3-4pm SN2025

Behind the Research I

Navigating Methods and Approaches in Geography

Join us for our first collaborative exploration of diverse methodologies being used across the department. Faculty and students will discuss the tools, techniques, and challenges they encounter in their current projects, offering a candid look at how research methods shape outcomes!

Invited speakers

Dr. Yolande Pottie-Sherman

**Access to Information and Freedom of Information as
Research Strategies**

Dr. Ben Misiuk

**What we can learn from the deep: global analysis of
marine imagery using deep learning methods**

Shima Bahramnejad

Evaluating different CMIP6 model outputs
