Perched on Canada's North Atlantic coast, Memorial University of Newfoundland is a destination for discovery. A beacon for the 21st-century explorer, Newfoundland and Labrador's university is a unique learning community founded as a living memorial to those who lost their lives in the First World War — "that in freedom of learning their cause and sacrifice might not be forgotten." Today more than 18,000 students from over 110 countries come together to discover. From the classics to advanced technology, the University offers certificate, diploma, undergraduate, graduate and postgraduate programs across five campuses, numerous locations and online. A global network of almost 95,000 accomplished alumni throughout the world strengthens Memorial University of Newfoundland's capacity and reputation for leadership in world-class research, teaching and public engagement.

The 2022-2023 University Calendar and the printable Calendar PDF files are on-line at www.mun.ca/regoff/calendar.

IN MEMORIAM

Three hundred and ten former students of the Memorial University College offered themselves for active service in the Second Great War, 19 39-1945. The University holds in special honour the past students who have been reported dead or missing and whose names are here given.

TABLE OF CONTENTS

GENERAL INFORMATION

SECTION CONTENTS

1 Note

The contents of this calendar set forth the intentions of the University at the time of publication, with respect to the matters contained therein. THE UNIVERSITY EXPRESSLY RESERVES THE RIGHT TO DEVIATE FROM WHAT APPEARS IN THE CALENDAR WITHOUT NOTICE, including both the content and scheduling therein, in whole or in part, and including, without limiting the generality of the foregoing, the right to revise the content of, and to cancel, defer, reschedule or suspend, in whole or in part, the scheduling of particular periods of instruction, courses, or programs, and the academic program of the University, and to alter, accelerate or defer fees and charges, and to do any or all of the above either in order to serve what the University considers to be the best interests of the academic or student community or of the University itself, or because of any circumstance or occurrence, whether occurring by or through the wilful act or negligence of the University, its agents, servants and employees, or otherwise and whether or not beyond the reasonable or other control of the University, and without limiting the generality of the foregoing, as a result of circumstances or occurrences including financial resources, natural catastrophe or disaster, the health, safety and well-being of the employees or students of the University, labour disagreements or disputes, slow-downs, work-stoppages, and strikes. THE UNIVERSITY DOES NOT ACCEPT, AND HEREBY EXPRESSLY DISCLAIMS, ANY OR ALL RESPONSIBILITY OR LIABILITY to any person, persons or group, for any loss, injury, damages or adverse effect, either direct or indirect, consequential or otherwise, arising out of any one or more of such deviations. The University hereby disclaims liability to any person who may suffer loss as a result of reliance upon any information contained in this calendar.

The rights and obligations of parties subject to the Calendar and the rules and regulations of Memorial University of Newfoundland shall be governed by the laws of the Province of Newfoundland and Labrador. Any action or proceeding against Memorial University of Newfoundland shall be brought in the Province of Newfoundland and Labrador.

Each and every of the subsequent provisions contained in this Calendar, and the relationship, both legal and otherwise, between the University, and its students, is expressly subject to and governed by the above provisions.

The Office of the Registrar will assist students with any questions or problems which might arise concerning the interpretation of academic regulations. It is, however, the responsibility of students to see that their academic programs meet the University's regulations in all respects.

2 The Memorial University of Newfoundland Code

All members of the Memorial University of Newfoundland Community, which includes students, faculty, and staff, shall treat others with respect and fairness, be responsible and honest, and uphold the highest standards of academic integrity.

3 Student Code of Conduct

Memorial University of Newfoundland expects that students will conduct themselves in compliance with University Regulations and Policies, Departmental Policies, and Federal, Provincial and Municipal laws, as well as codes of ethics that govern students who are members of regulated professions. The *Student Code of Conduct* outlines the behaviors which the University considers to be non-academic misconduct offences, and the range of remedies and/or penalties which may be imposed. Academic misconduct is outlined in ***UNIVERSITY REGULATIONS* - Academic Misconduct** in the University Calendar.

For more information about the *Student Code of Conduct*, see www.mun.ca/student.

4 Glossary of Terms Used in This Calendar

In this calendar “Grenfell Campus” or “Grenfell " refers to Grenfell Campus, Memorial University of Newfoundland, "Labrador Campus" refers to Labrador Campus of Memorial University, and “Marine Institute” refers to the Fisheries and Marine Institute of Memorial University of Newfoundland. “University”, when capitalized, refers to Memorial University of Newfoundland.

Academic standing:
is an enrolment status normally determined each semester by a regular evaluation procedure used to assess whether or not students are meeting the standards prescribed for continuing in the University and/or their programs.

Academic unit:
refers to a centre, department, division, faculty, program or school, other than an administrative unit, as the context requires.

Academic year:
runs from September 1 to August 31.

Accelerated course:
is a course that is offered in a shorter time frame than a semester or session.

Administrative unit:
refers to an office, division or centre, other than an academic unit, as listed in the **Offices of the University** section of the Calendar.

Appeal:
is the challenge of, or the request for review of, a judgment regarding the application of regulations.

Assignment:
is an evaluative exercise including but not limited to assigned work, term papers and projects.

Certificate:
is an academic designation awarded for the completion of a specified program of study which is of shorter duration than a degree or diploma.

Challenge for credit:
is the request for consideration of academic credit resulting from experience or knowledge gained elsewhere for which transfer credit cannot be awarded.

Convocation:
is a large formal gathering where a graduation often takes place.

Co-requisite course:
is a course which may be taken concurrently with or successfully completed prior to the course for which it is required.

Course:
is a unit of work in a particular subject normally extending through one semester or session, the successful completion of which normally carries credit toward the fulfilment of the requirements of certain degrees, diplomas or certificates.

Course number:
courses are designated by four characters. The first character signifies the level of the course. Where all four characters are numeric, the last three are used by academic units to indicate various information such as course sequence and area of study. Where the last character is alphabetic, the letter:

A or **B** identifies a linked course. No credits or points are given until the "B" part is successfully completed.
C identifies an English course that does not carry credit towards a degree, diploma or certificate.
F identifies a foundation course that is intended to remedy a specific academic weakness and does not carry credit towards a degree, diploma or certificate.
L identifies a period of university-level learning involving residency outside of Canada, normally through the Faculty of Humanities and Social Sciences.
T identifies an undergraduate teaching internship offered by the Faculty of Education.
W identifies a course in either a work term in a co-operative program or a special project in certain of the professional schools and faculties and may or may not be assigned credit hours.
X identifies a course which represents an entire semester's work and carries at least 15 credit hours.

Courses offered outside of the normal time frame:
are those with different start and/or end dates than those of the semester or session.

Credit hour:
is the measure used to reflect the relative weight of a given course toward the fulfilment of appropriate degree, diploma, certificate, major, minor, or other program requirements. A weight of 1 credit hour normally means that the course meets for lectures one hour per week for the duration of a semester or two hours per week for the duration of a session. Unless otherwise indicated, a course normally has a credit value of 3 credit hours.

Credit-restricted courses:
are courses which are closely related but not equivalent. Credit is limited to one of the credit-restricted courses. Normally, credit-restricted courses cannot be substituted, one for the other, to satisfy program requirements.

Cross-listed courses:
are courses which are listed under two or more academic units and which can be taken for credit from one unit only. Cross-listed courses can be substituted, one for the other, to satisfy program requirements.

Degree:
is an academic designation awarded for the completion of a specified program of study which is of longer duration than a diploma or certificate.

Diploma:
is an academic designation awarded for the completion of a specified program of study which is of shorter duration than a degree and longer duration than a certificate.

Equivalent courses:
are those which are determined to be equal for credit determination, although the subject area or course number will differ. These are normally identified with the phrase "Same as".

Examination:
is an evaluative exercise including but not limited to tests, quizzes or mid-terms, final or supplementary examinations.

Foundation course:
is a course intended to remedy a specific academic weakness and is identified by the letter "F" as the last character of the course number. A foundation course does not carry credit towards a degree, diploma or certificate.

GPA:
is the abbreviation for grade point average.

Graduand:
is someone who is eligible to graduate.

Graduate:
is someone whose academic degree, diploma, or certificate has been awarded.

Graduation:
is the awarding of an academic degree, diploma, or certificate. No formal in-person ceremony is necessary although this often occurs at a convocation.

Head of academic unit:
includes but is not limited to co-ordinator, dean, department head, division head, associate vice-president academic, vice-president, or equivalent.

In-absentia graduation:
is the awarding of a degree, diploma, or certificate without a formal in-person ceremony.

In-class work:
is any part of the evaluation in a course which is to be completed by the student in a supervised setting, at a time and location designated by the University.

Inactive courses:
are courses which have not been offered in the previous three academic years and which are not scheduled to be offered in the current academic year.

Last week of the lecturing period in a semester or session:
consists of the final five days of lectures, including statutory holidays on days when lectures would otherwise be held, in a semester or session.

Lecturing period:
is a designated period of lectures within a semester or session as defined by the University Diary.

Linked course:
is a course comprising two components and is normally identified by the letter "A" or "B" as the last character of the course number. No credits or points are given until the "B" part is successfully completed.

Major:
is a subject or field of study which a student normally specializes in during the course of degree studies.

Minor:
is a subject or field of study which a student normally pursues secondary to a major during the course of degree studies.

Online course
is a for credit university course delivered entirely over the Internet. Examinations may be written at exam sites or online. Students access course materials and participate in course activities through Memorial University of Newfoundland's learning management system.

Parchment:
is the paper on which a student's academic credential is detailed after it has been awarded.

Prerequisite course:
is a course which must be successfully completed prior to commencing the course for which it is required.

Program:
is a series of courses, the successful completion of which, if all requirements are met, qualifies the candidate for a degree, diploma or certificate.

Registration:
is the process of selecting, enrolling in, and being assessed fees for courses.

Registration period:
is, in any semester, the period extending from the first day of registration to two weeks following the first day of lectures, as stated in the University Diary. In any session, it is the period extending from the first day of registration to one week following the first day of lectures, as stated in the University Diary.

Repeatable course:
is a course that may be taken for credit in several semesters to a maximum number of credit hours. All such courses shall have specified both the number of credit hours assigned per semester and the maximum number of credit hours to be awarded.

Semester:
is a period of approximately fourteen consecutive weeks during which there are at least twelve weeks of lecture. Normally the Fall semester commences in early September, the Winter semester in early January, and the Spring semester in early May.

Session:
is a period of approximately seven consecutive weeks in the Spring semester during which there are at least six weeks of lecture. The first half of Spring semester is designated as Intersession; the second half of Spring semester is designated as Summer session.

Student Self-Service:
is a suite of e-business student services including registration and the provision of personalized student information.

Take-home work:
is any part of the evaluation in a course which is to be completed by the student without supervision or a designated location, normally subject to a due date determined by the University.

Teaching and Learning:
Asynchronous Learning is learning outside a scheduled time and place by accessing course content, activities, materials and assignments provided by an instructor through an online platform. Methods of asynchronous learning include, but not limited to, recorded presentations, self-directed projects, posted lecture notes and facilitated discussions within a learning management system.
Learning Management System is a software application used in the development and delivery of academic courses. The system includes tools for the delivery of course content, instructor-student communications, and assessments.
Proctored Assessments are completed under the supervision of an invigilator. These assessments may occur in-person, remotely with an invigilator, or with the assistance of technology but is always supervised.
Remote Learning is learning that is facilitated in times of face-to-face class interruptions (e.g., a scheduled absence, a snow day or an emergency situation) through an Instructor's preferred technology, often with asynchronous activities complemented by synchronous activities, selected to best meet course outcomes under the circumstances.
Synchronous Learning requires students to interact with instructors in real-time through online platforms and web conferencing to engage in and learn about course content, activities, materials and assignments.

Transcript:
is the complete and unabridged report of a student's academic record.

Transfer credit:
is academic credit granted for work completed at an institution other than Memorial University of Newfoundland.

Waiver:
is the permission granted by the appropriate authority for exemption from a particular program requirement and/or a particular university regulation.

5 University Diary for the Academic Year 2022-2023

June 1, 2022, Wednesday	Registration begins for Residents
July 12, 2022, Tuesday	Registration begins for eligible students registering in undergraduate courses, Fall semester 2022
August 1, 2022, Monday	Deadline for registration and fee payment for Residents Registration begins for graduate students, Fall semester 2022
September 5, 2022, Monday	Labour Day, no lectures
September 6, 2022, Tuesday	Deadline for fees payment Fall semester Lectures begin, Fall semester
September 13, 2022, Tuesday	Final date for receipt, by the Registrar, of replacement grades for "INCOMPLETE" grades in undergraduate and graduate courses, Spring semester (Intersession, Summer session and 14-week) 2022

September 20, 2022, Tuesday	End of Regular Registration Period and last day for undergraduate and graduate students to add courses, Fall semester Last day for Medical students to withdraw from a Phase and receive 100% refund of tuition fees, Payment 1 Last day for undergraduate students to drop courses and receive a 100% refund of tuition fees, Fall semester
September 27, 2022, Tuesday	Final date for departments to submit Recommendation for Award of Degree in order for graduate students to be deregistered from Graduate Registration 9000/Medicine 9900 without incurring any liability for continuance fees, Fall semester Final date for graduate students to request a leave of absence from programs without incurring liability for tuition fees, Fall semester Final date for graduate students to withdraw from programs without incurring liability for tuition fees, Fall semester Final date for new graduate students to request a deferral of admission without incurring liability for tuition fees, Fall semester Last day for Medical students to withdraw from a Phase and receive 50% refund of tuition fees, Payment 1 Last day for undergraduate students to drop courses and receive a 50% refund of tuition fees, Fall semester
September 30, 2022, Friday	National Day for Truth and Reconciliation, no lectures
October 4, 2022, Tuesday	Last day for Medical students to withdraw from a Phase and receive 25% refund of tuition fees, Payment 1. No tuition fees are refunded for withdrawing from a Phase after this date. Last day for undergraduate students to drop courses and receive a 25% refund of tuition fees, Fall semester. No tuition fees are refunded for courses dropped after this date.
October 10, 2022, Monday	Fall semester break begins at St. John's and Grenfell Campuses Thanksgiving Day, no lectures
October 12, 2022, Wednesday	Lectures resume at St. John's and Grenfell Campuses. Lectures will follow the Monday schedule on this day only.
October 25, 2022, Tuesday	Final date for departments to submit Recommendation for Award of Degree in order for graduate students to receive a 50% refund of continuance fees, Fall semester
November 1, 2022, Tuesday	Last day for undergraduate students and graduate students to drop courses without academic prejudice, Fall semester
November 7, 2022, Monday	Registration begins for eligible students registering in undergraduate courses, Winter semester 2023
November 10, 2022, Thursday	Lectures will follow the Friday schedule
November 11, 2022, Friday	Remembrance Day holiday, no lectures
November 22, 2022, Tuesday	Final date for Departments to submit Recommendation for Award of Degree in order for graduate students to receive a 25% refund of continuance fees, Fall semester
November 28, 2022, Monday	Registration begins for graduate students, Winter semester 2023
December 2, 2022, Friday	Lectures end, Fall semester
December 7, 2022, Wednesday	Examinations begin, Fall semester
December 16, 2022, Friday	Examinations end, Fall semester
January 5, 2023, Thursday	Deadline for fees payment, including for undergraduate Medical students, Winter semester Lectures begin, Winter semester
January 12, 2023, Thursday	Final date for receipt, by the Registrar, of replacement grades for "INCOMPLETE" grades in undergraduate and graduate courses, Fall semester 2022 Final date for submission of Master's and Doctoral Theses and Reports for examination, by students who expect to receive their degree at the Spring Convocation 2032. Theses and Reports received after this date will be processed as time and resources permit.
January 19, 2023, Thursday	End of Regular Registration Period and last day for undergraduate and graduate students to add courses, Winter semester Last day for Medical students to withdraw from a Phase and receive 100% refund of tuition fees, Payment 2 Last day for undergraduate students to drop courses and receive a 100% refund of tuition fees, Winter semester
January 26, 2023, Thursday	Final date for departments to submit Recommendation for Award of Degree in order for graduate students to be deregistered from Graduate Registration 9000/Medicine 9900 without incurring any liability for continuance fees, Winter semester Final date for graduate students to request a leave of absence from programs without incurring liability for tuition fees, Winter semester Final date for graduate students to withdraw from programs without incurring liability for tuition fees, Winter semester Final date for new graduate students to request a deferral of admission without incurring liability for tuition fees, Winter semester Last day for Medical students to withdraw from a Phase and receive 50% refund of tuition fees, Payment 2 Last day for undergraduate students to drop courses and receive a 50% refund of tuition fees, Winter semester

February 2, 2023, Thursday	Last day for Medical students to withdraw from a Phase and receive 25% refund of tuition fees, Payment 2. No tuition fees are refunded for withdrawing from a Phase after this date. Last day for undergraduate students to drop courses and receive a 25% refund of tuition fees, Winter semester. No tuition fees are refunded for courses dropped after this date.
February 20 to February 24, 2023 Monday to Friday	Winter semester break begins at St. John's and Grenfell Campuses
February 23, 2023, Thursday	Final date for departments to submit Recommendation for Award of Degree in order for graduate students to receive a 50% refund of continuance fees, Winter semester
February 27, 2023, Monday	Lectures resume at St. John's and Grenfell Campuses
March 2, 2023, Thursday	Last date for undergraduate and graduate students to drop courses without academic prejudice, Winter semester
March 23, 2023, Thursday	Final date for Departments to submit Recommendation for Award of Degree in order for graduate students to receive a 25% refund of continuance fees, Winter semester
March 27, 2023, Monday	Registration begins for eligible students registering in undergraduate courses, Spring semester (14-week courses, Intersession and Summer session) 2023
April 6, 2023, Thursday	Lectures end, Winter semester
April 12, 2023, Wednesday	Examinations begin, Winter semester
April 17, 2023, Monday	Registration begins for graduate students, Spring semester (14-week courses, Intersession and Summer session) 2023
April 21, 2023, Friday	Examinations end, Winter semester
May 8, 2023, Monday	Deadline for fees payment, Spring semester (14-week courses, Intersession and Summer session) Lectures begin, Intersession and 14-week Spring semester
May 15, 2023, Monday	End of Regular Registration Period and last day for undergraduate and graduate students to add courses, Intersession Final date for receipt, by the Registrar, of replacement grades for "INCOMPLETE" grades in undergraduate and graduate courses, Winter semester 2023 Last day for undergraduate students to drop courses and receive a 100% refund of tuition fees, Intersession
May 18, 2023, Thursday	Last day for undergraduate students to drop courses and receive a 50% refund of tuition fees, Intersession
May 22, 2023, Monday	End of Regular Registration Period and last day for undergraduate and graduate students to add courses, 14-week Spring semester Last day for undergraduate students to drop courses and receive a 100% refund of tuition fees, 14-week Spring semester Last day for undergraduate students to drop courses and receive a 25% refund of tuition fees, Intersession. No tuition fees will be refunded for Intersession courses dropped after this date.
May 29, 2023, Monday	Final date for departments to submit Recommendation for Award of Degree in order for graduate students to be deregistered from Graduate Registration 9000/Medicine 9900 without incurring any liability for continuance fees, Spring semester Final date for graduate students to request a leave of absence from programs without incurring liability for tuition fees, 14-week Spring semester Final date for graduate students to withdraw from programs without incurring any liability for tuition fees, 14-week Spring semester Final date for new graduate students to request a deferral of admission without incurring liability of tuition fees, 14-week Spring semester Last day for undergraduate students to drop courses and receive a 50% refund of tuition fees, 14-week Spring semester
June 5, 2023, Monday	Last date for undergraduate and graduate students to drop courses without academic prejudice, Intersession Last day for undergraduate students to drop courses and receive a 25% refund of tuition fees, 14-week Spring semester. No tuition fees will be refunded for 14-week Spring semester courses dropped after this date.
June 16, 2023, Friday	Final date for submission of Master's and Doctoral Theses and Reports for examination, by students who expect to receive their degree at the Fall Convocation 2022. Theses and Reports received after this date will be processed as time and resources permit. Lectures end, Intersession
June 19, 2023, Monday	Examinations begin, Intersession Semester Break begins, 14-week Spring semester
June 21, 2023, Wednesday	Examination end, Intersession
June 22, 2023, Thursday	Lectures resume, 14-week Spring semester
June 26, 2023, Monday	Final date for departments to submit Recommendation for Award of Degree in order for graduate students to receive a 50% refund of continuance fees, Spring semester Lectures begin for Summer session

July 3, 2023, Monday	Memorial Day holiday, no lectures End of Regular Registration Period and last day for undergraduate and graduate students to add courses, Summer session Last date for undergraduate and graduate students to drop courses without academic prejudice, 14-week Spring semester Last day for undergraduate students to drop courses and receive a 100% refund of tuition fees, Summer session
July 6, 2023, Thursday	Last day for undergraduate students to drop courses and receive a 50% refund of tuition fees, Summer session
July 7, 2023, Friday	Lectures will follow the Monday schedule on this day only
July 10, 2023, Monday	Last day for undergraduate students to drop courses and receive a 25% refund of tuition fees, Summer session. No tuition fees will be refunded for Summer session courses dropped after this date.
July 24, 2023, Monday	Final date for Departments to submit Recommendation for Award of Degree in order for graduate students to receive a 25% refund of continuance fees, Spring semester Last date for undergraduate and graduate students to drop courses without academic prejudice, Summer session
August 4, 2023, Friday	Lectures end, 14-week Spring semester
August 5, 2023, Saturday	Lectures end, Summer session. Lectures will follow the Monday schedule on this day only.
August 7, 2023, Monday	Examinations begin, 14-week Spring semester and Summer session
August 9, 2023, Wednesday	Examinations end, Summer session
August 12, 2023, Saturday	Examinations end, 14-week Spring semester

6 Governing Bodies

6.1 The Board of Regents

www.mun.ca/regents

Chair of the Board
Iris Petten, St. John's

An up-to-date listing of members of the Board of Regents is available at www.mun.ca/regents/about/regents.

6.2 The Senate

www.mun.ca/senate

President and Chair
Dr. Vianne Timmons

An up-to-date listing of members of the Senate is available at www.mun.ca/senate.

6.3 University Officers

Visitor
Hon. J.M. Foote, PC, ONL, B.A., B.Ed., Hons. Dip. RTJA, Lieutenant-Governor of Newfoundland and Labrador

Chancellor
to be determined

Chair of the Board of Regents
I. Petten, B.A., B.Voc.Ed. *Memorial*

President and Vice-Chancellor
V. Timmons, B.A. *Mount Allison*, B.Ed. *Acadia*, M.Ed. *Gonzaga University*, Ph.D.*Calgary*

Interim Provost/Vice-President (Academic)/Pro Vice-Chancellor and Dean of Medicine
M. Steele, H.B.Sc., M.D. *Western*, M.Ed. *Toronto*

Vice-President (Marine Institute)
G. Blackwood, B.Sc.(Hons.), M.A. *Memorial*

Vice-President (Administration and Finance)
R. Philpott, B.Comm. *Memorial*, M.B.A. *Dalhousie*, C.P.A.

Vice-President (Indigenous)
C. Andersen, B.A., M.A., M.B.A. *Memorial*

Vice-President (Research)
N. Bose, B.Sc., Ph.D. *Glasgow*

Vice-President Pro Tempore (Grenfell Campus)
I. Sutherland, B.Mus.(Hons.), M. Mus. *Memorial*, Ph.D. *University of Exeter, U.K.*

7 General Information

Memorial University of Newfoundland is the only university in Newfoundland and Labrador and one of the largest universities in Atlantic Canada. With campuses in St. John's, Corner Brook and Harlow, England, each year, it welcomes more than 19,000 students from over 115 countries.

7.1 The Beginning

Memorial University College was established as a memorial to the Newfoundlanders who had lost their lives during the First World War. It opened its doors to a student body of 55 and five faculty members on September 15, 1925. The College offered the first two years of university training in the arts and sciences in a building located on Parade Street in St. John's.

7.2 University Status

Soon after the province joined Confederation in 1949, a legislative bill was passed elevating the college to university status with degree-granting powers. The first convocation was held in June 1950 when five students received degrees. The University now has more than over 100,000 alumni.

7.3 A Period of Expansion

With university status, Memorial University of Newfoundland entered a period of rapid growth. By the time the University moved to its new multi-building campus on Elizabeth Avenue in 1961, student enrolment had reached almost 2,000.

During this time there were equally dramatic changes in the variety and extent of available academic programs. In the early years of the university, there were two faculties (Arts and Science, and Education); when the University moved to its new campus, areas of instruction, course offerings and degrees awarded had all increased.

In 1966 the Board of Regents approved the establishment of a small residential campus in Harlow, England. The first Memorial University of Newfoundland students went to Harlow in 1969 for Education and Engineering one-semester internships in Harlow schools and factories.

In 1975 Memorial University of Newfoundland established a regional campus in Corner Brook. The campus was named Sir Wilfred Grenfell College in 1979, honouring the memory of the medical missionary who pioneered medicine in Northern Newfoundland and along the coast of Labrador. In 2010 the campus in Corner Brook was renamed Grenfell Campus, Memorial University of Newfoundland.

In 1992 the Marine Institute joined the University, becoming the Fisheries and Marine Institute of Memorial University of Newfoundland. Founded in 1964, the Marine Institute offers a range of certificate, diploma, undergraduate and graduate degree programs in the ocean and marine sectors and is involved in research and technology transfer.

In 2013, the University acquired the former Battery Hotel property in downtown St. John's and redeveloped it into the Signal Hill Campus. The campus was established primarily as a public engagement facility to further connect the university with the community. The first residence rooms for graduate students opened there in September 2015 and, after significant reconstruction, the campus officially opened in the fall of 2018.

In the late 1970s, Memorial University of Newfoundland established the Labrador Institute of Northern Studies in Happy Valley-Goose Bay, which was renamed the Labrador Institute of Memorial University in 1997. In July 2020, the School of Arctic and Subarctic Studies was created there, Memorial University of Newfoundland's first academic unit in Labrador. In January 2022 the Labrador Institute officially acquired full academic campus status and was renamed Labrador Campus of Memorial University. Today the Campus is a leading centre of research, education, policy and outreach by and for the North.

7.4 The Campuses

Memorial University of Newfoundland, positioned on the edge of the North Atlantic, is one of the largest universities on Canada's East Coast and the only university in the Province of Newfoundland and Labrador. There are four campus locations in the Province and one abroad.

7.4.1 St. John's

www.mun.ca

Spanning approximately 220 acres, Memorial University of Newfoundland's largest Campus is home to extensive facilities that support a full range of academic programs in a modern, urban setting. Memorial University of Newfoundland offers access to the best in research, teaching and learning, and public engagement, providing world-class opportunities and contributing expertise and insight both locally and globally.

In addition to academic buildings, the Campus includes the Queen Elizabeth II Library, Bruneau Centre for Research and Innovation, Paton College and Macpherson College residence complexes, Burton's Pond Apartments, Campus Childcare Centre, and The Works recreation complex, comprising the Aquarena, Field House and other sports and recreation facilities.

The University (Smallwood) Centre, contains student services and student union operations, as well as recreation and dining facilities. Information regarding the Students' Union (MUNSU) may be obtained at www.munsu.ca.

The Campus also includes the Health Sciences Centre, and the National Research Council's Ocean, Coastal and River Engineering Research Centre, as well as the separately incorporated University entity C-CORE (Captain Robert A. Bartlett building).

Slightly further north is the Memorial University of Newfoundland Botanical Garden.

The Ocean Sciences Centre, located to the northeast in the town of Logy Bay-Middle Cove-Outer Cove, is one of Canada's largest marine research laboratories.

7.4.2 Fisheries and Marine Institute

www.mi.mun.ca

The Fisheries and Marine Institute, headquartered on Ridge Road in St. John's, is Canada's leading centre of education, training, applied research and technology transfer for the ocean industries. It offers undergraduate and graduate degrees, advanced diplomas, diplomas of technology, certificates in such fields as marine transportation, food and water quality, naval architecture, aquaculture, underwater vehicles, ocean mapping, marine environmental, marine studies, technology management and maritime management.

It has three primary units - the School of Fisheries, the School of Maritime Studies and the School of Ocean Technology.

The Holyrood Marine Base, 45 kilometres west of St. John's, is home to the Centre for Applied Ocean Technology. The Marine Institute also operates the Offshore Safety and Survival Training Centre in Foxtrap, and the Safety and Emergency Response Training Centre in Stephenville on the west coast.

7.4.3 Grenfell Campus

www.grenfell.mun.ca

Grenfell Campus stands on a 185-acre site in Corner Brook on the island's west coast. With a student population of about 1,300, Grenfell Campus offers a personalized education through a wide variety of interdisciplinary experiences. Students may choose from undergraduate degrees in arts, business administration, fine arts, education, nursing, science or resource management. Graduate programs are also offered.

Located on University Drive, Grenfell Campus comprises five academic buildings. The Arts and Science Building houses one of the largest astronomical telescopes in Atlantic Canada.

In addition to the original dormitory-style residence, student housing has been expanded to include eight chalet-style apartment buildings and a residence complex. About half the student population at Grenfell resides on campus.

7.4.4 Harlow Campus

www.mun.ca/harlow

Harlow Campus is the international Campus of Memorial University of Newfoundland, one of only two universities in Canada with Campus facilities in the United Kingdom. Professional schools and academic departments at Memorial University of Newfoundland use Harlow Campus in Essex to deliver ongoing and specialized one-time programming, internships and experiential learning. It provides technologically equipped meeting facilities and residence accommodations for up to 51 people.

Harlow Campus consists of a group of converted 19th century and older buildings. The main building is The Maltings (once used to dry grain), which now houses the administration offices and accommodations for residents.

7.4.5 Labrador Campus

www.mun.ca/labradorcampus

The Labrador Campus is Memorial University of Newfoundland's newest location. Based in Labrador, the Labrador Campus is a leading centre of research, education, policy, and community partnerships by and for the North. Home to the School of Arctic and Subarctic Studies and the Pye Centre for Northern Boreal Food Systems, the Labrador Campus provides place-based, Northern-focused, and Indigenous-led education and research opportunities in Labrador and across the North.

With main facilities located on Hamilton River Road in Happy Valley-Goose Bay, a research station in North West River, and a research, education, and community farm on Mud Lake Road, the Labrador Campus provides access to undergraduate, graduate, and post-graduate degrees, diplomas, and certificates, as well as research and community infrastructure, with a particular focus on Labrador and Northern issues, needs, and priorities.

7.4.6 Signal Hill Campus

www.mun.ca/signalhill
www.mun.ca/signalhill/engage

Memorial University of Newfoundland's Signal Hill Campus, officially opened its doors in September 2018. With a focus on public engagement and innovation, the initial tenants, programming and partnerships based at the University's iconic new location help address 21st century issues by connecting the expertise and ideas of the University's students, faculty, staff and retirees, and the people and organizations of Newfoundland and Labrador.

The tenants in the Campus' Emera Innovation Exchange facility include flagship publicly engaged units, along with the Memorial University of Newfoundland Pensioners' Association and the community organization Business and Arts NL. Also located at Signal Hill Campus are graduate student accommodations and a high-tech conference and meeting centre.

7.5 Vision, Mission, and Core Values of the University

The Vision, Mission, and Core Values of the University is available at www.mun.ca/president/planning.

7.6 Presidents of Memorial University College

1925 - 1933 John Lewis Paton
1933 - 1949 Dr. Albert G. Hatcher

7.7 Presidents of the University

1949 - 1952 Dr. Albert G. Hatcher
1952 - 1966 Dr. Raymond Gushue
1966 - 1967 M.O. Morgan *(pro tempore)*
1967 - 1973 The Rt. Hon. the Lord Taylor of Harlow
1973 - 1981 Dr. M.O. Morgan
1981 - 1990 Dr. Leslie Harris
1990 - 1999 Dr. Arthur W. May
1999 - 2007 Dr. Axel Meisen
2007 - 2009 Dr. H.E.A. (Eddy) Campbell (Acting)
2009 - 2010 Dr. C. Loomis *(pro tempore)*

2010 - 2020 Dr. G. Kachanoski
2020 - Present Dr. V. Timmons

7.8 Chancellors of the University

1952 - 1961 The Rt. Hon. Viscount Rothermere of Hemsted
1961 - 1968 The Rt. Hon. Lord Thomson of Fleet
1971 - 1979 Dr. G. Alain Frecker
1979 - 1988 Dr. Paul G. Desmarais
1994 - 2008 Hon. Dr. John C. Crosbie
2008 - 2012 Dr. Rick J. Hillier
2012 - 2022 Dr. Susan Dyer Knight

7.9 Chairs of the Board of Regents (Established May, 1950)

1950 - 1954 Hon. Sir Albert Walsh
1954 - 1968 Dr. Edmund J. Phelan
1968 - 1974 Hon. Dr. Gordon A. Winter
1974 - 1982 Hon. Dr. Frederick Russell
1982 - 1991 Dr. Charles White
1991 - 1997 Dr. Janet Gardiner
1997 - 2002 Dr. Edward Roberts
2002 - 2003 Chris Decker
2003 - 2004 Dr. Georgina Hedges *(pro tempore)*
2004 - 2006 Lorne Wheeler
2005 - 2007 Dr. Georgina Hedges *(pro tempore)*
2007 - 2008 Gilbert Dalton
2008 - 2012 Dr. Robert Simmonds
2012 - Present Iris Petten

7.10 University Constitution

The Constitution of the University is embodied in an *Act* of the House of Assembly of Newfoundland entitled *An Act Respecting the Memorial University of Newfoundland*, Chap. 231, Revised Statutes of Newfoundland (as amended). The *Act* delineates the authority and the functions of the University and its parts, as follows:

> There shall be a university which shall be called the Memorial University of Newfoundland, consisting of a Chancellor, Convocation, Board of Regents, Senate, Faculty Councils and the Faculties and which shall be a body politic and corporate. No other university having corporate powers capable of being exercised within Newfoundland shall be known by the same name, nor shall any other university have power to grant degrees.
>
> The University shall have full power and authority from time to time and at all times to establish and maintain such faculties, colleges, schools, institutions, departments, chairs and courses as to the Board of Regents may seem meet, and to give instructions and training; to grant degrees, including honorary degrees, diplomas and certificates of proficiency; to provide facilities for the prosecution of original research in every branch of knowledge and learning and to conduct and carry on such research work; and generally, to promote and carry on the work of a university in all its branches.

7.10.1 The Board of Regents

www.mun.ca/regents

The management, administration and control of the property, revenue, business and affairs of the University are vested in a Board of Regents, consisting of:

1. three ex-officio members
   a. the Chancellor of the University
   b. the President of the University
   c. the Vice-President of the University who is the Pro Vice-Chancellor;
2. six members elected by the Alumni Association of the University;
3. seventeen members appointed by the Lieutenant-Governor-in-Council; and
4. four members appointed by the Lieutenant-Governor-in-Council being full-time students of the University who
   a. meet the requirements set out in the regulations, and
   b. are recommended to the Lieutenant-Governor-in-Council by the board following the recommendation to the board of one candidate each from the following student unions:
      i. the Memorial University of Newfoundland Students' Union,
      ii. the Graduate Students' Union,
      iii. the Marine Institute Students' Union, and
      iv. the Grenfell Campus Students' Union.

7.10.2 The Senate

www.mun.ca/senate

Matters of an academic character are in general charge of the Senate of the University, consisting of the following:

1. The Chancellor of the University;
2. ex-officio members who shall be
   a. the President of the University, who shall be the chairman thereof,
   b. the Vice-President (Academic) of the University, who shall be the deputy chairman thereof,
   c. the Deputy Minister of Education or a representative of the Deputy Minister,
   d. the Vice-President of the Grenfell Campus,
   e. the Deans of the Faculties of the University,
   f. the Dean of Graduate Studies,
   g. the University Librarian,
   h. the University Registrar, and
   i. such other persons holding office within the University or in any of the campuses or institutions affiliated with the University chosen in such number and manner as may be approved by the Board;
3. such members from the academic staff of the Faculties and Professional Schools of the University, exclusive of any person who is a member by virtue of paragraph 2., elected in such number and manner as may be approved by the Board, but the number elected under this paragraph shall be not less than twice the number of members named or chosen under paragraph 2.; and
4. thirteen members from the students in attendance at the University, including at least one student from the Marine Institute, one graduate student and one student from Grenfell Campus with all members to be chosen in a manner approved by the Board.

7.10.3 Convocation

www.mun.ca/convocation

Convocation of the University, as provided in the *Act*, is composed of the Chancellor, the President, the Senate, the Board of Regents, all persons who are graduates of the Memorial University College, all persons holding academic appointments with the University whose names are added to the roll of the Convocation by the Registrar of the University from time to time upon instructions from the President, and all persons who have become graduates of the University. The functions of Convocation are chiefly elective, but it may also consider all questions affecting the well-being and prosperity of the University and make representations from time to time on such questions to the Senate, which shall consider the same and return to the Convocation its conclusions thereon.

7.10.4 Affiliation

The *Act* provides that, subject to the approval of the Lieutenant-Governor-in-Council, the University may affiliate with any college or institution established in the province for the promotion of Arts and Science, or for instruction in Law, Medicine, Nursing, Education, Engineering, Agriculture or in any other useful branch of learning, and to dissolve any such affiliation. The institution which has become affiliated with the University under this provision is Queen's College, St. John's.

7.11 Academic Dress

The academic dress for matriculated undergraduates of the University shall be similar to the Scholar's gown of the University of Oxford. It shall be worn whenever the President so directs.

The gowns of the Bachelors shall be of black stuff. The gowns of the Masters shall be of black stuff or silk. The gowns of the Doctors shall be of fine scarlet cloth or silk, or of black stuff or silk.

The pattern of the Bachelor's gown shall be similar to that of the Oxford Bachelor's gown. The pattern of the Master's gown and the Doctor's black gown shall be similar to that of the Oxford Master's gown, except that the Doctor's gown shall have an edging of black silk braid at the opening of the sleeve. The Doctor's scarlet gown shall be similar to that of the Oxford Doctor of Divinity's gown.

The hoods of the Bachelors shall be made of black stuff, the hoods of the Masters of black silk, and the hoods of the Doctors of scarlet silk. They shall be full in shape and lined with the University colours of claret and white. The hoods of the Bachelors shall be trimmed with white fur, the tippets with velvet in the colours distinctive of the Faculty or Degree. The hoods and tippets of the Masters shall be edged with velvet in the colours distinctive of the Faculty or Degree. The hoods and tippets of the Doctors shall be edged with silk in the colours distinctive of the Faculty or Degree; however, the hood of the Doctor of Philosophy shall be of claret silk, lined and edged with claret silk.

The University hood, worn by official representatives of Memorial University of Newfoundland participating in ceremonies, shall be made of black stuff, and lined and edged with claret and white silk.

The distinctive colours for the degrees shall be:

B.A., M.A., M.G.S. - White
B.B.A., B.Comm., B.Comm.(Co-op.), I.B.B.A., M.B.A., M.O.G.S., M.Sc.M. - Tan
B.Ed., B.Ed.(Elementary), B.Ed.(Intermediate/Secondary), B.Ed.(Native and Northern), B.Ed.(Primary), B.Ed.(Post-Secondary), B.Ed. (Primary/Elementary), B.Mus.Ed., B.Sp.Ed., B.Voc.Ed., M.Ed - Light Blue
B.Eng., M.Eng., M.E.M. - Orange
B.F.A.(Theatre), B.F.A.(Visual Arts) - Amethyst
B.Kin., B.Kin.(Co-op.), B.P.E., B.P.E.(Co-op.), B.Rec., B.Rec.(Co-op.), M.P.E., M.Sc.(Kinesiology) - Sage Green
B.M.S., B. Tech, M.M.M., M.M.S.(Fisheries Resource Management), M.T.M. - Navy Blue
B.Mus., M.Mus. - Pink
B.R.M. - Citron
B.Sc., M.A.S., M.A.Sc., M.A.S.P.(Co-op), M.Env.Sc., M.Sc., M.Sc.(B.E.A.Sc.), M.A.P.S.(Co-op), Psy.D. - Gold
B.Sc.N., M.Sc.N. - Coral
B.Sc.(Pharmacy), M.Sc.(Pharmacy), Pharm.D. - Clover
B.S.W., M.S.W. - Ruby Gem
M.D., M.P.H., M.Sc.(Medicine), M.H.E. - Green
M.A.Ed. (Education Francophone Literatures and Cultures), M.E.R. - Chocolate Brown
M.Phil., Ph.D. - Claret
M.W.S. - Purple

The caps of Bachelors and Masters shall be black and of the square shape, with black tassel. The caps of the Doctors shall be similar to the Oxford Doctor's bonnet.

The academic dress for the Officers of the University shall be as follows:

Chancellor - a silk gown heavily embroidered with gold braid

Vice-chancellor - a silk gown embroidered with gold braid

Pro vice-chancellor - a silk gown embroidered with gold braid

Registrar and other Officers of the University - gowns of a pattern approved by Senate

7.12 Queen's College (Affiliated Institution)

www.queenscollegenl.ca

Provost and Vice-Chancellor

Singleton, R., B.A. *Memorial*, M.Div. *King's*, *Western Ontario*, D.Min. *Graduate Theological Foundation*, *Indiana*, Ph.D. *Foundation House, Oxford*

An up-to-date personnel listing is available at www.queenscollegenl.ca/?page_id=1251.

7.12.1 Faculty of Theology

Queen's College, founded in 1841, is an Associate Member of The Association of Theological Schools in the United States and Canada and is affiliated with Memorial University of Newfoundland. It has a Faculty of Theology which offers courses in theology and in professional training for ministry. Under Legislative authority it confers the degrees of Master of Divinity, Master of Theological Studies, Master of Theology, and Bachelor of Theology and grants a Diploma in Theology and Ministry and an Associate in Theology.

Further information may be obtained by contacting the College in writing to The Registrar, Queen's College, St. John's, NL, A1B 3R6, or by telephone to (709) 753-0116, (877) 753-0116 (toll free), by fax to (709) 753-1214, by e-mail to queens@mun.ca or through the website at www.queenscollegenl.ca.

8 University Library

www.library.mun.ca/qeii/aboutus

University Librarian

Cleyle, S.E., B.A. *Mount Allison*, M.L.I.S. *Dalhousie*

8.1 The Memorial University of Newfoundland Code

The attention of all members of the University community is drawn to the section of the University Calendar titled **The Memorial University of Newfoundland Code**, which articulates the University's commitment to maintaining the highest standards of academic integrity.

8.2 Student Code of Conduct

Memorial University of Newfoundland expects that students will conduct themselves in compliance with University Regulations and Policies, Departmental Policies, and Federal, Provincial and Municipal laws, as well as codes of ethics that govern students who are members of regulated professions. The Student Code of Conduct outlines the behaviors which the University considers to be non-academic misconduct offences, and the range of remedies and/or penalties which may be imposed. Academic misconduct is outlined in ***UNIVERSITY REGULATIONS*** - **Academic Misconduct** in the University Calendar.

For more information about the Student Code of Conduct, see www.mun.ca/student.

8.3 University Libraries Description

www.library.mun.ca/mi
www.library.mun.ca/edu
www.library.mun.ca/grenfell
www.library.mun.ca/hsl
www.library.mun.ca/qeii/aboutus

With eight branches, Memorial University of Newfoundland Libraries is one of Atlantic Canada's largest university libraries. In addition to providing access to millions of physical book and digital access to e-books, journals, and other resources, the libraries house several specialized archives and collections, including the largest collection of published materials about Newfoundland and Labrador in the world in the Centre for Newfoundland Studies.

The Libraries encourage innovation and excellence in the University's teaching and learning, research, scholarship, creative activity, service and public engagement.

The Library offers a credit course which is described at the end of this section under **Course Descriptions** and designated by LIBR. The Library also offers a non-credit course which is described at the end of this section under **Course Descriptions** and designated by INTG.

8.4 Course Descriptions

8.4.1 Library Credit Course

Library credit courses are designated by LIBR.

2100 Making and Understanding in a Digital World teaches students to analyze resources from MUN Libraries critically. Students will learn about information and digital literacy through archival and library resources and issues in their use. Starting with a single resource, students will develop a narrative of relevant scholarship for a digital video. Students will formulate research projects, develop skills to produce digital projects, communicate a

AR = Attendance requirement; CH = Credit hours are 3 unless otherwise noted; CO = Co-requisite(s); CR = Credit can be retained for only one course from the set(s) consisting of the course being described and the course(s) listed; LC = Lecture hours per week are 3 unless otherwise noted; LH = Laboratory hours per week; OR = Other requirements of the course such as tutorials, practical sessions, or seminars; PR = Prerequisite(s); UL = Usage limitation(s).

narrative and demonstrate ability to use digital resources.

8.4.2 Library Non-Credit Course

Library non-credit courses are designated by INTG.

100A/B Academic Integrity is a non-credit course offered by the University Libraries, introduces students to the concept of academic integrity and the important role it plays at Memorial University of Newfoundland. Students complete online modules on a variety of topics including: understanding the meaning of academic integrity and its associated university regulations; how to complete university work with academic integrity; and how to avail of supports to ensure academic integrity. Normally, this course is completed by week 7 of a student's first semester. This course is mandatory for all undergraduate students new to Memorial University of Newfoundland. Registration in subsequent semesters is dependent upon successful completion of this course. This course is offered only online.
CH: 0

9 Centre for Innovation in Teaching and Learning (CITL)

www.citl.mun.ca

Associate Vice-President, Teaching and Learning, and Director
Watson, G., B.A.Sc. *Guelph*, M.E.S., Ph.D. *York*

The Centre for Innovation in Teaching and Learning (CITL) provides teaching and learning support to Memorial University of Newfoundland across all Campuses and online. CITL leads the delivery of online courses and programs, professional development for educators, and the use of educational media and technologies for teaching and learning. The Centre also partners with internal and external individuals and groups to meet education-related goals, facilitate research, and provide the wider community with access to University events and opportunities.

Through its activities CITL serves students and educators on all of the University's Campuses, and connects students across the Province, Country and around the world who have limited educational opportunities, or who seek flexibility in education delivery. The Centre also enhances, promotes and supports an e-learning vision throughout the Institution. CITL provides Faculties and Schools with the e-learning expertise and knowledge needed to provide an engaging and responsive learning environment for on campus and online courses. A Memorandum of Understanding with Newfoundland and Labrador English School District's Centre for Distance Learning and Innovation (CDLI), which delivers distance education to K-12 students, allows CITL to share knowledge and information and prepare the incoming university student for online learning.

UNIVERSITY REGULATIONS

SECTION CONTENTS

1 The Memorial University of Newfoundland Code

The attention of all members of the University community is drawn to the section of the University Calendar titled **The Memorial University of Newfoundland Code**, which articulates the University's commitment to maintaining the highest standards of academic integrity.

2 Student Code of Conduct

Memorial University of Newfoundland expects that students will conduct themselves in compliance with University Regulations and Policies, Departmental Policies, and Federal, Provincial and Municipal laws, as well as codes of ethics that govern students who are members of regulated professions. The *Student Code of Conduct* outlines the behaviors which the University considers to be non-academic misconduct offences, and the range of remedies and/or penalties which may be imposed. Academic misconduct is outlined in ***UNIVERSITY REGULATIONS* - Academic Misconduct** in the University Calendar.

For more information about the *Student Code of Conduct*, see www.mun.ca/student.

3 Fees and Charges

www.mun.ca/finance/fees/

Fees and charges are listed on the Financial and Administrative Services website and are accurate at the date of publishing. The University reserves the right to make changes to the regulations and fees and charges. Any questions concerning fees and charges for the Cashier's Office in St. John's should be directed in writing to the Cashier's Office, Memorial University of Newfoundland, Arts and Administration Building, A1023, St. John's, NL, A1C 5S7, or by e-mail at cashiers@mun.ca, or by telephone at (709) 864-8228, or through the website at www.mun.ca/finance. Any questions concerning fees and charges for the Bursar's Office in Corner Brook should be directed in writing to the Bursar's Office, Grenfell Campus, University Drive, Corner Brook, NL, A2H 6P9, or by telephone at (709) 637-6286, or through the website at www.grenfell.mun.ca/bursar.

The complete and up-to-date listing of fees and charges is available on the Financial and Administrative Services website at www.mun.ca/finance/fees/.

4 Admission/Readmission to the University (Undergraduate)

4.1 Admission/Readmission Information

This section applies to all undergraduate applicants except those applying to the Faculty of Medicine.

Applicants seeking admission to the Faculty of Medicine should refer to the **Faculty of Medicine** regulations for information.

The application for admission or readmission to the University is submitted online. The application for admission or readmission to the University is submitted online at www.mun.ca/undergrad/admissions/apply. Applicants who are new to Memorial University of Newfoundland should follow the application instructions at www.mun.ca/undergrad/apply.

Applicants seeking admission to a particular faculty or school may be required to submit additional documents beyond those required for general admission to the University. Applicants should refer to appropriate faculty or school regulations for procedures, deadlines, admission requirements and further information.

1. Applications for admission/readmission should be submitted by the following deadline dates: March 1 for Fall, October 1 for Winter, and February 1 for Spring (14-week, Intersession and Summer session). Applications received later than the stated deadline dates will be processed as time and resources permit.
2. Each application must be accompanied by the appropriate application processing fee. An additional application processing fee is required from non-Canadian applicants or applicants transferring from post-secondary institutions outside of Newfoundland and Labrador. Neither fee is refundable nor will it be credited to the applicant's financial account under any circumstances. Information regarding fees and charges can be found on the Financial and Administrative Services website at www.mun.ca/finance/fees/.
3. Applicants who have previously attended Memorial University of Newfoundland and have not registered for courses for the past three consecutive semesters (Fall, Winter, Spring) are required to submit a new Application for Admission/Readmission with the appropriate application processing fee.
4. The admission criteria for each category of applicant is specified under **Categories of Applicants, Admission Criteria And Required Documentation**.
5. Admission to some courses, programs and/or the University may be limited by the University when it deems the facilities and resources available to it are not adequate to provide for additional students. Consequently possession of the minimum requirements does not guarantee that an applicant will be granted admission to a course, a program and/or the University.
6. Applicants who meet the University's general admission requirements may not necessarily meet the pre-requisites for registration in all first-year courses. Course registration may require the achievement of a minimum grade or score in a specific high school subject or in a specific placement or other standardized examination. For information on first-year English course placement for students who have been required to prove English proficiency for general admission purposes, see the regulations outlined under **English Language Proficiency Requirements** below. For information on course placement and pre-requisites for first-year mathematics and other subjects, consult the respective faculty and school sections of this Calendar.
7. The University may set its own matriculation examinations either in separate subjects or in all those required for matriculation, and may refuse admission to any applicant failing to attain a satisfactory standard in these examinations.
8. The University reserves the right to refuse admission to any applicant.
9. Applicants may be required to provide medical evidence of their fitness to pursue university studies. This should normally be in the form of the Student Health Certificate, available at www.mun.ca/regoff/forms.php.

4.2 English Language Proficiency Requirements

As English is the primary language of instruction at this University, all applicants seeking admission to Memorial University of Newfoundland must possess an adequate knowledge of written and spoken English as a prerequisite to admission. Regardless of country of origin or of citizenship status, applicants will be required to provide proof of proficiency in the English language based on one of the following forms.

4.2.1 English Language Secondary Institution

Applicants are required to have successfully completed the equivalent of three years of full-time instruction in an English language secondary institution as recognized by Memorial University of Newfoundland including successful completion of appropriate course(s) in English at the Grade 12 or equivalent level. English as a Second Language (ESL) courses are not acceptable for meeting this requirement. The University may require, as deemed appropriate by the University Committee on Admissions, further proof of English proficiency through one of the standardized tests below.

4.2.2 English Language Post-Secondary Institution

Applicants who have attended a recognized post-secondary institution where English is the language of instruction must have successfully completed the equivalent of 30 credit hours. These 30 credit hours must include 6 transferable credit hours in English courses. For information on transfer credit refer to **Transfer Credit**.

4.2.3 Memorial University of Newfoundland's Intensive English Program (IEP)

Applicants who have provisional acceptance to Memorial University of Newfoundland, but have not obtained the English language proficiency requirements to be admitted, have the opportunity to take part in the Memorial University of Newfoundland's Intensive English Program (IEP). Applicants in the IEP may provide evidence of reaching the required English language proficiency by way of their performance in their IEP coursework, or by achieving an acceptable score on an institutionally recognized test or one of the standardized tests stated blow. Information regarding Memorial University of Newfoundland's IEP can be found at www.mun.ca/esl or the **Grenfell Campus** sections of the Calendar.

4.2.4 Standardized Tests

Applicants proving English Proficiency through one of the following forms may be required to write a placement test prior to the commencement of classes to determine the appropriate course in English for which they should register. For further information refer to **English Language Placement Test**, **Faculty of Science Mathematics Course Descriptions**, and **Grenfell Campus Mathematics Course Descriptions**. The official results of the following standardized tests must be forwarded to Memorial University of Newfoundland directly from an authorized test reporting centre.

4.2.4.1 MUN Test of English Language (MUNTEL)

A minimum score of 60 in each of Reading and Listening, Writing, and Speaking is required on the MUN Test of English Language. Information regarding the MUN Test of English Language can be found at www.mun.ca/esl/muntel.

4.2.4.2 Test of English as a Foreign Language (TOEFL)

A minimum score of 79 with at least 20 in each of Reading and Writing, and no less than 17 in Listening and Speaking is required on the internet-based TOEFL. Information regarding the TOEFL program is available from the Educational Testing Service (ETS), TOEFL/TSE Services, online at www.ets.org/toefl/, from U.S. embassies or consulates, or from offices of the U.S. Information Services.

4.2.4.3 International English Language Testing System (IELTS)

A minimum overall band score of 6.5, with at least band 6 in each of Writing and Reading. Information regarding the IELTS may be obtained from the IELTS Subject Officer, University of Cambridge Local, Examinations Syndicate via www.ielts.org/.

4.2.4.4 Canadian Academic English Language (CAEL) Assessment

Minimum band scores between 50 and 60 in each of the four skills tested (Reading, Writing, Listening, Speaking), with at least two band scores of 60 are required on the CAEL Assessment. Information regarding the CAEL Assessment may be obtained from the CAEL Assessment Office at www.cael.ca.

4.2.4.5 Cambridge English for Speakers of Other Languages (ESOL)

A minimum grade of "B" or, for those who have completed this test since January 2015, an overall Cambridge English Scale score of 176 in the C1 Advanced or the C2 Proficiency are required. Information regarding these examinations may be obtained from University of Cambridge ESOL Examinations via www.cambridgeenglish.org/.

4.2.4.6 Canadian Test of English for Scholars and Trainees (CanTEST)

Minimum band scores of 4.5 in the listening comprehension and reading comprehension sub-tests and a score of 4 in writing are required on the CanTEST. Information regarding this examination may be obtained from the Language Testing Service of the University of Ottawa online at www.cantest.uottawa.ca/index.php.

4.2.4.7 Michigan English Test (MET)

A minimum score of 59 is required on the MET. Information on the MET testing program may be obtained from Michigan Language Assessment online at www.michiganassessment.org.

4.2.4.8 Pearson Test of English Academic (PTE Academic)

A minimum score of 58 in each of the reading, writing, listening, and speaking components of the PTE Academic is required. Information about the PTE Academic is available online at www.pearsonpte.com.

4.2.5 English Language Placement Test

1. With the exception of applicants who demonstrate English language proficiency under **English Language Proficiency Requirements, English Language Secondary Institution** and **English Language Proficiency Requirements, English Language Post-Secondary Institution**, all applicants will be required to write a placement test in English language. This test must be taken prior to the commencement of classes to determine the appropriate English course for which an applicant should register.
2. Students who are registered for courses at the St. John's Campus or by Distance/Online Learning whose first language is not English and whose performance in the placement test in English language indicates that appropriate placement is in a first-year English credit course will normally be placed in English 1020.
3. Students who are registered for courses at the Grenfell Campus should consult with the Office of the Registrar at Grenfell Campus.

4.2.6 Other

Other forms of proof of English language proficiency, acceptable to the University Committee on Admissions, may be considered.

4.3 Categories of Applicants, Admission Criteria and Other Information

The categories of applicants applying for admission/readmission as well as the admission criteria and other related information are listed below. Before a final admissions decision can be reached all required documents must be received. All documents must be official and be forwarded directly to the Admissions Office, Office of the Registrar from the appropriate institution(s) or source(s). Photocopied documents are not acceptable unless duly certified.

4.3.1 Applicants Who Have Followed the High School Curriculum of Newfoundland and Labrador

4.3.1.1 Admission Criteria

The courses below are courses designed for students who intend to seek post-secondary education at the University or other institutions whose programs demand levels of proficiency equivalent to those required by the University. Applicants shall have completed Graduation Requirements for high school as set down by the Department of Education and obtained credits in the following subjects with an overall average of not less than 70% compiled from the grades received in those courses at the 3000 level.

- **English:** English 3201 (2 credits); or the former combination of Language 3101 (1 credit) and one of Thematic Literature 3201(2 credits) or Literary Heritage 3202 (2 credits).
- **Academic or Advanced Mathematics:** One of Mathematics 2200, 2201, 2204, or 2205 and one of Mathematics 3200, 3201, 3204, or 3205 (valued at 2 credits each).
- **Laboratory Science:** Four credits in Laboratory Science (i.e. Biology, Chemistry, Earth Systems, Physics), including at least two credits at the 3000 level chosen from one of Biology 3201, Chemistry 3202, Earth Systems 3209, or Physics 3204 (valued at two credits each). The remaining two credits may be selected from 2000-level courses in the above-noted subject areas or from Science 1206.
- **Social Science/Modern or Classical Language:** Two credits at the 3000 level in a Social Science area or in a Modern or Classical Language.
- **Electives:** Two credits at the 3000 level in elective courses chosen from the subjects above or from additional courses approved by the Department of Education for offering at the 3000 level for certificate purposes.

4.3.1.2 Other Information

- **Early Acceptance:** Applicants in their final year of high school who have completed or who are completing a slate of courses which meets the course requirements specified in **Applicants Who Have Followed the High School Curriculum of Newfoundland and Labrador**, may be granted early acceptance prior to the writing of final examinations. This early acceptance will be subject to verification, when final examination results are released by the appropriate authorities, that the applicant has successfully met the requirements for admission as specified above in **Admission Criteria**. Applicants who fail to meet the minimum admission requirements at that time will have their acceptance revoked. This does not preclude the application of selective admission criteria for particular faculty/school programs.
- **Advanced Placement:** Applicants completing Advanced Placement courses through the Advanced Placement Program offered by the College board should also refer to **Transfer Credit Advanced Placement (AP)**.
- **English Language Proficiency Requirements** will apply to all applicants.

4.3.2 Applicants Who Have Followed the High School Curricula of Other Provinces of Canada

4.3.2.1 Admission Criteria

- Applicants from other provinces of Canada are required to have successfully completed Grade XII in the University Preparatory Program (in the case of Quebec students, Secondary V Certificate) with a passing mark in each of the following Grade XII academic or advanced-level subjects and an overall average of not less than 70% compiled from the grades received in the courses selected:
  - English
  - Mathematics
  - Laboratory Science (1 of Biology, Chemistry, Earth Science, Geology or Physics)
  - Social Science/Modern Classical Language
  - Elective
- Further information on admission requirements by province may be found at www.mun.ca/undergrad/apply or by contacting the Admissions Office, Office of the Registrar by e-mail at admissions@mun.ca.

4.3.2.2 Other Information

- **Early Acceptance**: Applicants in their final year of high school who have completed or who are completing, a slate of courses which meets the course requirements in **Applicants Who Have Followed the High School Curricula of Other Provinces of Canada** may be granted early acceptance prior to the writing of final examinations. This early acceptance will be subject to verification, when final examination results are received by the Office of the Registrar from the appropriate authorities, that the applicant has successfully met the minimum requirements for admission as specified above in **Admission Criteria**. Applicants who fail to meet the minimum admission requirements at that time will have their acceptance revoked. This does not preclude the application of selective admission criteria for particular faculty/school programs.
- **Advanced Placement:** Applicants completing Advanced Placement courses through the Advanced Placement Program offered by the College Board should refer to **Transfer Credit Advanced Placement (AP)**.
- Applicants seeking credit for enriched High School Grade XII courses or Ontario Grade XIII/OAC courses should refer to **Transfer Credit Enriched Courses and Ontario Grade XIII/OAC.**
- **English Language Proficiency Requirements** will apply to all applicants.

4.3.3 Applicants Who Have Followed the College of the North Atlantic Comprehensive Arts and Science Transition Program

4.3.3.1 Admission Criteria

Applicants who do not meet the requirements for admission to Memorial University of Newfoundland under one of the two categories above but who do hold a high school diploma may be eligible for admission under this category. Applicants applying under this category must successfully complete all qualification requirements for the award of the Comprehensive Arts and Science (CAS) Transition Year Certificate from the College of the North Atlantic. A full outline of this program is available in the College of the North Atlantic Calendar which is available online at www.cna.nl.ca.

This does not preclude the application of selective admission criteria for particular faculty/school programs. Applicants may wish to consider the course requirements for their intended program of study at Memorial University of Newfoundland when selecting CAS Transition Year courses for completion of the Transition Year Certificate program.

4.3.3.2 Early Acceptance

Applicants who have completed, or who are completing, a slate of courses which meets the **Admission Criteria** as described above for applicants completing the College of the North Atlantic CAS Transition Year program may be granted early acceptance prior to the writing of final examinations. This early acceptance will be subject to verification, when final examination results are received by the Office of the Registrar from the College of the North Atlantic, that the applicant has successfully met the minimum requirements for admission as specified above in **Admission Criteria**. Applicants who fail to meet the minimum admission requirements at that time will have their acceptance revoked.

4.3.3.3 Other Information

- English Language Proficiency Requirements will apply to all applicants.

4.3.4 Applicants for Concurrent Studies

4.3.4.1 Admission Criteria

- Applicants in or about to enter their final year of high school with a superior academic record (i.e. normally an overall average of 85% or above in completed English, Math and Science courses at the 2000 or 3000 level) may apply to enrol in university courses. The applicant for concurrent studies must be enrolled in a high school and completing a slate of courses that meets the course requirements for admission to the University as specified in **Applicants Who Have Followed the High School Curriculum of Newfoundland and Labrador**.
- Applicants will be required to submit a letter requesting enrolment in a specific course and provide a list of final year registrations; an official high school transcript; and a letter from the high school principal or guidance counsellor clearly supporting admission for concurrent studies.
- Applicants must submit a completed application for admission/readmission with the appropriate fee. For further information refer to the Financial and Administrative Services website at www.mun.ca/finance/fees/.
- Normally, enrolment for concurrent studies students will be limited to 3 credit hours in a given semester. Fees and deadlines are the same as for regularly admitted students. University credit will be awarded after successful completion of the course(s) and successful completion of the requirements for admission to the University.
- Normally, eligibility to enrol is limited to the Fall and Winter semesters.
- Concurrent studies students must apply for general admission to the University for the Fall semester of the following academic year. The requirements for admission to the University will apply. Additional faculty application and admission requirements may apply.

4.3.4.2 Other Information

- **English Language Proficiency Requirements** will apply to all applicants.

4.3.5 Applicants Who Have Followed the Adult Basic Education Program (ABE)

4.3.5.1 Admission Criteria

Applicants shall have completed the Level III Adult Basic Education Certificate (ABE) with the approved combination of thirty-six credits set down by the Department of Education and successfully completed, with an overall average of not less than 70%, the following courses as outlined below:

- **Communication Skills:** IC 3112 and IC 3321 **OR** English 3101A, 3101B, and 3101C
- **Mathematics:** One of the following groups:
  - Mathematics: IM 3115, 3211, 3212, 3213, and 3216 **OR**
  - Mathematics: IM 3218, 3219, and 3221 **OR**
  - Mathematics: 2104A, 2104B, 2104C, 3104A, 3104B, and 3104C **OR**
  - Mathematics: 2101A, 2101B, 2101C, 3101A, 3101B, and 3101C
- **Science:** One of the following patterns:
  - Biology: IBT 3113, 3115, 3211, 3212A/B, 3214, and 3316 **OR**
  - Biology: 2101A, 2101B, 2101C, 3101A, 3101B, and 3101C
  - Chemistry: ICH 3111, 3112, 3113, 3114, 3116, 3117, 3118, and 3215 **OR**
  - Chemistry: 2102A, 2102B, 2102C, 3102A, 3102B, and 3102C
  - Geology: IS 3212
  - Physics: IP 3111, 3112, 3213, 3215, and 3216 **OR**
  - Physics: 2104A, 2104B, 2104C, 3104A, 3104B, and 3104C

4.3.5.2 Other Information

- **English Language Proficiency Requirements** will apply to all applicants.

4.3.6 Applicants for Mature Student Status

4.3.6.1 Admission Criteria

- An applicant, 21 years of age or older within one month after the beginning of the semester or the session to which admission is being sought, who has not fulfilled the admission criteria outlined in any of the above categories may be admitted to the University with the approval of the University Committee on Admissions.
- Applicants for mature student status will be required to submit proof of age; two letters of reference from persons competent to assess the candidate's ability to proceed with university studies; a letter from the applicant outlining the grounds for requesting special consideration; and high school marks and marks from post-secondary institutions, if applicable.
- Applicants will be required to submit a completed application for admission/readmission with the appropriate fee. For further information refer to the Financial and Administrative Services website at www.mun.ca/finance/fees/.
- Applicants for mature student status may be required to show through an interview that they possess the potential to proceed with university studies.
- Since admission as a mature student is not on the grounds of age alone, the University Committee on Admissions reserves the right to refuse admission to any applicant.

4.3.6.2 Other Information

- **English Language Proficiency Requirements** will apply to all applicants.

4.3.7 Applicants for Visiting Student Status

An applicant who wishes to enrol as a student at Memorial University of Newfoundland for a limited period of time and who does not wish to be admitted to a program for the purpose of completing a degree at this University may apply for admission under the Visiting Student category. This category includes, but is not limited to, students who are in good standing at their current or most recently attended post-secondary institution and who either:

- wish to complete one or more courses for the purpose of transferring the resulting credit to their home institutions; or
- wish to come to Memorial University of Newfoundland to complete an unpaid research internship under the supervision of a Memorial University of Newfoundland faculty member; or
- have been offered provisional acceptance to a Memorial University of Newfoundland graduate-level program subject to the successful completion of specific pre-requisite courses.

4.3.7.1 Application and Admission Criteria

- Applicants will be required to submit a completed Undergraduate Application for Admission/Readmission with the appropriate fee. For further information refer to the Financial and Administrative Services website at www.mun.ca/finance/fees/.
- Applicants for admission as visiting students will be required to supply one of either (1) a final official transcript from the most recent institution attended, (2) a Letter of Permission (LOP) from their current or former institution, or (3) confirmation of acceptance to the School of Graduate Studies.
- Visiting students enrolling at Memorial University of Newfoundland under an approved exchange agreement or as visiting interns will be required to submit a letter of recommendation from the head of the academic unit that will host the student confirming that the nature and duration of the student's visit and the courses for which the student will register.
- Visiting students are normally eligible to register at Memorial University of Newfoundland under this category for a maximum of two semesters and registration eligibility is subject to course availability and successful completion of course pre-requisites. For courses at a level beyond first year in particular, consultation with the academic unit offering course(s) of interest for the purpose of verifying registration eligibility, prior to submission of an application, is strongly encouraged.
- In order to obtain access to University resources and, where applicable a study permit, visiting research interns will be required to register for each semester of their visit for one of either (1) UGRD 5900 if they are visitors at the undergraduate student level or (2) GRAD 9900 if they are visitors at the graduate student level. Registration for one of these courses will be conducted by using a Course Change Form.
- Visiting research interns will be exempt from tuition fees. However, all visiting research students will be required, as a condition of registration, to participate in the University's mandatory health insurance plan and enrol in the University's recreation program.

4.3.7.2 Other Information

- **English Language Proficiency Requirements** and the regulations outlined under **Admission/Readmission to the University** will apply to all applicants.
- All visiting students are subject to all other applicable Memorial University of Newfoundland regulations as published in the University Calendar.

4.3.8 Applicants Who Are Senior Citizens

4.3.8.1 Admission Criteria

- An applicant, 60 years of age or older within one month after the beginning of the semester/session to which admission is being sought, may be admitted to the University as a senior citizen, upon submission of a birth certificate or other proof of age.

4.3.9 Applicants Who Have Followed the High School Curriculum of Another Country or a Recognized Standardized Curriculum

The criteria below apply to applicants who have completed a high school program and diploma under a curriculum sanctioned by a ministry of education or government jurisdiction other than the ministry of education of a province or territory of Canada or under an organization that offers internationally-recognized standardized examinations.

Applicants shall have completed the requirements for a recognized high school diploma or senior secondary certificate following completion of university-preparatory courses at, as a minimum, either the senior secondary or grade 12 level in the following five subject areas: Mathematics, English, Laboratory Science (Biology, Chemistry, Earth Systems/Geology, or Physics), Social Science or Modern or Classical Language, and an Elective. The courses in each subject area shall have been of a depth and breadth that prepares students to continue studies in the related subject areas at the undergraduate university level. An overall minimum average grade among the

courses used to satisfy admission requirements may also be required.

4.3.9.1 International Baccalaureate (IB)

- Applicants seeking admission on the basis of the International Baccalaureate Organization's IB Diploma program may be admitted upon award of the IB Diploma with a minimum total score of 24. See **Transfer Credit** regulations and www.mun.ca/undergrad/admissions/ib-chart.php for details regarding the University's IB transfer credit eligibility.

4.3.9.2 American-based High School Curriculum

- Applicants completing an American-based high school program are required to provide official transcripts reflecting a minimum overall average of “B” or better in the required five grade 12 subjects.

4.3.9.3 United Kingdom (UK) or UK-patterned Curriculum

- Applicants are required to have completed the General Certificate of Education (GCE) with at least five subjects. These must include at least three Advanced Subsidiary (“AS”) Level subjects or two Advanced (“A”) Level subjects with grades of “C” or better or, for applicants completing the Higher-Level subjects of the Scottish Leaving Certificate, at least two subjects at the Higher-Level with grades of “C” or better. Exceptional candidates may be admitted based upon Ordinary (“O”) Level results. Applicants should refer to **Transfer Credit** for information concerning transfer credit eligibility.

4.3.9.4 France and French-Patterned Curriculum

- Applicants are required to complete and supply a certified copy of the Diplôme du Baccalauréat General (Diploma of General Baccalaureate) with a minimum grade of 12 in the required subject areas.

4.3.9.5 West Africa (Nigeria, the Gambia, Ghana, Liberia, and Sierra Leone)

- Applicants are required to complete the West African Examinations Council (WAEC) Senior School Certificate with a minimum grade of C6 in the required subjects. Applicants from Nigeria may also be considered based upon completion of National Examinations Council (NECO) examination results with a minimum grade of C6 in the required subjects.

4.3.9.6 Caribbean (Anguilla, Antigua and Barbuda, Barbados, Belize, British Virgin Islands, Cayman Islands, Dominica, Grenada, Guyana, Jamaica, Montserrat, Saint Kitts and Nevis, Saint Lucia, Saint Vincent and the Grenadines, Trinidad and Tobago, and Turks and Caicos Islands)

- Applicants are required to hold a Caribbean Examinations Council Secondary Education Certificate (CESC) with a minimum grade of 2 in the required subject areas and a minimum of two 2-unit subjects on the Caribbean Advanced Proficiency Examination (CAPE) examinations. Applicants who have completed Caribbean Advanced Proficiency Examination (CAPE) examinations may be eligible for transfer credit at the undergraduate level.

Further details regarding admission criteria by country are provided online at www.mun.ca/undergrad/admissions. Applicants may also contact the Admissions Office, Office of the Registrar by e-mail at admissions@mun.ca.

4.3.9.7 Other Information

- **Early Acceptance:** Applicants in their final year of high school who have completed, or who are completing, a slate of courses which meets the course requirements as specified under **Applicants Who Have Followed the High School Curriculum of Another Country or a Recognized Standardized Curriculum** may be granted early acceptance prior to the writing of final examinations. This early acceptance will be subject to verification, when final examination results are received by the Office of the Registrar from the appropriate authorities, that the applicant has met the minimum requirements for admission as specified under **Applicants Who Have Followed the High School Curriculum of Another Country or a Recognized Standardized Curriculum**. Applicants who fail to meet all requirements at that time will have their acceptance revoked. This does not preclude the application of selective admission criteria for particular faculty/school programs.
- Applicants from other countries should submit official matriculation certificates at least two months prior to the commencement of the semester to which they are seeking admission. Certificates in a language other than English or French should be accompanied by notarized English translations.
- Applicants from other countries may be required to submit with their application, a statement of satisfactory financial resources.
- **English Language Proficiency Requirements** will apply to all applicants.

4.3.10 Applicants Transferring From Other Recognized Universities or Colleges

4.3.10.1 Admission Criteria

- The admission of applicants from other recognized universities or colleges will be subject to the regulations for **Admission/ Readmission to the University** in addition to **General Academic Regulations, Regulations for Continuance and Readmission**. In order to allow sufficient time for assessment of possible transfer credit, applicants should refer to **Transfer Credit** for information on the transfer credit application and evaluation process and requirements.

4.3.10.2 Other Information

- In addition to the non-refundable application processing fee, an additional fee is required of all applicants who apply for admission from post-secondary institutions outside of Newfoundland and Labrador and/or non-Canadian applicants. Neither fee is refundable nor will it be credited to the applicant's financial account in any circumstances. For further information refer to the Financial and Administrative Services website at www.mun.ca/finance/fees/.
- Students applying for transfer from other recognized universities or colleges shall submit their high school transcript confirming receipt of a high school diploma and official transcript(s) from all universities and colleges attended. All documents must be forwarded directly to the Admissions Office, Office of the Registrar from the appropriate institution(s). These documents must be certified and official and received in the Office of the Registrar not later than two months prior to the first day of lectures in any semester, as stated in the **University Diary**. An application is not considered complete until these documents have been received.
- Applicants transferring from other universities or colleges should also see **Transfer Credit**.
- **English Language Proficiency Requirements** will apply to all applicants.

4.3.11 Applicants Who Are Requesting Special Admission

Where circumstances warrant, applicants not meeting the regulations for **Admission/Readmission to the University** may be admitted to Memorial University of Newfoundland with the approval of the University Committee on Admissions.

4.3.11.1 Admission Criteria

- Applicants must submit a completed application for admission/readmission with the appropriate fee. For further information refer to the Financial and Administrative Services website at www.mun.ca/finance/fees/.
- Applicants must submit a letter to the Committee outlining the grounds for requesting special consideration and provide a letter from a school principal, guidance counsellor, employer or other responsible person substantiating those grounds.
- In order to allow sufficient time for reasonable and consistent consideration of special cases, supporting letters must be received at least one week prior to the beginning of the semester to which admission is being sought.

4.3.11.2 Other Information

- **English Language Proficiency Requirements** will apply to all applicants.

4.3.12 Applicants for Non-Degree Student Status

4.3.12.1 Admission Criteria

- Applicants for non-degree status must normally be 21 years of age or older within one month after the beginning of the semester or the session to which admission is being sought.
- Applicants will be required to submit a completed application for admission/readmission with the appropriate fee. For further information refer to the Financial and Administrative Services website at www.mun.ca/finance/fees.
- As per regulation **Admission/Readmission to the University (Undergraduate, Admission/Readmission Information**, non-degree students are required to submit a new Application for Admission/Readmission with the appropriate application processing fee if they do not register for courses for three consecutive semesters.
- Non-degree students are subject to the same academic and nonacademic regulations as all other undergraduate students, as applicable.
- Memorial University of Newfoundland students not in good academic standing may not avail of this option.
- Applicants will not be required to submit academic documentation for admissions purposes with the exception of students who may be required to demonstrate proof of English proficiency and/or students who may be required to submit academic documentation to meet requirements of specific courses.

4.3.12.2 Other Information

- **English Language Proficiency Requirements** will apply to all applicants.

4.4 Transfer Credit

Applicants wishing to be considered for advanced standing or transfer credit must submit, in addition to the Application for Admission/Readmission, the appropriate application for transfer credit which can be obtained online or in-person from the Office of the Registrar at www.mun.ca/regoff/forms.php. Official transcript(s) and calendar descriptions and/or outlines of courses claimed for credit are also required and should be sent directly to Memorial University of Newfoundland from the institution attended.

In order to allow sufficient time for evaluation, these documents should be received at least two months prior to the commencement of the registration period for the semester to which the applicant is seeking admission. It is the student's responsibility to provide the pertinent documents, and until they are received, the Office of the Registrar is unable to commence an evaluation or to advise students of their standing at this University. The award of transfer credit is subject to the following regulations:

- When transfer credit is awarded for work completed at another institution, only equivalent Memorial University of Newfoundland course(s) and credit(s) are recorded on the Memorial University of Newfoundland transcript. Grades received from other institutions are not recorded nor included in averages.
- Applicants who have not received the results of a transfer credit evaluation prior to the assigned registration time for the semester in which they propose to begin studies should contact the Admissions Office for further assistance.
- Memorial University of Newfoundland will consider for transfer credit courses for which credit has been granted through a Prior Learning Assessment and Recognition process by another recognized university or college.
- Award of credit will be subject to **University Regulations** and evaluation and recommendation by the appropriate academic unit(s).
- Due to its specific or unique nature, a course (e.g. capstone or clinical course) may be identified as being exempt from the transfer credit review process.
- A minimum grade may, in some circumstances, be required by a faculty/school in order to award transfer credit.
- The applicability of all transfer credits, whether specified or unspecified, is subject to appropriate program regulations.
- Information regarding course equivalencies can be obtained from the Admissions Office, Office of the Registrar.

Outlined below are the various categories for which transfer credit may be considered.

4.4.1 College Board Advanced Placement (AP)

- Award of credit for AP courses will be subject to the achievement of a minimum grade of 3 in each subject claimed for credit (in certain subjects a minimum grade of 4 may be required).

4.4.2 Enriched Courses and Ontario Grade XIII/OAC

- Certain Grade XII enriched courses and certain Ontario Grade XIII/OAC subjects may be recognized for introductory (normally first year) credits, where applicable, provided that the subjects claimed for credit are recommended as equivalent to Memorial University of Newfoundland courses by the relevant University academic unit(s). In addition, the applicant must have obtained an overall average in these courses of not less than 65% with a passing grade in each subject claimed for credit. Applicants who have not obtained the overall average requirement of 65% in these courses will be required to have obtained a mark of not less than 65% in individual subjects claimed for credit.

4.4.3 Advanced or Higher Levels

- The “Advanced Level” subjects of the General Certificate of Education will generally be accepted for credit to a maximum of 12 credit hours in each subject provided that a minimum grade of ‘D’ in each subject claimed for credit has been obtained.
- The “Higher Level” subjects of the Scottish Leaving Certificate will generally be accepted for credit at the first year level.

4.4.4 International Baccalaureate Diploma

- Memorial University of Newfoundland will consider for transfer credit the “Higher Level” subjects and certain “Standard” or “Subsidiary” level subjects, provided that the subjects claimed for credit are recommended as equivalent to Memorial University of Newfoundland courses by the relevant University academic unit(s), and the candidate has achieved a minimum grade of 4 in individual subjects claimed for credit. In certain subjects a minimum grade of 5 may be required.

4.4.5 Member Institutions of Universities Canada

- All university-level course work successfully completed by transfer students during the first two years of university study taken at universities/colleges that are ordinary members of Universities Canada will be recognized for transfer credit. In the first instance, the evaluation of such course work for appropriate credit will be conducted by University academic units. In instances where appropriate credit cannot be granted by academic units or where no University academic unit exists at this University for the evaluation of particular transfer credits, the Office of the Registrar will award the appropriate unspecified credits in an unspecified discipline.
- Applicants who have successfully completed course work beyond the first two years of university study may be considered for further transfer credit subject to evaluation and recommendation by the appropriate academic unit(s) and **University Regulations**.

4.4.6 Other Universities, Colleges and Institutes

- Memorial University of Newfoundland may recognize for transfer credit certain courses offered by the College of the North Atlantic, the Fisheries and Marine Institute of Memorial University of Newfoundland, and certain other community colleges, technical colleges, institutes and CEGEPs.
- Memorial University of Newfoundland may recognize for transfer credit certain courses offered by other recognized universities or university colleges.

4.4.7 Caribbean Advanced Proficiency Exams

- Memorial University of Newfoundland may recognize for transfer credit certain courses completed through the Caribbean Advanced Proficiency Examinations. These examinations will generally be accepted for credit to a maximum of 12 credit hours for each 2 unit course and 6 credit hours for each 1 unit course.

4.5 Prior Learning Assessment and Recognition (PLAR)

Memorial University of Newfoundland recognizes that learning may occur outside a formal institutional setting through professional or personal experience or through participation in unaccredited learning. Students of Memorial University of Newfoundland may be eligible for the award of credit for informal or non-formal learning in specific circumstances. Where PLAR is offered, it is available only to those students who have applied for admission or who are currently registered at the University. PLAR at Memorial University of Newfoundland is subject to the following regulations and procedures:

- The recognition of informal learning, assessed on the basis of recognized professional achievement, may exist in the form of program admission, advanced placement, or academic credit in selected programs. Students are advised to consult the regulations governing programs of interest in the appropriate section of the University Calendar for further information.
- The recognition of learning that has not been recognized through the award of credit, for the purposes of determining pre-requisite waiver eligibility, may be approved by academic units on the basis of interviews or a review of unofficial documents. Students are advised to contact the academic unit offering the course(s) involved for further advice.
- Assessment of learning in the form of written or practical challenge examinations may be offered at the discretion of academic units. Recognition of learning assessed through challenge examinations is subject to the regulations outlined below.
- PLAR may be used to receive credit for Work Terms or Internships at the discretion of the individual faculty or school.

4.5.1 Challenge for Credit

Where challenge for credit is offered, it is available under the following conditions:

1. Applications to challenge for credit are available online at www.mun.ca/regoff/forms.php or in-person at the Office of the Registrar. Completed applications must be submitted to the Office of the Registrar and must receive approval from the head of the academic unit offering the course(s). The academic unit may require documentary material from the student and/or an interview before making its decision whether or not to accept the challenge. The academic unit involved will be responsible for deciding the scheduling and appropriate method of evaluation, which may consist of a variety of possible modes of evaluation including written, practical and oral.
2. A student who has applied for transfer credit evaluation may not apply to challenge for credit until the transfer credit evaluation has been completed.
3. Memorial University of Newfoundland will consider for credit courses that have been granted credit through a challenge for credit process by another recognized university or college. Award of credit will be subject to **University Regulations** and evaluation and recommendation by the appropriate academic unit(s).
4. For the purpose of satisfying the regulations governing residence requirements for a first degree and residence requirements for a second degree under **General Academic Regulations (Undergraduate)**, a successful challenge for credit shall be considered the equivalent of a transfer credit and shall be recorded on the transcript as a pass (PAS). Challenge grades are not included in averages. For further information refer to **Residence Requirements for a First Degree** and **Residence Requirements for a Second Degree**.
5. The appropriate fee must be paid at the time of application. For further information refer to the Financial and Administrative Services website at www.mun.ca/finance/fees/. If the application is accepted for consideration, the fee is not refundable nor is the student permitted to withdraw the challenge.

5 Academic Advising

During their period of study at the University, students are expected to make some very important academic decisions, the consequences of which can significantly affect the course of their academic careers. While the responsibility for making these decisions rests with students individually, they are not expected to make such decisions without access to sound academic advice.

Students should seek advice on matters such as course selection, registration, dropping/adding course registrations, selecting/changing an academic program, entrance requirements for degree programs and interpretation of university regulations. It is especially true that students in the early stages of their degree program should seek academic advice.

Students who are considering enrolling at the University or who are in their first year of study at the University or who have not declared an academic program can obtain academic advice from the following sources: those students attending the St. John's Campus should contact the Academic Advising Centre, Office of the Registrar, located in the Science Building room SN 4053, at (709) 864-8801; those students attending the Grenfell Campus should contact the Manager, Academic Advising at the Office of the Registrar, located in the Arts and Science Building in room AS 270, at (709) 637-6298.

Students beyond their first year who have declared their major or have been accepted to a School or Faculty can obtain academic advice from a faculty adviser assigned by their School/Faculty/Department. Students should contact the head of the relevant academic unit to be assigned a faculty adviser.

Students are also encouraged to approach their professors for academic advice or for referral to the appropriate source of advice.

While it is the responsibility of students to see that their academic programs meet regulations in all respects, academic advice is provided as a service of the University.

Further information regarding academic advising at the St. John's Campus may be obtained by e-mail at advice@mun.ca or through the website at www.mun.ca/advice.

Further information regarding academic advising at Grenfell Campus may be obtained by e-mail at info@grenfell.mun.ca or through the website at www.grenfell.mun.ca/campus-services/Pages/academic-advising.aspx.

6 General Academic Regulations (Undergraduate)

Memorial University of Newfoundland is governed by the principles of fairness, academic integrity and the timely provision of information and by regulations whose purpose is to ensure fair and equitable treatment for the entire University community. Some regulations deal with the normal workings of the University (continuance, registration deadlines, etc.) and pertain to all undergraduate students. Other regulations, however, especially those concerned with classification of degrees and academic conduct, apply to certain students in certain specific situations.

The Office of the Registrar will assist students with any questions or problems which arise concerning the interpretation of regulations. It is, however, the responsibility of the student to see that the student's program meets University regulations in all respects. Every student has the right to request waiver of **General Academic Regulations (Undergraduate)**. In addition, every student has the right to appeal decisions resulting from a request for waiver of **General Academic Regulations (Undergraduate)**. For further information refer to **Waiver of Regulations** and **Appeal of Decisions.**

Descriptions and regulations for individual programs can be found in the appropriate academic unit section of this Calendar. The terminology is explained in the **Glossary of Terms Used in This Calendar.**

6.1 Classification of Students

1. **Full-time students:**
   a. Students who have been admitted to this University and who are registered for the duration of any semester in at least 9 credit hours or at least 5 credit hours in a session are deemed full-time students.
   b. Notwithstanding the above and the regulations governing the Marine Institute technology diploma programs, students who have been declared as pre-Bachelor of Technology or pre-Bachelor of Maritime Studies are deemed full-time students if they are registered for either: three non-degree courses and a minimum of 3 degree credit hours, or two non-degree courses and a minimum of 6 degree credit hours.
   c. Students who are registered for the duration of any semester in a co-operative education work term, the internship required of the Co-operative Internship in Computer Science (CICS), the International Internship Option in the International Bachelor of Arts (INTL 399W), or the Structured Practice Experiences, the Professional Practice Experiences, and the Advanced Professional Practice Experiences required of the School of Pharmacy will be deemed full-time students.
   d. Provided they had been admitted to the University, the members of the Executive of the Memorial University of Newfoundland Students' Union (MUNSU), the Grenfell Campus Student Union (GCSU) and the Marine Institute Student Union (MISU) shall be deemed, for the purpose of membership on University committees, the Senate and the Board of Regents, to be full-time students during their tenure.
2. **Non-Degree Students** are students admitted to the University who are not currently pursuing a formal credential (including, but not limited to: a degree, certificate, or diploma).
3. **Part-time students** are students who have been admitted to the University and who are registered for fewer than 9 credit hours in any semester or fewer than 5 credit hours in any session.
4. **First-year students** are students who have earned fewer than 18 credit hours.
5. **Second-year students** are students who have earned from 18 to 47 credit hours inclusive.
6. **Third-Year Students** are students who have earned from 48 to 77 credit hours inclusive.
7. **Fourth-Year Students** are students who have earned from 78 to 107 credit hours inclusive.
8. **Fifth-Year Students** are students who have earned not fewer than 108 credit hours.

6.2 Degree and Departmental Regulations

Every student seeking a bachelor's degree shall comply with all the course requirements governing the award of that degree.

6.2.1 Year of Degree and Departmental Regulations - Faculty of Humanities and Social Sciences and Faculty of Science

1. A student completing a degree program in the Faculty of Humanities and Social Sciences or in the Faculty of Science will normally follow the degree regulations in effect in the academic year in which the student first successfully completes a course(s) at Memorial University of Newfoundland. However, the student may elect to follow subsequent regulations introduced during the student's tenure in a program.
2. In the case of departmental regulations for a major or minor, a student will normally follow regulations in effect in the academic year in which the student first successfully completes a course in that subject at the 2000 level or above which may be applied to the major or minor program respectively. However, the student may elect to follow subsequent regulations introduced during the student's tenure in a program.

6.2.2 Year of Degree and Departmental Regulations - All Other Faculties and Schools

1. A student registered in any program, other than programs in the Faculty of Humanities and Social Sciences, programs in the Faculty of Science, the Bachelor of Commerce program offered by the Faculty of Business Administration, or in the Bachelor of Maritime Studies or Bachelor of Technology programs offered by the Fisheries and Marine Institute will normally follow regulations in effect in the academic year in which the student first successfully completes a course(s) in the faculty or school following formal admission to that program. However, the student may elect to follow subsequent regulations introduced during the student's tenure in a program.
2. A student who has been admitted to and who is currently completing courses in one of the Fisheries and Marine Institute diploma programs that meets the admission criteria to the Bachelor of Technology program may simultaneously complete the requirements for the Bachelor of Technology program. Under those circumstances, for the purpose of meeting **Degree and Departmental Regulations, Year of Degree and Departmental Regulations - All Other Faculties and Schools**, students will normally follow the degree regulations in effect in the academic year in which the student first successfully completes an undergraduate degree course in the Technology (TECH) subject area. However, the student may elect to follow subsequent regulations introduced during the student's tenure in the program.
3. For the purpose of meeting **Degree and Departmental Regulations, Year of Degree and Departmental Regulations - All Other Faculties and Schools**, a student who is completing the Bachelor of Maritime Studies/Bachelor of Technology will normally follow the degree regulations in effect in the academic year in which the student first successfully completes a course(s) in the program following formal admission to that program. However, the student may elect to follow subsequent regulations introduced during the student's tenure in the program.
4. A student in the Bachelor of Commerce (Co-operative) program, or in the Faculty of Education, Faculty of Engineering and Applied Science, Faculty of Nursing, Faculty of Medicine, School of Pharmacy, or School of Social Work, who fails to obtain promotion or is not registered for full-time studies for more than one semester and is readmitted to full-time studies in the faculty or school will normally follow regulations in effect at the time of readmission.
5. A student in the School of Music who is required to withdraw from the Bachelor of Music degree program for academic reasons, or who has withdrawn from the principal applied study course will normally follow regulations in effect at the time the student is readmitted to the School. However, the student may elect to follow subsequent regulations introduced during the student's tenure in a program.

6.2.3 Further Credentials

1. Students may obtain more than one undergraduate degree at this University but not in the same major subject. Students are also encouraged to consider proceeding to more advanced studies at the honours or graduate level.
2. A student will not be awarded the same bachelor's degree more than once by this University (e.g., if a student has been awarded a Bachelor of Arts degree from this University the student will not be awarded a second Bachelor of Arts degree from this University).
3. A student who has completed a Bachelor's degree from this University may complete the requirements for another major or minor. A notation indicating the completion of the requirements for the additional major or minor will be included on the student's academic record.
4. For further information refer to **Residence Requirements - Second Degree**.

6.2.4 Time Limits

1. Notwithstanding these regulations, the University may place limits on the time permitted to complete a program under any given set of regulations. In addition, detailed scheduling of courses and/or practical experience, e.g., work terms, internships, field placements, may be changed as the University deems appropriate or necessary.

6.3 Residence Requirements

6.3.1 General Information

1. Residence requirements are met by attendance at classes on a campus and/or by the number of credit hours completed at this University.

6.3.2 First Degree

1. More than half of the total credit hours required for the degree shall consist of the following:
   - Courses taken at this University.
   - Courses taken at universities and/or colleges which are included in formal institutional exchange agreements with this University.
   - Courses taken at Francophone universities, as required under specific degree program regulations.

   This regulation is not applicable to the Bachelor of Maritime Studies and the Bachelor of Technology. For the Bachelor of Maritime Studies and the Bachelor of Technology degrees see under **Fisheries and Marine Institute, Degree Program Regulations**.
2. Students who have taken courses in the subject(s) of their major at another university are required to complete more than half of the total credit hours in each of their major subjects at this University.

6.3.3 Second Degree

A student who has already completed a bachelor's degree may undertake a second bachelor's degree, but not in the same major, subject to the condition outlined below:

1. Every student for a second bachelor's degree shall complete at least 30 credit hours at this University beyond those required for the first degree. These credit hours must be applicable to the degree sought. Students who have completed a first degree at this University may be permitted to take at another university up to 6 of the 30 credit hours required in this clause. For the Bachelor of Maritime Studies and the Bachelor of Technology degrees see under **Fisheries and Marine Institute, Degree Program Regulations**.

6.4 Special/Selected Topics Courses

When a block of courses has been approved under a general heading such as selected topics, special areas, directed readings or like heading, each new course offered from that block of courses shall be approved in advance by the Faculty/School Undergraduate Studies Committee. To ensure an orderly use of the courses and non-duplication between course numbers, titles and contents, the Committee shall require the same quality and type of information as is needed for the approval of any single course.

6.5 Registration

6.5.1 General Information

1. Students register using the Student Web/Self-Service at www.mun.ca/regoff.
2. No student may register after the end of the registration period. In the case of accelerated courses and courses offered outside the normal time frame of a semester or session the registration period will be prorated with respect to all associated deadlines.
3. The University reserves the right to require a student to withdraw without academic prejudice from a course, courses, or program in which the student is improperly registered.

6.5.2 Student Responsibility

1. Students are strongly encouraged to seek academic advice before registering.
2. The responsibility for taking all steps necessary for registering and ensuring that a student's registration is appropriate, correct, and proper rests solely with the student. The University will make every effort, through its various academic counselling and advising services, to ensure that students are informed of the suitability and accuracy of their registrations.
3. Students must register for courses at or after the assigned registration time and before the end of the registration period as defined in the **University Diary**.

6.5.3 Registration Priority

1. The University uses a registration priority system that assigns the date and time that students register. Priority for registration is determined by a combination of three factors: closeness to graduation (i.e., number of credit hours completed); a student's academic achievement (i.e., GPA), and a student's program of study (i.e., degree, major, minor).
2. Students with the admission category of **Non-Degree Student Status** will be assigned the last available registration slot.
3. Academic units may reserve spaces in course sections for students in a particular degree, major, minor, or the like.
4. For further information on registration priority consult the *Undergraduate Registration Procedures*.

6.5.4 Registration for Students Not Admitted to a Degree Program

1. Students who have earned at least 60 credit hours, whether by the successful completion of Memorial University of Newfoundland courses or via transfer credit, and who have not been admitted to a degree program, including Bachelor of Arts and Bachelor of Science students who have not yet declared a major, will not normally be permitted to register for courses until they have consulted with a designated academic advisor to develop an appropriate plan and timeline for seeking admission to a degree program. Designated advisors can be found through the Academic Advising Centre or Grenfell Campus Academic Advising. Further information on academic advising for students who are still exploring can be found on the Office of the Registrar web page on Academic Advice.
2. Students who have not been admitted to a degree program will be subject to the same restriction described in the Clause above, after earning 90 credit hours, 120 credit hours, and so on.
3. The Clauses above do not apply to students who:
   - are attending Memorial University of Newfoundland solely for the purpose of completing a diploma or certificate,

- have already completed an undergraduate degree at Memorial University of Newfoundland or another recognized university or college, or
- have self-identified as not pursuing a Memorial University of Newfoundland degree.

4. Appeals of this Regulation will be considered by the Senate Committee on Undergraduate Studies.

6.5.5 Adding Courses

6.5.5.1 General Information

- Specific deadlines for adding courses in any semester or session are stated in the **University Diary**. In the case of sessions, accelerated courses, and courses offered outside the normal time frame of a semester or session, deadlines for adding courses will be prorated accordingly.
- No course will be considered to have been added until the Registrar has received official notification and certified the add.
- Attending classes or informing an instructor of the intent to add a course does not constitute an official adding of a course.
- Only under special circumstances may a course(s) be added after the end of the registration period. For information contact the Office of the Registrar.
- Before the end of the registration period a student may, upon formal notification to the Registrar, change the course(s) for which the student was originally registered by adding and/or dropping a course(s).

6.5.6 Course Weight/Course Load

Course load is the sum of course weights. In a session the course load is double. For the purposes of determining course load, each course is weighted with the credit hour value associated with that course, unless otherwise specified as follows:

- The course weight of each of the A and B components of a linked course shall be equivalent to one half of the credit hour value of the B component.
- The course weight of courses with C or F as the last character shall be three.
- The course weight of courses with W as the last character will vary according to individual program requirements.

1. **Semester Course Load:** The normal course load in a semester shall be 15 credit hours, except where academic regulations require more than that number. No student shall register for more than 15 credit hours or more credit hours than required by degree regulations in a semester except with the written permission of the dean, division head, vice-president or associate vice-president of the student's faculty, school, or campus.
2. **Session Course Load:** The normal course load in a session shall be 6 credit hours. No student shall register for more than 6 credit hours in a session except with the written permission of the dean, division head, vice-president or associate vice-president of the student's faculty, school, or campus.

6.5.7 Dropping Courses

6.5.7.1 General Information

- Specific deadlines for dropping courses in any semester or session are stated in the **University Diary**. In the case of sessions, accelerated courses, and courses offered outside the normal time frame of a semester or session, deadlines for dropping courses without academic prejudice will be prorated accordingly.
- No course will be considered to have been dropped until the Registrar has received official notification and certified the drop.
- Ceasing to attend classes, or informing an instructor of the intent to drop a course, does not constitute an official dropping of a course.
- A student who drops all courses in any given semester will be considered to have withdrawn from the University for that semester. A student who has withdrawn from the University, before the start of classes in any semester, is deemed to be not registered for that semester. For information regarding applying for readmission to the University refer to **Admission/Readmission to the University (Undergraduate)**.
- In the event that a student drops a co-requisite course, the student will be required to drop the course for which that course is a co-requisite.
- Before the end of the registration period a student may, upon formal notification to the Registrar, change the course(s) for which the student was originally registered by adding and/or dropping a course(s).

6.5.7.2 Dropping Courses Without Academic Prejudice

- Until the end of the second week following the first day of lectures in any semester, a student may, upon formal notification to the Registrar, drop a course without academic prejudice. A course dropped under these circumstances will not be entered on the student's record.
- From the beginning of the third week to the end of the eighth week following the first day of lectures in any semester, a student may, upon formal notification to the Registrar, drop a course without academic prejudice. A grade of DR will be assigned in these circumstances and will be entered on the student's record.
- From the beginning of the ninth week following the first day of lectures in any semester to the last day to add courses in the following semester, a student who is prevented from completing the requirements of a course by illness, bereavement, or other acceptable cause, duly authenticated in writing, may drop a course without academic prejudice. This may occur only with the approval of both the course instructor and the head of the academic unit of the student's program or in the case of students who have not declared a program, the head of the academic unit of the course in question. A grade of DR will be assigned in these circumstances and will be entered on the student's record.

6.5.7.3 Dropping Courses Retroactively

An academic transcript is a complete and accurate reflection of a student's academic record. Once the final exam is written the course will be considered to be completed and, normally, no retroactive drop will be possible. A poor grade is not, in and of itself, acceptable grounds for dropping a course retroactively. On rare occasions, a student may request to drop a course retroactively (i.e. beyond the last day to add courses in the semester following the one in which the course was taken). Normally, such requests will be considered only for courses that were not completed as a result of circumstances beyond the student's control such as illness, bereavement, or other acceptable cause, duly authenticated. If a request for a retroactive drop is approved, a grade of DEX (Drop due to Exceptional Circumstances) will be assigned in these circumstances and entered on the student's record. Requests shall be submitted to the Office of the Registrar by e-mail to appeals.retrodrops@mun.ca no later than five years following the last day of examinations for the semester in which the course was taken. Requests must include the following information:

- name,
- current address and telephone number,
- Memorial University of Newfoundland email address,
- student ID number,
- course(s) requested to drop retroactively,
- explanation of why course(s) could not be dropped during regular time frame for dropping,
- grounds for the request,
- supporting documentation, and
- documentation from the course instructor regarding grading scheme and final grade.

6.5.7.4 Work Terms

Students registered for a co-operative education work term should refer to the appropriate academic unit section of this calendar with respect to regulations regarding work terms.

6.5.7.5 Tuition Fee Implications

- A student who drops a course within two weeks following the first day of lecture in any semester will not be liable for tuition fees for that course. Tuition fee refunds for dropping courses after that period will be prorated in accordance with Tuition and Related Fees, Tuition refunds based on withdrawal from course(s). Further Information can be found at the Financial and Administrative Services website at www.mun.ca/finance/fees/.
- In the case of sessions, accelerated courses, and courses offered outside the normal time frame of a semester or session, deadlines for dropping courses without financial liability will be prorated accordingly.

6.5.8 Withdrawing from the University

6.5.8.1 General Information

- A student who drops all courses in any given semester will be considered to have withdrawn from the University for that semester. A student who has withdrawn from the University, before the start of classes in any semester, is deemed to be not registered for that semester. For information regarding applying for readmission to the University refer to **Admission/Readmission to the University (Undergraduate)**.
- A withdrawal is not official until the Registrar has received official notification and certified the changes.
- Ceasing to attend classes, or informing an instructor of the intent to drop a course, does not constitute an official withdrawal.

6.5.8.2 Withdrawing from the University Without Academic Prejudice

- Until the end of the second week following the first day of lectures in any semester as stated in the **University Diary**, a student may, upon formal notification to the Registrar, withdraw from the University without academic prejudice. Courses dropped under these circumstances will not be entered on the student's record.
- From the beginning of the third week to the end of the eighth week following the first day of lectures in any semester as stated in the **University Diary**, a student may, upon formal notification to the Registrar, withdraw from the University without academic prejudice. The letter grade DR will be assigned to all courses in these circumstances.
- From the beginning of the ninth week following the first day of lectures in any semester to the last day to add courses in the following semester as stated in the **University Diary**, a student who is prevented from completing the semester by illness, bereavement, or other acceptable cause, duly authenticated in writing, may withdraw from the University without academic prejudice. This may occur only with the approval of the dean, division head, vice-president or associate vice-president of the student's faculty, school, or campus and upon formal notification to the Registrar. The letter grade DR will be assigned to all courses in these circumstances.
- In the case of sessions, accelerated courses, and courses offered outside the normal time frame of a semester or session, deadlines for withdrawing from the University will be prorated accordingly.
- Students who withdraw from the University for medical reasons for one or more semesters may not be permitted to re-enter unless they can provide medical evidence, satisfactory to the Registrar in consultation with the Head of the appropriate academic unit, of fitness to pursue studies. This should normally be in the form of the Student Health Certificate.

6.5.8.3 Withdrawing from the University Retroactively

An academic transcript is a complete and accurate reflection of a student's academic record. Once the student has written one or more final exams, the semester will be considered to be completed and, normally, no retroactive withdrawal will be possible. Poor grades are not, in and of themselves, acceptable grounds for withdrawing retroactively. On rare occasions, a student may request to withdraw from the University retroactively (i.e. beyond the last day to add courses in the semester following the one in which the courses were taken). Normally, such requests will be considered only for courses that were not completed as a result of circumstances beyond the student's control such as illness, bereavement, or other acceptable cause, duly authenticated. If a request for a retroactive withdrawal is approved, a grade of DEX (Drop due to Exceptional Circumstances) will be assigned in these circumstances and entered on the student's record. Requests shall be submitted to the Office of the Registrar no later than five years following the last day of examinations for the semester in which the courses were taken. Requests must include the following information:

- name,
- current address and telephone number,
- Memorial University of Newfoundland email address ,
- student ID number,
- semester(s) for which retroactive withdrawal is requested,
- explanation of why course(s) could not be dropped during regular time frame for dropping,
- grounds for the request,
- supporting documentation, and
- documentation from the course instructors regarding grading scheme and final grade.

6.5.8.4 Work Terms

Students registered for a co-operative education work term should refer to the appropriate academic unit section of this calendar with respect to regulations governing withdrawing from work terms.

6.5.9 Completing a Course

1. A student will be considered to have completed a course if the student attends and/or attempts the final examination (or a similarly cumulative or capstone form of evaluation, in the case of a course with no final examination), regardless of the grade achieved in the course.
   - A student who has not completed a course, but who has neither dropped the course (as described under **Registration – Dropping Courses**) nor withdrawn from the semester in which the student was registered for the course (as described under **Registration – Withdrawing from the University**), will be assigned a grade in the course following the prescribed method of evaluation.
   - Once a student has completed a course, neither a retroactive drop of the course nor a retroactive withdrawal from the semester in which the student was registered for the course will normally be possible.
2. A student will be considered to have successfully completed a course if the student has received a passing grade in the course based upon the method of evaluation for the section of the course in which the student was registered, as modified by any approved changes and/or exemptions to the method of evaluation, and in accordance with any relevant Faculty, School or Departmental regulations.

6.5.10 Auditing of Courses

1. Individuals auditing courses must have met the University's admission or readmission requirements as stated in **Admission/ Readmission to the University (Undergraduate)**.
2. In order to audit any course, an individual must receive permission from the instructor in that course and the head of the academic unit in which the course is offered. Permission cannot be given until the number of registrations is known. Factors to be considered shall include class size, impact on students registered for credit, and other matters judged relevant by the academic unit.
3. Individuals auditing courses shall limit their participation to that deemed appropriate by the instructor.
4. Auditors are not permitted to write formal examinations or have their work formally assessed.
5. Audited courses will not be considered as meeting prerequisites, admission, or course requirements for any undergraduate programs, nor will audited courses be listed on the individual's transcript of University studies.

6.6 Attendance

1. Attendance regulations must be approved by the Senate and will be allowed only in cases where the academic unit has demonstrated that attendance is necessary for safety reasons, for teaching practical skills, or for attaining other clearly specified objectives. This may include an attendance regulation that may, by itself, cause a student who contravenes the regulation to fail or be dropped from a course.
2. The course where an attendance regulation is to be enforced must have the statement "attendance required" included in the calendar description.

6.7 Evaluation of Student Work

6.7.1 Method of Evaluation

1. The method of evaluation in any course shall be determined by the academic unit subject to all University regulations.

6.7.2 Course Syllabus

1. Before the end of the first week of lectures in any semester or session, the course syllabus shall be made known to students. The course syllabus shall include:
   - the method of evaluation,
   - any required prerequisites or co-requisites,
   - any required textbooks or other resources which must be purchased,
   - information about the availability of the instructor for consultation (in-person and, where appropriate, by other means of communication) outside of class,
   - a statement of Memorial University of Newfoundland's commitment to accommodation of students with disabilities, and

- a statement regarding academic integrity, including a reference to the entry on **Academic Misconduct** in this Calendar.

2. The following shall be included in the explanation of the method of evaluation:
   - the allocation of marks for all parts of the evaluation, e.g., assignments, laboratory projects, presentations, tests, mid-term examinations, final examinations;
   - whether the course will be graded using numeric grades, pass/fail grades, and/or another grading system approved by the University Senate; in courses where students will be given the option of choosing between multiple grading systems, an explanation will also be provided of the mechanism and deadline by which this choice will be declared;
   - wherever possible, an explanation of the alternate evaluation which will be offered to students who are unable to complete a part of the evaluation due to acceptable cause, as described under **Exemptions from Parts of the Evaluation**; and
   - with the exception of the final examination, and in accordance with **Scheduling of Parts of the Evaluation** below, the probable dates of all in-class parts of the evaluation, and the probable dates on which all take-home parts of the evaluation are due.
3. The course syllabus shall be provided in paper form to students present in class, or in electronic form via a University approved email account or learning management system.
4. As early as possible following the start of lectures in each semester or session, and no later than the end of the first week of lectures, the course instructor shall file a copy of the course syllabus with the appropriate academic unit.
5. Methods used for notification of grades earned in all parts of the evaluation and for the return of graded evaluative instruments will be in keeping with the Access to Information and Protection of Privacy Act (Government of Newfoundland and Labrador).

6.7.3 Scheduling of Parts of the Evaluation

1. Every effort should be made to adhere to the dates given on the course syllabus. Deviations from these dates of one calendar week or less are subject to the restrictions listed in clauses 2 to 5. Longer deviations are permitted only as described under **Changing the Method of Evaluation**.
2. No laboratory examinations totalling more than one laboratory period in length shall be given in any laboratory course in any week during a lecturing period in any semester or session. Such examinations shall be administered in the laboratory time period assigned for that course section. The application of this clause in the Faculty of Engineering and Applied Science, the Faculty of Medicine and the School of Pharmacy is subject to interpretation by the appropriate committee on undergraduate studies. The Senate Committee on Undergraduate Studies may grant a waiver of this clause for laboratory examinations in individual courses in a given semester or session upon recommendation of the appropriate committee on undergraduate studies. Such waivers will be considered only if it can be shown that such laboratory examinations do not conflict with regularly scheduled meetings of another course for any student involved.
3. Any other in-class work shall not extend beyond the class period assigned to that course section in any week during a lecturing period in any semester or session. The application of this clause in the Faculty of Engineering and Applied Science and the Faculty of Medicine is subject to interpretation by the appropriate committee on undergraduate studies. The Senate Committee on Undergraduate Studies may grant a waiver of this clause for in-class work in individual courses in a given semester or session upon recommendation of the appropriate committee on undergraduate studies. Such waivers will be considered only if it can be shown that such in-class work does not conflict with regularly scheduled meetings of another course for any student involved.
4. No form of evaluation shall take place or be due during the last two weeks of the lecturing period in any semester or the last week of the lecturing period in any session, with the exception of oral exams and presentations, laboratory exams and reports, grading on participation, and take-home work which has been made available to students prior to this part of the lecturing period. Courses taught outside the regular time frame are exempt from the application of this regulation. In exceptional circumstances, the undergraduate studies committee of the appropriate faculty or school may, upon the recommendation of the head of an academic unit, grant a waiver of this regulation with the proviso that the total value of all parts of the evaluation thereby permitted shall not exceed 20% of the final mark in that course. At the end of each semester, the Senate Committee on Undergraduate Studies must be notified of waivers granted.
5. No evaluation of any nature shall be held or due between the last day of lectures and the start of the formal examination period in any semester or session. The application of this clause to the Faculty of Education (with respect to accelerated courses), the Faculty of Medicine, the School of Human Kinetics and Recreation (with respect to accelerated courses and courses offered outside the normal time frame during the Spring semester) and the Faculty of Nursing is subject to interpretation by the appropriate committee on undergraduate studies.
6. In the event of an officially declared emergency which results in the cancellation or interruption of in-class work previously scheduled and notified to be held in the final class period of the third last week of lectures of a semester or the second last week of lectures of a session, teaching units may reschedule such work in the next regularly scheduled class or as early as possible in the second last week of lectures of a semester or the last week of lectures of a session. In no circumstances can the rescheduled work be held in the last week of lectures of a semester.

6.7.4 Changing the Method of Evaluation

1. The method of evaluation, as made available to the class in the first week of lectures, shall be changed only if:
   - exceptional circumstances warrant the change; and
   - the head of the academic unit approves the proposed change; and
   - accommodation is made for students who demonstrate to the course instructor that they are disadvantaged by the change.

6.7.5 Exemptions from Parts of the Evaluation

1. For information and procedures regarding exemptions from final examinations, refer to **Exemptions From Final Examinations and Procedures for Applying to Write Deferred Final Examinations**.
2. A student is, at times, prevented from completing a part of the evaluation by illness or medical conditions of less than five calendar days' duration. In such cases, a student may apply for an alternate evaluation by declaring to the relevant instructor that the student has experienced such an illness or medical condition. This declaration should be made via telephone or in writing through the student's University approved e-mail account. This declaration should be made in advance of the original date on which an in-class part of the evaluation is to be held or a take-home part of the evaluation is due, wherever possible, but no later than 48 hours after the original date of the part of the evaluation. If the declaration is made by telephone, written confirmation must then be received by the relevant instructor within seven calendar days of the original date of the part of the evaluation.
3. A student who is prevented from completing a part of the evaluation by illness of at least five calendar days' duration, bereavement or other acceptable cause, duly authenticated in writing, may apply for an alternate evaluation. This application should be made in

advance of the original date on which an in-class part of the evaluation is to be held or a take-home part of the evaluation is due, wherever possible, but no later than 48 hours after the original date of the part of the evaluation. If application is made by telephone, written confirmation must then be received by the head of the appropriate academic unit within seven calendar days of the original date of the part of the evaluation. The following supporting documentation is required:

- For illness or medical conditions, medical documentation from a health professional is required. This should normally be in the form of the Student Health Certificate, available at www.mun.ca/regoff/forms.php.
- For bereavement or other acceptable cause, official documents or letters that support the reason for the request (e.g. death certificate, letter from employer, etc.) are required.

4. The alternate evaluation may consist of the deferral of in-class work, the extension of the deadline for take-home work, an alternative allocation of marks, the use of a pass/fail grading system in place of a numeric grading system or vice versa, or another appropriate accommodation as determined by the course instructor. A student who is dissatisfied with the accommodation offered by the instructor may consult with the head of the appropriate academic unit.

6.7.6 Correction and Return of Student Work

1. Provided that students submit work by the due date outlined in the method of evaluation, instructors shall mark and return work that is worth a total of at least 20% of the final grade before the last day to drop courses without academic prejudice. This excludes practicums, placements, internships, theses, and courses where a single piece of work is used to determine the entire mark for the course. In exceptional circumstances, a waiver of this clause may be granted to an individual section of a course in a given semester upon application by the course instructor. For courses at the 1000- and 2000-level, such a waiver may be granted by the Senate Committee on Undergraduate Studies. For all other courses, such a waiver may be granted by the undergraduate studies committee of the appropriate faculty or school; at the end of each semester, the Senate Committee on Undergraduate Studies shall be notified of waivers granted.
2. Instructors shall mark and return all work in a timely manner. In courses where evaluation includes a final examination, instructors shall make all reasonable efforts to mark and return all work before the beginning of the examination period, provided that students submit this work by the due date specified in the method of evaluation.

6.8 Final Examinations

6.8.1 Scheduling of Final Examinations

1. Final examinations, if any, whether of the normal two-hour duration or longer, shall be held in each course at the end of the semester or session during which it was given in accordance with the schedule of examinations published by the Office of the Registrar. The application of this clause to the Bachelor of Education (Intermediate/Secondary) and all degree programs offered by the School of Human Kinetics and Recreation is subject to interpretation by the appropriate committee on undergraduate studies.
2. Normally, course sections offered during the day will have their final examinations, if any, scheduled in the day, and course sections offered in the evening will have their final examinations, if any, scheduled in the evening. When a student is unable, for good reason, to write a final examination scheduled outside the provisions of this clause, the student will be entitled to write a deferred examination. For further information refer to **Exemptions From Final Examinations and Procedures for Applying to Write Deferred Final Examinations**.
3. When an academic unit determines that there will be a common final examination for day and evening sections of a course, students must be so informed in the course syllabus.
4. Where possible, academic units should inform the Office of the Registrar when they submit their class schedules if it is anticipated that a common final examination will be required for day and evening sections of a course, so that this information can be publicized in the class schedule for the appropriate semester or session. Academic units should indicate whether the examination is to be held during the day or the evening.

6.8.2 Exemptions From Final Examinations and Procedures for Applying to Write Deferred Final Examinations

1. A student who is prevented from writing a final examination by acceptable cause may apply, with supporting documents, to have the course graded based on the work completed or have the final examination deferred.
2. For a student who is prevented from writing a final examination as described under **Scheduling of Final Examinations**, the application to defer this examination should be made in writing to the head of the appropriate academic unit (or delegate). It should be submitted as soon as possible after the release of the final examination schedule, and in any case no later than two weeks before the end of the semester or session.
3. A student who is scheduled to write three final examinations which begin and end within a twenty-four-hour period may request to write a deferred examination. Normally, only the second examination in the twenty-four-hour period may be deferred. The application to defer this examination should be made in writing to the head of the appropriate academic unit (or delegate). It should be submitted as soon as possible after the release of the final examination schedule, and in any case no later than two weeks before the end of the semester or session.
4. For a student who is prevented from writing a final examination by illness, bereavement or other acceptable cause, duly authenticated in writing, the application to defer this examination should be made via telephone or in writing through the student's University approved e-mail account to the head of the appropriate academic unit (or delegate) and the course instructor. This application should be made in advance of the examination wherever possible, but no later than 48 hours after the original date of the examination. If application is made by telephone, written confirmation must then be received by the head of the appropriate academic unit (or delegate) within seven calendar days of the original date of the examination. The following supporting documentation is required:
   - For illness or medical conditions, medical documentation from a health professional is required. This should normally be in the form of the Student Health Certificate, available at www.mun.ca/regoff/forms.php.
   - For bereavement or other acceptable cause, official documents or letters that support the reason for the request (e.g. death certificate, letter from employer, etc.) are required.
5. The decision regarding the request of the student to have a course graded based on the work completed or have the final examination deferred, including information on the appeals route open to the student in the case of a negative decision, must be communicated in writing by the head of the appropriate academic unit (or delegate) to the student and to the Registrar within seven calendar days of the receipt of the student's complete application. For further information refer to **Appeal of Decisions**.
6. In those cases where the academic unit accepts the extenuating circumstances the student may be permitted to write a deferred

examination or, with the consent of both the academic unit and the student, the grade submitted may be based on term the work completed alone. An interim grade of ABS will be assigned by the academic unit in the case of a student granted a deferred examination. This grade will be replaced by the final grade which must be received by the Registrar within seven calendar days following the start of classes in the next semester or session.

7. A student who is prevented from writing a deferred final examination by illness, bereavement, or other acceptable cause, duly authenticated in writing, may apply, with supporting documents, to have the deferred final examination further deferred. This application should be made via telephone or in writing through the student's University approved e-mail account to the head of the appropriate academic unit (or delegate) and the course instructor. This application should be made in advance of the examination wherever possible, but no later than 48 hours after the original date of the examination. If application is made by telephone, written confirmation must then be received by the head of the appropriate academic unit (or delegate) within seven calendar days of the original date of the examination. The examination will be postponed to a time not later than the last date for examinations in the semester following that in which the student was enrolled in the course. The following supporting documentation is required:
   - For illness or medical conditions, medical documentation from a health professional is required. This should normally be in the form of the Student Health Certificate, available at www.mun.ca/regoff/forms.php.
   - For bereavement or other acceptable cause, official documents or letters that support the reason for the request (e.g. death certificate, letter from employer, etc.) are required.

6.8.3 Access to Final Examination Scripts

1. A student has a right to see the final examination script. However, the script is the property of the University and the University retains full possession and control of the script at all times. This regulation upholds the authority and judgement of the examiner in evaluation.
2. To access a final examination script, a student must make a written request to the head of the academic unit in which a course is offered. This request is subject to the following conditions:
   - Any such request must be made following release of examination results for the semester or session in which the course was taken and within one month of the official release of grades by the University.
   - The final examination script must be viewed in the presence of the course instructor or other person delegated by the head of the academic unit. Both the instructor and the student have the right to be accompanied by a registered student or a member of the faculty or staff of the University.
   - The final examination script must not be taken away or tampered with in any way.
3. All final examination scripts shall be retained by the academic unit for a minimum of one academic year.

6.8.4 Rereading of Final Examination Scripts

1. A student may apply to have a final examination script reread whether or not the student has obtained a passing grade in that course.
2. A student is encouraged to request to access the final examination script prior to submitting a request to have the final examination reread. For further information refer to **Access to Final Examination Scripts**.
3. A student who wishes to have a final examination script reread must make application in writing to the Office of the Registrar within one month of the official release of grades by the University. When a rereading is requested, the University will make every reasonable attempt to have the rereading conducted by a faculty member(s) other than the original marker(s). Students are advised to refer to relevant academic units for policies and procedures governing rereads of examinations.
4. An appropriate fee per course must be paid at the time of application. For further information refer to the Financial and Administrative Services website at www.mun.ca/finance/fees/. If the final letter grade in the course is raised after rereading or if the final numeric grade increases by at least 5%, then the fee is refunded. If the final letter grade in the course is unchanged or lowered, and if the final numeric grade increases by less than 5% or is unchanged or lowered, then the fee is forfeited.

6.9 Grading

6.9.1 Grading Systems

1. For each course, an academic unit may choose to use a numeric grading system, a pass/fail grading system, or both.
   a. When a grade is to be numeric, its integer value between 0% and 100% shall be submitted to the Registrar. The corresponding letter grades, and the points awarded for each credit hour, are as follows:

Numeric Grade	Letter Grade	Points Per Credit Hour
80-100%	A	4
65-79%	B	3
55-64%	C	2
50-54%	D	1
0-49%	F	0

   An explanation of each of these letter grades can be found below under **Descriptions of Letter Grades Which Correspond to Numeric Grades**.

   b. When a grade is to indicate only whether a student passed or failed a course, one of the following letter grades shall be submitted to the Registrar, for which no points shall be applicable:

Result	Letter Grade	Description
Pass	PAS	indicates that performance met or exceeded expectations; credit is awarded for the successful completion of the course
Fail	FAL	indicates that performance was below expectations; no credit is awarded for the successful completion of the course

   c. In a work term course, the following letter grade may instead be submitted to the Registrar, for which no points shall be applicable:

Result	Letter Grade	Description
Pass With Distinction	PWD	indicates that performance significantly exceeded expectations; credit is awarded for the successful completion of the course

2. The use of a grading system other than those described above, including the use of the Pass With Distinction letter grade in a course which is not a work term course, requires the approval of the University Senate.
3. Where circumstances warrant, and in accordance with the relevant University regulations, a student may be assigned one of the following letter grades, for which no points shall be applicable:

Result	Letter Grade	Description
Incomplete	INC	grade cannot be determined until the student has completed additional course requirements; see **Grading, Incomplete Grades**
Absent	ABS	grade cannot be determined until the student has written a deferred final examination; see **Final Examinations, Exemptions From Final Examinations and Procedures for Applying to Write Deferred Examinations**
Drop	DR	student has dropped the course without academic prejudice; see **Registration, Dropping Courses Without Academic Prejudice**
Drop Under Exceptional Circumstances	DEX	student has been permitted to retroactively drop the course without academic prejudice; see **Registration, Dropping Courses Retroactively**
Aegrotat	AEG	student has been granted aegrotat status; see **Grading, Aegrotat Status**

4. The grading system to be used in a course, including the option to choose between multiple grading systems, is at the discretion of the academic unit, and cannot be appealed by a student.
5. When an academic unit offers a choice of grading systems where only one is numeric, students are encouraged to consult with an academic advisor before declaring their choice, as this decision may have implications for program admissions, scholarships, and other matters of an academic nature.
6. Should any dispute or uncertainty arise in the application of the method of evaluation to determine a student's grade in a course, or in a student's choice of grading system when this option has been provided, the final authority to make grading decisions rests with the Dean of the appropriate Faculty/School or the Vice-President of the Marine Institute, in consultation with the course instructor and the head of the appropriate academic unit.

6.9.2 Descriptions of Letter Grades Which Correspond to Numeric Grades

- "A" indicates excellent performance with clear evidence of:

  comprehensive knowledge of the subject matter and principles treated in the course,
  a high degree of originality and independence of thought,
  a superior ability to organize and analyse ideas, and
  an outstanding ability to communicate.

- "B" indicates good performance with evidence of:

  substantial knowledge of the subject matter,
  a moderate degree of originality and independence of thought,
  a good ability to organize and analyse ideas, and
  an ability to communicate clearly and fluently.

- "C" indicates satisfactory performance with evidence of:

  an acceptable grasp of the subject matter,
  some ability to organize and analyse ideas, and
  an ability to communicate adequately.

- "D" indicates minimally acceptable performance with evidence of:

  rudimentary knowledge of the subject matter,
  some evidence that organizational and analytical skills have been developed, but with significant weaknesses in some areas, and
  a significant weakness in the ability to communicate.

- "F" indicates failing performance with evidence of:

  an inadequate knowledge of the subject matter,
  failure to successfully complete required work,
  an inability to organize and analyse ideas, and
  an inability to communicate.

6.9.3 Good Writing

1. Students at all university levels should have reasonably sophisticated and effective communication skills and are expected to demonstrate proficiency in logical organization, clarity of expression and grammatical correctness. Good writing is expected of students in all courses. Upon graduation students should be capable of expressing complicated ideas clearly and concisely and should be able to develop arguments in a logical manner. When, in the judgement of the instructor, a student persistently fails to display a reasonable standard of writing, the instructor may consider this when assigning a final grade.
2. Good writing is characterized by the following qualities:
   - **Content**

     critical insight and freshness of thought,
     clear and penetrating ideas,
     perceptive, pure grasp of subject,
     intelligent use of primary and secondary sources, and
     a sense of completeness about the handling of the topic.
   - **Organization**

     effective introduction and conclusion,
     main idea is clear and logical development follows,
     smooth transitions, and
     good use of details.
   - **Style**

     appropriate, accurate, precise and idiomatic diction, and
     sentences varied in kind, length and effect.
   - **Mechanics**

     consistently correct spelling,
     accurate use of punctuation,
     grammatically correct sentences, and
     well organized paragraphing.

6.9.4 Linked Course

1. A linked course is a course comprising two components and is normally identified by the letter "A" or "B" as the last character of the course number. No credits or points are assigned to the "A" part of a linked course. No credits or points are given until the "B" part is successfully completed. Credits and points will be awarded upon successful completion of the "B" part and will be attributed to the "B" part only.

6.9.5 Incomplete Grades

1. A student who, for extenuating circumstances, is unable to complete the requirements of a course may, with the approval of the appropriate academic unit, be granted a letter grade of incomplete (INC) in the course. This grade shall be valid for only one week following the start of classes in the next academic semester or session as stated in the **University Diary**. In the event that a numeric grade has not been received by the Registrar by this deadline the INC shall be changed to the letter grade F with a numeric grade 0%.
2. A student unable to complete the requirements of a course by the end of one week following the start of classes in the next academic semester or session as stated in the **University Diary**, may be permitted an extension of time not exceeding the last date for examinations in the semester following that in which the student was enrolled in the course. Such an extension may be granted by the head of the appropriate academic unit at the request of the student. In the event that a numeric grade has not been received by the Registrar by this new deadline the INC shall be changed to the letter grade F with a numeric grade 0%. In special circumstances, students registered for a Social Work Internship may be given an extension not exceeding two semesters. Students registered in one of Human Kinetics and Recreation 2210, 2220, 3210, 3220, 4210 or 4220 may be given an extension not exceeding three semesters, by the Academic Council of the School of Human Kinetics and Recreation.

6.9.6 Calculation of Averages

Only courses evaluated using final grades with associated numeric grades and points are included in the calculation of all averages. In calculating current averages the grades obtained in the A part of linked courses shall be included, while the grades obtained in foundation courses and work terms shall be excluded. Credit received as a result of transfer credit and challenge for credit are not included in the calculation. These calculations may be expressed as averages or grade point averages.

1. Current average: is a method of expressing a student's performance for the semester. The current average is based on final grades. The current average is calculated by computing the sum of the numeric grade in each course multiplied by the course weight and dividing that sum by the total of the course weights.
2. Cumulative average: is a method of expressing a student's performance over the student's academic career recorded since the beginning of the 1980-81 academic year. Where any given course, or an equivalent or cross-listed course, is attempted two or more times and is not repeatable, only the best attempt is included in the average. The cumulative average is calculated by computing the sum of the numeric grade in each course multiplied by the credit hour value and dividing that sum by the total number of credit hours attempted.
3. Current grade point average: is a method of expressing a student's performance for the semester. The points associated with each letter grade are multiplied by the course weight. The current grade point average is calculated by dividing the total number of grade points earned by the total of the course weights.
4. Cumulative grade point average: is a method of expressing a student's performance over the student's academic career recorded since the beginning of the 1980-81 academic year. Where any given course, or an equivalent or cross-listed course, is attempted two or more times and is not repeatable, only the best attempt is included in the average. For each course used in the calculation, the points associated with each letter grade are multiplied by the course credit hour value. The cumulative grade point average is calculated by dividing the total number of points earned by the total number of credit hours attempted.

6.9.7 Aegrotat Status

1. Students in their final semester or session before graduation, who have been absent from a final examination where one has been scheduled or who have been prevented from completing the semester's or session's work, for reasons which qualify them to write a deferred examination, may, in exceptional circumstances, be given credit for the course on the recommendation of the Senate Committee on Undergraduate Studies.
2. Application for aegrotat status, with full details duly authenticated, must be made to the Registrar, indicating each course for which the application is being made, within one week after the last day of final examinations.

6.10 Dean's and Vice-President's List

6.10.1 General Information

Memorial University of Newfoundland acknowledges the academic success of its students in various ways. One of these is by naming students to the appropriate dean's or vice-president's list. Annually, every academic unit will name to its list a maximum of 10% of its students, selected on the basis of academic performance in the nominating period.

6.10.2 Procedure and Criteria

1. At the end of the Winter semester, academic units will nominate students to the appropriate list based on academic performance in the three preceding semesters, Spring, Fall, and Winter.
2. Students on the dean's and vice-president's list will be selected based on the following minimum criteria:
   - The student must have obtained a grade point average of at least 3.5 in the credit hours completed in the preceding Spring, Fall, and Winter semesters.
   - The student must have attended full-time in at least two of the three preceding semesters.
   - The student must have successfully completed at least 27 credit hours over the preceding Spring, Fall, and Winter semesters, although an academic unit may require that the 27 credit hours be completed in any two of the three preceding semesters.
   - In consideration of specific program requirements, individual academic units may include students who have successfully completed, over the three preceding semesters, a course load other than 27 credit hours, but which is consistent with the course load defined by the program.
3. A notation will be placed on the student's transcript indicating that the student has been named to the dean's or vice-president's list.

6.11 Continuance and Readmission

These regulations will be applied at the end of each semester to any student who is registered in a course load of at least 9 credit hours on the last day for adding courses in a semester or session, including a student who later drops courses and changes status to that of a part-time student.

6.11.1 Eligibility for Continuance

6.11.1.1 Academic Criteria for Continuance in the University

At the end of each semester, in order to be eligible for continuance in the University, a student is required either:

- to obtain a current average of 50% in the courses for which the student is registered on the last day for dropping courses without academic prejudice, or
- to have obtained a cumulative average of at least 55%.

6.11.1.2 Academic Criteria for Continuance in Programs of Study

- Most academic units have separate promotion or advancement criteria for continuation of students in specific programs of study. Students are advised to check the regulations of the appropriate academic unit for details. The appropriate committee on undergraduate studies may, at any time, require a student to withdraw for academic reasons.

6.11.1.3 Other

- Students who meet the academic criteria for continuance in the University but who have not registered for courses for three or more

consecutive semesters are required to apply for readmission to the University in accordance with the **Admission/Readmission to the University (Undergraduate)** regulations.

- These regulations notwithstanding, the continuance of any student at this University is subject to all University regulations.

6.11.2 Academic Warning

1. Any student who, for the first time, fails to meet the requirements outlined under **Eligibility for Continuance - Academic Criteria for Continuance in the University** will be given an academic warning.
2. Certain conditions may be set for students who have been given an academic warning. Any conditions will be set by the head of the appropriate academic unit and will be administered in conjunction with the Registrar. These conditions may include, but are not limited to the following:
   - restrictions on course load,
   - enrollment in courses designed to improve academic competence,
   - involvement with programs designed to enhance success in university studies, such as those which teach time management, study, or similar skills,
   - regular meetings with a faculty advisor.

6.11.3 Ineligibility for Readmission

1. Any student who has previously been given an academic warning and who again fails to meet the requirements, as outlined under **Eligibility for Continuance - Academic Criteria for Continuance in the University,** at this or another recognized university or college, will not be eligible for readmission to the following two semesters.
2. Any student who has previously been given an academic warning and who fails, for the second time, to meet the requirements, as outlined under **Eligibility for Continuance - Academic Criteria for Continuance in the University,** at this or another recognized university or college, will not be eligible for readmission to the following three semesters. To be considered for readmission after this period, the student will need the recommendation of the head of the appropriate academic unit, or, in the case of a student with an undeclared program of study, a senior faculty advisor.
3. Any student who fails, for the third time, to meet the requirements, as outlined under **Eligibility for Continuance - Academic Criteria for Continuance in the University**, at this or another recognized university or college, will be considered for readmission only on appeal following a period of withdrawal of at least six semesters. This appeal will be considered by the Senate Committee on Undergraduate Studies only on the recommendation of the head of the appropriate academic unit, or in the case of a student with an undeclared program of study, a senior faculty advisor.
4. In very exceptional circumstances, a student who has been required to withdraw under **Eligibility for Continuance - Academic Criteria for Continuance in the University** may be permitted to return to the University without serving the full period of dismissal. However, this is possible only once a student has served at least one-half of the required dismissal period. An appeal for readmission will only be considered in the case of health issues, bereavement and/or other acceptable cause, duly authenticated.

   Requests shall be submitted to the Office of the Registrar by e-mail to appeals.readmission@mun.ca no later than June 15 for readmission to Fall semester, October 15 for readmission to Winter semester, and February 15 for readmission to Spring semester.

   Requests must include the following information:

   - name,
   - current address and telephone number,
   - Memorial University of Newfoundland email address,
   - student ID number,
   - semester to which student is seeking readmission
   - grounds for the request, and
   - supporting documentation. Medical documentation should normally be in the form of the Student Health Certificate, available at www.mun.ca/regoff/forms.php.
5. Certain conditions may be set for students who are readmitted after a period of ineligibility. These conditions are outlined under **Academic Warning**.
6. Academic units reserve the right to deny readmission where a student has been determined to have engaged in unprofessional conduct. The code of ethics of the appropriate profession will serve as the guidelines when making this determination. However, should there not be an appropriate code of ethics, the following standard will apply: unprofessional conduct is that conduct which involves a breach of the duties required by professional ethics.
7. The University reserves the right to deny a student readmission where, in the opinion of the Senate Committee on Undergraduate Studies, following appropriate professional consultation, there is a reasonable likelihood that the student's health or behaviour could endanger the lives, health, or safety of other persons on-campus or off-campus where such a location pertains to University studies. If the University denies a student readmission, the student must be advised of the nature of the case, must be provided with an opportunity to answer the case, and must be advised of the right to appeal before the penalty imposed takes effect. For information regarding the appeal procedure refer to **Appeal of Decisions.**
8. These regulations notwithstanding, the readmission of any student at this University is subject to all University regulations.

6.12 Academic Misconduct

6.12.1 Principles

Within the University community there is a collective responsibility to maintain a high level of scholarly integrity. A student is expected to adhere to those principles which constitute proper academic conduct. Academic misconduct cannot be condoned or even appear to be condoned. A student has the responsibility to know which actions, as described under **Academic Offences**, could be construed as dishonest or improper. A student is reminded that for further guidance on proper scholarly behaviour the student should seek advice from the student's instructors and faculty advisors.

6.12.2 General Information

1. These procedures shall apply to all academic offences relating to undergraduate studies involving, but not limited to, those students who either have been or who are enrolled at Memorial University of Newfoundland. Notification of an allegation of academic misconduct will be forwarded to the last known mailing address of the student as noted on the files at the Office of the Registrar, and/or to the official University email address of the student. The University reserves the right to implement action under these

procedures where an allegation has been made against a student but where reasonable efforts to contact the student are unsuccessful.

2. Meetings and interviews stipulated in this regulation will be held in person, or at a distance using telephone or other interactive technologies.
3. A student who wishes to attend classes, laboratories or other educational activities while an investigation under these procedures is being carried out, can do so only with the written permission of the academic unit concerned. Permission to do so will only be granted with the understanding that if the allegation of academic misconduct is proven and the penalty involves either suspension or expulsion, credit will not be granted for work completed prior to a finding of guilt. This provision excludes students charged with an offence under the *Code of Student Conduct*. For information regarding the *Code of Student Conduct* contact the Office of Student Life.
4. Although a student can continue in a program of studies, if eligible, while an investigation under these procedures is being carried out, the University does not accept liability for any consequences to the student's progress. However, the University may take these consequences into account, as appropriate and to the extent feasible, in cases where charges are dropped or the student is not found guilty. The consequences arising from an investigation and any negative decision rendered may include retroactive effects on grades or promotion within a program.
5. A student accused of academic misconduct may consult advisors or facilitators. Such advisors may include a representative from a Memorial University of Newfoundland student union, an international student advisor, a faculty advisor, a University counselor or a faculty member who is familiar with these Regulations and who is willing to undertake the role of advisor whether resolution is sought through **Procedures for Resolution of Alleged Academic Offences at the Unit Level** or **Procedures for Resolution of Alleged Academic Offences by the Senate Committee on Undergraduate Studies**.
6. Where an allegation of academic misconduct relates to research and the Tri-Agency Framework: Responsible Conduct of Research, as amended from time to time, the Framework applies. These procedures shall be applied in a manner consistent with the minimal requirements of the Framework.
7. Where an allegation of academic misconduct relates to research involving United States Public Health Service (USPHS) funds, these procedures shall be applied in a manner consistent with the minimal requirements of the U.S. Office of Research Integrity or other appropriate offices of the U.S. Department of Health and Human Services, including U.S. Federal Regulation 42 CFR Parts 50 and 93, as amended from time to time, and the 'Statement on Dealing with Allegations of Research Misconduct Under USPHS Research-related Activities for Foreign Institutions.'

6.12.3 General Procedure

1. When a member of the University community (faculty, staff, student) has grounds for belief that an academic offence has been committed there should be an attempt between the parties concerned to resolve allegations of minor offences. If the alleged offence is not deemed to be minor by the accuser, or resolution proves impossible, or one party is dissatisfied with the resolution, the matter shall be reported, without delay, to the head of the appropriate academic or administrative unit. If resolution is achieved and it is agreed that an academic offence has been committed, then the offence, together with the penalty applied, shall be reported to the head of the academic or administrative unit.
2. Where resolution is not achieved, and if in the judgment of the head of the academic or administrative unit, the alleged offence warrants resolution at the unit level, the individuals involved will be advised to attempt to resolve the matter through **Procedures for Resolution of Alleged Academic Offences at the Unit Level**. In the event that no resolution is possible through these procedures between the individual parties, the head of the academic or administrative unit will institute proceedings through the Senate Committee on Undergraduate Studies.
3. If, in the judgment of the head of the academic or administrative unit, the alleged offence against University regulations is such as to warrant resolution through the Senate Committee on Undergraduate Studies, the head of the academic or administrative unit will refer the matter to the Secretary of the Senate Committee on Undergraduate Studies, and **Procedures for Resolution of Alleged Academic Offences by the Senate Committee on Undergraduate Studies** will be implemented.
4. In all cases, it is the responsibility of the academic or administrative unit to ensure that fairness and impartiality are achieved in the treatment of students.

6.12.4 Academic Offences

1. In the following section the plural shall be deemed to include the singular.
2. Academic offences shall be deemed to include, but shall not be limited to, the following:
   - **Cheating on examinations or any other tests, theses, assignments, work term reports, projects, laboratory assignments, laboratory reports or internship reports**: This includes copying from another student's work or allowing another student to copy from one's own work; consulting with any unauthorized person during an examination or test; possessing unauthorized aids; using unauthorized aids; or knowingly recording or reporting false empirical or statistical data. The work referred to includes examinations, theses, assignments, work term reports, projects, laboratory assignments, laboratory reports, internship reports, or any other tests which are to be used in judging the student's performance in a course or program of study, or on any special tests which the University may offer.
   - **Impersonating another student or allowing oneself to be impersonated**: This includes the imitation of a student or the entrance into an arrangement with another person to be impersonated for the purposes of taking examinations or tests or carrying out laboratory or other assignments.
   - **Plagiarism:** Plagiarism is the act of presenting the ideas or works of another as one's own. This applies to all material such as essays, laboratory assignments, laboratory reports, work term reports, design projects, seminar presentations, statistical data, computer programs, research results and theses. The properly acknowledged use of sources is an accepted and important part of scholarship. Use of such material without acknowledgment is contrary to accepted norms of academic behaviour. Information regarding acceptable writing practices is available through the Writing Centre at www.mun.ca/writingcentre.
   - **Theft of examination papers or other material**: This includes obtaining by any improper means examination papers, tests, or any other such material.
   - **Use and/or distribution of stolen material**: This includes the use of material which the student knows to have been improperly obtained and/or the distribution of such material.
   - **Submitting false information**: This includes falsifying academic forms or records, submitting false credentials, medical or other certificates, or making a false, misleading or incomplete declaration to the University.
   - **Submitting work for one course or work term which has been or is being submitted for another course or work term at this or any other institution without express permission to do so**: This includes the presentation of an essay, report or

assignment to satisfy some or all of the requirements of a course when that essay, report, or assignment has been previously submitted or is concurrently being submitted for another course without the express permission of the professor(s) involved.

- **Prevention or obstruction of access to works or materials provided by the University needed by others for academic purposes.**
- **Attempt of bribery, and/or threat of blackmail to influence the award of any credit, grade, honour or academic decisions**.
- **Failure to follow relevant University/Faculty/School guidelines on ethics**.
- **Failure to follow the Memorial University of Newfoundland Code**.

6.12.5 Procedures for Resolution of Alleged Academic Offences at the Unit Level

6.12.5.1 General Information

These procedures will not be applied to cases involving alleged offences on final examinations, any other evaluative instruments worth 40% or more of the final grade, allegations of impersonation or allegations of submission of forged documents. Such alleged offences are governed by the **Procedures for Resolution of Alleged Academic Offences by the Senate Committee on Undergraduate Studies**.

6.12.5.2 Explanation of Procedures

If, upon receiving a report of an alleged academic offence, the head of the academic or administrative unit decides that an attempt should be made to resolve the matter at the unit level the following procedures shall apply:

1. Normally within one week of notification, the head of the appropriate academic or administrative unit shall request a meeting with the accuser and the accused and at the meeting the head shall state the allegation, review the **Procedures for Resolution of Alleged Academic Offences at the Unit Level** including the range of applicable penalties, and arrange a second meeting between the accuser and the accused only.
2. At the second meeting the accuser and accused shall endeavour to obtain a mutually satisfactory resolution of the matter.
3. The accuser and accused shall report jointly to the head of the academic or administrative unit on the result of their second meeting.
4. If the report is of a resolution which the head of the academic or administrative unit considers to be fair and equitable the matter shall be considered closed. If the head of the academic or administrative unit considers the reported resolution to be unfair and/or inequitable the head of the academic or administrative unit will endeavour to obtain an alternative satisfactory resolution directly with the parties.
5. Should all reasonable efforts to obtain a resolution at the unit level fail, the head of the academic or administrative unit will refer the case to the Secretary of the Senate Committee on Undergraduate Studies and shall inform the accuser and the accused accordingly. From this stage onward **Procedures for Resolution of Alleged Academic Offences by the Senate Committee on Undergraduate Studies** will apply.
6. At any stage of the Procedures for Resolution of Alleged Academic Offences at the Unit Level, the student may ask that the student's case be referred to the Secretary of the Senate Committee on Undergraduate Studies, and thereafter the **Procedures for Resolution of Alleged Academic Offences by the Senate Committee on Undergraduate Studies** will apply.
7. Should the accused be found guilty, a brief description of the offence and the penalty(ies) applied shall be forwarded by the head of the academic or administrative unit to the Office of the Registrar.

6.12.5.3 Failure to Appear or Respond

1. If at any stage of the **Procedures for Resolution of Alleged Academic Offences at the Unit Level**, the accused fails to respond to a charge, without reasonable cause, within two weeks of notification of an allegation, action may be taken on the charge in the absence of the accused.
2. If at any stage of the **Procedures for Resolution of Alleged Academic Offences at the Unit Level**, the accuser fails to appear at a scheduled meeting to defend an allegation, without reasonable cause, the action will be dismissed.

6.12.5.4 Penalties in the Case of Resolution at the Unit level

A student who has been found guilty of an academic offence will be subject to a penalty or penalties commensurate with the offence. Some cases may warrant more than one penalty for the same offence, and previous academic misconduct will be taken into account in determining the severity of penalties. The range of penalties and their determination are:

1. **Resubmission**: of work with appropriate reduction in grade: will allow a student to complete and submit the work a second time.
2. **Reprimand**: will be in the nature of a warning by the head of the academic or administrative unit to the student that the student's behaviour has been unacceptable to the University.
3. **Reduction of grade**: will apply to an examination, test, or assignment to which an offence is relevant, and will be decided by the head of the academic or administrative unit.

6.12.6 Procedures for Resolution of Alleged Academic Offences by the Senate Committee on Undergraduate Studies

6.12.6.1 General Information

If the matter cannot be resolved following the **Procedures for Resolution of Alleged Academic Offences at the Unit Level**, or if, in the opinion of the head of the academic or administrative unit, the allegation involves a major breach of University regulations, or in cases involving alleged offences on final examinations, evaluative instruments worth 40% or more of the final grade, allegations of impersonation or allegations of submission of forged documents, the following **Procedures for Resolution of Alleged Academic Offences by the Senate Committee on Undergraduate Studies** shall apply. In the application of these procedures, in the case of students attending Grenfell Campus, the Grenfell Campus Sub-Committee of the Senate Committee on Undergraduate Studies shall assume the role and authority defined below for the Senate Committee on Undergraduate Studies. Should there be an instance where the case cannot be heard by the Senate Committee on Undergraduate Studies or the Grenfell Campus Sub-Committee of the Senate Committee on Undergraduate Studies, but is in the first instance heard by the Senate Committee on Academic Appeals, the Senate Committee on Academic Appeals shall assume the role and authority defined below for the Senate Committee on Undergraduate Studies.

6.12.6.2 Explanation of Procedures

1. If the head of the academic or administrative unit (in the case of departmentalized faculties, the head in consultation with the dean) is satisfied that the student has a serious allegation to answer, that person shall inform the student in writing or at the official University email address of the student, normally within one week, of the nature of the allegation against the student. In addition, the head of the academic or administrative unit shall report to the Secretary, Senate Committee on Undergraduate Studies, c/o Office of the Registrar, who will, normally within one week appoint as an investigator a member of the Senate Committee on Undergraduate Studies other than Committee members from that Faculty or School, student representatives, and ex-officio members of the Senate Committee on Undergraduate Studies. The investigator will interview separately the accuser, the accused and relevant witnesses. At these interviews the investigator, the accuser, the accused and relevant witnesses all have the right to be accompanied by a registered student or a member of the faculty or staff of the University.
2. Upon completion of these interviews, the investigator shall submit a written report of all findings to the Secretary, Senate Committee on Undergraduate Studies, c/o Office of the Registrar. Normally, the report will be submitted within four weeks of appointment as an investigator.
3. The Secretary of the Senate Committee on Undergraduate Studies shall present this report to both the accuser and accused for perusal and comment. Once in receipt of this report, the accuser and accused shall have two weeks in which to submit to the Secretary, Senate Committee on Undergraduate Studies any additional comments on the report that the person wishes to be considered in the deliberations of the Senate Committee on Undergraduate Studies.
4. The Secretary of the Senate Committee on Undergraduate Studies shall present to the Senate Committee on Undergraduate Studies for decision all information received from the investigator as well as comments from the accuser and accused. The investigator shall attend the meeting held to consider the case to answer questions raised by the Senate Committee on Undergraduate Studies and to provide information pertinent to the case, but shall be absent from the voting process.
5. Once a vote is taken, should the accused be found guilty, the Senate Committee on Undergraduate Studies shall take appropriate action in accordance with **Penalties in the Case of Resolution by the Senate Committee on Undergraduate Studies**.

6.12.6.3 Failure to Appear or Respond

1. If at any stage of the **Procedures for Resolution of Alleged Academic Offences by the Senate Committee on Undergraduate Studies**, the accused fails to respond to a charge, without reasonable cause, within two weeks of notification of an allegation, action may be taken on the charge in the absence of the accused.
2. If at any stage of the **Procedures for Resolution of Alleged Academic Offences by the Senate Committee on Undergraduate Studies**, the accuser fails to appear at a scheduled interview to defend an allegation, without reasonable cause, the action will be dismissed.

6.12.6.4 Appeals Against Decisions of the Senate Committee on Undergraduate Studies

Appeals against findings of guilt and/or penalties assigned by the Senate Committee on Undergraduate Studies or the Grenfell Campus Sub-Committee can be directed to the Senate Committee on Academic Appeals, c/o The Office of the Registrar in accordance with **Appeal of Decisions, The Senate Committee on Academic Appeals**.

When considering an appeal against decisions of the Senate Committee on Undergraduate Studies, the Senate Committee on Academic Appeals has the authority to:

- Uphold the decision of the Senate Committee on Undergraduate Studies and, if applicable, the penalty assigned by that Committee.
- Uphold the decision of the Senate Committee on Undergraduate Studies and assign a new penalty, if applicable.
- Reverse the decision of the Senate Committee on Undergraduate Studies and assign a penalty, if applicable.

6.12.6.5 Penalties in the Case of Resolution by the Senate Committee on Undergraduate Studies or the Senate Committee on Academic Appeals

A student who has been found guilty of an academic offence will be subject to a penalty or penalties commensurate with the offence. Some cases may warrant more than one penalty for the same offence, and previous academic misconduct will be taken into account in determining severity of penalties. Enforcement of penalties resulting from **Procedures for Resolution of Alleged Academic Offences by the Senate Committee on Undergraduate Studies** will be overseen by the Registrar. A student who has been found guilty will be issued a Reprimand, which shall be in the nature of a warning to the student that the student's behavior has been unacceptable to the University. Additionally, a student who has been found guilty will be required to successfully complete specific modules of INTG 1000 Academic Integrity and submit a written reflective evaluation as assigned. In addition to the Reprimand and INTG 1000, the range of penalties and their determination is:

1. **Resubmission**: of work with appropriate reduction in grade; will allow a student to complete and submit the work a second time.
2. **Reduction of grade**: will apply to an examination, test, or assignment to which an offence is relevant, or to the entire course, and will be decided by the Senate Committee on Undergraduate Studies or the Senate Committee on Academic Appeals.
3. **Rescinding of scholarships, bursaries or other awards**: the recommendation for rescinding of scholarships, bursaries or other awards will be made by the Senate Committee on Undergraduate Studies to the Senate Committee on Scholarships and Awards for a final decision. In the case of a decision by the Senate Committee on Academic Appeals to rescind scholarships, bursaries or other awards, the decision will be forwarded to the Senate Committee on Scholarships and Awards for information. The Senate Committee on Undergraduate Studies or the Senate Committee on Academic Appeals will notify the student, in writing or by email, of the recommendation or decision.
4. **Probation**: the period of probation will be determined by the Senate Committee on Undergraduate Studies or the Senate Committee on Academic Appeals. The impact of being placed on probation is that the commission of any further academic offence during the period of probation may lead to suspension or expulsion.
5. **Suspension**: will apply to a course, department, faculty, school, or the University. The period of suspension will be determined by the Senate Committee on Undergraduate Studies or the Senate Committee on Academic Appeals and shall not exceed six consecutive semesters.
6. **Expulsion**: the recommendation for expulsion from the University will be made by the Senate Committee on Undergraduate Studies or the Senate Committee on Academic Appeals to the President of the University for a final decision. Prior to the President's decision, the Senate Committee on Undergraduate Studies or the Senate Committee on Academic Appeals will notify the accused, in writing or by email, of the recommendation for expulsion from the University. The accused will be allowed a period of two weeks following the date of release of such notification to lodge an appeal before the President's final decision concerning expulsion from the University. If the penalty was assigned by the Senate Committee on Undergraduate Studies, any such appeal should be made in writing or by email to the Senate Committee on Academic Appeals, c/o the Office of the Registrar. If the penalty was assigned by the

Senate Committee on Academic Appeals, any such appeal should be made in writing or by email to the Executive Committee of Senate, c/o the Office of the Registrar.

7. **Rescinding of degree**: the recommendation for the rescinding of a degree previously awarded by the University will be made by the Senate Committee on Undergraduate Studies or the Senate Committee on Academic Appeals to Senate for a final decision. Prior to Senate's decision the Senate Committee on Undergraduate Studies or the Senate Committee on Academic Appeals will notify the accused, in writing, of the recommendation for rescinding of the degree. The accused will be allowed a period of two weeks following the date of release of such notification to lodge an appeal before the Senate's final decision concerning the rescinding of the degree. If the penalty was assigned by the Senate Committee on Undergraduate Studies, any such appeal should be made in writing or by email to the Senate Committee on Academic Appeals, c/o the Office of the Registrar. If the penalty was assigned by the Senate Committee on Academic Appeals, any such appeal should be made in writing to the Executive Committee of Senate, c/o the Office of the Registrar.

6.12.7 Transcript Entries Related to Penalties

1. Transcript entries shall relate to the penalty(ies) imposed as follows:

Penalty	Transcript Entry
Reprimand	No transcript entry
Reduction of Grade	Entry of final grade for course
Probation	"On probation at the University for academic misconduct until [Day, Month, Year]"
Suspension	"Suspended from the University/Faculty/School/Program/Course for academic misconduct until [Day, Month, Year]"
Expulsion	"Expelled from the University for academic misconduct effective [Day, Month, Year]"
Rescinding of Degree	"Degree rescinded for academic misconduct"

2. The transcript entries for "probation" or "suspension" will be removed entirely upon the expiration of the penalty.

6.12.8 Disposition of Documentation

1. The disposition of documents relating to allegations under these procedures shall be as follows:
   - In cases where the accused was not found guilty, none of the documentation shall be retained.
   - In the case of a resolution effected through **Academic Misconduct - General Procedure** or **Procedures for Resolution of Alleged Academic Offences at the Unit Level**, a brief description of the offence and the penalty(ies) applied shall be forwarded by the head of the academic or administrative unit to and retained by the Office of the Registrar, separate from the student files.
   - In the case of a resolution effected through the **Procedures for Resolution of Alleged Academic Offences by the Senate Committee on Undergraduate Studies**, all documentation shall be forwarded to and retained in the Office of the Registrar, separate from the student files.

6.13 Graduation

Memorial University of Newfoundland awards undergraduate and graduate degrees, diplomas, and certificates three times per year. Normally, this takes place at regular convocation ceremonies that are held each Spring and Fall to celebrate those graduands who completed programs by the end of the preceding Winter and Spring semesters, respectively. An *in-absentia* graduation occurs each Winter to award degrees, diplomas, and certificates to those graduands who completed programs by the end of the preceding Fall semester.

Students who are fulfilling, or have fulfilled, all academic requirements for their programs are strongly encouraged to apply to graduate by the deadline date noted on the Office of the Registrar website at www.mun.ca/regoff/graduation. The "Application to Graduate" is available within Memorial Self Service which can be accessed at selfservice.mun.ca. Additional information is available from the Office of the Registrar at www.mun.ca/regoff/graduation. Information regarding convocations, including the dates of the ceremonies, is available at www.mun.ca/convocation.

6.13.1 Application to Graduate - Degrees, Diplomas and Certificates

Students in their graduating year must apply to the Registrar to be admitted to a degree or to be awarded a diploma or certificate. Application must be made through the Student Self-Service at https://selfservice.mun.ca. The deadlines for application submission are July 15 for Fall (October) graduation, January 3 for Winter (February) *in-absentia* graduation, and January 15 for Spring (May) graduation. Applications received after these dates will be processed as time and resources permit.

1. No student can be awarded a degree, diploma or certificate unless and until an average of at least 2 points has been obtained on the total number of credit hours required for such degree, diploma or certificate. The degree of Doctor of Medicine and the degree of Bachelor of Education (Primary/Elementary) as a Second Degree Conjoint with Certificate in STEM Education are not included in this requirement since all courses comprising each degree are graded on a PAS or FAL basis.
2. It is the duty of the Registrar to certify to the Senate, where appropriate, that students for degrees, diplomas and certificates have met all the regulations and requirements of the University.

6.13.2 Classification of General Degrees

1. General degrees are awarded as "Classified", "Unclassified" or are not classified, in compliance with such regulations as may be required by the academic unit(s) offering the program(s). Refer to the degree regulations of the academic units for further information.
2. General degrees are awarded in three classes based on the system for granting points set forth in **Grading - Letter Grades, Numeric Grades and Points Per Credit Hour**, and determined as follows:
   - A student who obtains an average of 3.5 points or better on the total number of credit hours required for the degree shall be awarded the degree with First-Class Standing and provided that all other degree requirements are met.
   - A student who fails to obtain First-Class Standing but who obtains an average of 2.75 points or better on the total number of

credit hours required for the degree shall be awarded the degree with Second-Class Standing provided that all other degree requirements are met.

- All other students will be awarded the degree with Third-Class Standing, provided that they obtain an average of 2 points or better on the total number of credit hours required for the degree and provided that all other degree requirements are met.

3. When a student obtains credit for more credit hours than are required for the degree, the student's total degree points shall include only those received for the credit hours required. In eliminating from the total points those received for credit hours beyond the requirements of the degree, the credit hour(s) for which the student receives the fewest points shall be disregarded, provided that no credit hour is disregarded that is a requisite for the degree.
4. Where a student receives more than one classified bachelor's degree, the class of each degree will be determined independently by applying the scheme set forth in **Classification of General Degrees** and provided that in determining the points total for each degree only those credit hours may be counted which are applicable towards the degree concerned.
5. A student who has been granted credit for courses successfully completed at Memorial University of Newfoundland before the introduction of the point system, and/or one who has been given credit for courses successfully completed at another university, will have the class of the degree determined by applying the scheme set forth in **Classification of General Degrees** in proportion to the total of required credit hours completed at Memorial University of Newfoundland since the introduction of the point system.
6. An Unclassified degree will be awarded to a student who has completed at Memorial University of Newfoundland, fewer than one-half of the credit hours required for the degree, or fewer than one-half of the required credit hours since the introduction of the point system. All students shall, however, obtain an average of 2 points or better on the total number of the credit hours required for the degree taken at this University since the introduction of the point system.
7. The following degrees are not classified: Bachelor of Education (Intermediate/Secondary), Bachelor of Education (Primary/Elementary) as a Second Degree Conjoint with Certificate in STEM Education, Bachelor of Engineering, Bachelor of Maritime Studies, Bachelor of Music Education, Bachelor of Post-Secondary Education (as a second degree), Bachelor of Science (Pharmacy), Bachelor of Special Education, Bachelor of Technology, Doctor of Medicine, Doctor of Pharmacy, and all degrees offered by the School of Human Kinetics and Recreation.

6.13.3 Classification of Honours Degrees

1. Honours degrees may be classified or not classified in compliance with such regulations as may be required by the academic unit offering the program. Refer to the appropriate degree regulations of the academic units for further information.
2. A student who has been granted credit for courses successfully completed at Memorial University of Newfoundland before the introduction of the point system, and/or one who has been given credit for courses successfully completed at another university, will have the class of the honours degree determined in proportion to the total number of required credit hours completed at Memorial University of Newfoundland since the introduction of the point system.
3. An honours degree awarded a student who has completed at Memorial University of Newfoundland, fewer than one half of the credit hours required for the degree, or fewer than one half of the required credit hours since the introduction of the point system, may be Unclassified or not classified.

6.13.4 Diplomas and Certificates

Diplomas and certificates are not classified.

6.14 Waiver of Regulations

1. All undergraduate regulations notwithstanding, the University reserves the right, in special circumstances, to modify, alter or waive any regulation in its application to individual students where, in the judgment of the head of the appropriate academic unit or the appropriate committee, merit and equity so warrant. In keeping with the principle that decisions to waive regulations should be made as close as possible to the University officer or committee with responsibility for the regulations, requests for waivers, which normally must be made in writing, must be directed as follows:
   - Course Prerequisites or Co-requisites: the head of the academic unit of the course(s) in question.
   - Departmental Regulations: the appropriate committee on undergraduate studies upon the recommendation of the head of the appropriate department.
   - Faculty or School Regulations: the appropriate committee on undergraduate studies. Such waivers shall not reduce the total number of credit hours required for a minor, major, certificate, diploma, or degree program.
   - General Academic Regulations (Undergraduate): the Senate Committee on Undergraduate Studies on the recommendation of the appropriate committee on undergraduate studies. Such waivers shall not reduce the total number of credit hours required for a minor, major, certificate, diploma, or degree program.
   - Scholarships, Bursaries, Awards, Medals and Prizes Regulations: the Committee on Undergraduate Scholarships, Bursaries and Awards on the recommendation or request of the head of the appropriate academic unit.
2. Any student whose request for waiver of regulations has been denied has the right to appeal. With the exception of verbal requests for waiver of Course Prerequisites or Co-requisites, the student will be advised in writing of the reasons for the decision and of the avenue of appeal that may be taken. For information regarding the appeal procedure refer to **Appeal of Decisions**.

6.15 Appeal of Decisions

6.15.1 General Information

1. Every student has the right to appeal decisions resulting from the application of University regulations.
2. Appeals will be considered in the case of health issues, bereavement and/or other acceptable cause, duly authenticated.
3. For assistance in the appeals process, a student is advised to consult with the Office of the Registrar.
4. In preparing an appeal a student may consult advisors. Such advisors may include a representative from a Memorial University of Newfoundland student union, an international student advisor, a faculty advisor, a counsellor or a faculty member who is familiar with the appeals process and who is willing to undertake the role of student advisor or facilitator.
5. Appeals are made before specific committees that exist at the University to provide an objective review of cases. The appeals process is designed to assist a student at critical points in the student's university career, and to provide an accessible and transparent process for a student. A student should refer also to the **Routes of Appeal of Academic Regulations** below for information concerning where appeals should be directed.

6. The principles of natural justice shall be applied to the appeals processes and decisions. These principles include, but are not limited to, such practices as all parties to the appeal receiving timely and adequate notice, all parties to the appeal having the opportunity to submit arguments and supporting documentation and all parties to the appeal being made aware of the evidence considered by the committee. No person shall sit in judgment on an appeal if that person has been previously involved in a decision-making process related to the matter under appeal or if that person has any conflict of interest, bias or reasonable apprehension of bias.
7. While the University makes provision for a student to appeal decisions made under University regulations, the academic, financial or other consequences of the appeals process rests with the student.
8. When an appeal is denied, the student shall be advised in writing of the reasons for the decision and if there are further steps that can be taken in the appeals process.
9. A student whose appeal is denied by the Senate Committee on Undergraduate Studies may appeal to the Senate Committee on Academic Appeals. Academic units whose decisions are overturned by the Senate Committee on Undergraduate Studies may appeal to the Senate Committee on Academic Appeals. Decisions of the Senate Committee on Academic Appeals are final and within the University there is no further appeal.
10. Unless the student bringing the appeal requests otherwise, student appeals are heard anonymously by all committees except the Senate Committee on Academic Appeals.

6.15.2 Routes of Appeal of Academic Regulations

1. Normally, the responsibility for making an appeal before the appropriate committee of the University rests with the student.
2. A student who is ineligible to register for courses officially but who wishes to attend classes, laboratories or other educational activities while an appeal is in progress can do so only with the written permission of the academic units offering the courses. Such permission shall not be unreasonably withheld.
3. A student whose request for waiver of regulations has been denied may direct the appeal as described below.
   - Course prerequisites or co-requisites: to the appropriate faculty/school committee on undergraduate studies. No further appeal is possible;
   - Applications to write Deferred Final Examinations: to the appropriate faculty/school committee on undergraduate studies;
   - Program Regulations: to the Senate Committee on Undergraduate Studies, c/o The Office of the Registrar, where the appropriate committee on undergraduate studies denies the request for waiver;
   - General Academic Regulations (Undergraduate): to the Senate Committee on Academic Appeals, c/o The Office of the Registrar;
   - Decisions of the Senate Committee on Undergraduate Studies: to the Senate Committee on Academic Appeals, c/o The Office of the Registrar;
   - Scholarships, Bursaries, Awards, Medals and Prizes Regulations: to the Senate Committee on Academic Appeals, c/o The Office of the Registrar; and
   - Decisions of a Faculty/School under **Regulations for Readmission and Advancement**, 7. of the Faculty of Education; **Promotion Regulations, Other Information**, bullet four of the School of Human Kinetics and Recreation; **Regulations for the Degree of Doctor of Medicine, Promotion**, 6. of the Faculty of Medicine; **Promotion Regulations**, 12. of the Faculty of Nursing; **Promotion Regulations, Other Information** of the School of Pharmacy; or **Academic Requirements and Promotion Regulations, Promotion Status, Other Information**, 1., bullet three of the School of Social Work: to the Senate Committee on Academic Appeals, c/o The Office of the Registrar.

6.15.3 Route for Questioning Grades

1. Grades awarded in individual courses cannot be appealed, as the student shall normally have had the opportunity to contest grades immediately after the release of examination results (see **Access to Final Examination Scripts** and **Rereading of Final Examination Scripts**). Dissatisfaction with grades is not sufficient grounds for an appeal.
2. Notwithstanding the above, and recognizing that the awarding of grades is an academic matter within the purview of experts in a discipline or subject area, a student who wishes to question the grades awarded in individual courses may consult with the following in the order given:
   - the course instructor
   - the head of the appropriate academic unit
   - the Dean of the appropriate Faculty/School or Vice-President of the Marine Institute.

6.15.4 Information Required in Letters of Appeal

1. Except in the case of appeals to the Senate Committee on Academic Appeals, appeals must be made in writing, clearly stating the basis for the appeal, and must be directed to the secretary of the appropriate University committee.
2. In the letter of appeal, the student must clearly and fully provide:
   - name,
   - current address and telephone number,
   - Memorial University of Newfoundland e-mail address,
   - student ID number,
   - the decision being appealed,
   - the grounds of appeal, and
   - the resolution being sought.
3. When providing grounds for the appeal, including health issues, bereavement and/or other acceptable cause, a student must present independent evidence to corroborate statements made in the letter of appeal. Preferably, this evidence will come from a professional, such as a health professional, a counsellor, or a professor. However, certificates from other knowledgeable parties may be acceptable.
4. A student shall include with the letter of appeal any submissions the student wishes to make in support of the appeal.
5. In cases where an appeal is based on health issues, the student must produce an original certificate from a health professional. This should normally be in the form of the Student Health Certificate, available at www.mun.ca/regoff/forms.php. For further information see **Information Required in Certificates from Health Professionals**.

6. A student claiming bereavement as grounds must provide an obituary notice or death certificate, together with evidence of a close personal relationship between the student and the deceased.
7. Privacy and Confidentiality: The committees to which appeals are made do require substantial information about the reasons for the appeals in order to make their decisions. However, the committees also recognize each student's right to privacy and its obligations, under the Access to Information and Protection of Privacy Act, to safeguard a student's personal information.

6.15.5 The Senate Committee on Academic Appeals

1. Appeals shall be initiated by submitting a written Notice of Appeal, c/o The Office of the Registrar, containing the following:

   When the Notice of Appeal is from a student:

   - name,
   - current address and telephone number,
   - Memorial University of Newfoundland e-mail address,
   - student ID number,
   - a copy of the decision giving rise to the appeal,
   - supporting documentation,
   - a description of the matter under appeal,
   - the grounds of appeal, and
   - the resolution being sought.

   When the Notice of Appeal is from an academic unit:

   - name of the Head of the academic unit,
   - Memorial University of Newfoundland e-mail address,
   - a copy of the decision giving rise to the appeal,
   - supporting documentation,
   - a description of the matter under appeal,
   - the grounds of appeal, and
   - the resolution being sought.
2. The Notice of Appeal should include, in writing, relevant information in support of the appeal.
3. Except with the approval of the Executive Committee of Senate, notices of appeal shall be submitted no later than the last day of classes in the semester following the semester in which the decision under appeal was sent to the student.
4. In accordance with the principles of natural justice, students and academic units are entitled to make an oral presentation.
5. Appeals shall be heard either through written submission only or through an oral presentation, as requested. No inferences shall be drawn from the choice.
6. When an appeal is heard by an oral presentation, a student may be accompanied by an advisor (see **Appeal of Decisions, General Information**, 4.). A student may participate in person, or at the expense of the University, by way of teleconference, or by such other means approved in advance by the Committee; however, any expenses incurred by the student are the responsibility of the student.
7. Decisions of the Senate Committee on Academic Appeals are final and within the University there is no further appeal.

6.15.6 Information Required in Certificates from Health Professionals

1. A student who requests permission to drop courses; to withdraw from University studies; to have examinations deferred or to obtain other waivers of University, departmental or course regulations based on health issues is required by the University to provide, in support of the request, a certificate from a health professional in the form of a note or letter. While not compulsory, this should normally be in the form of the Student Health Certificate, available at www.mun.ca/regoff/forms.php. If a note or letter is provided other than in the form of the Student Health Certificate, the submission must be on letterhead. Such certificates must be sufficiently specific to allow a proper consideration of a student's case. The University requires that all such certificates must be signed by the health professional, must confirm the specific dates on which the student visited the health professional and should include details on the following:
   - the degree to which the health issue (or treatment, in the case of medication, for example) is likely to have affected the student's ability to study, attend classes, or sit examinations;
   - the length of time over which the student's abilities were likely hampered by the condition (e.g., recurring and severe back pain over a two-month period would likely have a more adverse effect on studies than a single episode of back pain requiring bed rest for a week);
   - the fitness of the student to resume studies (it is in the student's best interest not to return to studies prematurely).
2. The University respects the privacy of students and will keep confidential all such certificates. A student should request that the health professional retain a copy of such a certificate in case the certificate needs to be verified or reissued at a later date.

7 Certificate Programs

Certificate courses are specially designed courses relating to specific areas of study for which no equivalent degree credit course exists and are not applicable towards an existing diploma or degree program.

A student is required to meet ***UNIVERSITY REGULATIONS* - Admission/Readmission to the University (Undergraduate)** for entry to Memorial University of Newfoundland.

A student may receive up to three exemptions for equivalent course work completed through another program or at another institution. If a student has previously obtained credit from Memorial University of Newfoundland for any of the courses on a certificate program, the student will not be required to repeat these courses. To receive exemptions for certificate credit courses, a student must make a written request with supporting documents (transcripts and course descriptions).

7.1 Admission Requirements

A student who wishes to complete certificate programs must be admitted to the University as an undergraduate student and comply with the **General Academic Regulations (Undergraduate)**.

7.2 Regulations for a First Certificate

A Memorial University of Newfoundland certificate is awarded to a student who completes certificate program requirements.

1. Every candidate for a certificate shall comply with all the course requirements governing the award of that certificate.
2. Candidates shall complete at this University a minimum of 9 credit hours of the total number of credit hours required for a certificate.
3. No candidate will be awarded a certificate unless an average of 2 points or better on the total number of credit hours required for the certificate has been obtained.

7.3 Regulations for a Second Certificate

A student who has completed a certificate program and wishes to complete a second certificate must:

1. comply with all course requirements governing the award of that certificate; and
2. complete at least 9 credit hours beyond those required for the first certificate. The courses which comprise these credit hours must be applicable to the certificate sought.

8 Scholarships, Bursaries, Awards and Other Recognition

www.mun.ca/scholarships/home

The Scholarships, Awards and Financial Aid Office administers entrance and undergraduate scholarships, bursaries and awards. A complete list of scholarships, bursaries and awards is available at www.mun.ca/scholarships/scholarships.

8.1 Definitions

Various types of recognitions are available to students of Memorial University of Newfoundland. Included are scholarships, bursaries, awards, fellowships, studentships, prizes and medals.

- A scholarship is based on academic performance and is awarded to the student with the highest average who meets the other conditions of the scholarship. Scholarship standing is required for all scholarships.
- A bursary is based primarily on financial need and may be awarded to full-time students who have a minimum GPA of 2 (out of a possible 4) and meet the other conditions of the bursary.
- Awards, fellowships, studentships, prizes and medals are awarded to recognize special achievements or to assist with special projects or travel and may be awarded to students who have an academic status of clear standing as defined by the University and meet the other conditions of the recognition.
- A general recognition is a scholarship, bursary, award or other recognition that is awarded by the Senate Committee on Undergraduate Scholarships, Bursaries and Awards and is not based on a recommendation from an academic unit.
- An academic unit recognition is a scholarship, bursary, award or other recognition that is awarded by the Senate Committee on Undergraduate Scholarships, Bursaries and Awards based on the recommendation of the appropriate academic unit.

8.2 Scholarship Standing

Students will be considered for scholarships based on the following minimum criteria:

1. Scholarship standing for undergraduate entrance students (who are Canadian citizens or permanent residents graduating from secondary schools within Canada) is defined as a 75% average compiled from the final grades received in secondary school courses required for University admission. Students in level three who, have a 90% or higher average on 3000 level credits from the list of courses covered under ***UNIVERSITY REGULATIONS* - Admission/Readmission to the University (Undergraduate), Applicants Who Have Followed the High School Curriculum of the Newfoundland and Labrador,** may be provisionally offered scholarships. Students graduating from High Schools in other provinces in Canada may be eligible based on corresponding criteria from their provincial secondary program. The provisional offer will remain in effect until University admission averages are determined.
2. Scholarship standing for undergraduate students is defined as a 75% average at the end of two out of the last three semesters in the previous scholarship year and the successful completion of not less than 30 credit hours in those two semesters. In considering students who complete more than 30 credit hours in those two semesters, the average on the actual number of credit hours taken will be reviewed. Students who fail one or more courses during the scholarship year, regardless of the number of courses completed, will not be eligible for scholarships.
3. For Co-op students who do not meet the above definition because of scheduled work terms, scholarship standing is defined as a 75% average over the most recent two academic semesters in the preceding four semesters in which they must have been enrolled as regular full-time Co-op students. Those who fail an academic course or work term during the four-semester period will not be eligible for scholarships.
4. Students transferring to Memorial University of Newfoundland from Universities/Colleges in Canada which are members of Universities Canada and who meet scholarship standing as defined by Memorial University of Newfoundland will be eligible for undergraduate scholarships in the year in which they transfer. Such students must notify the Scholarships, Awards, and Financial

Aid Office in writing of their intention to transfer and provide a complete transcript for the year in question.

5. Not all students who meet the above definitions of scholarship standing will receive a scholarship.

8.3 Waivers

1. A student who does not meet the above definition because of illness, disability, or other acceptable cause, duly authenticated in writing, may apply for a waiver of specific scholarship standing requirements. This application should be made in writing to the Scholarships, Awards and Financial Aid Office.
2. The decision regarding the waiver, including information on the appeals route open to the student in the case of a negative decision, must be communicated in writing to the student by the Scholarships, Awards and Financial Aid Office. For further information refer to **Appeal of Decisions**.

8.4 Award and Renewal of Recognitions

1. Recognitions are awarded by the Senate Committee on Undergraduate Scholarships, Bursaries and Awards in accordance with the terms of reference of the recognition.
2. Unless otherwise stated in the terms of reference, students who have obtained scholarship standing as defined above need not apply for general recognitions.
3. Students with special circumstances and students with questions concerning recognitions with special terms should consult with the Scholarships, Awards and Financial Aid Office.
4. Normally, a student may receive in any one scholarship year:
   - One general recognition that is based solely on academic merit, and/or
   - One general recognition for which the student also meets specific non-academic eligibility criteria.

   Exceptions to these limits may be made on a case-by-case basis by the Waivers Subcommittee of the Senate Committee on Undergraduate Scholarships, Bursaries and Awards. The Scholarships, Awards and Financial Aid Office will, wherever possible, maximize the number of students who benefit from the recognition program.
5. Students who have received general recognition(s) may receive additional academic unit recognition(s). Academic units are encouraged, wherever possible, to maximize the number of students who will benefit from the recognition program.
6. Some recognitions may be held for more than one year but are usually renewable only if the student continues to meet the eligibility criteria stated in the terms of reference.
7. Unless otherwise stated in the terms of reference, recognitions must be taken during the scholarship year for which they are awarded and the student must be classified as a full-time student in order to receive the recognition.
8. The scholarship year runs from May 1st - April 30th.

8.5 Government Assistance

The Government of Canada and the Government of Newfoundland and Labrador work together to provide student financial assistance to residents of the Province. Students who have a demonstrated financial need may, upon application, receive financial support from the Canada-Newfoundland and Labrador Student Financial Assistance Program. Students are encouraged to apply online at www.gov.nl.ca/education/studentaid/ and to apply early.

9 Non-Academic Regulations

9.1 Discipline

The President may use all means deemed necessary for maintaining discipline. Students found guilty of misbehaviour may be suspended or fined on the authority of the President, or expelled from the University by the President on the authority of the Board of Regents. (See the ***Code of Student Conduct***)

9.1.1 Traffic and Parking Regulations On Campus

Students, employees, service personnel, and other persons having a direct association with the University, Health Sciences Centre, or the Fisheries and Marine Institute wishing to park a vehicle in a designated area on campus must obtain a parking permit. Traffic and parking regulations on campus are enforced by Campus Enforcement and Patrol assisted by the Royal Newfoundland Constabulary.

Application forms for vehicle parking permits, copies of the Traffic and Parking Rules and Regulations, and other information pertaining to traffic and parking on campus, are available at the Campus Enforcement and Patrol Office, Facilities Management Building, Room FM1018, or the Health Sciences Centre, Room H2720, or the Fisheries and Marine Institute, Room C2210. Additional Information regarding the Traffic and Parking Rules and Regulations is also available at www.mun.ca/cep/parking.

9.2 Firearms on Campus

Memorial University of Newfoundland prohibits firearms in classrooms on its campuses.

1 The Memorial University of Newfoundland Code

The attention of all members of the University community is drawn to the section of the University Calendar titled **The Memorial University of Newfoundland Code**, which articulates the University's commitment to maintaining the highest standards of academic integrity.

2 Student Code of Conduct

Memorial University of Newfoundland expects that students will conduct themselves in compliance with University Regulations and Policies, Departmental Policies, and Federal, Provincial and Municipal laws, as well as codes of ethics that govern students who are members of regulated professions. The *Student Code of Conduct* outlines the behaviors which the University considers to be non-academic misconduct offences, and the range of remedies and/or penalties which may be imposed. Academic misconduct is outlined in ***UNIVERSITY REGULATIONS* - Academic Misconduct** in the University Calendar.

For more information about the *Student Code of Conduct*, see www.mun.ca/student.

3 Faculty Description

The Faculty of Business Administration is a first-in-class, community-minded business school whose mission is to inspire students to be entrepreneurial and innovative. The Faculty guides students to aim for global success, engages in scholarship with global and local relevance, and serves as a catalyst for the success of organizations and individuals. Creating a culture of firsts, Memorial University of Newfoundland's Faculty of Business Administration has paved the way in Canadian business education by pioneering studies in business ethics, entrepreneurship, social enterprise and co-operative education. In 1973, the University established the first co-operative undergraduate business program in Canada. The Faculty aims to continue this tradition and reinforce its position as a thought leader and champion of sustainability, innovation, inclusion and prosperity all over the world.

The Faculty, along with the Gardiner Centre, Memorial Centre for Entrepreneurship, Centre for Social Enterprise and Husky Centre for Excellence in Sales and Supply Chain Management, focuses on four strategic priorities: to champion change, to educate through experience, to innovate through research and to eliminate barriers through partnerships.

Each business program is designed to give students the skills and experience needed to advance their careers in competitive global environments, and the Faculty's close-knit community provides students with many opportunities to get involved and network with fellow classmates.

Additional information regarding the Faculty of Business Administration and its partner centres is available at www.business.mun.ca.

Students must meet all regulations of the Faculty in addition to those stated in the ***UNIVERSITY REGULATIONS***. For information concerning admission/readmission to the University and general academic regulations (undergraduate), refer to ***UNIVERSITY REGULATIONS.***

For information regarding graduate programs in Business Administration, see the **School of Graduate Studies** section of the University Calendar.

For information regarding fees and charges, see the Financial and Administrative Services website at www.mun.ca/finance/fees.

For information regarding scholarships, bursaries and awards, see the Scholarships/Bursaries/Awards and Other Financial Aid website at www.mun.ca/scholarships/scholarships.

3.1 Accreditation

In 2002, the Faculty of Business Administration became the first business school in Atlantic Canada to be accredited by AACSB International - the Association to Advance Collegiate Schools of Business. AACSB International is one of higher education's most prestigious and rigorous accrediting bodies, stressing academic excellence and dedication to continuous improvement. This accreditation is a significant milestone that ranks the Faculty of Business Administration among top tier business schools both nationally and internationally.

3.2 Academic and Professional Ethics

The Faculty of Business Administration expects its students to adhere to the highest standards of academic and professional integrity. The *Statement and Code of Academic and Professional Integrity* provides guidance and prescriptive standards.

Academic integrity allows students to express their own thoughts, opinions, and values while pursuing academic excellence and striving to achieve their own personal best. It means that they will take responsibility for their learning values and pursue academic goals with honesty and enthusiasm. Academic integrity refers to submitting/presenting work for credit that represents only the student's/students' own work unless otherwise properly acknowledged, documented, and previously authorized by the instructor. This work includes but is not limited to exams, assignments, quizzes, individual or group projects or assignments, oral presentations, and work term reports.

Academic Offenses are outlined under ***UNIVERSITY REGULATIONS,* Academic Misconduct - Academic Offenses**.

Professional integrity requires students to act with honesty, demonstrate accountability, engage in respectful collaboration, and support a culture of inclusiveness and respect. When students are participating in University activities, they shall do so with professional integrity and shall consistently apply the knowledge, skills, and values expressed in the *Student Code of Conduct*. The Faculty has created a *Statement and Code of Academic and Professional Integrity*, which is posted prominently on the Faculty of Business Administration website, in the Business Administration Building and is distributed annually to all students in the Faculty.

Students in the Faculty of Business Administration are subject to the *Student Code of Conduct* in all Faculty- or University-related activities including: work terms, exchanges, and case and other competitions. Violations of this standard of professional integrity will be resolved in accordance with the *Student Code of Conduct*.

4 Description of Programs

Important Notice

Students are no longer being admitted to the Bachelor of Business Administration and the Bachelor of Business Administration (Honours). Students are no longer being admitted or readmitted to the Joint Degrees of Bachelor of Business Administration and Bachelor of Music, the Bachelor of Commerce (Co-operative) (Honours), the Minor in International Business, the International Bachelor of Business Administration, and the International Bachelor of Business Administration (Honours) programs. Students currently completing any these programs may follow the Calendar regulations for the Academic year in which they were admitted or regulations for subsequent Academic years up to the retirement of the program. Students previously admitted to any of these programs must complete all program requirements by December 31, 2028. Memorial University of Newfoundland Calendars by Academic year can be viewed at the Office of the Registrar website at www.mun.ca/regoff/calendar.php. Students are advised to contact the Academic Programs Office, Faculty of Business Administration by email to busihelp@mun.ca, for guidance on course selection and planning.

All courses of the Faculty are designated by BUSI.

4.1 General Information

1. The Office of the Registrar and the Faculty of Business Administration will assist students with any questions or problems which might arise concerning the interpretation of academic regulations. It is, however, the responsibility of students to see that their academic programs meet the University's regulations in all respects.
2. No student shall obtain more than one undergraduate business degree from Memorial University of Newfoundland.
3. The Faculty of Business Administration may recommend that transfer credit for certain Business courses be awarded on the basis of successful completion of academic and professional courses that lead to a professional designation. Applications for **transfer credit** should be made through the Office of the Registrar.
4. With the exception of Faculty of Business Administration service courses outlined on the Faculty of Business Administration website, all BUSI courses at the 3000 level and higher are restricted to students who have been admitted to one of the programs outlined under **General Degrees**. Other students will be admitted to these courses only with the approval of the Academic Programs Office.
5. All business degree students will complete a common first year called **Business One,** after which they must apply for entry into either the Bachelor of Commerce or the Bachelor of Commerce (Co-operative). Modifications to Business One requirements for the Joint Degrees of Bachelor of Commerce and Bachelor of Music are outlined in **Table 6 Program of Study for the Bachelor of Commerce Component of the Joint Degrees of Bachelor of Commerce and Bachelor of Music**.

4.2 General Degrees

The Faculty of Business Administration offers four general degree programs the Bachelor of Commerce, the Bachelor of Commerce (Co-operative), the Joint Degrees of Bachelor of Commerce (Co-operative) and Bachelor of Arts, and the Joint Degrees of Bachelor of Commerce and Bachelor of Music. The Faculty also offers a Certificate in Business Administration, a Diploma in Business Administration, and a Minor in Business Administration.

The admission/readmission regulations and the program regulations for each program listed below can be found at **Admission/ Readmission Regulations for the Faculty of Business Administration** and **Program Regulations**, respectively.

4.2.1 Bachelor of Commerce

The Bachelor of Commerce is a 120 credit hour program with a flexible course structure. This Business degree can be completed full- or part-time. Students have the opportunity to focus their studies in a variety of business areas.

4.2.1.1 Minors, Certificates and Diplomas From Another Academic Unit

A student enrolled in the Bachelor of Commerce program may, using the non-Business electives required in the curriculum, complete a minor, certificate or diploma from another academic unit, where such programs exist. Regulations for minors, certificates, and diplomas are given under the Calendar entries for the applicable academic unit.

4.2.2 Bachelor of Commerce (Co-operative)

The Bachelor of Commerce (Co-operative) is a full-time, 135 credit hour program with a structured format. This five-year business degree includes three work terms. Students have the opportunity to focus their studies in a variety of business areas.

4.2.2.1 Minors, Certificates and Diplomas From Another Academic Unit

A student enrolled in the Bachelor of Commerce (Co-operative) program may, using the non-Business electives required in the curriculum, complete a minor, certificate or diploma from another academic unit, where such programs exist. Regulations for minors, certificates, and diplomas are given under the Calendar entries for the applicable academic unit.

4.2.3 Certificate in Business Administration

The Certificate in Business Administration is a 30 credit hour program designed to meet the needs of mature students and provides them with a foundation in business education.

4.2.4 Diploma in Business Administration

The Diploma in Business Administration is a 60 credit hour program designed to meet the needs of mature students who have completed the Certificate in Business Administration program and wish to continue their business education.

4.2.5 Joint Degrees of Bachelor of Commerce (Co-operative) and Bachelor of Arts

The Joint Degrees of Bachelor of Commerce (Co-operative) and Bachelor of Arts is a 150 credit hour program offered jointly with the Faculty of Humanities and Social Sciences. Some degree requirements are modified for students pursuing the Joint Degrees.

4.2.6 Joint Degrees of Bachelor of Commerce and Bachelor of Music

The Joint Degrees of Bachelor of Commerce and Bachelor of Music is a five-year program offered jointly with the School of Music.

Students choose from the following majors for the Bachelor of Music degree: General Music Studies (157 credit hours), Composition (160 credit hours), or Performance (164 credit hours). Some degree requirements are modified for students pursuing the Joint Degrees.

4.2.7 Minor in Business Administration

The Minor in Business Administration is comprised of 24 credit hours and is available to students who are completing non-Business degree programs which provide for the completion of a minor.

4.3 Business One

- All undergraduate business degree students will complete a common first year called Business One, after which they must apply for entry into either the Bachelor of Commerce or the Bachelor of Commerce (Co-operative).
- Business One is 30 credit hours comprised of BUSI 1000, Economics 1010, Economics 1020, 6 credit hours in English, 3 credit hours of which may be replaced by any Memorial University of Newfoundland Critical Reading and Writing (CRW) course, Mathematics 1000, and 12 additional credit hours in non-BUSI electives. Critical Reading and Writing (CRW) courses are regulated by the Faculty of Humanities and Social Sciences and are indicated under Faculty of Humanities and Social Sciences.
- The courses comprising Business One must be successfully completed with an overall average of at least 65%, and an overall cumulative average of at least 60%.
- A student who wishes to complete the Joint Degrees of Bachelor of Commerce (Co-operative) and Bachelor of Arts should structure Business One as outlined under **Joint Degrees of Bachelor of Commerce (Co-operative) and Bachelor of Arts** to ensure the timely completion of the Joint Degrees.
- Modifications to Business One requirements for the Joint Degrees of Bachelor of Commerce and Bachelor of Music are outlined in **Table 6 Program of Study for the Bachelor of Commerce Component of the Joint Degrees of Bachelor of Commerce and Bachelor of Music**.

4.4 Business Electives

- A Business elective is any course with the prefix BUSI that is not a required core course.
- A student may select electives to focus studies in a variety of business areas. More information about focus areas is available at www.business.mun.ca.
- A student is encouraged to consider courses that have relevant and business-related content offered by other academic units. A list of approved Business electives from other academic units is available on the Faculty of Business Administration website.

4.5 Non-Business Electives

A non-Business elective can be any credit course chosen from any discipline except Business.

- For the **Bachelor of Commerce** degree program:
  - a student must complete sixteen electives (48 credit hours), all of which may be non-Business electives. Of the sixteen electives (48 credit hours), a student has the option of completing a maximum of nine Business electives (27 credit hours).
- For the **Bachelor of Commerce (Co-operative)** degree program:
  - of the 51 credit hours in elective courses required in the program from Academic Terms 1 through 7, 12-27 credit hours must be non-Business electives and the remaining credit hours must be Business (BUSI) electives.
- For the Joint Degrees of Bachelor of Commerce (Co-operative) and Bachelor of Arts see **Program Regulations, Joint Degrees of Bachelor of Commerce (Co-operative) and Bachelor of Arts**.
- For the Joint Degrees of Bachelor of Commerce and Bachelor of Music see **Program Regulations, Joint Degrees of Bachelor of Commerce and Bachelor of Music**.

4.6 Business Professional Development Seminars

- Business Professional Development seminars are designed to complement academic programming and prepare Business undergraduate students for entering the workforce. These seminars are required for the Bachelor of Commerce, the Bachelor of Commerce (Co-operative), the Joint Degrees of Bachelor of Commerce and Bachelor of Music, and the Joint Degrees of Bachelor of Commerce (Co-operative) and Bachelor of Arts.
- Areas of focus include career development, job search, professionalism, and individual skill development.
- These seminars are mandatory, non-credit with a PAS/FAL marking scheme and will be recorded on the University transcript.

4.7 Work Terms

www.mun.ca/coop
www.mun.ca/coop/programs/business/

The Faculty of Business Administration work term registration, grading, and tuition fee charges and payments are governed by the ***UNIVERSITY REGULATIONS*** in this Calendar and those outlined below. The Faculty of Business Administration work term placement and opt-outs, conduct, and evaluation are governed by the *Business Co-operative Education Handbook*.

4.7.1 General Information

- A competition for work term employment is organized by the Co-operative Education Office of the Faculty.
- The Co-operative Education Office of the Faculty is responsible for the general management of work term requirements, and the on-going development of employment opportunities, for arranging student-employer interviews, for counselling of students, for monitoring students on their work terms, and for the evaluation of the work terms.
- Students and employers are matched through the job competition process. Placement is not guaranteed, but every effort is made to ensure that appropriate employment opportunities are available.
- Students may obtain their own work term jobs outside the competition. Such jobs must be confirmed by letter from the employer and approved by the Co-operative Education Office of the Faculty on or before the first day of the work period.
- Students in the Bachelor of Commerce (Co-operative) program give permission to prospective employers, in the course of the placement process, to have access to their academic records, which contain their academic grades and their work term evaluations.

- After accepting a position, a student may not withdraw from a specific co-operative work term situation unless prior permission is obtained from the Committee on Undergraduate Studies. Students should consult the *Business Co-operative Education Handbook* for more information.
- In the case of a student who is required to withdraw from the Bachelor of Commerce (Co-operative) program, the Co-operative Education Office of the Faculty has no responsibility for placement unless the student has been readmitted to the program.

4.7.2 Evaluation of Work Terms

Two components are considered in work term evaluation: on-the-job performance and the work term report/communication component. Each component is evaluated separately.

- The overall evaluation of work terms will result in the assignment of one of the following letter grades: PWD (pass with distinction), PAS (pass) or FAL (fail). Further information is available in the *Business Co-operative Education Handbook*.
- A work report on a topic approved by the Co-operative Education Office of the Faculty must be submitted for Work Terms 1 and 2. An oral presentation and executive summary must be completed for Work Term 3. The communications component must be approved by the employer and submitted to the Co-operative Education Office of the Faculty on or before the deadline scheduled by Co-operative Education Office of the Faculty. Late reports will not be graded unless prior permission for a late report has been given by Co-operative Education Office of the Faculty.

5 Admission/Readmission Regulations for the Faculty of Business Administration

An applicant must be eligible for admission or readmission to the University in a category as defined in the Calendar section ***UNIVERSITY REGULATIONS* - Admission/Readmission to the University (Undergraduate), Categories of Applicants, Admission Criteria and Other Information**. In addition to meeting ***UNIVERSITY REGULATIONS***, students must meet the admission/readmission regulations for the Faculty of Business Administration and the requirements as indicated below under the appropriate program.

5.1 Application Forms and Deadlines

1. The application for admission or readmission to the University and programs offered by the Faculty of Business Administration is submitted online at www.mun.ca/undergrad/apply. A complete application includes an application to the University (for those who have not attended Memorial University of Newfoundland in the three preceding semesters) and any other required supporting documentation. Application fees must be paid when the application forms are submitted. Admission or readmission to the University does not necessarily constitute admission or readmission to a program.
2. The deadline dates by program are listed in the **Application Deadline Dates** table below. The application deadline dates are strictly enforced.

Application Deadline Dates

Program	Admission Deadline Dates	Readmission Deadline Dates
Bachelor of Commerce	Fall - May 15 Winter - December 1 Spring - March 1	Fall - May 15 Winter - December 1 Spring - March 1
Bachelor of Commerce (Co-operative)	Fall - May 15 for Term 1 and Term 3 only Winter - December 1 for Term 2 only	Fall - May 15 Winter - December 1 Spring - March 1
Certificate in Business Administration	No deadline as admission is ongoing.	
Diploma in Business Administration	No deadline as admission is ongoing.	
Joint Bachelor of Commerce (Co-operative) and Bachelor of Arts Degrees	See above for the Bachelor of Commerce (Co-operative) admission deadline dates.	
Joint Bachelor of Commerce and Bachelor of Music Degrees	See the **School of Music, Application Forms and Deadlines** for the Bachelor of Music admission deadline date.	
Minor in Business Administration	No deadline. Applicants declare the Minor by emailing the Office of the Registrar to reghelp@mun.ca.	

5.2 Bachelor of Commerce

1. Applicants declare Business One and may apply for admission to the program after a minimum completion of the 30 credit hours comprising Business One.
2. Applicants must apply at www.mun.ca/undergrad/admissions/i-want-to-apply/ and by the appropriate deadline date.
3. Entry to the Bachelor of Commerce degree program is competitive and selective. The primary criterion used in reaching decisions on applications for admission into the Bachelor of Commerce program is overall academic achievement.
4. Meeting the minimum admission requirements does not guarantee acceptance into the Bachelor of Commerce program.
5. The final decision on admission or readmission rests with the Admissions Committee of the Faculty.
6. Admission or readmission to the University does not necessarily constitute admission or readmission to the Bachelor of Commerce program.
7. Up to three positions per year in the Faculty of Business Administration may be designated for applicants of Indigenous ancestry who have met the admission requirements of the Bachelor of Commerce program. Applicants must send a letter of request at the time of application and provide documentation of Indigenous ancestry.
8. In the case where an applicant has been required to withdraw from one of the Faculty's other Undergraduate programs, the Admissions Committee of the Faculty may consider this circumstance as grounds to deny admission.

5.2.1 Direct Entry (for High School Students)

5.2.1.1 Business One

1. To be admitted to Business One, applicants should select Business One as the program of study on the online application to the University. The application for admission to programs is submitted online and applicants should follow the application instructions at www.mun.ca/undergrad/apply. Application deadlines are strictly enforced. A complete application includes an application to the University and any other required supporting documentation. Application fees must be paid when the application forms are submitted. Direct admission from high school is subject to the applicant's final acceptance to the University and admissibility into Mathematics 1000, 1090 or 109A/B. Business One normally begins in the Fall semester commencing in September.
2. Upon meeting general admission requirements to Memorial University of Newfoundland, applicants are admitted to Business One and may apply for admission into the program after a completion of a minimum of 30 credit hours of the courses comprising **Business One**. Business One courses are outlined under **Table 1 Suggested Program of Study for the Bachelor of Commerce**.
3. Upon completion of Business One, a student may wish to apply for admission to the Bachelor of Commerce program. In this regard, a student should follow the instructions listed below under **Beyond Business One, Admission**.

5.2.2 Memorial University of Newfoundland Applicants

5.2.2.1 Business One

An applicant who is attending or has previously attended this University may declare **Business One** by contacting the Office of the Registrar by e-mail to reghelp@mun.ca.

5.2.2.2 Beyond Business One

1. **Admission**
   a. Admission to the Bachelor of Commerce program is competitive and selective. Prospective students are therefore encouraged to consider an alternate degree program in the event that they are not accepted into the Bachelor of Commerce program. The primary criterion used in reaching decisions on applications for admission into the Bachelor of Commerce program is overall academic achievement.
   b. Applicants must declare **Business One** as their program of study in order to be considered for admission into the Bachelor of Commerce program. To declare Business One applicants should contact the Office of the Registrar by e-mail to reghelp@mun.ca.
   c. Applicants to the Bachelor of Commerce program must apply online at www.mun.ca/undergrad/apply. Applicants must apply by the appropriate deadline date as indicated in the **Application Deadline Dates** table. The application deadline date is strictly enforced. Applicants applying for admission to the program must have successfully completed the 30 credit hours of courses comprising **Business One**.
   d. Applicants for admission must have an overall average of at least 65% in the courses comprising **Business One** as outlined in **Program Regulations, Bachelor of Commerce**, and an overall cumulative average of at least 60%. Applicants to the Bachelor of Commerce program must complete a minimum of 15 credit hours at Memorial University of Newfoundland.
   e. Business One applicants with non-numerical, passing grades in any of the required courses required in **Business One** will have those courses exempted from their admission average.
2. **Readmission**
   a. Students who have been required to withdraw from the Bachelor of Commerce program may be considered for readmission after the lapse of one semester. Applicants for readmission must have an overall average of at least 65% over the last 15 credit hours of courses taken. In the event that a student has more than the 15 credit hours of courses needed in the earliest term used, the 15 credit hours of courses with the highest grades in that term will be used.
   b. Students applying for readmission into the program must apply online at www.mun.ca/undergrad/apply. The application deadline date outlined in the **Application Deadline Dates** table is strictly enforced.

5.2.3 Transfer Applicants

1. Applicants who are transferring from a recognized post-secondary institution must apply for admission to the University on or before the deadlines indicated in the **Application Deadline Dates** table to allow sufficient time for the evaluation of transfer credits. The application for admission or readmission to the University is submitted online at www.mun.ca/undergrad/apply. A complete application includes an application to the University (for those who have not attended Memorial University of Newfoundland in the three preceding semesters) and any other required supporting documentation. Application fees must be paid when the application forms are submitted.
2. Admission to the Bachelor of Commerce program is competitive and selective. Prospective students are therefore encouraged to consider an alternate degree program in the event that they are not accepted into the Bachelor of Commerce program. The primary criterion used in reaching decisions on applications for admission into the Bachelor of Commerce program is overall academic achievement.

5.2.3.1 Business One

1. Applicants must declare Business One.
2. To be admitted to Business One, applicants should select Business One as the program of study on the online application to the University.

5.2.3.2 Beyond Business One

1. **Admission**
   a. Admission to the Bachelor of Commerce program is competitive and selective. Prospective students are therefore encouraged to consider an alternate degree program in the event that they are not accepted into the Bachelor of Commerce program. The primary criterion used in reaching decisions on applications for admission into the Bachelor of Commerce program is overall academic achievement.
   b. Applicants must declare **Business One** as their program of study in order to be considered for admission into the Bachelor of Commerce program. To declare Business One applicants should contact the Office of the Registrar by e-mail to reghelp@mun.ca.

c. Applicants to the Bachelor of Commerce program must apply online at www.mun.ca/undergrad/apply. Applicants must apply by the appropriate deadline date as indicated in the **Application Deadline Dates** table. The application deadline date is strictly enforced. Students applying for admission to the program must have successfully completed the 30 credit hours of courses comprising **Business One**.

d. Applicants for admission must have an overall average of at least 65% in the courses comprising **Business One** as outlined in **Program Regulations, Bachelor of Commerce**, and an overall cumulative average of at least 60%. Applicants to the Bachelor of Commerce program must complete a minimum of 15 credit hours at Memorial University of Newfoundland.

e. Business One students with non-numerical, passing grades in any of the courses comprising **Business One** will have those courses exempted from their admission average.

2. **Readmission**

a. Students who have been required to withdraw from the Bachelor of Commerce program may be considered for readmission after the lapse of one semester. Applicants for readmission must have an overall average of 65% over their last 15 credit hours of courses taken. In the event that a student has more than the 15 credit hours of courses needed in the earliest term used, the 15 credit hours of courses with the highest grades in that term will be used.

b. Applicants to the Bachelor of Commerce program must apply online at www.mun.ca/undergrad/apply. The **Application Deadline Date** is strictly enforced.

5.3 Bachelor of Commerce (Co-operative)

1. Applicants declare Business One and may apply for admission to the program after a minimum completion of the 30 credit hours comprising **Business One**.
2. Applicants must apply online at www.mun.ca/undergrad/apply and by the appropriate deadline date.
3. Entry to the Bachelor of Commerce (Co-operative) degree programs is competitive and selective. The primary criterion used in reaching decisions on applications for admission into the Bachelor of Commerce (Co-operative) program is overall academic achievement.
4. Meeting the minimum admission requirements does not guarantee acceptance into the Bachelor of Commerce (Co-operative) program.
5. The final decision on admission or readmission rests with the Admissions Committee of the Faculty.
6. Admission or readmission to the University does not necessarily constitute admission or readmission to the Bachelor of Commerce (Co-operative) program.
7. Prospective students who plan to complete the Bachelor of Commerce (Co-operative) program should review the information about work term expectations available in the *Business Co-operative Education Handbook*.
8. Up to three positions per year in the Faculty of Business Administration may be designated for applicants of Indigenous ancestry who have met the admission requirements of the Bachelor of Commerce (Co-operative) program. Applicants must send a letter of request at the time of application and provide documentation of Indigenous ancestry.
9. In the case where an applicant has been required to withdraw from one of the Faculty's other Undergraduate programs, the Admissions Committee of the Faculty may consider this circumstance as grounds to deny admission.

5.3.1 Direct Entry (for High School Students)

5.3.1.1 Business One

1. Applicants may declare Business One directly from high school. The application for admission to programs is submitted online and applicants should follow the application instructions at www.mun.ca/undergrad/apply. Application deadlines are strictly enforced. A complete application includes an application to the University and any other required supporting documentation. Application fees must be paid when the application is submitted. Direct admission from high school is subject to the applicant's final acceptance to the University and admissibility into Mathematics 1000, 1090 or 109A/B. Business One normally begins in the Fall semester commencing in September.
2. Upon meeting general admission requirements to Memorial University of Newfoundland, applicants are admitted to Business One and may apply for admission into the program after a completion of a minimum of 30 credit hours of the courses comprising **Business One**. Business One courses are outlined under **Table 2 Suggested Program of Study for the Bachelor of Commerce (Co-operative)**.
3. Upon completion of Business One, a student may wish to apply for admission to the Bachelor of Commerce (Co-operative) program. In this regard, a student should follow the instructions listed below under **Beyond Business One, Admission**.

5.3.2 Memorial University of Newfoundland Applicants

5.3.2.1 Business One

An applicant who is attending or has previously attended this University may declare Business One by contacting the Office of the Registrar by e-mail to reghelp@mun.ca.

5.3.2.2 Beyond Business One

1. **Admission**

a. Admission to the Bachelor of Commerce (Co-operative) program is competitive and selective. Prospective students are therefore encouraged to consider an alternate degree program in the event that they are not accepted into the Bachelor of Commerce (Co-operative) program. The primary criterion used in reaching decisions on applications for admission into the Bachelor of Commerce (Co-operative) program is overall academic achievement.

b. Applicants must declare Business One as the program of study in order to be considered for admission into the Bachelor of Commerce (Co-operative) program. To declare Business One applicants should contact the Office of the Registrar by e-mail to reghelp@mun.ca.

c. Applicants to the Bachelor of Commerce (Co-operative) program must apply online at www.mun.ca/undergrad/apply. Applicants must apply by the appropriate deadline date as indicated in the **Application Deadline Dates** table. The application deadline date is strictly enforced. Students applying for admission to the program must have successfully completed the 30 credit hours of courses comprising **Business One**.

d. Applicants may apply for admission into the Bachelor of Commerce (Co-operative) program up to and including Academic Term 3. Applicants applying for admission to the program must have successfully completed all of the courses required in the program up to that term, including the courses required in **Business One** as outlined in **Program Regulations, Bachelor of Commerce (Co-operative)**, with grades at least as high as those required to meet promotion requirements. As such, students must have an overall average of 65% on the 30 credit hours required for **Business One**, and an overall cumulative average of at least 60% in each additional term. Applicants must complete a minimum of 15 credit hours at Memorial University of Newfoundland.

e. Business One students with non-numerical, passing grades in any of the courses comprising Business One will have those courses exempted from their admission average.

f. Since the Bachelor of Commerce (Co-operative) program is full-time and continuous, the Admissions Committee of the Faculty will review the applicant's transcript for evidence that the applicant can successfully complete 15 credit hour course loads with acceptable performance.

2. **Readmission**

a. Students must apply for readmission into the Bachelor of Commerce (Co-operative) program at www.mun.ca/undergrad/apply by the appropriate deadline date as indicated in the **Application Deadline Dates** table. The application deadline date is strictly enforced.

b. Students who have been required to withdraw following any one of Terms 1 through 3 may be considered for readmission after the lapse of two semesters, at which time they will normally be required to repeat the term which they failed, unless, in the opinion of the Committee on Undergraduate Studies, a more meaningful course of study would be appropriate.

Alternatively, students may apply for readmission into the program up to and including Academic Term 3. Students must have successfully completed all of the courses required in the program up to that term, including the courses required in **Business One**, with grades at least as high as those required to meet promotion requirements. As such, students must have an overall average of 65% on the 30 credit hours required for **Business One**, and an overall cumulative average of at least 60% in each additional term. Applicants must complete a minimum of 15 credit hours at Memorial University of Newfoundland.

c. Students who have been required to withdraw or who have voluntarily withdrawn following any one of Terms 4 through 7 may be considered for readmission after the lapse of two semesters, at which time they will normally be required to repeat the term which they failed, unless, in the opinion of the Committee on Undergraduate Studies, a more meaningful course of study would be appropriate.

5.3.3 Transfer Applicants

1. Applicants who are transferring from a recognized post-secondary institution must apply for admission to the University on or before the deadlines indicated in the **Application Deadline Dates** table to allow sufficient time for the evaluation of transfer credits. The application for admission or readmission to programs offered by Memorial University of Newfoundland is submitted online. The application for admission or readmission to the University is submitted online at www.mun.ca/undergrad/apply. A complete application includes an application to the University (for those who have not attended Memorial University of Newfoundland in the three preceding semesters) and any other required supporting documentation. Application fees must be paid when the application forms are submitted.
2. Admission to the Bachelor of Commerce (Co-operative) program is competitive and selective. Prospective students are therefore encouraged to consider an alternate degree program in the event that they are not accepted into the Bachelor of Commerce (Co-operative) program. The primary criterion used in reaching decisions on applications for admission into the Bachelor of Commerce (Co-operative) program is overall academic achievement.

5.3.3.1 Business One

1. Applicants must declare Business One.
2. To be admitted to **Business One**, applicants should select Business One as the program of study on their online application to the University available at www.mun.ca/undergrad/apply.

5.3.3.2 Beyond Business One

1. **Admission**

a. Admission to the Bachelor of Commerce (Co-operative) program is competitive and selective. Prospective students are therefore encouraged to consider an alternate degree program in the event that they are not accepted into the Bachelor of Commerce (Co-operative) program. The primary criterion used in reaching decisions on applications for admission into the Bachelor of Commerce (Co-operative) program is overall academic achievement.

b. Applicants must declare Business One as their program of study in order to be considered for admission into the Bachelor of Commerce (Co-operative) program. To declare Business One applicants should contact the Office of the Registrar by e-mail to reghelp@mun.ca.

c. Applicants to the Bachelor of Commerce (Co-operative) program must apply online at www.mun.ca/undergrad/apply. Applicants must apply by the appropriate deadline date as indicated in the **Application Deadline Dates** table. The application deadline date is strictly enforced. Students applying for admission to the program must have successfully completed the 30 credit hours of courses comprising **Business One**

d. Applicants may apply for admission into the Bachelor of Commerce (Co-operative) program up to and including Academic Term 3. Applicants applying for admission to the program must have successfully completed all of the courses required in the program up to that term, including the courses required in **Business One** as outlined in **Program Regulations, Bachelor of Commerce (Co-operative)** with grades at least as high as those required to meet promotion requirements. As such, students must have an overall average of 65% on the 30 credit hours required for **Business One**, and an overall cumulative average of at least 60% in each additional term. Applicants must complete a minimum of 15 credit hours at Memorial University of Newfoundland.

e. Business One students with non-numerical, passing grades in any of the courses comprising **Business One** will have those courses exempted from their admission average.

f. Since the Bachelor of Commerce (Co-operative) program is full-time and continuous, the Admissions Committee of the Faculty will review the applicant's transcript for evidence that the applicant can successfully complete 15 credit hour course loads with acceptable performance.

2. **Readmission**

a. Students must apply for readmission into the Bachelor of Commerce (Co-operative) program at www.mun.ca/undergrad/apply by the appropriate deadline date as indicated in the **Application Deadline Dates** table. The application deadline date is strictly enforced.

b. Students who have been required to withdraw following any one of Terms 1 through 3 may be considered for readmission after the lapse of two semesters, at which time they will normally be required to repeat the term which they failed, unless, in the opinion of the Committee on Undergraduate Studies, a more meaningful course of study would be appropriate.

   Alternatively, students may be considered for readmission into the program up to and including Academic Term 3. Students must have successfully completed all of the courses required in the program up to that term, including the courses required in **Business One** as outlined in **Program Regulations, Bachelor of Commerce (Co-operative)** with grades at least as high as those required to meet promotion requirements. As such, students must have an overall average of 65% on the 30 credit hours required for **Business One** as outlined in **Program Regulations, Bachelor of Commerce (Co-operative)** and an overall and an overall cumulative average of at least 60% in each additional term. Applicants must complete a minimum of 15 credit hours at Memorial University of Newfoundland.

c. Students who have been required to withdraw following any one of Terms 4 through 7 may be considered for readmission after the lapse of two semesters, at which time they will normally be required to repeat the term which they failed, unless, in the opinion of the Committee on Undergraduate Studies, a more meaningful course of study would be appropriate.

5.4 Certificate in Business Administration

5.4.1 All Categories of Applicants

1. To be considered for admission to the Certificate in Business Administration, applicants must be eligible for Admission to Memorial University of Newfoundland.
2. Applicants who are new to the University should follow the application instructions at www.mun.ca/undergrad/apply.
3. The applicant must submit a personal statement highlighting the applicant's relevant past experiences, career plans, and motivation for pursuing the Certificate.
4. Meeting the minimum admission requirements does not guarantee acceptance into the Certificate in Business Administration program.
5. In the case where students have been required to withdraw from one of the Faculty's other undergraduate programs, the Admissions Committee of the Faculty may consider the circumstances of the required withdrawal in its admission decision.
6. The final decision on admission or readmission to the Certificate in Business Administration program rests with the Admissions Committee of the Faculty.

5.5 Diploma in Business Administration

5.5.1 All Categories of Applicants

1. **Admission**
   a. To be considered for admission to the Diploma in Business Administration, applicants must have been admitted to and successfully completed the **Certificate in Business Administration**.
   b. The primary criterion used in reaching decisions on applications for admission into the Diploma in Business Administration is overall academic achievement.
   c. Meeting the minimum admission requirements does not guarantee acceptance into the Diploma in Business Administration program.
   d. In the case where students have been required to withdraw from one of the Faculty's other undergraduate programs, the Admissions Committee of the Faculty may consider the circumstances of the required withdrawal in its admission decision.
   e. The final decision on admission or readmission to the Diploma in Business Administration program rests with the Admissions Committee of the Faculty.
2. **Readmission**
   a. Students who have been required to withdraw from the Diploma in Business Administration program may be considered for readmission after the lapse of one semester.
   b. Applicants for readmission must have an overall average of 65% over their last 15 credit hours of courses taken. In the event that a student has more than the 15 credit hours of courses needed in the earliest term used, the 15 credit hours of courses with the highest grades in that term will be used.

5.6 Joint Degrees of Bachelor of Commerce and Bachelor of Music

5.6.1 All Categories of Applicants

1. Applicants for the Joint Degrees of Bachelor of Commerce and Bachelor of Music program must meet the Admission/ Readmission Requirements to the School of Music and must be admitted to the Bachelor of Music program.
2. Admission to the program is competitive and selective. Prospective students are therefore encouraged to consider an alternate degree program in the event that they are not accepted into the Joint Degrees of Bachelor of Commerce and Bachelor of Music program.
3. Applicants who have been awarded a Bachelor of Music Degree or an undergraduate Business degree from this University may not complete the Joint Degrees of Bachelor of Commerce and Bachelor of Music program.
4. Applicants must submit a 750-word letter of motivation highlighting the applicant's relevant past experiences, career plans, and motivation for pursuing the Joint Degrees of Bachelor of Commerce and Bachelor of Music program.
5. Applicants may be requested to attend an interview.
6. The final decision on admission or readmission rests with the Joint Degrees of Bachelor of Commerce and Bachelor of Music Admissions Committee.
7. For information on the Bachelor of Music degree programs see the **School of Music, Joint Degrees of Bachelor of Music and Bachelor of Commerce** section of the University Calendar.

5.7 Joint Degrees of Bachelor of Commerce (Co-operative) and Bachelor of Arts

5.7.1 All Categories of Applicants

1. Applicants must be formally admitted to the Bachelor of Commerce (Co-operative) degree program and meet the **Admission/ Readmission Regulations for the Faculty of Business Administration, Bachelor of Commerce (Co-operative)**.
2. For information on Bachelor of Arts degrees see the **Faculty of Humanities and Social Sciences** section of the University Calendar.

5.8 Minor in Business Administration

5.8.1 All Categories of Applicants

1. Applicants who are new to Memorial University of Newfoundland may select the Minor in Business Administration by following the application instructions at www.mun.ca/undergrad/apply. Current and returning students may declare the Minor in Business Administration by emailing the Office of the Registrar by e-mail to reghelp@mun.ca. Students should declare the Minor in Business Administration in order to receive priority registration access in Business courses.
2. Students who are completing a degree program, offered by another academic unit, which provides for the completion of a minor may complete a Minor in Business Administration.
3. A student who completes courses at another university in the area of the Minor in Business Administration may be eligible to transfer a maximum of 12 of those credit hours to fulfill requirements in the Minor at Memorial University of Newfoundland.

6 Program Regulations

6.1 Bachelor of Commerce

- The full or part-time Bachelor of Commerce requires 120 successfully completed credit hours comprised of 30 credit hours completed during **Business One**, 90 credit hours completed after Business One, and three Business Professional Development seminars.
- The 120 required credit hours are outlined below in **Table 1 Suggested Program of Study for the Bachelor of Commerce**.
- Critical Reading and Writing (CRW) courses are regulated by the Faculty of Humanities and Social Sciences. Eligible CRW courses are indicated under Faculty of Humanities and Social Sciences.
- Non-Business electives can be a 3 credit hour course chosen from any discipline except Business. A student must complete sixteen electives (48 credit hours), all of which can be non-Business electives. Of the sixteen electives (48 credit hours), a student has the option of completing a maximum of nine Business electives (27 credit hours).
- A student is advised to consult with an academic advisor in the Academic Programs Office to discuss course selection throughout the program by email to busihelp@mun.ca.

Table 1 Suggested Program of Study for the Bachelor of Commerce

Term	Required Courses	Electives
Business One (30 credit hours completed prior to admission into the Bachelor of Commerce)	BUSI 1000 Economics 1010, Economics 1020 6 credit hours in English, 3 credit hours of which may be replaced by any Memorial University of Newfoundland Critical Reading and Writing (CRW) course Mathematics 1000	12 additional credit hours in **non-BUSI electives**
Year 2	BUSI 200W, 2011, 2012, 2111, 2112, 2205, 2600, 2720 Statistics 2500	6 additional credit hours of electives
Year 3	BUSI 400W, 3005, 3310, 3325, 3335, 3401, 3550, 3700	9 additional credit hours of electives
Year 4	BUSI 500W, 4306, 4720, 5001	21 additional credit hours of electives

6.2 Bachelor of Commerce (Co-operative)

- The Bachelor of Commerce (Co-operative) is a full-time, 135 credit hour program comprised of 30 credit hours completed during **Business One**, four Business Professional Development seminars, 105 credit hours completed after Business One, and three co-operative work terms. The program must be completed in the sequence, order and course load as outlined below in **Table 2 Program of Study for the Bachelor of Commerce (Co-operative)**.
- Critical Reading and Writing (CRW) courses are regulated by the Faculty of Humanities and Social Sciences. Eligible CRW courses are indicated under Faculty of Humanities and Social Sciences.
- Non-Business electives can be chosen from any discipline except Business. Of the 51 credit hours required in elective courses from academic terms 1 through 7, 24-39 credit hours must be Business electives and 12-27 credit hours must be non-Business electives.
- A student will require special permission to register for courses during work terms or academic terms if the courses are in addition to the prescribed program. Any course with the prefix BUSI, that is not a required core course, is a **Business Elective**.
- Exceptions to this prescribed program, including specified course load, must have the approval of the Committee on Undergraduate Studies of the Faculty. A student must earn a minimum grade of 65% on courses taken out of sequence.
- A student is advised to consult with an academic advisor in the Academic Programs Office to discuss course selection throughout the program by email to busihelp@mun.ca.

Table 2 Program of Study for the Bachelor of Commerce (Co-operative)

Term	Required Core Courses	Required Electives
Business One (30 credit hours completed prior to admission)	BUSI 1000 Economics 1010, Economics 1020 6 credit hours in English, 3 credit hours of which may be replaced by any Memorial University of Newfoundland Critical Reading and Writing (CRW) course Mathematics 1000	12 additional credit hours in **non-BUSI electives**
Fall Academic Term 1	BUSI 2011, 2111 3 credit hours chosen from BUSI 2205, 2600, 2720 Statistics 2500	3 credit hour elective course
Winter Academic Term 2	BUSI 200W, 2012, 2112 6 credit hours from BUSI 2205, 2600, 2720 (which must be different from the 3 credit hours chosen in Fall, Academic Term 1)	3 credit hour elective course
Fall Academic Term 3	BUSI 300W, 3325, 3401, 3550	6 credit hours in elective courses
Winter Work Term 1	BUSI 399W	
Spring Academic Term 4	BUSI 400W, 3005, 3310, 3335, 3700	3 credit hour elective course
Fall Work Term 2	BUSI 499W	
Winter Academic Term 5	BUSI 4720	12 credit hours in elective courses
Spring Work Term 3	BUSI 599W	
Fall Academic Term 6	BUSI 500W, 4306	12 credit hours in elective courses
Winter Academic Term 7	BUSI 5001	12 credit hours in elective courses

6.3 Certificate in Business Administration

- The full or part-time Certificate in Business Administration is comprised of 30 credit hours.
- To be considered for graduation a student must have been admitted to the Certificate program and successfully complete the 30 credit hours as outlined below in **Table 3 Program of Study for the Certificate in Business Administration**.
- The student must have achieved an overall grade point average of at least 2.5 and a numeric average of at least 60% in the courses that comprise the 30 credit hours. A student failing to meet this requirement will be required to repeat a course(s) to raise the overall average and/or GPA to the minimum acceptable level.
- Critical Reading and Writing (CRW) courses are regulated by the Faculty of Humanities and Social Sciences. Eligible CRW courses are indicated under Memorial University of Newfoundland Critical Reading and Writing (CRW).
- A student pursuing the Certificate in Business Administration will be required to complete more than half of the total credit hours required for the Certificate at this University. The courses comprising these credit hours must be applicable to the Certificate in Business Administration.
- A student pursuing the Certificate in Business Administration who has completed a Bachelor's degree at this University or another recognized post-secondary institution, will be required to complete at least 15 credit hours at this University beyond those required for that degree. The courses comprising these credit hours must be applicable to the Certificate in Business Administration as outlined below in **Table 3 Program of Study for the Certificate in Business Administration**.
- A student should plan the program of study carefully as course offerings vary from term to term. A student is advised to consult with an academic advisor in the Academic Programs Office to discuss program planning by email to busihelp@mun.ca.

Table 3 Program of Study for the Certificate in Business Administration

Required Courses
BUSI 1000, 2011, 2111, 2205, 2600 6 credit hours in English, 3 credit hours of which may be replaced by any Memorial University of Newfoundland Critical Reading and Writing (CRW) course 9 credit hours chosen from: BUSI 2012, 2112, 2720, 3005, 3310, 3325, 3335, 3401, 3550, 3700, 4306, 4720, Economics 1010, Economics 1020

6.4 Diploma in Business Administration

- The full or part-time Diploma in Business Administration is comprised of 60 credit hours.
- To be considered for graduation a student must have been admitted to the Diploma program and have successfully completed the 60 credit hours outlined below in **Table 4 Program of Study for the Diploma in Business Administration**.
- A student must achieve an overall grade point average of at least 2.5 and a numeric average of at least 60% in the courses which comprise the 60 credit hours outlined below in **Table 4 Program of Study for the Diploma in Business Administration**. A student failing to meet this requirement will be required to repeat a course(s) to raise the overall average and/or GPA to the minimum acceptable level.
- Critical Reading and Writing (CRW) courses are regulated by the Faculty of Humanities and Social Sciences. Eligible CRW courses are indicated under Memorial University of Newfoundland Critical Reading and Writing (CRW).
- A student pursuing the Diploma in Business Administration will be required to complete more than half of the total credit hours required for the Diploma at this University. The courses comprising these credit hours must be applicable to the Diploma in Business Administration.
- A student pursuing the Diploma in Business Administration who has completed a Bachelor's degree at this University or another recognized post-secondary institution, will be required to complete at least 30 credit hours at this University beyond those required for that degree. The courses comprising these credit hours must be applicable to the Diploma in Business Administration.
- A student should plan the program of study carefully as course offerings vary from term to term. A student is advised to consult with an academic advisor in the Academic Programs Office to discuss program planning by email to busihelp@mun.ca.

Table 4 Program of Study for the Diploma in Business Administration

30 Credit Hours Required Prior to Admission	**30 Credit Hours Required After Admission**
BUSI 1000, 2011, 2111, 2205, 2600 6 credit hours in English, 3 credit hours of which may be replaced by any Memorial University of Newfoundland Critical Reading and Writing (CRW) course 9 credit hours chosen from of the following: BUSI 2012, 2112, 2720, 3005, 3310, 3325, 3335, 3401, 3550, 3700, 4306, 4720, Economics 1010, Economics 1020	BUSI 2012, 2112, 2720 3 credit hours chosen from BUSI 3325 or 3335 3 credit hours chosen from BUSI 3310, 3325, 3335, 3401, 3550, 3700, 4306, 4720 Economics 1010, Economics 1020 Mathematics 1000 Statistics 2500 or equivalent 3 credit hours in **non-BUSI electives**. Non-Business electives can chosen from any discipline except Business.

6.5 Joint Degrees of Bachelor of Commerce (Co-operative) and Bachelor of Arts

1. A student must be formally admitted into the Bachelor of Commerce (Co-operative) program in order to concurrently complete the requirements for the Joint Degrees of Bachelor of Commerce (Co-operative) and Bachelor of Arts.
2. The Joint Degrees of Bachelor of Commerce (Co-operative) and Bachelor of Arts is a five year, full-time, 50 course, 150 credit hour program with a structured format comprised of 30 credit hours completed during **Business One**, four Business Professional Development seminars, 120 credit hours completed after **Business One** and three co-operative work terms.
3. Some degree requirements are modified for students concurrently completing the Joint Degrees program. The modifications for the Bachelor of Commerce (Co-operative) portion of the program are outlined below under **Special Requirements for the Joint Degrees of Bachelor of Commerce (Co-operative) and Bachelor of Arts, Bachelor of Commerce (Co-operative)**. The modifications for the Bachelor of Arts portion of the program are outlined below under **Special Requirements for the Joint Degrees of Bachelor of Commerce (Co-operative), Bachelor of Arts** and at **Faculty of Humanities and Social Sciences, Joint Degrees of Bachelor of Arts and Bachelor of Commerce (Co-operative)**. These modifications to the normal curriculum will only be permitted for students who are graduating with the Bachelor of Commerce (Co-operative) and Bachelor of Arts degree at the same convocation.
4. Careful planning of courses is crucial to ensure timely completion of the Joint Degrees of Bachelor of Commerce (Co-operative) and Bachelor of Arts. Therefore, a student is strongly encouraged to consult regularly with academic advisors in the Faculty of Business Administration, the Faculty of Humanities and Social Science, and the Faculty of Science, as appropriate.
5. A student intending to complete the Joint Degrees in the minimum number of 150 credit hours should ensure that at least 78 of these credit hours are completed in courses offered by departments within the Faculty of Humanities and Social Sciences. Majors are also available from the following Departments in the Faculty of Science: Computer Science, Mathematics and Statistics, and Psychology. Careful planning, particularly in the selection of elective courses as well as in the sequence of Major program courses, is therefore recommended to ensure timely completion of the Joint Degrees.
6. A student is advised that, in order to complete the Joint Degrees within the minimum 150 credit hours, at least five of the courses required for the Bachelor of Arts must be successfully completed as opportunities arise and as courses are offered. These courses may be completed during the Spring semesters between Business One and Term 1, between Terms 2 and 3, or during any of the three Work Terms or as a sixth course during any of the Academic Terms following submission and approval of a course load waiver request to the Academic Programs Office of the Faculty of Business Administration.
7. The 150 required credit hours are outlined below in **Table 5 Bachelor of Commerce (Co-operative) Curriculum (Completed Jointly with the Bachelor of Arts)**.

6.5.1 Special Requirements for the Joint Degrees of Bachelor of Commerce (Co-operative) and Bachelor of Arts

6.5.1.1 Bachelor of Commerce (Co-operative)

1. A student in the Bachelor of Commerce (Co-operative) program who is concurrently completing the Bachelor of Arts degree must complete not fewer than 18 and not more than 39 credit hours in approved **Business Electives**, and no fewer than 12 credit hours, but no more than 33 credit hours, in elective courses chosen from the Faculty of Humanities and Social Sciences.
2. A student in the Bachelor of Commerce (Co-operative) program who is concurrently completing the Bachelor of Arts degree must complete the special requirements outlined below under **Bachelor of Arts**.

6.5.1.2 Bachelor of Arts

1. A student intending to complete the Joint Degrees in the minimum number of 150 credit hours should ensure that at least 78 of these credit hours are completed in courses offered by departments within the Faculty of Humanities and Social Sciences. Careful planning, particularly in the selection of elective courses as well as in the sequence of Major program courses, is therefore recommended to ensure timely completion of the Joint Degrees.
2. A student is advised that, in order to complete the Joint Degrees within the minimum 150 credit hours, at least five of the courses required for the Bachelor of Arts must be successfully completed as opportunities arise and as courses are offered. These courses may be completed during the Spring semesters between Business One and Term 1, between Terms 2 and 3, or during any of the three Work Terms or as a sixth course during any of the Academic Terms following submission and approval of a course load waiver request to the Academic Programs Office.
3. A student who chooses to pursue a Major from the Faculty of Science (Computer Science, Mathematics and Statistics, and Psychology) will require more than 150 credit hours to complete their program to ensure meeting the 78 credit hour requirement from the Faculty of Humanities and Social Sciences. Regular consultation with the appropriate academic advisors within the Faculty of Humanities and Social Sciences and Faculty of Science is encouraged.
4. The Bachelor of Arts requires completion of a **Major Program**, a **Minor Program**, a set of **Core Requirements** (comprising a **Breadth of Knowledge Requirement**, a **Critical Reading and Writing (CRW) Requirement**, a **Language Study (LS) Requirement**, a **Quantitative Reasoning (QR) Requirement**, and **Elective** courses, totalling at least 78 credit hours in courses offered by departments within the Faculty of Humanities and Social Sciences. Majors are also available from the following Departments in the Faculty of Science: Computer Science, Mathematics and Statistics, and Psychology. When the Bachelor of Arts is completed jointly with the Bachelor of Commerce (Co-operative) the following course adjustments will be made to the Bachelor of Arts degree:
   a. Minor program requirements are satisfied by Business (BUSI) courses specified in **Table 5 Bachelor of Commerce (Co-operative) Curriculum Completed Jointly with the Bachelor of Arts**; and
   b. the 6 credit hours for the Quantitative Reasoning (QR) requirement for the Bachelor of Arts are satisfied by Mathematics 1000 and Statistics 2500;
   c. Major requirements for the Bachelor of Arts may be satisfied in 36 to 45 credit hours, depending on the department or program chosen. A student is strongly recommended to seek advice from the department or program of the chosen Major to ensure that the proposed degree program is possible within the constraints of course scheduling and prerequisites.
5. A student must also complete the special requirements outlined above under **Bachelor of Commerce (Co-operative)**.

6.5.2 Bachelor of Commerce (Co-operative) Completed Jointly with the Bachelor of Arts

- In addition to the requirements listed below in **Table 5 Bachelor of Commerce (Co-operative) Completed Jointly with the Bachelor of Arts**, students should also refer to information listed under **Joint Degrees of Bachelor of Commerce (Co-operative) and Bachelor of Arts** including the **Special Requirements for the Joint Degrees of Bachelor of Commerce (Co-operative) and Bachelor of Arts**.

Table 5 Bachelor of Commerce (Co-operative) Completed Jointly with the Bachelor of Arts

Term	Required Courses	Electives
Business One (30 credit hours completed prior to admission)	BUSI 1000 Economics 1010, Economics 1020 6 credit hours in English, 3 credit hours of which may be replaced by any Memorial University of Newfoundland Critical Reading and Writing (CRW) course Mathematics 1000	12 additional credit hours in non-BUSI electives as indicated in **Special Requirements for the Joint Degrees of Bachelor of Commerce (Co-operative) and Bachelor of Arts, Bachelor of Arts**, 4. above
Fall Academic Term 1	BUSI 2011, 2111 3 credit hours chosen from BUSI 2205, 2600, 2720 Statistics 2500	3 credit hours in Major, Core or elective courses as indicated in **Special Requirements for the Joint Degrees of Bachelor of Commerce (Co-operative) and Bachelor of Arts, Bachelor of Arts**, 4. above
Winter Academic Term 2	BUSI 200W, 2012, 2112, 6 credit hours from BUSI 2205, 2600, 2720 which must be different from the 3 credit hours chosen in Fall, Academic Term 1	3 credit hours in Major, Core or elective courses as indicated in **Special Requirements for the Joint Degrees of Bachelor of Commerce (Co-operative) and Bachelor of Arts, Bachelor of Arts**, 4. above
Spring		See **Special Requirements for the Joint Degrees of Bachelor of Commerce (Co-operative) and Bachelor of Arts, Bachelor of Commerce (Co-operative)** and **Bachelor of Arts**, 2. above
Fall Academic Term 3	BUSI 300W, 3325, 3401, 3550	6 credit hours in Major, Core or elective courses as indicated in **Special Requirements for the Joint Degrees of Bachelor of Commerce (Co-operative) and Bachelor of Arts, Bachelor of Commerce (Co-operative)** 1. above and in **Special Requirements for the Joint Degrees of Bachelor of Commerce (Cooperative) and Bachelor of Arts, Bachelor of Arts**, 1. and 4. respectively
Winter Work Term 1	BUSI 399W	See **Special Requirements for the Joint Degrees of Bachelor of Commerce (Co-operative) and Bachelor of Arts, Bachelor of Commerce (Co-operative)** and **Bachelor of Arts**, 2. above
Spring Academic Term 4	BUSI 3005, 3310, 3335, 3700, 400W	3 credit hours in Major, Core or elective courses as indicated in **Special Requirements for the Joint Degrees of Bachelor of Commerce (Co-operative) and Bachelor of Arts, Bachelor of Commerce (Co-operative)** 1. above and in **Special Requirements for the Joint Degrees of Bachelor of Commerce (Cooperative) and Bachelor of Arts, Bachelor of Arts**, 1. and 4. respectively
Fall Work Term 2	BUSI 499W	See **Special Requirements for the Joint Degrees of Bachelor of Commerce (Co-operative) and Bachelor of Arts, Bachelor of Commerce (Co-operative)** and **Bachelor of Arts**, 2. above
Winter Academic Term 5	BUSI 4720	12 credit hours in Major, Core or elective courses as indicated in **Special Requirements for the Joint Degrees of Bachelor of Commerce (Co-operative) and Bachelor of Arts, Bachelor of Commerce (Co-operative)** 1. above and in **Special Requirements for the Joint Degrees of Bachelor of Commerce (Cooperative) and Bachelor of Arts, Bachelor of Arts**, 1. and 4. respectively
Spring Work Term 3	BUSI 599W	See **Special Requirements for the Joint Degrees of Bachelor of Commerce (Co-operative) and Bachelor of Arts, Bachelor of Commerce (Co-operative)** and **Bachelor of Arts**, 2. above
Fall Academic Term 6	BUSI 4306, 500W	12 credit hours in Major, Core or elective courses as indicated in **Special Requirements for the Joint Degrees of Bachelor of Commerce (Co-operative) and Bachelor of Arts, Bachelor of Commerce (Co-operative)** 1. above and in **Special Requirements for the Joint Degrees of Bachelor of Commerce (Cooperative) and Bachelor of Arts, Bachelor of Arts**, 1. and 4. respectively
Winter Academic Term 7	BUSI 5001	12 credit hours in Major, Core or elective courses as indicated in **Special Requirements for the Joint Degrees of Bachelor of Commerce (Co-operative) and Bachelor of Arts, Bachelor of Commerce (Co-operative)** 1. above and in **Special Requirements for the Joint Degrees of Bachelor of Commerce (Cooperative) and Bachelor of Arts, Bachelor of Arts**, 1. and 4. respectively

6.6 Joint Degrees of Bachelor of Commerce and Bachelor of Music

- The Joint Degrees of Bachelor of Commerce and Bachelor of Music is a five-year program offered jointly with the Faculty of Business Administration and the School of Music. Students choose from one of the following majors for the Bachelor of Music degree: **General Music Studies** (157 credit hours), **Composition** (160 credit hours), or **Performance** (164 credit hours).
- A student concurrently completing the Joint Degrees program will be permitted to make the adjustments to the Bachelor of Commerce program as outlined in **Table 6 Program of Study for the Bachelor of Commerce Component of the Joint Degrees of Bachelor of Commerce and Bachelor of Music** below. These adjustments to the normal curriculum will only be permitted for students who are graduating with the Bachelor of Commerce degree and the Bachelor of Music degree at the same convocation.
- A student must meet the **Continuance Regulations for the Bachelor of Commerce** program and the **Academic Standards and Continuance Regulations in the Bachelor of Music**. A student who fails to meet Continuance Regulations are advised to seek academic advice from the appropriate academic unit.
- Critical Reading and Writing (CRW) courses are regulated by the Faculty of Humanities and Social Sciences. Eligible CRW courses are indicated under Memorial University of Newfoundland Critical Reading and Writing (CRW).
- Careful planning of courses is crucial to ensure timely completion of the Joint Degrees of Bachelor Commerce and Bachelor of Music. Therefore, a student is strongly encouraged to consult regularly with academic advisors in the Faculty of Business Administration and the School of Music.
- For program requirements for the Major in General Music Studies see **School of Music, Joint Degrees of Bachelor of Music with a Major in General Music Studies and Bachelor of Commerce**. For program requirements for the Major in Composition see **School of Music, Joint Degrees of Bachelor of Music with a Major in Composition and Bachelor of Commerce**. For program requirements for the Major in Performance see **School of Music, Joint Degrees of Bachelor of Music with a Major in Performance and Bachelor of Commerce**.

Table 6 Program of Study for the Bachelor of Commerce Component of the Joint Degrees of Bachelor of Commerce and Bachelor of Music

Business One Requirements for the Bachelor of Commerce Component	**Required Courses for the Bachelor of Commerce Component**	**Bachelor of Music Major Component**
Business One (30 credit hours). Students completing the Joint Degrees of Bachelor of Commerce and Bachelor of Music must have an average of at least 65% on the 30 credit hours that comprise Business One at the time they complete those 30 credit hours.	**Required Business One Courses** BUSI 1000 Economics 1010, Economics 1020 6 credit hours in English, 3 credit hours of which may be replaced by any Memorial University of Newfoundland Critical Reading and Writing (CRW) course Mathematics 1000 12 additional credit hours as determined by the Music Major **Required Business And Other Courses** BUSI 200W, 400W, 500W, 2011, 2012, 2111, 2112, 2205, 2600, 2720, 3005, 3210, 3310, 3325, 3335, 3401, 3550, 3700, 4306, 4720, 5002 Statistics 2500	Students must complete one of three Major programs below in the course sequencing as outlined for the chosen Major program. **Major in General Music Studies** For program requirements for the Major in General Music Studies see **School of Music, Joint Degrees of Bachelor of Music with a Major in General Music Studies and Bachelor of Commerce**. **Major in Composition** For program requirements for the Major in Composition see **School of Music, Joint Degrees of Bachelor of Music with a Major in Composition and Bachelor of Commerce**. **Major in Performance** For program requirements for the Major in Performance see **School of Music, Joint Degrees of Bachelor of Music with a Major in Performance and Bachelor of Commerce**. The student must meet the **Continuance Regulations for the Bachelor of Commerce** program and the **Academic Standards and Continuance Regulations in the Bachelor of Music**.
Careful planning of courses is crucial to ensure timely completion of the Joint Degrees of Bachelor Commerce and Bachelor of Music. A student is strongly encouraged to consult regularly with academic advisors in the Faculty of Business Administration and the School of Music. A student must graduate with the Bachelor of Commerce degree and the Bachelor of Music degree at the same convocation.		

6.7 Minor in Business Administration

- A Minor in Business Administration shall consist of 24 credit hours as outlined below in **Table 7 Minor in Business Administration**.
- A student who completes courses at another university in the area of the Minor in Business Administration may be eligible to transfer a maximum of 12 of those credit hours towards the requirements in the Minor at Memorial University of Newfoundland.
- A student is advised to consult with an academic advisor in the Academic Programs Office to discuss course selection throughout their program by email to busihelp@mun.ca.

Table 7 Minor in Business Administration

Required Courses
BUSI 1000, 2011, 2111, 2205, 2600 3 credit hours chosen from either BUSI 3310 or 3325 6 credit hours chosen from BUSI 2112, 2720, 3005, 3310, 3325, 3335, 3401, 3550, 3700, 4306, 4720

7 Continuance and Promotion Regulations

7.1 Bachelor of Commerce

These regulations apply to the Bachelor of Commerce program. For the Diploma in Business Administration see **Continuance Regulations for the Diploma in Business Administration**. For the Bachelor of Commerce (Co-operative) see **Promotion Regulations for the Bachelor of Commerce (Co-operative)**.

7.1.1 General Information

In addition to meeting the **Promotion Regulations** for the Faculty of Business Administration, all students must meet the general academic regulations (Undergraduate). For further information refer to the ***UNIVERSITY REGULATIONS*** **- General Academic Regulations (Undergraduate)**.

7.1.2 Continuance Regulations

1. A Bachelor of Commerce student must qualify for continuance after each term of study beyond Business One. To meet continuance, a student must have an overall average of at least 60% over the last 30 credit hours of courses taken. In the event that the student has more courses than needed in the earliest term used, the 30 credit hours of courses with the highest grades in that term will be used in the calculation.
2. A student who fails to achieve the standards outlined in 1. above will be required to withdraw from the program. A student may be considered for readmission after a lapse of one semester. In order to be considered for readmission, a student must formally apply for readmission.
3. A status of required to withdraw will be reflected on a student's transcript.
4. A student who is required to withdraw from the program for a second time is not eligible for readmission into the program.

7.2 Bachelor of Commerce (Co-operative)

There regulations apply to the Bachelor of Commerce (Co-operative). For the Diploma in Business Administration see **Continuance Regulations for the Diploma in Business Administration**. For the Bachelor of Commerce see **Continuance Regulations for the Bachelor of Commerce**.

7.2.1 General Information

In addition to meeting the **Promotion Regulations** for the Faculty of Business Administration, all students must meet the general academic regulations (Undergraduate). For further information refer to the ***UNIVERSITY REGULATIONS*** **- General Academic Regulations (Undergraduate)**.

7.2.2 Promotion Status for Academic Terms

7.2.2.1 Promoted

1. For a Bachelor of Commerce (Co-operative) student to be promoted from each of Terms 1 through 7, the requirements are the achievement of a passing grade in at least 12 credit hours and an overall average of at least 60% on those courses required in each academic term.
2. A student who meets academic promotion requirements but fails a core course in any of Terms 1 through 7 will be required to successfully repeat that course prior to graduation.
3. A student who meets academic promotion requirements but who fails an elective in any of Terms 1 through 7 will be required to either successfully repeat that elective or successfully complete a different elective to replace it prior to graduation.
4. A student must repeat or replace the failed course during the Spring semester between Terms 2 and 3, during one of the three work terms (for example in the evening or online), or as a sixth course during a subsequent academic term, following the submission and approval of a course load waiver request to the Academic Programs Office. A student is advised to note the prerequisites for subsequent courses and must plan to repeat failed courses as soon as possible to ensure meeting the course sequencing requirements of the program.
5. A student is advised that subsequent attempts at successfully completed courses cannot be used to meet program requirements, and should note that the grade from the first successful attempt will be used to compute the degree average. A student wishing to repeat courses to improve grades must do so during one of the three work terms or as a sixth course during an academic term, following the submission and approval of a course load waiver request to the Academic Programs Office.

7.2.2.2 Required to Withdraw

1. A student in an academic term who does not maintain the appropriate course load as outlined in **Program Regulations, Bachelor of Commerce (Co-operative), bullets 1 and 5**, and who does not have the prior approval of the Committee on Undergraduate Studies for a reduced course load, will be required to withdraw from the Bachelor of Commerce (Co-operative) program.

2. A student completing Terms 1 through 7 who fails to meet promotion standards will be required to withdraw from the program.
3. A student who receives a failing grade on a work term will be required to withdraw from the program.
4. A status of required to withdraw will be reflected on a student's transcript.
5. A student who has been required to withdraw from the program may reapply for admission into the program in accordance with **Admission/Readmission Regulations for the Faculty of Business Administration, Bachelor of Commerce (Co-operative), Beyond Business One, Readmission**.
6. A student who has been required to withdraw twice from the program will not be eligible for readmission to the program.

7.2.2.3 Voluntary Withdrawal

1. A student who is completing an academic term may withdraw voluntarily from the program prior to the last day to drop courses without academic prejudice by notifying the Office of the Registrar and the Academic Programs Office of the Faculty of Business Administration in writing.
2. A student who is completing an academic term may, due to illness, bereavement, or other acceptable cause, duly authenticated in writing, withdraw voluntarily from the program after the last day to drop courses without academic prejudice only with the approval of the Academic Programs Office of the Faculty of Business Administration.
3. A student who is completing a work term and who has not accepted a work placement may withdraw voluntarily from the program by notifying the Office of the Registrar and the Academic Programs Office of the Faculty of Business Administration in writing.
4. A student who is completing a work term and who has accepted a work placement may not withdraw voluntarily from the program.
5. A voluntary withdrawal is not reflected on a student's transcript.
6. A student who has voluntarily withdrawn from the program may reapply for readmission into the program in accordance with **Admission/Readmission Regulations for the Faculty of Business Administration, Bachelor of Commerce (Co-operative), Beyond Business One, Readmission**.

7.2.2.4 Promotion Status of Work Terms

1. A student is not permitted to drop work terms without prior approval of the Committee on Undergraduate Studies upon the recommendation of the Office of Business Cooperative Education.
2. A student who drops a work term without permission, or who fails to honour an agreement to work with an employer, or who conduct themselves in such a manner as to cause the discharge from the job, will be awarded a grade of FAL for that work term.
3. Permission to drop a work term does not constitute a waiver of degree requirements, and a student who has obtained such permission must successfully complete an approved work term in lieu of the one dropped.

7.2.2.5 Leave of Absence

A leave of absence from the Bachelor of Commerce (Co-operative) program may be granted in one year intervals, up to a maximum of two years. A request for a leave of absence must be made in writing to the Academic Programs Office.

7.3 Diploma in Business Administration

These regulations apply to the Diploma in Business Administration. For the Bachelor of Commerce see **Continuance Regulations for the Bachelor of Commerce**. For the Bachelor of Commerce (Co-operative) see **Promotion Regulations for the Bachelor of Commerce (Co-operative)**.

7.3.1 General Information

In addition to meeting the **Promotion Regulations** for the Faculty of Business Administration, all students must meet the general academic regulations (Undergraduate). For further information refer to the ***UNIVERSITY REGULATIONS* - General Academic Regulations (Undergraduate)**.

7.3.2 Continuance Regulations

1. In the Diploma in Business Administration a student must qualify for continuance after each term of study. To meet continuance, a student must have an overall average of at least 60% over their last 30 credit hours of courses taken. In the event that the student has more courses than needed in the earliest term used, the 30 credit hours of courses with the highest grades in that term will be used.
2. A student who fails to achieve the standards outlined in 1. above will be required to withdraw from the program. The student may be considered for readmission after a lapse of one semester. In order to be considered for readmission, a student must formally apply for readmission. A status of required to withdraw will be reflected on a student's transcript.
3. A student who is required to withdraw from the program for a second time is not eligible for readmission into the program.

8 Graduation

Upon meeting the qualifications for the program, students must apply to graduate on the prescribed "Application for Graduation" form. This form may be obtained online at selfservice.mun.ca. The deadlines for application submission are July 15 for Fall (October) graduation, January 3 for Winter (February) in-absentia graduation, and January 15 for Spring (May) graduation. Applications received after these dates will be processed as time and resources permit. Additional information is available from the Office of the Registrar at www.mun.ca/regoff/graduation. Information regarding Convocation, including the dates of the ceremony, is available at www.mun.ca/convocation.

9 Waiver of Faculty Regulations

A student has the right to request waiver of Faculty regulations. The requirement for a specific course, or courses, may in special circumstances, and upon individual request, be waived by the Committee on Undergraduate Studies. Such waivers shall not reduce the total number of credits required for the Degrees or Diploma.

A student wishing waiver of University academic regulations should refer to ***UNIVERSITY REGULATIONS,* Appeal of Decisions General Academic Regulations (Undergraduate) - Waiver of Regulations**.

10 Appeal of Decisions

Any student whose request for waiver of Faculty regulations has been denied has the right to appeal. For further information refer to ***UNIVERSITY REGULATIONS,* Appeal of Decisions**.

11 Course Descriptions

In accordance with Senate's *Policy Regarding Inactive Courses*, course descriptions for courses which have not been offered in the previous three academic years and which are not scheduled to be offered in the current academic year have been removed from the following listing. For information about any of these inactive courses, please contact the Dean of the Faculty.

Unless otherwise specified in the course description or awarded as transfer credit, only Business courses offered by the Faculty of Business Administration and designated as BUSI are applicable to programs of the Faculty of Business Administration.

All courses of the Faculty are designated by BUSI.

1000 Introduction to Business in Society is designed to provide students with an introduction to the Canadian business environment, business issues and functions, including entrepreneurship, accounting and financial management, human resource management, and marketing. These areas will be examined in profit and not-for-profit contexts. Students will explore the importance of business ethics, sustainability, and social responsibility in an increasingly global environment.
CR: Business 1010, the former BUSI 2001
UL: may be used in place of Business 1010 in programs offered in Business Administration at the Grenfell Campus

2000 Business Communications - inactive course.

2011 Business Writing introduces students to the fundamentals of effective business writing. Students will learn how to apply writing and research skills, and produce professional-quality business documents. In reading, analyzing, planning, and writing documents for various audiences, students will learn about the distinctive elements of business writing. Students will develop awareness of language and tone, and learn how to reference, organize and convey ideas and information using appropriate means to accomplish their intended purpose.
CR: the former BUSI 2010
PR: BUSI 1000, 6 credit hours in English of which 3 credit hours may be replaced by any Memorial University of Newfoundland Critical Reading and Writing (CRW) course

2012 Business Professionalism introduces students to the essential skills which help business professionals be successful. Beyond strong technical and analytical skills, business graduates are expected to possess effective presentation, social and emotional skills with ethics, integrity and attention to inclusion and diversity. This knowledge and skill set will be developed through use of various readings, exercises, group work and individual presentations to foster professionalism, empathy, and effective interactions with all stakeholders.
CR: the former BUSI 2010
PR: BUSI 1000, BUSI 2011

2102 Introductory Accounting for Non-Business Students provides introductory coverage of both financial and managerial accounting topics. Areas covered include financial statements, break-even analysis and budgeting.
CR: BUSI 2111 or the former BUSI 1101, BUSI 2112 or the former BUSI 2101

2111 Introductory Financial Accounting (same as the former BUSI 1101) introduces the student to financial accounting principles, concepts, and issues. The course provides an introduction to generally accepted accounting principles (GAAP); measurement and valuation of financial statement items; and preparation and usefulness of financial statements.
CR: the former BUSI 1101, BUSI 2102, Business 2100
PR: Mathematics 1090 or 109B or a combination of placement test and high school Mathematics scores acceptable to the Faculty

2112 Introductory Management Accounting (same as the former BUSI 2101) introduces management accounting by developing students' ability to prepare, interpret, and communicate accounting information that supports management decisions. The course also considers the limitations inherent in this information. For example, a product cost system seldom perfectly satisfies the information requirements of both external (financial accounting) and internal (management accounting) users. Main topics covered in the course include costing systems, cost behaviour, cost-volume-profit analysis, relevant costing, business decisions, budgeting, and performance evaluation.
CR: the former BUSI 2101, BUSI 2102, Business 2110
PR: the former BUSI 1101, BUSI 2111

2205 Introduction to Marketing provides a relationship-focused introduction to the marketing principles that support evidence-based decision making. Students are introduced to the marketing process, social responsibility and marketing ethics, marketing research, consumer and business buyer behaviour, market segmentation, targeting and positioning, and product planning, pricing, distribution, and marketing communication. In this course, students will become familiar with the strategic and tactical components of a comprehensive marketing plan.
CO: BUSI 2011
CR: Business 2200, the former BUSI 2210, Business 2250
PR: BUSI 1000

2220 Personal and Business Branding with Social Media develops students' ability to design and refine on-line personal brands and display brands through social media channels.
CR: Business 3230, the former BUSI 6042

2400 Decision Modeling provides an introduction to linear optimization and the related topics of integer, assignment, and transportation models; and decision analysis including payoff matrices, decision trees, and Bayesian revision. All topics will be taught within the context of business applications.
CO: Statistics 2500
PR: Mathematics 1000

2600 Entrepreneurial Thinking and Behaviour (same as the former BUSI 1600) is an introductory course designed to give students an understanding of the broad field of entrepreneurship, the significant role that entrepreneurship plays in business and society and their potential for entrepreneurial careers. Students are encouraged to think and act entrepreneurially and to be creative in assessing business opportunities. Skills gained in this course will be useful in any organization.
CR: the former BUSI 1600

2710 Modeling and Implementing Business Processes introduces techniques for understanding and modelling business processes and implementing them in modern enterprise systems. Course work will be project-based; students will create small-scale business applications, including web-based applications, using current design and development methodologies and tools.
PR: BUSI 1000, BUSI 2011

2720 Business Computer Applications features a strong hands-on, problem-based approach rooted in a variety of business disciplines to allow students to develop practically relevant technology skills. Students will learn to explore and solve business problems and communicate findings using current productivity applications including spreadsheets, programming language and graphical visualization tools.
PR: BUSI 1000

3005 Business Law I (same as the former BUSI 4000) is an introductory course that focuses on the laws relating to business activity in Canada and Newfoundland and Labrador, including key aspects of the nature of law and legal processes, an examination of the law of contract, tort, business organizations and agency.
CR: Business 3030, the former BUSI 4000
PR: BUSI 2011

3160 Cost Accounting (same as the former BUSI 5160) deals with the use of accounting data for decision making. Topics covered include cost estimation, pricing, joint costs, advanced variance analysis, total quality management, just-in-time, decentralization, transfer pricing, performance evaluations, activity-based accounting, and backflush costing.
CR: the former BUSI 5160
PR: BUSI 2112 (or the former BUSI 2101) with a final grade of at least 60%

3210 Consumer Behaviour deals with concepts related to factors which influence the purchase and consumption behaviour of individuals including culture, social class, reference groups, perception, learning, motivation, personality and lifestyle. The unique aspects of groups and organizational buyers will also be examined.
CR: Business 3240
PR: BUSI 2011, BUSI 2205 or the former BUSI 2210

3250 Business and Industrial Marketing (same as the former BUSI 5250) presents a comprehensive view of business markets, including industrial, institutional, and government markets. There is a balanced focus on strategy development and implementation. Particular attention is given to organizational buying behaviour, relationship management, global competitiveness, and the marketing of new high technology products and services.
CR: the former BUSI 5250
PR: BUSI 2011, BUSI 2205 or the former BUSI 2210

3310 Organizational Behaviour focuses on the study of individual and

group processes in organizations. Taking a systematic approach to the study of behavior this course addresses the areas of personality, job attitudes, diversity, motivation, leadership, negotiation, conflict, decision making and group/team dynamics.
CR: Business 2300
PR: BUSI 2011

3325 Human Resource Management (same as the former BUSI 4320) provides an introduction to Human Resources Management (HRM). It includes a basic overview of the activities in the area of HRM. Key topics include job analysis, human resources planning, legal issues, recruiting and selecting, employee onboarding, training and development, performance management, diversity, compensation and benefits, occupational health & safety, and how unions impact HRM functions. It reviews the role of HRM in contributing to the well-being of the total enterprise.
CR: Business 3300, the former BUSI 4320
PR: BUSI 2012

3335 Labour Relations (same as the former BUSI 4330) examines labour relations via an Industrial Relations Systems Model and other theoretical perspectives. Key components include environmental factors, parties of interest (such as workers/unions, employers, and government), interaction between the parties, dispute resolution, and outcomes such as strikes/ lockouts, and terms and conditions of work in unionized and non-union settings. To explore these topics, students will be exposed to various experiential exercises including a collective bargaining simulation.
CR: Business 3320, the former BUSI 4330
PR: BUSI 2011

3401 Operations Management teaches fundamental concepts, methods, tools, and techniques to understand, analyze, and effectively manage as well as improve operations in business organizations. The course covers operations competitiveness and strategy, productivity, forecasting, capacity planning, material requirements planning, waiting lines analysis, project management, inventory management, quality control and its improvement, and supply chain management.
CR: Business 3410
PR: Statistics 2500

3405 Optimization I: Applications (same as the former BUSI 5401) extends the formulation seen in BUSI 2400 to more complex optimization models.
CR: the former BUSI 5401
PR: BUSI 2400, Statistics 2500

3406 Optimization II: Algorithms (same as the former BUSI 5402) covers the algorithms needed to solve the computer models made in BUSI 2400: the simplex and revised simplex algorithms, the interior-point algorithm, and the branch and bound algorithm.
CR: the former BUSI 5402
PR: BUSI 2400, Statistics 2500

3550 Financial Management I (same as the former BUSI 4500) introduces students to theoretical and practical aspects of financial management, including current technology for financial analysis and trading. Topics covered include: the time value of money, pricing of stocks and bonds, risk and return, diversification, the Capital Asset Pricing Model, and capital budgeting.
CR: Business 3500, the former BUSI 4500, Economics 3160
PR: BUSI 2111 or the former BUSI 1101, Economics 1010, Statistics 2500

3610 Regulatory and Taxation Issues for Small Business is designed for non-accounting students and provides knowledge of various tax and regulatory issues considered in starting a business. The role of tax in decision making is examined as well as types of corporate funding to establish a new business through government grants, conventional loans and tax credits as provided under the Income Tax Act. Alternative corporate structures, aspects of employee compensation, business valuations and practical aspects of starting a business will also be examined.
PR: successful completion of at least 48 credit hours

3630 Venture Creation (same as the former BUSI 5600) covers the business creation process from the idea conception stage to the launch stage. Students learn how to search for, screen and evaluate opportunities, and to plan and assemble the required resources, including the preparation of an actual business plan. Alternatives to new venture creation, such as purchasing an existing business and purchasing a franchise, are also explored. Extensive group work is required.
CR: Business 3600, the former BUSI 5600
PR: successful completion of at least 48 credit hours

3700 Information Systems examines information systems in an organizational context. Students will learn to: explain how information systems generate organizational value; identify, describe, and evaluate options for acquiring information systems; assess the appropriateness of an information systems strategy in the context of an organizational strategy, and identify and analyze information systems-related risks and learn to propose mitigation approaches to those risks by creating appropriate policies and procedures.
PR: BUSI 1000, BUSI 2011

4005 Business Law II (same as the former BUSI 5000) is an advanced course that focuses on real and intellectual property law, special types of contracts, business and banking law, business succession planning law and the evolving legal business environment.
CR: Business 4030, the former BUSI 5000
PR: BUSI 3005 or the former BUSI 4000

4006 International Business Law (same as the former BUSI 6040) develops the skills a business student must have in understanding the laws and regulations that exist and relate to international business decision making. The course will equip students with a knowledge and understanding of laws and regulations that currently prevail in international business operations.
CR: the former BUSI 6040
PR: BUSI 3005 or the former BUSI 4000

4011 Strategic Management of Technology and Innovation (same as the former BUSI 6010) is designed to explore the strategic management of technology and innovation for improving competitiveness and for business development. This will include market-strategy technology connections, and technical innovation/new product development processes. Technology and technical innovation are viewed as fundamental to strategic competitiveness and business development as important elements of the management of strategic change in the business firm. In approaching technical innovation as strategic implementation, business environmental, organizational capability, human resources and management factors will be discussed.
CR: the former BUSI 6010
PR: BUSI 3005 or the former BUSI 4000, BUSI 3325 or the former BUSI 4320, BUSI 3335 or the former BUSI 4330, BUSI 3550 or the former BUSI 4500, BUSI 3700

4015 Business and Society (same as the former BUSI 7010) examines the inter-relationships among business, government, society and the environment. Topics include: the social-economic business system, business ideologies, social responsibilities of business, business ethics, stakeholder and issues management, and selected current issues in business.
CR: Business 2060, Business 4020, the former BUSI 7010
PR: BUSI 1000, BUSI 2012

4021 Topics in Resource-Based Industries Management (same as the former BUSI 5020) enables students to engage with resource-based industry companies and agencies through an integrated working knowledge of the sector and its operations. Topics include: an overview of the oil and mining industries, regulation, social license concerns, human resources issues, procurement, and contracting. The course provides opportunities for student involvement with industry leaders and events through the use of guest speakers.
CR: the former BUSI 5020

4101 Intermediate Accounting I (same as the former BUSI 6100) covers intermediate areas of accounting for assets, revenue and expense recognition, and presentation and disclosure of issues pertinent to general-purpose financial statements.
CR: Business 3100, the former BUSI 6100
PR: BUSI 2111 (or the former BUSI 1101) with a final grade of at least 60%

4102 Intermediate Accounting II (same as the former BUSI 6110) covers intermediate areas of accounting for liabilities, both short and long-term including deferred taxes; employees' future benefits and leases; shareholders' equity; and financial statement presentation including earnings per share.
CR: Business 3110, the former BUSI 6110
PR: BUSI 2111 (or the former BUSI 1101) with a final grade of at least 60%

4121 Taxation I (same as the former BUSI 6120) covers personal income tax including the calculation of net and taxable income, federal and provincial income taxes and surtaxes including basic tax planning for individuals.
CR: Business 3120, the former BUSI 6120
PR: either BUSI 2111 or the former BUSI 1101, or the former BUSI 3100; and BUSI 3005 or the former BUSI 4000

4131 Auditing (same as the former BUSI 6130) covers the theory and practice of external auditing according to Canadian Auditing Standards (CASs). The course also provides an overview of other assurance services and reports.
CR: Business 4130, the former BUSI 6130
PR: BUSI 4101 (or the former BUSI 6100) with a final grade of at least 60%; or BUSI 4102 (or the former BUSI 6110) with a final grade of at least 60%

4215 Marketing Communications (same as the former BUSI 5210) provides a theoretical background on the nature, role and principles of marketing communications; and develops analytical and decision-making skills in planning, executing, evaluating and controlling marketing communications campaigns.
CR: the former BUSI 5210

PR: BUSI 2011, BUSI 2205 or the former BUSI 2210

4217 Professional Selling (same as the former BUSI 5217) provides a detailed introduction to and application of the principles of personal selling. The course introduces the basic concepts of professional selling, including customer analysis, communication skills, effective openings and closings, and customer relations. Selling skills and concepts are developed through the extensive use of sales exercises, role-plays and presentations.
CR: the former BUSI 5217
PR: BUSI 2011, BUSI 2205 or the former BUSI 2210

4218 Salesforce Management (same as the former BUSI 6217) examines the elements of an effective salesforce as a key component of the organization's total marketing effort. The course will apply theory relating to salesforce management from a manager's point of view. Topics include the sales process, the relationship between sales and marketing salesforce structure, territory design, use of technology to improve salesforce effectiveness, and issues in recruiting, selecting, training, motivating, compensating and retaining salespeople.
CR: the former BUSI 6217
PR: BUSI 2011, BUSI 2205 or the former BUSI 2210

4221 Marketing Research (same as the former BUSI 5220) is designed to acquaint the student with the use of marketing research as an aid to management. This is a comprehensive survey of the scope and methods of marketing research.
CR: Business 4210, the former BUSI 5220
PR: BUSI 2011, BUSI 2205 or the former BUSI 2210, Statistics 2500

4235 Services Marketing (same as the former BUSI 6230) examines the marketing of services and the role of services in supporting the marketing of tangible products. This course identifies the distinct issues which are encountered in services marketing and explores strategies for implementing services marketing programs. This course examines in detail the role of people in delivering services, the importance of service quality as a strategic differentiating tool, and the importance of collaboration between marketing and human resources management in the delivery of services.
CR: Business 3220, the former BUSI 6230
PR: BUSI 2011, BUSI 2205 or the former BUSI 2210

4241 Digital Marketing (same as the former BUSI 6241) is designed to instruct students on the best practices and trends for digital marketing, specifically through the utilization of digital advertising across web and social media, communications and engagement through messaging applications, and optimizing web presence. Throughout the course, an introduction to digital analytics for each channel will be discussed. This course complements BUSI 2220 where the focus is on the effective utilization of social media channels and other online platforms.
CR: the former BUSI 6241
PR: BUSI 2011, BUSI 2205 or the former BUSI 2210

4246 International Marketing (same as the former BUSI 7240) provides an understanding of the effects that the international dimension has upon the strategies and management of the marketing efforts of the firm. In particular, the student is introduced to the analysis techniques of the various environments that constitute a country analysis. Entry strategies are discussed with an emphasis upon the export process. Finally, the standardization/adaptation question is discussed in the context of each element of the marketing mix.
CR: Business 4230, the former BUSI 7240
PR: BUSI 2011, BUSI 2205 or the former BUSI 2210

4250 Retailing Management (same as the former BUSI 6250) provides an integrative examination of the activities involved in marketing goods and services directly to the ultimate consumer. Specifically, the following areas will be examined within a managerial framework: the evolution of retailing; retailing within the marketing channel; market analysis and planning; shopping behaviour; image and retail advertising; trading area and site analysis; store layout; shelf space utilization; merchandising; and the future prospects for retailing.
CR: the former BUSI 6250
PR: BUSI 2011, BUSI 2205 or the former BUSI 2210

4305 New Directions in Organizational Behaviour (same as the former BUSI 6301) provides an opportunity for students to explore and to develop their interests in topics in a dynamic field. Topics will be selected according to current emphases in the organizational behaviour literature.
CR: the former BUSI 6301
PR: BUSI 3310

4306 International Business (same as the former BUSI 5302) introduces students to essential frameworks and different political, economic, legal systems and technological forces that impact the global business environment. Content includes globalization, de-globalization, the global business environment, global strategy and cross-cultural management. Students will be able to explain the drivers and consequences of globalization, analyze the role of multinationals, and evaluate the role of ethics and social responsibility in the global economy.
CR: BUSI 4040, the former BUSI 5302
PR: BUSI 1000, BUSI 2012, BUSI 3005 or the former BUSI 4000, Economics 1010, Economics 1020

4315 Organizational Theory (same as the former BUSI 5301) focuses on the organization, its environment, and its subsystems. From providing a basic appreciation of the role and practice of research in organizations, study extends to measures of organizational effectiveness, determinants of structure and design, power and politics, intergroup conflicts and conflict resolution, and organizational development and change.
CR: Business 3010, the former BUSI 5301
PR: BUSI 3310

4322 Employee Recruitment and Selection (same as the former BUSI 6312) is a critical factor in creating high performance work systems. This course examines the role of selection in Human Resource Management, legal issues, measurement, selection criteria, job competencies, testing, and interviewing, and making the employment decision.
CR: Business 4310, the former BUSI 6312
PR: BUSI 3325 or the former BUSI 4320

4325 Advanced Human Resource Management (same as the former BUSI 6310) examines processes for managing contemporary Human Resource Management (HRM) issues. Topics include problem solving in the areas of promotion policy, performance appraisal, test validation, training and development, compensation, job evaluation and pay equity, wrongful dismissal, occupational health and safety, absenteeism, equity, diversity, inclusion and racism. Students will examine cases and other material involving worker-management conflict and seek to relate these to the legal, ethical and behavioural foundations of HRM in both unionized and non-unionized settings.
CR: the former BUSI 6310
PR: BUSI 3325 or the former BUSI 4320

4326 International Human Resource Management (same as the former BUSI 6311) develops the skills a business student must have in understanding the processes and practices of international human resource management (IHRM) for a successful managerial career. The course will equip students with a solid knowledge and understanding of human resource functions and practices that currently prevail in global/international business operations.
CR: the former BUSI 6311
PR: BUSI 3325 or the former BUSI 4320

4335 Advanced Labour Relations (same as the former BUSI 6320) provides advanced treatment of industrial and labour relations (ILR) in Canada, with primary emphasis on labour-management relationship and understanding recent ILR problems/issues and the resolution options available. Topics may include industrial relations theory; labour law reform; union growth and structure; management strategy; the role of third parties; workplace innovations; alternative dispute resolution mechanisms; union impact; public sector labour relations; comparative industrial relations; etc. Students may be exposed to various role-playing exercises applicable to ILR.
CR: the former BUSI 6320
PR: BUSI 3335 or the former BUSI 4330

4336 International Labour Relations (same as the former BUSI 6330) aims to place Canadian industrial relations in an international context by studying industrial relations in a number of different countries, bearing in mind the challenges faced by practitioners and policy makers arising from globalization and the information age. The review includes a selection of long-established industrialized countries as well as later industrializing countries.
CR: the former BUSI 6330
PR: BUSI 3335 or the former BUSI 4330

4410 Project Management (same as the former BUSI 7410) introduces methodology and theory for selecting, planning and managing projects including project portfolio selection, creation of a plan including breakdown of tasks, construction of inherent relationships and dependencies, and controlling execution of activities according to the plan. Emphasis is placed on resource allocation, leveling and management, critical path analysis, risk analysis, accounting for uncertainties and time-cost trade-offs. Also addressed are issues related to multi-project management and the roles of the project manager and team.
CR: the former BUSI 7410
PR: successful completion of at least 78 credit hours

4415 Supply Chain Management (same as the former BUSI 6415) covers the management of the processes, assets, and flows of material and information required to satisfy customers' demands. In this course, important supply chain drivers will be identified and investigated in detail such as inventory, information and pricing. Those drivers determine the performance of a supply chain. The understanding of these key drivers and their inter-relationships with strategy and other functions of the company are really crucial in the management of any supply chain.
CO: BUSI 3401, BUSI 3700
CR: the former BUSI 6415
PR: BUSI 3401, BUSI 3700, Statistics 2500

4420 Logistics Management (same as the former BUSI 6410) will focus on

transportation, location, procurement and distribution aspects of logistics management, within local and global settings. A number of classical and latest models related to the focus areas will be introduced, and some real-life case examples discussed. The focus is on modes of transportation, transportation management, facility location, procurement and supplier selection, distribution strategies, and global logistics.
CR: the former BUSI 6410
PR: BUSI 3401, Statistics 2500

4540 Investments (same as the former BUSI 6510) is a study of investment securities, risks, markets and mechanics; an appraisal of the economy, the industry and the firm; and portfolio management for personal and institutional investments.
CR: Business 4510, the former BUSI 6510
PR: BUSI 3550 or the former BUSI 4500

4545 Options and Futures (same as the former BUSI 7510) is an extension of BUSI 4540 Investments, which will introduce the student to the workings of the options and futures markets. Specific topics will include the institutional structure of the markets, option pricing, strategies such as straddles and spreads, hedging, spot/forward/futures markets, speculation, risk transference and market efficiency considerations.
CR: the former BUSI 7510
PR: BUSI 4540 or the former BUSI 6510

4550 Financial Management II (same as the former BUSI 5500) is an extension of BUSI 3550. Topics include capital investment decision-making using discounted cash flow methodologies; investments under uncertainty; financial structure and leverage; analysis of money and capital markets; further examination of long-term external financing.
CR: Business 3510, the former BUSI 5500
PR: BUSI 3550 or the former BUSI 4500

4560 International Finance (same as the former BUSI 6550) examines the risks and opportunities that arise for firms when they extend operations into international markets. Specific topics will include the determination of exchange rates, the international monetary system, balance of payments, the foreign exchange market, international money and capital markets, the parity conditions, accounting exposure, economic exposure, transactions exposure, political risk, and global financing. Knowledge of these topic areas will give further understanding with respect to operating within the constraints of the international marketplace.
CR: the former BUSI 6550
PR: BUSI 3550 or the former BUSI 4500

4605 Small Business Consulting (same as the former BUSI 6605) introduces students to the nature of business consulting and the challenges associated with growth in small firms. The course draws upon knowledge from various functional areas and emphasizes complex and interdisciplinary applications of this knowledge in a real-world environment. Topics include models of the consulting process, problem diagnosis, managing the client relationship, research design, document preparation and ethics in consulting. Working in teams, students will undertake a problem-solving project for a local organization. A student will not be permitted to register for the course after the first day of classes.
AR: attendance is required
CR: the former BUSI 6605
PR: BUSI 3005 or the former BUSI 4000, BUSI 3335 or the former BUSI 4330, BUSI 4306

4615 Small Enterprise and Regional Development (same as the former BUSI 6610) explores the potential and constraints on efforts to foster small enterprise formation and expansion as a means to promote regional economic development. It critically examines government initiatives to promote small business as the panacea for depressed regional economies, and reviews changes in the global economy and the organization of production which may enhance small business competitiveness. Both Canadian and international cases are studied, with theoretical and empirical findings related to the Newfoundland and Labrador context.
CR: the former BUSI 6610

4700 Information Systems Analysis and Design (same as the former BUSI 5700) provides students with the skills to identify business problems which may be solved using information technology, determine requirements for information systems solutions, and develop detailed designs which form the basis for implementing systems. Topics may include role of the user in systems development, systems development life cycle, requirements analysis and conceptual modelling, structured analysis and design, and trends in systems development methodologies. The importance of CASE tools in modern systems development is emphasized through hands-on exercises.
CR: the former BUSI 5700
PR: BUSI 3700

4710 Business Models and Strategy of Electronic Commerce (same as the former BUSI 5702) examines business concepts, social issues, and technology issues related to e-commerce, as well as providing an introduction to current practices, opportunities and challenges in implementing e-commerce solutions. Topics include business models associated with web-based commerce; security, privacy, and intellectual property issues; payment and distribution systems; internet marketing; and strategic and planning issues.
CR: the former BUSI 5702
PR: BUSI 3700

4720 Business Analytics introduces concepts and techniques to select, evaluate, prepare and process data for decision making in organizations. Students learn to select and apply descriptive, predictive and prescriptive techniques, including deep learning, sequence analysis and text mining, to solve business problems, and learn to interpret and communicate results. The course also examines ethical and legal issues in the use of business analytics and discusses appropriate governance and oversight. Students analyze real-life data using modern software.
PR: BUSI 2720, Mathematics 1000, Statistics 2500

5001 Strategic Management (same as the former BUSI 7000) develops student's skills to create and implement organizational strategy aimed at achieving superior performance and sustaining it over the long run. Primarily based on case studies and experiential learning, students apply theories of strategy and integrate concepts of the various functional areas of business, learning how successful strategy simultaneously satisfies internal and external circumstances of an organization.
CR: Business 4010, the former BUSI 7000
PR: BUSI 2012, BUSI 2205 or the former BUSI 2210, BUSI 3325 or the former BUSI 4320, BUSI 3550 or the former BUSI 4500, BUSI 4306 or the former BUSI 5302

5002 Strategic Management in the Music Industry (same as the former BUSI 7002) develops a comprehensive approach for understanding the important, organization-wide issues involved in strategy making in the music industry. Using experiential learning activities, the course focuses on key trends in the music sector and considers the strategic actions needed to achieve successful positioning in the industry. Strategy implementation is also covered. Students will examine how organizational culture, structure, and control systems can be key instruments for realization of business and corporate strategies, leading to business sustainability.
CO: Music 4800
CR: the former BUSI 7002
PR: BUSI 2205 or the former BUSI 2210, BUSI 3005 or the former BUSI 4000, BUSI 3325 or the former BUSI 4320, BUSI 3335 or the former BUSI 4330, BUSI 3550 or the former BUSI 4500, and admission to the Joint Degrees of Bachelor of Commerce and Bachelor of Music program

5120 Advanced Financial Accounting (same as the former BUSI 7120) covers specific topics such as long-term investments, consolidated financial statements, joint ventures, and not-for-profit accounting.
CR: the former BUSI 7120
PR: BUSI 4101 (or the former BUSI 6100) with a final grade of at least 60%, BUSI 4102 (or the former BUSI 6110) with a final grade of at least 60%

5125 Accounting Capstone (same as the former BUSI 7125) is a capstone course designed to prepare students to pursue a Canadian professional accounting designation. Students will be introduced to foreign currency transactions and translation, corporate income tax issues, and integrated case analysis and will further develop financial reporting, income tax, and auditing competencies.
CO: BUSI 5120 or the former BUSI 7120
CR: the former BUSI 7125
PR: BUSI 4101 (or the former BUSI 6100) with a final grade of at least 60%, BUSI 4102 (or the former BUSI 6110) with a final grade of at least 60%, BUSI 4121 (or the former BUSI 6120) with a final grade of at least 60%, BUSI 4131 (or the former BUSI 6130) with a final grade of at least 60%

5165 Advanced Topics in Managerial Accounting (same as the former BUSI 7160) introduces the student to an in-depth study of advanced qualitative and quantitative methodology available to the managerial accountant. The application of mathematical models and behavioural theories to realistic challenges faced by various fiscal entities will be stressed. Class instruction will include the use of cases and rely heavily on a multidisciplinary approach towards solving the unstructured problem.
CR: the former BUSI 7160
PR: BUSI 3160 (or the former BUSI 5160) with a final grade of at least 60%

5218 Customer Relationship Management (CRM) (same as the former BUSI 6218 and the former BUSI 7218) is the evolution and integration of marketing ideas, data, technology, and organizational factors. Relying on the integration of people, processes, and marketing capabilities and facilitated by information technology, effective CRM optimizes the identification, acquisition, growth, and retention of desired customers. The history of CRM and the benefits and challenges of its implementation in business and consumer markets are addressed. The course culminates in the student's creation of a CRM strategic plan.
CR: the former BUSI 6218, the former BUSI 7218
PR: BUSI 2011, BUSI 2205 or the former BUSI 2210, BUSI 4221 or the

former BUSI 5220

5230 Strategic Marketing Management (same as the former BUSI 7230) is designed to integrate the principles, concepts and skills acquired in previous marketing courses and to enhance the student's analytical and decision-making capabilities. The course will focus on market analysis, marketing planning, the strategic decisions to be made within the framework of the marketing mix; and the control systems related to the marketing program. The use of market research and knowledge from other functional areas of the organization will be considered throughout the course.
CR: the former BUSI 7230
PR: BUSI 2011, BUSI 3210, BUSI 3550 or the former BUSI 4500, BUSI 4221 or the former BUSI 5220

5320 Human Resource Management Training (same as the former BUSI 7315) exposes students, through a variety of methods including lecture, discussion, case analysis, research, and the development of a detailed training program, to many topics in the area of human resource management training; including: needs analysis, training design, on and off-the-job training methods, technology and training, training implementation and delivery, transfer of training, and training evaluation.
CR: the former BUSI 7315
PR: BUSI 3325 or the former BUSI 4320

5325 Seminar in Human Resource Management (same as the former BUSI 7310) seeks to integrate policies, procedures and methods covered in BUSI 4325 with other functional areas which impact upon the management of Human Resource Systems. Stakeholder assumptions about work-force characteristics; management philosophy; business strategy; labour markets; laws and society; task technology and unions will be examined via a combination of cases, readings, research, peer discussion and dialogue with guest speakers.
CR: the former BUSI 7310
PR: BUSI 3325 or the former BUSI 4320

5332 Labour Law (same as the former BUSI 7322) provides an overview of laws regulating the employment relationship in Canada, including the common law, general employment and collective bargaining laws, and the Charter of Rights and Freedoms. Emphasis is placed on the law of collective bargaining in the private sector, including the acquisition and termination of bargaining rights, unfair labour practices, the duty to bargain, industrial conflict and the administration of the collective agreement.
CR: the former BUSI 7322
PR: BUSI 3005 or the former BUSI 4000, BUSI 3335 or the former BUSI 4330

5335 Collective Agreement Administration and Arbitration (same as the former BUSI 7320) provides advanced coverage of the substantive and procedural rights of employers, unions and employees under collective agreements, and the means by which disputes over these rights are resolved through the grievance arbitration process. Students undertake extensive reviews of labour arbitration cases and examine the impact of jurisprudence on the philosophy and practice of management in the private and public sectors. Students may be exposed to various role-playing exercises applicable to industrial and labour relations.
CR: the former BUSI 7320
PR: BUSI 3005 or the former BUSI 4000, BUSI 3335 or the former BUSI 4330

5410 Advanced Management Science (same as the former BUSI 6400) provides advanced level treatment of special topic(s) in Management Science, such as queueing theory, stochastic dominance, stochastic dynamic programming, etc. The topic(s) to be covered in any particular year will be chosen by the Instructor and may vary from year to year.
CR: the former BUSI 6400
PR: either BUSI 3405 or the former BUSI 5401 or; BUSI 3406 or the former BUSI 5402

5414 Simulation in Management (same as the former BUSI 7400) emphasizes the use of simulation modeling technique to study and analyze management systems. Generally, simulation is considered as an experimental technique and is used in problem situations whose complexity precludes the use of analytical problem-solving techniques. Topics to be covered include simulation methodology, model building, developing and building simulation models, simulation languages, generation of random numbers, and simulating a business system. Computers and case studies will be used to study various applications of simulation in business.
CR: the former BUSI 7400
PR: either BUSI 3405 or the former BUSI 5401 or; BUSI 3406 or the former BUSI 5402

5415 Managing Business Process Flows (same as the former BUSI 7415) employs a logical, rigorous approach to studying the fundamentals of business processes. This approach is based on modeling business process and its flows, studying causal relationships between the business process and its performance, and formulation implications for managerial action by determining business process drivers and their impact on process management and performance. The focus is on business process flow, capability, productivity, variability, control, improvement, risk sharing and management, coordination and integration.
CR: the former BUSI 7415
PR: BUSI 3401, BUSI 3700, Statistics 2500

5530 Public Finance - inactive course.

5550 Advanced Finance (same as the former BUSI 7500) examines advanced developments in finance. Several topics will be selected, researched and discussed. These topics shall vary as financial practices change.
CO: BUSI 4540 or the former BUSI 6510
CR: the former BUSI 7500
PR: BUSI 4550 or the former BUSI 5500

5601 Current Topics in Entrepreneurship (same as the former BUSI 7600) endeavors to address recent research findings in various aspects of entrepreneurship. Students will have the opportunity to pursue issues in entrepreneurship development covering a wide range of topics using publications, journals and conference proceedings.
CR: the former BUSI 7600
PR: BUSI 3630 or the former BUSI 5600

5701 Information Systems Development - inactive course.

5703 Information Security, Privacy, and Ethics - inactive course.

5720 Data Management (same as the former BUSI 6700) is based on the premise that data is a valuable resource which needs to be managed effectively to provide accurate, complete, timely, relevant, and accessible information to support decision making. Topics may include enterprise data modelling, logical database design, database management systems, query languages, transaction management and concurrent access, and security.
CR: the former BUSI 6700
PR: BUSI 3700

6000-6029 Special Topics is a range of special topics courses announced by the Faculty.

6041-6060 Special Topics is a range of special topics courses announced by the Faculty.

7110 Accounting Theory - inactive course.

7150 Taxation II - inactive course.

7321 Dispute Settlement in Labour Relations - inactive course.

7330 Organizational Development - inactive course.

7700 Strategic Information Systems - inactive course.

7701 Current Topics in Information Systems - inactive course.

11.1 Work Terms and Non-Credit

200W Business Professional Development Seminar 1 is an online seminar that encourages students to recognize, foster and apply their interests and strengths towards the selection and achievement of their career and educational goals. Students will develop skills relevant to professional standards worldwide, providing them a first step towards their professional ambitions. This seminar is mandatory, non-credit with a PAS/FAL marking scheme, and will be recorded on the student's transcript.
CH: 0
PR: admission into the Bachelor of Commerce or the Bachelor of Commerce (Co-operative) program, successful completion of at least 48 credit hours

300W Business Co-operative Education Seminars exposes students to both theoretical and practical aspects of co-operative education in general and the work term in specific prior to the first work term. The seminars will utilize a combination of lectures, workshops, guest speakers, panel discussions, and practical exercises to prepare students for their work terms. This course will be evaluated as PAS or FAL based on attendance, participation, and assignments. This seminar is mandatory, non-credit with a PAS/FAL marking scheme, and will be recorded on the student's transcript.
AR: attendance is required
CH: 0
LC: as scheduled
PR: admission to the Bachelor of Commerce (Co-operative) program

399W Work Term 1 follows the successful completion of Academic Term 3. Students have the opportunity to learn, develop and practice the high standards of behaviour and performance expected in the work environment. In addition to the work experience, students are required to complete a work report that will demonstrate an understanding of the structure of a professional report, and show developing competence in written communication skills. Students should consult the *Business Co-operative Education handbook* for more information.
CH: 0

LC: 0
PR: BUSI 300W

400W Business Professional Development Seminar 2 is an online seminar designed for students who are further along within their program and focuses more on individual skill development than BUSI 200W. Resume building and enhancement remains an important component, but there are also further opportunities to explore more specific topics and areas. This seminar is mandatory, non-credit with a PAS/FAL marking scheme, and will be recorded on the student's transcript.
CH: 0
LC: as scheduled
PR: BUSI 200W, BUSI 2012, admission into the Bachelor of Commerce or the Bachelor of Commerce (Co-operative) program, successful completion of at least 75 credit hours

499W Work Term 2 follows the successful completion of Academic Term 4. Students should develop and expand their professional knowledge and skills, demonstrating the ability to accept increased responsibility in the workplace. In addition to the work experience, students demonstrate competence in written communication skills through completing a professional work report which demonstrates an understanding of business concepts relative to the student's academic background. Students should consult the *Business Co-operative Education handbook* for more information.
CH: 0
LC: 0
PR: BUSI 399W

500W Business Professional Development Seminar 3 is an online seminar that focuses on preparing students for life after the completion of their undergraduate program. Students in this course will develop self-reflective learning skills through the creation of a professional portfolio. They will demonstrate how their academic experience directly applies to the next stage of their career plan and how to effectively articulate those experiences for the intended audiences. This seminar is mandatory, non-credit with a PAS/ FAL marking scheme, and will be recorded on the student's transcript.
CH: 0
LC: as scheduled
PR: BUSI 400W, admission into the Bachelor of Commerce or the Bachelor of Commerce (Co-operative) program, successful completion of at least 90 credit hours

599W Work Term 3 follows the successful completion of Academic Term 5. Students should have sufficient academic and work experience to contribute to the management and problem-solving processes needed and practiced in the workplace. In addition to the work experience, students must complete a communications component that demonstrates a high level of competency in professional communications, through preparing an executive summary and delivering a formal oral presentation. Students should consult the *Business Co-operative Education handbook* for more information.

FACULTY OF EDUCATION

SECTION CONTENTS

List of Tables

www.mun.ca/educ

Interim Dean
Galway, G., B.Sc., B.Ed., M.Sc.(M.Ed.) *Memorial*, Ph.D. *South Australia*; Professor

Up-to-date personnel listings are available at www.mun.ca/educ/facultyStaff.

1 The Memorial University of Newfoundland Code

The attention of all members of the University community is drawn to the section of the University Calendar titled **The Memorial University of Newfoundland Code**, which articulates the University's commitment to maintaining the highest standards of academic integrity.

2 Student Code of Conduct

Memorial University of Newfoundland expects that students will conduct themselves in compliance with University Regulations and Policies, Departmental Policies, and Federal, Provincial and Municipal laws, as well as codes of ethics that govern students who are members of regulated professions. The *Student Code of Conduct* outlines the behaviors which the University considers to be non-academic misconduct offences, and the range of remedies and/or penalties which may be imposed. Academic misconduct is outlined in ***UNIVERSITY REGULATIONS* - Academic Misconduct** in the University Calendar.

For more information about the *Student Code of Conduct*, see www.mun.ca/student.

3 Mission Statement

The Faculty of Education is committed to improving the human condition through education. The Faculty is dedicated to leadership and exemplary practice in teaching and learning, research and scholarship, and public engagement in local and global communities.

Additional information regarding the Faculty of Education is available at www.mun.ca/educ, or by e-mail at muneduc@mun.ca, or by telephone to (709) 864-3403.

A student must meet all regulations of the Faculty in addition to those stated in the general regulations. For information concerning admission/readmission to the University and general academic regulations (undergraduate), refer to ***UNIVERSITY REGULATIONS***.

For information regarding fees and charges, see the Financial and Administrative Services website at www.mun.ca/finance/fees/.

For information regarding scholarships, bursaries and awards, see www.mun.ca/scholarships/scholarships.

4 Student Responsibility Clause

The Office of Academic Programs, Faculty of Education, will assist students with questions or problems which may arise concerning their programs. It is, however, the responsibility of students to see that their academic programs meet the Faculty of Education and the ***UNIVERSITY REGULATIONS* - General Academic Regulations (Undergraduate)**.

5 Teacher Certification

Teacher Certification is a Provincial responsibility. Students are advised to contact Teacher Certification in writing at Teacher Certification and Records, Department of Education, P.O. Box 8700, St. John's, NL, A1B 4J6, or by visiting the website at www.gov.nl.ca/education/k12/teaching/certification for advice regarding Teacher Certification Regulations.

6 Registration in Education Courses

6.1 For Non-Education Students

Registration in Education courses is normally restricted to those students who have been admitted to a degree or diploma program in the Faculty of Education. A student in first year or a student in other Faculties or Schools who has completed not fewer than 24 credit hours may register for the following courses in Education without acceptance to a program when space is available: 2040, 2050, 2222, 2800, 2803, 3210, 3211, 3565, 3570, 3571, and 3660.

Such a student is advised to consult degree or diploma regulations to determine which, if any, of the above courses can be applied to the student's program.

6.2 For Teacher Certification Upgrading and the Post-Secondary Instructors Certificate (as issued by the Government of Newfoundland and Labrador)

A student who has completed a degree program in Education, or equivalent, who wishes to register in Education courses for certification upgrading purposes and a student requiring Education courses for the Post-Secondary Instructors Certificate should contact the Office of Academic Programs at least one month in advance of registration for permission and procedure.

7 Description of Programs

The admission/readmission regulations and the program regulations for each degree and diploma program listed below can be found at **Admission/Readmission Regulations for the Faculty of Education** and the **Program Regulations**, respectively.

All courses of the Faculty are designated by ED.

7.1 General Degree Programs

The Faculty of Education offers ten general degrees and one diploma program.

1. The **Bachelor of Education (Intermediate/Secondary)** is a 51 credit hour second degree program designed to prepare teachers of grades 7-12. The program is offered in a three semester (12 month), full-time format, and commences in the Fall semester of each year.
2. The **Bachelor of Education (Intermediate/Secondary) Conjoint with the Diploma in Technology Education** is a 69 credit hour second degree program designed to prepare both Intermediate/Secondary and Technology Education teachers. The program is offered in a four semester (16 month), full-time format and commences in the Spring of each year. A student in the program will

complete courses that address the development of basic skills and competencies in a variety of technological areas and how to apply them through design and problem solving processes in a school classroom/laboratory setting.

3. The **Bachelor of Education (Post-Secondary) as a First Degree** is the equivalent of a 120 credit hour degree program designed to prepare students for a variety of instructional and leadership roles in formal and informal post-secondary education, including careers in academic, adult, community, technical and trades, and professional education. The program is available through part-time or full-time study. Students undertaking the program full-time are advised that a course load of 15 credit hours may not be available each semester.
4. The **Bachelor of Education (Post-Secondary) as a Second Degree** is a 36 credit hour second degree program designed to prepare students for a variety of instructional and leadership roles in informal and formal post-secondary education, including careers in academic, adult, community, technical and trades, and professional education. Students in this program come from diverse backgrounds including administrative, academic, adult education, business, health, literacy, policy, student services, and technical and trades professions. The program is available through part-time or full-time study. Students undertaking the program full-time are advised that a course load of 15 credit hours may not be available each semester.
5. The **Bachelor of Education (Primary/Elementary) as a First Degree** is a full-time, 150 credit hour degree program designed to prepare teachers for kindergarten through grade six. With the appropriate academic planning, a student can commence this Education program in the Fall semester of the third year of studies.
6. The **Bachelor of Education (Primary/Elementary) as a Second Degree** is a 72 credit hour program and is intended for students who have completed an appropriate Bachelor's degree. The program is offered in a two-year (September-June), full-time format, and commences in the Fall semester of each year. A 75 credit hour French as a Second Language Option is available and commences in August each year. The Grenfell Campus offering of this program is currently under review and may not be available for intake at this time. For further information contact the Office of Academic Programs.
7. The **Bachelor of Education (Primary/Elementary) as a Second Degree Conjoint with Certificate in STEM Education** is an 85 credit hour integrated second degree program intended for students who have completed an appropriate Bachelor's degree. The program is designed for the preparation of K-6 classroom teachers with a focus on STEM education (science, technology, engineering, and mathematics). The program is offered in a two-year (September - May) full-time format, and commences in the Fall semester of each year. This program will run for three cohorts of students beginning 2018. For information about admission beyond Fall 2020, prospective applicants should contact the Office of Academic Programs.
8. The **Bachelor of Music Conjoint with Bachelor of Music Education** is a 159 credit hour, five-year conjoint degree program offered in partnership with the School of Music. This program is designed for the preparation of K-12 music teachers, and other professionals in positions related to music education.
9. The **Bachelor of Music Education as a Second Degree** is a 45 credit hour degree program for students who have already been awarded a Bachelor of Music. This program is the same as the music education component of the conjoint program. The program is designed to prepare music teachers in all facets of school music education: foundations of music education; primary/elementary, intermediate/secondary classroom music; and choral and instrumental music education. The program consists of 30 credit hours of course work in music education and general foundational education and a 15 credit hour teaching internship.
10. The **Bachelor of Special Education** is a 36 credit hour second degree program designed for the preparation of Special Education teachers and is available through part-time or full-time study. This program is currently under review. For more information contact the Office of Academic Programs.

7.2 General Diploma Program

The **Diploma in Adult Learning and Post-Secondary Education** explores practices, principles, and theories in the field of adult learning. This diploma program is designed to prepare graduates for instructional and professional roles in adult education settings such as community agencies, not-for-profit organizations, and community development programs.

8 Admission/Readmission Regulations for the Faculty of Education

The program regulations for each degree and diploma program listed below can be found at **Program Regulations**.

In addition to meeting ***UNIVERSITY REGULATIONS***, an applicant must meet the **Admission/Readmission Regulations for the Faculty of Education** below and the **Admission/Readmission Regulations** for the program of admission/readmission.

1. Admission to degree and diploma programs within the Faculty of Education is limited, selective and highly competitive. Meeting minimum admission requirements does not guarantee acceptance to a program. The Faculty reserves the right to limit the number of spaces available in each program. When the number of eligible applicants exceeds the number of spaces available in a particular program, preference may be given to applicants who are permanent residents of Newfoundland and Labrador.
2. At least three positions per year are available in Education programs for applicants of Indigenous ancestry who have met the admission requirements. Applicants must submit a letter of request with the Faculty application and provide documentation of Indigenous ancestry.
3. The application for admission or readmission to programs offered by the Faculty of Education is submitted online. The application for admission or readmission to the University is submitted online at www.mun.ca/undergrad/admissions/apply. Transcripts from institutions other than Memorial University of Newfoundland and any other supporting documents required must be sent to the Office of the Registrar in accordance with the deadlines specified for each program in the **Application Deadline Dates** table below. Applications received later than the stated deadline dates will be processed as time and resources permit.

Application Deadline Dates

Program	Commencement Date	Application Deadline
Bachelor of Education (Intermediate/Secondary)	Fall	January 15
Bachelor of Education (Intermediate/Secondary) Conjoint with the Diploma in Technology Education	Spring	January 15
Bachelor of Music Education - first and second degree	Fall	January 15
Bachelor of Education (Post-Secondary) - first and second degree	Fall Winter	May 15 September 15
Bachelor of Education (Primary/Elementary) as a First Degree	Fall	January 15
Bachelor of Education (Primary/Elementary) as a Second Degree The Grenfell Campus offering of this program is currently under review and may not be available for intake at this time. For further information contact the Office of Academic Programs.	Fall	January 15
Bachelor of Education (Primary/Elementary) as a Second Degree Conjoint with Certificate in STEM Education	Fall	January 15
Bachelor of Special Education	Fall	January 15
Diploma in Adult Learning and Post-Secondary Education	Fall Winter	May 15 September 15

4. Admission to programs within the Faculty of Education is determined by the Admissions Committee and is based on the criteria listed for each degree/diploma program. An applicant who is completing courses at this or another institution and for whom final and complete transcripts are not yet available may be granted provisional acceptance to the program to which the applicant is applying pending the receipt of final transcripts. This provisional acceptance will remain valid until final transcripts are received. Deadline for receipt of final transcripts is June 15th. A provisionally accepted applicant may be granted a final acceptance upon review of the final transcript by the Admissions Committee. The Faculty reserves the right to deny admission to an applicant who, in the opinion of the Admissions Committee, is deemed unsuitable for admission to a program.
5. Readmission to programs within the Faculty of Education is determined by the Committee on Undergraduate Studies except in cases where the withdrawal of a student was the result of a Committee on Undergraduate Studies decision in which case Executive Committee of Faculty Council will assess the application for readmission.
6. A student who has been admitted to a program in the Faculty of Education requiring a teaching internship is advised that the student may be assigned to any Provincial school district and is responsible for all travel and accommodation costs associated therewith.
7. A student who has been admitted to a particular degree program offered by the Faculty of Education and who wishes to change to another degree program within the Faculty must submit a new Faculty application online at www.mun.ca/undergrad/admissions/ apply that will be considered in competition with other applicants.
8. In special circumstances, the Admissions Committee may, at its discretion, consider an applicant or group of applicants as an exception to the requirements.
9. A student who declines an offer of admission to the Faculty of Education, withdraws from the program, or who does not register for courses in at least one of the three semesters following admission must, if the student wishes to be subsequently considered for admission, submit a new application in competition with other applicants.
10. An unsuccessful applicant has the right to appeal the decision of the Admissions Committee not to offer the applicant a place, if it is felt by the applicant that the decision was reached on grounds other than those specified under the **Admission/Readmission Regulations for the Faculty of Education**. The appeal should be made in writing within twenty-one days of the notification of the decision and should be directed to the Committee on Undergraduate Studies, Faculty of Education. The letter should state clearly and fully the grounds for the appeal. Normally, appeals will only be considered in the case of procedural error and/or receipt of new information that is relevant to the application. An applicant is advised to refer to ***UNIVERSITY REGULATIONS* - General Academic Regulations (Undergraduate) - Appeal of Decisions** section of the University Calendar.
11. The Faculty of Education does not require criminal record checks or other screening procedures as a condition of admission to programs. A student should, however, be aware that such record checks or other screening procedures are required by school districts/schools that host education students. Such agencies will not accept a student without a clear criminal record check or other screening procedure, which would prevent the student from completing a required component of the program. As a result, such a student may not be eligible for promotion or graduation.

    It is the responsibility of the student to have such procedures completed as required and at the student's own expense. The Faculty of Education expects a student to provide evidence of a clear criminal record check before the student is assigned to a school.

    The screening procedures of any given agency may change from time to time and are beyond the control of the University.
12. The letter of acceptance to the Bachelor of Education (Intermediate/Secondary), Bachelor of Education (Intermediate/Secondary) Conjoint with the Diploma in Technology Education, Bachelor of Music Education as a Second Degree, Bachelor of Education (Primary/Elementary) as a Second Degree, Bachelor of Education (Primary/Elementary) as a Second Degree Conjoint with Certificate in STEM Education, and Bachelor of Education (Post-Secondary) as a Second Degree will give the successful applicant 14 days from the date of the letter of notification in which to confirm acceptance of the placement offer. The signed Accept/Decline Form indicating acceptance of the offer must be accompanied by a deposit of $150 which will be credited towards tuition fees. The deposit will be forfeited if the applicant subsequently declines the offer or fails to register. If no reply is received within 14 days, the offer by the Faculty will be withdrawn and the applicant will be informed of this by letter.
13. Transfer credit cannot be awarded for either Education 3600 or Education 3650.

8.1 Bachelor of Education (Intermediate/Secondary)

1. For application deadlines refer to the **Application Deadline Dates** table. Consideration will be given to the courses for which an applicant is registered at the time of application. An applicant who will have completed all requirements for admission by the end of the Spring semester of the year that admission is being sought will be considered as time and resources permit. An applicant attending institutions other than Memorial University of Newfoundland must supply transcripts indicating Winter semester grades no later than June 15.
2. To be considered for admission to the Bachelor of Education (Intermediate/Secondary) degree program, an applicant must have:
   a. been awarded a Bachelors Degree from a university recognized by Memorial University of Newfoundland;
   b. completed 36 credit hours in a subject listed under **Academic Disciplines for Bachelor of Education (Intermediate/Secondary)** below (Business Studies, Newfoundland and Labrador Studies, and Religious Studies cannot be used to satisfy the 36 credit hour requirement);
   c. completed 24 credit hours in a subject listed under **Academic Disciplines for Bachelor of Education (Intermediate/Secondary)** below but different from that in b. above; and
   d. achieved an overall average of at least 65% in the courses chosen to meet b. and c. above.
3. Academic Disciplines are deemed to be the disciplines on the following list. Courses from other disciplines deemed by the Admissions Committee to be equivalent to courses in any of the listed **Academic Disciplines for Bachelor of Education (Intermediate/Secondary)** will be acceptable.

Academic Disciplines for Bachelor of Education (Intermediate/Secondary)

Biochemistry	Biology	Business Studies - An applicant who uses Business Studies as an Academic Discipline must have at least a minor in Business Administration.
Canadian Studies	Chemistry	Earth Sciences
Economics	English	Environmental Science
French - An applicant who uses French as an Academic Discipline must have written the DELF Tout Public (Level B2) and achieved an overall grade of at least 70%, with no less than 60% in any one skill area of the exam. An applicant must also have completed at least eight weeks (first academic discipline) or at least four weeks (second academic discipline) at an approved Francophone institution in a French speaking area or have acquired equivalent work experience in a Francophone environment.		
General Science - An applicant who uses General Science as an Academic Discipline may use courses chosen from the separate science disciplines in any combination from Biochemistry, Biology, Chemistry, Earth Sciences, Environmental Science, Ocean Sciences or Physics but must complete a minimum of 12 credit hours in each separate science discipline used.		
Geography	History	Mathematics - may include Statistics
Newfoundland and Labrador Studies	Physical Education - In order to be considered for admission within this Academic Discipline, an applicant must have successfully completed courses in the following areas: Human Anatomy, Human Physiology, Motor Learning, Biomechanics, Primary/Elementary Physical Education Curriculum and Teaching, Issues and Trends in Physical Education and a minimum of 15 credit hours in Physical Education activities.	
Physics	Political Science	Religious Studies
Theatre Arts	Visual Arts	
The Academic disciplines of Religious Studies, Theatre Arts, and Visual Arts will only be offered every two years. For further information contact the Office of Academic Programs.		

4. When calculating averages in the first and second teachable areas, no more than two 1000-level courses in each of the first and second teachable areas will normally be used.
5. A limited number of program spaces are allocated to each discipline. An applicant who is admitted with a particular Academic Discipline and who wishes to change to a different Academic Discipline must obtain permission of the Office of Academic Programs. Such changes may not be possible in particular areas.
6. An applicant is advised that admission to the program on the basis of academic disciplines is dependent on sufficient numbers of applicants to warrant the offering of applicable methodology courses in those disciplines in any given year.
7. An applicant who is registered in the final semester of the first Bachelor's Degree program during the Winter semester must have satisfied the academic requirements set out in Clause 2. above upon completion of the first degree program.
8. In assessing applications to the Bachelor of Education (Intermediate/Secondary) program, consideration will be given to the following:
   a. average in each of the two academic disciplines;
   b. overall academic performance; and
   c. personal statement and references as outlined on the application to the Faculty.
9. Because of the structured, sequential nature of this program, a student must attend full-time. A student who drops any course which is part of the program will be dropped from the entire program.
10. A student who has been admitted to the program but chooses not to attend in the Fall semester of the year of admission will lose admission status. Such a student may reapply for admission at a later date, and must submit a new application which will be considered in competition with other applicants.

8.2 Bachelor of Education (Intermediate/Secondary) Conjoint with the Diploma in Technology Education

1. For application deadlines refer to the **Application Deadline Dates** table. Consideration will be given to the courses for which an applicant is registered at the time of application. An applicant attending institutions other than Memorial University of Newfoundland must supply transcripts indicating Fall semester grades no later than February 1.
2. To be considered for admission to the Bachelor of Education (Intermediate/Secondary) Conjoint with the Diploma in Technology Education program an applicant must have:
   a. been awarded a Bachelors Degree from a university recognized by Memorial University of Newfoundland;
   b. completed 36 credit hours in a subject listed under **Academic Disciplines for Bachelor of Education (Intermediate/Secondary) Conjoint with the Diploma in Technology Education** in clause 3. below; and
   c. achieved an overall average of at least 65% in the courses chosen to meet b. above.
3. **Academic Disciplines for Bachelor of Education (Intermediate/Secondary) Conjoint with the Diploma in Technology Education** are deemed to be the disciplines on the following list. Courses from other disciplines deemed by the Admissions Committee to be equivalent to courses in any of the listed **Academic Disciplines for Bachelor of Education (Intermediate/Secondary) Conjoint with the Diploma in Technology Education** will be acceptable.

Academic Disciplines for Bachelor of Education (Intermediate/Secondary) Conjoint with the Diploma in Technology Education

Biochemistry	Biology	Canadian Studies
Chemistry	Earth Sciences	Economics
English	Environmental Science	
French - An applicant who uses French as an Academic Discipline must have written the DELF Tout Public (Level B2) and achieved an overall grade of at least 70%, with no less than 60% in any one skill area of the exam. An applicant must also have completed at least eight weeks at an approved Francophone institution in a French speaking area or have acquired equivalent work experience in a Francophone environment.		
General Science - An applicant who uses General Science as an Academic Discipline may use courses chosen from the separate science disciplines in any combination from Biochemistry, Biology, Chemistry, Earth Sciences, Environmental Science, Ocean Sciences, Physics but must complete a minimum of 12 credit hours in each separate science discipline used.		
Geography	History	Mathematics - may include Statistics
Physical Education - In order to be considered for admission within this Academic Discipline, an applicant must have successfully completed courses in the following areas: Human Anatomy, Human Physiology, Motor Learning, Biomechanics, Primary/ Elementary Physical Education Curriculum and Teaching, Issues and Trends in Physical Education and a minimum of 15 credit hours in Physical Education activities.		
Physics	Political Science	Theatre Arts
Visual Arts		
The Academic disciplines of Theatre Arts and Visual Arts will only be offered every two years. For further information contact the Office of Academic Programs.		

4. When calculating the average in the 36 credit hours required under clause 2. b. above, no more than two 1000-level courses will normally be used.
5. A limited number of program spaces are allocated to each discipline. An applicant who is admitted with a particular Academic Discipline and who wishes to change to a different Academic Discipline must obtain permission of the Office of Academic Programs. Such changes may not be possible in particular areas.
6. An applicant is advised that admission to the program is dependent on sufficient numbers of students to warrant the offering of applicable methodology courses in those disciplines in any given year.
7. An applicant who is registered in the final semester of the first Bachelor's Degree program during the Winter semester must have satisfied the academic requirements set out in Clause 2. above upon completion of the first degree program.
8. In assessing applications to the Bachelor of Education (Intermediate/Secondary) Conjoint with the Diploma in Technology Education degree program, consideration will be given to the following:
   a. average in courses in clause 2. b.;
   b. overall academic performance; and
   c. personal statement and references as outlined on the application to the Faculty.
9. Because of the structured, sequential nature of this program, a student must attend full-time. A student who drops any course which is part of the program will be dropped from the entire program.
10. A student who has been admitted to the program but chooses not to attend in the Spring semester of the year of admission will lose admission status. Such a student may reapply for admission at a later date, and must submit a new application which will be considered in competition with those of all other applicants.

8.3 Bachelor of Education (Post-Secondary) as a First Degree

The Bachelor of Education (Post-Secondary) as a First Degree is designed to prepare students for a variety of instructional and leadership roles in formal and informal post-secondary education, including careers in academic, adult, community, technical and trades, and professional education.

A number of the courses also form the basis for the Post-Secondary Instructor Certificate awarded by the Government of Newfoundland and Labrador.

1. For application deadlines refer to the **Application Deadline Dates** table. To be considered for admission to the Bachelor of Education (Post-Secondary) as a First Degree program, an applicant must meet, in addition to the general admission requirements of the University, the requirements outlined below:
   a. the Diploma in Adult Learning and Post-Secondary Education; and
   b. a program of study as verified by one of:
      - a certificate of qualification as a journeyperson for a designated trade; or
      - a certificate or diploma from a college, university, or school (vocational, technical, business); or
      - satisfactory completion of a training program equivalent to bullet one or two above.
2. Advanced standing to a maximum of 30 credit hours may be awarded, upon admission, for training and work experience applicable to post-secondary education settings. Training and experience will be assessed by the Selections Committee for Post-Secondary Education. The work experience must be subsequent to the completion of, or concurrent with, the occupational training program.

8.4 Bachelor of Education (Post-Secondary) as a Second Degree

1. For application deadlines refer to the **Application Deadline Dates** table. To be considered for admission to the Bachelor of Education (Post-Secondary) as a Second Degree program, an applicant must meet, in addition to the general admission requirements of the University, the admission requirements as outlined below. Applicants must have:
   a. been awarded an undergraduate degree from Memorial University of Newfoundland or from an institution recognized by Memorial University of Newfoundland with at least second class standing or equivalent; or
   b. been awarded an undergraduate degree from Memorial University of Newfoundland or an institution recognized by Memorial University of Newfoundland and have successfully completed Education 2700, 2720 and 2801 with an average of at least 65%.
2. In assessing applications to the Bachelor of Post-Secondary Education as a Second Degree, consideration will be given to the following:
   a. academic performance as described above; and
   b. personal statement and references as outlined on the application to the Faculty.

8.5 Bachelor of Education (Primary/Elementary) as a First Degree

1. For application deadlines refer to the **Application Deadline Dates** table.
2. Consideration will be given to the courses for which an applicant is registered at the time of assessment of applications. An applicant who has completed all requirements for admission by the end of the Spring semester of the year that admission is being sought will be considered as time and resources permit.
3. To be considered for admission, an applicant must have successfully completed 60 credit hours as outlined in Clauses a. - h. below with a cumulative average of at least 65% or an average of at least 65% on the last attempted 30 credit hours. The 60 credit hours are:
   a. 12 credit hours in English including at least 6 credit hours at the 2000 level or above - ESL courses cannot be used to satisfy this requirement;
   b. 6 credit hours in Mathematics or 3 credit hours in Calculus;
   c. 6 credit hours in Psychology;
   d. the former Science 1150 and 1151; or 9 credit hours from 3 separate Science areas, 6 credit hours of which must have a laboratory component. Chemistry 1900 may be used to satisfy 3 credit hours of the laboratory requirement. The science areas are: Biochemistry, Biology, Chemistry, Earth Sciences, Environmental Science, Ocean Sciences, Physics; or a Focus Area in Science;
   e. 6 credit hours chosen in any combination from Anthropology, Archaeology, Economics, Folklore, Geography, History, Linguistics, Political Science, Religious Studies, Sociology;
   f. 6 credit hours in French (recommended) or 6 credit hours in a single language other than English, or demonstration of equivalent competency in a second language;
   g. 15 credit hours as part of a focus area as set out in **Table 6 Focus Areas for Bachelor of Education (Primary/Elementary)**; and
   h. additional credit hours from areas other than Education.
4. An applicant with French as a Focus Area must have written the DELF Tout Public (Level B2) and achieved an overall grade of at least 70%, with no less than 60% in any one skill area of the exam.
5. In assessing applications to the Bachelor of Education (Primary/Elementary) as a First Degree program, consideration will be given to applicant's:
   a. overall academic performance; and
   b. personal statement and references as outlined on the application to the Faculty.

8.6 Bachelor of Education (Primary/Elementary) as a Second Degree

The Grenfell Campus offering of this program is currently under review and may not be available for intake at this time. For further information contact the Office of Academic Programs.

1. For application deadlines refer to the **Application Deadline Dates** table.
2. Consideration will be given to the courses for which an applicant is registered at the time of assessment of applications. An applicant who has attended institutions other than Memorial University of Newfoundland must supply transcripts indicating Fall semester grades by February 1.
3. To be considered for admission to the Bachelor of Education (Primary/Elementary) as a Second Degree program, an applicant must have:
   a. been awarded a Bachelor's Degree, or approved (prior to program startup) for the award of a Bachelor's Degree from a university recognized by Memorial University of Newfoundland;
   b. achieved a cumulative average of at least 65% or an average of at least 65% on the last attempted 30 credit hours;
   c. completed a minimum of:
      - 6 credit hours in English - ESL courses cannot be used to satisfy this requirement;
      - 6 credit hours in Mathematics or 3 credit hours in Calculus;
      - 6 credit hours in Psychology;
      - the former Science 1150 and 1151; or 9 credit hours from 3 separate Science areas, 6 credit hours of which must have a laboratory component. Chemistry 1900 may be used to satisfy 3 credit hours of the laboratory requirement. The science areas are: Biochemistry, Biology, Chemistry, Earth Sciences, Environmental Science, Ocean Sciences, Physics; or a Focus Area in Science;
      - 6 credit hours in any combination to be chosen from: Anthropology, Archaeology, Economics, Folklore, Geography, History, Linguistics, Political Science, Religious Studies, Sociology;
      - 6 credit hours in French (recommended) or 6 credit hours in a single language other than English, or demonstration of equivalent competency in a second language; and
      - the equivalent of a completed focus area as per **Table 6 Focus Areas for Bachelor of Education (Primary/Elementary)** or the completion of a major or minor within the initial Bachelor's degree program in a subject area classified as a focus area.

        An applicant with French as a Focus Area must apply under the **French as a Second Language Option**.
4. In assessing applications to the Bachelor of Education (Primary/Elementary) as a Second Degree program, consideration will be given to the following:
   a. overall academic performance; and
   b. personal statement and references as outlined on the application to the Faculty.
5. A student must attend full-time due to the structured, sequential nature of this program. A student who drops any course which is part of the program will be withdrawn from the entire program.
6. A student who has been admitted to the program but chooses not to attend in the Fall semester of the year of admission will lose admission status. Such a student may reapply for admission at a later date, and must submit a new application which will be considered in competition with other applicants.

8.6.1 Bachelor of Education (Primary/Elementary) as a Second Degree, French as a Second Language Option

In addition to meeting the Admission Requirements for the **Bachelor of Education (Primary/Elementary) as a Second Degree** an applicant for this option must have completed a major in French of at least 36 credit hours or equivalent and achieved at least an average of 65% in the 36 credit hours. Applicants with a French major must have written the DELF Tout Public (Level B2) and achieved an overall grade of at least 70%, with no less than 60% in any one skill area of the exam. Applicants must have completed at least eight weeks at an approved Francophone institution in a French speaking area or have acquired equivalent work experience in a Francophone environment. Admission to this option will be competitive and based on overall academic performance and demonstrated commitment, in the personal statement, to studies in French and French Education. Applicants who are unable to fulfill the eight week immersion requirements will be considered on a case-by-case basis.

8.7 Bachelor of Education (Primary/Elementary) as a Second Degree Conjoint with Certificate in STEM Education

This program will run for three cohorts of students beginning 2018. For information about admission beyond Fall 2020, prospective applicants should contact the Office of Academic Programs.

1. For application deadlines refer to the **Application Deadline Dates** table.
2. Consideration will be given to the courses for which an applicant is registered at the time of assessment of applications. An applicant who has attended institutions other than Memorial University of Newfoundland must supply transcripts indicating Fall semester grades by February 1.
3. To be considered for admission to the Bachelor of Education (Primary/Elementary) as a Second Degree Conjoint with Certificate in STEM Education, an applicant must have:
   a. been awarded a Bachelor's Degree, or approved (prior to program startup) for the award of a Bachelor's Degree from a university recognized by Memorial University of Newfoundland;
   b. achieved a cumulative average of at least 65% or an average of at least 65% on the last attempted 30 credit hours;
   c. completed a minimum of:
      - 6 credit hours in English - ESL courses cannot be used to satisfy this requirement;
      - 6 credit hours in Mathematics or 3 credit hours in Calculus;
      - 6 credit hours in Psychology;
      - the former Science 1150 and 1151; or 9 credit hours from 3 separate Science areas, 6 credit hours of which must have a laboratory component. Chemistry 1900 may be used to satisfy 3 credit hours of the laboratory requirement. The science areas are: Biochemistry, Biology, Chemistry, Earth Sciences, Environmental Science, Ocean Sciences, Physics, or a Focus Area in Science;
      - 6 credit hours in any combination to be chosen from: Anthropology, Archaeology, Economics, Folklore, Geography, History, Linguistics, Political Science, Religious Studies, Sociology;
      - 6 credit hours in French (recommended) or 6 credit hours in a single language other than English, or demonstration of equivalent competency in a second language; and
      - the equivalent of a completed focus area as per **Table 6 Focus Areas for Bachelor of Education (Primary/Elementary)** or the completion of a major or minor within the initial Bachelor's degree program in a subject area classified as a focus area. The focus area of French is typically not available in this program. For further information contact the Office of Academic Programs.
4. In assessing applications, consideration will be given to the following:
   a. overall academic performance;
   b. personal statement and references as outlined in application to the faculty; and
   c. admission interview (selected applicants).

8.8 Bachelor of Music Conjoint with Bachelor of Music Education

1. For application deadlines refer to the **Application Deadline Dates** table.
2. Applications for admission are considered once a year normally to the Fall semester. Consideration will be given to the Winter semester courses for which an applicant is registered at the time of application.
3. At the time of application, an applicant must have been formally admitted to, and be in clear standing with, the School of Music.
4. To be considered for admission, an applicant must have successfully completed a minimum of 45 credit hours with either a cumulative average of at least 65% or an average of at least 65% on the last attempted 30 credit hours.

   Within the 45 credit hours, an applicant must have completed the following:
   a. at least 6 credit hours in English designated Critical Reading and Writing (CRW) courses, and/or former Research/Writing (R/W) courses;
   b. at least 3 credit hours from the following: Music 3221, 3222, 3231, 3232, 3233, 3241, 3242, 3261, 3281, 3282;
   c. at least 12 credit hours in Music, in addition to the 3 credit hours used to satisfy the clause directly above.
5. In assessing applications, consideration will be given to the following:
   a. average in the courses required for admission in clause 4. above;
   b. overall academic performance; and
   c. personal statement and references as outlined on the application to the Faculty. One reference must be from a faculty member of the School of Music.

8.9 Bachelor of Music Education as a Second Degree

1. For application deadlines refer to the **Application Deadline Dates** table.
2. Applications for admission are considered once a year normally to the Fall semester. Consideration will be given to the Winter semester courses for which an applicant is registered at the time of application.
3. An applicant who has been awarded a Bachelor's degree in Music (or equivalent) from a recognized post-secondary institution may be admitted to the program leading to the degree of Bachelor of Music Education provided that the pattern of courses for the first degree is acceptable to the Selections Committee of the Faculty of Education. This pattern normally includes courses or equivalent experiences in conducting and instrumental techniques (brass, woodwinds, strings and percussion).

8.10 Bachelor of Special Education

This program is currently under review. For more information contact the Office of Academic Programs.

1. For application deadlines refer to the **Application Deadline Dates** table.
2. Consideration will be given to the courses for which an applicant is registered at the time of application. Provisional acceptance may be granted to an applicant who will successfully complete all prerequisites prior to commencement of the program. A percentage of program spaces will be allocated to applicants having relevant teaching experience.
3. To be considered for admission an applicant shall have a minimum of a 65% average in the last 60 attempted credit hours (not including the internship) and also meet the following requirements:
   a. have been awarded a degree in Primary and/or Elementary Education, Music Education, or Intermediate/Secondary Education from Memorial University of Newfoundland or from an institution recognized by Memorial University of Newfoundland;
   b. have successfully completed Education 4240 (or equivalent);
   c. have successfully completed Education 3312 and 3543, or 4350 (or equivalent); and
   d. have successfully completed a professional internship in education or have equivalent teaching experience prior to admission.
4. There are four Education courses applicable to the Special Education degree program that may be completed prior to admission (following completion of an Education degree) subject to space availability. They are Education 3040, 3640, 3660, 3941 (see the **Course Descriptions** section for prerequisites).

8.11 Diploma in Adult Learning and Post-Secondary Education

1. For application deadlines refer to the **Application Deadline Dates** table.
2. To be considered for admission an applicant must have completed one of:
   a. a training program or slate of post-secondary level courses; or
   b. the Post-Secondary Instructor Certificate awarded by the Government of Newfoundland and Labrador.

Programs and courses will be assessed by the Selections Committee for Post-Secondary Education.

9 Program Regulations

The admission/readmission regulations for each degree and diploma program listed below can be found at **Admission/Readmission Regulations for the Faculty of Education**.

In addition to meeting Program Regulations for the student's program of admission/readmission a student must also meet ***UNIVERSITY REGULATIONS***.

9.1 Bachelor of Education (Intermediate/Secondary)

- The full-time, 51 credit hour Bachelor of Education (Intermediate/Secondary) is a second degree program offered in three consecutive semesters (12 months) and commences in the Fall semester of each year.
- A student must complete the 51 credit hours in the academic semesters, sequence and course load as set out in **Table 1 Bachelor of Education (Intermediate/Secondary)** below. A student must also have complied with the **Regulations for Readmission and Advancement for this program**.

Table 1 Bachelor of Education (Intermediate/Secondary)

Term	Required Courses
Fall - Semester 1	ED 4005 ED 406T ED 4240 ED 4260 Two methodology courses from: ED 4120, 4121, 4142, 4154, 4161, 4174, 4175, 4180, 4181, 4190, 4203. These methodology courses must be chosen to match the academic disciplines under which the applicant was admitted. Those with a Geography discipline are required to successfully complete either ED 4180 or 4174. Those with a Social Studies discipline (Business Studies, Canadian Studies, Economics, History, Newfoundland and Labrador Studies, and Political Science) are required to successfully complete ED 4180. Those with first and second academic disciplines in Social Studies are required to successfully complete ED 4180 and 4181. Those with first and second academic disciplines in sciences (Biochemistry, Biology, Chemistry, Earth Sciences, Environmental Science, General Science, Physics) are required to successfully complete ED 4174 and 4175. ED 5000 (non-credit) This semester will follow a schedule that falls outside the normal teaching semester. Consult the Office of Academic Programs for applicable dates.
Winter - Semester 2	ED 407T ED 4350 or 3 credit hours in Institutes in Intermediate and Secondary Education ED 5000 (non-credit) This semester will follow a schedule that falls outside the normal teaching semester. Consult the Office of Academic Programs for applicable dates.
Spring - Semester 3	ED 4242 ED 4381 ED 4390 ED 4427 ED 4950 ED 5000 (3 credit hours) Courses may be offered in Spring, Intersession and/or Summer Session

9.2 Bachelor of Education (Intermediate/Secondary) Conjoint with the Diploma in Technology Education

- The full-time, 69 credit hour Bachelor Education (Intermediate/Secondary) Conjoint with the Diploma in Technology Education is offered in four consecutive semesters.
- The 69 credit hours shall include 30 credit hours in intermediate and secondary education, 24 credit hours in technology education and 15 credit hours of internship. A student must also have complied with the **Regulations for Readmission and Advancement** for this program.
- A student shall complete the 69 credit hours in the academic semesters, sequence and course load as set out in **Table 2 Bachelor of Education (Intermediate/Secondary) Conjoint with the Diploma in Technology Education** below.

Table 2 Bachelor of Education (Intermediate/Secondary) Conjoint with the Diploma in Technology Education

Term	Required Courses
Spring - Semester 1	ED 2750 ED 3751 ED 3752 ED 4260 ED 4427 ED 4754 Courses may be offered in the Spring, Intersession and/or Summer Session.
Fall - Semester 2	ED 2711 ED 4005 ED 406T ED 4240 One of the following: ED 4120, 4121, 4142, 4154, 4161, 4174, 4180, 4190. This methodology course must be chosen to match the academic discipline under which the student was admitted. Those with a Geography discipline are required to successfully complete either ED 4180 or 4174. Those with a Social Studies discipline (Canadian Studies, Economics, History, and Political Science) are required to successfully complete ED 4180. One of: ED 4750, 4752 (to be determined by the Office of Academic Programs) ED 5000 (non-credit) This semester will follow a schedule that falls outside the normal teaching semester. Consult the Office of Academic Programs for applicable dates.
Winter - Semester 3	ED 2752 ED 407T ED 5000 (non-credit) This semester will follow a schedule that falls outside the normal teaching semester. Consult the Office of Academic Programs for applicable dates.
Spring - Semester 4	ED 4242 ED 4381 ED 4390 a second course from: ED 4750, 4752 ED 4950 ED 5000 (3 credit hours) Courses may be offered in the Spring, Intersession and/or Summer Session.

9.3 Bachelor of Education (Post-Secondary) as a First Degree

- The full or part-time Bachelor of Education (Post-Secondary) as a First Degree is the equivalent of a 120 credit hour program.
- The requirements for the Bachelor of Education (Post-Secondary) as a First Degree are listed in **Table 3 Bachelor of Education (Post-Secondary) as a First Degree**.
- For waiver of Education 4735 see **Waiver Guidelines - Education 4735**.

Table 3 Bachelor of Education (Post-Secondary) as a First Degree

Required Courses	Elective Courses
6 credit hours in English 30 credit hours that satisfy the requirements for the **Diploma in Adult Learning and Post-Secondary Education** as follows: ED 2700, 2710, 2730, 2740, 3280, 4735 and 12 credit hours chosen from ED 2800, 2803, 2806, 3730, 3801, 4730 with no more than 6 credit hours at the 2000 level 30 credit hours in recognition of prior learning. Students who are not eligible for the maximum of 30 credit hours upon admission will be required to obtain further work experience and/or complete additional university courses. 30 non-Education credit hours to complement and strengthen an area of teaching specialization or to provide development in an area within the field of post-secondary education.	12 additional credit hours chosen from ED 2720, 2801, 2900, 3210, 3440, 3710, 3720, 3730, 3801, 4710, 4730, 4760-4780 12 additional credit hours in non-Education electives

9.3.1 Waiver Guidelines - Education 4735

A student who has at least one year of Post-Secondary or Adult instructional experience (documented) and who provides a letter from their current/former supervisor to the Office of Academic Programs certifying the duration and quality of their experience, may be excused from Education 4735. Students who are excused from taking the student teaching course must substitute in its place Education 2900 or an appropriate course in Education designated Adult Learning and Post-Secondary Education or Post-Secondary Education to make up the total required credit hours for the degree.

9.4 Bachelor of Education (Post-Secondary) as a Second Degree

- The Bachelor of Education (Post-Secondary) as a Second Degree is a full or part-time, 36 credit hour program intended for students who have completed an appropriate Bachelor's degree.
- The 36 credit hours are set out in **Table 4 Bachelor of Education (Post-Secondary) as a Second Degree**.
- A student can be awarded only one of the **Diploma in Adult Learning and Post-Secondary Education**, the former Diploma in Adult Teacher Education, the former Diploma in Post-Secondary Education or the **Bachelor of Education (Post-Secondary) as a Second Degree**.
- A student must also comply with ***UNIVERSITY REGULATIONS*** **- General Academic Regulations (Undergraduate) - Second Degree**.
- For waiver of Education 4735 see **Waiver Guidelines - Education 4735**.

Table 4 Bachelor of Education (Post-Secondary) as a Second Degree

Required Courses in Education	Elective Courses in Education
ED 2700, 2710, 2730, 2740, 3280, 4735	12 credit hours chosen from ED 2720, 2800, 2801, 2803, 2806, 3210, 3730, 3801, 4730 with no more than 6 credit hours at the 2000 level 6 additional credit hours chosen from ED 2900, 3440, 3710, 3720, 3730, 3801, 4710, 4730, 4760-4780

9.5 Bachelor of Education (Primary/Elementary) as a First Degree

- The Bachelor of Education (Primary/Elementary) as a First Degree is a 150 credit hour program.
- The 150 credit hours must include: 75 credit hours in non-education courses including the courses required for admission, courses required to complete a focus area listed under **Table 6 Focus Areas for Bachelor of Education (Primary/Elementary)** below, and Human Kinetics and Recreation 2001; and 75 credit hours in Education courses as set out in **Table 5 Bachelor of Education (Primary/Elementary) as a First Degree**.
- Following admission, a student will normally progress in attaining the 150 credit hours required for the Bachelor of Education (Primary/Elementary) as a First Degree, in the academic terms, sequence and course load as set out in **Table 5 Bachelor of Education (Primary/Elementary) as a First Degree**. In particular, a student must have all non-education requirements completed prior to Professional Year; must enrol full-time during the Professional Year; and may enrol in the extended internship only after successful completion of the Professional Year.

Table 5 Bachelor of Education (Primary/Elementary) as a First Degree

Term	Required Courses
	60 credit hours in courses required for admission
Fall - Semester 1	ED 3617 ED 4240 Human Kinetics and Recreation 2001 6 credit hours in non-Education courses
Winter - Semester 2	ED 3312 ED 3940 ED 4242 ED 401T 6 credit hours in non-Education courses
Fall - Semester 3 (Professional Year)	One of ED 2520 or 3920 is required for students with a music focus area in place of ED 3151 and 3212 (course to be determined in consultation with the Office of Academic Programs, Faculty of Education) ED 3050 is required for students with a French focus area in place of ED 3151 and 3212. ED 3151 ED 3212 ED 3273 ED 3274 ED 3322 ED 3942 ED 3953 ED 402T ED 5001 (non-credit)

Fall - Semester 5	ED 404T
Winter - Semester 6	ED 2051 ED 3131 (ED 2515 instead of ED 3131 is required for students with a Music focus area) ED 3484 ED 3566 ED 3574 ED 4381 ED 5001

Table 6 Focus Areas for Bachelor of Education (Primary/Elementary)

English (24 credit hours) 6 credit hours in English at the 1000 level English 2390 or 3395 3 credit hours chosen from English 2000, 2001, 2005-2007, 3200, 3201, 3205 3 credit hours chosen from English 2002-2004, 2010 or the former 2020, 2350, 2351 6 credit hours chosen from English 2146, 2150, 2151, 2155, 2156, 2160, 3145, 3147-3149, 3152, 3155-3158 3 additional credit hours in English at the 2000 level or above	**Folklore (24 credit hours)** Folklore 1000 Folklore 2100, 2300, 2401, 2500 9 credit hours in Folklore at the 3000 or 4000 level
French (36 credit hours) The equivalent of a major in French with a maximum of 6 credit hours at the 1000 level. An average of at least 65% in the 36 credit hours. At least eight weeks at an approved Francophone institution in a French-speaking area or have acquired equivalent work experience in a Francophone environment. It is recommended that a student successfully complete at least one of French 2900, 3650, 3651, 3653, 3654. An applicant with French as focus area must have written the DELF Tout Public (Level B2) and achieved an overall grade of at least 70%, with no less than 60% in any one skill area of the exam. This focus area is typically not available in the Bachelor of Education (Primary/Elementary) as a Second Degree Conjoint with Certificate in STEM. Education. For further information contact the Office of Academic Programs.	**Geography (18 credit hours)** Geography 1050, 2001, 2102, 2195, 2302, and 2425
History (18 credit hours) 3 credit hours in History at the 1000 level 9 credit hours in History at the 2000 level 6 credit hours in Newfoundland and Labrador History at the 3000 level	**Interdisciplinary Studies (18-24 credit hours)** Non-Education courses for cohorts in special offerings of the program approved by the Faculty of Education. For information on Interdisciplinary Studies Focus Areas students should contact the Undergraduate Admissions Office, Faculty of Education.
Linguistics (18 credit hours) Language 2800 or Linguistics 1100 or 2800 (Language 2800 or Linguistics 2800 is recommended) Linguistics 1103 Linguistics 1104 Linguistics 2210 6 credit hours chosen from Linguistics 3000, 3100, 3104, 2120 or the former 3155, 3201, 3210, 3500, 3850	**Mathematics (18 credit hours)** No more than 6 credit hours in Mathematics at the 1000 level and at least 3 credit hours in Mathematics at the 3000 level.
Music (18 credit hours) Music 1106 or 1120 3 credit hours chosen from Music 2011, 2012, 2013, 2014 3 credit hours chosen from Music 2021, 2022, 2023, 2611, 2612, 2613, 2614, 2619 (admission to 2612, 2613 and 2619 is by audition only) 6 credit hours chosen from Music 3014, 3015, 3016, 3017, 3018, 3019, 4040 3 additional credit hours from the courses in 2nd and 4th clauses above	**Physical Education (18 credit hours)** Human Kinetics and Recreation 1000, 2210, 2300 9 credit hours chosen from Human Kinetics and Recreation 2002, 2310 or 2311, 2320, 2600, 2601, 3330, 3340, 3400, 3490
Religious Studies (18 credit hours) Religious Studies 1000 3 credit hours chosen from Religious Studies 2013, the former 2130, the former 2140, 2330, 2340 3 credit hours chosen from Religious Studies 2400, 2410, 2420, 2425, 2430 3 credit hours chosen from Religious Studies 2350, 2610, 2810, 2811, 2812, the former 2820, 2830 6 credit hours in Religious Studies at the 3000 level or above	**Science (18 credit hours)** At least 6 credit hours in each of two subject areas selected from Biochemistry, Biology, Chemistry, Earth Sciences, Environmental Science, Ocean Sciences, or Physics. At least 6 credit hours used to meet this requirement must have a laboratory component. Chemistry 1900 may be used to satisfy 3 credit hours of the laboratory requirement.
Theatre Arts (18 credit hours) For information on the Theatre Arts Focus Area contact the Undergraduate Admissions Office, Faculty of Education.	**Visual Arts (18 credit hours)** Courses in Art History may be used to satisfy this requirement in whole or in part. For information on the Visual Arts Focus Area contact the Undergraduate Admissions Office, Faculty of Education.

9.6 Bachelor of Education (Primary/Elementary) as a Second Degree

The Grenfell Campus offering of this program is currently under review and may not be available for intake at this time. For further information contact the Office of Academic Programs.

- The Bachelor of Education (Primary/Elementary) as a Second Degree is a 72 credit hour program intended for students who have completed an appropriate Bachelor's degree. This program is offered in a five semester, full-time format and commences in the Fall semester of each year.
- In addition to meeting these regulations, students must also meet ***UNIVERSITY REGULATIONS*** **- General Academic Regulations (Undergraduate) - Second Degree**.
- The Bachelor of Education (Primary/Elementary) as a Second Degree requires 72 credit hours normally completed in the academic terms, sequence, and course load as set out in **Table 7 Bachelor of Education (Primary/Elementary) as a Second Degree**.

Table 7 Bachelor of Education (Primary/Elementary) as a Second Degree

Fall - Semester 1 **Learning and Teaching Learners**	ED 3312, 3617, 401T, 4240, 4381, 5001 (non-credit) HKR 2001
Winter - Semester 2 **Learning and Teaching Curriculum**	ED 3273, 3322, 3940, 3962, 402T, 4242, 5001 (non-credit)

9.8 Bachelor of Music Education

The Bachelor of Music Education is delivered in two formats: the **Bachelor of Music Conjoint with Bachelor of Music Education** and **Bachelor of Music Education as a Second Degree**.

9.8.1 Bachelor of Music Conjoint with Bachelor of Music Education

- A student for the Bachelor of Music Conjoint with Bachelor of Music Education shall be required to complete a minimum of 159 credit hours in accordance with the Bachelor of Music degree regulations for the Bachelor of Music Conjoint with Bachelor of Music Education and the regulations below.
- A student shall complete 45 credit hours in Education as set out in **Table 10 Bachelor of Music Conjoint with Bachelor of Music Education**.

Table 10 Bachelor of Music Conjoint with Bachelor of Music Education

Bachelor of Music Requirements	**Bachelor of Music Education Requirements**
see **Bachelor of Music Conjoint with Bachelor of Music Education** under **School of Music** section of the Calendar.	ED 3618 or 4260 one of ED 4362, 4381, 4383 ED 2500, 2515, 2520, 3920, 3925, 4240, 4830 ED 403X 3 other credit hours in Education other than Music Education. It is recommended that these 3 credit hours be used toward the acquisition of instructional content in a second teachable area.

9.8.2 Bachelor of Music Education as a Second Degree

- A student for the Bachelor of Music Education must have been awarded a Bachelor's degree in Music (or equivalent) from a recognized post-secondary institution.
- The degree of Bachelor of Music Education may be awarded upon the successful completion of at least 45 additional credit hours in accordance with **Table 11 Bachelor of Music Education as a Second Degree** below.

Table 11 Bachelor of Music Education as a Second Degree

ED 3617 or 4260 ED 2500, 2515, 2520, 3920, 3925, 4240, 4381, and 4830 ED 403X 3 other credit hours in Education other than Music Education. It is recommended that these 3 credit hours be used toward the acquisition of instructional content in a second teachable area.

9.9 Bachelor of Special Education

This program is currently under review. For more information contact the Office of Academic Programs.

- The full or part-time Bachelor of Special Education requires the completion of the Memorial University of Newfoundland Bachelor of Education Degree Primary and/or Elementary, Music Education, or Intermediate/Secondary, or another Education degree deemed appropriate by the Faculty of Education.
- In addition a student must complete a further 36 credit hours as outlined below in **Table 12 Bachelor of Special Education**.
- A limited number of courses are available through distance education. A student must comply with the University's **Regulations for a Second Degree** as outlined in the **University Regulations** section of the Calendar.

Table 12 Bachelor of Special Education

Required Education Courses	Elective Education Courses
ED 3040 ED 3600 ED 3610 ED 3620 ED 3650 ED 3670 ED 4531	15 credit hours chosen from: ED 3640, 3660, 3680, 3690, 3941, 4505, 4510, 4515, 4520, 4540, 4541, 4543

9.10 Diploma in Adult Learning and Post-Secondary Education

The Diploma in Adult Teacher Education and the Diploma in Post-Secondary Education have been replaced with the Diploma in Adult Learning and Post-Secondary Education.

- The Diploma in Adult Learning and Post-Secondary Education is a part-time program and requires 30 credit hours in Education courses as outlined in **Table 13 Diploma in Adult Learning and Post-Secondary Education**.
- At least 21 of the 30 credit hours required for the Diploma must be completed at this University.
- For waiver of Education 4735 see **Waiver Guidelines - Education 4735**.

Table 13 Diploma in Adult Learning and Post-Secondary Education

Required Courses in Education	Elective Courses in Education
ED 2700, 2710, 2730, 2740, 3280, 4735	12 credit hours in Education chosen from: ED 2720, 2800, 2801, 2803, 2806, 3210, 3730, 3801, 4730, with no more than 6 credit hours at the 2000 level.

10 Regulations for Readmission and Advancement for the Bachelor of Education (Primary/Elementary) as a Second Degree, Bachelor of Education (Intermediate/Secondary), and Bachelor of Education (Intermediate/Secondary) Conjoint with the Diploma in Technology Education

These regulations apply to the Bachelor of Education (Primary/Elementary) as a Second Degree, Bachelor of Education (Intermediate/Secondary), and Bachelor of Education (Intermediate/Secondary) Conjoint with the Diploma in Technology Education. For any of the degree programs not listed here see Regulations for the Readmission and Advancement for the Bachelor of Education (Primary/Elementary) as a Second Degree Conjoint with Certificate in STEM Education and Regulations for Readmission and Advancement for the Bachelor of Education (Primary/Elementary) as a First Degree, Bachelor of Music Conjoint with Bachelor of Music Education, Bachelor of Music Education as a Second Degree, Bachelor of Special Education, Bachelor of Education (Post-Secondary) as a First Degree, Bachelor of Education (Post-Secondary) as a Second Degree, and Diploma in Adult Learning and Post-Secondary Education.

1. A student must successfully complete all courses, attain an overall semester average of at least 65%, and a grade of PAS (pass) in the internship(s). A student who fails to meet any of the above criteria will be required to withdraw from the program.
2. Notwithstanding Clause 1., the Committee on Undergraduate Studies reserves the right to require a student to withdraw from the Faculty at any time if, in the opinion of the Committee, the student is deemed unsuitable for continued attendance in the programs.
3. In exceptional circumstances, waiver of these regulations may be granted by the Committee on Undergraduate Studies, Faculty of Education, on advice of the Office of Academic Programs.

11 Regulations for the Readmission and Advancement for the Bachelor of Education (Primary/Elementary) as a Second Degree Conjoint with Certificate in STEM Education

1. A student must obtain a PAS (pass) in each course of a Phase to successfully meet the requirements for that Phase. Successful completion of a Phase is pre-requisite for the next Phase. A student who does not successfully complete a Phase will be required to withdraw from the program and seek re-entry the following year.
2. Notwithstanding Clause 1., the Committee on Undergraduate Studies reserves the right to require a student to withdraw from the Faculty at any time if, in the opinion of the Committee, the student is deemed unsuitable for continued attendance in the program.
3. In exceptional circumstances, waiver of these regulations may be granted by the Committee on Undergraduate Studies, Faculty of Education, on advice of the Office of Academic Programs.

12 Regulations for Readmission and Advancement for the Bachelor of Education (Primary/Elementary) as a First Degree, Bachelor of Music Conjoint with Bachelor of Music Education, Bachelor of Music Education as a Second Degree, Bachelor of Special Education, Bachelor of Education (Post-Secondary) as a First Degree, Bachelor of Education (Post-Secondary) as a Second Degree, and Diploma in Adult Learning and Post-Secondary Education

These regulations apply to the Bachelor of Education (Primary/Elementary) as a First Degree, Bachelor of Music Conjoint with Bachelor of Music Education, Bachelor of Music Education as a Second Degree, Bachelor of Special Education, Bachelor of Education (Post-Secondary) as a First Degree, Bachelor of Education (Post-Secondary) as a Second Degree, and Diploma in Adult Learning and Post-Secondary Education. For any of the degree or diploma programs not listed here see Regulations for the Readmission and Advancement for the Bachelor of Education (Primary/Elementary) as a Second Degree Conjoint with Certificate in STEM Education and Regulations for Readmission and Advancement for the Bachelor of Education (Primary/Elementary) as a Second Degree, Bachelor of Education (Intermediate/Secondary), and Bachelor of Education (Intermediate/Secondary) Conjoint with the Diploma in Technology Education.

1. a. Following admission to a program of the Faculty of Education, all full-time students must obtain a semester average of at least 65% in order to remain in clear standing in the Faculty.
   b. These regulations will be applied to part-time students only after they have completed 12 consecutive credit hours on a part-time basis.
2. A student who fails to obtain a semester average of 65% but who is eligible for readmission under ***UNIVERSITY REGULATIONS* - General Academic Regulations (Undergraduate)** will be placed on probation in the Faculty. A probationary student who fails to obtain a 65% average during the next semester in which the student completes courses will be required to withdraw from the Faculty.
3. A student completing the Bachelor of Education (Primary/Elementary), Bachelor of Music Conjoint with Bachelor of Music Education, or the Bachelor of Music Education as a Second Degree who attains a grade of FAL (fail) in the internship will either:
   a. be required to withdraw from the program; or
   b. with the recommendation of the Office of Academic Programs, Faculty of Education, repeat the internship in another school setting.
4. A student who has been required to withdraw from the Faculty of Education may, after a lapse of at least two semesters, apply for readmission to the Faculty. A student who is readmitted under this Clause will be considered probationary and must meet requirements stated in Clause 2. above.
5. A student who is required to withdraw from the University under ***UNIVERSITY REGULATIONS* - General Academic Regulations (Undergraduate)** will be required to withdraw from the Faculty of Education.
6. A student who has been required to withdraw from the Faculty on two occasions will be ineligible for future readmission.
7. Notwithstanding Clauses 1. through 4., the Committee on Undergraduate Studies reserves the right to require a student to withdraw from the Faculty at any time if, in the opinion of the Committee, the student is deemed unsuitable for continued attendance in the programs.
8. A student who has been required to withdraw from the Faculty may register only in those Education courses listed as applicable for non-Education students.
9. In exceptional circumstances, the Committee on Undergraduate Studies may waive the Readmission and Advancement regulations for the Faculty of Education as stated above.

13 Graduation

Upon meeting the qualifications for the program, students must apply to graduate on the prescribed "Application for Graduation" form. This form may be obtained on-line at the Memorial Self Service at selfservice.mun.ca. The deadlines for application submission are July 15 for Fall (October) graduation, January 3 for Winter (February) in-absentia graduation, and January 15 for Spring (May) graduation. Applications received after these dates will be processed as time and resources permit. Additional information is available from the Office of the Registrar at www.mun.ca/regoff/graduation. Information regarding Convocation, including the dates of the ceremony, is available at www.mun.ca/convocation.

14 Waiver of Faculty Regulations

A student has the right to request waiver of Faculty regulations. The requirement for a specific course, or courses, may in special circumstances, and upon individual request, be waived by the Committee on Undergraduate Studies. Such waivers shall not reduce the total number of credits required for the Degrees or Diploma.

A student wishing waiver of University academic regulations should refer to ***UNIVERSITY REGULATIONS* - General Academic Regulations (Undergraduate) - Waiver of Regulations**.

15 Appeal of Decisions

Any student whose request for waiver of Faculty regulations has been denied has the right to appeal. For further information refer to ***UNIVERSITY REGULATIONS* - General Academic Regulations (Undergraduate) - Appeal of Decisions**.

16 Course Descriptions

In accordance with Senate's *Policy Regarding Inactive Courses*, course descriptions for courses which have not been offered in the previous three academic years and which are not scheduled to be offered in the current academic year have been removed from the following listing. For information about any of these inactive courses, contact the Dean of the Faculty.

According to the nature of particular courses, the specified number of laboratory hours may be scheduled as separate laboratory sessions or as integrated experiential class time.

All courses of the Faculty are designated by ED.

Legend:

ACP: Courses for students in the Aboriginal Community Based programs
AL: Courses for students in the **Adult Learning and Post-Secondary Education** program
IS: Courses for students in the **Intermediate/Secondary** program
ISI: Courses for students in the **Intermediate/Secondary Conjoint with the Technology Education** program
ME: Courses for students in the **Music Education** program
PE: Courses for students in the Primary/Elementary programs
PS: Courses for students in the Post-Secondary Education programs
SE: Courses for students in the **Special Education** program
ST: Courses for students in the **Bachelor of Education (Primary/ Elementary) as a Second Degree Conjoint with Certificate in STEM Education** program

2022 The Teaching of Inuttut (ACP) focuses on the preparation of materials and the development of methods, strategies and assessment techniques for the teaching of Inuttut In schools In Labrador.

2023 Language and Culture in Education (ACP) explores contexts, curricula and materials that recognize cultural diversity (especially Aboriginal cultures), foster the teaching and maintenance of Aboriginal languages, and support the work of Aboriginal language specialists In the classroom.

2032 The Teaching of Innu-aimun (ACP) focuses on the preparation of materials and the development of methods, strategies and assessment techniques for the teaching of Innu-almun In schools In Labrador.

2038 Aboriginal Music and Art (ACP) Is a study of music and art In cultural transmission. The course will develop skills In reading and writing associated with Aboriginal cultures. and will emphasize activities for exploring the elements of music. Aboriginal art forms will be explored as well as art in decoration in Aboriginal society.

2039 Aboriginal Land Based Learning (ACP) is for students Interested In learning about the Aboriginal cultures of Newfoundland and Labrador. Under the guidance of Elders and traditional teachers, learners will gain an understanding of Aboriginal pedagogy, land-based learning and ways of incorporating culture Into the school curricula. This course Is normally offered at Labrador Campus of Memorial University.

2040 Basic Interpersonal Communication (PE) is designed to help students develop confidence through self-expression, and acquire skills in interpersonal relationships.
CR: the former ED 2041

2050 Introduction to Drama Education (ME,PE) is designed to introduce students to the use of drama as a learning medium. Students will be expected to participate in and to critically analyse practical drama sessions in order to gain an understanding of the fundamental nature of drama. Students will be engaged in a variety of teacher devised drama structures to introduce them to the theory and practice of selected pioneers in the field. Reference will be made to some aspects of child development such as play, cognition, affect and language and their relationship to learning through drama. It is expected that students will begin to formulate a rationale for the use of drama education in their future classroom practice.
CR: the former ED 2030

2051 Learning Through Drama (PE) is an experiential drama education course that will offer students a broad introduction to the potential for using and incorporating drama education in learning experiences and in cross-curricular teaching.
CH: 1

2194 Physical Education in the Primary and Elementary Grades (ME,NPE,PE,T) examines the curriculum organization in physical education for the Primary and Elementary grades; instructional material and teaching techniques for these grades; creative, aesthetic, and health-developing aspects of physical education.
CR: the former ED 3070, or the former ED 2192 taken during the 1984-85 or 1985-86 academic years

2202 Education in Aboriginal and Northern Communities - An Overview (ACP,PE) is an introductory course where students explore teaching in an Aboriginal or northern context with particular focus on Newfoundland and Labrador. This will include an understanding of philosophical and cultural distinctions between Aboriginal and non-Aboriginal approaches to teaching and learning; an examination of significant historical developments In Aboriginal education and how they may have Impacted Aboriginal education today; an exploration of actual and potential roles played by local Individuals and groups In the education process; models to Improve communication between school and community; and an examination of the current status of Aboriginal education and the major educational challenges facing students, leaders and communities.

2222 Teaching English as a Second Language (PE) includes selection and preparation of materials, and suitable classroom strategies for teaching English as a second language. Stress will be on the methods appropriate to cope with linguistic difficulties encountered in schools by children whose first language is not English.

2500 Orientation to Music Education (ME) is an introduction to music education, bridging life as a musician and the development of a career as a musician-teacher. Topics include an overview of theoretical, philosophical, historical, sociological, cultural, psychological, methodological, and curricular foundations of music education as well as contemporary contexts and issues in music education. Emphasis is on research and writing in music education, technology applications, and the development of functional keyboard skills specific for music educators.

2515 Primary/Elementary School Music Methods (ME,PE) examines current pedagogical practices, methodologies, and resources for use in the primary and elementary school music program. Within the context of authorized K-6 curriculum guides, teacher candidates will develop skills and instructional strategies for developing the singing, moving, playing, listening, and creating child.
CR: the former ED 2510, the former ED 2530
PR: Primary/Elementary program candidates must have completed the focus area in music

2520 Voice and Choral Methods (ME) examines current pedagogical practices, procedures, and resources for use with all levels of school singing ensembles and choirs. Emphasis is placed on developing teacher candidates' own vocal techniques. Topics include philosophy and history of choral music education, vocal and choral pedagogy, and components/ organization of choral programs.
LH: a 2 hour twice weekly laboratory section (MUN Lab Choir) designed to provide practical teaching experience and methodologies in vocal/ choral settings

2700 Academic Literacies in Adult and Post-Secondary Learning Contexts (AL,PS) examines the literacies, discourses and epistemologies of post-secondary learning contexts. Academic areas are ways of knowing which are generated and defended through language, practices and texts. This course explores ways of making explicit these often implicit activities. It provides opportunities to understand different forms of knowledge, what counts as evidence, and how 'texts' are developed, written, read and performed.

2710 Course Organization and Development in Post-Secondary Education (AL,PS) examines the development of procedures for the identification of concepts in instructional units; analysis of tasks and identification of related competencies; development of resource units.

2711 Teaching Technology Education: Theory, Method and Practice (ISI) is an examination of the development, structure, organization, and pedagogy of technology education curriculum locally and internationally. Philosophical and pragmatic viewpoints will frame the exploration of various pedagogical approaches related to the teaching of technology education.

2720 Introduction to Post-Secondary Education (AL,PS) is a study of the background of Post-Secondary Education and of its development and present forms in Newfoundland, other provinces of Canada, and other countries; an examination of current programs in Post-Secondary Education; the role of federal and provincial governments in Post-Secondary Education.

2730 General Methods of Teaching in Post-Secondary Education (AL,PS) is an introduction to teaching and learning methods in post-secondary and adult learning contexts and it includes preparation, learning goals, aligning assessment and a range of methods such as facilitation, lecturing, active learning, experiential learning and problem-based learning.

2740 Ethics and Professionalism in Adult and Post-Secondary Education (AL,PS) will explore the ethical dimensions of adult and post-secondary education in Canadian higher education. Students will consider the meaning of ethical professional practice within the post-secondary environment. A particular emphasis will be placed upon the application of ethical theories to real world learning contexts within adult and post-secondary education.

2750 Teaching Design and Materials Processing I (ISI) examines theory and practice of teaching design based learning, problem solving, non-computer controlled materials processes, and fabrication. Topics include: manual multi-materials processing, modeling and prototyping, fabrication, and computer assisted design.
AR: attendance is required
LH: 2
OR: WHMIS training. Information can be obtained from the Office of Academic Programs.

2752 Teaching Current and Emerging Power Technology Systems (ISI) provides technology education students with opportunities to apply current teaching and learning strategies to the issues surrounding traditional and emerging energy technologies. Major topics of study include: fundamentals of sustainable energy production and control, redevelopment and use of traditional energy sources, application of solar energy, wind power production, and fuel cell development and utilization.
AR: attendance is required
LH: 2
OR: WHMIS training. Information can be obtained from the Office of Academic Programs.

2800 Introduction to Adult Education (AL,PS) is a review of the history of the Adult Education movement. The rationale for the investment of public or private resources in the education or training of adults. An examination of current educational philosophies related to Adult Education.

2801 Adult Learning (AL,PS) examines the major foundational theories of adult learning, the contextual nature of adult learning and various dimensions of learning and development throughout adulthood.

2803 Educational Aspects of Adult Development (AL,PS) is an examination of the educational aspects of adult development from early adulthood through middle age to later maturity.

2806 Sociology of Adult Education (AL,PS) explores the sociological context of adult learning. The interrelationship between particular social factors (e.g., age, sex, occupational structure) and the need for adult educational programs are studied. The potential effects of such programs on society are examined with reference to community development. Special emphasis is given to societal change as it relates to education as a way of life.

2900 Introduction to Statistics in Education (ME,PE,PS) is a laboratory course which takes a practical case study approach to survey and quasi-experimental quantitative methods in education, together with supporting statistical concepts of probability, descriptive and inferential statistics sampling and sampling distributions, correlation and bivariate regression.
LH: 2

3007 Teaching Strategies in Native and Northern Schools - inactive course.

3009 Drama Education in the Primary and Elementary Grades (ME,PE) - inactive course.

3040 The Assessment and Development of Children's Language Abilities (PE,SE) focuses on techniques for assessing language abilities in primary/elementary and intermediate/secondary students and will provide models for developing strategies in implementing language instruction appropriate to students' needs.
PR: ED 4350, 3543, or the former 3540 or 3545

3050 The Teaching of French as a Second Language in the Primary and Elementary Grades (ME,PE) is an introduction to the general principles of second-language teaching, to the curriculum materials currently prescribed for use in the schools, and to a consideration of teaching strategies and evaluation techniques associated with these materials.
OR: for students completing the Bachelor of Education (PrimarylElementary) as a Second Degree, French Immersion Option this course will be taught in French
PR: French 2101

3052 and 3053 Institute for Teachers of Core French in the Elementary Grades (PE) - inactive course.

3120 Foundations of Art Education (ME,PE) develops an understanding of art in relation to current theories of education and art education and to provide individual exploration of an experience in appropriate techniques. Curriculum will be examined with the focus on understanding how to provide favourable conditions and experiences for high quality individual development in visual expression.
CR: the former ED 2020, the former ED 3110, the former ED 3112

3131 Music Education in the Primary/Elementary Grades (PE) is designed to provide the prospective primary/elementary classroom teacher with the knowledge, skills and understandings necessary for presenting basic music concepts and skills to students and for using music as a means for teaching or enriching other areas of the curriculum. Course work will include study in the three facets of general classroom music: scholarship of the discipline, musicianship, and classroom methodology.
CR: former ED 3130
UL: not applicable towards the Conjoint Degrees of Bachelor of Music and Bachelor of Music Education or the Bachelor of Music Education as a Second Degree

3150 Bilingualism: Linguistic, Cognitive and Educational Aspects (PE) - inactive course.

3151 Multilingualism in the Classroom (PE) is a course whose goal is to introduce pre-service teachers to the needs of students whose first language is not English in the primary/elementary classroom. Emphasis will be placed on the development of language skills in English, issues associated with reading and writing in an additional language and cultural sensitivity in multilingual classrooms.
CH: 1

3210 Introduction to Counselling (AL,PE,PS) is an introduction to the profession of counselling throughout the lifespan with specific emphasis on the definition and history of the profession, the characteristics and professional competencies of a counsellor, ethical issues and principles, theories and current issues. Topics also include an introduction to the nature of counselling and ways of developing effective interpersonal relationships within various educational contexts.

3211 Introduction to Career Education (PE) is an introduction to contemporary concepts and practices of career education and to theories of career development. Emphasis is on the practical application of theory and basic principles to the design and delivery of career education programs and to career counselling. Attention will be given to continuing career counselling and career development needs of individuals as well as to groups with special needs.
CR: the former ED 4906

3212 Counselling Issues and Career Development (PE) is a course whose goal is to highlight prevalent presenting social and developmental issues that are experienced by school-age children, some of which may require collaborative cooperation with guidance counselling colleagues. The course will seek to understand the primary-elementary students' experiences from a holistic lens. Students will engage with content that focuses on developmental and social dynamics that inform student health and functioning, hence impacting school and academic engagement and career development.
CH: 2

3255 Child Abuse and the School-Age Child (PE) will discuss the general issues of child abuse including definitions, detection, reporting, protection, prevention, and the educational implications of child abuse. A number of specific issues including provincial policies presently in force in Newfoundland and Labrador and elsewhere will be examined. The teacher's role in collaboration between officials in education, social work, health and justice agencies will be explored with a view to preventing abuse and modifying the circumstances of abused children.

3273 Science in the Primary/Elementary Grades (PE) is a practical course designed to develop approaches to Science teaching based on student investigation of scientific phenomena. Examples are drawn from both provincial and other major curricula.
CR: the former ED 2180, the former ED 3270, the former ED 3275

3274 Infusing STEM into Primary/Elementary Grades (PE) will focus on the nature of STEM (Science, Technology, Engineering, and Mathematics) and how to infuse STEM into the K-6 science curriculum, with a particular emphasis on the inquiry, design process, integrated curriculum, and technology. Teacher candidates will have opportunities to explore several frameworks to support integrated curriculum and plan and implement STEM-infused science learning experiences.
CH: 1
PR: ED 3273, ED 3940

3280 Educational Assessment (AL,PS) is a study of the broad spectrum of educational assessment focussing specifically on the development of objectives, the construction and use of formal teacher-made tests, the use of informal assessment techniques, the interpretation and application of assessment data, continuous evaluation, criterion-referenced measurement, and emerging trends in assessment.
CR: the former ED 4912

3290 Identifying Learner Diversity Within a Context of Culture (PE) - inactive course.

3312 Language Arts in the Primary/Elementary School I (PE) provides students with a holistic view of the learning and teaching of language arts (i.e., the receptive language abilities of viewing, listening and reading, and the expressive language abilities of speaking and writing). This course will help students develop a theoretical perspective on two major aspects of language, that being "knowledge of language" (i.e., knowledge of the structures of language) and "knowledge about language" (i.e., knowledge about attitudes and perceptions towards language and the various purposes of language). This course will extend students' understanding of the

importance of the home/community influences upon emergent and developmental literacy and language development.
CR: the former ED 2210, the former ED 2220, the former ED 3305, the former ED 3315

3322 Children's Literature in the Primary/Elementary School (PE) focuses on the personal and educational values for using children's literature in the classroom, examines the literary genres appropriate for primary/elementary children and explores meaningful literacy extensions to develop children's literacy strategies and skills. In addition, the course examines guidelines for evaluating children's literature for literacy and aesthetic qualities. Instructional strategies to integrate children's literature across the curriculum are explored.
CR: the former ED 2060, the former ED 2065, the former ED 3310, the former ED 3320

3440 Organization and Administration of Programs in Adult Education (PS) examines alternative provincial or regional methods of organization for the provision of Adult Education, including the statutory framework within which Adult Education functions.

3484 Computers and Learning Resources for Primary/Elementary Teachers (PE) focuses on the integration of computer software and other learning resources into primary/elementary school teaching. Laboratory components will be scheduled so that students may learn how to use and implement communications, applications and curricular software.
CR: the former ED 3480, ED 3801, the former ED 4480, the former ED 4905

3515 Current Approaches to Reading in the Primary and Elementary Grades (PE) - inactive course.

3543 Language Arts in the Primary/Elementary School II (PE) provides students with a social-psychological perspective on children's learning to read, reading and reading to learn. Students will explore current and traditional models of the reading process and the importance of home/school/community contexts for fostering literacy learning. Students will apply instructional strategies for children's learning of story, book and print concepts, word identification, fluency, vocabulary development and comprehension for a variety of texts.
CR: the former ED 2110, the former ED 2120, the former ED 3540, the former ED 3542, the former ED 3545
PR: ED 3312

3565 Gender and Schooling (PE) is an introduction to the study of gender and education. It includes a historical overview of the link between gender and schooling as well as an examination of contemporary theoretical perspectives and research relating to the role of the school in gender development in general and gender inequality in particular. Implications for educational policy and practices will also be explored.

3566 Affirmative Sexuality and Gender Pedagogy in Education Matters (PE) aims to increase preservice teacher awareness, skill and knowledge with respect to diverse gender and sexuality affirmative practices and pedagogy in the context of educational environments. The course will briefly explore the history of queer, trans*(umbrella term) and two spirit students, families and teacher-educators in educational settings. Affirmative practice with gender and sexuality diverse folks will be explored in the classroom and in teacher practices as an ethic of care.
CH: 1

3570 History of North American Education (PE) - inactive course.

3571 The History of Education in Newfoundland Since 1800 (PE) - inactive course.

3573 History and Current Trends in Aboriginal Education in Canada (ACP,PE) is a seminar course that explores how to integrate indigenous knowledge and experience in curriculum and pedagogy in classrooms and communities, and on the land. The course offers insights from past experience and draws on Aboriginal perspectives to understand educational history, current contexts and future directions. Students will develop critical analytical skills and learn about restorative justice, land and place based education, and other pedagogical approaches based on Aboriginal knowledge and cultures.

3574 An Introduction to Indigenous Education (PE) is a course where students will engage in critically examining the challenges of bringing together Indigenous and Western knowledge systems and consider the various models of education that co-construct teaching and learning. Students will gain the pedagogical knowledge and skills to blend Indigenous ways of knowing and doing within the K-12 provincial curricula.
CH: 1

3585 Multiculturalism and Education (PE) - inactive course.

3600 Academic and Behavioural Assessment (SE) applies the theories of test development in establishing a competent understanding of the utilization of diagnostic and prescriptive instruments as well as teacher-made tests as they apply to the area of exceptional children.
AR: attendance is required

3610 Nature and Characteristics of Intellectual Disabilities (SE) aims to provide an understanding of the nature and characteristics of intellectual disabilities and the psycho-social implications of this area of exceptionality.

3617 Children and Learning (PE) provides an introduction to psychological theories of learning and motivation, and development. The focus is on typical development with some attention to atypical functioning (exceptionality) where appropriate. Emphasis will be placed upon the application of this knowledge to classroom practice, instruction, and the facilitation of learning.

3618 Nature of the Primary/Elementary School Child - Development (ME,PE) is intended to provide students with an awareness and understanding of the origins of many aspects of child behaviour and competence. While focussing on the development and nature of the "normal" child, where appropriate, contrasts and comparisons will be made between the development of "normal" and "exceptional" individuals.
CR: the former ED 2610, the former ED 3240

3619 Nature of Primary/Elementary School Child - Learning and Cognition (ME,PE) provides an introduction to human learning, motivation and cognition and to the related concepts and theories underlying children's classroom learning and behaviour. Focus will be on typical development with some attention to atypical (exceptionality) functioning in these areas. The course will familiarize students with the concepts and vocabulary used to describe classroom learning and with explanations and justifications for many educational and instructional activities and practices. Particular attention will be paid to application of this knowledge to instruction and classroom management and to the facilitation of learning.
CR: the former ED 3616, the former ED 3615
PR: ED 3618

3620 Nature and Characteristics of Emotional/Behavioural Disorders (SE) includes an examination of procedures for the early identification of children and adolescents with behavioural disabilities and major systems of classification. It critically examines causes of emotional and behavioural disorders and implications for assessment and intervention.
PR: ED 4240, or the former ED 3220 or ED 3230

3640 Current Issues in Special Education (PE,SE) consists of a study of special and selected problems related to the teaching of special education with particular emphasis placed on special education within the Province of Newfoundland and Labrador.
PR: ED 4240, or the former ED 3220 or ED 3230

3650 Practicum in Special Education (SE) encompasses a practice experience with students who have an identified exceptionality. The emphasis will be on a supervised field placement in a special education position within a school setting.
PR: completion of 18 credit hours in Special Education including ED 3600

3660 A Study of the Gifted Child (ME,PE,SE) is an examination of the nature and characteristics of gifted children, with emphasis upon methods of identifying gifted children, implications of giftedness for learning and instruction and reviews of several educational programs for the gifted.

3670 Responding to Diversity addresses universal design for learning, response to intervention, and differentiated instruction. It explores how universal design for learning can support diversity through the implementation of strategies to support social and emotional learning and inclusive instructional practice. The course examines how response to intervention strategies provides inclusive instructional practice (Tier 1), and individualized assessment and programming (Tier 2 and 3).
PR: ED 4240 or the former ED 3220 or the former ED 3230

3680 Therapeutic Interventions for Students with Autism Spectrum Disorder (ASD) in Educational Settings (SE) is intended to provide learners with an in-depth knowledge of the unique characteristics and learning needs of children and adolescents with autism spectrum disorders (ASDs). Education 3680 will present worthwhile strategies to accommodate the special learning needs of individuals with ASD enabling special education resource teachers to support classroom teachers within the inclusive classroom setting. The course considers current research related to a range of educational, psychological, social, and cultural issues.
PR: ED 4240, or the former ED 3220 or ED 3230

3690 Collaborative Practice/Monitoring Student Progress (SE) examines theoretical and practical aspects of collaborative practice within current service delivery models of case planning for students with diverse learning needs. Emphasis is on exploring issues of power/empowerment, consultation, communication, collaboration, conflict resolution/problem-solving, advocacy, monitoring student progress through informal and formal means, individual education plans (IEP), and developing student focused goals and objectives. Perspectives of parents and families, educators, and community resource professionals are explored through family-focused approach to effective planning in contemporary schools.
PR: ED 4240

3691-3699 Special Topics Courses in Special Education (SE) to be announced by the Faculty of Education.

3710 Group Instruction in Post-Secondary Education (PS) - inactive course.

3720 Individualized Instruction in Post-Secondary Education (PS) - inactive course.

3730 Curriculum and Instructional Development in Post-Secondary Education (AL,PS) examines the social, cultural, philosophical, and economic forces influencing changes in Post-Secondary curriculum and instructional methods. Study of current Post-Secondary Education curriculum designs, problems and trends; methods of gathering curriculum information; procedures for revising and evaluating a curriculum.
PR: ED 2710 and ED 2730

3751 Teaching Communication and Computer Technology Systems I (ISI) examines the application of communication techniques through the various forms of computer technology and media available. Technology education students will engage in activities that will provide insights into how current teaching and learning strategies can be blended with contemporary communication devices and means to facilitate collaborative lifelong learning. Topics include: web-based multimedia and programming, graphic design, audio/video production, animation production and social networking applications.
AR: attendance is required
LH: 2

3752 Teaching Communication and Computer Technology Systems II (ISI) examines the application of various communication and computer technologies related to hardware, software, and the required infrastructure. Students will engage in activities that will provide insights into how current teaching and learning strategies can be blended with fundamental computing principles and processes within a framework of project and problem based learning. Topics include: computer architecture, block-based programming, text-based programming, software development, and interfacing and physical computing.
AR: attendance is required
LH: 2

3801 Educational Media (AL,PS) introduces audio visual communications with emphasis on equipment operation and basic local production of instructional materials; and the application of computers to education.
CR: the former ED 3480, ED 3484, the former ED 4480, the former ED 4905

3920 Instrumental Teaching Methods (ME) examines current pedagogical practices, procedures, and resources for teaching brass, woodwinds, percussion, and strings in both band and orchestral school settings. Emphasis is placed on the development of comprehensive instrumental music education programs.
LH: a 2 hour twice weekly laboratory section (MUN Lab Band and Orchestra) designed to provide practical teaching experience and methodology in both band and orchestral settings

3925 Intermediate/Secondary School Music Methods (ME) examines current pedagogical practices, procedures, and resources for teaching Music in the intermediate/secondary schools. In addition to standard contexts in general music, choral, and instrumental settings, emphasis is placed on technology and settings such as musical theatre in order to reflect the diversity of music programming in intermediate/secondary schools.

3940 Mathematics in Primary and Elementary Grades (ME,PE) is a general overview of aspects of teaching Mathematics in the primary and elementary grades. Theories of child development as they relate to Mathematics teaching, characteristics of Mathematics topics in primary and elementary grades, and the implications for teaching will be the major topics to be discussed in this course.
CR: the former ED 2340, the former ED 2310, the former ED 2320

3941 Diagnosing and Directing Learning in Primary and Elementary Mathematics (PE,SE) is a study of aspects of diagnosis and remediation in primary and elementary Mathematics, and of the basis for constructing and applying diagnostic techniques. The course offers an examination, development, and application of a variety of manipulative aids and assistive technology to be used in the teaching of Mathematics in the primary and elementary grades.
PR: ED 3940

3942 Teaching and Learning Elementary Mathematics (PE) provides students with an opportunity to explore beliefs about the nature of mathematics and to consider how to teach mathematics for, and with, understanding, with a focus on elementary children. Building upon Education 3940, students will focus on the unique developmental characteristics, beliefs, behaviours and learning needs of elementary children in mathematics. Students will also engage in mathematical practice so they have a shared basis for discussion of particular mathematical topics that appear within the curriculum.
CH: 2
PR: ED 3940

3945 and 3946 Institute in Teaching of Junior High School Mathematics Courses (PE) will focus on the nature of junior high Mathematics instruction and how it should differ from elementary and high school instruction. Emphasis will be placed on the transition between informal and formal approaches to the teaching of junior high Mathematics. The Van Hiel levels and their implications for instruction in geometry will be discussed. Activities appropriate to the teaching of junior high Mathematics will be developed and demonstrated. A particular focus in this component of the Institute will be on activities appropriate to the new program and how they can be integrated into the junior high Mathematics curriculum.
PR: ED 3940 (or equivalent) or ED 4161 (or equivalent) or permission of the instructor

3951 Curriculum, Instruction, and Assessment in the Primary/Elementary School I (PE) is designed to engage students in an introduction to curriculum, instruction, and assessment in the primary/elementary school through active participation in problem solving. Students will be introduced to the different ways that primary/elementary school children view and make sense of their world (i.e., the linguistic, mathematical, scientific, and artistic). Working through such a framework, students will be introduced to instructional strategies and planning, formative and summative assessment, and issues inherent in the management of the primary/elementary classroom, as they create multi-disciplinary, thematic, resource-based units.
OR: for students completing the **Bachelor of Education (Primary/Elementary) as a Second Degree, French Immersion Option** this course will be taught in French

3952 Curriculum, Instruction, and Assessment in the Primary/Elementary School II (PE) is designed to engage students in a deeper exploration of issues in curriculum, instruction, and assessment in the primary/elementary school through active participation in problem solving. Students will be introduced to the different ways that primary/elementary school children view and make sense of their world. Working through such a framework, students will be introduced to instructional strategies and planning, formative and summative assessment, and issues inherent in the management of the primary/elementary classroom, as they create multi-disciplinary, thematic, resource-based units.
OR: for students completing the **Bachelor of Education (Primary/Elementary) as a Second Degree, French Immersion Option** this course will be taught in French
PR: ED 3951

3953 Assessment for Learning in the Primary/Elementary Grades (PE) is an introduction to the theory and practice of evaluating student learning in the classroom. Topics include the characteristics of classroom assessment; the relationship among assessment, curriculum, and instruction; formative assessment; summative assessment; development, administration, interpretation, and evaluation of assessment activities including teacher-made tests, performance-based tasks, and portfolios; assessment for students with exceptional needs; assessment for culturally and linguistically diverse students; grading and reporting progress; and the interpretation and use of assessment information.

3962 Social Studies in the Primary/Elementary School (PE) is an introduction to the social studies program at the primary/elementary school level. Topics to be explored include the nature and purposes of the social studies curricula, approaches to teaching and learning in this curricula area, selecting and utilizing learning resources, and conducting assessment in the social studies.
CR: the former ED 2160, the former ED 3960

4005 Effective Teaching and Learning Environments (IS,ISI) introduces the principles, dispositions, and skills needed to create various types of effective learning environments. Topics include: professional relationships, school culture, decision making classroom management and models of teacher power.

401T Introductory Field Experience in the Primary and Elementary School I (PE) is a 5 (consecutive) school day teaching and learning experience, framed by explicit guidelines, that focus on key learning experiences and graduated responsibilities related to professional teaching. It may include both observation periods and initial teaching experiences. AR: Attendance is required. With respect to holidays, interns follow the schedule of the school and not that of the University.
AR: Attendance is required. With respect to holidays, interns follow the schedule of the school and not that of the University.
CH: 0

401X Undergraduate Teaching Internship (PE) (equivalent to 15 credit hours in Education) is a 65 day teaching and learning experience, framed by explicit guidelines, designed to provide students an opportunity to integrate theory and practice in the school classroom. It includes both observation periods and extensive teaching experiences. The internship is intended to help students develop their individual style of teaching, to enable students to recognize the scope and complexity of a classroom teacher's role and responsibility, and to provide opportunities for the study of children as individuals and in groups, both in the classroom and other school settings.

AR: Attendance is required. With respect to holidays, interns follow the schedule of the school and not that of the University.
OR: students may not be placed in the first school of choice and may be assigned to another appropriate school
PR: successful completion of the professional year. Students must have completed the professional year of the French Immersion Option to be assigned to a French Immersion classroom.

4020 Topics and Trends in Aboriginal Education (ACP) is a seminar course with a focus on topics and trends in Aboriginal educational research and practice in Newfoundland and Labrador as well as other Aboriginal contexts. The course will provide a greater understanding and appreciation of Aboriginal educational needs and self-determination within national and local socio-political contexts.

402T Introductory Field Experience in the Primary and Elementary School II (PE) is a 10 (consecutive) school day teaching and learning experience, framed by explicit guidelines, that focus on key learning experiences and graduated responsibilities related to professional teaching. It may include both observation periods and initial teaching experiences.
AR: Attendance is required. With respect to holidays, interns follow the schedule of the school and not that of the University.
CH: 0
PR: ED 401T

403T Introductory Field Experience in the Primary and Elementary School III (PE) is a 10 (consecutive) school day teaching and learning experience, framed by explicit guidelines, that focus on key learning experiences and graduated responsibilities related to professional teaching. It may include both observation periods and initial teaching experiences.
AR: Attendance is required. With respect to holidays, interns follow the schedule of the school and not that of the University.
CH: 0
PR: ED 402T

403X Internship in Music Education (ME) (equivalent to 15 credit hours in Education) is a one semester internship in one or more schools to provide student teaching experiences in choral, classroom, and/or instrumental teaching contexts in primary, elementary, intermediate, and/or secondary schools settings.
AR: Attendance is required. With respect to holidays, interns follow the schedule of the school and not that of the University.
OR: students may not be placed in their first district of choice and may be assigned to another Provincial school district
PR: ED 2500, ED 2515, ED 2520, ED 3920, ED 3925 and any additional requirements as outlined in the letter of acceptance to the music education program

404T Extended Teaching Internship (PE) is a 50 day teaching and learning experience, framed by explicit guidelines, designed to provide students an opportunity to integrate theory and practice in the school classroom. It includes both observation periods and extensive teaching experiences. The internship is intended to help students develop their individual style of teaching, to enable students to recognize the scope and complexity of a classroom teacher's roles and responsibilities, and to provide opportunities for the study of children as individuals and in groups, both in the classroom and other school settings.
AR: Attendance is required. With respect to holidays, interns follow the schedule of the school and not that of the University.
CH: 12
OR: students may not be placed in the first school of choice and may be assigned to another appropriate school
PR: ED 403T and successful completion of semesters one to four of the Bachelor of Education (Primary/Elementary) as a Second Degree. Students must have successfully completed ED 4155 and ED 3050 to be assigned to a French Immersion classroom.

406T Introductory Internship in the Intermediate and Secondary School (IS,ISI) is a 10 (consecutive) school day teaching and learning experience, framed by explicit guidelines, that focuses on key learning experiences and graduated responsibilities related to professional teaching. It includes both observation periods and initial teaching experiences.
AR: Attendance is required. With respect to holidays, interns follow the schedule of the school and not that of the University.

407T Extended Internship in the Intermediate and Secondary School (IS,ISI) is a 60 day teaching and learning experience, framed by explicit guidelines, that focuses on key learning experiences and graduated responsibilities related to professional teaching. It includes both observation periods and extensive teaching experiences.
AR: Attendance is required. With respect to holidays, interns follow the schedule of the school and not that of the University.
CH: 12
CR: the former ED 405X
OR: Interns completing the Bachelor of Education (Intermediate/Secondary) Conjoint with the Diploma in Technology Education will be placed for part of the internship in a Technology Education classroom setting.
PR: Education 406T. Interns wishing to complete an internship in French immersion must successfully complete Education 4154 and obtain the permission of the Office of Academic Programs. Normally, French immersion interns have the equivalent of a major in French and a minimum of two semesters in a French milieu.

4100 Learners and Learning - Teachers and Teaching (ST) is an integrative course providing students with collective and individual opportunities to critically explore and inquire into the phenomena of learning and teaching through psychological, sociological, and pedagogical lenses/frames. Students will consider their own emerging philosophies of learning and teaching in relation to current and ongoing fields of study research and within the contexts of their school field experiences.
CH: 16

410T School Field Experience I (ST) is a school field experience designed to assist students during Phase I to re-focus their perceptions and assumptions about teaching and learning. Students spend two field days per week in a partner school, for a total of 24 days.
AR: Attendance is required. With respect to holidays, students follow the schedule of the school and not that of the University.

4120 The Teaching and Learning of Art in the Intermediate and Secondary School (IS,ISI,ME) introduces the rationales for teaching art and examines contemporary art teaching practices. Teacher candidates will examine their roles as artist-teacher and teacher-artist, as well as explore learning in and through art. Topics include curriculum implementation; instructional planning; managing the learning environment; assessment and evaluation; safety; arts advocacy; and visual, artistic and technological literacies.

4121 The Teaching and Learning of Theatre Arts in the Intermediate and Secondary School (IS,ISI,ME) engages teacher candidates in developing their role as theatre artist/teacher. Topics include: beliefs informing the practice of theatre arts in the context of school; related pedagogies and educational practices in dialogue with the art form of drama; process drama and theatre education, an interdependent relationship; implementation planning strategies; communication style and facilitative language.

4142 The Teaching and Learning of the English Language Arts in the Intermediate and Secondary School (IS,ISI,ME) draws on research in the teaching and learning of English/language and literacy to prepare teacher candidates to develop engaging, differentiated experiences for students. Topics include: curriculum; the nature and structure of language and literature programs; test analysis, response and critique; writing and representing genres in multimodal and linguistic; media literacy forms; and oracy.

4151 Advanced French Methodology (IS,ISI,NS) - inactive course.

4154 The Teaching and Learning of French in the Intermediate and Secondary School (IS,ISI,ME) provides an introduction to the nature and purpose of French programs in Canada. Topics include: an overview of the purpose of core French and French immersion; theories and principles of second-language teaching and learning; methods; techniques, strategies and characteristics of effective planning and assessment in second-language teaching.
OR: this course will be taught in French

4155 Introduction to Teaching in French Immersion in the Primary and Elementary Grades (ME,PE) is an overview of the development of French Immersion programs and an examination of current models for organization and instruction of French at the primary and elementary levels. This course will focus on methods and strategies for content-based teaching in immersion, integrating the formal aspects of French language teaching into content-based teaching and integrating culture, strategy training and language awareness into immersion curricula. Additional topics will include assessment of/for learning and effective technology integration in French Immersion.
OR: this course will be taught in French
PR: acceptance to the French Immersion Option or permission of the Office of Academic Programs

4161 The Teaching and Learning of Mathematics in the Intermediate and Secondary School (IS,ISI,ME) introduces teacher candidates to the principles, dispositions, and skills necessary to teach mathematics. Topics include: the nature of mathematical knowledge, learning principles, mathematics pedagogy, curriculum, instructional planning, and evaluation in mathematics.

4174 The Teaching and Learning of Science in the Intermediate and Secondary School I (IS,ISI) provides a context for teacher candidates to develop the knowledge, abilities, and dispositions to provide learners with the opportunity to develop multidimensional scientific literacy. Topics include: assessment and instruction, controversial issues in Science, curriculum planning, differentiating instruction in science, inquiry, information and communication technologies in science, learning theories, multicultural science education, scientific literacy, science-technology-society-environment, and student naive and alternative conceptions.
CR: the former ED 4170, the former ED 4171, the former ED 4270, the

former ED 4271
LH: two hours per week
OR: WHMIS training. Information can be obtained from the Office of Academic Programs, Faculty of Education.

4175 The Teaching and Learning of Science in the Intermediate and Secondary School II (IS) provides a context for teacher candidates to develop a greater understanding of the nature of scientific knowledge and how it is generated, explore the rationale(s) for the inclusion of the nature of science as a goal of scientific literacy, analyse research that reports on teachers' and students' views about the nature of science, and examine the potential of a range of pedagogical approaches for helping all learners in science develop a greater understanding of the nature of science. Topics include: philosophy, history, and sociology of science; the nature of science (definitions and beliefs); and the nature of science in the classroom.
CO: ED 4174

4180 The Teaching and Learning of Social Studies in the Intermediate and Secondary School I (IS,ISI,ME) examines the theory and practice of social studies education. Teacher candidates will investigate ways of applying the principles of effective teaching and learning in the social studies classroom. Topics include: the nature and purpose of social studies education, specific teaching strategies, and instructional planning and evaluation.

4181 The Teaching and Learning of Social Studies in the Intermediate and Secondary School II (IS) examines the separate disciplines of social studies. Topics include: the evolution and nature of social studies education, current issues and trends in the area and various teaching strategies and assessment techniques appropriate to the discipline.
CO: ED 4180

4190 The Teaching and Learning of Physical Education in the Intermediate and Secondary School (IS,ISI,ME) applies the principles of effective teaching to the teaching and learning of physical education. Topics include the nature and purpose of physical education, an examination of the physical education curriculum, an analysis of quality daily physical education, approaches to teaching physical education, and evaluation of progress in physical education.
LH: two hours per week supervised practice teaching on-campus and/or in a school setting

4200 Curriculum Content and Curriculum Contexts I (ST) is designed to engage students in exploring, understanding, and applying theoretical foundations of curriculum and instruction practices specific to primary and elementary education learners, with attention to the political, social, and cultural contexts in which said curriculum content is enacted. Students will utilize sustained inquiry regarding the curricular core - literacy and numeracy - while including attention to each primary/elementary subject discipline.
CH: 16

4203 The Teaching and Learning of Religious Education in the Intermediate and Secondary School (IS,ME) applies the principles of effective teaching to the teaching and learning of religious education. Topics include formulating objectives, examining theories of faith and moral development, selecting and using resources, and evaluating learning.

