School of Science and the Environment Grenfell Campus, Memorial University

Per Course Appointment

The School of Science and the Environment (Grenfell Campus) invites applications from individuals interested in teaching the following graduate course, as listed below, required for the Winter 2026 semester.

Subject to budgetary restrictions and sufficient enrolments, appointments will be made on a course-by-course basis and will not entail any obligation to conduct research or to perform any administrative service for Memorial University. Appointments will be made in accordance with the provisions in the MUN-LUMUN Collective Agreement. Course design and evaluation methods for all courses will be in accordance with the School of Science and the Environment's regulations and the Memorial University Calendar.

Course Title: ENVP 6001 (Applied Environmental Problem Solving: A Case-Based Approach)

Course Schedule: To be determined

Campus Location: Grenfell Campus, Corner Brook, NL

Course Description: ENVP 6001 (Applied Environmental Problem Solving: A Case-Based Approach – Winter) provides students with an opportunity to apply concepts and ideas to a current practical environmental problem facing decision makers.

Cases for study are presented by partner organizations, such as (but not limited to) government departments. Students then work together to define the issue, identify and elaborate information relevant to the problem, identify and elaborate the relevant legislative and regulatory frameworks, and propose courses of action to address the problem that consider environmental, social, economic, and political objectives. This is a hands-on course with students collecting and integrating data from various sources. Students present their final analyses to decision makers in a policy showcase. Case study topics vary from year to year depending on the needs and priorities of partners. These topics may include: climate change mitigation and adaptation, biodiversity, drinking water quality, sewage treatment, species at risk, wildlife management, energy use and related issues, environmental recreation and leisure conflicts, forest practices, land use, waste diversion and recycling, fisheries management, and mining exploration, extraction, and rehabilitation.

For further information regarding this course please visit <https://mun.ca/grenfellcampus/programs--schools/school-of-science-and-the-environment/>

Qualifications: Masters/PhD in related field, specializing in public policy and/or environment and sustainability/or combination of education and experience is considered, with Post-Secondary teaching experience in related areas.

To apply for this position:

Please submit a letter of application, curriculum vitae and the names of referees, electronically or in writing to:

Dr. Robert Bailey, Interim Dean
School of Science and the Environment
Grenfell Campus, Memorial University
