- 4600 Chaucer and His Contemporaries** is an in-depth study of some of the major writers of the fourteenth century.  
PR: two 3000-level English courses. ENGL 2600 or 3600 is recommended.
- 4601 Medieval Romance Literature** is a study of representative texts of the medieval romance genre from the twelfth to the fifteenth century.  
PR: successful completion of two 3000-level English courses
- 4605-4615 Special Topics in Medieval Language and Literature** will have topics to be studied announced by the Department.
- 4810-4819 (Excluding 4817) Special Topics** will have topics to be studied announced by the Department.  
PR: successful completion of two third-year English courses
- 4817 Utopias and Dystopias in Literature** is a study of representative literary utopias and dystopias, both classic and modern.  
PR: successful completion of two third-year English courses
- 4821 Canadian Literature: Imagining Worlds** is a study of some of the main concepts in Canadian culture up to World War II as they affect the history and development of Canadian Literature.  
PR: completion of 3 credit hours chosen from courses at the 2000 or 3000 level in Canadian Literature, or permission of the instructor
- 4822 Canadian Literature: Making it New** is a study of some of the main concepts in Canadian culture since World War II as they affect the history and development of Canadian Literature.  
PR: completion of 3 credit hours chosen from courses at the 2000 or 3000 level in Canadian Literature, or permission of the instructor
- 4843 Graphic Memoir** examines a broad spectrum of graphic memoirs taking into account theoretical developments in both comics studies and autobiographical studies.  
CR: ENGL 3841  
PR: ENGL 2244 or ENGL 3843, or permission of the instructor.
- 4850 Contemporary Canadian Poetry** is a seminar course in contemporary Canadian poetry. Students will have the opportunity to study collections by six English Canadian contemporary poets - not just new work by established older writers, but also first collections by younger writers. The work of poets from across Canada will be chosen.  
CR: ENGL 3148  
PR: successful completion of two third-year English courses
- 4851 Canadian Exploration Literature** will examine Canada's early exploration and travel literature and show how it has shaped our contemporary fiction. Early texts may be studied from an anthology of exploration writings, such as Germaine Warkentin's Canadian Exploration Literature: An Anthology. Several contemporary novels will also be studied and may include Wayne Johnston's *The Navigator* of New York and John Steffler's *The Afterlife of George Cartwright*.  
PR: successful completion of two third-year English courses
- 4852-4860 Special Topics in Canadian Literature** will have topics to be studied announced by the Department.  
PR: successful completion of two third-year English courses
- 4900 Book History and Print Culture I** is an introduction to bibliographical and textual studies to 1800. Areas covered may include the book as a material object; the history of the book; manuscripts; the spread of printing; the hand-press period; editing of texts; the evolution of the library; origins of intellectual property; freedom of the press; aspects of literary detection, forgery and plagiarism.  
PR: successful completion of two third-year English courses
- 4901 Book History and Print Culture II** is an introduction to bibliographical and textual studies from 1800 to the present day. Areas covered may include the book as a material object; the history of the book; machine-press period; industrialization of printing; globalization of the book trade; intellectual property and copyright; electronic book; digital literacy; digital literatures.
- 4910 Advanced Creative Writing: Fiction** is a seminar for students who wish to write publishable literary fiction. Class size will be limited. Students will be expected to produce at least 15,000 words during the semester. Regular participation is also required.  
PR: completion of ENGL 3900 with a grade of 70 or higher and submission of a portfolio and permission of the instructor.
- 4911 Advanced Creative Writing: Poetry** uses models of contemporary writing and the students' own work. This course is designed to develop further the technical skill of those students who have reached a high level of achievement in the introductory creative writing course in poetry, English 3901 (or who have a body of work of exceptional accomplishment) and to help them move towards publication in literary journals and chapbooks.  
PR: normally, admission to this course will be based on the instructor's evaluation of the student's writing and on the achievement of a minimum grade of 70% in ENGL 3901 or ENGL 3900
- 4912 Advanced Creative Writing: Playwriting** - inactive course.
- 4913 Advanced Creative Writing: Nonfiction** is conducted as a seminar using models of contemporary writing and the students' own work. Each student will be required to submit work regularly.  
PR: successful completion of at least one Creative Writing course at the 3000-level, plus submission of a portfolio specified by the instructor and permission of the instructor
- 4914 Advanced Editing** is editing for the workplace: An intensive course in drafting and editing. Students will be expected to work both individually and collaboratively.  
PR: successful completion of at least two of the following: ENGL 3001, 3817, 3903 (or other course designated Creative Writing), 3910, 3920. Normally, admission to this course will be based on the instructor's evaluation of the student's writing. Class size will be limited.
- 4920-4930 Special Topics in Creative Writing** will have topics to be studied announced by the Department.  
PR: successful completion of two third-year English courses
- 4999 Essay for Honours Candidates** is required as part of the Honours program.
- 5000 Instructional Field Placement** is a 6 credit hour course which occurs upon completion of course work in the **Diploma in Performance and Communications Media**. The curriculum emphasis is on the application of acquired skills. Continuing the project-oriented structure built into the practical courses, students will be placed with existing projects in the professional communities of film, television, theatre or video.  
CH: 6  
PR: ENGL 3350, 3351, 3816, 4400, 4401, 4402, with an overall average of 65% in these courses. Restricted to students in the **Diploma in Performance and Communications Media**. Admission is by application to the Program Coordinator, normally at least three months before the beginning of the placement, and is limited to students who at the time of admission have completed the six courses listed above with an overall average of at least 65% and who already hold a first degree or are in their final year of a degree program as confirmed by the Office of the Registrar.  
UL: can be used for credit only towards the **Diploma in Performance and Communications Media**

## 12.7.1 Communication Studies

Communication Studies courses are designated by CMST.

**2000 Critical Approaches to Popular Culture** considers critical issues and approaches in the study of popular culture. It will explore the ways in which

everyone is both a user of and is used by popular culture. A variety of critical approaches to studying popular culture will be examined: Production, Texts, Audience, and History.

**2001 Introduction to Communication Theory** provides an introduction to theoretical approaches to organization, use and manipulation of language, including semiotics, performativity, mass and group communications, sociolinguistics and interpersonal communication. We will examine notions of influence, rhetoric, social judgment, deception, subject formation, globalization and cultural hybridity within the field of communications.

PR: prior completion of CMST 2000 is encouraged

**3010-3020 Special Topics in Communication Studies** will have topics to be studied announced by the Program Coordinator.

**4000 Advanced Communications Theory** engages communication theories, such as interpersonal, organizational, intercultural, or international communication, seeking to understand how and why mediated communication works have found their explanatory power to be useful. The course will aim to analyze various communication theories, apply communication theories to everyday life, write a theoretical literature review, and form sound hypotheses or focused research questions to advance theory.

PR: CMST 2000 and 2001 and 9 additional credit hours chosen from Program and Regulations, Elective Courses, List A or B

**4001 Seminar in Mass Communication and Visual Culture** examines the ways visual culture shapes and is shaped by communication forms and processes.

**4010-4020 Special Topics in Communication Studies** will have topics to be studied announced by the Program Coordinator.

## 12.8 English as a Second Language

**011F Core Intensive English Program** covers reading through a variety of types of texts, vocabulary development, writing development, and academic listening and note-taking skills. Students will be placed into appropriate sections following a placement test.

**012F Speaking, Listening, and Culture** includes development of speaking and listening abilities through a wide variety of tasks and communicative activities, including discussions, debates, conversation, role-plays, and presentations. Listening activities promote comprehension of rapid conversational English, while discussion topics enrich students' understanding of Canadian culture. Students will be placed into appropriate sections following a placement test.

## 12.9 Folklore

In accordance with Senate's *Policy Regarding Inactive Courses*, the course descriptions for courses which have not been offered in the previous three academic years and which are not scheduled to be offered in the current academic year have been removed from the following listing. For information about any of these inactive courses, please contact the Head of the Department.

Folklore courses are designated by FOLK.

Folklore 1000 is the prerequisite for all other courses in Folklore, except Folklore 1050, Folklore 1060, and those courses cross-listed with other Departments.

**1000 Introduction to Folklore** explores the role of tradition in communication, art and society. Reading assignments and audiovisual material will emphasize the use of folklore in context. Students will analyse traditions in their own lives through special assignments.

CR: the former FOLK 2000

**1060 Folklore and Culture** is an introduction to traditional expressive behaviour as cultural experience. Readings and lectures will explore the various meanings of "culture" from interdisciplinary perspectives and link them to areas of folklore such as children's folklore, material culture, and occupational folklife.

PR: while there is no prerequisite for this course, students should note that they will need to take Folklore 1000 (or the former 2000) before they can advance to other courses

**2100 Folklore Research Methods** introduces the resources, tools and methods that folklorists use for primary and secondary research, including interviewing and participant observation.

PR: it is strongly recommended that majors and minors take this course before taking 3000 and 4000 level courses

**2230 Newfoundland Society and Culture** (same as Sociology 2230, the former Sociology/Anthropology 2230, and the former Anthropology 2230) focuses on the social and cultural aspects of contemporary island Newfoundland.

CR: Sociology 2230, the former Sociology/Anthropology 2230, the former

Anthropology 2230

**2300 Newfoundland and Labrador Folklore** (same as the former Anthropology 2300) is a survey of the full range of folklore in the province, with an emphasis on community and regional identity.

CR: the former Anthropology 2300, the former FOLK 3420

**2401 Folklife Studies** examines the interweaving of traditional elements in the tangible and intangible cultural heritage of various cultures. These may include holiday customs, rites of passage, folk religion, home remedies, clothing, food and art.

CR: the former FOLK 3500

**2500 Oral Literature** (same as the former Anthropology 2500) focuses on the analysis of folk literature - narrative, poetry and song, drama, and speech from around the world - through textual, comparative and contextual methods.

CR: the former Anthropology 2500, the former English 3400, the former FOLK 3400, the former Sociology/Anthropology 3400

**2700 Ethnography of the University** allows students to develop their skills in cultural documentation as they record and analyze Memorial University of Newfoundland's unofficial culture. Course material covers ethnographic practices and issues as well as the dynamics and history of campus life.

**3001 Art, Architecture and Medieval Life** (same as Archaeology 3001, History 3020, and Medieval Studies 3001) is an examination of the development of medieval art and architecture and of the ways in which they mirror various aspects of life in the Middle Ages. This course will include a discussion of art and architecture in the countryside, in the town, in the castle, in the cathedral and in the cloister.

CR: Archaeology 3001, History 3020, and Medieval Studies 3001

PR: it is recommended, but not obligatory, that students should have successfully completed one of the following courses: Archaeology 2480, FOLK 1000 or the former 2000, History 2320/Medieval Studies 2001, History 2330/Medieval Studies 2002, Medieval Studies 2000

**3100 Fictional Worlds: The Folktales** is a study of fictional folk narratives told worldwide. Students may be asked to read, collect, and/or analyze folktales.

CR: the former FOLK 4200

**3200 Music, Song and Tradition** (same as Music 3017) introduces students to a wide range of traditional song. Students will hear and discuss local, regional and international examples. Ability to read music or familiarity with music theory not required.

CR: Music 3017, the former FOLK 2430

**3250 Song Worlds: The Ballad** examines traditional balladry (including subgenres such as tragic, comic, romantic, religious, and medieval ballads) in the contexts of transmission, function, performance, and aesthetics. Differences in dealing with written literature and the literature of tradition will also be addressed.

CR: the former FOLK 4445

**3300 Vernacular Drama** is a survey of traditional drama and its study with an emphasis on North America and Great Britain from social function, performance, and aesthetic perspectives.

**3350 Folklore of the Body** examines how the body is socially constructed and how it is represented through folklore genres from narrative, to material culture and custom. It considers how culture is both inscribed on the body and how it is bodily performed.

CR: the former FOLK 3611

**3360 Sex/Folklore/Power** is 1) an introduction to the many ways that sexual identities are displayed, developed, and categorized through informal and everyday cultural performances, i.e., folklore; 2) a study of how such performances relate to various folklore genres, including folk language and narrative, music/song/ballad, material culture/space, and festival/ritual; and 3) an examination of how social power structures are (de)constructed and negotiated through folk processes involving sexuality/sexual identities.

**3450 Language and Play** examines the role of play in the folklore of children and adults with particular attention to games, rhymes, proverbs and other small genres of wordplay.

**3460 Folklore and Literature** (same as English 3460) examines the interrelationships among folklore forms and literary genres, the influence of oral traditions on written literatures, and consider the theoretical issues raised by these interrelationships. The primary emphasis is on the interpretation of literature from the perspective of folk tradition.

CR: English 3460, the former English 4450, the former FOLK 4450

**3601-3640 (Excluding 3606, 3612 and 3618) Special Topic in Folklore** will have topics to be studied announced by the Department.

**3606 Supernatural Folklore** focuses on the ethnography of belief systems. Students examine patterns of belief and the features of supernatural folklore.

**3612 Urban Legend** provides an introduction to the study of one of the most

rapidly expanding and exciting areas of folk narrative research. The course looks at the main features of the urban legend and the topics they cover. Examination is also made as to how, when, where and why stories of this type are used, including their incorporation into television programs, films and literature.

**3618 Jazz and Blues: The Roots of Popular Music** (same as Music 3018) is an overview of blues and jazz as traditional musical forms. Lectures and listening will illustrate the development of regional music cultures and generic styles. To better understand the shift of blues and jazz from regional to global performance contexts, the course will examine the effects of changing transmission media, from predominantly sensory media through contemporary media technologies. A term paper concerning musical style will entail library research and aural analysis.  
CR: Music 3018

**3650 Artifacts of Colonial America** (same as Archaeology 3650) provides students with practical experience in the analytical methods used to identify, date and interpret artifacts from colonial-era sites in North America. Detailed discussions on manufacture, technology, form and function provide the necessary background for a better understanding of concepts relating to artifact identification, provenance, dating techniques, and other current issues. Practical, hands-on exercises will help reinforce weekly topics and teach students the fundamentals required to interpret artifact assemblages from the historic period.  
CR: Archaeology 3650, the former Anthropology 3683

**3700 Museums and Historic Sites** - inactive course.

**3710-3729 Special Topics in Folklore** is available only as part of the Harlow Campus Semester.

**3820 Folk Custom** provides an introduction to the study of calendar, seasonal, occupational, and life-cycle customs, focusing on their analysis as symbolic behaviour.  
CR: the former FOLK 3600

**3830 Foodways** focuses on dietary practices in a variety of regional traditions, considering both historical and contemporary approaches to the supply, storage, preparation and serving of food. The whole range of cookery and food habits - from the acquisition of raw materials to the allocation of portions - will be addressed from both theoretical and applied perspectives.

**3850 Material Culture** (same as Archaeology 3850) is an introduction to the study of material culture and the question of why objects are important to us. Using folklore and interdisciplinary approaches, we will look at objects as cultural products, question the influence of objects on behaviours, and address the role of objects in historical and ethnographic research.  
CR: Archaeology 3850

**3860 Vernacular Architecture** same as Archaeology 3860 and History 3860) is a historical survey of vernacular architectural forms in various regions of North America, with attention to Newfoundland and Labrador materials. Issues discussed include the relationship of house form and culture, the concepts of antecedents, diffusion, innovation and evolution of building forms and technologies, and the siting of buildings in the landscape. Dwelling houses, outbuildings, churches and industrial vernacular architecture will be included.  
CR: Archaeology 3860, History 3860

**3870 An Introduction to the History of Western Architecture Since the Renaissance** - inactive course.

**3910 Traditions of Work** concerns the development and role of tradition in occupational groups and work settings. Verbal and non-verbal codes including narratives, joking relationships, pranks, material culture, and labourlore will be examined in a variety of contexts.

**3920 Folklore, Education and Community** familiarizes students with the function of Folklore in the educational process. Emphasis will be on cultural transmission and cultural learning inside and outside the K-12 classroom.

**3930 Folklore and Popular Culture** is an introduction to the study of popular culture, the folk/popular continuum, and the role of folklore in media such as film, television, music, and art.  
CR: the former FOLK 2400

**3950 Gender and Traditional Culture** is an introduction to the ways in which gender shapes and/or is shaped by traditional culture. Readings and lectures will explore the significance of gender for folklore collection and preservation, examine representations of gender in folklore forms, and analyse creations of gendered traditions.

**4015 Cultural Resource Management** (same as Archaeology 4015 and Geography 4015) is a study of cultural resource management: the definition and recognition of cultural resources, the application of policy in managing cultural resources, and the identification and consideration of contemporary issues in cultural resource management.  
CR: Archaeology 4015, Geography 4015  
OR: three hours of seminar per week

**4100 History and Memory** - inactive course.

**4310 Studies in Newfoundland and Labrador Folklore** studies rural and urban Newfoundland and Labrador with specific reference to a culture in transition. Folklore is examined as one of the channels through which a people maintain, change and adapt various cultural patterns.  
CR: the former FOLK 3421  
PR: FOLK 2300

**4400 Traditional Culture of French-Newfoundlanders** - inactive course.

**4410 Folklore of France** - inactive course.

**4420 French Folklore in the New World** - inactive course.

**4440 Music and Culture** (same as the former Anthropology 4440, Music 4040, and the former Music 4440) examines traditional music as an aspect of human behaviour in Western and non-European cultures. Examination of the functions and uses of music; folk-popular-art music distinctions; and the relation of style to content. Outside reading, class exercises and individual reports will be required.  
CR: the former Anthropology 4440, Music 4040, the former Music 4440  
PR: completion of at least 24 credit hours of university course work

**4460 Vernacular Religion** (same as Religious Studies 4460) examines religion as it is "lived" on a daily basis, focusing primarily on forms of belief and spirituality that are informally expressed. Drawing upon various cultural contexts, the course addresses such notions as space and time; metaphysical powers; religious material culture, music, and verbal art; and the role and power of the holy person.  
CR: Religious Studies 4460, the former FOLK 4240

**4470 Spaces and Places** tackles the question of how globalization and modernity influence our attachments to locality, community, and region; how folklore has contributed to social constructions of place; how folklore is used to turn physical space into cultural place; how folklore must change to meet the needs of today's global and virtual worlds.

**4480 Oral History** (same as History 4480) examines the narratives of everyday people who tell their life experiences. This course focuses on the collection and analysis of oral narratives and how they can be used to illuminate the past. It considers the power of these narratives to shape constructions of the present and future for both narrators and audiences.  
CR: History 4480

**4500-4520 Special Topic in Folklore** will have topics to be studied announced by the Department.

**4600-4615 Special Research in Folklore** will be determined by the Department.

**4700-4715 Directed Reading Course** will be offered as determined by the Department.

**4810 Documents Management** (same as History 4810) is an introduction to the management of records and documents, both official and private.  
CR: History 4810

**400X Folklore in the Community Context** - inactive course.

**4998 Honours Comprehensive Examination** may be written or oral, or a combination of both.

**4999 Honours Essay** is required as part of the Honours program.

## 12.10 French

In accordance with Senate's *Policy Regarding Inactive Courses*, the course descriptions for courses which have not been offered in the previous three academic years and which are not scheduled to be offered in the current academic year have been removed from the following listing. For information about any of these inactive courses, please contact the Head of the Department.

Students who have successfully completed one or more credit courses in French language will not subsequently be permitted to receive credit for courses not previously completed and judged by the Department to be of a lower level than those already completed with the following provisos:

- Students who successfully complete a 4 to 5 week summer bursary program may receive three unspecified credits at the first-year level. In order to receive transfer credits students must complete the Application form for Transfer Credit Evaluation available at [www.mun.ca/regoff/admission/Transfer\\_Credit\\_Evaluation\\_2013.pdf](http://www.mun.ca/regoff/admission/Transfer_Credit_Evaluation_2013.pdf) and submit it to the Office of the Registrar.
- Students who wish to return to a previously completed course

to improve their standing may do so only with the permission of the Head of the Department.

- Students returning to the study of French after an absence should consult the Department to determine the appropriate level. Failing to do so may put them at risk of registering for courses beyond their level.

French courses are designated by FREN.

**1500 Introductory University French I** is a course for beginners and for students whose background in French is very weak. Students with a strong background in high-school French should bypass 1500 and begin their University study with 1501, especially if they intend to proceed beyond the first-year level. Very well-prepared students may apply to the Department for permission to enter 1502 directly. All sections of this course follow the Language Study Course Guidelines available at [www.mun.ca/hss/ls](http://www.mun.ca/hss/ls).

**1500 Introduction à la langue française, niveau universitaire I** cours pour débutants et pour ceux dont les connaissances du français sont très faibles. Toutes les sections de ce cours suivent le guide des cours de langue qui est consultable à [www.mun.ca/hss/ls](http://www.mun.ca/hss/ls).

CR: the former FREN 1010 or the former FREN 1011

LH: two additional hours of language laboratory work or conversation class, or both

PR: students may not register concurrently for more than one of FREN 1500, 1501 and 1502 except with the permission of the Head of the Department.

UL: permission to register for this course will not be given to students who have completed Français 3202 (High School French immersion)

**1501 Introductory University French II** is one of three consecutive credit courses in French language at the first-year university level, offering a complete overview of basic oral and written French. Students with a limited background in French should register for FREN 1500 and continue with 1501. Students with a strong background in high-school French should bypass 1500 and begin their University study with 1501, especially if they intend to proceed beyond the first-year level. Very well-prepared students may apply to the Department for permission to enter 1502 directly. All sections of this course follow the Language Study Course Guidelines available at [www.mun.ca/hss/ls](http://www.mun.ca/hss/ls).

**1501 Introduction à la langue française, niveau universitaire II** Toutes les sections de ce cours suivent le guide des cours de langue qui est consultable à [www.mun.ca/hss/ls](http://www.mun.ca/hss/ls).

CR: the former FREN 1050

LH: two additional hours of language laboratory work or conversation class, or both

PR: High School FREN 3200 or permission of the Head of the Department. Ex-immersion students should consult the Head of the Department before registering for this course. Students may not register concurrently for more than one of FREN 1500, 1501 and 1502 except with the permission of the Head of the Department.

**1502 Introductory University French III** is one of three consecutive credit courses in French language at the first-year university level, offering a complete overview of basic oral and written French. All sections of this course follow the Language Study Course Guidelines available at [www.mun.ca/hss/ls](http://www.mun.ca/hss/ls).

**1502 Introduction à la langue française, niveau universitaire III** Toutes les sections de ce cours suivent le guide des cours de langue qui est consultable à [www.mun.ca/hss/ls](http://www.mun.ca/hss/ls).

CR: the former FREN 1051

LH: two additional hours of language laboratory work or conversation class, or both

PR: FREN 1501 with a grade of at least 60% or by permission of the Head of the Department. Students may not register concurrently for more than one of FREN 1500, 1501 and 1502 except with the permission of the Head of the Department. Very well-prepared students may apply to the Department for permission to enter 1502 directly.

**2100 Intermediate French I** is a course on composition, grammar and practice in oral skills. All sections of this course follow the Language Study Course Guidelines available at [www.mun.ca/hss/ls](http://www.mun.ca/hss/ls).

**2100 Français intermédiaire II** traite de rédaction, grammaire et pratique orale. Toutes les sections de ce cours suivent le guide des cours de langue qui est consultable à [www.mun.ca/hss/ls](http://www.mun.ca/hss/ls).

OR: students may be required to attend a 50 minute weekly practicum

PR: FREN 1502 with a grade of at least 60% or Passport Français 3302 with a grade of at least 85% or Grade 12 French Immersion with a grade of at least 80% or French 4283 with a grade of at least 85% or French 3283 with a grade of at least 85% or equivalent

**2101 Intermediate French II** is further work in composition, grammar and oral skills. All sections of this course follow the Language Study Course Guidelines available at [www.mun.ca/hss/ls](http://www.mun.ca/hss/ls).

**2101 Français intermédiaire II** est la continuation du travail de rédaction, de grammaire et de communication orale. Toutes les sections de ce cours suivent le guide des cours de langue qui est consultable à [www.mun.ca/hss/ls](http://www.mun.ca/hss/ls).

OR: students may be required to attend a 50 minute weekly practicum

PR: FREN 2100 or Passport Français 3302 with a grade of at least 85% or Grade 12 French Immersion with a grade of at least 80% or French 4283 with a grade of at least 85% or French 3283 with a grade of at least 85% or equivalent

**2159 Advanced French for First-year Students I** - inactive course.

**2159 Français avancé pour étudiants de première année I** - cours désactivé.

**2160 Advanced French for First-year Students II** - inactive course.

**2160 Français avancé pour étudiants de première année II** - cours désactivé.

**2300 Phonetics** is a practical introduction to French phonetics, including the International Phonetic Alphabet and phonetic transcription as well as corrective phonetics.

**2300 Phonétique** est une introduction pratique à la phonétique du français. Emploi des symboles de l'alphabet phonétique, transcription phonétique et phonétique corrective.

OR: may be offered in accelerated format outside the regular semester or session timeframe when being delivered as part of the Frecker Summer Program

OR: students may be required to attend a 50 minute weekly practicum

PR: FREN 1502 with a grade of at least 60% or Passport Français 3302 with a grade of at least 85% or Grade 12 French Immersion with a grade of at least 80% or French 4283 with a grade of at least 85% or French 3283 with a grade of at least 85% or equivalent

**2601 Grammar and Reading** will explore reading strategies in a variety of narrative and descriptive readings in French. This course will normally be taught in French.

**2601 Grammaire et texte** propose l'exploration des stratégies de lecture qui faciliteront la compréhension de textes narratifs et descriptifs divers. Ce cours sera enseigné normalement en français.

OR: students may be required to attend a 50 minute weekly practicum

PR: FREN 1502 with a grade of at least 60% or Passport Français 3302 with a grade of at least 85% or Grade 12 French Immersion with a grade of at least 80% or French 4283 with a grade of at least 85% or French 3283 with a grade of at least 85% or equivalent

**2602 Reading Practice** will explore reading strategies in a variety of readings in French intended to inform or persuade. This course will normally be taught in French.

**2602 Pratique de la lecture** propose l'exploration des stratégies qui faciliteront la compréhension de textes informatifs et argumentatifs divers. Ce cours sera enseigné normalement en français.

OR: students may be required to attend a 50 minute weekly practicum

PR: FREN 1502 with a grade of at least 60% or Passport Français 3302 with a grade of at least 85% or Grade 12 French Immersion with a grade of at least 80% or French 4283 with a grade of at least 85% or French 3283 with a grade of at least 85% or equivalent

**2900 A Survey of Francophone Cultures** places emphasis on oral comprehension and expression.

**2900 Survol des cultures francophones** met l'accent mis sur la compréhension et l'expression orales.

CR: the former FREN 2500

OR: may be offered in accelerated format outside the regular semester or session timeframe when being delivered as part of the Frecker Summer Program; students may be required to attend a 50 minute weekly practicum

PR: FREN 1502 with a grade of at least 60% or Passport Français 3302 with a grade of at least 85% or Grade 12 French Immersion with a grade of at least 80% or French 4283 with a grade of at least 85% or French 3283 with a grade of at least 85% or equivalent. Students who have obtained less than 70% in 1051 are, however, advised to complete FREN 2100 before attempting this course.

**3100 Grammar and Textual Analysis** is a revision of the French noun and verb systems (morphology, number, gender, tense, aspect, mood, voice). Grammatical and stylistic textual analysis with special emphasis on the use of verbs in French. Vocabulary enrichment. All sections of this course follow the Language Study Course Guidelines available at [www.mun.ca/hss/ls](http://www.mun.ca/hss/ls).

**3100 Grammaire et analyse de textes** révision des catégories nominale et verbale du français (morphologie, nombre, genre, temps, aspect, mode, voix). **3300 Rhétorique et art oratoire** le discours et le dialogue. Le cadre du cours est la rhétorique: mémoire, invention, disposition, élocution, diction. Exercices oraux variés.

OR: two and a half hours of instruction plus one 50-minute period of conversation class per week  
PR: 15 credit hours in French at the 2000 level or permission of the Head of the Department

**3302 History of the French Language** (same as Linguistics 3302) is a study of the origins of French, including the influence of Gaulish, Vulgar Latin, Frankish and the langue d'oc/langue d'oïl division, a survey of the dialects, morphology and syntax of Old French and of the evolution from Old to Middle French, including phonology, morphology, syntax and vocabulary.

**3302 Histoire de la langue française** (identique à Linguistique 3302) Une étude des origines du français qui porte sur l'influence du gaulois, du latin vulgaire, du francique et de la division langue d'oc/langue d'oïl; survol des dialectes, de la morphologie et de la syntaxe de l'ancien français, ainsi que de l'évolution de l'ancien français au moyen français, en tenant compte de la phonologie, de la morphologie, de la syntaxe et du vocabulaire.

CR: Linguistics 3302  
PR: 15 credit hours in French and/or Linguistics at the 2000 level or permission of the Head of the Department; Classics 1120 is strongly recommended

**3310 Phonology and Morphology of French** (same as Linguistics 3310) is an examination of the phonological and morphological structure of French. Data from regional and non-standard varieties contrasted with data from standard French: formal rules to deal with observed regularities. Interactions of phonology and morphology in phenomena such as liaison. Derivational and inflectional morphology. Research articles on one or more of the topics dealt with in the course will be assigned as readings, and a written report in French based on one or more of the articles is to be submitted as part of the term work. This course will normally be taught in French. All sections of this course follow the Language Study Course Guidelines available at [www.mun.ca/hss/ls](http://www.mun.ca/hss/ls).

**3310 Phonologie et morphologie du français** (identique à Linguistique 3310) est une étude de la structure phonologique et morphologique du français. Données des variétés régionales et non-standard en contraste avec le français standard: règles formelles pour rendre compte des régularités observées. Interaction de la phonologie et de la morphologie dans la liaison et d'autres contextes. La flexion et la dérivation. On prescrit des articles de recherche sur au moins un des thèmes à l'étude et un rapport rédigé en français sur l'un ou plusieurs des articles. Ce cours est normalement enseigné en français. Toutes les sections de ce cours suivent le guide des cours de langue qui est consultable à [www.mun.ca/hss/ls](http://www.mun.ca/hss/ls).

CR: Linguistics 3310  
PR: 15 credit hours in French and/or Linguistics at the 2000 level or permission of the Head of the Department

**3311 Introduction to General Linguistics: Aspects of French Linguistic Theory** (same as Linguistics 3311) is a practical examination of the French verbal system, with a thorough exposition of the systems of aspect, voice, tense and mood. The fundamental concepts of linguistics will form the

framework of this exposition: the langue/parole distinction and its relationship to underlying and surface entities, language as activity and the generation of surface elements from underlying subsystems. This course will normally be taught in French.

**3311 Initiation à la linguistique générale: aspects de la théorie linguistique française** (identique à Linguistique 3311) Étude pratique du système verbal du français et une exposition approfondie des systèmes de l'aspect, de la voix et des modes. Les concepts fondamentaux de la linguistique serviront de cadre à cette exposition: la distinction langue/parole et le rapport avec les entités sous-jacentes et de surface; le langage comme activité et la génération des éléments de surface à partir des systèmes sous-jacents. Ce cours sera normalement enseigné en français.

CR: Linguistics 3311  
PR: 15 credit hours in French and/or Linguistics at the 2000 level or permission of the instructor

**3500 An Introduction to Prose Literature in French** pays particular attention to the literatures of French Canada and France.

**3500 Introduction à la prose de langue française** une attention particulière sera accordée aux littératures du Canada français et de la France.

PR: 15 credit hours in French at the 2000 level or permission of the Head of the Department

**3501 An Introduction to Drama in French** pays particular attention to the literatures of French Canada and France.

**3501 Introduction au théâtre de langue française** une attention particulière sera accordée aux littératures du Canada français et de la France.

PR: 15 credit hours in French at the 2000 level or permission of the Head of the Department

**3502 An Introduction to Poetry in French** pays particular attention to the literatures of French Canada and France.

**3502 Introduction à la poésie de langue française** une attention particulière sera accordée à la poésie du Canada français et de la France.

PR: 15 credit hours in French at the 2000 level or permission of the Head of the Department

**3503 Study of Theme** is the study of a particular theme or of interrelated themes in selected French-language texts.

**3503 Thématique** un ou quelques thèmes reliés étudiés à travers un choix de textes d'expression française.

PR: 15 credit hours in French at the 2000 level or permission of the Head of the Department

**3504 Literary History** is the study of one or more literary periods through selected French-language texts.

**3504 Histoire littéraire** l'étude d'une ou de quelques époques à travers un choix de textes d'expression française.

PR: 15 credit hours in French at the 2000 level or permission of the Head of the Department

**3506 French Cinema** is a survey course designed to acquaint students with the major productions and trends in French cinema. The course is taught in French, and films screened will not necessarily have English subtitles. It is therefore recommended that students have a good aural comprehension of French.