4205 Religious Education in Primary and Elementary Grades (ME,PE) is an introductory study of aims and objectives, subject matter, curriculum materials, teaching methods, learning experiences, and evaluation for Religious Education courses.
CR: the former ED 2080

4206 Teaching Religious Education in the Primary and Elementary Grades (PE) is an introductory study of objectives, subject matter, curriculum materials, teaching methods and evaluation for primary/elementary Religious Education courses when teaching/learning from a multi-faith perspective in a pluralistic society.
CH: 1

420T School Field Experience II (ST) is a second school field experience, integrated with coursework that is focused on inquiry into curriculum, teaching, and learning. Students spend two field days per week, in addition to one full week at the end of this Phase, for a total of 27 days.
AR: Attendance is required. With respect to holidays, students follow the schedule of the school and not that of the University.

4240 An Introduction to the Exceptional Learner (IS,ISI,ME,PE) is an introduction to the nature of exceptionality in the student. Topics include an examination of special needs resulting from exceptionality, approaches to meeting the special needs, issues of exceptionality, and a consideration of selected categories of exceptionality.
CR: the former ED 3220, the former 3230, the former ED 4902

4242 Identification and Remediation of Learning Difficulties (IS,ISI,PE) examines the identification processes and remediation techniques appropriate for dealing with student learning difficulties. Topics include identification of learning difficulties, the process of program planning, and the application of teaching and learning strategies to specific subject areas.
PR: ED 4240 or the former 3220 or 3230

4260 Engaging the Adolescent Learner (IS,ISI,ME) considers the unique learning contexts and characteristics of learners through the span of adolescence, from early adolescence to young adulthood. It focuses on the intersection of psychological aspects of adolescence with biological, social and cultural, as well as cognitive and affective aspects in order to understand, to engage, and to effectively teach the adolescent learner. The implications of these unique periods for creating effective teaching and learning environments in both intermediate and secondary classrooms will be considered.

4300-4310 Special Topics Courses in Primary/Elementary (PE) will have topics to be offered announced by the Faculty of Education.

4350 Reading in the Content Areas (IS,ISI) examines the nature of reading in subject-specific areas such as history, biology, and mathematics. Topics include the role of the teacher in the teaching of content in different areas, evaluating vocabulary, grammar, usage and text structure for instruction, and analysing the variety of strategies for reading, writing and studying.

4362 Sociological Perspectives on Teaching and Learning (ME,PE) is an examination of such social issues in education as poverty, child abuse, gender, ethnicity, and changes in the society and their implications for the nature and process of schooling. A study of social dimensions of education, including the content of education and the organization of teaching and learning. An analysis of students' experiences in the internship with regard to the above and other aspects of education the students might identify.
CR: the former ED 4360
PR: completion of the Professional Year

4381 Perspectives on Education (IS,ISI,ME,PE) examines educational theory, practice and policy from the disciplinary perspectives of philosophy, sociology, history and/or comparative education. Its aim is to foster an appreciation of the intrinsic value of these specific forms of inquiry as contributions to contemporary understanding of educational enterprise. Topics include: ethical and epistemological considerations related to areas such as critical pedagogy, equal educational opportunity, educational reform, change and social justice.

4383 Philosophy of Teaching and Learning (ME,PE) examines a number of central philosophical concepts, assumptions and issues involved in the pursuit of teaching and learning in the schools. The aim of the course is to provide students with an understanding of the distinctive character of philosophical analysis as a reflective and critical practice that intends to promote professional excellence and personal well-being.
CR: the former ED 4380
PR: completion of the Professional Year

4390 Diversity, Social Justice, Teaching and Learning (IS,ISI) examines the intersection of multiple and inter-related forms of social and cultural diversity such as those related to social class, ethnicity, gender, ability, place, and sexual identity. The course explores ways to create more effective equitable learning environments through renewed, culturally responsive and respectful policy; critical, reflective and anti-discriminatory teaching; and more inclusive, socially critical curriculum.

4391 Social Justice, Equity and Education: An Introduction (PE) offers students an introduction to concepts and issues of social justice and equity as they relate to school and classroom culture and effective teaching and learning. Students will examine the basis of social inequity and its effects in education locally and worldwide, explore meanings of social justice and determine its importance as an educational priority, and review and develop curriculum, pedagogy and policies to build more equitable and just classrooms and school communities.
CH: 2

4400 Curriculum Content and Curriculum Contexts II (ST) is designed to provide students with critical opportunities to inquire into what it means to teach knowledgeably and well, and to explore the relationships between curriculum knowledge, pedagogic practices, and understandings of student learning.
CH: 8

440T School Field Experience III (ST) is a 50 day teaching and learning experience, spanning twelve weeks during Phase III. Students will gradually progress to assuming near full responsibility for all aspects of classroom teaching and learning. The experience is supported through integrated coursework designed to complement and enhance the field experience.
AR: Attendance is required. With respect to holidays, students follow the schedule of the school and not that of the University.
CH: 10

4420 Legal and Moral Issues in Education (PE) examines educational law and sources of conventional morality for the purpose of clarifying individual stances on legal and moral issues. Topics include the nature and theoretical bases of law and morality in education, the legal foundations of the Canadian education system, the legal and moral rights and responsibilities of teachers and students, and teacher liability.

4425 Introduction to Educational Administration (PE) is an examination

of the roles of various levels of government in Education; theories of administration; management as it relates to curriculum, organization, personnel, finance, and communication; and their implications for teachers in the Newfoundland context.
CR: the former Education 2410
PR: completion of the Professional Year

4427 Professional Leading and Learning in the School Organization (IS,ISI,PE) explores the theory and practice of school organization and its effect on teaching and learning and provide opportunities for teacher candidates to become reflective learners and teacher leaders. Topics include: parents and families, communities and schools; law and education; resources in education; policy and politics; teacher leadership, school and system administration; and the teaching profession.
CR: ED 4425

4500 Integration: Diversity and Identity (ST) provides an opportunity for students to integrate the theoretical and practical understandings from the previous three phases and explore what it means to be ethically and culturally responsive to students and their communities while becoming a confident STEM educator.
CH: 17

4505 Transition Planning for Adolescents with Intellectual Disabilities (SE) focuses on the application of educational procedures relevant to successful post-secondary education, employment and community integration of adolescents and young adults with mild and moderate developmental disabilities. Appropriate senior high programming, life skills development, use of assistive technology and resource materials necessary for transition planning for this population will be reviewed.
CO: ED 3610
PR: ED 3610

4510 Inclusive Practices for Students with Mild Intellectual Disabilities (SE) gives consideration to the establishment of objectives; selection, development and review of materials; the use of various instructional strategies; assistive technology and the provision of appropriate experiences for the education of students with mild intellectual disabilities.
CO: ED 3610
PR: ED 3610

4515 Inclusive Practices for Students with Moderate Intellectual Disabilities (SE) focuses on inclusive educational practices for students with moderate intellectual disabilities. Emphasis will be placed on the development, implementation and management of a well-balanced individualized curriculum as articulated in an individual educational plan. Students will be expected to demonstrate fluency in the design of effective instructional strategies, including the use of assistive technology to maximize student's individual strengths across a variety of environments.
CO: ED 3610
PR: ED 3610

4520 Inclusive Practices for Students with Behavioural Challenges (SE) examines programs and strategies for students with behavioural issues. These will include counseling skills, case conferences, structured learning environments, use of assistive technology and therapeutic interventions for specific behaviour problems. In addition, consideration will be given to collaboration with mental health practitioners and procedures to develop readiness for return to regular instructional programs.
CO: ED 3620
PR: ED 3620

4530 Inclusive Practices for Students with Learning Disabilities (SE) investigates specific teaching methods, use of assistive technology and programming practices as they pertain to reading, writing, language, mathematics, social skills, and metacognitive skills for students with identified learning disabilities.
CO: the former ED 3630
PR: the former ED 3630

4531 Specific Learning Disorders (same as the former ED 3630) examines our theoretical understanding of the nature and characteristics of specific learning disorders. It discusses contemporary understandings and current research and relates such information to practice. It investigates specific teaching methods, use of assistive technology and instructional technology, and programming practices as they pertain to reading, writing, mathematics, social skills, and metacognitive skills for students with identified specific learning disorders.
CR: the former ED 3231, the former ED 3630
PR: ED 4240 or the former ED 3220 or ED 3230

4540 Inclusive Practices for Students with Speech/Language Disorders (SE) examines theoretically sound and research-based methods for the identification and remediation of speech and language concerns in children and adolescents. Topics include typical language development; nature of developmental concerns for both speech (articulation, voice and fluency) and language (receptive, expressive and phonetic awareness); social use of language; and use of assistive technology. Particular focus will be placed on current interventions/strategies and programs/models. The course is aimed at supporting teachers in developing effective individualized programs.

4541 Communication for the Deaf - inactive course.

4543 Inclusive Practices for Students with Hearing Loss (SE) - inactive course.

4600 Community Field Experience (ST) is designed to complement on-campus course work, particularly ED 4200, and to enhance student field experience. This four week placement is designed to enrich student understanding of their professional identity and responsibility in a broader context.
AR: Attendance is required. With respect to statutory holidays, students follow the schedule at their workplace settings and not that of the University.
CH: 4

4610 The Nature and Management of Stress (PE) studies the nature of stress as it is manifested in the teacher and the teaching profession, and provides approaches to coping effectively with the factors which are related to that stress. Topics include the nature of the human stress response, causes and symptoms of stress (personal and professional), self-assessment techniques, and a selection of approaches available to cope with the stress typically related to the roles and expectancies of teaching.

4620-4639 Institutes in Intermediate and Secondary Education (IS) will have topics announced by the Faculty of Education. These institutes may follow a schedule that falls outside of the normal teaching semester.
CH: 1

4640-4659 Institutes in Intermediate and Secondary Education (IS) will have topics announced by the Faculty of Education. These institutes may follow a schedule that falls outside of the normal teaching semester.
CH: 2

4660-4680 Institutes in the Bachelor of Education (Primary/Elementary) as a Second Degree Conjoint with Certificate in STEM Education (ST) will have topics announced by the Faculty of Education. These institutes may follow a schedule that falls outside of the normal teaching semester.
CH: 1

4690-4699 Institutes in the Bachelor of Education (Primary/Elementary) as a Second Degree Conjoint with Certificate in STEM Education (ST) will have topics announced by the Faculty of Education. These institutes may follow a schedule that falls outside of the normal teaching semester.
CH: 2

4710 Recurring Issues in Post-Secondary Education (PS) identifies, analyses, and discusses major issues, practices and problems in Post-Secondary Education provincially, nationally, and internationally.
PR: ED 2710, ED 2720, and ED 2730

4730 Educational Programs and Practices in Industry and Labour (AL,PS) is a study of the various Post-Secondary Education programs operated either wholly by industry and labour or jointly with educational institutions; apprenticeship, work experience and study programs, co-operative education, training-in-industry, training on-the-job, supervisory training, and management development.
PR: ED 2710, ED 2720, and ED 2730

4735 Practicum in Adult and Post-Secondary Education (AL, PS) is comprised of on-the-job supervised instructional activities designed to allow for the implementation of concepts, theory and principles of teaching, learning and curriculum in an adult and post-secondary education setting.
CR: the former ED 4450 and the former ED 4700
PR: ED 2700, ED 2710, ED 2730, ED 2740, ED 3280 or equivalent as determined by the Office of Academic Programs.

4750 Teaching Design and Materials Processing II (ISI) provides students with opportunities to examine current teaching and learning strategies applicable to technology education programs. The course will focus on advanced design and materials processing and fabrication using modern digital manufacturing equipment. Topics include: design, fabrication, and assembly processing, within the application of a design process and portfolio development.
AR: attendance is required
LH: 2
OR: WHMIS training. Information can be obtained from the Office of Academic Programs.

4752 Teaching Robotics Systems (ISI) is designed to provide students with an understanding of key concepts in robotic development and control applications. Students will complete practical activities that promote development of the skills necessary to deliver a comprehensive program in this area of study. Topics include: the study of electrical energy, analog and digital electronics; fabrication techniques; object oriented/event driven programming; and wireless robotic control over Internet Protocol (IP).
AR: attendance is required
LH: 2
OR: WHMIS training. Information can be obtained from the Office of Academic Programs.

4754 Teaching Construction Technology Systems (ISI) will provide students opportunities to apply current teaching and learning strategies within the technology education laboratory environment in relation to a selection of skilled trades. Students will examine labour trends that are impacting on society's ability to expand and maintain today's infrastructure. The course features hands-on, practical learning experiences, to support the concepts that have been theoretically discussed in class.
AR: attendance is required
LH: 2
OR: WHMIS training. Information can be obtained from the Office of Academic Programs.

4760-4780 Advanced Specialized Post-Secondary Education Technologies (PS) examines the theory and practice of selected advanced specialized Post-Secondary Education technical skills and their application to the laboratory, workshop and business office. Emphasis will be placed on innovative and emerging techniques in selected areas of business, industry, and the service occupations.

4830 Music Education Seminar (ME) examines, through inquiry, reflection and synthesis, the foundations of music education common to all levels and contexts of school music. The focus is the bridging of theory, philosophy, and practice in music education. Topics include current issues; challenges and opportunities in music education(provincial, national, and international); interdisciplinary and integrated arts education; cultural pedagogy, diversity, and social justice in education; and teacher professional development. Additional modules will be designed to meet teacher candidates' needs and interests.

4901 Effective Teaching Strategies for Multi-grade/Multi-age Classrooms (PE) begins with a critical examination of traditional approaches to multi-grading. The main focus of the course will be to introduce teachers to the potential of adopting a multi-age approach in small schools which have of necessity grouped children of more than one age group and grade level together for instruction. This course will also examine the implications of implementing a philosophy of multi-age pedagogy in the primary, elementary and intermediate grades (K-9).

4950 Assessment for Learning (IS,ISI) introduces the theory and practice of evaluation and assessment in educational settings. Topics include the nature of classroom assessment; production, administration and evaluation of teacher-made tests and other assessment tools; product and performance assessment; grading and reporting communication of evaluation information; and the analysis and application of assessment data to instructional planning and the improvement of teaching.
CR: the former ED 4912

4970-4980 Special Topics Courses in Intermediate/Secondary (IS) will have topics announced by the Faculty of Education.

5000 The Teacher Development Seminar (IS,ISI) provides teacher candidates with an opportunity to frame, conceptualize and articulate educational issues; (re)consider the purposes of education; reflect on teaching and learning; and develop and display artifacts that document learning, professional knowledge and practice, and teacher identity. Teacher candidates are expected to participate in a series of critical reflective seminars and workshops, and to create an electronic portfolio (e-portfolio). Topics include: critical reflection, professionalism and ethics in teaching, and teacher identity.
AR: attendance is required
OR: seminars, workshops and other professional development sessions

5001 The Teacher Development Seminar for Primary/Elementary (PE) provides teacher candidates with an opportunity to frame, conceptualize and articulate educational issues; (re)consider the purposes of education; reflect on teaching and learning; and develop and display artifacts that document learning, professional knowledge and practice, and teacher identity. Teacher candidates are expected to participate in a series of critical reflective seminars and workshops, and to create an electronic portfolio (e-portfolio). Topics include: critical reflection, professionalism and teacher identity, educational technology, social/emotional/mental health and student and school safety.
AR: attendance is required
OR: seminars, workshops and other professional development sessions

1 The Memorial University of Newfoundland Code

The attention of all members of the University community is drawn to the section of the University Calendar titled **The Memorial University of Newfoundland Code**, which articulates the University's commitment to maintaining the highest standards of academic integrity.

2 Student Code of Conduct

Memorial University of Newfoundland expects that students will conduct themselves in compliance with University Regulations and Policies, Departmental Policies, and Federal, Provincial and Municipal laws, as well as codes of ethics that govern students who are members of regulated professions. The *Student Code of Conduct* outlines the behaviors which the University considers to be non-academic misconduct offences, and the range of remedies and/or penalties which may be imposed. Academic misconduct is outlined in ***UNIVERSITY REGULATIONS* - Academic Misconduct** in the University Calendar.

For more information about the *Student Code of Conduct*, see www.mun.ca/student.

For additional information and resources on academic and professional integrity in the Faculty of Engineering and Applied Science, see www.mun.ca/engineering/undergrad/academicintegrity.php.

3 Faculty Description

The Faculty of Engineering and Applied Science offers a co-operative undergraduate program leading to the degree of Bachelor of Engineering, as well as graduate programs leading to the degrees of Master of Engineering, Master of Applied Science, and Doctor of Philosophy. The Faculty encompasses five academic departments: Civil Engineering, Electrical and Computer Engineering, Mechanical and Mechatronics Engineering, Ocean and Naval Architectural Engineering, and Process Engineering. Through teaching, research and outreach, the Faculty of Engineering and Applied Science plays a critical role in the economic development of the Province, and graduates from the programs hold key positions in the major industrial developments in our Province. A growing number of our recent graduates are leading emerging high-technology companies and hold important positions in national and international industries and governments, contributing to the University's global impact. Research in the Faculty of Engineering and Applied Science has a strong focus on research and development opportunities associated with the general technological needs of our society. The Faculty maintains a very strong sense of identity and cooperation among students, faculty, and staff, and prides itself on its strong linkages with industry and the engineering profession.

Additional information regarding the Faculty of Engineering and Applied Science is available at www.mun.ca/engineering.

Students must meet all regulations of the Faculty in addition to those stated in the general regulations. For information concerning admission/readmission to the University and general academic regulations (undergraduate), refer to ***UNIVERSITY REGULATIONS***.

For information concerning fees and charges, see the Financial and Administrative Services website at www.mun.ca/finance/fees/.

For information concerning scholarships, bursaries and awards, see www.mun.ca/scholarships/scholarships.

3.1 Accreditation Status

Graduates of Memorial University of Newfoundland's engineering programs have been enjoying the benefits of full accreditation with the Canadian Engineering Accreditation Board (CEAB) since 1975. The undergraduate co-operative programs offered by the Faculty of Engineering and Applied Science are fully accredited by The Canadian Engineering Accreditation Board (CEAB) of The Canadian Council of Professional Engineers (CCPE) to 2024. The co-operative education component of these programs is accredited by Co-operative Education and Work Integrated Canada (CEWIL Canada) to December 2027.

3.2 Objectives of the Bachelor of Engineering Degree Program

The objectives of the undergraduate program are to provide students an excellent academic experience and to equip graduates with the ability to solve a broad range of problems in our rapidly changing technological, economic and social environment. To this end, the Faculty is committed to educate graduates who have:

1. a strong foundation and knowledge in engineering fundamentals with a capacity to know how, when and where to use the knowledge in specific ways;
2. an ability to identify, formulate, analyse and solve engineering problems and a capacity to integrate material from more than one subject and to apply appropriate engineering principles to arrive at correct and effective solutions;
3. a comprehensive knowledge in the fundamentals of engineering practice, including an ability to use analytical techniques, experimental and laboratory skills and modern engineering simulation and design software tools;
4. a broad knowledge of the principles and skills in engineering design, development and management in global, cultural and business contexts;
5. a multidisciplinary view with an ability to work effectively as members of teams, composed of individuals from different disciplines and different professional cultures;
6. strong oral and written communication skills with a capacity to produce effective technical documents and to use current communication techniques and tools;
7. a culture of life-long learning with a capacity to engage in continuous self-improvement, personal enrichment and professional development; and
8. a broad sense of social, ethical and professional responsibility with a capacity to demonstrate an understanding and appreciation of the human dimension of technology and its impact on people.

3.3 Academic and Professional Ethics

The Faculty of Engineering and Applied Science supports the highest standards of academic and professional ethics. Ethical behaviour encompasses integrity, conduct, respect, and professionalism, and also means that we will take responsibility for our learning and pursue academic goals in an honest and engaged manner. It is the principles, values, and expectations that we espouse as members of the Faculty and future professional engineers.

When participating in coursework or representing the Faculty on work-terms, in competitions, at conferences, and other research and academic activities, we consider ethical behaviour as important as our performance, conduct, and quality of work. In decision-making, teamwork, and individual expression, we seek to understand the significance of justice, fairness, individual rights, and care in striving to achieve our own personal best.

Guidelines for Academic Integrity and an Engineering Student Code of Conduct are available at the Faculty of Engineering and Applied Science website.

4 Description of Program

The Bachelor of Engineering Degree at Memorial University of Newfoundland is a Co-operative Program in which regular full-time academic study is supplemented by four month periods of full-time work in positions related to the student's future career. The Bachelor of Engineering degree program is available in the following seven majors: Civil Engineering, Computer Engineering, Electrical Engineering, Mechanical Engineering, Mechatronics Engineering, Ocean and Naval Architectural Engineering, and Process Engineering.

Engineering One, the first-year of the engineering program, comprises courses in mathematics and basic science (physics and chemistry), as well as courses covering engineering fundamentals which are common to each of the majors. The engineering courses in Engineering One introduce students to engineering problem-solving, analysis, design, communication, and teamwork. Students will develop an understanding of the different engineering specialties, as well as the interdisciplinary nature of engineering practice.

The specialized major programs of Civil Engineering, Computer Engineering, Electrical Engineering, Mechanical Engineering, Mechatronics Engineering, Ocean and Naval Architectural Engineering, and Process Engineering are offered in academic terms 3 through 8.

Electives can be tailored to meet the needs of those who plan to go straight into industry and those who wish to join the increasing number of our graduates who are pursuing advanced degrees.

Courses of the Faculty are designated by the following abbreviations: CIV are courses offered by the Department of Civil Engineering; ECE are courses offered by the Department of Electrical and Computer Engineering; ENGI are non-departmental courses offered by the Faculty; ME are courses offered by the Department of Mechanical and Mechatronics Engineering; ONAE are courses offered by the Department of Ocean and Naval Architectural Engineering; and PROC are courses offered by the Department of Process Engineering.

4.1 Program of Study

1. Courses in the Engineering Program are normally taken in Academic Terms as shown in the appropriate program table. Students must satisfy the criteria for promotion as described below under **Promotion Regulations** to remain in the Engineering program.
2. The Engineering Program consists of eight academic terms and four to six work terms. The first-year of the Engineering Program, known as Engineering One, forms a core that is common to all majors. All students must successfully complete the requirements of Engineering One prior to being promoted to Academic Term 3 as indicated under **Promotion Regulations, Promotion Status (Engineering One)**.
3. To be eligible for registration for ENGI 001W in the Spring semester after completing Engineering One, students are expected to successfully complete the prerequisite ENGI 200W in the Fall semester of Engineering One. All other Engineering One students are expected to successfully complete ENGI 200W in the Winter semester of Engineering One.
4. In 1000 level Engineering courses, registration priority is given to students who have been admitted to Engineering One. Other students will be admitted to these courses only with the approval of the Associate Dean (Undergraduate Studies) (or delegate).
5. In these program regulations, including the program tables, wherever reference is made to Chemistry 1050, this course may be replaced by a course deemed equivalent by the relevant academic unit.
6. Upon entering Academic Term 3, students begin to specialize in their academic program, in one of the following seven majors: Civil Engineering, Computer Engineering, Electrical Engineering, Mechanical Engineering, Mechatronics Engineering, Ocean and Naval Architectural Engineering, or Process Engineering.
7. Upon entering Academic Term 6, students in the Computer Engineering and Electrical Engineering majors may choose to enter the Biomedical stream. Upon entering Academic Term 6, students in the Mechanical Engineering major choose one of five technical streams: Biomedical, Mechanics and Materials, Mechatronics, Petroleum, and Thermo-Fluids. Upon entering Academic Term 6, students in the Process Engineering major may choose one of two technical streams: Chemical and Bioprocess, and Mineral and Energy Resources.
8. Courses offered in the Faculty of Engineering and Applied Science are restricted to students who have been admitted or promoted to the appropriate academic term and major (e.g., Academic Term 3 for 3000 level courses, restricted by major; Engineering One for 1000 level courses). Other students will be admitted to these courses only with the approval of the Head of the appropriate Department for courses at the 3000 level and higher, or the Associate Dean (Undergraduate Studies) (or delegate) for ENGI courses.

   Some of the courses offered in academic terms 3 to 8 are taken by all Engineering students, others are offered for more than one major, but most technical courses in academic terms 3 to 8 are specific to the individual majors. Students should refer to the program descriptions for the detailed course requirements in each phase of their program.
9. Technical elective courses may be offered in terms other than those indicated in the program tables.
10. A student who has previously met a technical elective requirement in a given semester or wishes to defer it, may request an exemption or deferral by applying to the Head of the appropriate Department. A minimum grade of 60% is required for credit to be given towards a student's engineering program for any technical elective taken outside the normal Academic Terms as shown in the tables.
11. A minimum grade of 60% is required for credit to be given towards a student's engineering program for any course beyond Engineering One that is taken outside the normal Academic Terms as shown in the tables.
12. Transfer credit cannot be awarded for project or design courses in Academic Terms 7 or 8 of the Engineering program.
13. Students registered in Academic Term 7 of any Engineering major are eligible to apply for admission to a **Master of Engineering Fast-Track Option** (M.Eng.). The purpose of the Option is to encourage students interested in pursuing graduate studies to begin

their graduate program while still registered as an undergraduate student. While enrolled in the Option, a student may complete some of the M.Eng. Degree requirements and potentially be able to graduate earlier from the M.Eng. Program. For further details and the regulations regarding the option, refer to the **School of Graduate Studies, Regulations Governing the Degree of Master of Engineering**.

4.2 Complementary Studies

1. The Complementary Studies component has been developed to make students aware of the function and responsibilities of the Professional Engineer in society and the impact that engineering in all its forms has on environmental, economic, social and cultural aspects of our society. This complements the technical expertise and communications skills developed and practised in all components of the program.
2. The Complementary Studies component is the same for all programs and consists of a minimum of 21 credit hours as follows:
   - One 3 credit hour course in English at the 1000 level;
   - Engineering 3101;
   - Engineering 4102 (which is a prerequisite for required courses in Term 6 in the Civil and Process majors, and for required courses in Term 7 in all other majors);
   - One 3 credit hour course that deals with the effect of technology on society and the environment. The course is to be chosen from Engineering 8151, Engineering 8154, Engineering 8155, Sociology 2120, Sociology 4107, Philosophy 2330 or the former 2571, or the former 2801;
   - Engineering 8152;
   - One Elective course of a 3 credit hour value chosen from the arts, humanities, social sciences and management and approved by the Associate Dean (Undergraduate Studies) of the Faculty of Engineering and Applied Science. List A is an approved list of courses maintained by the Office of the Associate Dean (Undergraduate Studies) of the Faculty of Engineering and Applied Science and is available at the website www.mun.ca/engineering; and
   - One Elective course of a 3 credit hour value chosen from the humanities and social sciences and approved by the Associate Dean (Undergraduate Studies) of the Faculty of Engineering and Applied Science. This course must be second-year or higher and it is intended to provide experience with the central issues, methodologies and thought processes of the humanities and social sciences. List B is an approved list of courses maintained by the Office of the Associate Dean (Undergraduate Studies) of the Faculty of Engineering and Applied Science and is available at the website www.mun.ca/engineering.
3. In order to be considered for graduation, the student must obtain an overall average of at least 60% in the 21 credit hours in **Complementary Studies** courses required in the program.

4.3 Bachelor of Engineering Majors

The Bachelor of Engineering degree program is available in the following seven majors: Civil Engineering, Computer Engineering, Electrical Engineering, Mechanical Engineering, Mechatronics Engineering, Ocean and Naval Architectural Engineering, and Process Engineering.

4.3.1 Civil Engineering

www.mun.ca/engineering/civil

Civil Engineering deals with the planning, design, and construction of roads, railways, harbours, docks, tunnels, bridges, buildings, water supplies, hydroelectric power development, and sewage collection, treatment, and disposal systems.

The Civil Engineering major provides a broad introduction to the scientific principles and engineering techniques necessary for an understanding of the fundamental problems tackled by civil engineers.

4.3.2 Computer Engineering

www.mun.ca/engineering/ece

Computer Engineering is the design and analysis of computer systems applied to the solution of practical problems. It encompasses both hardware and software design in applications ranging from telecommunications and information systems to process control and avionics. Computer Engineering students learn the mathematics of discrete and continuous systems, the design of digital machines such as processors and memories, the fundamentals of software design, and the principles used in communications systems such as telephone networks and the Internet.

Computer Engineering shares many fundamentals with Electrical Engineering, which are covered in a common curriculum up to and including Academic Term 3. In recognition of the considerable diversity of careers available to computer engineers, students are given latitude in the final three academic terms to choose from a wide range of electives in various specialty areas. In Academic Term 6, students may choose to enter the Biomedical stream which provides focus on electives relevant to the field of biomedical engineering. Making use of their elective course choices, students in the Computer Engineering major also have the opportunity to undertake a minor in Physics.

4.3.3 Electrical Engineering

www.mun.ca/engineering/ece

Electrical Engineering is a broad field encompassing the study of control systems, electromagnetics and antennas, power systems, electronics, communications, and computer hardware and software.

Electrical Engineering shares many fundamentals with Computer Engineering, which are covered in a common curriculum up to and including Academic Term 3. In recognition of the considerable diversity of careers available to electrical engineers, students are given latitude in the final three academic terms to choose from a wide range of electives in various specialty areas. In Academic Term 6, students may choose to enter the Biomedical stream which provides focus on electives relevant to the field of biomedical engineering. Making use of their elective course choices, students in the Electrical Engineering major also have the opportunity to undertake a minor in Physics.

4.3.4 Mechanical Engineering

www.mun.ca/engineering/mech

Mechanical Engineering is a highly diversified discipline encompassing the design, analysis, testing and manufacture of products that are used in every facet of modern society. Mechanical engineers analyse and design using the principles of motion, energy, and force to ensure that the product functions safely, efficiently, reliably, and can be manufactured at a competitive cost. This activity requires a thorough knowledge of materials, mathematics, and the physical sciences, and an ability to apply this knowledge to the synthesis of economical and socially acceptable solutions to engineering problems.

Mechanical Engineering is designed to provide students with a knowledge in the following four areas: design and dynamics, emphasizing solid mechanics, material science, dynamics, vibrations and machine component design; thermo-fluids, focussing on thermodynamics, heat transfer and fluid mechanics; mechatronics, dealing with electro-mechanical systems, control, robotics, and automation; and manufacturing/industrial, which encompasses CAD/CAM, production and operation management. In Academic Term 6, students select one of five Technical Streams, which provide focus to the wide range of electives in various specialty areas in Academic Terms 7 and 8.

4.3.5 Mechatronics Engineering

www.mun.ca/engineering/mte

Mechatronics Engineering is an interdisciplinary branch of engineering that comprises mechanical, electronic and electrical engineering systems. It often involves a combination of robotics, electronics, computer engineering, communications, control systems, and machine learning. In the future digital economy, automated combined mechanical and electrical systems are becoming increasingly prevalent.

Mechatronics engineers work in diverse fields that include automation and control of mechanical systems. This includes, but is not limited to, advanced manufacturing systems, robotics, autonomous driving, navigation, unmanned aerial vehicles (UAV), intelligent systems, remote diagnostics and telesurgery, autonomous underwater vehicles (AUV), remotely operated underwater vehicles (ROV), machine vision, advanced sensing and instrumentation.

4.3.6 Ocean and Naval Architectural Engineering

www.mun.ca/engineering/ona

Ocean and Naval Architectural Engineering covers aspects of both naval architecture and ocean engineering. The Ocean and Naval Architectural Engineering major is the only accredited undergraduate program specifically in naval architecture/ocean engineering in Canada. The major is designed to provide education to work in marine transport, ship and boat building, offshore engineering, submersibles design and many related marine areas. The undergraduate program is also a comprehensive preparation for graduate studies, research and consulting in ocean engineering.

Naval Architecture is primarily concerned with the design and construction of ships, offshore structures and other floating equipment and facilities. Ocean Engineering extends this focus to cover virtually all aspects of engineering related to the world's oceans. Topics including sub-sea systems and oceanographic science add core ocean engineering content to the program.

Students in the Ocean and Naval Architectural Engineering major also have the opportunity to undertake a minor in Mathematics.

4.3.7 Process Engineering

www.mun.ca/engineering/process

Process Engineering is a diversified discipline encompassing new development, design, optimization, and operation of sustainable processes for human needs. A process engineer uses biological, chemical, and physical processing of substances to modify their nature, their properties, and/or the composition of mixtures to produce useful products. This activity requires a thorough knowledge of materials, chemical and physical sciences, and mathematics and an ability to apply this knowledge in an economical and sustainable way to engineering development.

The Process Engineering major is designed to provide students with a specialization in the areas of chemical and bioprocesses, minerals and metals processing, upstream oil and gas production, and downstream oil and gas processing. In Academic Term 6, a student may select the Chemical and Bioprocess Stream with emphasis on chemical, biological processes, and petrochemicals including refining, polymer, or in the Mineral and Energy Stream with emphasis on mining and mineral processing, and upstream oil and gas including petroleum geology, drilling, reservoir and production engineering. Throughout the major and within each area of specialization, emphasis is placed on green and clean processes which are environmentally benign and inherently safe. The goal of this major is to prepare graduates with knowledge and ability to implement this knowledge in a sustainable manner to larger-scale industrial development.

4.4 Work Terms

www.mun.ca/coop/programs/engineering
www.mun.ca/coop

Engineering work term registration, grading, and tuition fee charges and payments are governed by the ***UNIVERSITY REGULATIONS*** in this Calendar and those outlined below. Engineering work term placement and opt-outs, conduct, and evaluation are governed by the *Engineering Student Co-op Handbook* which is available at www.mun.ca/coop/programs/engineering/enghandbook.pdf. Any changes to the *Engineering Student Co-op Handbook* require the approval of the Committee on Undergraduate Studies.

A student must successfully complete a minimum of four work terms in order to graduate with a Bachelor of Engineering degree. The Bachelor of Engineering degree offers the opportunity to complete up to five work terms beyond academic term 3. A student is expected to complete as many of these work terms as possible. A student who expects to complete the Engineering One requirements by the end of the Winter semester may apply to the Committee on Undergraduate Studies to undertake a work term during the Spring semester of Engineering One. Academic performance is the basis for approving such requests.

All students in academic terms 3 to 7 and any student approved to complete a work term during the Spring semester of Engineering One will be registered automatically during the regular registration period for the next scheduled work term unless the student has opted out. A student may opt out of up to two work terms beyond Academic Term 3 by completing the procedures outlined in the *Engineering Student Co-op Handbook*. Opt-outs normally are approved only in cases where a student has successfully completed a minimum of four work terms.

4.4.1 General Information

- During work terms a student is brought into direct contact with the engineering profession, exposed to the work place setting, expected to assume ever-increasing responsibility in employment situations as the student's education advances, and introduced to

experiences beyond the scope of those which could be provided in the classroom.

- A student is responsible for finding suitable work placements. The Office of Co-operative Education provides resources to assist in this process. A student who obtains a work placement outside the job competition must have that work placement approved by the Office of Co-operative Education prior to accepting it.
- A student who cannot meet the demands of the work term may be required by the Faculty to withdraw from the work term until the student can demonstrate an ability to continue in the program.
- Following the date of automatic registration for a work term, only a student who is registered for that work term will be permitted to continue in, or subsequently join, the job placement process and be approved to begin a work placement.
- A student in the job competition who refuses all job offers without the prior consent of the Office of Co-operative Education may be subject to penalties that may include the assignment of a grade of FAL (fail) for that work term.
- A student is not permitted to drop work terms without prior approval of the Committee on Undergraduate Studies, on the recommendation of the Office of Co-operative Education. A student who drops a work term without permission, or who fails to honour an agreement to work with an employer, will be assigned a grade of FAL (fail) for that work term.
- A student who conducts him or herself in such a manner as to cause termination from the job, will normally be assigned a grade of FAL (fail) for that work term.
- A student who is registered for a work term and who does not opt out from that work term must complete that work term successfully as a requirement for graduation.
- A student who opts out from a work term is not permitted to work for a co-op employer during that work term.
- A student who opts out from a work term and who works for a co-op employer during that work term may be considered to have committed an academic offence and will be subject to the penalties listed under the ***UNIVERSITY REGULATIONS*****, Academic Offences**.
- A student in a work term who does not meet the deadlines stated by the Office of Co-operative Education for the submission of forms and documentation may be awarded a reduced grade for one or both components of that work term.
- The work term performance grade is assigned by the student's Academic Staff Member in Co-operative Education (ASM-CE) based upon feedback from the employer and other information gathered from contact with the student.

4.4.2 Evaluation of Work Terms

Two components are considered in work term evaluation: work performance and a communications component, as described in the *Engineering Student Co-op Handbook* which is available at www.mun.ca/coop/programs/engineering/enghandbook.pdf.

Each component is evaluated separately and equally weighted resulting in one of the following classifications: Outstanding, Above Expectations, Satisfactory, Marginal Pass, Fail. Both evaluations will be recorded on the transcript. Overall evaluation of the work term will result in the assignment of one of the following final grades:

- Pass with distinction (PWD): To receive a PWD, a student must obtain an evaluation of Outstanding in both the communications and work performance components of the work term.
- Pass (PAS): To receive a PAS, a student must achieve an evaluation of Marginal Pass or better in the communications component and in the performance component of the work term.
- Fail (FAL): A student receiving a Fail in either the communications or performance component of the work term will receive a FAL. For promotion from the work term, a student must obtain PWD or PAS.

4.5 Continuing Engineering Education

The Faculty of Engineering and Applied Science has a firm commitment to continuing engineering education and offers a variety of seminars and short courses in St. John's and in other centres for practising engineers. For applicability of courses towards diplomas and certificates in Engineering, contact the Continuing Engineering Education office through the Faculty of Engineering and Applied Science website.

5 Admission/Readmission Regulations for the Faculty of Engineering and Applied Science

In addition to meeting ***UNIVERSITY REGULATIONS***, students must meet the admission/readmission regulations for the Faculty of Engineering and Applied Science.

5.1 General Information

1. Entry to the Bachelor of Engineering program is competitive for a limited number of placements. Meeting the minimum admission requirements does not guarantee acceptance into the Engineering program.
2. The final decision on admission or readmission to the Bachelor of Engineering program rests with the Admissions Committee of the Faculty.
3. Admission or readmission to the University does not necessarily constitute admission or readmission to the Bachelor of Engineering program.
4. The primary criterion used in reaching decisions on applications for admission or readmission is the judgement of the Admissions Committee on the likelihood of an applicant succeeding in the program.
5. Up to three positions per year in the Faculty of Engineering and Applied Science may be designated for applicants of Indigenous ancestry who have met the admission requirements of the program. Applicants must send a letter of request at the time of application and provide documentation of Indigenous ancestry.
6. The Admissions Committee allocates majors to students after promotion or readmission to Academic Term 3 of the Bachelor of Engineering program. Information on promotion from Engineering One is available at **Promotion Regulations, Promotion Status (Engineering One)**.

5.2 Application Forms and Deadlines

Applications for admission or readmission to programs offered by the Faculty of Engineering and Applied Science must be submitted online at www.mun.ca/undergrad/admissions/apply and by the appropriate deadline date as indicated in the **Application for Admission Deadline Dates** table or the **Application for Readmission Deadline Dates** table below.

5.2.1 Admission

1. A student applying for admission to the Bachelor of Engineering program is required to submit an online application by the appropriate deadline date as indicated in the **Application for Admission Deadline Dates** table below.
2. Applications for admission to Engineering One may be considered for admission to any semester of the academic year.
3. Applications will be considered from Memorial University of Newfoundland students who have successfully completed or are currently registered for two or more of the following courses or their prerequisites: Chemistry 1050 (or Chemistry 1200), 3 credit hours in English at the 1000 level, Mathematics 1001, Mathematics 2050, Physics 1051.
4. Applications and documentation received after the relevant deadline may be considered as time and space permit. The Admissions Committee for the Faculty will only consider applications that are complete.

Application for Admission Deadline Dates

Semester	Deadline Date	Deadline for Receipt of all Documentation
Fall	March 1	July 31
Winter	October 1	It is strongly recommended that the required documentation be received on or close to the admission deadline.
Spring	February 1	It is strongly recommended that the required documentation be received on or close to the admission deadline.

5.2.2 Readmission

1. Applications for readmission to Academic Term 3 and beyond will only be considered for applicants who have been previously admitted to the Academic Term for which readmission is applied.
2. A student applying for readmission to the Bachelor of Engineering program is required to submit an online application by the appropriate deadline date as indicated in the **Application for Readmission Deadline Dates** table below.
3. Applicants will be considered for readmission to Academic Term 3 based on their **Promotion Status (Engineering One)**.
4. Applications and documentation received after the relevant deadline may be considered as time and space permit. The Admissions Committee for the Faculty will only consider applications that are complete.

Application for Readmission Deadline Dates

Academic Term	Semester	Deadline Date	Deadline for Receipt of all Documentation
Academic Term 3	Fall	March 1	July 31
Beyond Academic Term 3	Fall Winter Spring	June 1 October 1 February 1	It is strongly recommended that the required documentation be received on or close to the appropriate admission deadline.

5.3 Admission Requirements to the Faculty Program

An applicant must be eligible for admission or readmission to the University in a category as defined in the Calendar section ***UNIVERSITY REGULATIONS* - Admission/Readmission to the University (Undergraduate), Categories of Applicants, Admission Criteria and Other Information**. In addition to meeting these regulations, an applicant to the Bachelor of Engineering program in the following admission categories must meet the requirements as indicated below.

5.3.1 High School Applicants

1. The Faculty of Engineering and Applied Science encourages applications for admission to the Bachelor of Engineering program from high school students who are new to post-secondary education, have an interest in pursuing an engineering degree and have achieved a good academic performance during high school. In addition to meeting the requirements under ***UNIVERSITY REGULATIONS* - Admission/Readmission to the University (Undergraduate), Applicants Who Have Followed the High School Curriculum of Newfoundland and Labrador, Admission Criteria**, performance in advanced mathematics, chemistry, physics and English is of particular interest, and grades above 80% are normally required for consideration.
2. Applicants who have not successfully completed either chemistry or physics but who have performed well in the other subjects may be considered.
3. Applicants must meet the English language proficiency requirements as noted in **English Language Proficiency Requirements**.
4. An applicant who is not admitted to the Bachelor of Engineering program is encouraged to contact the University's Academic Advising Centre or the Office of the Associate Dean (Undergraduate Studies) to discuss an appropriate first-year program.

5.3.2 Memorial University of Newfoundland Applicants

1. To be eligible for consideration for admission to the Bachelor of Engineering program, a student who is attending or has previously attended this University must have a cumulative average of at least 70%, and obtained a grade of at least 70% in two or more of the following courses or their prerequisites: Chemistry 1050 (or Chemistry 1200), 3 credit hours in English at the 1000 level, Mathematics 1001, Mathematics 2050, Physics 1051.
2. Applicants must meet the English language proficiency requirements as noted in **English Language Proficiency Requirements**.

5.3.3 Transfer Applicants

1. An applicant seeking admission to the Bachelor of Engineering program through transfer from recognized post-secondary institutions must have achieved a minimum overall average of 70% or GPA of 3.0, or equivalent.
2. Applicants must have obtained a grade of at least 70% in two or more courses that have been deemed equivalent for transfer credit purposes to the following courses or their prerequisites: Chemistry 1050 (or Chemistry 1200), 3 credit hours in English at the 1000 level, Mathematics 1001, Mathematics 2050, Physics 1051.
3. Where it is determined, at the time of admission, that an applicant has met all the requirements for promotion from Engineering One, customized program requirements will be determined on an individual basis following transfer credit evaluation.
4. Applicants must meet the English language proficiency requirements as noted in **English Language Proficiency Requirements**.
5. A transfer applicant is advised that more than half of the total credit hours must be completed at this University as indicated under ***UNIVERSITY REGULATIONS*** **- Residence Requirements, First Degree and Second Degree**.

5.4 English Language Proficiency Requirements

Applicants who have not met the University specified requirements for study at an English Language Secondary or Post-Secondary Institution (see ***UNIVERSITY REGULATIONS*****, Admission/Readmission to the University (Undergraduate) - English Language Proficiency Requirements**) are required to:

1. Possess higher than University minimum scores in one of the following standardized tests:
   a. **Test of English as a Foreign Language (TOEFL)**. A minimum score of 90, with at least 20 in each of Reading and Listening, and no less than 25 in Speaking and Writing, is required on the TOEFL;
   b. **International English Language Testing System (IELTS)**. A minimum overall band score of 6.5, with at least band 6.5 in each of Writing and Speaking, and 6.0 in Reading and Listening is required on the IELTS;
   c. **Canadian Academic English Language Assessment (CAEL)**. A minimum overall score of 70, with at least 60 per band, and no less than 70 in Writing and Speaking is required on the CAEL; and
2. Successfully complete an e-proctored English test or an interview.

5.5 Other Information

1. The Faculty will notify each applicant of their admission decision by e-mail through the applicant's University-approved e-mail account.
2. Admission decisions may be deferred until grades are available for courses currently being completed.
3. A student admitted to the program in any term, without receiving credit for all courses required up to that level, must complete those courses successfully prior to graduation.
4. A student who has been admitted to one major offered by the Faculty and who wishes to change to another major within the Faculty must submit a new application for admission to the program. This application must be submitted to the Office of the Registrar by the appropriate deadline date as outlined above in **Application Forms and Deadlines** and will be considered in competition with all other applications.
5. A student who declines an offer of admission or who fails to register for the appropriate courses during the term of admission will be considered withdrawn from the program. Such a student, if subsequently wishing to be considered for admission, must submit a new application for admission to the program. This application must be submitted to the Office of the Registrar by the appropriate deadline date in **Application Forms and Deadlines** above and will be considered in competition with other applications.

6 Program Regulations

6.1 Civil Engineering Program Regulations

6.1.1 Civil Engineering Major

- The full-time 141 credit hour Bachelor of Engineering (Co-operative), Civil Engineering Major, requires eight academic terms and four work terms.
- The 141 credit hours shall normally be taken in the academic terms and order as set out in **Table 1 Civil Engineering Major**.
- Work terms shall normally be taken in the order as set out in **Table 1 Civil Engineering Major**.

Table 1 Civil Engineering Major

Term	Required Courses	Elective Courses
Engineering One	Chemistry 1050 or 1200 ENGI 1010, 1020, 1030, 1040 3 credit hours in English at the 1000 level Mathematics 1000, 1001, 2050 Physics 1050, 1051	Students who are expecting to successfully complete the Engineering One requirements by the end of the Winter semester may apply to undertake a work term during the Spring semester. In this case, the prerequisite course ENGI 200W is expected to be successfully completed during the Fall semester. All other students are expected to successfully complete ENGI 200W in the Winter semester of Engineering One.
In addition to meeting the requirements outlined below, a student must successfully complete four Complementary Studies courses as described under **Description of Program, Complementary Studies**.		
Fall **Academic Term 3**	CIV 3210, 3440, 3710, 3720 ENGI 3101 Mechanical and Mechatronics Engineering 3301	
Winter	ENGI 001W or 002W	
Spring **Academic Term 4**	CIV 4220, 4310, 4450, 4610 ENGI 4421	
Fall	ENGI 001W or 002W or 003W	
Winter **Academic Term 5**	CIV 5110, 5230, 5320, 5460, 5510	
Spring	ENGI 002W or 003W or 004W	
Fall **Academic Term 6**	CIV 6120, 6330, 6470, 6520, 6810	
Winter	ENGI 003W or 004W or 005W (optional)	
Spring **Academic Term 7**	CIV 7130, 7530, 7730	6 credit hours from: CIV 7140, 7240, 7340, 7540, 7620, 7820 or other courses as specified by the Head of the Department of Civil Engineering
Fall	ENGI 004W or 005W (optional) or 006W (optional)	
Winter **Academic Term 8**	CIV 8000, 8830 ENGI 8152	9 credit hours from: CIV 8150, 8550, 8560, 8570, 8630 or other courses as specified by the Head of the Department of Civil Engineering

6.2 Computer Engineering Program Regulations

6.2.1 Computer Engineering Major

- The full-time 141 credit hour Bachelor of Engineering (Co-operative), Computer Engineering Major, requires eight academic terms and four work terms.
- The 141 credit hours shall normally be taken in the academic terms and order as set out in **Table 2 Computer Engineering Major**.
- Work terms shall normally be taken in the order as set out in **Table 2 Computer Engineering Major**.
- The requirements for a minor in Physics in the Computer Engineering program are detailed under **Faculty of Science, Minor in Physics**. Students wishing to undertake a minor in Physics must obtain approval from the Head of the Department of Electrical and Computer Engineering for their course selection.

Table 2 Computer Engineering Major

Term	Required Courses	Elective Courses
Engineering One	Chemistry 1050 or 1200 ENGI 1010, 1020, 1030, 1040 3 credit hours in English at the 1000 level Mathematics 1000, 1001, 2050 Physics 1050, 1051	Students who are expecting to successfully complete the Engineering One requirements by the end of the Winter semester may apply to undertake a work term during the Spring semester. In this case, the prerequisite course ENGI 200W is expected to be successfully completed during the Fall semester. All other students are expected to successfully complete ENGI 200W in the Winter semester of Engineering One.
In addition to meeting the requirements outlined below, a student must successfully complete four Complementary Studies courses as described under **Description of Program, Complementary Studies**.		
Fall **Academic Term 3**	ECE 3300, 3400, 3500 ENGI 3101, 3424 Physics 3000	
Winter	ENGI 001W or 002W	
Spring **Academic Term 4**	ECE 4110, 4300, 4400, 4500, 4600	
Fall	ENGI 001W or 002W or 003W	
Winter **Academic Term 5**	ECE 5010, 5100, 5200, 5400, 5500	
Spring	ENGI 002W or 003W or 004W	
Fall **Academic Term 6**	ECE 6400, 6500, 6600, 6610	**Students in the Biomedical Stream:** Human Kinetics and Recreation 2311 **All other students:** 3 credit hours from: ECE 6200 or other courses as specified by the Head of the Department of Electrical and Computer Engineering
Winter	ENGI 003W or 004W or 005W (optional)	
Spring **Academic Term 7**	ECE 7010, 7400, 7600	**Students in the Biomedical Stream:** Medicine 6250 3 credit hours from: ECE 7200, 7410, 7420, Mechanical and Mechatronics Engineering 7204, other courses as specified by the Head of the Department of Electrical and Computer Engineering **All other students:** 6 credit hours from: ECE 7200, 7410, 7420, 7500, Mechanical and Mechatronics Engineering 7204, other courses as specified by the Head of the Department of Electrical and Computer Engineering
Fall	ENGI 004W or 005W (optional) or 006W (optional)	
Winter **Academic Term 8**	ECE 8010, 8400 ENGI 8152	**Students in the Biomedical Stream:** Human Kinetics and Recreation 4703 6 credit hours from: ECE 8410, 8420, 8600, other courses as specified by the Head of the Department of Electrical and Computer Engineering **All other students:** One free elective which must be a 2000-level or higher course from any academic unit. Selection of a course must be approved by the Head of the Department of Electrical and Computer Engineering. 6 credit hours from: ECE 8210, 8410, 8420, 8600, 8620, 8900-8949, or other courses as specified by the Head of the Department of Electrical and Computer Engineering

6.2.2 Minor in Computer Engineering

A student in an Engineering degree program at the University, except Computer Engineering, may apply to the Department of Electrical and Computer Engineering for admission to the Minor in Computer Engineering (Software). The Minor is focused on Computer Engineering aspects such as programming, software design, and related applications. Before applying for the Minor, a student must complete the necessary prerequisites to register for ECE 3400 and ECE 4110 (or Mathematics 2320).

The Minor in Computer Engineering (Software) will consist of 24 credit hours, as follows:

1. ECE 3400, ECE 4110 (or Mathematics 2320), ECE 4400, ECE 5010, ECE 5400, ECE 6400, and
2. 6 credit hours chosen from: ECE 7400, ECE 7410, ECE 7420, ECE 8410, ECE 8420, or other courses subject to approval by the Head of the Department of Electrical and Computer Engineering.

6.3 Electrical Engineering Program Regulations

6.3.1 Electrical Engineering

- The full-time 141 credit hour Bachelor of Engineering (Co-operative), Electrical Engineering Major, requires eight academic terms and four work terms.
- The 141 credit hours shall normally be taken in the academic terms and order as set out in **Table 3 Electrical Engineering Major**.
- Work terms shall be taken in the order as set out in **Table 3 Electrical Engineering Major**.
- The requirements for a minor in Physics in the Electrical Engineering program are detailed under **Faculty of Science, Minor In Physics**. Students wishing to undertake a minor in Physics must obtain approval from the Head of the Department of Electrical and Computer Engineering for their course selection.

Table 3 Electrical Engineering Major

Term	Required Course	Elective Courses
Engineering One	Chemistry 1050 or 1200 ENGI 1010, 1020, 1030, 1040 3 credit hours in English at the 1000 level Mathematics 1000, 1001, 2050 Physics 1050, 1051	Students who are expecting to successfully complete the Engineering One requirements by the end of the Winter semester may apply to undertake a work term during the Spring semester. In this case, the prerequisite course ENGI 200W is expected to be successfully completed during the Fall semester. All other students are expected to successfully complete ENGI 200W in the Winter semester of Engineering One.
In addition to meeting the requirements outlined below, a student must successfully complete four Complementary Studies courses as described under **Description of Program, Complementary Studies**.		
Fall **Academic Term 3**	ECE 3300, 3400, 3500 ENGI 3101, 3424 Physics 3000	
Winter	ENGI 001W or 002W	
Spring **Academic Term 4**	ECE 4300, 4500, 4600, 4800 ENGI 4430	
Fall	ENGI 001W or 002W or 003W	
Winter **Academic Term 5**	ECE 5000, 5100, 5200, 5300, 5700	
Spring	ENGI 002W or 003W or 004W	
Fall **Academic Term 6**	ECE 6200, 6600, 6700, 6800	**Students in the Biomedical Stream:** Human Kinetics and Recreation 2311 **All other students:** 3 credit hours from: ECE 6610, 6810, or other courses as specified by the Head of the Department of Electrical and Computer Engineering
Winter	ENGI 003W or 004W or 005W (optional)	
Spring **Academic Term 7**	ECE 7000, 7600	**Students in the Biomedical Stream:** Medicine 6250 3 credit hours from: ECE 7200, 7410, Mechanical and Mechatronics Engineering 7204, other courses as specified by the Head of the Department of Electrical and Computer Engineering 3 credit hours from: ECE 7200, 7210, 7410, 7800, 7810, Mechanical and Mechatronics Engineering 7204, other courses as specified by the Head of the Department of Electrical and Computer Engineering **All other students:** 9 credit hours from: ECE 7200, 7210, 7410, 7620, 7800, 7810, Mechanical and Mechatronics Engineering 7204, other courses as specified by the Head of the Department of Electrical and Computer Engineering
Fall	ENGI 004W or 005W (optional) or 006W (optional)	
Winter **Academic Term 8**	ECE 8000, 8610 ENGI 8152	**Students in the Biomedical Stream:** Human Kinetics and Recreation 4703 6 credit hours from: ECE 8410, 8600, other courses as specified by the Head of the Department of Electrical and Computer Engineering **All other students:** One free elective which must be a 2000-level or higher course from any academic unit. Selection of a course must be approved by the Head of the Department of Electrical and Computer Engineering. 6 credit hours from: ECE 5500, 8210, 8600, 8620, 8700, 8800, 8950-8999 or other courses as specified by the Head of the Department of Electrical and Computer Engineering

6.3.2 Minor in Applied Science - Electrical Engineering for Physics Majors and Honours

For Physics Majors and Honours students, a Minor in Applied Science - Electrical Engineering will consist of:

1. ECE 3300 (or the former ENGI 3821 or Physics 3550)
2. ECE 4300 (or the former ENGI 4854)
3. Physics 3000 and
4. 15 credit hours chosen from
   a. ECE 3500 (or the former ENGI 3861)
   b. ECE 4500 (or the former ENGI 4862)
   c. ECE 4600 (or the former ENGI 4823)
   d. ECE 4800 (or the former ENGI 4841)
   e. ECE 5000 (or the former ENGI 5800)
   f. ECE 6700 (or the former ENGI 6813 or Physics 4500)
   g. or other courses subject to approval by the Head of the Department of Physics and Physical Oceanography and the Head of the Department of Electrical and Computer Engineering.

Completion of the Minor in Applied Science - Electrical Engineering does not qualify persons to hold the designation "Professional Engineer" as defined by various provincial acts governing the Engineering Profession.

6.4 Mechanical Engineering Program Regulations

6.4.1 Mechanical Engineering Major

- The full-time 141 credit hour Bachelor of Engineering (Co-operative), Mechanical Engineering Major, requires eight academic terms and four work terms.
- The 141 credit hours shall normally be taken in the academic terms and order as set out in **Table 4 Mechanical Engineering Major**.
- Work terms shall normally be taken in the order as set out in **Table 4 Mechanical Engineering Major**.

Table 4 Mechanical Engineering Major

Term	Required Courses	Elective Courses
Engineering One	Chemistry 1050 or 1200 ENGI 1010, 1020, 1030, 1040 3 credit hours in English at the 1000 level Mathematics 1000, 1001, 2050 Physics 1050, 1051	Students who are expecting to successfully complete the Engineering One requirements by the end of the Winter semester may apply to undertake a work term during the Spring semester. In this case, the prerequisite course ENGI 200W is expected to be successfully completed during the Fall semester. All other students are expected to successfully complete ENGI 200W in the Winter semester of Engineering One.
In addition to meeting the requirements outlined below, a student must successfully complete four Complementary Studies courses as described under **Description of Program, Complementary Studies**.		
Fall **Academic Term 3**	ENGI 3101, 3424 ME 3101, 3102, 3301, 3401	
Winter	ENGI 001W or 002W	
Spring **Academic Term 4**	ENGI 4430 ME 4302, 4402, 4501, 4601	
Fall	ENGI 001W or 002W or 003W	
Winter **Academic Term 5**	ENGI 4421 ME 5103, 5201, 5502, 5602	
Spring	ENGI 002W or 003W or 004W	
Fall **Academic Term 6**	ME 6202, 6303, 6403, 6701, 6702	Students in the Biomedical Technical Stream must also take Human Kinetics and Recreation 2311 in Academic Term 6. Students in the Petroleum Technical Stream must also take Process Engineering 6202 in Academic Term 6
Winter	ENGI 003W or 004W or 005W (optional)	
Spring **Academic Term 7**	ME 7203, 7704	6 credit hours from **Technical Stream Required Courses**, Academic Term 7 For students in the Biomedical Technical Stream, one Technical Stream Required Course is replaced by Human Kinetics and Recreation 2311, taken in Academic Term 6. For students in the Petroleum Technical Stream, one Technical Stream Required Course is replaced by Process Engineering 6202, taken in Academic Term 6. 3 credit hours from **Technical Stream Elective Courses**. One free elective which must be a 2000-level or higher course from any academic unit. Selection of a course must be approved by the Head of the Department of Mechanical and Mechatronics Engineering and must be completed before Academic Term 8.
Fall	ENGI 004W or 005W (optional) or 006W (optional)	
Winter **Academic Term 8**	ENGI 8152 ME 8705	3 credit hours from **Technical Stream Required Courses**, Academic Term 8 6 credit hours from **Technical Stream Elective Courses**

6.4.1.1 Technical Streams

- A student must select one of the Technical Streams in the areas of Biomedical, Mechanics and Materials, Mechatronics, Petroleum, and Thermo-Fluids.
- Technical Stream required courses must be chosen according to the student's stream as outlined below in the **Technical Stream Required Courses Table**.
- Technical Stream elective courses must be chosen according to the student's stream as outlined below in the **Technical Stream Elective Courses Table**.

  A student must choose one course in Academic Term 7 and two courses in Academic Term 8 according to the student's stream from the **Technical Stream Elective Courses Table** or other courses as approved by the Head of the Department of Mechanical and Mechatronics Engineering.
- The selection of a course as a technical stream course from outside these lists requires the approval of the Head of the Department of Mechanical and Mechatronics Engineering.

Technical Stream Required Courses Table

Stream	Academic Term 6	Academic Term 7	Academic Term 8
Biomedical	Human Kinetics and Recreation 2311	Medicine 6250	Human Kinetics and Recreation 4703
Mechanics and Materials		ME 7104 ME 7703	ME 8604
Mechatronics		ME 7205 ME 7703	ME 8305
Petroleum	Process Engineering 6202	Process Engineering 7291	Process Engineering 8291
Thermo-Fluids		ME 7404 ME 7405	ME 8406

Technical Stream Elective Courses Table

Stream	Elective Courses
Biomedical	Electrical and Computer Engineering 7410 Electrical and Computer Engineering 8410 ME 7204 ME 7205 ME 7603 ME 8504

Spring	ENGI 002W or 003W or 004W	
Fall **Academic Term 6**	Electrical and Computer Engineering 6810 ME 6202, 6303, 6701, 6702	
Winter	ENGI 003W or 004W or 005W (optional)	
Spring **Academic Term 7**	ME 4501, 7205, 7705	6 credit hours from ME 7204, 7210, 7220, 7230, 7603, 7703, Electrical and Computer Engineering 7200, 7410, Computer Science 4766, or other courses as specified by the Head of the Department of Mechanical and Mechatronics Engineering.
Fall	ENGI 004W or 005W (optional) or 006W (optional)	
Winter **Academic Term 8**	ENGI 8152 ME 8706	9 credit hours from ME 8304, 8305, Electrical and Computer Engineering 5500, 8210, 8410, 8610, 8630, Ocean and Naval Architectural Engineering 8055, Computer Science 6915, or other courses as specified by the Head of the Department of Mechanical and Mechatronics Engineering.

6.6 Ocean and Naval Architectural Engineering Program Regulations

6.6.1 Ocean and Naval Architectural Engineering Major

- The full-time 141 credit hour Bachelor of Engineering (Co-operative), Ocean and Naval Architectural Engineering Major, requires eight academic terms and four work terms.
- The 141 credit hours shall normally be taken in the academic terms and order as set out in **Table 6 Ocean and Naval Architectural Engineering Major**.
- Work terms shall normally be taken in the order as set out in **Table 6 Ocean and Naval Architectural Engineering Major**.
- Ocean and Naval Architectural Engineering students may complete a minor in Mathematics as outlined under **Faculty of Science, Mathematics, Minor in Mathematics**.

Table 6 Ocean and Naval Architectural Engineering Major

Term	Required Courses	Elective Courses
Engineering One	Chemistry 1050 or 1200 ENGI 1010, 1020, 1030, 1040 3 credit hours in English at the 1000 level Mathematics 1000, 1001, 2050 Physics 1050, 1051	Students who are expecting to successfully complete the Engineering One requirements by the end of the Winter semester may apply to undertake a work term during the Spring semester. In this case, the prerequisite course ENGI 200W is expected to be successfully completed during the Fall semester. All other students are expected to successfully complete ENGI 200W in the Winter semester of Engineering One.
In addition to meeting the requirements outlined below, a student must successfully complete four Complementary Studies courses as described under **Description of Program, Complementary Studies**.		
Fall **Academic Term 3**	ENGI 3101 Mathematics 2000 Mechanical and Mechatronics Engineering 3301, 3401 ONAE 3001, 3054

Spring **Academic Term 7**	ONAE 7000, 7002, 7033, 7036	3 credit hours from ONAE 7003, 7046, Process Engineering 7171 or other courses as specified by the Head of the Department of Ocean and Naval Architectural Engineering
Fall	ENGI 004W or 005W (optional) or 006W (optional)	
Winter **Academic Term 8**	ENGI 8152 ONAE 8000	One free elective which must be a 2000-level or higher course from any academic unit. Selection of a course must be approved by the Head of the Department of Ocean and Naval Architectural Engineering. 9 credit hours from ENGI 8150, ONAE 8034, 8046, 8054, 8055, 8074, 8075, or other courses as specified by the Head of the Department of Ocean and Naval Architectural Engineering

6.7 Process Engineering Program Regulations

6.7.1 Process Engineering Major

- The full-time 141 credit hour Bachelor of Engineering (Co-operative), Process Engineering Major, requires eight academic terms and four work terms.
- The 141 credit hours shall normally be taken in the academic terms and order as set out in **Table 7 Process Engineering Major**.
- Beginning in Academic Term 6, a student will follow the **Chemical and Bioprocess** Stream or the **Mineral and Energy Resources** Stream with elective course options as outlined in **Table 7 Process Engineering Major**.
- Work terms shall normally be taken in the order as set out in **Table 7 Process Engineering Major**.
- Process Engineering students may complete a minor in Chemistry as outlined under **Faculty of Science, Chemistry, Minor in Chemistry**.

Table 7 Process Engineering Major

Term	Required Courses	Elective Courses
Engineering One	Chemistry 1050 or 1200 ENGI 1010, 1020, 1030, 1040 3 credit hours in English at the 1000 level Mathematics 1000, 1001, 2050 Physics 1050, 1051	Students who are expecting to successfully complete the Engineering One requirements by the end of the Winter semester may apply to undertake a work term during the Spring semester. In this case, the prerequisite course ENGI 200W is expected to be successfully completed during the Fall semester. All other students are expected to successfully complete ENGI 200W in the Winter semester of Engineering One.
In addition to meeting the requirements outlined below, a student must successfully complete four Complementary Studies courses as described under **Description of Program, Complementary Studies**.		
Fall **Academic Term 3**	Chemistry 1051, 2400 ENGI 3101, 3424 Mechanical and Mechatronics Engineering 3401 PROC 3000	
Winter	ENGI 001W or 002W	
Spring **Academic Term 4**	ENGI 4430 PROC 4002, 4021, 4025, 4061	
Fall	ENGI 001W OR 002W OR 003W	
Winter **Academic Term 5**	ENGI 4421 PROC 5001, 5002, 5071, 5092	
Spring	ENGI 002W or 003W or 004W	
Fall **Academic Term 6**	PROC 6025, 6031, 6061, 6071	3 credit hours from Technical Streams courses, Academic Term 6
Winter	ENGI 003W or 004W or 005W (optional)	
Spring **Academic Term 7**	PROC 7021, 7040, 7077	6 credit hours from Technical Streams courses, Academic Term 7
Fall	ENGI 004W or 005W (optional) or 006W (optional)	
Winter **Academic Term 8**	ENGI 8152 PROC 8040	One free elective which must be a 2000-level or higher course from any academic unit. Selection of a course must be approved by the Head of the Department of Process Engineering. 9 credit hours from Technical Streams courses, Academic Term 8

6.7.1.1 Technical Streams

- Technical Streams are available in the areas of **Chemical and Bioprocess**, and **Mineral and Energy Resources**.
- A student may experience scheduling difficulties if courses are selected from more than one Technical Stream.
- The selection of a course as a technical stream course from outside these lists requires the approval of the Head of the Department of Process Engineering.

Chemical and Bioprocess Technical Stream

Term	Required Courses	Elective Courses
Academic Term 6	PROC 6151	
Academic Term 7 Between Term 7 and Term 8 a student must choose four courses from the **Elective Courses**.		PROC 7125, 7131, 7141, 7171
Academic Term 8 Between Term 7 and Term 8 a student must choose four courses from the **Elective Courses**.	PROC 8125	Electrical and Computer Engineering 8210 PROC 8141, 8151, 8170

Mineral and Energy Resources Technical Stream

Term	Required Courses	Elective Courses
Academic Term 6	PROC 6202	
Academic Term 7	PROC 7291, 7293	
Academic Term 8 A student must choose three courses from the **Elective Courses**.		PROC 8125, 8276, 8291, 8292, 8293

6.7.2 Minor in Applied Science - Process Engineering for Chemistry Majors and Honours

For Chemistry Majors or Honours students, a Minor in Applied Science - Process Engineering will consist of

1. Chemistry 1051;
2. PROC 3000 (or the former ENGI 3600)
3. PROC 4021 (or the former ENGI 4621)
4. PROC 4002 (or the former ENGI 4602 or Chemistry 2301)
5. PROC 4025 (or the former ENGI 4625)
6. PROC 4061 (or Mechanical and Mechatronics Engineering 4501 or the former ENGI 4661 or the former ENGI 4961) and
7. 6 credit hours chosen from:
   a. PROC 5001 (or the former ENGI 5601)
   b. PROC 6025 (or the former ENGI 6621 or the former PROC 6021)
   c. PROC 6031 (or the former ENGI 6631)
   d. PROC 6151 (or the former ENGI 6651)
   e. PROC 7021 (or the former ENGI 7621)
   f. PROC 7171 (or the former ENGI 8671).

Completion of the Minor in Applied Science - Process Engineering does not qualify persons to hold the designation "Professional Engineer" as defined by various provincial acts governing the Engineering Profession.

6.8 Advanced Standing

Students are occasionally admitted to later terms in Engineering from other institutions. Such entry is normally based on a detailed analysis of the student's record and is handled on a case-by-case basis. Such students should contact the Office of the Associate Dean (Undergraduate Studies).

7 Promotion Regulations

7.1 Promotion Status (Engineering One)

Promotion from Engineering One to Academic Term 3 depends on available capacity in the seven Engineering majors; promotion from Engineering One does not guarantee admission to a student's preferred major. Capacity limits for Engineering majors are set by the Faculty.

1. Promotion from Engineering One is based on the following nine courses, which are common to all Engineering majors: Chemistry 1050 (or Chemistry 1200), ENGI 1010, ENGI 1020, ENGI 1030, ENGI 1040, 3 credit hours in English at the 1000 level, Mathematics 1001, Mathematics 2050, and Physics 1051. Students are responsible for identifying and completing any needed prerequisites.
2. The minimum requirements for promotion from Engineering One to Academic Term 3 are:
   a. promotion average of at least 65% in the nine Engineering One courses as listed above;
   b. a grade of at least 55% or transfer credit in each of the nine Engineering One courses listed above; and
   c. submission of a Major Preference Form, indicating preferences for Engineering majors in rank order, no later than the last day of classes in the Spring term.
3. Meeting the minimum Engineering One promotion requirements does not guarantee promotion to Academic Term 3.
4. A student promoted to Academic Term 3 with an Engineering One promotion average of 75% or greater is guaranteed their preferred major.
5. A student who meets the promotion requirements with a promotion average of less than 75% will be promoted as Faculty capacity permits.
6. If a student fails an Engineering One course more than once, that student will be withdrawn from the Engineering program.
7. Students must complete the requirements for Engineering One within two academic years. A student who is not promoted at the end of the academic year following the academic year of admission will be withdrawn from the Engineering program.
8. The Faculty reserves the right to guarantee admission into a particular major, subject to meeting minimum promotion requirements, at the time of admission into the Engineering program.

7.2 Promotion Status (Beyond Engineering One)

A student's eligibility for promotion from semesters beyond Engineering One will be determined at the end of each term. In order to be considered for promotion a student must complete all courses required in that Academic term. Promotion from each academic term will be based upon the student's Promotion Average for the semester. The Promotion Average, which will appear on the transcript, is calculated to be the overall average of required courses completed in the academic term excluding complementary studies and free elective courses. Promotion from work terms will be determined based upon the grade awarded in that work term.

A student's promotion status will be determined beyond Engineering One and at the end of each academic term in one of the following three categories:

7.2.1 Clear Promotion

Clear Promotion means that a student can proceed to the next term without restrictions.

1. A student completing or repeating an academic term will receive a Clear Promotion by obtaining a promotion average of at least 60% and a numeric grade of at least 50% in each of the courses included in the calculation of the promotion average in that academic term.
2. A student completing a work term will receive a Clear Promotion by obtaining an overall grade of PAS or PWD in that work term.

7.2.2 Probationary Promotion

A student who is not eligible for **Clear Promotion** from an academic term but who achieves a promotion average of at least 60% in that term will be granted Probationary Promotion.

1. A student's Probationary Promotion status will be reflected on the University Transcript under the Promotion Average for the semester.
2. A student with Probationary Promotion from an academic term may continue to the subsequent work term under the condition that entry into the next academic term is not allowed until the student's status is changed to **Clear Promotion**.
3. A student with Probationary Promotion at the end of the final academic term will not be recommended for graduation until the student's status is changed to **Clear Promotion**.
4. To change Probationary Promotion to **Clear Promotion** for an academic term the student must satisfy the Faculty of competence in the subject of the Engineering program course(s) (courses with any of the prefixes CIV, ECE, ENGI, ME, ONAE, PROC) in which the student has failed to achieve 50%.This will normally entail re-examination(s) prescribed by the Faculty as a condition of probation, after which the student will be declared to have passed or failed a test of competence in the subject(s) concerned. No numerical grade will be assigned in a re-examination. Upon passing a re-examination, the original grade submitted for the course will be changed to PAS, but the promotion average will not change and a note of the original grade will remain on the transcript.
5. Re-examination will be at a time determined by the Faculty, normally in the first week of the subsequent academic term. A re-examination is cumulative in nature, covers the entire course and, as such, may be different in scope from the original final examination for that course.
6. In order to qualify for a re-examination in a failed Engineering program course, a student must obtain a grade of at least 40% in that course and must have completed any laboratory and/or project work in that course. Re-examinations are not normally available for senior project courses or for other courses in which the final examination is worth less than 40% of the grade.
7. A student who has failed the communications component of a work term and who, in the opinion of the Office of Co-operative Education, can benefit from a remedial program, may be permitted an extension of time, not to exceed the end of the registration period of the subsequent academic term, to complete the requirements of the work term.
8. A student will be permitted to write a maximum of four re-examinations for the duration of the student's program.
9. To change Probationary Promotion to **Clear Promotion** for an academic term the student must repeat successfully any non-Engineering program course(s) which count towards the promotion average and in which the student has failed to achieve 50%.
10. A student may apply for a deferred re-examination on a similar basis to the deferral of a final examination.

11. A student with Probationary Promotion who does not complete a prescribed re-examination will be deemed to have failed that re-examination. Upon failing a prescribed re-examination the original course grade will be retained and a comment confirming failure of the re-examination will be added to the transcript.
12. A student with Probationary Promotion who fails in the re-examination(s) or who does not qualify for the re-examination(s) must repeat the corresponding failed course(s) successfully in order to change the Probationary Promotion to **Clear Promotion**.
13. A student with Probationary Promotion from any of Academic Terms 3 to 7 who does not meet the requirements for Clear Promotion by the end of the registration period for the subsequent academic term must withdraw from the program. Permission to register for Engineering program courses to be repeated may be subject to the approval of the Head of the appropriate Department. Such students may apply for readmission to the Bachelor of Engineering program when they have satisfied the requirements for **Clear Promotion**.

7.2.3 Promotion Denied

Promotion Denied status is awarded when a student does not meet the requirements for **Clear Promotion** or **Probationary Promotion**.

The student's Promotion Denied status will be reflected on the University Transcript under the Promotion Average for the academic term.

1. A student with Promotion Denied status will be required to withdraw from the Faculty.
2. A student with Promotion Denied status may apply for readmission to the program after two semesters. Subject to space being available, a student will be readmitted into the term from which promotion was denied. An academic term may be repeated only once, and not more than two academic terms may be repeated in the entire program.
3. A student who is denied promotion for failing a work term may be considered for readmission. A student readmitted under this clause must successfully complete four work terms prior to graduation.
4. A work term may be repeated only once, and not more than two work terms may be repeated in the entire program.
5. A student who is denied promotion from an academic term will be required to repeat all required courses in which the student obtained a numeric grade of less than 60% in that term. In addition, the Admissions Committee may design a remedial program to address the student's specific area(s) of weakness. A technical elective course in which the student obtained a numeric grade of less than 60% may be replaced by a course acceptable in the student's program.
6. A student who is denied promotion from an academic term may not continue to the subsequent work term unless both the employer and the Office of Co-operative Education grant permission.
7. A student with Promotion Denied status at the end of the final academic term will not be recommended for graduation until the student's status is changed to **Clear Promotion**.

7.3 Other Information

1. The appropriate Department will make a recommendation to Faculty Council on each student's promotion status at the end of each of Academic Terms 3 to 8.
2. To be recommended for graduation, a student must have **Clear Promotion** from Academic Term 8, must have successfully completed the four mandatory work terms and any elective work terms undertaken and must have an average of at least 60% in the 21 credit hours in complementary studies as described in **Description of Program, Complementary Studies**.
3. The Office of Co-operative Education will make a recommendation to Faculty Council on each student's promotion status at the end of each work term.
4. A student must have completed at least one work term successfully, in order to be promoted to Academic Term 5.
5. A student must have completed at least two work terms successfully, in order to be promoted to Academic Term 6.
6. A student must have completed at least three work terms successfully, in order to be promoted to Academic Term 7.
7. A student must have completed four work terms successfully, in order to be promoted to Academic Term 8.
8. A student denied promotion shall be permitted only one readmission to the same term and a total of no more than two readmissions to the Faculty.
9. A student is permitted one failure only in each of the courses required in Engineering One.
10. No course required in any of Academic Terms 3 to 8 of the program may be attempted more than twice.
11. A student may be required to withdraw from their program at any time, if, in the opinion of the Faculty, the student is unlikely to benefit from continued attendance.

8 Graduation

Upon meeting the qualifications for the program, students must apply to graduate on the prescribed "Application for Graduation" form. This form may be obtained on-line at the Memorial Self Service at selfservice.mun.ca. The deadlines for application submission are July 15 for Fall (October) graduation, January 3 for Winter (February) in-absentia graduation, and January 15 for Spring (May) graduation. Applications received after these dates will be processed as time and resources permit. Additional information is available from the Office of the Registrar at www.mun.ca/regoff/graduation. Information regarding Convocation, including the dates of the ceremony, is available at www.mun.ca/convocation.

9 Waiver of Faculty Regulations

Every student has the right to request a waiver of Faculty regulations. Students seeking a waiver of University academic regulations should refer to the ***UNIVERSITY REGULATIONS*** **- General Academic Regulations Undergraduate, Waiver of Regulations**.

1. The Faculty Council reserves the right in special circumstances to modify, alter, or waive any Faculty regulation in its application to individual students, where merit and equity so warrant in the judgment of the appropriate Committee of the Faculty Council.
2. All requests must be submitted to the Office of the Associate Dean (Undergraduate Studies) for submission to the appropriate Committee of the Faculty. Students must submit their request in writing. Medical and/or other documentation to substantiate the request must be provided. Medical documentation should normally be in the form of the Student Health Certificate, available at www.mun.ca/regoff/forms.php.
3. Requests for waivers of admission requirements will be submitted to the Admissions Committee who will make a recommendation for action to the Committee on Undergraduate Studies of the Faculty.
4. Requests for a waiver of a course(s) required in academic terms 3 to 8 should be made prior to the commencement of the academic

term and will be considered by the Committee on Undergraduate Studies, upon recommendation of the Head of the appropriate Department.

5. Requests for a waiver of a work term will be considered by the Committee on Undergraduate Studies upon recommendation of the Office of Co-operative Education. Any waiver granted does not reduce the total number of work terms required for the degree below an absolute minimum of three.

10 Appeal of Regulations

10.1 General Information

In accordance with ***UNIVERSITY REGULATIONS*** **- General Academic Regulations (Undergraduate), Appeal of Decisions**, the Appeals Committee of the Faculty of Engineering and Applied Science considers appeals of promotion, admission and readmission decisions related to undergraduate programs offered by the Faculty of Engineering and Applied Science. A student wishing to appeal related decisions should review the **General Academic Regulations (Undergraduate), Appeal of Decisions** carefully. Individual course grades may not be appealed as a student will normally have had the opportunity of contesting grades immediately after notification as outlined under ***UNIVERSITY REGULATIONS*** **- General Academic Regulations (Undergraduate), Appeal of Decisions, Route for Questioning Grades**.

All appeals must be directed to the Secretary of the Appeals Committee, c/o the Undergraduate Studies Office of the Faculty of Engineering and Applied Science. All letters of appeal must state clearly and fully the grounds for the appeal and the resolution being sought.

10.2 Appeals of Admission Decisions

An appeal of a decision concerning admission or readmission must be made in writing within fourteen days of the date of notification of the decision to the Secretary of the Appeals Committee, c/o the Undergraduate Studies Office of the Faculty of Engineering and Applied Science.

10.3 Appeals of Promotion Decisions

1. Appeals of promotion decisions must be submitted to the Secretary of the Appeals Committee, c/o the Undergraduate Studies Office of the Faculty of Engineering and Applied Science within one month of the notification by the Faculty of the promotion decision. Appeal submissions shall contain the following:
   - Student name,
   - Current address and telephone number,
   - Memorial University of Newfoundland e-mail address,
   - Student ID number,
   - A copy of the decision giving rise to the appeal,
   - A description of the matter under appeal,
   - The grounds of appeal,
   - Supporting documentation; and
   - The resolution being sought.
2. When a student has requested a re-read of an examination paper which may affect an appeal, that appeal must nevertheless be submitted within one month of the issue of the original decision and consideration of the appeal will be delayed until the result of the re-read is available.
3. A student may request additional time to gather supporting documentation. Such a request will not be unreasonably denied.
4. For assistance in the appeals process, a student is advised to consult with the Associate Dean (Undergraduate Studies) whose advice shall include the provision of a list of others within the Faculty and elsewhere in the University who can advise the student during the appeals process.
5. A student is encouraged to review ***UNIVERSITY REGULATIONS*** **- General Academic Regulations (Undergraduate) - Appeal of Decisions, Information Required in Letters of Appeal**.
6. The terms of reference for the Appeals Committee of the Faculty of Engineering and Applied Science, including procedures followed by the Committee, are posted on the Faculty website at www.mun.ca/engineering.

10.4 Other Appeals

Any student whose request for waiver of Faculty regulations has been denied has the right to appeal. For further information refer to the ***UNIVERSITY REGULATIONS*** **- General Academic Regulations (Undergraduate) - Appeal of Decisions**.

11 Course Descriptions

11.1 Civil Engineering

Civil Engineering courses are identified by a four-digit numbering system, the first two digits signifying the following:

The first digit denotes the academic term during which the course is normally offered.

The second digit denotes the primary areas of study, namely:
0: Capstone courses
1: Hydrotechnical & Water Resources
2: Geotechnical courses
3: Mechanics & Structural Analysis
4: Mathematics and Science
5: Design and Civil cross-disciplinary courses
6: Environmental courses
7: Highways and Construction Materials
8: Construction
9: Special Topics

Civil Engineering courses are designated by CIV.

AR = Attendance requirement; CH = Credit hours are 3 unless otherwise noted; CO = Co-requisite(s); CR = Credit can be retained for only one course from the set(s) consisting of the course being described and the course(s) listed; LC = Lecture hours per week are 3 unless otherwise noted; LH = Laboratory hours per week; OR = Other requirements of the course such as tutorials, practical sessions, or seminars; PR = Prerequisite(s); UL = Usage limitation(s).

Non-departmental Engineering courses are designated by ENGI.

3210 Earth Sciences for Civil Engineering (same as the former ENGI 3610) is an introduction to basic concepts in geology with emphasis on applications in Civil, Geological, Mining and Environmental Engineering through the study of basic concepts and case histories. It includes the study of rocks, minerals, sediments and their physical properties in laboratory exercises.
CR: the former ENGI 3610
LH: 3

3440 Mathematics for Civil Engineering I (same as the former ENGI 3425) includes functions of a single parameter, conic sections, polar coordinates, partial differentiation, multiple integrals, sequences & series, and an introduction to first order ordinary differential equations.
CH: 4
CR: the former ENGI 3425
LC: 4
OR: tutorial 1 hour per week
PR: Mathematics 1001 and 2050

3710 Surveying and Geomatics (same as the former ENGI 3703) includes distance, elevation, and angle measurements; horizontal curves; plane survey calculations; area and volume computations; introduction to photogrammetry; global positioning (GPS) and geographical information systems (GIS). A surveying field school to introduce students to the use of surveying equipment and mapping will be held in the first two weeks of the term.
CR: the former ENGI 3703
LH: nine 3-hour sessions per semester
OR: 18 hours of field school which occurs in the first two weeks of the semester

3720 Materials for Construction (same as the former ENGI 3731) includes structure of metals and nonmetals; deformation of metals; strengthening mechanisms in metals; concrete and cementitious materials; admixtures; iron and steel; brick masonry; concrete masonry; mortar grout and plaster; wood and wood products.
CR: the former ENGI 3731
LH: nine 3-hour sessions per semester

4220 Geotechnical Engineering I (same as the former ENGI 4723) includes an introduction to soil as a three-phase material and examines physical and mechanical properties; particle size distribution; soil plasticity and structure; classification of soils; soil compaction; hydraulic properties; permeability; flow of water in soil; flownets; effective stress concept in soils; stresses in soils beneath loaded areas; and one-dimensional consolidation theory.
CR: the former ENGI 4723
LH: 3
OR: twelve 1-hour tutorials per semester
PR: CIV 3210 or the former ENGI 3610

4310 Mechanics of Solids I (same as the former ENGI 4312) examines force analysis of structures and structural components, free body diagrams of structure, components and section of a components, definition of a stress at point, stress notation, complementary property of shear stress, definition of strain, normal strain, shear strain, thermal strain, mechanical properties of materials, analysis of prismatic members due to axial, bending and torsion loading, analysis of beams, shear force and bending moment diagrams, combined loads; and the transformation of stresses and strains.
CR: Mechanical and Mechatronics Engineering 4601, the former ENGI 4312, the former ENGI 4934
LH: four 1-hour sessions per semester
LH: up to ten 1-hour tutorials per semester
PR: ENGI 1010

4450 Mathematics for Civil Engineering II (same as the former ENGI 4425) examines the analytical solutions of ordinary differential equations of the first and higher orders and numerical methods: errors, round off and stability, solution to nonlinear equations, curve fitting and interpolation methods, numerical differentiation and integration.
CH: 4
CR: the former ENGI 4422, the former ENGI 4425
LC: 4
OR: tutorial 1 hour per week
PR: CIV 3440 or the former ENGI 3425

4610 Applied Environmental Science and Engineering (same as the former ENGI 4717) examines the nature and scope of environmental problems; concept of sustainable development; basic concepts of environmental quality parameters and standards; water and wastewater treatment; solid and hazardous wastes; atmospheric, water and noise, pollution, their measurements, and mitigation control.
CR: the former ENGI 4717
LH: six 3-hour sessions per semester
OR: two 3-hour tutorials per semester
PR: Chemistry 1050 or Chemistry 1200, CIV 3210 or the former ENGI 3610

5110 Fluid Mechanics (same as the former ENGI 5713) examines fluid properties; fluid statics; buoyancy and stability; kinematics; pressure measurement; continuity, energy and momentum principles; control volume analysis; energy and hydraulic grade lines; free jets; laminar and turbulent flow; dimensional analysis; drag on immersed bodies; flow measurement; head loss in pipes; and an introduction to flow in pipe systems.
CR: Mechanical and Mechatronics Engineering 4501, the former ENGI 4913, the former ENGI 4961, the former ENGI 5713, the former ENGI 5961
LH: five 2-hour sessions per semester
OR: twelve 1-hour tutorials per semester
PR: CIV 4450 or the former ENGI 4425

5230 Geotechnical Engineering II (same as the former ENGI 5723) examines shear strength of soil; types of laboratory and in-situ soil shear strength tests; lateral earth pressure on retaining structures; slope stability analysis; soil bearing capacity for shallow foundations; introduction to pile foundations and limit state design in geotechnical engineering.
CR: the former ENGI 5723, the former ENGI 6723
LH: 3
OR: twelve 1-hour tutorials per semester
PR: CIV 4220 or the former ENGI 4723

5320 Mechanics of Solids II (same as the former ENGI 5312) includes a review of earlier concepts; strain transformation; failure theories; deflections of beams; energy methods; buckling of columns and the inelastic behaviour of beam cross-sections.
CR: the former ENGI 5312
LH: four 3-hour sessions per semester
OR: twelve 1 hour tutorials per semester
PR: CIV 4310 or the former ENGI 4312

5460 Applied Mathematical Analysis (same as the former ENGI 5434) examines numerical and analytical solutions of applied mathematical problems in Civil Engineering, problems with higher order ordinary differential equations, stiff equations, systems of ODE, Runge-Kutta methods, boundary value problems, applications of eigen value problems (numerical solutions). Fourier analysis, elliptic, parabolic and hyperbolic partial differential equations and their numerical solutions with engineering applications.
CR: the former ENGI 5434
PR: CIV 4450 or the former ENGI 4425

5510 Design of Concrete Structures (same as the former ENGI 5706) begins with a review of mechanical properties of concrete. Topics include design methods and requirements, strength of reinforced concrete sections in bending, balanced condition at ultimate strength with tension reinforcement, bending with both tension and compression reinforcement; serviceability, deflections, flexural crack control for beams and one-way slabs; shear strength, inclined cracking, and shear reinforcement; bond stress and development of reinforcement; members in compression and bending; short columns.
CR: the former ENGI 5706
LH: five 3-hour sessions per semester
OR: twelve 1-hour tutorials per semester
PR: CIV 4310 or the former ENGI 4312

6120 Hydraulics (same as the former ENGI 6713) examines flow in pipe systems and networks; uniform and non-uniform flow in open channels; hydraulic machinery and associated conduits; design and analysis of culverts; and pipeline/pump system optimization.
CR: the former ENGI 6713
LH: four 3-hour sessions per semester
PR: ENGI 4102, CIV 5110 or the former ENGI 5713

6330 Structural Analysis I (same as the former ENGI 6705) examines structure classification and loads, building code provisions, the analysis of statically determinate frames, arches and cables, stability and determinacy of planar structures, shear and moment diagrams for frames, influence lines for statically determinate structures, the force method of analysing indeterminate structures, the slope deflection method, and moment distribution method.
CR: the former ENGI 6705
LH: six 3-hour sessions per semester
OR: twelve 1-hour tutorials per semester
PR: CIV 5320 or the former ENGI 5312

6470 Thermal Sciences (same as the former ENGI 6322) examines fundamental concepts associated with thermodynamics, fluid dynamics and heat transfer; first and second laws of thermodynamics; system and control volume analysis; classification of flows; introduction to boundary layers and drag; convection, conduction and radiation heat transfer; thermal insulation and calculation of R-values; and cooling of electrical components.
CR: the former ENGI 4322, the former ENGI 6322

6520 Design of Concrete and Masonry Structures (same as the former ENGI 6707) examines the design of slender columns, design methods for reinforced concrete two-way slabs, two-way slabs supported on walls and stiff beams, direct design method, design of foundation systems, footing

design, design of concrete retaining walls, engineered masonry, mortar stress, analysis and design of flexural members, axial load and bending in unreinforced and reinforced walls.
CR: the former ENGI 6707
LH: 2
OR: twelve 1-hour tutorials per semester
PR: CIV 5510 or the former ENGI 5706

6810 Construction Planning Equipment and Methods (same as the former ENGI 6749) includes construction equipment selection and utilization; earthmoving including use of explosives; case studies of major civil projects; principles of project planning and control; computer applications to the construction industry.
CR: the former ENGI 6749, the former ENGI 8749
PR: ENGI 4102, completion of Academic Term 5 of the Civil Engineering program

7130 Hydrology and Water Resources (same as the former ENGI 7713) examines basic hydrometeorological processes, evapotranspiration, precipitation, intensity-duration-frequency (IDF) analysis and development, snowmelt, infiltration, runoff and streamflow; statistical treatment of hydrologic data; hydrograph analysis and synthesis; design storms and design floods; reservoir storage and flood routing; urban run-off and drainage; use of hydrologic modelling software.
CR: the former ENGI 7713
LH: four 2-hour sessions per semester
PR: CIV 5110 or the former ENGI 5713

7140 Hydrotechnical Engineering (same as the former ENGI 7716) examines the theory and application of steady gradually-varied flow in artificial and natural open channels together with an introduction to appropriate software; erosion protection and mobile-boundary hydraulics; problems with ice in rivers, the design of spillways, energy dissipaters, and culverts. There is an introduction to water hammer and surge tanks.
CR: the former ENGI 7716
LH: four 3-hour sessions per semester
PR: CIV 6120 or the former ENGI 6713

7240 Geotechnical Engineering III (same as the former ENGI 7723) examines geotechnical engineering analysis and design methods; subsurface investigation; limit state design of shallow foundations and mat foundations in soil and rock; foundations in cold regions; design of axially and laterally loaded piles; and flexible retaining structures (sheet piles).
CR: the former ENGI 7723
PR: CIV 5230 or the former ENGI 5723

7340 Finite Element Structural Analysis (same as the former ENGI 7706) includes a review of basic concepts required for FEA, basics of stiffness formulation, direct stiffness method, displacement method, one dimensional elements, trusses and frames. Topics include 1-D fluid and heat transfer elements, automated analysis and modelling concepts, higher order elements, two dimensional elements - plane stress and plane strain, introduction to 3D and other types. - introduction to advanced topics and isoparametric formulation.
CR: the former ENGI 7706
LH: at least eight 2-hour sessions per semester
PR: CIV 6330 or the former ENGI 6705 or approval of the Head of the Department

7530 Design of Steel Structures (same as the former ENGI 7704) begins with a review of design concepts, standards and products. Topics include design of members and connections, tension members, bolted joints, welded joints, compression members, stability and effective length, flexural members including beams & beam-columns, plate girders, composite beams, introduction to serviceability through deflections of beams.
CR: the former ENGI 7704
LH: five 3-hour sessions per semester
OR: twelve 1-hour tutorials per semester
PR: CIV 5510 or the former ENGI 5706 and CIV 5320 or the former ENGI 5312, or approval of the Head of the Department

7540 Reliability and Environmental Loading on Offshore Structures (same as the former ENGI 7707) begins with an introduction to natural phenomena that cause loading and influence the design of marine structures. Topics include the interpretation and utilization of field data for the determination of design loads for wind, waves currents and ice and case studies of load analysis for the design of offshore structures in Atlantic Canada.
CR: the former ENGI 7707
PR: CIV 5320 or the former ENGI 5312

7620 Environmental Geotechniques (same as the former ENGI 6718, the former ENGI 7718) examines soil characteristics; soil water interactions; soil contaminants; advection, diffusion, dispersion, adsorption, and biodegradation; contaminated site characterization; soil and groundwater remediation; waste containment and minimization.
CR: the former ENGI 6718, the former ENGI 7718
OR: six 1-hour tutorials per semester
PR: CIV 5230 or the former ENGI 5723

7730 Highway Engineering (same as the former ENGI 7745) examines highways transportation systems including driver, vehicle and road characteristics; geometric design of highways; subgrade and base materials; highway drainage features; design of flexible and rigid pavement; fundamentals of traffic flow and queuing theory; traffic control and analysis of signalized intersections; travel demand and traffic forecasting.
CR: the former ENGI 7745
LH: four 3-hour sessions per semester
PR: CIV 3710 or the former ENGI 3703, CIV 5230 or the former ENGI 5723

7820 Project Planning and Control (same as the former ENGI 7748) includes an introduction to types of contracts, project delivery approaches, and prevailing contractual relationships. The course examines basic project management techniques for network planning and scheduling (CPM and PERT); principles of resource productivity databases, preliminary estimating, and detailed bid preparation; quantitative approaches for effective control of time, cost, resource, quality, and value of constructed facilities; use of computer software for scheduling, estimating, and control.
CR: the former ENGI 7748
PR: completion of Academic Term 6 of the Civil Engineering program

8000 Civil Engineering Project (same as the former ENGI 8700) is a practically oriented design project integrated over the five areas in which Civil programs are offered. Students will operate in consultant groups and will complete a design for a typical Civil Engineering undertaking.
CR: the former ENGI 8700
LC: scheduled as required
OR: 1 client meeting per week, 1 tutorial per week
PR: completion of Term 7 of the Civil Engineering program

8150 Municipal Engineering (same as the former ENGI 8713) includes water supply system overview; water consumption estimation; groundwater and surface water sources; oxygen demand and transfer; water treatment processes; water distribution systems and design software; sewer systems and design software; wastewater treatment processes; sludge handling; decentralized and on-site wastewater treatment.
CR: the former ENGI 8713
PR: CIV 7140 or the former ENGI 7716

8550 Structural Building Systems (same as the former ENGI 8705) examines geometries, loads, safety and serviceability, procedure of using the national building code for evaluating the governing loads on structural members; approximate analysis of structures; structural forms for low rise structures; design of low rise and steel buildings; lateral load-resisting elements and bracing systems.
CR: the former ENGI 8705
LH: 2
OR: 1 hour tutorial per week
PR: CIV 7530 or the former ENGI 7704

8560 Offshore Structural Design (same as the former ENGI 8708) examines guidelines and international codes and standards for offshore structural design; understanding design constraints and concepts of offshore fixed and floating structures; design consideration for fixed offshore concrete platform; design consideration for offshore platform and floating production system design, and analysis of various support systems of the offshore structure.
CR: the former ENGI 8708
PR: CIV 7540 or the former ENGI 7707

8570 Coastal and Ocean Engineering (same as the former ENGI 8751) examines the coastal and ocean environment; ocean circulation and properties; waves and tides; instrumentation and measurement. Additional topics will be drawn from the areas of hydraulic, geotechnical and structural engineering. Relevant field exercises will be conducted.
CR: the former ENGI 8751
PR: CIV 6120 or the former ENGI 6713

8580 Subsea Pipeline Engineering (same as the former ENGI 8673) provides an introduction to subsea pipeline engineering with a focus on the mechanical design of offshore pipelines. Stress-based, design-based and limit-states design for strength and stability are examined. Other fundamental pipeline engineering design issues such as materials specification, flow assurance and installation are reviewed. Principles of geotechnical engineering and pipeline/soil interaction analysis techniques are investigated. Special topics are also reviewed.
CR: the former ENGI 8673
LH: 2
PR: one of CIV 5320, the former ENGI 5312, Mechanical and Mechatronics Engineering 5602, the former ENGI 5931, Ocean and Naval Architectural Engineering 7002, the former ENGI 6003 or the former ENGI 7002

8630 Environmental Assessment, Monitoring and Control (same as the former ENGI 8717) covers pollution monitoring, and sampling network design; water quality and air quality modelling; environmental risk assessment; environmental impact assessment; site remediation and hazardous waste management, and environmental statistical analysis. There

are relevant field trips to local wastewater treatment and landfill facilities, as well as case studies.
CR: the former ENGI 8717
OR: at least 2 field trips
PR: CIV 4610 or the former ENGI 4717

8830 Contract Law and Labour Relations (same as the former ENGI 8740) is an introduction to law as it applies to engineering activity; the nature of law and legal processes, including standard forms; liens, bonds and insurances; the labour movement in North America; examination of union philosophies and managerial attitudes; labour law and collective bargaining; disputes and settlements.
CR: the former ENGI 6740, the former ENGI 8740
PR: completion of Term 7 of the Civil Engineering program

8900-8999 Special Topics in Civil Engineering will have topics to be studied announced by the Department.

11.2 Complementary Studies and Interdisciplinary

In accordance with Senate's *Policy Regarding Inactive Courses*, the course descriptions for courses which have not been offered in the previous three academic years and which are not scheduled to be offered in the current academic year have been removed from the following listing. For information about any of these inactive courses, please contact the Associate Dean (Undergraduate Studies) of the Faculty.

Engineering Complementary Studies and Interdisciplinary Courses are designated by ENGI.

3101 Engineering Professionalism I examines issues associated with professional engineering practice and with functioning effectively in the workplace. Topics include communication, workplace and professional ethics, information literacy, equity, gender, diversity, and occupational health and safety (including first-aid). This is a writing-intensive course with a critically-reflective component. Current accreditation graduate attributes are introduced for further development throughout the program.
PR: Science 1807 and Science 1808

3424 Engineering Mathematics includes ordinary differential equations of first order and first degree; linear ordinary differential equations of higher order, methods of undetermined coefficients and variation of parameters; applications to electric circuits and mass-spring systems; Laplace transforms; partial differentiation; convergence of series; Taylor and binomial series; remainder term; and an introduction to Fourier series.
CH: 4
CR: the former ENGI 2422
LC: 4
OR: tutorial 1 hour per week
PR: Mathematics 1001, Mathematics 2050

4102 Engineering Economics is an introduction to the concepts in the determination of the economic feasibility of engineering projects; time value of money – interest rates, depreciation, annual, present and future worth analysis; benefit-cost analysis, tangible and intangible benefits and costs; economic risk and sensitivity analysis, economic optimization.

4421 Probability and Statistics includes probability, probability distributions, probability densities, sampling distribution, hypothesis testing, regression and correlation.
CR: the former ENGI 3423, Statistics 2550, the former Statistics 2510
OR: tutorial 1 hour per week
PR: Mathematics 1001

4430 Advanced Calculus for Engineering iincludes parametric vector functions; polar curves; gradient, divergence and curl; multiple integration; vector calculus, theorems of Green, Stokes and Gauss; an introduction to partial differential equations; and application of advanced calculus to relevant engineering problems.
CR: the former ENGI 5432
OR: tutorial 1 hour per week
PR: ENGI 3424

8102-8149 Special Topics in Engineering will have topics to be studied announced by the Faculty.

8150 Engineering Entrepreneurship (same as the former ENGI 8607) is an introduction to the concepts, issues, and themes related to business planning, strategy, and entrepreneurship, with an overview of the functional activities in a typical business venture. Business analysis and planning skills are developed. The course explores the business planning and strategic management issues of technology-driven enterprises in the early stages of development and focuses on the engineer as an entrepreneur.
CR: the former ENGI 8607
PR: completion of Academic Term 6

8151 Technology, Sustainable Society and International Development (same as the former ENGI 8977) examines multidisciplinary planning on technical international development projects through the conceptual frameworks of international development and project implementation theory. Emphasis is placed on analysis of the complex relationships between society, culture, economic, environmental and political factors, and technology to achieve sustainable international development objectives.
CR: the former ENGI 8977
PR: ENGI 3101

8152 Engineering Professionalism II (same as the former ENGI 7102) examines the demands upon the 21st Century engineer. Topics include the roles and responsibilities of the professional engineer in society, the Engineering Code of Ethics, sustainable development, environmental stewardship, the place of technology in society and the nature of technological decisions. Students will reflect on their entire course of studies, in the context of current accreditation graduate attributes. This is a writing-intensive course with a critically-reflective component.
CO: one of Civil Engineering 8000, Electrical and Computer Engineering 8000, Electrical and Computer Engineering 8010, Mechanical and Mechatronics Engineering 8705, Ocean and Naval Architectural Engineering 8000, Process Engineering 8040 or one of the former ENGI 8000, 8640, 8650, 8700, 8853, 8854, or 8926
CR: the former ENGI 5101, the former ENGI 7102
PR: ENGI 004W

8154 Critical Thinking about Technology, Science and Engineering (same as the former ENGI 8104) is an introduction to the study of "science, technology and society" (STS) in the context of engineering. We examine how society, politics, culture and values affect scientific research, technological innovation, and the practice of engineering. Topics may include transhumanism, geoengineering, artificial intelligence, and emerging technologies. Issues will be examined through various lenses such as technological progressivism, feminist theories, and actor network theory. This is a research and writing-intensive course, with an emphasis on critical reflection.
CR: the former ENGI 8104

8155 Ethics in a Technological World (same as the former ENGI 8105) examines ethical issues and dilemmas that arise primarily in engineering work, but also in relationship to broader technological systems. Through case study analyses and facilitated discussion, various decision-making processes will be explored to address moral and ethical issues spanning from common workplace dilemmas, to whistleblowing, to major engineering disasters. This is a research and writing-intensive course, with an emphasis on critical reflection.
CR: the former ENGI 8105

11.3 Electrical and Computer Engineering

In accordance with Senate's *Policy Regarding Inactive Courses*, the course descriptions for courses which have not been offered in the previous three academic years and which are not scheduled to be offered in the current academic year have been removed from the following listing. For information about any of these inactive courses, please contact the Head of the Department. (or the Associate Dean (Undergraduate Studies) of the Faculty in the case of ENGI courses).

Electrical and Computer Engineering courses are identified by a four-digit numbering system, the first two digits signifying the following:

The first digit denotes the academic term during which the course is normally offered.

The second digit denotes the primary areas of study, namely:
0: Design
1: Mathematics
2: Controls
3: Circuits
4: Software
5: Digital Hardware
6: Signals & Communications
7: Electromagnetism
8: Power & Machines
9: Special Topics

Electrical and Computer Engineering courses are designated by ECE.

Non-departmental Engineering courses are designated by ENGI.

3300 Circuit Analysis (same as the former ENGI 3821) begins with a review of basic circuit analysis including dependent sources, then considers wye-delta transformation, bridge circuits, transient analysis of first- and

second -order circuits, sinusoidal steady state analysis, phasor diagrams, sinusoidal steady-state power, complex power and maximum power transfer.
CO: ENGI 3424. Students completing a **Minor in Applied Science - Electrical Engineering** may successfully complete Mathematics 2260 as the co-requisite instead of ENGI 3424.
CR: Physics 3550, the former ENGI 3821
LH: eight 3-hour sessions per semester
OR: tutorial 1 hour per week
PR: ENGI 1040, Mathematics 1001, Mathematics 2050. Students completing a **Minor in Applied Science - Electrical Engineering** may complete Physics 2055 as the prerequisite instead of ENGI 1040.

3400 Foundations of Programming (same as the former ENGI 3891) introduces fundamental concepts in object-oriented programming and develops vocational programming skills in C++. Topics include abstraction, types, contracts, object-oriented design, C++ language features including key elements of the standard library and practical programming and debugging skills.
CR: Computer Science 2510, the former ENGI 3891
LH: at least four 2-hour sessions per semester
OR: tutorial one hour per week
PR: ENGI 1020

3500 Digital Logic (same as the former ENGI 3861) includes number systems and Boolean algebra; minimization techniques for Boolean functions; basic combinational logic circuit analysis and design; flip-flops, state machine design and implementation; decoders, multiplexors, registers, counters; simple arithmetic and logic units (ALUs); digital system design of small systems.
CR: the former Computer Science 3723, the former ENGI 3861
LH: six 3-hour sessions per semester
OR: twelve 1-hour tutorial sessions per semester
PR: ENGI 1040. Students completing a **Minor in Applied Science - Electrical Engineering** may successfully complete Physics 2055 as the prerequisite instead of ENGI 1040.

4110 Discrete Mathematics for Computer Engineering (same as the former ENGI 4424) is an introduction to discrete mathematics including a selection of topics such as propositional logic, introductory predicate logic, mathematical reasoning, induction, sets, relations, functions, integers, graphs, trees, and models of computation.
CR: Computer Science 1002, or the former Computer Science 2740, the former ENGI 3422, the former ENGI 4424, Mathematics 2320
OR: tutorial 1 hour per week
PR: Mathematics 1001 or Mathematics 2050

4300 Electronic Circuits I (same as the former ENGI 4854) provides an introduction to semiconductor electronic devices and circuits. Topics covered include internal structure of electronic devices; working principles, dc and small-signal models and analysis of p-n junction diodes, bipolar junction transistors and field effect transistors; introduction to digital electronics; differential and multistage amplifier circuits; Miller's theorem; frequency response of discrete amplifiers; practical applications including power supplies, amplifiers and switching circuits. CAD tools are used to illustrate the analysis and design of electronic circuits.
CR: the former ENGI 4854
LH: eight 3-hour sessions per semester
OR: tutorial 1 hour per week
PR: ECE 3300 or the former ENGI 3821. Students completing a **Minor in Applied Science - Electrical Engineering** may successfully complete Physics 3550 as the prerequisite instead of ECE 3300.

4400 Data Structures (same as the former ENGI 4892) examines fundamental data structures; recursive structures and generic programming techniques; modularity and reusability; time complexity and efficient data structures; procedural abstraction; data abstraction and precise documentation of data structures.
CO: ECE 4110 or Mathematics 2320 or the former ENGI 4424
CR: the former ENGI 4892
OR: tutorial 1 hour per week
PR: ECE 3400 or the former ENGI 3891

4500 Microprocessors (same as the former ENGI 4862) includes microprocessor architecture; assembly language programming: addressing modes, table look up; memory mapped devices; interfacing techniques: parallel, serial; timing control; analog input and output, and computer displays.
CR: the former ENGI 4862
LH: eight 3-hour sessions per semester
OR: nine 1-hour tutorial sessions per semester
PR: ECE 3500 or the former ENGI 3861

4510 Microprocessors and Digital Logic includes number systems, logic gates, Boolean algebra, Karnaugh maps and combinational logic design, sequential logic and state machines, microprocessor architectures, micro-processor programming, GPIO, analog input and output, and serial communication.
CR: ECE 3500, ECE 4500
LH: five 3-hour sessions per semester
OR: tutorial 1 hour per week
PR: ECE 3300 or the former ENGI 3821, ENGI 1040, ENGI 3424

4600 Introduction to Systems and Signals (same as the former ENGI 4823) begins with an introduction to systems and signals, and includes mechanical and electrical analogues; principles of linear superposition and time-invariance; definitions, properties, and use of the delta function; applications of complex variables and functions; impulse and step responses; input-output relations of continuous-time systems in terms of convolution and transfer functions; frequency response plots; the Fourier transform and applications; Laplace transforms with application to filtering, communications, and controls.
CR: the former ENGI 4823
OR: tutorial 1 hour per week
PR: ECE 3300 or the former ENGI 3821, ENGI 3424. Students completing a **Minor in Applied Science - Electrical Engineering** may successfully complete Physics 3820 as a prerequisite instead of ENGI 3424 and may successfully complete Physics 3550 as a prerequisite instead of ECE 3300.

4800 Electromechanical Devices (same as the former ENGI 4841) includes an introduction to fundamental principles of energy conversion; review of single-phase AC circuits; three-phase AC circuits; magnetic fields and circuits; transformer models, performance and applications; basic concepts of rotating machines; performance and control of DC motors.
CR: the former ENGI 4841, the former ENGI 5842
LH: six 3-hour sessions per semester
OR: tutorial 1 hour per week
PR: ECE 3300 or the former ENGI 3821, ENGI 3424. Students completing a **Minor in Applied Science - Electrical Engineering** may successfully complete Physics 3820 as a prerequisite instead of ENGI 3424 and may successfully complete Physics 3550 as a prerequisite instead of ECE 3300.

5000 Electrical Engineering Design (same as the former ENGI 5800) students work, normally in pairs, on small design projects that require them to follow a hierarchical design process including general product definition, specifications and requirements, functional-block diagrams, specification of functional blocks for circuit-level synthesis and implementation, system integration, simulation or modelling, testing and verification. The small projects are designed to encourage and motivate students to learn and practise the process of design. The course culminates in a large design project.
CO: ECE 5200 or the former ENGI 5821, ECE 5300 or the former ENGI 5854. There is no co-requisite for students completing a minor in Applied Science - Electrical Engineering.
CR: the former ENGI 5800
LC: 18 lecture hours per semester
LH: ten 3-hour sessions per semester
OR: meetings with project supervisor as required
PR: ECE 4300 or the former ENGI 4854, ECE 4500 or the former ENGI 4862, ECE 4800 or the former ENGI 4841

5010 Software Design (same as the former ENGI 5895) examines the development process: requirement analysis, design, iterative development, design documentation; an introduction to the Unified Modelling Language: use cases, class diagrams and sequence diagrams; an introduction to software design patterns: creational patterns, structural patterns and behavioural patterns; object oriented, modular decomposition. The course includes a major design project.
CR: the former ENGI 5895
LC: 25 lecture hours per semester
LH: six 3-hour sessions per semester
OR: meetings with project supervisor as required
PR: ECE 4400 or the former ENGI 4892

5100 Probability and Random Processes (same as the former ENGI 5420) includes basic concepts in probability, random variables, multiple random variables, descriptive statistics, random processes and selected applications for engineering.
CR: the former ENGI 5420
PR: ECE 4600 or the former ENGI 4823

5200 Control Systems I (same as the former ENGI 5821) includes an introduction to control systems with negative feedback; mathematical modelling and transfer functions of electromechanical systems; block diagram and signal flow graphs; controller realization; transient response analysis; Routh's stability criterion; basic control actions and response of control systems; root locus analysis and design; frequency response analysis; Bode diagram; gain and phase margins; compensator design in frequency domain; Nyquist stability criterion; digital implementations of analog compensators; and an introduction to PID controller tuning methods.
CR: the former ENGI 5821
LH: four 3-hour sessions per semester
OR: six 1-hour tutorials per semester
PR: ECE 4600 or the former ENGI 4823

5300 Electronic Circuits II (same as the former ENGI 5854) provides an

introduction to circuits using operational amplifiers. Topics covered include operational amplifier configurations, analysis, and design; transient and frequency response of amplifier circuits; feedback amplifier analysis and design, stability and compensation techniques; noise and distortion in electronic circuits; analysis and design of data converters; and an introduction to analog filter design. CAD tools are used to illustrate the analysis and design of electronic circuits.
CR: the former ENGI 5854
LH: eight 3-hour sessions per semester
OR: tutorial 1 hour per week
PR: ECE 4300 or the former ENGI 4854, ECE 4600 or the former ENGI 4823. Students in the Mechatronics Engineering program may complete ECE 5610 as a corequisite instead of ECE 4600.

5400 Algorithms: Correctness and Complexity (same as the former ENGI 5892, the former ENGI 6892) presents fundamental theories and practices for the design of correct and efficient computing systems, including specification of computing systems and their components, correctness with respect to specifications; methods of verification; algorithmic problem solving strategies (such as divide and conquer, dynamic programming); tractability and intractability of computational problems.
CR: the former ENGI 5892, the former ENGI 6892
OR: tutorial one hour per week
PR: ECE 4110 or the former ENGI 4424, ECE 4400 or the former ENGI 4892

5500 Digital Systems (same as the former ENGI 5865) includes concepts, language, tools, and issues pertaining to specification, modelling, analysis, simulation, testing and synthesis of digital systems, including PLD, FPGA, and ASIC devices. Industry standard CAD tools will be used in this course to facilitate system design and testing.
CR: the former ENGI 5865
LH: ten 3-hour sessions per semester
PR: ECE 3400 or the former ENGI 3891, ECE 4500 or ECE 4510 or the former ENGI 4862

5610 Sensors and Instrumentation involves modelling, analysis, and design of mechanical measurement systems. Topics covered include Laplace transforms, lumped parameter modelling of electro-mechanical systems, static and dynamic characteristics of sensors, sampling and anti-aliasing, classification and selection of sensors for motion and process, op-amps and signal conditioning and processing, and data acquisition system design.
CR: ECE 4600, Mechanical and Mechatronics Engineering 7203, the former ENGI 5952, the former ENGI 7930
LH: five 3-hour sessions per semester
OR: tutorial 1 hour per week
PR: ECE 3300 or the former ENGI 3821, ENGI 1040, ENGI 3424

5700 Basic Electromagnetics (same as the former ENGI 5812) includes a review of relevant vector calculus, including the divergence, gradient and curl operators in Cartesian, cylindrical and spherical coordinates; divergence theorem, Stokes' theorem, and Laplace's and Poisson's equations. Topics in electrostatics include Coulomb's law, potential and energy, conductors, dielectrics, capacitance and electric field boundary conditions. Topics for magnetism include the steady magnetic field, the Biot-Savart law and Ampère's law.
CR: the former ENGI 5812, Physics 3500
OR: tutorial 1 hour per week
PR: ECE 3300 or the former ENGI 3821, ENGI 4430

6200 Industrial Controls and Instrumentation (same as the former ENGI 6855) examines control and instrumentation system components; transducers and signal processing circuits, linear variable differential transformers, power oscillators; electromechanical actuators, solenoids, power drives; A/D and D/A conversion, standard PC interfaces; real-time operating systems; design of discrete-time feedback controllers on a PC platform; system integration, control system tweaking and troubleshooting; programming soft-PLC's using IEC61131.
CR: the former ENGI 6855, the former ENGI 7858
LH: at least eight 3-hour sessions per semester
PR: ECE 5200 or the former ENGI 5821

6400 Software Development Practice (same as the former ENGI 6893) introduces the student to software development processes, practices, and tools. It includes software project management using agile processes; development tools and practices; architectural level design; deployment and operations; and verification via static analysis, formal verification, and testing.
CR: the former ENGI 6893
LH: six 3-hour sessions per semester
PR: ECE 5010 or the former ENGI 5895, ECE 5400 or the former ENGI 5892

6500 Computer Architecture (same as the former ENGI 6861) begins with a review of microprocessors and computer organization. Topics include fundamentals of computer design: performance metrics and cost; instruction set architecture; memory hierarchy design: cache, main memory and virtual memory; pipelining: hazards, parallelism; special purpose processors; multiprocessors and thread-level parallelism.
CR: the former ENGI 6861
OR: tutorial 1 hour per week
PR: ECE 5500 or the former ENGI 5865

6600 Communication Principles (same as the former ENGI 6871) begins with a review of signal representation and analysis and includes distortionless signal transmission, analog modulation (AM, FM and PM), super-heterodyne receiver, sampling theorem, pulse amplitude modulation (PAM), pulse code modulation (PCM), delta modulation.
CR: the former ENGI 6871
LH: four 3-hour sessions per term
PR: ECE 4600 or the former ENGI 4823, ECE 5100 or the former ENGI 5420

6610 Communication Networks (same as the former ENGI 6876) is an introduction to communication networks such as the telephone and computer networks. Topics include circuit and packet switching, network protocols and layered architecture, physical layer, data link layer, network layer, error control; local area networks, and internetworking.
CR: the former ENGI 6876
PR: ECE 5100 or the former ENGI 5420

6700 Electromagnetic Fields (same as the former ENGI 6813) is a continuation of the topics started in ECE 5700, including a review of electrostatics and magnetostatics, Maxwell's equations, Lorentz force, Poynting's theorem, plane waves, and applications including two-wire transmission lines.
CR: the former ENGI 6813, Physics 4500
OR: tutorial 1 hour per week
PR: ECE 5700 or the former ENGI 5812. Students completing a **Minor in Applied Science - Electrical Engineering** may successfully complete Physics 3500 as the prerequisite instead of ECE 5700.

6800 Rotating Machines (same as the former ENGI 6843) examines the fundamentals of rotating machines; design of machine windings; polyphase and single phase induction motor theory and applications; synchronous machine theory; stability and control of synchronous generators; introduction to permanent magnet machines; introduction to AC motor drives.
CR: the former ENGI 6843
LH: six 3-hour sessions per semester
OR: eight 1-hour tutorial sessions per semester
PR: ECE 4800 or the former ENGI 4841

6810 Power Electronics (same as the former ENGI 6856) is an overview of power semiconductor switches, an introduction to energy conversion and control techniques and examination of controlled rectifiers; phase-controlled converters; switch-mode dc/dc converters; variable frequency dc/ac inverters; ac/ac converters; gate and base drive circuits; design of driver and snubber circuits; thermal models and heat sink design.
CR: the former ENGI 6856, the former ENGI 7846
LH: eight 3-hour sessions per semester
OR: eight 1-hour tutorial sessions per semester
PR: ECE 5300 or the former ENGI 5854

7000 Electrical Engineering Design Project I (same as the former ENGI 7803) provides an opportunity for senior students to integrate the knowledge that they have acquired through the junior terms and apply it to solving an electrical engineering design problem. Students work in small teams with the assistance of a faculty mentor to define an appropriate design problem and propose a method of solution to the problem. The project is continued in ECE 8000.
CR: the former ENGI 7800, the former ENGI 7803
LC: at least 10 lecture hours per semester
OR: weekly meetings with project supervisor
PR: ENGI 4102, completion of Academic Term 6 of the Electrical Engineering program

7010 Computer Engineering Design Project I (same as the former ENGI 7804) provides an opportunity for senior students to integrate the knowledge that they have acquired through the junior terms and apply it to solving a computer engineering design problem. Students work in small teams with the assistance of a faculty mentor to define an appropriate design problem and propose a method of solution to the problem. The project is continued in ECE 8010.
CR: the former ENGI 7800, the former ENGI 7804
LC: at least 10 lecture hours per semester
OR: weekly meetings with project supervisor
PR: ENGI 4102, completion of Academic Term 6 of the Computer Engineering program

7200 Control Systems II (same as the former ENGI 7825) examines state space models for multi-input/output systems; observability, controllability; state feedback without and with integral controller structure, state observers; quadratic optimal regulator and tracking control strategies; discrete-time state equations; and an introduction to optimal control.
CR: the former ENGI 6825, the former ENGI 7825
PR: ECE 5200 or the former ENGI 5821, or Mechanical and Mechatronics Engineering 6202 or the former ENGI 6951

7210 Process Control and Instrumentation (same as the former ENGI 8680) begins with an introduction to feedback control systems, and instrumentation. Topics include modelling thermal, gas, liquid and chemical processes; sensors and transmitters, controller design and simulation in Matlab /Simulink, industrial feedback controllers; design of feedback control loops, tuning of feedback controllers; cascade, ratio, digital controller design; feedforward control; multivariable process control; fuzzy logic control and tuning, instrumentation electronics design, and process system identification using Matlab /Simulink.
CR: the former ENGI 8680
LH: twelve 3-hour sessions per semester
PR: ECE 5200 or the former ENGI 5821

7400 Concurrent Programming (same as the former ENGI 7894) surveys parallel and distributed architectures and examines patterns of concurrent program design; correctness of concurrent programs: safety and liveness properties, proof of properties; synchronization using locks, semaphores, and monitors; communication using message passing and remote procedures; parallelization for high-performance computation and advanced topics such as scientific applications, distributed systems, model checking, and transaction processing.
CR: the former ENGI 7894, the former ENGI 8893
PR: ECE 5400 or the former ENGI 5892 or the former ENGI 6892

7410 Image Processing and Applications (same as the former ENGI 7854) presents fundamental theoretical and practical concepts of image processing and analysis. These concepts include image enhancement and filtering, frequency domain analysis, morphological image operations, image segmentation, and feature extraction. The course enables the use of these concepts to automatically process and analyze images and videos from various real-world applications such as biomedical imaging, visual surveillance, and robotics.
CR: the former Computer Science 4756, the former ENGI 7854
LH: at least four 3-hour sessions per semester

7420 Computer Security (same as the former ENGI 7864) introduces students to key computer security concepts for applications, hosts, networks and the Web. Students will learn to employ the primitives provided by programming languages, cryptography, operating systems and network protocols for protecting engineered systems and their users.
CR: the former ENGI 7864
LH: at least eight 3-hour sessions per semester
PR: ECE 5010 or the former ENGI 5895, ECE 5400 or the former ENGI 5892 or the former ENGI 6892

7500 Introduction to VLSI Design (same as the former ENGI 8863) is an introduction to ASICs and ASIC design methodology and includes basic concepts of digital logic design tools and ASIC technology libraries; partitioning for logic synthesis and VHDL coding; constraining designs, synthesizing, simulation and optimization; design for testability; layout and post-layout optimization and SDF generation; and static timing analysis.
CR: the former Computer Science 4725, the former ENGI 8863
LH: nine 3-hour sessions per semester
OR: eight 1-hour tutorial sessions per semester
PR: ECE 5500 or the former ENGI 5865

7600 Introduction to Digital Signal Processing (same as the former ENGI 7824) examines sampling theory; elementary discrete-time signals; discrete-time linear and time-invariant systems; linear constant-coefficient difference equations; the convolution sum; the discrete-time Fourier series; the discrete-time Fourier transform; the z-transform; the frequency response of discrete-time systems; the discrete Fourier transform; the efficient fast Fourier transform algorithm; an introduction to digital filter design techniques; and digital signal processing applications.
CR: the former ENGI 7824
OR: tutorial 1 hour per week
PR: ECE 6600 or the former ENGI 6871

7610 Communications Electronics - inactive course.

7620 Digital Communications (same as the former ENGI 8879) is a review of baseband transmission and basic digital modulation schemes, detection (optimum receiver, matched filter, correlator), error performance, intersymbol interference (ISI), equalization, the concept of information and entropy, source coding including Huffman coding and linear predictive coding, channel coding including block and convolutional error correcting codes, modulation and coding trade-offs, bandwidth and power efficiency.
CR: the former ENGI 8879
PR: ECE 6600 or the former ENGI 6871

7800 Power System Analysis (same as the former ENGI 7844) begins with an introduction to electric power systems. Topics include per unit quantities; transmission line parameters; modelling of power system components; single line diagrams; network equations formulation; bus impedance and admittance matrices; load flow analysis and control; design of reactive power compensation for power system performance enhancement; tap changing, auto and control transformers for power system application; economic dispatch and optimal power flow studies.
CR: the former ENGI 7844
LH: six 3-hour sessions per semester
PR: ECE 6800 or the former ENGI 6843

7810 Renewable Energy Systems (same as the former ENGI 7856) examines the assessment of wind energy potential, wind turbine aerodynamics, types, modelling and control strategies; hybrid energy systems; energy storage; solar energy systems; photovoltaic, PV system engineering, stand-alone and grid connected systems, sizing and maximum power tracking; solar water pumping; micro-hydro systems and control; tidal power, wave energy converters, ocean thermal systems. Applications of hybrid energy system sizing software are also included in the course.
CR: the former ENGI 7856
LH: eight 3-hour sessions per semester
PR: ECE 6800 or the former ENGI 6843

8000 Electrical Engineering Design Project II (same as the former ENGI 8853) continues ECE 7000 and provides an opportunity for senior students to integrate the knowledge that they have acquired through the junior terms and apply it to solving an electrical engineering design problem. Students work in small teams with the assistance of a faculty mentor to complete detailed design, implementation and testing of an electrical engineering system to solve the problem as defined in ECE 7000.
CR: the former ENGI 8800, the former ENGI 8853
LC: 0
OR: weekly meetings with project supervisor
PR: ECE 7000 or the former ENGI 7803

8010 Computer Engineering Design Project II (same as the former ENGI 8854) continues ECE 7010 and provides an opportunity for senior students to integrate the knowledge that they have acquired through the junior terms and apply it to solving a computer engineering design problem. Students work in small teams with the assistance of a faculty mentor to complete detailed design, implementation and testing of an computer engineering system to solve the problem as defined in ECE 7010.
CR: the former ENGI 8800, the former ENGI 8854
LC: 0
OR: weekly meetings with project supervisor
PR: ECE 7010 or the former ENGI 7804

8210 Supervisory Control and Data Acquisition (same as the former ENGI 7680) examines data acquisition and intelligent field devices; distributed systems and fieldbus technology; programmable logic controllers and programming standards; operator control interface; supervisory control and data acquisition; and enterprise organization.
CR: the former ENGI 7680
LH: at least four 3-hour sessions per semester
PR: ECE 5200 or the former ENGI 5821, or Mechanical and Mechatronics Engineering 6202 or the former ENGI 6951, or Process Engineering 7021 or the former ENGI 7621

8400 Real-time Operating Systems (same as the former ENGI 8894) examines real-time process scheduling; memory and device management; I/O communications; real-time systems; operating system and hardware concurrency issues; kernel architectures; device drivers; and a survey of available real-time operating systems and embedded platforms.
CR: Computer Science 4721, the former ENGI 7863, the former ENGI 8894
LH: four 3-hour sessions per semester
PR: ECE 6500 or the former ENGI 6861, ECE 7400 or the former ENGI 7894

8410 Computer Vision (same as Computer Science 4301, the former ENGI 8814) studies how to develop methods that enable a machine to "understand" or analyze images. The course introduces the fundamental problems in computer vision and the state-of-the-art approaches that address them. Topics include feature detection and matching, geometric and multi-view vision, structure from X, segmentation, object tracking and visual recognition.
CR: Computer Science 4301, the former ENGI 8814
LH: six 3-hour sessions per semester
PR: Computer Science 3301 or ECE 7410 or the former ENGI 7854 or permission of the instructor

8420 Cryptography (same as the former ENGI 8868) examines the techniques used to provide security in communication networks and computer systems. The course focuses on topics in cryptography required to provide privacy, authentication, and integrity, including symmetric key ciphers, public key ciphers, message authentication, and digital signature schemes.
CR: the former ENGI 8868
PR: ECE 5400 or the former ENGI 5892 or the former ENGI 6892

8600 Design of Digital Signal Processing Systems (same as the former ENGI 8821) is a review of introductory digital signal processing (DSP) principles, including sampling theory and discrete-time systems and signals. Topics include transform analysis of DSP systems; issues in the implementation of DSP systems; design of IIR and FIR digital filters; computable transforms and their use in the frequency analysis of digital signals; and design of DSP systems for current and emerging applications of

AR = Attendance requirement; CH = Credit hours are 3 unless otherwise noted; CO = Co-requisite(s); CR = Credit can be retained for only one course from the set(s) consisting of the course being described and the course(s) listed; LC = Lecture hours per week are 3 unless otherwise noted; LH = Laboratory hours per week; OR = Other requirements of the course such as tutorials, practical sessions, or seminars; PR = Prerequisite(s); UL = Usage limitation(s).

digital signal processing.
CR: the former ENGI 8821
PR: ECE 7600 or the former ENGI 7824

8610 Filter Synthesis (same as the former ENGI 8826) introduces analog filters. Topics include transfer functions and frequency response of filters; design of first order passive and active filters; design and analysis of filter circuits such as biquad circuit, Sallen-Key circuit, multiple feedback circuit and state variable filter; RC-CR transformation; cascade design principle; design of Butterworth, Chebyshev and elliptic filters, Bessel-Thomson filters, switched capacitor filters; and the use of Matlab for design of analog filters.
CR: the former ENGI 8826
LH: at least four 3-hour sessions per semester
PR: ECE 5300 or the former ENGI 5854

8620 Wireless and Mobile Communications (same as the former ENGI 8804, the former ENGI 8877) covers the fundamentals and main concepts of wireless and mobile communication systems focusing on the system level design and performance. Main topics to be covered include Introduction to Wireless Communication Systems, Wireless Channel Models, Frequency Reuse Concept, Wireless Multiple Access Techniques (TDMA, FDMA, CDMA), Orthogonal Frequency Division Multiplexing (OFDM), Wireless Systems (GSM, 3G, LTE, etc.).
CR: the former ENGI 8804, the former ENGI 8877
PR: ECE 6600 or the former ENGI 6871, ECE 6610 or the former ENGI 6876

8630 Introduction to the Internet of Things introduces the architectures, protocols, standards, and applications of the Internet of Things (IoT). Topics include: IoT concepts, architectures, and standards, communication and networking, computing and IoT data management, security and privacy, IoT applications, digital twins, and next generation cellular networks and their impact on IoTs. Through this course, students will be able to understand the key challenges of the IoT systems and develop proper conceptual and technological solutions to real-world problems.
LH: at least four 3-hour sessions per semester
PR: ECE 4510, ECE 5610

8700 Antennas (same as the former ENGI 7811) examines the fundamentals of electromagnetic radiation; potentials; small antennas and antenna parameters; thin linear wire antennas and antenna arrays; antenna impedance and ground effects; Friis transmission formula; and aperture antennas.
CR: the former ENGI 7811
LH: three 3-hour simulation and demonstration sessions per semester
OR: tutorial 1 hour per week
PR: ECE 6700 or the former ENGI 6813

8800 Power System Operation (same as the former ENGI 8845) examines symmetrical components; power system fault analysis; power system stability; and power system protection.
CR: the former ENGI 8845
LH: four 3-hour sessions per semester
PR: ECE 7800 or the former ENGI 7844

8900-8949 Special Topics in Computer Engineering will have topics to be studied announced by the Department.

8950-8999 Special Topics in Electrical Engineering will have topics to be studied announced by the Department.

11.4 Engineering One

Engineering One courses are designated by ENGI.

1010 Engineering Statics is the first course in Engineering mechanics. Forces and moments are described with vector algebra, leading to a description of the equilibrium conditions for particles and solid bodies. The importance of free body diagrams is highlighted. This knowledge is then applied to the analysis of trusses, frames and machines. Additional topics include an examination of friction and the concepts of centre of force, centroids and second moments of area.
CO: Mathematics 1000
CR: the former ENGI 1313
OR: tutorial 1 hour per week
PR: Level III Physics or Physics 1020 or equivalent

1020 Introduction to Programming is an introduction to algorithmic problem solving techniques and computer programming, including basic program control structures (sequence, call, branch, loop) and data representations, functional decomposition, and design by contract. Exercises and examples are drawn from a variety of engineering disciplines and are implemented using a standard modern programming language.
CR: the former ENGI 2420
LH: at least four 2-hour sessions per semester
PR: eligibility to register for Mathematics 1000

1030 Engineering Graphics and Design provides two complementary competencies. Firstly, it provides an introduction to the fundamentals of graphic communication, including orthographic projections, three dimensional pictorials, sectioning and dimensioning. Both sketching and CAD are utilized. Secondly, the course introduces students to standard design methodologies. The graphics and design competencies are reinforced through lab and project exercises.
LH: 3
PR: eligibility to register for Mathematics 1000

1040 Mechanisms and Electric Circuits is offered in two serial modules, including laboratory and workshop practice, and a team project to expose students to the concept of system integration involving electrical and mechanical systems. The electrical module provides an introduction to dc circuits, with an analysis of dc circuits used in control, measurement and instrumentation systems. The mechanism module provides an introduction to machine components such as belts, pulleys, gears, and simple linkages. The laboratory and workshop component introduces students to hands-on practice in basic laboratory instruments, tools and safety procedures. A team project involves the construction, assembly and testing of a simple mechanism.
LH: 3
PR: Level III Physics or Physics 1051 (which may be taken concurrently) and Mathematics 1000 (which may be taken concurrently).

11.5 Mechanical and Mechatronics Engineering

Mechanical and Mechatronics Engineering courses are identified by a four-digit numbering system, the first two digits signifying the following:

The first digit denotes the academic term during which the course is normally offered.

The second digit denotes the primary areas of study, namely:
1: Materials Science
2: Mechatronics
3: Dynamics
4: Thermal Science
5: Fluid Mechanics
6: Solid Mechanics
7: Design/Project courses
8: Other regular courses
9: Special Topics

Non-departmental Engineering courses are designated by ENGI.

Mechanical and Mechatronics Engineering courses are designated by ME.

3101 Chemistry and Physics of Engineering Materials I (same as the former ENGI 3911) is an introduction to the structure and properties of engineering materials, in particular materials, semiconductors, ceramics, glasses and polymers. Topics include a review of atomic bonding, discussion of basic crystalline and amorphous structures, point and line defects, and the role these structural features play in elastic and plastic deformations, yield, fracture, glass transition, thermal conductivity, thermal expansion, specific heat and electrical conductivity.
CR: Process Engineering 5092, the former ENGI 2205, the former ENGI 3911
LH: at least four 3-hour sessions per semester
OR: tutorial 1 hour per week
PR: Chemistry 1050 or Chemistry 1200

3102 Production Technology (same as the former ENGI 3941) includes an overview of production: production strategies; dimensioning and tolerancing; basic material removal process; forming and shaping process; casting; molding, extrusion and joining processes; computer aided machining; new technologies; design for manufacture.
CR: the former ENGI 3941
LH: at least eight 3-hour sessions per semester

3301 Dynamics (same as the former ENGI 3934) includes kinematics and kinetics of particles using rectangular, normal/tangential and polar coordinates; relative motion using rotating axes; two-dimensional kinematics and kinetics of rigid bodies; force-acceleration, work-energy and impulse-momentum methods.
CR: the former ENGI 2313, the former ENGI 3934
OR: tutorial 1 hour per week
PR: ENGI 1010, Mathematics 1001

3401 Thermodynamics I (same as the former ENGI 3901) is a macroscopic approach to heat, work, and energy; properties of pure substances; conservation of mass, energy for open and closed systems; thermal efficiency and coefficient of performance; second law of thermodynamics; and its corollaries; entropy; second law analysis of thermodynamic systems; second law efficiency; and an introduction to simple thermodynamic cycles.
CR: the former ENGI 3901
OR: tutorial 1 hour per week

PR: Mathematics 1001

4302 Mechanisms and Machines (same as the former ENGI 4932) includes an overview of mechanisms within machines; analytical and computer-aided methods for position, velocity, and acceleration analysis of moving mechanisms; power transmission; kinematics and kinetics of planar mechanisms; static and dynamic loads on mechanisms and an introduction to mechanism synthesis. Students will complete an analysis project.
CR: the former ENGI 3933, the former ENGI 4932
LH: two or three 2-hour computer simulation laboratory sessions per semester
OR: tutorial 1 hour per week
PR: ME 3301 or the former ENGI 3934

4402 Thermodynamics II (same as the former ENGI 4901) examines thermodynamic cycles: power and refrigeration applications; human comfort and air conditioning: mixture of gases and vapours, humidity, psychrometrics; chemically reacting mixtures and combustion; exergy analysis.
CR: the former ENGI 4901
LH: at least three 1.5-hour sessions per semester
OR: tutorial 1 hour per week
PR: ME 3401 or the former ENGI 3901

4501 Fluid Mechanics I (same as the former ENGI 4961, the former ENGI 5961) examines fluid statics; fluid flow phenomena; control volume analysis; conservation of mass, momentum, and energy; Bernoulli equation; head losses, applications of conservation laws: flow measurement devices; pipe networks; momentum devices, dimensional analysis, boundary layer phenomena, lift and drag.
CR: the former ENGI 4661, the former ENGI 4913, the former ENGI 4961, the former ENGI 5961
LH: five 1-hour sessions per semester
OR: tutorial 1 hour per week
PR: ME 3301 or the former ENGI 3934, ME 3401 or the former ENGI 3901

4601 Mechanics of Solids I (same as the former ENGI 4934) examines stress and strain analysis applied to bars and beams in axial, torsion and bending; beam deflection, plane stress and strain, stress and strain transformations in two dimensions and Mohr's circle.
CR: the former ENGI 4312, the former ENGI 4934
LH: at least four 1-hour sessions per semester
OR: tutorial 1 hour per week
PR: ENGI 1010

5103 Chemistry and Physics of Engineering Materials II (same as the former ENGI 5911) examines aspects of chemical and physical processes and microscopic structure relevant to the production and use of engineering materials, focussing on metals, alloys, silicates, Portland cement, plastics and adhesives, composites, and wood. Topics include solid-state solutions and compounds, alloy structures, phase diagrams, reaction rates, solid-state transformations, polymerization, oxidation and corrosion, hardness, creep, fatigue, fracture toughness and visco-elastic deformation.
CR: Process Engineering 5092, the former ENGI 3205, the former ENGI 5911
LH: at least four 3-hour sessions per semester
OR: tutorial 1 hour per week
PR: ME 3101 or the former ENGI 3911

5201 Mechatronics I (same as the former ENGI 5952) involves modelling of electro-mechanical systems and introduction to basic analog and digital electronic devices. Topics covered include lumped-parameter modelling of electro-mechanical systems, basic electronic components and semiconductors, introduction to op amps, digital logic and number systems, microcontroller technology and interfacing (switches, LEDs, steppers, solenoids, A/D and D/A conversion).
CR: the former ENGI 4951, the former ENGI 5952
LH: five 3-hour sessions per semester
OR: tutorial 1 hour per week
PR: ENGI 1040, ENGI 3424

5502 Fluid Mechanics II (same as the former ENGI 5962) examines differential analysis of fluid motion; conservation of mass: continuity equation; conservation of momentum: Navier-Stokes equations; conservation of energy; basic film lubrication theory, boundary layer flows; compressible flows.
CR: the former ENGI 5913, the former ENGI 5962, the former ENGI 6661, the former ENGI 6961
LH: at least three 1-hour sessions per semester
OR: tutorial 1 hour per week
PR: ME 4501 or the former ENGI 4961 or the former ENGI 5961

5602 Mechanics of Solids II (same as the former ENGI 5931) examines stresses due to combined loads, asymmetric bending, transformation of stresses and strains, principal stresses and strains (in two and three dimensions), static failure theories, stress concentration, energy methods, method of superposition, buckling of columns, thin- and thick-walled pressure vessels and contact stresses.
CR: the former ENGI 5312, the former ENGI 5931
LH: at least four 1-hour sessions per semester
OR: tutorial 1 hour per week
PR: ME 4601 or the former ENGI 4934

6202 Control Systems I (same as the former ENGI 6951) examines modeling, analysis and design of feedback control systems using classical controller design methods. Topics covered include linear system modelling using Laplace transforms, control system stability, time domain analysis - root locus design, frequency domain analysis - bode diagram and Nyquist design, PID Control.
CR: the former ENGI 6925, the former ENGI 6951
LH: at least three 1-hour sessions per semester
OR: 1-hour tutorial per week
PR: ME 5201 or Electrical and Computer Engineering 5610 or the former ENGI 5951 or the former ENGI 5952

6303 Mechanical Vibrations (same as the former ENGI 6933) examines single degree of freedom systems: free vibration, energy methods, response to harmonic excitation, response to arbitrary inputs, rotating unbalance, vibration isolation; two degree of freedom systems: natural frequencies and mode shapes, vibration absorption.
CR: the former ENGI 5932, the former ENGI 6933
LH: at least four 2-hour sessions per semester
PR: ME 3301 or the former ENGI 3934

6403 Heat Transfer I (same as the former ENGI 6901) examines modes of heat transfer; conduction: steady 1-D conduction, thermal resistance, extended surfaces (fins), lumped capacitance analysis, 1-D transient conduction; convection: Newton's law of cooling, convection heat transfer coefficient, external boundary layer flows, internal flows; radiation: principles, properties, exchange factors, black body radiation, and enclosures, radiation shields.
CR: the former ENGI 5602, the former ENGI 6901
LH: at least one 3-hour session per semester
OR: tutorial 1 hour per week
PR: ME 4402 or the former ENGI 4901, ME 5502 or the former ENGI 5962

6701 Computer Aided Engineering Applications (same as the former ENGI 6928, the former ENGI 7928) introduces a variety of Computer Aided Engineering (CAE) applications based on advanced 3D CAD modelling. The fundamentals of 3D modelling are covered. CAE include assembly modelling, mechanism animation and finite element analysis. Applications include Computer Aided Manufacturing (CAM); model based inspection; reverse engineering; document/drawing production; data exchange; and data management. Lab exercises provide exposure to solid modelling and CAE applications using CAD/CAM/CAE tools.
CR: the former ENGI 6928, the former ENGI 7928, the former ENGI 7962
LH: at least ten 2-hour computer laboratory sessions per semester
PR: ENGI 1030, ME 3102 or the former ENGI 3941

6702 Mechanical Component Design I (same as the former ENGI 5927, the former ENGI 6929) examines adequacy assessment and synthesis of machine elements with a focus on failure prevention, safety factors, and strength; static failure and fatigue analysis of components. Topics include the design of power screws, bolted connections, welds, and shafts.
CR: the former ENGI 5926, the former ENGI 5927, the former ENGI 6929
LH: at least four 3-hour computer laboratory sessions per semester
PR: ME 5602 or the former ENGI 5931

7104 Industrial Materials (same as the former ENGI 7911) includes metals and alloy systems, strengthening mechanisms of metals, iron-carbon alloys, corrosion resistant alloys, light metals and their alloys, copper and nickel base alloys, super alloys, the function of alloying elements in metals, heat treatments, surface hardening, and surface modification.
CR: the former ENGI 6972, the former ENGI 7911
LH: at least five 3-hour laboratory sessions per semester
PR: ME 5103 or the former ENGI 5911

7105 Welding and Joining Processes (same as the former ENGI 8971) introduces modern welding and joining processes for metallic materials, polymers, and ceramics. Fundamentals of materials joining processes and the impact of the process parameters on the weld geometry, mechanical properties, and quality are discussed. Laboratory exercises will provide hands-on experience with some industrially significant welding processes.
CR: the former ENGI 8971
LH: seven 3-hour sessions per semester
PR: ME 4601 or the former ENGI 4934, ME 5103 or the former ENGI 5911

7203 Instrumentation and Experimental Design (same as the former ENGI 7930) involves analysis and design of mechanical measurement systems and multi factor experiments. Topics covered include static and dynamic characteristics of sensors, Fourier transforms, sampling theorem and signal conditioning, uncertainty analysis of sensors, sensors for motion control, load sensing and process control, one factor vs multi factor experiments, factorial design and analysis, partial factorial design and blocking, response surface methodology (RSM).
CR: the former ENGI 7930
LH: at least four 3-hour sessions per semester
OR: tutorial 1 hour per week

PR: ENGI 4421 or Statistics 2550, ME 6202 or the former ENGI 6951

7204 Robotics and Automation (same as the former ENGI 7952) provides the fundamentals in robotic manipulators and arms. The course provides basic understanding in coordinate transformations for spatial description, both kinematical and kinetic analysis, forces and dynamics and finally trajectory generations and path planning.
CR: the former ENGI 7944, the former ENGI 7952
LH: at least three 3-hour sessions per semester
PR: ENGI 4430

7205 Mechatronics II (same as the former ENGI 7953) emphasizes the integration of the core technologies on which contemporary, mechatronic designs are based. Topics covered include combinational logic circuit design, sequential logic circuit design, modelling and control of servo motors, selection, sizing, and modelling of servo valves and hydraulic actuators, microcontroller technology and interfacing (relays, timers, PWM control, interrupts, digital communication).
CR: the former ENGI 5951, the former ENGI 7953
LH: five 3-hour sessions per semester
OR: tutorial 1 hour per week
PR: ME 6202 or the former ENGI 6951

7210 Industrial Automation introduces programmable logic controllers (PLC) and ladder logic programming, sensor and actuator interfaces, DC and AC motors, pneumatic circuits, fluid power actuators and control, industrial data communication, supervisory control and data acquisition (SCADA) and human machine interface (HMI).
LC: minimum of 2 lecture hours per week
LH: five 3-hour sessions per semester
PR: ME 6202 or the former ENGI 6951, ME 6701 or the former ENGI 6928 or the former ENGI 7928

7220 Guidance, Navigation, and Control provides applied knowledge in the design of navigation algorithms used in aerial autonomy, marine robotics, and self-driving applications. Topics covered include modelling platform and sensor dynamics, stochastic processes, linear state space GN&C solutions, nonlinear GN&C solutions, optimal filtering, trajectory optimization, factor graphs, and performance analysis.
LH: at least three 3-hour sessions per semester
PR: ENGI 4421, ME 6202 or the former ENGI 6951

7230 Introduction to MEMS provides the fundamentals in micro-electro-mechanical systems (MEMS) using examples from industrial MEMS applications. Topics include essential electrical and mechanical concepts for MEMS; fabrication processes for MEMS devices; basic MEMS governing equations in different energy domains (mechanical, electrical and thermal); methods for layout, design and modelling of MEMS devices; simulation techniques; techniques for testing and characterization of MEMS devices; thermal sensing and actuation; surface micro machining; and case studies.
LH: at least three 3-hour sessions per semester
PR: ME 6202 or the former ENGI 6951

7404 Heat Transfer II (same as the former ENGI 7901) examines advanced topics in heat transfer; multidimensional heat conduction: shape factors, numerical methods, moving heat sources; phase change heat transfer: melting, solidification, condensation, and boiling; natural convection: external flows, internal flows; multimode heat transfer; and environmental radiation.
CR: the former ENGI 7901
LH: at least three 2-hour computer laboratory sessions per semester
PR: ME 6403 or the former ENGI 6901

7405 Mechanical Equipment (same as the former ENGI 7903) examines performance characteristics of mechanical equipment; fluid power devices: pipes; valves; turbomachinery: pumps; fans; blowers; compressors; heat transfer devices: heat exchangers; boilers, and cooling towers.
CR: the former ENGI 7903
LH: at least four 1.5-hour sessions per semester
PR: ME 6403 or Process Engineering 5002 or the former ENGI 5602 or the former ENGI 6901

7503 Gas Dynamics (same as the former ENGI 8970) begins with an introduction to compressible gas flows, then considers fundamental laws of compressible fluid flow; wave propagation in compressible fluids; isentropic flow of a perfect gas; normal and oblique shock waves; Prandtl-Meyer flows; external compressible flows; flow in ducts, flow with friction (Fanno) and heat transfer (Rayleigh); imperfect gas effects; and measurement of compressible flows.
CR: the former ENGI 8970
PR: ME 5502 or the former ENGI 5962

7603 Finite Element Analysis (same as the former ENGI 7934) includes a review of basic concepts required for FEA, basics of stiffness formulation, direct stiffness method, displacement method, one dimensional elements, trusses and frames. Topics include 1D fluid and heat transfer elements, automated analysis and modelling concepts, higher order elements, two dimensional elements - plane stress and plane strain, introduction to 3D elements, introduction to advanced topics and isoparametric formulation.
CR: the former ENGI 7934
LH: 2
OR: tutorial 1 hour per week
PR: ENGI 4430, ME 5602 or the former ENGI 5931

7703 Mechanical Component Design II (same as the former ENGI 6927, the former ENGI 7929) is a continuation of the ME 6702 course in analysis and synthesis of machinery, including advanced analysis of machine elements such as clutches, brakes, couplings, journal bearings and gears. Advanced machine design concepts are examined, such as reliability, optimization and techniques for stimulating innovative design. A synthesis project involving the machine elements studied is usually included.
CR: the former ENGI 6926, the former ENGI 6927, the former ENGI 7929
LH: at least five 3-hour computer laboratory sessions per semester
PR: ME 6702 or the former ENGI 5927 or the former ENGI 6929

7704 Mechanical Design Project I (same as the former ENGI 7926) is the first of two capstone design courses in Mechanical Engineering. In this course mechanical students are organized into small groups or teams, which must complete a design challenge. The project is presented as an open-ended problem statement with specific performance objectives. The system must be designed, prototyped and tested during the semester. Each team is a small consulting firm and is required to document its object planning as well as its design.
CR: the former ENGI 7926, the former ENGI 7936
LC: minimum of 2 lecture hours per week
LH: at least three 2-hour sessions per semester
PR: ENGI 4102, completion of Term 6 of the Mechanical Engineering Program

7705 Mechatronics Design Project I provides an opportunity for senior students to integrate the knowledge that they have acquired through the junior terms and apply it to solving a mechatronics engineering design problem. Students work in small teams with the assistance of a faculty mentor to define an appropriate design problem and propose a method of solution to the problem. The project is continued in ME 8706.
CR: the former ENGI 7926, the former ENGI 7936
LC: at least 10 lecture hours per semester
LH: scheduled as required
OR: weekly meetings with project supervisor
PR: ENGI 4102, completion of Term 6 of the Mechatronics Engineering Program

8106 Corrosion and Corrosion Control (same as the former ENGI 8911) examines forms of corrosion; the electrochemical nature of the corrosion process; the mixed potential theory, Purbaix diagrams and Evan diagrams; corrosion testing, control use by use of materials, selection, cathodic protection, inhibitors, and coatings. There are case studies of selected corrosion problems.
CR: the former ENGI 8962, the former ENGI 8911
LH: at least four 3-hour sessions per semester
PR: ME 5103 or Ocean and Naval Architectural Engineering 4007 or the former ENGI 4007 or the former ENGI 5911

8304 Machine Dynamics (same as the former ENGI 8937) reviews mechanism kinematics and inverse dynamics (prediction of unknown forces and torques required to create a known motion) and continues with forward dynamic analysis of mechanisms (predicting unknown motion due to applied forces and torques) using student-generated computer code and commercial software. Practical applications of dynamics are explored, such as engine shaking forces, balancing of machinery, shaft vibration, design of flywheels, and gyroscopic effects.
CR: the former ENGI 7945, the former ENGI 8937
PR: ME 4302 or the former ENGI 4932, ME 6303 or the former ENGI 6933

8305 Modelling and Simulation of Dynamic Systems (same as the former ENGI 8946) emphasizes interdisciplinary system models, equation formulation and structure, and model complexity. The bond graph modelling language will be introduced to simulate systems containing mechanical, electrical, thermal, hydraulic, and magnetic components.
CR: the former ENGI 8946
PR: ME 5201 or Electrical and Computer Engineering 5610 or the former ENGI 5952, ME 6303 or the former ENGI 6933

8406 Design of Thermal Systems (same as the former ENGI 8903) examines thermal system design; modeling of thermal systems; steady and transient system simulation; single and multi-variable optimization; overall system performance; thermodynamic optimization; selected design case studies.
CR: the former ENGI 8903
PR: ME 7404 or the former ENGI 7901, ME 7405 or the former ENGI 7903

8407 Sustainable Energy Systems (same as the former ENGI 8984) examines thermo-fluid features of energy conversion and storage technologies. Topics include nuclear power, wind power, biorenewable and nonconventional fuels, fuel cells, carbon capture and sequestration, photovoltaics, solar thermal, energy storage, and hydroelectric power systems.
CR: the former ENGI 8984
PR: ME 4402 or the former ENGI 4901, ME 7404 or the former ENGI 7901

8504 Computational Fluid Dynamics (same as the former ENGI 8947)

begins with a review of the equations governing viscous fluid flows and heat transfer. The course includes heat conduction, convection-diffusion, and fluid flow equations; gridding, dependent variable interpolation, discretized equations, solution of the discretized equations, transients and nonlinearities; testing and validation of CFD codes, standard test problems.
CR: the former ENGI 8947
PR: ME 5502 or the former ENGI 5962 or the former ENGI 6961, ME 7404 or the former ENGI 7901

8505 Fluid Structure Interactions (same as the former ENGI 8964) examines structural vibrations generated by fluid flow. These vibrations can be transient or they can take the form of instability or resonance. The course deals with the following fluid structure interactions: (1) Flow induced vibration of structures (2) Unsteady flow in pipe networks (3) Water wave interactions with structures.
CR: the former ENGI 8904, the former ENGI 8964
LH: at least three 3-hour sessions per semester
PR: ME 5502 or the former ENGI 5962 or the former ENGI 6961, ME 6303 or the former ENGI 6933

8506 Advanced Fluid Dynamics (same as the former ENGI 8965) includes fluid kinematics; equations of fluid dynamics: Navier-Stokes equations, Euler's equations, Stokes' equations, vorticity transport; advanced topics in: low Reynolds flows, unsteady viscous flows, boundary layer analysis, potential flows; introduction to turbulent flow; free shear flows.
CR: the former ENGI 8965
PR: ME 5502 or the former ENGI 5962 or the former ENGI 6961

8604 Fatigue and Fracture Mechanics (same as the former ENGI 8933) is an introduction to fatigue and fracture analysis of metallic components, failure mechanisms, fracture mechanisms, effects of cracks, notches, collapse; linear elastic fracture mechanic analysis; design of components to avoid fracture; fatigue crack propagation, fracture initiation, crack arrest; and fracture toughness measurements.
CR: the former ENGI 8933
OR: tutorial 1 hour per week
PR: ME 5602 or the former ENGI 5931

8605 Pressure Component Design (same as the former ENGI 8935) includes pressure vessel design philosophy; membrane theory of shells; stress categories; discontinuous stresses; design of pressure vessel components according to ASME Boiler and pressure vessel and piping codes. There is a design project involving pressure vessel components.
CR: the former ENGI 8935
OR: at least 1 tutorial hour per week
PR: ME 5602 or the former ENGI 5931, ME 6702 or the former ENGI 6929

8606 Mechanical Behaviour of Composites (same as the former ENGI 8982) includes stress-strain behaviour of composites, properties of matrix and reinforcing materials, mechanics of fibre-reinforced composites, lamina and laminate analysis, and an introduction to manufacturing methods.
CR: the former ENGI 8982
OR: tutorial 1 hour per week
PR: ME 5602 or the former ENGI 5931

8705 Mechanical Design Project II (same as the former ENGI 8926) is the Mechanical Engineering capstone project, building on skills acquired in ME 7704. Student teams choose a unique design challenge and proceed to generate a solution. Problems are often drawn from industry and, where possible, interdisciplinary interaction is encouraged. The problem proponent will act as the "client" and the team is expected to generate a solution. Emphasis is placed on oral and written communication and technical aspects. Wherever possible, elements should be prototyped and tested.
CR: the former ENGI 8926, the former ENGI 8936
LC: scheduled as required
LH: scheduled as required
PR: ME 7704 or the former ENGI 7926

8706 Mechatronics Design Project II continues ME 7705 and provides an opportunity for senior students to integrate the knowledge that they have acquired through the junior terms and apply it to solving a mechatronics engineering design problem. Students work in small teams with the assistance of a faculty mentor to complete detailed design, implementation and testing of a mechatronics engineering system to solve the problem as defined in ME 7705.
CR: the former ENGI 8926, the former ENGI 8936
LC: scheduled as required
LH: scheduled as required
PR: ME 7705

8801 Production & Operations Management (same as the former ENGI 8945) is an overview of production and operations management, and an examination of decision making and operations strategy; process design and improvement, process flow analysis/simulation, capacity planning; design of value chains, lean systems, plant layout and process planning; operating value chains, MIS systems, inventory and resource management; Relevant computer laboratory exercises are conducted.
CR: the former ENGI 7943, the former ENGI 8945
PR: ME 6403 or the former ENGI 6901

8900-8999 Special Topics in Mechanical and Mechatronics Engineering will have topics to be studied announced by the Department.

11.6 Ocean and Naval Architectural Engineering

Ocean and Naval Architectural Engineering courses are identified by a four-digit numbering system, the first two digits signifying the following:

The first digit denotes the academic term during which the course is normally offered.

The second digit denotes the primary areas of study, namely:
0: Regular courses
9: Special Topics courses

Non-departmental Engineering courses are designated by ENGI.

Ocean and Naval Architectural Engineering courses are designated by ONAE.

3001 Ocean/Naval Design (same as the former ENGI 3001) introduces design and operation for ships and marine structures. Technology evolution in ship and offshore structures is reviewed, emphasizing service needs. Structural concepts, materials and construction methods are examined, including design for manufacturing. The design spiral and trade-offs between design characteristics are explored and modelling methods as tools in the design process are introduced. There is a minimum of six laboratory sessions including ship tours, a design project or research paper.
CR: the former ENGI 3001
LH: at least six 3-hour sessions per semester

3054 Ocean Engineering Hydrostatics (same as the former ENGI 3054) is an introductory course to naval architecture and marine engineering. It discusses the basic principles of the statics of rigid floating or submerged structures. These include: ships, offshore platforms and submersibles. Methods of analysis of the hydrostatics, stability and trim, damage stability and the statics of mooring systems are introduced. Applications are also discussed.
CR: the former ENGI 3054
LH: at least nine 3-hour sessions per semester
PR: ENGI 1010, Mathematics 1001

4007 Marine Materials (same as the former ENGI 4007) examines the properties and uses of steel, aluminum and composite materials in marine applications. Topics include: review of mechanics of materials, Hooke's Law, material failure models; carbon steel - fundamentals, processes, preparation, design, drawings, certification; joining of aluminum; riveting and welding; corrosion phenomena; composites - classification, production, and mechanical properties.
CR: the former ENGI 4007, the former ENGI 7007
LH: at least 4 three-hour sessions per semester
PR: Chemistry 1050 or Chemistry 1200, ENGI 1010, ONAE 3001 or the former ENGI 3001

4011 Resistance and Propulsion (same as the former ENGI 4011) examines ship resistance and some factors considered in the design of marine screw propellers. Topics include the resistance due to friction, wave making, form appendage, wind and waves, squat, blockage, shallow water effects, and the estimation of powering using methodical series and statistical methods. Topics considered in the design of marine screw propellers include propeller theory, blade sections, blade strength, methodical series charts, efficiency elements, lifting line calculations, cavitation, and propellers in non-uniform flow.
CR: the former ENGI 4011, the former ENGI 5011
LH: 3
OR: tutorial 1 hour per week
PR: ONAE 3054 or the former ENGI 3054

4020 Marine Fluid Dynamics (same as the former ENGI 4020) includes fluid statics; fluid flow phenomena, in general and in marine applications; control volume analysis of fluid motion; conservation of mass, momentum and energy; differential approach to flow analysis; head losses; applications of conservation laws; external vs. internal flow; dimensional analysis and scaling; fluid-structure interaction concepts; potential flow theory, lift and Kutta-Joukowski theorem; viscous flow, boundary layers and drag.
CR: the former ENGI 4020
LH: at least four 3-hour sessions per semester
OR: tutorial 1 hour per week
PR: ONAE 3054 or the former ENGI 3054

5020 Marine Propulsion (same as the former ENGI 5020) is a second course in marine propellers and ship powering. Design and analysis of marine screw propellers and other propulsion devices are covered. Conventional and unconventional propulsion systems are introduced. Methods and philosophy of propeller design are included. Design of fixed-pitch propellers based on lifting line theory and the design of ducted propellers are emphasized. Design of other propulsion systems such as

waterjets and sails is also incorporated.
CR: the former ENGI 5020, the former ENGI 6020
LH: at least two 3-hour sessions per semester
PR: ONAE 4011 or the former ENGI 4011, ONAE 4020 or the former ENGI 4020

5022 Probability and Random Processes in Ocean Engineering (same as the former ENGI 5022) includes basic concepts in probability, random variables, multiple random variables, descriptive statistics. The random processes component reviews mathematics of functions; introduces system input-output relations of continuous-time systems; contrasts time vs frequency domain representations; introduces frequency response plots and the Fourier transform. A probabilistic approach to ship damage, representation of ocean waves (in time and frequency domains), Response Amplitude Operators (RAO), and acceptable levels of risk for design are introduced and applied.
CR: the former ENGI 5022
OR: tutorial one hour per week
PR: Mathematics 2260 or the former Mathematics 3260, ONAE 3001 or the former ENGI 3001

5034 Marine Vibrations (same as the former ENGI 5034) provides an introduction to mechanical vibration with a focus on vibration of marine machinery and on the dynamic response of marine structures. Topics include: single degree of freedom systems – free vibration, energy methods, response to harmonic excitation, response to arbitrary inputs; multi degree of freedom systems – natural frequencies and mode shapes, response to harmonic excitation; frequency response functions; on-board sources of vibration, vibration measurement techniques and instrumentation.
CR: the former ENGI 5034, the former ENGI 5932, the former ENGI 6933, Mechanical and Mechatronics Engineering 6303
LH: at least four 2-hour sessions per semester
PR: Mathematics 2260, Mechanical and Mechatronics Engineering 3301 or the former ENGI 3934

6002 Ship Structures I (same as the former ENGI 6002) examines longitudinal strength, still water and wave bending moment, shear and bending moment curves, Smith Correction, section modulus calculation, torsion and racking forces; bulkhead and girder scantlings, portal frame analysis by moment distribution and energy method; finite element analysis and the use of Classification Society rules for design of midship section. Laboratory sessions cover use of analysis software to illustrate structural behaviour concepts.
CR: the former ENGI 5003, the former ENGI 6002
LH: at least five 3-hour sessions per semester
PR: Civil Engineering 4310 or the former ENGI 4312, ONAE 4007 or the former ENGI 4007 or the former ENGI 7007

6005 Floating Ocean Structures Design (same as the former ENGI 6005) introduces floating structures used in the offshore petroleum industry, along with functional requirements, such as drilling and production, of the platforms. Field development criteria are discussed in the context of platform concept selection and synthesis. Environmental loads are examined, focussing on wave loads and ice loads. Diffraction theory and its application on offshore structures is presented. Offshore safety is discussed in terms of major hazards, risk management, and case studies.
CR: the former ENGI 6005, the former ENGI 7005
LH: 1
PR: ONAE 3001 or the former ENGI 3001, ONAE 3054 or the former ENGI 3054

6036 Dynamics of Ocean Vehicles (same as the former ENGI 6036) examines applications of the linearized equations of motion to ocean vehicle problems with single and multiple degrees of freedom in waves; dynamics of marine vehicles: motions in waves; hydrodynamics effects such as added mass, radiation and viscous damping; strip theory; irregular seaway and motions.
CR: the former ENGI 6030, the former ENGI 6036, the former ENGI 7035
LH: at least two 3-hour sessions per semester
OR: 1 tutorial hour per week
PR: ONAE 4020 or the former ENGI 4020, ONAE 5022 or the former ENGI 5022, ONAE 5034 or the former ENGI 5034 or the former ENGI 5932 or the former ENGI 6933 or Mechanical and Mechatronics Engineering 6303

6046 Marine Engineering Systems (same as the former ENGI 6046, the former ENGI 7045) examines shafting system design; shafting system vibration analysis, study of exciting forces and moments, and balancing of reciprocating and rotating machinery; heat transfer and marine heat exchangers; incompressible fluid flow and piping system design and selection of appropriate pumping devices.
CR: the former ENGI 6046, the former ENGI 7045
LH: 1
PR: Mechanical and Mechatronics Engineering 3401 or the former ENGI 3901, ONAE 5034 or the former ENGI 5034

6055 Marine Cybernetics (same as the former ENGI 6055) examines propulsion and motion control of ships, submersibles and offshore structures. Building upon the student's knowledge of mathematics, mechanics and hydrodynamics provides an introduction to control systems and mathematical modeling of marine systems. Course components include: basic control actions and response of control systems; simulation and design of control systems; dynamic positioning; power management; marine automation.
CR: the former ENGI 6055
LH: at least four 2-hour sessions per semester
PR: ONAE 4011 or the former ENGI 4011, ONAE 5034 or the former ENGI 5034 or the former ENGI 5932 or the former ENGI 6933 or Mechanical and Mechatronics Engineering 6303

7000 Ocean Systems Design (same as the former ENGI 7000) develops concept design methods for marine systems from need definition through to solution selection, including weight, cost and power requirements estimating, selection of principal design characteristics and evaluation of alternative solutions. Students develop a proposal for a marine system design project which will include a statement of requirements, a parametric study, a work plan and schedule. This design project will be completed as a full design in ONAE 8000.
CR: the former ENGI 7000, the former ENGI 7052
LH: 3
PR: ENGI 4102, completion of Academic Term 6 of the Ocean and Naval Architectural Engineering program

7002 Ship Structures II (same as the former ENGI 7002) is an introduction to ship structural safety and rational design. Topics include local strength analysis, elastic, plastic and ultimate strength of plating, frames and grillages, buckling of columns and plates and fatigue and fracture in ships. Laboratory exercises include structural analysis software and physical experiments.
CR: the former ENGI 6003, the former ENGI 7002
LH: at least five 3-hour sessions per semester
PR: ONAE 5022 or the former ENGI 5022, ONAE 6002 or the former ENGI 6002 or the forner ENGI 5003

7003 Small Craft Design (same as the former ENGI 7003, the former ENGI 8003) presents fundamentals of naval architecture and design methodology for small craft. Emphasis is on recreational craft, with special emphasis on sailing vessels. Construction materials, scantlings, performance prediction and seaworthiness are covered. Design problems unique to small craft such as mast design, sail area determination and performance prediction are covered. Students will do a small craft design of their choice. Small weekly design studies will be required.
CR: the former ENGI 7003, the former ENGI 8003
PR: completion of Academic Term 6 of the Ocean and Naval Architectural Engineering program

7033 Marine Hydrodynamics (same as the former ENGI 7033) examines the fundamental equations of hydrodynamics, boundary layers; potential flow, added mass, damping, circulation, and vorticity; numerical methods for hydrodynamic coefficients; water waves and loading for regular and irregular seas.
CR: the former ENGI 7033
LH: at least one 3-hour session per semester
OR: one tutorial hour per week
PR: Mathematics 3202, ONAE 5020 or the former ENGI 5020 or the former ENGI 6020

7036 Manoeuvring of Ocean Vehicles (same as the former ENGI 7036) examines manoeuvrability of ocean vehicles; derivation of linear and nonlinear equations of motion and hydrodynamic coefficients; stability of motion; standard maneuvers such as turning circle, turning spiral, and PMM test; modelling and simulations of engine, propulsion, rudder and transmission systems during manoeuvring; systems for course keeping, autopilot, motion control and dynamic positioning.
CR: the former ENGI 6030, the former ENGI 7035, the former ENGI 7036
LH: at least two 3-hour sessions per semester
OR: 1 tutorial hour per week
PR: ONAE 6036 or the former ENGI 6036

7046 Marine Economics and Ship Construction (same as the former ENGI 7046) examines the macro-economics of the marine transportation industry and identifies and examines the stages of project definition. The basic techniques of project management needed for large scale industrial marine projects, such as ship construction and transportation of natural resources, are introduced. This course examines methods for estimating labour hours, materials, fabrication facilities required and schedule for ship construction. The legal and social aspects of large projects are also examined.
CR: the former ENGI 7046
PR: ENGI 4102, ONAE 6002 or the former ENGI 6002 or the former ENGI 5003

8000 Ocean and Naval Architectural Engineering Project (same as the former ENGI 8000) completes the design project selected and approved in ONAE 7000 The project must illustrate the application and integration of previous design related courses, i.e., decision methods, impact assessments and application of technology. The subject may be ship or offshore structure design, marine system, directed research or a unique

design solution. Lectures will be scheduled as required.
CR: the former ENGI 8000
LH: 3
PR: ONAE 7000 or the former ENGI 7000

8034 Applied Acoustics (same as the former ENGI 8034) provides an introduction to acoustic engineering. Topics include: sound in fluids and solids, wave phenomena, mathematical models of sound waves, sources of sound, frequency analysis, levels and decibels, introduction to psychoacoustics, sound waves in rooms, reverberation time, sound absorbers, sound insulation, room acoustical design, introduction to underwater acoustics, acoustic measurement techniques and instrumentation.
CR: the former ENGI 8034
LH: at least four 3-hour sessions per semester
PR: ONAE 5034 or the former ENGI 5034

8046 Marine Engineering II (same as the former ENGI 8046) builds on the fundamental marine engineering aspects covered in ONAE 6046 to include engineering factors onboard the ship, such as electrical generation, lighting, heating and air conditioning, as well as special systems needed on board the ship for operation, cargo management and navigation.
CR: the former ENGI 8046
PR: ONAE 6046 or the former ENGI 6046

8054 Advanced Marine Vehicles (same as the former ENGI 8054) examines the concepts used in the design of advanced marine vehicles. Emphasis will be given to: structural design of craft constructed from fibre reinforced plastics; high speed marine vehicles (powering, structures, seakeeping and model testing); small craft.
CR: the former ENGI 8054
LH: at least 9 hours per semester
PR: ONAE 6002 or the former ENGI 5003 or the former ENGI 6002

8055 Design and Control of Unmanned Marine Vehicles (same as the former ENGI 8055) examines the formulation of mission statement and design constraints of unmanned marine vehicles, surface and underwater. Major subsystems, including propulsion, power, communication, navigation and control, are introduced. Principles of navigation and control as they pertain to unmanned systems are examined. This course includes hands on experimentation including the design of a small unmanned platform for tank experiments.
CR: the former ENGI 8055
LH: at least four 3-hour sessions per semester
PR: ONAE 6055 or the former ENGI 6055 or approval of the instructor

8074 Arctic Ocean Engineering (same as the former ENGI 8074, the former ENGI 8674) examines marine ice load on ships and marine structures designed for ice covered waters. Topics include types of naturally occurring ice; sea ice formation and characteristics; mechanical strength of sea ice under common modes of ice failure; modes of ice interaction with ships and marine structures; estimation of ice forces on offshore structures; powering requirements for ice breaking ships; regulations and standards for design of ships and offshore structures in arctic environments.
CR: the former ENGI 8074, the former ENGI 8674
LH: at least four 3-hour sessions per semester
PR: Civil Engineering 4310 or the former ENGI 4312, Mechanical and Mechatronics Engineering 3301 or the former ENGI 3934

8075 Finite Element Analysis of Marine Structures (same as the former ENGI 8075) examines application of the finite element method (FEM) to the design and assessment of marine hull structures. Simulation of static, quasi-static, and impact loads on hull structures is discussed. Linear and nonlinear analyses are explored. Practical considerations for finite element model design are discussed.
CR: the former ENGI 8075
LH: 12 weekly 3-hour lab sessions
PR: ONAE 7002 or the former ENGI 7002 or the former ENGI 6003

8900-8999 Special Topics in Ocean and Naval Architectural Engineering will have topics to be studied announced by the Department.

11.7 Process Engineering

In accordance with Senate's *Policy Regarding Inactive Courses*, the course descriptions for courses which have not been offered in the previous three academic years and which are not scheduled to be offered in the current academic year have been removed from the following listing. For information about any of these inactive courses, please contact the Head of the Department. (or the Associate Dean (Undergraduate Studies) of the Faculty in the case of ENGI courses).

Process Engineering courses are identified by a four-digit numbering system, the first two digits signifying the following:

The first digit denotes the academic term during which the course is normally offered.

The second digit denotes the primary areas of study, namely:

0: Process Engineering courses common to both technical streams
1: Chemical and Bioprocess Stream
2: Mineral and Energy Resources Stream
9: Special Topics

Non-departmental Engineering courses are designated by ENGI.

Process Engineering courses are designated by PROC.

3000 Introduction to Sustainable Process Engineering (same as the former ENGI 3600) familiarizes students with the principles and the practical aspects of organic, inorganic, and biochemical processes including the major unit operations and equipment used. It emphasizes process flow sheeting, process variable identification, component and overall material balances, and process design. The course uses extensive examples from industrial processes. In laboratory sessions students are introduced to the laboratory scale process equipment and use HYSYS software to study process characteristics.
CO: Chemistry 1051
CR: the former ENGI 3600
LH: at least five 2-hour sessions per semester

4002 Process Engineering Thermodynamics (same as the former ENGI 4602) extends the study started in Mechanical and Mechatronics Engineering 3401 of thermodynamics, with special reference to chemical process applications: basic laws, thermodynamic properties of pure fluids and mixtures, heat engines, multicomponent systems, thermal/mechanical equilibrium, chemical equilibrium, and thermodynamics of chemical processes. Special emphasis is placed on the application of thermodynamics to practical problems in chemical engineering such as phase equilibria, solutions and reaction equilibria in separations and reaction engineering.
CR: the former Chemistry 2300, the former Chemistry 3300, the former ENGI 4602
PR: Mechanical and Mechatronics Engineering 3401 or the former ENGI 3901

4021 Process Mathematical Methods (same as the former ENGI 4621) introduces numerical methods in chemical engineering processes, solution of sets of linear algebraic equations, solution of non-linear equations, curve fitting and interpolation, numerical integration, numerical differentiation, first order and higher order ordinary differential equations, boundary value problems and partial differential equations. It provides applications of the methods to different aspects of process engineering such as reactor design, separation, process modeling, equipment design and analysis.
CO: PROC 4025 or the former ENGI 4625
CR: the former ENGI 4621
LH: eight 2.5-hour sessions per semester
PR: ENGI 3424 (or Mathematics 2000, Mathematics 2050, and Mathematics 2260)

4025 Process Engineering Calculations (same as the former ENGI 4625) is an introduction to the analysis of chemical processes with an emphasis on mass and energy balances. Stoichiometric relationships, ideal and real gas behaviour are also covered. The course will help Process Engineering majors in their second year to develop a framework for the analysis of flow sheet problems and will present systematic approaches for manual and computer-aided solution of full scale balance problems.
CO: PROC 4002 or the former ENGI 4602. There is no co-requisite for students completing a minor in Applied Science - Process Engineering.
CR: the former ENGI 4625
PR: Mechanical and Mechatronics Engineering 3401 or the former ENGI 3901. Students completing a minor in Applied Science - Process Engineering must successfully complete Chemistry 2301 as the prerequisite instead of Mechanical and Mechatronics Engineering 3401.

4061 Process Fluid Dynamics I (same as the former ENGI 4661) provides process engineering students with fundamentals of fluid mechanics/ dynamics. Topics covered include fluid properties; Newtonian and non-Newtonian fluids; pressure; hydrostatics; control volume and system representation; mass and momentum conservation laws; Euler and Bernoulli equations; viscous fluid flows; laminar and turbulent flow; flow through conduits and pipes; pipe networks; flow measurement devices; momentum devices; concept of boundary layers; dimensional analysis; lift and drag on objects; fluid transportation (pumps and compressors).
CR: the former ENGI 4661, the former ENGI 4913, the former ENGI 4961, the former ENGI 5961
LH: five 1-hour sessions per semester

5001 Mass Transfer (same as the former ENGI 5601) covers diffusive as well as convective mass transfer, mass transfer correlations, and the application to absorption and membrane separations.
CR: the former ENGI 5601
LH: at least seven 2-hour sessions per semester
PR: PROC 4002 or the former ENGI 4602 (or Chemistry 2301)

5002 Process Heat Transfer (same as the former ENGI 5602) is a study of concepts involved in heat transfer. Topics include applications of continuity and energy equations, fundamentals of heat transfer, modes of heat transfer, conduction, convection and radiation heat transfer, boiling and condensation, evaporation, and heat exchanger analysis and design.
CR: the former ENGI 5602, the former ENGI 6901
LH: one 3-hour session per semester
PR: PROC 4002 or the former ENGI 4602, PROC 4061 or the former ENGI 4661 or Mechanical and Mechatronics Engineering 4501 or the former ENGI 4961 or the former ENGI 5961

5071 Process Equipment Design I (same as the former ENGI 5671) introduces the principles of unit operations, grouped into four sections: fluid mechanics, heat transfer, mass transfer and equilibrium stages, and operations involving particulate solids. It also includes design and operation fundamentals of unit operations: size reduction, filtration, evaporation, drying, crystallization, and humidification, and membrane separation.
CO: PROC 5001 or the former ENGI 5601
CR: the former ENGI 5671
LH: at least six 3-hour sessions per semester
PR: PROC 4021 or the former ENGI 4621, PROC 4025 or the former ENGI 4625

5092 Chemistry and Physics of Engineering Materials introduces the structure and properties of engineering materials, in particular metals, alloys, semiconductors, ceramics, glasses and polymers. Topics include a review of atomic bonding, discussion of basic crystalline and amorphous structures, phase diagram, mechanical properties of the materials. Selection of materials for process engineering applications, corrosion and degradation of material will be also covered in the course.
CR: Mechanical and Mechatronics Engineering 3101, Mechanical and Mechatronics Engineering 5103
PR: completion of Academic Term 4 of the Process Engineering program

6025 Process Modelling and Simulation introduces the concepts of process model building and its application in design and process operations. It includes the fundamentals of process modelling, lumped parameter dynamic models, distributed parameter dynamic models, application of process models, and computer aided process design. The course provides hands on experience to use a process simulator effectively for development and analysis of flowsheets, mass and energy balances, sizing of individual equipment and process units including reactor, separator, and heat exchangers.
CR: the former ENGI 5621, the former ENGI 6621, the former PROC 6021
LH: ten 3-hour sessions per semester
PR: PROC 4021 or the former ENGI 4621, PROC 4025 or the former ENGI 4625

6031 Chemical Reaction Engineering (same as the former ENGI 6631) will cover the fundamentals of chemical kinetics and reaction rate expressions as well as the types of reactors, homogeneous and heterogeneous (catalytic) reactors, and the interrelation between transport phenomena and reaction engineering as it applies to process design. It also includes an overview of non-ideal reactors and an introduction to bio reactors.
CR: the former ENGI 6631
LH: four 2-hour sessions per semester
PR: PROC 4021 or the former ENGI 4621, PROC 4061 or the former ENGI 4661 or Mechanical and Mechatronics Engineering 4501 or the former ENGI 4961 or the former ENGI 5961

6061 Process Fluid Dynamics II (same as the former ENGI 6661) builds upon the materials introduced in Process Fluid Dynamics I. The course covers important aspects of fluid dynamics principles and applications in process engineering, including; continuity equation; differential governing equations of fluid momentum; conservation laws in chemical/process engineering; ideal and non-ideal flow; compressible and incompressible flow; boundary layer theory for laminar and turbulent flow; multiphase flow; introduction to CFD; turbomachinery; fluid flow features of unit operations.
CR: the former ENGI 5913, the former ENGI 5962, the former ENGI 6661, the former ENGI 6961
LH: three 1-hour sessions per semester
PR: PROC 4061 or the former ENGI 4661 or Mechanical and Mechatronics Engineering 4501 or the former ENGI 4961 or the former ENGI 5961

6071 Process Equipment Design II (same as the former ENGI 6671) will cover design and operation of equilibrium stage separation processes including distillation, extraction, and leaching. It will also cover advanced concept of equipment design such as heterogeneous system, multiphase system, absorption, and adsorption operation and computer assisted design. This course will use HYSIS and other process equipment design tools.
CR: the former ENGI 6671
LH: at least four 2-hour sessions per semester
PR: PROC 5001 or the former ENGI 5601, PROC 5071 or the former ENGI 5671

6151 Sustainable Engineering in Processing Industries (same as the former ENGI 6651) will introduce students to sustainable development and its application to processing operations. Areas such as traditional economic growth, materials cycles, methods for measuring environmental impact, life cycle analysis, waste treatment technologies and recycling technologies will be covered. In addition, the concept of industrial ecology will be included.
CR: the former ENGI 6651
PR: PROC 4025 or the former ENGI 4625, PROC 5001 or the former ENGI 5601

6202 Natural Resources Geology and Formation Evaluation (same as the former ENGI 6602) covers the fundamentals of petroleum geology, formation evaluation and well logging. Topics include rock types; economic minerals; sedimentary basins and formation; hydrocarbon traps and seals; reservoir fluids; well and core logging fundamentals; in situ stress; lithology identification and permeability; formation and fluid identification; formation density and porosity; pore fluids and saturation; integrated logging and resource evaluation.
CR: the former ENGI 6602
PR: completion of Academic Term 5

7021 Process Dynamics and Control (same as the former ENGI 7621) familiarizes students with the scientific and engineering principles of process dynamics and control. Students will apply and integrate knowledge of chemical engineering to identify, formulate and solve process dynamics problems and develop control systems. Modern computational techniques and tools will be used for solving chemical process control problems. Also students will become familiar with industrial control systems.
CR: the former ENGI 7621
LH: at least six 2-hour sessions per semester
PR: PROC 6025 or the former PROC 6021 or the former ENGI 6621 or the former ENGI 5621

7040 Process Engineering Project I (same as the former ENGI 7640) gives students the opportunity to apply the knowledge gained in previous design and technical courses to complete a high-level design of a process plant or major modification to a process plant. The goal is to expose students to process design, practical design issues, and to provide experience in the complete design process as applied to real devices. Students will work in groups to design a process system. This course is a precursor to PROC 8040.
CR: the former ENGI 7640
LC: scheduled as required
PR: ENGI 4102, completion of academic term 6 of the Process Engineering program

7077 Process Plant Design and Economics (same as the former ENGI 8677) will provide a comprehensive picture of the availability and design of both traditional and current process equipment. Economic and optimization issues relevant to investment, product-cost estimation, and profitability analysis will also be addressed. The course will provide students with tools to evaluate the economics of process industries reflecting current economic criteria, and provide helpful guidelines to approaching, defining, and solving optimization problems.
CR: the former ENGI 8677
PR: PROC 6071 or the former ENGI 6671

7123 Process Simulation - inactive course.

7125 Process Data Analytics covers all necessary elements, beginning from data collection to model development, to conduct a data analysis project in a process plant. The course focuses on data quality evaluation and preprocessing of data to ensure the fidelity of data. A range of unsupervised techniques including several variants of principal component analysis (PCA), support vector machine (SVM) and clustering algorithms will be covered. Students will also receive hands on training on various Matlab toolboxes and Python libraries.
CR: the former ENGI 7623, the former PROC 7123
PR: PROC 6025 or the former ENGI 5621 or the former ENGI 6621 or the former PROC 6021

7131 Advanced Reactor Design will build on previous courses in reaction engineering with more analysis of reactor designs involving complex fluid flow and/or complex kinetics and catalysts. The course will also cover bioreactor design.
PR: PROC 6031 or the former ENGI 6631

7141 Bioprocess Engineering I covers the fundamentals of chemical engineering applied to biomass/biological based processes, from valorisation of virgin/waste biomass to biomass as the bioprocess. The focus is in bioprocessing as it relates to the natural resource industries and associated markets. This course covers the fundamentals related to biomass and bioprocessing including: composition of biomass and biomass processing (biochemical, thermochemical, chemical, and physical), and associated products. The course will highlight “green” processes that minimize waste and energy.
PR: PROC 5001 or the former ENGI 5601, PROC 5002 or the former ENGI 5602, PROC 6031 or the former ENGI 6631

7171 Safety and Risk Engineering (same as the former ENGI 8671) begins with an overview of safety and risk issues in the offshore oil and gas industry. The course examines regulatory requirements; hazards and

structured analysis tools; risk terminology and quantified risk analysis (QRA) techniques; and safety assessment studies. The course includes project and case studies.
CR: the former ENGI 8671
PR: completion of Academic Term 6 or registration in the Minor in Applied Science - Process Engineering

7291 Sustainable Oil Production & Gas Storage I (same as the former ENGI 8691) examines the fundamentals to sustainably producing fossil fuels, in-situ carbon utilization and sequestration, and hydrogen storage. Students will be able to describe rock and fluid properties then use their knowledge of Darcy's Law and apply it to determine how much CO2/H2 can be stored or oil/gas produced. Students will learn material balances of single phase flow (liquid and gas) in porous media, natural forces, well inflow and performance, and how to predict and maximize fluid injection and production.
CR: the former ENGI 8691
PR: completion of Academic Term 6

7293 Mineral Processing and Tailings Management covers the fundamentals of mineral processing and emerging practices and technologies that result in the generation of a mineral concentrate. Topics include rock fragmentation leading to run-of-mine ore, comminution and mineral liberation, sensor-based ore sorting, gravity separation, magnetic separation, electrical separation, froth flotation, dewatering, and tailings transportation and storage. Advanced topics include process simulation and control, practical processes of metallic and non-metallic ore dressing.
LH: at least five 3-hour sessions per semester
PR: completion of Academic Term 6

8040 Process Engineering Project II (same as the former ENGI 8640) is a design project that illustrates the application of previous engineering science and design related courses. Projects will be done by teams of students with individuals concentrating their participation in their own engineering discipline. The project topic will be from the process industry which includes the offshore oil and gas industry, mining and metal processing industry and chemical process industry.
CR: the former ENGI 8640
LC: scheduled as required
PR: PROC 7040 or the former ENGI 7640

8125 Artificial Intelligence in Process Engineering covers the fundamentals of machine learning and artificial intelligence relevant to process and petroleum engineering systems. Topics will include regression analysis, concepts of optimization for machine learning, Neural Network, Convolution Networks, Recurrent and Recursive Nets, Reinforcement Learning, as well as Statistical Machine Learning with a focus on the use of process data.
PR: completion of Academic Term 6

8141 Bioprocess Engineering II focuses on the introduction of downstream bioprocessing, with applications covering biopharmaceutical manufacturing, extraction of oils from natural sources, minerals bioprocessing, and environmental applications. Bioseparation techniques using supercritical fluid extraction, crystallization and liquid and ion-exchange chromatography will be covered in this course.
PR: PROC 7141

8151 Industrial Pollution Prevention and Control (same as the former ENGI 7651) is designed to introduce methods of industrial pollution assessment and control. Topics include waste characterization, water pollution assessment, water pollution control, air pollution assessment and control, solid waste assessment and control, pollution prevention, environmental risk assessment and risk based decision making.
CR: the former ENGI 7651
PR: PROC 6151 or the former ENGI 6651, PROC 6071 or the former ENGI 6671

8170 Reliability Engineering (same as the former ENGI 8670, the former PROC 8270) is an introduction to reliability engineering; physics of failure and failure mechanism, reliability measures and assessment; reliability of components and parts; complex system reliability and availability analysis; and field reliability assessment. The course includes case studies and a project.
CR: the former ENGI 8670, the former PROC 8270
PR: completion of Academic Term 6

8276 Decarbonization Strategies in Gas Industry (same as the former ENGI 8676) investigates the carbon emitted from the gas industry and how to reduce it. The course describes gas processes, design methods, operating procedures, and challenges of gas production, carbon capture facilities and their use in blue hydrogen production. The course covers separation operations, hydrate prevention and control, gas dehydration, NGL recovery and dew point control, gas transmission and pipeline design and transportation systems.
CR: the former ENGI 8676
PR: completion of Academic Term 6

8291 Sustainable Oil Production & Gas Storage II (same as the former ENGI 8690, the former PROC 8290) continues to examine flow in porous media expanding to multiphase flow and the challenges of producing and injecting fluids into a reservoir accounting for capillary pressure and phase behaviour. Flow assurance challenges, enhanced recovery methods, CO2 utilization and storage, as well as strategies to optimize production and gas injection
CR: the former ENGI 8690, the former PROC 8290
PR: completion of Academic Term 6

8292 Drilling Engineering (same as the former ENGI 8692, the former PROC 7292) covers both offshore and onshore drilling operations and includes: rotary drilling rig operations, well construction sequence, drill string, drill bits, well bore hydraulics, casing and well heads, cementing, well control, directional and horizontal drilling, well planning and fishing operations, and extended reach, horizontal and multilateral well drilling techniques.
CR: the former ENGI 8692, the former PROC 7292
LH: two 3-hour lab sessions per semester
PR: completion of Academic Term 6

8293 Extractive Metallurgy covers the fundamentals of pyrometallurgy, hydrometallurgy and electrometallurgy that extract metals from ores and mineral concentrates. Topics include thermodynamics and reaction kinetics of extractive metallurgical processes; electrolytic reduction of molten salts; metal refining processes; materials preparation in the metallurgical industry; equipment selection and operation; and sustainable technologies and practices.
CR: the former ENGI 7691, the former PROC 8191
LH: at least four 2-hour sessions per semester
PR: PROC 7293

8294 Downstream Processing - inactive course.

8296 Petroleum Refining Engineering - inactive course.

8900-8999 Special Topics in Process Engineering will have topics to be studied announced by the Department.

11.8 Work Terms and Non-Credit

Engineering work terms and non-credit courses are designated by ENGI.

001W Engineering Work Term 1 provides opportunity for an introductory experience in an engineering work environment. Students are expected to learn, develop and practise the basic standards of behaviour, discipline and performance normally found in a professional work environment. They are expected to learn the basics of technical writing and to become familiar with the various communications tools used in an engineering work environment.
CH: 0
LC: 0
PR: ENGI 200W

002W Engineering Work Term 2 requires students, under supervision, to contribute positively to the engineering and problem solving processes practised in the work environment. They are expected to set objectives, take direction, work independently as required, learn professional behaviours, and function as effective team members. An ability to investigate work-related concepts should be demonstrated. Students should become better familiarized with the use of engineering tools, data analysis, prioritization of assignments, and effective communication of technical information.
CH: 0
LC: 0
PR: ENGI 001W, ENGI 3101

003W Engineering Work Term 3 requires greater participation in the students' engineering discipline. They become more experienced and proficient in problem solving and use of appropriate design processes. They should demonstrate speed and accuracy in their work, accept greater responsibility and be able to function with less direct supervision. Good judgement, increased initiative and improved analytical skills are expected to develop at this stage. Students should better appreciate the attitudes, responsibilities, and ethics expected of engineers.
CH: 0
LC: 0
PR: ENGI 002W

004W Engineering Work Term 4 requires students to engage in complex facets of engineering. Participation in their selected engineering discipline is expected. Students should be able to contribute independently to design and/or problem solving processes, understand their responsibility to society and the environment, understand project management strategies, think critically, and use engineering tools appropriately. The level of responsibility should reflect their academic background and experience. Good teamwork skills are expected and leadership skills may be developed.
CH: 0
LC: 0
PR: ENGI 003W

005W Engineering Work Term 5 requires students to continue to engage in

advanced facets of engineering. Participation in their selected engineering discipline is expected. Students should apply skills independently in engineering analysis, contribute to a safe work environment, and utilize engineering tools while understanding their limitations. They will contribute significantly to design and/or problem solving processes, and demonstrate project management and leadership abilities. The level of responsibility should be commensurate with their academic background and experience.
CH: 0
LC: 0
PR: ENGI 004W

006W Engineering Work Term 6 requires students to further engage in various advanced facets of engineering. Participation in their selected engineering discipline is expected. Students should gain further appreciation of the use and importance of acquired analytical skills in engineering analysis, and significantly contribute to design and/or problem solving processes. The level of responsibility should be commensurate with their academic background and experience. Work scope should be mostly independent, with longer timelines, and with the possibility of leadership opportunities.
CH: 0
LC: 0
PR: ENGI 005W

200W Work Term Preparation and Professional Development introduces the Co-operative Education process and professional development, and prepares the student for work terms. This course is designed to assist students to apply for, interview and obtain the first work term, as well as to be prepared for a professional work environment. It is a one semester course offered during the Fall and Winter semesters of Engineering One, prior to a student's first work term competition. This course is graded PAS or FAL.
AR: attendance is required
CH: 0
LC: as scheduled

Shea, R.J., B.A., B.S.W., M.Ed. *Memorial*, Ed.D, *Calgary*

Up-to-date personnel listings are available at www.mi.mun.ca/departments.

