

*We acknowledge that the lands on which we gather, plant, harvest, and share knowledge and resources are the homelands of the Innu and Inuit of Labrador, and we recognize their ancestral and continued ties to these lands and waters.*

## COMMUNITY FARM-BASED RESEARCH AT THE PYE CENTRE

All research that takes place at and with the Pye Centre is considered community farm-based research. We consider community farm-based research to be any research activity on, or linked to, the farm that is place-based and community-focused, meaning it is designed with and for the benefit of peoples, lands, and waters of Labrador.

An important component of any community farm-based research project is sharing your research results with those who will benefit from the information. The purpose of this clear language report is to summarize the main contributions of your research project: *what* you found through your work, *who* will be able to use that information, and *how* they might use it.

Please send your completed report to [pyecentre@mun.ca](mailto:pyecentre@mun.ca). Final reports will be publicly accessible through the Pye Centre.

***Additionally, if you have any photos or videos related to your project that you would be willing to share with the Pye Centre for us to share on our website social media channels, please attach them in your email. Thank you!***

### PART I: ADMINISTRATIVE INFORMATION

**Full name of research lead:**

**Institution/organization:**

**Phone number:**

**Email:**

**Names and affiliations of any research team members:**

**Names and affiliations of all collaborators/partner organizations:**

**Start date of project:**

**End date of project:**

# COMMUNITY FARM-BASED RESEARCH AT THE PYE CENTRE

## CLEAR LANGUAGE RESEARCH REPORT

### **PART II: RESEARCH PROJECT OVERVIEW**

**Title of research project:**

**What is this research about? (max 300 words)**

*(Please include a brief description of your research questions, goals, and objectives)*

**How did you do this research? (max 300 words)**

*(Please explain how you answered your research questions, and describe the methods you used. If you worked with any research partners, please explain how they contributed to your project).*

## PART IV: ADDITIONAL KNOWLEDGE SHARING ACTIVITIES

**Have you published or presented anything related to your research project, and/or do you have plans to publish or present in the future?**

*(Please include the titles and/or links to any scholarly activities related to your project, including reports, journal articles, news articles, etc.)*

**What kinds of knowledge mobilization activities have you done and/or plan on doing to share the results of your research?**

*(Please include the titles and/or links to any public data sources, public talks, community events, informational videos, blog posts, social media posts, etc.)*

**Is your dataset available publicly or by request? If so, where, or through what contact information?**
