APPENDIX A – SPECIFICATIONS & SCOPE

Memorial University of Newfoundland

Memorial University College was founded in 1925 as a living memorial to those who fought in World War I. It began with an initial enrollment of 55 students and a full-time teaching staff of six. In 1949, one of the first legislative acts of the newly formed provincial government was to give the college full university status. Memorial University of Newfoundland (hereafter referred to as “Memorial”) moved to a new campus on Elizabeth Avenue in 1961 and a period of rapid expansion followed. Sir Wilfred Grenfell College was established in 1975 to meet the demand for university education on the west coast of the province and in 1995, the Marine Institute merged with Memorial, bringing the total number of campuses in the province to three. Together these three campuses, along with the campus in Harlow, England, have educated and served the people of Newfoundland and Labrador. A full description of the university, our objectives, mission, strategies and values can be found at www.mun.ca.

The standard to which Memorial has always aspired was set out by the province’s first premier, Joseph R. Smallwood, who declared that memorial should be the most distinguished institution for its size in the world. Memorial has pursued this goal vigorously and with a good measure of success. The university is now the largest in the Atlantic provinces and this growth has been achieved in large measure by educating the people of the province of Newfoundland and Labrador and increasingly, a large body of international students.

Program offerings in undergraduate and graduate disciplines have grown along with our research agenda and memorial has earned a place among the best comprehensive universities in the country. Externally funded research now exceeds \$90 million annually. Memorial has also been a major contributor to the social, cultural and economic development of the province.

Intent and Overview

Memorial University of Newfoundland is seeking proposals for mobile communication technology services, herein collectively called “mobility services”. The solution is expected to address memorial’s needs by providing voice, text, data, administrative, and support services for its mobile devices and mobile device users. Memorial university currently owns all its mobile devices, as it operates under a non-subsidized model. Under a new contract, memorial is committed to retaining this model and is seeking proposals based on non-subsidized hardware models only. If the hardware currently in use is not compatible with the proponent’s solution, a

transition plan, clearly indicating any charges, costs, or fees, is required.

In 2023, memorial:

- Consumed over 2.5 million minutes of Canadian voice service
- Consumed nearly 21,000 minutes of non-Canadian voice services
- Consumed approximately 19 TB of data
- Consumed approximately 88 GB of roaming data
- Sent and received over 2 million text messages

We currently have approximately 860 devices in the field, over 650 of which require full voice, text/sms, and data services. These devices are made up primarily of iPhone and android devices. See approximate counts below.

- 476 iPhone
- 123 Android
- 70 other smartphone devices
- 64 non-smartphone devices
- 1 smartwatch
- 9 tablets
- 80 Blackberry (Blackberry OS)
- 12 turbo stick/hub
- 25 avl (vehicle tracking systems)
- 1 paging device

Consideration will be given to proven industry leading solutions and proponents that have proven experience to assist memorial with the implementation and support of the mobility services. Consideration will also be given to proponents who have deployed solutions for other higher education institutions.

Memorial expects that all proponents will provide detailed specifications for their proposal, clearly identifying service details, as well as any costing associated with the proposed solution.