1 The Memorial University of Newfoundland Code

The attention of all members of the University community is drawn to the section of the University Calendar titled **The Memorial University of Newfoundland Code**, which articulates the University's commitment to maintaining the highest standards of academic integrity.

2 Student Code of Conduct

Memorial University of Newfoundland expects that students will conduct themselves in compliance with University Regulations and Policies, Departmental Policies, and Federal, Provincial and Municipal laws, as well as codes of ethics that govern students who are members of regulated professions. The *Student Code of Conduct* outlines the behaviors which the University considers to be non-academic misconduct offences, and the range of remedies and/or penalties which may be imposed. Academic misconduct is outlined in ***UNIVERSITY REGULATIONS* - Academic Misconduct** in the University Calendar.

For more information about the *Student Code of Conduct*, see www.mun.ca/student.

3 School Description

The Fisheries and Marine Institute was established in 1964 as the College of Fisheries, Navigation, Marine Engineering and Electronics. It became affiliated with the University in 1992 and since then has continued to grow as a world-class centre of marine technology and education. The official name is the Fisheries and Marine Institute of Memorial University of Newfoundland, but it is commonly known as the Marine Institute.

The main campus of the Marine Institute overlooks the city of St. John's from within Pippy Park, which has extensive hiking trails and recreational facilities. This building houses a flume tank, a seafood processing plant, freshwater aquaculture research and development facilities, and extensive marine simulation facilities. The Dr. C. R. Barrett Library, located at this campus, houses one of Canada's largest marine-related collections. In addition, the Institute manages the Offshore Safety and Survival Centre (OSSC) in Foxtrap, the Safety and Emergency Response Training (SERT) Centre in Stephenville, a regional fisheries and marine training center in Lewisporte, and a marine base, The Launch, in Holyrood.

The Marine Institute provides a full range of programs focusing on fisheries and marine science and technology. In addition to undergraduate and graduate degrees, the Institute offers advanced diplomas, diplomas of technology, and technical and vocational certificates. The Institute also runs a variety of short courses and industrial response programs.

All programs and courses are designed to provide students with the knowledge and skills required for success in the workforce. The Institute seeks the advice of industrial program advisory committees in the ongoing development and review of programs. Whenever appropriate, it submits programs for national accreditation, providing graduates with mobility in professional employment.

For information concerning fees and charges, see the Financial and Administrative Services website at www.mun.ca/finance/fees/.

For information concerning scholarships, bursaries and awards, see www.mun.ca/scholarships/scholarships.

3.1 The Marine Institute Students' Union (MISU)

The Marine Institute Students' Union (MISU) was incorporated in 1991. It is committed to the provision of services to students as well as representing the student body at the national, provincial and institute levels in matters affecting the quality of student life.

The MISU is a prominent member of the Canadian Federation of Students (CFS). The CFS provides a voice for students at over 70 universities, colleges, and technical institutes across Canada including more than 32,000 students in Newfoundland and Labrador. The national body has a strong presence in Ottawa and ensures students' opinions are known on Parliament Hill. Services provided by CFS include the National Student Health Network, student saver cards, Student Work Abroad Program (SWAP), and International Student Identity Cards. The CFS Newfoundland and Labrador (CFS-NL) ensures students' opinions are known in the Provincial House of Assembly. The MISU takes part in the CFS bi-annual conferences to discuss and form policies on behalf of students.

Within the Institute, the MISU has representation on a number of committees, including the Marine Institute Industry Advisory committee and the Academic Council, where the Union members ensure that student well-being is at the forefront in all policies affecting student life. The MISU administers the student health plan. Many social and recreational activities are planned and sponsored by the MISU including Winter Carnival held during the last week of January. Profits from the social activities are returned to the students in the form of scholarships. The MISU manages and maintains the student lounge -The Mariner's Lounge.

4 Description of Degree and Certificate Programs

Students must meet all regulations of the Marine Institute in addition to those stated in the ***UNIVERSITY REGULATIONS* - General Academic Regulations (Undergraduate)**. For information concerning admission/readmission to the University and general academic regulations (undergraduate), refer to ***UNIVERSITY REGULATIONS***.

For information about non-degree programs and upgrading opportunities refer to www.mi.mun.ca.

4.1 General Degrees

The Marine Institute offers two undergraduate degrees: a Bachelor of Maritime Studies and a Bachelor of Technology. For specific details on each degree refer to the appropriate **Degree Program Regulations**.

4.1.1 Bachelor of Maritime Studies

The Bachelor of Maritime Studies program prepares graduates for career advancement in Maritime Management or Safety Management industries. It is designed for students who have graduated from an accredited diploma of technology program that is applicable to one of two major areas of study. Courses in the program provide the student with an introduction to the art and science of managing and running a maritime-focused business. The program major consists of 39 credit hours in addition to work completed in a diploma program. All Maritime Studies (MARI) courses in the program are normally available online. Students should check with other University departments to determine whether courses are available on Campus or online.

The major areas of study are:

4.1.1.1 Major in Maritime Management

The Major in Maritime Management is normally chosen by students who have graduated from accredited, or Transport Canada approved, diploma of technology programs in the marine fields.

4.1.1.2 Major in Safety Management

The Major in Safety Management is open to all students eligible for the Major in Maritime Management but also includes any student holding a three-year CTAB or TAC accredited technology diploma or those having a CRSP designation.

4.1.2 Bachelor of Technology

The Bachelor of Technology program prepares graduates for career advancement in health science technology or engineering technology or applied science industries. It is designed for students who have graduated from an accredited diploma of technology program that is applicable to one of two major areas of study. Courses in the program provide the student with an introduction to human resource and business management concepts, and the social contexts in which their careers will be based. The program consists of 39 credit hours in addition to work completed in a diploma program and can be taken on a full-time or part-time basis.

The major areas of study are:

4.1.2.1 Major in Engineering Technology and Applied Science

The Engineering Technology and Applied Science Major is normally chosen by students who have an engineering technology or applied science diploma.

4.1.2.2 Major in Health Sciences Technology

The Health Sciences Technology Major is normally chosen by students who have a health sciences technology diploma.

4.2 Certificate Program

An undergraduate certificate program at the Marine Institute offers a flexible option for students seeking to develop specialized knowledge and competencies. It provides a starting point for university studies or acts as an adjunct to an undergraduate degree. It is not designed to satisfy specific employment credentials. It is sufficiently specialized to ensure its academic integrity and normally features at least one required anchor course that is taken at the beginning of the program. Undergraduate certificate programs introduce students to a focused subject area, placing greater emphasis on foundation-level knowledge.

4.2.1 Certificate in Leadership

The Certificate in Leadership is administered by the School of Ocean Technology and is designed for those who are interested in exploring the field of leadership. Its goal is to enhance the leadership skills of the leaders of tomorrow while strengthening the relationships between the civilian and military domains and Canadian universities.

A student interested in an undergraduate Certificate in Leadership is first encouraged to consult with the Coordinator of Programs or the Program Chair to discuss the requirements of the program.

5 Admission/Readmission Regulations for Degree and Certificate Programs

In addition to meeting the admission/readmission requirements for the University, students must also meet the admission/readmission requirements for the Marine Institute. See ***UNIVERSITY REGULATIONS*** **- Admission/Readmission to the University (Undergraduate)** for University requirements.

5.1 General Information

1. The application for admission or readmission to the University is submitted online at www.mun.ca/undergrad/admissions/apply.

Table 1 Application Deadlines

Fall	June 30 (Official transcripts due July 15)
Winter	October 15 (Official transcripts due October 30)
Spring	March 15 (Official transcripts due March 30)

2. Students may not obtain both a Bachelor of Maritime Studies and a Bachelor of Technology degree based upon completion of the same diploma of technology.
3. Students may not obtain a Bachelor of Maritime Studies in more than one major. Students wishing to further their studies in either Maritime Management or Safety Management are strongly encouraged to consider a minor in Safety Management or apply to the School of Graduate Studies for the Master of Maritime Management program.

5.2 Admission Requirements for Applicants to the Bachelor of Maritime Studies Program

1. The application for admission or readmission to the University is submitted online at www.mun.ca/undergrad/admissions/apply. This application must include all required documentation including proof of the diploma or certificate required for admission in a specific category.
2. **Categories for admission to the Bachelor of Maritime Studies, Major in Maritime Management**

   Applicants must meet the general admission/readmission requirements of the University and be eligible for admission to the Bachelor of Maritime Studies, Major in Maritime Management program in one of the following categories:

   - Category A: applicants holding a diploma from the Marine Institute in nautical science, marine engineering technology, naval architecture technology or marine engineering systems design technology,

- Category B: applicants holding a Canadian Technology Accreditation Board accredited, or Transport Canada approved, diploma in marine engineering technology or nautical science,
- Category C: applicants holding a Canadian or non-Canadian diploma similar to an accredited or Transport Canada approved Marine Institute diploma in nautical science, marine engineering technology, naval architecture technology or marine engineering systems design technology,
- Category D: applicants holding a Transport Canada Certificate of Competency at the Master Mariner, Fishing Master First Class or Engineering First Class level or equivalent,
- Category E: applicants who have Canadian Forces (Naval Operations) training acceptable to the Admissions Committee.

3. **Categories for admission to the Bachelor of Maritime Studies, Major in Safety Management**

   Applicants must meet the regular admission requirements of the University and be eligible for admission to the Bachelor of Maritime Studies - Major in Safety Management program in one of the following categories:

   - Category A: applicants holding a diploma from the Marine Institute in nautical science, marine engineering technology, naval architecture technology, marine engineering systems design technology, marine environmental technology, or food technology
   - Category B: applicants holding a diploma of technology in engineering/applied science technology accredited by the Canadian Technology Accreditation Board (CTAB), or Technology Accreditation Canada (TAC);
   - Category C: applicants holding a diploma of technology comparable to a Marine Institute or College of the North Atlantic three-year accredited diploma;
   - Category D: applicants who have Canadian Forces training acceptable to the Admissions Committee;
   - Category E: applicants who hold a Canadian Registered Safety Professional (CRSP) designation.

4. Applications to the program will be considered by the appropriate admissions committee(s).
5. In accordance with the ***UNIVERSITY REGULATIONS*** **- Residence Requirements - Second Degree**, students completing the Bachelor of Maritime Studies program, as a second degree, must successfully complete all required courses in their major area of study within the Bachelor of Maritime Studies program.

5.3 Admission Requirements for Applicants to the Bachelor of Technology Program

1. The application for admission or readmission to the University is submitted online at www.mun.ca/undergrad/admissions/apply. This application must include all required documentation including proof of the degree, diploma or certificate required for admission in a specific category.
2. **Categories for admission to the Bachelor of Technology Program**

   Applicants must meet the regular admission requirements of the University and be eligible for admission in one of the following categories:

   - Category A: applicants holding a diploma of technology accredited by the Canadian Technology Accreditation Board (CTAB) or Technology Accreditation Canada (TAC), or the Canadian Medical Association (CMA),
   - Category B: applicants holding a diploma of technology, excluding nautical science, from the Marine Institute; applicants holding a diploma of technology comparable to a Marine Institute diploma of technology; applicants who hold a diploma of technology from an institution with which the Marine Institute has an articulation agreement as acceptable to the Admissions Committee,
   - Category C: applicants holding a Certified Engineering Technologist (CET) designation or a Professional Technologist (PTech) designation,
   - Category D: applicants who have Canadian Forces training acceptable to the Admissions Committee,
   - Category E: applicants who hold an undergraduate degree which is based in Science and Technology acceptable to the Admissions Committee.

3. Upon acceptance into the program, students will be admitted to one of the two majors: the Major in Engineering and Applied Science Technology or the Major in Health Sciences Technology. Students may be permitted to change their major with the approval of the Marine Institute Committee on Undergraduate Studies.
4. Applications to the program will be considered by the appropriate admissions committee(s).
5. In accordance with the ***UNIVERSITY REGULATIONS*** **- Residence Requirements - Second Degree**, students completing the Bachelor of Technology program, as a second degree, must successfully complete all required courses in their major area of study within the Bachelor of Technology program.

5.4 Admission Requirements for Applicants to the Certificate in Leadership

1. The application for admission or readmission to the University is submitted online at www.mun.ca/undergrad/admissions/apply. This application must include all required documentation including proof of the diploma or certificate required for admission in a specific category.
2. An applicant must meet ***UNIVERSITY REGULATIONS*** **- Admission/Readmission to the University (Undergraduate)** requirements.
3. An applicant must have either at least three years of full-time work experience that is deemed acceptable by the Admissions Committee of the School of Ocean Technology, or a minimum of 30 credit hours.

6 Degree Program Regulations

6.1 Bachelor of Maritime Studies

6.1.1 Maritime Management Major

- A student must complete 39 credit hours in addition to the work which was required under their category of admission.
- The required and elective courses are listed in **Table 2 Bachelor of Maritime Studies - Maritime Management Major**.
- A maximum of 9 transfer credit hours applicable to the degree may be used to meet the degree requirements.
- When transfer credit has been granted for a course(s) taken to satisfy the requirements for admission, a student must take an additional elective University course(s).
- To meet the academic requirements for a Bachelor of Maritime Studies a candidate shall successfully complete the following program with a minimum overall average of 60% and a minimum numeric grade of 50% in each course required for the degree unless stated otherwise within the course description.
- A student must take 39 credit hours with 21 credit hours from the required courses and 18 credit hours from the electives.
- At least three electives must be chosen from **Group A** and at least one elective must be chosen from **Group B** listed in **Table 2 Bachelor of Maritime Studies - Maritime Management Major**

Table 2 Bachelor of Maritime Studies - Maritime Management Major

Required Courses	Group A Electives	Group B Electives
3 credit hours in a Critical Reading and Writing (CRW) course or 3 credit hours in English at the 1000 level (excluding English 1020 and 1021) MARI 4001 MARI 4002 MARI 4103 MARI 4105 MARI 4106 MARI 4116 or TECH 4025 or Statistics 1510 or 2500 or equivalent	MARI 4005 MARI 4006 MARI 4007 MARI 4008 MARI 4101 MARI 4102 MARI 4104 MARI 4107 MARI 4113	Business 2102 or 2111 Business 3005 Economics 1010 or the former 2010 Economics 1020 or the former 2020 Geography 3510 MARI 4004 Philosophy 2330 or the former 2571 Sociology 2120 TECH 4019 TECH 4020 TECH 4030 TECH 4040 TECH 4050

6.1.2 Safety Management Major

- A student must complete 39 credit hours in addition to the work which was required under their category of admission.
- The required and elective courses are listed in **Table 3 Bachelor of Maritime Studies - Safety Management Major**.
- When transfer credit has been granted for a course(s) taken to satisfy the requirements for admission, a student must take an additional elective University course(s).
- To meet the academic requirements for a Bachelor of Maritime Studies a student shall successfully complete the program with a minimum overall average of 60% and a minimum numeric grade of 50% in each course required for the degree unless stated otherwise within the course description.
- A student must take 39 credit hours with 27 credit hours from the required courses and 12 credit hours from the electives.
- At least two electives must be chosen from **Group A** and at least one elective must be chosen from **Group B** listed in **Table 3 Bachelor of Maritime Studies - Safety Management Major**.

Table 3 Bachelor of Maritime Studies - Safety Management Major

Required Courses	Group A Electives	Group B Electives
3 credit hours in a Critical Reading and Writing (CRW) course or 3 credit hours in English at the 1000 level (excluding English 1020 and 1021) MARI 4004 MARI 4101 MARI 4103 MARI 4104 MARI 4107 MARI 4109 MARI 4110 MARI 4111	MARI 4001 MARI 4008 MARI 4112 MARI 4113 MARI 4114 MARI 4115 MARI 4116 or TECH 4025 or Statistics 1510 or 2500 or equivalent	Business 2102 or 2111 MARI 4002 MARI 4106 Philosophy 1100 Philosophy 2330 Sociology 2120 or TECH 4030 TECH 4019 TECH 4040

6.1.3 Safety Management Minor

1. A student who is completing a degree program which provides for the completion of a Minor may complete a Minor in Safety Management.
2. Declaration of the Minor in Safety Management may be made at the time of application to the University or by means of the Declaration/Change of Academic Program form following admission to the University.
3. A maximum of 9 credit hours from the Major may be used to satisfy the requirements of the Minor.
4. A Minor in Safety Management shall be comprised of the following Safety Management courses: MARI 4004, 4101, 4104, 4107, 4109, 4110 and 4111 as well as 3 credit hours chosen from MARI courses within the **Group A Electives** in **Table 3 Bachelor of Maritime Studies - Safety Management Major**.
5. A student who has taken courses appropriate to their Minor at another university is required to complete at least 15 credit hours in courses from the Minor subject at this University.

6.2 Bachelor of Technology

- A student must complete 39 credit hours in addition to the work which was required under the student's category of admission.
- A student completing the Bachelor of Technology as a second degree must complete all 39 credit hours with a minimum of 30 credit hours being above and beyond the first degree.
- The required and elective courses are listed in **Table 4 Bachelor of Technology - Engineering Technology and Applied Science Major** and **Table 5 Bachelor of Technology - Health Science Technology Major**.
- A maximum of 9 transfer credit hours applicable to the degree may be used to meet the degree requirements.
- When transfer credit has been granted for a course(s) taken to satisfy the requirements for admission, a student must take an additional elective University course(s).
- To meet the academic requirements for a Bachelor of Technology a student shall successfully complete the program with a minimum overall average of 60% and a minimum numeric grade of 50% in each course required for the degree unless stated otherwise within the course description.

6.2.1 Engineering Technology and Applied Science Major

- A student must take 39 credit hours with 24 credit hours from the required courses and 15 credit hours from the electives.
- At least one elective must be chosen from each of the groups A and B.

Table 4 Bachelor of Technology - Engineering Technology and Applied Science Major

Required Courses	Group A Electives	Group B Electives
3 credit hours in a Critical Reading and Writing (CRW) course or 3 credit hours in English at the 1000 level (excluding English 1020 and 1021) TECH 4010 TECH 4019 TECH 4020 TECH 4025 or Statistics 1510 or 2500 or equivalent TECH 4040 TECH 4060 TECH 4400	Business 2102 or 2111 Business 3005 Economics 3360 MARI 4008 TECH 4011 TECH 4012 TECH 4013 TECH 4017 TECH 4050 TECH 4070 TECH 4080 TECH 4090 or Business 1000 TECH 4130	Economics 1010 or the former 2010 Economics 1020 or the former 2020 Economics 3080 Philosophy 1100 Philosophy 2330 or the former 2571 TECH 4014 TECH 4015 TECH 4016 TECH 4030 or Sociology 2120 or Geography 3015 or Sociology 3015 TECH 4055 TECH 4120

6.2.2 Health Science Technology Major

- A student must take 39 credit hours with 18 credit hours from the required courses and 21 credit hours from the electives.
- At least one elective must be chosen from each of the groups A, B, and C.

Table 5 Bachelor of Technology - Health Science Technology Major

7 Certificate Program Regulations

7.1 Certificate in Leadership

- The undergraduate Certificate in Leadership consists of 24 credit hours and may be completed on a full-time or part-time basis.
- An overall average of 60% or higher is required in the 24 credit hours required for the program. The required and elective courses are listed in **Table 6 Certificate in Leadership**
- A student must also comply with all regulations under ***UNIVERSITY REGULATIONS*****, Certificate Programs, Regulations for a First Certificate** or **Regulations for a Second Certificate**, as appropriate.
- Courses offered by the Marine Institute satisfying another University program may also be used to satisfy the requirements of a Marine Institute certificate program, subject to both programs' regulations.
- Courses satisfying the Major, Minor or elective components of an undergraduate degree may also be used to satisfy the requirements of an undergraduate certificate program.
- Not all courses are offered every semester. A student is strongly advised to consult with the Program Chair or the Coordinator of Programs for assistance with course planning.

Table 6 Certificate in Leadership

Required Courses	Elective Courses
LEAD 3000, 3006, 3007, 4001, 4002, 4003	**9 credit hours as follows:** 3 credit hours chosen from **Electives A (Related Professional Competencies)**: Business 1000, Business 3310 or Business 2300, LEAD 4004, 4005, a 3000 or 4000 level course in the Domain of Leadership with prior approval of the Program Chair, or a 3000 or 4000 level course in the Domain of Ethics with prior approval of the Program Chair; 3 credit hours chosen from **Electives B (History and Political Science)**: History 2065, History 2510, Political Science 1000, Political Science 2200, Political Science 2800, Political Science 3800, a 3000 or 4000 level course in the Domain of History and Politics with prior approval of the Program Chair; and 3 credit hours chosen from **Electives C (Law, Human Resources, and Labour)**: the former Business 4000, Business 4320 or Business 3300, Business 4330, Political Science 3210, Political Science 3620, a 3000 or 4000 level course in the Domain of Law, Human Resources, and Labour) with prior approval of the Program Chair.

8 Graduation

Upon meeting the qualifications for the program, students must apply to graduate on the prescribed "Application for Graduation" form. This form may be obtained on-line at the Memorial Self Service at selfservice.mun.ca. The deadlines for application submission are July 15 for Fall (October) graduation, January 3 for Winter (February) in-absentia graduation, and January 15 for Spring (May) graduation. Applications received after these dates will be processed as time and resources permit. Additional information is available from the Office of the Registrar at www.mun.ca/regoff/graduation. Information regarding Convocation, including the dates of the ceremony, is available at www.mun.ca/convocation.

9 Waiver of Degree Program Regulations

Students requesting waiver of University academic regulations should refer to ***UNIVERSITY REGULATIONS*** **- General Academic Regulations (Undergraduate) - Waiver of Regulations.** Every student also has the right to request waiver of degree program regulations.

9.1 General Information

- The Marine Institute reserves the right in special circumstances to modify, alter, or waive any Marine Institute regulation in its application to individual students where merit and equity so warrant, in the judgement of the Committee on Undergraduate Studies of the Marine Institute.
- Students requesting a waiver of a Marine Institute regulation must submit their request in writing to the head of the program who will forward a recommendation to the Chair of the Committee on Undergraduate Studies of the Marine Institute. Medical and/or other documentation to substantiate the request must be provided. Medical documentation should normally be in the form of the Student Health Certificate, available at www.mun.ca/regoff/forms.php.
- Any waiver granted does not reduce the total number of credit hours required for the degree.

10 Appeal of Decisions

Any student whose request for waiver of Marine Institute regulations has been denied has the right to appeal. For further information refer to ***UNIVERSITY REGULATIONS*** **- General Academic Regulations (Undergraduate) - Appeal of Decisions**.

11 Course Descriptions

11.1 Leadership

Leadership courses are designated by LEAD.

3000 Leadership Fundamentals will provide a basic introduction to leadership by focusing on what it means to be a good leader. Emphasis in the course will be on the practice of leadership. The course will examine topics such as: the nature of leadership, recognizing leadership traits, developing leadership skills, creating a vision, setting the tone, listening to out-group members, handling conflict, overcoming obstacles, ethics in leadership, and destructive leadership. Attention will be given to helping students to understand and improve their own leadership perception and performance.

AR = Attendance requirement; CH = Credit hours are 3 unless otherwise noted; CO = Co-requisite(s); CR = Credit can be retained for only one course from the set(s) consisting of the course being described and the course(s) listed; LC = Lecture hours per week are 3 unless otherwise noted; LH = Laboratory hours per week; OR = Other requirements of the course such as tutorials, practical sessions, or seminars; PR = Prerequisite(s); UL = Usage limitation(s).

3006 Special Topics in Leadership provides the opportunity for students to investigate the concept of Leadership through the lens of current events.
PR: LEAD 3000

3007 Leadership Capstone Project provides the student with an opportunity to reflect on how their personal leadership characteristics have matured through their studies. A multifaceted capstone project assignment will serve as the summative academic and intellectual experience for students.
CH: 0
PR: LEAD 3006

4001 Project Management (same as the former MSTM 4040, TECH 4040) introduces the student to the interdisciplinary field of project management. The course covers the interpersonal skills necessary to successfully lead or work effectively within a project team as well as providing an overview of certain planning and scheduling tools and techniques necessary for the planning and monitoring of projects.
CR: the former MSTM 4040, TECH 4040

4002 Technological Entrepreneurship (same as the former MSTM 4015, TECH 4015) surveys technological entrepreneurship via examples of both successful and failed businesses in technological fields. By examining cases of entrepreneurship, this course will examine challenges and opportunities facing technological entrepreneurs.
CR: the former MSTM 4015, TECH 4015

4003 Communications and Conflict Management (same as MARI 4107, TECH 4120) provides students with the knowledge, tools and strategies to effectively manage and resolve conflicts in the workplace. The necessary communication skills taught in this course will allow students to respond to interpersonal and organizational conflicts in a collaborative manner to ensure a safe and productive workplace.
CR: MARI 4107, TECH 4120

4004 Advanced Technical Communications (same as the former MSTM 4060, TECH 4060) enhances the technical communication skills of students. The course content examines technical writing fundamentals; information gathering, analysis, and documentation; proposal preparation; technical document applications; technical report preparation; graphics preparation; and technical presentations. The course will provide students with the knowledge and skills necessary to develop proposals, reports, and presentations for technical projects.
CR: the former MSTM 4060, TECH 4060

4005 Structure and Functions of Technology-Based Organizations (same as the former MSTM 4013, TECH 4013) focuses on the emergence of technology-based companies and how to implement methods to increase their organizational effectiveness. This course will concentrate on the integration of three basic frameworks which include the study of technological economics and organizational progression, structural configurations and operations, and universal and contemporary approaches to organizational design. In addition, it will examine the challenges of change that face highly dynamic industries: individual and organizational change, technological change, and national and global change.
CR: the former MSTM 4013, TECH 4013

11.2 Maritime Studies

Maritime Studies courses are designated by MARI.

1900 Critical Reading and Writing: Maritime Studies exposes students to the process of critical reading and writing through the examination of a variety of texts on relevant, current issues and events in the maritime industry. Emphasis is placed on critically analyzing texts; understanding the importance of purpose, audience, word choice, and tone in writing style; effectively constructing paragraphs, essays, and reports; conducting research and incorporating effective documentation; as well as drafting, revising, and editing. All sections of this course follow CRW guidelines.

4001 The Organization and Issues of Shipping (same as the former MSTM 4001) provides students with knowledge of the economic shipping environment with respect to Canada. The course will develop an understanding of basic trade theory, patterns of trade and sea routes, commodities traded by sea, and the organizational structure of shipping companies.
CR: the former Engineering 8065; the former MSTM 4001

4002 The Business of Shipping (same as the former MSTM 4002) provides students with an understanding of financial statements, costs, revenues and financial performance of shipping companies as well as computing, voyage and annual cashflows. The course will develop an understanding of marine insurance and forecasting, and risk management.
CR: the former MSTM 4002
PR: MARI 4001

4004 Marine Environmental Management (same as the former MSTM 4004) introduces students to the requirements for the safe management of the marine environment. This course will introduce major environmental problems and identify the major threats to the marine environment. It will provide a working knowledge of these threats and consider the possible counter measures that may be employed by employees in the marine industry.
CR: the former MSTM 4004

4005 Trends and Issues in International Shipping (same as the former MSTM 4005) provides students with an understanding of how regulatory bodies and their legislation have evolved to affect the modern seafarer trading internationally. This course will develop an understanding of the various rules and regulations dealing with Classification, ISM, MAPROL, SOLAS and SIRE inspections which have to be dealt with on a daily basis at sea.
CR: the former MSTM 4005

4006 Maritime Human Resource Management (same as the former MSTM 4006) provides basic principles of HRM in terms of seagoing and shore-based personnel. Students will analyze the world maritime labour market, HRM practices, outsourcing and international conventions. This course stresses the importance of coherent maritime HRM systems required to gain a sustainable competitive advantage.
CR: the former MSTM 4006

4007 Shipping Finance (same as the former MSTM 4007) focuses on commercial ship management and the critical evaluation of alternative financial decisions. It analyzes the principles of financial ship management and the impact of global economic variables on the financial operations and performance of shipping companies. The course provides an appreciation of critical questions, problems, issues and alternative approaches incorporated in shipping finance. This will support and facilitate the conduct of meaningful financial analysis and managerial decision- making for investments and fund raising in shipping business.
CR: the former MSTM 4007

4008 Introduction to Offshore Oil and Gas (same as the former MSTM 4008) provides students with an understanding of the basic concepts of the oil and gas industry from a marine perspective. This course will cover the entire supply chain and industry structure from upstream to downstream. Topics discussed will give an overview of oil and gas; how it is explored and evaluated, extracted, refined, transported and traded.
CR: the former MSTM 4008

4101 Maritime Occupational Health and Safety (Legislation and Regulations) (same as the former MSTM 4101) provides students with the knowledge and understanding to manage the legislative framework within the workplace and show the importance of establishing a positive safety culture with specific focus on the maritime industry.
CR: the former MSTM 4101

4102 Maritime Risk Management/Accident Incident Investigation (same as the former MSTM 4102) provides students with the knowledge of methodologies and practices needed to manage operational risk in today's maritime industry. Risk management will be analyzed in the context of prevention and mitigation of loss resulting from health and safety, equipment, and environmental accidents and incidents. The course will further explore methodologies and practices used to investigate accident and incident occurrences in the maritime industry.
CR: the former MSTM 4102

4103 Advanced Communications for the Maritime Sector (same as the former MSTM 4103) equips students to write a variety of formal and informal maritime-related technical documents; develops students' capabilities in gathering and critically analysing information from technical sources and constructing a clear message; and prepares students to develop and deliver oral technical presentations.
CR: the former MSTM 4103

4104 Integrated Management Systems in Maritime Industries (same as the former MSTM 4104) offers a firsthand knowledge of a systematic, comprehensive process for managing safety risks. A safety management system program provides for goal setting, planning, and measuring performance. It becomes part of the company's safety culture, as well as the way people do their jobs.
CR: the former MSTM 4104

4105 Policy and Governance in the Maritime Industry (same as the former MSTM 4105) provides the student with an understanding of the maritime industry as a global enterprise in the context of policy and governance. It will focus on the full range of the regulatory framework from the standpoint of the International Maritime Organization to the statutory regulations applicable to the Canadian maritime industry.
CR: the former MSTM 4105

4106 Ship Operations Management (same as the former MSTM 4106) provides comprehensive knowledge of global ship management practices supporting the function of ship operations management, both ashore and at sea. This course aims to develop the student's understanding of management issues in marine transportation as they relate to basic principles of management; management in multi-ethnic environments; managing under adverse conditions; the SOLAS Convention and the ISM

and ISPS Codes; the International Labour Organization and the MLC Convention; the International Transport Federation; and, Port State Control.
CR: the former MSTM 4106

4107 Communications and Conflict Management (same as LEAD 4003, TECH 4120) provides students with the knowledge, tools and strategies to effectively manage and resolve conflicts in the workplace. The necessary communication skills taught in this course will allow students to respond to interpersonal and organizational conflicts in a collaborative manner to ensure a safe and productive workplace.
CR: LEAD 4003, TECH 4120

4109 Human Factors in the Maritime Sector addresses the application of our understanding of human characteristics to the design of equipment and environments in which people perform and learn. Framed within a maritime context, this course provides an overview of human capabilities and limitations, and how they interact with the design, use and learning of systems, controls and displays.

4110 Risk Management in the Maritime Sector provides a solid grounding in knowledge and skills required to interpret, evaluate, communicate, and manage risk in the maritime sector. Utilizing a variety of case studies, the course covers risk assessment methodologies and provides a practical approach to conducting, reviewing, and evaluating risk assessments. The course reviews regulatory requirements and discusses the importance and challenges (including the human element) of effective risk management. Students will also conduct article reviews as part of their study.

4111 Incident/Accident Investigation in the Maritime Sector provides a solid grounding in the knowledge and skills required to conduct a near-miss and incident / accident investigation. Utilizing a variety of case studies, the course covers incident investigation / root cause analysis methodologies and provides a framework to conduct an investigation, analyse the information, implement corrective actions, and write the investigation report. Students will also review and critique investigation reports as part of their study.

4112 Quality Systems and Organizational Management examines the theory and application of quality management systems (QMS). It also provides direction for the integration of a QMS into an overall management system that addresses occupational health and safety as well as environment.

4113 Maritime Security Management examines contemporary port, coastal and ocean security issues. It explores the roles of national and international agencies, international conventions, security audits, and inspections. The course also explores maritime security risk assessment methodologies that enable organizations to make organizational and operational decisions to mitigate maritime security risks. Utilizing a variety of case studies and security assessment methodologies the course will provide a practical approach to conducting, reviewing, and evaluating maritime security risk assessments.

4114 Maritime Environmental Health focuses on the rise in the number of work-related diseases worldwide, relative to traumatic injuries, which has led to an increased focus on occupational health hazards in the workplace. Exposure to physical, chemical, biological, psychosocial and ergonomic factors as major concerns in occupational health and safety, as well as an awareness of these hazards and the associated health effects as an important step in their recognition and control, will also be covered.
PR: MARI 4101 or the former MSTM 4101

4115 Safety Management in the Commercial Fish Harvesting Sector will examine safety management issues existing within the global and, more specifically, the Canadian fishing industry; the safety management systems being employed within the Canadian sector to address these issues; and how international and domestic safety standards and regulations both influence, and are influenced by, investigations into fishing vessel incidents and the resulting recommendations.
PR: MARI 4110

4116 Statistics: Maritime Studies introduces students to scientific approaches to consuming and designing research as well as presenting data visually and numerically. This course introduces students to statistical software to aid in professionally presenting data. Examples are framed within a maritime context.
CR: Statistics 1510, Statistics 2500, TECH 4025
LH: 2

11.3 Technology

Technology courses are designated by TECH.

4010 Assessment and Implementation of Technology (same as the former MSTM 4010) examines the effects of technology on the physical, socio-economic, historic, cultural and aesthetic environments. The course also addresses relevant legislation, the generation and evaluation of project/ product alternatives, and the prediction, verification and mitigation of technological effects.
CR: the former MSTM 4010

4011 Introduction to Intellectual Property and its Management (same as the former MSTM 4011) introduces students to the management of Intellectual Property Rights (IPRs). This course will cover the philosophical rationale for intellectual property rights, its technical and legal considerations, its implications to the development of science and technology and its economic impact in society.
CR: the former MSTM 4011

4012 Occupational Health and Safety Legislation and Management (same as the former MSTM 4012) introduces students to occupational health and safety issues in a technical/industrial context. Students will gain a knowledge and understanding of the legislative framework surrounding occupational health and safety, the assignment of responsibilities in the workplace, the management of occupational health and safety in the workplace and the importance of establishing a positive safety culture.
CR: the former MSTM 4012

4013 Structure and Functions of Technology-based Organizations (same as LEAD 4005, the former MSTM 4013) focuses on the emergence of technology-based companies and how to implement methods to increase their organizational effectiveness. This course will concentrate on the integration of three basic frameworks which include the study of technological economics and organizational progression, structural configurations and operations, and universal and contemporary approaches to organizational design. In addition, it will examine the challenges of change that face highly dynamic industries: individual and organizational change, technological change, and national and global change.
CR: LEAD 4005, the former MSTM 4013

4014 Technology and the Environment (same as the former MSTM 4014) helps students critically examine technology and the environment and how the two are linked. Topics may include how technology is both the cause of and solution to many environmental problems, the greenhouse effect, renewable energy vs. fossil fuels, recycling vs. landfills, the efficiency paradox, geo-engineering, and other select current topics.
CR: the former MSTM 4014

4015 Technological Entrepreneurship (same as LEAD 4002, the former MSTM 4015) surveys technological entrepreneurship via examples of both successful and failed businesses in technological fields. By examining cases of entrepreneurship, this course will examine challenges and opportunities facing technological entrepreneurs.
CR: LEAD 4002, the former MSTM 4015

4016 Technological Problem Solving (same as the former MSTM 4016) introduces students to TRIZ, a powerful set of tools and algorithms developed specifically for analyzing and solving technological problems. TRIZ was developed by people with a technical background for those with a technical background. While TRIZ was developed for inventing and solving technical problems, the tools and approaches can be used to understand and solve virtually any solvable problem.
CR: the former MSTM 4016

4017 Technical Operations Management (same as the former MSTM 4017) introduces students to the area of operations management as it pertains to technology companies. Operations is generally considered the process by which an organization converts inputs such as labour and material into outputs such as goods or services. This course will examine how to manage the processes with a particular emphasis on operations in technology-based companies. Topics may include operations based strategy, processes and technology, capacity and facilities planning, and supply chain management.
CR: the former MSTM 4017

4019 Research Methods (same as the former MSTM 4019) examines the fundamental steps in the process of doing research. It will provide students with the necessary information and tools to conduct technical research and communicate their findings. This course will examine how to define a research project, how to prepare a research proposal, how to select a research methodology, how to collect and analyze data and information, and how to prepare a research project report.
CR: the former MSTM 4019
PR: one of TECH 4060 or the former MSTM 4060, one of TECH 4040 or the former MSTM 4040, and TECH 4025 or Statistics 1510 or 2500 or equivalent

4020 Economic Management for Technologists (same as the former MSTM 4020) provides an introduction to the economics of technological projects. Students will study the mathematics of money, cost composition, and project evaluation, including cost comparison. They will also learn to analyse projects for decision making, including risk assessment and replacement analysis. In addition, they will learn to use suitable criteria for project selection, and to conduct sensitivity analysis.
CR: Engineering 4102; the former MSTM 4020

4025 Applied Statistics (same as the former MSTM 4025) enables the student to use descriptive statistics to report data findings, to make statistical inferences using appropriate data analysis, and to use, and interpret the output from, statistical software.
CR: MARI 4116, the former MSTM 4025, Statistics 1510, Statistics 2500

4030 Technology in the Human Context (same as the former MSTM 4030) examines technology in the historical context and technology in the modern era. Students will discuss human insights, innovation, the interactions between development and technology transfer, ethics and professionalism and how to develop a technology value system.
CR: the former MSTM 4030

4040 Project Management for Technologists (same as LEAD 4001, the former MSTM 4040) introduces the student to the interdisciplinary field of project management. The course covers the interpersonal skills necessary to successfully lead or work effectively within a project team as well as providing an overview of certain planning and scheduling tools and techniques necessary for the planning and monitoring of projects.
CR: LEAD 4001, the former MSTM 4040

4050 Introduction to Quality Management (same as the former MSTM 4050) provides students with an understanding of the philosophy and concepts involved in the total quality approach to quality management. The course covers the various tools and techniques used in quality management as well as providing an overview of the role of management.
CR: the former MSTM 4050

4055 Marine Renewable Energy (same as the former MSTM 4055) provides students with an overview of MRE resources, introduces current and emerging technologies to exploit MRE resources, and places these technologies in context with environmental, political, and economic constraints.
CR: MSTM 4055

4060 Advanced Technical Communications (same as LEAD 4004, the former MSTM 4060) enhances the technical communication skills of students. The course content examines technical writing fundamentals; information gathering, analysis, and documentation; proposal preparation; technical document applications; technical report preparation; graphics preparation; and technical presentations. The course will provide students with the knowledge and skills necessary to develop proposals, reports, and presentations for technical projects.
CR: LEAD 4004, the former MSTM 4060

4070 Special Topics in Technology (same as the former MSTM 4070) provides the opportunity for students to maintain technical currency through a review of recent advances in technology and their application to particular technical areas.
CR: MSTM 4070

4080 Maintenance Management provides an introduction to maintenance management systems, to devise maintenance strategies and to utilize risk management strategies using statistical analysis and computerized maintenance management systems.

4090 Introduction to Technology (same as the former MSTM 4090) provides a broad survey of practices critical to operating a technology-based business. Topics covered may include an introduction to technology management, historical developments in the management of technology, the functions of technology management, and select current topics that are relevant to operating technology-based businesses.
CR: MSTM 4090

4110 Health Care Management provides an introduction to health care management. Students will study leadership, change management, strategic planning, quality, and teamwork. They will also learn to analyze and examine health care related case studies. In addition, they will learn to research and analyze current health management issues which exist.

4111 Health Information Management and Technology focuses on the management of health care information through the use of technology and the interdisciplinary collaboration to analyze, design, implement and evaluate information that can enhance health outcomes.

4120 Conflict Management and Communication Strategies (same as MARI 4107, LEAD 4003) provides participants with an understanding of the basic principles of conflict resolution, negotiation, and effective communication and interpersonal skills to investigate and solve problems and manage conflicts within the workplace.

4130 Technology Enabling the Blue Economy introduces students to the Blue Economy by examining policies, recent events, and academic literature. Students will learn about the Blue Economy as it relates to industry, governments, and the environment.

4400 Technological Assessment Project (same as the former MSTM 4400) provides students with the opportunity to conduct an assessment and implementation plan of a technical project in their area of interest. Students will utilize the knowledge that they have obtained in the required courses and incorporate this knowledge into a final project paper.
CR: the former MSTM 410A/B, the former MSTM 4000, the former MSTM 4100, the former MSTM 4200, the former MSTM 4400 and the former Technology 4000
PR: one of TECH 4019 or the former MSTM 4019

1 The Memorial University of Newfoundland Code

The attention of all members of the University community is drawn to the section of the University Calendar titled **The Memorial University of Newfoundland Code**, which articulates the University's commitment to maintaining the highest standards of academic integrity.

2 Student Code of Conduct

Memorial University of Newfoundland expects that students will conduct themselves in compliance with University Regulations and Policies, Departmental Policies, and Federal, Provincial and Municipal laws, as well as codes of ethics that govern students who are members of regulated professions. The *Student Code of Conduct* outlines the behaviors which the University considers to be non-academic misconduct offences, and the range of remedies and/or penalties which may be imposed. Academic misconduct is outlined in ***UNIVERSITY REGULATIONS* - Academic Misconduct** in the University Calendar.

For more information about the *Student Code of Conduct*, see www.mun.ca/student.

3 Grenfell Campus Description

www.grenfell.mun.ca

Grenfell Campus, Memorial University of Newfoundland, was established in September 1975, and originally was called the Western Regional College. In 1979 it was named Sir Wilfred Grenfell College, honouring the memory of the medical missionary who pioneered medicine in northern Newfoundland and along the coast of Labrador. In 2010, it was renamed Grenfell Campus, Memorial University of Newfoundland.

Four-year undergraduate degree programs in Arts, Business Administration, Environment and Sustainability, Fine Arts, Nursing, and Science may be completed at Grenfell Campus, as well as an accelerated program in Nursing. The Bachelor of Arts degree is available in English, Historical Studies, Multidisciplinary Humanities, Psychology, and Social/Cultural Studies, and the Bachelor of Arts (Honours) may be obtained in English and Psychology. The Bachelor of Business Administration is offered as general and honours degrees. The Bachelor of Science is offered in Computational Mathematics, Environmental Science, General Science, Physics, and Psychology and the Bachelor of Science (Honours) is offered in Environmental Science, and Psychology, and the University's four-year Bachelor of Science in Nursing degree is offered in conjunction with the Western Regional School of Nursing in Corner Brook. Bachelor of Fine Arts degrees are conferred in Theatre and Visual Arts. These programs differ from those offered on the St. John's Campus and many are available only at the Grenfell Campus. Grenfell Campus also offers graduate programs in boreal ecosystems and agricultural science, environmental policy, management, applied geomatics, transdisciplinary sustainability, and visual arts. For information regarding graduate programs see the School of Graduate Studies at www.mun.ca/sgs.

Students at Grenfell Campus may also complete the first-year requirements of several programs offered at St. John's Campus including the requirements of the Engineering One Program. It is recommended that students meet with an academic advisor concerning course selection for specific programs.

Students have the option of completing distance and web-based credit courses offered by Memorial University of Newfoundland's Centre for Innovation in Teaching and Learning (CITL). As well, Grenfell's Office of Engagement offers a wide variety of non-credit courses to students, the Campus community, and the general public.

Grenfell's physical location affords the Campus a spectacular view of the city of Corner Brook and the scenic Bay of Islands. All Campus buildings are connected by a series of skywalks and tunnels. The Arts and Science Building houses administrative and academic units, a bookstore, an athletics and recreation wing, a student residence, the Grenfell Campus Student Union Student Centre and the Grenfell Campus Observatory and astronomical telescope. The Library and Computing Building includes Ferriss Hodgett Library, a computer lab and the largest lecture theatre on Campus. The Fine Arts Building contains facilities for visual arts and theatre students. It features a 160 seat theatre, dressing rooms, scenery, costume and properties workshops, as well as an actors' green room and a rehearsal hall. The Fine Arts Building also includes an art gallery, art storage vault, studios for drawing, painting, sculpture, multi-media and photography, darkrooms, and workshops for lithography, intaglio and serigraphy. The Forest Centre houses classroom, laboratory and research facilities for the Campus as well as the Atlantic Division of the Canadian Forest Service, Natural Resources Canada. Adjacent to the Forest Centre is a boreal ecosystem research facility, which supports research in agricultural, environmental and boreal sectors.

Additional information regarding the Grenfell Campus is available at www.grenfell.mun.ca.

Students must meet all regulations of Grenfell Campus in addition to those stated in the general regulations.

For information concerning admission/readmission to the University and general academic regulations (undergraduate), refer to ***UNIVERSITY REGULATIONS***.

For information concerning fees and charges, see the Financial and Administrative Services website at www.mun.ca/finance/fees/.

For information concerning scholarships, bursaries and awards, see www.mun.ca/scholarships/scholarships.

3.1 Statement of Academic Purpose

Grenfell Campus, as part of Memorial University of Newfoundland, is a four year undergraduate degree granting institution offering a liberal education in arts and science and a professional education in business, nursing, theatre and visual arts. In addition, the Campus continues to accommodate students who wish to complete their degrees at Memorial University of Newfoundland in St. John's or at universities elsewhere.

At Grenfell Campus a liberal education means a critical and open-minded pursuit of knowledge providing students with the intellectual tools to enable them to respond to a rapidly changing world. A liberal education marks the start of preparation for a career and it may lead to graduate work in a number of fields. In a broader sense it is intended to build a foundation for social, cultural and recreational interests that will help students move toward a meaningful personal and professional life. Academically, the aim of Grenfell Campus is to enable students to be open to new ways of thinking and to gain a lasting intellectual self-confidence so that they may have both the ability and the desire to be life-long learners.

At Grenfell Campus the goal of high quality education is reflected in the following commitments:

1. to teach students in a variety of challenging contexts and in general provide them with a personalized learning environment;
2. to maintain high academic standards;
3. to foster excellence in teaching, to encourage scholarship, research, performance and artistic endeavour, and to engage students, where appropriate, in these activities.

4 General Information

In addition to the information given below, further information regarding Grenfell Campus is available at www.grenfell.mun.ca.

4.1 Advice to Students on Planning a Program

www.grenfell.mun.ca/registrar
www.grenfell.mun.ca/undergraduate-studies

When planning the sequence of courses for a Major or Minor Program, or to ensure that a proposed degree program is possible within the constraints of course scheduling and prerequisites, students should seek advice from the Office of the Registrar or the appropriate Program Chair.

4.2 Student Unions

www.grenfell.mun.ca/current-students/Pages/student-union.aspx

The undergraduate Grenfell Campus Student Union (GCSU), Local 36, CFS, represents students' interests to the Campus administration and on a provincial and national level through the Canadian Federation of Students. The GCSU also promotes artistic, literary, educational, social, recreational, charitable, and sporting activities for the enhancement of the students of the Campus.

Information regarding the graduate student union is available at www.gsumun.ca/.

All full and part-time students pay student union fees and upon registration become members of the student unions.

4.3 Library

www.library.mun.ca/grenfell

Small branch, big collection! The Ferriss Hodgett Library is one of five libraries that make up the Memorial University of Newfoundland Libraries system. It provides local personalized service and a core collection of over 120,000 books, 200 print journal subscriptions, and other materials, combined with access to a much larger collection of print and online resources. Over 1,000,000 books and articles can be requested from the St. John's campus, and if it's not available through Memorial University of Newfoundland, can be obtained from other libraries worldwide.

Everyone is always welcome in the Library, but for those who like to research after hours or from the comfort of dorms or homes, remote access to the Library catalogue, over 20,000 e-books, 200 article databases, and 26,000 e-journals is available 24/7, making library research easier than ever. The Library also provides equipment loans to support emerging research needs such as eBook readers, digital voice recorders, portable DVD players, and more.

The Library has an Information Commons, with computers providing access to the Library's online resources (like e-journals and e-books), Internet, email, MS Office, and other software. Students can bring their laptops into the Library and access all online services using the campus wireless network. There are a variety of study spaces, from group study rooms to individual study carrels and laptop chairs.

A full range of public services are offered including research assistance, tours, library instruction classes, and support for copyright enquiries.

4.4 Student Services

www.grenfell.mun.ca/current-students

4.4.1 Athletics

www.grenfell.mun.ca/athletics

Grenfell Campus competitive sports offerings include men's and women's basketball, and women's volleyball. Further information may be obtained through the website at www.grenfell.mun.ca/athletics or by telephone to (709) 637-7315.

4.4.2 Counselling and Psychological Services

www.grenfell.mun.ca/cps

The Campus has a full-time registered psychologist and one full-time professional counsellor in Counselling and Psychological Services, which is physically located within Health Services at Grenfell Campus. One of the counsellors works with Western Regional School of Nursing students and is located in Monaghan Hall. Counselling and Psychological Services provides a free and confidential service to students including personal, academic and career counselling. The services may be provided through individual appointments, group programming and/or on-line support. When necessary, counselling services can arrange referrals to other professionals in the community. In addition, psychoeducational assessments are available on a fee-for-service basis for currently registered students seeking academic accommodations. Further Information may be obtained through the web site at www.grenfell.mun.ca/cps or by telephone to (709) 637-7919.

4.4.3 Health Services

www.grenfell.mun.ca/health

Health Services provides students with access to Physician clinics. In addition, through a partnership with the Western Regional School of Nursing, Grenfell Campus offers a variety of sessions designed to promote healthy living. Further information may be obtained in-person in the Bennett Wing of the Arts and Science building (AS 243), through the website, or by telephone to (709) 637-7919.

4.4.4 Indigenous Student Services

www.grenfell.mun.ca/aboriginal-students

Student Services provides a variety of services to Indigenous students attending Grenfell Campus. The Student Affairs Officer-Indigenous Affairs assists and/or refers students on matters related to admission requirements, adaptation to an academic/urban environment, and connections with Indigenous communities on- and off-campus. Activities are organized on-campus to raise awareness about Indigenous cultures and to develop opportunities for engaging Indigenous students in life at Grenfell Campus. As well, the Indigenous Student Lounge is a designated culturally safe space for smudging and Kullik/Qulliq lighting. Further information may be obtained through the website at www.grenfell.mun.ca/aboriginal-students, by e-mail to studentservices@grenfell.mun.ca, or by telephone to (709) 637-6232.

4.4.5 International Student Services

www.grenfell.mun.ca/international

International Student Services provides settlement and integration services to foreign students. New students must meet with the student programming coordinator (international) upon arrival for advice concerning their stay at the University and their compulsory health insurance program. Further information may be obtained through the website at www.grenfell.mun.ca/international or by telephone to (709) 639-6525.

4.4.6 The Learning Centre

www.grenfell.mun.ca/learning-centre

The Learning Centre, the Grenfell Campus is the academic support centre at Grenfell Campus. Staff assist students with writing, math, and study skills. Peer tutoring and supplemental instruction are available to students free of charge.

Students who require accommodations because of a disability should contact the Accessibility Centre & Education Support (ACES) though the web at www.grenfell.mun.ca/disability-services or by telephone to (709) 637-6232.

4.4.7 Student Housing

www.grenfell.mun.ca/housing

Student Housing currently offers accommodation for 600 students in suite-style residences and chalet apartments. The suite-style residences are mainly for first-year students while the chalet-style apartments are mainly for students beyond first-year and families. In each apartment, four students share a living room, kitchen and one-and-a-half baths and each has their own room. Individual phones and Internet ports are provided.

Student Housing facilitates a variety of programs and activities to meet the diverse interests of residents and encourages students to get involved.

Further information may be obtained by telephone to (709) 637-6266, or by e-mail at resinfo@grenfell.mun.ca or through the website at www.grenfell.mun.ca/housing.

4.4.8 Wellness

www.grenfell.mun.ca/current-students/Pages/athletics/recreation.aspx

Grenfell Campus offers recreation and wellness activities that contribute to the well-being and personal and social development of students. The Campus has a double gymnasium. Students at Grenfell have the opportunity to participate in a variety of different recreation programs, such as: intramural sports, step aerobics, yoga, downhill skiing, and curling. Students also have access to a fitness centre (which includes cardio equipment, weights and squash courts), skating, hockey and a walking track. Students may purchase a recreation pass in order to participate in these activities. Further information may be obtained by telephone to (709) 637-6232.

5 Description of Programs

Students must meet all regulations of Grenfell Campus in addition to those stated in the general regulations. For information concerning admission/readmission to the University and general academic regulations (undergraduate), refer to ***UNIVERSITY REGULATIONS***.

For information concerning fees and charges, see the Financial and Administrative Services website at www.mun.ca/finance/fees/.

5.1 General Degrees

Grenfell Campus has three Schools; the School of Arts and Social Science, the School of Fine Arts, and the School of Science and the Environment. Grenfell Campus offers seven general degrees in sixteen program areas. For specific details on each degree refer to the appropriate **Admission/Readmission Regulations for Grenfell Campus** and **Program Regulations - General and Honours Degrees**. The School of Arts and Social Science also offers English as a Second Language non-degree programs.

5.1.1 Arts Degree

Bachelor of Arts degree programs are offered under the School of Arts and Social Science.

The School of Arts and Social Science offers the Bachelor of Arts Degree with majors in **English Language and Literature**, **Historical Studies**, **Multidisciplinary Humanities**, **Psychology**, and **Social/Cultural Studies**.

The Bachelor of Arts degree program is comprised of 120 credit hours, 40 courses, and may be completed on a full or part-time basis. Students will examine culture, thought, prehistory and history, human interactions, and the social and natural forces that constantly transform our society. Students gain critical-thinking, analytical and communication skills needed to succeed and adapt in a changing world through the study of a major and minor. Students must complete a minimum of 120 credit hours made up of **Core Program Requirements**, an approved concentration of courses known as a Major, an approved concentration of courses known as a Minor, and elective courses. A Minor is not required for the Major in Social/Cultural Studies; however, students in that program may choose to complete a minor. A student may not use the same course to satisfy the requirements for both a Major and a Minor.

Majors are available in English Language and Literature, Historical Studies, Multidisciplinary Humanities, Psychology, and Social/Cultural Studies. The requirements for a Major, with the exception of the Major in Multidisciplinary Humanities and the Major in Social/Cultural Studies, include a minimum of 36 credit hours in a single discipline. Students must also complete either a minor or, with the permission of the appropriate program chair(s), a second major. Actual credit hours required for specific disciplines will vary.

All Majors require a minimum of 12 credit hours in 3000-level courses, 6 credit hours in 4000- level courses and 3 credit hours in a 4000-level senior project. A student must follow the specific requirements for each major program as set forth in the Grenfell Campus section

of the University Calendar.

A Minor requires a minimum of 24 credit hours which must be completed in a single discipline or interdisciplinary area other than that of the Major. Minors are available in the following areas: Art History, Business, Canadian Studies, Classics, Economics, English, Environmental Science, Environment and Sustainability, Folklore, French, Geography, Historical Studies, Mathematics, Multidisciplinary Humanities, Philosophy, Physics, Psychology, Religious Studies, Science, Social/Cultural Studies, Sociology, Theatre, and Tourism Studies. A student must follow the requirements for the Minor program as set forth in the Grenfell Campus section of the University Calendar. As an alternative to a Minor, a second Major may be completed and students must meet all general and departmental or program regulations for both Majors.

Elective courses to make up the total of 120 credit hours, other than those required for the core program and Major/Minor requirements, may be chosen according to the following guidelines: Any courses in arts, social science, science and fine arts, and up to 15 credit hours in other subject areas.

5.1.2 Business Degree

The Bachelor of Business Administration (B.B.A.) is offered under the School of Arts and Social Science.

The Bachelor of Business Administration is comprised of 120 credit hours, 40 courses, and may be completed on a full or part-time basis. The program is designed to deliver a comprehensive foundation in the fundamental areas of business and decision making.

Articulation Agreements with the College of the North Atlantic are in place for students who have completed the two-year Business Administration (Accounting), the two-year Business Administration (Human Resource Management), the two-year Business Administration (Marketing), the three-year Business Management (Accounting), the three-year Business Management (Human Resource Management), or the three-year Business Management (Marketing) diploma programs and who wish to complete the Bachelor of Business Administration degree program at Grenfell Campus.

Articulation Agreements with the St. John's College Junior College, Belize are in place for students who have completed the two-year Business Administration (General), the two-year Business Administration (Accounting), the two-year Business Administration (Economics), or the two-year Business Administration (Tourism) associate degree programs and who wish to complete the Bachelor of Business Administration degree program at Grenfell Campus.

For specific admission and program requirements see **Admission/Readmission Regulations for Programs Offered by the School of Arts and Social Science, Bachelor of Business Administration** and **Program Regulations - General and Honours Degree, the School of Arts and Social Science**.

5.1.3 Education Degree

The Grenfell Campus offering of this program is currently under review and may not be available for intake at this time. For further information please contact the Office of Academic Programs, Faculty of Education.

5.1.4 Environment and Sustainability Degree

The Bachelor of Environment and Sustainability is offered under the School of Science and the Environment. The Bachelor of Environment and Sustainability is a four-year program comprised of 40 courses (120 credit hours) and may be completed on a full or part-time basis. The program aims to produce environmental specialists who have an understanding of ethics, as well as the many ecological, social, and economic factors that influence environmental decision making. The program offers students the opportunity to Major in either Resource Management or Environmental Studies. For specific admission and program requirements see **Admission/ Readmission Regulations for Programs Offered by the School of Science and the Environment** and **Program Regulations - General and Honours Degree, School of Science and the Environment**.

Articulation Agreements with the College of the North Atlantic are in place for students who have completed the two-year Fish and Wildlife Technician or the two-year Forest Resources Technician Diploma and who wish to complete the Bachelor of Environment and Sustainability degree program at Grenfell Campus. For specific admission and program requirements see **Admission/Readmission Regulations for Programs Offered by the School of Science and the Environment** and **Program Regulations - General and Honours Degree, School of Science and the Environment**.

5.1.5 Fine Arts Degree

The Bachelor of Fine Arts is offered under the School of Fine Arts.

The Bachelor of Fine Arts is available in **Theatre** or **Visual Arts**. For specific admission and program requirements see **Admission/ Readmission Regulations for Programs Offered by the School of Fine Arts** and **Program Regulations - General and Honours Degree, School of Fine Arts**.

5.1.5.1 Theatre

The Bachelor of Fine Arts (Theatre) is comprised of 120 credit hours, 36 courses and is normally completed on a full-time basis. This program is designed to educate and train the student in the history, theory and practice of the theatre arts.

5.1.5.2 Visual Arts

The Bachelor of Fine Arts (Visual Arts) is comprised of 120 credit hours, 40 courses and a non-credit health and safety course, and is normally completed on a full-time basis. This professional program is designed to educate and train students in the history, theory, and practice of the visual arts.

5.1.6 Nursing Degree

The **Bachelor of Science in Nursing (Collaborative) Program** is a four-year program comprised of 130 credit hours and is completed on a full-time basis. The program is designed to prepare entry-level nurses who will function within a variety of health care settings. For specific admission and program requirements see **Admission/Readmission Regulations for the Faculty of Nursing** and **Program Regulations, General Degree, Bachelor of Science in Nursing (Collaborative) Program**. The program is completed at Grenfell Campus and the Western Regional School of Nursing.

The **Bachelor of Science in Nursing (Collaborative) Program Accelerated Option** is designed for students with well-developed university-level study skills and prior completion of at least 60 credit hours in university level courses. This full-time Option is comprised of 106 credit hours taken over eight consecutive semesters. For specific admission and program requirements see **Admission/ Readmission Regulations for the Faculty of Nursing** and **Program Regulations, General Degree, Bachelor of Science in Nursing (Collaborative) Program Accelerated Option** The program is completed at Grenfell Campus and the Western Regional School of Nursing.

5.1.7 Science Degree

Bachelor of Science degree programs are offered under the School of Arts and Social Science and the School of Science and the Environment.

The School of Science and the Environment offers the Bachelor of Science with Majors in **Computational Mathematics**, **Environmental Science** (Biology or Chemistry), **General Science**, and **Physics** general degrees. The School of Arts and Social Science offers the **Bachelor of Science with Major in Psychology** which follows the regulations of that School.

The Bachelor of Science is a four-year program comprised of 40 courses, 120 credit hours and may be completed on a full or part-time basis. Students must complete a minimum of 120 credit hours made up of **Core Program Requirements**, an approved concentration of courses known as a Major and elective courses. Students may also choose to complete an approved concentration of courses known as a Minor as part of the 120 credit hours.

For specific admission and program requirements see **Admission/Readmission Regulations for Programs Offered by the School of Science and the Environment** and **Program Regulations - General and Honours Degree, School of Science and the Environment**.

5.2 Honours Degrees

Programs are offered leading to the Honours Degrees of Bachelor of Arts, Bachelor of Business Administration, and Bachelor of Science. An Honours degree requires, over and above the requirement of the General degree, a concentration at an advanced level in an approved field, consisting of a subject or subjects of specialization and/or related subjects, and a high quality of work throughout the program. An Honours degree is of distinct advantage to students who plan advanced work or careers in their chosen fields and also to those who have a clear commitment to some special field of study. An Honours degree with first or second class standing is, in many cases, a prerequisite for admission to a graduate program. For specific details on each degree refer to the appropriate **Program Regulations - General and Honours Degree, School of Science and the Environment**.

5.3 Non-Degree Programs

The School of Arts and Social Science offers two non-degree programs in English as a Second Language program, the **Intensive English Bridge Program at Grenfell (IEBP-G)** and the **Intensive English Program at Grenfell (IEP-G)**. The School also offers the **Certificate in Sustainable Rural Communities**.

5.3.1 Certificate in Sustainable Rural Communities

The Certificate in Sustainable Rural Communities is comprised of 21 credit hours and is designed for those who are interested in the study of practical and theoretical understandings of sustainable rural communities, with a focus on real-world applications of contemporary strategies to address opportunities and issues within rural places. Core courses will dissect the term ‘rural’ and examine the urban-rural divide through a critical lens. Specific attention will be paid to current issues facing rural Newfoundland and Labrador across multiple sectors: tourism, environment, economy, culture, and heritage.

5.3.2 English as a Second Language

English as a Second Language programs are offered under the School of Arts and Social Science.

The English as a Second Language Office, affiliated with the School of Arts and Social Science, Grenfell Campus, offers year-round programs for adult students wishing to improve their English language skills for academic, professional or personal purposes. These programs include:

1. the **Intensive English Bridge Program at Grenfell (IEBP-G)**;
2. twelve-week non-credit **Intensive English Program at Grenfell (IEP-G)** which are offered year-round on a semesterized basis;
3. tutoring and language development support for current Grenfell Campus, Memorial University of Newfoundland students in undergraduate and graduate degree programs; and
4. custom-designed language and culture programs for schools, universities, or businesses. These can be developed on contract and are either for general learning purposes or to suit the needs of specific disciplines or professions.

The full-time, non-credit **Intensive English Program at Grenfell (IEP-G)** is designed to improve English language skills for academic, professional and personal purposes. Reading, writing, speaking and listening skills are covered, and workshops on culture and social activities promoting integration with the local community also form part of the program. The program prepares the student for full-time university studies in English.

The full-time, non-credit and credit **Intensive English Bridge Program at Grenfell (IEBP-G)** is designed for applicants to Memorial University of Newfoundland who have been provisionally admitted as undergraduate students and who are students of advanced proficiency.

Information regarding the above programs and services is available from the Coordinator of English as a Second Language programs at Grenfell Campus, Memorial University of Newfoundland and online at www.grenfell.mun.ca/esl.

6 Admission/Readmission Regulations for Grenfell Campus

An applicant must be eligible for admission or readmission to the University in a category as defined in the Calendar section ***UNIVERSITY REGULATIONS* - Admission/Readmission to the University (Undergraduate), Categories of Applicants, Admission Criteria and Other Information**. In addition to meeting these regulations, an applicant to certain programs offered by Grenfell Campus must meet the requirements as indicated below under the appropriate program and School.

6.1 Applications

The application for admission or readmission to programs offered by Grenfell Campus is submitted online. The application for admission or readmission to the University is submitted online at www.mun.ca/undergrad/admissions/apply. A complete application includes an application to the University (for those who have not attended Grenfell Campus in the three preceding semesters) and any other required supporting documentation. Application fees must be paid when the application forms are submitted.

6.2 Admission/Readmission Regulations for Programs Offered by the School of Arts and Social Science

1. A student may apply for admission into programs offered by the School of Arts and Social Science directly from high school. The

application for admission to programs offered by Grenfell Campus is submitted online. Applicants who are new to Grenfell Campus should follow the application instructions at www.mun.ca/undergrad/apply. A complete application includes an application to the University and any other required supporting documentation. Application fees must be paid when the application is submitted. Direct admission from high school is subject to the applicant's final acceptance to the University. Grenfell Campus reserves the right to limit the number of spaces available in each Major and Minor program.

2. The application for admission or readmission to programs offered by Grenfell Campus is submitted online. The application for admission or readmission to the University is submitted online at www.mun.ca/undergrad/admissions/apply. A complete application includes an application to the University (for those who have not attended Grenfell Campus in the three preceding semesters) and any other required supporting documentation. Application fees must be paid when the application forms are submitted.
3. Transfer credit cannot be awarded for the following courses: Business 4010, 4070, English 4950; History 4950; Humanities 4950; Psychology 4950, 4951, 4959; Social/Cultural Studies 4000, 4100, 4950.

6.2.1 Bachelor of Arts Degrees

A student may apply for admission into the Bachelor of Arts program directly from high school. The application for admission to programs offered by Grenfell Campus is submitted online. Applicants who are new to Grenfell Campus should follow the application instructions at www.mun.ca/undergrad/apply. A complete application includes an application to the University and any other required supporting documentation. Application fees must be paid when the application forms are submitted.

6.2.1.1 Direct Entry (for High School Students)

Students may apply for admission into the Bachelor of Arts program directly from high school. The application for admission to programs offered by Grenfell Campus is submitted online. Applicants who are new to Grenfell Campus should follow the application instructions at www.mun.ca/undergrad/apply. A complete application includes an application to the University and any other required supporting documentation. Application fees must be paid when the application is submitted. Direct admission from high school is subject to the applicant's final acceptance to the University.

6.2.1.2 Transfers from Other Post-Secondary Institutions

1. Students who are transferring from other universities must apply for admission to the University on or before the deadlines specified for the semester in which they intend to begin their program, to allow sufficient time for the evaluation of transfer credits. The deadline dates are March 1 for Fall, October 1 for Winter, and February 1 for Spring (14-week, Intersession and Summer session). The application for admission or readmission to programs offered by Grenfell Campus is submitted online. The application for admission or readmission to the University is submitted online at www.mun.ca/undergrad/admissions/apply. A complete application includes an application to the University (for those who have not attended Grenfell Campus in the three preceding semesters) and any other required supporting documentation. Application fees must be paid when the application forms are submitted.
2. Transfer credit cannot be awarded for the following courses: Business 4010, 4070; English 4950; History 4950; Humanities 4950; Psychology 4950, 4951, 4959; Social/Cultural Studies 4000, 4100, 4950.

6.2.2 Bachelor of Business Administration

6.2.2.1 Direct Entry (for High School Students)

Students may apply for admission into the Bachelor of Business Administration program directly from high school. The application for admission to programs offered by Grenfell Campus is submitted online. Applicants who are new to Grenfell Campus should follow the application instructions at www.mun.ca/undergrad/apply. A complete application includes an application to the University and any other required supporting documentation. Application fees must be paid when the application is submitted. Direct admission from high school is subject to the applicant's final acceptance to the University.

6.2.2.2 Current Grenfell Campus Students

Current Grenfell Campus students should select the B.B.A. program on the Declare/Change Academic Program (Grenfell Campus) form available from the Office of the Registrar.

6.2.2.3 Transfers from Other Post-Secondary Institutions

1. Students who are transferring from accredited post-secondary institutions must apply for admission to the University on or before the deadlines specified for the semester in which they intend to begin their program, to allow sufficient time for the evaluation of transfer credits. The deadline dates are March 1 for Fall, October 1 for Winter, and February 1 for Spring (14-week, Intersession and Summer session). The application for admission or readmission to programs offered by Grenfell Campus is submitted online. The application for admission or readmission to the University is submitted online at www.mun.ca/undergrad/admissions/apply. A complete application includes an application to the University (for those who have not attended Grenfell Campus in the three preceding semesters) and any other required supporting documentation. Application fees must be paid when the application forms are submitted.
2. Transfer credit cannot be awarded for the following courses: BUSN 4010, 4070; English 4950; History 4950; Humanities 4950; Psychology 4950, 4951, 4959; Social/Cultural Studies 4000, 4100, 4950.

6.2.2.4 Articulation Agreements for Bachelor of Business Administration

1. For Graduates of the Two-Year Business Administration (Accounting) Diploma Program Offered by the College of the North Atlantic

   A student may apply for admission into the Bachelor of Business Administration program by indicating the program of choice on the online application at www.mun.ca/undergrad/apply. Students must be eligible for admission or readmission to the University in a category as defined in the Calendar section **UNIVERSITY REGULATIONS** and have been awarded the two-year Business Administration (Accounting) Diploma Program Offered by the College of the North Atlantic.

   A student in this category must apply under **Transfers from Other Post-Secondary Institutions** above.

2. For Graduates of the Two-Year Business Administration (Human Resource Management) Diploma Program Offered by the College of the North Atlantic

   A student may apply for admission into the Bachelor of Business Administration program by indicating the program of choice on the online application at www.mun.ca/undergrad/apply. Students must be eligible for admission or readmission to the University in a category as defined in the Calendar section **UNIVERSITY REGULATIONS** and have been awarded the two-year Business Administration (Human Resource Management) Diploma Program Offered by the College of the North Atlantic.

A student in this category must apply under **Transfers from Other Post-Secondary Institutions** above.

3. For Graduates of the Two-Year Business Administration (Marketing) Diploma Program Offered by the College of the North Atlantic

   A student may apply for admission into the Bachelor of Business Administration program by indicating the program of choice on the online application at www.mun.ca/undergrad/apply. Students must be eligible for admission or readmission to the University in a category as defined in the Calendar section **UNIVERSITY REGULATIONS** and have been awarded the two-year Business Administration (Marketing) Diploma Program Offered by the College of the North Atlantic.

   A student in this category must apply under **Transfers from Other Post-Secondary Institutions** above.

4. For Graduates of the Three-Year Business Management (Accounting) Diploma Program Offered by the College of the North Atlantic

   A student may apply for admission into the Bachelor of Business Administration program by indicating the program of choice on the online application at www.mun.ca/undergrad/apply. Students must be eligible for admission or readmission to the University in a category as defined in the Calendar section **UNIVERSITY REGULATIONS** and have been awarded the three-Year Business Management (Accounting) Diploma Program Offered by the College of the North Atlantic.

   A student in this category must apply under **Transfers from Other Post-Secondary Institutions** above.

5. For Graduates of the Three-Year Business Management (Human Resource Management) Diploma Program Offered by the College of the North Atlantic

   A student may apply for admission into the Bachelor of Business Administration program by indicating the program of choice on the online application at www.mun.ca/undergrad/apply. Students must be eligible for admission or readmission to the University in a category as defined in the Calendar section **UNIVERSITY REGULATIONS** and have been awarded the three-year Business Management (Human Resource Management) Diploma Program Offered by the College of the North Atlantic.

   A student in this category must apply under **Transfers from Other Post-Secondary Institutions** above.

6. For Graduates of the Three-Year Business Management (Marketing) Diploma Program Offered by the College of the North Atlantic

   A student may apply for admission into the Bachelor of Business Administration program by indicating the program of choice on the online application at www.mun.ca/undergrad/apply. Students must be eligible for admission or readmission to the University in a category as defined in the Calendar section **UNIVERSITY REGULATIONS** and have been awarded the three-year Business Management (Marketing) Diploma Program Offered by the College of the North Atlantic.

   A student in this category must apply under **Transfers from Other Post-Secondary Institutions** above.

7. For Graduates of the Two-Year Business Administration (General) Associate Degree Program offered by the St. John's College Junior College, Belize

   A student may apply for admission into the Bachelor of Business Administration program by indicating the program of choice on the online application at www.mun.ca/undergrad/apply. Students must be eligible for admission or readmission to the University in a category as defined in the Calendar section **UNIVERSITY REGULATIONS** and have been awarded the two-year Business Administration Associate Degree (General) offered by the St. John's College Junior College, Belize.

   A student in this category must apply under **Transfers from Other Post-Secondary Institutions** above.

8. For Graduates of the Two-Year Business Administration (Accounting) Associate Degree Program offered by the St. John's College Junior College, Belize

   A student may apply for admission into the Bachelor of Business Administration program by indicating the program of choice on the online application at www.mun.ca/undergrad/apply. Students must be eligible for admission or readmission to the University in a category as defined in the Calendar section **UNIVERSITY REGULATIONS** and have been awarded the two-year Business Administration Associate Degree (Accounting) offered by the St. John's College Junior College, Belize.

   A student in this category must apply under **Transfers from Other Post-Secondary Institutions** above.

9. For Graduates of the Two-Year Business Administration (Economics) Associate Degree Program offered by the St. John's College Junior College, Belize

   A student may apply for admission into the Bachelor of Business Administration program by indicating the program of choice on the online application at www.mun.ca/undergrad/apply. Students must be eligible for admission or readmission to the University in a category as defined in the Calendar section **UNIVERSITY REGULATIONS** and have been awarded the two-year Business Administration Associate Degree (Economics) offered by the St. John's College Junior College, Belize.

   A student in this category must apply under **Transfers from Other Post-Secondary Institutions** above.

10. For Graduates of the Two-Year Business Administration (Tourism) Associate Degree Program offered by the St. John's College Junior College, Belize

    A student may apply for admission into the Bachelor of Business Administration program by indicating the program of choice on the online application at www.mun.ca/undergrad/apply. Students must be eligible for admission or readmission to the University in a category as defined in the Calendar section **UNIVERSITY REGULATIONS** and have been awarded the two-year Business Administration Associate Degree (Tourism) offered by the St. John's College Junior College, Belize.

    A student in this category must apply under **Transfers from Other Post-Secondary Institutions** above.

6.2.3 Bachelor of Education (Primary/Elementary) as a Second Degree

The Grenfell Campus offering of this program is currently under review and may not be available for intake at this time. For further information please contact the Office of Academic Programs, Faculty of Education.

6.2.4 Bachelor of Science with Major in Psychology

A student may apply for admission into the Bachelor of Science with Major in Psychology directly from high school. The application for admission to programs offered by Grenfell Campus is submitted online. Applicants who are new to Grenfell Campus should follow the application instructions at www.mun.ca/undergrad/apply. A complete application includes an application to the University and any other required supporting documentation. Application fees must be paid when the application is submitted. Direct admission from high school is subject to the applicant's final acceptance to the University. Grenfell Campus reserves the right to limit the number of spaces available in each Major and Minor program.

6.2.4.1 Direct Entry (for High School Students)

Students may apply for admission into the Bachelor of Science with Major in Psychology program directly from high school. The application for admission to programs offered by Grenfell Campus is submitted online. Applicants who are new to Grenfell Campus should follow the application instructions at www.mun.ca/undergrad/apply. A complete application includes an application to the

University and any other required supporting documentation. Application fees must be paid when the application is submitted. Direct admission from high school is subject to the applicant's final acceptance to the University.

6.2.4.2 Transfers from Other Post-Secondary Institutions

1. Students who are transferring from accredited post-secondary institutions must apply for admission to the University on or before the deadlines specified for the semester in which they intend to begin their program, to allow sufficient time for the evaluation of transfer credits. The deadline dates are March 1 for Fall, October 1 for Winter, and February 1 for Spring (14-week, Intersession and Summer session). The application for admission or readmission to programs offered by Grenfell Campus is submitted online. The application for admission or readmission to the University is submitted online at www.mun.ca/undergrad/admissions/apply. A complete application includes an application to the University (for those who have not attended Grenfell Campus in the three preceding semesters) and any other required supporting documentation. Application fees must be paid when the application forms are submitted.
2. Transfer credit cannot be awarded for the following courses: English 4950; History 4950; Humanities 4950; Psychology 4950, 4951, 4959; Social/Cultural Studies 4000, 4100, 4950.

6.2.5 Certificate in Sustainable Rural Communities

6.2.5.1 Direct Entry (for High School Students)

An applicant may apply for admission into the Sustainable Rural Communities Certificate directly from high school. The application for admission to programs offered by Grenfell Campus is submitted online. Applicants who are new to Grenfell Campus should follow the application instructions at www.mun.ca/undergrad/apply. A complete application includes an application to the University and any other required supporting documentation. Application fees must be paid when the application is submitted. Direct admission from high school is subject to the applicant's final acceptance to the University.

6.2.5.2 Transfers from Other Post-Secondary Institutions

An applicant who is transferring from other universities must apply for admission to the University on or before the deadlines specified for the semester in which the applicant intends to begin the program, to allow sufficient time for the evaluation of transfer credits. The deadline dates are March 1 for Fall, October 1 for Winter, and February 1 for Spring, Intersession, and Summer sessions. The application for admission or readmission to programs offered by Grenfell Campus is submitted online; current and returning applicants must apply at www.mun.ca/undergrad/admissions. Applicants who are new to Grenfell Campus should follow the application instructions at www.mun.ca/undergrad/apply. A complete application includes an application to the University (for those who have not attended Grenfell Campus in the three preceding semesters) and any other required supporting documentation. Application fees must be paid when the application forms are submitted.

6.2.5.3 Current Grenfell Campus Students

Current Grenfell Campus students should select the Sustainable Rural Communities Certificate on the Declaration/Change Academic Program (Grenfell Campus) form available from the Office of the Registrar.

6.2.6 English as a Second Language

An applicant may apply for admission to the **Intensive English Program Grenfell (IEP-G)** or the **Intensive English Bridge Program at Grenfell (IEBP-G)** program offered by the School of Arts and Social Science by submitting an application by email to esl@grenfell.mun.ca or in writing to the Coordinator, English as a Second Language Programs (Grenfell Campus), Memorial University of Newfoundland, Corner Brook, NL, A2H 6P9. Further information and applications for admission to these programs are available at www.grenfell.mun.ca/esl.

Grenfell Campus reserves the right to limit the number of spaces available in English as a Second Language programs.

6.2.6.1 Intensive English Program at Grenfell (IEP-G)

An applicant may apply for admission into the **Intensive English Program Grenfell (IEP-G)** program offered by the School of Arts and Social Science by submitting an application directly in writing to Coordinator, English as a Second Language Programs (Grenfell Campus), Memorial University of Newfoundland, Corner Brook, NL, A2H 6P9.

Applicants to the Intensive English Program must

1. be at least 18 years old;
2. hold a valid high school diploma; and
3. have an intermediate level of English proficiency, equivalent to **International English Language Testing System (IELTS)** 4.5 or higher, as determined by the English as a Second Language (ESL) Coordinator.

An applicant wishing to complete the **Intensive English Program at Grenfell (IEP-G)** in preparation for admission to Memorial University of Newfoundland as an undergraduate degree student may apply for this program at the same time as application for admission to undergraduate studies. Subject to **General Academic Regulations (Undergraduate), Admission/Readmission to the University (Undergraduate)**, governing admission for undergraduate studies, and the regulations in place for admission to specific programs, an applicant may be provisionally admitted for studies at an undergraduate level in an upcoming term while currently enrolled in the Intensive English Program. The **General Academic Regulations (Undergraduate), Admission/Readmission to the University (Undergraduate)** should be reviewed carefully by students.

6.2.6.2 Intensive English Bridge Program at Grenfell (IEBP-G)

An applicant may apply for admission to Memorial University of Newfoundland using the University's General Application for Admission/ Readmission (Undergraduate).

An applicant for the **Intensive English Bridge Program at Grenfell (IEBP-G)** must have:

1. been provisionally accepted to undergraduate studies at Memorial University of Newfoundland;
2. achieved for IEBP-G Level 1: an average of Band 40 in the **Canadian Academic English Language (CAEL) Assessment** with a Writing sub-score of at least 40, a paper-based **Test of English as a Foreign Language (TOEFL)** score of 490, an iBT TOEFL score of 58, with a minimum writing score of 16, or an **International English Language Testing System (IELTS)** score of 5.5 with no sub-score less than 5 and a minimum writing score of 5.5 or evidence showing equivalent proficiency as determined by the English as a Second Language (ESL) Coordinator; achieved for IEBP-G Level 2: an average of Band 50 in the CAEL with a Writing sub-score of at least 50, a paper-based TOEFL score of 530, or an iBT TOEFL score of 70, with a minimum writing score of 18, or

an IELTS score of 6.0 with no subscore less than 5.5 and a minimum writing score of 6.0; or evidence showing equivalent proficiency as determined by the ESL Coordinator; or

3. achieved a grade of "B" or better with a satisfactory attendance level (90%) if enrolled in the preceding level of the Intensive English program or Intensive English Bridge Program and "C" in the concurrent credit course (if applicable) at the Grenfell Campus within the previous two semesters.

Final admission for provisionally admitted students will be subject to the regulations outlined under ***UNIVERSITY REGULATIONS*, Admission/Readmission to the University (Undergraduate), English Language Proficiency Requirements**.

6.3 Admission/Readmission Regulations for Programs Offered by the School of Fine Arts

1. The application for admission or readmission to programs offered by Grenfell Campus is submitted online. The application for admission or readmission to the University is submitted online at www.mun.ca/undergrad/admissions/apply. A complete application includes an application to the University (for those who have not attended Grenfell Campus in the three preceding semesters) and any other required supporting documentation. Application fees must be paid when the application forms are submitted.
2. An applicant may apply for admission into programs offered by the School of Fine Arts directly from high school. The application for admission to programs offered by Grenfell Campus is submitted online. Applicants who are new to Grenfell Campus should follow the application instructions at www.mun.ca/undergrad/apply. A complete application includes an application to the University (for those who have not attended Grenfell Campus in the three preceding semesters) and any other required supporting documentation. Application fees must be paid when the application forms are submitted. Grenfell Campus reserves the right to limit the number of spaces available in each Major and Minor program. In addition to meeting the general admission requirements of the University, applicants for the Bachelor of Fine Arts (Theatre) must undergo an audition/interview to the satisfaction of the Department. Enrollment in the Bachelor of Fine Arts (Theatre) is limited and selection is competitive. In addition to meeting the general admission requirements of the University, all applicants for the Bachelor of Fine Arts (Visual Arts) will be required to submit a portfolio of previous art work. The deadline for submission of applications to the Bachelor of Fine Arts (Theatre) is March 31st and the deadline for the Bachelor of Fine Arts (Visual Arts) is March 1st of the year in which entry is sought.
3. Transfer credit cannot be awarded for the following courses: Theatre 4001, 4010, 4020, 4060, 4070, 4080, 4090, Visual Arts 4800, 4801, 4950, 4951.

6.3.1 Bachelor of Fine Arts (Theatre)

1. Applicants must meet the general admission requirements of the University as outlined under ***UNIVERSITY REGULATIONS***.
2. In addition to meeting the general admission requirements of the University, applicants for the Bachelor of Fine Arts (Theatre) must undergo an audition/interview to the satisfaction of the School. Enrollment in the Bachelor of Fine Arts (Theatre) is limited and selection is competitive.
3. The deadline for submission of Theatre application forms is March 31st of the year in which admission is sought.
4. Transfer credit cannot be awarded for the following courses: Theatre 4001, 4010, 4020, 4060, 4070, 4080, 4090.

6.3.1.1 Articulation Agreements for Bachelor of Fine Arts (Theatre)

1. Applicants who have graduated from the two-year Digital Filmmaking Diploma program offered by the College of the North Atlantic, or who are in the final semester of that program, can apply for entry into the third year of the Bachelor of Fine Arts (Theatre), Technical Theatre Production program offered by Grenfell Campus.
2. Applicants who have graduated from the two-year Theatre Performance program offered by Holland College, or who are in the final semester of that program, can apply for entry into the third year of the Bachelor of Fine Arts (Theatre), Acting offered by Grenfell Campus.

6.3.2 Bachelor of Fine Arts (Visual Arts)

1. Applicants must meet the general admission requirements of the University. outlined under ***UNIVERSITY REGULATIONS***.
2. In addition to meeting the general admission requirements of the University, all applicants will be required to submit a portfolio of previous art work. Applicants must apply before March 1st of the year in which entry is sought. Although it is assumed that applicants will have had no previous formal training in art, evidence of suitability for study in the visual arts is required. Instructions for the submission of portfolios will be provided by the School of Fine Arts upon request. Enrollment in the Bachelor of Fine Arts (Visual Arts) program is limited and selection is competitive.
3. Students who have voluntarily withdrawn from the Bachelor of Fine Arts (Visual Arts) program and wish to re-enter must re-apply by March 1st for the upcoming Fall semester, or by August 30th for the upcoming Winter semester.
4. Students who have been required to withdraw from the Bachelor of Fine Arts (Visual Arts) program and wish to re-enter must re-apply in competition after a lapse of two semesters by March 1st for the upcoming academic year.
5. Students who have been required to withdraw twice from the Bachelor of Fine Arts (Visual Arts) program shall be ineligible for further admission to the Visual Arts Program.
6. Transfer credit cannot be awarded for the following courses: Visual Arts 4800, 4801, 4950, 4951.

6.3.3 Minor in Theatre (Acting) or Theatre (Technical Theatre Production)

1. Applicants who are completing a non-Theatre degree program that provides for the completion of a minor may complete a minor in either Theatre (Acting) or Theatre (Technical Theatre Production).
2. Application is made in the space provided on the Declaration/Change Academic Program (Grenfell Campus) which must then be approved by the Dean of the School of Fine Arts or delegate. The form may be obtained in person at the Office of the Registrar or at www.mun.ca/regoff/forms.
3. Applicants who wish to undertake either Theatre minor program must have successfully completed a minimum of 27 credit hours.
4. Admission into these minor programs is selective. At the time of application, an applicant must have a cumulative average of at least 65%. An audition is required for the Acting stream and an interview is required for the Technical Theatre Production stream.

6.4 Admission/Readmission Regulations for Programs Offered by the School of Science and the Environment

1. An applicant may apply for admission into programs offered by the School of Science and the Environment directly from high school. The application for admission to programs offered by Grenfell Campus is submitted online. The application for admission or readmission to the University is submitted online at www.mun.ca/undergrad/admissions/apply. A complete application includes an application to the University and any other required supporting documentation. Application fees must be paid when the application is submitted. Direct admission from high school is subject to the applicant's final acceptance to the University. Grenfell Campus reserves the right to limit the number of spaces available in each Major and Minor program.
2. The application for admission or readmission to programs offered by Grenfell Campus is submitted online. The application for admission or readmission to the University is submitted online at www.mun.ca/undergrad/admissions/apply. A complete application includes an application to the University (for those who have not attended Grenfell Campus in the three preceding semesters) and any other required supporting documentation. Application fees must be paid when the application forms are submitted.
3. Transfer credit cannot be awarded for the following courses: Environment and Sustainability 2200, 2201, 4950, 4960; Environmental Science 4000, 4950, 4951, 4959; Mathematics 4950; Physics 4100, 4880, 4950; Science 4000, 4950.

6.4.1 Bachelor of Environment and Sustainability

An applicant may apply for admission into the Bachelor of Environment and Sustainability program directly from high school. The application for admission to programs offered by Grenfell Campus is submitted online. Applicants who are new to Grenfell Campus should follow the application instructions at www.mun.ca/undergrad/apply. A complete application includes an application to the University and any other required supporting documentation. Application fees must be paid when the application is submitted. Direct admission from high school is subject to the applicant's final acceptance to the University. Grenfell Campus reserves the right to limit the number of spaces available in each Major and Minor program.

6.4.1.1 Direct Entry (for High School Students)

An applicant may apply for admission into the first year of the Bachelor of Environment and Sustainability program directly from high school. The application for admission to programs offered by Grenfell Campus is submitted online. Applicants who are new to Grenfell Campus should follow the application instructions at www.mun.ca/undergrad/apply. A complete application includes an application to the University and any other required supporting documentation. Application fees must be paid when the application is submitted. Direct admission from high school is subject to the applicant's final acceptance to the University.

6.4.1.2 Transfers from Other Post-Secondary Institutions

1. An applicant who is transferring from accredited post-secondary institutions must apply for admission to the University on or before the deadlines specified for the semester in which they intend to begin their program, to allow sufficient time for the evaluation of transfer credits. The deadline dates are March 1 for Fall, October 1 for Winter, and February 1 for Spring (14-week, Intersession and Summer session). The application for admission or readmission to programs offered by Grenfell Campus is submitted online. The application for admission or readmission to the University is submitted online at www.mun.ca/undergrad/admissions/apply. A complete application includes an application to the University (for those who have not attended Grenfell Campus in the three preceding semesters) and any other required supporting documentation. Application fees must be paid when the application forms are submitted.
2. Transfer credit cannot be awarded for the following courses: Environment and Sustainability 2200, 2201, 4950, 4960; Environmental Science 4000, 4950, 4951, 4959; Mathematics 4950; Physics 4100, 4880, 4950; Science 4000, 4950.

6.4.1.3 Articulation Agreements for Bachelor of Environment and Sustainability

1. For Graduates of the Two-Year Fish and Wildlife Technician Diploma Program Offered by the College of the North Atlantic

   A student may apply for admission into the Bachelor of Environment and Sustainability Program with Majors in Resource Management or Environmental Studies by indicating the program of choice on the online application at www.mun.ca/undergrad/apply. Students must be eligible for admission or readmission to the University in a category as defined in the Calendar section ***UNIVERSITY REGULATIONS*** and have been awarded the two-year Fish and Wildlife Technician Diploma offered by the College of the North Atlantic.

   A student in this category must apply under **Transfers from Other Post-Secondary Institutions** above.
2. For Graduates of the Two-Year Forest Resources Technician Diploma Program Offered by the College of the North Atlantic

   A student may apply for admission into the Bachelor of Environment and Sustainability program with majors in Resource Management or Environmental Studies by indicating the program of choice on the online application at www.mun.ca/undergrad/apply. Students must be eligible for admission or readmission to the University in a category as defined in the Calendar section ***UNIVERSITY REGULATIONS*** and have been awarded the Two-Year Forest Resources Technician Diploma offered by the College of the North Atlantic.

   A student in this category must apply under **Transfers from Other Post-Secondary Institutions** above.

6.4.2 Bachelor of Science

A student may apply for admission into the Bachelor of Science directly from high school. The application for admission to programs offered by Grenfell Campus is submitted online. Applicants who are new to Grenfell Campus should follow the application instructions at www.mun.ca/undergrad/apply. A complete application includes an application to the University and any other required supporting documentation. Application fees must be paid when the application is submitted. Direct admission from high school is subject to the applicant's final acceptance to the University. Grenfell Campus reserves the right to limit the number of spaces available in each Major and Minor program.

6.4.2.1 Direct Entry (for High School Students)

An applicant may apply for admission into the Bachelor of Science program directly from high school. The application for admission to programs offered by Grenfell Campus is submitted online. Applicants who are new to Grenfell Campus should follow the application instructions at www.mun.ca/undergrad/apply. A complete application includes an application to the University and any other required supporting documentation. Application fees must be paid when the application is submitted. Direct admission from high school is subject to the applicant's final acceptance to the University.

6.4.2.2 Transfers from Other Post-Secondary Institutions

1. An applicant who is transferring from accredited post-secondary institutions must apply for admission to the University on or before the deadlines specified for the semester in which the applicant intends to begin their program, to allow sufficient time for the evaluation of transfer credits. The deadline dates are March 1 for Fall, October 1 for Winter, and February 1 for Spring (14-week, Intersession and Summer session). The application for admission or readmission to programs offered by Grenfell Campus is submitted online. The application for admission or readmission to the University is submitted online at www.mun.ca/undergrad/admissions/apply. A complete application includes an application to the University (for those who have not attended Grenfell Campus in the three preceding semesters) and any other required supporting documentation. Application fees must be paid when the application forms are submitted.
2. Transfer credit cannot be awarded for the following courses: Environment and Sustainability 2200, 2201, 4950, 4960; Environmental Science 4000, 4950, 4951, 4959; Mathematics 4950; Physics 4100, 4880, 4950; Science 4000, 4950.

6.5 Bachelor of Science in Nursing (Collaborative) Program Degree

Admission/readmission regulations for the **Bachelor of Science in Nursing (Collaborative)** degree program can be found at **Admission/Readmission Regulations for the Faculty of Nursing**.

7 Program Regulations - General and Honours Degrees

7.1 School of Arts and Social Science Core Program Requirements

1. Students completing the Bachelor of Arts or Bachelor of Science degree programs at Grenfell Campus offered by the School of Arts and Social Sciences must complete the requirements as outlined below under **Breadth of Knowledge Requirement**, **Literacy Requirement**, and **Quantitative Reasoning and Analysis Requirement**.
2. Students completing the Bachelor of Environment and Sustainability or Bachelor of Science degree programs offered by the School of Science and the Environment must complete a core program as indicated under **School of Science and the Environment Core Program Requirements**.

7.1.1 Breadth of Knowledge Requirement

Six credit hours from each of the three groups identified below for a total of 18 credit hours. The courses chosen can be any courses within the disciplines identified. However, students are not permitted to use these courses to meet the Quantitative Reasoning and Analysis requirement nor the first-year English requirements.

7.1.1.1 Breadth of Knowledge Requirement - Group A

Art History, Classics, English, History, Humanities, Languages, Philosophy, Religious Studies, Theatre, Visual Arts

7.1.1.2 Breadth of Knowledge Requirement - Group B

Anthropology, Business, Economics, Education, Environment and Sustainability, Folklore, Gender Studies, Geography, Human Kinetics and Recreation, Political Science, Psychology, Sociology, Tourism Studies

7.1.1.3 Breadth of Knowledge Requirement - Group C

Biochemistry, Biology, Chemistry, Computer Science, Earth Sciences, Environmental Science, Mathematics, Physics, Science

7.1.2 Literacy Requirement

Thirty credit hours in Writing courses which must include 6 credit hours in first-year English. Up to 6 credit hours in languages other than English may be used to satisfy the literacy requirement. Courses in this group are identified with the designation W and are listed in **Table 1 Designated Writing Courses (W)**.

Courses in this category must either be completed through on-campus offerings at Grenfell Campus or be demonstrated to be equivalent to Grenfell writing courses.

7.1.3 Quantitative Reasoning and Analysis Requirement

Six credit hours in Quantitative Reasoning and Analysis courses. Courses in this group are identified with the designation QRA and are listed in **Table 2 Designated Quantitative Reasoning and Analysis Courses (QRA)**.

7.1.4 Designated Writing Courses (W)

Courses will be designated Writing courses by the Committee on Academic Programming. A Writing course is a course in which a minimum of 30 percent of the course grade involves a specific component consisting of written work on which students will receive feedback. For the purpose of this regulation, the final examination will not be counted as part of the evaluated Writing component.

Table 1 Designated Writing Courses (W)

Anthropology: 2230, 2240, 2300, 2412, 2414, 2500, 3080, 3083, 3140, 3314, 3520, 3525, 4072, 4440	Humanities: 1001, 1002, 2001, 2002, 2010, 3001, 3002, 3010, 3020, 3021, 4001, 4010, 4950
Biology: 2040, 2041, 2122, 2600	Mathematics: 2130
Business: 2020	Philosophy: 1002, 1005, 2020, 2030, 2040, 2100, 2130, 2140, 2201, 2215, 2340, 2360, 3010, 3220, 3230, 3310, 3400, 3430, 3450, 3460, 3610, 4000, 4005
Classics: 1100, 1120, 1121, 1200, 2010, 2015, 2020, 2035, 2040, 2055, 2701, 2800, 2801, 3010, 3020, 3110, 3111, 3130	Political Science: 1010, 1020, 2200, 2600, 3351, 3631
Economics: 3085	Psychology: 4910, 4925, 4950, 4951, 4959
English: All English courses listed with the Grenfell Campus English Program and English 2010	Religious Studies: 1000, 2013, 2050, 2051, 2610, 2830, 3010, 3020, 3200, 3401, the former 3500, 3820, 3831,3840, 3880
Environmental Science: 2370, 3131	Science: 2001
Environment and Sustainability: 4201	Social/Cultural Studies: 4000, 4100, 4950
Folklore: 1000, 1050, 2100, 2230, 2300, 2401, 2500, 2600, 3130, 3200, 3300, 3606, 4440	Sociology: 2100, 2120, 2230, 2240, 2610, 3140, 3150, 3160, 3290, 3314, 3395, 4072
French: 2100, 2101, 2601, 2602, 3100, 3101	Theatre: 1000, 1001
Gender Studies: 2001	Tourism: 2000, 3240
Geography: 2001, 2302	Visual Arts: 2700, 2701, 3620, 3700, 3701, 3702-3721, 3820, 4700-4729, 4730, 4731, 4740, 4741
History: All History courses listed with the Grenfell Campus Historical Studies Program	University: 1010

7.1.5 Designated Quantitative Reasoning and Analysis Courses (QRA)

Courses will be designated Quantitative Reasoning and Analysis by the Committee on Academic Programming. The Quantitative Reasoning and Analysis (QRA) Requirement is intended to help students develop a degree of appreciation of numerical, statistical and/or symbolic modes of representation, as well as an appreciation of the analysis, interpretation and broader quantitative application of such representations.

Table 2 Designated Quantitative Reasoning and Analysis Courses (QRA)

Biochemistry 1430	Environment and Sustainability 2000, 2001, 3001, 3101, 4100
Biology 2250, 2600	Geography 3222
Business: 2100, 2110, 3100, 3150, 3110, 3120, 3410, 3500, 3510, 4120, 4130, 4510	Mathematics (All courses)
Chemistry (All courses with the exception of Chemistry 1900)	Philosophy 2030 or the former 2210, 2031 or the former 2211
Computer Science (All courses)	Physics (All courses)
Earth Sciences 2150	Psychology 2925, 2950, 3950
Economics 1010 (or the former 2010), 1020 (or the former 2020), 3150	Sociology 3040
Environmental Science (All courses with the exception of: 1000, 2360, 2370, 2371, 3072 and 4000)	Statistics (All courses)

7.2 School of Science and the Environment Core Program Requirements

Students completing the Bachelor of Environment and Sustainability or Bachelor of Science degree programs offered by the School of Science and the Environment must complete at least 120 credit hours, including 24 credit hours as follows:

1. One of:
   a. 6 credit hours in English courses;
   b. 3 credit hours in English and 3 credit hours in another language;
   c. 6 credit hours in Critical Reading and Writing (CRW) courses, including at least 3 credit hours in English courses.
2. 6 credit hours in Mathematics or Statistics courses;
3. 6 credit hours in courses chosen from: Biochemistry, Biology, Chemistry, Computer Science, Earth Sciences, Environmental Science, Ocean Sciences, or Physics;
4. 6 credit hours in courses chosen from: Economics, Environment and Sustainability, Geography, or Political Science.

The same course cannot be used to meet more than one of the requirements listed above.

Critical Reading and Writing (CRW) courses are regulated by the Faculty of Humanities and Social Sciences, St. John's Campus. Eligible CRW courses are indicated under **Faculty of Humanities and Social Sciences, Course Descriptions**.

7.3 School of Arts and Social Science

www.grenfell.mun.ca/school-of-arts-and-social-science

The School of Arts and Social Science offers the Bachelor of Arts Degree with majors in English Language and Literature, Historical Studies, Multidisciplinary Humanities, Psychology, and Social/Cultural Studies. A Bachelor of Business Administration and a Bachelor of Science with Major in Psychology are also available. Minors are available in Business, Canadian Studies, Classics, English, Folklore, French, Historical Studies, Multidisciplinary Humanities, Philosophy, Psychology, Religious Studies, Social/Cultural Studies, Sociology, and Tourism Studies and are outlined under **Table 19 Minor Programs Offered by the School of Arts and Social Science**. Students may choose the minor from **Table 19 Minor Programs Offered by the School of Arts and Social Science**, or from **Table 7 Minor Program Offered by the School of Fine Arts**, or from **Table 10 Minor Programs Offered by the School of Science and the Environment**. An **Intensive English Program (IEP-G)** and an **Intensive English Bridge Program at Grenfell (IEBP-G)** are also available.

Bachelor of Arts (Honours) in English, Psychology, Bachelor of Business Administration (Honours) and the Bachelor of Science (Honours) degree in **Psychology** are available.

7.3.1 Bachelor of Arts with Major in English Language and Literature

www.grenfell.mun.ca/english

- The 120 credit hour, 40 course program may be completed on a full or part-time basis as set out under **Table 1 Bachelor of Arts with Major in English Language and Literature**.
- A student must complete Core Program Requirements as outlined under **School of Arts and Social Science Core Program Requirements**.
- A student must complete an approved concentration of courses known as a Major, an approved concentration of courses known as a Minor, and elective courses to make up the required total of 40 courses, 120 credit hours.
- A student may not use the same course to satisfy the requirements for both a Major and a Minor.
- As an alternative to a Minor, a second Major may be completed and students must meet all general and departmental or program regulations for both Majors.
- A student may devise a Major/Minor of one's own choosing in close consultation with a faculty advisor and with approval of the appropriate dean(s). Such "open" programs must be approved by the School Committee on Student Academic Affairs.
- Any student enrolled in the Grenfell Campus Bachelor of Arts Degree with a Major in English who has completed the Bachelor of Fine Arts (Theatre) Degree at Grenfell Campus will be considered to have fulfilled the requirements for a Minor in Theatre.

Table 1 Bachelor of Arts with Major in English Language and Literature

Required Courses	Elective Courses
Courses as outlined under **School of Arts and Social Science Core Program Requirements**, **Breadth of Knowledge Requirement**, **Literacy Requirement**, and **Quantitative Reasoning and Analysis Requirement** English 1000 and 1001 or equivalent English 2005, 2008, 2815, 3205 or 3206, 4950 21 additional credit hours in English courses, including at least 3 credit hours in women writers and 3 credit hours in pre-1900 courses. At least 9 credit hours must be at the 3000 level and at least 6 credit hours must be at the 4000 level.	A minor comprised of 8 courses, 24 credit hours chosen from **Table 19 Minor Programs Offered by the School of Arts and Social Science**, or from **Table 7 Minor Program Offered by the School of Fine Arts**, or from **Table 10 Minor Programs Offered by the School of Science and the Environment**. As an alternative to a Minor, a second Major may be completed.
Pre-1900 Courses English 2211, 2215, 2350, 2805, 3021, 3130, 3181, 3205, 3206, 3395, 4317 **Women Writers Courses** English 2750 - 2759, 2805, 3810 English courses that are listed in more than one category cannot be double counted.	Elective courses to make up the total of 120 credit hours, other than those required for the **School of Arts and Social Science Core Program Requirements** and Major/Minor requirements, may be chosen according to the following guidelines: Any courses in arts, social science, science and fine arts and Up to 15 credit hours in other subject areas.

7.3.2 Bachelor of Arts with Major in Historical Studies

www.grenfell.mun.ca/historical-studies

- The 120 credit hour, 40 course program may be completed on a full or part-time basis as set out under **Table 2 Bachelor of Arts with Major in Historical Studies**.
- A student must complete Core Program Requirements as outlined under **School of Arts and Social Science Core Program Requirements**.
- A student must complete an approved concentration of courses known as a Major, an approved concentration of courses known as a Minor, and elective courses to make up the required total of 40 courses, 120 credit hours.
- Applicable courses used to satisfy the Minor requirements may also be counted as Historical Studies credits.
- As an alternative to a Minor, a second Major may be completed and students must meet all general and departmental or program regulations for both Majors.
- A student may devise a Major/Minor of one's own choosing in close consultation with a faculty advisor and with approval of the appropriate dean(s). Such "open" programs must be approved by the School Committee on Student Academic Affairs.

Table 2 Bachelor of Arts with Major in Historical Studies

Required Courses	Elective Courses
Courses as outlined under **School of Arts and Social Science Core Program Requirements**, **Breadth of Knowledge Requirement**, **Literacy Requirement**, and **Quantitative Reasoning and Analysis Requirement**	A minor comprised of 8 courses, 24 credit hours chosen from **Table 19 Minor Programs Offered by the School of Arts and Social Science**, or from **Table 7 Minor Program Offered by the School of Fine Arts**, or from **Table 10 Minor Programs Offered by the School of Science and the Environment**. As an alternative to a Minor, a second Major may be completed.
The Major consists of a minimum of 19 courses, 57 credit hours as follows: 1. History 1100, 1101, and 3840 2. 24 credit hours in **Early** and **Later Western History**, namely: **12 credit hours in Early Western History chosen from**: Anthropology 3520 or History 3520, Art History 2700 or History 2700, Art History 3700 or History 3700, Art History 3701 or History 3701, Classics 2035 or History 2035, Classics 2040 or History 2040, Classics 3090 or History 3090, History 2100, 2200, 2300, 2320, 2330, 3030, 3050, 3110, 3135, 3320, 3370, 3445, 3551, 3760, 3786 Those courses that are listed in both Early and later Western History categories (3030 and 3551) cannot be double-counted for both categories. **12 credit hours in Later Western History chosen from**: Anthropology 3525 or Archaeology 3525 or History 3525, Art History 2701 or History 2701, History 2120, 2210, 2310, 2500, 2510, 2540, 3030, 3060, 3102, 3120, 3250, 3330, 3380, 3440, 3460, 3490, 3551, 3675, 3770, 3801, 3807 Those courses that are listed in both Early and later Western History categories (3030 and 3551) cannot be double-counted for both categories. 3. 6 credit hours in 4000-level History courses which are in addition to the senior project 4. Senior project: History 4950; or History 4951 and 4952 5. 15 credit hours chosen from the following list of which no more than 6 credit hours can be from one single discipline: Anthropology 1031, Anthropology 2230 or Folklore 2230 or Sociology 2230, Anthropology 2260 or Sociology 2260, Anthropology 2270 or Sociology 2270, Anthropology 3140 or Sociology 3140, Anthropology 3314 or Sociology 3314, Classics 1100, Classics 1200, Classics 3700, Economics 1010 (or the former 2010), Economics 1020 (or the former 2020), English 2005, the former English 2006, the former English 2007, English 2155, English 2215, English 2244 or Social/Cultural Studies 2244, English 3215, Folklore 1000, Folklore 2300 or Anthropology 2300, Folklore 2401, Folklore 2500 or Anthropology 2500, French 1501, French 1502, French 2100, French 2101, French 2601, French 2602, Geography 1050, Geography 2001, Humanities 2002, Humanities 3001, Humanities 3002, Philosophy 1005 or the former 1600, Philosophy 2201 or the former 2701, Philosophy 2215 or the former 2702, Philosophy 3400, Political Science 1000, Political Science 1020, Political Science 2200, Political Science 2800, Religious Studies 2013, Religious Studies 2050, Religious Studies 2051, Social/Cultural Studies 2000, Sociology 1000, Sociology 2120, Sociology 3040, Sociology 3150, Theatre 1000, Theatre 1001 A student who chooses to take HIST 4951 and HIST 4952 is required to complete only 12 credit hours from this list.	Elective courses to make up the total of 120 credit hours, other than those required for the **School of Arts and Social Science Core Program Requirements**, and Major/Minor requirements, may be chosen according to the following guidelines: Any courses in arts, social science, science and fine arts and Up to 15 credit hours in other subject areas.

7.3.3 Bachelor of Arts with Major in Multidisciplinary Humanities

www.grenfell.mun.ca/humanities

- The 120 credit hour, 40 course program may be completed on a full or part-time basis as set out under **Table 3 Bachelor of Arts with Major in Multidisciplinary Humanities**.
- A student must complete Core Program Requirements as outlined under **School of Arts and Social Science Core Program Requirements**.
- A student must complete an approved concentration of courses known as a Major, an approved concentration of courses known as a Minor, and elective courses to make up the required total of 40 courses, 120 credit hours.
- A maximum of 12 credit hours from the Multidisciplinary Humanities Major may be used to satisfy the requirements of a single discipline Minor or second Major, provided they are in accordance with the regulations governing both programs.
- As an alternative to a Minor, a second Major may be completed and students must meet all general and departmental or program regulations for both Majors.
- A student may devise a Major/Minor of one's own choosing in close consultation with a faculty advisor and with approval of the appropriate dean(s). Such "open" programs must be approved by the School Committee on Student Academic Affairs.

Table 3 Bachelor of Arts with Major in Multidisciplinary Humanities

Required Courses	Elective Courses
Courses as outlined under **School of Arts and Social Science Core Program Requirements**, **Breadth of Knowledge Requirement**, **Literacy Requirement**, and **Quantitative Reasoning and Analysis Requirement**	A minor comprised of 8 courses, 24 credit hours chosen from **Table 19 Minor Programs Offered by the School of Arts and Social Science**, or from **Table 7 Minor Program Offered by the School of Fine Arts**, or from **Table 10 Minor Programs Offered by the School of Science and the Environment**. As an alternative to a Minor, a second Major may be completed. A maximum of 12 credit hours from the Multidisciplinary Humanities Major may be used to satisfy the requirements of a single discipline Minor or second Major, provided they are in accordance with the regulations governing both programs. If a student has completed 75 credit hours in Humanities courses and disciplines, then the student does not have to complete a minor.
The Major consists of 15 courses, 45 credit hours as follows: **21 credit hours in Humanities courses:** 12 credit hours: Humanities 1001, 1002, 3010, 4950 and 9 credit hours in other Humanities courses, at least 3 credit hours at the 3000-level and at least 3 credit hours at the 4000-level A total of 24 credit hours from courses in at least three of the arts/humanities disciplines chosen from the following list: Classics 1100, 1200, 3405, 3415, English 2005, 2008, 2705, 2815, 3205, 3206, 3395, Folklore 2500, History 2500, 2510, 3120, 3786, 3801, 4101, History 2700 or Visual Arts 2700, History 2701 or Visual Arts 2701, History 3700 or Visual Arts 3700, History 3701 or Visual Arts 3701, History 4730 or Visual Arts 4730, History 4731 or Visual Arts 4731, Philosophy 1005, Philosophy 2201 or Classics 2701, Philosophy 3010, Religious Studies 1000, 3820, Tourism Studies 3240 In order to meet the Bachelor of Arts degree requirements at Grenfell Campus, a student is required to complete 12 credit hours at the 3000-level and 6 credit hours at the 4000- level, in addition to Humanities 4950.	Elective courses to make up the total of 120 credit hours, other than those required for the **School of Arts and Social Science Core Program Requirements**, and Major/Minor requirements, may be chosen according to the following guidelines: Any courses in arts, social science, science and fine arts and Up to 15 credit hours in other subject areas.

7.3.4 Bachelor of Arts with Major in Psychology

www.grenfell.mun.ca/psychology

- The 120 credit hour, 40 course program may be completed on a full or part-time basis as set out under **Table 4 Bachelor of Arts with Major in Psychology**.
- A student must complete Core Program Requirements as outlined under **School of Arts and Social Science Core Program Requirements**.
- A student must complete an approved concentration of courses known as a Major, an approved concentration of courses known as a Minor, and elective courses to make up the required total of 40 courses, 120 credit hours.
- A student may not use the same course to satisfy the requirements for both a Major and a Minor.
- As an alternative to a Minor, a second Major may be completed and students must meet all general and departmental or program regulations for both Majors.
- A student may devise a Major/Minor of one's own choosing in close consultation with a faculty advisor and with approval of the appropriate dean(s). Such "open" programs must be approved by the School Committee on Student Academic Affairs.
- A student completing this program cannot receive credit for Psychology 2920.

Table 4 Bachelor of Arts with Major in Psychology

Required Courses	Elective Courses
Courses as outlined under **School of Arts and Social Science Core Program Requirements**, **Breadth of Knowledge Requirement**, **Literacy Requirement**, and **Quantitative Reasoning and Analysis Requirement**	Elective courses to make up the total of 120 credit hours, other than those required for the **School of Arts and Social Science Core Program Requirements** and Major/Minor requirements, may be chosen according to the following guidelines: Any courses in arts, social science, science and fine arts and Up to 15 credit hours in other subject areas.
45 credit hours in Psychology as follows: Psychology 1000, 1001, 2925, 2950, 4910, 4925, and one of 4950 or 4951 At least 12 credit hours from: Psychology 2025, 2125, 2225, 2425, 2625, 2825 At least 12 credit hours chosen from: Psychology 3025, 3040, 3125, 3126, 3225, 3226, 3325, 3425, 3525, 3625, 3626, 3627, 3628, 3725, 3825, 3950	A minor comprised of 8 courses, 24 credit hours chosen from **Table 19 Minor Programs Offered by the School of Arts and Social Science**, or from **Table 7 Minor Program Offered by the School of Fine Arts**, or from **Table 10 Minor Programs Offered by the School of Science and the Environment**. As an alternative to a Minor, a second Major may be completed.

7.3.5 Bachelor of Arts with Major in Social/Cultural Studies

www.grenfell.mun.ca/social-cultural-studies

- The 120 credit hour, 40 course program may be completed on a full or part-time basis as set out under **Table 5 Bachelor of Arts with Major in Social/Cultural Studies**.
- A student must complete Core Program Requirements as outlined under **School of Arts and Social Science Core Program Requirements**.
- A student must complete an approved concentration of courses known as a Major and elective courses to make up the required total of 40 courses, 120 credit hours. A Minor is not required for this program.

Table 5 Bachelor of Arts with Major in Social/Cultural Studies

Required Courses	Elective Courses
Courses as outlined under **School of Arts and Social Science Core Program Requirements**, **Breadth of Knowledge Requirement**, **Literacy Requirement**, and **Quantitative Reasoning and Analysis Requirement**	Elective courses to make up the total of 120 credit hours, other than those required for the **School of Arts and Social Science Core Program Requirements** and Major/ Minor requirements, may be chosen according to the following guidelines: Any courses in arts, social science, science and fine arts Up to 15 credit hours in other subject areas.
72 credit hours as follows: Anthropology 1031, 2410, and an additional 9 credit hours in Anthropology Folklore 1000, 2100, and an additional 9 credit hours in Folklore History 1100, 1101 Social/Cultural Studies 2000, 4000, 4100, 4950 Sociology 1000, 3040, 3150, and an additional 6 credit hours in Sociology 9 credit hours at the 3000 or 4000 level chosen from Anthropology, Folklore, Sociology, or Social/Cultural Studies	If a student decides to complete a minor, it must be comprised of 8 courses, 24 credit hours chosen from **Table 19 Minor Programs Offered by the School of Arts and Social Science**, or from **Table 7 Minor Program Offered by the School of Fine Arts**, or from **Table 10 Minor Programs Offered by the School of Science and the Environment**.

7.3.6 Bachelor of Business Administration

www.grenfell.mun.ca/business

- The Bachelor of Business Administration requires a total of 120 credit hours as outlined under **Table 6 Bachelor of Business Administration** and may be completed on a full or part-time basis. Students must achieve a grade point average of at least 2.5 and an average of at least 60% on those 120 credit hours.
- A student enrolled in the Bachelor of Business Administration program is not required to complete minor programs; however, students may choose to pursue a minor in other non-business academic units (where minor programs exist) with permission of that academic unit.
- A student is advised to refer to the requirements for the chosen Minor program as set forth in the University Calendar, and it is recommended that a student seek academic advice when planning a program.

Table 6 Bachelor of Business Administration

Term	Required Courses	Elective Courses
Year 1	BUSN 1010 BUSN 1020 Economics 1010 (or the former 2010) Economics 1020 (or the former 2020) 6 credit hours in first-year English (students are strongly encouraged to take English 1110) Mathematics 1052 (Mathematics 1000 is also accepted)	9 credit hours selected from **Electives** below

7.3.7 Bachelor of Education (Primary/Elementary) as a Second Degree

www.grenfell.mun.ca/education

The Grenfell Campus offering of this program is currently under review and may not be available for intake at this time. For further information please contact the Office of Academic Programs, Faculty of Education.

7.3.8 Bachelor of Science with Major in Psychology

www.grenfell.mun.ca/psychology

- The 120 credit hour, 40 course program may be completed on a full or part-time basis as set out under **Table 18 Bachelor of Science with Major in Psychology**.
- A student must complete Core Program Requirements as outlined under **School of Arts and Social Science Core Program Requirements**.
- A student must complete an approved concentration of courses known as a Major and elective courses to make up the required total of 40 courses, 120 credit hours. A Minor is not required for this program.
- Students completing this program cannot receive credit for Psychology 2920.

Table 18 Bachelor of Science with Major in Psychology

Required Courses	Elective Courses
Courses as outlined under **School of Arts and Social Science Core Program Requirements**, **Breadth of Knowledge Requirement**, **Literacy Requirement**, and **Quantitative Reasoning and Analysis Requirement**	Elective courses to make up the total of 120 credit hours, other than those required for the **School of Arts and Social Science Core Program Requirements** and Major/Minor requirements, may be chosen according to the following guidelines: Any courses in arts, social science, science and fine arts and Up to 15 credit hours in other subject areas.
45 credit hours in Psychology as follows: Psychology 1000, 1001, 2925, 2950, 4910, 4925, and one of 4950 or 4951 At least 12 credit hours chosen from: Psychology 2025, 2125, 2225, 2425, 2625, 2825 At least 12 credit hours chosen from: Psychology 3025, 3040, 3125, 3126, 3225, 3226, 3325, 3425, 3525, 3625, 3626, 3627, 3628, 3725, 3825, 3950 **36 credit hours as follows:** 6 credit hours in Mathematics, which must include Mathematics 1000 Biology 1001 and 1002 Chemistry 1200 and 1001 or Physics 1020 (or 1050) and 1021 (or 1051) 9 credit hours at the 2000 level or above (two courses must be laboratory courses) in one of the following subjects: Biochemistry, Biology, Chemistry, Earth Science, Environmental Science, Physics 9 additional credit hours chosen in any combination from the following subjects: Biochemistry, Biology, Chemistry, Computer Science, Earth Science, Environmental Science, Mathematics, Physics, Statistics	If a student decides to complete a minor, it must be comprised of 8 courses, 24 credit hours chosen from **Table 19 Minor Programs Offered by the School of Arts and Social Science**, or from **Table 7 Minor Program Offered by the School of Fine Arts**, or from **Table 10 Minor Programs Offered by the School of Science and the Environment**.

7.3.9 Intensive English Program at Grenfell (IEP-G)

www.grenfell.mun.ca/esl

- The 12 week, full-time, non-credit program may be offered at the intermediate level in each of the Fall, Winter, and Spring semesters.
- Full participation is an essential part of the language learning process in this program. For this reason, regular attendance is required. No more than 10% of instructional days may be missed without documented reasons that are acceptable to the Coordinator of English as a Second Language Programs. Students who fail to meet the minimum attendance requirements may not be permitted to re-enroll in the IEP in the following semester.
- Evaluation of students may include, but not be limited to, any or all of the following: projects, assignments, quizzes, oral presentations, and class participation.

7.3.9.1 Program of Study

1. The IEP-G may be offered at the intermediate level in each of the Fall, Winter, and Spring terms.
2. A student admitted to the IEP-G must register for the course English as a Second Language 013F.

7.3.10 Intensive English Bridge Program at Grenfell (IEBP-G)

www.grenfell.mun.ca/esl

- The program is offered at two levels, IEBP-G Level 1 and IEBP-G Level 2 and requires fifteen to twenty hours of classroom language instruction in reading, writing, speaking, grammar, vocabulary and listening. The emphasis is on English for academic purposes.
- A student in this program may register concurrently for one undergraduate credit course at IEBP-G Level 1 or two undergraduate credit courses at IEBP-G Level 2, in consultation with the Coordinator of English as a Second Language programs and with the approval of the academic unit. The number of semesters of intensive English study required to achieve a student's desired level of proficiency will vary according to the student's initial proficiency level and individual progress rate.
- The Intensive English Bridge Program is intended for applicants to Memorial University of Newfoundland who have been provisionally admitted as undergraduate students, and who are students of high intermediate or advanced proficiency who meet the criteria outlined in **Admission**.
- Final admission for provisionally admitted students will be subject to the regulations governing English language proficiency requirements for admission/readmission to the University as described in the University Calendar under ***UNIVERSITY REGULATIONS*, English Language Proficiency Requirements**.

7.3.10.1 Program of Study

1. A student admitted to the Intensive English Bridge Program must register for the course English as a Second Language 014F (level 1) or 015F (level 2).
2. A student in this program may normally register for no more than one credit course at IEBP-G Level 1 and no more than two credit courses at IEBP-G Level 2, chosen in consultation with the Coordinator of the English as a Second Language Program, and with approval of the academic unit.
3. A student may register in each level of the Intensive English Bridge Program for a maximum of two semesters.
4. Full participation is an essential part of the language learning process in this Program. For this reason, regular attendance is required. No more than 10% of instructional days may be missed without documented reasons that are acceptable to the Coordinator of English as a Second Language Programs. A student who fails to meet the minimum attendance requirements may not be permitted to re-enroll in the IEBP-G in the following semester.

7.3.11 Certificate in Sustainable Rural Communities

www.grenfell.mun.ca/src

- The full or part-time 21 credit hour Certificate in Sustainable Rural Communities requires 6 core credit hours and 15 elective credit hours of which 3 credit hours must focus on Indigenous Studies.
- The 21 credit are set out below in **Table 19 Certificate in Sustainable Rural Communities**.
- A student may count courses satisfying the Honours, Major, Minor and elective components of an undergraduate degree to satisfy the requirements of the Certificate Program.
- Prerequisites for courses are applicable. This may increase the number of courses students will have to take to complete the Certificate Program.
- A minimum of 9 credit hours in courses prescribed for a certificate program must be completed at Memorial University of Newfoundland.

Table 19 Certificate in Sustainable Rural Communities

Core Courses (6 credit hours)	Electives (15 credit hours)
Sustainable Rural Communities 1800 Sustainable Rural Communities 3800	Anthropology 3210 or Sociology 3210 Anthropology 2200 Anthropology 2230 or Sociology 2230 or Folklore 2230 Anthropology 2300 or Folklore 2300 Archaeology 1005 or History 1005 (these courses focus on Indigenous Studies) Archaeology 2482 (this course focuses on Indigenous Studies) Business 1010 or 1000 Business 1020 or 2600 Business 2060 Environment and Sustainability 1000 Environment and Sustainability 2001 Environment and Sustainability 3100 Geography 1050 Geography 2302 Geography 2425 Geography 3350 Political Science 2600 Political Science 3351 Tourism 1000 Tourism 2000 Tourism 3240 Tourism 4903
Further courses will be added to the list focusing on Indigenous studies which must be taken as part of the electives requirement. An approved list will be available at www.grenfell.mun.ca/src.	

7.3.12 Minor Programs Offered by the School of Arts and Social Science

www.grenfell.mun.ca/minor

The School of Arts and Social Science offers minors comprised of 8 courses, 24 credit hours as outlined under **Table 19 Minor Programs Offered by the School of Arts and Social Science**. In addition to the minors below, students for the Bachelor of Arts degree may complete a minor offered by the School of Fine Arts or the School of Science and the Environment.

Table 19 Minor Programs Offered by the School of Arts and Social Science

Business Minor Business 1010, 1020 9 credit hours in Business courses from the Grenfell Campus offerings at the 2000-level 9 credit hours in Business courses from the Grenfell Campus offerings at the 3000-level or above	**Multidisciplinary Humanities Minor** Humanities 1001, 1002 18 additional credit hours in Humanities at least 3 of which have to be at the 3000- or 4000-level
Canadian Studies Minor 15 credit hours chosen from at least four different disciplines: English 2146, English 2156 French 1502, French 2601, French 2602 History 2200, History 2210 Political Science 1010, the former Political Science 2710, the former Political Science 2711, Political Science 2800 Sociology/Anthropology 2240 9 additional credit hours in courses from at least two different disciplines: Art History 3710, Art History 3711 English 3145, English 3147, English 3148, English 3149, English 4307, English 4825-35 Folklore 4300 History 2120, History 3520/Anthropology 3520/Archaeology 3520, History 3525/Anthropology 3525/Archaeology 3525, History 4254 Political Science 3631 or the former 3731 Sociology 3395	**Philosophy Minor** Philosophy 1002 or the former 1200, 1005 or the former 1600, 2030 or the former 2210, 2100 or the former 2551, 2130 or the former 2561 9 additional credit hours in Philosophy, of which at least 3 credit hours must be at the 3000- or 4000-level
Classics Minor Classics 1100 and 1200 Classics 2035 and 2040 3 credit hours at the 3000 level 9 additional credit hours in Classics	**Psychology Minor** Psychology 1000, 1001 18 credit hours in Psychology at the 2000 level or above

Folklore Minor Folklore 1000, 2100, 2300, 2401, 2500 9 additional credit hours in Folklore	**Social/Cultural Studies Minor** Anthropology 1031, Folklore 1000, Sociology 1000 Anthropology 2410 or Social/Cultural Studies 2000 Folklore 2100 or Sociology 3040 3 additional credit hours in each of Anthropology, Folklore, and Sociology
French Minor No more than 6 credit hours at the 1000 level and no more than 6 transfer credits may be used to fulfill the minimum requirement of the minor in French. French 2100 and 2101 French 3100 or French 3101 15 additional credit hours in French	**Sociology Minor** Sociology 1000, 3040, 3150 15 credit hours in Sociology; at least 6 credit hours must be at the 3000 or 4000 level
Historical Studies Minor History 1100 and 1101 History 3840 3 credit hours at 3000 level in History 3 credit hours at 4000 level in History additional 9 credit hours in History	**Tourism Studies Minor** Business 1020 Tourism 1000, 3240, 4902 6 credit hours in Tourism Studies beyond the 1000-level 6 credit hours chosen from Environment and Sustainability 2200 or 2201, Philosophy 2130 or the former Philosophy 2561, Religious Studies 3880
Students for the Bachelor of Arts, Bachelor of Business Administration, and Bachelor of Science degrees offered by the School of Arts and Social Science may complete a minor offered by the School of Arts and Social Science, the School of Fine Arts, or the School of Science and the Environment. See **Table 19 Minor Programs Offered by the School of Arts and Social Science**, or from **Table 7 Minor Program Offered by the School of Fine Arts**, or from **Table 10 Minor Programs Offered by the School of Science and the Environment**.	

7.4 School of Fine Arts

www.grenfell.mun.ca/school-of-fine-arts

The School of Fine Arts offers Bachelor of Fine Arts degrees in Theatre and in Visual Arts. The Minor Program is available in Art History.

7.4.1 Bachelor of Fine Arts (Theatre)

www.grenfell.mun.ca/theatre

- The 120 credit hour, 36 course program may be completed on a full-time basis as set out under **Table 1 Bachelor of Fine Arts (Theatre)**. The course structure for the Bachelor of Fine Arts (Theatre) is outlined under **Table 2 Suggested Program of Study for the Bachelor of Fine Arts in Theatre**.
- The program is designed to educate and train the student in the history, theory and practice of the theatre arts. The degree provides an undergraduate training, delivered by theatre professionals, that will prepare students to enter a professional graduate school of theatre, theatre conservatory or an apprenticeship in the theatre profession. The degree also provides a broad liberal arts education with a strong component of dramatic literature, enabling the graduate to pursue a variety of careers outside the theatre profession.
- In recognition of the relative isolation of the Grenfell Campus and the need for students of the performing arts to be exposed to examples of excellence in their field of study, provision will be made for students in their senior years to visit major theatre centres outside the province (e.g. the Harlow Campus will be utilized for studies in London and Stratford).
- Where circumstances warrant any prerequisite(s) for Theatre courses may be waived by the Program Chair.
- Students in their first year will not be allowed to participate in theatre productions. Exceptions will be made only with the permission of the Dean of the School of Fine Arts, and permission will be given only where a student demonstrates satisfactory performance. Where circumstances warrant, a student in second or third year may be given the opportunity for advanced responsibilities in production with the permission of the Program Chair. Permission will be given only where a student demonstrates above average academic performance as well as exceptional theatrical ability.
- Productions will constitute the designated number of rehearsal hours as described below. However, the final week of rehearsals (technical rehearsals) will include ten hour days on Saturday and Sunday. All performances will take place in the evenings with the possible exceptions of occasional matinees.

7.4.1.1 Articulation Agreement - Bachelor of Fine Arts (Theatre) for Graduates of the Two-Year Digital Filmmaking Diploma Program Offered by the College of the North Atlantic

- Students who have graduated from the two-year Digital Filmmaking Diploma Program offered by the College of the North Atlantic and who are entering the Bachelor of Fine Arts (Theatre), Technical Theatre Production program will be given a total of 59 credit hours toward the 120 credit hour degree.
- A maximum of 9 additional transfer credit hours applicable to the degree may be used to meet the degree requirements.
- Students will be required to complete an additional 61 credit hours over the course of five semesters as outlined under **Table 3 Suggested Program of Study for the Bachelor of Fine Arts (Theatre) for Graduates of the Two-Year Digital Filmmaking Diploma Program Offered by the College of the North Atlantic**.

Table 3 Suggested Program of Study for the Bachelor of Fine Arts (Theatre) for Graduates of the Two-Year Digital Filmmaking Diploma Program Offered by the College of the North Atlantic

Year/Semester	Courses
Year 1, Fall Semester	English 1001 (or equivalent) Theatre 1000, 3020, 3060, 3090
Year 1, Winter Semester	6 credit hours chosen from Classics 3405, 3410, 4240, 4300, 4305, English 3021, 3022, 3156, 3171, 3181, 3200, 3201, 3206, 3260, 3275, 3902, 4210, 4211, 4300, 4301, 4302, 4305, 4307, 4308, 4317, 4912, Folklore 3300, French 3501, Spanish 4502 Theatre 3021, 3061, 3091

Year 2, Fall Semester	Theatre 4010, 4030, 4040, 4060, 4090
Year 2, Winter Semester	Theatre 4001

7.4.1.2 Articulation Agreement - Bachelor of Fine Arts (Theatre) for Graduates of the Two-Year Theatre Performance Program Offered by Holland College

- Students who have graduated from the two-year Holland College Theatre Performance program and who are entering the Bachelor of Fine Arts (Theatre) program will be given a total of 56 credit hours toward the 120 credit hour degree.
- A maximum of 9 additional transfer credit hours applicable to the degree may be used to meet the degree requirements.
- Students will be required to complete an additional 64 credit hours over the courses of six semesters as outlined under **Table 4 Bachelor of Fine Arts (Theatre) for Graduates of the Two-Year Theatre Performance Program Offered by Holland College**.

Table 4 Bachelor of Fine Arts (Theatre) for Graduates of the Two-Year Theatre Performance Program Offered by Holland College

Year/Semester	Courses
Year 1, Spring Semester	English 1000 (or equivalent)
Year 1, Fall Semester	English 1001 (or equivalent) Theatre 1000, 3010, 3070, 3080
Year 1, Winter Semester	6 credit hours chosen from Classics 3405, 3410, 4240, 4300, 4305, English 3021, 3022, 3156, 3171, 3181, 3200, 3201, 3206, 3260, 3275, 3902, 4210, 4211, 4300, 4301, 4302, 4305, 4307, 4308, 4317, 4912, Folklore 3300, French 3501, Spanish 4502 Theatre 3011, 3071, 3081
Year 1, Spring Semester	Theatre 1001
Year 2, Fall Semester	Theatre 4010, 4030, 4040, 4070, 4080
Year 2, Winter Semester	Theatre 4001

7.4.2 Bachelor of Fine Arts (Visual Arts)

www.grenfell.mun.ca/visual-arts

- The 120 credit hour, 40 course program and a non-credit health and safety course, may be completed on a full-time basis as set out under **Table 5 Bachelor of Fine Arts (Visual Arts)** and **Table 6 Suggested Program of Study for the Bachelor of Fine Arts (Visual Arts)**.
- The Bachelor of Fine Arts (Visual Arts) degree program is a professional program designed to educate and train students in the history, theory and practice of the Visual Arts. Courses are offered in Computers and Art, Drawing, New Media, Painting, Sculpture, Printmaking, Photography, Textile and Fibre Art, Time-Based Art, and Art History/Visual Culture. The curriculum is devised with the aim of producing well-rounded generalists with a solid grounding in all aspects of the Visual Arts. It illustrates the philosophy that artistic freedom and creative expression require both technical skill and intellectual vision, acquired through a disciplined application of effort and a critical awareness of artistic issues, past and present.
- In addition to Studio and Art History/Visual Culture courses, students will take a number of appropriate academic courses from disciplines other than Visual Arts. It is intended that academic courses be chosen which will enhance the Bachelor of Fine Arts (Visual Arts) program. The first year of the program consists of an in-depth exploration of a wide range of media and an introductory health and safety studio component. This is in preparation for continued study in a given discipline or, alternatively, exploring new disciplines in the second year. Intermediate studio courses in the third year emphasize the production of self-directed bodies of work in extended practices. In the fourth year, the senior studio seminar course includes professional practices. The 4950/4951 studio courses are conducted as tutorials, in which, students will work independently on the research and creation of independent bodies of work and confer regularly with instructors. Each year of the program will include Art History/Visual Culture courses as well as academic electives.
- It is recognized that students in the Bachelor of Fine Arts (Visual Arts) program must have occasional opportunities to view important works of art first-hand. Arrangements will therefore be made where possible for students to visit major art centres.
- The Bachelor of Fine Arts (Visual Arts) program is rigorous and demanding and it is assumed that students will normally be enrolled for full-time study. Students who withdraw from a course may put their program in jeopardy or be unable to complete the degree in the normally allotted time. Where circumstances warrant, any prerequisite(s) or co-requisite(s) for Visual Arts courses may be waived by the Program Chair. For further information on waiver or regulations refer to ***UNIVERSITY REGULATIONS*****, General Academic Regulations (Undergraduate) - Appeal of Decisions**.
- Studio courses are offered in the following subjects: Computers and Art, Drawing, New Media, Painting, Sculpture, Printmaking, Photography, Textile and Fibre Art, and Time-Based Art. Courses in a studio subject consist of four hours of practical work in a studio class each week. Course components will require that considerable additional studio work be done outside scheduled class time. Students will supply their own art materials. Some courses may not be offered every year. Courses with a planned rotation are indicated in the University Calendar under **Course Descriptions**. Please consult with the Fine Arts Division prior to registration to confirm course offerings.
- One work of art done during the fourth year may be selected by the Visual Arts Program, in consultation with the student, and retained for the permanent collection of the Campus.

7.4.3 Minor Programs Offered by the School of Fine Arts

www.grenfell.mun.ca/minor

- A minor in Art History/Visual Culture Minor is comprised of 24 credit hours as outlined below under **Table 7 Minor Programs Offered by the School of Fine Arts**.
- A minor in Theatre (Acting) is comprised of 27 credit hours as outlined below under **Table 7 Minor Programs Offered by the School of Fine Arts**.
- A minor in Theatre (Technical Theatre Production) is comprised of 27 credit hours as outlined below under **Table 7 Minor Programs Offered by the School of Fine Arts**.

Table 7 Minor Programs Offered by the School of Fine Arts

Art History/Visual Culture Minor Visual Arts 2700 and 2701 18 credit hours in Art History/Visual Culture at the 3000- or 4000-level • The Art History/Visual Culture Minor Program is applicable to all programs offered at Grenfell Campus except for the Bachelor of Fine Arts degree programs.
Theatre (Acting) Minor THEA 1000, 1001, 1010, 1020, 1110, 1120 at least 9 credit hours from THEA 2010, 2011, 2090, 2091, 4030. (THEA 2080 or THEA 2081 may be substituted for THEA 2090 or THEA 2091 with approval from the instructor and the Chair of the program). • Course prerequisites for all courses with the exception of THEA 4030 shall apply. The prerequisite for THEA 4030 shall be completion of THEA 2011 or THEA 2021. Courses are not offered every semester. • A student must also meet **Promotion Regulations, Academic Performance**.
Theatre (Technical Theatre Production) Minor THEA 1000, 1001, 1010, 1020, 1110, 1120 at least 9 credit hours from THEA 2020, 2021, 2090, 2091, 4030 • Course prerequisites for all courses with the exception of THEA 4030 shall apply. The prerequisite for THEA 4030 shall be completion of THEA 2011 or THEA 2021. Courses are not offered every semester. • A student must also meet **Promotion Regulations, Academic Performance**.

7.5 School of Science and the Environment

www.grenfell.mun.ca/school-of-science-and-the-environment

The School of Science and the Environment offers the Bachelor of Environment and Sustainability with **Majors in Environmental Studies or Resource Management** and the Bachelor of Science with Majors in **Computational Mathematics**, **Environmental Science**, **General Science**, and **Physics** general degrees.

A Bachelor of Science (Honours) degree is available in **Environmental Science**.

Minors are available in Economics, Environment and Sustainability, Environmental Science, Environmental Science Biology, Environmental Science Chemistry, Geography, Mathematics, Physics, and Science. Students for the Bachelor of Science degree offered by the School of Science and the Environment may complete a minor offered by the School of Science and the Environment, the School of Arts and Social Science, or the School of Fine Arts. See **Table 19 Minor Programs Offered by the School of Arts and Social Science**, **Table 7 Minor Program Offered by the School of Fine Arts**, and **Table 10 Minor Programs Offered by the School of Science and the Environment**.

Articulation agreements have been established with the College of the North Atlantic for students who have completed the **Two-Year Fish and Wildlife Technician Diploma Program** and the **Two-Year Forest Resources Technician Diploma Program** who wish to obtain the Bachelor of Environment and Sustainability degree.

Students currently completing the requirements of either of these programs must follow the Calendar regulations for the academic year in which they were admitted to the Major. Memorial University of Newfoundland calendars by academic year can be read at www.mun.ca/regoff/calendar.php.

Students completing the Bachelor of Environment and Sustainability or Bachelor of Science degree programs offered by the School of Science and the Environment must also complete the **School of Science and the Environment Core Program Requirements** comprised of 24 credit hours.

7.5.1 Bachelor of Environment and Sustainability with Majors in Environmental Studies or Resource Management

- The 120 credit hour, 40 course Bachelor of Environment and Sustainability with specialization in Environmental Studies or Resource Management program may be completed on a full or part-time basis as set out under **Table 1 Bachelor of Environment and Sustainability with Majors in Environmental Studies or Resource Management**.
- A student must complete Core Program Requirements as outlined under **School of Science and the Environment Core Program Requirements**.
- The program consists of a common set of courses which provides an interdisciplinary understanding of environmental studies and resource management issues within the context of the physical, social and economic environments and two sets of courses that provide specialized training in either Environmental Studies or Resource Management.
- A Minor is required for this program.

Table 1 Bachelor of Environment and Sustainability with Majors in Environmental Studies or Resource Management

Required Common Courses	Major in Environmental Studies	Major in Resource Management	Additional Requirements
42 credit hours in the following courses: Economics 1010, 3080 3 credit hours in first year English Environment and Sustainability 1000, 2000, 2001, 3000, 3001, 4000, 4010 Environmental Science 1000 Geography 1050, 3222 Political Science 3631 or the former 3731	Economics 2550, 3085 Environment and Sustainability 2200 or 2201, 4200, 4201, 4950 Political Science 2600, 3351 or the former 3550 Sociology 3040 One of: Historical Studies 3030, Humanities 3020, Philosophy 2130 or the former 2561, Religious Studies 3880	Biology 1001, 1002, 2600 Environment and Sustainability 3100, 3101, 4100, 4960 Environmental Science 4132, 4140 (or equivalent field course from Biology, Earth Science or Geography)	Courses as outlined under the **School of Science and the Environment Core Program Requirements**. A minor comprised of 8 courses, 24 credit hours chosen from **Table 19 Minor Programs Offered by the School of Arts and Social Science**, or from **Table 7 Minor Program Offered by the School of Fine Arts**, or from **Table 10 Minor Programs Offered by the School of Science and the Environment** Elective courses to make up the total of 120 credit hours.

7.5.1.1 Articulation Agreement - Bachelor of Environment and Sustainability with Majors in Environmental Studies or Resource Management for Graduates of the Two-Year Fish and Wildlife Technician Diploma Program Offered by the College of the North Atlantic

- Students who have graduated from the two-year Fish and Wildlife Diploma Program offered by the College of the North Atlantic and who are entering the Bachelor of Environment and Sustainability Program will be awarded a total of 60 credit hours towards the 120 credit hour degree program.
- Students will be required to complete an additional 60 credit hours as outlined under **Table 2 Bachelor of Environment and Sustainability with Majors in Environmental Studies or Resource Management for Graduates of the Two-Year Fish and Wildlife Technician Diploma Program Offered by the College of the North Atlantic**.

7.5.2 Bachelor of Science with Major in Computational Mathematics

www.grenfell.mun.ca/academics-and-research/Pages/Minors/Mathematics.aspx

This Mathematics Major covers the essential undergraduate topics in mathematics, develops rigorous logical thinking, and equips students with computational techniques to model and solve real-world problems. Courses used to complete the requirements of this major may be used to meet the requirements of a minor or second major in a different subject area excluding a minor in Science and a major in General Science.

- The 120 credit hour, 40 course program may be completed on a full or part-time basis as set out under **Table 5 Bachelor of Science with Major in Computational Mathematics**.
- A student must complete Core Program Requirements as outlined under **School of Science and the Environment Core Program Requirements**.
- A student must complete an approved concentration of courses known as a Major and elective courses to make up the required total of 40 courses, 120 credit hours. A Minor is not required for this program.

Table 5 Bachelor of Science with Major in Computational Mathematics

Required Courses	Elective Courses
Courses as outlined under the **School of Science and the Environment Core Program Requirements**.	Elective courses to make up the total of 120 credit hours.
3 credit hours in a computer programming course. Computer Science 1510 or 1001 is recommended. Mathematics 1000, 1001, 2000, 2050, 2051, 2130, 2260, 2320, 3000, 3132, 3240, 4242, 4950 3 credit hours in Physics chosen from Physics 1020, 1050, 2151, or 2400 Statistics 2550 (or equivalent) 9 further credit hours in Mathematics and Statistics at the 3000 level or higher, including 3 credit hours at the 4000 level (Physics 3820 may be used in place of an equivalent level Mathematics course) 3 credit hours chosen from Philosophy 2030 or the former 2210, Physics 2820, or Mathematics, Statistics, or Computer Science at the 2000 level or higher.	If a student decides to complete a minor, it must be comprised of 8 courses, 24 credit hours chosen from **Table 19 Minor Programs Offered by the School of Arts and Social Science**, or from **Table 7 Minor Program Offered by the School of Fine Arts**, or from **Table 10 Minor Programs Offered by the School of Science and the Environment**.

7.5.3 Bachelor of Science with Major in Environmental Science

www.grenfell.mun.ca/academics-and-research/Pages/Minors/Environmental-Science.aspx

The Major consists of an Environmental Science Core which provides a broad appreciation of the interrelationships inherent in any study of the environment and one of two possible streams which provide the depth and focus for the degree program.

- The 120 credit hour, 40 course program may be completed on a full or part-time basis as set out under **Table 6 Bachelor of Science with Major in Environmental Science**.
- A student must complete Core Program Requirements as outlined under **School of Science and the Environment Core Program Requirements**.
- A student must complete an approved concentration of courses known as a Major and elective courses to make up the required total of 40 courses, 120 credit hours. A Minor is not required for this program.

Table 6 Bachelor of Science with Major in Environmental Science

Required Courses	Elective Courses
Courses as outlined under **School of Science and the Environment Core Program Requirements**.	Elective courses to make up the total of 120 credit hours.
Environmental Science Core 54 credit hours as follows: Biology 1001, 1002, 2600 Chemistry 1200/1001 sequence or Chemistry 1050/1051 sequence. It is strongly recommended that students complete one of these sequences of Chemistry courses in their first year. Earth Sciences 1000 Mathematics 1000, Statistics 2550 or equivalent Physics 1020 or 1050 Environmental Science 2000, 3000, 4000 Environmental Science 4950 (or 4951) Two of Environmental Science 4069, 4131, 4133, 4369, 4479, Environment and Sustainability 4201 3 credit hours chosen from Philosophy 2130 or the former 2561, Political Science 3351 or the former 3550, 3631 or the former 3731, Religious Studies 3880. Students are encouraged to take additional courses from this list as electives. 6 credit hours chosen from Environmental Science 2360, Environmental Science 2370, Environmental Science 2430, Environmental Science 3072, Environment and Sustainability 2000 (this course is strongly recommended for the Biology Stream of the Environmental Science program). Students are encouraged to take additional courses from this list as electives. It is recommended that students successfully complete Environmental Science 1000.	If a student decides to complete a minor, it must be comprised of 8 courses, 24 credit hours chosen from **Table 19 Minor Programs Offered by the School of Arts and Social Science**, or from **Table 7 Minor Program Offered by the School of Fine Arts**, or from **Table 10 Minor Programs Offered by the School of Science and the Environment**.
Environmental Science Streams A student must choose one of the following streams**:** **Biology stream (27 credit hours)** Biology 2010, 2122 Chemistry 2440 One of Earth Sciences 1002 or Physics 1021 or Physics 1051 Environmental Science 3110, 3130 3131, 4132, 4140 (or equivalent field course) **Chemistry stream (33 credit hours)** Chemistry 2210, 2301, 2400, 2401 Environmental Science 3210, 3211, 3260, 3261, 4230 Mathematics 1001 Physics 1021 or 1051 It is strongly recommended that students considering the Chemistry stream of the Environmental Science program complete Mathematics 1000 and 1001, Physics 1020 or 1050 and one of Physics 1021 or 1051 in their first year; Biology 1001/1002 may be delayed until second year for students in the Chemistry stream of the Environmental Science program.	

7.5.4 Bachelor of Science with Major in General Science

www.grenfell.mun.ca/academics-and-research/Pages/school-of-science-and-the-environment.aspx

Students completing the Major in General Science will complete a General Science Core. In addition, they will complete a minimum of 24 credit hours (or 18 credit hours in the case of Mathematics or Physics) in each of three streams chosen from Biology, Chemistry, Earth Systems, Mathematics or Physics. A student may not use the same course to satisfy the requirements of more than one stream. Students planning their course selection should be aware of the fact that most senior level science courses have one or more specified prerequisites; some prerequisites may involve courses from outside a particular stream.

- The 120 credit hour, 40 course program may be completed on a full or part-time basis as set out under **Table 7 Bachelor of Science with Major in General Science**.
- A student must complete Core Program Requirements as outlined under **School of Science and the Environment Core Program Requirements**.
- A student must complete an approved concentration of courses known as a Major and elective courses to make up the required total of 40 courses, 120 credit hours. A Minor is not required for this program.

Table 7 Bachelor of Science with Major in General Science

Required Courses	Elective Courses
Courses as outlined under **School of Science and the Environment Core Program Requirements**.	Elective courses to make up the total of 120 credit hours.
General Science Core Mathematics 1000, 1001 Physics 1050 (or 1020), 1051 (or 1021). Students in the Physics Stream require Physics 1051 and are recommended to take Physics 1050 Science 4000, 4950	If a student decides to complete a minor, it must be comprised of 8 courses, 24 credit hours chosen from **Table 19 Minor Programs Offered by the School of Arts and Social Science**, or from **Table 7 Minor Program Offered by the School of Fine Arts**, or from **Table 10 Minor Programs Offered by the School of Science and the Environment**.
General Science Streams 24 credit hours in each of three streams, chosen from the following list of courses: **Biology:** Biology 1001, 1002 18 credit hours from Biology 2010, 2122, 2210, 2250, 2600, 3053, Environmental Science 3072, 3110, 3130, 3131, 4140 (or equivalent field course) where at least 6 credit hours must be beyond the 2000 level. **Chemistry:** Chemistry 1001 (or 1051), 1200 (or 1050), 2210, 2400, 2401 One of Chemistry 2301 or 2302 Environmental Science 3210, 3211 **Earth Systems:** Earth Sciences 1000, 1002 Any 18 credit hours beyond the 1000 level from the following list, at least 6 credit hours of which are beyond the 2000 level: Environment and Sustainability 2000, 3001, 4100, Environmental Science 2360, 2369, 2370, 2430, 3072, 4069, 4369, 4479, Geography 2425, Physics 2150, 2151, any Earth Sciences courses. **Mathematics:** Mathematics 1000, 1001, 2000, 2050, 2320 9 additional credit hours beyond the 1000 level chosen from Mathematics or Statistics, at least 6 of which must be beyond the 2000 level. **Physics:** Physics 1050 (or 1020), 1051, 2056, 2820 12 additional credit hours in Physics beyond the 1000 level, at least 6 of which must be beyond the 2000 level.	

7.5.5 Bachelor of Science with Major in Physics

www.grenfell.mun.ca/academics-and-research/Pages/Minors/Physics.aspx

- The 120 credit hour, 40 course program may be completed on a full or part-time basis as set out under **Table 8 Bachelor of Science with Major Physics** and **Table 9 Suggested Program of Study for the Bachelor of Science with Major in Physics**.
- A student must complete Core Program Requirements as outlined under **School of Science and the Environment Core Program Requirements**.
- A student must complete an approved concentration of courses known as a Major and elective courses to make up the required total of 40 courses, 120 credit hours.
- A Minor is not required for this program. However, courses used to complete the requirements of this major may be used to meet the requirements of a minor or second major in a different subject area excluding a minor in Science and a major in General Science.

Table 8 Bachelor of Science with Major in Physics

Required Courses	Elective Courses
Courses as outlined under **School of Science and the Environment Core Program Requirements**.	Elective courses to make up the total of 120 credit hours.
Mathematics 1000, 1001, 2000, 2050, 2260 (or the former Mathematics 3260), 3202. Since Mathematics 2000 is required for a number of upper-year Physics and Mathematics courses, a student not successfully completing Mathematics 1001 in first year will require more time to complete the degree. A student who has successfully completed Mathematics 1000 and Physics 1020 with a minimum grade of 65% may enrol in Physics 1051. Taking the sequence Physics 1020, 1021, and 1051 will increase the number of credit hours needed to complete the major Physics 1050 (or 1020), 1051, 2053, 2056, 2400 or 2151, 2820, 3060, 3061, 3220, 3400, 3650, 4100, 4880, 4950. It is recommended that students successfully complete Chemistry 1200 and 1001. A student who has successfully completed Mathematics 1000 and Physics 1020 with a minimum grade of 65% may enrol in Physics 1051. Taking the sequence Physics 1020, 1021, and 1051 will increase the number of credit hours needed to complete the major 9 additional credit hours in Physics chosen from Physics 3160, 3180, 3250, 3230, 3820.	If a student decides to complete a minor, it must be comprised of 8 courses, 24 credit hours chosen f from **Table 19 Minor Programs Offered by the School of Arts and Social Science**, or from **Table 7 Minor Program Offered by the School of Fine Arts**, or from **Table 10 Minor Programs Offered by the School of Science and the Environment**.

Table 9 Suggested Program of Study for the Bachelor of Science with Major in Physics

Year 1 Fall & winter	Chemistry 1200 (recommended) Elective English 1000 Mathematics 1000 Physics 1050 (or 1020)	Chemistry 1001 (recommended) Elective English 1001 Mathematics 1001 Physics 1051
Year 2 Fall and Winter	Elective Mathematics 2000 Mathematics 2050 Physics 2400 or Physics 2151 Physics 2820	Elective Elective Mathematics 2260 Physics 2053 Physics 2056
Year 3 Fall and Winter	Elective Mathematics 3202 Physics 3060 Physics 3220 Physics 3400	Elective Elective Physics 3061 Physics 3160 and/or Physics 3250 Physics 3650
Year 4 Fall and Winter	Elective Elective Elective Physics 4100 Physics 4880	Elective Elective Elective Physics 3180 and/or Physics 3230 and/or Physics 3820 Physics 4950

7.5.6 Minor Programs Offered by the School of Science and the Environment

www.grenfell.mun.ca/minor

Table 10 Minor Programs Offered by the School of Science and the Environment

Economics Minor Economics 1010 (or the former 2010), 1020 (or the former 2020), 3000, 3010 12 additional credit hours in Economics of which at least 6 must be at the 3000 or 4000-level
Environment and Sustainability Minor Environment and Sustainability 1000, 2000, 2001, 3000 Environmental Science 1000 9 additional credit hours in Environment and Sustainability which must be at the 3000 or 4000 level
Environmental Science Biology Minor Biology 1001, 1002, 2010, 2122, 2600 3 credit hours from Environmental Science 3110, 3130, 3131, 4131 An additional 6 credit hours in Environmental Science of which at least 3 credit hours must be at the 3000 or 4000 level
Environmental Science Chemistry Minor Chemistry 1200, 1001, 2210, 2301, 2440 3 credit hours from Environmental Science 3210 or 3261 An additional 6 credit hours in Environmental Science of which at least 3 credit hours must be at the 3000 or 4000 level
Environmental Science Minor Biology 1001, 1002, 2600; or Chemistry 1200, 1001, 2440 Environmental Science 2000 Additional 12 credit hours in science courses within the Environmental Science program of which at least 6 credit hours must be at the 3000 or 4000 level
Geography Minor Geography 1050, 2001, 2102, 2195, 2302, 2425 6 additional credit hours in Geography which must be at the 3000 or 4000 level
Mathematics Minor Mathematics 1000, 1001 either 18 additional credit hours from Mathematics and Statistics courses at the 2000 level or higher, at least 6 credit hours shall be in courses at the 3000 level or higher (Physics 3820 can be used in place of a Mathematics course at the 3000 level); or 15 additional credit hours from Mathematics and Statistics courses at the 2000 level or higher, at least 6 credit hours shall be in courses at the 3000 level or higher (Physics 3820 can be used in place of a Mathematics course at the 3000 level); and 3 credit hours in one of Computer Science 1001, 1510, the former 1710, or Engineering 1020
Physics Minor Physics 1050 (or 1020), 1051, 2053, 2056, 2820. An additional 9 credit hours in Physics at the 2000-level or above
Science Minor The Minor in Science may be chosen in courses from the following disciplines: Biology, Chemistry, Computer Science, Earth Sciences, Environmental Science, Mathematics, Physics, Science, and Statistics. Students who have successfully completed courses drawn from other Science disciplines must obtain approval of the Committee on Student Academic Affairs upon recommendation of the Dean. Mathematics 1000 6 additional credit hours in first year science courses (At least 3 credit hours must be in a laboratory course chosen from any science discipline except mathematics). Five science courses beyond the 1000 level, at least 6 credit hours of which must be beyond the 2000 level. (Mathematics 1001 may be substituted for one of the 2000 level science courses).
Students for the Bachelor of Environment and Sustainability and Bachelor of Science degrees offered by the School of Science and the Environment may complete a minor offered by the School of Science and the Environment, the School of Arts and Social Science or the School of Fine Arts. See **Table 19 Minor Programs Offered by the School of Arts and Social Science**, or from **Table 7 Minor Program Offered by the School of Fine Arts**, or from **Table 10 Minor Programs Offered by the School of Science and the Environment**.

7.6 Bachelor of Science in Nursing (Collaborative)

Information regarding program requirements for the Bachelor of Science in Nursing (Collaborative) degree program is located at the **Faculty of Nursing, Program Regulations, Bachelor of Science in Nursing (Collaborative) Program - Western Memorial Regional Hospital**.

8 Honours Degrees

Programs are offered leading to the Honours Degrees of Bachelor of Arts, Bachelor of Business Administration, and Bachelor of Science.

An Honours Bachelor of Arts or Bachelor of Science degree requires, over and above the requirement of the General degree, a concentration at an advanced level in an approved field, consisting of a subject or subjects of specialization and/or related subjects, and a high quality of work throughout the program. An Honours degree is of distinct advantage to students who plan advanced work or careers in their chosen fields and also to those who have a clear commitment to some special field of study. An Honours degree with first or second class standing is, in many cases, a prerequisite for admission to a graduate program. The Honours Degree of Bachelor of Arts is available in Psychology and the Honours Degree of Bachelor of Science is available in Environmental Science and Psychology.

An Honours Bachelor of Business Administration signifies superior academic achievement.

8.1 Admission and Registration for Honours Bachelor of Arts or Bachelor of Science Degrees

1. Admission to the Honours degree is competitive and limited, depending upon available resources. Students should consult the criteria established for the program in question. To be considered for admission to an Honours program a candidate shall complete an "Application For Admission to the Honours Program" form. The application must be approved by the Program Chair of the Major before the student can be admitted to the program.

   A student who wishes to enter an honours program is strongly advised to consult the Program Chair at the earliest possible date, as it may not be possible to complete the requirements for the degree in the normal time if the decision to embark on the program is delayed beyond the end of the second year.
2. Students who have been awarded the General Degree of Bachelor of Arts or Bachelor of Science at Grenfell Campus may convert it to an Honours Degree of Bachelor of Arts or Bachelor of Science by following procedure outlined in 1. above.
3. Before registering for any semester or any session, the candidate is strongly advised to consult with the Program Chair on the student's choice of courses. Failure to comply with this requirement may result in denial of access to certain courses.

8.2 Admission and Registration for Honours Bachelor of Business Administration Degree

Students do not apply for admission to this program but rather must indicate their desire to be considered for the Bachelor of Business Administration (Honours) by the appropriate deadline date to graduate on the prescribed "Application for Graduation " form. This form may be obtained on-line at the Memorial Self Service at selfservice.mun.ca. Additional information is available from the Office of the Registrar at www.mun.ca/regoff/graduation.

8.3 Course Requirements for Honours Bachelor of Arts or Bachelor of Science Degrees

Students for the Honours Degree of Bachelor of Arts or Bachelor of Science shall complete a program of studies which shall consist of not fewer than 120 credit hours subject to the following regulations:

1. All students are required to complete the Core Program Requirements governing the Bachelor of Arts and Bachelor of Science degrees in either the School of Arts and Social Science (for the Honours Bachelor of Arts or Honours Bachelor of Science in Psychology) or the School of Science and the Environment (for the Honours Bachelor of Science in Environmental Science).
2. All students must also submit an Honours thesis or dissertation on an approved topic which may be followed by an oral examination thereon. Two copies of the Honours thesis/dissertation must be submitted to the University Library upon completion. All Honours theses/dissertations in the University Library shall be available for unrestricted consultation by students and faculty except under very exceptional circumstances which must be approved by the relevant Committee on Student Academic Affairs. Copyright remains with the author. A signed release form must accompany a thesis or dissertation when it is submitted to the University Library.
3. Further courses shall be chosen:
   a. minimum 60 credit hours in the major and, where applicable, not fewer than 24 credit hours in the minor; and
   b. courses to make up a minimum of 120 credit hours, other than those required for the Core Program, major and minor, shall be chosen as follows:
      i. any courses in Arts, Science, Social Science and Fine Arts
      ii. up to 15 credit hours in other subject areas.

8.4 Course Requirements for Honours Bachelor of Business Administration Degree

A student must meet all the regulations governing the General Degree of **Bachelor of Business Administration** and **Academic Standing for Honours Bachelor of Business Administration Degree**.

8.5 Program Regulations for Honours Bachelor of Arts or Bachelor of Science Degrees

Students for Honours degrees must comply with such additional requirements of the appropriate Program(s) as approved by the Senate and printed in the University Calendar.

8.6 Program Regulations for Honours Bachelor of Business Administration Degree

A student must meet all the regulations governing the General Degree of **Bachelor of Business Administration**.

8.7 Academic Standing for Honours Bachelor of Arts or Bachelor of Science Degrees

In order to be considered for graduation with an Honours degree, a student shall obtain:

1. A grade of 'B' 70% or better, or an average of 75% or higher in the courses that comprise the minimum number of credit hours in the Honours subject(s) prescribed by the program concerned as outlined under the regulations governing specific Honours degree programs, excluding 1000-level courses. Students who wish to fulfil this requirement using repeated or substituted courses must obtain approval of the Program Chair and the relevant Committee on Student Academic Affairs. The Honours thesis or dissertation may not be repeated or substituted. A grade of 70% or better must be obtained in the Honours dissertation; and
2. An average of at least 2.75 points per credit hour in the courses required for the degree. See ***UNIVERSITY REGULATIONS* - General Academic Regulations (Undergraduate), Grading** for explanation of the point system.

For information regarding classification of degrees see ***UNIVERSITY REGULATIONS* - General Academic Regulations (Undergraduate), Graduation**.

8.7.1 Classification of Degrees

1. If a student's general average is 3.25 points or better per credit hour in required courses and the average is 3.5 points or better per credit hour in the courses in the Honours subject (excluding 1000-level courses), the student shall be awarded an Honours degree with First Class standing.
2. If a student fulfils the conditions of Academic Standing above but not of Regulation 1. under **Classification of Degrees**, the student shall be awarded an Honours degree with Second Class standing.
3. No classification will be given to the degree awarded a student who has successfully completed fewer than one half of the courses required for the degree at this University, or who has successfully completed fewer than one half of the courses required for the degree at this University since 1959. All students for such degrees shall, however, fulfil the condition of **Academic Standing** above on the courses taken at this University since September 1959 in order to qualify for the degree.
4. A declared student for an Honours degree who fails to attain the academic standing specified in **Academic Standing** above but fulfils the academic requirements for a General degree shall be awarded a General degree, the classification of which shall be determined in accordance with ***UNIVERSITY REGULATIONS* - General Academic Regulations (Undergraduate), Graduation**.

8.8 Academic Standing for Honours Bachelor of Business Administration Degree

Students are not permitted to repeat or substitute courses for the purposes of meeting the criteria below.

A declared student for an Honours degree who fails to fulfil the criteria below but fulfils the requirements for the general degree will be awarded the general degree of Bachelor of Business Administration.

In order to be considered for graduation with an Honours degree, a student shall obtain:

1. a minimum overall average of 75% in the required Business courses prescribed in **Table 6 Bachelor of Business Administration** and courses selected from **Table 7 Business Electives**; and
2. obtain a minimum overall grade point average of 3.25 in the 120 credit hours required for the degree.

8.9 Honours in English

The Honours Bachelor of Arts in English offers greater concentration in the discipline and requires a higher level of academic achievement than is required for the completion of a general degree.

8.9.1 Course Requirements for Honours in English

1. Students must meet the General Regulations for the Grenfell Campus Bachelor of Arts degree.
2. Students must complete:
   a. English 1000, 1001, 2005, 2008, 2815, 3105, 3205 or 3206, 3395, 4951, and 4959.
   b. 30 additional credit hours in English courses, including at least 6 credit hours in nationally-identified literatures, at least 3 of those credit hours being in Canadian literature; at least 6 credit hours in pre-1900 courses; and at least 3 credit hours in women writers. At least 3 credit hours shall be at the 3000 level and at least 6 credit hours shall be at the 4000 level.
3. The Honours thesis shall be evaluated by the thesis supervisor and an additional faculty member selected by mutual consent of the student and the supervisor. In order to be considered for graduation with an Honours degree, the student must satisfy the regulations regarding Academic Standing as specified under Honours Degrees.

8.10 Honours in Environmental Science (B.Sc.)

8.10.1 Course Requirements for Honours in Environmental Science (B.Sc.)

1. Students must meet the General Regulations for Grenfell Campus Bachelor of Science degree.
2. Students must complete 81 or 87 credit hours as follows:
   a. the Environmental Science Core requirements as outlined under **Bachelor of Science with Major in Environmental Science**.
   b. the course requirements of a specific stream as outlined under **Bachelor of Science with Major in Environmental Science**.
3. Students must complete 3 additional credit hours in courses at the 4000 level. These credit hours normally will be drawn from: Environmental Science 4069, 4131, 4133, 4369, 4479 and Environment and Sustainability 4201

   Students, in close consultation with a faculty advisor and the agreement of the Chair of the Program, may select fourth-year honours requirement courses in place of those required above, so long as such selections are consistent with the Major to which they are added. Such honours selections will be subject to approval by the School of Science and the Environment Committee on Student Academic Affairs.
4. Honours graduates of the Environmental Science Program will have also successfully completed a two-semester research project consisting of a research proposal and literature review course (Environmental Science 4951) and a research project course (Environmental Science 4959).
5. In order to be considered for graduation with an Honours degree, the candidate must satisfy the regulations regarding **Academic Standing** as specified under **Honours Degrees**.

Courses used to calculate the academic standing as outlined under **Honours Degrees** include all required Environmental Science and Chemistry courses for the Chemistry stream students and all required Environmental Science and Biology courses for the Biology stream students, excluding, in both cases, 1000 level courses.

More specifically, courses normally used for calculations would be:

Biology stream
Biology 2010, 2122, 2600
Two of: Environmental Science 2360, 2370, 2430, 3072, or Environment and Sustainability 2000
Environmental Science 3110, 3130, 3131, 4132, 4140 (or equivalent)
Three of: Environmental Science 4069, 4131, 4133, 4369, 4479 or Environment and Sustainability 4201
Environmental Science 2000, 3000, 4000, 4951, 4959

Chemistry stream:
Chemistry 2210, 2301, 2400, 2401
Two of: Environmental Science 2360, 2370, 2430, 3072, or Environment and Sustainability 2000
Environmental Science 3210, 3211, 3260, 3261, 4230
Three of: Environmental Science 4069, 4131, 4133, 4369, 4479, or Environment and Sustainability 4201
Environmental Science 2000, 3000, 4000, 4951, 4959

8.10.2 Honours Dissertation for Honours in Environmental Science (B.Sc.)

The honours project sequence (Environmental Science 4951 and 4959) involves the production of an honours dissertation. This dissertation will be evaluated by a three member committee that includes the dissertation supervisor(s) and that is approved by the Environmental Science faculty unit.

8.11 Honours in Psychology

The Honours Bachelor of Arts and Bachelor of Science degrees in Psychology offer greater concentration in the discipline and also require a higher level of academic achievement than is required for the completion of a degree. The Honours degrees in Psychology at Grenfell Campus are 120 credit hour programs normally requiring four years for completion (See **Honours Degrees**).

8.11.1 Course Requirements for Honours in Psychology

Students must meet the General Regulations for Grenfell Campus Bachelor of Arts or Bachelor of Science degree.

Students must also successfully complete:

1. Psychology 1000, 1001, 2025, 2125, 2225, 2425, 2625, 2825, 2925, 2950, 3950, 4910, 4925;
2. 15 credit hours from Psychology 3025,3040 3125, 3126, 3225, 3226, 3325, 3425, 3525, 3625, 3626, 3627, 3628, 3725, 3825; and
3. a two-semester research project, Psychology 4951 and 4959.

Students for the Bachelor of Science (Honours) degree in Psychology shall also complete an additional 27 credit hours as follows:

1. 6 credit hours in Mathematics, which must include Mathematics 1000;
2. Biology 1001 and 1002;
3. Chemistry 1200 and 1001 OR Physics 1020 (or 1050) and 1021 (or 1051); and
4. 9 credit hours at the 2000 level or above (two courses of which must be laboratory courses) in one of the following subjects: Biochemistry, Biology, Chemistry, Earth Sciences, Environmental Science or Physics.

In order to be considered for graduation with an Honours degree, the candidate must satisfy the regulations regarding **Academic Standing** as specified under **Honours Degrees**.

Students completing this program cannot receive credit for Psychology 2920.

8.11.2 Honours Thesis for Honours in Psychology

The Honours project sequence (Psychology 4951 and 4959) involves the production of an Honours thesis. This thesis will be evaluated by the thesis supervisor and an additional faculty member selected by mutual consent of the candidate and the supervisor.

9 Promotion Regulations

For all programs students must meet the meet the general academic regulations (undergraduate) of the University and all general and program regulations of Grenfell Campus. For further information refer to ***UNIVERSITY REGULATIONS* - General Academic Regulations (Undergraduate)**. In addition, student completing the Bachelor of Fine Arts (Theatre) or the Bachelor of Fine Arts (Visual Arts) must fulfill the promotion regulations outlined below as appropriate.

9.1 Bachelor of Fine Arts (Theatre)

9.1.1 Academic Performance

1. Attendance and participation in all studio courses and production rehearsals is vital to the collaborative nature of the program of study in Theatre. Absence from classes or rehearsals of any one student could jeopardize a production, the proper dissemination of practical skills and the overall safety of the students. Therefore attendance at all studio classes, rehearsals and crew calls will be compulsory.
2. A student who has failed a studio course shall not take more advanced courses in that discipline until the failed course has been successfully completed.
3. A student shall successfully complete all 1000 level Theatre courses before advancing to any 2000 level Theatre course.
4. A student whose average in the Theatre courses for the Bachelor of Fine Arts degree falls below 65 percent in any semester will be placed on probation within the program. A student placed on probation at the end of the final semester of the Theatre program will not be recommended for graduation.
5. A student will be required to withdraw from the program if the candidate's average in Theatre courses falls below 65 percent in each of two consecutive semesters of enrollment in the program.
6. A student who has withdrawn or who has been required to withdraw from the Bachelor of Fine Arts (Theatre) program and who

wishes to re-enter the program must re-apply in competition after a lapse of two semesters by April 30 for the upcoming Fall semester, or by August 30 for the upcoming Winter semester.

7. A student who has been required to withdraw twice from the Bachelor of Fine Arts (Theatre) program shall be ineligible for further admission.
8. The Bachelor of Fine Arts (Theatre) program is intended for full-time students only. Students are strongly advised to take the full course load as prescribed each semester and so progress through the degree in clearly defined blocks of courses.

9.2 Theatre Minors

9.2.1 Academic Performance

1. A Minor in **Theatre (Acting)** shall consist of a minimum of 27 credit hours outlined at **School of Fine Arts, Minor Programs Offered by the School of Fine Arts, Table 7 Minor Programs Offered by the School of Fine Arts**.
2. A Minor in **Theatre (Technical Theatre Production)** shall consist of a minimum of 27 credit hours outlined at **School of FIne Arts, Minor Programs Offered by the School of Fine Arts, Table 7 Minor Programs Offered by the School of Fine Arts**.
3. A student whose average in the Theatre courses for the Theatre Minor program falls below 65 percent in any semester will be placed on probation within the program.
4. A student will be required to withdraw from the program if the student's average in Theatre courses falls below 65 percent in each of two consecutive semesters of enrollment in the program.
5. A student who has withdrawn or who has been required to withdraw from the Theatre Minor program and who wishes to re-enter the program must re-apply in competition after a lapse of two semesters by April 30 for the upcoming Fall semester, or by August 30 for the upcoming Winter semester.
6. A student who has been required to withdraw twice from the Theatre Minor program shall be ineligible for further admission.

9.3 Bachelor of Fine Arts (Visual Arts)

9.3.1 Academic Performance

9.3.1.1 Attendance

1. Attendance at all studio courses is considered vital to the program and will be required. Failure to attend may result in the student being dropped from the course.
2. A student whose average in Visual Arts courses falls below 65% in any semester will be placed on probation by the Visual Arts program.
3. A student registered beyond the first semester of the **Foundation Year** will be required to withdraw from the program if:
   a. The student's cumulative average in Visual Arts courses required for the program falls below 65%. or
   b. The student's average in Visual Arts courses falls below 65% in each of two consecutive semesters of enrolment in the program.
4. A student will be denied graduation if, at the end of the final semester of the Visual Arts Program:
   a. The student's cumulative average in Visual Arts courses required for the program falls below 65%. or
   b. The students term average in Visual Arts courses falls below 65% in each of the last two consecutive semesters of enrolment in the program.

   A student denied graduation for either of these reasons will be permitted to register for Visual Arts courses without a waiting period and re-application, and is not bound by Regulation 7 below.
5. A student who has voluntarily withdrawn from the Bachelor of Fine Arts (Visual Arts) program and who wishes to re-enter must re-apply by March 1st for the upcoming Fall semester, or by August 30th for the upcoming Winter semester.
6. A student who has been required to withdraw from the Bachelor of Fine Arts (Visual Arts) program and who wishes to re-enter must re-apply in competition after a lapse of two semesters by March 1st for the upcoming academic year.
7. A student who has been required to withdraw twice from the Bachelor of Fine Arts (Visual Arts) program shall be ineligible for further admission to the Visual Arts Program.

9.3.1.2 Calculation of Visual Arts Average

1. Promotion status within the Visual Arts program will be determined by semester or cumulative average of Visual Arts courses only.
2. A failed Visual Arts course grade will be used to calculate the cumulative average for Visual Arts courses and the semester average for Visual Arts courses for the semester in which the fail occurs.
3. A failed visual arts course will not be used in calculating the cumulative average for Visual Arts courses beyond the semester in which it occurred but will remain on the academic transcript.

9.3.1.3 Probationary Promotion

A student whose semester average in Visual Arts courses falls below 65% will be placed on probation by the Visual Arts program.

9.3.1.4 Promotion Denied

1. A student registered beyond the first semester of 1000 level Visual Arts courses will be required to withdraw from the program if:
   a. the student's cumulative average in Visual Arts courses required for the program falls below 65% or
   b. the student's semester average in Visual Arts courses falls below 65% in each of two consecutive semesters of enrolment in the program.

9.3.1.5 Graduation Denied

1. A student will be denied graduation if, at the end of the final semester of the Visual Arts Program:
   a. the student's cumulative average in Visual Arts courses required for the program falls below 65% or
   b. the student's semester average in Visual Arts courses falls below 65% in each of their last two consecutive semesters of enrolment in the program.

A student denied graduation for either of these reasons will be permitted to register for Visual Arts courses without a waiting period and re-application, and is not bound by Regulation 7 under **Attendance** above.

10 Graduation

Upon meeting the qualifications for the program, students must apply to graduate on the prescribed "Application for Graduation" form. This form may be obtained on-line at the Memorial Self Service at selfservice.mun.ca. The deadlines for application submission are July 15 for Fall (October) graduation, January 3 for Winter (February) in-absentia graduation, and January 15 for Spring (May) graduation. Applications received after these dates will be processed as time and resources permit. Additional information is available from the Office of the Registrar at www.mun.ca/regoff/graduation. Information regarding Convocation, including the dates of the ceremony, is available at www.mun.ca/convocation.

11 Waiver of Regulations

Every student has the right to request waiver of Grenfell Campus regulations. Students wishing waiver of University academic regulations should refer to ***UNIVERSITY REGULATIONS*** **- General Academic Regulations (Undergraduate) - Waiver of Regulations.**

11.1 General Information

- Grenfell Campus reserves the right in special circumstances to modify, alter, or waive any Grenfell Campus regulation in its application to individual students where merit and equity so warrant in the judgment of the relevant Committee on Student Academic Affairs (for the School of Arts and Social Science or School of Science and the Environment) or the Academic Studies Committee (for the School of Fine Arts).
- All requests, other than requests for waiver of a prerequisite or co-requisite of a course, must be submitted to the appropriate School Committee on Student Academic Affairs or Academic Studies Committee for consideration. Waiver of a course prerequisite or co-requisite may be granted by the course instructor.
- Any waiver granted does not reduce the total number of credit hours required for the degree.

12 Appeal of Decisions

Any student whose request for waiver of Grenfell Campus regulations has been denied has the right to appeal. For further information refer to ***UNIVERSITY REGULATIONS*** **- General Academic Regulations (Undergraduate) - Appeal of Decisions**.

13 Course Descriptions

In accordance with Senate's *Policy Regarding Inactive Courses*, the course descriptions for courses which have not been offered in the previous three academic years and which are not scheduled to be offered in the current academic year have been removed from the following listing. For information about any of these inactive courses, please contact the appropriate Dean of the School.

Prerequisites may be waived by the Dean/Program Chair of the course area in question.

Upon the recommendation of the appropriate Program Chair(s), any Major requirements may be waived by the relevant Committee on Student Academic Affairs (for the School of Arts and Social Science or School of Science and the Environment) or the Academic Studies Committee (for the School of Fine Arts).

Some of the courses in this section of the Calendar are available only at Grenfell Campus. Students who choose to transfer from Grenfell Campus to the St. John's campus should see their faculty advisor to determine the extent to which such courses can be applied to their new program.

13.1 Anthropology

Anthropology 1030 and Anthropology 1031 or an equivalent course or courses are required of all students wishing to concentrate in anthropology.

The following courses, cross-listed with the Department of Sociology and identified by the prefix "S/A", are also taught at the introductory level: 2200, 2210, 2220, 2230, 2240, 2260, 2270, 2280, and 2350. These courses can be taken as first courses or may be taken following an Anthropology introductory course.

Anthropology courses are designated by ANTH.

1031 Introduction to Anthropology provides an overview of the field of social and cultural anthropology. It covers key anthropological concepts used to study issues such as inequality, social justice, the environment, work, politics and law, family, identity, gender and sexuality, ethnicity, spirituality, and communication. An emphasis is placed on human diversity, international examples, and processes of globalization. This course is suitable for students in all disciplines.
CR: the former ANTH 1000 or 2000

2200 Communities (S/A 2200) is an interdisciplinary examination of the concept of Community. Readings will include community studies from North America and Europe.

2210 Communication and Culture (S/A 2210) is an examination of verbal and non-verbal systems of communication, and the influence of language on human cognition.

2220 Labrador Society and Culture examines the Sociology and Anthropology of Labrador. The focus is on social and cultural aspects of contemporary Labrador.

2230 Newfoundland Society and Culture (S/A 2230) (same as Folklore 2230) examines the Sociology and Anthropology of the Island of Newfoundland. The focus is on social and cultural aspects of contemporary island Newfoundland.
CR: Folklore 2230

2240 Canadian Society and Culture (S/A 2240) is a descriptive and analytic approach to the development of Canadian society and culture.

2260 War and Aggression (S/A 2260) is a critical review of ethological, psychological and sociological approaches to the understanding of violence and organized aggression.

2270 Families (S/A 2270) is a comparative and historical perspective on the family as a social institution, the range of variation in its structure and the determinants of its development.

2280 The City (S/A 2280) examines varieties of urban life around the world and through history. The city as habitat and as spectacle.

2300 Newfoundland Folklore (same as Folklore 2300) is a survey of the various types of Folklore: tale, song, rhyme, riddle, proverb, belief, custom, childlore and others, with stress on their function in the Newfoundland community culture. Individual collection and analysis of materials from the students' home communities, supplemented by data from the Memorial University of Newfoundland Folklore and Language Archive.
CR: the former Folklore 3420, Folklore 2300
PR: Folklore 1000 or ANTH 1031

2410 Classics in Social and Cultural Anthropology is an examination of selected milestone monographs, ground-breaking studies for subdisciplinary specialties and major syntheses.

2411 Anthropologists in the Field base many of their ideas on experiences they have while living in other cultures. This course examines the human relationships through which anthropologists explore cultures and how in turn these relationships affect the anthropologists and the development of their discipline.

2412 Threatened Peoples is an examination of key social and cultural factors involved in the global extinction of small-scale societies; the intrusive influences that jeopardize small-scale societies, such as disease; economic and military incursion; the role of international non-governmental agencies in aid of threatened peoples; and the role of the anthropologist in this human crisis.

2413 Modern World Cultures is an examination of significant studies of 20th century populations and their implications for understanding the human condition.

2414 Indigenous Peoples of North America is a survey course dealing with various indigenous peoples of North America.
CR: the former ANTH 3281

2500 Oral Literature from Around the World (same as Anthropology 2500) focuses on the analysis of folk literature, and may include the genres of narrative, poetry, song, drama, and speech from various countries and regions. Textual, comparative, and contextual methods of analysis will be introduced. All sections of this course follow International Studies guidelines available at www.mun.ca/hss/IS.
CR: the former English 3400, Folklore 2500, the former Folklore 3400, Sociology/Anthropology 3400
PR: Folklore 1000 or ANTH 1031

3053 Anthropology of Religion is a critical evaluation of anthropological research on religion, centering on seminal thinkers and major theoretical traditions. Special attention is given to the study of belief systems, and to relationships between belief and ritual.
CR: Religious Studies 3053

3080 The Third World is an examination of the anthropology of the Third World. The course considers perspectives on peasantry, including such topics as underdevelopment, land reform, hunger, political and social movement.

3083 Cultural Crises and the Environment is an examination of social and cultural aspects of dilemmas in the use of renewable and non-renewable resources such as animals, arable land, forests, fisheries, air, water, fossil fuel, and nuclear energy. Special attention to Third World and marginal populations.

3140 Social Movements (S/A 3140) is an examination of social movements which challenge prevailing social institutions and cultural values. Social movements considered may include religious cults and sects, millenarian movements, attempts at utopian and communal living, feminism, labour and revolutionary movements.

3210 Persistence and Change in Rural Society (S/A 3210) assesses the social and cultural significance of the rural experience in the face of expanding urbanism. Topics may include the nature of rural society in Canada, similarities between Canadian and European rural society, utopian and anarchist movements in rural life, and reaction of agricultural populations to external influence.

3314 Gender and Society (S/A 3314) is an examination of biological, psychological, social and cultural aspects of gender, with an emphasis upon contemporary directions of change in sex roles.

3520 Indigenous History to 1763 (same as Archaeology 3520 and History 3520) examines Indigenous history in North America, including the Innu, Inuit, Beothuk and Mi'kmaq, from before European contact to the Royal Proclamation in 1763. Particular attention will be paid to historical encounters framed by first contacts, cultural exchange, trade, disease, religious encounters, conflict and diplomacy, and territorial encroachment.
CR: Archaeology 3520 and History 3520

3525 Indigenous History from 1763 (same as Archaeology 3525 and History 3525) examines the history of Indigenous peoples in North America, including the Innu, Inuit, Beothuk and Mi'kmaq, from 1763 to the twentieth century. Particular attention will be paid to Indigenous-settler relations, including Indigenous policies, military encounters and diplomacy, expansion and removals, education, treaties, and politicization.
CR: Archaeology 3525 and History 3525

4071 Social and Cultural Aspects of Health and Illness (S/A 4071) covers topics which may include: cultural concepts of illness and health; theories of disease causation; relationships between social life and illness patterns; symbolic use of illness; variations in philosophies of treatment and in practitioner/patient relationships; the social organization of medicine. Open to those without normal prerequisites by permission of the Instructor.

4072 Social and Cultural Aspects of Death (S/A 4072) covers topics which may include: symbolic meanings and values attached to death; cultural and historical variations in the management of death, e.g. treatment of the 'terminally ill', burial rites, the mourning process, and the social fate of survivors, together with the social and psychological meanings of these behaviours. Open to those without normal prerequisites by permission of the Instructor.

4440 Music and Culture (S/C 4440) (same as Folklore 4440, Music 4040, the former Music 4440) explores traditional music as an aspect of human behaviour in Western and non-European cultures. Examination of the functions and uses of music; folk-popular-art music distinctions; and the relation of style to content. Outside reading, class exercises and individual reports will be required.
CR: Folklore 4440, Music 4040, the former Music 4440

13.2 Biochemistry

Biochemistry courses are designated by BIOC.

1430 Biochemistry for Nurses is an introduction to the chemistry and structure-function relationships of carbohydrates, lipids and proteins. It will examine the basic metabolism of carbohydrates and fats, with emphasis on the biochemical fluctuations that occur in human health and disease, and will include a brief introduction to molecular genetics. Entry into this course is restricted to students in the Bachelor of Science in Nursing (Collaborative) Program and those signed in by special permission. Prospective B.N. (Collaborative) program students should consult with the Faculty of Nursing concerning admission to this course.
CR: the former BIOC 2430
LC: 4
PR: Level 3 Chemistry or Chemistry 1010 or Chemistry 1810 or equivalent, and acceptance to Bachelor of Science in Nursing (Collaborative) Program
UL: may not be used for credit to fulfil the requirements for a major in the Department of Biochemistry

13.3 Biology

Biology courses are designated by BIOL.

1001-1002 Principles of Biology is an introduction to the science of Biology, including a discussion of the unity, diversity and evolution of living organisms.
LH: 3
PR: BIOL 1001 is a prerequisite for BIOL 1002; Science 1807 and Science 1808

2010 Biology of Plants is a study of the structure, function and reproductive Biology of plants, with emphasis on the vascular plants, and on their relationship to environment and human activities.
LH: 3
PR: BIOL 1001 and BIOL 1002; Science 1807 and Science 1808

2040 Modern Biology and Human Society I examines various aspects of the human body, and the implications of modern biological research for human beings. Topics include cancer; diet and nutrition and associated diseases; circulatory disease, immunity, human genetics, biorhythms, new diseases, genetic engineering and reproductive engineering.
UL: cannot be used towards the Minor, Major or Honours programs in Biology

2041 Modern Biology and Human Society II examines the origins and consequences of the environmental crisis of the 20th century. Topics include the population explosion, energy, material cycles, air and water and land pollution, global food supplies, the fisheries, wildlands, renewable and non-renewable resources, environmental ethics.
UL: cannot be used towards the Minor, Major or Honours programs in Biology

2122 Biology of Invertebrates is a study of the invertebrates with emphasis on structure and function, adaptations and life histories. The laboratories will present a broad survey of the major invertebrate groups.
CR: the former BIOL 3122
LH: 3
PR: BIOL 1001 and BIOL 1002; Science 1807 and Science 1808

2210 Biology of Vertebrates is a study of the vertebrates, with emphasis on structure and function, adaptations and life histories.
CR: the former BIOL 3210
LH: 3
PR: BIOL 1001 and BIOL 1002; Science 1807 and Science 1808

2250 Principles of Genetics is an introduction to Mendelian and molecular genetics. Phenotype and genotype, behaviour of alleles in genetic crosses, chromosome theory of inheritance, genetic linkage, molecular Biology of DNA, RNA and protein, molecular basis of mutation, recombinant DNA, applications of genetic biotechnology.
CR: Biochemistry 2100, Biochemistry 2200, the former BIOL 3250
LH: 3
LH: 3
PR: BIOL 1001 and BIOL 1002, Chemistry 1200 or 1050; Science 1807 and Science 1808

2600 Principles of Ecology is a conceptual course introducing the principles of ecology, including theoretical, functional and empirical approaches.
CR: the former BIOL 3600

LH: 3
PR: BIOL 1001 and BIOL 1002; Science 1807 and Science 1808

3053 Microbiology for Nurses is a course on the fundamentals of microbiology with an emphasis on medical microbiology. The course will include topics such as: host responses to infections, human diseases caused by microorganisms, and the control and exploitation of microorganisms. Entrance is restricted to Nursing students in the Bachelor of Science in Nursing (Collaborative) program.
LH: 2
PR: Science 1807 and Science 1808
UL: cannot be used as one of the required courses for the Minor, Major, or Honours in Biology, nor is it acceptable for any of the joint programs between Biology and other disciplines

13.4 Business

Enrolment in some Business courses is limited and first priority will be given to students registered in Grenfell Campus's Business Administration programs.

Business courses are designated by BUSN.