**3506 Cinéma francophone** un cours d'initiation conçu pour familiariser l'étudiant avec les principales productions et directions du cinéma français. Ce cours est enseigné en français, et les films projetés ne seront pas nécessairement sous-titrés en anglais. Il est donc recommandé que les étudiants aient une bonne compréhension auditive du français.

OR: may include film viewings scheduled outside of class time  
PR: 15 credit hours in French at the 2000 level or permission of the Head of the Department

**3507 Advanced French Studies at Nice (I)** is a required course of Session I of the Canadian Third Year Program in Nice. The Coordinator will choose among a French literature, linguistics or culture course taught at his or her university.

**3507 Études françaises à Nice (I)** est un cours obligatoire lors du premier du programme Canadian Third Year in Nice. La personne responsable de la coordination choisit un cours de littérature, de linguistique ou de culture enseigné dans son université.

PR: admission to the Canadian Third Year Program in Nice and 15 credit hours in French at the 2000 level, or permission of the Head of the Department

**3508 Advanced French Studies at Nice (II)** is a required course of Session II of the Canadian Third Year Program in Nice. The Coordinator will choose among a French literature, linguistics or culture course taught at his or her university.

**3508 Études françaises à Nice (II)** est un cours obligatoire lors du deuxième du programme Canadian Third Year in Nice. La personne responsable de la coordination choisit un cours de littérature, de linguistique ou de culture enseigné dans son université.

PR: admission to the Canadian Third Year Program in Nice and French 3507

## 12.11 Gender Studies

Gender Studies courses are designated by GNDR.

**1000 Introduction to Gender Studies** (same as the former WSTD 1000) considers gender, gender studies and feminisms as areas of exploration from historical, contemporary, transnational and interdisciplinary perspectives. The aim of this course is to provide a critical framework for thinking about questions relating to gender and other forms of social difference.

CR: the former Women's Studies 1000, the former Women's Studies 2000

**2005 Critical Reading and Writing: Identities and Difference** builds foundational critical reading and writing abilities through an exploration of feminist scholarship about the construction of identities and difference in cultural discourse, representation, and institutions. Students learn the principles of scholarly analysis and the mechanics of academic writing. Coursework focuses on critically analyzing texts, evaluating sources, framing questions, developing an argument, and refining written work for Gender Studies and related fields. All sections of this course follow Critical Reading and Writing Course Guidelines available at [www.mun.ca/hss/crw](http://www.mun.ca/hss/crw).

CR: the former WSTD 2005

**2006 Genders and Sexualities** introduces genders and sexualities from an interdisciplinary perspective. Students will explore the continuum of sex/gender and sexual identities, and examine how these identities intersect with other aspects of identity, including (but not limited to) race, class, and (dis)ability

**3000 Research Methods in Gender Studies** (same as the former WSTD 3000) familiarizes students with basic tools and research skills for feminist enquiry in Gender Studies research. As a requirement of this course, students may be asked to design and carry out a research project.

CR: the former WSTD 3000

**3001 Women Writers in the Middle Ages** (same as English 3006, Medieval Studies 3006 and the former WSTD 3001) will study selections from the considerable corpus of women's writing in the Medieval period, as well as issues which affected women's writing. All selections will be read in English translation.

CR: English 3006, Medieval Studies 3006, the former Medieval Studies 3351, the former WSTD 3001

**3002-3020 (Excluding 3004, 3005 and 3009) Special Topics in Gender Studies** (same as the former WSTD 3002-3020 excluding 3004, 3005 and 3009) will have topics announced by the Department.

CR: the former WSTD 3002-3020 excluding 3004, 3005 and 3009

PR: 3 credit hours in Gender Studies at any level

**3005 Feminist Texts, Theories and Histories** (same as the former WSTD 3005) examines the development and dissemination of feminist thought through analyses of key texts and diverse media, and their connections to historical and contemporary debates within feminism.

CR: the former WSTD 3005

PR: 3 credit hours in Gender Studies at any level

**3025 Theories of Gender, Race and Post-Colonialism** examines theories, themes and issues that have emerged from, and in response to, post-colonial studies in recent decades. This course focuses particularly on what this body of scholarship contributes to understandings of the roles of gender, race and sexuality in colonialism, as well as the comprehension of current social and political realities.

PR: 3 credit hours in Gender Studies at any level

**3100 Gendered Politics of Health** (same as the former WSTD 3100) examines intersections of gender and health, recognising these to be politically shaped categories that have direct implications for individuals' lives. This course considers the ways that particular conceptualizations of gender, health and well-being are shaped and challenged and considers the role of individuals, institutions and states in structuring opportunities and challenges related to health.

CR: the former WSTD 3100

PR: 3 credit hours in Gender Studies at any level

**3710-3720 Special Topics in Gender Studies** (same as the former WSTD 3710-3720) are available only as part of the **Harlow Campus Semester**.

CR: the former WSTD 3710-3720

**4000 Contemporary Feminist Issues** (same as the former WSTD 4000) is an interdisciplinary seminar in Gender Studies that identifies emerging debates in contemporary feminism and analyses complex and contentious issues and how they intersect and disrupt social constructions of gender.

CR: the former WSTD 4000

OR: 3 hour seminar per week

PR: 6 credit hours in Gender Studies, including 3 credit hours in Gender Studies at the 3000-level

**4005 Feminist Practices** (same as the former WSTD 4005) examines, in considerable depth and detail, connections between feminist theories and activism for social and political change. It examines how social movement activism, including feminism, is mobilized in different historical, cultural and national contexts.

CR: the former WSTD 4005

PR: 6 credit hours in Gender Studies, including 3 credit hours in Gender Studies at the 3000-level

## 12.12 Geography

In accordance with Senate's *Policy Regarding Inactive Courses*, the course descriptions for courses which have not been offered in the previous three academic years and which are not scheduled to be offered in the current academic year have been removed from the following listing. For information about any of these inactive courses, please contact the Head of the Department.

It is strongly recommended that all 2000-level core courses be completed before registration in 3000-level courses. All 2000-level core courses must normally be completed prior to registration in a 4000-level course.

Specific prerequisites for courses may be waived only with permission of the instructor and the Head of Department.

Geography courses are designated by GEOG.

**1050 Geographies of Global Change** provides perspectives on the major geographical challenges and changes facing the contemporary globe, including: climate and environmental change, sustainability, human development, economic globalization, cultural change, and population and migration. Using the integrative skills of geographical analysis, the course prepares students for advanced study in geography and citizenship in the modern world. All sections of this course follow Quantitative Reasoning Course Guidelines available at [www.mun.ca/hss/qr](http://www.mun.ca/hss/qr).

CR: credit may not be obtained for GEOG 1050 and any one of the former GEOG 1000, the former GEOG 1001, the former GEOG 1010, the former GEOG 1011

**2001 Cultural Geography** is an introduction to the study of culture in geography, emphasizing both the history of the field from classic studies of landscapes to contemporary scholarship and themes of recent importance. These include the relationship between nature and culture; imperialism and colonialism; place, identity, and power; and global cultures of commodities, media, and tourism.

PR: GEOG 1050, or the former GEOG 1001, or the former GEOG 1011

**2102 Physical Geography: The Global Perspective** is a study of form, process, and change in natural systems at and near the surface of Earth, viewed as human environment. Emphasis is on global and regional scales in the systematic study of climate, water, landforms and vegetation. All sections of this course follow Quantitative Reasoning Course Guidelines available at [www.mun.ca/hss/qr](http://www.mun.ca/hss/qr).

CR: the former GEOG 2100, the former GEOG 2101

LH: 3

PR: GEOG 1050, or the former GEOG 1001, or the former GEOG 1011

**2105 Canada's Natural Environments and Landscapes** examines the characteristics and development of the natural environments and landscapes of each of the major regions of Canada. The diversity of natural environments is illustrated through discussion of the climatic, hydrological, biogeographical, and geomorphic processes responsible for shaping the land. The impact of both gradual and rapid (catastrophic) changes on local, national, and global scales will be emphasized. This course is complementary to GEOG 3405; students are encouraged to take both.

CR: the former GEOG 3100

**2195 Introduction to Geographic Information Sciences** is an introduction to the fields of cartography, remote sensing, and geographic information systems (GIS). Geographic information collection, representation and analysis methods are the topics for the course. An emphasis is given to applications of maps and satellite images. All sections of this course follow Quantitative Reasoning Course Guidelines available at [www.mun.ca/hss/qr](http://www.mun.ca/hss/qr).

**2226 Field Methods I** is designed to introduce students to the practice of geography in the field. Field techniques will focus on the observation, identification, and collection of primary data. This course provides a basis for further study in advanced geography courses.

CH: 1

PR: GEOG 1050 or permission of the instructor

**2302 Issues in Economic Geography** covers basic issues and ideas in economic geography. The development of a regional economy will be related to underlying economic, cultural and physical factors. All sections of this course follow Quantitative Reasoning Course Guidelines available at [www.mun.ca/hss/qr](http://www.mun.ca/hss/qr).

PR: GEOG 1050, or the former GEOG 1001, or the former GEOG 1011

**2425 Natural Resources** is an introduction to the concepts of natural resources, environment and conservation: the nature and distribution of natural resources; methods of use, allocation and development of natural resources and the role of various physical, social, economic, political and technological factors influencing decision-making about resources.

CR: the former GEOG 3325

PR: GEOG 1050, or the former GEOG 1001, or the former GEOG 1011

**2495 Regional Geography of Labrador** is a holistic study of the Geography of Labrador, including the terrain, geology, Quaternary history, climate, vegetation, and fauna; the cultural geography of Labrador, including Innu, Inuit, NunatuKavut, and Settler people and communities; economic activities in Labrador, and the interaction of the Labrador economy within Newfoundland, Canada, and globally; the management of physical and human resources; and the geographic techniques used to investigate and understand Labrador's unique Geography.

CR: the former GEOG 3495

**3110 Physical Geography of the Watershed** - inactive course.

**3120 Climatology** is an analysis of the energy and moisture budgets and circulation of the atmosphere at the macro-scale, together with an examination of resulting climate characteristics for selected world regions.

LH: 3

PR: GEOG 2102, Mathematics 1000

**3140 Biogeography** is the application of ecological concepts to the study of the spatial variations in the distribution of species. Laboratory work emphasizes terrestrial species distributions of the island of Newfoundland.

LH: 3

PR: GEOG 2102, Mathematics 1000

**3150 Geomorphology** (same as Earth Sciences 3700) is a study of the relationships between geomorphic processes and landforms. Practical work will involve collection of data and samples in the field and analytical laboratory techniques.

CR: Earth Sciences 3700

LH: 3

PR: GEOG 2102 or Earth Sciences 2905, Mathematics 1000. Sections of this course delivered by the Department of Geography do not require the Mathematics 1000 prerequisite.

**3202 Introduction to Cartography** is an introduction to the field of cartography and its different components, including: projections, generalization, cartographic design, data classification, topographic and thematic mapping.

CR: the former GEOG 2200

LH: 3. Laboratory exercises will utilize Geographic Information Systems software.

PR: 6 credit hours at the 2000-level

**3222 Research Design and Quantitative Methods in Geography** is an introduction to principles of research design, and to the use of quantitative techniques. This course provides students with a basic understanding of data collection, entry, and analysis and presentation skills most commonly used by geographers. Practical, computer-based exercises are an essential part of the course. It is strongly recommended that this course be completed before registration in a 4000-level geography course.

CR: the former GEOG 2220

LH: 3

PR: GEOG 1050, or the former GEOG 1011, or the former GEOG 1001 and at least 9 credit hours from GEOG 2001, 2102, 2195, 2302, 2425

**3226 Field Methods II** is designed to provide students with field experience at a more advanced level, building on GEOG 2226. In this course, the students will experience the field research process from the initial observation of a site through research and analysis to completion of a

written report.

CH: 2

PR: GEOG 2226

**3230 Field Course** will normally be taken by Geography Honours students just prior to the Fall semester of their third year. The course will be held off campus and is designed to provide experience in instrument and field techniques in physical, economic and cultural Geography.

PR: permission of the instructor

**3250 Introduction to Remote Sensing** is an introduction to digital image analysis, including many aspects of pre-processing and processing of airborne and satellite imagery.

LH: 3

PR: GEOG 2195, Mathematics 1000

**3260 Introduction to Geographic Information Systems (GIS)** introduces the principles of GIS as they relate to spatial data input, structures, management, integration, analysis and output. Laboratory exercises permit students to use GIS software and explore how it can be applied to a wide variety of disciplines and real world issues.

CR: the former GEOG 4251

LH: 3

PR: GEOG 2195, Mathematics 1000

**3303 Location Theory** - inactive course.

**3320 Fisheries Geography** - inactive course.

**3340 Techniques of Regional Analysis** is an introduction to some of the more common types of analysis of urban and regional systems.

PR: GEOG 2302 or GEOG 3303

**3350 Community and Regional Planning and Development** introduces students to regional planning and development theories, techniques and approaches. Understanding of networks of development actors at community and regional scales, methods of delineating regions, links between theory and practice in planning and development. Focus on Canadian experiences and a sustainable development perspective.

PR: GEOG 2302 or permission of the instructor

**3405 Canada** is a study of the regional geography of Canada, with emphasis on social, economic and political characteristics. This course is complementary to GEOG 2105; students are encouraged to take both.

CR: the former GEOG 2400

PR: GEOG 2001, 2102 and 2302; or permission of the instructor and the Head of the Department

**3425 Geographical Analysis of Resources** is the geographic study of contemporary North American issues in resources and their management. Emphasis will be placed on air and water quality issues, lands and forest resources, energy resources, and coastal zone resources. A number of substantive areas in resource analysis will be considered, including resource appraisal, landscape evaluation, and environmental impact assessment.

CR: the former GEOG 4400

PR: GEOG 2425 or equivalent

**3510 Geography of the Seas** is an introductory course in marine science and management treating the world's oceans as a geographic unit. The course covers basic physical, geological and biological marine science and applications of basic science to management issues facing the oceans today.

PR: GEOG 2102 or GEOG 2425, or permission of instructor

**3610 Cultural Landscape** is an investigation of a principal subject of study in cultural geography; the human imprint on the land. The course will include a detailed consideration of the origin of landscape studies in geography; newer approaches emphasizing visual and representational aspects of landscapes; and several diverse case studies, historical and contemporary, concerned with struggles over their definition.

PR: GEOG 2001

**3620 Migration and Colonization** is a study of population movements associated with colonization and frontier development.

PR: GEOG 2001

**3701 Urban Geography** is an examination of the evolution, structure and dynamics of cities and urban systems.

PR: GEOG 2302

**3710-3729 Special Topics in Geography** will have topics to be studied announced by the Department.

PR: available only as part of the Harlow Campus Semester

**3800 Political Geography** is a geographic study of political ideas and processes. The course will consist of a historical discussion of the origins and trajectory of geopolitics, from the beginning of the 20th century to contemporary uses. Key themes in political geography, including strategy and statecraft, decolonization and nationalism, global technologies, and environmental security will be discussed.

PR: GEOG 2001

**3900-3909 Special Topics in Geography** will have topics to be studied announced by the Department.

PR: permission of the instructor and the Head of the Department

**3990-3999 Special Topics in Geography** will have topics to be studied announced by the Department.

PR: permission of the instructor and the Head of the Department.

**4010 Cultural Geography** is concepts and methods in the study of cultural geography.

PR: GEOG 2001 and at least one of GEOG 3610, 3620, 3800. It is strongly recommended that GEOG 3222 and 3226 be completed before registration in 4000-level courses.

**4015 Cultural Resource Management** (same as Archaeology 4015 and Folklore 4015) is a study of cultural resource management: the definition and recognition of cultural resources, the application of policy in managing cultural resources, and the identification and consideration of contemporary issues in cultural resource management.

CR: Archaeology 4015, Folklore 4015

OR: three hours of seminar per week

PR: it is strongly recommended that GEOG 3222 and 3226 be completed before registration in 4000-level courses

**4120 Applied Climatology** is analysis of the impact of climatic environments and meteorological conditions upon agriculture, forestry, the hydro industry and the marine sector. Climatological considerations in the planning and design of urban areas and buildings.

LH: 3

PR: GEOG 3120

**4141 Glacial Environments** is an examination of the landforms, processes and sediments of past and present glacial environments. Course work will stress broad applications to environmental science.

