Focus area: Accounting

Accounting isn't just about crunching numbers – it's strategizing, communicating and guiding corporate decisions. Accountants keep businesses ahead of the curve by solving problems, building sound financial strategies and ensuring good fiscal health. Pursuing courses from this focus area will help you learn how to approach, analyze and shape financial practices within an organization.

If you want to focus your studies in accounting, consider the following elective courses, which we expect to offer over the next two academic years:
