

PSYCHOLOGY

Why study psychology at Grenfell?

Psychology seeks to understand how we think, act, and feel. By exploring mental functions and actions, we can understand individual and group behaviour. Grenfell's psychology program offers students a wide variety of topics and will provide you with skills and knowledge that will have relevance throughout your life including critical thinking, problem solving abilities, analytic abilities, writing skills and presentation skills.

Degree Options

Bachelor of Arts with Major in Psychology

Bachelor of Science with Major in Psychology

<https://www.mun.ca/university-calendar/grenfell-campus/grenfell-campus/7/3/#7.3.8>

Honours in Psychology

<https://www.mun.ca/university-calendar/grenfell-campus/grenfell-campus/8/12/>

The School of Arts and Social Sciences also offers a minor program in psychology.

Program Advisors

Students in the psychology program are assigned a staff/faculty member as an advisor to assist with registering for courses and ensuring program requirements are met. If you have not been assigned an advisor from the psychology program, please contact the current program chair to be assigned an advisor. It is recommended that students meet with their advisor before registering for courses each semester.

Scholarships & Awards

The Tom Daniels Application Assistance Prize, The Duncan A. Ferguson Prize in Psychology, The Alan and Patricia Wright Psychology Conference Travel Bursary, University Medal for Academic Excellence in Psychology, and Dr. Daniel J. Stewart Prize in Psychology

Psychology Society

The Psychology Society is a student-run organization. Fundraising activities allow the society to host socials with psychology professors, organize graduation festivities, plan psychology-related events and donate funds for non-profit organizations.

The Psychology Society meets in the Dem Room. It's a great way to meet other students, interact with professors, and get involved in campus life. The Dem Room (AS 348) is a meeting place for all psychology students. Feel free to use this space to work on your courses, use the computers and other psychology

resources, socialize/de-stress with other psychology students and stay informed by reading relevant notices posted on dem room boards.

Student Research

Near the end of your studies, you will have the opportunity to present your research to your peers, family, and the community at the Nick Novakowski Senior Project Conference. This is a celebration of the work of our senior students and an impressive showcase of their skills in the research domain, further demonstrating the dynamic and comprehensive characteristics of psychology.