CR: the former Earth Sciences 4701

LH: 3 hours of laboratory/field work per week

PR: 6 credit hours in physical geography courses at the 3000- level; or permission of Head of Department. It is strongly recommended that GEOG 3222 and 3226 be completed before registration in 4000-level courses.

**4150 Environmental Change and Quaternary Geography** (same as Archaeology 4150 and Earth Sciences 4703) covers methods of reconstructing Quaternary environments; effects of Quaternary environmental change on landforms, with special reference to North America; development and characteristics of glacial and non-glacial climates.

CR: Archaeology 4150, Earth Sciences 4703

LH: 3

PR: 6 credit hours in physical geography courses at the 3000- level; or permission of Head of Department. It is strongly recommended that GEOG 3222 and 3226 be completed before registration in 4000-level courses.

**4190 Coastal Geomorphology** is an advanced course in geomorphology of coastal regions in all climate zones. Covers reflective and dissipative beaches, barrier systems, coastal sand dunes, deltas, tidal flats, estuaries, reefs, bedrock and karst shorelines, ice-dominated shorelines, and influence of climate change and sea level change on coastal environments.

CR: the former GEOG 4180

LH: 3

PR: GEOG 3150 or permission of instructor. It is strongly recommended that GEOG 3222 and 3226 be completed before registration in 4000-level courses.

**4202 Advanced Cartography** will provide students with advanced knowledge in computer-based cartography required to produce final geographic datasets and maps.

LH: 3. Laboratory exercises will utilize Geographic Information Systems software.

PR: GEOG 3202 or permission of instructor. It is strongly recommended that GEOG 3222 and 3226 be completed before registration in 4000-level courses.

**4220 Advanced Quantitative Methods** - inactive course.

**4250 Environmental Image Analysis** is remote sensing techniques applied to various environmental problems. Techniques include selection of the system for data acquisition (airborne or satellite imagery), planning of a ground truth survey, and of data processing. Applications to high and low density urban areas, agricultural, forestry, coastal zone, oceanic, and environmental monitoring.

LH: 3

PR: GEOG 3250. It is strongly recommended that GEOG 3222 and 3226 be completed before registration in 4000-level courses.

**4261 Advanced Methods in Geographic Information Systems (GIS)** explores the nature and use of advanced GIS algorithms, discrete and continuous data structures, computational methods and analysis of error for the purpose of analysing and modelling spatial patterns and processes.

Laboratory exercises permit students to use GIS software to explore as well as develop problem solving and modelling skills for a wide variety of real world applications.

LH: 3

PR: GEOG 3260; Mathematics 2050; Computer Science 1001; (or equivalent, with permission of instructor and the Head of Department). It is strongly recommended that GEOG 3222 and 3226 be completed before registration in 4000-level courses.

**4290 Geographic Information Sciences Practicum** is practical experience with the geographic information sciences fields of cartography, remote sensing or geographical information systems. Students will serve as interns in governmental, institutional or private agencies, or in non-profit organizations.

CO: GEOG 4202, 4250, 4261, and be enrolled in the Diploma in Geographic Information Sciences

LH: six hours per week or a total of 72 hours of research or laboratory work  
OR: six hours per week or a total of 72 hours of research or laboratory work

PR: GEOG 4202, 4250, 4261, and be enrolled in the Diploma in Geographic Information Sciences. It is strongly recommended that GEOG 3222 and 3226 be completed before registration in 4000-level courses.

**4300 World Fisheries: Current Discourse and Future Directions** is a seminar course on the key concepts, principles and challenges in fisheries resources worldwide. Topics of discussion include the state of world fisheries, analysis of various management approaches and tools, and future scenarios for world fisheries.

PR: 6 credit hours in Geography at the 3000-level or permission of Head of Department. It is strongly recommended that GEOG 3222 and 3226 be completed before registration in 4000-level courses.

**4320 Regional Development Seminar** is focussed on understanding the region and regional development in theoretical terms and in a policy context. The central question of the course is: how do we understand the region and regional development in a globalizing world? What are the policy options for people interested in making regional development work in a global economy? The case studies will cover both the developing and the developed world.

PR: GEOG 2302 or permission of Head of Department. It is strongly recommended that GEOG 3222 and 3226 be completed before registration in 4000-level courses.

**4405 Outdoor Recreational Resources and Planning** is an introduction to the major themes and techniques in the study of outdoor recreation. A theoretical framework will provide a base for the evaluation of the complex issues involved in managing a physical resource for recreational purposes. North American examples will be emphasized.

CR: GEOG 4909

LH: 3

PR: GEOG 2425 or the former GEOG 3325. It is strongly recommended that GEOG 3222 and 3226 be completed before registration in 4000-level courses.

**4410 Research Seminar in Resources** offers the opportunity to undertake advanced work in a number of resource sectors such as energy, fisheries, forests, lands, air and water. The emphasis will be on learning through experience. Students will be expected to initiate and complete suitable research projects in close consultation with faculty involved.

PR: GEOG 2425 or the former GEOG 3325. It is strongly recommended that GEOG 3222 and 3226 be completed before registration in 4000-level courses.

**4600 Historical Geography** is a study of concepts and methods in historical geography. The field concerned with geographies of the past and their relation to the present. Themes will include the history of geography as a discipline, particularly its relevance to imperialism and state power; changing relationships between humans and the natural environment; and histories of the spaces of social life and human identity.

PR: GEOG 2001 and at least one of GEOG 3610, 3620, 3800. It is strongly recommended that GEOG 3222 and 3226 be completed before registration in 4000-level courses.

**4640 Historical Geography of Canada** (same as the former GEOG 3240) explains the geographical dimensions of Canada, past and present, in terms of spatial origins and processes of geographical change in the population, economy and landscape of the country. Themes will include: changing perceptions of the environment; the historical demography of immigration and initial settlement; the reconstruction of past regional geographies; the sequent occupation of particular regions; the human alteration of the natural landscape.

CR: the former GEOG 3240

PR: GEOG 2001 and at least one of GEOG 3610, 3620, 3800, the former 2290. It is strongly recommended that Geography 3222 and 3226 be completed before registration in 4000-level courses.

**4650 Conservation in Biology and Geography** (same as Biology 4650) is an examination of how biological and geographical principles can be applied

to conserving biological diversity in the natural world under conditions of exploitation and habitat loss. Special emphasis will be given to relevant provincial examples.

CR: Biology 4650

OR: 3 hours of seminar/discussion group per week

PR: 30 credit hours in either Biology or Geography and permission of the course coordinator. It is strongly recommended that GEOG 3222 and 3226 be completed before registration in 4000-level courses.

**4700 Seminar in Advanced Urban Geography** will provide senior students with the opportunity to immerse themselves in the analysis of a small number of problems related to contemporary urban structure and growth.

PR: GEOG 3701. It is strongly recommended that GEOG 3222 and 3226 be completed before registration in 4000-level courses.

**4900-4918 Special Topics in Geography** will have topics to be offered announced by the Department of Geography.

PR: permission of the instructor and the Head of the Department of Geography. It is strongly recommended that GEOG 3222 and 3226 be completed before registration in 4000-level courses.

**4919 Integrative Practicum in Geographic Information Sciences** is an applied or research project integrating aspects of cartography, geographical information systems and remote sensing. Students will have access to the GISciences Research Laboratory to complete their project. This is the capstone course for the students registered in the Diploma in Geographic Information Sciences program. It will involve the knowledge and experiences acquired over the years in the program.

CO: GEOG 4202, 4250, 4261, and be enrolled in the Diploma in Geographic Information Sciences

LH: six hours per week or a total of 72 hours of individual research or laboratory work

OR: six hours per week or a total of 72 hours of individual research or laboratory work

PR: GEOG 4202, 4250, 4261, and be enrolled in the Diploma in Geographic Information Sciences. It is strongly recommended that GEOG 3222 and 3226 be completed before registration in 4000-level courses.

**4990 Nature of Geography** is an examination of the major philosophical issues in the nature of geography and recent changes in geographical method. Particular emphasis will be placed on the implications of the quantitative, systems, behavioural and ecological approaches in geography, the use of models, the place of theory and the study of process in geography.

PR: It is strongly recommended that GEOG 3222 and 3226 be completed before registration in 4000-level courses. Admission to the Honours program.

**4999 Dissertation Honours Degree** is required of the Honours degree.

PR: Admission to the Honours program. It is strongly recommended that GEOG 3222 and 3226 be completed before registration in 4000-level courses.

## 12.13 German

In accordance with Senate's *Policy Regarding Inactive Courses*, the course descriptions for courses which have not been offered in the previous three academic years and which are not scheduled to be offered in the current academic year have been removed from the following listing. For information about any of these inactive courses, please contact the Head of the Department.

The Department offers several courses in Germany during the Spring/Summer semester. See the Departmental web page at [www.mun.ca/german](http://www.mun.ca/german) for details on the German Field School.

German courses are designated by GERM.

**1000 Elementary German I** is intended to give beginners a basic knowledge of the spoken and written language and culture of the German-speaking countries. All sections of this course follow the Language Study Course Guidelines available at [www.mun.ca/hss/ls](http://www.mun.ca/hss/ls).  
CR: the former GERM 1002

**1001 Elementary German II** is a continuation of Elementary German I with the same basic text. All sections of this course follow the Language Study Course Guidelines available at [www.mun.ca/hss/ls](http://www.mun.ca/hss/ls).

CR: the former GERM 1003

PR: GERM 1000

**1010 Critical Reading and Writing: Hansel, Gretel, and the Big Bad Wolf** introduces students to the German story-telling tradition from the Middle Ages to the present. Students will learn how to identify, critically read, analyse and evaluate arguments using rational judgement and appropriate rhetorical techniques and how to construct logically sound academic essays, incorporating the words and ideas of others. The communicative advantages of identifying an audience, the use of effective tone, word choice, and sentence patterns will also be covered. All sections of this course follow

Critical Reading and Writing Course Guidelines available at [www.mun.ca/hss/crw](http://www.mun.ca/hss/crw).

PR: GERM 1000 is encouraged but not required

**2010 Intermediate German I** is a completion of the fundamentals of the German language, with a continued strong cultural component. All sections of this course follow the Language Study Course Guidelines available at [www.mun.ca/hss/ls](http://www.mun.ca/hss/ls).

PR: GERM 1000 and GERM 1001 or equivalent

**2011 Intermediate German II** is a grammar review and introduction to literature. All sections of this course follow the Language Study Course Guidelines available at [www.mun.ca/hss/ls](http://www.mun.ca/hss/ls).

PR: GERM 2010 or consent of the Head of the Department

**2030 Reading German I** gives training in reading scholarly German for senior undergraduate and graduate students with no previous knowledge of German, for whom this work is recommended or required by other departments or faculties. All sections of this course follow the Language Study Course Guidelines available at [www.mun.ca/hss/ls](http://www.mun.ca/hss/ls).

**2031 Reading German II** is a continuation of Reading German I. In this course an attempt will be made to meet individual requirements. All sections of this course follow the Language Study Course Guidelines available at [www.mun.ca/hss/ls](http://www.mun.ca/hss/ls).

PR: GERM 2030

**2510 Intermediate Composition and Conversation I** - inactive course.

**2511 Intermediate Composition and Conversation II** is a continuation of Intermediate Composition and Conversation I.

OR: includes a 4- week field school in Germany in August, which lengthens the time frame for the course by approximately two weeks

PR: GERM 1001 and consent of the Head of the Department

**2900 Introduction to German Culture I** is a study of the major cultural trends and movements of German-speaking Europe to the beginnings of the modern age. Lectures are given in English.

**2901 Introduction to German Culture II** is a study of the major cultural trends and movements of German-speaking Europe in the modern age. Lectures are given in English.

**3000 German Film I** is a survey of German film from the beginnings to 1945.

**3001 German Film II** is a survey of West German film from 1945 to 1990.

**3002 Post-Wall Cinema** is a study of German cinema from 1990 to the present. It addresses a number of issues that are clearly identified with a post-Wall, unified Germany, such as German unification itself, the new German comedy of the 1990's, the transnationalization of German cinema, the treatment of the Nazi and the Communist past, the rediscovery of the social as a narrative focus, and on the evolving cinematographic directions taken by contemporary German film. The movies are subtitled and lectures and readings are in English.

**3003 DEFA The Cinema of East Germany** is an examination of East German cinema through its feature films addressing issues in the context of Germany's divided status and its split screen from 1946 to 1990.

**3004-3009 Special Topics in German Studies I** will have topics to be studied announced by the Department.

**3005 West to East: Aspects of the German Intellectual Influence on Russia** (same as History 3005 and Russian 3005) examines the fluidity of ideas across geo-political borders, languages and cultures, by exploring how the German intellectual discourse was received and reinterpreted by Russians in their literary, artistic and cultural dialogue. Ideas about the Romantic Hero become conflated with theories involving the Will, the Nietzschean Superman and the Proletarian Revolutionary, personified and embodied in what some scholars characterize as political/cultural Gods (Lenin, Stalin, Hitler).

CR: History 3005, Russian 3005

**3010 Advanced German I** aims at a high level of accomplishment in German pronunciation, composition and translation through practice in the spoken language, written exercises and the reading of more advanced literary material. All sections of this course follow the Language Study Course Guidelines available at [www.mun.ca/hss/ls](http://www.mun.ca/hss/ls).

PR: GERM 2010 and 2011

**3011 Advanced German II** is a continuation of Advanced German I. All sections of this course follow the Language Study Course Guidelines available at [www.mun.ca/hss/ls](http://www.mun.ca/hss/ls).

PR: GERM 3010 or consent of the Head of the Department

**3510 Advanced Composition and Culture** aims to increase accuracy and fluency in written and spoken German with emphasis on culture. All sections of this course follow the Language Study Course Guidelines available at [www.mun.ca/hss/ls](http://www.mun.ca/hss/ls).

OR: includes a 4- week field school in Germany in August, which lengthens the time frame for the course by approximately two weeks  
PR: GERM 1001 and consent of the Head of the Department

**3511 Advanced Composition and Conversation** aims to increase accuracy and fluency in written and spoken German with emphasis on grammar review. All sections of this course follow the Language Study Course Guidelines available at [www.mun.ca/hss/ls](http://www.mun.ca/hss/ls).

OR: includes a four week field school in Germany in August, which lengthens the time frame for the course by approximately two weeks  
PR: GERM 1001 and consent of the Head of the Department

**3900 Survey of German Literature I** is a study of the chief periods of German literature based on works of representative authors. A general survey from the earliest works to 1750.

PR: GERM 2011 or the consent of the Head of Department

**3901 Survey of German Literature II** is a study of the chief periods of German literature based on works of representative authors. A general survey from 1750 to the present.

PR: GERM 2011 or the consent of the Head of Department

**3911 Faust and the Magus Tradition** - inactive course.

**3912 Modern German Literature in Translation I (Pre-1945)** is a study of the works of some major modern German authors. Lectures and readings in English.

**3913 Modern German Literature in Translation II (Post-1945)** is a study of the works of some major modern German authors. Lectures and readings in English.

**3914 German Women Writers in English Translation** studies representative works by prominent German, Austrian, and Swiss women writers from the 19th-century to the present day, their place in German literary history, and the impact of their individual voices.

PR: the former Women's Studies 2000 or permission of the Department Head

**3915 National Socialist Ideology and Culture** examines German culture within the context of National Socialist era. Special attention will be focussed on how language, art and literature were used in National Socialist propaganda.

**4000 German Literature of the Eighteenth Century I** - inactive course.

**4001 German Literature of the Eighteenth Century II** is a study of the historical and cultural background of the eighteenth century, of Storm and Stress and Classicism. Reading and discussion of representative works with emphasis on Goethe and Schiller. Taught in German.

PR: GERM 3011 or the consent of the Head of Department

**4010 Advanced Stylistics I** is specialized study of the more complex areas of German grammar, style, and idiomatic usage, involving intensive practice in composition and oral expression, and focussed on detailed work with contemporary cultural materials such as newspapers, television, and film. This course is taught in German. All sections of this course follow the Language Study Course Guidelines available at [www.mun.ca/hss/ls](http://www.mun.ca/hss/ls).

PR: GERM 3011 or the consent of the Head of Department

**4011 Advanced Stylistics II** is a continuation of Advanced Stylistics I. This course is taught in German. All sections of this course follow the Language Study Course Guidelines available at [www.mun.ca/hss/ls](http://www.mun.ca/hss/ls).

PR: GERM 4010 or consent of the Head of the Department.

**4100 German Literature of the 19th Century I** is a study of the leading exponents of nineteenth-century literature, including the background of Romanticism and the young Germany movement. Taught in German.

PR: GERM 3011 or the consent of the Head of Department

**4101 German Literature of the 19th Century II** is a study of the leading exponents of nineteenth-century literature, including the background of Poetic Realism and Naturalism. Taught in German.

PR: GERM 3011 or the consent of the Head of Department

**4200 German Literature of the Twentieth Century I** traces the important literary movements up to 1945, using a number of representative authors. Reading of selected dramas, novels, poems and short stories. This course is taught in German.

PR: GERM 3011 or the consent of the Head of Department

**4201 German Literature of the Twentieth Century II** traces the important post 1945 literary movements, using a number of representative authors. Reading of selected dramas, novels, poems and short stories. This course is taught in German.

PR: GERM 3011 or the consent of the Head of Department

**4300 Middle High German Language and Literature I** - inactive course.

**4301 Middle High German Language and Literature II** - inactive course.

**4400 Early Modern German Literature I** - inactive course.

**4401 Early Modern German Literature II** - inactive course.

**4802-4825 Special Topics in German Studies II** will have topics to be studied announced by the Department.

**4998 Comprehensive Examination for Honours Students** is the comprehensive examination required for honours students.

**4999 Honours Essay for Honours Students** is required as part of the Honours program.

PR: admission to the Honours program

## 12.13.1 Russian

In accordance with Senate's *Policy Regarding Inactive Courses*, the course descriptions for courses which have not been offered in the previous three academic years and which are not scheduled to be offered in the current academic year have been removed from the following listing. For information about any of these inactive courses, please contact the Head of the Department.

The Department offers several courses in Russian during the Spring/Summer Semester. See the Departmental web page at [www.mun.ca/german/russian/course\\_descriptions.php](http://www.mun.ca/german/russian/course_descriptions.php) for details on the Russian Summer Program.

Russian courses are designated by RUSS.

**1000 Elementary Russian I** provides an introduction to Russian grammar and a basic knowledge of the spoken and written language. All sections of this course follow the Language Study Course Guidelines available at [www.mun.ca/hss/ls](http://www.mun.ca/hss/ls).

**1001 Elementary Russian II** is a continuation of Elementary Russian I. All sections of this course follow the Language Study Course Guidelines available at [www.mun.ca/hss/ls](http://www.mun.ca/hss/ls).

PR: RUSS 1000 or equivalent

**2010 Intermediate Russian I** continues RUSS 1000/1001 including more complex concepts of basic grammar and introducing Russian texts from literature and newspapers. All sections of this course follow the Language Study Course Guidelines available at [www.mun.ca/hss/ls](http://www.mun.ca/hss/ls).

PR: RUSS 1000 and 1001 or equivalent

**2011 Intermediate Russian II** is a continuation of Intermediate Russian I. All sections of this course follow the Language Study Course Guidelines available at [www.mun.ca/hss/ls](http://www.mun.ca/hss/ls).

PR: RUSS 1000 and 1001 or equivalent

**2030 Russian for Reading I** is designed to foster a reading knowledge of Russian relevant to professional, business or academic disciplines. It is intended for senior undergraduate or graduate students, as well as professional and business people. No previous knowledge of Russian is required. All sections of this course follow the Language Study Course Guidelines available at [www.mun.ca/hss/ls](http://www.mun.ca/hss/ls).

**2031 Russian for Reading II** is a continuation of Russian for Reading I. All sections of this course follow the Language Study Course Guidelines available at [www.mun.ca/hss/ls](http://www.mun.ca/hss/ls).

PR: RUSS 2030 or 1001, or permission of the Head of the Department

**2510 Intermediate Composition and Conversation I** is an intensive course which focuses on improving vocabulary and fluency in speaking and writing Russian. All sections of this course follow the Language Study Course Guidelines available at [www.mun.ca/hss/ls](http://www.mun.ca/hss/ls).

**2511 Intermediate Composition and Conversation II** is a continuation of RUSS 2510 including more complex concepts. All sections of this course follow the Language Study Course Guidelines available at [www.mun.ca/hss/ls](http://www.mun.ca/hss/ls).

**2600 Russian Literature in Translation: Nineteenth Century** is a study of selected works of Russian authors including Pushkin, Lermontov, Gogol, Turgenev, Tolstoy, Dostoyevsky, Chekhov.

**2601 Russian Literature in Translation: Twentieth Century** is a study of selected works of Russian authors of the pre-revolutionary, Soviet and post-Soviet periods.

**2900 Russian Culture I** is a study of the evolution of Russian culture and Russian intellectual history up to 1917. Lectures include discussions of Russian art, music and film. Lectures are given in English.

**2901 Russian Culture II** is a study of the evolution of Russian culture in the USSR and the post-Soviet period. Lectures include discussions of Soviet Russian art, music and film. Lectures are given in English.

**3000-3009 (Excluding 3003 and 3005) Special Topics in Russian Studies** will deal with topics as announced by the Department.

**3003 Russian and Soviet Film Until 1948** begins with the origins of film in

Russia in the late imperial era, and then proceeds to follow the development of film in Russia and the Soviet Union until the death of Sergei Eisenstein following World War II. Our focus is on a selection of artistically, culturally, and politically important films from this period.

UL: may not be used as part of the Faculty of Humanities and Social Sciences requirement of 6 credit hours in a second language

**3005 West to East: Aspects of the German Intellectual Influence on Russia** (same German 3005 and History 3005) examines the fluidity of ideas across geo-political borders, languages and cultures, by exploring how the German intellectual discourse was received and reinterpreted by Russians in their literary, artistic and cultural dialogue. Ideas about the Romantic Hero become conflated with theories involving the Will, the Nietzschean Superman and the Proletarian Revolutionary, personified and embodied in what some scholars characterize as political/cultural Gods (Lenin, Stalin, Hitler).

CR: German 3005, History 3005

**3010 Advanced Russian I** is an advanced study of literary texts, grammar, composition and translation with practice in the spoken language. All sections of this course follow the Language Study Course Guidelines available at [www.mun.ca/hss/ls](http://www.mun.ca/hss/ls).

PR: RUSS 2010 and 2011

**3011 Advanced Russian II** is a continuation of Advanced Russian I; emphasis is placed on advanced grammar and reading of selected texts from Russian short stories, magazines and newspapers. All sections of this course follow the Language Study Course Guidelines available at [www.mun.ca/hss/ls](http://www.mun.ca/hss/ls).

PR: RUSS 2010 and 2011

**3023 Post-Stalin Russia: Media and Film** is an examination of contemporary Russian visual media with attention to the cultural discourse concerning Russian history and cultural identity.

**3900 Survey of Russian Literature I** - inactive course.

**3901 Survey of Russian Literature II** is a continuation of RUSS 3900.

PR: one of RUSS 2011, 2511, 3011, or permission of the Head of the Department

**3910 Post Perestroika Russia** explores contemporary issues concerning the changes (artistic, political, cultural, economic) and sense of rediscovery in modern Russia in the context of works by present-day writers.

**4001-4010 (Excluding 4002) Special Topics in Russian** will deal with topics as announced by the Department.

**4002 Giants of Soviet Cinema** focuses on the oeuvres of one or two directors, or a movement or era within Soviet Cinema. Students will examine films closely according to their artistic structures and historical contexts, applying a broad range of classic readings on film theory to help inform analysis.

**4100 Russian Literature of the Nineteenth Century I** - inactive course.

**4101 Russian Literature of the Nineteenth Century II** - inactive course.

**4200 Russian Literature of the Twentieth Century I** - inactive course.

**4201 Russian Literature of the Twentieth Century II** - inactive course.

**4800 Special Topics in Russian Studies I** will deal with topics as announced by the Department.

**4801 Special Topics in Russian Studies II** will deal with topics as announced by the Department.

## 12.14 Greek

For Greek course descriptions see under **Classics**.

## 12.15 Greek and Roman Studies

For Greek and Roman Studies course descriptions see under **Classics**.

## 12.16 History

In accordance with Senate's *Policy Regarding Inactive Courses*, the course descriptions for courses which have not been offered in the previous three academic years and which are not scheduled to be offered in the current academic year have been removed from the following listing. For information about any of these inactive courses, please contact the Head of the Department.

History courses are designated by HIST.

**1009 Themes in Ancient and Medieval History** will introduce students to

the methodology of studying ancient and/or medieval history through a close examination of textual and material remains. The course will be taught around a particular theme and/or historical period each year.

CR: cannot receive credit for more than two first-year courses in History

**1010 Themes in the Age of Expansion** is a thematic examination of European interaction with the North Atlantic and the Americas from the voyages of discovery to the independence movements of the Americas.

CR: cannot receive credit for more than two first-year courses in History

**1011 Themes in Modern European History** is a thematic examination of the political, economic, social and cultural developments in Europe and the wider world from the French Revolution to World War I.

CR: cannot receive credit for more than two first-year courses in History

**1012 Themes in Twentieth Century World History** will examine some of the major themes in twentieth century world history after 1914.

CR: cannot receive credit for more than two first-year courses in History

**1013 Themes in Canadian History** will examine the historical context for various contemporary problems being experienced by Canadians.

CR: cannot receive credit for more than two first-year courses in History

**1014 Themes in United States History** will examine several historical themes or problems in the history of the United States.

CR: cannot receive credit for more than two first-year courses in History

**1015 Themes in Social and Cultural History** introduces students to early modern western history (1500 - 1800) through the study of original texts. It will combine lectures on the historical background to the texts, discussion of them and analysis of their meanings in assigned essays.

CR: cannot receive credit for more than two first-year courses in History

**1016 Themes in Aboriginal History** will examine selected themes and issues in North American Aboriginal history.

CR: cannot receive credit for more than two first-year courses in History

**1300 Critical Reading and Writing About Borders and Peripheries** introduces students to reading and writing skills required for success in university, including the analysis of scholarly literature and primary sources. Significant class time is spent on instruction in these skills. Students practice analytical reading and writing through class discussion and assignments related to the theme of borders and peripheries. Material covered varies by instructor; for more specific information see the department website. All sections of this course follow Critical Reading and Writing Course Guidelines available at [www.mun.ca/hss/crw](http://www.mun.ca/hss/crw).

**1301 Critical Reading and Writing About Historical Encounters** introduces students to reading and writing skills required for success in university, including the analysis of scholarly literature and primary sources. Significant class time is spent on instruction in these skills. Students practice analytical reading and writing through class discussion and assignments related to the theme of historical encounters. Specific material covered varies by instructor; for more specific information see the Department website. All sections of this course follow Critical Reading and Writing Course Guidelines available at [www.mun.ca/hss/crw](http://www.mun.ca/hss/crw).

**2000 Quantitative Reasoning: Visualising the Past** introduces students to the ways we understand the complexities of the past and explain it to others. Students in this history course undertake quantitative analysis of standard nominal series used in social history. They learn how to link these diverse sources in order to construct a composite whole and how to effectively present this to a general public using graphic and pictorial evidence. All sections of this course follow Quantitative Reasoning Course Guidelines available at [www.mun.ca/hss/qr](http://www.mun.ca/hss/qr).

**2020 Ancient Near Eastern History** (same as Classics 2025) is an introduction to the history of ancient city-states, kingdoms and empires in Egypt and/or Mesopotamia, including economic, social, political and cultural developments.

CR: Classics 2025

**2031 Ancient Asian History** is a study of the history of ancient India and/or China and/or Japan with emphasis on the way of life of the people, their customs, traditions, art and heritage.

**2034 History of the Hellenistic World** (same as Classics 2020) is a survey of the history of the Mediterranean world and the Near East from the death of Alexander the Great in 323 BC until the incorporation of the Kingdom of Egypt in the Roman Empire in 30 BC. Particular attention is given to the influence of the new monarchies on political, social and cultural developments in both Greek and non-Greek communities.

CR: Classics 2020

**2035 History of Classical Greece** (same as Classics 2035) is a survey of Greek history from the Bronze Age to the death of Alexander the Great, with special reference to the social and political institutions of the fifth century B.C.

CR: Classics 2035

**2041 History of the Roman Republic** (same as Classics 2041) is a survey

of Roman history from the early monarchy to the death of Julius Caesar, with special reference to the society and politics of the late Republican period.

CR: Classics 2041, the former Classics 2040, the former HIST 2040

**2042 History of the Roman Empire** (same as Classics 2042) is a survey of Roman history from the death of Julius Caesar to the rise of Constantine, with special reference to the society and politics of the early Imperial period.

CR: Classics 2042, the former Classics 2040, the former HIST 2040

**2050 Medieval Middle East** provides an introduction to the medieval Middle East (330-1453). Students will examine the Byzantine Empire, the Sasanian Empire, and the various Islamic Empires, as well as the minority groups living under these empires, including the Coptic, Armenian, and Syriac communities.

**2060 History of War and Society to 1789** (same as the former HIST 3050) is a survey of major developments in the history of warfare from the earliest times to 1789 with particular emphasis on changes in the nature and conduct of warfare, the evolution of military thinking, the organization of military and naval forces, the impact of technological change, the emergence of professionalism, societies, and armed forces.

CR: the former HIST 3050

**2065 History of War and Society from 1789 to the Present** (same as the former HIST 3060) is an examination of those major developments which have affected the nature and conduct of warfare in the period since 1789, with particular emphasis on the evolution of military thinking, the impact of technology on organization and planning, the role of air power, the civil-military relationship, professionalism in the armed forces, and the changing nature of warfare, the emergence of total war, global war, guerrilla warfare, and limited warfare.

CR: the former HIST 3060

**2110 North Atlantic History Since 1820** - inactive course.

**2130 Seafaring Places and Seafaring Peoples** is a study of the places and people involved in maritime activities between Europe and Asia and in India, south-east Asia, China and Japan during the period of European expansion to the region.

**2140 The Atlantic Slave Trade** is a comparative survey of the Transatlantic Slave Trade 1503-1851, from West African origins through the oceanic Middle Passage to the formation of slave societies in the Americas. This course examines processes of enslavement, commodification, shipboard resistance, sale and adaptation, and the international movement to abolish the slave trade.

**2200 Making Canada** is a survey of Canadian History to Confederation, 1867.

**2210 Modern Canada** is a survey of Canadian history since Confederation.

**2300 Early Modern European History, 1500-1789** is an introduction to the main issues and problems in early modern European history with an emphasis on the political, social, economic and cultural developments from the sixteenth to the eighteenth century.

**2310 Europe in the Nineteenth Century, 1789-1914** is a survey of the economic, social, political and cultural developments of Europe from 1789-1914.

**2320 Medieval Europe to the Eleventh Century** (same as Medieval Studies 2001) is a survey of the economic, social, political and cultural developments of the early Middle Ages.

CR: the former HIST 2030, Medieval Studies 2001

**2330 Medieval Europe Since the Eleventh Century** (same as Medieval Studies 2002) is a survey of the economic, social, religious, political and cultural developments of Europe in the high and late Middle Ages.

CR: the former HIST 2030, Medieval Studies 2002

**2340 European Urban History** examines the development of urban networks and the growth of specific towns and cities in early modern and modern Europe. We will also study how these centres were perceived, and the roles of public spaces and public festivals. Much of this course is devoted to examining the conditions found in urban centres and the impact on local inhabitants. The course concludes with a study of nineteenth century urban boosterism.

PR: at least 3 credit hours in History

**2350 Europe in the Twentieth Century** examines social, economic, and political changes from 1918 to the present including the collapse of monarchies, the emergence of mass politics, fascism and totalitarianism, World War II, postwar reconstruction and the welfare state, European integration, and Europe in the postwar economic and political order. The course will examine Britain, France, Germany, and Italy, and particularly the European Union. Special attention will be paid to the demise of class politics and the impact of postwar affluence.

CR: the former European Studies 2000, the former Political Science 2350, the former Political Science 2990

**2500 The Twentieth Century I** is a study of the world-wide impact of the main events and developments in the age of global interdependence.

CR: the former HIST 3700

**2510 The Twentieth Century II** is an historical analysis of the main issues in the contemporary world since 1945.

CR: the former HIST 3710

**2600 History of the United States of America to 1865** is a survey of the history of the United States of America from its colonial origins to the end of the Civil War.

CR: the former HIST 3230

**2610 History of the United States of America Since 1865** is a survey of the history of the United States of America since the Civil War.

CR: the former HIST 3240

**2665 Sickness and Health in Western Society** examines changing understandings of disease causation and how the human body functions, the evolution of formal medical education, and the rise of medical institutions. Examples of fine art, literature, and popular culture will be integrated into lectures and seminars to help provide a comprehensive overview of what it has been like to be ill and well over the last three millennia.

**2760 Women's History: The Gendered Past** - inactive course.

**2800 Indigenous Peoples and Colonialism** is a comparative survey of Indigenous experiences with colonialism in a global context from the sixteenth century onwards.

**3000 Medieval Books** (same as English 3002, Medieval Studies 3000, Religious Studies 3000) is an examination of the development and role of the manuscript book during the Middle Ages. Topics covered will include book production and dissemination; authors, scribes and audiences; and various kinds of books (e.g. glossed Bibles, anthologies, books of hours, etc.) and their uses.

CR: English 3002, Medieval Studies 3000, Religious Studies 3000

**3005 West to East: Aspects of the German Intellectual Influence on Russia** - inactive course.

**3011-3019 Special Topics in Ancient and Medieval History** are specialized studies in Ancient and Medieval history. Topics to be studied will be posted on the Department of History website.

CR: credit may be obtained for only one of HIST 3016 and HIST 3803

**3020 Art, Architecture and Medieval Life** - inactive course.

**3030 Environmental History** examines the history of human relationships to the natural environment. The focus of the course is the history of environmental changes caused by humans, and the influence of the natural environment on human cultures and societies. Case studies will focus on issues with broad relevance to contemporary environmental issues such as energy use, the environmental impact of military conflict, species introductions, natural disasters, urban sustainability, ecological restoration, and the origins of environmentalism.

**3110 History of Newfoundland to 1815** studies the growth of settlement and the manner in which a 'migratory' fishery carried on from England and Ireland changed into a 'sedentary' fishery carried on by residents of Newfoundland.

**3120 Modern Newfoundland Since 1815** examines the establishment and development of political institutions, changes in economic structure and the growth of populations.

**3200 Women and the Law in Newfoundland History** - inactive course.

**3270 Christianity and the Roman Empire** (same as Classics 3270 and Religious Studies 3270) is a study of the relationship between Christianity and the Roman Empire from the first to the fourth century.

CR: Classics 3270, Religious Studies 3270

**3360 Revolutionary and Soviet Russia** - inactive course.

**3370 German History I, to the Mid-Nineteenth Century** examines the history of the peoples and states of the Holy Roman Empire of the German nation and the Germanic Confederation with emphasis on the origins of modern Germany.

**3380 German History II, Since the Mid-Nineteenth Century** examines the history of German-speaking central Europe with special reference to the evolution of modern Germany since the mid-nineteenth century.

**3440 History of the British Empire and Commonwealth Since 1815** - inactive course.

**3450 Tudor and Stuart Britain, 1485-1714: Reformation, Renaissance, and Revolution** examines a dynamic period of religious, cultural and political change.

**3460 British History Since 1714** examines British history from the accession of the Hanoverians to the welfare state.

**3480 History of Ireland, 1603 to the Great Famine** is a survey of Irish history from Hugh O'Neill's submission to the English in 1603 to the mid-nineteenth century disaster of the Great Famine.

**3490 History of Ireland Since the Great Famine** is a survey of Irish history from the mid-nineteenth century to the present.  
CR: the former HIST 3470

**3520 Aboriginal History to 1763** (same as Archaeology 3520 and the former Anthropology 3520) examines Aboriginal history in North America from before European contact to the Royal Proclamation in 1763. Particular attention will be paid to historical encounters framed by first contacts, cultural exchange, trade, disease, religious encounters, conflict and diplomacy, and territorial encroachment.  
CR: Archaeology 3520, the former Anthropology 3520

**3525 Aboriginal History From 1763** (same as Archaeology 3525 and the former Anthropology 3525) examines the history of Aboriginal peoples in North America from 1763 to the twentieth century. Particular attention will be paid to Indigenous-settler relations, including Aboriginal policies, military encounters and diplomacy, expansion and removals, education, treaties, and politicization.  
CR: Archaeology 3525, the former Anthropology 3525

**3535 Historical Anthropology** (same as the former Anthropology 3584 and Archaeology 3584) will explore selected issues in historical anthropology, with special reference to the Mediterranean and North Atlantic worlds. Students will read specific case studies in order to explore the theoretical issues raised by the attempt to understand historically-documented past cultures. In order to give practical examples of methodology classes will analyse primary source material. Students will be introduced to the textual analysis of myth and legal records, to the interpretation of images and to the analysis of patterns in material culture. The course will consider specific current interpretive issues, particularly the rise of individualism, the consumer revolution and the cultural construction of gender.  
CR: the former Anthropology 3584, Archaeology 3584

**3536 Object Lessons: Putting Strange Things in Context** (same as Archaeology 3536) explores the interpretation of unique objects, especially those which have been separated, in some way, from their historical context or archaeological assemblage. Students will take a multi-disciplinary approach to understanding a specific remarkable artifact. Topics include the history of technology, the emergence of art, the invention of tradition and the role of design in industrial societies.  
CR: Archaeology 3536

PR: it is recommended but not obligatory, that students should have successfully completed one of the following courses: Archaeology 1030, Classics 1100 or 1200, Folklore 1000, HIST 1010 or 1011

**3560 A History of Human Rights** - inactive course.

**3570 The Modern Middle East** is an examination of the peoples and states of the Middle East and their interaction with each other and with the great powers since the mid-nineteenth century.

**3582 Historical Archaeology** (same as Archaeology 3582, the former Archaeology 2582, and the former History 2582) will introduce students to historical archaeology, with special reference to the North Atlantic, 1000 to 1900 AD. The archaeology of specific sites will be examined in order to raise issues about theory and method. Students will be introduced to paleography; historic maps; documentary archaeology; the survey, excavation and analysis of complex sites; material culture and subsistence studies; cultural resource management and theoretical approaches including historical anthropology, ethnohistory, world systems and consumer studies.  
CR: Archaeology 3582, the former Archaeology 2582, the former History 2582, the former History 3530  
PR: Archaeology 1030

**3585 Africa Since 1800** examines the history of SubSaharan Africa from the eve of colonialism until the post-independent contemporary era.

**3590 The Early Modern Caribbean** examines the history of the Caribbean region in the period 1492-1848, addressing topics such as comparative labour systems, slave resistance, colonial societies, plantation landscapes, and environmental change.

**3600 Industrial Revolutions of the Eighteenth and Nineteenth Centuries** - inactive course.

**3640 War and Society in Colonial North America** examines the struggle for empire and nationhood from the arrival of Europeans to the withdrawal of British forces from Canada in 1870. The course will take a comparative approach to examining war's effect on social, economic, and political developments in what is now Canada, focusing on specific conflicts and themes such as the struggle for empire, the military as an institution, gender, class, ethnicity, and memory.

**3641 War and Society in Modern Canada** - inactive course.

**3660 The Scientific Revolution** - inactive course.

**3665 Death, Disease and Medical Care in Early Modern and Modern Europe** - inactive course.

**3675 Navies and Societies Since 1650** is an examination of the rise of modern navies since 1650 that places navies and naval decisions within broader national and international political, economic and social contexts.  
CR: the former HIST 3822

**3680 North Atlantic Seafaring to 1850** examines the maritime mercantile development of the countries on the Atlantic littoral, 1650-1850.

**3690 North Atlantic Seafaring Since 1850** - inactive course.

**3710-3729 (Excluding 3713, 3728) Special Topics in British History** are available only as part of the Harlow Campus Semester.

**3740-3750 (Excluding 3747, 3748) Studies in Modern Social and Intellectual History** are selected studies in the history of modern ideas and society. Aspects to be studied will be posted on the Department of History website.

**3765 Gendered Indigenous History** - inactive course.

**3780 Women in Medieval Europe, 500-1500** uses a wide variety of primary and secondary sources to examine medieval women in their social, political, cultural, and religious contexts to understand women's lives in this important millennium of the European past.

**3785 The European Family: The Age of Faith to the Welfare State** focuses on the family in Europe from the middle ages to the early twentieth century. Topics examined will include: family structure, kinship, demography, sexuality, gender relations, child-rearing, attitudes towards the elderly and care of them, and the place of the family in the larger community.  
CO: at least 3 credit hours in history at the 2nd-year level, or permission of the instructors  
PR: at least 3 credit hours in history at the 2nd-year level, or permission of the instructors

**3790 Reel American History: United States History through its Films, 1895-1945** interprets narrative films as historical evidence to shed light on shifts in American culture and society during the first half of the twentieth century.

**3795 Reel American History: United States History through its Films Since WWII** interprets narrative films as historical evidence to shed light on shifts in American culture and society during the second half of the twentieth century.

**3800-3830 (Excluding 3801, 3806, 3807, 3813, 3821, 3822) Contemporary Problems in Historical Perspective** is an analysis of developments leading to a contemporary issue or problem selected each year or semester. Aspects to be studied will be posted on the Department of History website.  
CR: credit may be obtained for only one of HIST 3016 and HIST 3803

**3801 History of Modern Revolutions** examines theoretical and thematic approaches to the study of revolution. The class will study some of the major political revolutions of the twentieth century and also explore the causes and consequences of various social, cultural, and economic upheavals such as the student revolts of the 1960s and the sexual revolution. There will be a discussion on how the way in which historians have studied revolutions has changed during the past half century.

**3806 Titanic Histories** investigates the 'unsinkable ship', its passengers, crew and owners, and the dilemmas its loss has created for over a century. Students will examine how present-day understandings of the past are expressed in the multiple ways and diverse forms of treating the Titanic.

**3807 World War I in Historical Perspective** takes a global approach to the history of the First World War, emphasizing events on the battlefield and the effects of war on various societies.

**3813 Gendered History: Women in Newfoundland and Labrador** examines the experiences of women in Newfoundland and Labrador with an emphasis on the nineteenth and twentieth centuries. It explores the interaction of women's lives and the province's social, political and economic history. Topics to be covered include work (paid and unpaid); childbearing and child rearing; immigration and emigration; political activity; and legal status.

**3821 Gender in Canadian History** examines the experiences of women and men and the construction of gender identities through themes such as sexuality, moral reform, immigration, racial/ethnic identity, indigeneity, and participation in the workforce.

**3840 Historical Methods** is an introduction to the methods and practices of history in the modern era. This course is compulsory for Majors and Honours students, including those intending to apply for graduate studies.  
CR: the former HIST 4801

PR: 12 credit hours in History

**3860 Vernacular Architecture** - inactive course.

**3870 An Introduction to the History of Western Architecture Since the Renaissance** (same as Folklore 3870) introduces students to the history of architecture in the western world, beginning with the revival of classical forms in Renaissance Italy.

CR: Folklore 3870

**3925 The Pre-Islamic Empires of Iran** - inactive course.

**3930 Byzantine History to 1453** will introduce students to the history of Byzantine society from its beginnings under Constantine to the fall of Constantinople to the Turks in 1453. In addition to the chronological history, students will also encounter several characteristics of Byzantine society, including religion, urbanization, and interaction with the Persian Empire.

**3935 Islamic History to 1453** will introduce students to the history of Islamic society from its beginnings under Muhammad to the rise of the Ottomans and the fall of Constantinople in the fifteenth century. We will also discuss the non-Muslim communities which co-existed with the Muslim umma or community. Through the use of primary source material, students will be introduced to the types of historical sources available for Islamic history, as well as the problems associated with this evidence.

PR: there is no prerequisite for this course although History 2050 is strongly recommended

**4000-4010 (Excluding 4003, 4009, 4010) Special Topics in Ancient and Medieval History** are specialized studies in Ancient and Medieval history. Aspects to be studied will be posted on the Department of History website.

**4003 Religion and Society in the Late Antique and Early Medieval Periods** examines a range of written and physical evidence for the interaction of religion and society in the late antique and early medieval world. This course will cover the broad topic of religion and society through an in-depth analysis of the historiography and material culture of the late antique and early medieval period.

**4009 Death and the Afterlife in the Middle Ages** examines medieval ideas of what happens at and after death, starting from the premise that such ideas have great influence upon how people live their daily lives. It will look at the theology of death, ideas of heaven, hell, and purgatory, as well as conceptions of death and the afterlife in the popular culture, architecture, literature, etc., of European Christendom.

**4010 Cultural Interaction in the Medieval Middle East** examines the origins of Muslim-Christian relations in the Middle East through an examination of the effect of the arrival of Islam on the communities of Iraq, Iran, and the Levant, as well as the Byzantine reaction to Islam.

**4100 History and Memory** - inactive course.

**4110-4130 (Excluding 4125) Special Topics in North Atlantic History** are specialized studies in the history of the North Atlantic. Aspects to be studied will be posted on the Department of History website.

**4125 The History of Environmental Ideas in Canada and the United States** surveys major philosophical, scientific, and popular ideas of nature in Canada and the United States during the nineteenth and twentieth centuries. Students will examine key historical manifestations of environmental thought such as romanticism, the wilderness idea, ecofeminism, deep ecology, and social ecology. Students will also be exposed to important voices from social groups who are often marginalized in environmental debates such as African-Americans, Aboriginal people, and the working class.

**4200 Topics in United States Film and History** explores selected themes in the relationship between the American cinema and American national culture. Topics will vary from year to year, but may include the study of a particular period in U.S. film and history; an examination of how filmic representations of race, class, gender, and/or sexuality have changed over time in connection to broader historical shifts; or, the historical analysis of a particular genre as a way to understand shifting cultural and social values within the United States.

PR: any 2000, 3000, or 4000 level course in U.S. History or Film Studies

**4210-4229 (Excluding 4212, 4213, 4214, 4216, 4219, 4222) Special Topics in North American History** are specialized studies in the history of North America. Aspects to be studied will be posted on the Department of History website.

**4212 The North American Frontier** examines aspects of the history of the frontier in North America. The course will focus on major themes and debates in frontier history, including, but not limited to, the history of colonialism, settlement, and Aboriginal-settler relations.

**4213 Topics in U.S.-Canadian Relations** explores selected themes in U.S.- Canadian relations. Beyond considering the more 'formal' ties between Canada and the United States from a historical perspective, such as military and diplomatic interactions, this seminar examines social and cultural interrelationships.

**4216 Topics in U.S. Cultural History** explores selected themes in U.S. cultural history. Topics will vary from year to year, but may include historical approaches to such popular art forms as vaudeville, amusement parks, film, popular music, comics, television, gaming, and spectator sports.

**4219 Slavery and Resistance in the Atlantic World** examines the evolution of slavery and other forms of coerced labour in the early modern period.

**4222 North American Aboriginal Peoples in Historical Perspective** - inactive course.

**4230 Special Topics in Newfoundland History I** are specialized studies in the history of Newfoundland to the mid-nineteenth century.

**4231 Special Topics in Newfoundland History II** are specialized studies in the history of Newfoundland since the mid-nineteenth century.

CR: the former Political Science 4731

**4232 Special Topics in Newfoundland History III** - inactive course.

**4240-4260 (Excluding 4252, 4253, 4255) Special Topics in Canadian History** are specialized studies in Canadian history. Aspects to be studied will be posted on the Department of History website.

**4252 Canada and the North** examines the ideas and historical processes that have contributed to the colonization of land and people in the Canadian North. With a primary focus on the territorial north, the course will also analyze the many ways that Dene and Inuit have resisted and adapted to colonial processes. Using film, radio documentaries, and primary documents, this course will consider themes such as pre-contact life, northern militarization, Inuit relocations, development conflicts, and environmental injustices.

**4253 Inequality In Canada since 1945** challenges the conventional wisdom that equality improved in post-war Canada, but declined from the 1970s onwards. It contrasts socio-economic experiences with those of gender, race, nation and sexual orientation. By so doing it raises complex questions about the historical dynamics of identity politics in the making of contemporary Canada.

PR: HIST 2210 or permission of the instructor

**4255 The Industrial Revolution in Canada** examines the historiographical debates on industrialisation in 19th century British North America by critically evaluating representative works by leading historians of English Canada and Quebec. It also introduces the problems and advantages of the historical sources most commonly used to understand industrialisation.

PR: HIST 2200 or HIST 2210 or permission of the instructor

**4310-4330 (Excluding 4330) Special Topics in European History** are specialized studies in the history of Europe. Aspects to be studied will be posted on the Department of History website.

**4330 Aspects of Modern British History: Victorian England** designates an industrial, urban, ostensibly democratic, country in the period when Britain was dominant in the world. 'Victoria' and 'England' are the starting points, however, for a critical examination of those characteristics in this seminar course.

PR: a minimum of two second year History courses, or the permission of the instructor. Students who have not previously studied history beyond first year should consult with the Instructor before registering for this course.

**4360-4380 Special Topics in European History** are available only as part of the Harlow Campus Semester.

**4410-4430 (Excluding 4411, 4419, 4421) Historical Problems** are specialized studies in historical problems. Aspects to be studied will be posted on the Department of History website.

**4411 War and Society in Canada** examines various themes and topics in the military history of Canada, emphasizing the relationship between war and society.

**4419 Marx and Marxism** introduces Marxist thought as a product of revolutionary struggles. Emphasis will be on the nature of the historical circumstances and the concrete problems people faced. Each week there will be a critical examination of selected works produced by and through these struggles.

PR: HIST 2310 or HIST 2350 or permission of the instructor

**4421 Imperialism** examines the political, economic and cultural processes of modern European and American imperialism and its historical antecedents.

**4480 Oral History** (same as Folklore 4480) examines the narratives of everyday people who tell their life experiences. This course focuses on the collection and analysis of oral narratives and how they can be used to illuminate the past. It considers the power of these narratives to shape constructions of the present and future for both narrators and audiences.

CR: Folklore 4480

**4520-4529 Special Topics in Economic and Mercantile History** are specialized studies in Economic and Mercantile history. Aspects to be studied will be posted on the Department of History website.

**4560-4570 (Excluding 4569, 4570) Special Topics in Social and Intellectual History** are specialized studies in Social and Intellectual history. Aspects to be studied will be posted on the Department of History website.

**4570 History of Medicine Seminar** explores the content, methodology, and historiography of the history of medicine. Course readings reflect the broad sweep across time and geography of this field, but emphasize trends in Europe and North America during the last four centuries. Students will examine the evolution of intellectual problems that have occupied historians of medicine; explore the complexities specific to researching and writing medical history; and critique and identify differing historical genres, evidence, primary source materials, and methods.

**4670-4690 (Excluding 4672) Special Topics in Maritime History** are specialized studies in Maritime history. Aspects to be studied will be posted on the Department of History website.

**4672 Seafaring Lives: Sea-going Auto/Biography Since 1700** explores how life stories studied as primary sources lead to a reassessment of historian's traditional assumptions and concerns in this course. Students will research and discuss the changing, and often ambivalent, relationship of people and the sea across three centuries of auto/biographical writing and story-telling.

PR: students who have not previously studied history beyond first year should consult with the Instructor before registering for this course

**4695 The Middle Ages on Film** - inactive course.

**4800 Historiography** is an introduction to the major historians and historiographical traditions of the West. This course is for Honours students and other selected students, including those intending to apply for graduate studies.

PR: permission of the Head of Department

UL: may not be used to meet the requirements of a Major in History without the prior written approval of the Head of the Department of History

**4810 Documents Management** - inactive course.

**4821 Reading Course** is a directed reading course for Honours and selected students including those intending to apply for graduate studies. Readings will be taken from a list of works by historians, or social theorists whose works are related to history.

PR: permission of the Head of Department

UL: may not be used to meet the requirements of a Major in History without the prior written approval of the Head of the Department of History

**4822 Reading Course** is a directed reading course for Honours and selected students. The readings will be chosen in such a way as to supplement a student's knowledge of his/her area of specialization and, where appropriate, to prepare the student for the honours essay. If a student intends to complete HIST 4999, a proposal for the honours essay will be a requirement of the course.

CR: the former HIST 4820

PR: permission of the Head of Department

UL: may not be used to meet the requirements of a Major in History without the prior written approval of the Head of the Department of History

**4830-4850 Reading Courses** are directed reading courses for selected Bachelor of Arts students.

PR: permission of the Head of Department or delegate

**4999 Honours Essay** is required as part of the Honours program.

PR: HIST 4822, admission to the Honours program

UL: may not be used to meet the requirements of a Major in History without the prior written approval of the Head of the Department of History

## 12.17 Italian

For Italian course descriptions see under **French**.

## 12.18 Law and Society

For Law and Society course descriptions see under **Political Science, Law and Society**.

## 12.19 Latin

For Latin course descriptions see under **Classics**.

## 12.20 Linguistics

In accordance with Senate's *Policy Regarding Inactive Courses*, the course descriptions for courses which have not been offered in the previous three academic years and which are not scheduled to be offered in the current academic year have been removed from the following listing. For information about any of these inactive courses, please contact the Head of the Department.

Linguistics courses are designated by LING.

**1100 Introduction to Linguistics** is a general introduction to linguistic concepts which are important for understanding the nature of language and its function for communication. Topics include: languages as structured systems; the systematicity of language change; the classification of languages into families and their geographical distribution; language, the brain, and language disorders; the acquisition of language; and human vs animal communication.

CR: the former LING 2100

**1103 Introduction to Linguistic Analysis: Syntax** (same as the former LING 2103) is an introduction to the study of grammatical patterns in the structure of phrases and sentences. This course provides students with the tools to analyze phrase structure and syntactic constituency in English and other languages. Theoretical topics covered include case theory and agreement, principles of thematic role assignment, and different types of syntactic movement.

CR: the former LING 2103

**1104 Introduction to Linguistic Analysis: Phonology** (same as the former LING 2104) is an introduction to the study of sound patterns in human languages. Basic empirical and theoretical issues in phonology are demonstrated through the analysis of data selected from English and other languages. Theoretical concepts surveyed include phonological features and contrasts, and syllable structure. These are examined through the study of allophony, allomorphy, and processes such as assimilation and neutralization.

CR: the former LING 2104

**1105 The Wonder of Words** (same as the former LING 2105) is an introduction to the structure of words. This course presents methods of linguistic analysis through an in-depth study of English word origins. The French, Latin and Greek origins of technical and scientific words are studied, together with the ways that these words may change in structure, sound, and meaning. The course will also provide an introduction to etymology, to writing systems and transliteration, and to the use of dictionaries.

CR: the former LING 2105; credit may not be obtained for both the former LING 2105 and the former LING 1101

**1155 Linguistics for Language Learners** provides a thorough grounding in the linguistic concepts and terminology involved in university-level second language learning.

CR: LING 1100

**1530 Reading and Writing in Innu-aimun I** - inactive course.

**1531 Reading and Writing in Innu-aimun II** - inactive course.

**2020 Introduction to the Structure of Inuttitut I** - inactive course.

**2021 Introduction to the Structure of Inuttitut II** - inactive course.

**2022 Issues in Oral Inuttitut** reviews the primary role of oral language in communication, language, acquisition and language maintenance in oral Inuttitut. The nature and significance of dialect differences are also discussed. Different types of oral language are examined, e.g. stories, newscasts, conversation. Students study how oral language is used within modern Labrador society and whether language attitudes are reflected in this use. Students also consider how best to teach oral Inuttitut and different ways to test for oral proficiency. This course is intended for fluent speakers of Inuttitut who are planning to complete the Diploma in Native and Northern Education (T.E.P.L.). This course is not normally offered at the St. John's Campus.

PR: LING 2020

**2023 Reading and Writing in Inuttitut** - inactive course.

**2025 Introduction to Inuttitut I** introduces students to Inuttitut (Eskimo). Students develop a working knowledge of basic vocabulary and grammar, as well as a number of linguistic concepts that enable them to consult a wide range of reference books. A strong emphasis is placed on oral skills. This course is intended for students who want to learn an Aboriginal language spoken in Newfoundland and Labrador. All sections of this course follow the Language Study Course Guidelines available at [www.mun.ca/hss/l.s](http://www.mun.ca/hss/l.s).

**2026 Introduction to Inuttitut II** is a continuation of LING 2025. Students learn further vocabulary and grammar of the language. They are also required to submit a project based on their own investigation of some aspect of the grammar of the language (based on either reference books or fieldwork). A strong emphasis is placed on oral skills. This course is

intended for students who want to learn an Aboriginal language spoken in Newfoundland and Labrador. All sections of this course follow the Language Study Course Guidelines available at [www.mun.ca/hss/l.s](http://www.mun.ca/hss/l.s).

PR: LING 2025

**2030 Introduction to Innu-aimun (Montagnais/Naskapi) I** - inactive course.

**2031 Introduction to Innu-aimun (Montagnais/Naskapi) II** - inactive course.

**2040 Introduction to Mi'kmaq I** - inactive course.

**2041 Introduction to Mi'kmaq II** - inactive course.

PR: LING 2040

**2060 Aboriginal Languages of Eastern Canada** is an overview of the aboriginal languages of three language families of Eastern Canada: Eskimo-Aleut (Inuit) and Algonquian (Innu-aimun, Mi'kmaq, Maliseet-Pasamaquoddy and Beothuk) and Iroquoian (Mohawk) with respect to both linguistic structure and current vitality. The course also reviews a history of language suppression and revitalization efforts, within the context of the larger issues of minority language attrition and maintenance, is also considered.

**2210 Language in Newfoundland and Labrador: An Introduction to Linguistic Variation** examines linguistic variation and language change in the languages of Newfoundland and Labrador. Topics covered include the concept of variation within language, both regional and social, the chief causes of such variation, and some of its societal consequences. As a Quantitative Reasoning course, practical workshops and assignments focus on producing a final scientific research report using quantitative analysis, graphical representation of numerical data, and logical reasoning involving numbers. All sections of this course follow Quantitative Reasoning guidelines available at [www.mun.ca/hss/qr](http://www.mun.ca/hss/qr).

UL: may not be used as both a Quantitative Reasoning course and the former Research/Writing

**2212 Language and Gender** (same as the former LING 3212) explores gender, sexuality and language and their relationship to culture, power, performance, interaction, social networks, language change, and language in the school and workplace. The course introduces theoretical perspectives, methodologies, and research findings, from an early focus on gender difference to more recent work on how language helps people create and perform gender and sexuality.

CR: the former LING 3212

**2220 Linguistics and Law** (same as the former LING 3220) is an overview of the many relationships between linguistics and the judicial process. Topics to be covered include: the language of legal texts, and the Plain English movement; language use in legal settings (such as eyewitness testimony, jury instructions, and the language of lawyer-client interactions); the legal disadvantages which language may impose on speakers of minority languages and non-standard dialects; and the emerging discipline of forensic linguistics (which deals with such issues as voice and authorship identification, and linguistic interpretation of evidence).

CR: the former LING 3220

**2300 Philosophy of Language and Mind** (same as Philosophy 2300) is a survey of philosophical thinking about human language and thought, and about how these phenomena relate to the rest of the natural world. Topics covered include the nature of language, the relations between thought and language, and the nature of consciousness.

CR: Philosophy 2300, the former LING 2710, the former Philosophy 2710

**2400 History of the English Language to 1500** - inactive course.

**2401 History of the English Language from 1500 to Modern Times** - inactive course.

**2700-2720 Special Topics in Linguistics** is an introduction to Uncommonly Taught Languages including the following:

**2700 Introduction to Irish Gaelic I** is an introduction to Irish Gaelic I. All sections of this course follow the Language Study Course Guidelines available at [www.mun.ca/hss/l.s](http://www.mun.ca/hss/l.s).

PR: LING 1103 or the former LING. 2103 or LING 1104 or the former LING 2104 is recommended.

**2701 Introduction to Irish Gaelic II** is an introduction to Irish Gaelic II. All sections of this course follow the Language Study Course Guidelines available at [www.mun.ca/hss/l.s](http://www.mun.ca/hss/l.s).

PR: LING 2700 or waiver in special cases by the Head of the Department

**2702 Introduction to Japanese I** is an introduction to Japanese. All sections of this course follow the Language Study Course Guidelines available at [www.mun.ca/hss/l.s](http://www.mun.ca/hss/l.s).

**2703 Introduction to Japanese II** is a continuation of LING 2702. All sections of this course follow the Language Study Course Guidelines available at [www.mun.ca/hss/l.s](http://www.mun.ca/hss/l.s).

PR: LING 2702 or waiver in special cases by the Head of the Department

**2704 Introduction to Japanese III** - inactive course.

**2705 Introduction to Japanese IV** - inactive course.

**2706 Introduction to Japanese V** - inactive course.

**3000 Morphology** is an introduction to the study of word structure, which provides a comprehensive overview of morphological phenomena in a wide variety of languages. Topics include inflection, derivation, morphophonology, and operations which change grammatical functions.

PR: LING 1103 or the former LING 2103 and LING 1104 or the former LING 2104 or waiver in special cases by the Head of the Department

**3100 Syntactic Theory** builds on the basic concepts from LING 1103 and extends them to include cross-linguistic variation from a variety of language families and language types. New topics examined include the foundations of phrase structure, binding theory, phase theory and parametric variation.

PR: LING 1103 or the former LING 2103 or waiver in special cases by the Head of the Department

**3104 Phonetics** provides a thorough grounding in pronouncing, transcribing and acoustically analyzing the sounds of the world's languages. Material covered includes study of the vocal anatomy, phonetic transcription of speech data from both English and a variety of the world's languages, as well as basic concepts of acoustic analysis and speech perception. This involves the close examination of data from many of the world's languages, which illustrates how widely languages can differ in their selection and organization of speech sounds.

PR: LING 1100 or waiver in special cases by the Head of the Department

**3105 Issues in the Acquisition of English and the Adult Learner** - inactive course.

**3150 Bilingualism: Linguistic, Cognitive and Educational Aspects** - inactive course.

**3155 Introduction to Language Acquisition** examines critical issues in language acquisition, in light of the most central theoretical perspectives in this area of research. The course combines experimental evidence from infant speech perception with corpus data documenting speech production abilities in first language learners. Issues in second language acquisition and developmental language disorders are also discussed whenever relevant, and as part of dedicated lectures. Data from different populations of learners and across many different languages serve to illustrate the discussion, whenever relevant.

PR: LING 1100 or the former LING 2100 or waiver in special cases by the Head of the Department

**3201 Phonological Theory** presents terms, concepts, and methods of studying phonological representations and phonological processes. Topics include segmental and prosodic aspects of phonological patterning, including stress, tone, and harmony systems. The course also addresses challenges posed by transparent and opaque interactions between different components of phonological systems. These concepts are exemplified using phenomena observed across natural languages. The course also introduces the basics of constraint-based approaches to phonological theory.

PR: LING 1104 or the former LING 2104 or waiver in special cases by the Head of the Department

**3210 Introduction to Sociolinguistics** introduces the methods and theory underlying current approaches to the relationship between language and society. Topics covered include the concept of variation within language, both regional and social; the linguistic and social causes of such variation; and the means by which societies shape linguistic choices and behaviour.

PR: LING 1100 or the former LING 2100 or LING 2210 or waiver in special cases by the Head of the Department

**3302 History of the French Language** (same as French 3302) is a study of the origins of French, including the influence of Gaulish, Vulgar Latin, Frankish and the langue d'oc/langue d'oïl division, a survey of the dialects, morphology and syntax of Old French and of the evolution from Old to Middle French, including phonology, morphology, syntax and vocabulary.

CR: French 3302

PR: 15 credit hours in French and/or Linguistics at the 2000 level or permission of the Head of the Department; Classics 1120 is strongly recommended

**3310 Phonology and Morphology of French** (same as French 3310) is an examination of the phonological and morphological structure of French. Data from regional and non-standard varieties contrasted with data from standard French: formal rules to deal with observed regularities. Interactions of phonology and morphology in phenomena such as liaison. Derivational and inflectional morphology. Research articles on one or more of the topics dealt with in the course will be assigned as readings, and a written report in French based on one or more of the articles is to be submitted as part of the term work. This course will normally be taught in French.

CR: French 3310

PR: 15 credit hours in French and/or Linguistics at the 2000 level or

permission of the instructor

**3311 Introduction to General Linguistics: Aspects of French Linguistic Theory** (same as French 3311) is a practical examination of the French verbal system, with a thorough exposition of the systems of aspect, voice, tense and mood. The fundamental concepts of linguistics will form the framework of this exposition: the langue/parole distinction and its relationship to underlying and surface entities; language as activity and the generation of surface elements from underlying subsystems. This course will normally be taught in French.

CR: French 3311

PR: 15 credit hours in French and/or Linguistics at the 2000 level or permission of the instructor

**3500 Historical Linguistics** focuses on the genetic relationships between languages, using the comparative method, as well as on language change (as documented in phonetics/phonology, morphology, and syntax). Lexical and semantic change are also investigated, as is the role of language/dialect contact. The course covers the basis for comparative and internal language reconstruction, as well as the typological and genetic classification of languages.

