

## **Graduate Student Position Available (Fall 2023)**

Funding is available for a Master of Science (MSc) student in the Department of Earth Sciences at Memorial University of Newfoundland. The start date is September 2023. The MSc student will conduct laboratory-based research to study the fate and transport of contaminants (especially particulate contaminants such as micro-plastics and nano-plastics) in soil and groundwater. Some field work may be required. Candidates with a bachelor's degree in earth science, soil science, hydrology, environmental science & engineering, chemistry or other related fields are encouraged to apply.

For consideration, please email of your CV and transcripts to Dr. Tao Cheng (tcheng@mun.ca). A personal statement describing your background and suitability for this position is welcome. Please combine all your files and send as a single PDF document. **I will not reply to all applicants but will contact you if you are selected for further consideration.**

Memorial University is located in St. John's, Newfoundland in eastern Canada, with a student population of ~18,000. It has one of the largest and most diverse earth science departments in Canada. More information about the university and the department can be found at <http://www.mun.ca> and <http://www.mun.ca/earthsciences>