13.4.1 Core Program Course Descriptions

1010 Introduction to Business provides students with an overview of business in the Canadian environment, with a focus on the economic and business systems, as well as major social, technological, and global trends. The course introduces students to fundamental concepts related to many functional areas of business, such as human resource management, marketing, production, operations management, accounting, and financial management. Emphasis is placed on relating the course material to current events in the business world, as well as helping students acquire critical and analytical thinking skills.
CR: Business 1000, the former Business 2001
UL: may be used in place of Business 1000 in programs offered by the Faculty of Business Administration

1020 Introduction to Entrepreneurship is designed to give students a broad understanding of the field of entrepreneurship and the role that entrepreneurship plays in innovation in society. Topics will include the nature and theories of entrepreneurship, the characteristics and behaviours of entrepreneurs, and the entrepreneurial process in small and large firms. Students will think and act in a creative manner, engage with local entrepreneurs, practice the entrepreneurial process, and evaluate their own entrepreneurial skill set. Students will learn entrepreneurial, technical and communication skills that will be useful in any organizational setting.
CR: the former Business 1600, Business 2600

2020 Business and Professional Communication focuses on the development of written, oral, and visual communication skills for modern academic and professional environments. Students will learn the fundamentals of business research, analytical thinking, presentation design and delivery, academic and professional document creation, and effective writing. This course will introduce theoretical background and provide the opportunity for students to develop their expertise in teamwork, critical thinking, writing and presentation skills.
CR: Business 2000, the fomer Business 2010, Business 2011
PR: 6 credit hours in first-year English

2100 Financial Accounting I introduces the concepts of financial accounting using the Canadian framework. Topics include the nature of accounting, the accounting cycle, and preparation of financial statements: balance sheet, income statement, statement of owner's equity and statement of cash flow. Specific topics include accounting for assets as well as current and long-term liabilities in both service and merchandising operations.
CR: the former Business 1101, the former Business 2100, Business 2102, Business 2111, the former Business 3100
PR: completion of at least 30 credit hours

2110 Managerial Accounting I introduces students to the concepts of preparing and using financial data for managerial decision making. Topics include job costing, process costing, activity-based costing, cost-volume-profit analysis, budgeting, and variance analysis.
CR: the former Business 2101 or Business 2112, Business 2102, the former Business 4100
PR: the former Business 1101 or BUSN 2100 or Business 2111

2200 Marketing I introduces students to marketing strategy development, including a consideration of a firm's marketing-specific goals, strengths, weaknesses, and opportunities, environmental and competitive analysis, marketing research, consumer behaviour, and market segmentation, targeting and positioning. Students will assess and develop marketing strategies and action plans that address strategic marketing challenges in these areas.
CR: the former Business 1201, the former Business 1210, the former Business 2201, Business 2205, the former Business 3200
PR: BUSN 1010

2250 Marketing II introduces students to practical decision making based on the concepts, analyses, and activities that comprise marketing tactics: product management, pricing considerations, promotional strategies, channels of distribution, customer relationship marketing, implementation, evaluation, and control.
CR: the former Business 1201, the former Business 2201, Business 2205, the former Business 2210, the former Business 3200
PR: BUSN 2200

2300 Organizational Behaviour highlights the contribution of the applied behavioural sciences to the study of work in today's organizations with a particular focus on individual and group processes. Students will examine topics in personality, perception, motivation, communication, group dynamics, leadership, workforce diversity, conflict management and organizational culture.
CR: Business 3310, the former Business 2301, the former Business 4300
PR: completion of at least 30 credit hours

2310 Business Leadership further develops concepts from Organizational Behaviour and provides students with an opportunity to explore various theories of leadership in the context of today's business environment. Students will consider topics related to effective leadership and management that may include an examination of leader behaviour, attitudes and style, the role of self-awareness and emotional intelligence, communication style, followership, employee motivation and engagement, power and influence tactics, and ethics and social responsibility in decision making.
CR: the former Business 3350
PR: BUSN 2300

3010 Organizational Theory emphasizes the fundamental concepts of organizational theory: the nature of organizational structure and its determinants in a complex global economy, the boundaries and impacts of organizational environments, measures of organizational effectiveness, and the roles of organizational learning, culture, innovation, development and change in shaping today's organizations. In addition to exploring the underlying theory of these organization-level phenomena, students will have an opportunity to critically apply course concepts to their own professional experiences.
CR: the former Business 5301, the former Business 5300
PR: BUSN 2300

3030 Canadian Business Law I introduces the student to the Canadian legal system and substantive areas of the law that are of particular relevance to the business setting. Topics include torts, negligence, contracts, legal structures for business formation, employment and property law. Emphasis will be placed on risk management. The course is taught through a variety of means used to improve the student's critical thinking skills.
CR: the former Business 3000, Business 3005, the former Business 4000
PR: completion of at least 60 credit hours

3300 Human Resource Management provides background in the theory and practice of human resource management (HRM) in modern organizations. Students will learn the fundamentals of traditional human resource functions that focus on forecasting, attracting, retaining, developing, evaluating, and compensating employees. Contemporary issues in HRM will also be considered.
CR: Business 3325. the former Business 4320
PR: BUSN 2300

3410 Operations Management teaches fundamental concepts regarding the nature, design and management of the operations function of organizations. Focus will be on capacity planning, forecasting, quality management, inventory management, and material requirements planning.
CR: Business 3401, the former Business 5400
PR: Statistics 2500 or equivalent

3500 Financial Management I introduces the concepts of financial management in Canadian capital markets. Focus will be on financial analysis and forecasting; working capital management; time value of money; and financing options.
CR: Business 3550, the former Business 4110, the former Business 4500
PR: BUSN 2100, Economics 1010 (or the former 2010), and Statistics 2500 or equivalent

3600 Enterprise Development explores and examines the venture creation process. Emphasis is on the critical role of the entrepreneur and the underlying attributes and norms guiding the steps in creating a new business venture. Students will have the opportunity to experience closely the entrepreneurial process, as well as gain the skills and competencies required in developing a viable business plan and negotiating for start-up financing.
CR: Business 3630, the former Business 5030, the former Business 5600, the former Business 7030
PR: BUSN 1020, BUSN 2100 or Business 2111 or the former Business 1101, and BUSN 2250 or Business 2205 or the former Business 2210

4010 Strategy I: Analysis and Planning teaches students how to analyze and evaluate an organization's corporate strategies from the perspective of organizational leadership. This first of two capstone course integrates and synthesizes knowledge acquired in the program and applies skills developed in all functional areas of business. Students work to identify, diagnose and recommend appropriate action for challenges faced in various types of business organizations. Conceptual frameworks, analytical tools and critical thinking are emphasized.
CR: the former Business 4050, Business 5001 or the former Business 7000
PR: BUSN 2110,or Business 2112 or the former Business 2101, BUSN 2250 or the former Business 2210, BUSN 2300, BUSN 3010, BUSN 3030 or Business 3005,or the former Business 4000, BUSN 3300 or the former Business 4320, BUSN 3500 or Business 3550 or the former Business 4500, and BUSN 4040 or Business 4306 or the former Business 5302

4040 International Business Management focuses on issues of globalization and the role of business in the global economy. Topics include the role of multinational corporations in economic development, market entry strategies for small- and medium-sized enterprises, the challenges of managing economic, cultural, and technological changes and differences, the role of international investment and FDI, as well as international business strategies required to compete in today's highly interconnected world. Students will gain the skills to function within the international and global business context.
CR: Business 4306, the former Business 5302, the former Business 7302
PR: BUSN 1010, Economics 1010 (or the former 2010), Economics 1020 (or the former 2020), and the completion of at least 60 credit hours

4070 Strategy II: Implementation and Change Management examines current thinking and research regarding the implementation process and the strategic management of change. Specifically, the course will explore the development and implementation of appropriate strategic action plans in a variety of organizational contexts, the assessment of the change environment and the creation of a culture for change, as well as the role of change agents and organizational leaders in these processes.
PR: BUSN 4010, or the former Business 4050 or Business 5001 or the former Business 7000

13.4.2 Business Electives Course Descriptions

2060 Business Ethics allows students to gain an understanding of the importance of ethics in everyday decision making in the professional environment. Students will explore their own ethical positions as they examine strategies for making ethical decisions. The course introduces students to ethical theories and frameworks and will help students develop the skills to anticipate, critically analyze, and appropriately respond to many types of ethical issues on both individual and organizational levels.
CR: the former Business 2808

2320 Workplace Skills offers students an opportunity to explore knowledge and practice skills that will enable them to professionally navigate many of the challenges in the workplace environment. Class participation forms a significant part of this course, and substantial amounts of classroom time will be devoted to role plays, case studies and group discussion.
PR: completion of at least 30 credit hours

2500 Personal Finance introduces the essentials of individual financial management. Students will further develop an understanding and skills in areas such as basic personal income tax, financial security, saving and investing, the use of credit, insurance, investments, and borrowing.
PR: completion of at least 30 credit hours

3060 Negotiation in Organizations teaches students strategies and skills for negotiating with various stakeholders in a variety of workplace settings. Using current theory and research on negotiation, the course will focus on developing awareness and skills of the various aspects of the negotiation process. The course will include a practical component that will allow students to develop their negotiation skills.
PR: completion of at least 60 credit hours

3100 Intermediate Accounting I continues the study of financial accounting by focusing on specific topics such as current assets, long-term investments, capital assets, intangibles, financial assets and revenue recognition.
CR: Business 4101 or the former Business 6100
PR: BUSN 2100 or Business 2111 or the former Business 1101

3110 Intermediate Accounting II continues the study of financial accounting by focusing on specific topics such as long term debt, employee future benefits, shareholders' equity, and financial statement presentation and analysis.
CR: Business 4102 or the former Business 6110
PR: BUSN 2100 or Business 2111 or the former Business 1101

3120 Taxation I is an introduction to the fundamentals and principles of the taxation system in Canada. Emphasis is placed upon the calculation of the tax liability of individuals and corporations.
CR: Business 4121 or the former Business 6120
PR: BUSN 2100 or Business 2111 or the former Business 1101, and BUSN 3030 or Business 3005 or the former Business 4000

3150 Intermediate Managerial Accounting is the study of in-depth managerial accounting concepts. This course will focus on topics such as budget preparation and analysis, cost management, cost analysis, pricing decisions, and performance management techniques.
PR: BUSN 2110 or Business 2112 or the former Business 2101

3220 Services Marketing explores the distinctive nature and characteristics of services, the unique opportunities and challenges associated with the marketing of services, the role of service providers in determining service quality and its connection to customer satisfaction, and the distinctions and connections between tangibles and intangibles. In addition to considering how services marketing requires an alternative application of the traditional marketing mix, students will also examine how service marketing mix strategies vary in the context of for-profit and non-profit organizations.
CR: Business 4235 or the former Business 6230
PR: BUSN 2250 or Business 2205 or the former Business 2210 or the former Business 2201

3230 Social Media Marketing examines the relevance and importance of social media tools in a contemporary marketing environment. Students will learn to apply and adapt traditional marketing strategy and tactics in a social media context and will gain practical experience through the development of an integrated social media strategy.
CR: Business 2220, the former Business 6004, the former Business 6042, the former Business 6240
PR: BUSN 2250 or Business 2205 or the former Business 2210 or the former Business 2201

3240 Understanding Consumer Behaviour considers the impact of consumer behaviour and the consumer decision making process on corporate and marketing strategy. Students will examine the complexity of concepts that influence the purchase, consumption, and post-purchase behaviours of individuals including culture, reference groups, self-image, perception, personality and lifestyle.
CR: Business 3210, the former Business 5200
PR: BUSN 2250 or Business 2205 or the former Business 2210 or the former Business 2201

3320 Labour Relations introduces the structure and function of the Canadian labour relations system. Labour relations management in Canada is highlighted with emphasis on the players in the union environment, the collective bargaining process, the dispute resolution process and the overall administration of the collective agreement.
CR: Business 3335 or the former Business 4330 or the former Business 3320
PR: BUSN 1010

3510 Financial Management II continues the concepts of financial management in Canadian capital markets. Focus will be on asset management, capital budgeting, valuation, dividend policy and extension of long-term financing options.
CR: Business 4550, the former Business 5500, the former Business 5140, the former Business 7140
PR: BUSN 3500 or Business 3550 or the former Business 4500

3610 Social Entrepreneurship examines the research and practice of social entrepreneurship. The course introduces students to the theories and models of social entrepreneurship; students will also learn about the role and contribution of social entrepreneurship to society, define viable social enterprise concepts, and evaluate the characteristics of social entrepreneurs.
PR: BUSN 1020 or Business 2600 or the former Business 1600

3620 Franchising and Buying a Business introduces students to the concept of franchising and buying an enterprise. Topics include the nature of franchising in Canada, the characteristics of the franchisee-franchisor agreement, legal considerations, as well as policies and strategies in successful franchising. Students will also learn the important factors involved in buying and selling an enterprise, the valuation models to assess the value of a business, as well as the negotiation dynamics in the buying and selling process.
CR: the former Business 6500
PR: BUSN 1020 or Business 2600 or the former Business 1600

3630 Family Business Management focuses on introducing students to the theory and practice of family business issues, such as understanding the difference between family business and other types of businesses and examining the role of family and non-family members involved in the business. Other topics include understanding the succession planning process, learning to resolve and manage conflicts, and exploring the challenges of multigenerational businesses.
CR: the former Business 6500
PR: BUSN 1020

3750 Management Information Systems examines planning, designing,

and controlling information technology in a business environment. This course will be taught from both conceptual and practical perspectives. Topics include: types of systems; system security; enterprise resource planning; and database, spreadsheet and social media applications.
CR: Business 3700 or the former BUSN 4800
PR: 60 credit hours

3800-3850 Special Topics is a range of special topics courses in Business.
PR: successful completion of at least 60 credit hours is normally required

4020 Business Ethics and Corporate Social Responsibility acknowledges the complexities of ethical and socially responsible workplace decision making given the pressures and inter-relationships among business, government, society and the environment. Students will explore topics such as the social-economic business system, business ideologies, business ethics, social responsibilities of business, stakeholder and issues management, and sustainability.
CR: Business 4015, the former Business 7010
PR: BUSN 3010

4030 Canadian Business Law II expands upon the topics covered in Canadian Business Law I. The substantive areas of law from BUSN 3030 are considered at a more advanced level; additional topics include landlord and tenant, leasing, insurance and guarantees, sale of goods, mortgages and real estate transactions, the regulation of business, and international business transactions. Critical analysis is emphasized in this course.
CR: Business 4005, the former Business 5000
PR: BUSN 3030 or Business 3005 or the former Business 4000

4060 Managing Non-Profit Organizations explores the management of non-profit organizations in Canada. Students will learn what distinguishes the non-profit sector from traditional descriptions of business and government, with particular emphasis given to organizational structure, funding, and culture. Topics considered may include organizational strategy and governance, managing paid and non-paid human resources, fundraising and financial management, marketing and communications, and accountability.
PR: BUSN 2110 or Business 2112 or the former Business 2101, BUSN 2250 or Business 2205 or the former Business 2210, BUSN 2300 or Business 3310, BUSN 3300 or the former Business 3323 or the former Business 4320, BUSN 3500

4080 Business in Film engages students to examine, reflect on and discuss the role of business and its evolution in society. Topics include business and its contribution to socio-economic and community development, the role of stakeholders, the nature of the corporation, the impact of change management and change agents, and trends in functional areas of business. This seminar uses a combination of popular films, as well as documentaries to highlight issues, challenges, and opportunities in business administration from both a practical and an academic point of view.
PR: completion of at least 90 credit hours

4120 Taxation II is a continuation in the study of the income tax system in Canada. Focus will be on tax planning for corporations and individuals, sales tax, succession and estate planning, partnerships, trusts, and deferred income plans.
CR: Business 7150
PR: BUSN 3120 or Business 4121 or the former Business 6120

4130 External Auditing introduces the theory and concepts of external auditing. Emphasis will be placed upon legal liability, materiality and risk, internal control, and audit evidence and strategy as well as the case studies of the audit of specific business processes.
CR: Business 4131, the former Business 6130
PR: BUSN 3100 or BUSN 3110 or Business 4101 or the former Business 6100 or Business 4102 or the former Business 6110

4210 Marketing Research is designed to help students develop an understanding of the value of marketing research in strategic decision making. Students will become familiar with different methods and tools for collecting, analyzing, and interpreting data in a marketing research context.
CR: Business 4221, the former Business 5220, the former Business 6200
PR: BUSN 2250 or Business 2205 or the former Business 2210 or the former Business 2201, Statistics 2500 or equivalent

4220 Business-to-Business Marketing and Relationships presents a comprehensive view of the complexities of business-to-business marketing concepts, and the critical role of developing and managing business relationships. Particular attention is paid to organizational buying/purchasing behavior, supplier relationship management, and the analysis of business relationships from both dyadic and network perspectives.
CR: Business 3250 or the former Business 5250
PR: BUSN 2250

4230 International Marketing examines marketing in a global context with a particular focus on the strategic significance of the international dimension on marketing efforts. Students will explore various marketing challenges around global marketing opportunities such as exporting and direct entry strategies, contending in unfamiliar competitive environments, navigating complex social and cultural and political and legal environments, and adapting the marketing mix and activities to suit specific foreign market needs.
CR: Business 4246 or the former Business 7240, the former Business 6001
PR: BUSN 2250 or Business 2205 or the former Business 2210 or the former Business 2201

4310 Recruitment and Selection explores the role of recruitment and selection in the larger context of human resource management. Students will acquire the knowledge and skills needed to successfully design and implement strategic recruitment and selection initiatives in a variety of organizations. Topics may include the analysis of job requirements, legal considerations, selection criteria and methods, testing methods, interviewing techniques, and process evaluation.
CR: Business 4322, the former Business 6312
PR: BUSN 3300 or Business 3325 or the former Business 4320

4510 Investments is a study of capital markets and the financial services industry. Emphasis will be placed upon investment securities, risks, markets and mechanics, and portfolio management for personal and institutional investments.
CR: Business 4540 or the former Business 6510, the former Business 6140
PR: BUSN 3500 or the former Business 3350 or the former Business 4500

4610 Family Business Management focuses on introducing students to the theory and practice of family business issues, such as understanding the difference between family business and other types of businesses and examining the role of family and non-family members involved in the business. Other topics include understanding the succession planning process, learning to resolve and manage conflicts, and exploring the challenges of multigenerational businesses.
CR: the former Business 6500
PR: BUSN 1020 or Business 2600 or the former Business 1600

4660 Workplace Innovation discusses how organizations can use innovation to create a sustainable and competitive business. The course explores how organizational creativity is developed and examines both the drivers and barriers to managing employees through this process. Emphasis will be placed on the role of leadership in developing and maintaining innovation and its use in stimulating organizational growth. The course will focus on product, process and service innovation and consider innovation in all aspects of the core business functions.
PR: completion of at least 90 credit hours

4801-4850 Special Topics is a range of special topics courses in Business.
PR: successful completion of at least 90 credit hours is normally required

5010 Experiential Learning: Event Planning allows students to gain important event management, organizational and communication skills through the planning of one or more events on campus and throughout the greater community.
PR: restricted to Grenfell Campus Bachelor of Business Administration students who have completed at least 90 credit hours

5020 Experiential Learning: Field Study allows students to gain hands-on experience through one or more field studies. Students may work with organizations such as communities, associations or businesses in various settings across Newfoundland and Labrador. Field study opportunities may include, for example, working from the Bonne Bay Marine Station.
PR: restricted to Grenfell Campus Bachelor of Business Administration students who have completed at least 90 credit hours

5030 Experiential Learning: Internship places students in a business setting and provides the student with opportunities to use their business skills in a real business environment.
PR: restricted to Grenfell Campus Bachelor of Business Administration students who have completed at least 90 credit hours

5040 Experiential Learning: Small Business Consulting allows students to gain hands-on experience by working with small businesses. Student groups will be involved in such projects as business plan writing, market research, market strategies, strategic analysis or other business-related functions.
PR: restricted to Grenfell Campus Bachelor of Business Administration students who have completed at least 90 credit hours

5050 Experiential Learning: Student Leadership allows students to gain leadership and project management skills to empower fellow students and the community at large by assuming senior roles in student driven programs such as Enactus Grenfell.
PR: restricted to Grenfell Campus Bachelor of Business Administration students who have completed at least 90 credit hours

13.5 Chemistry

Students are strongly advised to successfully complete the Chemistry sequence appropriate to their program (Chemistry 1200/1001 or 1050/1001 or 1050/1051) on the Campus they first

attend prior to transfer to another Campus.

Chemistry courses are designated by CHEM.

1001 General Chemistry II focuses on rates of reaction, chemical equilibria, thermodynamics, electrochemistry, and introduction to organic chemistry.
AR: attendance is required in the laboratory component of this course. Failure to attend may result in a failing grade or deregistration from the course.
CR: CHEM 1051
LC: 4 including tutorials
LH: 3
PR: CHEM 1200 or CHEM 1050; Science 1807 and Science 1808

1200 General Chemistry I builds on basic chemistry concepts from high school. Topics include is atomic structure and bonding, stoichiometry, reactions in aqueous solutions, gases, energetics of chemical reactions, the periodic table, chemical bonding and molecular geometry, intermolecular forces.
AR: attendance is required in the laboratory component of this course. Failure to attend may result in a failing grade or deregistration from the course.
CR: CHEM 1050
LC: 4
LH: 3
PR: grade of at least 60% in CHEM 1810 or CHEM 1010, or high school CHEM 3202 with a grade of at least 65% or high school CHEM 2202 with a grade of at least 80%; Science 1807 and Science 1808

1810 Elements of Chemistry focuses on matter, scientific measurement, atomic theory, the periodic table, chemical compounds and elementary bonding theory, the mole, chemical reactions, the chemistry of selected elements, gases, solutions, stoichiometry. This course is specifically intended for those who have no background in chemistry.
AR: attendance in the laboratory component (on Campus version) or completion of the practical component (online version) of this course is required. Failure to do so may result in a failing grade or deregistration from the course.
CR: CHEM 1010; must not have previously received credit for, or be currently registered in CHEM 1200 or CHEM 1050
LC: 4
LH: 3
PR: Science 1807 and Science 1808
UL: may not be used as one of the Chemistry courses required for a B.Sc. Degree with a Major in Environmental Science at Grenfell Campus. Only 6 science credit hours will be awarded for a major or honours in Chemistry from the following course groups: CHEM 1010/1050/1051, or CHEM 1810/1200/1001.

1900 Chemistry in Everyday Life is a course that shows the relevance of chemistry in our daily lives. Following an introduction to atomic structure and chemical bonding, the course will focus on some of the following topics: organic chemistry and fuels; redox processes and batteries; acids, bases, and household cleaners; phases and detergents; the chemical components of foods; polymers and plastics; toiletries, and pharmaceuticals.
UL: may not be used as one of the required courses towards a Minor, Major, or Honours in any science degree program

2210 Introductory Inorganic Chemistry focuses on fundamental concepts in the chemistry of s, p, and d block elements and their compounds. Emphasis will be placed on periodic trends in physical and chemical properties, molecular symmetry, molecular orbital diagrams, simple crystal structures, Lewis acid/base theory, and introductory coordination chemistry.
AR: attendance is required in the laboratory component of this course. Failure to attend may result in a failing grade or deregistration from the course.
LH: 3
PR: Science 1807 and Science 1808; minimum 60% in CHEM 1051 or a minimum 60% in either CHEM 1001 or the former 1031

2301 Thermodynamics and Kinetics builds upon knowledge of physical chemistry from first year. It covers the three laws of thermodynamics for ideal and real systems as well as chemical kinetics. Topics in thermodynamics include the thermodynamics of ideal and real gases, phases, and solutions, the Maxwell relations, equilibria between phases, and in electrolyte solutions. The integrated rate laws for simple and complex mechanisms, and the temperature dependence of reaction rates in terms of kinetic molecular theory are some of the topics discussed in the kinetics section of the course.
AR: attendance is required in the laboratory component of this course. Failure to attend may result in a failing grade or deregistration from the course.
CR: the former CHEM 2300
LH: 3
PR: Science 1807 and Science 1808; minimum 60% in CHEM 1051, or a minimum 60% in either CHEM 1001 or the former CHEM 1031; Mathematics 1001. Physics 1051 or Physics 1021 is recommended.

2302 Quantum Chemistry and Spectroscopy examines the quantum mechanics of simple systems such as the particle in a box, the harmonic oscillator, linear rotor, and hydrogen-like atoms. Topics also include orbital quantum numbers, spin, many electron atoms, an introduction to quantum mechanical methods, the electronic structures of molecules, bonding, and symmetry. Furthermore, electronic, rotational, and vibrational spectroscopy will be discussed as well as modern applications of spectroscopy and lasers. AR: attendance is required in the laboratory component of this course. Failure to attend may result in a failing grade or deregistration from the course.
CO: Mathematics 2000 is recommended
CR: the former CHEM 3301
LH: 3
PR: Science 1807 and Science 1808; minimum 60% in CHEM 1051, or a minimum 60% in either CHEM 1001 or the former CHEM 1031; Mathematics 1001 and Physics 1051 or Physics 1021

2400 Introductory Organic Chemistry I is a course on bonding involving carbon; conformations and sterochemistry; introduction to functional groups and nomenclature; properties, syntheses and reactions of hydrocarbons, alkyl halides, alcohols and ethers.
AR: attendance is required in the laboratory component of this course. Failure to attend may result in a failing grade or deregistration from the course.
CR: CHEM 2440
LH: 3
PR: a minimum 60% in CHEM 1051, or CHEM 1010 and the former CHEM 1011 with a grade of at least 80% in each; or the former CHEM 1011 with a grade of at least 85%; or a minimum of 60% in either CHEM 1001 or the former CHEM 1031; Science 1807 and Science 1808

2401 Introductory Organic Chemistry II is an introduction to the interpretation of mass, infrared, ^{1}H and ^{13}C NMR spectra; properties, syntheses and reactions of simple aromatic and heteroaromatic compounds, ketones, aldehydes, amines, carboxylic acids and their derivatives; aldol and related reactions.
AR: attendance is required in the laboratory component of this course. Failure to attend may result in a failing grade or deregistration from the course.
CR: CHEM 2440
LH: 3
PR: CHEM 2400; Science 1807 and Science 1808

2440 Organic Chemistry for Biologists is an introduction to the principles of organic chemistry with an emphasis on material relevant to biological molecules. The laboratory will introduce techniques and illustrate concepts covered in the course.
AR: attendance is required in the laboratory component of this course. Failure to attend may result in a failing grade or deregistration from the course.
CR: CHEM 2400, CHEM 2401
LH: 3
PR: CHEM 1001 or CHEM 1051; Science 1807 and Science 1808

3261 Atmospheric Chemistry (same as Environmental Science 3261) provides a comprehensive study of the chemistry of the Earth's atmosphere. Beginning with an overview of planetary atmospheres, we follow the evolution of the Earth's atmosphere until today. Atmospheric chemical processes are interpreted from the perspectives of chemical kinetics, chemical thermodynamics, molecular orbital theory, and molecular spectroscopy. The mechanisms of stratospheric reactions are studied in the context of the ozone layer, while those of the troposphere are linked to the so-called 'greenhouse effect' and aspects of pollution. The very different upper-atmosphere chemistry is also studied.
CR: Environmental Science 3261
PR: CHEM 2210 and CHEM 2301 or permission of the instructor and Program Chair

13.6 Classics

In accordance with Senate's *Policy Regarding Inactive Courses*, the course descriptions for courses which have not been offered in the previous three academic years and which are not scheduled to be offered in the current academic year have been removed from the following listing. For information about any of these inactive courses, please contact the appropriate Dean of the School.

Classics courses are designated by CLAS.

1100 Life in Ancient Greece s a general survey of the origins and evolution of Ancient Greek Civilization. The course introduces the student to Greek social and political institutions, religion and myth, and achievements in art, philosophy, science and literature, as well as the influence of Ancient Greece on the modern world.
CR: the former CLAS 1000, the former CLAS 2000

1120 and 1121 Elementary Latin is an introduction to the grammar and syntax of Latin, with particular attention paid to the acquisition of basic skills in reading, composition, and aural comprehension.
CR: the former CLAS 120A and 120B

PR: CLAS 1120 is the prerequisite for CLAS 1121

1130 and 1131 Elementary Ancient Greek is an introduction to the grammar and syntax of ancient Greek, with particular attention paid to the acquisition of basic skills in reading, composition, and aural comprehension.
CR: the former CLAS 130A and 130B
PR: CLAS 1130 is the prerequisite for CLAS 1131

1200 Life in Ancient Rome is a general survey of the origins and evolution of Ancient Rome. The course introduces the student to social, political, and legal institutions, the growth of the Roman Empire, Roman art, literature, and religions, as well as Rome's pervasive influence in the modern world.
CR: the former CLAS 1000, the former CLAS 1101, the former CLAS 2001

2010 Greek Art and Architecture is an introduction to the study of the art and architecture of Ancient Greece, its social, religious, and political functions in Athens and the greater Greek world. The course introduces students to different ways of analysing and interpreting the material remains of the ancient Greeks and traces their echoes in modern art and architecture.
CR: the former CLAS 3100, the former CLAS 3101

2015 Roman Art and Architecture is an introduction to the study of the art and architecture of Ancient Rome, its social, religious, and political functions in Rome and the provinces. The course introduces students to different ways of analysing and interpreting the material remains of the ancient Romans and traces their echoes in modern art and architecture.
CR: the former CLAS 3100, the former CLAS 3102.

2020 History of the Hellenistic World (same as History 2034) is a survey of the history of the Mediterranean world and the Near East from the death of Alexander the Great in 323 BCE until the incorporation of the Kingdom of Egypt in the Roman Empire in 30 BCE. Particular attention is given to the influence of the new monarchies on political, social and cultural developments in both Greek and non-Greek communities.
CR: History 2034

2035 History of Classical Greece (same as History 2035) is a survey of Greek History from the Bronze Age to the death of Alexander the Great, with special reference to the social and political institutions of the fifth century BCE. Students will learn about the foundations of modern democracy and its responses to internal and external challenges.
CR: History 2035, the former CLAS 3910, the former History 3910, the former CLAS 2030, the former History 2030

2040 History of Rome (same as History 2040) is a survey of Roman History from the early monarchy to the reign of Constantine with special reference to society and politics in the late Republic and early Empire.
CR: CLAS 2041, CLAS 2042, History 2040, the former CLAS 3920, the former History 3920

2055 Women in Greece and Rome is an examination of the role of women in ancient Greece and Rome from the perspectives of religion, literature, art, society, and politics. Critical assessments of the scholarship and methodologies (including feminist methodologies) relevant to this topic will be included. Students will gain awareness of views of gender identity and sexuality that are different from modern views.

2701 History of Ancient Philosophy (same as Philosophy 2201, the former 2701) is a survey of the origin and development of philosophy among the ancient Greeks and Romans.
CR: Philosophy 2201, the former 2701

2800 Classical Drama I - inactive course.

2801 Classical Drama II - inactive course.

3010 Greek Religion (same as Religious Studies 3010) is a study of the role of religion in the private and public life of the Greek world. Topics include the Greek gods, religious rituals, sacred sites and temples, regional and temporal variations in religious practices, and the role of religion in society. The course may also compare ancient Greek religious practices and modern conceptions of religion.
CR: Religious Studies 3010, the former CLAS 3121, the former Religious Studies 3121

3020 Roman Religion (same as Religious Studies 3020) is study of the role of religion in the private and public life of the Roman world. Topics include the Roman divinities, sacred sites and temples, the role of religion in politics and society, the interaction with and assimilation of foreign religious practices, and the rise of Christianity. Students may also compare Roman religious practices with modern conceptions of religion.
CR: the former CLAS 3121, the former Religious Studies 3121, Religious Studies 3020

3090 Alexander and the Macedonians (same as History 3090) investigates the impact of the conquests of Alexander the Great and his Macedonian Successors on the political, social, cultural, intellectual, and religious world of the Mediterranean and Near East between Alexander's accession in 336 and the battle of Ipsus in 301, when his vast empire was carved into Hellenistic kingdoms.
CR: History 3090

3110 Greek Literature in Translation - inactive course.

3111 Latin Literature in Translation - inactive course.

3130 Greek and Roman Mythology (same as Folklore 3130) is a comparative study of the major myths of Greece and Rome as embodied in the literary and artistic remains of the ancient world with reference to their origins and their influence on later art and literature.
CR: Folklore 3130

3405 Tragic Drama in Greece and Rome is a detailed examination of the tragic dramas of ancient Greece and Rome. A selection of plays by Aeschylus, Sophocles, Euripides and Seneca will be read in English translation. Topics may include the development of ancient tragedy, its literary, performative and thematic traditions, its representation of social and historical conditions, its influence on later tragic drama, and on modern theatre and film.
CR: the former Classics 2805

3415 Epic Poetry in Greece and Rome offers a detailed and in-depth study of the epic poetry or ancient Greece and Rome. The course will examine the poems of Homer, Apollonius of Rhodes and Virgil in English translation. Instructors may include additional poems. Topics to be discussed include the development of epic poetry, its literary traditions and its role in Greek and Roman society, and its influence on modern literature and film.
CR: the former CLAS 2060

3700 The Ancient World in Film examines the representation of the history and cultures of the ancient world in film. A selection of films will be studied and extensive reference will be made to the ancient evidence that informs them. The ancient world's impact on modern society will be considered together with the film industry's recasting of the ancient world in response to modern social and historical developments.

4000 Seminar in Greek History and Society will have the topics to be studied announced.

4010 Seminar in Roman History and Society will have the topics to be studied announced.

4020 Seminar in Greek Literature and Culture will have the topics to be studied announced.

4030 Seminar in Roman Literature and Culture will have the topics to be studied announced.

13.7 Computer Science

Computer Science courses are designated by COMP.

1510 An Introduction to Programming for Scientific Computing introduces students to basic programming in the context of numerical methods with the goal of providing the foundation necessary to handle larger scientific programming projects. Numerical methods to solve selected problems from Physics, Chemistry, and Mathematics will be covered.
CR: the former COMP 2602, the former Mathematics 2120
LH: 2
PR: Mathematics 1000

2500 Data Analysis with Scripting Languages introduces the use of scripting languages to solve common data analysis tasks. The control structures and expressions of the language are first discussed. Script solution to storing/retrieving data sets, searching data sets, and performing numeric and statistical calculation are covered. Plotting and visualization for data sets are also presented.
PR: COMP 1510 or the former COMP 1700 or the former COMP 1710 or COMP 1000 or COMP 1001 (or equivalent)

13.8 Earth Sciences

In accordance with Senate's *Policy Regarding Inactive Courses*, the course descriptions for courses which have not been offered in the previous three academic years and which are not scheduled to be offered in the current academic year have been removed from the following listing. For information about any of these inactive courses, please contact the Head of the Department.

Earth Sciences courses are designated by EASC.

1000 Earth Systems is a survey of the structure, function and interrelations of Earth's lithosphere, hydrosphere, atmosphere and biosphere. Topics include an exploration of the physical and chemical properties of planetary materials, forces driving and sustaining Earth systems, and biological modifiers (including humankind) on the Earth today.
LH: 3
PR: Science 1807 and Science 1808

1001 Evolution of Earth Systems - inactive course.

1002 Concepts and Methods in Earth Sciences is an introduction to a broad range of concepts concerning the development of the geological record and the Earth; practical methods for collection of field based data; topics in map interpretation and geometric analysis, stratigraphy, paleontology, structure, petrology, and geophysics. The course is presented with an emphasis on the development of practical skills needed to pursue a career in Earth Sciences.
LH: 3
PR: EASC 1000; Science 1807 and Science 1808

2150 The Solar System describes the basic astronomy of the Solar System, tracing the search to understand motion of the Sun, Moon and planets in the sky: modern observations of planets, moons, comets, asteroids and meteorites and what they tell us about the origin and evolution of the Solar System. This course is designed for students taking Earth Sciences as an elective.
UL: not acceptable as one of the required courses for the Minor, Major or Honours programs in Earth Sciences

3811 Paleontology is an outline of the major changes in life forms from Archaean times through the Phanerozoic to the present day, including details of invertebrate and vertebrate faunas and major floral groups; mechanisms and effects of mega-, and microevolution in the fossil record; Biology and classification of organisms and summaries of their geological significance in biostratigraphy, paleoecology and rock-building; relationships between major cycles of evolution and extinction to global processes. This course has a laboratory component.
CR: Biology 3811, the former EASC 3801, the former Biology 3800
LH: 3
PR: either Biology 2120 (or Biology 1001 and Biology 1002) and EASC 1002; or Biology 2122 and Biology 2210; Science 1807 and Science 1808

13.9 Economics

In accordance with Senate's *Policy Regarding Inactive Courses*, the course descriptions for courses which have not been offered in the previous three academic years and which are not scheduled to be offered in the current academic year have been removed from the following listing. For information about any of these inactive courses, please contact the Head of the Department.

Economics courses are designated by ECON.

1010 Introduction to Microeconomics I (same as the former ECON 2010) examines scarcity and opportunity cost. Demand and supply. Elasticity. Household demand: marginal utility. Household demand: indifference curves. Production functions. Short-run and long-run cost functions. Perfect competition in the short run and the long run. Monopoly.
CR: the former ECON 2010

1020 Introduction to Macroeconomics (same as the former ECON 2020) covers national income accounting, aggregate income analysis, money, banking and foreign trade.
CR: the former ECON 2020

2550 Economic Statistics and Data Analysis is an analysis of economic statistics and the use of economic data. A course designed to introduce students to the task of economic data collection, description and analysis. Emphasis will be on interpretation and analysis of data using computer software programs.
PR: ECON 1010 (or the former 2010) and/or ECON 1020 (or the former 2020), Statistics 2500 or equivalent.

3000 Intermediate Micro Theory I is the basic microeconomic theory course; consumer demand, indifference curve analysis, theory of production and cost, factor substitution, and the theory of the firm under perfect competition and monopoly.
PR: ECON 1010 (or the former 2010) and/or ECON 1020 (or the former 2020), Mathematics 1000 or its equivalent

3001 Intermediate Micro Theory II is a continuation of basic microeconomic theory; the theory of imperfect competition, theory of factor pricing under various market structures, general equilibrium and welfare economics.
PR: ECON 3000

3010 Intermediate Macro Theory I is aggregate analysis including consumer, investment, government and international sectors, the role of money, determinants of aggregate supply, and the effects of autonomous behavioural changes and fiscal and monetary policies on unemployment, price levels and the balance of payments.
PR: ECON 1010 (or the former 2010) and/or ECON 1020 (or the former 2020), Mathematics 1000 or its equivalent

3011 Intermediate Macro Theory II is a consideration of modern theories of macroeconomics, dynamics, empirical evidence and simulation of the national economy. Emphasis on the availability and effectiveness of government policy instruments.
PR: ECON 3010

3030 International Economics: Issues and Problems in a Canadian Context is an intermediate course in international economics. The course covers the theory of comparative advantage, the structure and policy issues of the Canadian balance of payments, the foreign exchange market and the institutional aspects of international commerce.
PR: ECON 1010 (or the former 2010) and/or ECON 1020 (or the former 2020)

3050 Economic Forecasting: Methods and Applications - inactive course.

3080 Natural Resource and Environmental Economics is application of economic analysis to renewable and nonrenewable natural resource industries such as the fishery, forestry, and mining. Emphasis is given to the criteria for optimal resource use under various market structures and their implications for public policy. Issues of environmental resource management and pollution control will also be covered.
PR: ECON 1010 (or the former 2010)

3085 Issues in Ecological Economics (same as the former Environmental Studies 3085) aims to explore the dynamic interaction between the economic system and the ecological system that sustains it by using trans-disciplinary theoretical approaches and methodologies. The main focus of this course will be on Ecological Economics concepts such as low and high entropy, biotic and abiotic goods and services, stock-flow resources, carrying capacity, throughput, co-evolution, sustainable scale, use value, and their applications in a problem-solving context.
CR: same as the former Environmental Studies 3085
PR: ECON 1010 (or the former 2010)

3150 Money and Banking examines the operation of the money and banking system, with special emphasis on Canadian problems. Monetary theory will be treated in relation to income theory and foreign trade.
PR: ECON 1010 (or the former 2010) and/or ECON 1020 (or the former 2020)

3160 Financial Economics provides an analysis of the major building blocks of the modern theory of financial economics and their implications for decision-making. To reflect that modern finance is a branch of economics, emphasis will be on how general economic principles and analytical techniques can be applied across all finance sub-fields. Topics include the basic pillars in finance–intertemporal optimization, asset valuation, risk management–and selected issues that will vary each year.
CR: the former Business 4500 (St. John's), the former Business 4500 (Grenfell)
PR: Mathematics 1000 or its equivalent, ECON 1010 (or the former 2010) and/or ECON 1020 (or the former 2020). Students are recommended to take ECON 2550 or its equivalent prior to taking thus course.

3550 Mathematical Economics I examines linear algebra and differential calculus, with applications to economics.
PR: ECON 1010 (or the former 2010), Mathematics 1000 with a "B" standing, or Mathematics 2050

3551 Mathematical Economics II covers integral calculus, difference and differential equations, with applications to Economics.
PR: ECON 3000, ECON 3550,Mathematics 1000 with a "B" standing

4550 Econometrics I covers estimation of the general linear regression model with emphasis on fundamental theory and examples from published empirical research.
PR: ECON 2550, 3000, 3010.

4551 Econometrics II covers further problems in econometric theory and technique; multicollinearity, autocorrelation, nonlinear estimation, and the identification and estimation of systems of equations. Published empirical research will be discussed and each student will be expected to perform an original empirical study.
PR: ECON 4550

13.10 English

13.10.1 Applied and Experiential Courses

2905 Introduction to Creative Writing will introduce students to three main areas of creative writing: poetry, prose fiction, and creative non-fiction (travel writing, autobiography, journalism). Much of the emphasis will be on writing as a medium of communication. For this reason, some of the instruction will be the workshop system in which students act as each other's readers and audience.
PR: 6 credit hours in English at the 1000 level

3905 Creative Writing is a workshop course for aspiring writers of poetry and/or fiction. Limited enrolment. Applicants will be required to submit a sampling of their previous and current work.
CR: ENGL 3900, ENGL 3901
PR: permission of the instructor and successful completion of at least 6

credit hours in English courses at the second-year level

4905 Advanced Creative Writing is a workshop course for creative writers who have demonstrated considerable talent and skill in poetry and/or prose fiction. Limited enrolment.
PR: permission of the instructor and successful completion of at least 6 credit hours in English courses at the third-year level

13.10.2 English Core Courses

1000 Critical Reading and Writing in Prose Forms is an introduction to the essay, short fiction and the novel. Emphasis is placed on critical reading and thinking strategies; composition of essays, including use of quotations and documentation, revision and editing; and literary analysis. All sections of this course follow the CRW guidelines available at www.mun.ca/hss/CRW.
CR: ENGL 1090, or the former ENGL 1030, 1050, 1080

1001 Critical Reading and Writing in Poetry and Drama builds upon the essay writing and critical analytical strategies begun in ENGL 1000. Emphasis is placed on developing composition skills in essay writing, conducting research, and examining the genres of poetry and drama. All sections of this course follow the CRW guidelines available at www.mun.ca/hss/CRW.
CR: ENGL 1191, 1192, 1193, the former ENGL 1051, 1101, 1102, 1103
PR: ENGL 1000, or 1020, or 1090, or the former ENGL 1030, or the former ENGL 1080

1110 Critical Reading and Writing in Rhetoric is an examination of prose texts such as essays, articles and reviews. Students write for different purposes and audiences. Emphasis is placed on critical reading and writing: analysing texts, framing and using questions, constructing essays, organizing paragraphs, conducting research, quoting and documenting, revising and editing. All sections of this course follow the CRW guidelines available at www.mun.ca/hss/CRW. and build on foundational Critical Reading and Writing content delivered in ENGL 1000.
PR: ENGL 1000, or 1020, or 1090, or the former ENGL 1030, or the former ENGL 1080

2005 Literary Survey I (The beginnings to 1700) introduces students to major writers, movements, and genres by detailed study of selected texts.
CR: ENGL 2000, the former ENGL 2110
PR: 6 credit hours in English at the 1000 level

2008 Literary Survey II (1700-1900) introduces students to major writers, movements, and genres by detailed study of selected texts.
CR: ENGL 2001, the former ENGL 2006, 2007, 2111
PR: 6 credit hours in English at the 1000 level

2815 Introduction to Literary Theory and Criticism is an introduction to the study of contemporary theory and criticism with an emphasis on its application in the reading of literary texts.
PR: 6 credit hours in English at the 1000 level

3105 Critical Approaches and Theory (same as the former ENGL 4105) is a survey of critical approaches to English Literature, particularly those adopted by twentieth-century readers. The course will give an account of the theories on which these approaches are based and some attention will be paid to the application of different approaches to specific works of literature.
CR: ENGL 4101, the former ENGL 4105
PR: successful completion of at least 6 credit hours in English courses at the second-year level

3205 Shakespeare Survey is a study of at least eight plays, two from each dramatic mode: comedy, history, tragedy, and romance. This course is also designated as a **Pre-1900 Course**.
CR: credit may be obtained for only two of ENGL 3200, ENGL 3201, ENGL 3205, ENGL 3206
PR: successful completion of at least 6 credit hours in English courses at the second-year level

3206 Shakespeare and the Classical Tradition is a study of the relationship between Shakespeare and his major classical sources, with a particular focus on the use of classical literature in the Renaissance. This course is also designated as a **Pre-1900 Course**.
CR: credit may be obtained for only two of ENGL 3200, ENGL 3201, ENGL 3205, ENGL 3206
PR: successful completion of at least 6 credit hours in English courses at the second-year level

3395 The Literary Uses of English from the Earliest Times to the Present is an exploration of the development of the English language, as evidenced by its literary uses. This course is also designated as a **Pre-1900 Course**.
CR: the former ENGL 2401
PR: successful completion of at least 6 credit hours in English courses at the second-year level

4950 Individual Project in English is an individual project of a creative, or a critical, or a research character on a topic which is subject to the approval of the Program Chair. The topic will be prepared under the supervision of a designated faculty member or members.
CR: ENGL 4951, the former ENGL 4990
PR: successful completion of at least 6 credit hours in English courses at the third-year level

4951 Research and Bibliography will give honours students a grounding in research, bibliography, and the history of print culture in preparation for the honours thesis. Students will carry out research and other preparation appropriate to the scholarly or creative form planned for their honours thesis.
CR: ENGL 4900, the former ENGL 4901, ENGL 4950
PR: successful completion of at least 6 credit hours in English courses at the third-year level

4959 Honours Thesis is carried out by each student under the supervision of a faculty member assigned by the Program Chair.
CR: ENGL 4999
PR: ENGL 4951

13.10.3 Nationally-Identified Literatures

2145 Pride Literature in Canada considers literature that has been shaped by alternative sexualities, gender identities, and trans experiences (LGBTQI voices).
PR: 6 credit hours in English at the 1000 level

2146 Canadian Fiction explores diverse works of Canadian prose Post-First World War to the present.
CR: ENGL 2150, ENGL 2151, the former ENGL 3146
PR: 6 credit hours in English at the 1000 level

2155 Newfoundland Literature is a study of Newfoundland literature with emphasis on representative writers since 1949.
CR: ENGL 3155
PR: 6 credit hours in English at the 1000 level

2156 Canadian Short Stories is a study of Canadian short stories which aims to give the student a heightened appreciation of individual short stories, short story cycles, and the range of Canadian accomplishment in the genre.
PR: 6 credit hours in English at the 1000 level

2160 North American Indigenous Literature will introduce Indigenous literature in a social, political and historical context. Beginning with the oral tradition (songs, narratives, legends, and orations), it will focus on different works by North American Indigenous writers: poetry, drama, short stories and novels.
PR: 6 credit hours in English at the 1000 level

2705 Modern World Literature in Translation is a study of modern world literature in English translation, with focus on writers of the twentieth century who have attained international stature.
PR: 6 credit hours in English at the 1000 level

3145 Early Canadian Fiction explores diverse works of Canadian prose fiction from the beginnings through the First World War.
CR: ENGL 3152
PR: successful completion of at least 6 credit hours in English courses at the second-year level

3147 Early Canadian Poetry explores Canadian poetry from the beginnings through the First World War.
CR: ENGL 3152
PR: successful completion of at least 6 credit hours in English courses at the second-year level

3148 Canadian Poetry explores Canadian poetry from Post-First World War to the present.
CR: ENGL 3157, ENGL 3158, ENGL 4850
PR: successful completion of at least 6 credit hours in English courses at the second-year level

3149 Canadian Prose is a study of selected works of Canadian prose, covering both fiction and non-fiction.
PR: successful completion of at least 6 credit hours in English courses at the second-year level

3171 Irish Drama is a study of representative Anglo-Irish drama by such authors as Wilde, Shaw, Yeats, Synge, Lady Gregory, O'Casey, Behan, Friel and Molloy.
CR: the former ENGL 3170, the former ENGL 3180
PR: successful completion of at least 6 credit hours in English courses at the second-year level

3192 Modern Scottish Literature focusses on representative Scottish texts from the twentieth and twenty-first centuries studied within Scotland's distinctive historical and cultural contexts.
CR: ENGL 3190
PR: successful completion of at least 6 credit hours in English courses at the second-year level

3215 20th Century American Literature is study of American poetry and fiction from 1900 to 1960.
CR: ENGL 2217, ENGL 2218, the former ENGL 4260, the former ENGL 4261, the former ENGL 4270
PR: successful completion of at least 6 credit hours in English courses at the second-year level

3216 20th Century British and Irish Literature is a study of British and Anglo-Irish poetry and fiction from 1900 to 1960.
PR: successful completion of at least 6 credit hours in English courses at the second-year level

3245 The American Satirical Novel focuses on novels from the twentieth century to the present which examine from a satirical standpoint the vices, follies and shortcomings of American society, presenting critiques of issues such as race, gender, sexuality, education, employment, politics, religion, warfare, consumerism, technology, media, and celebrity.
CR: ENGL 3001
PR: successful completion of at least 6 credit hours in English courses at the second-year level. It is strongly recommended that students take ENGL 2243 prior to taking ENGL 3245

4248 Literary London explores the marking and shaping of the London landscape and English culture by literary figures and literature. Students will read selected texts from the eighteenth century onwards and study sites through films and virtual visits in order to map locations in and around London from the perspective of the texts and consider the way literary culture in England has evolved.
PR: successful completion of at least 6 credit hours in English courses at the third-year level

4302 Contemporary British Drama is a study of representative dramatic works of contemporary British drama.
PR: successful completion of at least 6 credit hours in English courses at the third-year level

4307 Contemporary Canadian Drama is a study of contemporary drama and performance in Canada, focussing on texts representative of Canada's cultural and regional diversity.
CR: ENGL 3156
PR: successful completion of at least 6 credit hours in English courses at the third-year level

13.10.4 Post-1900 Courses

2240 Forbidden Books is a study of texts that have been banned or prohibited for their allegedly offensive or subversive content.
PR: 6 credit hours in English at the 1000 level

2242 Science Fiction is a survey of Science Fiction from its earliest days to the present. Subjects that will be considered include the evolution of the genre, the relations among humans, technology and multinational capitalism, and the significance of memory and space.
CR: ENGL 2811
PR: 6 credit hours in English at the 1000 level

2243 Introduction to Humour in Literature begins with a survey of humour theories from antiquity to the present, and proceeds to a study of various forms and strategies of humour through a selection of works in English. Students will study texts exploring the roles that humour plays in relation to topics such as transgression, iconoclasm, class, sexuality, gender, ethnicity, culture, politics and religion.
CR: the former ENGL 2121
PR: 6 credit hours in English at the 1000 level

2244 The Graphic Novel - Historical, Cultural and Literary Contexts (same as Social/Cultural Studies 2244) examines the historical, cultural and literary impact of the Graphic Novel; investigates its continuing development; and introduces students to significant works within the genre.
CR: ENGL 3843, Social/Cultural Studies 2244
PR: 6 credit hours in English at the 1000 level; one of Folklore 1000, Anthropology 1031, or Sociology 1000

2245 Supernatural Fiction examines the evolution of the fiction of the supernatural as a distinct literary genre, focusing on writers who made significant contributions to the field.
PR: 6 credit hours in English at the 1000 level

2351 Introduction to Drama II is a survey of the major plays in the history of western drama from the 19th Century to the present.
CR: ENGL 2002
PR: 6 credit hours in English at the 1000 level

2850 What is Film? introduces students to the critical analysis of film, focusing on how its elements create style and meaning.
PR: 6 credit hours in English at the 1000 level

2851 Introduction to Film Form and Film Theory develops students' visual literacy and introduces film theories focused on, for example, reproduction technologies and cultures of spectatorship.
PR: 6 credit hours in English at the 1000 level

2870 Children's Literature is an introduction to literature written for children and young people. Beginning with an examination of the history of children's literature in the British Isles and North America, the course will focus on twentieth century and contemporary works, touching on a broad range of genres, audiences, and reading levels.
PR: 6 credit hours in English at the 1000 level

3275 Modern Drama (1830-1930) is a study of western drama and performance during the period 1830-1930, with a focus on theatrical and dramatic texts and movements, as well as artistic, social, political, technological, and philosophical influences.
CR: the former ENGL 3300, ENGL 4300
PR: successful completion of at least 6 credit hours in English courses at the second-year level

4245 Contemporary Fiction in English is an in-depth study of a selection of recent short fiction and novels in English. The focus will be on recent developments in American, British, Irish and Commonwealth fiction (excluding Canadian).
PR: successful completion of at least 6 credit hours in English courses at the third-year level

4246 Contemporary Poetry in English is an in-depth study of contemporary poetry in English. The focus will be on major poets and developments in the U.S.A., Britain, Ireland and the Commonwealth (excluding Canada) since 1945.
PR: successful completion of at least 6 credit hours in English courses at the third-year level

4247 The Art of Revolution: from the Romantics to Punk examines the relationship between literature and revolutionary moments in social and cultural history from the Romantic period to the present. Covering revolutionary aesthetic movements including Romanticism, Dadaism, Futurism, Modernism, Surrealism, Situationism, and Punk, the course will explore how these movements shaped and were shaped by their social and political contexts.
PR: successful completion of at least 6 credit hours in English courses at the third-year level

4305 Contemporary Drama is a study of modern and post-modern western drama and performance from 1930 to the present, with a focus on theatrical and dramatic texts and movements, as well as artistic, social, political, technological and philosophical influences. Recommended previous course: ENGL 3275.
CR: ENGL 4301, the former ENGL 3301
PR: successful completion of at least 6 credit hours in English courses at the third-year level

4308 20th Century American Drama is a study of American drama and performance from the turn of the century to the present, focussing on the theatre's historic role in the definition, reinforcement and scrutinizing of American mythology.
CR: ENGL 3260

13.10.5 Pre-1900 Courses

2211 The English Novel from 1800-1900 is a survey of representative texts from 1800- 1900.
CR: the former ENGL 2200
PR: 6 credit hours in English at the 1000 level

2215 American Literature to 1900 is a study of the historical origins and development of nineteenth century American Literature, concentrating on a selection of works within their political, social and artistic contexts. This course is also designated as a **Nationally-Identified Literatures Course**.
CR: the former ENGL 2214, 2216
PR: 6 credit hours in English at the 1000 level

2350 Introduction to Drama I is a survey of the major plays in the history of western drama from the Greeks to the end of the eighteenth century.
CR: ENGL 2002
PR: 6 credit hours in English at the 1000 level

3021 English Drama to 1580 is a study of the development of English drama from the Middle Ages to 1580. The course may also consider the popular arts, such as folk plays and mumming.
PR: successful completion of at least 6 credit hours in English courses at the second-year level

3130 The English Novel to 1800 is a study of eighteenth-century English novels by such authors as Burney, Defoe, Fielding, Manley, Richardson, Sterne and Smollett.
CR: the former ENGL 2210
PR: successful completion of at least 6 credit hours in English courses at the second-year level

3181 Drama of the Restoration and Eighteenth Century is a study of major dramatic texts from 1660 to the end of the eighteenth century.

PR: successful completion of at least 6 credit hours in English courses at the second-year level

4317 Elizabethan-Jacobean Drama is a survey of Shakespeare's dramatic rivals and the Elizabethan and Jacobean repertoires.
CR: ENGL 3022
PR: ENGL 3200 or ENGL 3201 and successful completion of at least 6 credit hours in English courses at the third-year level

13.10.6 Special Topics

4700-4730 Special Topics in Literary Studies is a variety of topics to be offered as resources permit.
PR: successful completion of at least 6 credit hours in English courses at the third-year level

4825-4835 Special Topics in Canadian Literature is a variety of topics to be offered as resources permit.

4836-4845 (Excluding 4843) Special Topics in Drama is a variety of topics to be offered as resources permit.
PR: successful completion of at least 6 credit hours in English courses at the third-year level

4861-4870 Special Topics in Modern Literature is a variety of topics to be offered as resources permit.

13.10.7 Women Writers

2750-2759 Special Topics in Women Writers will be offered by the English Program as resources permit.
PR: 6 credit hours in English at the 1000 level

2805 Women's Writing to 1900 is a study of writing by women in the British Isles and North America from the Middle Ages to 1900, including such items as letters and journals as well as fiction, poetry, and drama. This course is also designated as a **Pre-1900 Course**.
CR: ENGL 3830
PR: 6 credit hours in English at the 1000-level

3810 Non-Fiction Writing by Women after 1900 is a study of twentieth- and twenty-first century topical writing by women, including writing about social, political, and artistic, literary questions. This course is also designated as a **Post-1900 Course**.
CR: ENGL 3830.
PR: successful completion of at least 6 credit hours in English courses at the second-year level

13.11 English as a Second Language

011F Core Intensive English Program covers reading through a variety of types of texts, vocabulary development, writing development, and academic listening and note-taking skills.
AR: attendance is required
CH: 0

013F Core Intensive English Program covers reading, writing, speaking, listening, grammar and vocabulary development at an intermediate level through a variety of texts.
AR: attendance is required
CH: 0

014F Core Intensive English Bridge Program I covers reading, writing, speaking, listening, grammar and vocabulary development at a high-intermediate level through a variety of academic texts.
AR: attendance is required
CH: 0

015F Core Intensive English Bridge Program II covers reading, writing, speaking, listening, grammar and vocabulary development at an advanced level through a variety of academic texts.
AR: attendance is required
CH: 0

13.12 Environment and Sustainability

Environment and Sustainability courses are designated by ENSU.

The following number scheme is used to identify courses:
1st digit = year
2nd digit indicates specialization
0 = common
1 = Resource Management
2 = Environmental Studies
9 = Independent Research Project

1000 Introduction to Sustainability examines historical and contemporary models of resource management and decision making as well as the supporting theoretical basis for an interdisciplinary approach to natural resources that includes ecological, economic, social and political perspectives. Case studies will be presented from Newfoundland and Labrador, across Canada, and around the world.
CR: the former Environmental Studies 1000, the former Sustainable Resource Management 2000

2000 Introduction to Geographic Information Systems explores the structure, design, science, and applications of digital geospatial information and geospatial technologies. These include Geographic Information Systems (GIS), Global Positioning Systems (GPS) and Remote Sensing (i.e. 3S technology), and the Geoweb such as Google Earth, Location Based Services (LBS). Students will also gain exposure to hands-on exercise and analysis on the current GIS software.
CR: the former Environmental Studies 2000, Geography 2195
LH: 3
PR: Environmental Science 1000 or Earth Sciences 1002 or Geography 1050

2001 Introduction to Systems Thinking exposes students to complex system dynamics that challenge our understanding of environmental and resource management. It is designed to help students develop a systems' intuition for analyzing environmental and resource management problems and provide the skills needed to better understand complex interactions within and among natural and human systems. It covers the introduction of basic structure and behavior of systems and key interrelationships in social-ecological systems.
CR: the former Sustainable Resource Management 2001
PR: ENSU 1000

2200 Outdoor Pursuits - Fall introduces the theoretical rationale and practical skills needed to demonstrate basic proficiency in several of the following activities: minimal-impact camping, wilderness cooking, hiking, kayaking, canoeing, navigating with map and compass, outdoor safety, search and rescue, and group management. The major focus of this course will be the practical application of learned skills.
AR: attendance is required
CR: the former Environmental Studies 2210
OR: 3 hours of practicum per week

2201 Outdoor Pursuits - Winter introduces the theoretical rationale and practical skills needed to demonstrate basic proficiency in several of the following activities: navigating with map and compass, outdoor safety, search and rescue, group management, cross-country skiing, telemark skiing, downhill skiing, snowshoeing, winter camping, and winter survival techniques. The major focus of this course will be the practical application of learned skills.
AR: attendance is required
CR: the former Environmental Studies 2220
OR: 3 hours of practicum per week

3000 Human Dimensions of Resource Management explores how human attitudes and beliefs can be incorporated into resource and environmental management decisions and strategies. While this course will focus on the human aspects of resource and environmental management, it will also highlight the importance of integrating ecological dimensions into management efforts.
CR: Geography 3425
PR: ENSU 2001

3001 Application of Geographic Information Systems exposes students to the application of GIS in environmental and resource management through the use of real world, locally-relevant case studies. The topics cover spatial data acquisition, spatial data creation, spatial data interpolation, and simulation of the distribution of flow of mass, energy, goods, services, animals and people in a spatially-explicit manner. In addition to laboratory assignments, students will complete a major term project.
CR: the former Environmental Studies 3001, Geography 3260
LH: 3
PR: ENSU 2000

3100 Environmental Planning and Management has two simultaneous and complementary dimensions: planning and management. The "environment" in environmental planning and management plays out in two ways: inappropriate consumption, and appropriate site accommodation. In this course, we consider the broad context of environmental problems while focusing the planning toolkit on principles of sustainability. The course starts with a history of environmental contexts in North America, and then moves to the specifics of context. Case studies are widely employed.
CR: the former Sustainable Resource Management 3001
PR: ENSU 2001

3101 Analytical Approaches to Resource Management provides training in application of modelling approaches for entities ranging from single populations to interacting systems. These approaches will be used to understand population and ecosystem dynamics as well as harvester and market behaviour under various management scenarios.
LH: 3

PR: Biology 2600, ENSU 2001, Geography 3222 or 3 credit hours in statistics

4000 Integrated Approaches to Resource Management and Decision Analysis exposes students to approaches from natural and social sciences for natural resource management and decision making. Natural resource management involves decision making in a complex array of biophysical, social and economic environments consisting of the allocation of resources, formulation of policies, and manipulations of natural systems. The course presents methodological and practical aspects of planning and management using a case-based approach with regional, national and international perspectives.
PR: ENSU 3000 or permission of the Program Chair

4010 Seminar in Environment and Sustainability is a senior seminar in which selected environmental issues will be examined from several disciplinary perspectives.
CR: the former Environmental Studies 4010, the former Sustainable Resource Management 4010
PR: ENSU 3000 or permission of the Program Chair

4100 Remote Sensing discusses the physical principles on which remote sensing is based and the types of measurements being made. Understanding how remote sensors work at the conceptual level is the key to understanding the type of information that can be obtained. The topics covered include collection, manipulation and processing of remotely-sensed data, and the applications of these data in environmental and resource management.
CR: Geography 3250, the former Sustainable Resource Management 4000
LH: 3
PR: ENSU 3001

4200 Contemporary Issues in Environmental Studies provides a detailed, comprehensive investigation of selected environmental problems that could include the following issues: risk assessment, indigenous peoples' perspectives on the environment, energy policy, water governance, parks planning & management, political ecology, natural resource policy and administration, and environmental justice.
PR: ENSU 3000

4201 Environmental Assessment provides a thorough consideration of the environmental effects of a project and takes into account potential and probable impacts on the environment as well as people. Other areas of emphasis include cumulative impacts, socio-economic impacts, sustainability assessments, and Strategic Environmental Assessments of policies, plans, and programs.
CR: the former Environmental Studies 4000
PR: successful completion of 60 credit hours

4901-4910 Special Topics in Environment and Sustainability will have topics to be announced.
PR: enrollment in third or fourth year of the Bachelor of Environment and Sustainability Degree program

4950 Independent Research Project - Environmental Studies is a course that requires students to conduct independent research in environmental studies under the supervision of a faculty member. Students will prepare a major paper based upon their independent research.
CR: the former Environmental Studies 4950
PR: ENSU 3000, Geography 3222, Sociology 3040

4960 Independent Research Project - Resource Management is a course that requires students to conduct independent research in resource management under the supervision of a faculty member. Students will prepare a major paper based upon their independent research.
CR: the former Sustainable Resource Management 4950
PR: ENSU 3000, ENSU 3101, Geography 3222

13.13 Environmental Science

Environmental Science courses are designated by ENVS.

13.13.1 Environmental Biology

3110 Taxonomy of Flowering Plants is a study of the biodiversity of flowering vascular plants (Magnoliophyta) through the practical identification of Newfoundland families, genera, and species. Related taxonomic and biogeographical principles will be stressed.
CR: the formerBiology 3041
LH: 3 laboratory periods of integrated practice and theory
OR: Students must submit a collection of flowering plants identified to the species level. Detailed instructions should be obtained from the instructor in the spring/summer prior to the commencement of this course.
PR: Biology 2010 or equivalent; Science 1807 and Science 1808

3130 Freshwater Ecology is the study of freshwater ecosystems (lakes, rivers, streams, peatlands). Included are abiotic components, community structures, energy flow, biogeochemical cycles, and the evolution of natural and altered aquatic ecosystems. Emphasis will be placed on field and laboratory studies of the ecology of freshwater organisms and systems in western Newfoundland.
CR: BIOL 3630
LH: 3
PR: Biology 2010, Biology 2122, Biology 2600; one of Chemistry 1001 or the former Chemistry 1011; Science 1807 and Science 1808

3131 Impacted Terrestrial Ecosystems is an examination of ecological and evolutionary responses by organisms in terrestrial ecosystems to human-derived and natural perturbations. Advanced conceptual, empirical and experimental approaches will be used, with an emphasis on sampling local habitats.
CR: Biology 3610
LH: 3
PR: Biology 2600; two of Biology 2010, Biology 2122, Biology 2210 or permission of the Program Chair; Science 1807 and Science 1808

4132 Analytical Ecology provides a foundation in univariate and multivariate statistical procedures, and applies this understanding to the critical analysis of scientific literature dealing with community, ecosystem and landscape ecology.
LH: three-hour laboratory/discussion group
PR: Biology 2600, Statistics 2550 (or equivalent), and at least 9 credit hours in Environmental Science at the 2000 level or above, or permission of the Program Chair

4133 Conservation Biology will bring together the principles of ecology and conservation Biology at an advanced level. Current issues and techniques will be discussed with an aim towards understanding how populations of native flora and fauna can be managed for long-term conservation in the face of habitat degradation and loss.
CR: Biology 4650 and Geography 4650
LH: three-hour laboratory/discussion group
PR: two of ENVS 3110, 3130, and 3131; or permission of instructor; Science 1807 and Science 1808

4140 Environmental Science Field Course is a course providing practical experience in the observation, collection, identification and quantification of organisms and the various environmental parameters which affect them in pristine and disturbed habitats. Combinations of freshwater, marine and terrestrial habitats will be studied using techniques from various scientific disciplines. The actual combination of habitats, organisms, and techniques will vary from year to year.
PR: Biology 2600, Statistics 2550, with a minimum of 80 credit hours from Environmental Science Program (or equivalent) and permission of the instructor and Program Chair; Science 1807 and Science 1808

13.13.2 Environmental Chemistry

In accordance with Senate's *Policy Regarding Inactive Courses*, the course descriptions for courses which have not been offered in the previous three academic years and which are not scheduled to be offered in the current academic year have been removed from the following listing. For information about any of these inactive courses, please contact the appropriate Dean of the School.

2261 Survey of Environmental Chemistry provides an introduction to environmental problems, underlying chemistry and approaches to pollution prevention. Stratospheric chemistry and the ozone layer. Ground level air pollution. Global warming and the Greenhouse Effect. Toxic organic chemicals (TOCs), including herbicides, pesticides. Toxicology of PCBs, dioxins and furans. Chemistry of natural waters. Bioaccumulation of heavy metals. Energy production and its impact on the environment, including nuclear energy, fossil fuels, hydrogen.
PR: Chemistry 1001 or Chemistry 1051 or the permission of the instructor and Program Chair

3210 Environmental Analytical Chemistry I involves the treatment of data, error analysis, wet methods of analysis of laboratory and field samples. Volumetric methods for acidity, alkalinity and hardness; chemical and biological oxygen demand (COD and BOD). Gravimetric methods for sulphate and phosphates. Theory and application of specific ion electrodes analysis of metal ions, dissolved gases and halide ions. Turbidimetric and nephelometric measures of water quality. Spectrophotometric analysis of trace metal ions.
LC: not more than seven hours per week
LH: not more than seven hours per week
PR: Chemistry 2301 (or the former Chemistry 2300 or Chemistry 2302) and Chemistry 2210 ; Science 1807 and Science 1808

3211 Environmental Analytical Chemistry II discusses the theory and application of spectroscopic methods of analysis (including error analysis) of environmentally important compounds. Spectrophotometric, FTIR, light scattering, chromatographic (GC, GC/MS, HPLC), fluorescence, phosphorescence, atomic absorption and electroanalytical methods will be studied. Synthetic laboratory samples and field samples will be examined by

these techniques.
LC: not more than seven hours per week
LH: not more than seven hours per week
PR: ENVS 3210 (or equivalent); Science 1807 and Science 1808

3260 Industrial Chemistry examines chemical principles used in the manufacture of inorganic and organic chemical products; electrochemical, petrochemical, polymer, pulp and paper, agricultural, cement, cosmetics, detergent and paint industries. Processes, specific pollutants of current interest: inorganic (e.g. mercury, nitrogen oxides and sulfur oxides gases, lead etc.) and organic (e.g. PCBs, chlorinated hydrocarbons, freons, pesticides/herbicides). Industrial sources and analytical methods of detection will be studied.
PR: Chemistry 2210 and Chemistry 2401 or permission of the instructor and Program Chair

3261 Atmospheric Chemistry (same as Chemistry 3261) provides a comprehensive study of the chemistry of the Earth's atmosphere. Beginning with an overview of planetary atmospheres, we follow the evolution of the Earth's atmosphere until today. Atmospheric chemical processes are interpreted from the perspectives of chemical kinetics, chemical thermodynamics, molecular orbital theory, and molecular spectroscopy. The mechanisms of stratospheric reactions are studied in the context of the ozone layer, while those of the troposphere are linked to the so-called 'greenhouse effect' and aspects of pollution. The very different upper-atmosphere chemistry is also studied.
CR: Chemistry 3261
PR: Chemistry 2210 and Chemistry 2301 or permission of the instructor and Program Chair

4230 Aquatic Chemistry I introduces the thermodynamics and kinetics of model systems. Acids and bases (including buffer intensity and neutralizing capacity), dissolved gases, precipitation and dissolution. Metal ions in aqueous solution. Redox control in natural waters. Pourbaix diagrams. Regulation of chemical composition of natural waters, pollution and water quality.
LC: not more than seven hours per week
LH: not more than seven hours per week
PR: ENVS 3211 and one of Chemistry 2400 or Chemistry 2440 or permission of the instructor and Program Chair; Science 1807 and Science 1808

4239 Aquatic Chemistry II - inactive course.

4249 Environmental Organic Chemistry focuses on anthropogenic sources of organic chemicals and pollutants in the environment. Concepts of organic chemistry (synthesis, structure, physical properties, chirality, industrial organic processes), biological chemistry (enzymes, oxidative pathways) and physical chemistry (equilibria, partitioning) extended and applied to mass transport through soil, water and air. Kinetics and mechanisms of chemical, photochemical and biological degradation and conversion of organics. Structure-reactivity relationships for organic chemicals and degradation intermediates in the environment.
CR: Chemistry 4620
PR: ENVS 3260, ENVS 3261, ENVS 4230 or the permission of the instructor and Program Chair

13.13.3 Other Environmental Science

1000 Introduction to Environmental Science is an introduction to the study of the environment. Environmental principles, issues and problems will be described and placed in a historical and societal context.

2000 Sampling Methods in Environmental Science introduces students to common field and laboratory techniques and monitoring practices in environmental science, in an interdisciplinary manner. The importance of field sampling and equipment used in field and laboratory for environmental monitoring of aquatic and terrestrial systems will be the main focus, incorporating aspects of biology, chemistry and earth science. Modules will be a mixture of field work, laboratory work, and lectures.
PR: two of Biology 1002, Chemistry 1001, Earth Sciences 1000; or permission of Program Chair; Science 1807 and Science 1808

2360 Geological Hazards and Natural Disasters will introduce students to the geological aspects of the natural environment and the impacts that natural geological processes and phenomena may have on humanity. The impact of geological hazards and natural disasters on human society and behaviour will be examined through case studies.
CR: Earth Sciences 2916
PR: 18 credit hours or more

2369 Introduction to Soils provides a broad background knowledge about soils. Topics covered include: the origin of soils; physical, biochemical, and engineering aspects of soils; influence on humans and their food production; soil pollution and degradation; and management and conservation of soils.
PR: 18 credit hours or more

2370 Global Environmental Change is a survey of the Earth as a dynamic system. Discussion of interacting cycles that define the Earth's environment. Material cycles and energy concepts. Evolution of the atmosphere in response to lithospheric, biospheric and hydrospheric changes. Major global environmental changes from Earth's formation to present. Emphasis on self-regulating ability of the Earth system.
PR: 18 credit hours or more

2371 Oceanography - inactive course.

2430 Energy and the Environment considers energy, energy conversion, heat transfer, the laws of thermodynamics, nuclear processes and radiation. Practical problems such as the energy shortage, human influences on climate, resource extraction, nuclear power etc. will be discussed.
PR: Mathematics 1081 or Mathematics 1000; Physics 1021 or co-requisite Physics 1051

2450 Meteorology is an application of physics and mathematics to the study of the atmosphere. Atmospheric motion on the global, synoptic, meso- and micro-scales. An introduction to atmospheric radiation and thermodynamics, clouds and precipitation. Vertical soundings and the analysis and interpretation of surface and upper-air weather maps.
CO: Physics 1051 or prerequisite Physics 1021
PR: Physics 1021 or co-requisite Physics 1051

3000 Principles of Environmental Toxicology introduces students to the field of toxicology through the understanding of processes that include absorption, distribution, metabolism, and excretion of toxic substances; and provides an overview of the history and development of ecotoxicology. An emphasis is placed on contemporary examples of toxic substances and their effects on biological systems and the environment.
CR: the former ENVS 4240
PR: Biology 1002, Chemistry 2401 or Chemistry 2440, and ENVS 2000

3072 Comparative Marine Environments will investigate the physical, chemical, geological and biological characteristics of the major marine environments from the coastal zone to the abyss and from the equator to the poles. The objective of the course will be an integrated study of the parameters that define the various environments. Emphasis will be placed on the interaction of organism and environment. The influence of the environment on the form, function and behaviour or organisms and the influence of the organism in modification of the physical environment will be stressed.
PR: ENVS 2371

3470 Transport Phenomena is fundamentals of fluid flow. Conservation laws for mass, momentum, and energy. Dimensional analysis. Turbulence. Confined fluid flows. Fundamentals of heat transfer. Conduction, convention, and radiation. Diffusion, dispersion, and osmosis. Applications to transport of pollutants at the microscopic and macroscopic scale.
PR: Mathematics 1001, Physics 1020 and Physics 1021 or Physics 1050 and Physics 1051

4000 Environmental Science Seminar reviews current topics in environmental science and discusses in a seminar format. Seminars will be presented on current research and environmental issues by faculty, students and guest speakers from universities, government and industry.
PR: Environmental Science students who have completed 80 credit hours or more, to include Biology 2600, Statistics 2550 and one of Chemistry 2440, Chemistry 2401, Chemistry 2210, or the former Chemistry 2300 (or 2301).

4069 Fundamentals of Soil Systems is the physics, chemistry and Biology of soil, including inorganic soil components, chemistry of organic soil matter, soil equilibria, sorption phenomena on soils, ion exchange processes, kinetics of soil processes, redox chemistry of soils, soil acidity, saline and sodic soils, organic pollutants, trace and toxic elements in soils, soil organisms, organic matter cycling, nutrient cycling and fertility, soil conservation and sustainable agriculture.
LC: not more than six hours per week
LH: not more than six hours per week. The laboratory will cover a number of key physical, chemical and biological properties and procedures used in soil analyses. One or more field trips will be scheduled during laboratory sessions
PR: Biology 2600, Earth Sciences 1000, one of Chemistry 2210, the former Chemistry 2300, Chemistry 2301, Chemistry 2401, or Chemistry 2440, and 6 credit hours selected from Environment and Sustainability 2000 or the former Environmental Studies 2000, ENVS 2261, 2360, 2370, 2371, 2430, 2450, 3072, 3470. It is recommended that students complete at least 80 credit hours before registering for this course; Science 1807 and Science 1808.

4131 Environmental Restoration and Waste Management focuses on procedures aimed at restoring and rehabilitating ecosystems, with an examination of the interdisciplinary scientific basis underlying these procedures. The efficacy of management options, e.g. biomanipulation, microbial degradation and chemical treatments, involved in restoration and waste management will be evaluated. Applications and practical case studies of both aquatic and terrestrial ecosystems will be covered.
PR: Biology 2600, one of Chemistry 2210, the former Chemistry 2300, Chemistry 2301, Chemistry 2401, or Chemistry 2440, and 6 credit hours selected from Environment and Sustainability 2000 or the

former Environmental Studies 2000, ENVS 2261, 2360, 2370, 2371, 2430, 2450, 3072, 3470. It is recommended that students complete at least 80 credit hours before registering for this course.

4369 Environmental Hydrology provides quantitative and qualitative study of hydrological processes and functions under different environments. It explores natural and anthropogenic impacts on quality, quantity and distribution of water in different environments. Thus. the students will develop a balanced view of the hydrological processes and functions, will be able to understand the basic tenets of water cycle modeling and will be equipped to recognize the role and impact of water management on complex natural phenomena.
PR: Earth Sciences 1000, Mathematics 1000, and Physics 1020 or 1050 or permission of the Program Chair. It is recommended that students complete at least 75 credit hours before registering for this course.

4479 Groundwater Flow provides a quantitative approach to the occurrence, characterization, flow and modeling of groundwater systems. Thus, the students will acquire solid knowledge of the basic principles governing groundwater flow systems and their quantification of interest to environmental scientists and will help to develop a balanced view for sustainable development and management of groundwater systems.
CR: Earth Sciences 3610, the former 4610
PR: Earth Sciences 1000, Mathematics 1000, and Physics 1020 or 1050 or the permission of the Program Chair. It is recommended that students complete at least 75 credit hours before registering for this course.

4910-4930 Special Topics in Environmental Science are special topics courses in Environmental Science normally taken by students beyond the second year.

4950 Research Project in Environmental Science is a course, with the guidance of a faculty member, where students will conduct a scientific study based upon original research or a critical review of extant data in an appropriate area. Students are required to submit a report and give a presentation.
PR: permission of Program Chair; Science 1807 and Science 1808

4951 Honours Project in Environmental Science I is a course, under the guidance of a designated supervisor (or supervisors), where the student will prepare a thesis proposal including a comprehensive literature review of the subject of their Honours thesis. Students will present the results of their work in both written and oral form.
PR: restricted to Environmental Science students who have been accepted into the Honours option; Science 1807 and Science 1808

4959 Honours Research Project in Environmental Science II is a continuation of ENVS 4951 specifically for Honours students. Under the supervision of faculty member(s), students will carry out an original research project in environmental science. Students will present both a thesis and seminar on their research.
PR: ENVS 4951 and admission to the honours program; Science 1807 and Science 1808

13.14 Folklore

In accordance with Senate's *Policy Regarding Inactive Courses*, the course descriptions for courses which have not been offered in the previous three academic years and which are not scheduled to be offered in the current academic year have been removed from the following listing. For information about any of these inactive courses, contact the appropriate Dean of the School.

Folklore 1000 is the prerequisite for all other courses in Folklore, except Folklore 1050, Folklore 1060 and those courses cross-listed with other subject areas.

Folklore courses are designated by FOLK.

1000 Introduction to Folklore explores the role of tradition in communication, art and society. Reading assignments and audiovisual material will emphasize the use of folklore in context. Students will analyse traditions in their own lives through special assignments.
CR: the former FOLK 2000

1050 Folklore Studies - inactive course.

2100 Folklore Research Methods - An Introduction is designed to provide the basic introduction to the research resources, tools and methods regularly employed in the area of Folklore. On the one hand, the course will examine what types of Library and Archive resources can be useful to the folklorist and, on the other hand, it will explore how folklorists in fieldwork situations should handle people, and how they can capture for posterity a record of the interviews that they have conducted and the events that they have observed. It is strongly recommended that majors and minors take this course before taking 3000 and 4000 level courses.

2230 Newfoundland Society and Culture (same as Sociology/Anthropology 2230) is the Sociology and Anthropology of the Island of Newfoundland. The focus is on social and cultural aspects of contemporary island Newfoundland.
CR: Sociology/Anthropology 2230
UL: not applicable towards the Major or Minor in Anthropology

2300 Newfoundland Folklore (same as Anthropology 2300) is survey of the various types of Folklore: tale, song, rhyme, riddle, proverb, belief, custom, childlore and others, with stress on their function in the Newfoundland community culture. Individual collection and analysis of materials from the students' home communities, supplemented by data from the this University's Folklore and Language Archive.
CR: Anthropology 2300 and the former FOLK 3420
PR: FOLK 1000 or Anthropology 1031
UL: not applicable towards the Major or Minor in Anthropology

2401 Folklife Studies is an examination of the traditional cultures of Europe and North America with special reference to Newfoundland. A selection of the following areas will be covered: settlement patterns, architecture, work and leisure patterns in the folk community, calendar customs, rites of passage, folk religion, folk medicine, language and folk culture, folk costume, foodways and folk art.
CR: the former FOLK 3500

2500 Oral Literature from Around the World (same as Anthropology 2500) focuses on the analysis of folk literature, and may include the genres of narrative, poetry, song, drama, and speech from various countries and regions. Textual, comparative, and contextual methods of analysis will be introduced. All sections of this course follow International Studies guidelines available at www.mun.ca/hss/IS
CR: Anthropology 2500, the former English 3400, the former FOLK 3400, the former Sociology/Anthropology 3400
PR: FOLK 1000 or Anthropology 1031

2600 Regional Folklore - inactive course.

3130 Greek and Roman Mythology (same as Classics 3130) is a comparative study of specific myths and folktales of Greece and Rome as embodied in the literary and artistic remains of the ancient world with reference to their origins and their influence on later art and literature.
CR: Classics 3130

3200 Folksong is an introduction to the full range of traditional verse, song and music. Stress primarily on the songs of Canada, the United States and the British Isles, with attention to Newfoundland parallels. Examination of traditional vocal and instrumental styles as well as verse forms. Some reference to non-Western musical traditions. A knowledge of music is not a prerequisite.
CR: the former FOLK 2430

3300 Folk Drama is a survey of the main forms of traditional drama found in Great Britain and North America with reference to related European and non-western traditions. The origins, history and regional variations of these forms will be considered together with questions of social function, performance and aesthetics. The history of research in the area of folk drama will be examined along with related methodological and theoretical issues.

3450 Language and Play is an examination of such forms as the rhyme, riddle, proverb and proverbial saying, game, etc. Emphasis on problems of function and classification. Material will be chiefly from the British and North American traditions. Collecting will be encouraged.

3601-3620 Special Topic in Folklore will have topics to be studied announced by the School.

3850 Material Culture (same as Archaeology 3850) is an introduction to the study of material culture and the question of why objects are important to us. Using folklore and interdisciplinary approaches, we will look at objects as cultural products, question the influence of objects on behaviours, and address the role of objects in historical and ethnographic research.
CR: Archaeology 3850

3920 Folklore, Education and Community is intended to familiarize students with the function of Folklore in the educational process. Emphasis will be on cultural transmission, cultural learning and child training practices (including mechanisms of social control.) The relationship of formal to informal education will be examined with particular reference to Newfoundland.
CR: the former FOLK 3030 or the former FOLK 4475

3930 Folklore and Popular Culture is an introduction to the study of popular culture, the folk/popular continuum, and the role of folklore in media such as film, television, music, and art.
CR: the former FOLK 2400

4300 Folklore of Canada is an examination of a variety of Canadian folklore from historical, geographical and cultural perspectives. Emphasis will be placed upon the application of theories of Canadian culture to folklore studies. Questions of the role of folklore and folklife with respect to identity, ethnicity, multiculturalism, national literature, regionalism and similar issues

will be considered.
CR: the former FOLK 1020

4440 Music and Culture (same as Anthropology 4440, Music 4040, the former Music 4440) is traditional music as an aspect of human behaviour in Western and non-European cultures. Examination of the functions and uses of music; folk-popular-art music distinctions; and the relation of style to content. Outside reading, class exercises and individual reports will be required.
CR: Anthropology 4440, Music 4040, the former Music 4440
UL: not applicable towards the Major or Minor in Anthropology

4480 Oral History (same as History 4480) examines the narratives of everyday people who tell their life experiences. This course focuses on the collection and analysis of oral narratives and how they can be used to illuminate the past. It considers the power of these narratives to shape constructions of the present and future for both narrators and audiences.
CR: History 4480

13.15 French

Three consecutive credit courses in French language are available at the first-year university level, providing a complete overview of basic oral and written French. New students may choose to register initially in French 1500 or 1501; a diagnostic test is offered to assist students with initial course selection or to confirm that initial course selection is appropriate. Students with a limited background in French should register for French 1500 and continue with 1501. Students with a strong background in high-school French should bypass 1500 and begin their university study with 1501, especially if they intend to proceed beyond the first-year level. Very well prepared students may apply to the School for permission to enter 1502 directly. Bypassing one or more of these courses may enable students to include a larger number of advanced electives in their degree program. French 1500, 1501 and 1502 require three hours of instruction per week and two additional hours of language laboratory work or conversation class, or both.

French courses are designated by FREN.

1500 Introduction à la langue française, niveau universitaire I cours pour débutants et pour ceux don't les connaissances du français sont très faibles. La permission de s'inscrire à ce cours ne sera pas accordée à ceux qui ont complété le Francais 3202 (Immersion française au High School). Voir ci-dessus la note.
CR: l'autre des cours Français 1010 et 1011 (désormais supprimés)

1500 Introductory University French I is a course for beginners and for students whose background in French is very weak. Permission to register for this course will not be given to students who have completed Français 3202 (High School French immersion). See Note above.
CR: the former FREN 1010 or 1011

1501 Introduction à la langue française, niveau universitaire II Voir ci-dessus la note.
CR: et Français 1050 (désormais supprimé)
PR: High School French 3200 ou permission du chef du département. Les étudiants qui ont complété un programme d'immersion devraient consulter le chef du département avant de s'inscrire a ce cours.

1501 Introductory University French II See Note above.
CR: the former FREN 1050
PR: High School French 3200 or permission of the Head of the department. Ex-immersion students should consult the Head of the Department before registering for this course.

1502 Introduction à la langue française, niveau universitaire III Voir ci-dessus la note.
CR: et Français 1051 (désormais supprimé)
PR: 1501, ou la permission du chef de la division

1502 Introductory University French III See Note above.
CR: the former FREN 1051
PR: 1501, or by permission of the Dean of the School

2100 Français intermédiaire I rédaction, grammaire et pratique orale.
PR: Français 1502

2100 Intermediate French I is composition, grammar and practice in oral skills.
PR: FREN 1502

2101 Français intermédiaire II continuation du travail de rédaction, de grammaire et de communication orale.
PR: Français 2100

2101 Intermediate French II is further work in composition, grammar and oral skills.
PR: FREN 2100

2300 Phonétique introduction pratique à la phonétique du français. Emploi des symboles de l'alphabet phonétique, transcription phonétique et phonétique corrective.
PR: Français 1502 ou équivalent

2300 Phonetics is a practical introduction to French phonetics, including the International Phonetic Alphabet and phonetic transcription as well as corrective phonetics.
PR: FREN 1502 or equivalent

2601 Apprentissage de la lecture les étudiants exploreront des stratégies de lecture qui faciliteront la compréhension de textes divers. Ce cours sera normalement enseigné en français.
CR: Les étudiants ayant complété Français 2550 avec succès peuvent suivre Français 2601 ou Français 2602, mais pas les deux. Les étudiants ayant complété Français 2551 avec succès peuvent suivre Français 2601 ouFrançais 2602, mais pas les deux. Les étudiants ayant complété Français 2550 et Français 2551 avec succès ne peuvent suivre ni Français 2601 ni Français 2602.
PR: Français 1502 ou Français 2159, ou équivalent

2601 Reading Skills will explore reading strategies in a variety of texts in French. This course will normally be taught in French.
CR: Students who have successfully completed FREN 2550 may take either FREN 2601 or FREN 2602, but not both. Students who have successfully completed FREN 2551 may take either FREN 2601 or FREN 2602, but not both. Students who have successfully completed both FREN 2550 and FREN 2551 may not take either FREN 2601 or FREN 2602.
PR: FREN 1502, or FREN 2159 or equivalent

2602 Lecture de textes intégraux les étudiants exploreront des stratégies de lecture qui faciliteront la compréhension de textes intégraux. Ce cours sera normalement enseigné en français.
CR: Les étudiants ayant complété Français 2550 avec succès peuvent suivre Français 2601 ou Français 2602, mais pas les deux. Les étudiants ayant complété Français 2551 avec succès peuvent suivre Français 2601 OU Français 2602, mais pas les deux. Les étudiants ayant complété Français 2550 et Français 2551 avec succès ne peuvent suivre ni Français 2601 ni Français 2602.
PR: Français 1502, ou Français 2159 ou équivalent

2602 Reading Complete Texts will explore reading strategies in a variety of complete texts in French. This course will normally be taught in French.
CR: Students who have successfully completed FREN 2550 may take either FREN 2601 or FREN 2602, but not both. Students who have successfully completed FREN 2551 may take either FREN 2601 or FREN 2602, but not both. Students who have successfully completed both FREN 2550 and FREN 2551 may not take either FREN 2601 or FREN 2602.
PR: FREN 1502, or FREN 2159 or equivalent

2900 A Survey of Francophone Cultures places emphasis on oral comprehension and expression. This course is a prerequisite for FREN 3650-3651-3653.
CR: the former FREN 2500
PR: FREN 1502 or equivalent. Students who have obtained less than 70% in FREN 1051 are, however, advised to successfully complete FREN 2100 before attempting this course.

2900 Survol des cultures francophones met l'accent mis sur la compréhension et l'expression orales.

3100 Grammaire et analyse de textes révision des catégories nominale et verbale du français (morphologie, nombre, genre, temps, aspect, mode, voix). Analyse grammaticale et stylistique des textes avec un accent particulier sur l'emploi du verbe en français. Travaux d'expansion lexicale.
PR: Français 2101 ou Français 2160 et au moins un autre cours de français de niveau 2000

3100 Grammar and Textual Analysis is revision of the French noun and verb systems (morphology, number, gender, tense, aspect, mood, voice). Grammatical and stylistic textual analysis with special emphasis on the use of verbs in French. Vocabulary enrichment.
PR: FREN 2101 and 9 additional credit hours in French at the second-year level, or permission of the Head of the Department

3101 Stylistique et analyse de textes rôle et fonction des parties du discours; exploitation sémantique (synonymie, polysémie); tropes et figures de style. Analyse grammaticale et stylistique de textes avec un accent particulier sur ces phénomènes. Travaux d'expansion lexicale.
PR: Français 2101 ou Français 2160 et au moins un autre cours de français de niveau 2000

3101 Stylistics and textual analysis is role and function of the parts of speech in French; semantic enrichment (synonymy, polysemy); tropes and figures of speech. Grammatical and stylistic textual analysis with special

emphasis on these phenomena. Vocabulary enrichment.
PR: FREN 2101 or FREN 2160 and at least one other 2000-level course in French

13.16 Gender Studies

Gender Studies courses are designated by GNDR.

2000 An Interdisciplinary Introduction to Gender Studies (same as the former Women's Studies 2000) is an interdisciplinary introduction to the major concepts, issues and debates of Gender Studies.
CR: the former Women's Studies 2000

2001 Women and Science (same as Science 2001, the former Women's Studies 2001) is an investigation of: historical and contemporary contributions of women scientists, especially Canadians; different sciences and how they study women; and feminist and other perspectives on gender and science.
CR: Science 2001, the former Women's Studies 2001

3000-3010 Special Topics in Gender Studies (same as the former Women's Studies 3000 - 3010) has a range of special topics in Gender Studies.
CR: the former Women's Studies 3000 - 3010

4000 Contemporary Feminist Issues same as the former Women's Studies 4000) is an interdisciplinary seminar in Gender Studies that identifies emerging debates in contemporary feminism and analyses complex and contentious issues and how they intersect and disrupt social constructions of gender.
CR: the former Women's Studies 4000
OR: 3 hour seminar per week
PR: students must normally have successfully completed GNDR 3005 or the former Women's Studies 3005 or GNDR 3025 and 15 credit hours in other courses applicable to the Gender Studies Major and Minor programs before taking GNDR 4000. In exceptional cases, students without these prerequisites may be accepted, with the approval of the instructor of GNDR 4000 and the Head of the Department.

13.17 Geography

Geography courses are designated by GEOG.

1050 Geographies of Global Change provides perspectives on the major geographical challenges and changes facing the contemporary globe, including: climate and environmental change, sustainability, human development, economic globalization, cultural change, and population and migration. Using the integrative skills of geographical analysis, the course prepares students for advanced study in geography and citizenship in the modern world.
CR: the former GEOG 1000, the former GEOG 1001, the former GEOG 1010, and the former GEOG 1011

2001 Cultural Geography is an introduction to the study of culture in geography, emphasizing both the history of the field from classic studies of landscapes to contemporary scholarship and themes of recent importance. These include the relationship between nature and culture: imperialism and colonialism; place, identity, and power; and global cultures of commodities, media, and tourism.
PR: GEOG 1050, or the former GEOG 1001, or the former GEOG 1011

2102 Physical Geography: The Global Perspective is a study of form, process, and change in natural systems at and near the surface of Earth, viewed as human environment. Emphasis is on global and regional scales in the systematics study of climate, water, landforms and vegetation.
LH: 3
PR: GEOG 1050, or the former GEOG 1000, or the former GEOG 1011

2195 Introduction to Geographical Information Sciences is an introduction to the fields of cartography, remote sensing, and geographic information systems (GIS). Geographic information collection, representation and analysis methods are the topics for the course. An emphasis is given to the applications of maps and satellite images.
CR: ENSU 2000, the former Environmental Studies 2000

2302 Issues in Economic Geography are basic issues and ideas in economic geography. The development of a regional economy will be related to underlying economic, cultural and physical factors.
PR: GEOG 1050, or the former GEOG 1001, or the former GEOG 1011

2425 Natural Resources is an introduction to the concepts of natural resources, environment and conservation: the nature and distribution of natural resources; methods of use, allocation and development of natural resources and the role of various physical, social, economic, political and technological factors influencing decision-making about resources.
CR: the former 3325
PR: GEOG 1050, or the former GEOG 1001, or the former GEOG 1011

3222 Research Design and Quantitative Methods in Geography is an introduction to principles of research design, and to the use of quantitative techniques. This course provides students with a basic understanding of data collection, entry, and analysis and presentation skills most commonly used by geographers. Practical, computer-based exercises are an essential part of the course. It is strongly recommended that this course be successfully completed before registration in a 4000-level geography course.
CR: the former GEOG 2220
LH: 3
PR: GEOG 1050, or the former GEOG 1001, or the former GEOG 1011 and at least 9 credit hours from GEOG 2001, GEOG 2102, GEOG 2195, GEOG 2302, GEOG 2425.

3350 Community and Regional Planning and Development introduces students to regional planning and development theories, techniques and approaches. Understanding of networks of development actors at community and regional scales, methods of delineating regions, links between theory and practice in planning and development. Focus on Canadian experiences and a sustainable development perspective.
PR: GEOG 2302 or permission of the instructor

3900-3909 Special Topics in Geography will have topics to be studied announced.
PR: permission of the instructor and the Head

4405 Outdoor Recreational Resources and Planning is an introduction to the major themes and techniques in the study of outdoor recreation. A theoretical framework will provide a base for the evaluation of the complex issues involved in managing a physical resource for recreational purposes. North American examples will be emphasized.
CR: GEOG 4909
LH: 3
PR: GEOG 2425 or the former GEOG 3325. It is strongly recommended that GEOG 3222 and the former 3226 be successfully completed before registration in 4000-level courses

13.18 History

With the exception of 4000-level cross-listed courses, students are required to take 12 credit hours in History (in addition to History 1100/1101) or have permission of the Chair of the Historical Studies Program before enrolling in any 4000-level History course.

History courses are designated by HIST.

1100 Introduction to History I introduces students to working with historical materials and writing about the past. Students then will apply these skills to a study of the history of the Western world from the Renaissance and European colonialism up to and including the French Revolution, in a global context. The political, social, and cultural manifestations of Western history will be explored as well as the perspectives and condition of marginalized peoples.
CR: the former HIST 1000

1101 Introduction to History II refines students' ability to work with historical documents and to understand their significance in how we interpret the past. Students will explore the main contours of the history of the Western World from the Napoleonic period to the contemporary era. Students will learn about the range of historical experience, interaction and exchange between ethnicities and cultures, imperialism, war and revolution, national independence, human rights, gender and social life, environmental change, and globalization.
CR: the former HIST 1001

2034 History of the Hellenistic World (same as Classics 2020) is a survey of the history of the Mediterranean world and the Near East from the death of Alexander the Great in 323 BCE until the incorporation of the Kingdom of Egypt in the Roman Empire in 30 BCE. Particular attention is given to the influence of the new monarchies on political, social and cultural developments in both Greek and non-Greek communities.
CR: same as Classics 2020

2035 History of Classical Greece (same as Classics 2035) is a survey of Greek history from the Bronze Age to the death of Alexander the Great, with special reference to the social and political institutions of the fifth century BCE. Students will learn about the foundations of modern democracy and its responses to internal and external challenges.
CR: Classics 2035, HIST/Classics 2030 since 1985-86 or the former HIST/Classics 3910

2040 History of Rome (same as Classics 2040) is a survey of Roman history from the early monarchy to the reign of Constantine, with special reference to society and politics in the late Republic and early Empire.
CR: Classics 2040, HIST/Classics 3920

2100 Empires of the North Atlantic, 1500-1820 will examine European expansion across the Atlantic to North America, the attempt to take possession of that continent through commercial investment and colonies, and the way in which European colonies were transformed into new

societies.

2120 The History of Canadian-American Relations, 1783 to the Present is a survey of the major themes in the history of Canadian-American relations, from the American Revolution to the present. Emphasis will be placed on economic, social, political and cultural developments.

2200 Making Canada: Canadian History to 1867 is a survey of Canadian History to Confederation, 1867.

2210 Modern Canada: Canadian History Since 1867 is survey of Canadian History since Confederation.

2300 Early Modern European History, 1500-1789 is an introduction to the main issues and problems in early modern European History with an emphasis on the political, social, economic and cultural developments from the sixteenth through the eighteenth century.

2310 Europe in the Nineteenth Century, 1789-1914 is a survey of the economic, social, political and cultural developments of Europe from 1789-1914.

2320 Medieval Europe to the Eleventh Century (same as Medieval Studies 2001) is a survey of the economic, social, political and cultural developments of the early Middle Ages.
CR: the former HIST 2030, Medieval Studies 2001

2330 Medieval Europe Since the Eleventh Century (same as Medieval Studies 2002) is a survey of the economic, social, political and cultural developments of Europe in the high and late Middle Ages.
CR: the former HIST 2030, Medieval Studies 2002

2500 The Twentieth Century I is a study of the world-wide impact of the main events and developments in the age of global interdependence.
CR: the former HIST 3700

2510 Twentieth Century II is an historical analysis of the main issues in the contemporary world since 1945.
CR: the former HIST 3710

2540 Fascism and Resistance in the Twentieth Century will explore the history of fascism, and resistance to fascism, from its late nineteenth-century origins through the end of the Second World War.

2700 Art History Survey I (same as Visual Arts 2700) is the history of art from pre-historic times to the Renaissance.
CR: Visual Arts 2700

2701 Art History Survey II (same as Visual Arts 2701) is the history of art from the Renaissance to the 20th century.
CR: Visual Arts 2701

3030 Environmental History examines the history of human relationships to the natural environment. The focus of the course is the history of environmental changes caused by humans, and the influence of the natural environment on human cultures and societies. Case studies will focus on issues with broad relevance to contemporary environmental issues such as energy use, the environmental impact of military conflict, species introductions, natural disasters, urban sustainability, ecological restoration, and the origins of environmentalism.

3050 History of Warfare to 1789 is a survey of major developments in the history of warfare from the earliest times to 1789 with particular emphasis on changes in the nature and conduct of warfare, the evolution of military thinking, the organization of military and naval forces, the impact of technological change, the emergence of professionalism and the relationship between societies and armed forces.

3060 History of Modern Warfare since 1789 is an examination of those major developments which have affected the nature and conduct of warfare in the period since 1789, with particular emphasis on the evolution of military thinking, the impact of technology on organization and planning, the role of air power, the civil-military relationship, professionalism in the armed forces, and the changing nature of warfare: the emergence of total war, global war, guerilla warfare, and limited warfare.

3090 Alexander and the Macedonians (same as Classics 3090) investigates the impact of the conquests of Alexander the Great and his Macedonian Successors on the political, social, cultural, intellectual, and religious world of the Mediterranean and Near East between Alexander's accession in 336 and the battle of Ipsus in 301, when his vast empire was carved into Hellenistic kingdoms.
CR: Classics 3090

3102 Queer Histories in the Western World explores the social, cultural, and political history of sexual minorities in the West from the mid-nineteenth century to the present in order to demonstrate the ways in which sexuality has become central to identity formations.

3110 History of Newfoundland to 1815 is the growth of settlement and the manner in which a `migratory' fishery carried on from England and Ireland changed into a `sedentary' fishery carried on by residents of Newfoundland.

3120 Modern Newfoundland Since 1815 is the establishment and development of political institutions, changes in economic structure and the growth of populations.

3135 France in the Americas, 1500-1815 investigates the French presence mainly in New France, but also Newfoundland, Florida, Louisiana, the Caribbean, Acadia, Ile Royale, and Brazil, from the earliest voyages of exploration to the Anglo-French struggle for North America. This topic will be studied within the greater framework of the transplantation of a European society onto a different continent, delving also into various subject themes such as French-Indigenous relations, politics, and government, women and gender, and society in France and New France.

3250 Migration History of North America is a survey of migration to and within North America from the seventeenth to the twentieth century.

3320 Early Modern France, 1500-1789 is French history from 1500 to 1789, with a focus on such themes as the Renaissance, political and social change, gender history and the Enlightenment.
CO: 6 credit hours that have the initial digit '2'
PR: 6 credit hours that have the initial digit '2'

3330 France, 1750-1852 is the study of France from the decline of the Old Regime to the end of the Second Republic.

3370 German History I, to the Mid-Nineteenth Century examines the history of the peoples and states of the Holy Roman Empire of the German nation and the Germanic Confederation with emphasis on the origins of modern Germany.

3380 German History II, Since the Mid-Nineteenth Century examines the history of German-speaking central Europe with special reference to the evolution of modern Germany since the mid-nineteenth century.

3440 History of the British Empire and Commonwealth since 1815 is the transition from British Empire to Commonwealth of Nations.

3445 Witchcraft and the Witch-Hunts in Early Modern Europe is a history of witchcraft, demonology, and witch-hunts from 1400 to 1750, focusing on such themes as gender, the body and medical knowledge, religious dissidence, and popular culture.

3450 British History, 1485-1714 is the emergence of Britain under the Tudors and early Stuart monarchs.

3460 Modern Britain traces Britain's global ascendency in the eighteenth century to its 'decline' in the twentieth century, paying attention to the rise and fall of empire, Anglo- 'other' relations, class and gender conflicts, the formation of national identities, and Britain's relationship with the European Union. This course also examines Britain's enduring cultural legacy, the longevity and success of the welfare state, and Britain's continued position as a global political and economic power in the twenty-first century.

3490 History of Ireland Since the Great Famine is a survey of Irish history from the mid-nineteenth century to the present.
CR: the former HIST 3470

3520 Indigenous History to 1763 (same as Anthropology 3520 and Archaeology 3520) examines Indigenous history in North America, including the Innu, Inuit, Beothuk and Mi'kmaq, from before European contact to the Royal Proclamation in 1763. Particular attention will be paid to historical encounters framed by first contacts, cultural exchange, trade, disease, religious encounters, conflict and diplomacy, and territorial encroachment.
CR: Anthropology 3520 and Archaeology 3520

3525 Indigenous History from 1763 (same as Anthropology 3525 and Archaeology 3525) examines the history of Indigenous peoples in North America, including the Innu, Inuit, Beothuk and Mi'kmaq, from 1763 to the twentieth century. Particular attention will be paid to Indigenous-settler relations, including Indigenous policies, military encounters and diplomacy, expansion and removals, education, treaties, and politicization.
CR: Anthropology 3525 and Archaeology 3525

3551 Tudors, Historical Memory, and Film focuses on the dialogue between past and present as it plays out in the various film and historical representations of the Tudor period.

3675 Navies and Societies Since 1650 is an examination of the rise of modern navies since 1650 that places navies and naval decisions within broader national and international political, economic and social contexts.
CR: the former HIST 3822

3700 Art History: The Italian Renaissance (same as Visual Arts 3700) is an overview of the art and architecture of Renaissance Italy with an emphasis upon the historical context in which art was produced.
CR: Visual Arts 3700

3701 Art History: The Renaissance Outside Italy (same as Visual Arts 3701) is the Renaissance outside Italy from the late Fourteenth century and

the international style through the 16th century.
CR: Visual Arts 3701

3760 Women in Western Society and Culture I is a survey of major developments in the history of women from the fifteenth through the eighteenth centuries. The major themes addressed are: cultural and religious assumptions about women; demographic changes; women's work roles; women's participation in religious and political movements.

3770 Women in Western Society and Culture II are selected themes in the history of women in the modern period with a focus on cultural attitudes toward women, demographic trends affecting women, the impact of changing economic roles, and the development of feminism.
CR: the former HIST 3761

3786 Democracy in the American and French Revolutions contrasts these two Revolutions within the broader transnational framework of Atlantic World history in the eighteenth and early nineteenth centuries. Pertinent to this course is the exchange of ideas, peoples, and traditions between the French and American contexts. The course focuses on the discussions and development of human rights and democracy as well as the roles played by marginalized groups in these Revolutions.
CR: HIST 3330

3801 History of Modern Revolutions examines theoretical and thematic approaches to the study of revolution. The class will study some of the major political revolutions of the twentieth century and also explore the causes and consequences of various social, cultural, and economic upheavals such as the student revolts of the 1960s and the sexual revolution. There will be a discussion on how the way in which historians have studied revolutions has changed during the past half century.

3807 The World at War, 1914-18 examines one of the most important events in twentieth-century world history, the First World War, and the war's global impact on economics, society, culture, politics, and warfare. All sections of this course follow International Studies guidelines available at www.mun.ca/hss/IS.

3840 Historical Methods is an introduction to the methods and practices of history in the modern era. This course is compulsory for Honours students and recommended for Majors, including those intending to apply for graduate studies. For Historical Studies students at Grenfell Campus this course is required for all majors and minors.
CR: the former HIST 4801
PR: 12 credit hours in History including HIST 1100/1101 or permission of the instructor

4101 The Renaissance in Europe, 1400-1550 is a seminar on the Renaissance in Europe, particularly in Italy and northern Europe, focusing especially on its intellectual and cultural aspects but also the social and gender history of the topic.

4230 Special Topics in Newfoundland History I are specialized studies in the History of Newfoundland.

4231 Special Topics in Newfoundland History II are specialized studies in the History of Newfoundland.
CR: the former Political Science 4731

4254 Special Topics in Canadian History: A History of Social Welfare is a study of the broad theme of the state and social welfare in Canada. The course examines the origins of modern forms of social control as evidenced in the nineteenth century prison, the lunatic asylum, and the poorhouse. As well, the course compares Canadian and British and American social welfare institutions and policies, and traces their historical evolution into the twentieth century.

4320 Special Topics in European History: The British Empire, 1688 to the Present has a range of special topics.

4410-4430 (Excluding 4411, 4419, 4421) Historical Problems are specialized studies in historical problems.

4560-4570 Special Topics in Social and Intellectual History are specialized studies in social and intellectual history.

4730 Art History: Modern Art I (same as Visual Arts 4730) is an examination of the cultural, social, and political forces which, from 1750 to 1850, were to have a major impact on modernity and later modern art.
CR: Visual Arts 4730
PR: 6 credit hours in art history or permission of the chair of the Visual Arts Program

4731 Art History: Modern Art II (same as Visual Arts 4731) is an examination of the various cultural and social forces between 1850 and 1914 which shaped the rise of the Modern movement.
CO: 6 credit hours in art history or permission of the chair of the Visual Arts Program
CR: Visual Arts 4731
PR: 6 credit hours in art history or permission of the chair of the Visual Arts Program

4821 Reading Course is a directed reading course for Honours and selected students including those intending to apply for graduate studies. Readings will be taken from a list of significant works in History, the Humanities, and the Social Sciences.
PR: permission of the Program Chair

4950 Independent Project in Historical Studies will have students complete an independent research project under the supervision of a faculty member or members. Topics must have the approval of the Program Chair of Historical Studies.
CR: HIST 4951, HIST 4952
PR: HIST 3840 and 27 credit hours in other History courses

4951 Advanced Research Essay I is the preparatory course for the writing of the advanced research essay. Working under the supervision of an instructor, students will develop a knowledge of the scholarship in the chosen field and prepare a detailed essay proposal.
CR: HIST 4822; HIST 4950
PR: HIST 3840 and 24 credit hours in other History courses

4952 Advanced Research Essay II is a course in which students, working under the supervision of an instructor, will carry out the research essay proposal that they developed in HIST 4951, conducting the necessary historical research and analysis. Students will present their work in written and oral form.
CR: HIST 4950; HIST 4999
PR: HIST 4951

13.19 Human Kinetics and Recreation

Human Kinetics courses are designated by HKR.

3555 Outdoor Recreation Management is an overview of outdoor recreation practices in Newfoundland and Canada. This course will examine the management of resources, conservation education and practices, development for public use or exclusion; legislation related to management of risk; viability of facilities; national and provincial agencies; private commercial ventures; and future trends in management. Management strategies will form a major part of the course.
CR: the former RECR 3555 and the former PHSD 3550
UL: cannot be used as an elective towards the **Environmental Studies Major for Graduates of the Two-Year Adventure Tourism Diploma Program**

3565 Tourism/Commercial Recreation will examine behavioural factors influencing tourism; promotion of commercial recreation attractions; provincial strategies in travel and tourism; problems of leisure travel; stability of entrepreneurial ventures in tourism; and research and planning strategies relevant to commercial ventures.
CR: Tourism 1000, the former Tourism 2201, the former RECR 3565 and the former PHSD 3560

4555 Leadership and Supervision in Recreation is need, selection, training and supervision of leaders in recreation. Certification, standards and professional organizations. Evaluation of leadership - materials and methods used. Practical exposure to roles of both leader and supervisor through seminar and related fieldwork.
CR: the former RECR 4555 and the former PHSD 4550
UL: cannot be used as an elective towards the **Environmental Studies Major for Graduates of the Two-Year Adventure Tourism Diploma Program**

4575 Recreation Ethics, Issues and Trends will explore contemporary trends and issues identified by governments and recreation practitioners and the way in which these issues influence the delivery of leisure services.
CR: the former RECR 4575 and the former PHSD 4570

13.20 Humanities

Humanities courses are designated by HUMN.

1001 Humanities and the Contemporary World studies the interaction of traditional humanities disciplines and texts with contemporary conversations and practices in a range of popular art forms and cultural activities, such as music, books, films, television, video games, social media, etc. The course is a designated writing (W) course.

1002 Texts That Changed the World is a study of epochal or transformative texts, events and movements. The course examines how developments in the understanding of what it means to be human inform the intellectual, social and political world. The course is a designated writing (W) course.

2001 The Ancient World is a study of major cultural developments and achievements in art, literature, religion, philosophy, and science in the ancient Mediterranean during the period 4000 BCE to 400 CE. The course explores the great ancient civilizations of the Near East and their influence on the shaping of Greece, Rome, and subsequent Western culture and society. The course is a designated writing (W) course.

2002 Thought and Society in the Medieval World this course examines the development of medieval civilization through the consideration of thought, art, spirituality and politics. Medieval culture will be examined largely through primary texts centered on a series of key themes and historical-cultural watersheds. The course is a designated writing (W) course.

2010 Themes in Humanities (Multidisciplinary Seminar) is a seminar course in which a chosen broad theme of common interest to the Humanities, such as love, evil, God, war, sexuality, scepticism or others, will be considered through works selected from across the Humanities disciplines. The course is a designated writing (W) course.
CR: the former HUMN 3000

3001 The Early Modern Period is a study of the major cultural developments and achievements in art, literature, religion, philosophy, and science in Western Europe during the period 1450-1650. The course is a designated writing (W) course.

3002 The Modern World examines emerging conceptions of the modern self and its expression in philosophy, science, political revolution and constitution, visual art and literature during the period 1650-1850. The course is a designated writing (W) course.

3010 Interpretation and Method introduces students to central concepts and debates concerning the sorts of interpretation that distinguish Humanities as a discipline. Students gain familiarity with contemporary and historical approaches. The course is a designated writing (W) course.

3020 Humanities and the Environment is an examination of the human understanding of the natural world from the perspectives of the literary arts, the visual arts, and music and religion. It is a designated writing (W) course.

3021 East Meets West - Asian Traditions and the Humanities is an examination of the influence of Asian currents of thought in the West in literature, philosophy, the visual arts, music and popular culture. This is a designated writing (W) course.

3100-3109 Special Topics has a range of special topics in Multidisciplinary Humanities.

4001 The Postmodern World is a study of major developments in the evolution of culture, thought, arts, science, and beliefs in the Western world from the nineteenth century to the present day. The course is a designated writing (W) course.
PR: HUMN 1001, 1002 and at least 6 credit hours in other Humanities

4010 Authors, Events, and Texts is a seminar course which focuses on a single author, text or event of common interest to the Humanities. Discussion and interpretation of the specific subject chosen will be intensive and distinct from theme-oriented courses in Humanities. The course is a designated writing (W) course.
CR: the former HUMN 4000
PR: 60 credit hours with at least 9 credit hours in Humanities courses

4020-4029 Special Topics has a range of special topics in Humanities.
PR: HUMN 1001, 1002 and at least 6 credit hours in other Humanities

4950 Independent Project (Directed Research) will complete an independent research project under the supervision of a faculty member or members. Topics must have the approval of the Program Chair of Multidisciplinary Humanities.
PR: 60 credit hours with at least 12 credit hours in Humanities courses

13.21 Mathematics and Statistics

At most 9 credit hours in Mathematics will be given for courses successfully completed from the following list subject to normal credit restrictions: Mathematics 1000, 1005, 1031, 1050, 1051, 1052, 1053, 1080, 1081, 1090, 109A/B, 1150, 1151. Students who have already obtained credit for 6 or more Mathematics credit hours numbered 2000 or above are not permitted to register for Mathematics 1052 or 1053, nor can they receive credit for either of these courses.

At Grenfell Campus, students who have completed high school mathematics may enter directly into Mathematics 1052 or 1053. However, placement in other first-year mathematics courses is based upon a student's pre-requisite level of proficiency in mathematics as demonstrated in a manner that is acceptable to the School of Science and the Environment. This may be through a combination of credit and grades earned in recognized high school or undergraduate mathematics courses or through scores earned in the University's Mathematics Placement Test (MPT) or Calculus Placement Test (CPT), or recognized, standardized examinations such as International Baccalaureate (IB), Advanced Placement (AP), or the College Board's Subject Area Test in Mathematics Level I (SATM1) examinations. Students registering for first year mathematics courses online or through the St. John's Campus should consult the **Faculty of Science, Course Descriptions, Mathematics** for placement information.

Mathematics courses are designated by MATH and Statistics courses are designated by STAT.

1000 Calculus I is an introduction to differential calculus, including algebraic, trigonometric, exponential, logarithmic, inverse trigonometric and hyperbolic functions. Applications include kinematics, related rates problems, curve sketching and optimization.
CR: the former MATH 1081
LH: 1.5
PR: MATH 1090 or 109B or a combination of placement test and high school Mathematics scores acceptable to the School of Science and the Environment

1001 Calculus II is an introduction to integral calculus, including Riemann sums, techniques of integration and improper integrals. Applications include exponential growth and decay, area between curves and volumes of solids of revolution.
LH: 1.5
PR: MATH 1000 or the former MATH 1081

1052 Mathematics for Business covers topics which include elementary algebra and functions, sets, elementary probability, matrices, systems of equations, and linear programming.
CR: Math 1050 and Math 1051
LC: 4
UL: students who already have obtained credit for 6 or more Mathematics credit hours numbered 2000 or above are not permitted to register for this course, nor can they receive credit for it

1053 Classical Mathematics covers topics which include logic, permutations, combinations, mathematical systems, elementary number theory, and geometry.
CR: Math 1050 and Math 1051
LC: 4
UL: students who already have obtained credit for 6 or more Mathematics credit hours numbered 2000 or above are not permitted to register for this course, nor can they receive credit for it

109A and 109B Introductory Algebra and Trigonometry is a two-semester course which provides students with the essential prerequisite elements for the study of an introductory course in calculus, at a slower pace than MATH 1090. Topics include algebra, functions and their graphs, exponential and logarithmic functions, trigonometry, polynomials, and rational functions.
CR: if previously successfully completed or currently registered for MATH 1000, 1005 1001, 1090, the former 1080, or the former 1081
LH: 1.5
PR: a combination of placement test and high school Mathematics scores acceptable to the School of Science and the Environment

1090 Algebra and Trigonometry provides students with the essential prerequisite elements for the study of an introductory course in calculus. Topics include algebra, functions and their graphs, exponential and logarithmic functions, trigonometry, polynomials, and rational functions.
CR: if previously successfully completed or currently registered for MATH 1000, MATH 1001, 1005 109A/B, the former 1080, or the former 1081
LH: 1.5
PR: a combination of placement test and high school Mathematics scores acceptable to the School of Science and the Environment or the former MATH 104F

2000 Calculus III is an introduction to infinite sequences and series, and to the differential and integral calculus of multivariate functions. Topics include tests for the convergence of infinite series, power series, Taylor and Maclaurin series, complex numbers including Euler's formula, partial differentiation, and double integrals in Cartesian and polar coordinates.
LH: 1.5
PR: MATH 1001

2050 Linear Algebra I includes the topics of Euclidean n-space, vector operations in 2- and 3-space, complex numbers, linear transformations on n-space, matrices, determinants, and systems of linear equations.
PR: A combination of placement test and high school Mathematics scores acceptable to the Department or 3 credit hours in first year Mathematics courses.

2051 Linear Algebra II includes the topics of real and complex vector spaces, basis, dimension, change of basis, eigenvectors, inner products, and diagonalization of Hermitian matrices.
PR: MATH 1000 and MATH 2050

2090 Mathematics of Finance covers the following topics: simple and compound interest and discount, forces of interest and discount, equations of value, annuities and perpetuities, amortization schedules and sinking funds, bonds and other securities, contingent payments.

PR: MATH 1001

2130 Technical Writing in Mathematics is a project oriented course combining mathematical investigation and technical writing. By using computer programming, graphical and typesetting tools, students will explore mathematical concepts and will produce technical reports of professional quality. The latter will combine elements of writing and graphics to convey technical ideas in a clear and concise manner.
PR: MATH 1001 and Computer Science 1510 the former 1710 or the former 2710 or the former 2602 or Engineering 1020 or permission of the Chair of Computational Mathematics

2260 Ordinary Differential Equations I (same as the former MATH 3260) is direction fields, equations of first order and first degree, higher order linear equations, variation of parameters, methods of undetermined coefficients, Laplace transforms, systems of differential equations. Applications include vibratory motion, satellite and rocket motion, pursuit problems, population models and chemical kinetics.
CR: the former MATH 3260 or the former Engineering 3411
PR: MATH 2000

2320 Discrete Mathematics covers basic concepts of mathematical reasoning: logic and quantifiers, methods of proof, sets and set operations, functions and relations, equivalence relations and partial orders, countable and uncountable sets. These concepts will be illustrated through the congruence and divisibility of integers, induction and recursion, principles of counting, permutations and combinations, the Binomial Theorem, and elementary probability.
CR: the former Computer Science 2740, Electrical and Computer Engineering 4110, the former Engineering 3422 and the former Engineering 4424
PR: MATH 1001 or MATH 2050

2330 Euclidean Geometry is an introduction to Euclidean geometry of the plane. It covers the geometry of triangles and circles, including results such as the Euler line, the nine-point circle and Ceva's theorem. It also includes straight-edge and compass constructions, isometries of the plane, the three reflections theorem, and inversions on circles.
CR: the former MATH 3330
PR: MATH 2051 or 2320

2500 Statistics for Business and Arts Students covers descriptive statistics (including histograms, stem-and-leaf plots and box plots), elementary probability, random variables, the binomial distribution, the normal distribution, sampling distribution, estimation and hypothesis testing including both one and two sample tests, paired comparisons, correlation and regression, related applications.
CR: STAT 2550, the former STAT 2510, Psychology 2910, Psychology 2925 and the former Psychology 2900
LH: 1.5
PR: 3 credit hours in Mathematics or Statistics courses, or a combination of placement test and high school Mathematics scores acceptable to the School of Science and the Environment

2550 Statistics for Science Students is an introduction to basic statistics methods with an emphasis on applications to the sciences. Material includes descriptive statistics, elementary probability, binomial distribution, Poisson distribution, normal distribution, sampling distribution, estimation and hypothesis testing (both one and two sample cases), chi-square test, one way analysis of variance, correlation and simple linear regression.
CR: Engineering 4421, STAT 2500, the former STAT 2510, Psychology 2910, Psychology 2925 and the former Psychology 2900.
LH: 1.5
OR: Statistical computer package will be used in the laboratory, but no prior computing experience is assumed
PR: MATH 1000 or the former MATH 1081

3000 Real Analysis I covers the structure of the real numbers, sequences and limits, compactness, continuity, uniform continuity, differentiation, and the Mean Value Theorem.
CR: the former MATH 2001
LH: 1.5
PR: MATH 2000 and 2320

3132 Numerical Analysis I includes a discussion of round-off error, the solution of linear systems, iterative methods for nonlinear equations, interpolation and polynomial approximation, least squares approximation, fast Fourier transform, numerical differentiation and integration, and numerical methods for initial value problems.
CR: Computer Science 3731
LH: 1.5
PR: MATH 2000, MATH 2050, and Computer Science 1510 or the former 1710 or the former 2710 or the former 2602 or Engineering 1020 or permission of the Chair of Computational Mathematics

3202 Vector Calculus deals with functions of several variables. Lagrange multipliers, vector valued functions, directional derivatives, gradient, divergence, curl, transformations, Jacobians, inverse and implicit function theorems, multiple integration including change of variables using polar, cylindrical and spherical co-ordinates, Green's theorem. Stokes' theorem, divergence theorem, line integrals, arc length.
CR: Physics 3810
PR: MATH 2000 and MATH 2050

3240 Applied Graph Theory examines algorithms and complexity, definitions and basic properties of graphs, Eulerian and Hamiltonian chains, shortest path problems, graph colouring, planarity, trees, network flows, with emphasis on applications including scheduling problems, tournaments, and facilities design.
CR: the former Computer Science 2741
PR: MATH 2320

3320 Abstract Algebra is an introduction to groups and group homomorphisms including cyclic groups, cosets, Lagrange's theorem, normal subgroups and quotient groups, introduction to rings and ring homomorphisms including ideals, prime and maximal ideals, quotient rings, integral domains and fields.
PR: MATH 2320

3340 Introductory Combinatorics includes Topics such as distributions, the binomial and multinomial theorems, Stirling numbers, recurrence relations, generating functions and the inclusion-exclusion principle. Emphasis will be on applications.
PR: MATH 2320

3370 Introductory Number Theory is perfect numbers and primes, divisibility, Euclidean algorithm, greatest common divisors, primes and the unique factorization theorem, congruences, cryptography (secrecy systems), Euler-Fermat theorems, power residues, primitive roots, arithmetic functions, Diophantine equations, topics above in the setting of the Gaussian integers.
PR: MATH 2320

3410 Mathematical Statistics I is basic probability concepts, combinatorial analysis, conditional probability, independence, random variable, distribution function, mathematical expectation, Chebyshev's inequality, distribution of two random variables, binomial and related distributions, Poisson, gamma, normal, bivariate normal, t, and F distributions, transformations of variables including the moment-generating function approach.
CR: Statistics 2410
OR: one and a half hour tutorial period weekly
PR: MATH 2000

4132 Introduction to Optimization is an introduction to optimization, analytic methods for functions of one variable and for functions of several variables, classical maxima and minima, necessary and sufficient conditions, constrained optimization, equality and inequality constraints, Kuhn-Tucker conditions, introduction to the calculus of variations, linear programming, simplex algorithm.
PR: MATH 3202 and 2260 (or the former MATH 3260)

4160 Partial Differential Equations I covers two point boundary value problems, Fourier series, Sturm-Liouville theory, canonical forms, classification and solution of linear second order partial differential equations in two independent variables, separation of variable, integral transform methods.
PR: MATH 3202 and 2260 (or the former MATH 3260)

4242 Algorithms and Complexity is a study of the correctness and complexity of algorithms, with particular focus on algorithms important in mathematics. Topics may include sorting and binary search, string searching, integer multiplication and exponentiation, matrix multiplication, geometric problems such as closest pair of points and convex hull, probabilistic and approximative algorithms. This course discusses polynomial reductions and NP-completeness.
PR: MATH 3132 and 3240 and Computer Science 1510 or the former 1710 or the former 2710 or the former 2602 or Engineering 1020 or permission of the Chair of Computational Mathematics

4291-4299 Special Topics in Computational Mathematics is a variety of topics in Mathematics.
PR: permission of the Chair of Computational Mathematics

4305 Mathematical Logic starts with a brief overview of basic set theory, followed by an introduction to propositional and predicate logic and basics of model theory (models, theories, compactness theorem) and computability theory (computable and computably enumerable sets, first order arithmetic).
PR: MATH 2320 and 6 credit hours in Mathematics at the 3000-level or higher or permission of the Chair of Computational Mathematics

4340 Combinatorial Analysis continues most of the topics started in 3340 with further work on distributions, recurrence relations and generating functions. Generating functions are used to solve recurrence relations in two variables. Also included is a study of Polya's theorem with applications.
PR: MATH 2000 and 3340

4345 Advanced Graph Theory (same as the former MATH 4290) includes topics which may be chosen from matchings, factorizations, adjacency matrices, eigenvalues of graphs, strongly regular graphs, independent sets and cliques, cuts and connectivity, graph products, graph homomorphisms, edge colourings, domination, and graph searching.

CR: the former MATH 4290
PR: MATH 2051 and 3240

4950 Senior Project is a course in which, under the guidance of a faculty member, students conduct a scientific study based upon original research or a critical review of extant data in an appropriate area. Normally the project will have a computational component. Students are required to submit a report and give a presentation.
PR: permission of Program Chair

13.22 Philosophy

In accordance with Senate's *Policy Regarding Inactive Courses*, the course descriptions for courses which have not been offered in the previous three academic years and which are not scheduled to be offered in the current academic year have been removed from the following listing. For information about any of these inactive courses, please contact the appropriate Dean of the School.

Philosophy courses are designated by PHIL.

1002 Introduction to Philosophy (same as the former PHIL 1200) is a general introduction to the study of Philosophy both as a contemporary intellectual discipline and as a body of knowledge. It introduces philosophy's forms of enquiry, the nature of its concepts, and its fields (epistemology, logic, metaphysics, aesthetics, ethics, and political philosophy) by way of the critical study of primary works by major philosophers. Authors may include Plato, Aristotle, Aquinas, Descartes, Hume, Kant, Nietzsche, de Beauvoir, Arendt.
CR: the former PHIL 1200

1005 Philosophy of Human Nature (same as the former PHIL 1600, the former PHIL 1000) is an approach to philosophical thinking by way of analysis and critique of theories of human nature, classical and modern, and the world views associated with them. This course is of particular value to students interested in the Social Sciences and Humanities.
CR: the former PHIL 1000, the former PHIL 1600

2020 Epistemology (same as the former PHIL 2220) introduces philosophy by way of the question of the nature of knowledge. Is knowledge a possession or an activity? Is truth an illusion, a correspondence, or a form of coherence? What does it mean to 'hold a belief' or 'affirm a proposition'? Short classical texts form the basis of the works studied and may include Plato, Descartes, and Ayer.
CR: the former PHIL 2220

2030 Logic aims to improve the student's ability to formulate and evaluate arguments. At the end of the course, the student will have a thorough understanding of the essentials of argument, the rules of valid inference, and ways of proving the validity of good arguments and the invalidity of bad arguments. Open in any year to all students wishing acquaintance with basic logical skills.
CR: the former PHIL 2210

2050 Social and Political Philosophy is concerned with the social and political institutions and practices by which human life is organized. Historical and/or contemporary texts will be engaged to explore some of the following issues: What is the nature of political authority? What is the nature of freedom? What material and social conditions must be met in order for societies to be just? How are existing societies unjust, and how should that injustice be addressed?
CR: the former PHIL 3400

2100 Health Ethics (same as the former PHIL 2551) examines concepts of health and illness and their ethical implications.
CR: the former PHIL 2551, the former PHIL 2803

2130 Environmental Ethics (same as the former PHIL 2561, the former PHIL 2809) is a philosophical approach to issues in ecology. Topics may include historical and contemporary concepts of nature, technology, the ethical status of animals and the non-human, the application of traditional ethical paradigms to environmental issues, and the future of humanity in an age of climate change, ballooning human population, disappearing wilderness, and dwindling resources.
CR: the former PHIL 2561, the former PHIL 2809

2201 History of Ancient Philosophy (same as Classics 2701, the former Philosophy 2701, the former Philosophy 2701) introduces students to the origins of philosophy in the West. Topics include cosmology, metaphysics, physics, ethics, God, and the ancient ideal of philosophy as a 'way of life.' We will examine the texts and fragments of the most influential and foundational philosophers of the ancient world, focusing primarily on the thought of Plato and Aristotle, their engagement with the Pre- Socratic philosophers who came before them, and their influence upon philosophers since.
CR: Classics 2701, the former Philosophy 2701

2215 History of Modern Philosophy same as the former PHIL 2702) is a survey of the development of Western philosophy since the 17th century until the late 18th century. Topics may include the existence of God, whether nature is determined and if there is free will, the rise of early modern science, and the debates over rationalism and empiricism.
CR: the former PHIL 2702

2310 Philosophy and Literature engages philosophically with different literary forms such as poetry, drama, and fiction. Possible topics include the use of literary works to express philosophical ideas, the nature of literary expression, and different traditions of literary criticism and interpretation. Course readings will comprise both literature and philosophy.
CR: the former PHIL 3610

2340 Philosophy of Film (same as the former PHIL 2581) introduces some of the central philosophers, topics and themes in the philosophy of film. Topics and themes include: the nature of film image, the relationship between film and "reality", the social/ political role and function of film and the nature and value of the documentary. The course will also consider the representation of broader philosophical ideas in film. A film or films will accompany each section.
CR: the former PHIL 2581

3010 Plato (same as the former PHIL 3730) examines Plato's philosophy from selections representing the Socratic, transitional, eidetic, and stoichiological dialogues, as well as Plato's philosophy of the concrete. Plato's thought will be examined as a development of ideas and problems raised in Pre-Socratic philosophy, and the development of his own philosophy will be traced throughout a selection of his writings.
CR: the former PHIL 3730
PR: 6 credit hours in Philosophy courses at the 1000 or 2000 level

3020 Aristotle (same as the former PHIL 3734) examines Aristotle's philosophy of nature, logical works, metaphysics, psychology, and ethics. Attention will also be given to Aristotle's philosophy as a development of and response to Plato's thought. Whether one is a student of Philosophy, History, English, Religion, Classics, Political Science or History of Science, a familiarity with the thought of Aristotle is indispensable. For all these disciplines, not only is his place in history foundational, but his influence often remains formidable today.
CR: the former PHIL 3740
PR: 6 credit hours in Philosophy courses at the 1000 or 2000 level

3310 German Idealism (same as the former PHIL 3860) is a study of post-Kantian classical German philosophy from 1787-1831. The generation of philosophers immediately following Kant - most notably Fichte, Schelling, and Hegel - took his ideas and developed systematic interpretations of human experience, emphasizing its embodied and social nature, and interpreting history in terms of the struggle between freedom and oppression. This course studies these "German Idealists" who have continued to shape major developments in European philosophy.
CR: the former PHIL 3860
PR: 6 credit hours in Philosophy courses at the 1000 or 2000 level

3400 Political Philosophy is leading philosophical ideas concerning the origin and justification of political institutions.

3430 Existentialism (same as the former PHIL 3940) is a philosophical tradition dedicated to thinking through the experience of human freedom and to casting doubt on conventional answers to the question of how we should live. Human beings are free to define themselves, according to existentialism, but with that freedom comes a forbidding challenge: the responsibility to define themselves, without any easy answers to the question of how. This course will address some of the central figures associated with existentialism. Authors may include Nietzsche, Kierkegaard, Sartre, de Beauvoir, and Camus.
CR: the former PHIL 3940, the former PHIL 3980
PR: 6 credit hours in Philosophy courses at the 1000 or 2000 level

3610 Philosophy and Literature is a study of the interrelationship of thought and imagination in philosophical and literary forms of writing.

4000 Seminar in Metaphysics (same as the former PHIL 4250) focuses on a primary text or texts surrounding a particular metaphysical question. Topics may include: the nature of being, causality, order, unity, essence and existence, and freedom.
CR: the former PHIL 4250
PR: 6 credit hours in Philosophy courses at the 1000 or 2000 level

4100-4199 Special Topics in Major Authors and Texts (same as the former PHIL 4700-4790, the former PHIL 4800-4890) will have topics to be studied announced by the Department.
CR: the former PHIL 4700-4790, the former PHIL 4800-4890
PR: 6 credit hours in Philosophy courses at the 3000 level

13.23 Physics

In accordance with Senate's *Policy Regarding Inactive Courses*, the course descriptions for courses which have not been offered in the previous three academic years and which are not scheduled to

be offered in the current academic year have been removed from the following listing. For information about any of these inactive courses, please contact the Head of the Department.

Physics courses are designated by PHYS.

1020 Introductory Physics I is an algebra-based introduction to Newtonian mechanics. Topics covered include motion in one and two dimensions, Newton's laws, momentum, energy and work, and rotational motion. Previous exposure to physics would be an asset but is not essential.
CO: Mathematics 1090 or 109B
CR: PHYS 1050
LH: 3; six laboratory sessions per semester
OR: tutorial or problem sessions may be held on weeks when no laboratory is scheduled
PR: Level III Advanced Mathematics or Mathematics 1090 or 109B. It is recommended that students have completed at least one high school physics course; and Science 1807 and Science 1808.

1021 Introductory Physics II is an algebra-based introduction to oscillations, fluids, wave motion, electricity and magnetism, and circuits.
LH: 3; normally there will be six laboratory sessions per semester
OR: tutorial sessions may be held on weeks when no laboratory is scheduled
PR: PHYS 1020 or 1050, and Science 1807 and Science 1808

1050 General Physics I: Mechanics is a calculus-based introduction to mechanics. The course emphasizes problem solving, beginning with a review of vectors and one-dimensional kinematics. The main part of the course covers motion in two dimensions, forces and Newton's Laws, energy, momentum, rotational motion and torque, and finally oscillations. For details regarding recommendations for students taking PHYS 1050, see **Physics and Physical Oceanography, Note 4**.
CO: Mathematics 1000
CR: PHYS 1020
LH: 3
PR: Mathematics 1000; Science 1807 and Science 1808

1051 General Physics II: Oscillations, Waves, Electromagnetism is a calculus-based introduction to oscillations, wave motion, and electromagnetism. Topics include: simple harmonic motion; travelling waves, sound waves, and standing waves; electric fields and potentials; magnetic forces and fields; electric current and resistance; and electromagnetic waves.
CO: Mathematics 1001
LH: 3
PR: PHYS 1050, or 1021, or 1020 (with a minimum grade of 70%) and Mathematics 1001; Science 1807 and Science 1808

2053 Fluids and Thermal Physics examines elasticity, fluid mechanics, thermodynamics, kinetic theory and statistical mechanics.
CO: Mathematics 1001 and PHYS 1051
LH: 3
PR: Mathematics 1001 and PHYS 1051; Science 1807 and Science 1808

2056 General Physics VI: Modern Physics is special relativity, quanta of light, atomic structure and spectral lines, quantum structure of atoms and molecules, nuclei and elementary particles.
CO: Mathematics 1001 and PHYS 1051
CR: PHYS 2750
LH: 3
PR: Mathematics 1001, PHYS 1050 (or PHYS 1020 and PHYS 1021), and PHYS 1051; Science 1807 and Science 1808

2065 Experimental and Computational Physics - inactive course.

2150 The Foundation of Astronomy represents a general introduction to astronomy. The course emphasizes the scientific method, basic physics, night sky and objects in our solar system. Topics include space science, telescopes, spectroscopy, atomic structure, the formation and evolution of planetary systems, and the detection and properties of exoplanets.

2151 Stellar Astronomy and Astrophysics is atomic structure and spectra. The sun: radiation, energetics, magnetic field. Stars: distance, velocity, size, atmospheres, interiors. Variable stars, multiple stars, clusters and stellar associations. Stellar evolution, interstellar matter, structure of the Milky Way Galaxy. Exterior galaxies, quasi-stellar objects, pulsars. Cosmology.
PR: 6 credit hours in Mathematics at the first year level

2400 Subatomic Physics is an introduction to nuclear and particle physics. Topics include nuclear properties and models; radioactive dating; fission; nuclear reactors; accelerators; the detection, classification, and properties of subatomic particles. Applications in areas such as ecology, dosimetry, medical physics and nuclear astrophysics are discussed.
PR: Level III Advanced Mathematics or Mathematics 1090 or 109B. It is recommended that students have completed at least one of Level II and Level III high school physics courses.

2553 Introduction to Analog and Digital Electronics covers the basics of the analog and digital electronics; direct current circuits, capacitors and inductors, alternating currents, test equipment and measurement, transducers, diodes and transistors, introduction to operational amplifiers, digital basics, digital circuitry and digital analog I/O. This course is a combined lecture/laboratory course with two three-hour sessions scheduled per week.
PR: Mathematics 1000 or equivalent, PHYS 1021 or 1051; Science 1807 and Science 1808

2820 Computational Mechanics introduces computational methods in the context of Newtonian mechanics. Numerical differentiation and integration, numerical solutions to differential equations and data analysis are applied to projectile motion, N-body systems, oscillations and problems from astrophysics and geophysics. Implementation of numerical methods using computer programming is emphasized.
CO: Mathematics 2000
LH: 2
PR: Mathematics 2000 and PHYS 1051

3060 Electricity and Magnetism is point charges; Coulomb's law; electrostatic field and potential; Gauss' law; conductors; magnetostatics; Ampere's law; Biot-Savart law; dielectric and magnetic materials; electrostatic and magnetostatic energy; Lorentz force; time varying fields; Faraday's law; Lenz's law; Maxwell's equations.
CO: Mathematics 2260 (or the former Mathematics 3260)
LH: 3
PR: PHYS 1051 and Mathematics 2260 (or the former Mathematics 3260); Science 1807 and Science 1808

3061 Electromagnetic Theory includes Maxwell's equations, energy and momentum in electromagnetic systems, EM waves, potentials and fields, dynamical systems of charges, radiation, the interaction of EM fields with matter, and the relativistic formulation of electromagnetism and its applications.
PR: PHYS 3060

3160 Stellar and Galactic Astronomy is the physics and mathematics of stars and galaxies. Orbits and the two-body problem, radiation and matter, theory of stellar atmospheres, structure and evolution of stars. Galaxies: Morphology and kinematics. Milky Way kinematics and structure, large-scale star formation, the distribution of interstellar matter in galaxies. Starburst and active galaxies. An introduction to cosmology.
CR: PHYS 3150 and PHYS 3151
PR: Mathematics 2000, PHYS 2056, PHYS 2151. PHYS 3220 is recommended.

3180 Observational Astrophysics covers theoretical topics including celestial mechanics, continuous and line spectra, stellar structure and nucleosynthesis, and stellar evolution. Observational topics include planning observations, acquisition of images with a CCD electronic camera, fundamentals of astronomical image processing, photometry, and stellar spectroscopy using a variety of software packages.
LH: 3
PR: Mathematics 2000, PHYS 2056. PHYS 2151 is recommended.

3220 Classical Mechanics I covers vector operations, coordinate transformations, derivative of vectors, Newton's laws, differential equations, kinematics and dynamics of a particle, linear and quadratic air resistance, terminal velocity, momentum of a time varying mass, center of mass systems, angular momentum, moment of inertia, energy, work-energy theorem, forces as the gradient of potential energy, time dependent potential energy, curvilinear one-dimensional systems, energy of a multiparticle system, calculus of variations, and Lagrangian Dynamics.
CO: PHYS 2820, Mathematics 2260, Mathematics 3202
PR: PHYS 2820, Mathematics 2260, Mathematics 3202

3230 Classical Mechanics II covers noninertial frames of reference, Newton's second law in a rotating frame, centrifugal force, Coriolis force, motion of rigid bodies, center of mass, rotation about a fixed axis, rotation about any axis, inertia tensor, Euler's equations with zero torque, coupled oscillators, chaos theory, bifurcation diagrams, state-space orbits, Poincare sections, Hamiltonian dynamics, ignorable coordinate, phase-space orbits, Liouville's theorem, scattering angle, impact parameter, differential scattering cross section, and Rutherford scattering.
PR: PHYS 3220, Mathematics 2260, Mathematics 3202

3250 Elementary Particles and Fields includes the Standard Model, classification of elementary particles and forces of nature, symmetries, conservation laws, quark model, quantum electrodynamics, quantum chromodynamics, and the theory of weak interactions.
PR: Mathematics 3202, PHYS 3650

3400 Thermodynamics covers the first and second laws of thermodynamics. Entropy. Thermodynamics of real substances. Kinetic theory of matter. Introduction to statistical mechanics.
PR: Mathematics 2000, PHYS 2053 and PHYS 2750 or 2056

3650 Quantum Mechanics I includes a review of elementary quantum physics and covers topics such as wave functions, operators, expectation values, the Schrödinger equation in one dimension, states and operators in

Hilbert space, coordinate and momentum representations, quantum mechanics in three dimensions, angular momentum, spherically symmetric potentials, and approximation methods.
CO: Mathematics 3202
PR: Mathematics 2260, Mathematics 3202, PHYS 2056

3820 Mathematical Physics I focuses on applications of mathematical techniques to solve problems in physics. Vectors, vector calculus, matrices and tensors, coordinate systems and transformations, and summation notation are reviewed. Topics in complex numbers, functions and calculus are introduced, including branch cuts, differentiation, integration, Cauchy formula, series, residue theorem, and the gamma function. Other topics include differential equations using series solutions and separation of variables, and Fourier series of real and complex functions.
PR: Mathematics 2260 (or the former Mathematics 3260), Mathematics 3202

4100 Senior Physics Seminar is a review of current topics in Physics discussed in a seminar format. Seminars are presented by faculty, students, and guest speakers. Topics are normally drawn from the fields of sub-atomic & nuclear physics or astronomy & cosmology.
PR: normally restricted to Physics students who have completed 78 credit hours or more

4880 Physics Laboratory introduces the student to advanced laboratory work in several areas of physics.
PR: Physics students who have completed 60 credit hours or more; Science 1807 and Science 1808

4950 Research Experience in Physics is an opportunity for students to participate in original research under the supervision of a faculty advisor. Students are required to present a written report and to give a seminar on their work.
PR: Physics students who have completed 78 credit hours or more and permission of the Physics Program Chair

13.24 Political Science

In accordance with Senate's *Policy Regarding Inactive Courses*, the course descriptions for courses which have not been offered in the previous three academic years and which are not scheduled to be offered in the current academic year have been removed from the following listing. For information about any of these inactive courses, please contact the Head of the Department.

Political Science courses are designated by POSC.

The second digit in each course number designates a field in Political Science. Students interested in notionally concentrating in an area may be guided in their course selections, as follows:

Second Digit

0 General & Research techniques
1 Political theory
2 International politics
3 Comparative politics
6 Public policy and public administration
8 Canadian politics
9 Special topics

1000 Introduction to Politics is an introduction to basic concepts in the study of politics, power, law, public policy and government, touching on major areas of political ideologies, institutions, and current domestic and international political issues. Suitable for students in all disciplines.

1010 Issues in Canadian Politics and Policy explores some of Canada's most pressing and interesting political and public policy issues. This course profiles important political problems facing federal and provincial politicians and society. Open to all students interested in Canadian politics, government and domestic public policy.

1020 Issues in World Politics explores some of the world's most pressing and interesting political issues. This course profiles important political problems, such as a power struggle within a particular country, a controversial topic that affects an entire continent, or a major crisis that has implications for inhabitants around the world. Suitable for students in all disciplines who have an interest in international politics.

2200 Introduction to International Politics is an examination of the "building blocks" of international politics including determinants, means, processes and ends. Emphasis is on the post-1945 period.

2300 Introduction to Comparative Politics is an introduction to comparative politics and techniques of comparative analysis across political jurisdictions. This course focuses on the differences between, and similarities among, a variety of countries and systems of government.

2500 Introduction to Political Behaviour - inactive course.

2600 Introduction to Public Policy and Administration outlines major concepts in, and issues relating to, the fields of public policy and administration. Introduces students to major conceptual issues that shape public policy and government, such as agenda setting, types of public policy models and public management processes. Open to all students interested in the study of public policy and public administration.

2800 Introduction to Canadian Politics and Government is an introduction to the structure and operations of institutions of Canadian government and the nature of political actors. Topics to be examined may include the constitution, federalism, parliament, political parties, political culture and elections.
CR: the former POSC 2710

3351 Politics and the Environment (same as the former POSC 3550) is an examination of the environmentalist movement, interest groups, and green parties; the impact of environmentalism on conventional parties and public opinion; and the dynamics of support for and opposition to the achievement of environmentalist objectives.
CR: the former POSC 3550

3631 Environmental Policy (same as the former POSC 3731) is an examination of the formation, implementation, and impact of public policies concerning the environment including an examination of different policy approaches and the problems of environmental regulation.
CR: the former POSC 3731

13.25 Psychology

Psychology 1000 and Psychology 1001 are prerequisites for all Psychology courses.

1000 and 1001 Introduction to Psychology is an introduction to Psychology as a biological and social science. Topics shall include research methodology, physiological processes, perception, learning, memory and cognition, human development, animal behaviour, emotion, motivation, consciousness, personality and individuality, psychological disorders and treatment, and social psychology.
PR: Psychology 1000 is a prerequisite for Psychology 1001

2925 Research Methods and Data Analysis in Psychology I will cover basic research methods and supporting statistical concepts and techniques. Basic methods will include observational techniques, correlational studies, and surveys. Supporting statistical concepts will include populations and samples, measures of central tendency and variability, basic probability, correlation, simple linear regression and validity and reliability. Supporting statistical techniques will include producing tables and graphs, and the calculation and interpretation of measures of central tendency, variability, probabilities, correlation, and simple linear regression. Students will also learn how to write a description of a simple study in basic APA style, and how to use a statistical package to analyse surveys and calculate correlation. Basic ethical principles in conducting research will be introduced. This course includes a weekly laboratory.
CR: Psychology 2910, Statistics 2500, Statistics 2550, the former Psychology 2900, and the former Statistics 2510
LH: 3

2950 Research Methods and Data Analysis in Psychology II will cover basic experimental methods and supporting statistical concepts and techniques. Basic designs will include one factor designs (independent and repeated measures). Supporting statistical concepts will include statistical sampling distributions (t and F), internal and external validity, hypothesis testing, and simple interactions. Supporting statistical techniques will include independent and repeated measures t-tests, one-factor independent and repeated measures ANOVA, and selected multiple comparisons techniques. Students will also learn how to write a description of an experiment in APA style, how to critically analyse a report of an experiment, how to use and interpret a statistical package to analyse experimental data, and how to conduct literature searches.
CR: the former Psychology 2901, Psychology 2911, Statistics 2501, and Statistics 2560
LH: a weekly laboratory
PR: Psychology 2925 or equivalent

3950 Research Methods and Data Analysis in Psychology III will cover advanced research methods, including survey methods, and supporting statistical concepts and techniques. Designs will include single factor designs and multi-factor designs with both random and fixed factors. Supporting statistical concepts will include analysis of variance (ANOVA) from a linear model perspective, statistical power, and multiple regression, including model building. There may be a general introduction to multivariate statistical techniques. Ethical issues in research will be discussed in detail. Students will be required to design and carry out at least one research project from the design to the writeup stage, including an ethics review.
CR: Psychology 3900, Statistics 3520, the former Psychology 3520
LH: a weekly laboratory
PR: Psychology 2950 or equivalent

13.25.1 Survey Courses

2025 Survey of Developmental Psychology is a survey of the cognitive, social, and personality development of people. Development will be tracked from the prenatal stage to old age. Topics to be studied shall include: research methodology, genetics, prenatal development, environmental effects during prenatal development, attachment, emotional development, language development, intelligence, cognitive development, socialization, sex-roles and gender identity, adolescence, adulthood and aging.
CR: Psychology 2010, Psychology 2020, the former Psychology 2011

2125 Survey of Social Psychology is a survey of how the behaviour of individuals is influenced by others. Topics to be studied shall include: methodology and ethics, social cognition, social perception, attitude formation and change, interpersonal attraction, social influence, group processes and leadership. Additional topics may include: aggression, prosocial behaviour, sex and gender, environmental effects, organizational behaviour, health, stress and psychology and the law.
CR: Psychology 2100 and Psychology 2120

2225 Survey of Learning is a survey of learning phenomena and learning theories. Topics to be studied shall include: the evolutionary context of learning, habituation and sensitization, imprinting, Pavlovian conditioning, instrumental learning, generalization and discrimination in learning and neural mechanisms of learning.
CR: Psychology 2240, the former Psychology 2250, and Psychology 3251

2425 Survey of Cognitive Psychology is a survey of how humans process and retain information. Topics to be studied shall include: perception and pattern recognition, attentional processes and memory. The influence of stored information on selected behaviours will be considered. Selected behaviours may include language processing, concept formation, problem solving, decision making and practised and skilled performance.
CR: Psychology 2440 and Psychology 3450

2625 Survey of Personality is a survey of the theories of personality and relevant selected areas of research in the area of personality. Issues related to the application of this information to understanding abnormal behaviour will also be discussed. Theoretical systems covered will include: psychodynamic theory, behaviourism and cognitive-behavioural theory, humanism, traits and dispositions, social learning theory, psychological constructivism, information processing and biological theories of personality.
CR: Psychology 2610, the former Psychology 2620, and the former Psychology 2200.

2825 Survey of Biological Psychology is a survey of the biological bases of behaviour. Topics to be studied shall include: the structure and function of the nervous system, nerve conduction, sensory and motor structures, emotions, sexual behaviour, psychopharmacology, and behavioural evolution. Additional topics may include: the biological basis of circadian rhythms and sleep, consciousness and language, learning and memory, development and plasticity, and psychological disorders.
CR: Psychology 2810,the former Psychology 2850, Psychology 3810

13.25.2 Contemporary Issues Courses

3025 Contemporary Issues in Developmental Psychology examines in depth one or more areas of research within developmental psychology. Some topics that may be examined include cognitive development, social development, developmental psychopathology, and child eyewitness testimony.
PR: Psychology 2025 and Psychology 2925

3040 Contemporary Issues in the Psychology of Death and Dying uses psychological research, theory, and clinical experience to study death, dying and bereavement throughout the life cycle. Some selected topics include understanding death, the process of dying, care of the dying, medical ethics, suicide, and the psychological impact of life-threatening conditions. In addition, trauma, grief, and bereavement in children, adolescents, and adults are explored.
PR: Six credit hours in 2000 level psychology courses

3125 Contemporary Issues in Social Psychology examines in depth one or more areas of research within social psychology. Some topics that may be examined include the psychology of prejudice, criminal behaviour, social influence, and aggression.
PR: Psychology 2125 and Psychology 2925

3126 Contemporary Issues in the Psychology of Women explores the psychology of women from varying cultural perspectives, such as racial, sexual orientation, age and class. Topics include the history of women in psychology, women's development across the life span, women and social relationships, and violence against women.
PR: Six credit hours in 2000 level psychology courses

3225 Contemporary Issues in Learning examines in depth one or more areas of research in learning and cognition. Topics may include associative learning, instrumental conditioning, discrimination learning, category formation, memory, navigation, social cognition and learning, intelligence, concepts of time and number, self-awareness and communication and language.
PR: Psychology 2225 and Psychology 2925

3226 Contemporary Issues in the Psychology of Education is an introduction to the application of psychology to issues in education in a variety of settings. It examines the theoretical and applied aspects of learning and cognitive development; motivation; personal and social development; and evaluation, measurement, and assessment.
PR: Six credit hours in 2000 level psychology courses

3325 Contemporary Issues in Sensation and Perception examines the functioning of human sensory systems and how physical stimuli are transformed into signals that can be understood by the nervous system. In both human and animal models how the brain receives and processes information from the visual, auditory, gustatory, olfactory, and somatosensory systems may be examined. Basic psychophysics may also be examined.
PR: Psychology 2925 and Psychology 2425 or Psychology 2825

3425 Contemporary Issues in Memory and Cognition uses current psychological theories and research to examine aspects of human memory and cognition. Topics may include, but are not limited to, perception and pattern recognition, attentional processes, knowledge representation, working and long term memory, language, problem solving, decision making, expert performance, and abnormalities in cognition.
PR: Psychology 2425 and Psychology 2925

3525 Contemporary Issues in Emotion introduces the biological, cognitive, and social influences on emotions. Attention is given to unconscious (automatic) processes, nonverbal emotional expressions, and understanding specific emotions. Contemporary research may be highlighted in such areas as the effects of hormones, emotional intelligence, the consequences of problems in emotional development, or emotions in therapy.
PR: Psychology 2925 and any Survey Course in Psychology from the Grenfell Campus Psychology Program

3625 Contemporary Issues in Personality examines in depth one or more areas of research with personality psychology. Some topics that may be examined include stress and health, psychoanalysis, psychology of motivation, and personality in work organizations.
PR: Psychology 2625 and Psychology 2925

3626 Contemporary Issues in Abnormal Psychology explores the definition of abnormal behaviour, clinical assessment, classification, and diagnosis. The core theoretical perspectives on psychological disorders are examined. For each disorder the diagnostic criteria, etiology, treatment, and prognosis is presented. This course enhances the students' ability to think critically about issues pertaining to mental health and illness.
CR: Psychology 3640, Psychology 3650, and the former Psychology 3600
PR: Psychology 2625 and Psychology 2925

3627 Contemporary Issues in Psychotherapy introduces students to the major theories, concepts and practices of contemporary approaches to psychotherapy. It includes the exploration of ethical and professional issues in professional practice.
PR: Psychology 2625 and Psychology 2925

3628 Contemporary Issues in Psychological Testing and Measurement explores the development and application of tests and techniques for psychological assessment. A review of test construction and evaluation examines methods of item analysis, reliability, validity, and test norms. The major domains of applied psychological assessment are examined. Ethical issues in psychological assessment are presented throughout the course.
CR: Psychology 4920
PR: Psychology 2950 and any one of Psychology 2025, Psychology 2425, Psychology 2625.

3725 Contemporary Issues in Animal Behaviour includes one or more areas of research in animal behaviour and/or evolutionary psychology. Topics may include history of animal behaviour and/or evolutionary psychology, genetic analysis of behaviour, evolutionary theory and natural selection, development of behaviour, sensation and perception, orientation, foraging, antipredator behaviour, learning, cognition, sociality and dispersion, sexual reproduction and sexual selection, parental care and mating systems, altruism, aggression, communication and social dominance.
PR: Psychology 2925 and Psychology 2825 or Psychology 2225

3825 Contemporary Issues in Physiological Psychology includes one or more areas of research in neuroscience and/or behavioural neuroscience. Topics may include neurophysiology and neuroanatomy, methodology including brain imaging, developmental disorders, sensory-perceptual and motor systems, physiological basis of attention, memory, language, emotion and spatial behavior, alterations of consciousness, neurological disorders, plasticity, recovery and rehabilitation and neuropsychological assessment.
PR: Psychology 2825 and Psychology 2925

13.25.3 Senior Courses

4910 Systems of Psychology is a study of paradigms and explanations in contemporary psychology in the context of their historical antecedents.
CO: At the St. John's campus only: PSYC 3900 or 3950, or permission of instructor
PR: 30 credit hours in Psychology courses required in a Majors program. At the Grenfell Campus only, this must include PSYC 2950.

4925 Senior Seminar in Psychology is weekly seminars for faculty and senior students in Psychology. Current issues in academic and professional psychology shall be discussed.
PR: 30 credit hours in Psychology including Psychology 2950 or permission of the Chair of Psychology

4950 Independent Project in Psychology is under the supervision of a Faculty member where students will independently carry out approved projects and prepare reports of their findings.
CR: Psychology 4951
PR: 30 credit hours in Psychology including Psychology 2950 or permission of the Chair of Psychology

4951 Honours Project in Psychology I is under the supervision of a Faculty member and each student will independently review an area of psychology and prepare a thesis proposal for further investigation.
CO: Psychology 3950
CR: Psychology 4950
PR: 30 credit hours in Psychology including Psychology 2950 or permission of the Chair of Psychology and admission to the Honours program in Psychology

4959 Honours Project in Psychology II is a continuation of Psychology 4951. Under the supervision of a Faculty member, each student will independently carry out an approved project which will result in an honours thesis.
PR: Psychology 3950, Psychology 4951 or the permission of the Chair of Psychology and admission to the Honours program in Psychology

13.25.4 Non-Restricted Courses

2150 Introduction to Forensic Psychology will provide an in-depth overview of the relationship between psychology and the law. A variety of topics will be discussed and critically evaluated, including the use and misuse of psychology-based investigative methods such as offender and geographic profiling, detection of deception, investigative interviewing, eyewitness testimony, jury decision-making, corrections and treatment, risk assessment, and criminal responsibility.
PR: PSYC 1001
UL: cannot be used towards the Psychology major

2800 Drugs and Behaviour is an examination of the neurophysiology of drug action, the measurable effect of drugs on experimentally controlled behaviour, and a survey of information available on common self-administered drugs and their immediate and long-term effects.
PR: PSYC 1001
UL: cannot be used towards the Psychology major

3533 Sexual Behaviour covers the most important aspects of human sexuality with a psychology theory and research framework. The course will examine the biological, behavioural and socio-cultural bases of the human sexual response. Topics include sexual interaction and communication, contraception, sexually transmitted infections, reproduction, sexual orientation, transgender and intersex, variations in sexual behaviour, sex and gender, sexual dysfunction and therapy, and sexual coercion.
PR: PSYC 1001
UL: cannot be used towards the Psychology major

13.26 Religious Studies

Unless otherwise specified, Religious Studies courses do not have prerequisites. Students who register in a 3000- or 4000-level course are encouraged, however, to make sure that they have adequate preparation for that course, preferably by having successfully completed a first- or second-year course in the field.

Religious Studies courses are designated by RELS.

1000 The Religions of the World is an introduction to the basic beliefs and practices of the world's great religions.
CR: the former RELS 2010

1032 Introduction to Asian Religions and Culture is a broadly based survey course introducing students to the religions, culture, and societies of Asia. Traditions explored may include those of India (Hinduism, Buddhism, Sikhism, Jainism), China (Daoism, Confucianism, Buddhism), Japan (Shinto, Zen Buddhism), and Korea.

2013 Christianity is a study of the Christian tradition, its development and variety. The course will include an examination of the beliefs and practices of both Eastern and Western Christianity and a study of the main differences among the major Western denominations.
CR: the former RELS 2130, 2140

2050 The Old Testament is an introduction to the historical background, literary structure, and content of the Old Testament. Emphasis will be placed on the authorship and dating of the various texts that comprise the Old Testament, as well as on major themes, figures, and events.

2051 The New Testament is an introduction to the history and literary structure of the documents comprising the New Testament. Emphasis will be placed on the major themes found in these documents and on the distinctiveness of approach of the individual writers.

2350 Religious Institutions (same as Anthropology 2350) is a contextual study of religious institutions and beliefs, calendrical feasts and solemnities, religious roles and hierarchies, ritual innovation and revitalization.
CR: Anthropology 2350, the former Sociology/Anthropology 2350, the former Sociology 2350

2400 Buddhism examines the history of Buddhist traditions in Asia, with consideration of the major developments in Buddhist philosophy, institutions, and practices.
CR: the former RELS 3400

2410 Hinduism examines the history of Hindu religious traditions, their major religious texts, institutions, and practices, and their role in social, political, and cultural movements in India and in Hindu diaspora communities.
CR: the former RELS 3410

2610 Introduction to Religious Ethics is an introduction to religious ethics through the study of issues in biomedicine, human sexuality, and social justice. Possible topics for discussion include euthanasia, abortion, poverty, and human rights.
CR: the former RELS 2600 and the former RELS 2601

3010 Greek Religion (same as Classics 3010) is a study of the role of religion in the private and public life of the Greek world. Topics include the Greek gods, religious rituals, sacred sites and temples, regional and temporal variations in religious practices, and the role of religion in society. The course may also compare ancient Greek religious practices and modern conceptions of religion.
CR: Classics 3010 and the former RELS/Classics 3121

3020 Roman Religion (same as Classics 3020) is a study of the role of religion in the private and public life of the Roman world. Topics include the Roman divinities, sacred sites and temples, the role of religion in politics and society, the interaction with and assimilation of foreign religious practices, and the rise of Christianity. Students may also compare Roman religious practices with modern conceptions of religion.
CR: Classics 3020 and the former RELS/Classics 3121

3200 Jesus of Nazareth is a study of the historical Jesus. Beginning with an assessment of the relevant source material, this course explores what can be known about the life of Jesus of Nazareth in its historical and cultural contexts.

3210 Paul and His Writings is a study of the writings of the Apostle Paul in the New Testament. and his contribution to Christianity in the cultural and historical milieu in which he lived and was active.

3310 Judaism at the Time of Jesus will explore the developments in Jewish thought, institutions, beliefs, and practices from the Babylonian Exile of the sixth century B.C.E. to the time of Jesus, King Herod and the Roman Empire of the first century C.E.
CR: the former RELS 3220

3401 Zen, Buddhist Meditation, and Buddhist Psychology examines the relationship between meditation and theories of human psychology in Buddhism from its origins to its formulation in Zen.

3820 Religion and the Arts (same as Visual Arts 3820) is an examination of the role of art in the expression of religious ideas, together with a study of specific religious themes and concerns in one or more of the following: literature, film, music, painting, sculpture and dance.
CR: Visual Arts 3820

3831 Religious Themes in Contemporary Songwriting is a study of religious themes in contemporary songwriting through the in-depth examination of the work of a selection of contemporary songwriters. The course will explore how religious questions and themes are handled in contemporary song and explore how song as an artistic medium expresses religious meaning. Songwriters to be explored may include the following: Bob Dylan, Bob Marley, Joni Mitchell, Leonard Cohen, Van Morrison, Tori Amos, Nick Cave, Alanis Morissette, Julie Miller, the Louvin Brothers, the Stanley Brothers, Hank Williams, etc.

3880 Religion, Worldviews, and the Environment examines the human connection to the natural world as expressed in traditional religions, indigenous worldviews and contemporary approaches to environmental

crises.

13.27 Science

In accordance with Senate's *Policy Regarding Inactive Courses*, the course descriptions for courses which have not been offered in the previous three academic years and which are not scheduled to be offered in the current academic year have been removed from the following listing. For information about any of these inactive courses, please contact the Head of the Department.

Science courses are designated by SCI.

1807 Safety in the Scientific Laboratory introduces students to safety practices required for working in science laboratories where hazards are present. Students complete an online module in Laboratory Safety. Normally, it will be taken before the start of the semester in which students take their first science laboratory course with this prerequisite, and it must be successfully completed no later than the first Friday of the semester. Check department lists of courses to see where this is a prerequisite.
CH: 0
OR: only offered online; completion time estimated to be one hour

1808 WHMIS introduces students to Newfoundland and Labrador's Workplace Hazardous Materials Information System (WHMIS). Students will complete an online module in WHMIS. Normally, it will be taken before the start of the semester in which students take their first science laboratory course with this prerequisite, and it must be successfully completed no later than the first Friday of the semester. Check department lists of courses to see where this is a prerequisite.
CH: 0
OR: only offered online; completion time estimated to be one hour

2001 Women and Science (same as Gender Studies 2001, the former Women's Studies 2001) is an investigation of: historical and contemporary contributions of women scientists, especially Canadians; different sciences and how they study women; and feminist and other perspectives on gender and science.
CR: Gender Studies 2001, the former Women's Studies 2001

3000 Concepts, Methods and Issues in Science I - inactive course.

3001 Concepts, Methods and Issues in Science II - inactive course.

4000 Senior Science Seminar is a review of current topics in science discussed in a seminar format. Seminars will be presented by faculty, students and guest speakers.
PR: Permission of the Program Chair. This course is restricted to students in the General Science program who have completed 80 credit hours or more.

4950 Senior Project requires students to work either individually or in pairs on developing a poster presentation on specific scientific topics of current interest. This will require a detailed proposal, followed by the necessary relevant research in appropriate journals and Internet sources. Participants in this course will organize a mini-conference, to be held at the end of semester, at which these posters will be presented. Where appropriate, students will be encouraged to integrate knowledge from at least two different scientific disciplines in the development of this project.
PR: restricted to students in the General Science program who have completed 80 credit hours or more

4951 Honours Project I is the preparation of a project proposal under the guidance of a faculty supervisor, including a comprehensive bibliographical review, with the aim of producing a well-annotated Bibliography.
PR: Permission of the Program Chair. This course is restricted to students in the General Science program who have completed 80 credit hours or more.

4959 Honours Project II is a continuation of SCI 4951. Under the supervision of a Faculty Advisor, students will prepare an Honours Thesis. The preparation of this will entail some original research, and will require the student to integrate knowledge from at least two disciplines.
PR: SCI 4951 and permission of the Program Chair

13.28 Social/Cultural Studies

Social/Cultural Studies courses are designated by SCCU.

2000 Introduction to Social/Cultural Studies introduces students to the theory and the intellectual and historical contexts of anthropology, folklore and sociology as the central academic foci of Social/Cultural Studies. Readings and lecture materials, drawn from each of the three disciplines, introduce students to core concepts, ideas and debates found within each cognate and the ways in which all three disciplines contribute to Social/Cultural Studies as an interdisciplinary field of study.

2244 The Graphic Novel - Historical, Cultural and Literary Contexts (same as English 2244) examines the historical, cultural and literary impact of the Graphic Novel; investigates its continuing development; and introduces students to significant works within the genre.
CR: English 3843, English 2244
PR: 6 credit hours in English at the 1000 level; one of Folklore 1000, Anthropology 1031, or Sociology 1000

4000 Interdisciplinary Seminar in Social/Cultural Studies is conducted through faculty presentations, assigned readings and group discussions and students will learn how to engage and evaluate the broad debates within Anthropology, Folklore and Sociology. Rather than focus on narrow substantive material from the disciplines, this seminar will emphasize the larger shifts and challenges which have led to new topics and methods of analysis within the social sciences.
PR: completion of 90 credit hours or more and admission to Social/Cultural Studies

4100 Issues in Cultural Studies represents an examination of the concept of culture, as it is presently used within Anthropology, Folklore and Sociology. Particular attention will be paid to the area of Cultural Studies, and the ways in which that approach has re-energized an interest in the role of culture in modern society.
PR: completion of 90 credit hours or more and admission to Social/Cultural Studies

4950 Independent Project in Social/Cultural Studies is under the supervision of a faculty member and students will independently carry out approved projects of direct relevance to social and cultural phenomena, and prepare reports of their findings.
PR: SCCU 4000

13.29 Sociology

In accordance with Senate's *Policy Regarding Inactive Courses*, the course descriptions for courses which have not been offered in the previous three academic years and which are not scheduled to be offered in the current academic year have been removed from the following listing. For information about any of these inactive courses, please contact the Head of the Department.

Sociology 1000 is a prerequisite for all further Sociology courses except Sociology 2250 and those cross-listed with Anthropology. Credit is not given for both Sociology 1000 and the former Sociology 2000. Before taking 3000-level courses, students should have taken at least 6 credit hours in courses below the 3000 level. Courses at the 4000 level will normally be taken by students who have previously taken at least 9 credit hours in courses at the 3000 level.

The following courses, cross-listed with Anthropology and identified by the prefix "S/A", are also taught at the introductory level: 2200, 2210, 2220, 2230, 2240, 2260, 2270, 2280, and 2350. A minimum of two of these courses is prerequisite to further cross-listed courses. These courses are open to be taken as first courses or may be taken to follow up a Sociology introductory course.

Sociology courses are designated by SOCI.

1000 Introduction to Sociology (same as the former SOCI 2000) is an introduction to the concepts, principles, and topics of Sociology. This course is a prerequisite to most departmental courses.
CR: the former SOCI 2000

2100 Social Inequality introduces the subject of social inequality and stratification, examines social inequality in historical perspective, reviews major theories about social inequality, and considers key social developments in contemporary societies in the area of social inequality.

2120 Technology and Society is an examination of the role of technology in society. Topics may include the emergence of modern technological society, the impact of new technologies on social organization and culture and the institutionalization of science and the production of scientific knowledge. The course also explores the ideological functions of science and technology in advanced industrial societies as well as the question of "the domination of nature".

2200 Communities (S/A) is an interdisciplinary examination of the concept of Community. Readings will include community studies from North America and Europe.

2210 Communication and Culture (S/A) is an examination of verbal and non-verbal systems of communication, and the influence of language on human cognition.
UL: not applicable towards the Major or Minor in Anthropology

2220 Labrador Society and Culture is the sociology and anthropology of Labrador. The focus is on social and cultural aspects of contemporary Labrador.

2230 Newfoundland Society and Culture (S/A) (same as Folklore 2230) is the Sociology and Anthropology of the Island of Newfoundland. The focus is on social and cultural aspects of contemporary island Newfoundland.
CR: Folklore 2230
UL: not applicable towards the Major or Minor in Anthropology

2240 Canadian Society and Culture (S/A) is a descriptive and analytic approach to the development of Canadian society and culture.
UL: not applicable towards the Major or Minor in Anthropology

2250 Changing World is sociological analysis of contemporary world issues and social problems.

2260 War and Aggression (S/A) is critical review of ethological, psychological and sociological approaches to the understanding of violence and organized aggression.

2270 Families (S/A) is a comparative and historical perspective on the family as a social institution, the range of variation in its structure and the determinants of its development.

2280 The City (S/A) examines varieties of urban life around the world and through history. The city as habitat and as spectacle.

2610 Socialization - inactive course.

3040 Introduction to the Methods of Social Research has as its' objectives (1) to introduce basic concepts underlying research in the social sciences, and (2) to make students familiar with some techniques that are useful in the analysis of a wide range of sociological data and that represent a good foundation for later study of more advanced techniques.

3140 Social Movements (S/A) examines the major social movements that have driven social changes related to gender equality, social justice, human rights, and the environment. The course asks why people become involved in social movements, and what factors contribute to movement success. The course also examines social movements' use of mass media and new media technologies as tools for reaching the public and provoking social and cultural transformation.
UL: not applicable towards the Major or Minor in Anthropology

3150 Classical Social Theory is an introduction to the work of major 19th- and early 20th-century social theorists including Marx, Durkheim, Weber and Freud.

3160 Contemporary Social Theory is an exploration of selected topics from issues in contemporary social theory, including theories of feminism, the state, the environment, culture, organization, and communication.
PR: SOCI 3150

3210 Persistence and Change in Rural Society (S/A) assesses the social and cultural significance of the rural experience in the face of expanding urbanism. Topics may include (a) the nature of rural society in Canada, (b) similarities between Canadian and European rural society, c) utopian and anarchist movements in rural life, and (d) reaction of agricultural populations to external influence.

3290 Deviance is major sociological theories and methodological techniques central to the study of deviance and crime are outlined and evaluated. The distribution, attributes and explanations of a variety of forms of deviance are examined, which may include violence, sexual deviance, delinquency, addiction, mental disorder, theft, organized crime, political deviance and corporate deviance.

3314 Gender and Society (S/A 3314) is an examination of biological, psychological, social and cultural aspects of gender, with an emphasis upon contemporary directions of change in sex roles.

3395 Criminal Justice and Corrections provides an introduction to the operation of the Canadian criminal justice system. Topics to be examined may include the origin, nature and utilization of criminal law, policing, adult and juvenile courts, sentencing, correctional institutions, and community based corrections (probation, parole, community service). Criminal justice policy formulation and application are also discussed.
PR: SOCI 3290

3731 Sociology of Culture is a comparative examination of major contemporary sociological texts on the relationship between culture, broadly understood as symbolic systems, and social structure.

4071 Social and Cultural Aspects of Health and Illness covers topics which may include: cultural concepts of illness and health; theories of disease causation; relationships between social life and illness patterns; symbolic use of illness; variations in philosophies of treatment and in practitioner/patient relationships; the social organization of medicine. Open to those without normal prerequisites by permission of the Instructor.

4072 Social and Cultural Aspects of Death (S/A) will cover topics which may include: symbolic meanings and values attached to death; cultural and historical variations in the management of death, e.g. treatment of the 'terminally ill', burial rites, the mourning process, and the social fate of survivors, together with the social and psychological meanings of these behaviours. Open to those without normal prerequisites by permission of the Instructor.

13.30 Sustainable Rural Communities

Sustainable Rural Communities courses are designated by SURC.

1800 Introduction to Sustainable Rural Communities provides students with foundational knowledge of the history and theories of the 'rural'. These broad understandings will be considered as they apply to interdisciplinary sectors in rural Newfoundland and Labrador such as rural tourism, natural resource sectors, economic development, culture, entrepreneurship, governance, and/or Indigenous communities.

3800 Independent Community Project – Sustainable Rural Communities is a capstone course for the Certificate in Sustainable Rural Communities completed under the supervision of a current faculty member. It will connect students with rural community partners across various sectors of industry, government, and/or NGOs to engage with a current issue or question that requires potential solutions/answers.

13.31 Theatre

In accordance with Senate's *Policy Regarding Inactive Courses*, the course descriptions for courses which have not been offered in the previous three academic years and which are not scheduled to be offered in the current academic year have been removed from the following listing. For information about any of these inactive courses, please contact the Head of the Department.

Theatre courses are designated by THEA.

1000 and 1001 Introduction to the History of Theatre I and II are historical surveys of the art of the theatre. The history of theatre will be studied in terms of the evolution of performance and of the physical theatre from their origins in a variety of social rituals and contexts through to their present plurality of forms. At the same time, the nature and function of the various components of theatrical performance (acting, directing, design, etc.) will be analysed in terms of period philosophical, social, cultural, political and religious contexts. These courses are open to non-theatre students.

1010 Introduction to Acting is an appreciation of the fundamentals of the craft of acting. Basic exercises in voice, movement, relaxation and concentration, improvisation and script analysis will introduce the student to the imaginative and physical skills required by an actor. This is a basic course for both Acting and Technical Theatre Production majors.
AR: attendance is required
OR: 6 hours of studio per week

1020 Introduction to Technical Theatre Production is an appreciation of the basic vocabulary and techniques of the various technical and organizational structures and practices of staging plays. Areas of concentration will include scenic and costume construction, basics in lighting, painting, props, sound and stage management. This is a basic course for both Acting and Technical Theatre Production majors.
AR: attendance is required
OR: 6 hours of studio per week
PR: Science 1807, Science 1808

1110 Acting I is an introductory course for those majoring in acting. Emphasis on voice, speech, movement and text analysis. Various learning methods will be employed, from sensitivity exercises to improvisation and creative imagination exercises. Participation in in-class performance is required.
AR: attendance is required
OR: 6 hours of studio per week
PR: THEA 1000, THEA 1010, and THEA 1020 and admission to the Theatre Major

1120 Technical Theatre Production I is an introductory course for those majoring in Technical Theatre Production. Emphasis on the fundamentals of scenic carpentry, wardrobe, sound, lighting, crewing, painting and stage management.
AR: attendance is required
OR: 6 hours of studio per week
PR: THEA 1000, THEA 1010, and THEA 1020, Science 1807, Science 1808

1200 Concert Dance is an overview of the basic techniques of Western concert dance such as jazz, ballet, and contemporary dance within their historical, cultural, and aesthetic contexts. The course develops basic body awareness and alignment and explores the basics of codified dance technique. This course is open to non-Theatre students.
AR: attendance is required
OR: 3 hours of studio per week

1250 Improvised Movement and Conditioning is an exploration of the

basic development of healthy physical practice for movement training including conditioning and improvisation. Students will investigate body awareness, anatomy, self-expression, dynamic alignment, and the basic principles of creating movement-based performances. This course is open to non-Theatre students.
AR: attendance is required
OR: 3 hours of studio per week

2010 and 2011 Acting II are second level courses for Acting Majors. Emphasis is on speech, text analysis and scene study. Various techniques and texts will be employed to root the student in the fundamental process of acting. A beginning approach to understanding the body as an instrument and the techniques required to use the instrument.
AR: attendance is required
OR: 6 hours of studio per week
PR: THEA 1001 and THEA 1110. THEA 2010 is a prerequisite for THEA 2011 and admission to the Acting Major

2020 and 2021 Technical Theatre Production II are second level courses for the Technical Theatre Production Major. Emphasis is on the fundamentals of drafting, stage management and props development.
AR: attendance is required
OR: 6 hours of studio per week
PR: THEA 1001 and THEA 1120, Science 1807, Science 1808. THEA 2020 is a prerequisite to THEA 2021

2080 and 2081 Production Acting both involve practical work in each case work for Acting Majors in a theatre department production.
AR: attendance is required
CH: 4 credit hours each
OR: 12 hours of studio per week
PR: THEA 1110, Science 1807, Science 1808

2090 and 2091 Production - Technical Theatre both involve practical work for Technical Theatre Production Majors, in a departmental production in a supporting capacity (i.e. assistant stage manager, wardrobe assistant, etc.).
AR: attendance is required
CH: 4 credit hours each
OR: 12 hours of studio per week
PR: THEA 1120, Science 1807, Science 1808

3010 and 3011 Acting III are intermediate level courses for the Acting Major. Continued emphasis on speech, voice production, text analysis, etc.
AR: attendance is required
OR: 6 hours of studio per week
PR: THEA 2010 and THEA 2011, THEA 2080 and THEA 2081

3020 and 3021 Technical Theatre Production III are intermediate courses for Technical Theatre Production Majors. Continued emphasis on carpentry, painting, lighting, sound, wardrobe, stage management, etc.
AR: attendance is required
OR: 6 hours of studio per week
PR: THEA 2020 and THEA 2021, THEA 2090 and THEA 2091, Science 1807, Science 1808

3060 and 3061 Master Classes I and II (Technical Theatre Production) are courses for Technical Theatre Production students with a guest artist in a particular area of specialization.
AR: attendance is required
OR: 6 hours of studio per week
PR: THEA 2020 and THEA 2021, Science 1807, Science 1808. THEA 3060 is a prerequisite for THEA 3061.

3070 and 3071 Master Classes I and II (Acting) are courses for Acting students with a guest artist in a particular area of specialization.
AR: attendance is required
OR: 6 hours of studio per week
PR: THEA 2010 and THEA 2011. THEA 3070 is a prerequisite for THEA 3071

3080 and 3081 Production - Acting both involve practical work in each case work, for Acting Majors on a department of theatre production.
AR: attendance is required
CH: 4 credit hours each
OR: 16 hours of studio per week
PR: THEA 2010 and THEA 2011, THEA 2080 and THEA 2081, Science 1807, Science 1808

3090 and 3091 Production - Technical Theatre both involve practical work, for Technical Theatre Production Majors on a departmental production in a significant capacity (i.e. stage manager, crew chief, head of props, etc.).
AR: attendance is required
CH: 4 credit hours each
OR: 16 hours of studio per week
PR: THEA 2020 and THEA 2021, THEA 2090 and THEA 2091, Science 1807, Science 1808

3605 Music Theatre Workshop - inactive course.

4001 Theatre Institute at Harlow is a full semester's work, utilizing both the Harlow Campus and Grenfell Campus, comprising a "thesis production" involving fourth-year technical theatre production students in major responsibilities. A practical component in Theatre Criticism utilizing the resources of the Harlow Campus proximity to London and Stratford. A series of Master Classes, Workshops, Field Trips and Guest Lectures offered by members of the theatre profession in England. A project in a selected area of theatre history.
AR: attendance is required
CH: 10
PR: THEA 4010 or THEA 4020, THEA 4060 or THEA 4070, THEA 4080 or THEA 4090, THEA 4030, THEA 4040, Science 1807, Science 1808

4010 Acting IV is an advanced course for acting majors. Concentration on advanced scene study on texts illustrating period styles or genres of plays.
AR: attendance is required
OR: 6 hours of studio per week
PR: THEA 3010 and THEA 3011, THEA 3080 and THEA 3081

4020 Technical Theatre Production IV is an advanced course for Technical Theatre Production Majors with individual concentration on specific technical skills.
AR: attendance is required
OR: 6 hours of studio per week
PR: THEA 3020 and THEA 3021, THEA 3090 and THEA 3091, Science 1807, Science 1808

4030 Theory of Directing and Design is an examination and analysis of the nature and practice of directing and design from a theoretical and aesthetical perspective. A lecture/seminar course involving script analysis to examine the interpretive and imagistic processes of directors and designers.
OR: seminar 3 hours per week
PR: THEA 3010 and THEA 3011 or THEA 3020 and THEA 3021, Visual Arts 2700 and Visual Arts 2701,18 credit hours in Dramatic Literature courses, Science 1807, Science 1808

4040 Directed Studies are student projects in playmaking, performance, directing, design or technical presentations supervised by faculty. In consultation with the faculty, the student will submit a proposal for a project on which the student wishes to work. These projects will be presented in public.
OR: 6 hours of studio per week
PR: THEA 3010 and THEA 3011 or THEA 3020 and THEA 3021 and admission to the Theatre Major

4060 Master Class III (Technical Theatre Production) is advanced work with a guest artist in a particular area of specialization.
AR: attendance is required
OR: 6 hours of studio per week
PR: THEA 3060 and THEA 3061, Science 1807, Science 1808

4070 Master Class III (Acting) is advanced work with a guest artist in a particular area of specialization.
AR: attendance is required
OR: 6 hours of studio per week
PR: THEA 3070 and THEA 3071

4080 Production-Acting is work for Acting Majors on a theatre department production.
AR: attendance is required
CH: 4
OR: 20 hours of studio per week
PR: THEA 3010 and THEA 3011, THEA 3080 and THEA 3081, Science 1807, Science 1808

4090 Production - Technical Theatre is practical work for Technical Theatre Production Majors on a departmental production in a significant and leading capacity (i.e. designer, stage manager, technical director, etc.).
AR: attendance is required
CH: 4
OR: 20 hours of studio per week
PR: THEA 3020 and THEA 3021, THEA 3090 and THEA 3091, Science 1807, Science 1808

13.32 Tourism

In accordance with Senate's *Policy Regarding Inactive Courses*, the course descriptions for courses which have not been offered in the previous three academic years and which are not scheduled to be offered in the current academic year have been removed from the following listing. For information about any of these inactive courses, please contact the Head of the Department.

Tourism courses are designated by TRSM.

1000 Introduction to Tourism introduces students to the history of tourism and leisure, and the development of the field of tourism studies. This will include consideration of foundational concepts such as culture and nature, research on the needs and gratifications of tourists, and studies of the functions of tourism.

2000 Tourism and Sustainability investigates the concept of sustainability and focuses on the importance of sustainable tourism initiatives, covers measuring the demand for tourism, the role of government and industry stakeholders in the tourism planning process, and a consideration of how tourism planning strategies are developed, implemented, evaluated, and controlled. In addition, there will be an examination of the principles that structure the tourism industry.
PR: TRSM 1000 or permission of the instructor

3010 Issues in Ecotourism - inactive course.

3230 Parks and Protected Areas examines the history and geography of national parks and other publicly protected lands, and considers the impact of human interaction with landscapes. Additionally, the course will focus on tourism planning and management in national parks and protected areas, and investigate guidelines for best practice in tourism operations.
PR: TRSM 1000 or permission of the instructor

3240 Cultural and Heritage Tourism Development considers built, natural and cultural resources for heritage tourism destinations on a variety of scales from World Heritage Sites to countryside and rural tourism attractions. Issues around the international context of heritage, interpretation, and packaging of cultural heritage products, regional identities and environments and the importance of small and medium sized enterprises are examined.
PR: TRSM 1000 or permission of the instructor

3900 Global Issues and Tourism highlights the importance of responding to world issues in tourism, and considers issues around socio-political-environmental factors influencing tourism, the impact of new social movements on tourism, the demographics and psychographics of travellers, the promotion of culture and territories, and the globalization of tourism.
PR: TRSM 1000 or permission of the instructor

4010 Community and Cultural Issues in Tourism - inactive course.

4900-4910 (Excluding 4902) Special Topics in Tourism is a case-based course focussing on the application of major tourism theories and concepts to modern tourism industry issues. Potential areas of consideration include transportation issues in tourism, visitor management, rural tourism, urban tourism, health tourism and therapeutic recreation, island tourism, critical regionalism, maximizing the year-round potential of tourism, and contemporary research in tourism.
PR: at least 75 credit hours or permission of the instructor

4902 Culinary Tourism examines the history of gastronomy and the role of food in cultural heritage with different case studies around the world. Wine growing regions from countries such as Canada, France, Italy, Hungary, South Africa, Greece, and Cyprus will be critically analyzed from an economic impact context. Trends in cuisine and culinary arts, successes and challenges in promoting food tourism in Newfoundland food and drink in literature, art and film, and food and wine tourism best practices will be a key focus. The students will be required to take local tours of selected restaurants and wineries in Newfoundland for practical exposure of the food and wine industry.
PR: at least 75 credit hours or permission of the instructor

13.33 University

1010 The University Experience introduces students to the different modes of enquiry that one finds in the University, the interrelatedness of knowledge and the role of the University in society. It also provides students with tools and techniques of study and research that can lead them to academic success and fulfilling career.

13.34 Visual Arts

Visual Arts courses are designated by VART.

