

# Speaking of Engineering...

## Have you ever wondered...

Ruud Zoon

### What Husky Energy has in store for the East Coast?

Ruud Zoon, M.Sc.

Husky Energy is one of the largest acreage holders offshore Newfoundland with Terra Nova currently in production, White Rose under development and more than one million acres of exploration lands. First oil is expected from White Rose in the next year and the benefits for Newfoundland and Labrador are expected to be tremendous. Join Mr. Ruud Zoon, general manager, East Coast Development, as he talks about how important the East Coast is to Husky Energy and what the plan is for the future of our offshore oil and gas beyond White Rose.

Ruud Zoon has 25 years of experience in the offshore oil and gas industry. Mr. Zoon worked for Mobil Oil Corporation in the Netherlands, the UK and the US, and was technical, operations and asset manager for the Beryl Area, Mobil's largest producing asset in the North Sea. He joined the Dutch FPSO company Bluewater and was vice president Floating Production, responsible for Bluewater's FPSO activities in the North Sea, South Africa and China. Mr. Zoon joined Husky Energy in 2004 as general manager East Coast Development.