13.34.1 1st Year

1000 Introduction to Two-Dimensional Art Practices provides an introduction to two-dimensional art practices with selections made from drawing, painting, and printmaking. Design elements and principles, aesthetic concerns, the study of colour, and fundamental concepts of a variety of two-dimensional media, materials and processes will be explored. Ways of describing, analyzing, interpreting and assessing art will be examined. This course is open to both visual arts and non-visual arts students.
AR: attendance is required
CO: VART 1911
CR: the former VART 1510 and the former VART 1511
OR: 4 hours of studio per week
PR: Science 1808

1001 Introduction to 3D, Photo and Time-based Art Practices provides an introduction to 3D, photo and time-based art practices with selections from sculpture, installation, photo-media, time-based art and related practices. Design elements and principles, postmodern strategies, aesthetic concerns, and fundamental concepts of a variety of media, materials, and processes will be explored. Ways of appreciating art and artistic processes will be examined. This course is open to both visual arts and non-visual arts students.
AR: attendance is required
CO: VART 1911
OR: 4 hours of studio per week
PR: Science 1808

1010 Introduction to Drawing introduces the fundamentals of drawing with study of line, tone, shape, volume, form, texture and space. This course includes practice-based research methodologies.
AR: attendance is required
CO: VART 1911
CR: the former VART 1500
OR: 4 hours of studio per week
PR: Science 1808

1110 Painting: Colour, Materials, and Processes introduces the concepts, principles, and processes of painting. Students will be introduced to paint mediums, materials, and tools with a focus on colour, all within the context of contemporary art practices.
AR: attendance is required
CO: VART 1911
OR: 4 hours of studio per week
PR: Science 1808

1210 Introduction to Sculpture introduces the exploration of three-dimensional form, sculpture materials and processes, and of the organization of relationships and interactions between objects and space.
AR: attendance is required
CO: VART 1911
OR: 4 hours of studio per week
PR: Science 1808

1310 Printmaking: Relief and Screenprinting introduces visual language and concepts in conjunction with printmaking methods, materials and techniques via projects in relief and screenprinting.
AR: attendance is required
CO: VART 1911
OR: 4 hours of studio per week
PR: Science 1808

1410 Photography introduces the theory and technique of photography using the digital camera and its controls and incorporating the use of Photoshop for photography. The course also introduces theories and genres of photographic vision, the use of the medium to explore a personal vision, image editing, and service bureau printing.
AR: attendance is required
CO: VART 1911
CR: the former VART 2400
OR: 4 hours of studio per week
PR: Science 1808

1522 Textile and Fibre Art explores various textile and fibre materials and processes used in contemporary art studio practice.
AR: attendance is required
CO: VART 1911
CR: the former VART 1520
OR: 4 hours of studio per week
PR: Science 1808

1610 Introduction to Computers and Art provides an initial exploration of how computational technology can be a creative tool applied to all creative practices involving the essential applications for imaging and dissemination. The course includes but is not limited to, vector illustration, photo manipulation, digital painting and use of presentation technologies. A key notion in this course is that of personal workflow approaches.
AR: attendance is required
CO: VART 1911
OR: 4 hours of studio per week
PR: Science 1808

1810 Introduction to Time-Based Art introduces students to art practices that employ time, such as animation, video, sound art, and live art. This course may include attendance at screenings, performances, and/or visiting artist presentations outside of class time. This course includes practice-based research methodologies.
AR: attendance is required
CO: VART 1911
OR: 4 hours of studio per week
PR: Science 1808

1911 Fine Arts Health and Safety provides an overview to the culture and practice of health and safety in studio courses, as well as giving students information that will help them succeed at Grenfell Campus. This component is delivered through a series of workshops, demonstrations, lectures, and online training. The course includes: Personal Protective Equipment, art materials safety, basic First-Aid, studio protocols, tours and lectures to

acquaint students with campus resources, and the purchase of a safety kit and a course manual. This course is a co-requisite for all 1000 level studio courses. This is a pass/fail course and requires attendance at all sessions and completion of all online components.
AR: attendance is required
CH: 0
OR: 12 contact hours and supplementary online components
PR: Science 1808

13.34.2 2nd Year

2010 Drawing explores drawing through a range of materials, processes, and concepts. This course leads toward the investigation of student-initiated ideas and concepts, as well as comprehension of drawing in contemporary practices. Some drawing fundamentals are also covered. This course includes practice-based research methodologies.
AR: attendance is required
CR: the former VART 2000 and the former VART 2001
OR: 4 hours of studio per week
PR: 24 credit hours in VART, Science 1808

2011 Expanded Field explores the territory beyond conventional boundaries of discipline-based practices.
AR: attendance is required
OR: 4 hours of studio per week
PR: 24 credit hours in VART, Science 1808

2110 Painting: Process and Materiality introduces painting with emphasis on materials, processes and ideas within a contemporary painting context.
AR: attendance is required
CR: the former VART 2100 and the former VART 2101
OR: 4 hours of studio per week
PR: 24 credit hours in VART, Science 1808

2111 Painting: Themes and Practices emphasizes thematic development and practice in painting. This course includes practice-based research methodologies.
AR: attendance is required
CR: the former VART 2100 and the former VART 2101
OR: 4 hours of studio per week
PR: 24 credit hours in VART, Science 1808

2210 Sculpture I develops accurate and expressive control of three-dimensional media with an emphasis on areas such as formed sculpture and installation/site-specific sculpture.
AR: attendance is required
CR: the former VART 2200
OR: 4 hours of studio per week
PR: 24 credit hours in VART, Science 1808

2211 Sculpture II develops accurate and expressive control of three-dimensional media with an emphasis on areas such as carved sculpture and constructed sculpture.
AR: attendance is required
CR: the former VART 2201
OR: 4 hours of studio per week
PR: 24 credit hours in VART, Science 1808

2311 Intaglio Printmaking provides intensive exploration of Intaglio Printmaking materials and media applied to development of visual communication skills, conceptual breadth and personal expression. This course is normally offered in alternating years.
AR: attendance is required
OR: 4 hours of studio per week
PR: 24 credit hours in VART, Science 1808

2321 Lithographic Printmaking provides intensive exploration of Lithographic Printmaking materials and media applied to development of visual communication skills, conceptual breadth and personal expression. This course is normally offered in alternating years.
AR: attendance is required
OR: 4 hours of studio per week
PR: 24 credit hours in VART, Science 1808

2330 Print Media introduces contemporary printing technologies as applied to the development of personal expression. The course is designed to develop the students' critical awareness of print media while building technological, conceptual and visual communication skills. Technologies to be introduced include integration of computer or digital processes and photomechanical methods.
AR: attendance is required
CR: the former VART 3300
OR: 4 hours of studio per week
PR: 24 credit hours in VART including 3 credit hours from any of VART 1310, 1410, 1610, 2311, 2321, 2410, 2411, 2610, 2611, Science 1808

2410 Photography I introduces students to film cameras, lenses, and their controls to produce film negatives for printing in the traditional black and white darkroom. Topics covered include negative scanning, large-format digital printing for exhibition, the use of Photoshop for photography, the examination of photo-theory, critical reading and critical evaluation of photographs. Students are encouraged to explore a personal vision. Studio time is balanced with regular illustrated lectures on the theory and history of the first century of photography.
AR: attendance is required
CR: the former VART 3400
OR: 4 hours of studio per week
PR: 24 credit hours in VART, Science 1808

2411 Photography II continues the use of digital and/or film cameras to produce files and/or film negatives for printing in the traditional darkroom and/or digital lab. The theory and aesthetics of photography is addressed through critiques, readings and lectures. Students are encouraged to strengthen their personal vision. Studio time is balanced with regular illustrated lectures on the theory and history of the medium since the 1930's, with emphasis on contemporary photographic practitioners.
AR: attendance is required
CR: the former VART 3401
OR: 4 hours of studio per week
PR: VART 2410, Science 1808

2610 Introductory Projects in New Media encourages individualized investigation in the potential and possibilities of New Media in the creation of personal artistic works. Techniques for working with vector and pixel based software are demonstrated with the goal of encouraging students to find their own particular approach to a New Media workflow applied to various mediums. Blended and alternative learning approaches are used.
AR: attendance is required
OR: 4 hours of studio per week
PR: 3 credit hours in VART, Science 1808

2611 New Media - Motion and Media explores motion as a tool for expression and visual practice. Students are instructed in the use of tools for editing sound and motion (e.g. video, animation) with the goal of studying motion as a medium independent from the tools for production. Initial readings on theories of affect are combined with technical demonstrations to enhance notions of cross-fertilization between approaches and practices. Blended and alternative learning approaches will be used.
AR: attendance is required
OR: 4 hours of studio per week
PR: 3 credit hours in VART, Science 1808

2900-2909 Special Topics in Visual Arts introduces a range of introductory topics that might include: Textile Practices, Japanese Woodblock, and Book Arts.
AR: attendance is required
OR: 4 hours of studio per week
PR: 24 credit hours in VART, Science 1808

13.34.3 3rd Year

3110 Drawing/Painting Studio Art Practice explores various approaches to contemporary drawing and painting practices. This course includes practice-based research methodologies.
AR: attendance is required
OR: 4 hours of studio per week
PR: 6 credit hours from any of VART 2010, VART 2011, VART 2110, VART 2111, Science 1808

3210 Extended Practice in Sculpture, Space and Installation develops independent artistic and personal expression utilizing areas of expression such as sculpture, definition and articulation of space and site; and the creation and presentation of three-dimensional media through the use of installation.
AR: attendance is required
OR: 4 hours of studio per week
PR: VART 2210 and VART 2211, Science 1808

3310 Extended Practice in Printed Multiples hones skills in any of printmaking, print media, digital output, multiple producing print processes and printed matter while developing a self-directed body of work. The use of these processes will be selected by students in consultation with the instructor. Students can focus on the tradition of printmaking or print media or an interdisciplinary production. The creation of printed physical output is emphasized. This course includes practice-based research methodologies.
AR: attendance is required
CR: the former VART 3301
OR: 4 hours of studio per week
PR: 3 credit hours chosen from VART 2311 or VART 2321, VART 2330, VART 2411, Science 1808

3350 Directed Studies in Printmaking is a professional work/study experience in Printmaking. Students will undertake their own projects in Printmaking. In addition, they will assist the Director and/or Master printer at St. Michael's Printshop in St. John's, NL in the day-to-day operations of the studio. Students are required to write a paper on an aspect of Printmaking as it pertains to St. Michael's Printshop. Normally this course is available during Spring Session only (May to mid-August) so that students can

experience the complete summer activities scheduled at St. Michael's.
PR: 6 credit hours chosen from VART 1310, VART 2311, VART 2321 or VART 2330 and permission of the Program Chair, Science 1808

3410 Extended Practice in Photography continues exploration in photographic/digital output by creating self-directed, coherent bodies of work. These explorations build toward the production of suites, folios, and/or sequences in print installations, webpages, apps, and/or physical photobook. Independent practice and ongoing research of process, structure, content and sequence are major components of the term's work. This course includes practice-based research methodologies.
AR: attendance is required
CR: the former VART 3401
OR: 4 hours of studio per week
PR: VART 2411, Science 1808

3520 Intermediate Practice in Textile and Fibre Art explores the expressive potential of textiles and fibre materials and processes.
AR: attendance is required
OR: 4 hours of studio per week
PR: 48 credit hours in VART, Science 1808

3610 Computational Media explores process-based New Media for the production of spectacle. Students produce an independent body of work using computational media (e.g. projection, audio, installation) to create experiences designed for an audience. Instrumental to this process is the study of New Media theory concurrent with the development of software/programming skills, allowing space for any and all tools of expression. Blended and alternative learning approaches are used. This course is normally offered in alternating years.
AR: attendance is required
OR: 4 hours of studio per week
PR: 48 credit hours in VART, Science 1808

3611 Making Art in the Age of Theory explores the intersection of creative practice and theory. Making artwork is a continuous exchange between studio practice and consideration of the social. Through the reading and discussion of influential texts and the exploration of related works and artists, students work with the tools of their choice to create art. Blended and alternative learning approaches are used. This course is normally offered in alternating years.
AR: attendance is required
OR: 4 hours of studio per week
PR: 48 credit hours in VART, Science 1808

3810 Intermediate Time-Based Practice emphasizes concepts, media, and practices related to contemporary art that employ time. Students choose to work with performance, audio, video, relational art, interdisciplinary practices, new media and more. This course may include screenings, performances, and presentations and practice-based research methodologies.
AR: attendance is required
OR: 4 hours of studio per week
PR: 48 credit hours in VART, Science 1808

3821 Open Studio develops individual studio practice and research applied to the production of a self-directed body of work or project. Students work in a discipline or disciplines of their choice, or in an interdisciplinary way. Students define their research and creation based on a proposal, in consultation with their instructor. This course includes practice-based research methodologies.
AR: attendance is required
OR: 4 hours of studio per week
PR: 6 credit hours chosen from VART 3110, VART 3210, VART 3310, VART 3350, VART 3410, VART 3520, VART 3610, VART 3611, VART 3810, Science 1808

3850 Experiential Learning: Community Engagement in the Arts is a directed-studies course that provides students with the opportunity to apply their course-based knowledge in a community context. Under the guidance of their visual arts faculty supervisor, students work with a relevant community partner or on a community-based arts project. This course includes practice-based research methodologies.
AR: attendance is required
PR: 48 credit hours in VART and permission of the Program Chair, Science 1808

3900-3929 Special Topics in Visual Arts introduces a range of intermediate topics that might include: Ideas of Landscape, Word and Image, Installation, Performance, Art and the Environment, Non-Silver Photographic Processes, Book Arts.
AR: attendance is required
OR: 4 hours of studio per week
PR: 48 credit hours in VART, Science 1808

13.34.4 4th Year

4800 Senior Studio Seminar and Professional Practices I focuses on building skills in the understanding and articulation of concepts, research, theory, and practice involved in studio work. There are reading, research and writing components, including a support document. The course covers topics in a range of professional practices needed in the visual arts field, including preparation for graduate school. Visual Arts faculty and visitors offer presentations specific to their areas of expertise.
OR: 4 hours of studio per week
PR: 72 credit hours in VART, Science 1808

4801 Senior Studio Seminar and Professional Practices II continues the process of building skills in the understanding and articulation of concepts, research, theory and practice involved in studio work. Course components include reading, research, writing and preparation for the graduating exhibition. This course covers topics in a range of professional practices with a focus on preparation for a professional visual arts career. Visual Arts faculty and visitors offer presentations specific to their areas of expertise.
OR: 4 hours of studio per week
PR: VART 4800, Science 1808

4900-4929 Special Topics in Visual Arts introduces a range of senior topics that might include: Photo Journalism, Art and Politics, Community Practices, Environmental Practices.
AR: attendance in required
OR: 4 hours of studio per week
PR: 48 credit hours in VART, Science 1808

4950 Independent Senior Studio I develops an independent body of work and a related practice-based research methodology component under the supervision of a visual arts faculty advisor. Students attend regular meetings with their faculty advisor. Students are required to submit work at two critiques with visual arts faculty other than the student's advisor. Students present the body of work and associated practice-based research methodology component to their advisor at the end of semester.
AR: attendance is required
CO: VART 4800
PR: 72 credit hours in VART, Science 1808

4951 Independent Senior Studio II produces an independent body of work and a related practice-based research methodology component under the supervision of a visual arts faculty advisor. Students attend regular meetings with their faculty advisor. Students are required to submit work at two critiques with visual arts faculty other than the student's advisor. Students present the final body of work and associated practice-based research methodology component to their advisor at the end of semester.

13.34.5 Art History

In accordance with Senate's *Policy Regarding Inactive Courses*, the course descriptions for courses which have not been offered in the previous three academic years and which are not scheduled to be offered in the current academic year have been removed from the following listing. For information about any of these inactive courses, please contact the Head of the Department.

The prerequisite for all 3000-level courses is VART 2701 or History 1101 or permission of the Chair, Visual Arts.

No students shall register in any course having an initial digit "4" unless they have successfully completed at least 6 credit hours in Art History courses or by permission of the Chair, Visual Arts.

2700 Art History Survey I (same as History 2700) is the history of art from pre-historic times to the Renaissance.
CR: History 2700

2701 Art History Survey II (same as History 2701) is the history of art from the Renaissance to the twentieth century.
CR: History 2701

3620 Philosophy of Art is an introduction to aesthetics; applications in Visual Arts, music and drama.
CR: Philosophy 2360 or the former 3620

3700 Art History: The Italian Renaissance (same as History 3700) is an overview of the art and architecture of Renaissance Italy with an emphasis upon the historical context in which art was produced.
CR: History 3700

3701 Art History: The Renaissance Outside Italy (same as History 3701) is the Renaissance outside Italy from the late fourteenth century and the International style through the 16th century. As with the Italian Renaissance the art and architecture will be discussed in its historical context.
CR: History 3701

3702-3721 Art History: Special Topics has a range of special topics which might include: Early Renaissance Art, Art of the Later Renaissance, Canadian Art to 1900, 20th C. Canadian Art, American Art to 1900, History

Context and Modern Users.

3820 Religion and the Arts (same as Religious Studies 3820) is an examination of the role of art in the expression of religious ideas, together with a study of specific religious themes and concerns in one or more of the following: literature, film, music, painting, sculpture, and dance.
CR: Religious Studies 3820

4700-4729 Art History: Special Topics has a range of senior topics which might include: British Art and Architecture, Modern Art, Modern Art II, Aesthetics, 17th and 18th Century Art, 19th Century Art, Research Project in Modernism.

4730 Art History: Modern Art I: Precursors to Modernism (same as History 4730) is an examination of the cultural, social, and political forces which, from 1750 to 1850, were to have a major impact on modernity and later modern art.
CO: 6 credit hours in Art History or permission of the Chair of the Visual Arts program
CR: History 4730
PR: 6 credit hours in Art History or permission of the Chair of the Visual Arts program

4731 Art History: Modern Art II: Early Modernism (same as History 4731) is an examination of the various cultural and social forces between 1850 and 1914 which shaped the rise of the Modern movement.
CO: 6 credit hours in Art History or permission of the Chair of the Visual Arts program
CR: History 4731
PR: 6 credit hours in Art History or permission of the Chair of the Visual Arts program

4740 Current Issues in Art - inactive course.

4741 Art Criticism - inactive course.

1 The Memorial University of Newfoundland Code

The attention of all members of the University community is drawn to the section of the University Calendar titled **The Memorial University of Newfoundland Code**, which articulates the University's commitment to maintaining the highest standards of academic integrity.

2 Student Code of Conduct

Memorial University of Newfoundland expects that students will conduct themselves in compliance with University Regulations and Policies, Departmental Policies, and Federal, Provincial and Municipal laws, as well as codes of ethics that govern students who are members of regulated professions. The *Student Code of Conduct* outlines the behaviors which the University considers to be non-academic misconduct offences, and the range of remedies and/or penalties which may be imposed. Academic misconduct is outlined in ***UNIVERSITY REGULATIONS* - Academic Misconduct** in the University Calendar.

For more information about the *Student Code of Conduct*, see www.mun.ca/student.

3 School Description

The School of Human Kinetics and Recreation offers undergraduate and graduate degrees in kinesiology, physical education, and recreation. The School's programs prepare students to meet societal needs for professionals who are able to initiate and manage health and lifestyle-enhancing programs. The School encourages a close working relationship among students, faculty, and staff, and with local and national sport, health, and professional organizations. The co-operative education program provides for the integration of academic and professional knowledge. A full-time academic program officer within the School assists students with decisions related to their academic program. The School prides itself on the extent to which senior undergraduate and graduate students are engaged in teaching, research, and scholarly activity. Many graduates of the School are leaders in the fields of physical education, sport, kinesiology, health, and recreation.

Additional information regarding the School of Human Kinetics and Recreation is available at www.mun.ca/hkr.

Students must meet all regulations of the School in addition to those stated in the general regulations. For information concerning admission/readmission to the University and general academic regulations (undergraduate), refer to ***UNIVERSITY REGULATIONS***.

For information concerning fees and charges, see the Financial and Administrative Services website at www.mun.ca/finance/fees/.

For information concerning scholarships, bursaries and awards, see www.mun.ca/scholarships/scholarships.

4 Description of Programs

All courses of the School are designated by the abbreviation HKR.

4.1 General Degrees

The School of Human Kinetics and Recreation offers five degrees in four program areas. For specific details on each degree refer to the appropriate **Program Regulations - General and Honours Degrees**.

4.1.1 Human Kinetics and Recreation (Co-operative) Degree

www.mun.ca/coop/

A Human Kinetics and Recreation (Co-operative) degree is designed to prepare graduates for careers in a variety of health-related professions, including, but not limited to, health promotion, kinesiology, community and therapeutic recreation, fitness, health and wellness, and lifestyle professions. The **Bachelor of Human Kinetics and Recreation (Co-operative)** degree is comprised of 120 credit hours and three work terms and shall normally be completed on a full-time basis.

4.1.2 Kinesiology Degree

A Kinesiology degree is designed to prepare graduates for careers in ergonomics, fitness, health and wellness, and lifestyle professions. The kinesiology degree program consists of School courses in addition to a flexible choice of elective courses. The **Bachelor of Kinesiology** degree is comprised of 120 credit hours and can be taken on a full-time or part-time basis.

4.1.3 Physical Education Degree

A Physical Education degree is designed to prepare graduates for careers in teaching and related areas.

The **Bachelor of Physical Education** degree is comprised of 120 credit hours and can be taken on a full-time or part-time basis. This program is offered in the teaching and general options.

1. The Teaching Option contains courses in the fundamentals of physical education as well as courses in curriculum planning, teaching methods, and pedagogy relevant to physical education curricula for various grade levels. Within the teaching option students will be placed in an educational setting for some of the course work. Following completion of a physical education degree - teaching option, a student wishing to teach in a school setting normally completes an intermediate/secondary degree program offered by the Faculty of Education. For information regarding admission requirements to the intermediate/secondary programs refer to the **Faculty of Education** section of this Calendar.
2. The General Option is designed to provide basic professional preparation. The general option of the program consists of courses common to the teaching option plus a flexible choice of elective courses in place of the required curriculum and methods course.

4.1.4 Recreation Degree

A Recreation degree is designed to provide students with the opportunity to develop professional competencies in recreation and leisure service management. The optional therapeutic recreation concentration provides professional preparation for the practice of therapeutic recreation. The **Bachelor of Recreation** degree is comprised of 120 credit hours and can be taken on a full-time or part-time basis.

4.2 Honours Degrees

An Honours degree signifies superior academic achievement with specific course work in kinesiology, physical education, and recreation programs. To be considered for an Honours Degree, the student must so indicate on the prescribed "Application for Graduation " form. This form may be obtained on-line at the Memorial Self Service at selfservice.mun.ca. Additional information is available from the Office of the Registrar at www.mun.ca/regoff/graduation For further information on honours degrees see **Program Regulations - General and Honours Degrees**.

4.3 Elective Courses

Elective courses provide students the opportunity to avail of interdisciplinary learning to prepare graduates to serve the present and future needs of individuals and communities in a variety of professional settings related to health and wellness. This complements the expertise and skills developed and practiced in all components of a degree from the School of Human Kinetics and Recreation.

4.4 Work Terms in the Co-operative Program

www.mun.ca/coop

Students registered for work terms are also governed by the *Co-operative Student Handbook*. Prior to registering for the first work term, students must successfully complete the non-credit Professional Development Seminar course.

4.4.1 General Information

- During work terms students are brought into direct contact with the kinesiology, physical education, and recreation professions, exposed to the work place setting, expected to assume ever-increasing responsibility in employment situations as their education advances, and introduced to experiences beyond the scope of those which could be provided in the classroom.
- Students are responsible for finding suitable work placements. The Co-operative Education Office of the School provides resources to assist in this process.
- In addition to a work term, students may register for up to 6 credit hours, although they are advised to consult the School's Academic Program Officer.
- Students are not permitted to drop work terms without prior approval of the Committee on Undergraduate Studies and with the recommendation of the Co-operative Education Office of the School. Students who drop a work term without permission, or who fail to honour an agreement to work with an employer, will be assigned a grade of FAL (fail) for that work term.
- Students who conduct themselves in such a manner as to cause their termination from the job, will be assigned a grade of FAL (fail) for that work term.
- Students are expected to maintain professional ethics, including confidentiality.

4.4.2 Work Term Reports

- A work term report, on a topic approved by the Co-operative Education Office of the School, must be submitted for each work term. The report must be approved by the employer and submitted by the student to the Co-operative Education Office of the School on or before the appropriate deadline as indicated on the Co-operative Education website.
- Late work term reports will not be evaluated unless prior permission for a late work term report has been granted by the Co-operative Education Office of the School.

4.4.3 Evaluation of Work Terms

- Two components are considered in work term evaluation: on-the-job performance and the work term report. Each component is evaluated separately and equally. The overall evaluation of work terms will result in the assignment of one of the following letter grades: PWD (pass with distinction), PAS (pass) or FAL (fail).

4.5 Undergraduate Online Resource

Additional information about the undergraduate program, individual courses and suggested timetables can be found in the School of Human Kinetics and Recreation Undergraduate Online Resource which is available at www.mun.ca/hkr.

4.6 Course Restrictions

1. Students should be aware of a number of credit restrictions. For further information see the Human Kinetics and Recreation course descriptions section found under **Course Descriptions**.
2. Course prerequisites for all courses shall apply.

5 Admission/Readmission Regulations for the School of Human Kinetics and Recreation

In addition to meeting the ***UNIVERSITY REGULATIONS*** students must meet the **Admission/Readmission Regulations for the School of Human Kinetics and Recreation**.

5.1 General Information

1. Entry to programs offered by the School is competitive for a limited number of placements. Meeting the minimum requirements for admission does not guarantee acceptance into the program. The final decision on admission rests with the Admissions Committee of the School.
2. Admission or readmission to the University does not necessarily constitute admission or readmission to any program.
3. Up to three positions per year in the School of Human Kinetics and Recreation may be designated for applicants of Indigenous ancestry who have met the admission requirements of the program. Applicants must send a letter of request to hkr_registrar@mun.ca at the time of application and provide documentation of Indigenous ancestry.

5.2 Application Forms and Deadlines

1. All programs of the School commence in the Fall semester. The deadline for application for admission is March 1.
2. The deadline for application for readmission, for students who were previously admitted to a School of Human Kinetics and Recreation program, is June 1 for the Fall semester, October 1 for Winter, and February 1 for Spring.
3. The application for admission or readmission to programs offered by the School of Human Kinetics and Recreation is submitted online. The application for admission or readmission to the University is submitted online at www.mun.ca/undergrad/admissions/apply.
4. In addition to the application, students applying to the physical education programs must:
   - submit a 250 word autobiographical statement highlighting the applicant's experiences of teaching and learning and demonstrating a commitment to leading a physically active lifestyle. Further information is available from the School's website at www.mun.ca/hkr, and
   - submit a current first aid certificate, and
   - submit documentation of the applicant's swimming ability. Suitable documentation can include proof of successful completion of Red Cross Swim Basics for Adults 1 and 2, or Red Cross Swim Level 8, or other equivalent credential satisfactory to the School. Students unable to submit this documentation at the time of Physical Education admission may be eligible for provisional admission, but should be aware that approved documentation of swimming ability is a prerequisite for HKR 2220, a required course in the Bachelor of Physical Education Year 2.

5.3 Admission Requirements to the School of Human Kinetics and Recreation Programs

Applicants may apply for admission to School programs under the **Categories Of Applicants, Admission Criteria and Other Information** outlined under ***UNIVERSITY REGULATIONS*** - **Admission/Readmission to the University (Undergraduate)**. In addition to meeting these regulations, applicants in the following categories, other than those applying for admission to the Bachelor of Recreation degree program, must meet the additional requirements as indicated below.

5.3.1 High School Applicants

- High school applicants to the kinesiology degree programs must have completed:
  - Level III Laboratory Science with a grade of at least 70%, and one of
  - Level III Academic or Advanced Mathematics and have met the required prerequisites to register for one of Mathematics 1090, 109A/B or 1000. For further visit www.mun.ca/math.

5.3.2 Memorial University of Newfoundland Applicants

- To be eligible for consideration for admission to all programs, students who are attending or have previously attended this University must have a cumulative average of 60% or an average of 65% on their last 30 credit hours.
- Overall academic performance is an important criterion in reaching decisions on applications for admission, and will be considered, in the selection process.
- Students who are attending or have previously attended this University are not required to submit a copy of their transcript with their application(s).

5.3.3 Transfer Applicants

- Applicants seeking admission through transfer from accredited post-secondary institutions must have achieved a minimum overall average of 60% to be considered for admission.
- A student's placement within a program, and requirements needed to complete the program, will be determined on an individual basis at the time of admission. No applicant will be granted placement beyond Academic Term 4.
- Transfer applicants must request that an official transcript showing any completed courses and current registrations be forwarded to the Office of the Registrar. Final transcripts must be submitted upon receipt of final grades.
- A minimum grade of 60% (or equivalent) is required in an equivalent course taken at an institution other than Memorial University of Newfoundland in order to be considered for transfer credit for any HKR course.
- Transfer credit cannot be awarded for the following courses: HKR 3110, HKR 399W, HKR 4605, HKR 4610, HKR 4785, HKR 499W.

5.4 Other Information

1. The School will notify applicants regarding an admission decision to a School program.
2. Students admitted to a program at any level beyond Academic Term 1, without successfully completing all courses required up to that level, must successfully complete those courses prior to the end of their last academic term. Successful completion shall mean a minimum grade of 50% in every non-HKR course and a minimum grade of 60% in every HKR course.
3. Students who have been admitted to one program offered by the School and who wish to change to another program within the School must submit a new application for admission to the program. This application must be submitted to the Office of the Registrar by the March 1 deadline date and will be considered in competition with all other applications.
4. Students admitted full time to a program and who decline the offer of admission or who fail to register for courses during the Fall term of admission will be considered withdrawn from the program. Such students, if they subsequently wish to be considered for admission, must submit a new application for admission to the program. This application must be submitted to the Office of the Registrar by the March 1 deadline date and will be considered in competition with other applications.
5. Students admitted part time to a program and who decline the offer of admission or who fail to register for courses and fail to successfully complete at least 6 credit hours applicable to the degree during each academic year will be considered withdrawn from the program. Such students, if they subsequently wish to be considered for admission, must submit a new application for admission to the program. This application must be submitted to the Office of the Registrar by the March 1 deadline date and will be considered in competition with other applications.
6. While the School of Human Kinetics and Recreation does not require criminal record checks or other screening procedures as a condition of admission to its program, Physical Education students may be required by a school district to submit a Certificate of Conduct before placement in a school setting, such as HKR 3110. Students are encouraged to seek the Certificate of Conduct before registration in HKR 3110. Each Physical Education student is responsible for obtaining a Royal Newfoundland Constabulary or Royal Canadian Mounted Police Certificate of Conduct at the student's own expense. Details are available from the General Office of the School of Human Kinetics and Recreation.

6 Program Regulations - General and Honours Degrees

6.1 Bachelor of Human Kinetics and Recreation (Co-operative)

- The Bachelor of Human Kinetics and Recreation (Co-operative) shall normally be completed on a full-time basis, and includes 120 credit hours, and three work terms as outlined in **Table 1 Bachelor of Human Kinetics and Recreation (Co-operative)**.
- **Critical Reading and Writing (CRW)** and **Quantitative Reasoning (QR)** courses are regulated by the Faculty of Humanities and Social Sciences. Eligible CRW and QR courses are indicated under Faculty of Humanities and Social Sciences, **Course Descriptions**.

A student is encouraged to consider the honours regulations outlined under **Honours Degree**.

Table 1 Bachelor of Human Kinetics and Recreation (Co-operative)

Required Non-HKR Courses (33 Credit Hours)	Required HKR Courses (42 Credit Hours)	Elective Courses (45 Credit Hours)
21 credit hours: Biology 2040 3 additional credit hours in a **Critical Reading and Writing (CRW)** designated course English 1090 or 1000 Psychology 1000, 1001 Sociology 1000 Statistics 2550 or equivalent **12 credit hours (or an Optional Kinesiology Pathway as outlined below):** Biology 2041 3 additional credit hours in Psychology 3 credit hours in a **Quantitative Reasoning (QR)** designated course 3 credit hours in Sociology at the 2000 level **Optional Kinesiology Pathway (12 credit hours):** Chemistry 1050 or 1200 Chemistry 1051 or 1001 Mathematics 1000 Physics 1020	HKR 2000 HKR 2300 HKR 2310 HKR 2320 HKR 2500 HKR 3330 HKR 3340 HKR 3400 HKR 3410 HKR 3555 HKR 3910 HKR 3920 HKR 4600 3 credit hours chosen from HKR 4410, 4420, 4575, 4685 HKR 1123, 299W, 399W, 499W	15 credit hours from non-HKR elective courses of which no more than 9 credit hours can be at the 1000 level. 27 credit hours from HKR elective courses of which no more than 12 credit hours can be at the 2000 level and a minimum of 3 credit hours must be at the 4000 level. 3 additional credit hours in either a non-HKR elective course at the 2000 level or above, or a HKR elective course at the 3000 level or above. A student may choose to pursue an **Optional Pathway** as outlined below in **Table 2 Bachelor of Human Kinetics and Recreation (Co-operative) Optional Pathways**

6.1.1 Optional Pathways

A student may select from one of the five optional pathways. A pathway provides students with the opportunity to focus their studies. Particular attention should be paid to the necessary prerequisites when scheduling courses. These pathways are not binding. Students are not required to pursue a pathway, and even if they do, it is not reflected on their transcripts or degree parchments. Students who do not pursue a pathway must ensure the 120-credit-hour minimum degree requirements are met in accordance with **Table 1 Bachelor of Human Kinetics and Recreation (Co-operative)** above.

Table 2 Bachelor of Human Kinetics and Recreation (Co-operative) Optional Pathways

Community Recreation	Health Promotion	Kinesiology	Therapeutic Recreation
HKR 2100 HKR 2505 HKR 2515 HKR 2545 HKR 2585 HKR 3100 HKR 3535 HKR 4485	HKR 2505 HKR 2515 HKR 2585 HKR 3535 HKR 3575 HKR 4485 3 credit hours from Sociology at the 2000 level or above	HKR 2340 HKR 2600 HKR 2703 HKR 3300 HKR 3310 HKR 3320 HKR 4702 HKR 4703	HKR 2505 HKR 2515 HKR 2585 HKR 3485 HKR 3515 HKR 3685 HKR 3785 HKR 4485 HKR 4785 Psychology 3640

6.2 Bachelor of Kinesiology

- The Bachelor of Kinesiology may be completed on a full-time or part-time basis and requires 120 credit hours as outlined in **Table 3 Bachelor of Kinesiology**.
- **Critical Reading and Writing (CRW)** courses are regulated by the Faculty of Humanities and Social Sciences. Eligible CRW courses are indicated under Faculty of Humanities and Social Sciences, **Course Descriptions**.

A student is encouraged to consider the honours regulations outlined under **Honours Degree**.

Table 3 Bachelor of Kinesiology

Required Non-HKR Courses (30 Credit Hours)	**Required HKR Courses (57 Credit Hours)**	**Elective Courses (33 Credit Hours)**
Biology 2040 Chemistry 1050, 1051, or 1200, 1001 3 credit hours in a **Critical Reading and Writing (CRW)** designated course English 1090 or 1000 Mathematics 1000 Physics 1020 or 1050 Psychology 1000, 1001 Statistics 2550 or equivalent	HKR 2000 HKR 2300 HKR 2310 HKR 2320 HKR 2340 HKR 2500 HKR 2600 HKR 2703 HKR 3300 HKR 3310 HKR 3320 HKR 3340 HKR 3400 HKR 3410 HKR 4330 HKR 4410 HKR 4600 HKR 4702 HKR 4703	**33 credit hours of elective courses of which 27 credit hours must be at the 2000 level or above:** 12-15 credit hours in HKR elective courses other than those identified as required HKR courses. 18-21 credit hours in non-HKR elective courses other than those identified as required non-HKR courses.

6.3 Bachelor of Physical Education

- The Bachelor of Physical Education may be completed on a full-time or part-time basis and requires 120 credit hours as outlined in **Table 4 Bachelor of Physical Education**.
- This program is offered in the Teaching and General degrees.
- **Critical Reading and Writing (CRW)** courses are regulated by the Faculty of Humanities and Social Sciences. Eligible CRW courses are indicated under Faculty of Humanities and Social Sciences, **Course Descriptions**.

A student is encouraged to consider the honours regulations outlined under **Honours Degree**.

Table 4 Bachelor of Physical Education

Required Non-HKR Courses (27 Credit Hours)	**Required HKR Courses (63 Credit Hours)**	**Elective Courses (30 credit hours)**
3 credit hours in a **Critical Reading and Writing (CRW)** designated course English 1090 or 1000 Mathematics 1000 and 3 credit hours in an elective course, or 6 credit hours chosen from Mathematics 1050, 1051, 1052, 1053, 1090, 109A/B. Psychology 1000, 1001 6 credit hours in a laboratory science (Biology, Chemistry or Physics is recommended) Statistics 2550 or equivalent	HKR 2000 HKR 2004 HKR 2100 HKR 2210 HKR 2220 HKR 2300 HKR 2310 HKR 2320 HKR 2500 HKR 3110 (Students following the Bachelor of Physical Education (General) degree must replace HKR 3110 with 6 credit hours in HKR elective courses at the 2000 level or above.) HKR 3220 HKR 3300 HKR 3310 HKR 3320 HKR 3340 HKR 3400 HKR 4210 HKR 4220 HKR 4420 HKR 4600	6 credit hours in HKR elective courses at the 2000 level or above. A minimum of 24 credit hours in a Minor or an acceptable **Academic Discipline**. In choosing the minor students must follow the minor regulations of the appropriate Faculty or School. Students must select from and follow the **Academic Discipline** requirements of the **Faculty of Education Bachelor of Education (Intermediate/Secondary), Admission Regulations**. No more than 6 credit hours at the 1000 level may be included in the 24 credit-hour **Academic Discipline**. At least 3 credit hours at the 3000 level or higher must be included in the 24 credit-hour **Academic Discipline**.
Additional Requirement At the time of graduation, students require proof of current certification in first aid and CPR. These certifications must be submitted to the School's Academic Program Officer.		

6.4 Bachelor of Recreation

- The Bachelor of Recreation may be completed on a full-time or part-time basis and requires 120 credit hours as outlined in **Table 5 Bachelor of Recreation**.
- An **Optional Therapeutic Recreation Concentration** is available in this program.
- An **Optional Minor** is available in this program. In completing the minor students must follow the minor program regulations listed under the appropriate Faculty or School.
- **Critical Reading and Writing (CRW)** courses are regulated by the Faculty of Humanities and Social Sciences. Eligible CRW courses are indicated under Faculty of Humanities and Social Sciences, **Course Descriptions**.

A student is encouraged to consider the honours regulations outlined under **Honours Degree**.

Table 5 Bachelor of Recreation

Required Non-HKR Courses (24 Credit Hours)	Required HKR Courses (54 Credit Hours)	Elective Courses (42 Credit Hours)
3 credit hours in a **Critical Reading and Writing (CRW)** designated course English 1090 or 1000 Geography 1050 Psychology 1000, 1001 Sociology 1000 3 credit hours in Sociology at the 2000 level Statistics 2550 or equivalent	HKR 2000 HKR 2100 HKR 2300 HKR 2500 HKR 2505 HKR 2515 HKR 2545 HKR 2585 HKR 3100 HKR 3340 HKR 3400 HKR 3515 HKR 3535 HKR 3555 HKR 3575 or 3785 HKR 4485 HKR 4575 or 4685 HKR 4600	**42 credit hours of elective courses of which 30 credit hours must be at the 2000 level or above:** 15-18 credit hours in HKR elective courses at the 2000 level or above 24-27 non-HKR elective courses. **Optional Minor** In completing the minor students must follow the minor program regulations listed under the appropriate Faculty or School. **Optional Therapeutic Recreation Concentration** Students interested in pursuing a therapeutic recreation concentration shall normally complete the following among the 42 elective credit hours listed above: HKR 2311, or 2310 and 2320 HKR 3485 or 3685 Psychology 3640

6.5 Honours Degrees

1. An honours degree signifies superior academic achievement with specific course work in kinesiology, physical education, and recreation programs.
2. An application for admission to any of the honours degrees is not required. Rather, students indicate on the prescribed application for graduation form that they wish to be considered for an honours degree.
3. To receive an honours degree, a student shall:
   - meet the requirements of the general degree;
   - successfully complete HKR 4600, 4605 and 4610 with a minimum grade of 80% in each course;
   - obtain an overall average of 80% or better on all HKR courses for the degree; and
   - obtain an overall average of 70% on the non-HKR credit hours required for the degree.
4. A student for the honours degree who does not fulfill these conditions but fulfills the requirements for the general degree shall be awarded the general degree.
5. A student may, with the approval of the Committee on Undergraduate Studies, repeat or substitute up to three courses in order to meet the requirements of clause 3 above. In counting repeats, each attempt at the same course will count as one course towards the maximum. That is, the same course, repeated three times, would place a student at the maximum and no additional repeats or substitutions would be allowed.
6. Students are not permitted to repeat or substitute work terms for the purpose of meeting the academic requirements for honours degrees.
7. A student who, for academic reasons, has been required to withdraw from a program offered by the School will not be eligible for the honours degree.

7 Promotion Regulations

7.1 General Information

- In addition to meeting the promotion regulations for the School of Human Kinetics and Recreation all students must meet the general academic regulations (undergraduate). For further information refer to ***UNIVERSITY REGULATIONS*** **- General Academic Regulations (Undergraduate)**.
- Success in the programs depends on meeting the requirements of both academic terms and work terms.
- To be promoted a student must, in addition to obtaining the requisite grades and average, complete and deliver all work term reports as required.

7.2 Promotion Status

- A student's promotion status at the end of each term will be in one of the following four categories:

7.2.1 Clear Promotion

Clear Promotion means a student can proceed to the next term without restrictions.

- Students completing an academic term will receive a Clear Promotion by obtaining an overall average of at least 60%, with a numeric grade of at least 60% in each HKR course, and a numeric grade of at least 50% in each non-HKR course.
- Students completing a work term will receive a Clear Promotion by obtaining a PAS (pass) or a PWD (pass with distinction) in the work term.
- Students completing courses in addition to a work term must obtain a PAS (pass) or a PWD (pass with distinction) in the work term and an overall average of at least 60%, with a numeric grade of at least 60% in each HKR course, and at least 50% in each non-HKR course.

7.2.2 Probationary Promotion

Probationary Promotion designates less than a Clear Promotion but requires an overall average of at least 60%, with a numeric grade of at least 50% in each course, and not more than one HKR course with a numeric grade below 60%.

- A student with Probationary Promotion at the end of Academic Term 1 may be permitted to enter Academic Term 2 but must have Clear Promotion by the end of Academic Term 2.
- A student with Probationary Promotion from any academic term may continue to the subsequent work term under the condition that entry into the next academic term is not allowed until the student's status is changed to Clear Promotion.
- A student with Probationary Promotion at the end of the final academic term will not be recommended for graduation until the student's status is changed to Clear Promotion.
- To change Probationary Promotion to Clear Promotion the student must satisfy the School that the student is competent in the subject of the HKR course in which the student has failed to achieve 60%. This will normally entail re-examination, after which the student will be declared to have passed or failed a test of competency in the subject concerned. Re-examination is normally available only to a student who has submitted all required coursework during the semester. No numerical grade will be assigned in the re-examination, and the original grade submitted for the course will not be changed.
- Re-examination may be written, oral, practical or a combination of formats and will be at a time determined by the School.
- Only one re-examination is permitted per course.
- A maximum of two re-examinations is permitted in a student’s degree program. If a student is awarded a grade of less than 60% in a third HKR course, the student will be required to repeat or replace the course.
- It is the responsibility of the student to arrange for re-examination before the end of the first week of the student’s next academic term. If re-examination is not arranged in accordance with this time frame, the student will be required to repeat or replace the course.
- The School may recommend that the student complete remedial studies before re-examination.

7.2.3 Probationary (A) Promotion

Probationary (A) Promotion designates failure to successfully complete the required components of HKR 2210, 2220, 3210, 3220, 3920, 4210 and 4220 in a given term.

- Probationary (A) Promotion will be given upon the recommendation of the course instructor/Co-ordinator and/or the Committee on Undergraduate Studies and only for extreme circumstances, duly authenticated.
- A student with Probationary (A) Promotion in any term will be permitted to enter subsequent terms and will receive a letter grade of INC (incomplete) in the course. A final numeric grade will not be received until the required components of each course have been successfully completed. Academic Council will grant this status, taking into account the specific factors involved in each case. This status is not automatic, as failure to successfully complete all required components of each course would normally result in a failing grade.
- To change Probationary (A) Promotion to Clear Promotion, a student must successfully complete the activity course(s), with a minimum grade of 60%, within one academic year of the date on which the original grade(s) of Incomplete was (were) recorded.
- A student with Probationary (A) Promotion at the end of the final academic term will not be recommended for graduation until the student has successfully completed all required components of all courses, and the student's status is changed to Clear Promotion.

7.2.4 Promotion Denied

Promotion Denied indicates Clear Promotion is not achieved each term or following probation.

- A student with Promotion Denied status will be required to withdraw from the School. Students with Promotion Denied status may apply for readmission to the program after two semesters. A student will normally be readmitted into the term from which promotion was denied.
- A student who is denied promotion for failing a work term may be considered for readmission after the lapse of two semesters, at which time the student will be required to complete a further work term with satisfactory performance before being admitted to any further academic term in the School. A work term may be repeated only once, and not more than two work terms may be repeated in

the entire program.

- A student who has been denied promotion as a result of having failed a work term and who, in the opinion of the School, can benefit from a remedial program, may be permitted an extension of time not to exceed the end of the registration period of the subsequent semester to complete the requirements of the work term.
- A student who is denied promotion as a result of grades received in HKR and non-HKR courses will be required to repeat all HKR courses in which they obtained a numeric grade of less than 60% in that term. A non-HKR course may be replaced by a course acceptable in the student's program.
- A student with Promotion Denied status at the end of the final academic term will not be recommended for graduation until the student's status is changed to Clear Promotion.

7.3 Other Information

- The Committee on Undergraduate Studies will determine each student's promotion status at the end of each term and will make its recommendations to Academic Council.
- Academic Council may promote a student notwithstanding the promotion regulations given above. A decision of this nature will be made only for reasons acceptable to Academic Council and in the case of a student thought likely to succeed in future terms.
- A student shall be permitted only one readmission to the School.
- Students may be required to withdraw from their program at any time, if, in the opinion of the School, they are unlikely to benefit from continued attendance.

8 Graduation

Upon meeting the qualifications for the program, students must apply to graduate on the prescribed "Application for Graduation" form. This form may be obtained on-line at the Memorial Self Service at selfserve.mun.ca. The deadlines for application submission are July 15 for Fall (October) graduation, January 3 for Winter (February) in-absentia graduation, and January 15 for Spring (May) graduation. Applications received after these dates will be processed as time and resources permit. Additional information is available from the Office of the Registrar at www.mun.ca/regoff/graduation. Information regarding Convocation, including the dates of the ceremony, is available at www.mun.ca/convocation.

9 Waiver of School Regulations

Every student has the right to request waiver of School regulations. Students wishing waiver of University academic regulations should refer to ***UNIVERSITY REGULATIONS*** **- General Academic Regulations (Undergraduate) - Waiver of Regulations.**

9.1 General Information

- The School reserves the right in special circumstances to modify, alter, or waive any School regulation in its application to individual students where merit and equity so warrant in the judgment of the Committee on Undergraduate Studies of the School.
- All requests, other than requests for waiver of a prerequisite or co-requisite of a School course, must be submitted to the Committee on Undergraduate Studies of the School for consideration. Waiver of a School course prerequisite or co-requisite may be granted by the course instructor.
- Students requesting a waiver of a School regulation, other than requests for waiver of a prerequisite or co-requisite of a School course, must submit their request in writing to the Chair of the Committee on Undergraduate Studies on the prescribed form which is available from the School's general office. Medical and/or other documentation to substantiate the request must be provided. Medical documentation should normally be in the form of the Student Health Certificate, available at www.mun.ca/regoff/forms.php.
- Any waiver granted does not reduce the total number of credit hours required for the degree.
- In addition, regardless of any waiver granted, students enrolled in a co-operative program must successfully complete a minimum of two work terms.

10 Appeal of Decisions

Any student whose request for waiver of School regulations has been denied has the right to appeal. For further information refer to ***UNIVERSITY REGULATIONS*** **- General Academic Regulations (Undergraduate) - Appeal of Decisions**.

11 HKR Courses Available to Students Not Enrolled in a Program Offered By the School

11.1 Regulations for Students Not in a Program Offered By the School

- Students not in a program offered by the School may register for a maximum of 15 credit hours only from the following list if space is available.
- Students who have been required to withdraw from a program offered by the School may not register for any HKR course.
- Students not in a School program will be required to drop any HKR course(s) in excess of 15 credit hours and may be subject to academic and financial penalties.

11.2 HKR Courses

1000 Fitness and Wellness
1001 Resistance Training for Health and Activity
2000 Introduction to Kinesiology, Physical Education and Recreation
2002 Coaching
2300 Growth and Development
2310 Human Anatomy
2311 Introduction to Anatomy and Physiology
2320 Primary Human Physiology
2515 Social Psychology of Leisure

2585 Foundations of Therapeutic Recreation
2600 Introduction to Human Nutrition
2601 Physical Activity, Obesity, and Weight Control
3360 Care and Prevention of Athletic Injuries
3400 Social Determinants of Health and Physical Activity
3410 Sociology of Physical Activity and Sport
3490 Gender in Sport and Physical Activity
3535 Legal Aspects of Leisure and Recreation Services
3595 Gender and Leisure
4330 Social Psychology of Sport, Physical Activity and Recreation

12 Course Descriptions

In accordance with Senate's *Policy Regarding Inactive Courses*, the course descriptions for courses which have not been offered in the previous three academic years and which are not scheduled to be offered in the current academic year have been removed from the following listing. For information about any of these inactive courses, please contact the Dean of the School.

All courses of the School are designated by HKR.

1000 Fitness and Wellness is an introduction to the concepts of fitness and wellness, and the relationships among physical activity, fitness, wellness, quality of life, and longevity.
UL: not applicable towards any of the degrees offered by the School

1001 Resistance Training for Health and Activity is an introduction to resistance training exercises, programs, and principles.
CR: HKR 2340, the former HKR 4320
UL: not applicable towards the human kinetics and recreation (co-operative), kinesiology or physical education degrees offered by the School

1123 Professional Development Seminars are offered during the Fall semester prior to a student's first work term. These seminars introduce the co-operative education process and prepare the student for work terms. These seminars are graded PAS or FAL based on attendance and participation.
AR: attendance is required
CH: 0
LC: as scheduled

2000 Introduction to Kinesiology, Physical Education and Recreation introduces the philosophical, scientific, socio-cultural, historical concepts, and influences in kinesiology, physical education, and recreation.

2001 Introduction to Physical Education for Education Students provides students a general overview of the role that physical education and active living play in the overall development of primary and elementary students, and in the creation of positive learning environment in schools. This course is intended for students in the primary/elementary program offered by the Faculty of Education.
CR: HKR 3110
PR: admission to the Bachelor of Education (Primary/Elementary) offered by the Faculty of Education
UL: not applicable towards any of the degrees offered by the School

2002 Coaching introduces the various methods, principles, and theories used to coach developing athletes in various sport settings. Factors such as the coach's role, planning, analysing and developing skills, sport safety, and physical preparation will be presented with an emphasis on attaining competency in these areas.

2004 Enhancing Performance in Physical Activity gives an overview of the various models, principles, and theories used to explain and predict ways in which athletes and exercisers conduct themselves in various sport settings. Selected intervention techniques to enhance performance will be presented.

2005 Personal Stress Management is designed to provide students with an introduction to stress and to explore the relationship between exercise, fitness and physical activity and stress management. It describes how to reorganize one's life by presenting a systematic analysis of stress and coping mechanisms appropriate to different stages of life. The stress coping mechanisms will be presented with an emphasis on application. Completion of this course does not qualify students as stress management counsellors. Students interested in this field are advised to contact the Department of Psychology for information on careers in counselling.
CO: Psychology 1000 and 1001
PR: Psychology 1000 and 1001

2100 Introduction to Organization and Administration introduces the basic administrative functions in a work setting in physical education and/or recreation. The laboratory sessions will assist students to develop skill in the basic computer applications relevant to these functions.
LH: 2

2210 Physical Activities Course: Physical and Health Literacy employs the conceptual approach of movement education (i.e. concepts, skills, and strategies) through a wide variety of physical activities that focus on the development of the whole person. Socially-responsible leadership and inclusive education will also be emphasized.
AR: attendance is required. Students who are absent more than six class hours may be required to withdraw from the course and will receive a letter grade of DRF and a numeric grade of 0.
LC: as scheduled
LH: as scheduled

2220 Physical Activities Course: Active Living may employ a number of teaching methods in promoting lifelong active living to understand knowledge, skills, attitudes, and behaviours that promote active participation, physical fitness, and safety in various physical activity contexts (e.g., gymnastics and play) and environments (e.g., in water and on land). Emphasis will be placed on the language and practice of the conceptual approach. Concepts, skills, and strategies will be emphasized.
AR: attendance is required
LC: as scheduled
LH: as scheduled
OR: Red Cross Swim Basics for Adults 1 and 2, or Red Cross Swim level 8, or equivalent
PR: HKR 2210

2300 Growth and Development is an introductory study of human growth and developmental factors and their influence on the learning of motor skills.

2310 Human Anatomy is a study of the structure of the human body with emphasis on selected systems (endocrine, neural, muscular, skeletal, cardiovascular, respiratory).
CR: HKR 2311
LH: 2

2311 Introduction to Anatomy and Physiology is designed to provide students with general overview of the anatomy and physiology of the human body. Students will explore skeletal, muscular, neural and cardiorespiratory systems in addition to a very brief introduction to cell structure and 'cellular' muscle function.
CR: HKR 2310, HKR 2320
UL: not applicable towards the human kinetics and recreation (co-operative), kinesiology or physical education degrees offered by the School

2320 Primary Human Physiology is a study of bodily functions with emphasis of selected systems (endocrine, neural, muscular, cardiovascular, respiratory).
CR: HKR 2311
LH: 2

2340 Fitness Leadership (formerly HKR 4320) prepares professionals in the administrative, interpretive, instructional, interpersonal, and pedagogic competencies required for and associated with fitness testing, prescription, teaching, and leadership.
CR: HKR 1001, the former HKR 4320

2410 Historical and Comparative Physical Education - inactive course.

2420 Doping in Sport - inactive course.

2500 Diversity & Inclusion provides students with a broad multi-disciplinary perspective on diversity and inclusion for a global society through discussion of theory, research, and practice. We will explore how elements of the social structure construct categories of race, class, gender, sexuality, ability, size, religion, and age have been transformed into systems of oppression and privilege.

2505 Recreation Programming and Evaluation introduces the student to a variety of methodologies, skills, and materials for planning, developing, implementing, and evaluating professional recreation programs for diverse populations in a variety of settings.

2515 Social Psychology of Leisure introduces the personality and social factors that shape how people experience leisure. Course materials will focus on life cycle theory, intrinsic and extrinsic motivation, perceived freedom, constraints theory, and other social psychological theory related to leisure.

AR = Attendance requirement; CH = Credit hours are 3 unless otherwise noted; CO = Co-requisite(s); CR = Credit can be retained for only one course from the set(s) consisting of the course being described and the course(s) listed; LC = Lecture hours per week are 3 unless otherwise noted; LH = Laboratory hours per week; OR = Other requirements of the course such as tutorials, practical sessions, or seminars; PR = Prerequisite(s); UL = Usage limitation(s).

2545 Introduction to Outdoor Recreation and Education gives an overview of the foundational principles of outdoor education and recreation as they pertain to philosophy, wilderness ethics, professional preparation, movement through wildlands, environmental hazards, navigation, and safety. Students will participate in a sampling of outdoor education and recreation activities during the course including a three-day field trip.
AR: attendance is required. Students who are absent more than six hours may be required to withdraw from the course and will receive a letter grade of DRF and a numeric grade of 0.
LC: as scheduled
PR: HKR 2505

2585 Foundations of Therapeutic Recreation is designed to examine a variety of aspects of therapeutic recreation from both a practical and theoretical perspective. Topics will include the history, philosophies, and theories underlying therapeutic recreation, therapeutic recreation models, essential skills for the therapeutic recreationist and ethical considerations for therapeutic recreation. Diverse groups (e.g. adults, youth, disadvantaged and disabled) and settings (e.g. community, schools, institutions, and workplace) suitable for therapeutic recreation will be discussed.

2600 Introduction to Human Nutrition (same as Biochemistry 2600) gives an overview of human nutrition with an emphasis on topics of current interest. Students will gain an understanding of nutrition in the context of health maintenance across the life span. Topics covered will include nutrition during pregnancy, nutrition for infants, Canadian Recommended Nutrient Intake/Dietary Reference Intake, weight loss and weight gain, nutriceuticals, and ergogenic aids.
CR: Biochemistry 2600

2601 Physical Activity, Obesity, and Weight Control explores the relationship between physical activity, obesity, and morbidity. Emphasis will be placed on the incidence and prevalence of obesity, environmental and genetic factors affecting obesity, and mechanisms of weight and body composition modification.

2703 Introduction to Human Factors is an introduction to the field of human factors, the field that studies aspects of human movement, health, safety, and performance in the workplace. This will include an introduction to the methods of detection, evaluation, and the physiological changes arising from hazards (e.g. inappropriate levels of noise, vibration, and illumination) in the workplace. The course will also examine overuse injuries in workplace studied in the context of basic biomechanics and function of the musculo-skeletal system.
CO: HKR 2320 and Physics 1020
LH: 2
PR: HKR 2310

299W Work Term 1 offers an opportunity for students to learn, develop, and practice high standards of professional behaviour and performance in the work environment. A student is required to submit a personal job diary and a work term report which should, at a minimum, reflect a clear understanding of job events and work place expectations and show reasonable competence in written communication skills.
CH: 0
LC: 0
PR: HKR 1123

3002 Advanced Coaching is an advanced study of the various methods, principles, and theories used to coach athletes in various sport settings. Topics such as planning, the coach's role, analysing, and developing skills, mental training, physical preparation, and development of a personal coaching plan will be studied with an emphasis on attaining competency in these areas. Practical coaching experience is a required component of the course.
LH: 3 Students will participate in practical coaching situations from which coaching journals will be developed for course evaluation.
PR: HKR 2002

3100 Advanced Organization and Administration introduces advanced organizational and administrative competencies and functions within the professional fields of recreation and physical education. Students will learn about facility operations and management and the financial management of public, non-profit, and private organizations. Students will study the planning and overseeing of facilities, facility maintenance operations, facility rentals and partnerships, understanding and interpreting basic accounting documents, pricing programs and services, grants and proposal writing.
PR: HKR 2100

3110 Curriculum Development and Teaching Methods gives an overview, through a blend of theory and practical experience, of curriculum development and teaching methods as they apply to primary/elementary level physical education.
CH: 6
CO: HKR 3300
CR: HKR 2001
LH: 9
PR: HKR 2000, 2210, 2300, 2310, 2320 and 3340

3210 Physical Activities Course: Group Exercise, Net/Wall and Health Related Fitness covers activities such as volleyball, tennis, badminton, plus a selection of other net & wall games. A number of teaching methods may be employed and emphasis will be placed on the language and practice of the conceptual approach. Concepts, skills, and strategies will be emphasized.
AR: attendance is required. Students who are absent more than six class hours may be required to withdraw from the course and will receive a letter grade of DRF and a numeric grade of 0.
LC: as scheduled
LH: as scheduled
PR: HKR 2210

3220 Physical Activities Course: Summer Activities and Teaching Leadership through Physical Activity may include canoeing, orienteering, lightweight camping, and an over-night canoe trip. A number of teaching methods may be employed. Concepts, skills, and strategies will be emphasized.
AR: attendance is required
LC: as scheduled
LH: as scheduled
PR: HKR 2210, HKR 2220, HKR 3340

3221 Wilderness First Aid for Outdoor Leaders provides a minimum standard for outdoor professionals, guides and instructors who work in a wilderness setting. Course content extends beyond urban-based first aid programs to include elements inherent in leading groups in the outdoors and guiding wilderness adventures. Special emphasis is placed on prevention of injuries, accident scene management, leadership, leader responsibility and liability, advanced first aid kits, wound management and managing the trauma victim. CPR is included in this course.

3300 Motor Learning gives an overview of motor learning and performance variables and their application to the teaching of physical skills, and will investigate motor control issues related to skill instruction.
PR: HKR 2300

3310 Physiology of Exercise covers the physiological responses of the metabolic, neuromuscular, and cardiorespiratory systems at rest and during acute and chronic activity.
LH: 3
PR: HKR 2310 and 2320; or Biochemistry 311A and 311B; or Nursing 1002 and 1012; or the former Pharmacy 3201 and 3202

3320 Introduction to Biomechanics is the analysis of human movement; the mechanics of motion and the general application of kinesiology.
CO: HKR 2320
LH: 2
PR: HKR 2310 It is strongly recommended that students successfully complete Physics 1020 prior to enrolling in this course

3330 Health Issues I introduces students to the profession of health promotion. Students will explore the historical, social, political, and cultural contexts of health promotion, while gaining a better understanding of the models and theoretical frameworks that help to inform health promotion and the process of developing, implementing and evaluating health promotion programs.

3340 Adapted Physical Activity presents an overview of current practices, philosophies, and issues related to physical activity and recreation for persons with disabilities. Knowledge and understanding of various disabling conditions and consequent needs of persons with disabilities, including health, safety and fitness, and how these needs may be met in terms of physical activity will be emphasized.

3350 Health Issues II - inactive course.

3360 Care and Prevention of Athletic Injuries is a basic introduction to the field of athletic therapy and sports medicine. The content focuses on the prevention and care of sports injuries and covers topics such as preventive screening, safe environments, on the spot assessment and First Aid, legal responsibility, and supportive taping/wrapping.
PR: HKR 2310 and a Basic First Aid Course

3400 Social Determinants of Health and Physical Activity provides students with a social, political, economic, environmental, and cultural perspective on health and health inequalities. A concentrated look at contemporary health issues using the social determinants of health model will equip students with critical skills necessary to consider health issues beyond physical pathologies.

3410 Sociology of Physical Activity & Sport (same as Sociology 3410) is an analysis of functions of physical activity and sport in Canadian and North American society. Physical activity and sport will be viewed through social organization, social processes, social problems, socialization and stratification, and violence.
CR: Sociology 3410

3485 Therapeutic Recreation Service Delivery focuses on issues related to the delivery of therapeutic recreation services. In particular, the following topics will be addressed: documentation in therapeutic recreation; client

assessment issues; therapeutic recreation program planning (identifying client needs, selecting appropriate interventions, task and activity analysis, planning change-oriented programs, writing behavioural objectives, etc.); program and client evaluation; written plans of operation.
PR: HKR 2585

3490 Gender in Sport and Physical Activity - inactive course.

3505 Adventure Programming - inactive course.

3515 Inclusive and Therapeutic Recreation in Outdoor Settings provides an introduction to current philosophy, issues, and practices relating to inclusive and therapeutic recreation in outdoor settings. This course is designed to provide students with the knowledge and skills necessary to practice inclusive and therapeutic recreation in outdoor settings.
CO: HKR 2545
PR: HKR 2585

3525 Canadian Recreation Delivery Systems - inactive course.

3535 Legal Aspects of Leisure and Recreation Services provides students with an opportunity for in-depth study of legal issues related to the operation of leisure services and facilities. Issues of tort and contract liability, employment related legal aspects, human rights and freedoms, and administrative procedures involved in property acquisition, law enforcement, and risk management are the topics of this course.
PR: HKR 2515

3545 Outdoor Recreation Leadership acquaints students with the breadth, depth, and scope of outdoor recreation leadership including a detailed examination of theories, principles, and practices. The course provides opportunities for individual students to develop, practice, and receive feedback on their outdoor leadership skills. The course includes a required field experience in outdoor recreation leadership.
PR: HKR 2505 or HKR 3220

3555 Outdoor Recreation and Society gives an overview of outdoor recreation principles, theories, and practices and their influence on health and society. This course examines the recreational use of natural settings, management of outdoor resources, the value of protected areas, and the health benefits of outdoor activity.
PR: HKR 2505

3565 Tourism/Commercial Recreation examines behavioural factors influencing tourism; promotion of commercial recreation attractions, provincial strategies in travel and tourism, problems of leisure travel, stability of entrepreneurial ventures in tourism, and research and planning strategies relevant to commercial ventures.

3575 Community Development and Recreation introduces various theoretical perspectives on community organization and development, as well as methods available to the recreation practitioner to facilitate the development of recreation services in communities. This course examines, in particular, recreation services delivery which involves community residents and groups in recreation program decision-making and implementation.
CR: HKR 3785
PR: HKR 2505, HKR 2515

3595 Gender and Leisure provides students with an opportunity to examine, understand and appreciate critically the influences of gender on leisure. The student will be expected to analyse, synthesize, and evaluate a wide range of historical, cultural, philosophical, and socio-psychological issues that have shaped the nature and scope of participation in leisure.

3685 Assessment and Documentation in Therapeutic Recreation examines the assessment and documentation components of the therapeutic recreation process. Students will focus on both the oral and written communication skills necessary to carry out these tasks successfully. Active listening, documentation with correct terminology, and data interpretation for treatment services will be developed through lecture and fieldwork.
PR: HKR 2585

3785 Community Development and Recreation in Therapeutic Recreation Settings introduces various theoretical perspectives on community organization and development, as well as methods available to the therapeutic recreation practitioner to facilitate the development of recreation services in communities. Various issues such as poverty, ethnicity, and disability will be addressed. This course employs an ecological perspective in examining therapeutic recreation service delivery which involves community residents and groups in recreation program decision-making and implementation. The interconnectedness between leisure education, recreation and health and community development is discussed.
CR: HKR 3575
PR: HKR 2505, HKR 2515

3910 Exercise Psychology will provide a broad understanding of Exercise Psychology. Emphasis will be placed on understanding patterns of physical activity participation, motives and barriers influencing exercise and physical activity, theories and models of exercise behavior, intervention strategies aimed at modifying exercise behaviour, psychosocial influences and consequences of exercise, as well as the impact of exercise on different mental health states (e.g., depression, anxiety, emotional well-being).

3920 Physical Activities Course: Health Promotion provides students a general overview of the role that physical activity plays in one's health and wellness. Students will gain experiential learning opportunities in applying health promotion knowledge, skills, attitudes, and behaviours within various types and contexts of physical activity.
AR: attendance is required
UL: not applicable towards any of the physical education degrees offered by the School

399W Work Term 2 offers an opportunity for students to further expand and develop professional knowledge and skills, while demonstrating the ability to accept increased responsibility and challenge in the work place. A student is expected to demonstrate competence in written communication skills through the maintenance of a personal job diary and the submission of a formal report demonstrating the student's ability to effectively gather, analyse, organize, and present information regarding a specific aspect of the work term position.
CH: 0
LC: 0
PR: HKR 1123 and 299W

4210 Physical Activities Course: Winter Activities includes outdoor activities such as winter travel methods emphasizing cross-country skiing, snowshoeing, navigational skills, winter survival/camping, and overnight winter camping. A number of teaching methods may be employed and emphasis will be placed on the language and practice of the conceptual approach. Concepts, skills, and strategies will be emphasized.
AR: attendance is required. Students who are absent more than six class hours may be required to withdraw from the course and will receive a letter grade of DRF and a numeric grade of 0.
LC: as scheduled
PR: HKR 2210, HKR 2220, HKR 3220

4220 Physical Activities Course: Games and Activities includes activities such as target, net/wall, striking/fielding, territorial games and activities, Indigenous games and activities as well as those from multicultural perspectives. A number of teaching methods may be employed and emphasis will be placed on the language and practice of the conceptual approach. Concepts, skills, and strategies will be emphasized.
AR: attendance is required
LC: as scheduled
LH: as scheduled
PR: HKR 2210, HKR 2220, HKR 3220, HKR 3340

4300 Human Motor and Perceptual Motor Disorders - inactive course.

4310 Evaluation - inactive course.

4330 Social Psychology of Sport, Physical Activity and Recreation introduces the psychological factors that influence participation in sport, exercise, physical activity and recreation and the psychological effects derived from participation.

4410 Issues in Kinesiology provides an overview of issues related to kinesiology by exploring, through research and discussion, trends and issues basic to the profession. It is meant to provide an environment for students to integrate and consolidate the knowledge they have gained to date and as such give them a better sense of Kinesiology as a profession.
CR: HKR 4420, HKR 4575, HKR 4685
PR: successful completion of a minimum of 78 credit hours

4420 Issues in Physical Education explores, through research and discussion, trends and issues basic to the profession including areas in physical education, health, fitness, and lifestyle industries.
CR: HKR 4410, HKR 4575, HKR 4685
PR: successful completion of a minimum of 78 credit hours

4485 Leisure Education in Therapeutic Recreation Settings is designed to provide students with the knowledge and skills required to facilitate leisure education interventions designed to bring about desired changes in the leisure behaviour of individuals. The course will address the following three broad areas: a) concepts and models of leisure education; b) content related to specific skills required for leisure involvement (leisure awareness, social skills development, friendship development, stress management, assertiveness, decision making, etc.) and c) instructional and interactional techniques used in leisure education.
PR: HKR 2505, HKR 2585

4515 Principles and Practices of Social Recreation - inactive course.

4525 Planning for Recreation - inactive course.

4535 Camp Administration and Programming - inactive course.

4545 Facility Planning, Design and Management - inactive course.

4555 Leadership and Supervision in Recreation focuses on need, selection, training, and supervision of leaders in recreation. Certification, standards and professional organizations. Evaluation of leadership materials and methods used. Practical exposure to roles of both leader and supervisor through seminar and related fieldwork.

4565 Recreation Promotion and Marketing - inactive course.

4575 Recreation Ethics, Issues and Trends explores contemporary trends and issues identified by governments and recreation practitioners and the way in which these issues influence the delivery of leisure services.
CR: HKR 4410, HKR 4420, HKR 4685
PR: HKR 2505, HKR 4600, successful completion of a minimum of 78 credit hours

4585 Financing Recreation Services provides opportunities for in-depth study of financing leisure services in a variety of settings. The primary learning objectives are to achieve an understanding of revenue sources, financial management, and budgeting, the concepts of equity from a justice, social, and economic perspective, and the ability to use various techniques in the allocation of resources, the pricing of services, and ascertaining the costs of providing services.

4600 Introduction to Research introduces research methodologies currently employed in kinesiology, physical education or recreation.
PR: Statistics 2550 or equivalent

4605 Research Proposal provides students an opportunity to develop a research proposal suitable for the study or investigation of a topic relevant to kinesiology, physical education or recreation. Students who proceed to HKR 4610 will implement the study they have proposed.
PR: one of Statistics 2500 or Statistics 2550, a minimum of 80% in HKR 4600 and permission of the instructor

4610 Research Project is the second of a two-part study for honours students, directed by a faculty member of the School and will focus on a selected topic in the field of kinesiology, physical education or recreation.
PR: a minimum of 80% in HKR 4600 and HKR 4605, and one of Statistics 2500 or Statistics 2550

4625 Theoretical Perspectives of Recreation and Leisure - inactive course.

4635 Multicultural Perspectives of Recreation and Leisure - inactive course.

4685 Professional Issues in Therapeutic Recreation is designed to facilitate an in-depth exploration and analysis of philosophical issues and interdisciplinary theories and to discuss how they relate to therapeutic recreation practice and research. The course will be conducted as a seminar and students will be responsible for reading course materials and leading discussions on various topics. The ultimate goal of the course is to prepare the student to enter the profession confident in the ability to provide exemplary TR services.
CR: HKR 4410, HKR 4420, HKR 4575
PR: HKR 2505 and HKR 2585, HKR 4600, successful completion of a minimum of 78 credit hours

4700 Advanced Fitness Training and Assessment prepares students to assess, prescribe, demonstrate, supervise, educate, and counsel apparently healthy individuals across the lifespan on information related to physical activity/exercise, fitness and health. The successful completion of this course will allow students to apply for a certification as a Professional Fitness and Lifestyle Consultant from the Canadian Society of Exercise Physiology.
LH: 2
PR: HKR 2340

4701 Environmental Physiology (formerly KIN 4701) examines human behavioural, autonomic and metabolic responses to extreme environments. This will include the study of human responses seen during changes from normal ambient temperature and pressure, to those experienced in the environments encountered during undersea diving, space travel, altitude, and other similar environments.
CR: the former KIN 4701
PR: HKR 2320

4702 Advanced Exercise Physiology prepares students to acquire the knowledge necessary to understand, analyse, and integrate information and experiences related to physiological adaptations occurring with acute and chronic activity and disuse.
LH: 2
PR: HKR 3310

4703 Occupational Ergonomics and Sport Biomechanics focuses on the contrast between biomechanical analyses of workplace tasks and athletic movement. Students will conduct a detailed biomechanical analysis of a given movement, in the workplace or for a given sport, with regard to both the probability of injury and optimization of performance.
LH: 2
PR: HKR 2703, 3320, and Physics 1020, or completion of Academic Term 5 of the Bachelor of Engineering program

4720 Directed Study requires approval of Dean of the School and the course instructor. Permission to register must be obtained in the term preceding enrolment.

4785 Internship in Therapeutic Recreation provides the student with an opportunity to develop the skills to become a competent practitioner utilizing the therapeutic recreation process, assessment, treatment planning, implementation/facilitation and evaluation. This practical experience will be carried out under the supervision of an approved Therapeutic Recreation professional. The internship will consist of 14-16 full-time consecutive weeks (35-40 hours per week for a minimum total of 560 hours). This course will normally be taken in the students' last co-op work term placement or last semester of their degree program. This course will normally be taken in conjunction with the students' last co-operative work term placement.
PR: HKR 2585, HKR 3515, HKR 3785, HKR 4485 and permission of the instructor

4910 Directed Study requires approval of Dean of the School and the course instructor. Permission to register must be obtained in the term preceding enrolment.

4915 Directed Study requires approval of Dean of the School and the course instructor. Permission to register must be obtained in the term preceding enrolment.

499W Work Term 3 offers an opportunity for students, who have sufficient academic grounding and work experience, to exercise greater independence and responsibility in their assigned work. A student must demonstrate a high level of competency in communications skills through the submission of a formal report on a topic related to the work term or through a formal presentation on an aspect of the work term using the latest in computer technology and applications.

FACULTY OF HUMANITIES AND SOCIAL SCIENCES

FACULTY OF HUMANITIES AND SOCIAL SCIENCES

SECTION CONTENTS

List of Tables

www.mun.ca/hss

Interim Dean

Craig, A., B.A. *York*, Ph.D. *New York University*; Associate Professor, Department of Sociology; Recipient of the President's Award for Outstanding Teaching (Faculty), 2016-2017

Up-to-date personnel listings are available at www.mun.ca/hss/about/contact and www.mun.ca/hss/about/departments.php.

1 The Memorial University of Newfoundland Code

The attention of all members of the University community is drawn to the section of the University Calendar titled **The Memorial University of Newfoundland Code**, which articulates the University's commitment to maintaining the highest standards of academic integrity.

2 Student Code of Conduct

Memorial University of Newfoundland expects that students will conduct themselves in compliance with University Regulations and Policies, Departmental Policies, and Federal, Provincial and Municipal laws, as well as codes of ethics that govern students who are members of regulated professions. The *Student Code of Conduct* outlines the behaviors which the University considers to be non-academic misconduct offences, and the range of remedies and/or penalties which may be imposed. Academic misconduct is outlined in ***UNIVERSITY REGULATIONS* - Academic Misconduct** in the University Calendar.

For more information about the *Student Code of Conduct*, see www.mun.ca/student.

3 Faculty Description

The Faculty of Humanities and Social Sciences offers a wide range of undergraduate and graduate programs in the social sciences and the humanities, offering excellence in both teaching and research. These degree programs examine culture, thought, prehistory and history, human interactions and the social and natural forces that constantly transform our society. A Humanities and Social Sciences education can provide incomparable advantages. Students gain the critical-thinking, analytical and communication skills needed to succeed and adapt in a changing world. This can lead to exciting, productive careers. One of Memorial University of Newfoundland's largest and most diverse units, the Faculty of Humanities and Social Sciences is a place where you can study what fascinates you, and pursue a program that suits your aspirations for learning and career. At the graduate level, students find unique programs and the freedom to develop their knowledge and expertise. Our faculty conduct research in a wide variety of areas, making discoveries that foster our understanding of the past, present and future. Our alumni work in a wide variety of fields not only in Newfoundland and Labrador, but also in Canada and the rest of the world. Their services are in demand because they have learned to define and analyze problems, to think creatively, and to communicate to others. Members of the faculty are also actively engaged in the community, whether helping to understand complex problems, working with groups to preserve culture, hosting public lectures and readings, or helping raise awareness of significant issues relevant to the well-being of people and communities.

Additional information regarding the Faculty of Humanities and Social Sciences is available at www.mun.ca/hss.

For information regarding fees and charges, see the Financial and Administrative Services website at www.mun.ca/finance/fees/.

For information regarding scholarships, bursaries and awards, see www.mun.ca/scholarships/scholarships.

4 Admission, Registration and Withdrawal (Undergraduate Programs)

4.1 Admission

The application for admission or readmission to the University is submitted online at www.mun.ca/undergrad/admissions/apply/.

These regulations shall also apply to interdisciplinary programs. In such cases, the student should contact the Program Director or supervisor.

1. Declaration of the Bachelor of Arts or the International Bachelor of Arts degree programs may be made at the time of application to the University or by means of the appropriate program declaration form following admission to the University. This form maybe be obtained at www.mun.ca/regoff/forms.php or in-person at the Office of the Registrar.
2. A student who intends to complete a degree in the Faculty of Humanities and Social Sciences must also declare a Major and Minor (or second Major) chosen according to the **Major Program** and the **Minor Program** below. In most cases, this declaration may be made at the time of application to the University or, following admission to the University, by means of the appropriate program declaration form, which must be submitted to the Office of the Registrar.
3. A student is encouraged to declare a Major and Minor (or second Major) no later than the semester in which they next attend the University following completion of 18 credit hours in courses applicable to their program(s).
4. A student is strongly advised to consult with departments or program director or supervisors before making a declaration to the department or program of the student's intended Major or Minor.
5. In the case of programs with admission requirements which go beyond the general admission requirements of the University, a student should make formal application to the department, director or supervisor after completion of the program's admission requirements. These Bachelor of Arts programs include, but are not restricted to the following: Major in Archaeology (Co-operative), Major in Economics (Co-operative), Major in Political Science (Co-operative). In the Faculty of Science, this includes the Major in Psychology (Co-operative).
6. For information about admission to a diploma program, refer to **Diploma Programs, Admission**.
7. For information about admission to a certificate program, refer to **Certificate Programs, Admission**.

4.2 Registration and Withdrawal

Information about University registration can be found at ***UNIVERSITY REGULATIONS* - Registration**. Additional regulations in the Faculty of Humanities and Social Sciences for degree programs such as the B.A. and iBA include the following:

1. As outlined in ***UNIVERSITY REGULATIONS* - Registration, Course Weight/Course Load**, a student in this Faculty may request permission to enroll in more than the normal course load in a semester or session. Requests are reviewed by an academic advisor in the Office of the Dean.
   a. A request to enroll in additional field school courses or equivalent in a semester shall require written permission of the academic unit Head. Such a request involving Intersession or Summer session shall require approval by an associate dean.

b. A request to enroll in one additional regular course in a Fall, Winter or Spring semester shall be approved by an associate dean only when a student has successfully completed five courses in each of a minimum of two of the previous three semesters and obtained a minimum overall numeric grade average of 70% in those courses.

c. A request to enroll in two additional regular courses in a Fall, Winter or Spring semester or one additional course in Intersession or Summer session shall only be considered in extraordinary circumstances. Such a request requires approval by the Dean.

2. As outlined in ***UNIVERSITY REGULATIONS*** **- Registration, Withdrawing from the University Without Academic Prejudice**, from the beginning of the eighth week following the first day of lectures in any semester to the last day to add courses in the following semester as stated in the **University Diary**, a student who is prevented from completing the semester by illness, bereavement, or other acceptable cause, duly authenticated in writing, may request to withdraw from the University without academic prejudice.

   Requests are reviewed by an academic advisor in the Office of the Dean and require approval by an associate dean. A student who is prevented from completing the semester by illness may be required to provide an appropriately completed Student Health Certificate, available at www.mun.ca/regoff/forms.php.

5 Academic Regulations

5.1 Course Syllabus

All course syllabi must observe ***UNIVERSITY REGULATIONS*** **- Evaluation of Student Work, Course Syllabus**. A course syllabus in the Faculty of Humanities and Social Sciences that is distributed in the first week of classes must also include:

1. the academic semester and year;
2. the course number, title, and description consistent with the course's entry in the University Calendar, including any prerequisites or co-requisites;
3. the instructor's name and at least one of a Memorial University of Newfoundland email address or Memorial University of Newfoundland online learning portal contact information (e.g., D2L);
4. for courses delivered on campus, the instructor's room number and phone number, if they have been assigned;
5. the instructor's office hours for students, if the course is delivered on campus;
6. a brief description of all required assignments and testing that comprise the method of evaluation;
7. information about assigned readings that are common to all students and, if applicable, additional required readings;
8. a provisional schedule that outlines the themes or topics to be covered throughout the semester, accompanied by an associated timeline of required reading;
9. an associated timeline of probable dates of required reading responsibilities for all students and the probable dates of all evaluation components; and,
10. information about missed testing, alternate and similar evaluation, and late penalties, all of which must be in accordance with ***UNIVERSITY REGULATIONS*** **- Evaluation of Student Work, Exemptions from Parts of the Evaluation.** A course syllabus does not include attendance regulations unless approved by Senate and the course's Calendar entry includes the statement "attendance required".

In addition, the syllabus for any course designated as Critical Reading and Writing (CRW), International Studies (IS), Language Study (LS) or Quantitative Reasoning (QR) must follow the applicable course guidelines available on the Faculty of Humanities and Social Sciences website at www.mun.ca/hss. Further information is available in the www.mun.ca/hss/faculty_staff/tasks.php.

5.2 Special/Selected Topics Courses

1. A special/selected topics course must observe ***UNIVERSITY REGULATIONS*** **- Evaluation of Student Work, Special/Selected Topics Courses**.
2. Special/selected topics courses are offered infrequently and only in unusual circumstances.
3. A special/selected topics course is ineligible to appear in the Calendar entry of an interdisciplinary Major or Minor program, a diploma program or a certificate program unless the course originates in that program, and is not eligible for the CRW, IS, LS or QR designations. A student or course instructor may, in consultation with the academic Head or program director, submit a written request to the Faculty's Undergraduate Waivers and Appeals Committee for a course substitution waiver which, if granted, will normally be conditional on the course being regularized.

5.3 Grading

1. In all courses, evaluation of student work must observe ***UNIVERSITY REGULATIONS*** such as regulations concerning attendance, the method of evaluation, correction and return of student work, final examinations, grading, and academic misconduct.
2. In consultation with the course instructor and academic unit Head, the Dean of Humanities and Social Sciences vets and/or approves the final grade in a course. Emphasis is placed on ensuring that final grades are consistent with ***UNIVERSITY REGULATIONS - Grading***.
3. A student who wishes to question a grade in a course should follow the process outlined in ***UNIVERSITY REGULATIONS - Appeal of Decisions, Route for Questioning Grades***.

6 Degree Regulations - General and Honours Degrees

In these regulations, all references to Heads of Departments and Program Supervisors are to be read as "Head of Department or delegate" and "Program Supervisor or delegate."

6.1 Bachelor of Arts General Degree Components

1. A student for the General Degree of Bachelor of Arts must complete a minimum of 120 credit hours in courses subject to the following regulations.
2. A Bachelor of Arts emphasizes the study of the Humanities and Social Sciences. The Bachelor of Arts General Degree consists of the following components:
   a. **Core Requirements** courses, some of which may also be used to satisfy other components of the Degree;
   b. a **Major Program**, including a minimum 60% average, or alternatively an **Honours** Program;
   c. a **Minor Program**, including a minimum 60% average, or alternatively a second major including a minimum 60% average; and
   d. **Electives**.

6.1.1 Academic Advising and Declaring a Bachelor of Arts

A student is encouraged to consult with an academic advisor to discuss academic programs, including the **Core Requirements**. A student is encouraged to declare a program of study, including a Major and a Minor, before completing the first 45 credit hours of study. Information about declaring a Major and Minor in the Faculty of Humanities and Social Sciences and a list of advisors are available at www.mun.ca/hss/programs/undergraduate/ideclare.php.

6.1.2 Core Requirements

The Bachelor of Arts Core Requirements comprise a **Breadth of Knowledge Requirement**, a **Critical Reading and Writing (CRW) Requirement**, a **Language Study (LS) Requirement,** and a **Quantitative Reasoning (QR) Requirement**. The Core Requirements provide breadth of knowledge and exposure to methodologies that are foundational for a university education, including the development of critical thinking, analytical, and communication skills in different disciplines within the Faculty of Humanities and Social Sciences. Normally, core requirement courses are offered at the 1000-level or 2000-level, and are intended to be completed early in a student's program of study. A student is encouraged to complete the CRW, LS, and QR Requirements within the first 45 credit hours.

A student must complete all **Core Requirements**, subject to the following conditions:

1. Each eligible course may be used towards both the **Core Requirements** and applicable Major(s) or Minor requirements.
2. A student who is concurrently completing the Bachelor of Commerce (Co-operative) degree should refer to **Joint Degrees of Bachelor of Arts and Bachelor of Commerce (Co-operative)**.
3. As outlined in **Limited Enrolment Courses and Transfer Credits**, some Grenfell Campus courses may be eligible to fulfill the **Core Requirements**, and some limitations on transfer credits apply.

A student, in consultation with an academic advisor, is encouraged to follow **Table 1 Possible Course Sequencing for the First 45 credit hours of the Bachelor of Arts**. A student interested in a Bachelor of Arts Major in **Computer Science**, **Mathematics**, **Statistics**, or **Psychology**, or in a Minor in an eligible program outside of the Faculty of Humanities and Social Sciences, should consult an advisor in the appropriate department for suggested course sequencing, in addition to consulting an advisor in the Faculty of Humanities and Social Sciences.

A student in the International Bachelor of Arts (iBA) program is advised to subsequently consider **Table 2 Possible Course Sequencing for the iBA (first 60 credit hours)**.

Table 1 Possible Course Sequencing for the First 45 credit hours of the Bachelor of Arts

Semester	Suggested Courses
Semester 1 (15 credit hours)	Course #1 (3 credit hours): first course for **Critical Reading and Writing (CRW) Requirement** should be a 1000-level English CRW course Course #2 (3 credit hours): first course for **Language Study (LS) Requirement** Course #3 (3 credit hours): first course for **Quantitative Reasoning (QR) Requirement**. Eligible Quantitative Reasoning courses offered at the 3000-level are normally completed after the first 45 credit hours. Courses #4-5 (6 credit hours): choose 1000-level courses as electives. Breadth is encouraged. Consider choosing courses in a possible Major and Minor. Programs without 1000-level courses offer 2000-level courses that are ordinarily completed in the first year of study.
Semester 2 (15 credit hours)	Course #6 (3 credit hours): second course for **Critical Reading and Writing (CRW) Requirement**, ideally in an area of study being considered for the Major. This course can be at the 1000-level or 2000-level. Course #7 (3 credit hours): second course for **Language Study (LS) Requirement** Course #8 (3 credit hours): second course for **Quantitative Reasoning (QR) Requirement**. Eligible Quantitative Reasoning courses offered at the 3000-level are normally completed after the first 45 credit hours. Courses #9-10 (6 credit hours): choose additional electives of interest. Breadth is encouraged. Consider declaring a Major and Minor.
Semester 3 (15 credit hours)	Courses #11-15 (15 credit hours): consider your Major and Minor program requirements, as appropriate. Choose further electives.

6.1.2.1 Breadth of Knowledge Requirement

The Breadth of Knowledge Requirement is designed to ensure that students have exposure to courses in a variety of disciplines and interdisciplinary areas of study within the Humanities and Social Sciences, in order to achieve a well-rounded Humanities and Social Sciences education. To fulfill the Breadth of Knowledge Requirement, a student's Bachelor of Arts program (core, major, minor and electives) must contain at least one course in a minimum of 6 of the following areas of study in the Humanities and/or Social Sciences, chosen from: **Anthropology**, **Archaeology**, **Classics**, **Communication Studies**, **Criminology**, **Economics**, **English**, **Folklore**,

French, **Gender Studies**, **Geography**, **German**, **History**, **Languages**, **Law and Society**, **Linguistics**, **Medieval Studies**, **Philosophy**, **Political Science, Religious Studies**, **Russian**, **Sociology**, **Spanish** courses.

6.1.2.2 Critical Reading and Writing (CRW) Requirement

The Critical Reading and Writing Requirement (CRW) is designed to ensure that students develop university-level foundational knowledge and skills in critical reading and writing in the Humanities and/or Social Sciences, as described in the CRW course guidelines available at www.mun.ca/hss/crw. To fulfill the Critical Reading and Writing Requirement, a student must complete a minimum of 6 credit hours in foundational Critical Reading and Writing courses. This shall include 3 credit hours in a 1000-level CRW course offered by English, and an additional 3 credit hours in any Faculty of Humanities and Social Sciences course whose title begins with "Critical Reading and Writing" chosen from the following eligible courses: Archaeology 1001, 1005, Classics 1001, English 1090 or the former 1080, 1191 or the former 1101, 1192 or the former 1102, 1193 or the former 1103, 1110, Folklore 1005, Gender Studies 1005 or the former 2005, German 1010, History 1005, 1007, 1009-1015, Philosophy 1010, 1011, Political Science 1001, Religious Studies 1001. Courses offered at Grenfell Campus using these course numbers are only eligible if they meet the CRW criteria specified above.

1. Normally, students will complete 3 credit hours in an English CRW course, and 3 credit hours in a CRW course in another area of study included in the **Breadth of Knowledge Requirement**, preferably in the student's respective Major or Minor if available. The foregoing notwithstanding, any student who has completed a minimum of 3 credit hours in any English course may instead elect to fulfill the CRW Requirement by completing 6 credit hours in CRW courses in any disciplines in the Humanities and/or Social Sciences.
2. A Critical Reading and Writing course cannot also be used to fulfill the Language Study Requirement or the Quantitative Reasoning Requirement. Guidelines for CRW courses are maintained by the Faculty's Curriculum and Programs Committee.
3. As outlined in **Limited Enrolment Courses and Transfer Credits**, limitations exist on the number of transfer credits eligible towards the **Core Requirements**.

6.1.2.3 Language Study (LS) Requirement

The Language Study (LS) Requirement is designed to ensure that students develop university-level foundational knowledge of the structure of a language other than English, and to foster awareness of the inherent link between language and cultural literacy, as described in the LS course guidelines available at www.mun.ca/hss/ls. To fulfill the Language Study Requirement, a student must complete a minimum of 6 credit hours in the study of a single language, other than English, chosen from one of the following languages taught in the Faculty of Humanities and Social Sciences: **Ancient Greek**, **French**, **German**, **Hebrew**, **Innu-aimu**, I**nuktitut**, **Italian**, **Japanese**, **Latin**, **Mandarin Chinese**, **Russian**, **Sanskrit**, **Spanish** or another language that may be offered by the Faculty. Not all courses in the Department of Modern Languages, Literatures and Cultures or other departments qualify and it is a student's responsibility to refer to the applicable Calendar entry. The guidelines for LS courses are maintained by the Faculty's Curriculum and Programs Committee.

1. A student with competency in one of these languages should check with the respective department to select appropriate university-level courses.
2. A student whose first language is not English and who does not meet the standards for entry into regular first-year English courses may use English 1020 and 1021 to fulfill this requirement. University-level credit hours earned in the study of a language other than English at other institutions may be eligible for transfer to fulfill this requirement, including the study of a language not taught at Memorial University of Newfoundland for which unspecified LS credit hours may be awarded. For further information refer to **Limited Enrolment Courses and Transfer Credits, Transfers From Other Post-Secondary Institutions**.
3. As outlined in **Limited Enrolment Courses and Transfer Credits**, limitations exist on the number of transfer credits eligible towards the **Core Requirements**, and approved university-level credit hours earned in the study of a language other than English at other institutions may be eligible for transfer to fulfill this requirement.

6.1.2.4 Quantitative Reasoning (QR) Requirement

The Quantitative Reasoning (QR) Requirement is designed to ensure that students develop university-level foundational knowledge and skills in numeracy, quantitative analysis, logical reasoning involving numbers, and/or the graphical representation of data, as described in the QR course guidelines available at www.mun.ca/hss/qr. To fulfill the Quantitative Reasoning Requirement, a student must complete a minimum of 6 credit hours in foundational Quantitative Reasoning courses, through any combination of the following:

1. Eligible Humanities and Social Sciences courses: Archaeology 2450, Classics 3902, Economics 1010 or the former 2010, 1020 or the former 2010, 2550; Geography 1050, 2102, 2195, 2302; History 2000; Linguistics 2210, 3850; Philosophy 2030, 2031 or the former 2210, 2211; Political Science 3010, 3350; Sociology 3040.
2. Eligible Faculty of Science courses (limited to disciplines for which there is a Humanities and Social Sciences Major): Computer Science 1000-level and 2000-level courses; Mathematics 1000-level courses, 2050; Psychology 2910, 2911, 2920; Statistics 1510, 2500, 2550.

Some foundation-level Quantitative Reasoning courses have prerequisites and/or are offered at the 3000-level. Such courses will normally be completed after the first 45 credit hours. Guidelines for QR courses are maintained by the Faculty's Curriculum and Programs Committee.

As outlined in **Limited Enrolment Courses and Transfer Credits**, limitations exist on the number of transfer credits eligible towards the **Core Requirements**.

6.1.2.5 Previous Calendar Regulations

A student who has successfully completed any course at Memorial University of Newfoundland prior to September 2015 may choose to follow Core Requirement Calendar regulations from the corresponding previous edition of the University Calendar. For all students, a course section with the former Research/Writing (R/W) designation that was successfully completed prior to September 2015 may be used to fulfil the second Critical Reading and Writing (CRW) course requirement (i.e., all students must successfully complete at least one English course); identifying eligible R/W courses may require consultation with an academic advisor.

6.1.3 The Major Program

6.1.3.1 Major Programs of Study

Within the 120 credit hours required for a Bachelor of Arts (B.A.) or International Bachelor of Arts (iBA), a student must complete at least one Major program. Major programs are administered by departments and are governed by the following general regulations. In addition to a Major, a student must complete either an eligible Minor, a second Major, or a Joint Major program.

1. Requirements in a Major program, including a list of eligible courses, are found in each individual program's Calendar entry.

2. Major programs available in both the B.A. and iBA that are offered by departments in the Faculty of Humanities and Social Sciences are: Anthropology, Archaeology, Classics, Economics, English, Folklore, French, Gender Studies, Geography, German, History, Linguistics, Philosophy, Political Science, Religious Studies, Russian, Sociology, Spanish or the Major and Minor programs outlined in clauses c and d.
3. Interdisciplinary Major programs available in the B.A. and which feature courses from multiple programs in the Faculty of Humanities and Social Sciences are offered in the following areas of study: Communication Studies, Criminology, Law and Society, Medieval Studies.
   a. In order to complete a B.A., an Interdisciplinary Major must be combined with a Minor or a second Major from a single discipline in one of: Anthropology, Archaeology, Classics, Economics, English, Folklore, French, Gender Studies, Geography, German, History, Linguistics, Philosophy, Political Science, Religious Studies, Russian, Sociology, Spanish or the Major and Minor programs outlined in clauses c and d.
   b. The Interdisciplinary Major in Medieval Studies may be combined with a discipline in clause 3.a. above to form a Joint Major.
   c. Interdisciplinary Major programs may also be combined with Majors from the following disciplines offered by the Faculty of Science: Computer Science, Pure Mathematics, Psychology, Statistics.
   d. Interdisciplinary Major programs may also be combined with eligible Minor programs available through the Faculty of Business Administration, the Faculty of Science, and the School of Music. These programs are governed by regulations which are detailed in the Calendar entries for the applicable Faculty or School.
4. Interdisciplinary Major programs available in the iBA which feature courses from multiple programs in the Faculty of Humanities and Social Sciences are offered in the following areas of study: Communication Studies, Criminology, Law and Society, Medieval Studies.
   a. In order to complete an iBA, an Interdisciplinary Major must be combined with a second Major in one of: Anthropology, Archaeology, Classics, Economics, English, Folklore, French, Gender Studies, Geography, German, History, Linguistics, Philosophy, Political Science, Religious Studies, Russian, Sociology, Spanish.
   b. The Interdisciplinary Major in Medieval Studies may be combined with a discipline in clause 4.a. to form a Joint Major.
5. Major programs available in the B.A. whose courses are offered by the Faculty of Science are: Computer Science, Pure Mathematics, Psychology, Statistics. A student completing one of these Major programs must complete an additional Major or Minor offered by the Faculty of Humanities and Social Sciences.
6. Major programs available in the iBA whose courses are offered by the Faculty of Science are: Computer Science, Pure Mathematics, Psychology, Statistics. A student completing one of these Major programs must complete an additional Major program from a single discipline offered in the Faculty of Humanities and Social Sciences: Anthropology, Archaeology, Classics, Economics, English, Folklore, French, Gender Studies, Geography, German, History, Linguistics, Philosophy, Political Science, Religious Studies, Russian, Sociology, Spanish.
7. In departments such as Economics and Geography which offer both Bachelor of Arts and Bachelor of Science programs, a student is free to choose either degree program. A student may not obtain both a Bachelor of Arts and a Bachelor of Science degree in the same Major subject.
8. A student who completes courses at another university in the area of a Major offered by the Faculty of Humanities and Social Sciences may be eligible to transfer some of those credits to fulfill requirements in the Major at Memorial University of Newfoundland. For further information refer to **Limited Enrolment Courses and Transfer Credits, Requirement for Courses Delivered at Memorial University of Newfoundland**.

6.1.3.2 Courses in the Major

1. A student must select courses for the Major program as set forth in the appropriate section of the Calendar.
2. A Major program requires not fewer than 36 and not more than 45 credit hours.
3. Normally, all courses in a Major use the label of that program. If prescribed in a Major program's regulations, the Major may include courses from other disciplines in the Faculty of Humanities and Social Sciences, provided that the Calendar entry of each course emphasizes that discipline.
4. Due to its temporary nature, a special topics course using another program's label shall not normally be included in a Major program.
5. As outlined in **Limit on Certain Credit Hours**, credit hours in a course cannot be used to fulfill the requirements of two Major programs, of both a Major and a Minor program, or the program requirements of all three of a Major, diploma and certificate.
6. A student may complete additional courses in the Major subject area, which may be used as **Electives**.

6.1.4 The Minor Program

6.1.4.1 Minor Programs of Study

Within the 120 credit hours required for a Bachelor of Arts (B.A.) or International Bachelor of Arts (iBA), a student must complete either at least one eligible Minor program, a second eligible Major, or a Joint Major program. Minor programs are administered by departments and are governed by the following general regulations.

1. Requirements in a Minor program, including a list of eligible courses, are found in each individual program's Calendar entry.
2. Minor programs available in both the B.A. and iBA that are offered by departments in the Faculty of Humanities and Social Sciences are: Anthropology, Archaeology, Classics, Economics, English, Folklore, French, Gender Studies, Geography, German, History, Linguistics, Philosophy, Political Science, Religious Studies, Russian, Sociology, Spanish.
3. Interdisciplinary Minor programs available in the B.A. and the iBA and which feature courses from multiple programs in the Faculty of Humanities and Social Sciences are offered in the following areas of study: Communication Studies, Law and Society, and Medieval Studies.
   a. In order to complete a B.A. an Interdisciplinary Minor must be combined with a Major from a single discipline including one of: Anthropology, Archaeology, Classics, Economics, English, Folklore, French, Gender Studies, Geography, German, History, Linguistics, Philosophy, Political Science, Religious Studies, Russian, Sociology, Spanish or a Major program outlined in clause b.
   b. Interdisciplinary Minor programs may be combined with a Major program available in the B.A. whose courses are offered by the Faculty of Science in one of: Computer Science, Pure Mathematics, Psychology, Statistics.
4. Interdisciplinary Minor programs available in the iBA which feature courses from multiple programs in the Faculty of Humanities and Social Sciences are offered in the following areas of study: Communication Studies, Law and Society, and Medieval Studies.

in order to complete an iBA, an Interdisciplinary Minor must be combined with a Major from a single discipline including one of: Anthropology, Archaeology, Classics, Economics, English, Folklore, French, Gender Studies, Geography, German, History, Linguistics, Philosophy, Political Science, Religious Studies, Russian, Sociology, Spanish.

5. A Minor program available in the B.A. is also available through eligible programs in the Faculty of Business Administration, Faculty of Science and the School of Music. These programs are governed by regulations which are detailed in the Calendar entries for the applicable Faculty or School. A student completing one of these Minor programs must complete a Major offered in the Faculty of Humanities and Social Sciences.
6. A Minor program available in the iBA is also available through eligible programs in the Faculty of Business Administration, Faculty of Science and the School of Music. These programs are governed by regulations which are detailed in the Calendar entries for the applicable Faculty or School. A student completing one of these Minor programs must complete a Major from a single discipline offered in the Faculty of Humanities and Social Sciences: Anthropology, Archaeology, Classics, Economics, English, Folklore, French, Gender Studies, Geography, German, History, Linguistics, Philosophy, Political Science, Religious Studies, Russian, Sociology, Spanish.
7. A student who completes courses at another university in the area of a Minor offered by the Faculty of Humanities and Social Sciences may be eligible to transfer some of those credits to fulfill requirements in the Minor at Memorial University of Newfoundland. For further information refer to: **Limited Enrolment Courses and Transfer Credits, Requirement for Courses Delivered at Memorial University of Newfoundland**.

6.1.4.2 Courses in the Minor

1. A student must select courses for the Minor program as set forth in the appropriate section of the Calendar.
2. A Minor program offered by the Faculty of Humanities and Social Sciences requires not fewer than 24 and not more than 27 credit hours taken in a subject other than that of the Major. Eligible Minors in other eligible Faculties and Schools are a minimum of 24 credit hours.
3. Normally, all courses in a Minor use the label of that program. If prescribed in a Minor program's regulations, the Minor may include courses from other disciplines in the Faculty of Humanities and Social Sciences, provided that the Calendar entry of each course emphasizes that discipline.
4. Due to its temporary nature, a special topics course using another program's label shall not normally be included in the Calendar entry of a Minor program.
5. As outlined in **Limit on Certain Credit Hours**, credit hours in a course cannot be used to fulfill the requirements of both a Major and a Minor program, or the program requirements of all three of a Minor, diploma and certificate.
6. A student may complete additional courses in the Minor subject area, which may be used as **Electives**.

6.1.5 The Joint Major Program

As an alternative to a Major and Minor, a student may complete a Joint Major, which consists of a minimum of 33 to a maximum of 42 credit hours taken from each of two participating Major programs. The student must fulfill all other requirements of the B.A. or iBA degree, including the minimum of 120 credit hours.

1. Requirements in a Joint Major program, including a list of eligible courses, are found in each individual program's Calendar entry.
2. Students who choose a Joint Major program will have requirements reduced by 3 credit hours in each Major as prescribed in the program's regulations, found in each individual program's Calendar entry.
3. The Joint Major program is available in the following programs only: Anthropology, Archaeology, Classics, Economics, English, Folklore, French, Gender Studies, Geography, German, History, Medieval Studies, Philosophy, Political Science, Religious Studies, Russian, Sociology, Spanish.
4. As an alternative to a Major and Minor or the Joint Major, a student may simultaneously complete a second Major program by fulfilling all regulations for both Major programs.
5. As outlined in **Limit on Certain Credit Hours**, credit hours cannot be simultaneously used to fulfill the requirements of both programs in the Joint Major.

6.1.6 Electives

In accordance with Regulations outlined under **Core Requirements**, **The Major Program** and **The Minor Program**, a student must complete a minimum of 78 credit hours (of the 120 credit hours for the degree) in Humanities and Social Sciences courses offered by the Faculty of Humanities and Social Sciences. With some limitations, courses offered by the Faculty of Science in Computer Science, Mathematics and Statistics, and Psychology may be applied to this requirement. Electives comprise the remaining 42 credit hours of the total 120 credit hours for the degree.

1. Electives provide students with the opportunity to choose university-level courses from a variety of eligible disciplines. Subject areas that are eligible as electives towards the remaining 42 credit hours for the degree include:
   a. Humanities and/or Social Sciences. This includes additional courses in the Major and/or Minor that are over and above the normal requirements for that program of study,
   b. Science,
   c. Business, and/or,
   d. Music (Musicologies and Music Theory and Composition only).
2. Of the 42 credit hours in electives, a student may choose to include up to 15 credit hours in electives in any other subject area, including but not limited to Education, Engineering, Human Kinetics and Recreation, Maritime Studies, Medicine, Nursing, Pharmacy, Social Work, with the exception of courses that are clearly practical or professional.
3. Courses with academic demands that are clearly practical or professional, and are not consistent with the Faculty of Humanities and Social Sciences Description, are not eligible for use in any manner towards the Bachelor of Arts. Ineligible courses include but are not limited to:
   a. Internships, Student Teaching or Practicum courses (Education),
   b. Outdoor Pursuits or Expeditions courses (Environmental Studies),
   c. Activities and Coaching courses (Human Kinetics and Recreation),
   d. Master Classes (Fine Arts, Theatre),
   e. Studio courses (Fine Arts, Visual and Theatre),

f. Applied Music or Ensemble Techniques courses (Music),
g. Nursing Practice or Clinical Practicum courses (Nursing),
h. Structured Practice Experiences (SPE) or Pharmacy Practice Experiences in Pharmacy (Pharmacy), and/or
i. Field Practicum (Social Work).

6.1.7 Limit on Certain Credit Hours

1. Eligible credit hours may be used to jointly fulfill the requirements of the Major or Minor and any of the Bachelor of Arts Core Requirements, the iBA additional requirements, a diploma and/or certificate program, subject to certain limitations, including:
   a. Credit hours cannot be used to jointly fulfill the requirements of more than one Honours or Major program.
   b. Credit hours cannot be used to jointly fulfill the requirements of both a Major and a Minor program.
   c. Credit hours cannot be used to jointly fulfill the requirements of all three of a Major or Minor, a diploma and a certificate program. In the event that a course is required in all three programs, and no alternate course option exists, a student shall be guided by ***Waiver of Regulations for Undergraduate Students - Other Regulations***.
2. Additional credit may not be obtained for successfully completing two versions of a crosslisted course (i.e., the same course delivered by two or more academic units).
3. Credit hours awarded for field placement courses in certain Diploma programs are not eligible towards a Bachelor of Arts. This includes English 5000, the former Philosophy 5000, and the former Police Studies 5000.

6.2 International Bachelor of Arts (iBA) Degree Regulations

1. The International Bachelor of Arts (iBA) Degree program is designed for students who are interested in the study of global dynamics and worldwide issues from the perspective of the Humanities and Social Sciences. The program's objectives are to provide knowledge and analytical skills essential for research and work on cultural, economic, political, religious and social processes on a global scale. An iBA degree requires, in addition to the requirements of the Bachelor of Arts (B.A.) Degree, a combination of additional university-level language study, successful completion of designated courses with a clear international focus, and participation in either an international study or internship placement requiring residency outside of Canada.
2. The process for declaring an International Bachelor of Arts (iBA) is the same as for declaring a Bachelor of Arts (B.A.). However, admission to the **International Internship Option** is limited and competitive.
3. The iBA program is available exclusively to students who complete a Major or Honours program in one of the following Faculty of Humanities and Social Sciences programs: Anthropology, Archaeology, Classics, Economics, English, Folklore, French, Gender Studies, Geography, German, History, Linguistics, Philosophy, Political Science, Religious Studies, Russian, Sociology, and Spanish.
4. The iBA is not available with a Major in an interdisciplinary program (Communication Studies, Criminology, Law and Society, Medieval Studies) or a Faculty of Science program (Computer Science, Psychology, Pure Mathematics, Statistics) unless the student also completes an eligible Honours or Major program.
5. The iBA is not available to students who are enrolled in a Co-operative Education degree program.
6. Unless otherwise specified, normal Bachelor of Arts regulations apply with respect to Joint programs and Minor programs, including those offered by other Faculties and Schools.

6.2.1 International Bachelor of Arts (iBA) Admission and Registration

1. A student shall declare a Major in the Humanities and Social Sciences, normally within the first 45 credit hours, or shall apply for admission to an Honours program in the Humanities and Social Sciences as outlined under **Academic Advising and Declaring a Bachelor of Arts**.
2. A student who wishes to enter an iBA program is strongly advised to consult an academic advisor and international exchange director early in their university career, as it may not be possible to complete the requirements for the degree in the normal time if the decision to embark on the program is delayed beyond the end of the second year.
3. In accordance with ***UNIVERSITY REGULATIONS*** - **General Academic Regulations (Undergraduate), Degree and Departmental Regulations - Further Credentials**, no student shall obtain more than one undergraduate degree from the Faculty of Humanities and Social Sciences.

6.2.2 International Bachelor of Arts (iBA) Degree Components

A student for the Degree of International Bachelor of Arts (iBA) must complete a minimum of 120 credit hours in courses subject to the following regulations:

1. A student is required to complete the **Core Requirements** as detailed in the **Regulations for the General Degree of Bachelor of Arts**. These include:
   a. **Breadth of Knowledge Requirement**
   b. **Critical Reading and Writing (CRW) Requirement**
   c. **Language Study (LS) Requirement**
   d. **Quantitative Reasoning (QR) Requirement**
2. A student is required to complete a **Major Program** including a minimum 60% average, or alternatively an Honours Program including an average of 75% or better;
3. A student is required to complete a **Minor Program** including a minimum 60% average, or alternatively a second Major including a minimum 60% average;
4. A student is required to complete general **Electives**; and,
5. As part of the minimum 120 credit hours, an iBA student is also required to complete the following requirements, for which credit hours may be used to jointly satisfy other requirements of the degree:
   a. **International Studies (IS) Courses Requirement**;
   b. **Additional Language Study (LS) Requirement**, and
   c. **International Experience Requirement**.
6. A student must complete all iBA requirements, subject to the following conditions:

a. All students are required to follow the regulations pertaining to the **Bachelor of Arts** unless otherwise specified

b. Grenfell Campus courses and courses successfully completed at other eligible academic institutions may be eligible to satisfy the **International Studies (IS) Courses Requirement**. As outlined in **Limited Enrolment Courses and Transfer Credits**, some Grenfell Campus courses may be eligible to fulfill the Core Requirements. A university-level course that involves international study may be eligible if it is demonstrated that it follows the IS course guidelines available at www.mun.ca/hss/IS. The Faculty of Humanities and Social Sciences' Undergraduate Waivers and Appeals Committee is responsible for assessing the eligibility of these courses, in consultation with the applicable academic Unit Head; refer to **Waiver of Regulations for Undergraduate Students, Other Regulations**.

In consultation with an academic advisor, a student is encouraged to follow **Table 2 Possible Course Sequencing for the International Bachelor of Arts (iBA) (First 60 Credit Hours)** and to consider possible course sequencing in the Program Regulations – General and Honours Degrees. A student interested in a Bachelor of Arts Minor in an eligible program outside of the Faculty of Humanities and Social Sciences should consult an advisor in the appropriate department or suggested course sequencing, in addition to consulting an advisor in the Faculty of Humanities and Social Sciences.

Table 2 Possible Course Sequencing for the International Bachelor of Arts (iBA) (First 60 Credit Hours)

Semester	Suggested Course Planning
1 (15 credit hours)	Follow **Table 1 Possible Course Sequencing for the First 45 credit hours of the Bachelor of Arts**, including 3 credit hours in each of a **CRW** course, a **LS** course and a **QR** course.
2 (15 credit hours)	Follow **Table 1 Possible Course Sequencing for the First 45 credit hours of the Bachelor of Arts**, including 3 credit hours in each of a **CRW** course, a **LS** course in the same language as completed in Semester 1, and a **QR** course.
3 (15 credit hours)	Courses #11-15: Consider **Major** and **Minor** program requirements, as appropriate (a Major in the iBA is available only in Anthropology, Archaeology, Classics, Economics, English, Folklore, French, Gender Studies, Geography, German, History, Linguistics, Philosophy, Political Science, Religious Studies, Russian, Sociology, Spanish). Choose a first course for **International Studies (IS) Requirement** from **Table 3 International Studies (IS) Designated Courses**, which may be eligible to jointly fulfill requirements of the Major or Minor program. Consider another LS course in a language not yet studied within the parameters of the **Additional Language Study (LS) Requirement**.
4 (15 credit hours)	Courses #16-20: Consider **Major** and **Minor** program requirements. Choose a further 3 credit hours in an IS course. Consider a fourth LS course to fulfill the **Additional Language Study (LS) Requirement**, ensuring a maximum of 6 credit hours in languages not actively spoken. Attend an information session about options available for the **International Experience Requirement** or the **International Internship Option**, or speak with an academic advisor.
5-8 (60 credit hours)	Follow **Table 4 Possible Course Sequencing for the iBA, International Study Option (Final 60 Credit Hours)**. Alternatively, subject to admission to the **International Internship Option**, follow **Table 5 Possible Course Sequencing for the iBA, International Internship Option (Final 60 Credit Hours)**.
Eligible Quantitative Reasoning courses offered at the 3000-level are normally completed after the first 45 credit hours.	

6.2.3 International Studies (IS) Courses Requirement

1. Certain courses that are offered by the Faculty of Humanities and Social Sciences are found under **Course Descriptions, International** (IS). For the purposes of course designation, "international" refers to worldwide processes, institutions and peoples in today's global society. It does not refer to the study of a country, a multi-country region, or comparisons of countries or nations. For further information, refer to the International Studies course guidelines at www.mun.ca/hss/IS.
2. Students must complete a minimum of 24 credit hours in designated IS courses listed in **Table 3 International Studies (IS) Designated Courses** from a minimum of five disciplines, of which at least 6 credit hours must be at the 4000-level. Disciplines that offer designated IS courses include Anthropology, Economics, English, Folklore, French, Gender Studies, Geography, History, Political Science, Religious Studies, Sociology. As part of their course selections in other areas of the degree, students are encouraged to supplement the International Studies Courses Requirement with the study of related concepts, traditions and phenomena across a variety of disciplines.
3. Up to 3 credit hours in an Honours essay course that clearly encompasses the International Studies course criteria may, upon the recommendation of the Head of Department and approval by the Faculty's Undergraduate Waivers and Appeals Committee, be deemed eligible as an IS course for the purposes of that individual student's program, only.
4. A student who is completing the International Bachelor of Arts degree program is required to complete at least 12 credit hours in designated IS courses in Memorial University of Newfoundland courses.

Table 3 International Studies (IS) Designated Courses

2000-Level	**3000-Level**	**4000-Level** (Minimum 6 credit hours)
Anthropology 2412, 2413 English 2122 Folklore 2500 Gender Studies 2010 Geography 2001, 2102, 2302 History 2065, 2500, 2510, 2800 Political Science 2200 Sociology 2250	Anthropology 3200, 3083, 3260, 3409, 3452 Economics 3030, 3150 English 3160 Folklore 3100, 3250, 3360 French 3654 Gender Studies 3008, 3025 Geography 3420, 3510, 3620, 3800 History 3030, 3765, 3807, 3811 Political Science 3210, 3220, 3230, 3235, 3250, 3260, 3285, 3290, 3295 Sociology 3260	Anthropology 4415, 4416 Economics 4030, 4031 Folklore 4470 Folklore 4460 or Religious Studies 4460 French 4654 Geography 4300 History 4419, 4421 Political Science 4210, the former 4215, 4230, 4255, 4290 Sociology 4093, 4230

6.2.4 Additional Language Study (LS) Requirement

1. The study of a variety of world languages and cultures is an important component of international study. An iBA student shall complete 12 credit hours in Language Study (LS) courses as follows:
   a. 6 credit hours in university-level study of a single language to satisfy the **Language Study Requirement;** and,
   b. 6 additional credit hours in any LS courses, ensuring that no more than 6 credit hours used towards fulfilling the **Additional Language Study Requirement** are completed in languages that are not actively spoken, including those eligible towards the **Certificate in Ancient Languages** (e.g., Ancient Greek, Latin, and Sanskrit).
2. A student who successfully completes university-level study of language at another institution may apply for LS transfer credit, including the study of a language not taught at Memorial University of Newfoundland for which unspecified LS credit hours may be awarded.
3. A student whose first language is not English, who does not meet the standards for entry into regular first-year English courses, and who uses English 1020 and 1021 to satisfy the **Language Study Requirement**, is required to complete 6 credit hours in LS courses to satisfy the **Additional Language Study Requirement**.

6.2.5 International Experience Requirement

Studying or working outside of Canada provides an opportunity for students to immerse themselves in the culture, politics and society of another country. During the program of study and while residing outside of Canada, a student for the iBA degree is required to complete either university-level study (INTL 312L or equivalent) or an approved international internship (INTL 399W). The International Experience Requirement will normally be completed prior to the final semester of the iBA program so that a student may build on the learning experience in remaining courses.

6.2.5.1 Student Responsibilities

1. Careful course planning is essential for a student enrolled in the iBA program. Students are encouraged to consult with an academic advisor and international exchange director.
2. A student will normally have completed at least 60 credit hours with a minimum 70% average, including a minimum of 6 credit hours in designated LS courses and 12 credit hours in designated IS courses, prior to commencement of study outside of Canada.
3. Students must thoroughly research and comply with visa requirements of the county they intend to visit. Visa processing times and requirements may vary depending on the student's nationality, the international experience location, and the nature of the visit.
4. It is assumed that, by virtue of studying at Memorial University of Newfoundland, a student who is not a Canadian citizen has international experience; equally, many Canadian citizens will have acquired international experiences for diverse reasons. Notwithstanding their prior experiences or home country, all students must satisfy either the International Study Option or the International Internship Option while actively enrolled in the iBA program.

6.2.5.2 International Study Option

1. The International Study Option is designed for students who have completed 60 credit hours or more. In consultation with an academic advisor, a student is encouraged to follow **Table 4 Possible Course Sequencing for the iBA, International Study Option (Final 60 Credit Hours)**.
2. Between their first registration at Memorial University of Newfoundland and the time of their graduation, a student will complete courses in an approved international study program, or complete an international exchange semester at one of Memorial University of Newfoundland's approved partner institutes. These courses will require residency outside of Canada and are normally to be completed in 12 consecutive weeks.
3. Information about study abroad programs offered by Memorial University of Newfoundland is available at **Go Abroad (Harlow Campus and International Field Schools)** and from the Office of the Dean of Humanities and Social Sciences.
4. Students must register for INTL 312L at the start of the international study program. Successful completion of this non-credit hour course will designate fulfillment of the International Study Option. Alternatively, students may successfully complete an appropriate combination of INTL 301L-311L, or the former INTL 399L, to meet the requirement of a minimum of 12 weeks of university-level study while residing outside of Canada. Registration for any of these courses uses the Course Change Form, requiring approval from a member of the Office of the Registrar and an Associate Dean of Humanities and Social Sciences (or designate). The Office of the Registrar must confirm the student's enrollment in approved university-level courses requiring residency outside of Canada (normally a minimum of 9 credit hours). The course shall be added to the transcript upon documentation of successful completion of such a program of study, normally involving residency outside of Canada a period of 12 weeks, being provided to the Office of the Registrar. Clarification about interpretation of eligibility for INTL 312L (or equivalent) shall be referred to the Faculty's Curriculum and Programs Committee.
5. Alternatively, and normally with prior written approval from the Head of Department, a student may complete a minimum of 9 credit hours instruction in another university-level program requiring study while residing outside of Canada. Before leaving Canada, the student must research the course offerings at the proposed host institute and obtain the course syllabi. These must be submitted along with a Letter of Permission to the Office of the Registrar. The transferability of the courses will be determined before the student commences the international program of study. Upon completion of the program, the student must request that the host

institute send the student's transcripts directly to the Office of the Registrar in order for the transcripts to be deemed official. The student must provide complete information about the program and complete the appropriate application for transfer credit which can be obtained online at www.mun.ca/regoff/forms.php. Documentation must establish that the course(s) was successfully completed while the student was residing outside of Canada, normally for a minimum 12 week duration. If the transfer credits occur within the final 30 credit hours for the degree, an iBA student will not require a waiver of the University residence requirement, provided that all other requirements and University regulations are observed, and provided that courses were taken at university-level institutions which are included in formal institutional exchange agreements with this University and are not subject to the requirements of this residency requirement clause; or with special permission from the Head of the department. For more information regarding transfer of credit, the student should consult with the Faculty's International Exchange Director or the Office of the Registrar.

6. Courses and programs that do not require residency outside of Canada for a minimum 12 week duration are ineligible for the **International Study Option**.

Table 4 Possible Course Sequencing for the iBA, International Study Option (Final 60 Credit Hours)

Semesters	Suggested Course Planning
1-4 (60 credit hours)	Follow **Table 2 Possible Course Sequencing for the International Bachelor of Arts (iBA) (First 60 Credit Hours)**, including attending an information session about **International Experience Requirement**.
5-6 (30 credit hours)	Courses #21-30 (30 credit hours): While registered for INTL 312L (or equivalent), complete credit hours as part of an approved international study program, or as part of an international exchange semester at an approved partner institute, requiring residency outside of Canada (normally for 12 consecutive weeks). Consider **Major** and **Minor** program requirements. Choose 12 credit hours in IS courses, comprised of 3 credit hours in each of four different disciplines. Request a degree audit from the Office of the Registrar and consult an academic advisor for assistance with remaining course selections.
7-8 (final 30 credit hours)	Courses #31-40 (30 credit hours): Choose 6 credit hours in IS courses at the 4000-level towards completing the remaining credit hours required for the **International Studies (IS) Courses Requirement**, ensuring that IS courses have been successfully completed in a minimum of 5 disciplines. Complete remaining requirements for the degree, including the **Major** and **Minor**.

6.2.5.3 International Internship Option

1. In lieu of the **International Study Option**, a small number of internship placements outside of Canada may be available for eligible students during the Fall or Winter semesters. The purpose is to provide a structured work-integrated educational experience that supports the development of intercultural competencies and global citizenship. The educational experience will be completed between a student's first registration at Memorial University of Newfoundland and the time of their graduation, normally prior to the final semester of the iBA program. The internship should build on a student's prior coursework, education, employment and personal experiences to allow the student to experience workplace culture in a location outside of Canada.
2. Admission to the **International Internship Option** is limited and competitive, and is available only to full-time students in the iBA program. In consultation with an academic advisor, an admitted student is encouraged to follow **Table 5 Possible Course Sequencing for the iBA, International Internship Option (Final 60 Credit Hours)**.
3. Co-operative Education is responsible for administering the International Internship Option, in consultation with the Head of the student's declared Major(s) and the Office of the Dean of Humanities and Social Sciences as applicable.
4. A student must apply to Co-operative Education. Deadline dates are January 15 (or next business day) for Fall internships, and May 15 (or next business day) for Winter internships.
5. A student will normally have completed at least 60 credit hours, including a minimum of 12 credit hours with a minimum 70% average in designated IS courses and a minimum of 6 credit hours in designated LS courses, prior to commencement of the internship outside of Canada.
6. General management of the International Internship Option is the responsibility of Co-operative Education, which provides supports to accepted students, including job search preparation, counselling, monitoring during work assignments and evaluating internships. These supports are available exclusively in preparation for a Fall semester internship or Winter semester internship.
7. A student must participate in professional development and debriefing sessions offered by Co-operative Education before and after the placement.
8. As part of admission to the International Internship Option, a student is responsible for identifying and securing a prospective internship to be completed during the program of study. Internships must be full-time (normally paid) and must be at least 12 weeks duration within the dates for Fall or Winter semesters as shown at www.mun.ca/coop. Students are strongly advised to complete all arrangements and secure approval before travelling internationally. All internships must be approved in writing by Co-operative Education, in consultation with the Head of the relevant academic unit, before the first day of the internship.
9. Students must register for INTL 399W (International Internship) during the approved internship. Registration for INTL 399W uses the Course Change Form, requiring approval from Co-operative Education and an Associate Dean of Humanities and Social Sciences (or designate). Co-operative Education must confirm that a full-time work or voluntary experience for at least 12 weeks duration in a location outside of Canada has been arranged. Students are required to complete the internship reporting requirements as set out by Co-operative Education. Successful completion of INTL 399W will designate fulfillment of the International Internship Option. The evaluation of the internship by Co-operative Education will result in one of the following grades being awarded: pass with distinction, pass, or fail. Clarification about interpretation of eligibility of a full-time or voluntary experience for INTL 399W shall be referred to the Faculty's Curriculum and Programs Committee.
10. Regardless of the location of an international internship, the employer must have sufficient command of the English language to communicate with Co-operative Education personnel.
11. Students who drop INTL 399W without approval from Co-operative Education or who fail to honour an agreement to work with an employer, or conduct themselves in a manner which results in their discharge from the internship, will normally be awarded a grade of fail for INTL 399W and will not be eligible to re-apply to the International Internship Option.
12. A student who completes an equivalent internship position outside of Canada as part of another university-level academic program

should contact Co-operative Education and the Office of the Registrar about the possibility of receiving INTL 399W as transfer credit.

13. In extenuating circumstances, duly authenticated, a student may apply for permission from the Undergraduate Waivers and Appeals Committee to self-initiate and complete a work placement during the Fall or Winter semester within Canada involving an equivalent immersion in international cultures. As per **Waiver of Regulations for Undergraduate Students, Other Regulations**, a detailed rationale for the request must be must be made in writing to the Secretary of the Undergraduate Waivers and Appeals Committee, Faculty of Humanities and Social Sciences. Prior to doing so a student is expected to meet with Co-operative Education to discuss requirements associated with the proposed equivalency placement.

Table 5 Possible Course Sequencing for the iBA, International Internship Option (Final 60 Credit Hours)

Semester	Suggested Course Planning
1-4 (60 credit hours)	Follow **Table 2 Possible Course Sequencing for the International Bachelor of Arts (iBA) (First 60 Credit Hours)**, including attending an information session about **International Internship Option**.
5-6 (30 credit hours)	Courses #21-30: Consider **Major** and **Minor** program requirements. Choose 12 credit hours in IS courses, comprised of 3 credit hours in each of four different disciplines. Request a degree audit from the Office of the Registrar and consult an academic advisor for assistance with remaining course selections. Apply to Co-operative Education for entry into the **International Internship Option** at least eight months before commencing work for the internship.
7 (15 credit hours)	Courses #31-35: Choose 3 credit hours in an IS course at the 4000-level. Consider **Major** and **Minor** program requirements.
8 (Fall or Winter only) (3 credit hours)	Course #36: INTL 399W while completing an approved internship outside of Canada.
9 (final 12 credit hours)	Courses #37-40: Choose 3 credit hours in an IS course at the 4000-level towards completing the remaining credit hours required for the **International Studies (IS) Courses Requirement**, ensuring that IS courses have been successfully completed in a minimum of 5 disciplines. Complete remaining requirements for the degree, including the **Major** and **Minor**.

6.2.6 International Bachelor of Arts (iBA) as a Second Degree

A student who has been previously awarded a General Degree of Bachelor of Arts or a Bachelor of Arts Honours degree is not eligible to complete or be awarded the International Bachelor of Arts (iBA) degree.

6.2.7 Previous Calendar Regulations

An International Bachelor of Arts (iBA) student who, prior to September 2017, successfully completed an eligible course that subsequently received the IS designation may use up to 15 credit hours towards the **International Studies (IS) Courses Requirement**. Eligible courses successfully completed before September 2017 are limited to Anthropology 2412, 2413, 4416; Anthropology 3260 or Sociology 3260; Economics 3030, 4030, 4031; Folklore 3250, 4470; Geography 2102, 3510, 3800, 4300; History 2500, 2510, 2800, 3030; French 3654; Political Science 2200, 3210, 3220, 3250, 3290,the former 4215, 4230, 4255; Sociology 2250, 4230, 4093. Normal requirements for credit hours from five disciplines and for 4000-level credit hours continue to apply.

6.3 Graduation Requirements for the Bachelor of Arts and International Bachelor of Arts (iBA) General Degrees

1. In order to graduate with the **Bachelor of Arts General Degree**, a student shall obtain:
   a. an overall average of 60% or higher on the minimum number of courses prescribed for **The Major Program** and,
   b. an average of 60% or higher on the minimum number of courses prescribed for **The Minor Program**.
2. In order to graduate with the **International Bachelor of Arts (iBA)** General Degree, a student shall obtain:
   a. an overall average of 60% or higher on the minimum number of courses prescribed for **The Major Program**,
   b. an average of 60% or higher on the minimum number of courses prescribed for **The Minor Program**, and
   c. an average of 70% or higher in the minimum number of designated International Studies (IS) courses prescribed for the International Studies Courses Requirement.
3. Students must apply to graduate by the appropriate deadline through the Memorial Self-Service under the Graduation section. Additional information is available from the Office of the Registrar at www.mun.ca/regoff/graduation.

6.4 Bachelor of Arts (Honours) and International Bachelor of Arts (iBA) (Honours) Degree Regulations

1. A program is offered leading to the Honours Degree of Bachelor of Arts and the Honours Degree International Bachelor of Arts (iBA). The Bachelor of Arts Honours and the iBA degrees require, over and above the requirements of the **General Degree**, a concentration at an advanced level in an approved field, consisting of a subject or subjects of specialization and/or related subjects, and a high quality of work throughout the program. An Honours degree is of distinct advantage to students who plan advanced work or careers in their chosen fields and also to those who have a clear commitment to some special field of study. An Honours degree with first or second class standing is, in many cases, a prerequisite for admission to a graduate program.
2. A student completing a degree program in the Faculty of Humanities and Social Sciences will normally follow the degree regulations in effect in the academic year in which the student first entered Memorial University of Newfoundland. This is determined by the year of the student number. However, a student may elect to follow subsequent regulations introduced during the student's tenure in the

program.

6.4.1 Admission and Registration

1. Admission to Honours programs is competitive and limited, depending upon available resources. A student should consult the criteria established for the program in question. To be considered for admission to an Honours program, a student shall submit an "Application for Admission to Honours" form to the Office of the Registrar. The application may be obtained at www.mun.ca/regoff/forms.php. The application must be approved by the Head of the Department or Program Supervisor of the Subject of Specialization before the student can be admitted to the program.
2. A student who wishes to enter an Honours program is strongly advised to consult the Head of the Department or Program Supervisor at the earliest possible date, as it may not be possible to complete the requirements for the degree in the normal time if the decision to embark on the program is delayed beyond the end of the second year.
3. A student who has been awarded the General Degree of Bachelor of Arts may convert it to an Honours Degree of Bachelor of Arts by applying to the department of specialization and the Registrar and, upon approval of such application by the Department, completing the requirements for the Honours degree as set forth in the regulations. Similarly, a student who has been awarded the General Degree of International Bachelor of Arts may convert it to an Honours Degree of International Bachelor of Arts by following the same process.
4. Upon entering the program, the student shall be assigned a Faculty Advisor by the Head of the Department or Program Supervisor. The Faculty Advisor will be responsible for advising the student and the Head of the Department or Program Supervisor with respect to the student's program of studies.

6.4.2 Subjects of Specialization

Subjects which may be chosen as Subjects of Specialization for the Honours Degree of the Bachelor of Arts or the Honours Degree of the iBA are the following:

1. Those administered by Departments in the Faculty of Humanities and Social Sciences by the Head of the Department: Anthropology, Archaeology, Classics, Economics, English, Folklore, French, Geography, German, History, Linguistics, Philosophy, Political Science, Religious Studies, Sociology.
2. Bachelor of Arts Honours Programs are also available in and administered by the following Faculty of Science Departments: Computer Science, Mathematics and Statistics, Psychology. These programs require a Minor, or alternatively a second Major, in the Bachelor of Arts offered by a Department in the Faculty of Humanities and Social Sciences.

6.4.3 Course Requirements

A student for the Honours Degree of Bachelor of Arts or the Honours Degree of the iBA shall complete a program of studies that shall consist of not fewer than 120 credit hours subject to the following regulations:

1. A student is required to complete the **Core Requirements** as detailed in the **Regulations for the General Degree of Bachelor of Arts**. These include:
   a. **Breadth of Knowledge Requirement**
   b. **Critical Reading and Writing (CRW) Requirement**
   c. **Language Study (LS) Requirement**
   d. **Quantitative Reasoning (QR) Requirement**
2. A student must also:
   a. Pass a general comprehensive examination in a **Subject of Specialization**. This examination may be written, or oral, or a combination of both. The comprehensive examination shall count as 3 credit hours in the **Subject of Specialization**; and/or
   b. Submit an Honours essay on an approved topic which, at the discretion of the Head of the Department or the Program Supervisor, may be followed by an oral examination thereon. Normally, the Honours essay will count as 3 credit hours in the **Subject of Specialization**, or as 6 credit hours in the case of linked (A/B) Honours essays (please consult departmental regulations).

      The semester in which the student sits for the comprehensive examination, and/or the semester in which the Honours essay is to be submitted, may be decided by the student after consultation with the Head of the Department or Program Supervisor.

      A copy of the Honours essay must be submitted to the University Library upon completion. All Honours essays in the University Library shall be available for unrestricted consultation by students and faculty except under very exceptional circumstances, which must be approved by the Head of the department concerned. Copyright remains with the author. A signed release form must accompany an essay or dissertation when it is submitted to the University Library.
3. Further courses shall be chosen either
   a. in consultation with the Faculty Advisor and with the approval of the Head of the Department or Program Supervisor of the **Subject of Specialization**. The student's program shall include not fewer than 60 credit hours in courses applicable to the **Subject of Specialization**, including the comprehensive examination and/or the Honours essay, at least 36 of which must be at the 3000 level or above, and not fewer than 24 credit hours in a Minor subject or program according to the Departmental or Program Regulations covering that Minor, and the total number of credit hours which may be applied to the degree is not fewer than 120; or
   b. in consultation with the Faculty Advisor and with the approval of the Head of the Department or Program Supervisor of the **Subject of Specialization**. The student's program shall include not fewer than 60 credit hours in courses applicable to the **Subject of Specialization**, including the comprehensive examination and/or the Honours essay, at least 36 of which must be at the 3000 level or above, and not fewer than 36 credit hours in a Major subject or program according to the Departmental or Program Regulations governing that Major, and the total number of credit hours which may be applied to the degree is not fewer than 120; or
   c. a student may complete the Joint Honours program.

6.4.4 Departmental Regulations

A student for Honours degrees shall also comply with such additional requirements of the appropriate Department(s) as are approved by the Senate and printed in the Calendar.

6.4.5 The Joint Honours Program

As an alternative to a Major and Minor, a student may complete a Joint Honours, which consists of a minimum of 42 to a maximum of 51 credit hours taken from each of two participating Honours programs. The student must fulfill all other requirements of the B.A. or iBA degree, including the minimum of 120 credit hours.

1. Students who choose a Joint Honours program will have requirements reduced in each Honours program as prescribed in the program's regulations and found in each individual program's Calendar entry.
2. The Joint Honours program requires completion of an Honours program in at least one of the following: Anthropology, Archaeology, Classics, Economics, English, Folklore, French, Geography, German, History, Linguistics, Philosophy, Political Science, Religious Studies, Sociology.
3. The student's program shall include not fewer than 42 and not more than 51 credit hours in courses approved for each of the Subject of Specialization, including the comprehensive examination and/or the Honours essay, of which at least 27 shall be at the 3000 level or above in each of the **Subjects of Specialization**, and the total number of credit hours which may be applied to the degree is not fewer than 120.
4. A student in the Joint Honours program may choose the Subject of Specialization for the Honours essay and/or comprehensive examination.
5. As outlined in **Limit on Certain Credit Hours**, credit hours cannot be simultaneously used to fulfill the requirements of both programs in Joint Honours.

6.5 Graduation Requirements for the Bachelor of Arts (Honours) and the International Bachelor of Arts (iBA) (Honours) Degrees

6.5.1 Academic Standing - Bachelor of Arts (Honours) and the International Bachelor of Arts (iBA) (Honours) Degrees

A student for the Bachelor of Arts (Honours) or the International Bachelor of Arts (iBA) (Honours) degree shall complete a program of studies that shall consist of not fewer than 120 credit hours subject to the following regulations:

1. In order to graduate with a Bachelor of Arts (Honours) or the International Bachelor of Arts (iBA) (Honours) degree, a student shall obtain:
   a. a grade of 70% or better, or an average of 75% or higher in the minimum number of courses (including the required courses in the Honours subject(s) prescribed by the Department or, in the case of Joint Honours, Departments concerned. A grade of 70% or better must be obtained in the Honours essay and/or comprehensive examinations;
   b. an average of at least 2.75 points on the total number of credit hours in the courses required for the degree. (See **General Academic Regulations (Undergraduate)**, **Classification of General Degrees**); and
   c. an average of 70% or higher in the minimum number of designated International Studies (IS) courses prescribed for the International Studies Courses Requirement for students completing the International Bachelor of Arts (iBA) (Honours) degree.

   Note: *A student may, with the written approval of the Head of the Department and the Faculty's Undergraduate Waivers and Appeals Committee, repeat or substitute up to three courses in order to meet the requirements of Clause 1. above. In counting repeats, each attempt at the same course will count as one course towards the maximum. That is, the same course, repeated three times, would place a student at the maximum and no additional repeats or substitutions would be allowed. The Honours essay and/or comprehensive examinations may not be repeated or substituted.*

6.5.2 Classification of Degrees

1. If a student's general average is 3.25 points or better per credit hour in required courses and the student's average is 3.5 points or better per credit hour in the courses in the Honours subject, the student shall be awarded an Honours degree with First Class standing.
2. If a student fulfils the conditions of **Academic Standing** above but not of Regulation 1. under **Classification of Degrees**, the student shall be awarded an Honours degree with Second Class standing.
3. No classification will be given to the degree awarded a student who has successfully completed:
   a. fewer than one half of the courses required for the degree at this University, or
   b. who has successfully completed fewer than one half of the courses required for the degree at this University since 1959. All students for such degrees shall, however, fulfil the condition of **Academic Standing** above on the courses taken at this University since September 1959 in order to qualify for the degree.
4. A declared student for an Honours degree who fails to attain the academic standing specified in **Academic Standing** above but fulfils the academic requirements for a General degree shall be awarded a General degree, the classification of which shall be determined in accordance with **General Academic Regulations (Undergraduate), Classification of General Degrees**.

6.6 Regulations Governing Co-operative Education Program

1. Co-operative Education programs are offered in the **Department of Archaeology**, **Department of Economics** and **Department of Political Science**.
2. A student who transfers from a Co-operative Education degree program to an International Bachelor of Arts (iBA) degree program may, with permission of the Faculty's Undergraduate Waivers and Appeals Committee and the Head of the department, be permitted to satisfy INTL 399W with the successful completion of a respective Major program work term that was completed outside of Canada.

6.7 Joint Degrees of Bachelor of Arts and Bachelor of Commerce (Co-operative)

1. A student must be formally admitted into the Bachelor of Commerce (Co-operative) program in order to concurrently complete the requirements for the Joint Degrees of Bachelor of Arts and Bachelor of Commerce (Co-operative).
2. The Joint Degrees of Bachelor of Arts and Bachelor of Commerce (Co-operative) is a five year, full-time, 50 course, 150 credit hour program with a structured format comprised of 30 credit hours completed during **Business One**, four Business Professional Development seminars, 120 credit hours completed after **Business One** and three co-operative work terms.
3. Some degree requirements are modified for students concurrently completing the Joint Degrees program. The modifications for the Bachelor of Arts portion of the program are outlined below under **Special Requirements for the Joint Degrees of Bachelor of Arts and Bachelor of Commerce (Co-operative), Bachelor of Arts**. The modifications for the Bachelor of Commerce (Co-operative) portion of the program are outlined below under **Special Requirements for the Joint Degrees of Bachelor of Arts and Bachelor of Commerce (Co-operative), Bachelor of Commerce (Co-operative)** and at **Faculty of Business Administration Joint Degrees of Bachelor of Commerce (Co-operative) and Bachelor of Arts**. These modifications to the normal curriculum will only be permitted for students who are graduating with the Bachelor of Arts degree and the Bachelor of Commerce (Co-operative) degree at the same convocation.
4. Careful planning of courses is crucial to ensure timely completion of the Joint Degrees of Bachelor of Arts and Bachelor of Commerce (Co-operative). Therefore, a student is strongly encouraged to consult regularly with academic advisors in the Faculty of Humanities and Social Science, the Faculty of Business Administration, and the Faculty of Science, as appropriate.
5. A student intending to complete the Joint Degrees in the minimum number of 150 credit hours should ensure that at least 78 of these credit hours are completed in courses offered by departments within the Faculty of Humanities and Social Sciences. Majors are also available from the following Departments in the Faculty of Science: Computer Science, Mathematics and Statistics, and Psychology. Careful planning, particularly in the selection of elective courses as well as in the sequence of Major program courses, is therefore recommended to ensure timely completion of the Joint Degrees.
6. A student is advised that, in order to complete the Joint Degrees within the minimum 150 credit hours, at least five of the courses required for the Bachelor of Arts must be successfully completed as opportunities arise and as courses are offered. These courses may be completed during the Spring semesters between Business One and Term 1, between Terms 2 and 3, or during any of the three Work Terms or as a sixth course during any of the Academic Terms following submission and approval of a course load waiver request to the Academic Programs Office of the Faculty of Business Administration.
7. The 150 required credit hours are outlined below in **Table 1 Joint Degrees of Bachelor of Arts and Bachelor of Commerce (Co-operative)**.

6.7.1 Special Requirements for the Joint Degrees of Bachelor of Arts and Bachelor of Commerce (Co-operative)

6.7.1.1 Bachelor of Arts

1. A student intending to complete the Joint Degrees in the minimum number of 150 credit hours should ensure that at least 78 of these credit hours are completed in courses offered by departments within the Faculty of Humanities and Social Sciences. Careful planning, particularly in the selection of elective courses as well as in the sequence of Major program courses, is therefore recommended to ensure timely completion of the Joint Degrees.
2. A student is advised that, in order to complete the Joint Degrees within the minimum 150 credit hours, at least five of the courses required for the Bachelor of Arts must be successfully completed as opportunities arise and as courses are offered. These courses may be completed during the Spring semesters between Business One and Term 1, between Terms 2 and 3, or during any of the three Work Terms or as a sixth course during any of the academic terms following submission and approval of a course load waiver request to the Academic Programs Office.
3. A student who chooses to pursue a Major from the Faculty of Science (Computer Science, Mathematics and Statistics, and Psychology) will require more than 150 credit hours to complete their program to ensure meeting the 78 credit hour requirement from the Faculty of Humanities and Social Sciences. Regular consultation with the appropriate academic advisors within the Faculty of Humanities and Social Sciences and Faculty of Science is encouraged.
4. The Bachelor of Arts requires completion of a **Major Program**, a **Minor Program**, a set of **Core Requirements** (comprising a **Breadth of Knowledge Requirement**, a **Critical Reading and Writing (CRW) Requirement**, a **Language Study (LS) Requirement**, a **Quantitative Reasoning (QR) Requirement**, and **Elective** courses, totalling at least 78 credit hours in courses offered by departments within the Faculty of Humanities and Social Sciences. Majors are also available from the following Departments in the Faculty of Science: Computer Science, Mathematics and Statistics, and Psychology. When the Bachelor of Arts is completed jointly with the Bachelor of Commerce (Co-operative) the following course adjustments will be made to the Bachelor of Arts degree:
   a. Minor program requirements are satisfied by Business courses specified in **Table 1 Joint Degrees of Bachelor of Arts and Bachelor of Commerce (Co-operative)**; and
   b. the 6 credit hours for the Quantitative Reasoning (QR) requirement for the Bachelor of Arts are satisfied by Mathematics 1000 and Statistics 2500;
   c. Major requirements for the Bachelor of Arts may be satisfied in 36 to 45 credit hours, depending on the department or program chosen. A student is strongly recommended to seek advice from the department or program of the chosen Major to ensure that the proposed degree program is possible within the constraints of course scheduling and prerequisites.
5. A student must also complete the special requirements outlined below under **Bachelor of Commerce (Co-operative)**.

6.7.1.2 Bachelor of Commerce (Co-operative)

1. A student in the Bachelor of Commerce (Co-operative) program who is concurrently completing the Bachelor of Arts degree must complete not fewer than 18 and not more than 39 credit hours in approved Business Electives, and no fewer than 12 credit hours, but no more than 33 credit hours, in elective courses chosen from the Faculty of Humanities and Social Sciences.
2. A student in the Bachelor of Commerce (Co-operative) program who is concurrently completing the Bachelor of Arts degree must complete the special requirements outlined above under **Bachelor of Arts**.

6.7.2 Bachelor of Arts Completed Jointly with the Bachelor of Commerce (Co-operative)

- In addition to the requirements listed below in **Table 1 Joint Degrees of Bachelor of Arts and Bachelor of Commerce (Co-operative)**, students should also refer to information listed under **Joint Degrees of Bachelor of Arts and Bachelor of Commerce (Co-operative)** including the **Special Requirements for the Joint Degrees of Bachelor of Arts and Bachelor of Commerce (Co-operative)**.

Table 1 Joint Degrees of Bachelor of Arts and Bachelor of Commerce (Co-operative)

Term	Required Courses	Electives
Business One (30 credit hours completed prior to admission)	Business 1000 Economics 1010, Economics 1020 6 credit hours in English, 3 credit hours of which may be replaced by any Memorial University of Newfoundland Critical Reading and Writing (CRW) course Mathematics 1000	12 additional credit hours in non-Business electives as indicated in **Special Requirements for the Joint Degrees of Bachelor of Arts and Bachelor of Commerce (Co-operative)**, 4. above
Fall Academic Term 1	Business 2011, 2111 3 credit hours chosen from Business 2205, 2600, 2720 Statistics 2500	3 credit hours in Major, Core or elective courses as indicated in **Special Requirements for the Joint Degrees of Bachelor of Arts and Bachelor of Commerce (Co-operative)**, 4. above
Winter Academic Term 2	Business 200W, 2012, 2112, 6 credit hours from Business 2205, 2600, 2720 which must be different from the 3 credit hours chosen in Fall, Academic Term 1	3 credit hours in Major, Core or elective courses as indicated in **Special Requirements for the Joint Degrees of Bachelor of Arts and Bachelor of Commerce (Co-operative)**, 4. above
Spring		See **Special Requirements for the Joint Degrees of Bachelor of Arts and Bachelor of Commerce (Co-operative)** and **Bachelor of Arts**, 2. above
Fall Academic Term 3	Business 300W, 3325, 3401, 3550	6 credit hours in Major, Core or elective courses as indicated in **Special Requirements for the Joint Degrees of Bachelor of Arts and Bachelor of Commerce (Co-operative), Bachelor of Commerce (Co-operative)** 1. above and in **Special Requirements for the Joint Degrees of Bachelor of Arts and Bachelor of Commerce (Co-operative), Bachelor of Arts**, 1. and 4. respectively
Winter Work Term 1	Business 399W	See **Special Requirements for the Joint Degrees of Bachelor of Arts and Bachelor of Commerce (Co-operative)** and **Bachelor of Arts**, 2. above
Spring Academic Term 4	Business 3005, 3310, 3335, 3700, 400W	3 credit hours in Major, Core or elective courses as indicated in **Special Requirements for the Joint Degrees of Bachelor of Arts and Bachelor of Commerce (Co-operative)** 1. above and in **Special Requirements for the Joint Degrees of Bachelor of Arts and Bachelor of Commerce (Co-operative)**, 1. and 4. respectively
Fall Work Term 2	Business 499W	See **Special Requirements for the Joint Degrees of Bachelor of Arts and Bachelor of Commerce (Co-operative)** and **Bachelor of Arts**, 2. above
Winter Academic Term 5	Business 4720	12 credit hours in Major, Core or elective courses as indicated in **Special Requirements for the Joint Degrees of Bachelor of Arts and Bachelor of Commerce (Co-operative), Bachelor of Commerce (Co-operative)** 1. above and in **Special Requirements for the Joint Degrees of Bachelor of Arts and Bachelor of Commerce (Co-operative), Bachelor of Arts**, 1. and 4. respectively
Spring Work Term 3	Business 599W	See **Special Requirements for the Joint Degrees of Bachelor of Arts and Bachelor of Commerce (Co-operative), Bachelor of Commerce (Co-operative)** and **Bachelor of Arts**, 2. above
Fall Academic Term 6	Business 4306, 500W	12 credit hours in Major, Core or elective courses as indicated in **Special Requirements for the Joint Degrees of Bachelor of Arts and Bachelor of Commerce (Co-operative), Bachelor of Commerce (Co-operative)** 1. above and in **Special Requirements for the Joint Degrees of Bachelor of Arts and Bachelor of Commerce (Co-operative), Bachelor of Arts**, 1. and 4. respectively
Winter Academic Term 7	Business 5001	12 credit hours in Major, Core or elective courses as indicated in **Special Requirements for the Joint Degrees of Bachelor of Arts and Bachelor of Commerce (Co-operative), Bachelor of Commerce (Co-operative)** 1. above and in **Special Requirements for the Joint Degrees of Bachelor of Arts and Bachelor of Commerce (Co-operative), Bachelor of Arts**, 1. and 4. respectively

6.8 Joint Degrees of Bachelor of Arts and Bachelor of Science

Students who wish to simultaneously pursue a Bachelor of Arts program and a Bachelor of Science program may do so by completing a minimum of 135 credit hours in courses, rather than the minimum of 150 credit hours required under ***UNIVERSITY REGULATIONS* - General Academic Regulations (Undergraduate), Residence Requirements - Second Degree**.

Students who complete the Joint Degrees of Bachelor of Arts and Bachelor of Science are not required to complete a Minor. Students may complete the requirements for a Minor, or an additional (third) Major, in accordance with ***UNIVERSITY REGULATIONS* - General Academic Regulations (Undergraduate), Degree and Departmental Regulations - Further Credentials**.

Credit hours earned in Computer Science, Economics, Geography, Mathematics and Statistics, and Psychology may be eligible to simultaneously satisfy a requirement for credit hours in the Faculty of Humanities and Social Sciences and a requirement for credit hours in the Faculty of Science.

Careful planning of courses is crucial to ensure timely completion of the Joint Degrees of Bachelor of Arts and Bachelor of Science. Students enrolled in this program, or who plan to enroll in this program, are strongly encouraged to consult regularly with appropriate academic advisors in both the Faculty of Humanities and Social Sciences and the Faculty of Science. It may not be possible to complete the requirements for the Joint Degrees in the normal time if the decision to embark on the program is delayed.

Students who have enrolled in the Joint Degrees of Bachelor of Arts and Bachelor of Science must satisfy all program requirements before they may be granted either the degree of Bachelor of Arts or the degree of Bachelor of Science, and must graduate with both degrees at the same convocation.

1. The minimum of 135 credit hours for the Joint Degrees of Bachelor of Arts and Bachelor of Science shall include:
   a. a Major program chosen from those Majors offered by departments within the Faculty of Humanities and Social Sciences, with the exception of Majors offered by the Department of Computer Science, the Department of Mathematics and Statistics, and the Department of Psychology;
   b. a Major program chosen from those Majors offered by departments within the Faculty of Science, with the exception of Majors offered by the Department of Economics and the Department of Geography;
   c. the **Core Requirements** for the Faculty of Humanities and Social Sciences (including the **Breadth of Knowledge Requirement**, the **Critical Reading and Writing (CRW) Requirement**, the **Language Study (LS) Requirement**, and the **Quantitative Reasoning (QR) Requirement**), for which the Quantitative Reasoning Requirement shall be satisfied by 6 credit hours in Mathematics and Statistics courses;
   d. 6 credit hours in courses from each of two Sciences other than Mathematics and Statistics courses;
   e. a total of at least 78 credit hours in courses offered by departments within the Faculty of Humanities and Social Sciences, and a total of at least 78 credit hours offered by departments within the Faculty of Science; and
   f. no more than 6 credit hours in courses offered by a Faculty or School other than the Faculty of Humanities and Social Sciences or the Faculty of Science.

   While the Joint Degrees of Bachelor of Arts and Bachelor of Science is available to all Major programs offered by the Faculty of Humanities and Social Sciences and the Faculty of Science, students pursuing a Major outside of Computer Science, Economics, Geography, Psychology, Pure Mathematics or Statistics should pay special attention to course planning and selection to ensure that this requirement is met within the required 135 credit hours.
2. Admission to the Major programs shall be governed by **Faculty of Humanities and Social Sciences - Admission to the Bachelor of Arts General Degree Programs** and **Faculty of Science - Admission**.
3. Students who have already completed a bachelor's degree are not eligible to complete the Joint Degrees of Bachelor of Arts and Bachelor of Science, but may separately complete a Bachelor of Arts or a Bachelor of Science in accordance with ***UNIVERSITY REGULATIONS* - General Academic Regulations (Undergraduate), Residence Requirements - Second Degree**.

7 Diploma Programs

www.mun.ca/hss/programs/undergraduate/diplomas

Diploma Programs in the Faculty of Humanities and Social Sciences are of distinct advantage to students who wish to complement their studies in one or more fields of specialization. Students can choose programs that either develop knowledge relevant to growing sectors of the economy and to areas of increasing social concern, or enable exploration of a concentrated subject from a variety of disciplinary perspectives. Diploma programs tend to provide more in-depth study of a specialized area than certificate programs do and consequently feature more course options at an advanced level of study.

The Faculty of Humanities and Social Sciences offers the following diploma programs:

1. **Diploma in Ancient Worlds**
2. **Diploma in Creative Writing**
3. **Diploma in Environmental Humanities**
4. **Diploma in Geographic Information Sciences**
5. **Diploma in Humanities**
6. **Diploma in Northern Peoples, Lands, and Resources**
7. **Diploma in Stage and Screen Technique**

7.1 General Regulations for Diploma Programs

1. A diploma program is administered by a Program Director. The Program Director is normally affiliated with the Faculty of Humanities and Social Sciences department that is primarily responsible for the Program's administration.
2. Diploma programs consist of between 24 and 36 credit hours in courses as specified in individual programs.
3. Subject to limitations outlined in **Limit on Certain Credit Hours**, courses satisfying the Honours, Major, Minor and elective components of an undergraduate degree may also be used to satisfy the requirements of a diploma program. Departmental prerequisites for courses are applicable. This may increase the number of stated courses required for completion of the diploma program. Such courses may be eligible towards other components of the Bachelor of Arts.
4. Normal credit restrictions apply. It is the student's responsibility to recognize that additional credit may not be obtained for successfully completing two versions of a cross-listed course (i.e., the same course delivered by two or more departments).
5. A Program Director may, in consultation with the Head of the relevant academic unit, request permission from the Faculty's Undergraduate Waivers and Appeals Committee for a course to be added to the program.
6. A student may apply to the Faculty's Undergraduate Waivers and Appeals Committee to have a maximum of 3 credit hours from an Honours essay course applied to a diploma program. It must be clearly demonstrated that the entirety of the Honours essay course content is relevant to the program. This may not be used to substitute credit hours in a core course.
7. Due to their temporary nature, "special topics" courses are not listed in the entries for a diploma program. However, a special topics course may be included in a student's program of study with permission from the Faculty's Undergraduate Waivers and Appeals Committee.
8. A student who completes courses at another university in the area of a Diploma offered by the Faculty of Humanities and Social Sciences may be eligible to transfer some of those credits to fulfill requirements in the Major at Memorial University of Newfoundland. For further information refer to **Limited Enrolment Courses and Transfer Credits, Requirement for Courses Delivered at Memorial University of Newfoundland**.

7.2 Admission

Students seeking information about specific diploma programs should contact the Diploma Program Director, the Office of the Dean of Humanities and Social Sciences, or the Office of the Registrar.

1. Admission to all diploma programs is competitive and limited, depending upon available resources. For additional requirements stipulated by individual diploma programs, see the appropriate Calendar entry below.
2. All applicants for diploma programs must also be admitted to the University. The application for admission or readmission to the University is submitted online at www.mun.ca/undergrad/admissions/apply. A complete application package includes an application to the University, an application to the Diploma Program, and any other required documentation (for those who have not attending Memorial University of Newfoundland in the three preceding semesters). Details are available under ***UNIVERSITY REGULATIONS* - Admission/Readmission to the University (Undergraduate)**.
3. Applicants for admission to diploma programs must apply by completing the appropriate form available at the Faculty of Humanities and Social Sciences website or from the Office of the Registrar.

7.3 Graduation Requirements

1. To be eligible for the award of a diploma, a student must have obtained an overall average of 60% or higher in the courses prescribed for that program.
2. As per **Limited Enrolment Courses and Transfer Credits, Requirements for Courses Delivered by Memorial University of Newfoundland** a minimum of 12 credit hours in courses prescribed for the diploma program must be completed at this University.
3. Students must apply to graduate by the appropriate deadline through the Memorial Self-Service under the Graduation section. Additional information is available from the Office of the Registrar at www.mun.ca/regoff/graduation/.

7.4 Diploma in Ancient Worlds

www.mun.ca/hss/ancientworlds
www.mun.ca/hss/about/contact/coordinators.php

The Diploma in Ancient Worlds is administered by the Department of Archaeology.

The Diploma in Ancient Worlds is designed for those who are interested in the study of the history, customs, and culture of the Ancient World. The program's objective is to offer students a representative breadth of knowledge about the Ancient World. It is structured around introductory and advanced courses in Archaeology, Classics, History, Philosophy, and Religious Studies and promotes familiarity with at least three disciplines among the five offered. The program also includes Archeology 2583, an introduction to applied archaeology. The core skills and competencies taught in the course of the program will prepare students for pursuing studies in a variety

of interdisciplinary fields.

7.4.1 Faculty of Humanities and Social Sciences Diploma Regulations

Students intending to complete a diploma program within the Faculty of Humanities and Social Sciences must meet the Admission requirements as outlined in the University Calendar. Students are also advised to consult the University Calendar regarding **General Regulations for Diploma Programs** and **Graduation Requirements**.

7.4.2 Advising

Throughout their program of study, students shall contact an academic advisor or the Program Director of the Diploma in Ancient Worlds for assistance with course planning, declaring their program of study, prerequisite and registration issues, and with questions about the eligibility of any courses not listed here.

A tentative list of upcoming course offerings in the program can be found at www.mun.ca/hss/courses.php.

7.4.3 Declaring the Diploma in Ancient Worlds

Students wishing to declare a Diploma in Ancient Worlds are encouraged to consult with the Program Director to discuss the requirements of the program. Information about declaring a program of study in the Faculty of Humanities and Social Sciences is available at www.mun.ca/hss/programs/undergraduate/ideclare.php.

7.4.4 Regulations for the Diploma in Ancient Worlds

As part of the Diploma in Ancient Worlds, students must successfully complete courses up to and including the 3000 level and may take courses at the 4000 level. The Diploma in Ancient Worlds consists of 27 credit hours, as prescribed below:

1. Archaeology 1000 or the former 1030, 2480, and 2583 (or the former 3583), and
2. 18 credit hours from **Table 1 Approved Courses for the Diploma in Ancient Worlds**, which must include 3 credit hours in at least two of Classics, History, Religious Studies, Philosophy. This may include no more than 6 credit hours in designated Language Study courses and no more than 6 additional credit hours from Archaeology.

The Calendar description of courses eligible for the diploma place an emphasis on the study of ancient history, culture, and/or customs that pre-dates the Middle Ages (i.e., before 500 A.D.). With the prior written permission of the Program Director and the Faculty's Undergraduate Waivers and Appeals Committee, credit hours may be completed in eligible courses not listed in **Table 1 Approved Courses for the Diploma in Ancient Worlds** provided that the Faculty of Humanities and Social Sciences course calendar description is clearly related to the diploma's objectives. An approved list is maintained at www.mun.ca/hss/ancientworlds.

Not all courses are offered every semester. Students are strongly advised to consult with the Program Director for assistance with course planning, and to generally follow **Table 2 Suggested Course Sequencing for the Diploma in Ancient Worlds**.

Table 1 Approved Courses for the Diploma in Ancient Worlds

Archaeology 1000 or the former 1030, 2480, 2481, 2583 or the former 3583, 3290, 3500, 3510, 3585-3586, 3687	Philosophy 2201 or the former 2701, 3010 or the former 3730, 3020 or the former 3740
Classics - any course	Religious Studies 1050, 1051, 1060, 1061, 2050, 2051, 2420, 3010, 3020, 3031, 3305, 3310, 3411, 3431, 3432, 3600
History 2020, the former 2031, 2035, 2041, 2042, 3270 or Medieval Studies 3270 or Religious Studies 3270, the former History 3930	

Table 2 Suggested Course Sequencing for the Diploma in Ancient Worlds

First 9 credit hours: Archaeology 1000 or the former 1030, 6 credit hours from **Table 1 Approved Courses for the Diploma in Ancient Worlds** courses (breadth encouraged)
Next 9 credit hours: Archaeology 2480, 6 credit hours from **Table 1 Approved Courses for the Diploma in Ancient Worlds** courses (breadth encouraged)
Final 9 credit hours: Archaeology 2583 (or the former 3583) and 6 credit hours from **Table 1 Approved Courses for the Diploma in Ancient Worlds** courses (ensure Diploma minimum of two of Classics, History, Religious Studies and Philosophy; no more than 6 credit hours in Language Study courses; no more than a total of 15 credit hours in Archaeology)

7.4.5 Course Prerequisites

Many approved courses are suitable for students in all disciplines without a background in the given discipline. Other approved courses may have prerequisites. Students who are enrolled in the Diploma in Ancient Worlds program and who do not meet the prerequisites for Archaeology 2583 will normally be granted written permission to enroll by the course instructor and the Head of the Department of Archaeology.

7.5 Diploma in Creative Writing

www.mun.ca/english/dcw
www.mun.ca/hss/about/contact/coordinators.php

The Diploma in Creative Writing is administered by the Department of English.

The Diploma in Creative Writing gives students the opportunity to work intensively in a variety of creative genres, such as fiction, poetry, drama, screenwriting, and creative non-fiction. The overall aim of the program is to help students develop vigorous and robust writing practices through a focus on the composition, critiquing, and peer-editing of the students' own work together with close reading and analyses of models.

7.5.1 Faculty of Humanities and Social Sciences Diploma Regulations

Students intending to complete a diploma program within the Faculty of Humanities and Social Sciences must meet the Admission requirements as outlined in the University Calendar. Students are also advised to consult the University Calendar regarding **General Regulations for Diploma Programs** and **Graduation Requirements**.

7.5.2 Advising

Throughout their program of study, students shall contact an academic advisor or the Program Director of the Diploma in Creative Writing for assistance with course planning, declaring their program of study, prerequisite and registration issues, and with questions about the eligibility of any courses not listed here.

A tentative list of upcoming course offerings in the program can be found at www.mun.ca/hss/courses.php.

7.5.3 Admission Requirements

Students will be admitted to individual creative writing courses (except the introductory course, English 2905) based on writing portfolios they submit to the course instructor. Students interested in taking a creative writing course should contact the Program Director or course instructor a minimum of one month prior to the start of the semester to discuss portfolio requirements (usually five to ten pages of the student's best writing in the appropriate genre). A student will be notified as to their admission status in a creative writing course after the instructor has reviewed the submitted writing portfolio.

7.5.4 Declaring the Diploma in Creative Writing

Students wishing to declare a Diploma in Creative Writing are encouraged to consult with the Program Director to discuss the requirements of the program. Information about declaring a program of study in the Faculty of Humanities and Social Sciences is available at www.mun.ca/hss/programs/undergraduate/ideclare.php.

7.5.5 Program of Study

Students are required to complete a minimum of 24 credit hours of course work from **Table 1 Courses Approved for the Diploma in Creative Writing**.

Table 1 Courses Approved for the Diploma in Creative Writing

English 2905, 3900, 3901, 3902, 3903, 3904, 4910, 4911, 4912, 4913

With written approval of the Program Director and the Faculty's Undergraduate Waivers and Appeals Committee, select other courses may be eligible towards the Diploma credit requirements. This includes special topics courses in creative writing that are offered from time to time, English 4999 when it is completed as a creative writing project, and select courses offered at Grenfell Campus and other institutions.

7.6 Diploma in Environmental Humanities

www.mun.ca/hss/programs/undergraduate/diplomas/environmental_humanities.php
www.mun.ca/hss/about/contact/coordinators.php

The Diploma in Environmental Humanities is administered by the Department of History.

The Diploma in Environmental Humanities fosters an interdisciplinary approach to the study of the environment. The program draws primarily on scholarship in the humanities, as well as cognate material from the social sciences, to bring cultural, literary-critical, historical, philosophical, and qualitative analyses to bear on environmental issues, on the conceptualization of nature, and on the relationship of the human to the non-human. Complementing the contributions to ecology from the quantitative sciences, the diploma engages with fundamental questions of meaning, value, responsibility, and purpose in response to local and global environmental issues.

7.6.1 Advising

Throughout their program of study, students shall contact an academic advisor or the Program Director of the Diploma in Environmental Humanities for assistance with course planning, declaring their program of study, prerequisite and registration issues, and with questions about the eligibility of any courses not listed here.

A tentative list of upcoming course offerings in the program can be found at www.mun.ca/hss/courses.php.

7.6.2 Declaring the Diploma in Environmental Humanities

Students wishing to declare a Diploma in Environmental Humanities shall consult with the Program Director to discuss the requirements of the program. Information about declaring a program of study in the Faculty of Humanities and Social Sciences is available at www.mun.ca/hss/programs/undergraduate/ideclare.php.

7.6.3 Regulations for the Diploma in Environmental Humanities

Students are required to complete a minimum of 27 credit hours in eligible courses offered by the Faculty of Humanities and Social Sciences, selected from **Table 1 Approved Courses for the Diploma in Environmental Humanities**, of which no more than 15 credit hours may be in a single discipline, as follows:

1. 3 credit hours in Geography 1050;
2. 21 credit hours chosen from **Table 1 Approved Courses for the Diploma in Environmental Humanities**; and
3. 3 credit hours chosen from Geography 4500 or History 4500, History 4125 or Sociology 4104.

Table 1 Approved Courses for the Diploma in Environmental Humanities

Required Courses	Other Approved Courses
Geography 1050 At least one of Geography 4500 or History 4500, History 4125, Sociology 4104	Anthropology 3050, 3083, 3280, 3452, 4450 Classics 2902 Communication Studies 4002 English 3009 Geography 2001, 2425, 3610, 4600 History 3030, 3940, 4011, 4125, 4220, 4252 Philosophy 2130 or the former 2561 Religion 3880 Russian 3440 Sociology 2290, 4091

Given the wide variety of course options, a student may elect to follow a variety of pathways. One possible pathway of course sequencing is presented in **Table 2 Suggested Course Sequencing for the Diploma in Environmental Humanities**.

Table 2 Suggested Course Sequencing for the Diploma in Environmental Humanities

First 3 credit hours: Geography 1050
Next 21 credit hours: Courses selected from **Table 1 Approved Courses for the Diploma in Environmental Humanities**
Final 3 credit hours: Geography 4500 or History 4500, History 4125, Sociology 4104

7.6.4 Honours Essay Courses

A student may apply to the Committee on Undergraduate Studies to have a maximum of 3 credit hours from an Honours essay course applied to the Diploma in Environmental Humanities. It must be clearly demonstrated that the entirety of the Honours essay course content is relevant to the program. This may not be used to substitute credit hours in an anchor or core course.

7.6.5 Course Prerequisites

Many approved courses are suitable for students in all disciplines without a background in the discipline. Other approved courses may have prerequisites.

7.6.6 Graduation Requirements

1. To be eligible for the award of a diploma, a student must have obtained an overall average of 60% or higher in the courses prescribed for that program.
2. A minimum of 9 credit hours in courses prescribed for the diploma program must be completed at this University.
3. Students must apply to graduate by the appropriate deadline through the Memorial Self-Service under the Graduation section. Additional information is available from the Office of the Registrar at www.mun.ca/regoff/graduation.
4. A student may not be awarded both the Diploma in Environmental Humanities and the Diploma in Humanities.

7.7 Diploma in Geographic Information Sciences

www.mun.ca/geog/programs/undergraduate/GISciences
www.mun.ca/hss/about/contact/coordinators.php

The Diploma in Geographic Information Sciences is administered by the Department of Geography.

The Diploma in Geographic Information Sciences is of interest to students from a broad range of backgrounds. It is a valuable complement to social and natural sciences programs such as anthropology, biology, computer sciences, earth sciences, history, economics, engineering, health and medicine, physical oceanography, environmental sciences, and environmental studies. The fields of remote sensing, geographic information systems (GIS), and cartography provide the most effective methods of gathering, managing, analyzing, and representing geographic information. Remote sensing images provide resourceful information to observe and study cultural and physical landscapes. Examples of remote sensing applications include the monitoring of spatial changes, environmental quality evaluation, natural resource exploration, assessment and monitoring, and archaeological site assessment. Geographic information systems enable the compilation, organization, and processing of spatial (maps) and nonspatial (text statistics, graphs) data. Socio-economic, political, and environmental management decision-making is supported by the results of GIS analyses and modeling. Cartography involves the compilation, organization, and visual representation of spatial information. A variety of geographical information can effectively be communicated through cartography.

7.7.1 Faculty of Humanities and Social Sciences Diploma Regulations

Students intending to complete a diploma program within the Faculty of Humanities and Social Sciences must meet the Admission requirements as outlined in the University Calendar. Students are also advised to consult the University Calendar regarding **General Regulations for Diploma Programs** and **Graduation Requirements**.

7.7.2 Advising

Throughout their program of study, students shall contact an academic advisor or the Program Director of the Diploma in Geographic Information Sciences for assistance with course planning, declaring their program of study, prerequisite and registration issues, and with questions about the eligibility of any courses not listed here.

A tentative list of upcoming course offerings in the program can be found at www.mun.ca/hss/courses.php.

7.7.3 Declaring the Diploma in Geographic Information Science

Students wishing to declare a Diploma in Geographic Information Sciences shall consult with the Program Director to discuss the requirements of the program. Information about declaring a program of study in the Faculty of Humanities and Social Sciences is available at www.mun.ca/hss/programs/undergraduate/ideclare.php.

7.7.4 Admission Requirements

Admission to the Diploma is Geographical Information Sciences is limited and competitive. Students who wish to enter this program must apply through the Office of the Registrar by April 1 for Fall semester registration and by October 15 for Winter semester registration. The formal application is available at www.mun.ca/hss/programs/undergraduate/diplomas/ or from the Office of the Registrar.

To be considered for admission to the Diploma in Geographic Information Sciences, students will normally have completed 24 credit hours, including the courses listed below, with an overall average of at least 65%.

1. Geography 1050 or one 1000-level course in applicant's Bachelor's Major program.
2. Mathematics 1000 or equivalent.
3. Two 1000- or 2000-level core courses in student's Bachelor's Major program, excluding the courses listed above.

Students who fulfill the eligibility requirements compete for a limited number of available spaces. Selection is based on academic performance.

7.7.5 Program of Study

Students are required to complete a minimum of 30 credit hours of courses as listed below under **Table 1 Course Requirements for the Diploma in Geographic Information**. All students for the Diploma in Geographical Information Sciences must successfully complete the Field Placement course Geography 4290 and the capstone course Geography 4919.

Table 1 Course Requirements for the Diploma in Geographic Information Sciences

1000 and 2000-Level Courses	2000-Level Courses	4000-Level Courses
Computer Science 1001 Geography 2195	Geography 3202 Geography 3250 Geography 3260	Geography 4202 Geography 4250 Geography 4261 Geography 4290 Geography 4919

7.7.6 Continuation Requirements

To be considered for Geography 4290 and 4919, the students for the Diploma in Geographic Information Sciences will normally have completed at least 21 credit hours required for the program, with an overall average of 65%.

7.8 Diploma in Humanities

www.mun.ca/hss/humanities
www.mun.ca/hss/about/contact/coordinators.php

The Diploma in Humanities is administered by the Department of Philosophy.

The Diploma in Humanities provides a foundation in the study of liberal arts. Students are exposed to the foundational disciplines of Classics and Philosophy and other areas of the humanities that explore how great thinkers have interpreted our world, and take courses in a language other than English in which many of these thinkers originally wrote. The program takes a holistic approach to the study of the humanities by emphasizing subject areas rather than specific courses in order to be accessible to a wide audience. Students are encouraged to select from a wide variety of humanities courses in the Faculty of Humanities and Social Sciences that align with their interests and which fit their schedule.

7.8.1 Faculty of Humanities and Social Sciences Diploma Regulations

Students intending to complete a diploma program within the Faculty of Humanities and Social Sciences must meet the Admission requirements as outlined in the University Calendar. Students are also advised to consult the University Calendar regarding **General Regulations for Diploma Programs** and **Graduation Requirements**.

7.8.2 Advising

7.7.2 Advising Throughout their program of study, students shall contact an academic advisor or the Program Director of the Diploma in Humanities for assistance with course planning, declaring their program of study, prerequisite and registration issues, and with questions about the eligibility of any courses not listed here.

A tentative list of upcoming course offerings in the program can be found at www.mun.ca/hss/courses.php.

7.8.3 Admission Requirements

To be considered for admission to the Diploma in Humanities, students will have completed 6 credit hours in designated Critical Reading and Writing (CRW) courses in eligible humanities disciplines, including at least 3 credit hours in Department of English CRW courses. Eligible credit hours in CRW courses required for program admission will be applied towards the Diploma requirements.

7.8.4 Declaring the Diploma in Humanities

Students wishing to declare a Diploma in Humanities shall consult with the Program Director to discuss the requirements of the program. Information about declaring a program of study in the Faculty of Humanities and Social Sciences is available at www.mun.ca/hss/programs/undergraduate/ideclare.php.

7.8.5 Regulations for the Diploma in Humanities

Students are required to complete a minimum of 36 credit hours in eligible courses selected from **Table 1 Required and Elective Courses for the Diploma in Humanities** as follows:

1. a minimum of 12 credit hours at the 3000-level or above, of which at least 3 credit hours must be at the 4000-level;
2. a maximum of 18 credit hours in any one discipline;
3. 6 credit hours in designated Critical Reading and Writing (CRW) courses, chosen from areas of study listed in **Table 1 Required and Elective Courses for the Diploma in Humanities**, including at least 3 credit hours in a CRW course offered by English. Refer

to **Bachelor of Arts General Degree Components, Core Requirements, Critical Reading and Writing (CRW) Requirement**;

4. 6 credit hours in designated Language Study (LS) courses delivered in the same language of instruction chosen from languages listed in **Bachelor of Arts General Degree Components, Core Requirements, Language Study (LS) Requirement**;
5. 6 credit hours in Greek studies and/or Roman studies courses offered by Classics (excluding designated Language Studies courses);
6. 6 credit hours in Philosophy (excluding Philosophy 2030, 2031 (or the former 2210, 2211); and,
7. 12 additional credit hours chosen from:
   a. any of the specified areas of study above, which may include a maximum of 6 additional credit hours in Language Study courses; and/or
   b. up to 9 credit hours in non-Language Study courses in French, German, Russian, Spanish; and/or
   c. up to 9 credit hours in any one of Communication Studies, English, Gender Studies, History, Medieval Studies, Political Science political theory, Religious Studies. Quantitative Reasoning (QR) courses are not eligible towards the Diploma in Humanities.

Table 1 Required and Elective Courses for the Diploma in Humanities

Required Courses	Elective Courses
Critical Reading and Writing (CRW) courses in areas of study listed in **Table 1 Required and Elective Courses for the Diploma in Humanities**, Required Courses or Elective Courses Language Study (LS) courses Classics courses in Greek studies and/or Roman studies Philosophy courses (excluding Philosophy 2030, 2031 (or the former 2210, 2211)	Non-Language Study courses in French, German, Russian, Spanish Communication Studies courses English courses Gender Studies courses History courses Medieval Studies courses Political Science courses in political theory (second digit in course number is “1”) Religious Studies courses

Given the wide variety of course options, a student may elect to follow a variety of pathways. One possible pathway of course sequencing is presented in **Table 2 Suggested Course Sequencing for the Diploma in Humanities**.

Table 2 Suggested Course Sequencing for the Diploma in Humanities

First 6 credit hours: One Critical Reading and Writing (CRW) course in English, and one CRW course in another discipline listed in **Table 1 Required and Elective Courses for the Diploma in Humanities**
Next 6 credit hours: Two Language Study (LS) courses in the same language
Next 12 credit hours: Complete Classics and Philosophy requirement
Final 12 credit hours: Choice of four additional courses from **Table 1 Required and Elective Courses for the Diploma in Humanities**, including at least three courses at the 3000-level and one course at the 4000-level. A student is encouraged to select courses that align with classical humanities and theory, while being mindful of the limit of 18 credit hours in any one discipline.

7.8.6 Other Eligible Courses

Courses whose calendar title and description clearly aligns with the Diploma in Humanities requirements may be deemed eligible towards the program with the prior written permission of the Faculty's Undergraduate Waivers and Appeals Committee and the Program Director. This includes up to 9 elective credit hours in cultural studies humanities courses offered by related disciplines in the Faculty of Humanities and Social Sciences; up to 18 credit hours in Humanities courses offered at Grenfell Campus; and of up to 9 credit hours in Social/Cultural Studies courses offered at Grenfell Campus. Quantitative Reasoning (QR) courses are not eligible.

7.8.7 Course Prerequisites

Normal course prerequisites apply. Students must plan their program of study accordingly in order to fulfill all requirements.

7.8.8 Preparation for a Bachelor of Arts

All credit hours used towards the Diploma in Humanities may also be eligible for application to a Bachelor of Arts, including the Critical Reading and Writing (CRW) and Language Study (LS) aspects of the **Bachelor of Arts Core Requirements**.

7.8.9 Graduation Requirements

1. As per **Diploma Programs Offered in the Faculty of Humanities and Social Sciences, Graduation Requirements**, to be eligible for the award of a Diploma in Humanities, a student must obtain an overall average of 60% or higher in the courses prescribed for the program. A minimum of 9 credit hours in courses prescribed for the diploma program must be completed at this University.
2. A student may not be awarded both the Diploma in Environmental Humanities and the Diploma in Humanities.

7.9 Diploma in Northern Peoples, Lands, and Resources

The Diploma in Northern Peoples, Lands, and Resources is administered by the School of Arctic and Subarctic Studies at the Labrador Campus of Memorial University, in partnership with the Faculty of Humanities and Social Sciences.

The Diploma in Northern Peoples, Lands, and Resources provides a foundation in the understanding of issues relevant to the North, including Labrador, the provincial and territorial Norths in Canada, and the Circumpolar North. The program emphasizes content and approaches that are specifically relevant to understanding Northern and Indigenous societies, economies, and landscapes. Students take courses in multiple disciplines and develop a broad base of knowledge and skills relevant to Northern studies, careers, leadership, and community- and place-based relationships.

7.9.1 Faculty of Humanities and Social Sciences Diploma Regulations

Students intending to complete a diploma program within the Faculty of Humanities and Social Sciences must meet the Admission

requirements as outlined in the University Calendar. Students are also advised to consult the University Calendar regarding **General Regulations for Diploma Programs** and **Graduation Requirements** and to be aware of the regulation limiting the use of certain credit hours to fulfill multiple programs within the Faculty of Humanities and Social Sciences.

7.9.2 Advising

Throughout their program of study, students shall contact an academic advisor or the Program Director of the Diploma in Northern Peoples, Lands, and Resources for assistance with course planning, declaring their program of study, prerequisite and registration issues, and questions about the eligibility of any courses not listed here.

A tentative list of upcoming course offerings in the program can be found at www.mun.ca/hss/courses.php.

7.9.3 Declaring the Diploma in Northern Peoples, Lands, and Resources

Students wishing to declare a Diploma in Northern Peoples, Lands, and Resources shall consult with the Program Director to discuss the requirements of the program.

7.9.4 Regulations for the Diploma in Northern Peoples, Lands, and Resources

Students pursuing the Diploma in Northern Peoples, Lands, and Resources are required to complete a minimum of 30 credit hours in eligible courses, as follows:

1. 3 credit hours in foundational studies in a relevant field, selected from **Table 1 Approved Foundational Courses for the Diploma in Northern Peoples, Lands, and Resources**;
2. 21 credit hours in courses on relevant themes, including at least 12 credit hours at the 3000-level or higher, with courses selected from **Table 2 Approved Courses for the Diploma in Northern Peoples, Lands, and Resources**;
3. 6 credit hours in summer schools, field schools, or other lands- and/or place-based courses that take place in Labrador, the provincial and territorial Norths in Canada, or the Circumpolar North, and that have been approved by the Undergraduate Studies Committee of the School of Arctic and Subarctic Studies or delegate.
4. A maximum of 18 credit hours in courses selected from any one department may be counted towards the requirements of the Diploma in Northern Peoples, Lands, and Resources.

Table 1 Approved Foundational Courses for the Diploma in Northern Peoples, Lands, and Resources

Anthropology 1031, Archaeology 1000, Geography 1050

Table 2 Approved Courses for the Diploma in Northern Peoples, Lands, and Resources

2000 Level Courses	3000 and 4000 Level Courses

7.9.5 Land- and Place-Based Courses

Students pursuing the Diploma in Northern Peoples, Lands, and Resources are required to complete a minimum of 6 credit hours in summer schools, field schools, or other land- and/or place-based courses that take place in Labrador, the provincial and territorial Norths in Canada, or the Circumpolar North. Students must contact the Program Director to ensure that the entirety of the courses are relevant to the program, and must apply to the Undergraduate Studies Committee of the School of Arctic and Subarctic Studies or delegate to have the 6 credit hours applied to the Diploma in Northern Peoples, Lands, and Resources.

7.10 Diploma in Stage and Screen Technique

www.mun.ca/english/programs/diplomas
www.mun.ca/hss/about/contact/coordinators.php

The Diploma in Stage and Screen Technique is administered by the Department of English.

The Diploma in Stage and Screen Technique is a stand-alone diploma which may be completed concurrently with a degree program. It combines hands-on courses in film, video, and theatre production to prepare students to work in the cultural industries, or for further study in these fields. Students will cover a broad number of production areas, including directing, producing, acting, and many backstage and behind-the-scenes roles. Courses result in production of digital videos and films, and in staged performances.

All credit hours used towards the Diploma in Stage and Screen Technique may also be eligible for application to a Bachelor of Arts.

7.10.1 Faculty of Humanities and Social Sciences Diploma Regulations

Students intending to complete a diploma program within the Faculty of Humanities and Social Sciences must meet the Admission requirements as outlined in the University Calendar. Students are also advised to consult the University Calendar regarding **General Regulations for Diploma Programs** and **Graduation Requirements**.

7.10.2 Advising

Throughout their program of study, students shall contact an academic advisor or the Program Director of the Diploma in Stage and Screen Technique for assistance with course planning, declaring their program of study, prerequisite and registration issues, and with questions about the eligibility of any courses not listed here.

A tentative list of upcoming course offerings in the program can be found at www.mun.ca/hss/courses.php.

7.10.3 Admission Requirements

To be considered for admission to the Diploma in Stage and Screen Technique, students must have successfully completed English 2451 (or the former English 3351) and earned a minimum of 75% in that course.

Students wishing to declare the Diploma in Stage and Screen Technique shall consult with the Program Director to discuss the requirements of the program. Information about declaring a program of study in the Faculty of Humanities and Social Sciences is available at www.mun.ca/hss/programs/undergraduate/ideclare.php.

7.10.4 Regulations for the Diploma in Stage and Screen Technique

Students are required to complete 24 credit hours from a series of prescribed courses. The 24 credit hours shall include:

1. 9 credit hours in English 2450, 2451, and 4401;
2. 9 credit hours in English 4400, 5000, Communication Studies 3816 and 4402;
3. 3 credit hours in a Creative Writing course chosen from English 3902, English 3912, English 3913 or Communication Studies 3913, English 3920, English 4912 or a Podcasting course; and
4. 3 credit hours chosen from **Table 1 Faculty of Humanities and Social Sciences Courses for the Certificate in Film Studies**.

7.10.5 Attendance Regulation

Attendance is mandatory in the following courses: English 2450, 2451, 4400, 4401, and 5000 and Communication 3816 and 4402. Students may miss a maximum of two classes per course per semester. Students may fail or be deregistered from the course if they exceed this number of missed classes, for any reason, and/or if they consistently miss class time due to late arrivals or early departures. Attendance is necessary for safety reasons, as these are practical courses where students are working with equipment and in situations where they will be at risk without proper training. In addition, the majority of the assignments are based on group work, which cannot be carried out when students are absent from class.

7.10.6 Graduation Requirements and Applying for Graduation

As per **Diploma Programs, Graduation Requirements**, to be eligible for the award of a Diploma in Stage and Screen Technique, a student must obtain an overall average of 60% or higher in the courses prescribed for the program. A minimum of 12 credit hours in courses prescribed for the diploma program must be completed at this University.

In the final semester of either their degree and/or the Diploma in Stage and Screen Technique, students must apply by the appropriate deadline date to graduate on the prescribed "Application for Graduation " form. This form may be obtained on-line at the Memorial Self-Service at selfservice.mun.ca. Additional information is available from the Office of the Registrar at www.mun.ca/regoff/graduation.

7.10.7 The Former Diploma in Performance and Communications Media

Students cannot receive both a Diploma in Performance and Communications Media and a Diploma in Stage and Screen Technique. Students currently enrolled in the former Diploma in Performance and Communications Media may choose to transfer to the Diploma in Stage and Screen Technique, but must successfully complete all the required courses of either one or the other. There will be no mixing of the programs. Since all courses required for the former Diploma in Performance and Communications Media will continue to be offered, there is no need for a grandparenting clause.

8 Certificate Programs

www.mun.ca/hss/programs/undergraduate/certificates

A certificate program in the Faculty of Humanities and Social Sciences offers a flexible option for students seeking to develop specialized knowledge and competencies. It provides a starting point for university studies or acts as an adjunct to an undergraduate degree. It is not designed to satisfy specific employment credentials. It is sufficiently specialized to ensure its academic integrity and normally features at least one required anchor course that is taken at the beginning of the program. Whereas diploma programs are designed as advanced level of study, certificate programs introduce students to a focused subject area, placing greater emphasis on foundation-level knowledge.

The Faculty of Humanities and Social Sciences offers the following certificate programs:

1. **Certificate in Ancient Languages**
2. **Certificate in Criminology**
3. **Certificate in Film Studies**
4. **Certificate in Food Studies**
5. **Certificate in History and Philosophy of Science and Technology**
6. **Certificate in Indigenous Studies**
7. **Certificate in Newfoundland and Labrador Studies**
8. **Certificate in Public Policy**

8.1 General Regulations for Certificate Programs

1. A certificate program is administered by a Program Director. The Program Director is normally affiliated with the Faculty of Humanities and Social Sciences department that is primarily responsible for the Program's administration.
2. Certificate programs consist of between 18 and 21 credit hours in courses as specified in individual programs. No more than 6 credit hours at the 4000-level shall be required. Additional 4000-level credit hours may be substituted following the process outlined in **General Regulations for Certificate Programs**. Pre-requisites may apply.
3. Subject to limitations outlined in **Limit on Certain Credit Hours**, courses satisfying the Honours, Major, Minor and elective components of an undergraduate degree may also be used to satisfy the requirements of a certificate program. Departmental prerequisites for courses are applicable. This may increase the number of stated courses required for completion of the certificate program. Such courses may be eligible towards other components of the Bachelor of Arts.
4. Normal credit restrictions apply. It is the student's responsibility to recognize that additional credit may not be obtained for successfully completing two versions of a cross-listed course (i.e., the same course listed under two or more departments).
5. A Program Director may, in consultation with the Head of the relevant academic unit, request permission from the Faculty's Undergraduate Waivers and Appeals Committee for a course to be added to the certificate program.
6. Due to their temporary nature, "special topics" courses are not listed in the entries for a certificate program. However, a special topics course may be included in a student's program of study with permission from the Faculty's Undergraduate Waivers and Appeals Committee.
7. A student who completes courses at another university in the area of a Certificate offered by the Faculty of Humanities and Social Sciences may be eligible to transfer some of those credits to fulfill requirements in the Major at Memorial University of Newfoundland. For further information refer to **Limited Enrolment Courses and Transfer Credits, Requirement for Courses Delivered at Memorial University of Newfoundland**.

8.2 Admission

1. Students seeking information about a certificate program should contact the Program Director of the certificate program, the Office of the Dean of Humanities and Social Sciences, or the Office of the Registrar.
2. A certificate program is open to all students who are granted admission to the University. The application for admission or readmission to the University is submitted online at www.mun.ca/undergrad/admissions/apply. A complete application package includes an application to the University and any other required documentation (for those who have not attended Memorial University of Newfoundland in the three preceding semesters). Details are available under ***UNIVERSITY REGULATIONS*** **- Admission/Readmission to the University Undergraduate**.

8.3 Components

1. A student must follow the regulations for the certificate program as set forth in the appropriate section of the Calendar.
2. A certificate program in the Faculty of Humanities and Social Sciences consists of between 18 and 21 credit hours in courses as specified by the program. This normally includes a selection of core courses that has been deemed fundamental to the program and a requirement for courses from a minimum of two disciplines. The majority of credit hours in a Faculty of Humanities and Social Sciences certificate must be comprised of courses listed in the Faculty of Humanities and Social Sciences **Course Descriptions**.
3. Courses offered by the Faculty of Humanities and Social Sciences satisfying another University program may also be used to satisfy the requirements of a Faculty of Humanities and Social Sciences certificate program, subject to both programs' regulations.
4. A student may apply to the Faculty's Undergraduate Waivers and Appeals Committee to have a maximum of 3 credit hours from an Honours essay course applied to a certificate program. It must be clearly demonstrated that the entirety of the Honours essay course content is relevant to the program. This may not be used to substitute credit hours in an anchor or core course.

8.4 Graduation Requirements

1. To be eligible for the award of a certificate offered by the Faculty of Humanities and Social Sciences, a student must have obtained an overall average of 60% or higher in the courses prescribed for that program.
2. As per **Limited Enrolment Courses and Transfer Credits, Requirements for Courses Delivered by Memorial University of Newfoundland** a minimum of 9 credit hours in courses prescribed for the certificate program must be completed at this University.
3. A student who has completed a certificate program and wishes to complete a second certificate offered by the Faculty of Humanities and Social Sciences must:
   a. comply with all course requirements governing the award of that certificate; and

b. complete at least 9 credit hours beyond those used for the first certificate. The courses which comprise these credit hours must be applicable to the certificate sought.

8.5 Certificate in Ancient Languages

www.mun.ca/hss/ancientlanguages
www.mun.ca/hss/about/contact/coordinators.php

The Certificate in Ancient Languages is administered by the Department of Classics.

The Certificate in Ancient Languages is designed to appeal to students interested in the study of ancient languages and who wish to gain an appreciation for the origin of many modern languages. Ancient languages are languages which are no longer spoken as the first language of any living person, although they may have direct descendants in current use. They remain culturally significant as languages of religion, scholarship and literature. The Certificate also offers specialized, high-quality preparation for students interested in studying subjects such as Archaeology, Classics, History, Linguistics, Philosophy, and Religion. The Certificate will also appeal to students studying in the areas of Medicine and Law, providing them with the etymological roots of subject-specific terminology.

8.5.1 Faculty of Humanities and Social Sciences Certificate Regulations

Students intending to complete a certificate program within the Faculty of Humanities and Social Sciences must meet the Admission requirements as outlined in the University Calendar. Students are also advised to consult the University Calendar regarding **General Regulations for Certificate Programs** and **Graduation Requirements**.

8.5.2 Advising

Throughout their program of study, students are encouraged to contact an academic advisor or the Program Director of the Certificate in Ancient Languages for assistance with course planning, declaring their program of study, prerequisite and registration issues, and with questions about the eligibility of any courses not listed here.

A tentative list of upcoming course offerings in the program can be found at www.mun.ca/hss/courses.php.

8.5.3 Declaring the Certificate in Ancient Languages

Students interested in a Certificate in Ancient Languages are first encouraged to consult with the Program Director to discuss the requirements of the program. After consultation with the Program Director, students wishing to enroll in the certificate can declare a Certificate in Ancient Languages by contacting the Office of the Registrar. Information about declaring a program of study in the Faculty of Humanities and Social Sciences is available at www.mun.ca/hss/programs/undergraduate/ideclare.php.

8.5.4 Regulations for the Certificate in Ancient Languages

The Certificate in Ancient Languages consists of 21 credit hours as prescribed below:

1. 3 credits hours in Linguistics chosen from a list of approved courses as outlined under **Table 1 Approved Courses for the Certificate in Ancient Languages, Foundational Required Courses**; and,
2. 18 credit hours chosen from specified courses in Ancient Greek, Biblical Hebrew, Latin, Sanskrit, Old English and Middle High German as outlined under **Table 1 Approved Courses for the Certificate in Ancient Languages, Approved Ancient Languages Courses**, consisting of:
   a. a minimum of 6 credit hours in one ancient language;
   b. a minimum of 6 credit hours in another ancient language;
   c. a minimum of 3 credit hours in a third ancient language; and
   d. a further 3 credit hours in any **Table 1 Approved Courses for the Certificate in Ancient Languages, Approved Ancient Languages Course**.

When planning their program of study, students should consider that languages other than Greek and Latin are not regularly available. Therefore, students are strongly advised to consult with the Program Director for assistance with course planning.

Table 1 Approved Courses for the Certificate in Ancient Languages

Foundational Required Courses	Approved Ancient Languages Courses
Linguistics 1105 Language 2800 (or the former 1800) or Linguistics 2800 (or the former 1155)	Classics 1120, 1121, 1130, 1131, 2200, 2300, 2302 English 3500, 4500 German 4300, 4301 Religious Studies 1050, 1051, 1060, 1061

Eligible 4000-level credit hours may be substituted following the process outlined in **General Regulations for Certificate Programs**.

8.5.5 Course Prerequisites

Due to the sequenced nature of language courses, all language courses beyond the introductory level have prerequisites.

8.6 Certificate in Criminology

www.mun.ca/hss/criminology
www.mun.ca/hss/about/contact/coordinators.php

The Certificate in Criminology is administered by the Department of Sociology.

The Certificate in Criminology is designed for those who are interested in the study of criminality, crime, deviance, and the correctional systems more broadly. Program participants will be introduced to the foundational knowledge related to the Canadian legal system, law, justice and correctional systems, with a provincial and federal focus. They will gain a more complex understanding of the social structures and practices of criminal justice as well as what constitutes positive practice for persons working in corrections or criminal justice more generally. Students are introduced to the theoretical, legal, methodological, practical, and ethical debates in criminology, which will allow participants to more effectively analyze and understand their work in law enforcement, corrections and rehabilitation. The program will be of particular interest to persons engaged in law enforcement, corrections, social work, and rehabilitation, as well as persons studying society, and individuals seeking work in not-for-profit and charitable organizations that foster positive social growth.

8.6.1 Faculty of Humanities and Social Sciences Certificate Regulations

Students intending to complete a certificate program within the Faculty of Humanities and Social Sciences must meet the Admission requirements as outlined in the University Calendar. Students are also advised to consult the University Calendar regarding **General Regulations for Certificate Programs** and **Graduation Requirements**.

8.6.2 Advising

Throughout their program of study, students shall contact an academic advisor for assistance with course planning, declaring their program of study, prerequisite and registration issues, and with questions about the eligibility of any courses not listed here.

A tentative list of upcoming course offerings in the program can be found at www.mun.ca/hss/courses.php.

8.6.3 Declaring the Certificate in Criminology

Students interested in a Certificate in Criminology are first encouraged to consult with the Program Director to discuss the requirements of the program. After consultation with the Program Director, students wishing to enroll in the certificate can declare a Certificate in Criminology by contacting the Office of the Registrar. Information about declaring a program of study in the Faculty of Humanities and Social Sciences is available at www.mun.ca/hss/programs/undergraduate/ideclare.php.

8.6.4 Regulations for the Certificate in Criminology

The Certificate in Criminology consists of 21 credit hours as prescribed below. Six credit hours must be at the 3000-level or higher.

1. 12 credit hours in Sociology 1000, Criminology 1001 or Sociology 1001 (or the former Police Studies 2300 or the former Sociology 2300), Criminology 3290 or Sociology 3290; and Criminology 3395 (or the former Police Studies 3395) or Sociology 3395;
2. 3 credit hours in either Law and Society 1000 or Law and Society 2000; and
3. 6 additional credit hours chosen from **Table 1 Elective Courses for the Certificate in Criminology**, of which 3 credit hours must be from Criminology, Law and Society, Political Science, or Psychology.

Not all courses are offered every semester. Students are strongly advised to consult with the Program Director for assistance with course planning.

Students are advised to generally follow the suggested course sequencing presented in **Table 2 Suggested Course Sequencing for the Certificate in Criminology**.

Table 1 Elective Courses for the Certificate in Criminology

Criminology 2200 (or the former Police Studies 2200), Criminology 2400 (or the former Police Studies 1000 or the former Police Studies 2000), Criminology 3100 or the former Police Studies 3100), Criminology 4212 or the former Police Studies 4212) or Sociology 4212
Criminology 3306 or Sociology 3306 (or Police Studies 3306), Criminology 4080 or Sociology 4080 (or the former Police Studies 4080), Criminology 4099 or Sociology 4099 (or the former Police Studies 4099), Criminology 4212 or Sociology 4212 (or the former Police Studies 4212)
Law and Society 1000, 2000
Political Science 3620, 3820
Psychology 2150, 2800, one of 3640 or 3650

Table 2 Suggested Course Sequencing for the Certificate in Criminology

First 6 credit hours: Law and Society 1000, Sociology 1000
Next 9 credit hours: Criminology 1001 (or the former Police Studies 2300 or the former Sociology 2300), Criminology 3290 or Sociology 3290, Criminology 3395 or Sociology 3395 (or the former Police Studies 3395)
Final 6 credit hours: two additional approved courses, one of which must be from Criminology, Law and Society, Political Science or Psychology

Eligible 4000-level credit hours may be substituted following the process outlined in **General Regulations for Certificate Programs**.

Prior to the Fall 2021 semester, all current Criminology (CRIM) courses offered through the Faculty of Humanities and Social Sciences were designated Police Studies (PLST).

8.6.5 Approved Course Substitutions for the Certificate in Criminology

1. Psychology 3626 (Grenfell) may be substituted for Psychology 3640 or 3650.
2. Any one of Psychology 2910, 2911, 2920, or 2925 (Grenfell) or Sociology 3040 or 3041 may, for the purposes of this Certificate, be substituted for the former Sociology 2300.

8.6.6 Course Prerequisites

Normal course prerequisites will apply. Students should note that Psychology 1000 and 1001 are prerequisites (in addition to the 21 credit hours specified for the certificate) for Psychology 2920. As well, as 6 credit hours in Sociology is the prerequisite for Criminology

4080 and Sociology 4080, and Sociology 3040 and 3150 are prerequisites for Sociology 4099, enrollment priority will be given to students who have declared a Sociology Major and / or Criminology certificate.

8.6.7 Regulations Concerning the Former Lifelong Learning Certificate in Criminology

A Humanities and Social Sciences Certificate in Criminology cannot be awarded to those who have already been awarded a Certificate in Criminology through the former Division of Lifelong Learning.

8.7 Certificate in Film Studies

www.mun.ca/hss/fmst
www.mun.ca/hss/about/contact/coordinators.php

The Certificate in Film Studies is administered by the Department of English.

The Certificate in Film Studies is designed for those who are interested in film as a form of cultural production that spans the globe. The program acquaints students with film as form before exploring how it is deployed in multiple settings and how it evolves depending on political, social, historical, economic, and technological contexts.

8.7.1 Faculty of Humanities and Social Sciences Certificate Regulations

Students intending to complete a certificate program within the Faculty of Humanities and Social Sciences must meet the Admission requirements as outlined in the University Calendar. Students are also advised to consult the University Calendar regarding **General Regulations for Certificate Programs** and **Graduation Requirements**.

8.7.2 Advising

Throughout their program of study, students are encouraged to contact an academic advisor or the Program Director of the Certificate in Film Studies for assistance with course planning, declaring their program of study, prerequisite and registration issues, and with questions about the eligibility of any courses not listed here.

A tentative list of upcoming course offerings in the program can be found at www.mun.ca/hss/courses.php.

8.7.3 Declaring the Certificate in Film Studies

Students interested in a Certificate in Film Studies are first encouraged to consult with the Program Director to discuss the requirements of the program. After consultation with the Program Director, students wishing to enroll in the Certificate can declare a Certificate in Film Studies by contacting the Office of the Registrar. Information about declaring a program of study in the Faculty of Humanities and Social Sciences is available at www.mun.ca/hss/programs/undergraduate/ideclare.php.

8.7.4 Regulations for the Certificate in Film Studies

As part of the Certificate in Film Studies students must successfully complete a communications theory course and a film theory course, supplemented by courses analyzing film in specific contexts. Students are encouraged to take foundation courses before proceeding with the other requirements for the Certificate.

The Certificate in Film Studies consists of 21 credit hours as prescribed below:

1. 3 credit hours in Communication Studies 2001 or English 2813;
2. 3 credit hours in English 2850 or 2851; and
3. a minimum of 15 additional credit hours selected from **Table 1 Faculty of Humanities and Social Sciences Courses for the Certificate in Film Studies**, of which there shall be a minimum of 3 credit hours at the 3000-level.

Table 1 Faculty of Humanities and Social Sciences Courses for the Certificate in Film Studies

Foundation Theory Courses	1000-level and 2000-level Film Studies Courses	3000-level Film Studies Courses
Communication Studies 2001 English 2813 or Communications Studies 2813 English 2850, 2851	Archaeology 2493 Philosophy 2340 or the former Philosophy 2581 Religious Studies 2022 or the former 1022	Anthropology 3404 Classics 3700 English 3813 English 3828 or Medieval Studies 3828 French 3506 German 3000, 3001, 3002, 3003 History 3790, 3795 Religious Studies 3812 Russian 3003, 3023 Spanish 3300

Eligible 4000-level credit hours may be substituted following the process outlined in **General Regulations for Certificate Programs**.

8.7.5 Course Prerequisites

Many approved courses are suitable for students in all disciplines without a background in the discipline. Other approved courses may have prerequisites.

8.7.6 Regulations Concerning the Former Minor in Film Studies

The Certificate in Film Studies cannot be awarded to those who have already been awarded a Minor in Film Studies.

8.8 Certificate in Food Studies

www.mun.ca/hss/fdst
www.mun.ca/hss/about/contact/coordinators.php

The Certificate in Food Studies is administered by the Department of Anthropology.

The Certificate in Food studies involves the interdisciplinary study of food issues at local, regional, national and global scales. The objective of the program is to provide foundational knowledge about the various dimensions of food systems and about the barriers to local and global food security.

8.8.1 Faculty of Humanities and Social Sciences Certificate Regulations

Students intending to complete a certificate program within the Faculty of Humanities and Social Sciences must meet the Admission requirements as outlined in the University Calendar. Students are also advised to consult the University Calendar regarding **General Regulations for Certificate Programs** and **Graduation Requirements**.

8.8.2 Advising

Throughout their program of study, students are encouraged to contact an academic advisor or the Program Director of the Certificate in Food Studies for assistance with course planning, declaring their program of study, registration issues, and with questions about the eligibility of any courses not listed here.

A tentative list of upcoming course offerings in the program can be found at www.mun.ca/hss/courses.php.

8.8.3 Declaring the Certificate in Food Studies

Students interested in a Certificate in Food Studies are first encouraged to consult with the Program Director to discuss the requirements of the program. After consultation with the Program Director, students wishing to enroll in the Certificate can declare a Certificate in Food Studies by contacting the Office of the Registrar. Information about declaring a program of study in the Faculty of Humanities and Social Sciences is available at www.mun.ca/hss/programs/undergraduate/ideclare.php.

8.8.4 Regulations for the Certificate in Food Studies

The Certificate in Food Studies consists of 21 credit hours as prescribed below:

1. 9 credit hours chosen from Anthropology 2415, Folklore 3830, Geography 3420, Political Science 3260; and
2. 12 additional credit hours chosen from **Table 1 Approved Courses for the Certificate in Food Studies**.

In accordance with **Certificate Programs, Components**, a minimum of 12 credit hours in the Certificate in Food Studies must be must be comprised of courses listed in the Faculty of Humanities and Social Sciences **Course Descriptions**.

Table 1 Approved Courses for the Certificate in Food Studies

Core Courses	Other Humanities and Social Sciences Courses	Other Approved Courses
Anthropology 2415 Folklore 3830 Geography 3420 Political Science 3260	Anthropology 3411, 3452 Archaeology 3510 Folklore 2800 History 3749 Sociology 2290	Biochemistry 2005 Biochemistry 2600 or Human Kinetics and Recreation 2600 Biology 2041

Eligible 4000-level credit hours may be substituted following the process outlined in **General Regulations for Certificate Programs**.

Not all courses are offered every semester. Students are strongly advised to consult with the Program Director for assistance with course planning.

8.9 Certificate in History and Philosophy of Science and Technology

www.mun.ca/hss/about/contact-us/certificate-and-diploma-coordinators

The Certificate in History and Philosophy of Science and Technology is administered and coordinated by the Departments of Classics, History, and Philosophy in a triennial rotation.

The Certificate in History and Philosophy of Science and Technology aims to promote the study through core courses of the human understanding of and interaction with the natural world. The time frame reaches from the European Bronze Age to the present. This approach combines the methods and subjects of several disciplines, demonstrates our indebtedness to the thinkers and makers of the past, and also illustrates the far-reaching effects of human activities on the natural world and on present and future societies. The foundation course in History and Philosophy of Science and Technology is intended to integrate the material and provide a common focus at the beginning of the program. The Certificate offers specialized preparation for students interested in studying subjects such as Archaeology, Classics, History, Philosophy, and Religion. The Certificate will also appeal to students studying in the areas of Engineering, Medicine, Pharmacy, and Science.

8.9.1 Faculty of Humanities and Social Sciences Certificate Regulations

Students intending to complete a certificate program within the Faculty of Humanities and Social Sciences must meet the admission requirements as outlined in the University Calendar. Students are also advised to consult the University Calendar regarding **General Regulations for Certificate Programs** and **Graduation Requirements**.

8.9.2 Advising

Throughout their program of study, students enrolled in the Certificate in History and Philosophy of Science and Technology are encouraged to contact the Program Director for assistance with course planning, declaring their program of study, prerequisite and registration issues, and questions about the potential eligibility of any courses not listed here. The Director liaises with representatives of participating departments, and supports students in identifying upcoming course offerings and creating a tentative schedule.

8.9.3 Declaring the Certificate in History and Philosophy of Science and Technology

Students wishing to declare a Certificate in History and Philosophy of Science and Technology are encouraged to consult with the Program Director to discuss the requirements of the program. Information about declaring a program of study in the Faculty of HSS is available at www.mun.ca/hss/programs/undergraduate/ideclare.php.

8.9.4 Regulations for the Certificate in History and Philosophy of Science and Technology

The Certificate in History and Philosophy of Science and Technology consists of 21 credit hours in eligible courses as prescribed below:

1. 3 credit hours in History 2001; and
2. 18 credit hours chosen from specified courses listed in **Table 1 Core Faculty of Humanities and Social Sciences Courses for the Certificate in History and Philosophy of Science and Technology**, including a minimum of 3 credit hours in eligible Classics courses, a minimum of 3 credit hours in eligible Philosophy courses, and at least 6 credit hours must be in 3000-level courses.
3. Students are strongly advised to consult with the Program Director for assistance with course planning.

Table 1 Core Faculty of Humanities and Social Sciences Courses for the Certificate in History and Philosophy of Science and Technology

Classics	History	Philosophy	Religious Studies
Classics 2701 Classics 2900 Classics 2901 Classics 2902 Classics 2903 Classics 3900 Classics 3901	History 2130 History 2340 History 2665 History 3030 History 3811 History 3940	Philosophy 2100 Philosophy 2110 Philosophy 2120 Philosophy 2130 Philosophy 2201 Philosophy 2215 Philosophy 2330 Philosophy 3020 Philosophy 3460	Religious Studies 2810 Religious Studies 3880

8.9.5 Course Prerequisites

Normal departmental prerequisites for courses are applicable.

8.10 Certificate in Indigenous Studies

www.mun.ca/hss/abst
www.mun.ca/hss/about/contact/coordinators.php

The Certificate in Indigenous Studies is administered by the Department of Archaeology.

The Certificate in Indigenous Studies is designed for those interested in learning about the history, cultures, languages, beliefs, and experiences of Indigenous peoples.

The objective of the program is to provide foundational knowledge for understanding historical and contemporary experiences of Indigenous peoples - from the origins of first peoples and complex histories over the succeeding millennia, to present movements and the growing desire for reconciliation between governments and Indigenous societies.

The area of Indigenous studies is an increasingly important field in Canada, and the world. This program will benefit a wide variety of learners, including current and prospective university students, and individuals interested in a career in the public, not-for-profit, and non-governmental sectors.

8.10.1 Faculty of Humanities and Social Sciences Certificate Regulations

Students intending to complete a certificate program within the Faculty of Humanities and Social Sciences must meet the Admission requirements as outlined in the University Calendar. Students are also advised to consult the University Calendar regarding **General Regulations for Certificate Programs** and **Graduation Requirements**.

8.10.2 Advising

Throughout their program of study, students are encouraged to contact an academic advisor or the Director of the Certificate in Indigenous Studies for assistance with course planning, declaring their program of study, prerequisite and registration issues, and with questions about the eligibility of any courses not listed here.

A tentative list of upcoming course offerings in the program can be found at www.mun.ca/hss/courses.php.

8.10.3 Declaring the Certificate in Indigenous Studies

Students interested in a Certificate in Indigenous Studies are first encouraged to consult with the Program Director to discuss the requirements of the program. After consultation with the Program Director, students wishing to enroll in the Certificate can declare a Certificate in Indigenous Studies by contacting the Office of the Registrar. Information about declaring a program of study in the Faculty of Humanities and Social Sciences is available at www.mun.ca/hss/programs/undergraduate/ideclare.php.

8.10.4 Regulations for the Certificate in Indigenous Studies

As part of the Certificate in Indigenous Studies students must successfully complete a 3 credit hour foundation course at the 1000-level. It is anticipated that the foundation course will be taken at the beginning of the program. As part of their course selections, students are encouraged to complete courses that emphasize the origins and histories of Indigenous peoples as well as courses that emphasize contemporary issues of Indigenous peoples.

The Certificate in Indigenous Studies consists of 21 credit hours as prescribed below:

1. Archaeology 1005 or History 1005;
2. a minimum of 6 credit hours at the 2000 level from **Table 1 Courses for the Certificate in Indigenous Studies**;
3. a minimum of 6 credit hours at the 3000 level or 4000 level from **Table 1 Courses for the Certificate in Indigenous Studies**;
4. an additional 6 credit hours at any level from **Table 1 Courses for the Certificate in Indigenous Studies**; and

5. of the required 21 credit hours, students must complete courses from at least three disciplines.

Table 1 Courses for the Certificate in Indigenous Studies

1000-level and 2000-level Courses	3000-level and 4000-level Courses
Anthropology 2414 Archaeology 1005 or History 1005 Archaeology 2481, 2482 English 2160 History 2800 Linguistics 2022, 2025, 2026, 2060	Anthropology 3070, 3240 Archaeology 3290, 3291, 3510, 3588 Archaeology 3520 or History 3520 Archaeology 3525 or History 3525 Gender Studies 3015 History 3765, 4252 Law and Society 3830, 3014 Linguistics 3951 Political Science 3830 Sociology 4205

Not all courses are offered every semester. Students are strongly advised to consult with the Program Director for assistance with course planning, and to generally follow **Table 2 Suggested Course Sequencing for the Certificate in Indigenous Studies**. Students who are only pursuing the Certificate program (i.e. not pursuing a degree program) are encouraged to consult with the Program Director and/or course instructor when considering a 4000-level course.

Other Humanities and Social Sciences courses whose Calendar entries clearly establish an emphasis on Indigenous Studies, including courses delivered exclusively at Grenfell Campus or the Labrador Campus of Memorial University, may be eligible. Students should speak with the Program Director for information.

Table 2 Suggested Course Sequencing for the Certificate in Indigenous Studies

First 3 credit hours: Archaeology 1005 or History 1005
Next 18 credit hours: Successfully complete an additional six courses selected from **Table 1 Courses for the Certificate in Indigenous Studies**. (Certificate total is 7 courses)

8.10.5 Course Prerequisites

Many approved courses are suitable for students in all disciplines without a background in the discipline. Other approved courses may have prerequisites.

8.10.6 Regulation Concerning the Former Minor in Aboriginal Studies

A student who is enrolled in, or who has completed the former Minor in Aboriginal Studies, is not eligible to enroll in the Certificate in Indigenous Studies.

8.10.7 Regulation Concerning the Former Certificate in Aboriginal and Indigenous Studies and the Former Certificate in Indigenous-Aboriginal Studies

A student cannot receive more than one of the Certificate in Indigenous Studies, the former Certificate in Indigenous-Aboriginal Studies, and the former Certificate in Aboriginal and Indigenous Studies.

8.11 Certificate in Newfoundland and Labrador Studies

www.mun.ca/hss/nlst
www.mun.ca/hss/about/contact/coordinators.php

The Certificate in Newfoundland and Labrador Studies is administered by the Department of Folklore.

The Certificate in Newfoundland and Labrador Studies is designed as an interdisciplinary humanities and social sciences certificate program that aims to encourage students to better understand the histories, social cultures, languages, geographies, scientific knowledges, philosophies, folklore, and contemporary experiences of Newfoundland and Labrador. Upon completion of the certificate, students should have an improved ability to contextualize Newfoundland and Labrador's place in Canada and the world, including an ability to situate case studies that have application to broader knowledge development. The program is overseen by the Department of Folklore.

8.11.1 Faculty of Humanities and Social Sciences Certificate Regulations

Students intending to complete a certificate program within the Faculty of Humanities and Social Sciences must meet the Admission requirements as outlined in the University Calendar. Students are also advised to consult the University Calendar regarding **General Regulations for Certificate Programs** and **Graduation Requirements**.

8.11.2 Advising

Throughout their program of study, students are encouraged to contact an academic advisor or the Director of the Certificate in Newfoundland and Labrador Studies for assistance with course planning, declaring their program of study, prerequisite and registration issues, and with questions about the eligibility of any courses not listed here.

A tentative list of upcoming course offerings in the program can be found at www.mun.ca/hss/courses.php.

8.11.3 Declaring the Certificate in Newfoundland and Labrador Studies

Students interested in a Certificate in Newfoundland and Labrador Studies are first encouraged to consult with the Program Director to discuss the requirements of the program. After consultation with the Program Director, students wishing to enroll in the Certificate can declare a Certificate in Newfoundland and Labrador Studies by contacting the Office of the Registrar. Information about declaring a program of study in the Faculty of Humanities and Social Sciences is available at the website.

8.11.4 Regulations for the Certificate in Newfoundland and Labrador Studies

The Certificate in Newfoundland and Labrador Studies students consists of 21 credit hours with no more than 9 credit hours in a single discipline as prescribed below:

1. 3 credit hours in a Critical Reading and Writing course that emphasizes the study of Newfoundland and Labrador, normally Folklore 1005; and,
2. 18 additional credit hours selected from **Table 1 Courses Approved for the Certificate in Newfoundland and Labrador Studies**, which may include up to 6 credit hours at the 4000-level. Additional 4000-level credit hours may be substituted following the process outlined in **General Regulations for Certificate Programs**.

Table 1 Courses Approved for the Certificate in Newfoundland and Labrador Studies

1000-level and 2000-level Courses	3000-level Courses or Above	4000-level Courses (up to 6 credit hours)
the former Economics 2070 Folklore 1005, 2300 Folklore 2230 or Sociology 2230 Geography 2495 Linguistics 2025, 2026, 2210	Archaeology 3290 Economics 3070 English 3155, 3820 History 3110, 3120, 3813 Law and Society 3200 Law and Society 3014 Political Science 3880	Anthropology 4280 Folklore 4310 French 4400 or Folklore 4400 History 4230, 4231 Law and Society 4900 Political Science 4680, 4880 Sociology 4240

Not all courses are offered every semester. Students are strongly advised to consult with the Program Director for assistance with course planning.

8.11.5 Regulations Concerning the Former Lifelong Learning Certificate in Newfoundland and Labrador Studies

A student who completed the Certificate in Newfoundland and Labrador Studies offered by the former Division of Lifelong Learning is not eligible also to complete a Faculty of Humanities and Social Sciences Certificate in Newfoundland and Labrador Studies.

8.11.6 Regulation Concerning the Former Minor in Newfoundland and Labrador Studies

A student who is enrolled in, or who has completed the Minor in Newfoundland and Labrador Studies is not eligible to enroll in the Certificate in Newfoundland and Labrador Studies.

8.12 Certificate in Public Policy

www.mun.ca/hss/publicpolicy
www.mun.ca/hss/about/contact/coordinators.php

The Certificate in Public Policy is administered by the Department of Political Science.

The Certificate in Public Policy is designed for those who are interested in the study of governance and policy responses to public issues. The program's objective is to provide foundational knowledge that is essential for exploring topical issues in diverse policy fields and settings. The program is structured around introductory and advanced core courses in Political Science that promote understanding of the theoretical parameters of public policy, such as the processes and mechanisms that are relied upon to define and solve policy problems. These core skills and competencies are used in the analysis and study of public policy in a variety of interdisciplinary fields.

8.12.1 Faculty of Humanities and Social Sciences Certificate Regulations

Students intending to complete a certificate program within the Faculty of Humanities and Social Sciences must meet the Admission requirements as outlined in the University Calendar. Students are also advised to consult the University Calendar regarding **General Regulations for Certificate Programs** and **Graduation Requirements**.

8.12.2 Advising

Throughout their program of study, students are encouraged to contact an academic advisor or the Program Director of the Certificate in Public Policy for assistance with course planning, declaring their program of study, prerequisite and registration issues, and with questions about the eligibility of any courses not listed here.

A tentative list of upcoming course offerings in the program can be found at www.mun.ca/hss/courses.php.

8.12.3 Declaring the Certificate in Public Policy

Students interested in a Certificate in Public Policy are first encouraged to consult with the Program Director to discuss the requirements of the program. After consultation with the Program Director, students wishing to enroll in the certificate can declare a Certificate in Public Policy by contacting the Office of the Registrar. Information about declaring a program of study in the Faculty of Humanities and Social Sciences is available at www.mun.ca/hss/programs/undergraduate/ideclare.php.

8.12.4 Regulations for the Certificate in Public Policy

As part of the Certificate in Public Policy, students must complete a concentration in a policy subfield, which comprises foundation courses up to the 3000-level and is overseen by a designated department. Students are encouraged to take courses in the concentration after successfully completing initial foundation-level courses in public policy offered by the Department of Political Science. A student is not eligible to complete more than one concentration.

The Concentration in **Economic Policy** is overseen by the Department of Economics. Approved courses feature a foundation-level focus on the interrelationships between public policy, political institutions and economic systems.

The Concentration in **Urban and Regional Policy** is overseen by the Department of Geography. Approved courses feature a foundation-level focus on public policy concerning broad concepts of regionalism, municipal governance, and sub-national planning.

The Concentration in **Governance** is overseen by the Department of Political Science. Approved courses feature a foundation-level focus on the public policy process within government, emphasizing constitutional, legal and internal procedural factors.

The Certificate in Public Policy consists of 21 credit hours as follows:

1. 6 credit hours chosen from Political Science 1000, 1010, 2600, 3600, including at least one of Political Science 2600, 3600;
2. 12 credit hours chosen from one of the following designated policy concentrations:
    a. **Economic Policy**: Economics 1010 (or the former 2010), Economics 1020 (or the former 2020), and 6 additional credit hours chosen from **Table 1 Approved Courses for the Concentration in Economic Policy**, including at least 3 credit hours in Economics at the 3000-level; or
    b. **Urban and Regional Policy**: Geography 1050, 2302 and 6 additional credit hours chosen from **Table 2 Approved Courses for the Concentration in Urban and Regional Policy**, including at least 3 credit hours in Geography 3350, 3701; or
    c. **Governance**: 3 credit hours chosen from Political Science 3600 or 3620 (excluding Political Science 3600 if previously successfully completed to fulfill the requirements in 1. above), and a minimum of 9 additional credit hours at the 3000-level chosen from **Table 3 Approved Courses for the Concentration in Governance**, including at least 3 credit hours in Canadian Governance and 3 credit hours in International Governance; and
3. 3 credit hours in Political Science 4600 or 4630.

Not all courses are offered every semester. Students are strongly advised to consult with the Program Director for assistance with course planning, and to generally follow **Table 4 Suggested Course Sequencing for the Certificate in Public Policy**.

Table 1 Approved Courses for the Concentration in Economic Policy

1000-level and 2000-level Courses	3000-level Courses
Economics 1010 (or the former 2010) (required) Economics 1020 (or the former 2020) (required) Geography 2302 Sociology 2110	Anthropology 3200, 3260/Sociology 3260 Economics 3010, 3011, 3030, 3070, 3080, 3140 Economics 3150, 3360, 3711 Political Science 3250, 3650

Table 2 Approved Courses for the Concentration in Urban and Regional Policy

1000-level and 2000-level Courses	3000-level Courses
Anthropology 2280 Geography 1050 (required), 2302 (required)	Anthropology 3058 Economics 3711 Geography 3340, 3350, 3701 Political Science 3870, 3890

Table 3 Approved Courses for the Concentration in Governance

Foundation Courses (successfully complete at least 1)	3000-level Canadian Governance Courses (successfully complete at least 1)	3000-level International Governance Courses (successfully complete at least 1)
Political Science 3600, 3620	Economics 3711 Law and Society 3014, Political Science 3650, 3800, 3810, 3820, 3830, 3870, 3880, 3890	Political Science 3210, 3220, 3250, 3280

Table 4 Suggested Course Sequencing for the Certificate in Public Policy

First 6 credit hours: Choose from Political Science 1000, 1010, 2600, 3600 (take one or both of 2600, 3600)
Next 12 credit hours: Complete a **Policy Concentration**
Last 3 credit hours: Choose from Political Science 4600 or Political Science 4630

Eligible 4000-level credit hours may be substituted following the process outlined in **General Regulations for Certificate Programs**.

8.12.5 Course Prerequisites

Many approved courses are suitable for students in all disciplines without a background in the discipline. Other approved courses may have prerequisites.

8.12.6 Regulations Concerning the Former Lifelong Learning Certificate in Public Administration

A student who completed the Certificate in Public Administration or the Certificate in Regional Policy and Development offered by the former Division of Lifelong Learning is also eligible to complete a Faculty of Humanities and Social Sciences **Certificate in Public Policy**.

9 Waiver of Regulations for Undergraduate Students

9.1 Student Responsibility and Academic Advice

Students are responsible for following regulations as stipulated in the University Calendar in all respects. In accordance with ***UNIVERSITY REGULATIONS*, Academic Advising**, the ability to make sound academic decisions requires access to sound academic advice. Information in the University Calendar and in an academic degree audit prevails over any other advice provided by any representative of Memorial University of Newfoundland. Requests for an academic degree audit are made by emailing the Office of the Registrar at audit_arts@mun.ca.

In extenuating circumstances that are duly documented, certain regulations involving course pre-requisites or co-requisites, departmental regulations, and faculty regulations may be waived or modified in accordance with ***UNIVERSITY REGULATIONS* - General Academic Regulations (Undergraduate)**.

9.2 Course Prerequisites

Matters involving course prerequisites or co-requisites require approval of both the course instructor and the Head of the academic unit that is delivering the course. Requests are made to the course instructor in person or in writing from the student's @mun.ca email account. Students should provide a detailed explanation of the reasons for the request.

9.3 Residence Requirements

Further to ***UNIVERSITY REGULATIONS* - General Academic Regulations (Undergraduate), Residence Requirements** for a student's first degree, the Faculty's Undergraduate Waivers and Appeals Committee may permit students to complete, at another recognized institution, up to 15 of the last 30 credit hours or equivalent required for the degree, subject to the following:

1. the student must confirm that no reasonable options exist to complete eligible courses offered by Memorial University of Newfoundland;
2. the rationale and any special circumstances are documented by the student in writing as outlined in **Waiver of Regulations for Undergraduate Students, Other Regulations**;
3. a letter of permission from the Office of the Registrar must accompany the request, confirming that the proposed courses will qualify for transfer to meet the student's program requirements; and,
4. the student must obtain written approval from the Head of the appropriate academic unit(s) at Memorial University of Newfoundland supporting the request and confirming the applicability of the equivalent courses for the student's program.

9.4 Other Regulations

1. Students facing extenuating circumstances should discuss their situation with an academic advisor(s), up to and including the Head of Department and/or Program Director.
2. Requests for waivers of degree or program regulations and for adjustment of course requirements must be made in writing to the Assistant Registrar responsible for the Faculty of Humanities and Social Sciences, c/o The Office of the Registrar. In the written request, the student must clearly and fully provide:
   - Full name;
   - Current address and telephone number;
   - @mun.ca email address;
   - Student ID number;
   - The request that is being made, including relevant information from the University Calendar and a course syllabus if applicable;

- A detailed explanation of the reasons for the extenuating request, supported by all relevant documentation; and
- The proposed resolution.

3. Only requests arising from extenuating circumstances beyond a student's control and which are properly documented will be brought forward to the Faculty of Humanities and Social Sciences' Undergraduate Waivers and Appeals Committee.
4. Terms of reference for the Undergraduate Waivers and Appeals Committee are available on the Faculty of Humanities and Social Sciences website at www.mun.ca/hss/faculty_staff/council.php. In considering a request for a waiver or substitution, the Committee normally considers the following factors:
   - the need to uphold the academic integrity of all programs within the Faculty of Humanities and Social Sciences;
   - the need to apply Calendar regulations in a consistent and fair manner;
   - the opinion of the Head of Department and/or Program Director;
   - that delayed graduation is not in itself an extraordinary circumstance; and
   - that medical documentation from a health professional must be sufficiently specific to allow proper consideration of the request. Medical documentation should normally be in the form of the Student Health Certificate. For further details, refer to **UNIVERSITY REGULATIONS - Information Required in Certificates from Health Professionals**.
5. A Committee decision is communicated by the Assistant Registrar to the student's @mun.ca account and to the Head of department and/or Program Director. If appropriate, the Committee, the Head and/or the Program Director will also examine whether the Calendar entry should be modified.
6. The procedure for appealing unfavourable decisions is outlined in the ***UNIVERSITY REGULATIONS*** **- General Academic Regulations (Undergraduate), Appeal of Decisions**.

10 Study Abroad (Harlow Campus and International Field Schools)

The Faculty of Humanities and Social Sciences periodically offers instruction at the Harlow Campus, England and in field school locations around the world. These provide students with the opportunity to study abroad combined with access to the expertise of Memorial University of Newfoundland instructors. Classroom and learning experiences occur in a safe learning environment. Students are exposed to new surroundings, diverse cultures and languages, skills development. extracurricular trips and guest speakers in ways that are possible only by spending time in another locale. The ability to complete Memorial University of Newfoundland courses elsewhere as part of a local cohort acts as an extension of campus learning, delivering exceptional value in terms of financial commitment, administration and peace of mind. Those who complete time abroad develop skills that help them prepare for today's global society, which increasingly involves travelling to unfamiliar locations, working in multicultural environments, adapting to new situations, and thinking creatively.

The content of the Harlow Campus and field school courses changes depending on the departments and instructors involved. Priority is normally given to delivering courses that are listed among the requirements for a Major, Minor, Diploma and/or Certificate program. Students wishing to enrol must have completed a minimum number of credit hours at the university level as specified by the participating department, and satisfy any prerequisites which may be required. Enrolment is limited and competitive. The relevant admission criteria, as well as other information, may be obtained from the Office of the Dean of Humanities and Social Sciences and the participating department.

Harlow campus semester and field school courses are normally clearly identified in the course title and can be found among a department's course descriptions. In addition, other courses or portions thereof are from time-to-time delivered outside of Canada by a variety of faculty members in the Humanities and Social Sciences. For information about upcoming interactional courses, contact the Go Abroad Director at www.mun.ca/goabroad.

10.1 Harlow Campus Semester Courses

Courses delivered exclusively at Harlow Campus include:

Classics 3710-3729
English 3710-3729
Folklore 3710-3729
Gender Studies 3710-3720
Geography 3710-3729
History 3710-3729 (excluding 3713, 3728), 4360-4380
Medieval Studies 3710-3729
Political Science 3980-3999

In addition, a number of courses listed under **Course Descriptions** are periodically offered at the Harlow Campus. For further information, contact the applicable department.

10.2 Field School Courses Delivered Outside of Canada

Field school courses delivered exclusively outside of Canada include:

French 3102, 3103, 3507, 3508
German 3510, 3511

The Department of Modern Languages, Literatures and Cultures regularly offers a one semester French immersion program in St-Pierre (July and Fall Frecker Programs) and periodically offers Russian language courses in Russia and Spanish language study abroad.

In addition, a number of courses listed under **Course Descriptions** are periodically offered at the Harlow Campus. For further information, contact the applicable department.

10.3 International Exchanges

Memorial University of Newfoundland offers international exchanges with approved partner institutes around the world. Information is available by e-mail to international@mun.ca.

1. All courses are subject to overall degree requirements, including residence requirements and departmental regulations.
2. It is a student's responsibility to confirm that courses successfully completed at another institution are eligible for transfer to Memorial University of Newfoundland. To confirm eligibility, a student is expected to begin by consulting with academic advisors and undergraduate Program Directors of the relevant academic department(s). A degree audit may be required.
3. While planning for an International exchange, a student must research the course offering(s) at the host institute and request the

associated syllabi. Before leaving the country the student must submit a completed letter of permission (www.mun.ca/regoff/forms.php) along with the relevant syllabi to the Office of the Registrar.

4. Upon completion of the international exchange, a student must request that the host institute send the student's transcripts directly to the Office of the Registrar in order for the transcripts to be deemed official. For more information regarding transfer of credit, the student should consult with the Faculty's International Exchange Director or the Office of the Registrar.

11 Experiential Learning

The Faculty of Humanities and Social Sciences offers a number of experiential learning opportunities. Co-operative education degree programs feature full-time employment in positions related to the student's area of study. These positions are completed as part of work term courses that are reserved for full-time students enrolled in the program. Field school courses provide hands-on instructional experiences as part of a regular degree or diploma program. Internship courses feature a part-time work placement of short duration that is completed in conjunction with coursework and are otherwise treated as a regular course.

11.1 Co-operative Education Degree Programs

www.mun.ca/coop

Major in Archaeology (Co-operative)
Honours Major in Archaeology (Co-operative)
Major in Economics (Co-operative) (B.A. or B.Sc.)
Honours in Economics (Co-operative) (B.A. or B.Sc.)
Major in Political Science (Co-operative)
Honours in Political Science (Co-operative)

For further information, contact the Division of Co-operative Education or the appropriate department.

11.2 Co-operative Education Work Term Courses

www.mun.ca/coop

Archaeology 300W, 400W
Economics 299W, 399W, 499W
Political Science 260W, 360W, 460W

For further information, contact Co-operative Education or the appropriate department.

11.3 Field School Courses Normally Delivered Within Canada

Archaeology 2583, 3585, 3586
English 5000
Geography 3230

For further Information, contact the appropriate department or course instructor.

11.4 Internship Courses Normally Delivered Within Canada

Political Science 4600
Sociology 4100

For further Information, contact the appropriate department or course instructor.

12 Limited Enrolment Courses and Transfer Credits

12.1 Limited Enrolment Courses

Certain course offerings in the Faculty of Humanities and Social Sciences will be identified as being Limited Enrolment Courses and will be clearly identified as such in the University Calendar, under **Course Descriptions**. Students who have registered for a Limited Enrolment Course must confirm their registration either (1) by attending at least one of the first three hours of lectures in the course (and the first meeting of any laboratory section of the course, if appropriate); or (2) by notifying the department in writing within the first five university working days of the semester. Students who do not confirm their registration may be dropped from the course on the recommendation of the Head of Department.

12.2 Requirement for Courses Delivered at Memorial University of Newfoundland

1. A student who successfully completes courses at another university in the area of a Major offered by the Faculty of Humanities and Social Sciences is required to complete more than half of the total credit hours in the Major subject in Memorial University of Newfoundland courses. Courses taken at universities and/or colleges which are included in formal institutional exchange agreements with this University are not subject to the requirement of this clause.
2. A student who successfully completes courses in the area of the Minor at another university is required to complete at least 12 credit hours in that subject at Memorial University of Newfoundland.
3. A minimum of 12 credit hours in courses prescribed for a diploma program must be completed at Memorial University of Newfoundland.
4. A minimum of 9 credit hours in courses prescribed for a certificate program must be completed at Memorial University of Newfoundland.
5. A student who is completing the International Bachelor of Arts degree program is required to complete at least 12 credit hours in designated IS courses in Memorial University of Newfoundland courses.

12.3 Grenfell Campus Courses

1. Courses delivered only at Grenfell Campus shall be treated on a case-by-case basis.
2. Specific (designated) Grenfell Campus courses may be eligible to fulfill the **Core Requirements**. Art History, Environmental Sustainability, Humanities, Social/Cultural Studies, and Tourism courses are eligible to fulfill the Breadth of Knowledge Requirement. A course that is identified as **Critical Reading and Writing (CRW)** in the same manner as in this Faculty is eligible towards the

Critical Reading and Writing Requirement. A designated **Writing (W)** course is eligible to fulfill the Critical Reading and Writing Requirement if it is demonstrated that the course follows the CRW course guidelines available at www.mun.ca/hss/crw. A course in a language, other than English, is eligible to fulfill the Language Study Requirement if it is demonstrated that the course follows the LS course guidelines available at www.mun.ca/hss/ls. A designated Quantitative Reasoning and Analysis (QRA) course is eligible if it is demonstrated that the course follows the QR course guidelines available at www.mun.ca/hss/qr. For further information, contact the Dean of the Faculty of Humanities and Social Sciences.

12.4 Transfers From Other Post-Secondary Institutions

The following Faculty of Humanities and Social Sciences regulations are in addition to ***UNIVERSITY REGULATIONS*** **- General Academic Regulations (Undergraduate)**.

1. As per ***UNIVERSITY REGULATIONS*** **- General Academic Regulations (Undergraduate)**, **Graduation**, a student who completes fewer than one-half of the credit hours required for the degree is eligible only to obtain an "unclassified" degree. For these students, at least one-half of the minimum number of credit hours required for a Major (or a second Major) and at least one-third of the minimum number of credit hours required for a Minor must be completed at this University.
2. No more than 9 of the 18 combined credit hours required to fulfill the **Critical Reading and Writing (CRW)**, **Language Study (LS)**, and **Quantitative Reasoning (QR) Requirements** may be transferred as equivalencies from another institution. In addition, no more than 3 credit hours in a CRW course may be transferred towards the **Critical Reading and Writing** requirement, with the exception of pre-authorized courses from the College of the North Atlantic that follow this University's CRW guidelines. Additional transferred credit hours that would normally qualify towards these requirements may be eligible to fulfill other requirements of the degree.
3. University-level study of a language not taught at this University may be eligible for unspecified LANG credit hours, and may be eligible towards the **Language Study (LS) Requirement**, subject to review by the Head of Modern Languages, Literatures and Cultures (or designate) and the Office of the Registrar.
4. University-level international study may be eligible towards the iBA **International Studies (IS) Courses Requirement** if it is demonstrated that it follows the IS course guidelines available at www.mun.ca/hss/IS.
5. The Faculty of Humanities and Social Sciences' Curriculum and Programs Committee is responsible for assessing the eligibility of specific (designated) Grenfell Campus courses for the **Bachelor of Arts General Degree Requirements, Core Requirements**.
6. Limits on credit transfer hours exist for the Honours, Major and Minor in French. Refer to **Program Regulations, Department of Modern Languages, Literatures and Cultures**.
7. Limits on credit transfer hours exist for the Honours, Major and Minor in History. Refer to **Program Regulations, Department of History**.
8. Limits on credit transfer hours exist for the Honours. Major and Minor in Spanish. Refer to **Program Regulations, Department of Modern Languages, Literatures and Cultures**.
9. Unspecified credit hours transferred as University (UNIV) are ineligible toward the requirement for 78 credit hours in Humanities and Social Sciences courses. They may be eligible as electives comprising the remaining 42 credit hours of the 120 credit hours for the degree.

13 Dean's List and Dean's Award for Exemplary Co-op Performance

13.1 Dean's List General Information

The Dean's List recognizes academic excellence. University information about the Dean's List is outlined in ***UNIVERSITY REGULATIONS*** **- General Academic Regulations (Undergraduate), Dean's and Vice-President's List**. In the Faculty of Humanities and Social Sciences (HSS), undergraduate students who meet all of the following criteria shall have a notation placed on their transcript that the student was named to the Dean's List.

13.1.1 Dean's List Procedure and Criteria

1. As per ***UNIVERSITY REGULATIONS*** **- General Academic Regulations (Undergraduate), Dean's and Vice-President's List, General Information**, a maximum of 10 percent of students in the Faculty shall be eligible. In the event that more than 10 percent of students meet the academic criteria, the minimum grade threshold shall increase accordingly.
2. Eligibility is determined at the end of the Winter semester. Eligibility is based on academic performance in the nominating period, which is the entirety of the three preceding semesters (Spring, Fall and Winter, inclusive). After the release of final grades in the Winter semester, a list of eligible students is generated by the Office of the Registrar and reviewed by the Dean's Office.
3. All full-time students who have declared a Major or Honours program in the Faculty of Humanities and Social Sciences are eligible and will be automatically considered. A student must be enrolled in a Bachelor of Arts, Bachelor of Arts (Honours), International Bachelor of Arts, Bachelor of Arts (Co-operative), Joint Bachelor of Arts/Bachelor of Science or Joint Bachelor of Arts/Bachelor of (Co-operative) Commerce program. Alternatively, a student may complete the requirements for the degree during the nominating period. Students with INC grades are treated on a case-by-case basis.
4. The official transcript must demonstrate that the student has met all of the following minimum criteria during the nominating period:
   a. completed at least 27 credit hours in courses delivered by Memorial University of Newfoundland;
   b. obtained a grade point average of 3.50 or higher;
   c. obtained a final numeric grade average of no less than 80%;
   d. obtained a final numeric grade of no less than 80% (letter grade of A) in at least seven courses, of which at least five courses were delivered by this Faculty's Major programs identified in **Degree Regulations – General and Honours Degrees**;
   e. obtained no more than three final numeric grades less than 80% (letter grade of B or lower);
   f. obtained no final numeric grades below 50% (letter grade of F or FAL); and
   g. did not commit an academic offense, as outlined in ***UNIVERSITY REGULATIONS*** **- General Academic Regulations (Undergraduate), Academic Misconduct**.
5. For the exclusive purposes of establishing eligibility in 4. above:
   a. grades and grade point average are examined to the second decimal place, and are not rounded up; and
   b. a student who was required during the nomination period to complete one or more work terms as part of a co-operative education degree program is eligible if a *Pass With Distinction* standard was achieved. In such cases, for the exclusive purposes

of the Dean's List calculation, the *Pass With Distinction* semester will be treated as a final numeric grade of 80% (letter grade of A) in 5 courses (15 credit hours).

6. Courses identified as “TR” (transfer) on a Memorial University of Newfoundland transcript are not eligible for consideration unless obtained through Memorial Abroad or Field school Programs. Regardless of a student’s program of study, a recommended planning process is outlined at **International Study Option** and/or in the student’s Major program.

13.2 Dean's Award for Academic Excellence

A student named to the Faculty of Humanities and Social Sciences Dean's List a fourth time will receive a transcript notation of “Dean’s Award for Academic Excellence in Humanities and Social Sciences”.

13.3 Dean’s Award for Exemplary Co-op Performance General Information

The Dean’s Award for Exemplary Co-op Performance recognizes students who have demonstrated exemplary performance in their academic program and work term(s).

13.3.1 Dean’s Award for Exemplary Co-op Performance Procedure and Criteria

1. A maximum of 10 percent of students in co-operative education programs in the Faculty shall be eligible.
2. Eligibility is determined at the end of the Winter semester. Eligibility is based on work term and academic performance in the nominating period, which is the entirety of the three preceding semesters (Spring, Fall and Winter, inclusive). After the release of final grades in the Winter semester, a list of eligible students is generated by the Office of the Registrar and reviewed by the Dean’s Office.
3. All full-time students who have declared a Major or Honours co-operative education program in the Faculty of Humanities and Social Sciences are eligible and will be automatically considered.
4. The official transcript must demonstrate that the student has met all of the following minimum criteria during the nominating period:
   a. completed at least 27 credit hours, at least 9 credit hours must be from courses without a W designation in the course number;
   b. attended full-time in at least two semesters of the qualifying period;
   c. received a grade of Pass with Distinction on one or more work terms;
   d. obtained a grade point average of 3.50 or higher;
   e. obtained no final numeric grades below 50% (letter grade of F or FAL); and
   f. did not commit an academic offense, as outlined in ***UNIVERSITY REGULATIONS*** **- General Academic Regulations (Undergraduate), Academic Misconduct**.
5. For the exclusive purposes of establishing eligibility in 4. above:
   a. grades and grade point average are examined to the second decimal place, and are not rounded up; and
   b. a work term is equivalent to 15 credit hours.

14 Graduation

Upon meeting the qualifications for the program, students must apply to graduate on the prescribed "Application for Graduation" form. This form may be obtained on-line at the Memorial Self Service at selfservice.mun.ca. The deadlines for application submission are July 15 for Fall (October) graduation, January 3 for Winter (February) in-absentia graduation, and January 15 for Spring (May) graduation. Applications received after these dates will be processed as time and resources permit. Additional information is available from the Office of the Registrar at www.mun.ca/regoff/graduation. Information regarding Convocation, including the dates of the ceremony, is available at www.mun.ca/convocation.

15 Programs and Regulations

15.1 Anthropology

www.mun.ca/anthro

All students who major in Anthropology will be assisted by a faculty advisor who will help them in planning their academic programs. For this purpose, it is essential that students declare their major at an early stage of their studies.

Anthropology course descriptions are found at the end of the Faculty of Humanities and Social Sciences section under **Course Descriptions, Anthropology** and are designated by ANTH.

15.1.1 Department of Anthropology Description

Anthropology explores how people and groups across the globe engage with the social, cultural, political, and economic processes that shape the contemporary world.

Anthropologists spend extended periods of time with the people they study in order to understand their practices and beliefs and how such practices and beliefs are entangled with systems of power. In short, the study of anthropology facilitates cross-cultural understanding and critical engagement with global problems. Students learn how concepts such as class, gender, and ethnicity relate to a variety of areas including development, environmental crises, economic processes, imaginary worlds, labour, media, politics, religion, tourism, and heritage. Our undergraduate programs foster skills needed to both think critically about these topics and engage with an increasingly globalized and complex world.

The study of anthropology provides a strong background for students who intend to specialize in any of the social sciences and humanities or in medicine, nursing, social work, education, law, business, government, communications and many other fields which require an understanding of global processes and a strong grounding in the cross-cultural study of human behaviour. Anthropology students have found employment with public, private and non-government organizations in diverse fields, including: academia; public policy; print, radio, and television journalism; documentary film-making; healthcare; international development; and social and environmental activism.

15.1.2 Bachelor of Arts Degree Requirements

The Bachelor of Arts requires the successful completion of a minimum of 120 credit hours. A student must meet the requirements for a

departmental Major, Minor, or Honours program and also meet the **Program Regulations – General and Honours Degrees** for the Faculty of Humanities and Social Sciences. A student is therefore advised to consult with the **Admission to the Bachelor of Arts General Degree Programs** regulations, the **Program Regulations - General and Honours Degrees** which also includes the **Bachelor of Arts General Degree Components**, **The Major Program**, and **The Minor Program** regulations. Information regarding honours programs is available at **Bachelor of Arts (Honours) Degree Regulations** as well as under each department's regulations.

A student is strongly encouraged to consult with an academic advisor to discuss available programs and requirements in the Faculty of Humanities and Social Sciences including the **Core Requirements**, **The Major Program**, **The Minor Program**, and the **Bachelor of Arts (Honours) Degree Regulations**. A student is advised to declare a program of study, including a Major and a Minor, before completing the first 45 credit hours of study. Information about declaring a Major and Minor in the Faculty of Humanities and Social Sciences is available at www.mun.ca/hss/programs/undergraduate/ideclare.php. Information regarding advisors for the Faculty of Humanities and Social Sciences is available at www.mun.ca/hss/about/contact/liaisons.php.

15.1.3 General Degree

15.1.3.1 Major

The student majoring in Anthropology must meet the requirements listed under **Program Regulations - General and Honours Degrees**. A minimum of 39 credit hours in Anthropology is required including:

1. Anthropology 1031;
2. 9 credit hours at the 2000-level chosen from any of the Anthropology courses between 2410 and 2416;
3. Anthropology 3300 and 3410;
4. 9 credit hours from Anthropology offerings at the 4000-level, of which one must be Anthropology 4412; and
5. the remaining 12 credit hours are to be chosen from any of the Anthropology 3000-or 4000-level offerings.

15.1.3.2 Minor

A minor in Anthropology requires the completion of 24 credit hours including:

1. Anthropology 1031;
2. 6 credit hours at the 2000 level chosen from any of the Anthropology courses between 2410 and 2416;
3. Anthropology 3410;
4. 6 credit hours from the 4000 level including Anthropology 4412; and
5. 6 credit hours chosen from Anthropology offerings at the 3000 level or above.

15.1.3.3 Joint Major

As an alternative to a minor, a student may choose to complete a major in Anthropology and a major in another eligible program in the Faculty of Humanities and Social Sciences. The Joint Major Program requires 3 fewer credit hours in each participating major as prescribed in each program's Calendar entry. For the joint major in Anthropology, 3 fewer credit hours shall be required at the 3000- or 4000-level to fulfill clause 5. of the **Major** above.

15.1.4 Honours Degree

1. Admission: see **Bachelor of Arts (Honours) Degree Regulations**.
2. Honours students are required to complete 60 credit hours in Anthropology following the requirements of the Major. In addition, students must include Anthropology 4994 and 4995. Thirty-six of the 60 credit hours must be at the 3000 or 4000 level. Students must also meet the requirements of the **Program Regulations - General and Honours Degrees**.

15.1.5 Regulations for Joint Honours, Anthropology and Another Major Subject

1. Students must fulfil the requirements of the **Bachelor of Arts (Honours) Degree Regulations**.
2. Students must complete 42 credit hours in Anthropology courses and include the following:
   a. Anthropology 1031;
   b. 9 credit hours at the 2000 level chosen from any of the Anthropology courses between 2410 and 2416;
   c. Anthropology 3300 and 3410;
   d. 9 credit hours in Anthropology courses at the 4000 level including Anthropology 4412; and
   e. 15 credit hours to be chosen from any of the 3000 or 4000 level Anthropology offerings.

15.1.6 Regulations for the International Bachelor of Arts (iBA)

In addition to completing the normal requirements for a Bachelor of Arts and one of a Joint Honours, Honours, Major or Minor in Anthropology, students may elect to complete requirements for the **International Bachelor of Arts (iBA)**. As part of the minimum 120 credit hours, a student may use eligible credit hours in Anthropology to jointly satisfy other requirements of the iBA degree. When selecting courses, a student is encouraged to consult with an academic advisor early in the program, to consider **Table 2 Possible Course Sequencing for the International Bachelor of Arts (iBA) (First 60 Credit Hours)**, and to consider Anthropology courses listed in **Table 3 International Studies (IS) Designated Courses**. Up to 12 credit hours in Anthropology IS courses may be used towards the **International Studies (IS) Courses Requirement**.

15.1.7 Certificate in Food Studies

The Department of Anthropology administers the **Certificate in Food Studies**. Credit hours in Anthropology may be eligible to jointly fulfill requirements of a degree and a certificate. For further information about this program, see **Certificate Programs Offered in the Faculty of Humanities and Social Sciences**, or contact the Program Director.

15.2 Archaeology

www.mun.ca/archaeology

15.2.1 Department of Archaeology Description

Archaeologists study past and present human cultures and behavior through their material traces: artifacts and features, plant and animal remains, human remains, sediments, sites, and their associated landscapes. In the Department of Archaeology, our students engage in practical training and experiential learning in classroom, laboratory, and field work settings that provide a comprehensive education and transferable skills. As one of the largest Archaeology departments in the country, we train our students to become effective researchers, critical thinkers, and active stewards of our shared archaeological heritage

The Undergraduate Liaison assists all Archaeology majors and minors in planning their academic programs. For this purpose students should register with the Department at an early stage of their studies.

The following programs are available in the Department:

1. **Major in Archaeology**
2. **Minor in Archaeology**
3. **Joint Major in Archaeology**
4. **Honours in Archaeology**
5. **Joint Honours in Archaeology and Another Major Subject**
6. **Major** in Archaeology (Co-operative) Education (ACE)
7. **Honours** in Archaeology (Co-operative) (ACE)

Archaeology course descriptions are found at the end of the Faculty of Humanities and Social Sciences section under **Course Descriptions, Archaeology** and are designated by ARCH.

15.2.2 Bachelor of Arts Degree Requirements

The Bachelor of Arts requires the successful completion of a minimum of 120 credit hours. A student must meet the requirements for a departmental Major, Minor, or Honours program and also meet the **Program Regulations – General and Honours Degrees** for the Faculty of Humanities and Social Sciences. A student is therefore advised to consult with the **Admission to the Bachelor of Arts General Degree Programs** regulations, the **Program Regulations - General and Honours Degrees** which also includes the **Bachelor of Arts General Degree Components**, **The Major Program**, and **The Minor Program** regulations. Information regarding honours programs is available at **Bachelor of Arts (Honours) Degree Regulations** as well as under each department's regulations.

A student is strongly encouraged to consult with an academic advisor to discuss available programs and requirements in the Faculty of Humanities and Social Sciences including the **Core Requirements**, **The Major Program**, **The Minor Program**, and the **Bachelor of Arts (Honours) Degree Regulations**. A student is advised to declare a program of study, including a Major and a Minor, before completing the first 45 credit hours of study. Information about declaring a Major and Minor in the Faculty of Humanities and Social Sciences is available at www.mun.ca/hss/programs/undergraduate/ideclare.php. Information regarding advisors for the Faculty of Humanities and Social Sciences is available at www.mun.ca/hss/about/contact/liaisons.php.

15.2.3 General Degree

15.2.3.1 Required Courses

The student majoring in Archaeology must meet the requirements listed under **Regulations for the General Degree of Bachelor of Arts**. Under these Regulations, a minimum of 36 credit hours in Archaeology is required. A student must successfully complete the Core Courses Archaeology 1000 (or the former 1030), 2480, 4182, and 4411. In addition, a student is required to take 12 credit hours from **Field and Laboratory Courses** and 12 credit hours from **Topical Courses**. A student is encouraged to take Archaeology 1001 or 1005 (**Critical Reading and Writing (CRW) Requirement**), and Archaeology 2450 (**Quantitative Reasoning (QR) Requirement**) as part of the Bachelor of Arts Core Requirements.

Course Groupings for the Archaeology Program:

Core Courses: 1000 (or the former 1030), 2480, 4182, 4411. A student is encouraged to take Archaeology 1001 or 1005 (**Critical Reading and Writing (CRW) Requirement**), and Archaeology 2450 (**Quantitative Reasoning (QR) Requirement**) as part of the Bachelor of Arts Core Requirements.

Field and Laboratory Courses: 2430, 2583 (or the former 3583), 3040, 3585, 3586, 3650, 4043, 4150, 4152, 4153.

Topical Courses: 2481, 2482, 2494, 3020, 3290, 3291, 3500, 3510, 3520, 3525 (or the former 3536), 3582 (or the former 3584), 3588, 3592, 3593, 3594, 3595, 3651, 3680, 3687, 3688, 3750, 3850, 4015, 4041, 4172, 4173, 4994.

15.2.3.2 Minor

A minor in Archaeology may be achieved by successfully completing the following courses: Archaeology 1000 (or the former 1030) and 2480; 6 credit hours in Archaeology courses at the 3000-level; 3 credit hours in Archaeology courses at the 4000-level; 9 credit hours chosen from Archaeology courses at any level, except Archaeology 2492, 2493 (or the former Archaeology 2491), or 2495. ARCH 1001 or ARCH 1005 is a recommended choice.

15.2.3.3 Joint Major

As an alternative to a minor, a student may choose to complete a major in Archaeology and a major in another eligible program in the Faculty of Humanities and Social Sciences. The Joint Major Program requires 3 fewer credit hours in each participating major as prescribed in each program's Calendar entry. For the joint major in Archaeology, 3 fewer credit hours shall be required from **Topical Courses** to fulfill **Required Courses** above.

15.2.4 Honours Degree

1. Students intending an Honours program are required to be majors and must complete 60 credit hours in Archaeology, at least 36 of which must be at the 3000 level or above including Archaeology 4994 and Archaeology 4995 (or the former Archaeology 4996). ARCH 1001 or ARCH 1005 is a recommended choice. Students must also meet the **Regulations for the General Degree of Bachelor of Arts**, and **Regulations for the Honours Degree of Bachelor of Arts**. Students are strongly advised to consult with the Archaeology Undergraduate Liaison and Honours Supervisor for assistance with planning their academic program.

15.2.5 Regulations for Joint Honours, Archaeology and Another Major Subject

1. Students must fulfill the **Regulations for the Honours Degree of Bachelor of Arts**.
2. Students must complete 42 credit hours in Archaeology courses and include the following:
   a. ARCH 1000 (or the former 1030);
   b. Archaeology 2430, 2480, and 3 other credit hours in Archaeology at the 2000 level;
   c. 15 credit hours in Archaeology courses at the 3000 level, chosen in consultation with an Honours supervisor; and
   d. Archaeology 4182, 4411, and 9 other Archaeology credit hours at the 4000 level, with a grade of "B" or better.

15.2.6 Major in Archaeology (Co-operative)

www.mun.ca/coop

The Major in Archaeology (Co-operative) Education (ACE) allows Archaeology students to apply skills in a variety of settings. The program is available to full-time Archaeology majors only.

The ACE Program is an extension of the Bachelor of Arts and Bachelor of Arts Honours programs. The program is administered by the designated Academic Staff Member in Co-operative Education (ASM-CE) for the Faculty of Humanities and Social Sciences. With the help of the ASM-CE and the Department of Archaeology, students will seek placement opportunities within the Province, within Canada, and internationally.

Students who participate in the ACE program must meet the requirements listed under the **Regulations for the General Degree of Bachelor of Arts** and **First Courses** above. In addition, the ACE Program requires two work term courses, 300W and 400W, as described in **Work Terms**.

15.2.6.1 Admission Requirements

1. Admission to the ACE program is limited and selective.
2. Applicants should note that it is possible to apply to enter the ACE program only in the Fall semester of each academic year. ACE application forms and the application deadline are available at the ACE website.
3. The primary criterion used in reaching decisions on applications for admission is overall academic achievement. Students with weak overall academic records are unlikely to be admitted. Applicants may be asked to attend an interview.
4. To be eligible for admission to the ACE program an applicant must have successfully completed a minimum of 30 credit hours with an overall average of at least 65%. All applicants must have successfully completed Archaeology 1000 (or the former 1030) and 2480 and an Archaeology Field School or Lab School or have significant archaeology experience. It is also advised that students choose courses which can satisfy the requirements for the **Core Requirements** as outlined under **Bachelor of Arts General Degree Components**, including courses in a second language.
5. Transfer students from other universities will be placed in the term of the program judged to be appropriate considering equivalent credits, as determined by the Department and the designated ASM-CE.

15.2.6.2 Program of Study

1. Promotion from each term requires a passing grade in all required major courses and an overall average of at least 65% in all courses including electives. A student who fails a required major course, fails to maintain the overall average of 65% and/or does not maintain full-time status will not be promoted to the next term and will be required to withdraw from the ACE program.
2. In addition to the 30 credit hours required for admission, a student is required to complete a total of 120 credit hours (including a field school or lab school) and two **Work Terms**. A student wishing to change the sequence of the work terms must first consult with the ACE Coordinator, the designated ASMs-CE and receive written approval from the Head of the Department or delegate.
3. A student may wish to follow **Table 1 Suggested Course Progression for Major/Honours in Archaeology (Co-operative)** outlined below under the **Honours in Archaeology (Co-operative)**. A student is encouraged to meet with the Program director early in the program in order to establish a course pattern that satisfies the regulations for this program.
4. ***UNIVERSITY REGULATIONS*** **- General Academic Regulations (Undergraduate)**, **Classification of Students** notwithstanding, a student will require permission from the Head of the Department to register for courses while on work terms if the courses are in addition to the prescribed program. Normally, work terms are considered equivalent to a full-time course load with no time for additional course work.

15.2.6.3 Work Term Placement

1. Students are ultimately responsible for securing their work term placements. ASMs-CE provide support for the job search and inform students of potential opportunities.
2. A student who applies for admission to the ACE program gives permission to the University to provide a copy of the student's resume and university transcript to potential employers.
3. A student is required to complete professional development seminars offered by the designated ASM-CE.
4. A student who is enrolled in the ACE Program may independently obtain a work term placement in consultation with the ASM-CE. Such employment positions must satisfy the criteria for work terms, be confirmed by the employer, and must be approved by the ASM-CE before the first day of the work term according to the Co-operative Education website.
5. Work terms are normally 12-16 weeks in duration, full-time and paid. Remuneration for work terms are determined by employers based on their internal wage structures.
6. The start and end dates for each work term are shown on the Co-operative Education website.

15.2.6.4 Registration and Evaluation of Performance

1. In Work Terms 1 and 2, a student must register for Archaeology 300W and 400W respectively.
2. The Work Term evaluations shall consist of two components:
   a. **On-the-job Student Performance:**

      Job performance shall be assessed by the ASM-CE using information gathered during the Work Term and input from the employer towards the end of the Work Term. Evaluation of the job performance will result in one of the following classifications: OUTSTANDING, ABOVE EXPECTATIONS, SATISFACTORY, MARGINAL PASS, FAIL.

b. **Work Term Assignment(s):**

- One or more work term assignment(s) as outlined in the course syllabus. Evaluation of the work term assignment(s) will result in one of the following classifications: OUTSTANDING, ABOVE EXPECTATIONS, SATISFACTORY, MARGINAL PASS, FAIL.

The evaluation of the job performance and the work term assignment(s) will result in one of the following final grades being awarded:

- Pass with Distinction: Indicates a classification of OUTSTANDING in both the work term assignment(s) and the job performance.
- Pass: Indicates a classification of ABOVE EXPECTATIONS, SATISFACTORY, and/or MARGINAL PASS for the work term assignment(s) and the job performance or an overall grade of OUTSTANDING in only one of the two components.
- Fail: Indicates a classification of FAIL in the work term assignment(s) and/or the job performance.

For promotion from the Work Term, a student must obtain at least a Pass in the applicable work term course. Students should also refer to the ***UNIVERSITY REGULATIONS*** **- General Academic Regulations (Undergraduate)** of the University. The grades awarded for each work term will be noted on the transcript of the student.

3. A student will not be eligible to continue in the ACE program if the student: withdraws from a Work Term subsequent to a job placement without acceptable cause and/or without prior approval from both the ASM-CE and the Department of Archaeology; fails to honour an agreement to work with an employer; and/or conducts themselves in such a manner as to cause their discharge from the job.

15.2.7 Honours in Archaeology (Co-operative)

www.mun.ca/coop

15.2.7.1 Admission Requirements

See **Major in Archaeology (Co-operative), Admission Requirements**. In addition to the regulations outlined below, a student must also meet the **Program Regulations - General and Honours Degree Bachelor of Arts General Degree**.

15.2.7.2 Program of Study

In addition to meeting the requirements for the **Major in Archaeology (Co-operative)**, Honours in Archaeology (Co-operative) students must also meet the following regulations.

1. A student should also refer to the **Bachelor of Arts (Honours) Degree Regulations**. Students intending to complete an Honours program are required to be majors and must complete 60 credit hours in Archaeology including Archaeology 4994 and Archaeology 4995 (or the former Archaeology 4996). In addition, the ACE Program requires two work Term courses, 300W and 400W, as described in **Work Terms**.
2. Promotion from each Term requires an overall average of at least 65% in all courses including electives. A student who fails a required course or fails to maintain an overall average of 65% and/or does not maintain full-time status will not be promoted to the next term and will be required to withdraw from the ACE program. See also ***UNIVERSITY REGULATIONS*** **- Regulations for the Honours Degree**.
3. In addition to the 30 credit hours required for admission, students are required to complete 120 credit hours (including a field school) and two Work Terms. A student wishing to change the sequence of the work terms must first consult with the ACE Coordinator, the ASM-CE and receive approval in writing from the Head of the Department or delegate.
4. ***UNIVERSITY REGULATIONS*** **- General Academic Regulations (Undergraduate)**, **Classification of Students** notwithstanding, a student will require permission from the Head of the Department to register for courses while on work terms if the courses are in addition to the prescribed program. Normally, work terms are considered equivalent to a full-time course load with no time for additional course work.
5. A student may wish to follow **Table 1 Suggested Course Progression for Major/Honours in Archaeology (Co-operative)** outlined below. A student is encouraged to meet with the Undergraduate Program Director early in the program in order to establish a course pattern that satisfies the regulations for this program.

Table 1 Suggested Course Progression for Major/Honours in Archaeology (Co-operative)

Year	Courses
Year 1	ARCH 1000 (or the former 1030) ARCH 2480
Year 2	9 credit hours from **Topical Courses** Students applying for the ACE Program are required to take an Archaeology Field or Laboratory School after their second year of study. The courses associated with the field/lab school include ARCH 2583 or the former 3583 (Intersession), ARCH 3585 and ARCH 3586 (Summer Session), and these count towards the Field and Laboratory course requirements - 9 credit hours **Field and Laboratory Courses**.
Year 3	3 credit hours from **Field and Laboratory Courses** Work Term 1
Year 4	ARCH 4182 ARCH 4411 ARCH 4994 and ARCH 4995 (or the former 4996) - Honours Program only Work Term 2 3 credit hours from **Topical Courses**

15.2.7.3 Work Term Placement

See **Major in Archaeology (Co-operative) Education (ACE)**.

15.2.7.4 Registration and Evaluation of Performance

See **Major in Archaeology (Co-operative) Education (ACE)**.

15.2.8 Regulations for the International Bachelor of Arts (iBA)

In addition to completing the normal requirements for a Bachelor of Arts and one of a Joint Honours, Honours, Major or Minor in Archaeology, students may elect to complete requirements for the **International Bachelor of Arts (iBA)**. As part of the minimum 120 credit hours, a student may use eligible credit hours in Archaeology to jointly satisfy other requirements of the iBA degree. When selecting courses, a student is encouraged to consult with an academic advisor early in the program and to consider **Table 1 Possible Course Sequencing for the First 45 credit hours of the Bachelor of Arts**.

15.2.9 Diploma in Ancient Worlds

The Department of Archaeology administers the **Diploma in Ancient Worlds**. Credit hours in Archaeology may be eligible to jointly fulfill requirements of a degree and a diploma and/or a certificate. For further information about this program, see **Diploma Programs Offered in the Faculty of Humanities and Social Sciences**, or contact the Program Director.

15.2.10 Certificate in Indigenous Studies

The Department of Archaeology administers the **Certificate in Indigenous Studies**. Credit hours in Archaeology may be eligible to jointly fulfill requirements of a degree and a certificate. For further information about this program, see **Certificate Programs Offered in the Faculty of Humanities and Social Sciences**, or contact the Program Director.

15.3 Classics

www.mun.ca/classics

15.3.1 Department of Classics Description

Classics explores the cultures and societies of ancient Greece and Rome within the broader context of the ancient Mediterranean. Such study is intrinsically multidisciplinary, encompassing Latin and ancient Greek texts, archaeology, intellectual history, material culture, the influence of Greco-Roman antiquity on later societies, and perspectives on gender, ethnicity, and socio-economic class. Classics is a discipline rooted in the past, yet relevant to the contemporary world and modern institutions. The study of classical antiquity and its subsequent traditions helps students make informed observations about the present and the future.

The following programs are available in the Department:

1. **Major in Classics**
2. **Minor in Classics**
3. **Joint Major in Classics**
4. **Honours in Classics**
5. **Joint Honours in Classics**

Classics course descriptions are found at the end of the Faculty of Humanities and Social Sciences section under **Course Descriptions, Classics** and are designated by CLAS.

15.3.2 Bachelor of Arts Degree Requirements

The Bachelor of Arts requires the successful completion of a minimum of 120 credit hours. A student must meet the requirements for a departmental Major, Minor, or Honours program and also meet the **Program Regulations – General and Honours Degrees** for the Faculty of Humanities and Social Sciences. A student is therefore advised to consult with the **Admission to the Bachelor of Arts General Degree Programs** regulations, the **Program Regulations - General and Honours Degrees** which also includes the **Bachelor of Arts General Degree Components**, **The Major Program**, and **The Minor Program** regulations. Information regarding honours programs is available at **Bachelor of Arts (Honours) Degree Regulations** as well as under each department's regulations.

A student is strongly encouraged to consult with an academic advisor to discuss available programs and requirements in the Faculty of Humanities and Social Sciences including the **Core Requirements**, **The Major Program**, **The Minor Program**, and the **Bachelor of Arts (Honours) Degree Regulations**. A student is advised to declare a program of study, including a Major and a Minor, before completing the first 45 credit hours of study. Information about declaring a Major and Minor in the Faculty of Humanities and Social Sciences is available at www.mun.ca/hss/programs/undergraduate/ideclare.php. Information regarding advisors for the Faculty of Humanities and Social Sciences is available at www.mun.ca/hss/about/contact/liaisons.php.

15.3.3 General Degree

15.3.3.1 Major in Classics

Students for a Major in Classics are advised to choose their program in consultation with the Department.

The major program consists of a minimum of 39 credit hours in Classics courses in accordance with the following:

1. Either Classics 1120 and 1121 or Classics 1130 and 1131;
2. at least 3 credit hours at the 4000 level;
3. an additional 12 credit hours at the 3000 level or above; and
4. an additional 18 credit hours at any level. With the exception of language courses (Classics 1120, 1121, 1130, 1131), no more than 6 1000-level credit hours may be counted towards the major.

A student is encouraged to consider the Honours or Joint Honours in Classics outlined under **Honours Degree**.

15.3.3.2 Minor in Classics

The Minor program in Classics consists of a minimum of 24 credit hours in Classics courses in accordance with the following:

1. At least 3 credit hours at the 3000 level or above.
2. With the exception of language courses (Classics 1120, 1121, 1130, 1131), no more than 6 1000-level credit hours may be counted towards the minor.

15.3.3.3 Joint Major in Classics

As an alternative to a minor, a student may choose to complete a major in Classics and a major in another eligible program in the Faculty of Humanities and Social Sciences. The Joint Major Program requires 3 fewer credit hours in each participating major as

prescribed in each program's Calendar entry. For the joint major in Classics, 3 fewer credit hours shall be required to fulfill clause 4. of the **Major in Classics** above.

15.3.4 Honours Degree

Students for Honours in Classics are advised to choose their program in consultation with the Department.

15.3.4.1 Honours Degree in Classics

The Honours Degree in Classics will include at least 60 credit hours in Classics courses and consist of the following:

1. 12 credit hours in ancient Greek and/or Latin, selected from Classics 1120, 1121, 1130, 1131, 2200, 2300, 3200, and 3300 (Classics 3200 and/or 3300 can be used to meet the 3000-level requirements in both regulations 1. and 2.);
2. 36 credit hours in Classics at the 3000 and 4000 level, of which at least 9 credit hours must be at the 4000 level, including Classics 4999; and
3. a minimum of 12 additional credit hours at any level in Classics resulting in a total of 60 credit hours. With the exception of language courses (Classics 1120, 1121, 1130, 1131), no more than 6 1000-level credit hours may be counted towards the Honours Degree.

15.3.4.2 Joint Honours in Classics

Classics may be combined with another subject to form a Joint Honours program. The Joint Honours Degree in Classics will include at least 45 credit hours in Classics courses and consist of the following:

1. 9 credit hours in ancient Greek and/or Latin, selected from Classics 1120, 1121, 1130, 1131, 2200, 2300;
2. 27 credit hours in Classics at the 3000 and 4000 level, of which at least 6 credits must be at the 4000 level (if a student chooses Classics as the Subject of Specialization in which to write the Honours Essay, Classics 4999 Honours Essay will count towards 3 credit hours at the 4000-level requirement); and
3. a minimum of 9 additional credit hours at any level in Classics resulting in a total of 45 credit hours. With the exception of language courses (Classics 1120, 1121, 1130, 1131), no more than 6 1000-level credit hours may be counted towards the Joint Honours Degree.

15.3.5 Regulations for the International Bachelor of Arts (iBA)

In addition to completing the normal requirements for a Bachelor of Arts and one of a Joint Honours, Honours, Major or Minor in Classics, students may elect to complete requirements for the **International Bachelor of Arts (iBA)**. As part of the minimum 120 credit hours, a student may use eligible credit hours in Classics to jointly satisfy other requirements of the iBA degree. When selecting courses, a student is encouraged to consult with an academic advisor early in the program and to consider **Table 1 Possible Course Sequencing for the First 45 credit hours of the Bachelor of Arts**.

15.3.6 Certificate in Ancient Languages

The Department of Classics administers the **Certificate in Ancient Languages**. Credit hours in Classics may be eligible to jointly fulfill requirements of a degree and a certificate. For further information about this program, see **Certificate Programs Offered in the Faculty of Humanities and Social Sciences**, or contact the Program Director.

15.3.7 Certificate in History and Philosophy of Science and Technology

The Departments of Classics, History, and Philosophy jointly administer the Certificate in History and Philosophy of Science and Technology. Credit hours in Classics may be eligible to jointly fulfill requirements of a degree and a certificate. For further information about this program, see **Certificate Programs**, **Certificate in History and Philosophy of Science and Technology**, or contact the Program Director.

15.4 Computer Science

www.mun.ca/computerscience

For Departmental Regulations and Course Descriptions, see **Faculty of Science** section of the Calendar.

The following undergraduate programs are available in the Department of Computer Science:

1. Applied Mathematics and Computer Science Joint Major
2. Computer Internship Option (CIIO)
3. Computer Science Honours (B.A., B.Sc.)
4. Computer Science and Economics Joint Major
5. Computer Science and Geography Joint Honours
6. Computer Science and Geography Joint Major
7. Computer Science and Physics Joint Honours (B.Sc. only)
8. Computer Science and Physics Joint Major (B.Sc. only)
9. Computer Science and Pure Mathematics Joint Honours
10. Computer Science and Pure Mathematics Joint Major
11. Computer Science and Statistics Joint Honours
12. Computer Science and Statistics Joint Major
13. Computer Science (Software Engineering) Honours (B.Sc. only)
14. Major in Computer Science
15. Major in Computer Science (Data-centric (Computing) (B.Sc. only)
16. Major in Computer Science (Smart Systems) (B.Sc. only)
17. Major in Computer Science (Visual Computing and Games) (B.Sc. only)
18. Minor in Computer Science

15.5 Economics

www.mun.ca/econ

15.5.1 Department of Economics Description

Economics, the scientific study of how societies use scarce resources to produce and distribute commodities, is a versatile and flexible discipline. The Department has a strong focus on teaching and applied research. Students graduate with problem-solving skills needed to analyze how individuals (microeconomics) and governments (macroeconomics) can efficiently achieve their objectives, given their constraints. Economics students are trained how to evaluate and predict economic relationships. The discipline draws on and collaborates with the sciences (fisheries, health, environment, petroleum) and other disciplines (business, sociology, history, epidemiology, geography, political science, statistics and mathematics) to deal with a variety of topics, including economic growth, monetary policy, fair taxation, regional and municipal economic development, natural resource economics, and the economics of environmental impacts.

The following programs are available in the Department:

1. Major in Economics (B.A. or B.Sc.)
2. Honours in Economics (B.A. or B.Sc.)
3. Honours in Economics (Co-operative) (B.A. or B.Sc.)
4. Minor in Economics
5. Joint Major in Economics (B.A. only)
6. Joint Programs (B.Sc. only)
7. Joint Program (Co-operative) (B.Sc. only)
8. Major in Economics (Co-operative) (B.A. or B.Sc.)

Economics course descriptions are found at the end of the Faculty of Humanities and Social Sciences section under **Course Descriptions, Economics** and are designated by ECON.

15.5.2 Bachelor of Arts Degree Requirements

The Bachelor of Arts requires the successful completion of a minimum of 120 credit hours. A student must meet the requirements for a departmental Major, Minor, or Honours program and also meet the **Program Regulations – General and Honours Degrees** for the Faculty of Humanities and Social Sciences. A student is therefore advised to consult with the **Admission to the Bachelor of Arts General Degree Programs** regulations, the **Program Regulations - General and Honours Degrees** which also includes the **Bachelor of Arts General Degree Components**, **The Major Program**, and **The Minor Program** regulations. Information regarding honours programs is available at **Bachelor of Arts (Honours) Degree Regulations** as well as under each department's regulations.

A student is strongly encouraged to consult with an academic advisor to discuss available programs and requirements in the Faculty of Humanities and Social Sciences including the **Core Requirements**, **The Major Program**, **The Minor Program**, and the **Bachelor of Arts (Honours) Degree Regulations**. A student is advised to declare a program of study, including a Major and a Minor, before completing the first 45 credit hours of study. Information about declaring a Major and Minor in the Faculty of Humanities and Social Sciences is available at www.mun.ca/hss/programs/undergraduate/ideclare.php. Information regarding advisors for the Faculty of Humanities and Social Sciences is available at www.mun.ca/hss/about/contact/liaisons.php.

15.5.3 Admission Regulations (B.Sc.)

A student is normally admitted to the B.Sc. Program upon successful completion of 30 credit hours which must include:

1. 6 credit hours in Critical Reading and Writing (CRW) courses, including at least 3 credit hours in English courses; and
2. 6 credit hours in Mathematics courses.

15.5.4 Major in Economics (B.A. or B.Sc.)

1. A student may major in Economics as part of either a B.A. or a B.Sc. program. See the **Regulations for the General Degree of Bachelor of Arts** and the **Degree Regulations** for the General Degree of Bachelor of Science, as appropriate.
2. A student shall consult with the Head of the Department or delegate when choosing courses for a Major in Economics.
3. Mathematics 1000 is the prerequisite for Economics 3000, 3010, and 3550.
4. A Bachelor of Arts student who undertakes a Major in Economics shall successfully complete Mathematics 1000, Statistics 2500, and at least 39 credit hours in courses in Economics of which:
   a. 1010 (or the former 2010), 1020 (or the former 2020), 2550, 3000, 3001, 3010, 3550 and 4550 are obligatory.
   b. An additional 15 credit hours shall be chosen from among the various Economics courses, at the 3000-level or above, in consultation with the Head of the Department or delegate, and will include at least 6 credit hours in courses at the 4000-level.
   c. A student may, with the approval of the Head of the Department or delegate, substitute Statistics 2550 for Statistics 2500.
5. A Bachelor of Arts student majoring in Economics shall complete a minor of 24 credit hours in one other approved subject, or a second Major in accordance with **Regulations for the General Degree of Bachelor of Arts**. It is recommended that the Minor or second Major be chosen from the following subjects: Business, Mathematics, Political Science, Statistics, Computer Science, History, Geography, Philosophy, Sociology, or Anthropology.
6. A Bachelor of Science student who undertakes a Major in Economics shall complete at least 42 credit hours in courses in Economics of which:
   a. Economics 1010 (or the former 2010), 1020 (or the former 2020), 2550, 3000, 3001, 3010, 3550 and 4550 are obligatory.
   b. Economics 3551 or 4551 must be successfully completed.
   c. An additional 15 credit hours shall be chosen from among the various Economics courses, at the 3000-level or above, in consultation with the Head of the Department or delegate, and will include at least 6 credit hours in courses at the 4000-level.
7. A Bachelor of Science student must successfully complete credits from other Science disciplines as follows:
   a. Mathematics 1000, 1001, and 2050.
   b. Statistics 2550 or 2500, and an additional 3 credit hours of Statistics.
   c. Computer Science 1000, and an additional 3 credit hours of Computer Science. With the approval of the Head of the

Department or delegate, students may substitute another 1000-level Computer Science course for Computer Science 1000.

d. At least 3 credit hours in an additional science subject other than Mathematics/Statistics, Economics, and Computer Science.

15.5.5 Honours in Economics (B.A. or B.Sc.)

1. See the **General Regulations for the B.A. (Honours) Degree** and the **Degree Regulations** for the Honours Degree of Bachelor of Science.
2. A student shall consult with the Head of the Department or delegate when choosing courses for an Honours program.
3. A student shall successfully complete all non-Economics courses required of B.A. or B.Sc. Majors, and at least 60 credit hours in courses in Economics, including 1010 (or the former 2010), 1020 (or the former 2020), 2550, and at least 36 credit hours at the 3000-level or above including 3000, 3001, 3010, 3011, 3550, 3551, 4550 and 4551.
4. Twenty-four credit hours in electives in Economics shall be chosen in consultation with the Head of the Department or delegate, including at least 9 credit hours in courses at the 4000-level. In addition, all Economics Honours students are required to write an essay.

15.5.6 Minor in Economics

1. Twelve required credit hours: Economics 1010 (or the former 2010), 1020 (or the former 2020), 3000, 3010.
2. Twelve credit hours in Economics electives of which 3 credit hours must be at the 4000-level. The 12 credit hours shall be chosen in consultation with the Head of the Department or Delegate.
3. Course prerequisites stipulated in the General Degree regulations and in the course descriptions shall apply to a Minor in Economics.

15.5.7 Joint Programs

15.5.7.1 Bachelor of Arts

As an alternative to a minor in the B.A., a student may choose to complete a major in Economics and a major in another eligible program in the Faculty of Humanities and Social Sciences. The Joint Major Program requires 3 fewer credit hours in each participating major as prescribed in each program's Calendar entry. For the joint major in Economics, 3 fewer credit hours shall be required to fulfill clause 4.b. of the **Major in Economics** above.

15.5.7.2 Bachelor of Science

Programs for Joint Majors in Economics and Computer Science, Pure Mathematics, Applied Mathematics or Statistics, and a Joint Major in Statistics and Economics (Co-operative) are found under the heading **Joint Program Regulations** in the entry for the Faculty of Science.

A student who wishes to take a Joint Major in Economics and Computer Science, Mathematics or Statistics must arrange a program in consultation with the heads of the respective departments and comply with the General Regulations for the Majors Degrees.

15.5.8 Major in Economics (Co-operative) (B.A. or B.Sc.)

www.mun.ca/coop

The Major in Economics (Co-operative) allows Economics students to apply their skills in a variety of settings including government, education, and the non-profit and private sectors. The program is available to full-time Economics major students only.

The Major in Economics (Co-operative) can be taken as a major in either of the following degrees: the Bachelor of Arts, Bachelor of Arts (Honours), Bachelor of Science and Bachelor of Science (Honours). The program is administered by the designated Academic Staff Member in Co-operative Education (ASM-CE) for the Faculty of Humanities and Social Sciences. With the help of the ASM-CE and the Department of Economics, participating students may seek work term opportunities within the Province, within Canada, and internationally.

Students who participate in the Economics (Co-operative) must meet the requirements listed under the **Regulations for the General Degree of Bachelor of Arts** and **Regulations for the General Degree of Bachelor of Science**. In addition, the Economics (Co-operative) requires three work term courses as described in **Course Descriptions, Work Terms**.

15.5.8.1 Eligibility for Admission

1. Admission to the Economics (Co-operative) is limited and selective.
2. A student should note that it is possible to apply to enter the Economics (Co-operative) only in the Fall semester of each academic year. Economics (Co-operative) application forms, and the application deadline, are available at the Department of Economics website.
3. The primary criterion used in reaching decisions on applications for admission is overall academic achievement. A student with weak overall academic records is unlikely to be admitted. An applicant may be asked to attend an interview.
4. To be eligible for admission to Economics (Co-operative) an applicant must have successfully completed a minimum of 30 credit hours with an overall average of at least 65%, including the following: Economics 1010 (or the former 2010) and 1020 (or the former 2020); at least 6 credit hours in English (English 1110 is recommended); Mathematics 1000; and 15 credit hours chosen from courses in the disciplines of Humanities, Social Sciences, Business, or Science. It is advised that students choose courses which can satisfy the **Core Requirements** as outlined in the **Bachelor of Arts General Degree Components** or the **Regulations for the General Degree of Bachelor of Science**, as relevant, including courses in a second language. Bachelor of Science applicants must have completed Mathematics 1001 at the time of application to the program.
5. A student who have already completed more than the 30 credit hours that are required for admission to the program may apply for entry into the program with Advanced Standing. Students with Advanced Standing will be placed in a semester of the program judged to be appropriate considering the number of credit hours remaining.
6. Transfer students from other universities will be placed in a semester of the program judged to be appropriate considering equivalent credits, as determined by the Department and the designated ASM-CE.

15.5.8.2 Program of Study

1. A Bachelor of Arts student who undertakes a Major in Economics (Co-operative) shall complete Economics 299W, 399W, and 499W and an additional 45 credit hours as follows:

a. Economics 1010 (or the former 2010), 1020 (or the former 2020), 2550, 3000, 3001, 3010, 3011, 3550, 4120, 4550, and 4551;
b. An additional 6 credit hours in Economics at the 3000 or 4000 level;
c. Mathematics 1000; and
d. Statistics 2500. Students may, with the approval of the Head of the Department or delegate, substitute Statistics 2550 for 2500.

2. A Bachelor of Science student who undertakes a Major in Economics (Co-operative) shall complete 66 credit hours as follows:
   a. Economics 1010 (or the former 2010), 1020 (or the former 2020), 2550, 3000, 3001, 3010, 3011, 3550, 4120, 4550, and 4551;
   b. An additional 9 credit hours in Economics at the 3000 or 4000 level;
   c. Economics 299W, 399W, and 499W;
   d. Mathematics 1000, 1001, and 2050;
   e. Statistics 2550 or 2500, and an additional 3 credit hours of Statistics;
   f. Computer Science 1000, and an additional 3 credit hours of Computer Science. With the approval of the Head of the Department or delegate, students may substitute another 1000-level Computer Science course for Computer Science 1000; and
   g. At least 3 credit hours in an additional science subject other than Mathematics/Statistics, Economics, and Computer Science.
3. A student should refer to **Table 1 Suggested Course Progression for Bachelor of Arts Major in Economics (Co-operative)** or **Table 2 Suggested Course Progression for Bachelor of Science Major in Economics (Co-operative)**.
4. Promotion from each semester requires a passing grade in all courses specified in clauses 1. or 2. above as relevant and a cumulative average of at least 65% in all courses. A student who fails a required course, fails to maintain the required cumulative average, or does not maintain full-time status will not be promoted to the next semester and will be required to withdraw from the program.
5. ***UNIVERSITY REGULATIONS*** **- General Academic Regulations (Undergraduate), Classification of Students** notwithstanding, students will require special permission to register for courses while on work terms if the courses are in addition to the prescribed program. Normally, work terms are considered equivalent to a full-time course load with no time for additional course work.

15.5.8.3 Work Term Placement

1. A student is ultimately responsible for securing work term placements. ASMs-CE provide support for the job search and inform students of potential opportunities.
2. A student who applies for admission to the Bachelor of Arts, Economics (Co-operative) degree program gives permission to the University to provide a copy of the student's resume, and university transcript to potential employers.
3. A student who is enrolled in a Co-operative Education program may independently obtain a work term placement, in consultation with the ASM-CE. Such employment positions must satisfy the criteria for work terms, be confirmed in writing by the employer, and be approved by the ASM-CE before the first day of the work term according to the Co-operative Education website.
4. Co-operative students are required to complete professional development seminars offered by the designated ASM-CE.
5. Work terms are normally 12-16 weeks in duration, full-time and paid. Remuneration for work placements is determined by employers based on their internal wage structures. The start and end dates for each work term are shown on the Co-operative Education website.
6. A student must complete the program on an academic semester. A student wishing to change the sequence of the work terms must first consult with the designated ASM-CE and receive written approval from the Head of the Department or delegate.

15.5.8.4 Registration and Evaluation of Performance

1. In Work Terms I, II, and III, a student must register for Economics 299W, 399W, and 499W, respectively.
2. The Work Term evaluations shall consist of two components:
   a. On-the-job Student Performance: Will be assessed by the ASM-CE using information gathered during the Work Term and input from the employer towards the end of the Work Term. Evaluation of the job performance will result in one of the following classifications: OUTSTANDING, ABOVE EXPECTATIONS, SATISFACTORY, MARGINAL PASS, FAIL.
   b. Work Term Assignment(s): One or more work term assignment(s) as outlined in the course syllabus. Evaluation of the Work Term assignment(s) will result in one of the following classifications: OUTSTANDING, ABOVE EXPECTATIONS, SATISFACTORY, MARGINAL PASS, FAIL.

   The evaluation of the on-the-job performance and the work term assignment(s) are recorded separately on the transcript for each work term.

   Overall evaluation of the work term will result in one of the following final grades being awarded:

   - Pass with Distinction (PWD): To receive a PWD, a student must obtain an evaluation of Outstanding in both the communications and work performance components of the work term.
   - Pass (PAS): To receive a PAS, a student must achieve an evaluation of Marginal Pass or better in the communications component and in the performance component of the work term.
   - Fail (FAL): A student receiving a Fail in either the communications or performance component of the work term will receive a FAL. For promotion from the work term, a student must obtain PWD or PAS.

   Students should also refer to the ***UNIVERSITY REGULATIONS*** **- General Academic Regulations (Undergraduate)**. The grades awarded for each work term will be noted on the transcript.
3. A student will not be eligible to continue in the program if the student withdraws from a Work Term subsequent to a job placement without acceptable cause and/or without prior approval from both the ASM-CE and the Head of the Department; fails to honour an agreement to work with an employer; and/or conducts themselves in such a manner as to cause their discharge from the job.

15.5.9 Honours in Economics (Co-operative) (B.A. or B.Sc.)

www.mun.ca/coop

In addition to the regulations outlined below, a student must also meet the requirements set out under the **General Regulations for the B.A. (Honours) Degree Regulations** or **Programs of Study for the Honours Degree of Bachelor of Science**, as well as the Department's Honours in Economics (B.A. or B.Sc.).

15.5.9.1 Eligibility for Admission

See **Major in Economics (Co-operative) (B.A. or B.Sc.), Eligibility for Admission**.

15.5.9.2 Program of Study

1. A Bachelor of Arts(Hons.) student who undertakes an Honours in Economics (Co-operative) shall complete at least 66 credit hours as follows:
   a. Economics 1010 (or the former 2010), 1020 (or the former 2020), 2550, 3000, 3001, 3010, 3011, 3550, 3551, 4120, 4550, 4551, and 4999;
   b. An additional 21 credit hours in Economics at the 3000 or 4000 level;
   c. Economics 299W, 399W, and 499W;
   d. Mathematics 1000; and
   e. Statistics 2500. A student may, with the approval of the Head of the Department or delegate, substitute Statistics 2550 for 2500.
2. A Bachelor of Science(Hons.) student who undertakes an Honours in Economics (Co-operative) shall complete at least 84 credit hours as follows:
   a. Economics 1010 (or the former 2010), 1020 (or the former 2020), 2550, 3000, 3001, 3010, 3011, 3550, 3551, 4120, 4550, 4551, and 4999;
   b. An additional 21 credit hours in Economics at the 3000 or 4000 level;
   c. Economics 299W, 399W, and 499W;
   d. Mathematics 1000, 1001, and 2050;
   e. Statistics 2550 or 2500, and an additional 3 credit hours of Statistics;
   f. Computer Science 1000, and an additional 3 credit hours of Computer Science. With the approval of the Head of the Department or delegate, a student may substitute another 1000-level Computer Science course for Computer Science 1000; and
   g. At least 3 credit hours in an additional science subject other than Mathematics/Statistics, Economics, and Computer Science.
3. A student should refer to **Table 3 Suggested Course Progression for Bachelor of Arts (Honours) in Economics (Co-operative)** or **Table 4 Suggested Course Progression for Bachelor of Science (Honours) in Economics (Co-operative)**.
4. Promotion from each semester requires a grade of 70% in all courses specified in clause 1. or 2. above, as relevant, and a cumulative average of at least 70% in all courses. A student who does not meet these requirements, and/or does not maintain full-time status will not be promoted to the next semester and will be required to withdraw from the program.
5. ***UNIVERSITY REGULATIONS* - General Academic Regulations (Undergraduate), Classification of Students** notwithstanding, a student will require special permission to register for courses while on work terms if the courses are in addition to the prescribed program. Normally, work terms are considered equivalent to a full-time course load with no time for additional course work.

15.5.9.3 Work Term Placement

See Major in Economics (Co-operative) (B.A. or B.Sc.).

15.5.9.4 Registration and Evaluation of Performance

See Major in Economics (Co-operative) (B.A. or B.Sc.).

15.5.10 Suggested Course Progression Tables

Table 1 Suggested Course Progression for Bachelor of Arts Major in Economics (Co-operative)

Year	Courses
1 **(pre-Economics (Co-operative))** **[See Note 1.]**	ECON 1010, 1020 6 credit hours in English (English 1110 is recommended) Mathematics 1000 15 credit hours from courses in the Faculties of Humanities and Social Sciences, Business, or Science
2	ECON 2550, 3000, 3001, 3010, 3550 ECON 299W (Work Term I (typically in Spring semester)) Statistics 2550 12 credit hours in Minor, Core and elective courses [see Notes 2. and 3. below]
3	ECON 3011, 4120, 4550, 4551 ECON 399W (Work Term II (typically in Spring semester)) 18 credit hours in Minor, Core and elective courses [see Notes 2. and 3. below]
4	ECON 499W (Work Term III (typically in Winter semester)) 6 further credit hours in Economics courses 24 credit hours in Minor, Core and elective courses [see Notes 2. and 3. below]

Notes:
1. *Courses listed in Year 1 are required to be eligible for admission to the program.*
2. *A student should refer to the **Core Requirements** as outlined in the **Bachelor of Arts General Degree Components** and ensure that all Core and Minor requirements are satisfied.*
3. *A Minor is required for a B.A. degree in Economics.*

Table 2 Suggested Course Progression for Bachelor of Science Major in Economics (Co-operative)

Year	Courses
1 (pre-Economics (Co-operative)) [See Note 1.]	ECON 1010, 1020 6 credit hours in English (English 1110 is recommended) Mathematics 1000, 1001 12 credit hours in elective courses [see Note 2.]
2	Computer Science 1000 [See Note 3] ECON 2550, 3000, 3001, 3010, 3550 ECON 299W (Work Term I (typically in Spring semester)) Mathematics 2050 Statistics 2550 6 credit hours in elective courses [see Note 2.]
3	ECON 3011, 4120, 4550, 4551 ECON 399W (Work Term II (typically in Spring semester)) 3 further credit hours in Economics courses at the 3000 or 4000 level 3 further credit hours in Statistics courses [see Note 4.] 12 credit hours in elective courses [see Note 2.] 18 credit hours in Minor, Core and elective courses [see Notes 2. and 3. below]
4	3 further credit hours in Computer Science courses [see Note 4.] ECON 499W (Work Term III (typically in Winter semester)) 6 further credit hours in Economics courses at the 3000 or 4000 level 18 credit hours in elective courses [see Note 2.] 3 further credit hours in a Science subject other than Computer Science, Economics, Mathematics, and Statistics

Notes:
1. *Courses listed in Year 1 are required to be eligible for admission to the program.*
2. *Elective courses should be chosen with reference to **Faculty of Science Degree Regulations, Electives**.*
3. *Another 1000-level Computer Science course may be substituted for Computer Science 1000 with the approval of the Head of the Department of Economics.*
4. *The Statistics and Computer Science elective courses may both be taken in either Year 3 or Year 4.*

Table 3 Suggested Course Progression for Bachelor of Arts (Honours) in Economics (Co-operative)

Year	Courses
1 (pre-Economics (Co-operative)) [See Note 1.]	ECON 1010, 1020 6 credit hours in English (English 1110 is recommended) Mathematics 1000 15 credit hours from courses in the Faculties of Humanities and Social Sciences, Business, or Science

Notes:
1. *Courses listed in Year 1 are required to be eligible for admission to the program.*
2. *Elective courses should be chosen with reference to Faculty of Science to **Faculty of Science Degree Regulations - Electives**.*
3. *Another 1000-level Computer Science course may be substituted for Computer Science 1000 with the approval of the Head of the Department of Economics.*
4. *Twenty-one credit hours in electives in Economics shall be chosen in consultation with the Head of Department or delegate.*
5. *The Computer Science and Statistics elective courses may both be taken in either Year 3 or 4.*

15.5.11 Regulations for the International Bachelor of Arts (iBA)

In addition to completing the normal requirements for a Bachelor of Arts and one of a Joint Honours, Honours, Major or Minor in Economics, students may elect to complete requirements for the **International Bachelor of Arts (iBA)**. As part of the minimum 120 credit hours, a student may use eligible credit hours in Economics to jointly satisfy other requirements of the iBA degree. When selecting courses, a student is encouraged to consult with an academic advisor early in the program, to consider **Table 2 Possible Course Sequencing for the International Bachelor of Arts (iBA) (First 60 Credit Hours)**, and to consider Economics courses listed in **Table 3 International Studies (IS) Designated Courses**. Up to 12 credit hours in Economics IS courses may be used towards the **International Studies (IS) Courses Requirement**.

15.6 English

www.mun.ca/english

15.6.1 Department of English Description

In the Department of English students will encounter ideas, both new and old, and texts, both experimental and traditional. Students will read some of the best works in literature and culture, and will engage in provocative conversations about meaning, literary history, the future, identity, and their place in the world. All of the programs offered by the Department of English are designed to help students to think critically, read closely, and to write effectively. It doesn't matter whether students are pursuing a Major, a Minor, or an Honours degree, as they will find a diverse range of courses taught by highly knowledgeable and dynamic professors.

A Bachelor of Arts in English is one of the most versatile degrees a student can obtain because of the universal creative focus achieved through literary study.

The following undergraduate programs are available in the Department of English:

1. Honours in English
2. Joint Honours in English and Another Major Subject
3. Joint Major in English
4. Major in Communication Studies
5. Major in English
6. Major in English with Specialization in Theatre/Drama
7. Minor in Communication Studies
8. Minor in English

15.6.1.1 General Information

1. Students who choose an Honours, Major or Minor degree in English are encouraged to consult with the Head of the Department or the Manager of Academic Programs to receive advice on English course selection.
2. Some courses offered at the Grenfell Campus may not be available in St. John's. Students wishing to move from one Campus to another may have difficulty in completing their program in a timely manner. Students are encouraged to consult with the Head of the Department or the Manager of Academic Programs, so that they may complete their program in a timely manner.
3. Students using ENGL 1020 and 1021 to fulfill the **Language Study Requirement** are required to complete an additional 6 credit hours in the Department of English Critical Reading and Writing courses at the 1000 level in order to fulfill the requirements for the English programs outlined below.

4. English course descriptions are found at the end of the Faculty of Humanities and Social Sciences section under **Course Descriptions, English** and are designated by ENGL.

15.6.2 Bachelor of Arts Degree Requirements

The Bachelor of Arts requires the successful completion of a minimum of 120 credit hours. A student must meet the requirements for a departmental Major, Minor, or Honours program and also meet the **Program Regulations – General and Honours Degrees** for the Faculty of Humanities and Social Sciences. A student is therefore advised to consult with the **Admission to the Bachelor of Arts General Degree Programs** regulations, the **Program Regulations - General and Honours Degrees** which also includes the **Bachelor of Arts General Degree Components**, **The Major Program**, and **The Minor Program** regulations. Information regarding honours programs is available at **Bachelor of Arts (Honours) Degree Regulations** as well as under each department's regulations.

A student is strongly encouraged to consult with an academic advisor to discuss available programs and requirements in the Faculty of Humanities and Social Sciences including the **Core Requirements**, **The Major Program**, **The Minor Program**, and the **Bachelor of Arts (Honours) Degree Regulations**. A student is advised to declare a program of study, including a Major and a Minor, before completing the first 45 credit hours of study. Information about declaring a Major and Minor in the Faculty of Humanities and Social Sciences is available at www.mun.ca/hss/programs/undergraduate/ideclare.php. Information regarding advisors for the Faculty of Humanities and Social Sciences is available at www.mun.ca/hss/about/contact/liaisons.php.

15.6.3 General Degrees

15.6.3.1 Major in English

1. The Major requires 36 credit hours in English, which shall include:
   a. 3 credit hours chosen from English 1090 or 1000 (or the former 1080), and 3 credit hours chosen from English 1001, 1110, 1191, 1192, 1193 (or one of the former 1101, 1102, or 1103);
   b. English 2000;
   c. English 2001;
   d. English 3200 or 3201;
   e. 6 credit hours at the 4000-level;
   f. an additional 6 credit hours at the 3000-level or above; and
   g. an additional 9 credit hours at the 2000-level or above.
   h. Of the 36 credit hours required for the Major above, 3 credit hours must be in Canadian Literature, and 3 credit hours must be in American Literature, as listed in **Table 1 English Courses to Fulfill Requirements for the Minor, Major, and Honours Programs in English**.

15.6.3.2 Major in English with Specialization in Theatre/Drama

1. The Major requires 36 credit hours in English, which shall include:
   a. 3 credit hours chosen from English 1090 or 1000 (or the former 1080), and 3 credit hours chosen from English 1001, 1110, 1191, 1192, 1193 (or one of the former 1101, 1102, or 1103);
   b. English 2000;
   c. English 2002;
   d. English 2450;
   e. English 2451;
   f. English 3021 or 3022;
   g. English 3200 or 3201;
   h. English 4300 or 4301;
   i. English 4400;
   j. English 4401; and
   k. 3 credit hours chosen from English 3156, 3171, 3260, 3849, 4302.

15.6.3.3 Minor in English

1. The Minor requires 27 credit hours in English, which shall include:
   a. 3 credit hours chosen from English 1090 or 1000 (or the former 1080), and 3 credit hours chosen from English 1001, 1110, 1191, 1192, 1193 (or one of the former 1101, 1102, or 1103);
   b. English 2000;
   c. English 2001;
   d. 3 credit hours chosen from English 2002, 2003, 2004;
   e. English 3200 or 3201;
   f. an additional 3 credit hours at the 3000-level or above; and
   g. an additional 6 credit hours at the 2000-level or above.
   h. Of the 27 credit hours required for the Minor above, 3 credit hours must be in Canadian Literature, as listed in **Table 1 English Courses to Fulfill Requirements for the Minor, Major, and Honours Programs in English**.

15.6.3.4 Joint Major in English

As an alternative to a Minor or a double Major, a student may choose to complete a **Joint Major in English** and a Major in another program in the Faculty of Humanities and Social Sciences. The Joint Major Program requires 3 fewer credit hours in each participating Major as prescribed in each program's Calendar entry. For the joint Major in English, 3 fewer credit hours shall be required to fulfill clause 1.g of the **Major in English** above.

15.6.4 Honours Degrees

An Honours degree in English is generally required for admission to a graduate program in the discipline.

15.6.4.1 Admission to Honours Program

Students wishing to pursue an Honours program in English must apply for admission to the Manager of Academic Programs or the Head of Department. To be eligible for the Honours program, students normally must have a minimum of 70% in each English course or a cumulative average of 75% or higher in all completed undergraduate courses. Admission to the program is in accordance with ***UNIVERSITY REGULATIONS*** and the **Bachelor of Arts (Honours Degree) Regulations**. It is strongly recommended that students have completed at least 15 credit hours, including 6 credit hours in English at the 1000 level (excluding English 1020 and 1021), English 2000, 2001, and 3200 or 3201 before applying.

15.6.4.2 Honours Degree with English as Major Subject

1. Students who choose to complete an Honours Bachelor of Arts in English must complete 60 credit hours in English courses.
2. In their final year, all Honours English students will be required to complete an Honours Essay (English 4999) and achieve a minimum grade of 70%. The semester before they plan to undertake their Honours Essay, students must receive approval of their chosen topic from the Head of the Department, who will then appoint an appropriate supervisor.
3. Any course that considers more than one national literature or period fulfills only one requirement for the Honours degree in English.
4. The 60 credit hours shall include:
   a. 3 credit hours chosen from English 1090 or 1000 (or the former 1080), and 3 credit hours chosen from English 1001, 1110, 1191, 1192, 1193 (or one of the former 1101, 1102, or 1103);
   b. English 2000;
   c. English 2001;
   d. English 2122 or 3160;
   e. English 2160;
   f. English 3200 or 3201;
   g. English 4100;
   h. English 4101;
   i. English 4900 or 4901;
   j. 3 credit hours chosen from English 2600, 3002, 3006, 3021, 3500, 3600, 3828, 4600, 4601;
   k. an additional 3 credit hours in pre-19th-century literature;
   l. 3 credit hours in 19th-century literature;
   m. English 4999; and
   n. an additional 18 credit hours in English courses at the 2000 level or above, including 3 credit hours at the 3000 level or above and 6 credit hours at the 4000 level. Of these 18 credit hours, 3 credit hours must be in Canadian Literature (excluding English 2160) and 3 credit hours must be in American Literature (excluding English 2160), as listed in **Table 1 English Courses to Fulfill Requirements for the Minor, Major, and Honours Programs in English**.
   o. Of the 60 credit hours required for the Honours above, at least 36 of these credit hours must be at the 3000-level or above.

15.6.4.3 Joint Honours Degree in English and Another Major Subject

See **Bachelor of Arts (Honours Degree) Regulations**.

1. A student's program for Joint Honours must be approved by each Head of Department and conform to the Faculty of Humanities and Social Sciences General Regulations for **Joint Honours** degrees.
2. Any course that considers more than one national literature or period fulfills only one requirement for the Honours degree in English.
3. Students must choose to write their Honours Essay in only one of the two departments involved in their Joint Honours. Honours students who choose to complete English 4999 must achieve a minimum grade of 70%.
4. The 45 credit hours shall include:
   a. 3 credit hours chosen from English 1090 or 1000 (or the former 1080), and 3 credit hours chosen from English 1001, 1110, 1191, 1192, 1193 (or one of the former 1101, 1102, or 1103);
   b. English 2000;
   c. English 2001;
   d. 3 credit hours chosen from English 2122, 2160, or 3160;
   e. English 3200 or 3201;
   f. English 4100;
   g. English 4101;
   h. English 4900 or 4901;
   i. an additional 3 credit hours in pre-19th-century literature;
   j. 3 credit hours in 19th-century literature; and
   k. 12 credit hours in additional English courses at the 2000-level or above, 3 credit hours of which must be at the 3000-level or above and 6 credit hours of which must be at the 4000-level.
   l. Of the 45 credit hours required for the Joint Honours above, 3 credit hours must be in Canadian Literature (excluding English 2160, if previously completed to fulfill the requirements in 6.d above) as listed in **Table 1 English Courses to Fulfill Requirements for the Minor, Major, and Honours Programs in English**.
   m. Of the 45 credit hours required for the Joint Honours above, at least 27 credit hours must be at the 3000-level or above.

15.6.5 Courses to Fulfill Requirements for the Minor, Major, and Honours Programs in English

Table 1 English Courses to Fulfill Requirements for the Minor, Major, and Honours Programs in English

Level	Canadian Literature	American Literature	Pre-19th Century	19th Century	20th and 21st Century
2000-Level	2150, 2151, 2160	2160, the former 2213, the former 2214, 2216, 2217, 2218	2600	2211, the former 2214	2122, 2150, 2151, 2212, the former 2213, 2811, 2813, 2815, 2850, 2851
3000-Level	3152, 3153, 3155, 3156, 3157, 3158, 3820, 3848	3260, 3261, 3262, 3263, 3265, 3848	3001, 3002, 3006, 3021, 3022, 3130, 3190, 3600, 3710, 3715, 3819, 3828	3152, 3160, 3161, 3172, 3175, 3190, 3710, 3711, 3819, 3830	3009, 3100, 3152, 3153, 3155, 3156, 3157, 3158, 3160, 3161, 3172, 3175, 3190, 3260, 3265, 3711, 3713, 3714, 3811, 3819, 3820, 3830, 3843, 3844, 3848
4000-Level	4821, 4822, 4850, 4851, 4852- 4860	the former 4251, the former 4260, 4261, the former 4270, 4271, 4272	4000, 4010, 4030, 4040, 4041, 4050, 4051, 4210, 4211, 4271, 4500, the former 4501, 4600, 4601	4001, 4050, 4051, 4060, 4061, 4070, the former 4251, the former 4260, 4271, 4300, the former 4805, 4817, 4821, 4851	4001, 4070, 4071, 4080, 4101, the former 4261, the former 4270, 4272, 4300, 4301, 4302, 4810, 4817, 4819, 4821, 4822, 4843, 4850

15.6.6 Major and Minor in Communication Studies

The Major and Minor in Communication Studies are administered by the Department of English

The Major and Minor in Communication Studies draws upon a variety of disciplines to provide students with a critical understanding of the role media and communication technologies play in culture and society. Courses focus on the analysis of media and communication technologies, the mass circulation of ideas and information, the relationship between communication and society, and the transformation of mass forms of popular culture. In addition to exploring the historical developments of media and communication, these programs introduce students to emerging theoretical and methodological approaches to the study of contemporary media. Core courses in Communication Studies provide students with knowledge of key traditions in communication studies and cover a series of critical themes that are intended to guide students throughout the program.

As per the **Degree Regulations, General and Honours Degrees, The Major Program, Major Programs of Study**, students completing a Major in Communication Studies are ineligible for an interdisciplinary Minor in any program.

Communication Studies course descriptions are found at the end of the Faculty of Humanities and Social Sciences section under **Course Descriptions, English, Communication Studies** and are designated by CMST.

15.6.6.1 Advising

Due to the nature of interdisciplinary programming, students must carefully plan their course selection and regularly consult with the program's designated academic advisor. Questions about the delivery of a course should be directed to the appropriate academic unit. Information regarding advisors for the Faculty of Humanities and Social Sciences is available at www.mun.ca/hss/about/contact/liaisons.php.

15.6.6.2 Declaring the Major or Minor in Communication Studies

Students wishing to declare a Major or Minor in Communication Studies shall consult with the program's designated academic advisor to discuss the requirements of the program. Information about declaring a program of study in the Faculty of Humanities and Social Sciences is available at www.mun.ca/hss/programs/undergraduate/ideclare.php.

15.6.6.3 Regulations for the Major in Communication Studies

A Major in Communication Studies consists of all of the requirements of the Bachelor of Arts program, including a minimum of 36 credit hours in courses in **Table 1 Core Faculty of Humanities and Social Sciences Courses Approved for the Major in Communication Studies** below, as follows:

1. 18 credit hours in courses designated as Communication Studies, including 2000, 2001, 3000, 4000; and
2. 18 additional credit hours chosen from **Table 1 Core Faculty of Humanities and Social Sciences Courses Approved for the Major in Communication Studies**. This may include up to 6 credit hours in non-Communication Studies courses eligible for the **Certificate in Film Studies** chosen from **Table 1 Faculty of Humanities and Social Sciences Courses for the Certificate in Film Studies**.
3. Of the 36 total credit hours, a minimum of 15 must be at the 3000 level or above, including at least 6 credit hours at the 4000 level.
4. Students should normally enroll in the Communication Studies (CMST) section of any applicable crosslisted courses.

15.6.6.4 Regulations for the Minor in Communication Studies

Students who choose to complete a Minor in Communication Studies must complete at least 24 credit hours in Communication Studies as follows:

1. CMST 2000; 2001; 3000; 4000;
2. 3 credit hours chosen from: CMST 2100, 2813, 3010-3020, 3816, 3913, 4001, 4003, 4010-4020, 4402 or 4844, 4700; and
3. 9 credit hours in additional Communication Studies courses from **Table 1 Core Faculty of Humanities and Social Sciences Courses Approved for the Major and Minor in Communication Studies**.
4. A minimum of 9 credit hours must come from the 3000 level or above.
5. Students should normally enroll in the Communication Studies (CMST) section of any applicable crosslisted courses.

15.6.6.5 Course List

Not all courses are necessarily offered each year. Students must be careful not to register for different designations of the same course

that is cross-listed with different departments. Normal departmental prerequisites for courses are applicable.

Table 1 Core Faculty of Humanities and Social Sciences Courses Approved for the Major and Minor in Communication Studies

1000 and 2000 Level Courses	3000 Level Courses	4000 Level Courses
CMST 2000, 2001, 2100 CMST 2813 or English 2813 Linguistics 1100 Philosophy 2140 or the former 2582 Philosophy 2360 or the former 3620 Religious Studies 2812 Sociology 2210	Anthropology 3630 or Sociology 3630 CMST 3000, 3001 CMST 3010-3020 CMST 3816 or the former English 3816 CMST 3913 or English 3913 English 3843, 3912 Folklore 3612, 3930 Political Science 3350, 3860	CMST 4000, 4001, 4002, 4003, 4010-4020, 4402 or the former English 4402, 4700, 4844 or English 4844 Sociology 4107

15.6.6.6 Previous Calendar Regulations

In accordance with ***UNIVERSITY REGULATIONS*** **- Degree and Departmental Regulations, Year of Degree and Departmental Regulations - Faculty of Humanities and Social Sciences and Faculty of Science**, candidates for a Major in Communication Studies will normally follow regulations in effect in the academic year in which the student first successfully completes a course in that subject at the 2000-level or above which may be applied to the major or minor program respectively. However, the student may elect to follow subsequent regulations introduced during the student's tenure in a program. These "grandparented" students are encouraged to consult the program's designated academic advisor for assistance with course selection.

In the case of departmental regulations for a major or minor, a student will normally follow regulations in effect in the academic year in which the student first successfully completes a course in that subject at the 2000 level or above which may be applied to the major or minor program respectively. However, the student may elect to follow subsequent regulations introduced during the student's tenure in a program.

15.6.7 Regulations for the International Bachelor of Arts (iBA)

In addition to completing the normal requirements for a Bachelor of Arts and one of a Joint Honours, Honours, Major or Minor in English, students may elect to complete requirements for the **International Bachelor of Arts (iBA)**. As part of the minimum 120 credit hours, a student may use eligible credit hours in English to jointly satisfy other requirements of the iBA degree. When selecting courses, a student is encouraged to consult with an academic advisor early in the program, to consider **Table 2 Possible Course Sequencing for the International Bachelor of Arts (iBA) (First 60 Credit Hours)**, and to consider English courses listed in **Table 3 International Studies (IS) Designated Courses**. Up to 12 credit hours in English IS courses may be used towards the **International Studies (IS) Courses Requirement**. Information regarding advisors for the Faculty of Humanities and Social Sciences is available at www.mun.ca/hss/about/contact/liaisons.php.

15.6.8 Diploma in Creative Writing

The Department of English administers the **Diploma in Creative Writing**. Credit hours in English may be eligible to jointly fulfill requirements of a degree and a diploma. For further information about this program, see **Diploma Programs Offered in the Faculty of Humanities and Social Sciences**, or contact the Program Director.

15.6.9 Former Diploma in Performance and Communications Media

The Department of English administers the **Diploma in Stage and Screen Technique**. Credit hours in English may be eligible to jointly fulfill requirements of a degree and a diploma. For further information about this program, see **Diploma Programs Offered in the Faculty of Humanities and Social Sciences**, or contact the Program Director.

15.6.10 Certificate in Film Studies

The Department of English administers the **Certificate in Film Studies**. Credit hours in English and Communications Studies may be eligible to jointly fulfill requirements of a degree and a certificate. For further information about this program, see **Certificate Programs Offered in the Faculty of Humanities and Social Sciences**, or contact the Program Director.

15.7 Folklore

www.mun.ca/folklore

The discipline of Folklore is a diverse examination of informal culture. Its subjects include stories, music, dance, drama, architecture, material culture, celebrations and patterns of belief, as well as customs related to work, leisure, childhood, family, aging, individuality and community.

Folklore explores these customs as dynamic relationships between old ideas and new, individual creation and collective acceptance, local and global influences. And because folklore concerns the everyday, intimate practices of people, ethnographic field research is a vital part of its practice.

Folklore course descriptions are found at the end of the Faculty of Humanities and Social Sciences section under **Course Descriptions, Folklore** and are designated by FOLK.

15.7.1 Bachelor of Arts Degree Requirements

The Bachelor of Arts requires the successful completion of a minimum of 120 credit hours. A student must meet the requirements for a departmental Major, Minor, or Honours program and also meet the **Program Regulations – General and Honours Degrees** for the Faculty of Humanities and Social Sciences. A student is therefore advised to consult with the **Admission to the Bachelor of Arts General Degree Programs** regulations, the **Program Regulations - General and Honours Degrees** which also includes the **Bachelor of Arts General Degree Components**, **The Major Program**, and **The Minor Program** regulations. Information regarding honours programs is available at **Bachelor of Arts (Honours) Degree Regulations** as well as under each department's regulations.

A student is strongly encouraged to consult with an academic advisor to discuss available programs and requirements in the Faculty of Humanities and Social Sciences including the **Core Requirements**, **The Major Program**, **The Minor Program**, and the **Bachelor of Arts (Honours) Degree Regulations**. A student is advised to declare a program of study, including a Major and a Minor, before completing the first 45 credit hours of study. Information about declaring a Major and Minor in the Faculty of Humanities and Social Sciences is available at www.mun.ca/hss/programs/undergraduate/ideclare.php. Information regarding advisors for the Faculty of

Humanities and Social Sciences is available at www.mun.ca/hss/about/contact/liaisons.php.

15.7.2 General Degree

Folklore 1000 is the prerequisite for all other courses in Folklore, except Folklore 1050, Folklore 1060, and those courses cross-listed with other Departments.

15.7.3 Major in Folklore

A student registered to major in Folklore must take a minimum of 36 credit hours in courses as follows:

1. 18 required credit hours: 1000 (or the former 2000), 2100, 2300, 2401, 2500, 4470;
2. 6 credit hours from Group A - Folk Literature Genres: 3100, 3200, 3250, 3300, 3450, 3612, 3618;
3. 6 credit hours from Group B - Folklife Genres: 3001, 3350, the former 3591, 3606, 3650, 3700, 3713, 3820, 3830, 3850, 3860, 4460; and
4. 6 credit hours from Group C - Topics: not more than 3 of which can be taken from courses at the 1000 level: 1060, 2230, 2700, 2800, 3350, 3360, 3460, the former 3591, 3601, 3613, 3618, 3700, 3714, the former 3900, 3910, 3920, 3930, 3950, 4015, 4100, 4310, 4400, 4410, 4420, 4440, 4480, 4810.

Students who declare a major in Folklore should have successfully completed Folklore 1000 (or the former 2000); it is recommended that students intending to major in Folklore take Folklore 2100 as early in their programs as possible.

All students who major in Folklore will be assisted by a faculty advisor who will help them in planning their academic program. Consequently, it is essential that students consult with the Department at an early stage in their studies.

15.7.4 Minor in Folklore

A student declaring a minor in Folklore must take a minimum of 24 credit hours including:

1. 15 required credit hours: 1000 (or the former 2000), 2100, 2300, 2401, 2500; and
2. 9 additional credit hours in Folklore - not more than 3 of which can be taken from courses at the 1000 level.

Students who declare a minor in Folklore should have successfully completed Folklore 1000 (or the former 2000); it is recommended that students intending to minor in Folklore take Folklore 2100 as early in their programs as possible.

15.7.5 Joint Major in Folklore

As an alternative to a minor, a student may choose to complete a major in Folklore and a major in another eligible program in the Faculty of Humanities and Social Sciences. The Joint Major Program requires 3 fewer credit hours in each participating major as prescribed in each program's Calendar entry. For the joint major in Folklore, 3 fewer credit hours shall be required from any one of Group A (Folk Literature Genres), Group B (Folklife Genres) or Group C (Topics) to fulfill the **Major in Folklore** above.

15.7.6 Honours Degree in Folklore

See **General Regulations for Honours Degree**. An Honours student in Folklore must complete a minimum of 60 credit hours, which must include at least 36 credit hours at the 3000-level or above, and including the 36 as prescribed for the Major in Folklore. The remaining courses will normally include one of the following options:

1. Folklore 400X
2. Folklore 4998
3. Folklore 4999

15.7.7 Joint Honours Degree in Folklore and Another Major Discipline

See **General Regulations for Honours Degrees**. A minimum of 84 credit hours in the two subjects selected, with the approval of the Heads of both Departments, is required.

Of the credit hours required in the two subjects selected, not fewer than 42, and not more than 51, must come from each discipline. The student may choose the discipline in which to complete the Honours Essay or the Comprehensive Examination. If the student chooses the 400X option, the Folklore component will consist of the major in Folklore plus 400X, for a maximum of 51 credit hours in Folklore. Students are advised to choose an option as soon as possible after declaring the second subject of the Joint Honours degree.

15.7.8 Regulations for the International Bachelor of Arts (iBA)

In addition to completing the normal requirements for a Bachelor of Arts and one of a Joint Honours, Honours, Major or Minor in Folklore, students may elect to complete requirements for the **International Bachelor of Arts (iBA)**. As part of the minimum 120 credit hours, a student may use eligible credit hours in Folklore to jointly satisfy other requirements of the iBA degree. When selecting courses, a student is encouraged to consult with an academic advisor early in the program, to consider **Table 2 Possible Course Sequencing for the International Bachelor of Arts (iBA) (First 60 Credit Hours)**, and to consider Folklore courses listed in **Table 3 International Studies (IS) Designated Courses**. Up to 12 credit hours in Folklore IS courses may be used towards the **International Studies (IS) Courses Requirement**.

15.7.9 Certificate in Newfoundland and Labrador Studies

The Department of Folklore administers the **Certificate in Newfoundland and Labrador Studies**. Credit hours in Folklore may be eligible to jointly fulfill requirements of a degree and a certificate. For further information about this program, see **Certificate Programs Offered in the Faculty of Humanities and Social Sciences**, or contact the Program Director.

15.8 Gender Studies

www.mun.ca/genderstudies

15.8.1 Department of Gender Studies Description

Gender Studies is an academic area of study that critically examines how gender shapes our identities, our social interactions and our world. Through exposure to interdisciplinary perspectives, students develop frameworks for thinking about power relations and the ways that those relations are shaped and challenged by intersecting constructions of gender, race, class, sexuality, ability, age and nationality. Gender Studies examines everyday experiences, social and political institutions, literary and philosophical contributions, and historical and contemporary issues and events. The discipline provides students with tools to engage with and critically analyze these areas.

The following undergraduate programs are available in the Department of Gender Studies:

1. Major in Gender Studies
2. Minor in Gender Studies

Gender Studies course descriptions are found at the end of the Faculty of Humanities and Social Sciences section under **Course Descriptions, Gender Studies** and are designated by GNDR.

15.8.2 Bachelor of Arts Degree Requirements

The Bachelor of Arts requires the successful completion of a minimum of 120 credit hours. A student must meet the requirements for a departmental Major, Minor, or Honours program and also meet the **Program Regulations – General and Honours Degrees** for the Faculty of Humanities and Social Sciences. A student is therefore advised to consult with the **Admission to the Bachelor of Arts General Degree Programs** regulations, the **Program Regulations - General and Honours Degrees** which also includes the **Bachelor of Arts General Degree Components**, **The Major Program**, and **The Minor Program** regulations. Information regarding honours programs is available at **Bachelor of Arts (Honours) Degree Regulations** as well as under each department's regulations.

A student is strongly encouraged to consult with an academic advisor to discuss available programs and requirements in the Faculty of Humanities and Social Sciences including the **Core Requirements**, **The Major Program**, **The Minor Program**, and the **Bachelor of Arts (Honours) Degree Regulations**. A student is advised to declare a program of study, including a Major and a Minor, before completing the first 45 credit hours of study. Information about declaring a Major and Minor in the Faculty of Humanities and Social Sciences is available at www.mun.ca/hss/programs/undergraduate/ideclare.php. Information regarding advisors for the Faculty of Humanities and Social Sciences is available at www.mun.ca/hss/about/contact/liaisons.php.

15.8.3 Major Program Regulations

Students who undertake a Major in Gender Studies must complete a minimum of 36 credit hours in Gender Studies, including:

1. 6 credit hours in Gender Studies 1000 and 1005;
2. 6 credit hours at the 2000 level including Gender Studies 2006;
3. 12 credit hours at the 3000 level including Gender Studies 3005 or Gender Studies 3025, and Gender Studies 3008;
4. 6 credit hours at the 4000 level including Gender Studies 4001; and
5. 6 additional credit hours at the 2000 level or above.

Students declaring a major in Gender Studies are expected to have successfully completed at least 9 credit hours in Gender Studies courses at the 1000 and 2000 level before registering in courses at the 3000 level, and 3 credit hours at the 3000 level before registering in a course at the 4000 level. Students should pay particular attention to necessary prerequisites when scheduling courses.

15.8.4 Minor Program Regulations

Students who minor in Gender Studies must complete a minimum of 24 credit hours in Gender Studies including:

1. 3 credit hours in Gender Studies 1000;
2. 6 credit hours at the 2000 level including Gender Studies 2006;
3. 9 credit hours at the 3000 level including Gender Studies 3005 or Gender Studies 3025, and Gender Studies 3008;
4. 3 credit hours at the 4000 level; and
5. 3 additional credit hours at the 2000 level or above.

Students declaring a minor in Gender Studies are expected to have successfully completed at least 6 credit hours in Gender Studies courses at the 1000 and 2000 level before registering in courses at the 3000 level, and 3 credit hours at the 3000 level before registering in a course at the 4000 level. Students should pay particular attention to necessary prerequisites when scheduling courses. Prerequisites may be waived at the discretion of the instructor.

15.8.5 Regulations for the International Bachelor of Arts (iBA)

In addition to completing the normal requirements for a Bachelor of Arts and one of a Major or Minor in Gender Studies, students may elect to complete requirements for the **International Bachelor of Arts (iBA)**. As part of the minimum 120 credit hours, a student may use eligible credit hours in Gender Studies to jointly satisfy other requirements of the iBA degree. When selecting courses, a student is encouraged to consult with an academic advisor early in the program, to consider **Table 2 Possible Course Sequencing for the International Bachelor of Arts (iBA) (First 60 Credit Hours)**, and to consider Gender Studies courses listed in **Table 3 International Studies (IS) Designated Courses**. Up to 12 credit hours in Gender Studies IS courses may be used towards the **International Studies (IS) Courses Requirement**.

15.8.6 Previous Calendar Regulations

In accordance with ***UNIVERSITY REGULATIONS*** **- Degree and Departmental Regulations, Year of Degree and Departmental Regulations - Faculty of Humanities and Social Sciences and Faculty of Science**, students for the Major or Minor in Gender Studies will normally follow regulations in effect in the academic year in which the student first successfully completes a course in that subject at the 2000 level or above which may be applied to the Major or Minor Program respectively. However, the student may elect to follow subsequent regulations introduced during the student's tenure in a program. These "grandparented" students are encouraged to consult the program's designated academic advisor for assistance with course selection.

15.9 Geography

www.mun.ca/geog

15.9.1 Department of Geography Description

Geography focuses on people, environments, and their interactions from local to global scales, integrating numerous physical and social sciences. As a spatial discipline, geographers study distributions and relationships among all natural and human features of Earth: climate, landscapes, populations, resources, and communities. Key questions that interest us include: Are we using resources sustainably? What are the impacts of changing environments on communities? How can we interpret the spatial distribution of economic, political and social activity? Memorial University of Newfoundland's Geographers are planners, researchers, educators, and decision makers focused on questions relevant to all life on Earth.

The following undergraduate programs are available in the Department of Geography:

1. Major in Geography (B.A. or B.Sc.)
2. Honours in Geography (B.A. or B.Sc.)
3. Minor in Geography
4. Joint Programs
5. Focus Area in Geography
6. Diploma in Geographic Information Sciences

Geography course descriptions are found at the end of the Faculty of Humanities and Social Sciences section under **Course Descriptions, Geography** and are designated by GEOG.

15.9.2 Bachelor of Arts Degree Requirements

The Bachelor of Arts requires the successful completion of a minimum of 120 credit hours. A student must meet the requirements for a departmental Major, Minor, or Honours program and also meet the **Program Regulations – General and Honours Degrees** for the Faculty of Humanities and Social Sciences. A student is therefore advised to consult with the **Admission to the Bachelor of Arts General Degree Programs** regulations, the **Program Regulations - General and Honours Degrees** which also includes the **Bachelor of Arts General Degree Components**, **The Major Program**, and **The Minor Program** regulations. Information regarding honours programs is available at **Bachelor of Arts (Honours) Degree Regulations** as well as under each department's regulations.

A student is strongly encouraged to consult with an academic advisor to discuss available programs and requirements in the Faculty of Humanities and Social Sciences including the **Core Requirements**, **The Major Program**, **The Minor Program**, and the **Bachelor of Arts (Honours) Degree Regulations**. A student is advised to declare a program of study, including a Major and a Minor, before completing the first 45 credit hours of study. Information about declaring a Major and Minor in the Faculty of Humanities and Social Sciences is available at www.mun.ca/hss/programs/undergraduate/ideclare.php. Information regarding advisors for the Faculty of Humanities and Social Sciences is available at www.mun.ca/hss/about/contact/liaisons.php.

15.9.3 Major in Geography (B.A. or B.Sc.)

1. Students may complete a Major in Geography as part of either a B.A. or B.Sc. program. See the **Regulations for the General Degree of Bachelor of Arts** and **Degree Regulations** for the General Degree of Bachelor of Science as appropriate.
2. All students who major in Geography shall consult with their assigned faculty advisor, or the Head of the Department, who will help them in planning their academic program. For this purpose, it is essential that students declare their major at an early stage of their studies.
3. The Major in Geography consists of 45 credit hours in Geography courses including:
   a. 1050;
   b. 2001, 2102, 2195, 2302, 2425;
   c. 3222;
   d. 3228; or the former 2226 and 3226;
   e. 9 additional credit hours from courses at the 3000-level;
   f. 490A and 490B;
   g. at least 6 additional credit hours chosen from courses at the 4000-level; and
   h. further credit hours in courses at the 3000-level or above, to fulfil the required 45 credit hours in Geography courses.
4. B.Sc. students must complete 15 credit hours in science courses outside Geography at the 2000-level or above.

15.9.4 Honours in Geography (B.A. or B.Sc.)

1. Students intending to take an Honours degree in Geography must apply for entry to the Honours program through the Office of the Registrar.
2. Students accepted in the Honours program must:
   a. comply with the **Regulations for the Honours Degree of Bachelor of Arts** or **Degree Regulations** for the Honours Degree of Bachelor of Science as appropriate; and
   b. arrange their program in consultation with the Head of the Department.
3. For the Honours Degree, a student will be required to have completed at least 60 credit hours in courses in Geography, including:
   a. 45 credit hours in courses as listed under Major in Geography;
   b. Geography 3230, 490A, 490B, and 4999; and
   c. 6 additional credit hours at the 4000-level.

15.9.5 Minor in Geography

The Minor in Geography consists of 24 credit hours in Geography courses, including:

1. 1050, 2001, 2102, 2195, 2302, 2425; and 6 credit hours in electives taken from Geography courses at the 3000- or 4000- level, or
2. the former 1000 and 1001, or 1010 and 1011; 2001, 2102, 2195, 2302, 2425; and 3 credit hours in electives taken from Geography

courses at the 3000- or 4000- level.

15.9.6 Joint Programs

Regulations for the Joint Honours in Computer Science and Geography, Joint Honours in Geography/Earth Sciences, and Joint Major in Computer Science and Geography are found under the heading **Joint Program Regulations** in the entry for the Faculty of Science.

Students who wish to take a Joint Major or a Joint Honours in Geography and another subject must arrange their program in consultation with the heads of the Departments concerned, and comply with the General Regulations of the appropriate Faculty.

15.9.6.1 Bachelor of Arts

As an alternative to a minor in the B.A., a student may choose to complete a major in Geography and a major in another eligible program in the Faculty of Humanities and Social Sciences. The Joint Major Program requires 3 fewer credit hours in each participating major as prescribed in each program's Calendar entry. The joint major in Geography requires successful completion of Geography 1050, 2001, 2102, 2195, 2302, 2425, 3222, 3228, 490A, 490B, 9 additional credit hours at the 3000-level, and 6 additional credit hours at the 4000-level.

15.9.6.2 Bachelor of Science

Regulations for the Joint Honours in Computer Science and Geography, Joint Honours in Geography/Earth Sciences, and Joint Major in Computer Science and Geography are found under the heading **Joint Program Regulations** in the entry for the Faculty of Science.

Students who wish to take a Joint Major or a Joint Honours in Geography and another subject must arrange their program in consultation with the heads of the Departments concerned, and comply with the General Regulations of the appropriate Faculty.

15.9.7 Regulations for the International Bachelor of Arts (iBA)

In addition to completing the normal requirements for a Bachelor of Arts and one of a Joint Honours, Honours, Major or Minor in Geography, students may elect to complete requirements for the **International Bachelor of Arts (iBA)**. As part of the minimum 120 credit hours, a student may use eligible credit hours in Geography to jointly satisfy other requirements of the iBA degree. When selecting courses, a student is encouraged to consult with an academic advisor early in the program, to consider **Table 2 Possible Course Sequencing for the International Bachelor of Arts (iBA) (First 60 Credit Hours)**, and to consider Geography courses listed in **Table 3 International Studies (IS) Designated Courses**. Up to 12 credit hours in Geography IS courses may be used towards the **International Studies (IS) Courses Requirement**.

15.9.8 Focus Area in Geography - Bachelor of Education (Primary/Elementary)

The focus area in Geography is applicable only to the Bachelor of Education Primary/Elementary degree programs offered by the Faculty of Education. See **Focus Areas** under the Faculty of Education for program details.

15.9.9 Diploma in Geographic Information Sciences

The Department of Geography administers the **Diploma in Geographic Information Sciences**. Credit hours in Geography may be eligible to jointly fulfill requirements of a degree and a diploma. For further information about this program, see **Diploma Programs Offered in the Faculty of Humanities and Social Sciences**, or contact the Program Director.

15.10 History

www.mun.ca/history

15.10.1 Department of History Description

History is the study of past societies through the critical examination of available evidence including texts, words and objects. The Department of History offers students the opportunity to study both the distant and recent past by exploring a variety of different topics and themes. The analytical skills integral to studying history - essentially how people interacted with one another and their built and natural environments - provide students with opportunities to develop critical thinking and writing proficiencies in addition to an appreciation of past cultures and societies.

History course descriptions are found at the end of the Faculty of Humanities and Social Sciences section under **Course Descriptions, History** and are designated by HIST.

The following programs are offered in the Department of History:

1. **Major in History**
2. **Minor in History**
3. **Joint Major in History**
4. **Honours in History**

15.10.2 Bachelor of Arts Degree Requirements

The Bachelor of Arts requires the successful completion of a minimum of 120 credit hours. A student must meet the requirements for a departmental Major, Minor, or Honours program and also meet the **Program Regulations – General and Honours Degrees** for the Faculty of Humanities and Social Sciences. A student is therefore advised to consult with the **Admission to the Bachelor of Arts General Degree Programs** regulations, the **Program Regulations - General and Honours Degrees** which also includes the **Bachelor of Arts General Degree Components**, **The Major Program**, and **The Minor Program** regulations. Information regarding honours programs is available at **Bachelor of Arts (Honours) Degree Regulations** as well as under each department's regulations.

A student is strongly encouraged to consult with an academic advisor to discuss available programs and requirements in the Faculty of Humanities and Social Sciences including the **Core Requirements**, **The Major Program**, **The Minor Program**, and the **Bachelor of Arts (Honours) Degree Regulations**. A student is advised to declare a program of study, including a Major and a Minor, before completing the first 45 credit hours of study. Information about declaring a Major and Minor in the Faculty of Humanities and Social Sciences is available at www.mun.ca/hss/programs/undergraduate/ideclare.php. Information regarding advisors for the Faculty of Humanities and Social Sciences is available at www.mun.ca/hss/about/contact/liaisons.php.

15.10.3 General Degree

1. Students should consult the **Regulations for the General Degree of Bachelor of Arts** in addition to the regulations listed below.

2. Any one of History 1005, 1009-1015 forms the introduction to the practice of history. Third and fourth-year students taking History courses as electives or to satisfy **Regulations for the General Degree of Bachelor of Arts** are encouraged to enrol in the Department's second-year courses.
3. All students who major in History will be assisted by a faculty advisor who will help them in planning their academic programs. It is essential that students register with the Department at an early stage of their studies.

15.10.3.1 Major in History

Students who undertake a Major in History must complete 36 credit hours in History, including:

1. 3 credit hours in a course beginning with the initial digit '1'. Only one first-year course may be used to meet the Major requirements in History. However, a Major may use subsequent first-year History courses as Humanities and Social Sciences electives for the B.A.;
2. at least 12 credit hours in courses with the initial digit '2' including either History 2200 or 2210;
3. at least 9 credit hours in courses with the initial digit '2' should be completed before registering in a course with the initial digit '3'. Students should pay particular attention to necessary prerequisites when scheduling courses. In addition, students should obtain advice on the appropriate courses from their faculty advisor;
4. at least 9 credit hours in courses with the initial digit '3' including History 3840;
5. History 3840 for which there is a prerequisite of 12 credit hours in History;
6. at least 3 credit hours in courses with the initial digit '3' should be completed before registering in a course with the initial digit '4';
7. at least 6 credit hours in courses with the initial digit '4'. Some fourth-year courses may require successful completion of courses in the same topic/subject area. Prerequisites may be waived at the discretion of the instructor; and
8. 6 additional credit hours in courses with an initial digit beyond '1'.

No more than 15 transfer credit hours in History may be used to fulfill the requirements for a Major in History.

15.10.3.2 Minor in History

Students who undertake a Minor in History must complete 24 credit hours in History, including:

1. 3 credit hours in a course beginning with the initial digit '1'. Only one first-year course may be used to meet the Minor requirements in History. However, a Minor may use subsequent first-year History courses as Humanities and Social Sciences electives for the B.A.;
2. at least 9 credit hours in courses with the initial digit '2';
3. at least 6 credit hours in courses with the initial digit '2' should be completed before registering in a course with the initial digit '3';
4. at least 6 credit hours in courses with the initial digit '3';
5. at least 3 credit hours in courses with the initial digit '4'. Some fourth-year courses may require successful completion of courses in the same topic/subject area. Prerequisites may be waived at the discretion of the instructor; and
6. 3 additional credit hours in courses with an initial digit beyond '1'.

No more than 9 transfer credit hours in History may be used to fulfil the requirements for a Minor in History.

15.10.3.3 Joint Major in History

As an alternative to a minor, a student may choose to complete a major in History and a major in another eligible program in the Faculty of Humanities and Social Sciences. The Joint Major Program requires 3 fewer credit hours in each participating major as prescribed in each program's Calendar entry. For the Joint Major in History, 3 fewer credit hours shall be required in courses at the 2000-level or 3000-level. Normal requirements to successfully complete History 2200 or 2210 and 3840 shall continue to apply.

15.10.4 Honours Degree

The Honours Degree in History is a rigorous and rewarding program of study for History Majors interested in developing a piece of independent research and writing. Honours students in History develop many of the necessary skills and preparation for graduate school, law school, or work in the heritage sector.

1. Students intending to take an Honours Degree with a Major in History must comply with the **Regulations for the Honours Degree of Bachelor of Arts**.
2. Students are required to complete at least 60 credit hours in History according to the following pattern, of which there must be a minimum of 36 credit hours at the 3000-level or above:
   a. 36 credit hours chosen in accordance with the pattern set out under the **Major in History** above; and
   b. 12 additional credit hours in History electives beyond the first-year level and 12 credit hours in Honours courses: History 4800, 4821, 4822, and 4999.
3. Applicants must apply by June 30th for the Fall semester and by November 1st for the Winter semester in order to be considered for admission. Applications received after June 30th will be considered for the Winter semester and applications received after November 1st will be considered for the next Fall semester. Students intending to complete an Honours degree in History will be assisted by a faculty advisor in planning their academic programs. The academic programs for Honours students must be approved by the Head of the Department or delegate.
4. Students electing Joint Honours are required to complete at least 51 credit hours in History according to the following pattern:
   a. 36 chosen in accordance with the pattern set out under the **Major in History** above;
   b. History 4800 and 4821;
   c. 3 additional credit hours in History electives beyond the first-year level; and
   d. if the student chooses to write the Honours Essay in History, the student must successfully complete History 4822 and History 4999; or
   e. if the student chooses to write the Honours Essay in another Department, the student does not need to complete History 4822 and History 4999. However, these courses must be replaced with 6 additional credit hours in History electives at the third-year level or above.
5. The minimum grades required are:
   a. 70% on each of the prescribed courses beyond the first-year level or an average of 75% on those courses; and

b. 70% or higher in History 4999.

6. No more than 27 transfer credit hours may be included in the minimum 60 credit hours required for the Honours degree in History.

15.10.5 Regulations for the International Bachelor of Arts (iBA)

In addition to completing the normal requirements for a Bachelor of Arts and one of an Honours, Major or Minor in History, students may elect to complete requirements for the **International Bachelor of Arts (iBA)**. As part of the minimum 120 credit hours, a student may use eligible credit hours in History to jointly satisfy other requirements of the iBA degree. When selecting courses, a student is encouraged to consult with an academic advisor early in the program, to consider **Table 2 Possible Course Sequencing for the International Bachelor of Arts (iBA) (First 60 Credit Hours)**, and to consider History courses listed in **Table 3 International Studies (IS) Designated Courses**. Up to 12 credit hours in History IS courses may be used towards the **International Studies (IS) Courses Requirement**.

15.10.6 Certificate in History and Philosophy of Science and Technology

The Departments of Classics, History, and Philosophy jointly administer the Certificate in History and Philosophy of Science and Technology. Credit hours in History may be eligible to jointly fulfill requirements of a degree and a certificate. For further information about this program, see **Certificate Programs, Certificate in History and Philosophy of Science and Technology**, or contact the Program Director.

15.11 Linguistics

www.mun.ca/linguistics

15.11.1 Department of Linguistics Description

Linguistics is the scientific study of language, including language structure, language variation, language change, the development of language and the psychology and biology of language.

The Department of Linguistics prides itself on maintaining strong links between teaching and research, with emphasis on data-driven, theoretically informed inquiry into Indigenous languages, language variation and change and language acquisition. Students are trained in linguistic scholarship through active engagement in primary research, supported by unique and extensive in-house data archives, broad library holdings and state-of-the-art labs and analytical tools. Strong relations with robust local speech communities enhance our research and our teaching. Memorial University of Newfoundland's Department of Linguistics is the only department of Linguistics in Atlantic Canada, and the largest department east of Quebec City.

The following undergraduate programs are offered in the Department of Linguistics:

1. **Major in Linguistics**
2. **Minor in Linguistics**
3. **Honours in Linguistics**
4. Joint Honours in Linguistics information is under **Honours in Linguistics**.

In addition to meeting the regulations below, a student must also meet ***UNIVERSITY REGULATIONS***.

Linguistics course descriptions are found at the end of the Faculty of Humanities and Social Sciences section under **Course Descriptions, Linguistics** and are designated by LING.

15.11.2 Bachelor of Arts Degree Requirements

The Bachelor of Arts requires the successful completion of a minimum of 120 credit hours. A student must meet the requirements for a departmental Major, Minor, or Honours program and also meet the **Program Regulations – General and Honours Degrees** for the Faculty of Humanities and Social Sciences. A student is therefore advised to consult with the **Admission to the Bachelor of Arts General Degree Programs** regulations, the **Program Regulations - General and Honours Degrees** which also includes the **Bachelor of Arts General Degree Components**, **The Major Program**, and **The Minor Program** regulations. Information regarding honours programs is available at **Bachelor of Arts (Honours) Degree Regulations** as well as under each department's regulations.

A student is strongly encouraged to consult with an academic advisor to discuss available programs and requirements in the Faculty of Humanities and Social Sciences including the **Core Requirements**, **The Major Program**, **The Minor Program**, and the **Bachelor of Arts (Honours) Degree Regulations**. A student is advised to declare a program of study, including a Major and a Minor, before completing the first 45 credit hours of study. Information about declaring a Major and Minor in the Faculty of Humanities and Social Sciences is available at www.mun.ca/hss/programs/undergraduate/ideclare.php. Information regarding advisors for the Faculty of Humanities and Social Sciences is available at www.mun.ca/hss/about/contact/liaisons.php.

15.11.3 Major in Linguistics

The General Major in Linguistics requires twelve courses, 36 credit hours. When planning the program of study, a student is encouraged to follow the pattern outlined in **Table 1 Suggested Course Sequence for Major in Linguistics** in order to proceed smoothly in the program.

1. Students majoring in Linguistics must complete 36 credit hours in Linguistics, which must include either Linguistics 1100 or 2800 (or the former 1155) and the 12 credit hours 1103, 1104, 3100, 3201 plus 21 credit hours in courses chosen from Linguistics 1100, 1105, 2060, 2120 (or the former 3155) 2210, 2212, 2220, 2300, 2800 (or the former 1155), 3000, 3104, 3105, 3150, 3210, 3302, 3310, 3311, 3500, 3850, 3950-3960, 4010-4091, 4100, 4110, 4120 (or the former 4150), 4151, 4203, 4204, 4210, the former 4400, 4420, 4421, 4500, 4700, 4750, 4751, 4752, 4753, 4754, 4900, 4901, 4956, 4950-4960. Of these 21 credit hours, 9 must be at the 4000 level.
2. Designated Language Study courses offered in Linguistics may not be used towards a Major in Linguistics.
3. In addition to meeting the Major in Linguistics requirements students must also meet the **Bachelor of Arts Degree Requirements**.

A student is encouraged to consider the Honours or Joint Honours in Linguistics outlined under **Honours in Linguistics**.

Table 1 Suggested Course Sequence for Major in Linguistics

Year	Required Courses	Recommended Courses	Optional Courses
1	Linguistics 1100 or 2800 (or the former 1155), and 1103, 1104	LING 2210	LING 1105 one other 2000-level LING course
2 - 3	LING 3100, 3201	two or three other 3000-level LING courses	
4	3000- and 4000- level LING courses		

With the exception of LING 1100 all other Linguistics courses are offered, other than language courses, during the Fall and Winter semesters only.

15.11.4 Minor in Linguistics

The General Minor in Linguistics requires eight courses, 24 credit hours. When planning the program of study, a student is encouraged to follow the pattern outlined in **Table 2 Suggested Course Sequence for Minor in Linguistics** in order to proceed smoothly in the program.

1. Students minoring in Linguistics must complete 24 credit hours in Linguistics, which must include: either Linguistics 1100 or 2800 (or the former 1155), and both of 1103 and 1104; any 6 credit hours from the following list: Linguistics 3000, 3100, 3104, 3201, 3500, 3850; and an additional 9 credit hours selected from: the former Linguistics 1101, 1105, 2060, 2120 (or the former 3155), 2210, 2212, 2220, 2300, 2800 (or the former 1155), 3000, 3100, 3104, 3105, 3150, 3201, 3210, 3302, 3310, 3311, 3500, 3850, 3950-3960, 4010-4091, 4100, 4110, 4120 (or the former 4150), 4151, 4203, 4204, 4210, the former 4400, 4420, 4421, 4500, 4700, 4750, 4751, 4752, 4753, 4754, 4900, 4901, 4956, 4950-4960.
2. Designated Language Study courses offered in Linguistics may not be used towards a Minor in Linguistics.
3. In addition to meeting the Minor in Linguistics requirements students must also meet the **Bachelor of Arts Degree Requirements**.

A student is encouraged to consider the Major or Honours in Linguistics outlined under **Major in Linguistics** and **Honours in Linguistics**.

Table 2 Suggested Course Sequence for Minor in Linguistics

Year	Required Courses	Recommended Courses
1	Linguistics 1100 or 2800 (or the former 1155), and 1103, 1104	
2 - 3	two of LING 3000, 3100, 3104, 3201, 3850	one other 2000 or 3000-level LING course
4	two other LING courses	

With the exception of LING 1100 all other Linguistics courses are offered, other than language courses, during the Fall and Winter semesters only.

15.11.5 Honours in Linguistics

The Honours in Linguistics requires twenty courses, 60 credit hours and the joint Honours requires sixteen courses, 48 credit hours. When planning the program of study, a student is encouraged to follow the pattern outlined in **Table 3 Suggested Course Sequence for Honours in Linguistics** in order to proceed smoothly in the program.

1. In addition to meeting the requirements below students must also meet the Faculty of Humanities and Social Sciences Honours regulations outlined under **Bachelor of Arts (Honours) Degree Regulations**.
2. An Honours degree in Linguistics must include 60 credit hours in Linguistics courses, including at least 36 credit hours at the 3000-level or above, of which the following are required: either Linguistics 1100 or 2800 (or the former 1155), and 1103, 1104, 2210, 3000, 3100, 3201, 3210, 3500, 3850, 4100 (or 4110), 4203 (or 4204), 4999, and at least one of Linguistics 4010-4091, 4120 (or the former 4150), 4151,4210, 4500, 4700, 4750, 4751, 4752, 4753, 4754, 4900, 4901, 4950-4960. Of the remaining 18 credits hours, 6 credit hours must be taken at the 3000 level or above, with the remaining 12 credit hours taken at any level. Students may substitute Psychology 2910 for one of these remaining 12 credit hours at any level. Students should choose courses in consultation with their Honours Essay supervisor, to ensure that the needs and interests of the individual student are met, and to take into account the availability of courses which the Department is able to offer.
3. Designated Language Study courses offered in Linguistics may not be used towards a Honours in Linguistics.
4. Linguistics may also be combined with another subject or subjects to constitute a Joint Honours degree. The required courses listed above for the Honours degree, except for Linguistics 4999, are also required for any Joint Honours degree in Linguistics. A total of 48 credit hours in Linguistics, which may include Linguistics 4999, is required for Joint Honours in Linguistics. Students should consult their Department of Linguistics advisor to ensure that they select courses which complement their other Honours Subject of Specialization.
5. In addition to meeting the Honours in Linguistics requirements students must also meet the **Bachelor of Arts Degree Requirements**.

Table 3 Suggested Course Sequence for Honours in Linguistics

Year	Required Courses	Recommended Courses
1	Linguistics 1100 or 2800 (or the former 1155), and 1103, 1104, 2210	one other 2000-level LING course
2	LING 3000, 3100, 3201, 3210, 3850	LING 2120 (or the former 3155) one other 2000 or 3000-level LING course
3	LING 3500, 4100 (or 4110), 4203 (or 4204) one of 4010-4091, 4120 (or the former 4150), 4210, 4500, 4700, 4950-4960	two other 3000 or 4000-level LING courses
4	LING 4999	one other 4000-level LING course

With the exception of LING 1100 all other Linguistics courses are offered, other than language courses, during the Fall and Winter semesters only.

15.11.6 Regulations for the International Bachelor of Arts (iBA)

In addition to completing the normal requirements for a Bachelor of Arts and one of a Joint Honours, Honours, Major or Minor in Linguistics, students may elect to complete requirements for the **International Bachelor of Arts (iBA)**. As part of the minimum 120 credit hours, a student may use eligible credit hours in Linguistics to jointly satisfy other requirements of the iBA degree. When selecting courses, a student is encouraged to consult with an academic advisor early in the program and to consider **Table 1 Possible Course Sequencing for the First 45 credit hours of the Bachelor of Arts**.

15.12 Mathematics and Statistics

For Departmental Regulations and Course Descriptions, see Faculty of Science section of the Calendar.

The following undergraduate programs are available in the Department:

1. Applied Mathematics and Chemistry Joint Honours (B.Sc. only)
2. Applied Mathematics and Computer Science Joint Major (B.Sc. only)
3. Applied Mathematics and Economics Joint Major (B.Sc. only)
4. Applied Mathematics and Physics Joint Honours (B.Sc. only)
5. Applied Mathematics and Physics Joint Major (B.Sc. only)
6. Biology and Statistics Joint Honours (B.Sc. only)
7. Computer Science and Pure Mathematics Joint Honours (B.Sc. only)
8. Computer Science and Pure Mathematics Joint Major (B.Sc. only)
9. Computer Science and Statistics Joint Honours (B.Sc. only)
10. Computer Science and Statistics Joint Major (B.Sc. only)
11. Economics and Pure Mathematics Joint Major (B.Sc. only)
12. Economics and Statistics Joint Major (B.Sc. only)
13. Economics and Statistics (Co-operative) Joint Major (B.Sc. only)
14. Honours in Applied Mathematics (B.Sc. only)
15. Honours in Pure Mathematics
16. Honours in Statistics
17. Major in Applied Mathematics (B.Sc. only)
18. Major in Pure Mathematics
19. Major in Statistics
20. Minor in Mathematics
21. Minor in Statistics
22. Pure Mathematics and Statistics Joint Honours (B.Sc. only)

15.13 Modern Languages, Literatures and Cultures

www.mun.ca/languages

15.13.1 Department of Modern Languages, Literatures and Cultures Description

The Department of Modern Languages, Literatures and Cultures (MLLC) is a multidisciplinary department that is rooted in the traditions of four major European and world languages (French, German, Russian, and Spanish), as well as in Canada's own French language and culture. The Department's mission is to advance the linguistic and cultural competencies of students in one or more modern languages. Mastering another language not only includes speaking and writing proficiency in the target language, but also increasing one's appreciation and critical analysis of the literatures and cultures that share that language. The Department is home to most of the courses offered in the Faculty of Humanities and Social Sciences that study actively spoken languages, including Irish Gaelic, Italian, and Japanese. These complement ancient language courses that are offered principally by the Department of Classics and by the Department of Religious Studies. The Department of Linguistics offers courses in First Nations and Inuit languages.

The following undergraduate programs are offered in the Department of Modern Languages, Literatures and Cultures:

1. French Major
2. French Major for Francophones
3. French Minor
4. French Minor for Francophones
5. Honours Degree in French
6. Joint Major in French and Joint Major in French for Francophones
7. Joint Honours in French
8. Frecker program in French Immersion
9. Canadian Third Year In Nice
10. Université de Bretagne Sud (UBS)
11. German Major
12. German Minor
13. German Studies Minor
14. Joint Major in German
15. Honours Degree in German
16. Russian Major
17. Russian Minor
18. Joint Major in Russian
19. Spanish Major
20. Spanish Minor
21. Joint Major in Spanish

15.13.2 French

www.mun.ca/languages

Native speakers of French and students with near-native fluency will not normally receive credit for courses taken at the first year level in their native language nor will they be allowed to challenge for credit at the first year level. Such students shall consult the Department to be placed at the appropriate level.

French course descriptions are found at the end of the Faculty of Humanities and Social Sciences section under **Course Descriptions, French** and are designated by FREN.

15.13.2.1 Bachelor of Arts Degree Requirements

The Bachelor of Arts requires the successful completion of a minimum of 120 credit hours. A student must meet the requirements for a departmental Major, Minor, or Honours program and also meet the **Program Regulations – General and Honours Degrees** for the Faculty of Humanities and Social Sciences. A student is therefore advised to consult with the **Admission to the Bachelor of Arts General Degree Programs** regulations, the **Program Regulations - General and Honours Degrees** which also includes the **Bachelor of Arts General Degree Components**, **The Major Program**, and **The Minor Program** regulations. Information regarding honours programs is available at **Bachelor of Arts (Honours) Degree Regulations** as well as under each department's regulations.

A student is strongly encouraged to consult with an academic advisor to discuss available programs and requirements in the Faculty of Humanities and Social Sciences including the **Core Requirements**, **The Major Program**, **The Minor Program**, and the **Bachelor of Arts (Honours) Degree Regulations**. A student is advised to declare a program of study, including a Major and a Minor, before completing the first 45 credit hours of study. Information about declaring a Major and Minor in the Faculty of Humanities and Social Sciences is available at www.mun.ca/hss/programs/undergraduate/ideclare.php. Information regarding advisors for the Faculty of Humanities and Social Sciences is available at www.mun.ca/hss/about/contact/liaisons.php.

15.13.2.2 French Major Program

Students completing a French Major Program, depending on the student's program and point of entry into the program, may wish to follow **Table 1 Course Pattern for Major in French, On-Campus (Entry Point FREN 1500)**, **Table 2 Course Pattern for Major in French, On-Campus (Entry Point FREN 2100**, or T**able 3 Course Pattern for Major in French, Study-Away Option** below.

1. Students who choose French as their Major must complete at least 42 credit hours in French, including:
   a. No more than 6 credit hours at the 1000 level. It is strongly recommended that students in the Major program complete Classics 1120 or Language 2800 or Linguistics 2800.
   b. 2100 and 2101;
   c. 2300;
   d. At least 6 credit hours chosen from 2601, 2602 and 2900;
   e. 3100 and 3101;

f. At least 6 credit hours chosen from 3500, 3501, 3502, 3503, 3504, 3506, 3507, 3508;

g. At least 6 credit hours at the 4000 level; and

h. An extra 3 credit hours at the 2000 level or above.

2. Between their first registration at Memorial University of Newfoundland and the time of their graduation, all students majoring in French must have spent at least eight weeks at an approved Francophone institution in a French-speaking area or have acquired equivalent work experience in a Francophone environment. Students are strongly encouraged to fulfill the requirement early in their program in order to get the greatest benefit from the immersion experience. Students should consult the Head of the Department before the end of their second year of study (60 credit hours) for help in selecting the immersion experience most appropriate for their circumstances. Every reasonable effort will be made by the Department to accommodate students who, for personal or professional reasons, need to fulfill the immersion requirement in a different setting. Please note that accommodation cannot include waivers or exemptions from the immersion requirement as completion of the immersion requirement is an academic requirement for all students completing a Major in French. Students with extenuating circumstances should consult with the Head of the Department for alternative options.
3. No more than 12 transfer credit hours may be used to fulfill the minimum requirements of the Major in French as outlined under **Transfer Credit for French Courses**.
4. One of Classics 1120 or Language 2800 or Linguistics 2800 may be substituted for 3 non-specified credit hours in French at the second-year level.

The Study-Away Option may include a summer bursary program. Information regarding bursary programs is available at www.gov.nl.ca/education/k12/french/bursaries.

15.13.2.3 French Minor Program

1. Students who choose French as their Minor must complete at least 24 credit hours in French, including:
   a. 2100 and 2101
   b. 3100 or 3101
2. No more than 6 credit hours at the 1000 level may be used to fulfil the minimum requirements of the Minor in French.
3. Between their first registration at Memorial University of Newfoundland and the time of their graduation, all students minoring in French must have spent at least four weeks at an approved Francophone institution in a French-speaking area or have acquired equivalent work experience in a Francophone environment. Students are strongly encouraged to fulfill the requirement early in their program in order to get the greatest benefit from the immersion experience. Students should consult the Head of the Department before the end of their second year of study (60 credit hours) for help in selecting the immersion experience most appropriate for their circumstances. Every reasonable effort will be made by the Department to accommodate students who, for personal or professional reasons, need to fulfill the immersion requirement in a different setting. Please note that accommodation cannot include waivers or exemptions from the immersion requirement as completion of the immersion requirement is an academic requirement for all students completing a Minor in French. Students with extenuating circumstances should consult with the Head of the Department for alternative options.
4. No more than 6 transfer credit hours may be used to fulfill the minimum requirements of the Minor in French as outlined under **Transfer Credit for French Courses**.

15.13.2.4 Honours Degree in French

In addition to the following regulations students are advised to see the General Regulations for Honours Degrees.

1. An Honours degree in French shall consist of at least 60 credit hours in French, including:
   a. no more than 6 credit hours at the 1000 level. However, Classics 1120 or Language 2800 or Linguistics 2800 may be substituted for 3 credit hours in French beyond the first-year level.
   b. 2100 and 2101;
   c. 2300;
   d. at least 6 credit hours chosen from 2601, 2602 and 2900;

e. 3100 and 3101;
f. at least 6 credit hours chosen from 3500, 3501, 3502, 3503, 3504, 3506, 3507, 3508;
g. a minimum of 15 credit hours at the 4000 level including French 4900 and 4999; and
h. an extra 6 credit hours at the 2000 level or above.

2. Between their first registration at Memorial University of Newfoundland and the time of their graduation, all students completing the Honours program in French must have spent at least two semesters at an approved Francophone institution in a French-speaking area or have acquired equivalent work experience in a Francophone environment. Students are strongly encouraged to fulfill the requirement early in their program in order to get the greatest benefit from the immersion experience. Students should consult the Head of the Department before the end of their second year of study (60 credit hours) for help in selecting the immersion experience most appropriate for their circumstances. Every reasonable effort will be made by the Department to accommodate students who, for personal or professional reasons, need to fulfill the immersion requirement in a different setting. Please note that accommodation cannot include waivers or exemptions from the immersion requirement as completion of the immersion requirement is an academic requirement for all students completing an Honours Degree in French. Students with extenuating circumstances should consult with the Head of the Department for alternative options.
3. No more than 24 transfer credit hours may be used to fulfill the minimum requirements of the Honours program in French as outlined under **Transfer Credit for French Courses**.
4. One of Classics 1120 or Language 2800 or Linguistics 2800 may be substituted for 3 non-specified credit hours in French at the second-year level.

15.13.2.5 Joint Honours

1. French may be combined with any other subject approved in the General Regulations to form a Joint Honours program. Students will establish their program in consultation with the Heads of the Departments of their chosen Honours subjects.
2. The Joint Honours program in French shall include at least 51 credit hours in French including the same requirements as the French Major.
3. Classics 1120 or Language 2800 or Linguistics 2800 may be substituted for 3 non-specified credit hours in French at the second-year level.
4. By the time of their graduation, all students completing the Joint Honours program in French must have spent at least two semesters at an approved Francophone institution in a French-speaking area or have acquired equivalent work experience in a Francophone environment.
5. No more than 18 transfer credit hours may be used to fulfil the minimum requirements of the Joint Honours program in French as outlined under **Transfer Credit for French Courses**.

15.13.2.6 Transfer Credit for French Courses

1. Students who successfully complete French language programs offered by recognized universities and colleges in Canada and elsewhere may apply to have their courses evaluated for equivalent Memorial University of Newfoundland credit. To do so, they must follow such procedures as may be specified by the Office of the Registrar; they may also be required to sit a placement test administered by the Department of Modern Languages, Literatures and Cultures. The result achieved on this placement test will influence any determination of the number and level of transfer credits to be awarded.
2. Students intending to participate in a summer language bursary program or the Student Fellowship Programs are particularly advised to consult the Head of the Department of Modern Languages, Literatures and Cultures before beginning such a program. All students intending to request transfer of credit are strongly advised to obtain a Letter of Permission from the Office of the Registrar before registering for any course of study offered by another institution.
3. In any event, no more than 9 transfer credit hours in French at the first-year level, and 18 at the second-year level, may be granted to any student.
4. See specific program regulations for restrictions placed on the maximum number of transfer credit hours applicable to the Minor, Major, Honours and Joint Honours programs. Students who have spent an extended period of time studying French in a francophone milieu may discuss with the Head of the Department the suitability of seeking permission from the Faculty's Undergraduate Waivers and Appeals Committee to transfer up to a maximum of 3 additional credit hours.

15.13.2.7 Frecker Program

1. The Frecker Program is a one-semester immersion program offered by Memorial University of Newfoundland in St-Pierre. Students who successfully complete this program will receive 15 credit hours in French as specified in clause 5. below. All students will board with French families and will participate in extra-curricular activities designed to take full advantage of the French milieu.
2. Students wanting to complete the Frecker Program may wish to follow **Table 4 Course Pattern for Major in French, Frecker Program (Entry Point FREN 1501)** below.
3. The minimum prerequisites for admission to the program are successful completion of French 1502 and permission of the Head of the Department following written application. Admission to the program will be on a competitive basis and will depend on marks obtained in French courses at Memorial University of Newfoundland and on instructors' recommendations.
4. The cost of room and board is partially subsidized by the Federal Government Bursary Program in the case of residents of Newfoundland and Labrador. (A limited number of non-bursary students may be admitted to the program.)
5. Students who are admitted to this program will register for French 2100, 2101, 2300, 2900, and 2602.

Table 4 Course Pattern for Major in French, Frecker Program (Entry Point FREN 1501)

Term	Course Requirements
Year 1 First Semester	3 credit hours in Critical Reading and Writing (English) Elective FREN 1501 Minor Subject 3 credit hours in Quantitative Reasoning
Year 1 Second Semester	3 credit hours in Critical Reading and Writing (any) Elective FREN 1502 Minor Subject 3 credit hours in Quantitative Reasoning

15.13.2.8 Canadian Third Year in Nice Program

Memorial University of Newfoundland is a member of a consortium of Canadian universities (with Guelph University, University of Toronto, University of Western Ontario, University of Windsor), which offer the Canadian Third Year in Nice Program. This program enables students to spend a full academic year studying at the Université de Nice-Sophia Antipolis in the South of France. Canadian Students participating in this program are accompanied by a faculty member from one of the Canadian universities participating in the program. This person teaches two of the five courses which students complete each semester in Nice, the other three being chosen from the offerings of the Université de Nice. Specific Memorial University of Newfoundland transfer credits are awarded for successful completion of the courses taught by the Canadian coordinator and specified and/or unspecified credits are awarded for the courses offered by the Université de Nice. All courses completed under this program will be offered outside the normal time frame for courses offered at Memorial University of Newfoundland. Fall semester courses will be completed between October and January each year, Winter semester courses between February and May. This follows the time frame of Sessions I and II at the Université de Nice-Sophia Antipolis. Students should consult the Head of the Department regarding course selection.

L'université Memorial fait partie du consortium des universités canadiennes qui offrent le programme Canadian Third Year in Nice (avec Guelph University, University of Toronto, University of Western Ontario, University of Windsor). Ce programme permet à des étudiants et étudiantes de passer une année académique à l'université de Nice-Sophia Antipolis dans le sud de la France. Les étudiant/e/s canadien/ne/s qui participent à ce programme sont encadrés par un/e professeur/e d'une des universités qui participent à ce programme. Chaque semestre, cette personne enseigne deux cours sur les cinq. Les trois autres cours sont choisis parmi les cours enseignés à l'université de Nice. Les cours de l'enseignant/e canadien/ne donneront droit à des crédits spécifiés, alors que les cours offerts à Nice donneront droit à de transfert crédits spécifiés et/ou non spécifiés. Le calendrier sera différent de celui de l'université Memorial: les cours d'automne auront lieu de septembre à janvier et ceux d'hiver de février à mai, suivant le calendrier des sessions I et II de l'université de Nice-Sophia Antipolis. Les étudiants et étudiantes doivent consulter la direction du département concernant le choix des cours.

Students wanting to complete the Canadian Third Year in Nice Program may wish to follow **Table 5 Course Pattern for Major in French, Nice (Entry Point FREN 1501)** below.

Table 5 Course Pattern for Major in French, Nice (Entry Point FREN 1501)

Term	Course Requirements

15.13.2.9 Université de Bretagne Sud (UBS)

The exchange program with the Université de Bretagne Sud (UBS) in Lorient, France, is a one semester immersion program (January to May) offered by Memorial University of Newfoundland at the third and/or fourth year level. Specified and/or unspecified Memorial University of Newfoundland transfer credits are awarded for successful completion of the courses taken at UBS.

Le programme d'échanges avec l'université de Bretagne Sud à Lorient, France, est un programme d'immersion d'un semestre aux niveaux de la troisième et/ou de la quatrième année. Les cours suivis à l'UBS donneront droit à des crédits de transfert spécifiés et/ou non spéficiés de Memorial University of Newfoundland.

15.13.2.10 Regulations for the Major in French for Francophones

The Major in French for Francophones is offered to students who have resided in a Francophone milieu and who have an advanced comprehension of the French language beyond what is acquired in a high school French immersion program. Admission to the program is normally restricted to students who have completed a minimum of 3 years in a French speaking high school while residing in a Francophone community, duly authenticated in writing. Equivalencies for Francophone students in other circumstances will be considered by the Faculty's Undergraduate Waivers and Appeals Committee upon a written recommendation from the Head of Department.

Francophone students who choose French as their Major must complete at least 42 credit hours in French, including:

1. a minimum of 9 credit hours at the 2000-level including FREN 2101 and 2300 and a minimum of 3 credit hours to be chosen from FREN 2601 or 2602;
2. a minimum of 18 credit hours at the 3000-level including FREN 3100 and 3101 (or 3202 and 3203); a minimum of 6 additional credit hours chosen from FREN 3500, 3501, 3502, 3503, 3504, 3506, 3507, 3508;
3. a minimum of 12 credit hours at the 4000-level; and
4. an additional 3 credit hours at the 2000-level or above.

Notes:
1. *Francophone students cannot register for 1000-level French courses or for FREN 3300.*
2. *Francophone students are exempted from the requirement for the Study in a Francophone Milieu.*
3. *International students from countries where French is an official language are advised to contact the Undergraduate Student Advisor for assistance with course planning.*

15.13.2.11 Regulations for the Minor in French for Francophones

The Minor in French for Francophones is offered to students who have resided in a Francophone milieu and who have an advanced comprehension of the French language beyond what is acquired in a high school French immersion program. Admission to the program is normally restricted to students who have completed a minimum of 3 years in a French speaking high school while residing in a Francophone community. duly authenticated in writing. Equivalencies for Francophone students in other circumstances will be considered by the Faculty's Undergraduate Waivers and Appeals Committee upon a written recommendation from the Head of Department.

Students who choose French as their Minor must complete at least 24 credit hours in French, including:

1. a minimum of 15 credit hours at the 2000-level including FREN 2100 and 2101;
2. a minimum of 3 credit hours at the 3000-level including FREN 3100 or 3101; and
3. up to 6 additional credit hours at the 2000 level or above.

No more than 6 transfer credit hours may be used to fulfill the minimum requirements of the Minor in French as outlined under **Transfer Credit for French Courses**.

Notes:
1. *Francophone students cannot register for 1000-level French courses or for FREN 3300.*
2. *Francophone students are exempted from the requirement for the Study in a Francophone Milieu.*
3. *International students from countries where French is an official language are advised to contact the Undergraduate Student Advisor for assistance with course planning.*

15.13.2.12 Joint Major in French and Joint Major in French for Francophones

As an alternative to a minor, a student may choose to complete a major in French and a major in another eligible program in the Faculty of Humanities and Social Sciences. The Joint Major Program requires 3 fewer credit hours in each participating major as prescribed in each program's Calendar entry.

1. For the joint major in French, the requirement in 1.h. under the **French Major Program** above for 3 extra credit hours at the 2000 level or above shall not apply.
2. For the joint major in French for Francophones, the requirement in 4. under the Regulations for the **Major in French for Francophones** for 3 extra credit hours at the 2000 level or above shall not apply.

15.13.2.13 Regulations for the International Bachelor of Arts (iBA)

In addition to completing the normal requirements for a Bachelor of Arts and one of a Joint Honours, Honours, Major or Minor in French, students may elect to complete requirements for the **International Bachelor of Arts (iBA)**. As part of the minimum 120 credit hours, a student may use eligible credit hours in French to jointly satisfy other requirements of the iBA degree. When selecting courses, a student is encouraged to consult with an academic advisor early in the program, to consider **Table 2 Possible Course Sequencing for the International Bachelor of Arts (iBA) (First 60 Credit Hours)**, and to consider French courses listed in **Table 3 International Studies (IS) Designated Courses**. Up to 12 credit hours in French IS courses may be used towards the **International Studies (IS) Courses Requirement**.

15.13.3 German

www.mun.ca/languages

Native speakers of German and students with near-native fluency will not normally receive credit for courses taken at the first year level in their native language nor will they be allowed to challenge for credit at the first year level. Such students shall consult the Department to be placed at the appropriate level.

German course descriptions are found at the end of the Faculty of Humanities and Social Sciences section under **Course Descriptions, German** and are designated by GERM.

15.13.3.1 Bachelor of Arts Degree Requirements

The Bachelor of Arts requires the successful completion of a minimum of 120 credit hours. A student must meet the requirements for a departmental Major, Minor, or Honours program and also meet the **Program Regulations – General and Honours Degrees** for the Faculty of Humanities and Social Sciences. A student is therefore advised to consult with the **Admission to the Bachelor of Arts General Degree Programs** regulations, the **Program Regulations - General and Honours Degrees** which also includes the **Bachelor of Arts General Degree Components**, **The Major Program**, and **The Minor Program** regulations. Information regarding honours programs is available at **Bachelor of Arts (Honours) Degree Regulations** as well as under each department's regulations.

A student is strongly encouraged to consult with an academic advisor to discuss available programs and requirements in the Faculty of Humanities and Social Sciences including the **Core Requirements**, **The Major Program**, **The Minor Program**, and the **Bachelor of Arts (Honours) Degree Regulations**. A student is advised to declare a program of study, including a Major and a Minor, before completing the first 45 credit hours of study. Information about declaring a Major and Minor in the Faculty of Humanities and Social Sciences is available at www.mun.ca/hss/programs/undergraduate/ideclare.php. Information regarding advisors for the Faculty of Humanities and Social Sciences is available at www.mun.ca/hss/about/contact/liaisons.php.

15.13.3.2 General Degree

All students who did not matriculate in German will begin their study with German 1000 or 1002.

15.13.3.3 German Major Program

Students majoring in German must comply with the ***UNIVERSITY REGULATIONS*** **- General Academic Regulations (Undergraduate)** and arrange their program in consultation with the German Program Liaison. It is highly desirable that, during their course of study, all students majoring in German spend at least one semester of study in a German-speaking country.

Students who choose German as their Major must complete 36 credit hours in German, including:

1. German 1000 or 1002, 1001 or 1003, 2010, 2011, 2900 or 2901, 3010, 3011, 4010 or 4011, and
2. 12 credit hours in German at the 3000- or 4000-level.
3. It is strongly recommended that students in the Major program complete Language 2800 or Linguistics 2800 which may be substituted for 3 non-specified credit hours in German at the first- or second-year level.

Table 1 Suggested Course Pattern for the Major in German

First-Year	Second-Year	Third-Year	Fourth-Year
GERM 1000 or 1002 GERM 1001 or 1003	GERM 2010 GERM 2011 Recommended: GERM 2900, 2901, or other GERM electives	GERM 3010 GERM 3011 Recommended: 6 credit hours in GERM at the 3000-level or above	Remaining courses to complete the Major in German including GERM 4010 or 4011. Recommended: GERM 3900 or 3901

15.13.3.4 German Minor Programs

1. **German Minor**: Students who choose German as their Minor must complete at least 24 credit hours in German, including:
   a. GERM 1000 or 1002, 1001 or 1003, 2010, 2011, 2510 or 3010; and
   b. 9 credit hours in German at the 2000-level or above.

   GERM 2030, 2031, 2900, 2901, the former 2910, 3000, 3001, 3002, 3003, 3005, the former 3902, 3911, 3912, 3913, 3914, 3915 and the Special Topics courses in German Studies may not be used as part of the Faculty of Humanities and Social Sciences Language Study (LS) Requirement.
2. **German Studies Minor**: In addition to the German Minor, a Minor in German Studies is also available consisting of a minimum of 24 credit hours in courses including:
   a. GERM 1000 or 1002, 1001 or 1003, 2010, 2011, 2900 or 2901; and
   b. 9 credit hours taken in either additional courses in German and/or from cognate courses offered by other departments, such as History 3370, 3380, Philosophy 3230, 3231, 3310 (or the former Philosophy 3850, 3851, 3860) to be chosen through prior consultation with the German Program Liaison.

   GERM 2030, 2031, 2900, 2901, the former 2910, 3000, 3001, 3002, 3003, 3005, the former 3902, 3911, 3912, 3913, 3914, 3915 and the Special Topics courses in German Studies may not be used as part of the Faculty of Humanities and Social Sciences Language Study (LS) Requirement.

15.13.3.5 Joint Major in German

As an alternative to a minor, a student may choose to complete a major in German and a major in another eligible program in the Faculty of Humanities and Social Sciences. The Joint Major Program requires 3 fewer credit hours in each participating major as prescribed in each program's Calendar entry. For the joint major in German, 3 fewer credit hours shall be required at the 3000- or 4000-level to fulfill clause 2. under the **German Major Program** above.

15.13.3.6 Honours Degree in German

Students intending to complete an Honours degree with a major in German must comply with the **Bachelor of Arts (Honours) Degree Regulations**. Students are required to complete a minimum of 60 credit hours in German according to the following pattern, of which there must be a minimum of 36 credit hours at the 3000-level or above:

1. 36 credit hours chosen in accordance with the pattern set out under the **German Major Program**;
2. German 4998 or 4999; and
3. an additional 21 credit hours, which must include German 4010 or 4011 and 4998 or 4999.
4. Language 2800 or Linguistics 2800 may be substituted for 3 non-specified credit hours in German at the first- or second-year level.

The minimum grades for the Honours program are:

1. a grade of 70% or better, or an average of 75% or higher in the minimum number of courses (including the required courses in German prescribed by the Department concerned; and
2. a grade of 70% or better must be obtained in the Honours essay and/or comprehensive examination.

15.13.3.7 Joint Honours Degree in German

Students who are completing a Joint Honours Degree in German will complete a minimum of 42 credit hours in German, including:

1. GERM 1000 or 1002, 1001 or 1003, 2010, 2011, 3010, 3011, 3900 and 3901;
2. 15 additional credit hours at the 3000-level or above, including GERM 4998 or 4999 if the student chooses to write the Honours Essay and/or comprehensive examination in German; and
3. 3 credit hours in GERM at the 2000-level or above.
4. Language 2800 or Linguistics 2800 may be substituted for 3 non-specified credit hours in German at the first- or second-year level.

The minimum grades for the Honours program are:

1. a grade of 70% or better, or an average of 75% or higher in the minimum number of courses (including the required courses in German prescribed by the Departments concerned; and
2. a grade of 70% or better must be obtained in the Honours essay and/or comprehensive examination.

Table 2 Suggested Course Pattern for the Honours Program

First-Year	Second-Year	Third-Year	Fourth-Year
GERM 1000 or 1002 GERM 1001 or 1003	GERM 2010 GERM 2011 GERM 2900 GERM 2901 Recommended: 12 credit hours at the 2000-level or above (including GERM 3510 and 3511)	GERM 3010 GERM 3011 GERM 3900 GERM 3901 Recommended: 12 credit hours at the 3000-level or above	GERM 4010 or GERM 4011 GERM 4998 or 4999

15.13.3.8 Regulations for the International Bachelor of Arts (iBA)

In addition to completing the normal requirements for a Bachelor of Arts and one of a Joint Honours, Honours, Major or Minor in

German, students may elect to complete requirements for the **International Bachelor of Arts (iBA)**. As part of the minimum 120 credit hours, a student may use eligible credit hours in German to jointly satisfy other requirements of the iBA degree. When selecting courses, a student is encouraged to consult with an academic advisor early in the program and to consider **Table 1 Possible Course Sequencing for the First 45 credit hours of the Bachelor of Arts**.

15.13.4 Russian

www.mun.ca/languages

Russian language courses are normally taken in succession. The prerequisite for each course is successful completion of the preceding level, or with permission of the Head of the Department. There is no prerequisite for Russian 1000.

The courses in Russian literature, film and culture may not be used as part of the Faculty of Humanities and Social Sciences requirement of 6 credit hours in a second language.

Native speakers of Russian and students with near-native fluency will not normally receive credit for courses taken at the first year level in their native language nor will they be allowed to challenge for credit at the first year level. Such students shall consult the Department to be placed at the appropriate level.

Russian course descriptions are found at the end of the Faculty of Humanities and Social Sciences section under **Course Descriptions, Russian** and are designated by RUSS.

15.13.4.1 Bachelor of Arts Degree Requirements

The Bachelor of Arts requires the successful completion of a minimum of 120 credit hours. A student must meet the requirements for a departmental Major, Minor, or Honours program and also meet the **Program Regulations – General and Honours Degrees** for the Faculty of Humanities and Social Sciences. A student is therefore advised to consult with the **Admission to the Bachelor of Arts General Degree Programs** regulations, the **Program Regulations - General and Honours Degrees** which also includes the **Bachelor of Arts General Degree Components**, **The Major Program**, and **The Minor Program** regulations. Information regarding honours programs is available at **Bachelor of Arts (Honours) Degree Regulations** as well as under each department's regulations.

A student is strongly encouraged to consult with an academic advisor to discuss available programs and requirements in the Faculty of Humanities and Social Sciences including the **Core Requirements**, **The Major Program**, **The Minor Program**, and the **Bachelor of Arts (Honours) Degree Regulations**. A student is advised to declare a program of study, including a Major and a Minor, before completing the first 45 credit hours of study. Information about declaring a Major and Minor in the Faculty of Humanities and Social Sciences is available at www.mun.ca/hss/programs/undergraduate/declare.php. Information regarding advisors for the Faculty of Humanities and Social Sciences is available at www.mun.ca/hss/about/contact/liaisons.php.

15.13.4.2 Advising for Major and Minor Programs

Students interested in pursuing a major in Russian are advised to consult the Department very early in their undergraduate studies. For students specializing in Russian programs course selection is important to enter graduate school, teaching, library work, or government service. Students with advanced credit or competence in Russian will be placed at an appropriate level. Students are encouraged to consult with the Undergraduate Program Director. Students with prior knowledge of Russian may be granted transfer credit if that knowledge came from a recognized academic course. Russian courses may be challenged for credit with the permission of the Head of the Department.

15.13.4.3 Russian Major Program

A Major in Russian consists of a minimum of 36 credit hours in Russian courses including 1000, 1001, 2010, 2011 and 3010, as well as 6 credit hours in courses at the 4000-level. The remaining 15 credit hours comprise any combination of language, literature and culture courses. It is strongly recommended that students in the Major program complete Language 2800 or Linguistics 2800 which may be substituted for 3 non-specified credit hours in Russian.

15.13.4.4 Russian Minor Program

A Minor in Russian consists of a minimum of 24 credit hours in Russian including 12 credit hours in the following: Russian 1000, 1001, 2010, and 2011.

The remaining 12 credit hours comprise any combination of language, literature and culture courses.

Students should note that with the permission of the Head of the Department, up to 6 credit hours for certain courses with a strong Russian content which are offered by other departments may be counted towards major and minor specializations in Russian.

15.13.4.5 Joint Major in Russian

As an alternative to a minor, a student may choose to complete a major in Russian, and a major in another eligible program in the Faculty of Humanities and Social Sciences. The Joint Major Program requires 3 fewer credit hours in each participating major as prescribed in each program's Calendar entry. For the joint major in Russian, 12 credit hours in language, literature and culture courses shall be required to fulfill the specification in the **Russian Major Program** for 15 additional credit hours above.

15.13.4.6 Regulations for the International Bachelor of Arts (iBA)

In addition to completing the normal requirements for a Bachelor of Arts and one of a Joint Honours, Honours, Major or Minor in Russian, students may elect to complete requirements for the **International Bachelor of Arts (iBA)**. As part of the minimum 120 credit hours, a student may use eligible credit hours in Russian to jointly satisfy other requirements of the iBA degree. When selecting courses, a student is encouraged to consult with an academic advisor early in the program and to consider **Table 1 Possible Course Sequencing for the First 45 credit hours of the Bachelor of Arts**.

15.13.5 Spanish

www.mun.ca/languages

Native speakers of Spanish and students with near-native fluency will not normally receive credit for courses taken at the first year level in their native language nor will they be allowed to challenge for credit at the first year level. Such students shall consult the Department to be placed at the appropriate level.

Spanish course descriptions are found at the end of the Faculty of Humanities and Social Sciences section under **Course Descriptions, Spanish** and are designated by SPAN.

15.13.5.1 Bachelor of Arts Degree Requirements

The Bachelor of Arts requires the successful completion of a minimum of 120 credit hours. A student must meet the requirements for a departmental Major, Minor, or Honours program and also meet the **Program Regulations – General and Honours Degrees** for the Faculty of Humanities and Social Sciences. A student is therefore advised to consult with the **Admission to the Bachelor of Arts General Degree Programs** regulations, the **Program Regulations - General and Honours Degrees** which also includes the **Bachelor of Arts General Degree Components**, **The Major Program**, and **The Minor Program** regulations. Information regarding honours programs is available at **Bachelor of Arts (Honours) Degree Regulations** as well as under each department's regulations.

A student is strongly encouraged to consult with an academic advisor to discuss available programs and requirements in the Faculty of Humanities and Social Sciences including the **Core Requirements**, **The Major Program**, **The Minor Program**, and the **Bachelor of Arts (Honours) Degree Regulations**. A student is advised to declare a program of study, including a Major and a Minor, before completing the first 45 credit hours of study. Information about declaring a Major and Minor in the Faculty of Humanities and Social Sciences is available at www.mun.ca/hss/programs/undergraduate/ideclare.php. Information regarding advisors for the Faculty of Humanities and Social Sciences is available at www.mun.ca/hss/about/contact/liaisons.php.

15.13.5.2 Spanish Major Program

1. A Major in Spanish consists of a minimum of 36 credit hours in Spanish. It is strongly recommended that students in the Spanish Major Program successfully complete Classics 1120 and 1121.
2. No more than 9 transfer credit hours may be used to fulfill the minimum requirements of the Major in Spanish.
3. Students who have spent an extended period of time studying Spanish in a Spanish-speaking milieu may discuss with the Head of the Department the suitability of seeking permission from the Undergraduate Waivers and Appeals Committee, Faculty of Humanities and Social Sciences to transfer up to a maximum of 3 additional credit hours.

15.13.5.3 Spanish Minor Program

1. A Minor in Spanish consists of a minimum of 24 credit hours in Spanish.
2. No more than 6 transfer credit hours may be used to fulfill the minimum requirements for a minor in Spanish. Students who have spent an extended period of time studying Spanish in a Spanish-speaking milieu may discuss with the Head of the Department the suitability of seeking permission from the Undergraduate Waivers and Appeals Committee, Faculty of Humanities and Social Sciences to transfer up to a maximum of 3 additional credit hours.

15.13.5.4 Joint Major in Spanish

As an alternative to a minor, a student may choose to complete a major in Spanish and a major in another eligible program in the Faculty of Humanities and Social Sciences. The Joint Major Program requires 3 fewer credit hours in each participating major as prescribed in each program's Calendar entry. For the joint major in Spanish, 3 fewer credit hours shall be required in Spanish beyond the first year.

15.13.5.5 Study Abroad Programs in Spanish

The Spanish section of the Department of Modern Languages, Literatures and Cultures offers students the opportunity of participating in Study Abroad programs in Spanish. These programs are designed to provide an intensive immersion experience in a Spanish-speaking country each summer. On successful completion of one of these programs, students will be awarded specific transfer credits applicable to their academic program at Memorial University of Newfoundland.

A Study Abroad program in Spanish will be offered each summer, provided that there is sufficient enrolment. All such courses will be offered outside the normal time frame for courses offered at Memorial University of Newfoundland.

Students will be required to register for either SPAN 2010/2020 or SPAN 3010/3020 in any one program.

Students who are unsure whether they meet the prerequisites for SPAN 2010, 2020, 3010, 3020, or 6900 should consult the Program Liaison for Spanish.

15.13.5.6 Regulations for the International Bachelor of Arts (iBA)

In addition to completing the normal requirements for a Bachelor of Arts and one of a Joint Honours, Honours, Major or Minor in Spanish, students may elect to complete requirements for the **International Bachelor of Arts (iBA)**. As part of the minimum 120 credit hours, a student may use eligible credit hours in Spanish to jointly satisfy other requirements of the iBA degree. When selecting courses, a student is encouraged to consult with an academic advisor early in the program and to consider **Table 1 Possible Course Sequencing for the First 45 credit hours of the Bachelor of Arts**.

15.14 Philosophy

www.mun.ca/philosophy

15.14.1 Department of Philosophy Description

Philosophy is the study of general and fundamental problems concerning matters such as knowledge, truth, beauty, law, justice, mind, language, and the right and the good, using a critical, generally systematic approach relying on reasoned argument. Philosophy is one of the most influential of all areas of study, providing the frameworks in which one thinks and acts. Allowing one to make sense of oneself and one's surroundings, Philosophy teaches not what to think but how to think. The study of Philosophy develops intellectual abilities. Beyond the knowledge and skills required for any particular profession, a good philosophical education enhances the capacity to participate responsibly and intelligently in public life.

The following undergraduate programs are available in the Department of Philosophy:

1. **Major in Philosophy**
2. **Minor in Philosophy**
3. **Joint Major in Philosophy**
4. **Honours in Philosophy**
5. **Joint Honours in Philosophy**
6. **Major in Medieval Studies**
7. **Minor in Medieval Studies**

Normally, 6 credit hours in Philosophy courses at the 1000 or 2000-level or a combination thereof, or permission from the Department, are prerequisites for Philosophy courses at the 3000-level and above. Normally, 6 credit hours in Philosophy courses at the 3000-level, or permission from the Department, are prerequisites for Philosophy courses at the 4000-level.

Philosophy course descriptions are found at the end of the Faculty of Humanities and Social Sciences section under **Course Descriptions, Philosophy** and are designated by PHIL.

15.14.2 Bachelor of Arts Degree Requirements

The Bachelor of Arts requires the successful completion of a minimum of 120 credit hours. A student must meet the requirements for a departmental Major, Minor, or Honours program and also meet the **Program Regulations – General and Honours Degrees** for the Faculty of Humanities and Social Sciences. A student is therefore advised to consult with the **Admission to the Bachelor of Arts General Degree Programs** regulations, the **Program Regulations - General and Honours Degrees** which also includes the **Bachelor of Arts General Degree Components**, **The Major Program**, and **The Minor Program** regulations. Information regarding honours programs is available at **Bachelor of Arts (Honours) Degree Regulations** as well as under each department's regulations.

A student is strongly encouraged to consult with an academic advisor to discuss available programs and requirements in the Faculty of Humanities and Social Sciences including the **Core Requirements**, **The Major Program**, **The Minor Program**, and the **Bachelor of Arts (Honours) Degree Regulations**. A student is advised to declare a program of study, including a Major and a Minor, before completing the first 45 credit hours of study. Information about declaring a Major and Minor in the Faculty of Humanities and Social Sciences is available at www.mun.ca/hss/programs/undergraduate/ideclare.php. Information regarding advisors for the Faculty of Humanities and Social Sciences is available at www.mun.ca/hss/about/contact/liaisons.php.

15.14.3 Major in Philosophy

In addition to meeting the requirements listed under **Program Regulations - General and Honours Degrees**, to complete a B.A. with a Major in Philosophy, students must complete a minimum of 36 credit hours in Philosophy courses as follows:

1. 3 credit hours in Philosophy 2010 or 2020;
2. 3 credit hours in Philosophy 2030;
3. 3 credit hours in Philosophy 2040 or 2050 (or the former 3400);
4. 6 credit hours in Philosophy 2201, 2205, or 2215;
5. 9 credit hours at the 3000-level;
6. 6 credit hours at the 4000-level; and,
7. 6 additional credit hours at any level. Normally these will include 3 credit hours at the 1000-level.

15.14.4 Minor in Philosophy

In addition to meeting the requirements listed under **Program Regulations - General and Honours Degrees**, to complete a B.A. with a Minor in Philosophy, students must complete a minimum of 24 credit hours in Philosophy courses as follows:

1. 3 credit hours in Philosophy 2010 or 2020;
2. 3 credit hours in Philosophy 2201, 2205, or 2215;
3. 9 credit hours at the 3000-level;
4. 3 credit hours at the 4000-level; and,
5. 6 additional credit hours at any level. Normally these will include 3 credit hours at the 1000-level.

15.14.5 Joint Major in Philosophy

As an alternative to a minor, a student may choose to complete a major in Philosophy and a major in another eligible program in the Faculty of Humanities and Social Sciences. The Joint Major Program requires 3 fewer credit hours in each participating major as prescribed in each program's Calendar entry. For the joint major in Philosophy, 3 fewer credit hours shall be required to fulfill clause 7 of the **Major in Philosophy** above.

15.14.6 Honours in Philosophy

An Honours degree provides students with a more in-depth education in the discipline of Philosophy and additional research and writing skills. An Honours degree may be required for admission to a graduate program and is useful preparation for law and other professional fields. Students considering the Honours program are encouraged to apply before their fourth semester. Admission to the program is in

accordance with ***UNIVERSITY REGULATIONS*** and the **Regulations for the Honours Degree of Bachelor of Arts**.

In addition to meeting the general requirements for the degree, to complete a B.A. with Honours in Philosophy, students must complete a minimum of 60 credit hours in Philosophy courses as follows:

1. 9 credit hours in Philosophy 2010, 2020, and 2030;
2. 3 credit hours in Philosophy 2040 or 2050 (or the former 3400);
3. 6 credit hours in Philosophy 2201, 2205, or 2215;
4. 24 credit hours in Philosophy at the 3000-level, including 3010 or 3020; 3230 or 3231; 3410; 3420;
5. 12 credit hours in Philosophy at the 4000-level, including Philosophy 4998 or 4999; and,
6. 6 additional credit hours at any level. Normally these will include 3 credit hours at the 1000-level.

15.14.7 Joint Honours in Philosophy

An Honours degree provides students with a more in-depth education in the discipline of Philosophy and additional research and writing skills. An Honours degree may be required for admission to a graduate program and is useful preparation for law and other professional fields. Students considering the Honours program are encouraged to apply before their fourth semester. Admission to the program is in accordance with ***UNIVERSITY REGULATIONS*** and the **Regulations for the Honours Degree of Bachelor of Arts**. A student's program for Joint Honours must be approved by each Head of Department involved, and conform to the Faculty of Humanities and Social Sciences General Regulations for Joint Honours degrees.

In addition to meeting the general requirements for the degree, to complete a B.A. (Joint Honours) in Philosophy, students must complete a minimum of 45 credit hours in Philosophy courses as follows:

1. 3 credit hours in Philosophy 2010 or 2020;
2. 3 credit hours in Philosophy 2030;
3. 3 credit hours in Philosophy 2040 or 2050 (or the former 3400);
4. 6 credit hours in Philosophy 2201, 2205, or 2215;
5. Philosophy 3010 or 3020; 3230 or 3231; 3410; 3420; and 9 additional credit hours at the 3000-level; and
6. Philosophy 4998 or 4999; and 6 additional credit hours in Philosophy at the 4000- level.
7. If a student opts to take the comprehensive exam or honours thesis in the other discipline, the student will take a minimum of 42 credit hours in Philosophy courses.

15.14.8 Regulations for the International Bachelor of Arts (iBA)

In addition to completing the normal requirements for a Bachelor of Arts and one of an Honours, Major or Minor in Philosophy, students may elect to complete requirements for the **International Bachelor of Arts (iBA)**. As part of the minimum 120 credit hours, a student may use eligible credit hours in Philosophy to jointly satisfy other requirements of the iBA degree. When selecting courses, a student is encouraged to consult with an academic advisor early in the program and to consider **Table 1 Possible Course Sequencing for the First 45 credit hours of the Bachelor of Arts**.

15.14.9 Previous Calendar Regulations

In accordance with ***UNIVERSITY REGULATIONS*** **- Degree and Departmental Regulations, Year of Degree and Departmental Regulations - Faculty of Humanities and Social Sciences and Faculty of Science**, students for a Philosophy Honours, Major, or Minor who had successfully completed a 2000-level course or above in Philosophy prior to September 2018 will normally follow the departmental regulations in effect at that time, although subsequent regulations are available for all students.

15.14.10 Major and Minor in Medieval Studies

The Major and Minor in Medieval Studies are administered by the Department of Philosophy.

The Major in Medieval Studies and the Minor in Medieval Studies are interdisciplinary programs offered by the Faculty of Humanities and Social Sciences that aim to promote the integrated study through core courses of a historical and cultural period, the Middle Ages, here defined as the period between Antiquity and the Modern Age. Such an approach, which coordinates the methods and subjects of several disciplines, mirrors the pluralistic and interreligious framework of the age. Core courses in Medieval Studies are intended to integrate the material and provide a common focus at the beginning of the programs.

Medieval Studies course descriptions are found at the end of the Faculty of Humanities and Social Sciences section under **Course Descriptions, Philosophy, Medieval Studies** and are designated by MST.

15.14.10.1 Advising

Students must carefully plan their course selection and regularly consult with the program's designated academic advisor. Questions about the delivery of a course should be directed to the appropriate academic unit. Information regarding advisors for the Faculty of Humanities and Social Sciences is available at www.mun.ca/hss/about/contact/liaisons.php.

15.14.10.2 Declaring the Major or Minor in Medieval Studies

Students wishing to declare a Major or Minor in Medieval Studies shall consult with the program's designated academic advisor to discuss the requirements of the program. Information about declaring a program of study in the Faculty of Humanities and Social Sciences is available at www.mun.ca/hss/programs/undergraduate/ideclare.php.

15.14.10.3 Regulations for the Major in Medieval Studies

1. A Major in Medieval Studies consists of all the general requirements of the Bachelor of Arts program, including a minimum of 36 credit hours in courses chosen from Table 1 Core Faculty of Humanities and Social Sciences Courses Approved for the Major and Minor in Medieval Studies as follows:
   a. 3 credit hours in Medieval Studies 1000 or the former Medieval Studies 2000;
   b. 6 credit hours in the study of the Latin language, normally Medieval Studies 1120 and 1121;
   c. 3 credit hours in one of Medieval Studies 2001 or 2002; and
   d. A further 24 credit hours in approved courses, including a minimum of 6 credit hours at the 3000-level or above, and a minimum of 6 credit hours in courses at the 4000-level;

2. As per the **Degree Regulations, General and Honours Degrees, The Major Program, Major Programs of Study**, students completing a Major in Medieval Studies must choose a single discipline Minor or a second Major.

15.14.10.4 Regulations for the Minor in Medieval Studies

1. The Minor in Medieval Studies consists of a minimum of 24 credit hours chosen from Table 1 Core Faculty of Humanities and Social Sciences Courses Approved for the Major and Minor in Medieval Studies as follows:
   a. Medieval Studies 1000 or the former Medieval Studies 2000;
   b. 3 credit hours in Medieval Studies 2001 or 2002;
   c. 3 credit hours in courses at the 4000-level; and
   d. an additional 15 credit hours in Medieval Studies courses. Courses at the 3000-level or above are recommended.
2. As per the **Degree Regulations, General and Honours Degrees, The Minor Program, Minor Programs of Study**, students completing a Minor in Medieval Studies must choose a single discipline Major.

15.14.10.5 Joint Major in Medieval Studies

As an alternative to a Minor or a second Major, a student may choose to complete a Joint Major in Medieval Studies and another eligible program in the Faculty of Humanities and Social Sciences. The Joint Major Program requires 3 fewer credit hours in each participating Major as prescribed in each program's Calendar entry. For the Joint Major in Medieval Studies, 3 fewer credit hours shall be required to fulfill clause 1.d. of the **Major in Medieval Studies** above.

15.14.10.6 Course List

1. The Medieval Studies program provides exposure to courses in various disciplines within the Faculty of Humanities and Social Sciences.
2. Not all courses are necessarily offered each year.
3. Students must be careful not to register for different designations of the same course that is crosslisted with different departments.
4. Normal departmental prerequisites for courses are applicable.

Table 1 Core Faculty of Humanities and Social Sciences Courses Approved for the Major and Minor in Medieval Studies

1000 Level Courses	2000 Level Courses	3000 Level Courses	4000 Level Courses
History 1009 the former History 2050 MST 1000 or the former MST 2000 MST 1120 or Classics 1120 MST 1121 or Classics 1121 MST 1130 or Classics 1130 MST 1131 or Classics 1131	MST 2001 or History 2320 MST 2002 or History 2330 MST 2200 or Classics 2200 MST 2205 or Philosophy 2205 MST 2300 or Classics 2300 MST 2494 or Archaeology 2494 MST 2600 or English 2600	History 3780 the former History 3930 the former History 3935 MST 3000 or English 3002, History 3000, Religious Studies 3000 MST 3001 or Archaeology 3001 or Folklore 3001 or the former History 3020 or the former Anthropology 3589 or the former Archaeology 3589 MST 3003 or Religious Studies 3560 MST 3110 or Philosophy 3110 or the former Philosophy 3760 MST 3006 or English 3006 or Gender Studies 3001 or the former Women's Studies 3001 or the former MST 3351 MST 3021 or English 3021 MST 3110 or the former MST 3200 or Classics 3200 or the former Classics 2205 MST 3300 or Classics 3300 or the former Classics 2305 MST 3500 or English 3500 MST 3592 or Archaeology 3592 or the former Archaeology 3685 MST 3600 or English 3600 MST 3710-3729 MST 3828 or English 3828	History 4003 the former History 4009 the former History 4010 the former History 4695 MST 4001-4020 MST 4500 or English 4500 MST 4600 or English 4600 MST 4601 or English 4601

15.14.10.7 Previous Calendar Regulations

In accordance with ***UNIVERSITY REGULATIONS*** **- Degree and Departmental Regulations, Year of Degree and Departmental Regulations - Faculty of Humanities and Social Sciences and Faculty of Science**, students for a Medieval Studies Major or Minor who had successfully completed a 2000-level course or above in Medieval Studies prior to September 2018 will normally follow the departmental regulations in effect at that time, although subsequent regulations are available for all students.

15.14.10.8 Diploma in Humanities

The Department of Philosophy administers the **Diploma in Humanities**. Credit hours in Philosophy and Medieval Studies may be eligible to jointly fulfill requirements of a degree and a diploma. For further information about this program, see **Diploma Programs Offered in the Faculty of Humanities and Social Sciences**, or contact the Program Director.

15.14.10.9 Certificate in History and Philosophy of Science and Technology

The Departments of Classics, History, and Philosophy jointly administer the Certificate in History and Philosophy of Science and Technology. Credit hours in Philosophy may be eligible to jointly fulfill requirements of a degree and a certificate. For further information about this program, see **Certificate Programs, Certificate in History and Philosophy of Science and Technology**, or contact the Program Director.

15.15 Political Science

www.mun.ca/posc

15.15.1 Department of Political Science Description

How do people live together in societies, and how should people live together? Political Science is the study of the institutions, organizations and norms that determine public lives. In Political Science there are discussions on basic concepts - such as "power", "government" or "democracy" - in order to understand the world and humanity's place in it. Once these concepts have been explored, there will be a study of the connections between them in order to better explain political outcomes, such as: why people vote for one political party as opposed to another, why governments and public policies differ in different countries, or why armed conflicts happen in some cases but not in other cases. Memorial University of Newfoundland's Department of Political Science has research strengths in public policy; international politics; and elections, campaigns and voting, particularly in Canada.

The following undergraduate programs are available in the Department of Political Science:

1. Major in Law and Society
2. Minor in Law and Society
3. Honours in Political Science
4. Major in Political Science
5. Honours and Major in Political Science (Co-operative)
6. Minor in Political Science
7. Joint Major in Political Science

The Department also offers two Political Science concentrations: a concentration in **Canadian Government** and a concentration in **Global Studies**. These concentrations are applicable to all programs in Political Science other than the Minor.

Political Science course descriptions are found at the end of the Faculty of Humanities and Social Sciences section under **Course Descriptions, Political Science** and are designated by POSC.

15.15.2 Bachelor of Arts Degree Requirements

The Bachelor of Arts requires the successful completion of a minimum of 120 credit hours. A student must meet the requirements for a departmental Major, Minor, or Honours program and also meet the **Program Regulations – General and Honours Degrees** for the Faculty of Humanities and Social Sciences. A student is therefore advised to consult with the **Admission to the Bachelor of Arts General Degree Programs** regulations, the **Program Regulations - General and Honours Degrees** which also includes the **Bachelor of Arts General Degree Components**, **The Major Program**, and **The Minor Program** regulations. Information regarding honours programs is available at **Bachelor of Arts (Honours) Degree Regulations** as well as under each department's regulations.

A student is strongly encouraged to consult with an academic advisor to discuss available programs and requirements in the Faculty of Humanities and Social Sciences including the **Core Requirements**, **The Major Program**, **The Minor Program**, and the **Bachelor of Arts (Honours) Degree Regulations**. A student is advised to declare a program of study, including a Major and a Minor, before completing the first 45 credit hours of study. Information about declaring a Major and Minor in the Faculty of Humanities and Social Sciences is available at www.mun.ca/hss/programs/undergraduate/ideclare.php. Information regarding advisors for the Faculty of Humanities and Social Sciences is available at www.mun.ca/hss/about/contact/liaisons.php.

15.15.3 General Information

1. The Department's website at www.mun.ca/posc features details about upcoming course offerings, course instructors, the undergraduate (Honours, Major, Minor) and graduate (Master of Arts) programs, frequently asked questions, and more. In the event of conflicting information, the official University Calendar and information issued by the Office of the Registrar shall take precedence.
2. Anticipated completion of an introductory course is generally recommended prior to enrolling in a corresponding course at the next level. Students following this path may opt to take courses in the same area in the same academic year (e.g., if a 2000-level course is successfully completed in Fall then a corresponding 3000-level course may be taken in Winter). This is presented, for illustrative purposes only, in **Table 1 Recommended Course Sequencing by Student's Area of Interest**.

Table 1 Recommended Course Sequencing by Student's Area of Interest

	Political Theory	International Politics	Comparative Politics	Public Policy and Administration	Canadian Politics
Overview Course	POSC 1000	POSC 1000	POSC 1000	POSC 1000	POSC 1000
Area introduction	POSC 2100	POSC 2200	POSC 2300	POSC 2600	POSC 2800
Area specialization	POSC 31xx	POSC 32xx	POSC 33xx	POSC 36xx	POSC 38xx
Advanced seminar	POSC 41xx	POSC 42xx	POSC 43xx	POSC 46xx	POSC 48xx

With the written consent of the course instructor and the Head of the Department, certain prerequisite requirements may be waived.

15.15.3.1 Course Prerequisites

1. The following prerequisite schedule applies to Political Science courses, except Co-operative work term courses.
2. All research techniques courses POSC 3010, 4010, 4011 have prerequisites specified in their descriptions.
3. 1000-level: No prerequisites. Suitable for students in all disciplines.
4. 2000-level: No prerequisites. Successful completion of POSC 1000 and POSC 1001 is generally recommended.
5. 3000-level: Except for POSC 3010, no prerequisites. Successful completion of a corresponding 2000-level area introduction course is generally recommended as outlined under **Table 1 Recommended Course Sequencing by Student's Area of Interest**.
6. 4000-level: Prerequisites are specified in course descriptions. Completion of at least 12 credit hours in Political Science, including 6 at the 3000-level, is generally recommended.

15.15.3.2 Previous Calendar Regulations

Students who successfully completed the former POSC 2010 may elect to treat it as POSC 1001 for the purposes of Political Science degree regulations and towards the Bachelor of Arts **Critical Reading and Writing Requirement**.

15.15.4 Honours in Political Science

1. An Honours degree provides students with additional research and writing skills, may be required for admission to a graduate program, and may be useful preparation for law and other professional fields. Students considering the Honours program are encouraged to apply before their fourth semester and to begin considering a potential Honours research topic before their seventh semester. Admission to the program is in accordance with ***UNIVERSITY REGULATIONS*** and the **Regulations for the Honours Degree of Bachelor of Arts**.
2. In addition to meeting the general requirements for the degree, students for a B.A.(Hons.) in Political Science must complete at least 60 credit hours in courses offered by the Department, including:
   a. 18 credit hours in POSC 1000, 2100, 2800, 3010, 4010, 4011;
   b. a minimum of 6 credit hours in Political Science courses numbered x2xx and/or x3xx;
   c. a minimum of 3 credit hours in Political Science courses numbered x6xx and/or x8xx (in addition to POSC 2800);
   d. 27 credit hours at the 3000 or 4000 level (in addition to POSC 3010), including a minimum of 9 credit hours at the 4000 level (in addition to POSC 4010 and 4011); and
   e. a further 6 credit hours in Political Science at any level.
3. Students for an Honours degree are required to select courses as specified under **Honours in Political Science**. A possible course pattern is presented in **Table 2 Course Pattern for an Honours in Political Science**.
4. Prior to enrolling in POSC 4010, all Honours students should review the *Guidelines Governing Honours Essays* available from the Head of the Department, and are required to follow these guidelines while enrolled in POSC 4010 and 4011.
5. Students electing Joint Honours are required to complete at least 51 credit hours in Political Science, including 42 credit hours chosen in accordance with the pattern set out in the degree regulations for a Bachelor of Arts with a **Major in Political Science**. An additional 9 credit hours can be selected from POSC courses, however, no more than 3 credit hours from POSC 1010 or 1020 are eligible. If the student chooses to complete the Honours Essay (POSC 4010 and 4011) in Political Science, it must be passed with a grade of 70% or better.

Notes:
1. *No more than one of POSC 1010 or 1020 can be included among the 60 Political Science credit hours required for an Honours degree.*
2. *For Honours, the former Philosophy 3870 and the former 3890 may be substituted for 3000-level Political Science credit hours (31xx). No other such substitutions may apply.*
3. *If the Honours essay topic encompasses one of Canadian Government or Global Studies, the POSC 4010 and/or 4011 may be applied towards the applicable Political Science concentration, upon recommendation of the Head of the Department and subject to the approval of the Faculty's Undergraduate Waivers and Appeals Committee. Refer to* ***Political Science Concentrations****.*

Table 2 Course Pattern for an Honours in Political Science (POSC)

Term	Political Science Courses (POSC)	Credit Hours
Fall **Academic Term 1**	POSC 1000	3
Winter **Academic Term 2**	POSC 1001, 2800 (POSC 1001 is a recommended choice)	6
Fall & Winter **Academic Terms 3 and 4**	POSC 2100 and two of x2xx or x3xx One of POSC x6xx or x8xx	12
Fall & Winter **Academic Terms 5 and 6**	POSC 3010 and five other 3000-levels One POSC course at the 4000-level (depends upon level of courses taken in previous year)	21
Fall **Academic Term 7**	POSC 4010 Two other POSC courses at the 4000-level	9
Winter **Academic Term 8**	POSC 4011 Two other POSC courses at the 3000- or 4000-levels	9

15.15.5 Major in Political Science

1. In addition to meeting the general requirements for the degree, students completing a Major in Political Science must complete 39 credit hours in courses offered by the Department, including:
   a. 12 credit hours in POSC 1000, 2100, 2800, 3010;
   b. a minimum of 6 credit hours in Political Science courses numbered x2xx and/or x3xx;
   c. a minimum of 3 credit hours in Political Science courses numbered x6xx and/or x8xx (in addition to POSC 2800);
   d. 15 credit hours at the 3000 or 4000 level (in addition to POSC 3010), including a minimum of 6 credit hours at the 4000 level; and
   e. a further 3 credit hours in Political Science at any level.
2. Students for a Major degree are required to select courses as specified under **Major in Political Science**. A possible course pattern is presented in **Table 3 Suggested Course Pattern for a Major in Political Science**

Table 3 Suggested Course Pattern for a Major in Political Science (POSC)

Term	Political Science Courses (POSC)	Credit Hours
Fall **Academic Term 1**	POSC 1000	3
Winter **Academic Term 2**	POSC 1001, 2800 (POSC 1001 is a recommended choice)	6
Fall & Winter **Academic Terms 3 and 4**	POSC 2100 and two of x2xx and/or x3xx One of POSC x6xx or x8xx	12
Fall & Winter **Academic Terms 5 and 6**	POSC 3010 and three other 3000-levels (depends upon level of courses taken in previous year)	12
Fall & Winter **Academic Terms 7 and 8**	Two 4000-level POSC courses	6

Notes:
1. *No more than one of POSC 1010 or 1020 can be included among the 42 Political Science credit hours required for a Major.*
2. *POSC 1001 is a recommended choice for a Major.*
3. *For a Major, the former Philosophy 3870 and the former 3890 may be substituted for 3000-level Political Science credit hours (31xx). No other such substitutions may apply.*

15.15.6 Political Science Concentrations

While meeting the requirements for a program in Political Science, other than a Minor in Political Science, students may optionally select courses in one of two formal concentrations which, if completed, will be noted on the student's transcript.

15.15.6.1 Concentration in Canadian Government

The concentration in Canadian Government is applicable to all programs in Political Science other than the Minor in Political Science. As part of their course selection, students opting for a Canadian Government concentration will complete a minimum of 24 credit hours in POSC courses emphasizing public policy (second digit is "6") and/or Canadian politics (second digit is "8"). These POSC x6xx and/or x8xx credit hours must include 2600 and 2800, and at least 6 credit hours at the 4000 level. Students are generally advised to follow the possible course pattern presented in **Table 4 Course Pattern for Optional Political Science (POSC) Concentration**. For Honours students, credit hours in POSC 4010 and/or POSC 4011 may be deemed eligible towards the concentration; such students must submit their request in writing to the Head of the Department who will communicate a recommendation to the Faculty's Undergraduate Waivers and Appeals Committee.

15.15.6.2 Concentration in Global Studies

The concentration in Global Studies is applicable to all programs in Political Science other than the Minor in Political Science. As part of their course selection, students opting for a Global Studies concentration will complete a minimum of 24 credit hours in POSC courses emphasizing international politics (second digit is "2") and/or comparative politics (second digit is "3"). These POSC x2xx and/or x3xx credit hours must include 2200 and 2300, and at least 6 credit hours at the 4000-level. Students are generally advised to follow the possible course pattern presented in **Table 4 Course Pattern for Optional Political Science (POSC) Concentration**. For Honours students, credit hours in POSC 4010 and/or POSC 4011 may be deemed eligible towards the concentration; such students must submit their request in writing to the Head of the Department who will communicate a recommendation to the Faculty's Undergraduate Waivers and Appeals Committee.

Table 4 Course Pattern for Optional Political Science (POSC) Concentration

Concentration	Courses for Political Science (POSC) Honours or Major
No Concentration	Honours: See **Table 2** Major: See **Table 3**
Canadian Government	Follow applicable **Table 2** or **Table 3**, choosing 2600, three 36xx/38xx and three 46xx/48xx courses.
Global Studies	Follow applicable **Table 2** or **Table 3**, choosing 2200 and 2300, three 32xx/33xx and three 42xx/43xx courses. Up to two 31xx and/or 41xx courses may be included.

15.15.7 Honours and Major in Political Science (Co-operative)

www.mun.ca/coop

The Political Science Co-operative Education Program (PSCE) is available to full-time Political Science Honours and Majors students only.

The PSCE provides an opportunity for students to obtain public policy and other relevant full-time employment experience in fields related to Political Science. Students will apply their academic knowledge to practical situations as they develop their research, analysis and writing skills, as well as their career interests. A commitment to ethical and professional conduct is expected of all students.

Students who are accepted into the PSCE must complete the normal requirements for their degree, as well as three full-time work terms. In addition to following the PSCE regulations, students must satisfy the **Bachelor of Arts General Degree Regulations**, the **Bachelor of Arts (Honours) Degree Regulations**, and the Department's requirements for the **Honours in Political Science** or the **Major in Political Science**, as applicable. Additional information about the PSCE can be found on the Department of Political Science website at www.mun.ca/posc.

15.15.7.1 Eligibility for Admission

1. Admission to the Political Science Co-operative Education Program is limited and selective.
2. A student should note that it is possible to apply to enter the PSCE only in the Fall semester of each academic year. PSCE application forms, and the application deadline are available at the Department of Political Science website.
3. The primary criterion used in reaching decisions on applications is overall academic achievement. Applicants may be asked to attend an interview.

4. To be eligible for consideration of admission to PSCE, an applicant must have completed a minimum of 42 credit hours, including POSC 1000 and 2800, by the end of that semester; have an overall average of at least 65%, and a minimum average of 70% in Political Science courses. Applicants transferring from another institution must normally have completed at least one semester at Memorial University of Newfoundland before applying to the program.

15.15.7.2 Program of Study

1. In addition to the requirements below students must fulfill all requirements for either a Honours or Major in Political Science.
2. Students' status in the program is assessed at the end of each semester. To be eligible to continue, students must maintain full-time student status (9 or more credits in a semester) and maintain a cumulative average of at least 65% and an average of at least 70% in Political Science courses. A student who fails a required course, fails to maintain the required cumulative average, or does not maintain full-time status will not be promoted to the next semester and will be required to withdraw from the program.
3. Students must successfully complete three work terms, at least one of which must occur during a Fall or Winter semester. No more than two of the three work terms may be completed consecutively.
4. Work terms normally begin after the student has completed four academic terms. The third work term must be completed before the final academic term.
5. Students who successfully complete all three work terms will be awarded 3 credit hours for completion of POSC 460W. These credit hours may be used as an elective as per **Degree Regulations - General and Honours Degrees, Electives** of the Faculty of Humanities and Social Sciences.

Course patterns may vary. Students are encouraged to meet with the undergraduate Director early in their program in order to establish a course pattern that meets the requirements as set out in these regulations.

15.15.7.3 Work Term Placements

The PSCE is coordinated by the Academic Staff Members in Co-operative Education in consultation with a designated Department faculty member.

1. A student is ultimately responsible for securing work term placements. ASMs-CE provide support for the job search and inform students of potential opportunities.
2. A student who applies for admission to the PSCE gives permission to the University to provide a copy of the student's resume and university transcript to potential employers.
3. A student who is enrolled in a Co-operative Education program may independently obtain a work term placement, in consultation with the ASMs-CE. Such employment positions must satisfy the criteria for work terms, be confirmed in writing by the employer, and be approved by the ASM-CE before the first day of the work term according to the Co-operative Education website.
4. Co-operative students are required to complete professional development seminars offered by the ASMs-CE.
5. Work terms are normally 12-16 weeks in duration, full-time and paid. Remuneration for work placements is determined by employers based on their internal wage structures. The start and end dates for each work term are shown on he Co-operative Education website.

15.15.7.4 Registration and Evaluation of Performance

1. In Work Terms I, II, and III, a student must register for POSC 260W, 360W or 460W, respectively.
2. The Work Term evaluations shall consist of two components:
   a. On-the-job Student Performance: this will be assessed by the ASM-CE using information gathered during the Work Term and input from the employer towards the end of the Work Term. Evaluation of the job performance will result in one of the following classifications: PASS WITH DISTINCTION, PASS, FAIL.
   b. Work Term Assignment(s): One or more work term assignment(s) as outlined in the course syllabus. Evaluation of the Work Term assignment(s) will result in one of the following classifications: PASS WITH DISTINCTION, PASS, FAIL.
3. Evaluation of the on-the-job performance and work term assignments are recorded separately on the student's transcript for each work term.
4. Overall evaluation of the work term will result in one of the following final grades being awarded for POSC 260W, 360W or 460W as applicable:
   a. *Pass with Distinction*: Indicates that the student received a grade of PASS WITH DISTINCTION on both the on-the-job performance and the work term assignments.
   b. *Pass*: Indicates that the student received a grade of PASS on both the on- the-job performance and the work term assignments or a grade of PASS on one component and a grade of PASS WITH DISTINCTION on the other component.
   c. *Fail*: Indicates a grade of FAIL in one or both of the evaluation components.
5. To be eligible for promotion from the work term and continuation in the PSCE a student must not be awarded a Fail. Students should also refer to the ***UNIVERSITY REGULATIONS*** **- General Academic Regulations (Undergraduate)**.
6. A student will not be eligible to continue in the program if the student withdraws from a Work Term subsequent to a job placement without acceptable cause and/or without prior approval from both the ASM-CE and the Head of the Department; fails to honour an agreement to work with an employer; and/or conducts themselves in such a manner as to cause their discharge from the job.

15.15.8 Minor in Political Science

1. Students for a Minor in Political Science must complete at least 24 credit hours in courses offered by the Department, including:
   a. POSC 1000;
   b. a minimum of 6 credit hours at the 2000-level, which must include POSC 2800; and
   c. a minimum of 12 credit hours at the 3000-level or above, which must include at least 3 credit hours at the 4000-level.

   Notes: *1. No more than one of POSC 1010 or 1020 can be included among the 24 POSC credit hours required for a Minor.*
   2. POSC 1001 and 3010 are recommended choices for a Minor.
   3. For a Minor, credit hours in another discipline may not be substituted for POSC credit hours.

2. Students for a Minor are required to select courses as specified under **Minor in Political Science**. A possible course pattern is presented in **Table 7 Course Pattern for a Minor in Political Science**.

Table 7 Course Pattern for a Minor in Political Science (POSC)

Term	Political Science Courses (POSC)	Credit Hours
Fall **Academic Term 1**	POSC 1000	3
Winter **Academic Term 2**	POSC 2800	3
Fall & Winter **Academic Terms 3 and 4**	POSC 1001 (POSC 1001 is a recommended choice) One of POSC 2100, 2200, 2300 or 2600	6
Fall & Winter **Academic Terms 5 and 6**	POSC 1001 (POSC 1001 is a recommended choice) One POSC course at the 3000-level	6
Fall & Winter **Academic Terms 7 and 8**	One POSC course at the 3000-level One POSC course at the 4000-level	6

15.15.9 Joint Major in Political Science

As an alternative to a minor, a student may choose to complete a major in Political Science and a major in another eligible program in the Faculty of Humanities and Social Sciences. The Joint Major Program requires 3 fewer credit hours in each participating major as prescribed in each program's Calendar entry. For the joint major in Political Science, the requirement for a further 3 credit hours in Political Science at any level shall not apply.

15.15.10 Regulations for the International Bachelor of Arts (iBA)

In addition to completing the normal requirements for a Bachelor of Arts and one of a Joint Honours, Honours, Major or Minor in Political Science, students may elect to complete requirements for the **International Bachelor of Arts (iBA)**. As part of the minimum 120 credit hours, a student may use eligible credit hours in Political Science to jointly satisfy other requirements of the iBA degree. When selecting courses, a student is encouraged to consult with an academic advisor early in the program, to consider **Table 2 Possible Course Sequencing for the International Bachelor of Arts (iBA) (First 60 Credit Hours)**, and to consider Political Science courses listed in **Table 3 International Studies (IS) Designated Courses**. Up to 12 credit hours in Political Science IS courses may be used towards the **International Studies (IS) Courses Requirement**.

15.15.11 Major and Minor in Law and Society

The Major and Minor in Law and Society are administered by the Department of Political Science.

The Major in Law and Society and the Minor in Law and Society are interdisciplinary programs that encourage students to engage in the academic and philosophical study of different facets of law and its role in society. They will acquaint and confront students with different aspects of the history, philosophical basis, and role of law in modern society. They include courses which deal explicitly with law, courses in social and political theory, and courses examining the role of law and its norms in diverse settings. Core courses in Law and Society integrate the material and provide a common focus at the beginning and the end of the programs. These are not pre-law programs nor do they offer a certificate or qualification in legal studies.

Law and Society course descriptions are found at the end of the Faculty of Humanities and Social Sciences section under **Course Descriptions, Political Science, Law and Society** and are designated by LWSO.

15.15.11.1 Advising

Due to the nature of interdisciplinary programming, students must carefully plan their course selection and regularly consult with the program's designated academic advisor. Questions about the delivery of a course should be directed to the appropriate academic unit. Information regarding advisors for the Faculty is available at www.mun.ca/hss/about/contact/liaisons.php.

15.15.11.2 Declaring the Interdisciplinary Major or Interdisciplinary Minor in Law and Society

Students wishing to declare a Major or a Minor in Law and Society shall consult with the program's designated academic advisor to discuss the requirements of the program. Information about declaring a program of study in the Faculty of Humanities and Social Sciences is available at www.mun.ca/hss/programs/undergraduate/ideclare.php. Information regarding advisors for the Faculty of Humanities and Social Sciences is available at www.mun.ca/hss/about/contact/liaisons.php.

15.15.11.3 Regulations for the Interdisciplinary Major in Law and Society

1. A Major in Law and Society consists of all the general requirements of the Bachelor of Arts program, including a minimum of 36 credit hours in courses selected from **Table 1 Core Faculty of Humanities and Social Sciences Courses Approved for the Major or Minor in Law and Society** and **Table 2 Other Faculty of Humanities and Social Sciences Courses Approved for the Major or Minor in Law and Society** below as follows:
   a. as per the **Degree Regulations, General and Honours Degrees, The Major Program, Major Programs of Study**, courses from a minimum of any three Humanities and Social Sciences disciplines, and no more than 15 credit hours in any one Humanities and Social Sciences discipline other than Law and Society;
   b. a minimum of 12 credit hours in Law and Society courses, which must include LWSO 1000 and 4000; and

c. an additional 24 credit hours chosen from **Table 1 Core Faculty of Humanities and Social Sciences Courses Approved for the Major or Minor in Law and Society** and/or **Table 2 Other Faculty of Humanities and Social Sciences Courses Approved for the Major or Minor in Law and Society**, which must include at least 15 credit hours at the 3000-level or above, including at least 3 credit hours at the 4000-level.

In fulfilling the requirements above, no more than 15 credit hours can be counted from **Table 2 Other Faculty of Humanities and Social Sciences Courses Approved for the Major or Minor in Law and Society**.

2. Before registering for any 4000-level Law and Society course, students must complete 18 credit hours selected from courses in **Table 1 Core Faculty of Humanities and Social Sciences Courses Approved for the Major or Minor in Law and Society**, including LWSO 1000.
3. As per the **Degree Regulations, General and Honours Degrees, The Major Program, Major Programs of Study**, students completing a Major in Law and Society must also choose a single-discipline Minor or a Major in single-discipline.

15.15.11.4 Regulations for the Interdisciplinary Minor in Law and Society

1. A Minor in Law and Society consists of a minimum of 24 credit hours in courses selected from **Table 1 Core Faculty of Humanities and Social Sciences Courses Approved for the Major or Minor in Law and Society** and **Table 2 Other Faculty of Humanities and Social Sciences Courses Approved for the Major or Minor in Law and Society** below as follows:
   a. as per the **Degree Regulations, General and Honours Degrees, The Major Program, Minor Programs of Study**, courses from a minimum of any three Humanities and Social Sciences disciplines, no more than 9 credit hours in any one Humanities and Social Sciences discipline other than Law and Society and a maximum of 15 credit hours in Political Science;
   b. a minimum of 9 credit hours in Law and Society courses, which must include LWSO 1000 and 4000; and
   c. an additional 15 credit hours chosen from **Table 1 Core Faculty of Humanities and Social Sciences Courses Approved for the Major or Minor in Law and Society** and/or **Table 2 Other Faculty of Humanities and Social Sciences Courses Approved for the Major or Minor in Law and Society**, including at least 9 credit hours at the 3000-level or above. In fulfilling the requirements above, no more than 9 credit hours can be counted from **Table 2 Other Faculty of Humanities and Social Sciences Courses Approved for the Major or Minor in Law and Society**.
2. Before registering for any 4000-level Law and Society course, students must complete 18 credit hours selected from courses from **Table 1 Core Faculty of Humanities and Social Sciences Courses Approved for the Major or Minor in Law and Society**, including LWSO 1000.
3. As per the **Degree Regulations, General and Honours Degrees, The Major Program, Major Programs of Study**, students completing a Minor in Law and Society must choose a single discipline Major.

15.15.11.5 Course List

1. Interdisciplinary programs provide exposure to courses in various disciplines within the Faculty of Humanities and Social Sciences. **Table 1** courses are Faculty of Humanities and Social Sciences courses whose Calendar entry establishes a focus on law and society, and are fundamental to the program of study. Subject to the program regulations, they may be supplemented with **Table 2** courses whose Calendar entry establishes an emphasis on the study of aspects of society that shape and/or are shaped by law. Not all courses are necessarily offered each year. Students must be careful not to register for different designations of the same course that is crosslisted with different departments. Normal departmental prerequisites for courses are applicable.
2. As per the **Degree Regulations, General and Honours Degrees, The Major Program, Major Programs of Study**, up to 6 credit hours obtained in undergraduate courses at Memorial University of Newfoundland that are not listed in the Faculty of Humanities and Social Sciences **Course Descriptions** may be deemed eligible towards the Major in Law and Society, or 3 such credit hours towards the Minor in Law and Society. Undergraduate courses not delivered by the Faculty of Humanities and Social Sciences that have been approved as Table 2 electives include Business 3005, 4005, 4006, 5332; Education 4420; Human Kinetics and Recreation 3535; Psychology 2150; Social Work 3720.
3. Students registered in the **Joint Degrees of Bachelor of Arts and Bachelor of Commerce (Co-operative)** who are pursuing a Major or a Minor in Law and Society are eligible to complete up to 12 credit hours for the Major and 6 credit hours for the Minor in approved courses that do not appear in the Faculty of Humanities and Social Sciences **Course Descriptions**. The normal limit that is identified in the **Degree Regulations, General and Honours Degrees, The Major Program, Major Programs of Study** does not apply to those students.

Table 1 Core Faculty of Humanities and Social Sciences Courses Approved for the Major or Minor in Law and Society

1000 and 2000 Level Courses	3000 Level Courses	4000 Level Courses
Criminology 2400 or the former Police Studies 1000, 2000, or 2200 Linguistics 2220 LWSO 1000, 2000 Philosophy 2370 or the former 2400 Political Science 1000, 2800 Religious Studies 2850	Criminology 3000 or the former Police Studies 3000 LWSO 3010-3019, 3200, 3215, 3400, 3830 Political Science 3210, 3215, 3620, 3800, 3820, 3830 Sociology 3306, 3395	LWSO 4000, 4900, 4901-4909 Political Science 4200 Sociology 4095, 4099, 4212

1000 and 2000 Level Courses	3000 Level Courses	4000 Level Courses
Anthropology 2260, 2413 Archaeology 2492 Philosophy 2040, 2050 (or the former 2230, 3400) Political Science 2600 Sociology 2100	Gender Studies 3500 Political Science 3290, 3810 Sociology 3130, 3290, 3320	Political Science 4360, 4370

15.15.11.6 Previous Calendar Regulations

In accordance with ***UNIVERSITY REGULATIONS*** **- Degree and Departmental Regulations, Year of Degree and Departmental Regulations - Faculty of Humanities and Social Sciences and Faculty of Science**, students for an Interdisciplinary Major or Minor in Law and Society will normally follow regulations in effect in the academic year in which the student first successfully completes a course in that subject at the 2000-level or above which may be applied to the major or minor program respectively. However, the student may

elect to follow subsequent regulations introduced during the student's tenure in a program. These “grandparented” students are encouraged to consult the program's designated academic advisor for assistance with course selection.

15.15.12 Certificate in Public Policy

The Department of Political Science administers the **Certificate in Public Policy**. Credit hours in Political Science and Law and Society may be eligible to jointly fulfill requirements of a degree and a certificate. For further information about this program, see **Certificate Programs Offered in the Faculty of Humanities and Social Sciences**, or contact the Program Director.

15.16 Psychology

For Departmental Regulations and Course Descriptions, see Faculty of Science section of the Calendar.

The following undergraduate programs are available in the Department of Psychology:

1. Biochemistry and Psychology (Behavioural Neuroscience) Joint Honours (B.Sc. only)
2. Biochemistry (Nutrition) and Psychology (Behavioural Neuroscience) Joint Honours (B.Sc. only)
3. Biology and Psychology Joint Honours (B.Sc. only)
4. Biology and Psychology (Behavioural Neuroscience) Joint Honours (B.Sc. only)
5. Major and Honours in Behavioural Neuroscience (B.Sc. only)
6. Major and Honours in Behavioural Neuroscience (Co-operative) (B.Sc. only)
7. Major and Honours in Psychology (B.A. or B.Sc.)
8. Major and Honours in Psychology (Co-operative) (B.Sc. only)
9. Minor in Psychology (B.A. or B.Sc.)

15.17 Religious Studies

www.mun.ca/relstudies

15.17.1 Department of Religious Studies Description

The Department of Religious Studies approaches the world's religious traditions and contemporary religiosity as historical and cultural phenomena, employing a variety of methods and theoretical perspectives. In addition to studying the beliefs and practices that comprise religion in its historical and contemporary forms, the Department's curriculum includes courses that contextualize religions in relation to the arts, popular culture, politics, gender, science, ethics, and secularism.

The following programs are available in the Department of Religious Studies:

1. Major in Religious Studies
2. Minor in Religious Studies
3. Joint Major in Religious Studies
4. Honours in Religious Studies
5. Joint Honours Degree in Religious Studies

15.17.2 Bachelor of Arts Degree Requirements

The Bachelor of Arts requires the successful completion of a minimum of 120 credit hours. A student must meet the requirements for a departmental Major, Minor, or Honours program and also meet the **Program Regulations – General and Honours Degrees** for the Faculty of Humanities and Social Sciences. A student is therefore advised to consult with the **Admission to the Bachelor of Arts General Degree Programs** regulations, the **Program Regulations - General and Honours Degrees** which also includes the **Bachelor of Arts General Degree Components**, **The Major Program**, and **The Minor Program** regulations. Information regarding honours programs is available at **Bachelor of Arts (Honours) Degree Regulations** as well as under each department’s regulations.

A student is strongly encouraged to consult with an academic advisor to discuss available programs and requirements in the Faculty of Humanities and Social Sciences including the **Core Requirements**, **The Major Program**, **The Minor Program**, and the **Bachelor of Arts (Honours) Degree Regulations**. A student is advised to declare a program of study, including a Major and a Minor, before completing the first 45 credit hours of study. Information about declaring a Major and Minor in the Faculty of Humanities and Social Sciences is available at www.mun.ca/hss/programs/undergraduate/ideclare.php. Information regarding advisors for the Faculty of Humanities and Social Sciences is available at www.mun.ca/hss/about/contact/liaisons.php.

15.17.3 General Information

Religious Studies 1000 is a basic courses which introduces students to the academic study of religion. Religious Studies 1040 and 1041 (Introduction to Chinese), Religious Studies 1050 and 1051 (Introduction to Biblical Hebrew), Religious Studies 1060 and 1061 (Sanskrit Language Study), are courses which fulfil the language requirement in the Faculty of Humanities and Social Sciences.

Religious Studies course descriptions are found at the end of the Faculty of Humanities and Social Sciences section under **Course Descriptions, Religious Studies** and are designated by RELS.

15.17.4 General Degree

15.17.4.1 Major in Religious Studies

Students pursuing a major in Religious Studies are advised to choose their program in consultation with the Department. Students are required to take a minimum of 36 hours in Religious Studies, including:

1. at least 3 credit hours at the 1000 level;
2. at least 12 credit hours at the 2000 level;
3. at least 18 credit hours at the 3000 level or higher; and
4. at least one of Religious Studies 4001, 4002, 4812.

A student pursuing a Major in Religious Studies is encouraged to successfully complete Language Study (LS) courses offered by the Department in order to fulfill the Bachelor of Arts Language Study (LS) Requirement and as preparation for advanced studies in

Religious Studies.

15.17.4.2 Minor in Religious Studies

1. A minimum of 24 credit hours in courses in Religious Studies is required, including at least 9 credit hours in courses at the 3000 level or above.
2. With the exception of the Language Study (LS) courses (1040, 1041, 1050, 1051, 1060, 1061), no more than two 1000-level courses can be counted as credit towards a minor.

15.17.4.3 Joint Major in Religious Studies

As an alternative to a minor, a student may choose to complete a major in Religious Studies and a major in another eligible program in the Faculty of Humanities and Social Sciences. The Joint Major Program requires 3 fewer credit hours in each participating major as prescribed in each program's Calendar entry. For the joint major in Religious Studies, a minimum of 33 credit hours shall be required in clause 1. under the **Major in Religious Studies** and only 3 additional credit hours in clause 6. under the **Major in Religious Studies** above.

15.17.5 Honours Degree

1. Students planning to complete further work in Religious Studies should bear in mind that an Honours degree is the normal requirement for admission to Graduate Schools.
2. Students planning to complete an Honours Degree of Bachelor of Arts with a Major in Religious Studies must comply with the **General Regulations for Honours Degrees**, and must complete at least 60 credit hours in Religious Studies courses of which at least 36 of these 60 credit hours must be at the 3000-level or above. In addition, the 60 credit hours must include the 36 credit hours in course requirements to fulfill the Major in Religious Studies and a further 24 credit hours in Religious Studies, including one of Religious Studies 4998 (a comprehensive examination in the area of their specialization) or Religious Studies 4999 (Honours Essay).
3. Students considering Honours should arrange their program at the earliest opportunity, normally before the beginning of their fifth semester at the University.
4. Students will normally be required to have a reading knowledge of a language basic to their area of specialization.
5. In each case the program of studies leading to an Honours degree will be determined in consultation with the Head of the Department of Religious Studies, or delegate, keeping in mind the needs and interests of the individual student.
6. A student pursuing an Honours in Religious Studies is encouraged to successfully complete Language Study (LS) courses offered by the Department in order to fulfill the Bachelor of Arts **Language Study (LS) Requirement** and as preparation for advanced studies in Religious Studies. Students whose area of specialization requires a knowledge of Greek must successfully complete Classics 1130 and 1131. In such cases these courses may be substituted for 6 of the 60 credit hours required for an Honours degree in Religious Studies.

15.17.6 Joint Honours Degree in Religious Studies and Another Major Subject

The attention of students is drawn to the possibility of doing a Joint Honours program that includes Religious Studies as one of the Major subjects. Such a program may be arranged in consultation with the Head of the Department of Religious Studies and the Head of the other Department concerned. Of the credit hours required in the two subjects selected, not fewer than 42, and not more than 51, must come from each discipline.

15.17.7 Regulations for the International Bachelor of Arts (iBA)

In addition to completing the normal requirements for a Bachelor of Arts and one of a Joint Honours, Honours, Major or Minor in Religious Studies, students may elect to complete requirements for the **International Bachelor of Arts (iBA)**. As part of the minimum 120 credit hours, a student may use eligible credit hours in Religious Studies to jointly satisfy other requirements of the iBA degree. When selecting courses, a student is encouraged to consult with an academic advisor early in the program, to consider **Table 2 Possible Course Sequencing for the International Bachelor of Arts (iBA) (First 60 Credit Hours)**, and to consider Religious Studies courses listed in **Table 3 International Studies (IS) Designated Courses**. Up to 12 credit hours in Religious Studies IS courses may be used towards the **International Studies (IS) Courses Requirement**.

15.18 Sociology

www.mun.ca/soc

15.18.1 Department of Sociology Description

Sociology explores patterns of social life and examines the development, structuring, and organization of societies in all their historical and current diversity. Sociologists seek to understand how people live, think, feel, and believe in the ongoing processes that maintain and shift society and culture. Through understanding the social forces, structures and relationships that shape our world, Sociology allows us to see why and how things are as they are, and how everything could be otherwise. Sociology is therefore central to understanding institutions, organizations, social policy, inequality, privilege, social problems and social change.

15.18.2 Programs in Sociology

The following undergraduate programs are available in the Department:

1. Major in Criminology
2. Major in Sociology
3. Minor in Criminology
4. Minor in Sociology
5. Joint Major in Sociology
6. Honours in Criminology
7. Honours in Sociology

Sociology course descriptions are found at the end of the Faculty of Humanities and Social Sciences section under **Course Descriptions, Sociology** and are designated by SOCI.

15.18.3 Bachelor of Arts Degree Requirements

The Bachelor of Arts requires the successful completion of a minimum of 120 credit hours. A student must meet the requirements for a departmental Major, Minor, or Honours program and also meet the **Program Regulations – General and Honours Degrees** for the Faculty of Humanities and Social Sciences. A student is therefore advised to consult with the **Admission to the Bachelor of Arts General Degree Programs** regulations, the **Program Regulations - General and Honours Degrees** which also includes the **Bachelor of Arts General Degree Components**, **The Major Program**, and **The Minor Program** regulations. Information regarding honours programs is available at **Bachelor of Arts (Honours) Degree Regulations** as well as under each department's regulations.

A student is strongly encouraged to consult with an academic advisor to discuss available programs and requirements in the Faculty of Humanities and Social Sciences including the **Core Requirements**, **The Major Program**, **The Minor Program**, and the **Bachelor of Arts (Honours) Degree Regulations**. A student is advised to declare a program of study, including a Major and a Minor, before completing the first 45 credit hours of study. Information about declaring a Major and Minor in the Faculty of Humanities and Social Sciences is available at www.mun.ca/hss/programs/undergraduate/ideclare.php. Information regarding advisors for the Faculty of Humanities and Social Sciences is available at www.mun.ca/hss/about/contact/liaisons.php.

15.18.4 Major in Sociology

Students may wish to follow the pattern for the Major in Sociology listed under **Table 1 Suggested Course Pattern for a Major in Sociology (SOCI)** below.

Students who undertake Sociology as their Major must complete at least 36 credit hours in Sociology as follows:

1. Core courses: Sociology 1000 (or the former 2000), Sociology 3040, Sociology 3041, Sociology 3150, Sociology 3160;
2. At least 6 credit hours in Sociology at the 4000 level;
3. No more than an additional 6 credit hours in courses below the 3000-level may be counted toward the Major; and
4. The remaining courses, for the minimum of 36 credit hours required for the Major, may be selected from any Sociology course at the 3000 and 4000 levels.

Table 1 Suggested Course Pattern for a Major in Sociology (SOCI)

Level	Sociology Courses (SOCI)	Credit Hours
1000	SOCI 1000	3
2000	6 credit hours at the 2000-level	6
3000	SOCI 3040 SOCI 3041 SOCI 3150 SOCI 3160	12
3000 or 4000	three SOCI courses at the 3000 or 4000-level	9
4000	two SOCI courses at the 4000-level	6

15.18.5 Minor in Criminology

For a Minor in Criminology, students must complete at least 27 credit hours in Criminology and other designated courses from relevant disciplines as follows:

1. Sociology 1000 (or the former Sociology 2000); Criminology 1001 or Sociology 1001 (or the former Sociology 2300 or the former Police Studies 2300); Law and Society 1000; Criminology 3290 or Sociology 3290; and Criminology 3395 or Sociology 3395 (or the former Police Studies 3395).
2. Any one of Sociology 3040; Sociology 3041, Political Science 3010, or Statistics 2500.
3. At least 3 credit hours at the 2000-level chosen from the following courses: Criminology 2200, Criminology 2400, Criminology 2208 or Sociology 2208, Psychology 2150, Psychology 2800, or Archaeology 2492, Sociology 2100; or other courses approved by the Criminology Undergraduate Program Director as listed in **Table 1 Elective Courses for the Minor in Criminology**.
4. At least 3 credit hours at the 3000-level chosen from the following courses: Criminology 3000 or the former Police Studies 3000, Criminology 3100 or the former Police Studies 3100, Criminology 3500 or the former Police Studies 3500, Psychology 3640, or Political Science 3620 or other courses approved by the Criminology Undergraduate Program Director as listed in **Table 1 Elective Courses for the Minor in Criminology**.
5. At least 3 credit hours at the 4000 level chosen from the following courses: Criminology 4000, Criminology 4001, Criminology 4099 or Sociology 4099, Criminology 4212 or Sociology 4212, Sociology 4210, or other courses approved by the Criminology Undergraduate Program Director as listed in **Table 1 Elective Courses for the Minor in Criminology**.

Credit hours in a course cannot be used to fulfill the requirements of both a Major and a Minor program, or the program requirements of all three of a Major or Minor, diploma, and Certificate.

Table 1 Elective Courses for the Minor in Criminology (CRIM)

Level	Courses
2000	Anthropology 2414 Archaeology 2492 Criminology 2200 Criminology 2208 or Sociology 2208 Criminology 2400 History 2800 Law and Society 2000 Psychology 2150 Psychology 2800 Sociology 2100
3000	Criminology 3000 or the former Police Studies 3000 Criminology 3100 or the former Police Studies 3100 Criminology 3306 or Sociology 3306 Criminology 3500 or the former Police Studies 3500 the former Law and Society 3012 Law and Society 3400 Political Science 3620 Psychology 3640 Sociology 3180
4000	Criminology 4000 Criminology 4001 Criminology 4080 or Sociology 4080 Criminology 4099 or Sociology 4099 Criminology 4212 or Sociology 4212 Sociology 4210

15.18.6 Minor in Sociology

Students who undertake Sociology as their Minor must complete at least 24 credit hours in Sociology as follows:

Sociology 1000 or the former 2000, Sociology 3040, 3041, 3150, at least 3 credit hours from Sociology courses at the 4000 level, and 9 credit hours in other Sociology courses.

15.18.7 Joint Major in Sociology

As an alternative to a minor, a student may choose to complete a major in Sociology and a major in another eligible program in the Faculty of Humanities and Social Sciences. The Joint Major Program requires 3 fewer credit hours in each participating major as prescribed in each program's Calendar entry. For the joint major in Sociology, 3 fewer credit hours shall be required at the 3000- or 4000-level to fulfill clause 4. under the **Major in Sociology** above.

15.18.8 Honours in Sociology

Honours students are required to complete at least 60 credit hours in courses in Sociology, of which there must be a minimum of 36 credit hours at the 3000-level or above, including all courses prescribed for the Major in Sociology, and Sociology 4995, and must meet the requirements outlined in the **Regulations for the Honours Degree of Bachelor of Arts**.

It is possible to complete a Joint Honours program that includes Sociology as one of the Major subjects. Such a program may be arranged in consultation with the Head of the Department of Sociology and the Head of the other Department concerned.

15.18.8.1 Admission to Honours Program

Admission to the Honours program in the Department of Sociology is competitive and selective. Students who wish to enter this program must submit an "Application for Admission to Honours Program" form to the Department.

To be accepted into the Honours program, a student must not only meet the criteria laid out in the **Regulations for the Honours Degree of Bachelor of Arts**, but must normally have obtained a cumulative average of at least 75% in 18 credit hours in courses in Sociology which must include Sociology 3040, 3041, 3150, and 3160.

15.18.9 Regulations for the International Bachelor of Arts (iBA)

In addition to completing the normal requirements for a Bachelor of Arts and one of an Honours, Major or Minor in Sociology, students may elect to complete requirements for the **International Bachelor of Arts (iBA)**. As part of the minimum 120 credit hours, a student may use eligible credit hours in Sociology to jointly satisfy other requirements of the iBA degree. When selecting courses, a student is encouraged to consult with an academic advisor early in the program, to consider **Table 2 Possible Course Sequencing for the International Bachelor of Arts (iBA) (First 60 Credit Hours)**, and to consider Sociology courses listed in **Table 3 International Studies (IS) Designated Courses**. Up to 12 credit hours in Sociology IS courses may be used towards the **International Studies (IS) Courses Requirement**.

15.18.10 Major in Criminology

The Major in Criminology is administered by the Department of Sociology.

The Major in Criminology aims to promote the academic study of different facets of criminal justice organizations and practices, including the legal, political and social contexts in which they operate. This program would be beneficial for students with a scholarly interest in deviant/criminal behaviour, social justice and legal issues, policing, corrections, law enforcement, rehabilitation, and criminal justice themes more broadly, including those who have completed the Diploma in Police Studies; experienced police officers; and others working in a policing, correctional, or criminal justice environment. The Major in Criminology does not constitute a qualification in policing or corrections.

Criminology course descriptions are found at the end of the Faculty of Humanities and Social Sciences section under **Course Descriptions, Sociology, Criminology** and are designated by CRIM.

15.18.10.1 Bachelor of Arts Degree Requirements

The Bachelor of Arts requires the successful completion of a minimum of 120 credit hours. A student is strongly encouraged to consult with an academic advisor to discuss available programs and requirements including the **Core Requirements**, **The Major Program**, **The Minor Program**, and the **Bachelor of Arts Degree Regulations**. A student is advised to declare a Major and a Minor (or two Majors) before completing the first 45 credit hours of study. Information about declaring a program of study In the Faculty of Humanities and Social Sciences is available at www.mun.ca/hss/programs/undergraduate/ideclare.php. Information regarding advisors for the Faculty of Humanities and Social Sciences is available at www.mun.ca/hss/about/contact/liaisons.php.

15.18.10.2 Advising

Students must carefully plan their course selection and consult with an academic advisor. Questions about the delivery of a course should be directed to the appropriate academic unit.

15.18.10.3 Declaring the Major in Criminology

Students wishing to declare a Major in Criminology shall consult with the designated academic advisor to discuss the requirements of the program. Information about declaring a program of study in the Faculty of Humanities and Social Sciences is available at www.mun.ca/hss/programs/undergraduate/ideclare.php. Information regarding advisors for the Faculty of Humanities and Social Sciences is available at www.mun.ca/hss/about/contact/liaisons.php.

15.18.10.4 Regulations for the Major in Criminology

1. A Major in Criminology consists of all of the requirements of the Bachelor of Arts program, including a minimum of 42 credit hours in courses as follows, which must include a minimum of 27 credit hours in Criminology courses:
    a. 21 credit hours in:
        i. Criminology 1001 or Sociology 1001 (or the former Sociology 2300 or Police Studies 2300);
        ii. Criminology 2400 (or the former Police Studies 1000 or the former Police Studies 2000);
        iii. Criminology 2200 (or the former Police Studies 2200);
        iv. Criminology 3000 (or the former Police Studies 3000);
        v. Criminology 3100 (or the former Police Studies 3100);
        vi. Criminology 3500 (or the former Police Studies 3500);
        vii. Criminology 3395 (or the former Police Studies 3395) or Sociology 3395
    b. 6 credit hours in two of Criminology 4000 (or the former Police Studies 4000), Criminology 4001 (or the former Police Studies 4001), Criminology 4080 or Sociology 4080, Criminology 4099 (or the former Police Studies 4099) or Sociology 4099, Criminology 4212 (or the former Police Studies 4212) or Sociology 4212;
    c. 3 credit hours in one of Law and Society 1000 or Law and Society 2000, Sociology 2100, or an additional 3 credit hours in Criminology at any level (excluding credit hours used to fulfill other requirements listed here);
    d. 3 credit hours in one of Political Science 3010, Statistics 2500, Sociology 3040, or Sociology 3041;
    e. 3 credit hours in one of Law and Society 3400; Criminology 3290 or Sociology 3290; or Criminology 3306 (or the former Police Studies 3306) or Sociology 3306;
    f. 3 credit hours in one of Archaeology 2492 or Psychology 2150; and
    g. 3 credit hours in one of Anthropology 2414, History 2800, the former Law and Society 3012, Sociology 3180, or Sociology 4205.
2. A student is expected to enroll in the Criminology section of any applicable crosslisted courses.
3. As per the **Degree Regulations, General and Honours Degrees, The Major Program, Major Program of Study**, students completing a Major in Criminology are ineligible for an interdisciplinary Minor in any program. Credit hours in a course cannot be used to fulfill the requirements of two Major programs, of both a Major and a Minor program, or the program requirements of all three of a Major, diploma and certificate.
4. Students cannot complete both a major and minor in criminology, a major and certificate in criminology, and/or a minor and certificate in criminology.

Students may wish to follow the pattern for the Major in Criminology listed under **Table 1 Suggested Course Pattern for a Major in Criminology (CRIM)** below.

Table 1 Suggested Courses for a Major in Criminology (CRIM)

Level	Courses	Required or Elective Courses
1000 CRIM/ Sociology	Sociology 1000 Criminology 1001 or Sociology 1001 (or the former Sociology 2300 or the former Police Studies 2300)	All courses required
Other 1000 and 2000, or any Criminology	3 credit hours in Criminology at any level (excluding otherwise-noted) Law and Society 1000 Law and Society 2000 Sociology 2100	3 credit hours required
2000 Forensics	Archaeology 2492 Psychology 2150	3 credit hours required

15.18.11 Honours in Criminology

Honours students are required to complete at least 60 credit hours in courses in Criminology, of which there must be a minimum of 36 credit hours at the 3000-level or above, including all courses prescribed for the Major in Criminology, and Criminology 4995, and must meet the requirements outlined in the **Regulations for the Honours Degree of Bachelor of Arts**.

15.18.11.1 Admission to Honours Program

Admission to the Honours program in Criminology is competitive and selective. Students who wish to enter this program must submit an "Application for Admission to Honours Program" form to the Department of Sociology. To be accepted into the Honours program, a student must not only meet the criteria laid out in the Regulations for the Honours Degree of Bachelor of Arts, but must normally have obtained a cumulative average of at least 75% in 18 credit hours in courses in Criminology and Sociology which must include Criminology 3290 (or Sociology 3290), and Sociology 3040 and 3041.

15.18.12 Regulation Concerning the Former Major in Police Studies

A student cannot be awarded both a Major in Police Studies and a Major in Criminology.

15.18.12.1 Recognition of Qualifications for Experienced Officers

1. Subject to the prior approval of the Program Director, certain programs and courses offered by recognized police or other criminal justice training programs may be eligible for credit hours that are applicable towards the Bachelor of Arts, Criminology. Graduates of the Atlantic Police Academy (APA) Police Sciences Technology Program, Holland College, Prince Edward Island; the RCMP Depot Division Cadet Training Program; or the pre-APA program offered through the Royal Newfoundland Constabulary (RNC) for cadet training may be awarded up to 30 PLAR credit hours at an unspecified level in the Criminology (CRIM) subject area. Qualifications from other recognized police or other criminal justice training programs will be assessed on an individual basis by the Program Director of the respective program based on the topics covered and the number of hours involved, and will be subject to the approval

of the Faculty's Undergraduate Waivers and Appeals Committee. Normally, the Committee will prioritize programs and courses that feature evaluation of student knowledge; workshops and professional development modules that do not involve evaluation are not eligible. Applicants with five or more years of professional criminal justice experience may request credit for CRIM 2200 or CRIM 2400 as part of their maximum 30 credit hours. An Application for Transfer Credit Evaluation, including official documentation confirming program completion or professional experience, must be submitted to the Office of the Registrar to have training assessed and recognized for transfer credit. The Application may be obtained online at www.mun.ca/regoff/forms.php or in-person at the Office of the Registrar.

2. Unspecified Criminology credit hours may only be used towards the Bachelor of Arts, Major in Criminology program to meet up to 12 of the required minimum of 27 credit hours in Criminology courses. Any remaining unspecified credit hours in the Criminology subject area may be used in part to satisfy the Humanities and Social Sciences Elective requirements for the Bachelor of Arts, Criminology Major program. In the case of programs where there are established course transfer credits, the student will be awarded transfer credit for the appropriate courses. Any remaining credit hours will be awarded as unspecified credit hours in the Criminology subject area.

15.18.12.2 Previous Calendar Regulations

In accordance with ***UNIVERSITY REGULATIONS*** **- Degree and Departmental Regulations, Year of Degree and Departmental Regulations - Faculty of Humanities and Social Sciences and Faculty of Science**, students for the Interdisciplinary Major in Criminology. will normally follow regulations in effect in the academic year in which the student first successfully completes a course in that subject at the 2000-level or above which may be applied to the major or minor program respectively. However, the student may elect to follow subsequent regulations introduced during the student's tenure in a program. These "grandparented" students are encouraged to consult the program's designated academic advisor for assistance with course selection.

Students eligible for the former Interdisciplinary Major in Criminology. may choose between that program or the Major in Criminology. Courses approved for the Major in Criminology that do not appear in the Interdisciplinary Major and which are successfully completed after August 2018 may, for the purpose of that former program, be treated as the former Table 1 courses.

The previous non-credit courses from the former Life Long Learning Certificate in Criminology are not eligible towards the Major in Criminology.

15.18.13 Diploma in Police Studies

The Department of Sociology administers the **Diploma in Police Studies** for students who were approved for and began this program prior to 2022 and are continuing in or returning to complete this program. Credit hours in Sociology and Criminology may be eligible to jointly fulfill requirements of a degree and a diploma.

15.18.14 Certificate in Criminology

The Department of Sociology administers the **Certificate in Criminology**. Credit hours in Sociology and Criminology may be eligible to jointly fulfill requirements of a degree and a certificate. For further information about this program, see **Certificate Programs Offered in the Faculty of Humanities and Social Sciences**, or contact the Program Director.

16 Course Descriptions

16.1 Anthropology

In accordance with Senate's *Policy Regarding Inactive Courses*, the course descriptions for courses which have not been offered in the previous three academic years and which are not scheduled to be offered in the current academic year have been removed from the following listing. For information about any of these inactive courses, contact the Head of the Department.

Students should note that credit may not be obtained for an Archaeology course if, prior to 2007, the student received credit for that course when it was designated as an Anthropology course.

A tentative list of upcoming Anthropology course offerings can be found at www.mun.ca/hss/courses.php.

Anthropology courses are designated by ANTH.

1031 Introduction to Anthropology provides an overview of the field of social and cultural anthropology. It covers key anthropological concepts used to study issues such as inequality, social justice, the environment, work, politics and law, family, identity, gender and sexuality, ethnicity, spirituality, and communication. An emphasis is placed on human diversity, international examples, and processes of globalization. This course is suitable for students in all disciplines.
CR: the former ANTH 1000 or 2000

2260 War and Aggression (same as the former Sociology/Anthropology 2260 and the former Sociology 2260) is a critical review of ethological, psychological and sociological approaches to the understanding of violence and organized aggression.
CR: the former Sociology/Anthropology 2260, the former Sociology 2260

2280 The City (same as the former Sociology/Anthropology 2280 and the former Sociology 2280) examines varieties of urban life around the world and through history. The city as habitat and as spectacle.
CR: the former Sociology/Anthropology 2280, the former Sociology 2280

2350 Religious Institutions (same as Religious Studies 2350) is a contextual study of religious institutions and beliefs, calendrical feasts and solemnities, religious roles and hierarchies, ritual innovation and revitalization.
CR: Religious Studies 2350, the former Sociology/Anthropology 2350, the former Sociology 2350

2410 Classics in Anthropology is an examination of selected milestone monographs, ground-breaking studies for subdisciplinary specialties, and major syntheses.

2411 Anthropologists in the Field combines a firsthand introduction to ethnographic research and writing with an exploration of how anthropological understanding develops through the experiences and human relationships of anthropologists in the field.

2412 Threatened Peoples is an examination of key social and cultural factors involved in the global extinction of small-scale societies; the intrusive influences that jeopardize small-scale societies, such as disease; economic and military incursion; the role of international non-governmental agencies in aid of threatened peoples; and the role of the anthropologist in this human crisis. All sections of this course follow International Studies guidelines available at www.mun.ca/hss/IS.

2413 Culture, Society and Globalization explores the way in which social, cultural, economic and political interconnections at the global level interact with local social and cultural processes. All sections of this course follow International Studies guidelines available at www.mun.ca/hss/IS.

2414 Indigenous Peoples of North America is a survey course dealing with various indigenous peoples of North America.
CR: the former ANTH 3281

2415 Anthropology of Food explores how cultural identities, social relationships, and inequalities are linked to the production, exchange, and consumption of food.

2416 Cultural Formations explores the symbolic formations that humans create in order to give meaning to their lives. Some of the cultural formations that will be studied include specific examples from the realms of religion, play, sports, art, and commonplace material objects.

3050 Ecology and Culture reviews the co-evolution of the fields of ecology and anthropology since the late 19th century and examines the variety of contemporary perspectives on the interconnection between social and

ecological systems.

3052 Anthropology and Directed Social Change - inactive course.

3053 Anthropology of Religion (same as Religious Studies 3053) is a critical evaluation of anthropological research on religion, centering on seminal thinkers and major theoretical traditions. Special attention is given to the study of belief systems, and to relationships between belief and ritual.
CR: Religious Studies 3053

3054 Play, Games and Sport is an examination of the phenomenon of play in a variety of human cultures, and in such forms of activity as religion, politics, festival, speech, performance, and artistic creation. Principal themes are the functional role of play in social relations, and the meaningful role of play in social thought.

3058 Urban Anthropology is an examination of anthropological studies of urban populations and population segments, such as ethnic groups and categories, occupations, neighbourhoods, etc.

3060 The Idea of Culture is the history of ideas, dealing with the emergence of this key anthropological concept, the meanings it has acquired, its broader implications, and major critiques of its use in the social sciences.

3061 Culture and Social Inequality examines the role of culture in mediating different forms of social inequality, exploring the idea that culture is not only a way of life but also a way of managing power among unequals, from individuals to social classes. Readings in the course concentrate on cultural techniques of social control.

3062 Anthropology in Social Policy-making - inactive course.

3063 The Politics of Ethnicity and Multiculturalism examines anthropological approaches and contributions to debates about ethnicity and multiculturalism.

3064 Anthropology and the Study of Social Problems - inactive course.

3070 Indigenous Self-Governance (same as the former ANTH 4070) examines contemporary Issues on the development of, and barriers to, self-government among Canadian Indigenous peoples. The focus will be on topics such as land claims and claims settlements, self-government agreements and proposed agreements, economic development, environmental and social Impact of Industrial developments, and cultural and religious revival.
CR: the former ANTH 4070

3073 Imaginary Worlds explores the anthropology of imaginary worlds, including those created through pseudo-history, on-line gaming, science fiction and fantasy literature, and film. Particular examples will be examined in terms of the ways that social stratification, gender, ethnicity, race, and cultural beliefs become constructed inside of these imaginary worlds.

3082 Banditry, Rebellion, and Social Revolution examines types of social conflict specific to different kinds of class-based society, including social banditry, primitive rebellions, and peasant revolutions. More generally, social conflict is used to explore the variety of ways that pre-industrial societies have been made part of the modern world economy.

3083 Global Environmental Crises examines the social, cultural, and economic forces that have contributed to rapid resource depletion and other environmental changes from the 20th century to present, and looks at how the impacts of these changes have been experienced around the world. All sections of this course follow International Studies guidelines available at www.mun.ca/hss/IS.

3100 Dominance and Power (same as the former Sociology/Anthropology 3100 and the former Sociology 3100) is a study of dominance behaviour in human societies, surveying the range from private to public and from openly exploitative to fully legitimate power systems.
CR: the former Sociology/Anthropology 3100, the former Sociology 3100

3200 Anthropology of the Global Economy explores the way in which anthropologists have studied the inter-linkages among economic, social and cultural processes. Topics covered include key concepts (e.g., gifts and commodities, exchange relationships) and debates (e.g., formalist versus substantivist) in economic anthropology, and the way in which different societies and social groups are integrated within global capitalist markets. All sections of this course follow International Studies guidelines available at www.mun.ca/hss/IS.
CR: the former ANTH 4200

3240 Regional Studies: Contemporary Native Peoples of Canada - inactive course.

3241 Regional Studies: The Atlantic is selected topics in the ecological, cultural, economic, social and political characteristics of the North Atlantic Region.

3242 European Societies - inactive course.

3249 Peoples of the Pacific - inactive course.

3254-3257 Regional Studies (same as the former Sociology/Anthropology 3254-3257 and the former Sociology 3254-3257) are interdisciplinary approaches to the study of selected regions.
CR: the former Sociology/Anthropology 3254-3257, the former Sociology 3254-3257

3260 International Development (same as Sociology 3260) is an examination of theories of development including a critical analysis of international case studies. All sections of this course follow International Studies guidelines available at www.mun.ca/hss/IS.
CR: Sociology 3260, the former Sociology/Anthropology 3260

3280 The Arctic studies cultural, ecologic, economic and social systems in the northern circumpolar regions.

3300 Fieldwork Methods focuses on the process of anthropological fieldwork. Readings, discussions and evaluations will examine a range of issues and concepts that include observation techniques, interviewing, ethical issues, and the interpretation of data. Students will conduct original fieldwork to learn how to apply some of these skills.
CR: the former ANTH 4300

3305 The Anthropology of Gender - inactive course.

3384-3389 Regional Studies in Anthropology

3403 The Anthropology of Travel and Tourism is an exploration of the anthropological study of travel and tourism. Students will learn how to critically evaluate this global industry and consider the role that it plays in the formation of contemporary human identity.

3404 Visual Anthropology explores the use of documentary film, photography, and new digital media in anthropological fieldwork. It also teaches students how anthropologists study visual media such as television, newspapers, popular films, social networking sites, web sites, and photography collections.

3406 The Anthropology of Ritual examines a range of theoretical perspectives, case studies and individual theorists in the study of ritual.

3407 Medical Anthropology focuses on a range of issues including illness, disease and healing, sexuality and reproduction, pandemics and epidemics, medical technology and bioethics.

3408 Engaged Anthropology is a seminar course exploring debates about the potential - and potential pitfalls - of a variety of approaches to publicly engaged anthropology.

3409 War and Globalization examines selected wars of the late 20th and 21st centuries to understand how war, political violence and the repartitioning of the world have become intrinsic features of the current era of globalization. All sections of this course follow International Studies guidelines available at www.mun.ca/hss/IS.

3410 Classic Theory in Anthropology (same as the former ANTH 4410) follows a historical approach to understanding some of the key theoretical trends in anthropology since the inception of the discipline.
CR: the former ANTH 4410

3411 Anthropology of Foraging deals with societies heavily reliant on hunting, fishing, and gathering wild foods. Industrial and post-industrial settings in which various forms of foraging (including recycling) are the basis for some people's livelihood will also be considered.

3421-3430 Anthropological Specialties will have a topic of current interest and importance announced by the Department for each term.

3451 Ethnography of Gambling - inactive course.

3452 Fisheries, Aquaculture, and the Global Commodity explores social and environmental tensions related to the increasing commodification and financialization of fisheries around the world. Topics include the changing roles of fisheries and aquaculture in global and local economic and food systems; the impact of fisheries privatization and restructuring on coastal communities; environmental crises related to fisheries and aquaculture; and ways that science and technology have constructed and transformed both fish and aquatic environments. All sections of this course follow International Studies guidelines available at www.mun.ca/hss/IS.

3630 New Media Methods in Social Research (same as Sociology 3630 and the former Sociology/Anthropology 3630) will explore non-print means for recording social behaviour and will utilize various forms of the media as a descriptive and an analytic tool.
CR: Sociology 3630, the former Sociology/Anthropology 3630

3700 Social and Cultural Change - inactive course.

4030 Legal Anthropology - inactive course.

4071 Social and Cultural Aspects of Health and Illness (same as

Sociology 4071) will cover topics which may include: cultural concepts of illness and health; theories of disease causation; relationships between social life and illness patterns; symbiotic use of illness; variations in philosophies of treatment and in practitioner/patient relationships; the social organization of medicine.
CR: Sociology 4071, the former Sociology/Anthropology 4071

4072 Social and Cultural Aspects of Death (same as the former Sociology/Anthropology 4072 and the former Sociology 4072) covers topics which may include: symbolic meanings and values attached to death; cultural and historical variations in the management of death, e.g. treatment of the 'terminally ill', burial rites, the mourning process, and the social fate of survivors, together with the social and psychological meanings of these behaviours. Open to those without normal prerequisites by permission of the Instructor.
CR: the former Sociology/Anthropology 4072, the former Sociology 4072

4073 Studies in Underclass Life (same as the former Sociology/Anthropology 4073 and the former Sociology 4073) is a critical inquiry into the social sources of human misery and suffering that characterize life in the underclass.
CR: the former Sociology/Anthropology 4073, the former Sociology 4073

4081 Advanced Seminar in the Anthropology of Gender - inactive course.

4089 Language and Social Change - inactive course.

4201 Current Debates in the Anthropology of Ireland explores selected current debates in the anthropology of Northern Ireland and the Republic of Ireland. Seminars centre on the critical reading of recent ethnographic studies. The course considers Ireland, north and south, as a changing scene, assesses the current state of Irish ethnography and considers how the field might develop.

4202-4209 Special Areas in Anthropology is a series of individual or small group tutorials and reading courses on topics of special or current interest.
PR: Departmental permission

4280 Advanced Newfoundland and Labrador Ethnography surveys the ethnographic literature on Newfoundland and Labrador, past and present, with special emphasis on ecological adaptation, interpersonal relations, class formation, patronage, brokerage, clientship, state formation, and modernization.

4301 The Intensive Study of One Culture - inactive course.

4302 Ethnographic Life Histories - inactive course.

4412 Contemporary Theory in Anthropology is an evaluation of current approaches to culture and power through a focus on critical issues and major schools of contemporary thought influencing Anthropology in the late 20th and early 21st centuries. Emphasis is placed on major works, paradigms and individual theorists.

4415 Labour and Global Capitalism examines core issues and problems entailed in the anthropological analysis of work and labour in the context of the global economy. All sections of this course follow International Studies guidelines available at www.mun.ca/hss/IS.

4416 Anthropology of Slums examines social class forces producing a planet of slums, and details ways that everyday forms of violence, social injustice, and poverty take social shape in the everyday lives of slum dwellers. Among the topics covered are: social class formations, including ghettos, favelas, and shanty towns; surplus populations and disposable peoples resulting from late capitalist globalization; and forms of resistance and struggle that arise within dispossessed populations. All sections of this course follow International Studies guidelines available at www.mun.ca/hss/IS.

4417 Anthropology of Sound examines how ethnographers do comparative research on the everyday sounds found in people's daily environments, including music and new media products.

4418 Marx and Social Inquiry examines the uses of Marx's later writings, especially Capital, in current American Anthropology. The primary focus is on the agenda-setting works of Eric Wolf and David Harvey. Topics include: capital accumulation and the making of localities; primitive accumulation and class formation; uneven global development; crises of capitalism and crises of social reproduction; capitalist globalization and disposable surplus populations.

4422 The Craft of Writing Anthropological Narrative is a seminar open to senior students in any discipline, which examines in detail both the mechanics and the sensitivities necessary to produce literate analysis.

4450 Politics of Landscapes is a survey of the variety of past and present systems of land tenure, showing their relevance to development/underdevelopment, conflicts with the state, relationships to social organization, symbolic significance, etc.

4994 Honours Essay I prepares students for the Honours Essay by helping them refine their research topics; providing them with independent research and writing skills; and offering a structured context in which to conduct the preliminary stages of Honours Essay research and writing.
PR: admission to the Honours program in Anthropology

4995 Honours Essay II is required as part of the Honours program.
PR: ANTH 4994

16.2 Archaeology

In accordance with Senate's *Policy Regarding Inactive Courses*, the course descriptions for courses which have not been offered in the previous three academic years and which are not scheduled to be offered in the current academic year have been removed from the following listing. For information about any of these inactive courses, please contact the Head of the Department.

Students should note that credit may not be obtained for an Archaeology course if, prior to 2007, the student received credit for that course when it was designated as an Anthropology course.

A tentative list of upcoming Archaeology course offerings can be found at www.mun.ca/hss/courses.php.

Archaeology courses are designated by ARCH.

1000 Introduction to Archaeology (same as the former ARCH 1030) is a broad overview of Archaeology and Bioarchaeology introducing the concepts of human biological and cultural evolution and the methods and techniques by which these are investigated. The course is designed to provide the basis for further study in the disciplines.
CR: the former ARCH 1030

1001 Critical Reading and Writing About the Archaeological Past is an introduction to archaeological literature including essays, monographs, and journal articles and popular media. Emphasis is placed on critical reading and writing, analyzing texts, framing and using questions, constructing essays, organizing paragraphs. Students learn elements of academic assessment of literature and technical skills to refine analytical writing. All sections of this course follow the Critical Reading and Writing Course Guidelines available at www.mun.ca/hss/crw.
CR: the former ARCH 2590

1005 Critical Reading and Writing in Indigenous Studies (same as History 1005) features the analysis of scholarly literature, media, and other sources of knowledge related to Indigenous studies. Students practice analytical reading and writing through class discussion and assignments related to the study of both past and present. All sections of this course follow Critical Reading and Writing Course Guidelines available at www.mun.ca/hss/crw.
CR: History 1005, the former ARCH 2590, the former History 1016

2430 Principles of Bioarchaeology investigates the human animal as we exist now and as we developed through time. Students will discover how the study of fossil remains, living and extinct primates, and the applications of the principles of genetics, adaptation and variation of human evolution help to provide an understanding of how biology and culture have interacted to produce modern humans.
PR: ARCH 1000 or the former 1030

2450 Principles of Archaeological Science introduces the student to a broad range of scientific approaches and quantitative methods used in archaeology. The course provides an overview of the historical development of archaeological science and a survey of the analytical techniques used to investigate materials recovered from archaeological contexts, including biomolecular methods, statistical analysis of data, geophysical prospection, dating techniques and quantitative methods of calibration, and remote sensing. All sections of this course follow Quantitative Reasoning Course Guidelines available at www.mun.ca/hss/qr.

2480 Principles of Archaeology is an introduction to archaeological techniques, methodology and theory. Classes cover the development of the discipline, techniques of survey and excavation, and the main methods of archaeological analysis and interpretation.
OR: may be offered in an accelerated format outside the regular semester or session timeframe
PR: ARCH 1000 or the former 1030 or permission of the instructor

2481 Ancient Civilizations of the Americas is a survey course introducing the archaeology and ethnohistory of the Aztec, Inca and Maya. The course is comparative and thematic, addressing the development, ideology, economics and administration of each civilization. The events and responses of these Indigenous civilizations to contact with Europeans will also be investigated.

2482 Indigenous Peoples and the Struggle for Self-determination explores, in a Pan-American comparative perspective, the experiences of Indigenous peoples inhabiting the nation-states that emerged out of the

European settlements. The loss of self-determination and struggles to regain it are shared experiences but the routes followed historically and in the present are not the same. Understanding Indigenous Peoples' diverse experiences of, and struggles against, colonialism will enable the alliances needed for more just and sustainable societies.

2492 Forensic Archaeology is an examination of procedures and techniques used by biological anthropologists and archaeologists to obtain data pertinent to investigations by law enforcement and medical authorities; evidence concerning the identification of human remains and the cause, time and manner of death.
UL: may not be used for credit toward a major or minor in Archaeology

2493 Archaeology on Film explores the use of archaeology as a popular backdrop to many films and documentaries. Yet, the manner in which archaeology is represented in modern film is hardly realistic, or is it? The portrayal of archaeology in popular film will be discussed in order to determine what movies convey to the public about archaeological method and theory as well as the historical stories that archaeologists investigate.
UL: may not be used for credit toward a major or minor in Archaeology

2494 Game of Genders: Sex and Society in the Medieval North (same as Medieval Studies 2494) introduces students to considerations and expressions of gender in northern medieval society, with particular reference to Viking and Anglo-Saxon worlds. The course explores the concept of gender and considers varied gendered identities found in material and textual evidence. Students will reflect on how significant cultural changes, such as the conversion to Christianity and the expansion to the North Atlantic and to L'Anse aux Meadows, laid the foundation for what is considered gender appropriate in Western society.
CR: Medieval Studies 2494
PR: it is recommended, but not obligatory, that students should have successfully completed ARCH 1000 or the former 1030 or Gender Studies 1000

2495 Archaeological Frauds and Mysteries will explore the sensationalized and 'unreal' side of archaeology and delve deeper into popular misconceptions of the past. From unraveling the mysteries of Big Foot to evaluating the evidence for alien life on Earth, students will learn how scientific methodology is used to determine facts from myths in archaeology.
CR: the former ARCH 2491
UL: may not be used for credit toward a major or minor in Archaeology

2583 Introduction to Applied Archaeology (same as the former ARCH 3583) is designed to familiarize students with field and laboratory techniques. Students will learn about research design and the methodologies involved in archaeological site survey and excavation. Students will be instructed in the identification of archaeological sites, completion of site inventory forms, the use of surveying instruments, and the creation of accurate site maps, using these instruments as well as the concepts associated with archaeological excavation, mapping, recording and photography. Moreover, students will be given basic instruction in artifact identification, processing and cataloguing. This course is intended to be a precursor to ARCH 3585 and 3586.
CR: the former ARCH 3583
OR: may be offered in an accelerated format outside the regular semester or session timeframe
PR: ARCH 2480

3001 Art, Architecture and Medieval Life (same as Medieval Studies 3001, the former History 3020, Folklore 3001) is an examination of the development of medieval art and architecture and of the ways in which they mirror various aspects of life in the Middle Ages. This course will include a discussion of art and architecture in the countryside, in the town, in the castle, in the cathedral and in the cloister.
CR: the former ARCH 3589, Anthropology 3589, Medieval Studies 3001, the former History 3020, Folklore 3001
PR: it is recommended but not obligatory, that students should have successfully completed one of the following courses: ARCH 2480, the former ARCH 2582, Folklore 1000 or the former 2000, History 2320, Medieval Studies 2001, History 2330/Medieval Studies 2002, or Medieval Studies 1000 or the former 2000.

3020 What is Human? discusses how humans have long considered themselves unique. Through readings, discussions and presentations this seminar will explore exactly how distinctive humans are in their biological, behavioural, and intellectual traits and whether there is, in fact, something which sets us apart from all other creatures.
PR: ARCH 2430

3040 The Human Skeleton reflects genetic, environmental and cultural influence. This course, emphasizing identification of individual bones in the skeleton, techniques for obtaining size and shape differences in individual bones and the entire skeleton, estimation of group numbers and death rates, and diagnosis of disease and other abnormal conditions, provides a means of assessing all of these influences on past human populations.
PR: ARCH 2430

3290 First Peoples of Newfoundland and Labrador explores the archaeological history of the area which today includes Newfoundland and Labrador and eastern Québec, from entry of humans into the region until the time of European contact, including the ancestors of the Beothuk, Mi'kmaq, Innu, and Inuit. Particular attention is paid to the interactions among the various archaeological cultures in the region and their adaptations to the local environment.
PR: ARCH 1000 or the former 1030 or permission of the instructor

3291 First Peoples of the Maritime Provinces explores cultural developments in the area which today includes the Maritime Provinces and northern Maine, from the entry of humans into the region until the time of European contact, including the ancestors of the Mi'kmaq, Wolastoqiyik, and Peskotomokhadi. Emphasis is placed on cultural adaptations to a changing regional environment and the evidence for intercultural contact.
PR: ARCH 1000 or the former 1030 or permission of the instructor

3500 Prehistory of Africa, Asia and Europe examines the early stages of cultural evolution in the Old World. Topics include: earliest human origins in Africa; the dispersal of humans throughout the Old World; the appearance of modern-type humans during the last ice age.
PR: ARCH 1000 or the former 1030

3510 The Ancient Americas is a survey of cultural development in the Americas from the entry of humans until the time of European contact. Topics include: the earliest human migrations and the dispersal of human groups throughout the New World; the development of complex hunting-gathering societies; the origins of agriculture and sedentism.
PR: ARCH 1000 or the former 1030 or permission of the instructor

3520 Indigenous History to 1763 (same as History 3520, Anthropology 3520) examines Indigenous history in North America, including the Innu, Inuit, Beothuk and Mi'kmaq, from before European contact to the Royal Proclamation in 1763. Particular attention will be paid to historical encounters framed by first contacts, cultural exchange, trade, disease, religious encounters, conflict and diplomacy, and territorial encroachment.
CR: History 3520, Anthropology 3520

3525 Indigenous History from 1763 (same as History 3525, Anthropology 3525) examines the history of Indigenous peoples in North America, including the Innu, Inuit, Beothuk and Mi'kmaq, from 1763 to the twentieth century. Particular attention will be paid to Indigenous-settler relations, including Indigenous policies, military encounters and diplomacy, expansion and removals, education, treaties, and politicization.
CR: History 3525, Anthropology 3525

3582 Historical Archaeology (same as the former ARCH 2582, the former History 2582, and History 3582) will introduce students to historical archaeology, with special reference to the North Atlantic, 1000 to 1900 AD. The archaeology of specific sites will be examined in order to raise issues about theory and method. Students will be introduced to paleography; historic maps; documentary archaeology; the survey, excavation and analysis of complex sites; material culture and subsistence studies; consumer studies; cultural resource management; archaeological conservation; and nautical archaeology.
CR: History 3582, the former Archaeology 2582, the former History 2582, the former History 3530
PR: ARCH 1000 or the former 1030

3585 Archaeological Fieldwork provides instruction and experience in site survey, mapping and sampling strategies, as well as the careful excavation and recovery of archaeological materials (i.e., artifacts and ecofacts). Students also receive an introduction to archaeological research pertaining to cultures of a selected region.
AR: attendance is required
CO: ARCH 3586
PR: ARCH 2583 or the former ARCH 3583 and permission of the instructor

3586 Laboratory Techniques instructs students in the methods used to clean, catalogue and interpret archaeological materials. Students will also receive training in proper archaeological conservation procedures.
AR: attendance is required
CO: ARCH 3585
PR: ARCH 2583 or the former ARCH 3583 and permission of the instructor

3588 Arctic Archaeology is an introduction to the archaeology of the Canadian Arctic, Greenland, and Alaska, from earliest settlement to historic interactions between Inuit and Europeans. Special emphasis is placed on the eastern Canadian Arctic, and the changing social and economic adjustments arctic peoples have made to a challenging environment.
PR: ARCH 1000 or the former 1030 or permission of the instructor

3592 Norse Archaeology (same as Medieval Studies 3592) explores the influence of the Vikings on the medieval world and the place of L'Anse aux Meadows within this cultural milieu. Students will be introduced to Viking-Age archaeological and literary texts to gain knowledge of specific questions and problems concerning multicultural contact within the Viking-Age world, specifically the North Atlantic region. They will also gain an appreciation of the challenges associated with using interdisciplinary evidence as well as migration and multicultural issues in the past and present.
CR: Medieval Studies 3592, the former ARCH 3685

PR: ARCH 1000 or the former 1030

3593 Archaeology of Children examines emerging archaeological and bioarchaeological research on children and childhood. Topics include play, learning work, embodiment, identity, death, narrative approaches to children's lives, and the paleoanthropology of childhood.
CR: the former ARCH 3684
PR: ARCH 1000 or the former 1030

3594 Archaeology of Sport addresses organized recreation as a fundamental variety of past social activity. The evolution of athletic physiology, bioarchaeological traces on past bodies, sporting facilities and equipment, animal sports, experimental and ethnoarchaeological approaches, and the varying social, ritual and economic contexts of past athletic performance will be examined, with case studies of notably large scale and long-running sporting phenomena such as chariot racing and the Mesoamerican ballgame.
CR: the former ARCH 3681

3595 Archaeology of Intoxicants surveys the archaeological evidence for drug use from the Paleolithic to the present, and its role in wider social, political, economic and cultural processes. This evidence consists of material traces (plant remains, genetic and chemical residues, paraphernalia, depictions etc.) of the production, circulation and consumption of a wide array of intoxicants (tea, coffee, tobacco, alcohol, opium, cannabis, coca, peyote etc.).

3650 Artifacts from North American Contexts 1600-1900 (same as Folklore 3650) provides students with practical experience in the analytical methods used to identify, date and interpret artifacts from 1600-1900 contexts in North America. Detailed discussions on manufacture, technology, form and function provide the necessary background for a better understanding of concepts relating to artifact identification, provenance, dating techniques, and other current issues. Practical, hands-on exercises will help reinforce weekly topics and teach students the fundamentals required to interpret artifact assemblages from the historic period.
CR: Folklore 3650, the former Anthropology 3683

3651 Archaeology of Exploration, Interaction and Settlement focuses on the history and archaeology of European expansion in the world since the 15th century and its impact on and interaction with Indigenous people. A diverse range of topics will be discussed including: colonialism; Indigenous peoples; early colonies and seasonal outposts; extractive industries; war, trade and economics; daily life in pluralistic societies; the material record; the built landscape and maritime archaeology.
CR: the former ARCH 3862, or the former Anthropology 3682
PR: ARCH 1000 or the former 1030

3680 Archaeology of Iceland employs an interdisciplinary archaeological approach to examine changes in Icelandic society from the Viking Age to the present. Through in-depth analyses of current research scholarship in Icelandic archaeology, the course will analyze the role played by changing economic, political, religious and environmental circumstances in the construction of past and modern Icelandic lifeways and identity.
PR: ARCH 1000 or the former 1030

3681-3689 (Excluding 3687, 3688) Studies in Archaeology and Prehistory will include the consideration of current developments in methods, techniques and theory as applied to selected areas of the world.
PR: ARCH 1000 or the former 1030

3687 The Archaeology of Death explores archaeological studies of mortuary rituals, human remains and grave goods to provide insight into past social structures, cultural ideals, identity, and community beliefs. This course takes multiple approaches to understand the variability in archaeological mortuary practices cross-culturally over time and space.

3688 Coastal Archaeology studies human adaptations to coastal landscapes with an emphasis on the analysis of shell middens. Shell midden sites can contain millennial-scale records of archaeological and environmental events, and when analyzed the contents can be used to interpret past food procurement strategies, migration, settlement, technology and how people responded to short- and long-term ecological changes.
PR: ARCH 2480

3750 Archaeology of Warfare is a broad overview of archaeological research conducted at sites associated with human conflict spanning from ancient times to World War II. Weekly lectures and hands-on exercises will provide students with a solid background on the various means by which archaeologists study and excavate sites relating to war, conflict and captivity. A broad range of topics will be covered including remote sensing and field survey techniques, the changing technology and tactics of war, battlefield sites, POW camps, sunken naval vessels, aviation sites, fortifications and frontier outposts.
PR: ARCH 1000 or the former 1030

3850 Material Culture (same as Folklore 3850) is an introduction to the study of material culture and the question of why objects are important to us. Using folklore and interdisciplinary approaches, we will look at objects as cultural products, question the influence of objects on behaviours, and address the role of objects in historical and ethnographic research.
CR: Folklore 3850

4015 Cultural Resource Management (same as Folklore 4015 and Geography 4015) is a study of cultural resource management: the definition and recognition of cultural resources, the application of policy in managing cultural resources, and the identification and consideration of contemporary issues in cultural resource management. Three hours of lecture and three hours of seminar per week.
CR: Folklore 4015 and Geography 4015
PR: ARCH 2480 or the former ARCH 2582

4041 Palaeopathology looks at disease, diet, genetics, accidents and maternal health factors as contributors to variations in the human skeleton. In this lecture and seminar course students will investigate how these factors are diagnosed from bones, and aspects of the culture, health, economy and environment of the skeletal individuals are examined.
PR: ARCH 2430 and ARCH 3040

4043 Biomolecular Archaeology is a rapidly developing, multidisciplinary subfield of archaeology concerned with unraveling aspects of human behaviour and adaptation from ancient biomolecules preserved in artifacts and biological remains. Through lectures, directed readings and seminars this course aims to review and critically assess the many facets of biomolecular archaeology, including how biological and (geo-chemical methods can be used to address questions of diet, migration and population affinity in the past.
PR: one of ARCH 2430, ARCH 2450 or ARCH 2480

4050-4059 Special Projects in Bioarchaeology includes directed reading, seminars and lab analysis of various skeletal collections. Topics to be covered may include primate behaviour, forensic anthropology, stable and radiogenic isotope analysis and various aspects of human evolution.
PR: ARCH 2430 and ARCH 2450

4150 Environmental Change and Quaternary Geography (same as Earth Sciences 4703 and Geography 4150) examines methods of reconstructing Quaternary environments, effects of Quaternary environmental changes on landform, with special reference to North America, development and characteristics of glacial and nonglacial climates.
CR: Earth Sciences 4703, Geography 4150
LH: 3
PR: 6 credit hours in Physical Geography or in Archaeology at the 3000-level, or permission of the instructor

4152 Zooarchaeology aims to introduce the student to the wide range of information that can be gleaned about past human groups from the animal remains they left behind after butchery, meals, toolmaking and other activities. Students will also gain practical experience in the identification and analysis of faunal remains.
CR: the former ARCH 4195 or the former Anthropology 4195
PR: ARCH 2450 or ARCH 2480

4153 Lithic Analysis explores the range of techniques used to study stone tools, including material and provenance identification, morphology and functional analysis, temporal and cultural typology, measurement, illustration, experimental manufacture, use wear and breakage patterns, refitting, debitage analysis and spatial distribution.
CR: the former ARCH 4196 or the former Anthropology 4196
PR: ARCH 2450 or ARCH 2480

4160-4169 Special Projects in Archaeology are courses which may be offered from time to time as demand arises. They may involve readings, seminars and actual analysis of archaeological collections on, for example: The Neolithic of Western Asia; the Rise of Civilization in Western Asia Scandinavian Prehistory; Palaeoethnobotany; and Technology and Material Culture.
PR: one of ARCH 2450, 2480, 2481, the former 2582, or permission of the instructor

4172 Postcolonial Archaeology critically explores the history and contemporary practice of archaeology in light of the political claims of (formerly) subjugated groups. Topics to be discussed include archaeological antecedents of a postcolonial perspective (postprocessualism, critical archaeology), political economy of archaeology, interests of indigenous and other descendant groups, repatriation, national and transnational archaeologies, and community archaeology.
CR: the former ARCH 4192 or the former Anthropology 4192
PR: ARCH 2480 or the former ARCH 2582

4173 Archaeology of the Body explores the possibility of a more encompassing archaeology of embodied experience, starting from archaeological work on gender and recent reconceptualizations of the body in social, cultural and feminist theory. Topics to be discussed include the notion of bodily practice, biopolitics, sexuality, hybridity, violence, identity, sensory experience, disability and aging.
CR: the former ARCH 4191 or the former Anthropology 4191
PR: ARCH 2480

4182 History of Archaeology is an intensive study of the emergence and

maturation of archaeology as a discipline within the social sciences, particularly in Western Europe and North America, during the 19th and 20th centuries.
PR: ARCH 2480

4190-4199 Selected Topics in Archaeology and Prehistory is a seminar course focusing on recent theoretical and methodological developments in archaeological research.
PR: one of ARCH 2450, 2480, or the former ARCH 2582

4411 Archaeological Theory is an overview of the higher level conceptual frameworks that organize current archaeological research and interpretation.
PR: ARCH 2480 and ARCH 4182

4500 Special Topic in Historical Archaeology is a consideration of current developments in methods, techniques, and theory in Historical Archaeology.
PR: ARCH 2480, the former 2582, or permission of instructor

4994 Past Material - Advanced Research and Writing is a directed reading course and is a prerequisite for the Honours Essay in Archaeology (ARCH 4995). Readings will be chosen to complement students' specialization and to prepare them for the honours essay. Assignments will emphasize short essays and will provide students with the opportunity to improve their professional writing skills in the fields of archaeology, material culture and heritage.
PR: ARCH 2480

4995 Honours Essay is required as part of the Honours program.
PR: ARCH 4994

16.2.1 Archaeology Work Terms

The following Work Terms are a requirement of the Bachelor of Arts Co-operative Education Major or Honours in Archaeology.

300W Work Term 1 (Co-operative) will be the student's first work experience in a professional environment. Students are expected to learn, develop and practice the high standards of behaviour normally expected in the workplace. Students may be required to attend seminars on professional development.
CH: 0
PR: admission to the ACE Program; ARCH 3585 and 3586 or previous archaeological experience; a minimum overall average of 65%; and permission of the ACE Coordinator and Head of the Department

400W Work Term 2 (Co-operative) builds on previous work term experiences and academic instruction as students will be assigned to a more challenging position. Students will now possess the necessary academic grounding and work experience to contribute to the problem-solving and management needs of a professional work environment. Students should observe and appreciate the attitudes, responsibilities and ethics normally expected of professionals, and should exercise greater independence and responsibility in their assigned work functions.
CH: 0
PR: admission to the ACE Program; ARCH 300W; a minimum overall average of 65%; and permission of the ACE Coordinator and Head of the Department

16.3 Classics

In accordance with Senate's *Policy Regarding Inactive Courses*, the course descriptions for courses which have not been offered in the previous three academic years and which are not scheduled to be offered in the current academic year have been removed from the following listing. For information about any of these inactive courses, please contact the Head of the Department.

In special circumstances, prerequisites may be waived with the permission of the Head of the Department.

A tentative list of upcoming Classics course offerings can be found at www.mun.ca/hss/courses.php.

Classics courses are designated by CLAS.

16.3.1 Greek

All sections of the Greek language courses below, except CLAS 4999, follow the Language Study Course Guidelines available at www.mun.ca/hss/ls.

1130 Introductory Ancient Greek I (same as Medieval Studies 1130) familiarizes students with the basics of the Ancient Greek language. Students will master the Ancient Greek alphabet, learn how to read simple narratives in Ancient Greek, and examine the connections between language and culture. Evaluation will focus largely on comprehension of written Ancient Greek. All sections of this course follow the Language Study Course Guidelines available at www.mun.ca/hss/ls.
CR: Medieval Studies 1130

1131 Introductory Ancient Greek II (same as Medieval Studies 1131) continues to familiarize students with the Ancient Greek language. Students will acquire a broad vocabulary, learn to read more complex passages of prose and poetry, and gain insights into key social concepts through study of language. All sections of this course follow the Language Study Course Guidelines available at www.mun.ca/hss/ls.
CR: Medieval Studies 1131
PR: CLAS 1130 or Medieval Studies 1130

2300 Intermediate Ancient Greek (same as Medieval Studies 2300) provides a deeper knowledge of the Ancient Greek language while offering a window onto the culture and society of Ancient Greece. Students will read selections from works of history, literature, philosophy and oratory in Ancient Greek. All sections of this course follow the Language Study Course Guidelines available at www.mun.ca/hss/ls.
CR: Medieval Studies 2300
PR: CLAS 1131 or Medieval Studies 1131

2302 Readings in New Testament Greek - inactive course.

3300 Advanced Ancient Greek (same as Medieval Studies 3300) provides advanced knowledge of the Ancient Greek language while offering a window onto the culture and society of Ancient Greece. Students will begin to apply their knowledge to the close reading and interpretation of major works of Ancient Greek literature. All sections of this course follow the Language Study Course Guidelines available at www.mun.ca/hss/ls.
CR: Medieval Studies 3300
PR: CLAS 2300 or Medieval Studies 2300

4300 Greek Tragedy
PR: CLAS 3300

4305 Greek Comedy
PR: CLAS 3300

4310 Greek Epic Poetry
PR: CLAS 3300

4315 Attic Orators
PR: CLAS 3300

4320 Greek Lyric Poetry
PR: CLAS 3300

4325 Greek Historians
PR: CLAS 3300

4340 Greek Philosophical Authors
PR: CLAS 3300

4355-4365 Special Topics in Greek Readings will have authors and readings selected by the Department.
PR: CLAS 3300

4370 Hellenistic Poetry
PR: CLAS 3300

4391 Special Authors
PR: CLAS 3300

4999 Honours Essay is a requirement of the Honours program.
PR: CLAS 3300

16.3.2 Greek and Roman Studies

Medieval Studies 3000 may be substituted for a Greek and Roman Studies course in both the Classics degree programs (Honours, Joint Honours and general degree) and the Greek and Roman Studies degree programs (Honours, Joint Honours and general degree).

1001 Critical Reading and Writing: Classics in Popular Culture is an introduction to the ways in which modern popular culture represents and understands the ancient Greek and Roman world. Emphasis is placed on learning and practising critical reading and writing skills, including the comprehension and analysis of primary sources and secondary literature, and effective academic composition. All sections of this course follow Critical Reading and Writing Course Guidelines available at www.mun.ca/hss/crw.

1051 Gods in Classical Mythology is an introduction to some of the major myths of ancient Greece and Rome, with particular attention to the gods. The myths will be studied with reference to their social and historical contexts, literary and artistic representations, modern theories of interpretation, and influences on modern modes of cultural expression.
CR: the former CLAS 1050

1052 Heroes in Classical Mythology is an introduction to some of the major myths of ancient Greece and Rome, with particular attention to the heroes. The myths will be studied with reference to their social and historical

contexts, literary and artistic representations, modern theories of interpretation, and influences on modern modes of cultural expression.
CR: the former CLAS 1050

1100 Life in Ancient Greece is a general survey of the origins and evolution of Ancient Greek Civilization. The course introduces the student to Greek social and political institutions, religion and myth, and achievements in art, philosophy, science and literature, as well as the influence of Ancient Greece on the modern world.

1200 Life in Ancient Rome is a general survey of the origins and evolution of Ancient Rome. The course introduces the student to social, political, and legal institutions, the growth of the Roman Empire, Roman art, literature, and religions, as well as Rome's pervasive influence in the modern world.

2010 Greek Art and Architecture is an introduction to the study of the art and architecture of Ancient Greece, its social, religious, and political functions in Athens and the greater Greek world. The course introduces students to different ways of analysing and interpreting the material remains of the ancient Greeks and traces their echoes in modern art and architecture.

2015 Roman Art and Architecture is an introduction to the study of the art and architecture of Ancient Rome, its social, religious, and political functions in Rome and the provinces. The course introduces students to different ways of analysing and interpreting the material remains of the ancient Romans and traces their echoes in modern art and architecture.

2020 History of the Hellenistic World (same as History 2034) is a survey of the history of the Mediterranean world and the Near East from the death of Alexander the Great in 323 BCE until the incorporation of the Kingdom of Egypt in the Roman Empire in 30 BCE. Particular attention is given to the influence of the new monarchies on political, social and cultural developments in both Greek and non-Greek communities.
CR: History 2034

2025 Ancient Near Eastern History (same as History 2020) is an introduction to the history of ancient city-states, kingdoms and empires in Egypt and/or Mesopotamia, including economic, social, political and cultural developments. Students will be introduced to the rich heritage that influences the modern Middle East and its relations with the traditions of Europe.
CR: History 2020

2035 History of Classical Greece (same as History 2035) is a survey of Greek History from the Bronze Age to the death of Alexander the Great, with special reference to the social and political institutions of the fifth century BCE. Students will learn about the foundations of modern democracy and its responses to internal and external challenges.
CR: History 2035

2041 History of the Roman Republic (same as History 2041) is a survey of Roman history from the early monarchy to the death of Julius Caesar, with special reference to the society and politics of the late Republican period. Students will learn about the different ways in which modern states have, for good or ill, attempted to emulate republican Roman political structures.
CR: History 2041, the former CLAS 2040, the former History 2040

2042 History of the Roman Empire (same as History 2042) is a survey of Roman history from the death of Julius Caesar to the rise of Constantine, with special reference to the society and politics of the early Imperial period. Course contents may also include the representation of Roman emperors and imperial culture in modern film and television.
CR: History 2042, the former CLAS 2040, the former History 2040

2055 Women in the Ancient World is an examination of the role of women in ancient Mediterranean civilizations from the perspectives of social and political history and culture. Critical assessments of relevant scholarship and methodologies will be included. Students will gain awareness of views of gender identity and sexuality that are different from modern views.

2156 Gladiators and the Arena: Violent Spectacle in Ancient Rome is an introduction to the violent and dangerous spectacles of ancient Rome: gladiatorial combat, beast fighting, executions, and chariot-racing. Emphasis will be placed on exploring the historical details of these spectacles, their significance in relation to aspects of Roman society, and representations of Roman gladiators, the arena, and chariot-racing in modern culture.

2701 History of Ancient Philosophy (same as Philosophy 2201, the former Philosophy 2701) introduces students to the origins of philosophy among the ancient Greeks and Romans. Topics include cosmology, metaphysics, physics, ethics, God, and the ancient ideal of philosophy as a 'way of life.' We will examine the texts and fragments of the most influential and foundational philosophers of the ancient world, focusing primarily on the thought of Plato and Aristotle, their engagement with the Pre- Socratic philosophers who came before them, and their influence upon philosophers since.
CR: Philosophy 2201, the former Philosophy 2701

2900 Science and Technology in the Ancient World is an introduction to significant developments in ancient Greek and Roman science and technology with emphasis on interpreting the primary evidence, including written sources (in translation) and material remains, assessing the historical and social context, considering the nature of changes, and their influence on modern science and technology.

2901 Technology and Culture in the Ancient World is an introduction to the applied technologies of the Greek and Roman cultures from ancient written sources and archaeological remains. It covers the time from the Late Bronze Age through the Late Roman Empire. Topics include machinery and gadgets, mass production, engineering, nautical technology, and labour. Students learn to assess the feedback between modern technology and culture by analysing equivalent situations in the ancient world.

2902 The Environment of the Greeks and Romans is an introduction to the environment in the ancient Greek and Roman world. It gives an overview of our sources of information, research methods, the technology of exploitation of natural resources and associated problems, and the environment in the mythical imagination of the ancient Greeks and Romans. Students learn to analyse the environmental problems faced by these ancient cultures and will apply what they learn to modern contexts.

2903 Greek and Latin Roots of Scientific Terms is an overview of the Greek and Latin origins of modern scientific and medical terminology.
CR: the former CLAS 1900

3010 Greek Religion (same as Religious Studies 3010) is a study of the role of religion in the private and public life of the Greek world. Topics include the Greek gods, religious rituals, sacred sites and temples, regional and temporal variations in religious practices, and the role of religion in society. The course may also compare ancient Greek religious practices and modern conceptions of religion.
CR: Religious Studies 3010, the former CLAS 3121, the former Religious Studies 3121
PR: there is no prerequisite for this course but students are strongly advised to have successfully completed at least one 1000- level or 2000-level Greek and Roman Studies course before registering in any 3000-level or higher Greek and Roman Studies course

3020 Roman Religion (same as Religious Studies 3020) is a study of the role of religion in the private and public life of the Roman world. Topics include the Roman divinities, sacred sites and temples, the role of religion in politics and society, the interaction with and assimilation of foreign religious practices, and the rise of Christianity. Students may also compare Roman religious practices with modern conceptions of religion.
CR: Religious Studies 3020, the former CLAS 3121, the former Religious Studies 3121
PR: there is no prerequisite for this course but students are strongly advised to have successfully completed at least one 1000- level or 2000-level Greek and Roman Studies course before registering in any 3000-level or higher Greek and Roman Studies course

3030 Greece and Persia is a study of relations between Greece and Persia from the foundation of the Persian Empire to the death of Alexander the Great. The course examines, and invites students to critique, the perceived dichotomy between "East" and "West," both ancient and modern.
PR: there is no prerequisite for this course but students are strongly advised to have successfully completed at least one 1000- level or 2000-level Greek and Roman Studies course before registering in any 3000-level or higher Greek and Roman Studies course

3040 Socrates and Athens is an introduction to and examination of Socrates within the context of Athenian political, social, cultural, intellectual, and religious life, and against the background of the fifth-century enlightenment and the sophistic movement. The course also examines changings views and representations of the figure of Socrates from antiquity to modern times.
PR: there is no prerequisite for this course but students are strongly advised to have successfully completed at least one 1000- level or 2000-level Greek and Roman Studies course before registering in any 3000-level or higher Greek and Roman Studies course

3050 Augustus and Rome is a course that examines transformations in Roman society and the city of Rome under the first Roman emperor (27 BCE to 14 CE). Topics include Augustan literature, art, and architecture, and the religious, social, and urban changes during this period. Students will also consider the ways in which later authoritarian regimes throughout history have appealed to the figure of Augustus as a model.
PR: there is no prerequisite for this course but students are strongly advised to have successfully completed at least one 1000- level or 2000-level Greek and Roman Studies course before registering in any 3000-level or higher Greek and Roman Studies course

3103 The Italian Renaissance and Classical Antiquity introduces students to the reception of Greco-Roman antiquity in Renaissance Italy. Particular attention will be paid to the ways in which the cultural legacy of classical antiquity was studied, reinterpreted, and adapted to new uses by writers, scholars, artists and architects such as Petrarch, Machiavelli, Raphael, Michelangelo, and Alberti.
PR: there is no prerequisite for this course but students are strongly

advised to have successfully completed at least one 1000- level or 2000-level Greek and Roman Studies course before registering in any 3000-level or higher Greek and Roman Studies course

3150 Early Christian Thought: The First Five Centuries - inactive course.

3270 Christianity and the Roman Empire (same as History 3270, Medieval Studies 3270, Religious Studies 3270) is a study of the relationship between Christianity and the Roman Empire from the first to the fourth century.
CR: History 3270, Medieval Studies 3270, Religious Studies 3270

3405 Tragic Drama in Greece and Rome is a detailed examination of the tragic dramas of ancient Greece and Rome. A selection of plays by Aeschylus, Sophocles, Euripides and Seneca will be read in English translation. Topics may include the development of ancient tragedy, its literary, performative and thematic traditions, its representation of social and historical conditions, its influence on later tragic drama, and on modern theatre and film.
CR: the former Classics 2805
PR: there is no prerequisite for this course but students are strongly advised to have successfully completed at least one 1000- level or 2000-level Greek and Roman Studies course before registering in any 3000-level or higher Greek and Roman Studies course

3410 Comic Drama in Greece and Rome is a detailed examination of the comic dramas of ancient Greece and Rome. A selection of plays by Aristophanes, Menander, Plautus and Terence will be read in English translation. Topics may include the development of ancient comedy, its literary permormative, and thematic traditions, its representation of social and historical context, its influence on later tragic drama, and on modern theatre, and film and television.
CR: the former Classics 2810
PR: there is no prerequisite for this course but students are strongly advised to have successfully completed at least one 1000- level or 2000-level Greek and Roman Studies course before registering in any 3000-level or higher Greek and Roman Studies course

3415 Epic Poetry in Greece and Rome offers a detailed and in-depth study of the epic poetry of ancient Greece and Rome. The course will examine the poems of Homer, Apollonius of Rhodes and Virgil in English translation. Instructors may include additional poems. Topics to be discussed include the development of epic poetry, its literary traditions and its role in Greek and Roman society, and its influence on modern literature and film.
CR: the former Classics 2060
PR: there is no prerequisite for this course but students are strongly advised to have successfully completed at least one 1000- level or 2000-level Greek and Roman Studies course before registering in any 3000-level or higher Greek and Roman Studies course

3420 Lyric Poetry in Greece and Rome - inactive course.

3500 Sport and Athletics in Ancient Society traces the evolution of athletics and other forms of recreation in Greece and Rome with emphasis on their religious, cultural, and social importance. Topics include sports in Homer, the concept of *arete*, the Olympic 'ideal,' gladiatorial contests, Greek athletics and the Roman Empire, and an analysis of ancient echoes in modern sport and athletics, e.g. the Olympic Games.

3501-3510 Special Topics in Classics will have topics determined by the Department.
PR: there is no prerequisite for this course but students are strongly advised to have successfully completed at least one 1000- level or 2000-level Greek and Roman Studies course before registering in any 3000-level or higher Greek and Roman Studies course

3580 Bronze Age Archaeology of the Eastern Mediterranean - inactive course.

3600 Ancient Myth and Cult (same as Religious Studies 3600) develops the students' knowledge of myth and material culture by examining specific religious sites in the Greek and Roman world as foci of ritual practice. Students learn to integrate knowledge of physical remains with literary and ritual evidence in order to obtain a more integrated understanding of religious life in ancient Greece and Rome.
CR: Religious Studies 3600
PR: there is no prerequisite for this course but students are strongly advised to have successfully completed at least one 1000- level or 2000-level Greek and Roman Studies course before registering in any 3000-level or higher Greek and Roman Studies course

3700 The Ancient World in Film examines the representation of the history and cultures of the ancient world in film. A selection of films will be studied and extensive reference will be made to the ancient evidence that informs them. The ancient world's impact on modern society will be considered together with the film industry's recasting of the ancient world in response to modern social and historical developments.
PR: there is no prerequisite for this course but students are strongly advised to have successfully completed at least one 1000- level or 2000-level Greek and Roman Studies course before registering in any 3000-level or higher Greek and Roman Studies course

3710-3729 Special Topics in Classics: Harlow is available only as part of the part of the Harlow Campus semester.
PR: there is no prerequisite for this course but students are strongly advised to have successfully completed at least one 1000- level or 2000-level Greek and Roman Studies course before registering in any 3000-level or higher Greek and Roman Studies course

3900 Greek and Roman Medicine examines the medical theories and practices of the ancient Greek and Roman world by taking account of ancient texts (in translation) as well as evidence from material culture, including art and architecture. Topics may include the relationship between science and medicine, concepts of health and illness, the role of the healer, practical applications, gender differentiation of patients, and legacy of ancient practices.
PR: there is no prerequisite for this course but students are strongly advised to have successfully completed at least one 1000- level or 2000-level Greek and Roman Studies course before registering in any 3000-level or higher Greek and Roman Studies course

3901 Ships and Seafaring in the Ancient World is an introduction to the maritime traditions of the ancient Greeks and Romans. It gives an overview of our sources of information, research methods, the origins and technology of shipbuilding, types of vessels, navigation, nautical infrastructure, and the sea in the mythical imagination of the ancient Greeks and Romans. Where appropriate, the course makes reference to modern elements such as hydraulic concrete, SCUBA diving, recreational boating and sailing, etc.
PR: there is no prerequisite for this course but students are strongly advised to have successfully completed at least one 1000- level or 2000-level Greek and Roman Studies course before registering in any 3000-level or higher Greek and Roman Studies course

3902 Ancient Greek and Roman Mathematics introduces students to the way the ancient Greeks and Romans employed mathematics and refers, where possible, to preceding Egyptian, Mesopotamian, and Indian models. Students will learn about Greek and Roman number systems, numerals, time measurement, the Roman calendar, ancient surveying devices, and the use of the abacus. All sections of this course follow Quantitative Reasoning Course Guidelines available at www.mun.ca/hss/qr.
PR: there is no prerequisite for this course but students are strongly advised to have successfully completed at least one 1000-level or 2000-level Greek and Roman Studies course before registering in any 3000-level or higher Greek and Roman Studies course.

4000 Seminar in Greek History and Society - inactive course.

4010 Seminar in Roman History and Society is a seminar in Roman History and Society.
PR: there is no prerequisite for this course but students are strongly advised to have successfully completed at least one 1000- level or 2000-level Greek and Roman Studies course before registering in any 3000-level or higher Greek and Roman Studies course

4020 Seminar in Greek Literature and Culture is a seminar in Greek Literature and Culture.
PR: there is no prerequisite for this course but students are strongly advised to have successfully completed at least one 1000- level or 2000-level Greek and Roman Studies course before registering in any 3000-level or higher Greek and Roman Studies course

4030 Seminar in Roman Literature and Culture is a seminar in Roman Literature and Culture.
PR: there is no prerequisite for this course but students are strongly advised to have successfully completed at least one 1000- level or 2000-level Greek and Roman Studies course before registering in any 3000-level or higher Greek and Roman Studies course

4100-4109 Special Topics in Greek and Roman Studies will have topics announced by the Department and may include field studies in topography, Greek and Roman art and architecture, archaeology, and related areas, to be held in the Mediterranean and other regions of Graeco-Roman influence.
PR: permission of the instructor and the Head of the Department

4999 Honours Essay is a requirement of the Honours program.

16.3.3 Latin

All sections of the Latin language courses below, except CLAS 4999, follow the Language Study Course Guidelines available at www.mun.ca/hss/ls.

1120 Introductory Latin I (same as Medieval Studies 1120) familiarizes students with the basics of the Latin language. Students will learn how to read simple narratives and short poems in Latin and examine the connections between language and culture. Evaluation will focus largely on comprehension of written Latin. All sections of this course follow the Language Study Course Guidelines available at www.mun.ca/hss/ls.
CR: Medieval Studies 1120

1121 Introductory Latin II (same as Medieval Studies 1121) continues to familiarize students with the Latin language and Roman culture and society. Students will acquire a broad vocabulary, learn to read more complex passages of prose and poetry in Latin, and gain insights into key social concepts through study of language. All sections of this course follow the Language Study Course Guidelines available at www.mun.ca/hss/ls.
CR: Medieval Studies 1121
PR: CLAS 1120 or Medieval Studies 1120

2200 Intermediate Latin (same as Medieval Studies 2200) provides a deeper knowledge of the Latin language while offering a window onto the culture and society of Ancient Rome. Students will read selections from works of history, literature, philosophy and oratory in Latin. All sections of this course follow the Language Study Course Guidelines available at www.mun.ca/hss/ls.
CR: Medieval Studies 2200
PR: CLAS 1121 or Medieval Studies 1121

3200 Advanced Latin (same as Medieval Studies 3200) provides advanced knowledge of the Latin language while offering a window onto the culture and society of Ancient Rome. Students will begin to apply their knowledge to the close reading and interpretation of major works of Latin literature. All sections of this course follow the Language Study Course Guidelines available at www.mun.ca/hss/ls.
CR: Medieval Studies 3200, the former CLAS 2205
PR: CLAS 2200 or Medieval Studies 2200

4202 Medieval Latin - inactive course.

4205 Latin Lyric Poetry
PR: CLAS 3200

4210 Latin Historians
PR: CLAS 3200

4215 Latin Orators
PR: CLAS 3200

4220 Latin Hexameter Poetry
PR: CLAS 3200

4225 Latin Epistolography
PR: CLAS 3200

4235 Latin Philosophical Authors
PR: CLAS 3200

4240 Latin Drama
PR: CLAS 3200

4245 Latin Elegiac Poetry
PR: CLAS 3200

4250 Latin Satire
PR: CLAS 3200

4265-4275 Special Topics in Latin Readings will have authors and readings selected by the Department.
PR: CLAS 3200

4291 Special Authors
PR: CLAS 3200

4999 Honours Essay is a requirement of the Honours program.
PR: CLAS 3200

16.4 Communication Studies

For Communication Studies course descriptions see under **English, Communication Studies**.

16.5 Criminology

For Criminology course descriptions see under **Sociology, Criminology**.

16.6 Economics

In accordance with Senate's *Policy Regarding Inactive Courses*, the course descriptions for courses which have not been offered in the previous three academic years and which are not scheduled to be offered in the current academic year have been removed from the following listing. For information about any of these inactive courses, please contact the Head of the Department.

A tentative list of upcoming Economics course offerings can be found at www.mun.ca/hss/courses.php.

Economics courses are designated by ECON.

1010 Introduction to Microeconomics (same as the former ECON 2010) examines scarcity and opportunity cost. Demand and supply. Elasticity. Household demand: marginal utility. Household demand: indifference curves. Production functions. Short-run and long-run cost functions. Perfect competition in the short run and the long run. Monopoly. All sections of this course follow Quantitative Reasoning Course Guidelines available at www.mun.ca/hss/qr.
CR: the former ECON 2010

1020 Introduction to Macroeconomics (same as the former ECON 2020) covers national income accounting, aggregate income analysis, money, banking and foreign trade. All sections of this course follow Quantitative Reasoning Course Guidelines available at www.mun.ca/hss/qr.
CR: the former ECON 2020

2550 Economic Statistics and Data Analysis is an analysis of economic statistics and the use of economic data. A course designed to introduce students to the task of economic data collection, description and analysis. Emphasis will be on interpretation and analysis of data using computer software programs. All sections of this course follow Quantitative Reasoning Course Guidelines available at www.mun.ca/hss/qr.
PR: ECON 1010 (or the former ECON 2010),ECON 1020 (or the former ECON 2020), Statistics 2500 or equivalent

3000 Intermediate Micro Theory I is the basic microeconomic theory course; consumer demand, indifference curve analysis, theory of production and cost, factor substitution, and the theory of the firm under perfect competition and monopoly.
PR: ECON 1010 (or the former ECON 2010) and ECON 1020 (or the former ECON 2020), Mathematics 1000

3001 Intermediate Micro Theory II is a continuation of basic microeconomic theory; the theory of imperfect competition, theory of factor pricing under various market structures, general equilibrium and welfare economics.
PR: ECON 3000

3010 Intermediate Macro Theory I is aggregate analysis including consumer, investment, government and international sectors, the role of money, determinants of aggregate supply, and the effects of autonomous behavioural changes and fiscal and monetary policies on unemployment, price levels and the balance of payments.
PR: ECON 1010 (or the former ECON 2010), ECON 1020 (or the former ECON 2020), Mathematics 1000

3011 Intermediate Macro Theory II is a consideration of modern theories of macroeconomics, dynamics, empirical evidence and simulation of the national economy. Emphasis on the availability and effectiveness of government policy instruments.
PR: ECON 3010

3030 International Economics is an intermediate course encompassing theories and empirical studies of global trade flows; the effects of trade barriers, and efforts at economic integration such as the North American Free Trade Agreement and the European Union; the Balance of Payments and its links to the foreign exchange markets; the importance of the exchange rate worldwide as a macroeconomic variable; and the causes and lessons of exchange rate crises. All sections of this course follow International Studies guidelines available at www.mun.ca/hss/IS.
PR: ECON 1010 (or the former ECON 2010) and ECON 1020 (or the former ECON 2020)

3070 The Structure and Problems of the Newfoundland and Labrador Economy is an analysis of the structure of the economy of Newfoundland and Labrador. Basic economic theory will be applied to current economic issues and problems in Newfoundland and Labrador.
PR: ECON 1010 (or the former ECON 2010) and ECON 1020 (or the former ECON 2020)

3080 Natural Resource and Environmental Economics is application of economic analysis to renewable and non-renewable natural resource industries such as the fishery, forestry, and mining. Emphasis is given to the criteria for optimal resource use under various market structures and their implications for public policy. Issues of environmental resource management and pollution control will also be covered.
PR: ECON 1010 (or the former ECON 2010)

3140 Economic Analysis in Health Care evaluates the role of economic analysis to health and medical care. Topics in the application of cost effectiveness analysis [and cost-benefit analysis] to health care programs, as well as comparisons of the Canadian experience with other health care systems will be discussed.
PR: ECON 1010 (or the former ECON 2010)

3150 Money and Banking examines the operation of the money and banking system. Topics include the core foundations of money and banking, and how they can be applied to the Canadian banking system and also to an international context, such as worldwide financial crises and the interaction of central banks globally. Selected topics and emphasis will vary from year to year so as to reflect the evolution of the Canadian banking system and

the global financial system. All sections of this course follow International Studies guidelines available at www.mun.ca/hss/IS.
PR: ECON 1010 (or the former ECON 2010) and ECON 1020 (or the former ECON 2020)

3160 Financial Economics provides an analysis of the major building blocks of the modern theory of financial economics and their implications for decision-making. To reflect that modern finance is a branch of economics, emphasis will be on how general economic principles and analytical techniques can be applied across all finance sub-fields. Topics include the basic pillars in finance–intertemporal optimization, asset valuation, risk management–and selected issues that will vary each year.
CR: Economis 3160, the former Business 4500
PR: Mathematics 1000 or its equivalent, ECON 1010 (or the former ECON 2010) and ECON 1020 (or the former ECON 2020). Students are recommended to take ECON 2550 or its equivalent prior to taking this course.

3360 Labour Market Economics is an intermediate course concentrating on Canadian labour issues. The course investigates the labour market decisions that workers face and the influence of government decisions. Course topics also include factors affecting a firm's demand for labour, wage determination in non-union market, the role of unions, the various structure of wages and wage differentials in the Canadian setting.
CR: the former ECON 4360
PR: ECON 1010 (or the former ECON 2010)

3550 Mathematical Economics I examines linear algebra and differential calculus, with applications to economics.
PR: ECON 1010 (or the former ECON 2010), Mathematics 1000 with a "B" standing or Mathematics 2050

3551 Mathematical Economics II covers integral calculus, difference and differential equations, with applications to Economics.
PR: ECON 3000, ECON 3550, Mathematics 1000 with a "B" standing

3600 Industrial Revolutions of the 18th and 19th Centuries - inactive course.

3610 International Economic History of the 19th and 20th Centuries - inactive course.

3620 Canadian Economic History to the End of the 19th Century - inactive course.

3630 Canadian Economic History in the 20th Century - inactive course.

3670 Applications of Choice Theory examines microeconomic choices made outside perfectly competitive markets. Its topics include areas to which choice theory has been applied, for example, the economics of labour, marriage, sport, entertainment, crime, gambling, and the consumption of addictive goods.
PR: ECON 1010 (or the former ECON 2010)

3711 Intergovernmental Relations in Canada - inactive course.

4000 Advanced Microeconomic Analysis is an advanced treatment of theoretical and applied microeconomic theory, including topics such as intertemporal choice, risk and information, game theory and competitive strategy, index numbers, public goods, externalities, input-output analysis, linear programming, duality theory and empirical microeconomic studies.
PR: ECON 3000, ECON 3001

4010 Economics of Development in Less Developed Countries - inactive course.

4011 Economic Planning and Development - inactive course.

4025 Public Expenditure is an analysis of the theory of public expenditure. Relationship to resource allocation and distribution of income. Market failure and the rationale for government intervention. Theory of public goods. Public choice mechanisms. Expenditure patterns in Canada. Public sector budgeting. Public enterprise pricing and investment rules. Introduction to cost-benefit analysis.
CR: the former ECON 4020
PR: ECON 3000

4026 Taxation is an analysis of the theory of taxation. Relationship to resource allocation and distribution of income. Incentive effects of taxation. Tax incidence. Tax structure in Canada at federal, provincial and local levels.
CR: the former ECON 4020
PR: ECON 3000

4030 International Trade is an advanced course in the theory and empirical tests of international trade, strategic trade policy and economic integration, taking a general equilibrium approach, and dispute resolution under the rules of the World Trade Organization, and under the North American Free Trade Agreement. All sections of this course follow International Studies guidelines available at www.mun.ca/hss/IS.
PR: ECON 3000

4031 International Monetary Problems is an advanced open economy international macroeconomics course covering the balance of payments, its links with the national accounts and foreign exchange markets; economic stabilization policies under flexible and fixed exchange rates; exchange rate determination; the open economy trilemma and its policy implications for the choice exchange regimes; international monetary problems in the context of the increasing globalization of financial markets and proposals for reform in the light of exchange rate crises. All sections of this course follow International Studies guidelines available at www.mun.ca/hss/IS.
PR: ECON 3010

4040 Economics of Education - inactive course.

4050 Inflation: Theory and Policy - inactive course.

4060 Development of Economic Thought I is Adam Smith to Karl Marx. A study in the development of Classical Economics with emphasis on the contributions of Smith, Malthus, Ricardo, Mill and Marx.
PR: ECON 1010 (or the former ECON 2010), ECON 1020 (or the former ECON 2020), and ECON 2550, 3000, 3010

4061 Development of Economic Thought II is Alfred Marshall to Keynes. A study in the evolution of marginalism. Emphasis will be placed on the Economics of Marshall and Keynes. Institutional Economics, a parallel development, is also considered.
PR: ECON 1010 (or the former ECON 2010), ECON 1020 (or the former ECON 2020), and ECON 2550, 3000, 3010

4070 Forestry Economics - inactive course.

4080 Advanced Fisheries Economics - inactive course.

4085 Advanced Environmental Economics is an advanced treatment of the environmental consequences of economic activities and the associated policy issues.
PR: ECON 3000

4090 Mineral and Petroleum Economics is an introduction to some of the theoretical economic problems and practical solutions involved in the exploration, development and production phases of mineral and petroleum mining in Newfoundland and Labrador.
PR: ECON 3000

4100 Industrial Organization and Public Policy is the study of the basic characteristics of structure, behaviour and performance of industry with particular reference to the Canadian economy. Relation of industrial structure to social purpose is examined, with an emphasis on public regulations of monopoly and the objectives and implementation of anti-combines policy.
PR: ECON 2550, ECON 3000

4120 Applied Welfare Economics and Cost Benefit Analysis investigates some current criteria of welfare theory found in the literature and then outlines the principles used in measuring changes in consumer and producer welfare. The theory of cost benefit analysis is examined and then the principles are applied to a variety of projects, some of which are proposed to take place in Newfoundland and Labrador.
PR: ECON 3000

4140 Health Economics is an application of economic analysis to current issues in the organization, financing and utilization of health services.
PR: ECON 3000

4150 Monetary Theory examines empirical studies in money. Readings in current literature. Monetary theory with applications to problems of employment and foreign trade.
PR: ECON 1010 (or the former ECON 2010), ECON 1020 (or the former ECON 2020), ECON 2550, 3000, 3010

4200 Game Theory is an introduction to game theory and strategic thinking. Ideas such as dominance, backward induction, Nash equilibrium, stability, commitment, credibility, and asymmetric information are discussed and applied to games played in class and to examples drawn from economics, politics, the movies, and elsewhere.
PR: ECON 3000

4361 Labour Market Theory and Income Distribution - inactive course.

4550 Econometrics I covers estimation of the general linear regression model with emphasis on fundamental theory and examples from published empirical research.
PR: ECON 1010 (or the former ECON 2010), ECON 1020 (or the former ECON 2020), ECON 2550, 3000, 3010

4551 Econometrics II covers further problems in econometric theory and technique: multicollinearity, autocorrelation, nonlinear estimation, and the identification and estimation of systems of equations. Published empirical research will be discussed and each student will be expected to perform an original empirical study.
PR: ECON 1010 (or the former ECON 2010), ECON 1020 (or the former ECON 2020), ECON 2550, 3000, 3010, 4550

4999 Honours Essay is required as part of the Honours program.
PR: ECON 1010 (or the former ECON 2010), ECON 1020 (or the former ECON 2020), ECON 2550, 3000, 3010, and admission to the Honours program.

16.6.1 Economics Work Terms

The following Work Term courses are available only to students who are admitted to the Honours in Economics (Co-operative) (B.A. or B.Sc.), Joint Program (Co-operative) (B.Sc. only) or Major in Economics (Co-operative) (B.A. or B.Sc.) programs and who meet continuance requirements outlined in Major in Economics (Co-operative) (B.A. or B.Sc.), Program of Study and Honours in Economics (Co-operative) (B.A. or B.Sc.), Program of Study.

299W Work Term I is the first of three full-time work terms and normally follows the completion of two academic semesters within the Economics (Co-operative) program. Students are expected to demonstrate high standards of behaviour and performance in a work environment.
CH: 0
LC: 0
OR: co-operative professional development sessions
PR: admission to the Honours or Major in Economics (Co-operative) of the Bachelor of Arts or Bachelor of Science or the Joint Program (B.Sc. only) degree program

399W Work Term II is typically the student's second Economics (Co-operative) program full-time work term and usually follows two academic semesters since the previous work term. Students are expected to further develop and expand their knowledge and work-related skills and demonstrate an ability to deal with increasingly complex work-related concepts and problems.
CH: 0
LC: 0
PR: Economics 299W

499W Work Term III is the final full-time work term and must be followed by an academic semester. Students should have sufficient academic grounding and work experience to contribute in a positive manner to the problem-solving and management processes needed and practiced in the work environment.
CH: 0
LC: 0
PR: Economics 399W

16.7 English

A tentative list of upcoming English course offerings can be found at www.mun.ca/hss/courses.php.

English courses are designated by ENGL.

1020 Writing for Second Language Students I is an introduction to the use of English with emphasis on composition. This course is for students whose first language is not English and who have attained a standard acceptable to the University on an approved language proficiency exam such as IELTS, TOEFL or CAEL. Students completing this course may elect to use it with ENGL 1021 to fulfill the Bachelor of Arts **Language Study Requirement**.
CR: the former ENGL 1030
UL: cannot be used as credit to fulfill the requirements for the major, minor, and honours in English programs

1021 Writing for Second Language Students II develops skills in critical reading and writing of academic English, with emphasis on research and writing syntheses from sources, for non-native English-speaking students. Students successfully completing this course may elect to use it with ENGL 1020 to fulfill the Bachelor of Arts **Language Study Requirement**.
PR: ENGL 1020
UL: cannot be used as credit to fulfill the requirements for the major, minor, and honours in English programs

1090 Critical Reading and Writing: Telling Stories is a foundational course for all university programs undertaken at Memorial University of Newfoundland, since understanding how stories work is fundamental to all disciplines. This course focuses on the language we encounter in our reading and use to record our reading experiences. Emphasis is placed on critical reading and writing: analyzing texts, framing and using questions, constructing essays, organizing paragraphs, conducting research, quoting and documenting, revising and editing. All sections of this course follow Critical Reading and Writing Course Guidelines available at www.mun.ca/hss/crw.
CR: ENGL 1000, or the former ENGL 1030, or the former ENGL 1080

1191 Critical Reading and Writing: Self and Society studies a variety of texts that explore the interaction between individual desires and social identities. Building on foundational critical reading and writing skills acquired in English 1090, students gain further experience with analyzing texts, framing and using questions, constructing essays, organizing paragraphs, conducting research, quoting and documenting, revising and editing. All sections of this course follow Critical Reading and Writing Course Guidelines available at www.mun.ca/hss/crw and build on foundational CRW content delivered in ENGL 1090. Bachelor of Arts students should normally choose the second Critical Reading and Writing course from a discipline listed in the **Breadth of Knowledge Requirement**, unless pursuing a Major or Minor in English.
CR: ENGL 1001, the former ENGL 1101, 1102, 1103
PR: ENGL 1000, or 1020, or 1090, or the former ENGL 1030, or the former ENGL 1080

1192 Critical Reading and Writing: Imagined Places studies a variety of texts that explore imaginary (or imaginatively reconstructed) places and the responses of the humans who inhabit them. Building on foundational critical reading and writing skills acquired in English 1090, students gain further experience with analyzing texts, framing and using questions, constructing essays, organizing paragraphs, conducting research, quoting and documenting, revising and editing. All sections of this course follow Critical Reading and Writing Course Guidelines available at www.mun.ca/hss/crw. Bachelor of Arts students should normally choose the second Critical Reading and Writing course from a discipline listed in the **Breadth of Knowledge Requirement**, unless pursuing a Major or Minor in English.
CR: ENGL 1001, and the former ENGL 1101, 1102, 1103
PR: ENGL 1000, or 1020, or 1090, or the former 1030, or the former 1080

1110 Critical Reading and Writing in Rhetoric is an examination of prose texts such as essays, articles and reviews. Students write for different purposes and audiences. Emphasis is placed on critical reading and writing: analyzing texts, framing and using questions, constructing essays, organizing paragraphs, conducting research, quoting and documenting, revising and editing. All sections of this course follow Critical Reading and Writing Course Guidelines available at www.mun.ca/hss/crw and build on foundational Critical Reading and Writing content delivered in ENGL 1090.
PR: ENGL 1000, or 1020, or 1090, or the former ENGL 1030, or the former ENGL 1080

1193 Critical Reading and Writing: Ways of Reading focuses on the process of reading, on specific strategies and approaches that we take in our encounters with texts and on the ways we report those encounters. Building on foundational critical reading and writing skills acquired in English 1090, students gain further experience analyzing texts, framing and using questions, constructing essays, organizing paragraphs, conducting research, quoting and documenting, revising and editing. All sections of this course follow Critical Reading and Writing Course Guidelines available at www.mun.ca/hss/crw. Bachelor of Arts students should normally choose the second Critical Reading and Writing course from a discipline listed in the **Breadth of Knowledge Requirement**, unless pursuing a Major or Minor in English.
CR: ENGL 1001 and the former ENGL 1101, 1102, 1103
PR: ENGL 1000 or 1020, or 1090, or the former 1030 or the former 1080

2000 Major Writers to 1800 is an introduction to the work of major authors by detailed study of selected texts. There is an emphasis on the various skills of essay writing.
CR: ENGL 2005
PR: 6 credit hours in English at the 1000 level

2001 Major Writers from 1800 is an introduction to the work of major authors by detailed study of selected texts. There is an emphasis on the various skills of essay writing.
CR: ENGL 2008 and the former ENGL 2007
PR: 6 credit hours in English at the 1000 level

2002 Drama is a survey of drama from the Greeks to the present day.
CR: ENGL 2350, 2351
PR: 6 credit hours in English at the 1000 level

2003 Poetry is a study of poetry, which aims to increase the student's critical understanding and appreciation of poetry, conducted through an examination of a wide variety of kinds and techniques.
PR: 6 credit hours in English at the 1000 level

2004 Short Fiction aims to give the students an appreciation of the short story as a literary form. The course will deal with the nature, history and development of short fiction by considering a variety of authors and stories.
PR: 6 credit hours in English at the 1000 level

2010 Introduction to Professional Writing requires students to analyze published essays for their aims, strategies, and discourses. Students practice writing as a process of discovery in the context of a learning community: for instance identifying questions to explore, free-writing, finding a focus, drafting, peer-editing, revising, editing. Each student produces a portfolio of revised, edited work.
PR: 6 credit hours in English at the 1000 level

2013 Twentieth Century Musicals (same as Music 2013) is a survey of twentieth-century musical theatre. Selected works, presenting different styles and periods, will be examined in detail. There will be a strong, required listening/viewing component to this course. The ability to read

music is not required.
CR: Music 2013 and Music 3007
PR: 6 credit hours in English at the 1000 level
UL: cannot be taken for credit by students enrolled in the Bachelor of Music program

2122 Introduction to World Literature in English addresses contemporary literature consciously pre-occupied with global cultural identities and practices. The writers studied address transnational issues such as migration, environmental and human rights, travel and tourism, and the legacies of European colonialism. All sections of this course follow International Studies guidelines available at www.mun.ca/hss/IS.
PR: 6 credit hours in English at the 1000 level

2150 Modern Canadian Fiction is a study of representative Canadian fiction since 1930, including such authors as Ross, Buckler, Davies, Laurence, Atwood, Ondaatje and Findley.
CR: ENGL 2146
PR: 6 credit hours in English at the 1000 level

2151 New Canadian Fiction is a study of fiction of Canadian writers since the 1970s.
CR: ENGL 2146
PR: 6 credit hours in English at the 1000 level

2160 North American Indigenous Literature will introduce Indigenous literature in a social, political and historical context. Beginning with the oral tradition (songs, narratives, legends, and orations), it will focus on different works by North American Indigenous writers: poetry, drama, short stories and novels.
PR: 6 credit hours in English at the 1000 level

2211 The English Novel from 1800-1900 is a survey of representative texts from 1800-1900.
CR: the former ENGL 2200
PR: 6 credit hours in English at the 1000 level

2212 The Twentieth-Century British Novel is a survey of representative texts from 1900-2000.
CR: the former ENGL 2201
PR: 6 credit hours in English at the 1000 level

2216 American Literature from 1776-1865 is a survey of American fiction, non-fiction, drama, and poetry from the Revolution to the Civil War era.
CR: the former ENGL 2214, ENGL 2215
PR: 6 credit hours in English at the 1000 level

2217 American Literature from 1865-1945 is a survey of American fiction, non-fiction, drama, and poetry from the Civil War era to the end of the Second World War.
CR: the former ENGL 2213, the former ENGL 2214, ENGL 3215
PR: 6 credit hours in English at the 1000 level

2218 American Literature since 1945 is a survey of American fiction, non-fiction, drama, and poetry from the end of the Second World War until the present.
CR: the former ENGL 2213, ENGL 3215
PR: 6 credit hours in English at the 1000 level

2390 Introduction to Modern English Structures is a practical introduction to the descriptive study of the English language with emphasis on syntax.
PR: 6 credit hours in English at the 1000 level

PR: 3 credit hours in English at the 2000 level

3819 The Gothic offers an introduction to the Gothic mode in a selection of texts from the eighteenth century to the present. Topics covered may include the Gothic's recurrent themes of sin, sex, violence, and religion; its subversive response to dominant cultures and historical contexts; and its philosophical roots in sensibility, horror, and the sublime.
PR: 3 credit hours in English at the 2000 level

3820 Poetry of Newfoundland and Labrador focuses on the poetry of Newfoundland and Labrador. While the work of early writers will be considered, the emphasis is on the poetry of the twentieth century and of our own century.
PR: 3 credit hours in English at the 2000 level

3828 The Middle Ages and the Movies (same as Medieval Studies 3828) explores the ways medieval sources are represented in modern films, and how modern cultural and political concerns influence how these medieval sources are presented. Through a selection of medieval films and their historical and literary inspirations, we will see how films shape our present-day concepts of history, identity, freedom, knowledge, and creativity.
CR: Medieval Studies 3828
PR: 3 credit hours in English at the 2000 level, or 3 credit hours at the 2000 level chosen from Table 1 Core Faculty of Humanities and Social

Sciences Courses Approved for the Major and Minor in Medieval Studies

3830 Women Writers is a course setting women writers in the context of literary history.
CR: ENGL 3810
PR: 3 credit hours in English at the 2000 level

3840-3870 (Excluding 3843, 3844 and 3848) Special Topics will have topics to be studied announced by the Department.
PR: 3 credit hours in English at the 2000 level

3843 Introduction to Comics will familiarize students with the study of comics. This course will examine a large selection of comics and current theoretical debates surrounding the relation between word and image, in general, and the workings of graphic narrative, in particular.
CR: ENGL 2244
PR: 3 credit hours in English at the 2000 level

3844 Science Fiction - The Golden Age and Beyond will examine the development of science fiction from its beginnings to the present day. It will consider some of the major authors, theories, forms and concerns that have been the focus of the genre.
PR: 3 credit hours in English at the 2000 level

3848 The Western introduces one of the world's most iconic and instantly recognizable genres. This course explores the fictional frontiers of the Wild West through classics and variants of the genre, showcasing examples that both establish and question myths of the West. In situating the texts alongside historical developments and changing attitudes, the course also situates them regionally along East-West/North-South axes, considering too the Western's position in Western literature.
PR: 3 credit hours in English at the 2000 level

3900 Introduction to Creative Writing: Fiction is conducted as a workshop using models of contemporary writing and the students' own work. Each student will be required to submit work regularly.
CR: credit may be obtained for only two of ENGL 3900, 3901, and 3905
PR: Normally, admission to this course will be based on the instructor's evaluation of the student's writing in the form of a writing portfolio submitted in the weeks prior to the beginning of the course (refer to the Diploma in Creative Writing). Class size will be limited.

3901 Introduction to Creative Writing: Poetry is conducted as a workshop using models of contemporary writing and the students' own work. Each student will be required to submit work regularly.
CR: credit may be obtained for only two of ENGL 3900, 3901, and 3905
PR: Normally, admission to this course will be based on the instructor's evaluation of the student's writing in the form of a writing portfolio submitted in the weeks prior to the beginning of the course (refer to the Diploma in Creative Writing). Class size will be limited.

3902 Introduction to Creative Writing: Playwriting is conducted as a workshop using models of contemporary dramatic writing and the students' own work. Each student will be required to submit work regularly.
CR: the former ENGL 3842
PR: Normally, admission to this course will be based on the instructor's evaluation of the student's writing in the form of a writing portfolio submitted in the weeks prior to the beginning of the course (refer to the Diploma in Creative Writing). Class size will be limited.

3903 Introduction to Creative Writing: Nonfiction is conducted as a workshop using models of contemporary writing and the students' own work. Each student will be required to submit work regularly.
PR: Normally, admission to this course will be based on the instructor's evaluation of the student's writing in the form of a writing portfolio submitted in the weeks prior to the beginning of the course (refer to the Diploma in Creative Writing). Class size will be limited.

3904 Writing Place is conducted as an online workshop for writers interested in exploring the possibilities for engaging with place through writing creative non-fiction.
PR: Normally, admission to this course will be based on the instructor's evaluation of the student's writing in the form of a writing portfolio submitted in the weeks prior to the beginning of the course (refer to the Diploma in Creative Writing). Class size will be limited.

3910 Investigative Writing will permit students to learn to draft and edit short investigative pieces; and they complete an article or essay, and an investigative project that attends to ethics guidelines, research, documentation, interviewing protocols, and writing and editing for a specific context. The course is conducted as a seminar using the students' own work. Each student will be required to submit work regularly. Some work may be done collaboratively.
PR: Normally, submission of a portfolio specified by the instructor and permission of the instructor. Class size will be limited.

3911 Writing Satire uses models of contemporary satire as a basis for students' own work. Guest satirists will be invited to meet with students who will write satirical sketches, articles and/or plays based on their own experiences in response to current affairs and topical items of interest. Students will engage in at least one collaborative project.
PR: Normally, submission of a portfolio specified by the instructor and permission of the instructor. Class size will be limited.

3912 Songwriting uses models from early ballads to contemporary hits and near-misses as a basis for students' own work. Guest songwriters will be invited to meet with students to discuss their compositions. Students will analyse song lyrics, write their own songs and collaborate on a major class project. The ability to sing or play a musical instrument or to read or write sheet music, while desirable, is not required.

3913 Speechwriting (same as Communication Studies 3913) develops the student's ability to speak on all occasions, formal and informal, expected and unexpected. Students will deliver speeches of varying types and lengths on a regular basis throughout the semester.
CR: Communication Studies 3913
PR: 3 credit hours in English at the 1000 level

3920 Reviewing permits students to analyse and practice reviewing of three kinds: (a) performance; (b) film, TV, video; c) books.
PR: 3 credit hours in English at the 2000 level

4000 English Literature and History of Ideas I is a study of European thought and culture as they affect the history and development of English literature from the Middle Ages to the eighteenth century.
PR: 3 credit hours in English at the 3000 level

Students will have the opportunity to study collections by six English Canadian contemporary poets - not just new work by established older writers, but also first collections by younger writers. The work of poets from across Canada will be chosen.
CR: ENGL 3148
PR: 3 credit hours in English at the 3000 level

4851 Canadian Exploration Literature will examine Canada's early exploration and travel literature and show how it has shaped our contemporary fiction. Early texts may be studied from an anthology of exploration writings, such as Germaine Warkentin's Canadian Exploration Literature: An Anthology. Several contemporary novels will also be studied and may include Wayne Johnston's The Navigator of New York and John Steffler's The Afterlife of George Cartwright.
PR: 3 credit hours in English at the 3000 level

4852-4860 Special Topics in Canadian Literature will have topics to be studied announced by the Department.
PR: 3 credit hours in English at the 3000 level

4900 Book History and Print Culture I is an introduction to bibliographical and textual studies to 1800. Areas covered may include the book as a material object; the history of the book; manuscripts; the spread of printing; the hand-press period; editing of texts; the evolution of the library; origins of intellectual property; freedom of the press; aspects of literary detection, forgery and plagiarism.
CR: ENGL 4951
PR: 3 credit hours in English at the 3000 level

4901 Book History and Print Culture II is an introduction to bibliographical and textual studies from 1800 to the present day. Areas covered may include the book as a material object; the history of the book; machine-press period; industrialization of printing; globalization of the book trade; intellectual property and copyright; electronic book; digital literacy; digital literatures.

CR: ENGL 4951
PR: 3 credit hours in English at the 3000 level

4910 Advanced Creative Writing: Fiction is a workshop for students who wish to write publishable literary fiction. Students will be expected to produce at least 15,000 words during the semester. Regular participation is also required.
PR: Normally, admission to this course will be based on the instructor's evaluation of the student's writing in the form of a writing portfolio submitted in the weeks prior to the beginning of the course (refer to the Diploma in Creative Writing). Class size will be limited.

4911 Advanced Creative Writing: Poetry is conducted as a workshop uses models of contemporary writing and the students' own work. This course is designed to develop further the technical skill of those students who have reached a high level of achievement in the introductory creative writing course in poetry, English 3901 (or who have a body of work of exceptional accomplishment) and to help them move towards publication in literary journals and chapbooks.
PR: Normally, admission to this course will be based on the instructor's evaluation of the student's writing in the form of a writing portfolio submitted in the weeks prior to the beginning of the course (refer to the Diploma in Creative Writing). Class size will be limited.

4912 Advanced Creative Writing: Playwriting is conducted as a workshop using models of contemporary dramatic writing and the students' own work. Each student will be required to submit work regularly.
PR: Normally, admission to this course will be based on the instructor's evaluation of the student's writing in the form of a writing portfolio submitted in the weeks prior to the beginning of the course (refer to the Diploma in Creative Writing). Class size will be limited.

4913 Advanced Creative Writing: Nonfiction is conducted as a seminar using models of contemporary writing and the students' own work. Each student will be required to submit work regularly.
PR: Normally, admission to this course will be based on the instructor's evaluation of the student's writing in the form of a writing portfolio submitted in the weeks prior to the beginning of the course (refer to the Diploma in Creative Writing). Class size will be limited.

4914 Advanced Editing is editing for the workplace: An intensive course in drafting and editing. Students will be expected to work both individually and collaboratively.
PR: 3 credit hours in English at the 3000 level

4920-4930 Special Topics in Creative Writing will have topics to be studied announced by the Department.
PR: Normally, submission of a portfolio specified by the instructor and permission of the instructor. Class size will be limited.

4999 Essay for Honours Candidates is required as part of the Honours program.
CR: ENGL 4959

5000 Instructional Field Placement is a 3 credit hour course which occurs upon completion of course work in the **Diploma in Stage and Screen Technique**. The curriculum emphasis is on the application of acquired skills. Continuing the project-oriented structure built into the practical courses, students will be placed with existing projects in the professional communities of film, television, theatre or video.
AR: attendance is required
CH: 3
PR: ENGL 2450, 2451 (or the former 3350, 3351) and 4400, and two of ENGL 4401 and Communication Studies 3816 (or the former ENGL 3816) and Communication Studies 4402, (or the former ENGL 4402) with an overall average of 75% in these courses. Restricted to students in the **Diploma in Stage and Screen Technique**. Admission is by application to the Program Director, normally at least three months before the beginning of the placement, and is limited to students who at the time of admission have successfully completed the six courses listed above with an overall average of at least 75% and who already hold a first degree or are in their final year of a degree program as confirmed by the Office of the Registrar.
UL: can be used for credit only towards the **Diploma in Stage and Screen Technique**

16.7.1 Communication Studies

A tentative list of upcoming Communication Studies course offerings can be found at www.mun.ca/hss/courses.php.

Communication Studies courses are designated by CMST.

2000 Critical Approaches to Popular Culture considers critical issues and approaches in the study of popular culture. It will explore the ways in which everyone is both a user of and is used by popular culture. A variety of critical approaches to studying popular culture will be examined: Production, Texts, Audience, and History.

2001 Introduction to Communication Theory provides an introduction to theoretical approaches to organization, use and manipulation of language, including semiotics, performativity, mass and group communications, sociolinguistics and interpersonal communication. We will examine notions of influence, rhetoric, social judgment, deception, subject formation, globalization and cultural hybridity within the field of communications.
PR: prior successful completion of CMST 2000 is encouraged

2100 Introduction to Game Studies provides an introduction to the critical study of video games and gaming. Classes will survey the history of games and play in relation to topics such as game design, ethics, industry, gender, race, and emerging technologies.

2813 Reading Images (same as English 2813) introduces students to the field of visual culture and familiarizes them with both the vocabulary and the methodologies to examine images critically.
CR: English 2813
PR: 6 credit-hours in English at the 1000 level

3000 Emerging Media: Social Media Platforms explores the historical, technological, economic and social dynamics associated with the rise of social media.
PR: English 1090 or permission of the instructor

3001 Media and Urban Life explores the theoretical, representational, and experiential intersections between modern media and urban cultures. The course will foreground how recent media theory has been shaped by important theoretical works in the study of urban societies.

3010-3020 Special Topics in Communication Studies will have topics to be studied announced by the Program Director.

3816 Television Production (same as the former English 3816) is an introduction to the principles of television production.
AR: attendance is required
CR: the former English 3816
PR: English 2451 (or the former English 3351). Admission priority will be given first to students in the **Diploma in Stage and Screen Technique** and then to students in the **Major in Communication Studies**.

3913 Speechwriting (same as English 3913) develops the student's ability to speak on all occasions, formal and informal, expected and unexpected. Students will deliver speeches of varying types and lengths on a regular basis throughout the semester.
CR: English 3913
PR: 3 credit hours in English at the 1000 level

4000 Advanced Communications Theory engages communication theories, such as interpersonal, organizational, intercultural, or international communication, seeking to understand how and why mediated communication works have found their explanatory power to be useful. The course will aim to analyze various communication theories, apply communication theories to everyday life, write a theoretical literature review, and form sound hypotheses or focused research questions to advance theory.
PR: CMST 2000, 2001, 9 additional credit hours chosen from Program and Regulations, Elective Courses, List A or B

4001 Seminar in Mass Communication and Visual Culture examines the ways visual culture shapes and is shaped by communication forms and processes.

4002 Media and the Environment explores the representational, technological, industrial, and socio-political dynamics associated with ecocritical media studies.

4003 Copyright, Creativity, and Culture examines the history of media piracy and its influence on media consumption and production, copyright law, and internet regulation. Classes will critically examine media piracy and copyright law across a variety of media industries (publishing, music, video games, film, and television) to explore their legal, social, political, economic, ethical, and cultural implications.
PR: CMST 2000, 2001, 3 credit hours at the 3000 level chosen from Table 1 Core Faculty of Humanities and Social Sciences Courses Approved for the Major and Minor in Communication Studies, or permission of the instructor

4010-4020 Special Topics in Communication Studies will have topics to be studied announced by the Program Director.

4402 Producing the Documentary (same as the former English 4402) is a full semester working on a selected project, to culminate in the creation of a completed video. Students, working in groups, established by the **Diploma in Stage and Screen Technique** Program Director, will be required to participate in all aspects of production.
AR: attendance is required
CR: the former English 4402
PR: English 2451 (or the former English 3351) and CMST 3816. Admission priority will be given first to students in the **Diploma in Stage and Screen Technique** and then to students in the **Major in**

Communication Studies.

4700 Internship is a one-semester (3 credit hours) internship for senior students in Communication Studies. The purpose of the course is to provide students with opportunities to apply and explore course concepts in various workplace settings. Internships entail a total of 70 hours of fieldwork carried out over the semester. Possible placements include work/training in advertising, public relations, communication coordination, social media marketing, and journalism.
PR: a minimum of 60 credit hours, including at least 21 credit hours in courses designated as CMST, with a minimum 70% average, and permission of the instructor

4844 Graphic Medicine (same as English 4844) examines a broad spectrum of graphic illness narratives across various media taking into account theoretical developments in comics studies, autobiographical studies, and graphic medicine.
CR: English 4844

16.8 Folklore

In accordance with Senate's *Policy Regarding Inactive Courses*, the course descriptions for courses which have not been offered in the previous three academic years and which are not scheduled to be offered in the current academic year have been removed from the following listing. For information about any of these inactive courses, please contact the Head of the Department.

Folklore 1000 is the prerequisite for all other courses in Folklore, except Folklore 1050, Folklore 1060, and those courses cross-listed with other Departments.

A tentative list of upcoming Folklore course offerings can be found at www.mun.ca/hss/courses.php.

Folklore courses are designated by FOLK.

1000 Introduction to Folklore explores the role of tradition in communication, art and society. Reading assignments and audiovisual material will emphasize the use of folklore in context. Students will analyse traditions in their own lives through special assignments.
CR: the former FOLK 2000

1005 Critical Reading and Writing in Newfoundland and Labrador Studies emphasizes learning about how to identify, critically read, and analyze a variety of texts that explore the culture and traditions of everyday life in Newfoundland and Labrador. In addition, special attention will be given to the stages of the writing process, from prewriting exercises to drafts and revisions. All sections of this course follow CRW guidelines available at www.mun.ca/hss/crw.

1060 Folklore and Culture is an introduction to traditional expressive behaviour as cultural experience. Readings and lectures will explore the various meanings of "culture" from interdisciplinary perspectives and link them to areas of folklore such as children's folklore, material culture, and occupational folklife.
PR: while there is no prerequisite for this course, students should note that they will need to take Folklore 1000 (or the former 2000) before they can advance to other courses

2100 Folklore Research Methods introduces the resources, tools and methods that folklorists use for primary and secondary research, including interviewing and participant observation.
PR: it is strongly recommended that majors and minors take this course before taking 3000 and 4000 level courses

2230 Newfoundland Society and Culture (same as Sociology 2230, the former Sociology/Anthropology 2230, the former Anthropology 2230) focuses on the social and cultural aspects of contemporary island Newfoundland.
CR: Sociology 2230, the former Sociology/Anthropology 2230, the former Anthropology 2230
UL: not applicable towards the Major or Minor in Anthropology

2300 Newfoundland and Labrador Folklore (same as the former Anthropology 2300) is a survey of the full range of folklore in the province, with an emphasis on community and regional identity.
CR: the former Anthropology 2300, the former FOLK 3420
UL: not applicable towards the Major or Minor in Anthropology

2401 Folklife Studies examines the interweaving of traditional elements in the tangible and intangible cultural heritage of various cultures. These may include holiday customs, rites of passage, folk religion, home remedies, clothing, food and art.
CR: the former FOLK 3500

2500 Oral Literature From Around the World (same as Anthropology 2500) focuses on the analysis of folk literature, and may include the genres of narrative, poetry, song, drama, and speech from various countries and regions. Textual, comparative, and contextual methods of analysis will be introduced. All sections of this course follow International Studies guidelines available at www.mun.ca/hss/IS.
CR: Anthropology 2500, the former English 3400, the former FOLK 3400, the former Sociology/Anthropology 3400
PR: Anthropology 1031 or FOLK 1000

2700 Ethnography of the University allows students to develop their skills in cultural documentation as they record and analyze Memorial University of Newfoundland's unofficial culture. Course material covers ethnographic practices and issues as well as the dynamics and history of campus life.

2800 Folklore and Tourism: Foodways, Music, and Ritual examines the role of folklore and folklorists in the global tourism industry. Students will study local practices of foodways, music, and ritual that are being refigured for tourist consumption in Newfoundland and Labrador, and beyond.

3001 Art, Architecture and Medieval Life (same as Archaeology 3001, the former History 3020, and Medieval Studies 3001) is an examination of the development of medieval art and architecture and of the ways in which they mirror various aspects of life in the Middle Ages. This course will include a discussion of art and architecture in the countryside, in the town, in the castle, in the cathedral and in the cloister.
CR: Archaeology 3001, the former History 3020, and Medieval Studies 3001
PR: it is recommended, but not obligatory, that students should have successfully completed one of the following courses: Archaeology 2480, FOLK 1000 or the former 2000, History 2320/Medieval Studies 2001, History 2330/Medieval Studies 2002, Medieval Studies 1000 or the former 2000.

3100 Fictional Worlds: The Folktale is a study of fictional folk narratives told worldwide. Students may be asked to read, collect, and/or analyze folktales in order to highlight the significance and function of oral fictional folk narratives as they are performed and understood in various contexts worldwide. All sections of this course follow International Studies guidelines available at www.mun.ca/hss/IS.
CR: the former FOLK 4200

3200 Music, Song and Tradition (same as Music 3017) introduces students to a wide range of traditional song. Students will hear and discuss local, regional and international examples. Ability to read music or familiarity with music theory not required.
CR: Music 3017, the former FOLK 2430

3250 Song Worlds: The Ballad examines traditional balladry (including subgenres such as tragic, comic, romantic, religious, and medieval ballads) in the contexts of global transmission, function, performance, and aesthetics. Differences in dealing with written literature and the literature of tradition will also be addressed. All sections of this course follow International Studies guidelines available at www.mun.ca/hss/IS.
CR: the former FOLK 4445

3300 Vernacular Drama is a survey of traditional drama and its study with an emphasis on North America and Great Britain from social function, performance, and aesthetic perspectives.

3350 Folklore of the Body examines how the body is socially constructed and how it is represented through folklore genres from narrative, to material culture and custom. It considers how culture is both inscribed on the body and how it is bodily performed.
CR: the former FOLK 3611

3360 Sex/Folklore/Power and Globalization is 1) an introduction to the many ways that sexual identities are displayed, developed, and categorized through informal and everyday cultural performances, i.e., folklore; 2) a study of how such performances in both local and international settings relate to various folklore genres, including folk language and narrative, music/song/ballad, material culture/space, and festival/ritual and continue to evolve through globalization; and 3) an examination of how social power structures are (de)constructed and negotiated through folk processes involving sexuality/sexual identities. All sections of this course follow International Studies guidelines available at www.mun.ca/hss/IS.

3450 Language and Play examines the role of play in the folklore of children and adults with particular attention to games, rhymes, proverbs and other small genres of wordplay.

3460 Folklore and Literature (same as English 3460) examines the interrelationships among folklore forms and literary genres, the influence of oral traditions on written literatures, and consider the theoretical issues raised by these interrelationships. The primary emphasis is on the interpretation of literature from the perspective of folk tradition.
CR: English 3460, the former English 4450, the former FOLK 4450

3601-3640 (Excluding 3606, 3612 and 3618) Special Topic in Folklore will have topics to be studied announced by the Department.

3606 Supernatural Folklore focuses on the ethnography of belief systems. Students examine patterns of belief and the features of supernatural folklore.

3612 Urban Legend and the Media provides an introduction to the study of

one of the most rapidly expanding and exciting areas of folk narrative research, focusing on the main features and themes of urban legends. It examines how, when, where and why stories of this type are communicated via and bound up with a variety of media.

3618 History of Jazz (same as Music 3018) examines the musical, cultural, and historical aspects of jazz from the genre's African roots and 19th century precursors to today. Through lectures, readings, and guided listening, students will develop an understanding of the diverse artistic practices and complex social history that have shaped the genre. The lives and achievements of influential artists will be explored in the context of ongoing racial injustice and inequity in the music industry and society more broadly.
CR: Music 3018

3650 Artifacts from North American Contexts 1600-1900 (same as Archaeology 3650) provides students with practical experience in the analytical methods used to identify, date and interpret artifacts from 1600-1900 contexts in North America. Detailed discussions on manufacture, technology, form and function provide the necessary background for a better understanding of concepts relating to artifact identification, provenance, dating techniques, and other current issues. Practical, hands-on exercises will help reinforce weekly topics and teach students the fundamentals required to interpret artifact assemblages from the historic period.
CR: Archaeology 3650, the former Anthropology 3683

3700 Museums and Historic Sites - inactive course.

3710-3729 Special Topics in Folklore: Harlow is available only as part of the Harlow Campus semester.

3820 Folk Custom provides an introduction to the study of calendar, seasonal, occupational, and life-cycle customs, focusing on their analysis as symbolic behaviour.
CR: the former FOLK 3600

3830 Foodways focuses on dietary practices in a variety of regional traditions, considering both historical and contemporary approaches to the supply, storage, preparation and serving of food. The whole range of cookery and food habits - from the acquisition of raw materials to the allocation of portions - will be addressed from both theoretical and applied perspectives.

3850 Material Culture (same as Archaeology 3850) is an introduction to the study of material culture and the question of why objects are important to us. Using folklore and interdisciplinary approaches, we will look at objects as cultural products, question the influence of objects on behaviours, and address the role of objects in historical and ethnographic research.
CR: Archaeology 3850

3860 Vernacular Architecture same as the former Archaeology 3860 and the former History 3860) is a historical survey of vernacular architectural forms in various regions of North America, with attention to Newfoundland and Labrador materials. Issues discussed include the relationship of house form and culture, the concepts of antecedents, diffusion, innovation and evolution of building forms and technologies, and the siting of buildings in the landscape. Dwelling houses, outbuildings, churches and industrial vernacular architecture will be included.
CR: the former Archaeology 3860, the former History 3860

3910 Traditions of Work concerns the development and role of tradition in occupational groups and work settings. Verbal and non-verbal codes including narratives, joking relationships, pranks, material culture, and labour force will be examined in a variety of contexts.

3920 Folklore, Education and Community familiarizes students with the function of Folklore in the educational process. Emphasis will be on cultural transmission and cultural learning inside and outside the K-12 classroom.

3930 Folklore and Popular Culture is an introduction to the study of popular culture, the folk/popular continuum, and the role of folklore in media such as film, television, music, and art.
CR: the former FOLK 2400

3950 Gender and Traditional Culture is an introduction to the ways in which gender shapes and/or is shaped by traditional culture. Readings and lectures will explore the significance of gender for folklore collection and preservation, examine representations of gender in folklore forms, and analyse creations of gendered traditions.

4015 Cultural Resource Management (same as Archaeology 4015 and Geography 4015) is a study of cultural resource management: the definition and recognition of cultural resources, the application of policy in managing cultural resources, and the identification and consideration of contemporary issues in cultural resource management.
CR: Archaeology 4015, Geography 4015
OR: three hours of seminar per week

4100 History and Memory - inactive course.

4310 Studies in Newfoundland and Labrador Folklore studies rural and urban Newfoundland and Labrador with specific reference to a culture in transition. Folklore is examined as one of the channels through which a people maintain, change and adapt various cultural patterns.
CR: the former FOLK 3421
PR: FOLK 2300 or permission of the instructor

4400 Traditional Culture of French-Newfoundlanders - inactive course.

4410 Folklore of France - inactive course.

4420 French Folklore in the New World - inactive course.

4440 Music and Culture (same as the former Anthropology 4440, Music 4040, and the former Music 4440) examines traditional music as an aspect of human behaviour in Western and non-European cultures. Examination of the functions and uses of music; folk-popular-art music distinctions; and the relation of style to content. Outside reading, class exercises and individual reports will be required.
CR: the former Anthropology 4440, Music 4040, the former Music 4440
PR: completion of at least 24 credit hours of university course work
UL: not applicable towards the Major or Minor in Anthropology

4460 Folk Religion (same as Religious Studies 4460) examines how established global religions and new forms of spirituality manifest themselves and are religion as it is "lived" on a daily basis in a variety of local contexts worldwide. It focuses primarily on forms of belief and spirituality that are informally expressed. Drawing upon various cultural contexts, the course addresses such notions as space and time; metaphysical powers; religious material culture, music, and verbal art; and the role and power of the holy person. All sections of this course follow International Studies guidelines available at www.mun.ca/hss/IS.
CR: Religious Studies 4460, the former FOLK 4240

4470 Spaces and Places tackles the question of how globalization and modernity influence our attachments to locality, community, and region; how folklore has contributed to social constructions of place; how folklore is used to turn physical space into cultural place; how folklore must change to meet the needs of today's global and virtual worlds. All sections of this course follow International Studies guidelines available at www.mun.ca/hss/IS.

4480 Oral History (same as History 4480) examines the narratives of everyday people who tell their life experiences. This course focuses on the collection and analysis of oral narratives and how they can be used to illuminate the past. It considers the power of these narratives to shape constructions of the present and future for both narrators and audiences.
CR: History 4480

4500-4520 Special Topic in Folklore will have topics to be studied announced by the Department.

4600-4615 Special Research in Folklore will be determined by the Department.

4700-4715 Directed Reading Course will be offered as determined by the Department.

4810 Documents Management (same as the former History 4810) is an introduction to the management of records and documents, both official and private.
CR: the former History 4810

400X Folklore in the Community Context - inactive course.

4998 Honours Comprehensive Examination may be written or oral, or a combination of both.

4999 Honours Essay is required as part of the Honours program.

16.9 French

In accordance with Senate's *Policy Regarding Inactive Courses*, the course descriptions for courses which have not been offered in the previous three academic years and which are not scheduled to be offered in the current academic year have been removed from the following listing. For information about any of these inactive courses, please contact the Head of the Department.

Students who have successfully completed one or more credit courses in French language will not subsequently be permitted to receive credit for courses not previously successfully completed and judged by the Department to be of a lower level than those already successfully completed with the following provisions:

- Students who successfully complete a 4 to 5 week summer bursary program may receive three unspecified credits at the first-year level. In order to receive transfer credits students must complete the appropriate application for transfer credit available at www.mun.ca/regoff/forms.php and submit it to the Office of the Registrar.

- Students who wish to return to a previously completed course to improve their standing may do so only with the permission of the Head of the Department.
- Students returning to the study of French after an absence should consult the Department to determine the appropriate level. Failing to do so may put them at risk of registering for courses beyond their level.

A tentative list of upcoming French course offerings can be found at www.mun.ca/hss/courses.php.

French courses are designated by FREN.

1500 Introductory University French I is a course for beginners and for students whose background in French is very weak. Students with a strong background in high-school French should bypass 1500 and begin their University study with 1501, especially if they intend to proceed beyond the first-year level. Very well-prepared students may apply to the Department for permission to enter 1502 directly. All sections of this course follow the Language Study Course Guidelines available at www.mun.ca/hss/ls.
1500 Introduction à la langue française, niveau universitaire I cours pour débutants et pour ceux dont les connaissances du français sont très faibles. Toutes les sections de ce cours suivent le guide des cours de langue qui est consultable à www.mun.ca/hss/ls.
CR: the former FREN 1010 or the former FREN 1011
LH: two additional hours of language laboratory work or conversation class, or both
PR: students may not register concurrently for more than one of FREN 1500, 1501 and 1502 except with the permission of the Head of the Department.
UL: permission to register for this course will not be given to students who have completed Français 3202 (High School French immersion)

1501 Introductory University French II is one of three consecutive credit courses in French language at the first-year university level, offering a complete overview of basic oral and written French. Students with a limited background in French should register for FREN 1500 and continue with 1501. Students with a strong background in high-school French should bypass 1500 and begin their University study with 1501, especially if they intend to proceed beyond the first-year level. Very well-prepared students may apply to the Department for permission to enter 1502 directly. All sections of this course follow the Language Study Course Guidelines available at www.mun.ca/hss/ls.
1501 Introduction à la langue française, niveau universitaire II Toutes les sections de ce cours suivent le guide des cours de langue qui est consultable à www.mun.ca/hss/ls.
CR: the former FREN 1050
LH: two additional hours of language laboratory work or conversation class, or both
PR: High School FREN 3200 or permission of the Head of the Department. Ex-immersion students should consult the Head of the Department before registering for this course. Students may not register concurrently for more than one of FREN 1500, 1501 and 1502 except with the permission of the Head of the Department.

1502 Introductory University French III is one of three consecutive credit courses in French language at the first-year university level, offering a complete overview of basic oral and written French. All sections of this course follow the Language Study Course Guidelines available at www.mun.ca/hss/ls.
1502 Introduction à la langue française, niveau universitaire III Toutes les sections de ce cours suivent le guide des cours de langue qui est consultable à www.mun.ca/hss/ls.
CR: the former FREN 1051
LH: two additional hours of language laboratory work or conversation class, or both
PR: FREN 1501 with a grade of at least 60% or by permission of the Head of the Department. Students may not register concurrently for more than one of FREN 1500, 1501 and 1502 except with the permission of the Head of the Department. Very well-prepared students may apply to the Department for permission to enter 1502 directly.

2100 Intermediate French I is a course on composition, grammar and practice in oral skills. All sections of this course follow the Language Study Course Guidelines available at www.mun.ca/hss/ls.
2100 Français intermédiaire II traite de rédaction, grammaire et pratique orale. Toutes les sections de ce cours suivent le guide des cours de langue qui est consultable à www.mun.ca/hss/ls.
OR: students may be required to attend a 50 minute weekly practicum
PR: FREN 1502 with a grade of at least 60% or Passport Français 3302 with a grade of at least 85% or Grade 12 French Immersion with a grade of at least 80% or French 4283 with a grade of at least 85% or French 3283 with a grade of at least 85% or equivalent

2101 Intermediate French II is further work in composition, grammar and oral skills. All sections of this course follow the Language Study Course Guidelines available at www.mun.ca/hss/ls.
2101 Français intermédiaire II est la continuation du travail de rédaction, de grammaire et de communication orale. Toutes les sections de ce cours suivent le guide des cours de langue qui est consultable à www.mun.ca/hss/ls.
OR: students may be required to attend a 50 minute weekly practicum
PR: FREN 2100 with a grade of at least 60% or Passport Français 3302 with a grade of at least 85% or Grade 12 French Immersion with a grade of at least 80% or French 4283 with a grade of at least 85% or French 3283 with a grade of at least 85% or equivalent

2159 Advanced French for First-year Students I is primarily intended to build on the language skills acquired by students in immersion programs. Development of reading, writing, listening and speaking ability through practical oral and written exercises. Other qualified students may register with the permission of the Head of Department. All sections of this course follow the Language Study Course Guidelines available at www.mun.ca/hss/ls.
2159 Français avancé pour étudiants de première année I ce cours est conçu principalement pour développer les compétences linguistiques des étudiants qui ont reçu leur formation dans les programmes d'immersion. La compréhension et l'expression écrites et orales seront développées au moyen d'exercices pratiques oraux et écrits. Les étudiants ayant des qualifications équivalentes peuvent s'incrire à ce cours avec la permission de la direction du département. Toutes les sections de ce cours suivent le guide des cours de langue qui est consultable à www.mun.ca/hss/ls.
PR: primarily intended for students who completed immersion programs or with permission of the Head of the Department. FREN 2159 and 2160 are courses designed for former French immersion students as well as others with exceptional backgrounds in French, and are intended as an alternative to the 1500, 1501, 1502, 2100, 2101 sequence.
UL: may not be used to meet the requirements of a Major or Minor in French

2160 Advanced French for First-year Students II is an intensive review of French grammar with oral and written practice. Particular attention will be paid to ensuring precision in language use in both oral and written forms and to eradicating anglicisms. All sections of this course follow the Language Study Course Guidelines available at www.mun.ca/hss/ls.
2160 Français avancé pour étudiants de première année II révision intensive de la grammaire et pratique de la langue écrite et parlée pour assurer la précision linguistique à l'oral ainsi qu'à l'écrit et supprimer les anglicismes. Toutes les sections de ce cours suivent le guide des cours de langue qui est consultable à www.mun.ca/artshss/ls.
PR: FREN 2159 and 2160 are courses designed for former French immersion students as well as others with exceptional backgrounds in French, and are intended as an alternative to the 1500, 1501, 1502, 2100, 2101 sequence.
UL: may not be used to meet the requirements of a Major or Minor in French

PR: 15 credit hours in French at the 2000 level or permission of the Head of the Department

3302 History of the French Language (same as Linguistics 3302, Medieval Studies 3302) is a study of the origins of French, including the influence of Gaulish, Vulgar Latin, Frankish and the langue d'oc/langue d'oïl division, a survey of the dialects, morphology and syntax of Old French and of the evolution from Old to Middle French, including phonology, morphology, syntax and vocabulary.
3302 Histoire de la langue française (identique à Linguistique 3302) Une étude des origines du français qui porte sur l'influence du gaulois, du latin vulgaire, du francique et de la division langue d'oc/langue d'oïl; survol des dialectes, de la morphologie et de la syntaxe de l'ancien français, ainsi que de l'évolution de l'ancien français au moyen français, en tenant compte de la phonologie, de la morphologie, de la syntaxe et du vocabulaire.
CR: Linguistics 3302, Medieval Studies 3302
PR: 15 credit hours in French and/or Linguistics at the 2000 level or permission of the Head of the Department; Classics 1120 or Medieval Studies 1120 is strongly recommended

3310 Phonology and Morphology of French (same as Linguistics 3310) is an examination of the phonological and morphological structure of French. Data from regional and non-standard varieties contrasted with data from standard French: formal rules to deal with observed regularities. Interactions of phonology and morphology in phenomena such as liaison. Derivational and inflectional morphology. Research articles on one or more of the topics dealt with in the course will be assigned as readings, and a written report in French based on one or more of the articles is to be submitted as part of the term work. This course will normally be taught in French. All sections of this course follow the Language Study Course Guidelines available at www.mun.ca/hss/ls.
3310 Phonologie et morphologie du français (identique à Linguistique 3310) est une étude de la structure phonologique et morphologique du français. Données des variétés régionales et non-standard en contraste avec le français standard: règles formelles pour rendre compte des regularités observées. Interaction de la phonologie et de la morphologie dans la liaison et d'autres contextes. La flexion et la dérivation. On prescrit des articles de recherche sur au moins un des thèmes à l'étude et un rapport rédigé en français sur l'un ou plusieurs des articles. Ce cours est normalement enseigné en français. Toutes les sections de ce cours suivent le guide des cours de langue qui est consultable à www.mun.ca/hss/ls.
CR: Linguistics 3310
PR: 15 credit hours in French and/or Linguistics at the 2000 level or permission of the Head of the Department

3311 Introduction to General Linguistics: Aspects of French Linguistic Theory (same as Linguistics 3311) is a practical examination of the French verbal system, with a thorough exposition of the systems of aspect, voice, tense and mood. The fundamental concepts of linguistics will form the framework of this exposition: the langue/parole distinction and its relationship to underlying and surface entities, language as activity and the generation of surface elements from underlying subsystems. This course will normally be taught in French.
3311 Initiation à la linguistique générale: aspects de la théorie linguistique française (identique à Linguistique 3311) Étude pratique du système verbal du français et une exposition approfondie des systèmes de l'aspect, de la voix et des modes. Les concepts fondamentaux de la linguistique serviront de cadre à cette exposition: la distinction langue/parole et le rapport avec les entités sous-jacentes et de surface; le langage comme activité et la génération des éléments de surface à partir des systèmes sous-jacents. Ce cours sera normalement enseigné en français.
CR: Linguistics 3311
PR: 15 credit hours in French and/or Linguistics at the 2000 level or permission of the instructor

3500 An Introduction to Prose Literature in French pays particular attention to the literatures of French Canada and France.
3500 Introduction à la prose de langue française une attention particulière sera accordée aux littératures du Canada français et de la France.

PR: successful completion of FREN 4900 with a minimum grade of 70%

16.10 Gender Studies

A tentative list of upcoming Gender Studies course offerings can be found at www.mun.ca/hss/courses.php.

Gender Studies courses are designated by GNDR.

1000 Introduction to Gender Studies (same as the former WSTD 1000) considers gender, gender studies and feminisms as areas of exploration from historical, contemporary, transnational and interdisciplinary perspectives. The aim of this course is to provide a critical framework for thinking about questions relating to gender and other forms of social difference.
CR: the former WSTD 1000, the former WSTD 2000

1005 Critical Reading and Writing: Identities and Difference (same as the former GNDR 2005) builds foundational critical reading and writing abilities through an exploration of feminist scholarship about the construction of identities and difference in cultural discourse, representation, and institutions. Students learn the principles of scholarly analysis and the mechanics of academic writing. Coursework focuses on critically analyzing texts, evaluating sources, framing questions, developing an argument, and refining written work for Gender Studies and related fields. All sections of this course follow Critical Reading and Writing Course Guidelines available at www.mun.ca/hss/crw.
CR: the former WSTD 2005 and the former GNDR 2005

2006 Genders and Sexualities introduces genders and sexualities from an interdisciplinary perspective. Students will explore the continuum of sex/gender and sexual identities, and examine how these identities intersect with other aspects of identity, including (but not limited to) race, class, and (dis)ability.

2007 Girlhood and Girl Culture (same as the former GNDR 3002) critically engages with the expanding contemporary feminist scholarship on girlhood and girl cultures. It considers historical and contemporary constructions of girlhood in primarily Western contexts as they intersect with 'race', ethnicities, sexualities and class. Course materials will be used to explore static and changing dimensions of girlhood, including gender expectations and identities; girlhood as possible sites of power; and claims about the emergence of 'grrrls' and 'new girls.'
CR: the former GNDR 3002, the former WSTD 3002

2010 Masculinities in Critical, Global Perspective engages theories of masculinities from a feminist perspective, in a variety of geographical and cultural contexts. All sections of this course follow International Studies guidelines available at www.mun.ca/hss/IS.

3001 Women Writers in the Middle Ages (same as English 3006, Medieval Studies 3006, the former WSTD 3001) will study selections from the considerable corpus of women's writing in the Medieval period, as well as issues which affected women's writing. All selections will be read in English translation.
CR: English 3006, Medieval Studies 3006, the former Medieval Studies 3351, the former WSTD 3001

3003-3020 (Excluding 3008, 3009) Special Topics in Gender Studies (same as the former WSTD 3002-3020 excluding 3004, 3005, 3009, and 3015) will have topics announced by the Department.
CR: the former WSTD 3003-3020 excluding 3004, 3005, 3008, and 3009
PR: 3 credit hours in Gender Studies

3005 Feminist Texts, Theories and Histories (same as the former WSTD 3005) examines the development and dissemination of feminist thought through analyses of key texts and diverse media, and their connections to historical and contemporary debates within feminism.
CR: the former WSTD 3005
PR: 3 credit hours in Gender Studies

3008 Feminist Practices and Global Change (same as the former GNDR 4005 and the former WSTD 4005) examines, in considerable depth and detail, connections between feminist theories and activism for social and political change on a global scale. It examines how social movement activisms, particularly in their transnational feminist forms, are mobilized in different historical, cultural and geographic contexts; and are increasingly defined by linkages between the local, regional and global/transnational. All sections of this course follow International Studies guidelines available at www.mun.ca/hss/IS.
CR: the former GNDR 4005, the former WSTD 4005
PR: 3 credit hours in Gender Studies

3015 Indigenous Feminisms in Theory and Practice examines the growing body of Indigenous feminist scholarship that has emerged from North America in recent decades. It looks at a range of theoretical debates and activist practices taken up in this literature, which centers colonialism alongside gender (and other axes of social difference) as an analytic for understanding the lived realities of Indigenous women and their communities.
PR: successful completion of GNDR 1000 is advised but not required

3025 Gender, Race and Post-Colonialism in Global Contexts examines theories, themes and issues that have emerged from, and in response to, post-colonial studies in recent decades. This course focuses particularly on what this international body of scholarship contributes to understandings of the roles of gender, race and sexuality in historical and ongoing colonial processes as global phenomena with diverse manifestations at the continental. regional and local levels. Special focus will be given to the legacies of British colonialism worldwide. All sections of this course follow International Studies guidelines available at www.mun.ca/hss/IS.
PR: 3 credit hours in Gender Studies

3026 Fat Studies introduces fat studies scholarship and fat activism. with particular attention to how fat, fatness, fat bodies, and fat as an identity are historically, socially, medically, politically, and culturally constructed in Canada and beyond.

3100 Gendered Politics of Health (same as the former WSTD 3100) examines intersections of gender and health, recognising these to be politically shaped categories that have direct implications for individuals' lives. This course considers the ways that particular conceptualizations of gender, health and well-being are shaped and challenged and considers the role of individuals, institutions and states in structuring opportunities and challenges related to health.

CR: the former WSTD 3100
PR: 3 credit hours in Gender Studies

3500 Justice, Politics, Reproduction analyzes key issues related to justice, politics and reproduction with particular attention to the ways that domestic law and politics, in Canada and other transnational locations, shape regulations and social expectations and practices.
PR: successful completion of Law and Society 1000 and/or GNDR 1000 are advised but not required

3710-3720 Special Topics in Gender Studies: Harlow (same as the former WSTD 3710-3720) is available only as part of the **Harlow Campus Semester**.
CR: the former WSTD 3710-3720

4000 Contemporary Feminist Issues (same as the former WSTD 4000) is an interdisciplinary seminar in Gender Studies that identifies emerging debates in contemporary feminism and analyses complex and contentious issues and how they intersect and disrupt social constructions of gender.
CR: the former WSTD 4000
OR: 3 hour seminar per week
PR: 3 credit hours in Gender Studies at the 3000 level or permission of instructor

4001 Methods that Matter in Gender Studies (same as the former GNDR 3000) familiarizes students with basic tools and research skills for feminist enquiry in Gender Studies research. As a requirement of this course, students will be asked to design and carry out a research project.
CR: the former WSTD 3000 and former GNDR 3000
PR: 3 credit hours in Gender Studies at the 3000 level or permission of instructor

16.11 Geography

In accordance with Senate's *Policy Regarding Inactive Courses*, the course descriptions for courses which have not been offered in the previous three academic years and which are not scheduled to be offered in the current academic year have been removed from the following listing. For information about any of these inactive courses, please contact the Head of the Department.

It is strongly recommended that all 2000-level core courses be successfully completed before registration in 3000-level courses. All 2000-level core courses must normally be successfully completed prior to registration in a 4000-level course.

Specific prerequisites for courses may be waived only with permission of the instructor and the Head of Department.

A tentative list of upcoming Geography course offerings can be found at www.mun.ca/hss/courses.php.

Geography courses are designated by GEOG.

1050 Geographies of Global Change provides perspectives on the major geographical challenges and changes facing the contemporary globe, including: climate and environmental change, sustainability, human development, economic globalization, cultural change, and population and migration. Using the integrative skills of geographical analysis, the course prepares students for advanced study in geography and citizenship in the modern world. All sections of this course follow Quantitative Reasoning Course Guidelines available at www.mun.ca/hss/qr.
CR: credit may not be obtained for GEOG 1050 and any one of the former GEOG 1000, the former GEOG 1001, the former GEOG 1010, the former GEOG 1011

2001 Cultural Geography is an introduction to the study of culture in geography, emphasizing both the history of the field from classic studies of landscapes to contemporary scholarship and themes of recent importance. It explores the politics of cultural production and consumption; critical spaces of cultural production and consumption from around the world, including cities, landscapes, texts, media, performance, and identity; and concepts of everyday life, materiality, and space/place. All sections of this course follow International Studies guidelines available at www.mun.ca/hss/IS.
PR: GEOG 1050, or the former GEOG 1001, or the former GEOG 1011

2102 Physical Geography: The Global Perspective is a study of form, process, and change in natural systems at and near the surface of Earth, viewed as human environment. Emphasis is on global and regional scales in the systematic study of climate, water, landforms and vegetation. All sections of this course follow International Studies guidelines available at www.mun.ca/hss/IS and Quantitative Reasoning Course Guidelines available at www.mun.ca/hss/qr.
LH: 3
PR: GEOG 1050, or the former GEOG 1001, or the former GEOG 1011, or students following a major in Environmental Physics

2105 Canada's Natural Environments and Landscapes examines the characteristics and development of the natural environments and landscapes of each of the major regions of Canada. The diversity of natural environments is illustrated through discussion of the climatic, hydrological, biogeographical, and geomorphic processes responsible for shaping the land. The impact of both gradual and rapid (catastrophic) changes on local, national, and global scales will be emphasized. This course is complementary to GEOG 3405; students are encouraged to take both.
CR: the former GEOG 3100

2195 Introduction to Geographic Information Sciences is an introduction to the fields of cartography, remote sensing, and geographic information systems (GIS). Geographic information collection, representation and analysis methods are the topics for the course. An emphasis is given to applications of maps and satellite images. All sections of this course follow Quantitative Reasoning Course Guidelines available at www.mun.ca/hss/qr.

2302 Issues in Economic Geography covers issues and ideas in economic geography. The development of local, regional and global economies will be related to economic, cultural and resource factors at international scales. All sections of this course follow International Studies guidelines available at www.mun.ca/hss/IS and Quantitative Reasoning Course Guidelines available at www.mun.ca/hss/qr.
PR: GEOG 1050, or the former GEOG 1001, or the former GEOG 1011, or permission of the instructor

2425 Natural Resources is an introduction to the concepts of natural resources, environment and conservation: the nature and distribution of natural resources; methods of use, allocation and development of natural resources and the role of various physical, social, economic, political and technological factors influencing decision-making about resources.
CR: the former GEOG 3325
PR: GEOG 1050, or the former GEOG 1001, or the former GEOG 1011

2495 Regional Geography of Labrador is a holistic study of the Geography of Labrador, including the terrain, geology, Quaternary history, climate, vegetation, and fauna; the cultural geography of Labrador, including Innu, Inuit, NunatuKavut, and Settler people and communities; economic activities in Labrador, and the interaction of the Labrador economy within Newfoundland, Canada, and globally; the management of physical and human resources; and the geographic techniques used to investigate and understand Labrador's unique Geography.
CR: the former GEOG 3495

3015 Science, Technology, and Society (same as Sociology 3015) explores the relationships among science, technology, and society (STS). It is premised on the idea that science and technology affect our social, cultural, economic, and political lives. Equally, scientific research and technology development are shaped by their social, cultural, economic, and political contexts. This course draws upon the fields of anthropology, sociology, geography, history, and cultural studies, as STS is an interdisciplinary field.
CR: Sociology 3015

3110 Physical Geography of the Watershed - inactive course.

3120 Climatology is an analysis of the energy and moisture budgets and circulation of the atmosphere at the macro-scale, together with an examination of resulting climate characteristics for selected world regions.
LH: 3
PR: GEOG 2102, Mathematics 1000

3140 Biogeography is the application of ecological concepts to the study of the spatial variations in the distribution of species. Laboratory work emphasizes terrestrial species distributions of the island of Newfoundland.
LH: 3
PR: GEOG 2102, Mathematics 1000

3150 Geomorphology (same as Earth Sciences 3700) is a study of the relationships between geomorphic processes and landforms. Practical work will involve collection of data and samples in the field and analytical laboratory techniques.
CR: Earth Sciences 3700
LH: 3