PR: LING 1103 or the former LING 2103 and LING 1104 or the former LING 2104 or waiver in special cases by the Head of the Department

**3850 Introduction to Semantics** examines the foundations of semantics, the study of linguistic meaning. The focus is on sentence-level semantics, involving both lexical meaning and logical/quantificational semantic operations. How do utterances get their meanings? How do we combine simple meanings to create complex ones? How are meanings connected to syntactic structure and intonation? What does context contribute to meaning? Set theory is introduced, as is some formal logic (from propositional logic to a typed lambda-calculus). All sections of this course follow Quantitative Reasoning guidelines available at [www.mun.ca/hss/qr](http://www.mun.ca/hss/qr).

PR: LING 1103 or the former LING 2103 is required or waiver in special cases by the Head of the Department. LING 3000 and 3100 are recommended.

**3950-3960 (Excluding 3951) Special Topics in Linguistics** will have topics to be studied announced by the Department.

**3951 Language Endangerment and Revitalization** provides an introduction to the key issues surrounding the discussion of endangered languages. Causes, consequences, and efforts to reverse the process of decline (language revitalization or maintenance) are examined through consideration of case studies from around the world. Theoretical models developed to evaluate the current status and future prospects of endangered languages are also considered. The course is likely to include substantial discussion of the situation in Canada and the USA.

PR: LING 1100 or the former LING 2100 or waiver in special cases by the Head of the Department

**4010-4091** will focus on the linguistic structure of certain languages, and are designed to provide senior students with the opportunity to be exposed to a substantial part of the grammar of a language other than those regularly offered in the Faculty of Humanities and Social Sciences. One course in this series will be offered each year, subject to availability of instructor.

PR: LING 1103 or the former LING 2103 and LING 1104 or the former LING 2104 or the permission of the instructor

**4050-4054 Linguistic Structure of a North American Aboriginal Language** could study the following languages: Cree, Inuitit (Inuktitut), Innu-aimun (Montagnais/Naskapi), etc.

CR: except where an exemption is supplied by the Head of the Department, a student may not obtain credit for more than one course in the LING 4050-4054 series. Students may not obtain credit for any of the previously offered LING 4010, 4020, 4021, 4030, 4031, 4040, 4041 in addition to a course in the LING 4050-4054 series.

PR: LING 1103 or the former LING 2103 and LING 1104 or the former LING 2104 or the permission of the instructor

**4055-4059 Linguistic Structure of an Uncommonly Taught Language** provides instruction about the grammar, pronunciation, and literary and/or oral tradition of a language which is not regularly taught

CR: except where an exemption is supplied by the Head of the Department, a student may not obtain credit for more than one course in the LING 4055-4059 series. Students may not obtain credit for any of the previously offered LING 4011, 4060, 4061, 4065, 4066, 4070, 4071, 4080, 4081, 4090, and 4091 in addition to a course in the LING 4055-4059 series.

PR: LING 1103 or the former LING 2103 and LING 1104 or the former LING 2104 or the permission of the instructor

**4100 Morphosyntactic Analysis** examines the relationship between complex morphology and syntactic structure. Data and patterns from a wide variety of languages are considered, including several polysynthetic languages. Students use readings selected from the primary literature for class discussion materials and for their own research.

PR: LING 3100 or waiver in special cases by the Head of the Department

**4110 Selected Topics in Syntactic Theory** is an analysis of a wide range

of linguistic data in morphology and syntax. The course focuses on essential linguistic concepts in more than one theoretical framework, and on the nature of linguistic evidence. This course is usually offered in alternate years.

PR: LING 3100 or waiver in special cases by the Head of the Department

**4150 Language Acquisition II** evaluates different theoretical avenues to explain patterns of first and second language acquisition. The course explores acquisition patterns in first and second language acquisition, bilingual development, and language learning disorders. Building on these data, the discussion covers central theoretical questions about the role of linguistic principles, issues in learnability and effects related to properties of the linguistic input.

PR: LING 3155 or waiver in special cases by the Head of the Department

**4151 Advanced Topics in Phonological Development** covers current empirical and theoretical questions in phonological development. The course evaluates how different theoretical frameworks can (or not) account for patterns of phonological development observed in a range of different languages. Central to these discussions is the learner's ability to perceive, interpret, and reproduce the various sounds and sound combinations present in these languages.

PR: LING 3155 or waiver in special cases by the Head of the Department

**4201 Advanced Phonology** addresses current issues in phonological theory. Topics include phonology in the lexicon, segmental and prosodic representations, as well as advanced issues in constraint-based approaches to phonology. Students further develop their ability to analyze phonological data in light of current theories.

PR: LING 3201 or waiver in special cases by the Head of the Department

**4202 Selected Topics in Generative Phonology** - inactive course.

**4210 Sociolinguistics II** studies the detailed patterns of variation found in any given speech community, and factors which co-vary with them, and the various theoretical models proposed to account for such variability. Students acquire a thorough grounding in the methods and theory underlying current approaches to the relationship between language and society. As their major assignment, students complete a carefully restricted sociolinguistic project. This course is usually offered in alternate years.

PR: LING 3210 or waiver in special cases by the Head of the Department

**4301 French Dialects, Patois and Argots** - inactive course.

**4310 The French Language in Canada** - inactive course.

**4350 General Romance Linguistics** - inactive course.

**4400 Historical and Comparative Linguistics** - inactive course.

**4403 Etymology: History of English Words** - inactive course.

**4420 English Dialectology I** - inactive course.

**4421 English Dialectology II** - inactive course.

**4500 Introduction to Field Methods** focuses on data collection and organization for an unfamiliar language in a simulated field situation, including methods of elicitation, data filing, preliminary analysis, and hypothesis formation and testing. In this course, students learn to apply theoretical concepts from all major Linguistics sub-disciplines, including phonetics, phonology, morphology, syntax, and historical linguistics. This course is usually offered in alternate years.

PR: LING 1103 or the former LING 2103 and LING 1104 or the former LING 2104 or waiver in special cases by the Head of the Department

**4700 Experimental Phonetics** examines some empirical methods of studying the different stages of the 'speech chain' which links speaker to hearer, with special emphasis on the acoustic and perceptual components of the chain. The course also surveys a range of natural articulations and their acoustic effects, explained through the Source-plus-Filter theory of speech production. The discussion also considers competing theories of speech perception as well as debates on the acoustic versus perceptual bases for phonological features.

PR: LING 3104 or waiver in special cases by the Head of the Department

**4750 Selected Topics in Phonology** will have topics to be studied announced by the Department. This course introduces students to more advanced topics in core linguistic disciplines.

PR: LING 3201 or waiver in special cases by the Head of the Department

**4751 Selected Topics in Morpho-Syntax** will have topics to be studied announced by the Department. This course introduces students to more advanced topics in core linguistic disciplines.

PR: LING 3100 or waiver in special cases by the Head of the Department

**4752 Selected Topics in Semantics** will have topics to be studied announced by the Department. This course introduces students to more advanced topics in core linguistic disciplines.

PR: LING 3850 or waiver in special cases by the Head of the Department

**4753 Selected Topics in Acquisition** will have topics to be studied announced by the Department. This course introduces students to more advanced topics in core linguistic disciplines.

PR: LING 3155 or waiver in special cases by the Head of the Department

**4754 Selected Topics in Linguistic Variation** will have topics to be studied announced by the Department. This course introduces students to more advanced topics in core linguistic disciplines.

PR: LING 3210 or waiver in special cases by the Head of the Department

**4900-4901 Independent Study** are courses that are open to advanced students wishing to do individual research in consultation with an advisor.

PR: permission of the instructor

**4950-4960 Special Topics in Linguistics** will have topics to be studied announced by the Department.

PR: permission of the instructor

**4999 Honours Essay** is required as part of the **Honours in Linguistics**

## 12.21 Medieval Studies

For Medieval Studies course descriptions see under **Philosophy, Medieval Studies**.

## 12.22 Philosophy

In accordance with Senate's *Policy Regarding Inactive Courses*, the course descriptions for courses which have not been offered in the previous three academic years and which are not scheduled to be offered in the current academic year have been removed from the following listing. For information about any of these inactive courses, please contact the Head of the Department.

Philosophy courses are designated by PHIL.

**1000 Philosophy of Human Nature** is an approach to philosophical thinking by way of analysis and critique of theories of human nature, classical and modern, and the world views associated with them. Philosophy 1000, or the former Philosophy 1600, is not required for further courses in philosophy but is of particular value to students interested in the Social Sciences and Humanities.

CR: the former PHIL 1001, the former PHIL 1600

**1001 Critical Reading and Writing in Human Nature** provides an overview of foundational knowledge and skills to enable critical reading and writing at the university level by way of analysis and critique of selected conceptions and theories of human nature raised throughout the history of philosophy. Significant instructional time will be devoted to teaching writing skills that develop clarity, form, content, tone, and style appropriate for university writing. All sections of this course follow the Critical Reading and Writing Course Guidelines available at [www.mun.ca/hss/crw](http://www.mun.ca/hss/crw).

**1100 Critical Thinking** aims to impart critical analytic skills: i.e., the ability to recognize good and bad arguments, to explain why a particular argument is good or bad, and a general understanding of why a good argument ought to persuade and a bad argument ought not to persuade.

CR: the former PHIL 1003

**1200 Introduction to Philosophy** is a general introduction to the study of Philosophy both as a contemporary intellectual discipline and as a body of knowledge. The course covers the main divisions, fundamental questions and essential terminology of Philosophy through a reading of classical texts. It is a prerequisite for courses at the 3000 level or above in Philosophy programs. It is intended for students in first year who have completed one semester of university education.

CR: the former PHIL 2200

**1230 Critical Reading and Writing in Ethics** provides an overview of university-level critical reading, writing, and argumentative skills. Students learn the ability to put in their own words the thoughts and writings of important ethical thinkers, how to use and assess secondary sources, and how to bring new writing! skills together in terms of critical analyses of different ethical ideas. All sections of this course follow the Critical Reading and Writing Course Guidelines available at [www.mun.ca/hss/crw](http://www.mun.ca/hss/crw).

**2000 Introduction to Metaphysics** is an introduction to the systematic inquiry into the nature of reality. Topic may include the nature of being, time, the question of God, appearance and reality, the one and the many, mind and matter, essence and existence.

**2210 Logic** is an introduction to traditional and modern logic. Open in any year to all students wishing acquaintance with basic logical skills. All sections of this course follow Quantitative Reasoning Course Guidelines available at [www.mun.ca/hss/qr](http://www.mun.ca/hss/qr).

**2211 Intermediate Logic** (same as the former PHIL 3110) examines techniques and topics in the logic of propositions, of predicates and of induction and probability. Normally the second course in logic. All sections of

this course follow Quantitative Reasoning Course Guidelines available at [www.mun.ca/hss/qr](http://www.mun.ca/hss/qr).

CR: the former PHIL 3110

PR: PHIL 2210 or permission of the Department

**2220 Epistemology** examines various concepts of knowledge - empirical, rational, transcendental, systematic. Their metaphysical grounds and implications. The concept of scientific knowledge; real and abstract entities; objectivity and subjectivity.

**2230 Moral Philosophy** examines the sources and validity of ethical principles which underlie individual and social action.

**2300 Philosophy of Language and Mind** (same as Linguistics 2300 and the former Linguistics 2710) is a survey of philosophical thinking about human language and thought, and about how these phenomena relate to the rest of the natural world. Topics covered include the nature of language, the relations between thought and language, and the nature of consciousness.

CR: Linguistics 2300, the former Linguistics 2710, the former PHIL 2710

**2400 Introduction to Philosophy of Law** employs historical and contemporary sources to explore major traditions and concepts in the philosophy of law. Topics covered include natural law, legal positivism, the nature of legal interpretation, the relationship between law and morality, and the concepts of rights, responsibility, and justice.

**2500-2550 Contemporary Issues** discusses the philosophical dimensions of an area of practical concern such as contemporary culture, professional ethics, leisure, education, the mass media, gender, war and human rights.

**2541 Philosophy and Western Spirituality** will examine Western theories and practices of soul-care which parallel and resonate with Eastern approaches. We will learn what is distinctive to Western approaches with selections from Socrates, Jesus, Paul, Plotinus, Augustine, Eckhart, Alchemy, Freud, Jung and Foucault. Students will not only gain knowledge of this lost road in Western culture, but also an understanding of themselves.

**2551 Health Ethics** examines concepts of health and illness and their ethical implications.

CR: the former PHIL 2803

**2552 Mental Health Ethics** examines concepts of mental health and illness and their ethical implications.

CR: the former PHIL 2802

**2553 Biomedical Ethics** examines medical dilemmas from legal and ethical points of view.

CR: the former PHIL 2807

**2561 Environmental Ethics** examines concepts of nature and their ethical implications.

CR: the former PHIL 2809

**2571 Technology** examines concepts of technology and their ethical implications.

CR: the former PHIL 2801

**2581 Philosophy of Film** introduces some of the central philosophers, topics and themes in the philosophy of film. Topics and themes include: the nature of film image, the relationship between film and "reality", the social/political role and function of film and the nature and value of the documentary. The course will also consider the representation of broader philosophical ideas in film. A film or films will accompany each section.

**2582 Media Ethics** examines ethical issues and dilemmas arising in the realm of the mass media, within the context of foundational ethical theories and major philosophies of mass communication. Topics include the nature and structure of mass communication, the public sphere, and the role of the media in a functioning democracy. Subtopics include: propaganda, censorship, freedom of speech, and access to information and communication.

**2591 Restorative Justice** - inactive course.

**2701 History of Ancient Philosophy** (same as Classics 2701) is a survey of the origin and development of Western philosophy among the Greeks and Romans.

CR: Classics 2701

**2702 History of Modern Philosophy** is a survey of the development of Western philosophy since the 17th century.

CR: the former PHIL 3700, the former PHIL 3701

### 12.22.1 Philosophy of...Series

**3120 Philosophy of Language** investigates various uses of language and its relationship to thought, as well as particular features of language, such as meaning, synonymy, reference, translation and interpretation.

PR: PHIL 1200 or permission of the Department

**3150 Philosophy of the Natural Sciences** examines major issues in the origins, methods and philosophical implications of science. Science as a form of knowledge; its relation to metaphysics; to more general theories of knowledge. Science and values.

PR: PHIL 1200 or permission of the Department

**3160 Hermeneutics, Semiotics and Deconstruction** - inactive course.

**3400 Political Philosophy** examines leading philosophical ideas concerning the origin and justification of political institutions.

PR: PHIL 1200 or permission of the Department

**3500 Philosophy of Religion** (same as Religious Studies 3500) examines the philosophical aspects of religious belief, religious language and theology.

CR: Religious Studies 3500

PR: PHIL 1200 or permission of the Department

**3600 Philosophy of the Humanities** examines the expression and interpretation in the humanistic disciplines: theology, history, art and literature, language.

PR: PHIL 1200 or permission of the Department

**3610 Philosophy and Literature** - inactive course.

**3620 Philosophy of Art** - inactive course.

## 12.22.2 Ancient, Medieval and Renaissance Series

**3730 Plato** examines selections from the works of the Greek "lovers of wisdom" - the first philosophers - particularly Plato.

PR: PHIL 1200 or permission of the Department

**3740 Aristotle** examines the works and legacy of perhaps the most influential systematic thinker of all time.

PR: PHIL 1200 or permission of the Department

**3760 Medieval Philosophy** (same as Medieval Studies 3004) is developments in Philosophy from Augustine to Ockham.

CR: Medieval Studies 3004

PR: PHIL 1200 or permission of the Department

**3790 Late Medieval and Renaissance Philosophy** - inactive course.

## 12.22.3 17th to 18th Century Series

**3800 Descartes** is a systematic introduction to the works and thought of the "father of modern philosophy".

PR: PHIL 1200 or permission of the Department

**3820 Rationalism** is a study of rationalism in Descartes, Spinoza, Leibniz and of subsequent developments of this standpoint.

PR: PHIL 1200 or permission of the Department

**3830 Empiricism** - inactive course.

**3840 Hume** is a study of the work and influence of Hume on theories of knowledge, metaphysics and moral philosophy.

PR: PHIL 1200 or permission of the Department

**3850 Kant's Theory of Knowledge** is an introduction to the work of one of the most influential thinkers of the modern era, concentrating on his theory of knowledge, particularly as stated in the *Critique of Pure Reason*.

PR: PHIL 1200 or permission of the Department

**3851 Kant's Ethics** is an introduction to the work of one of the most influential thinkers of the modern era, concentrating on his ethics, particularly as stated in *The Foundations of the Metaphysics of Morals* and *The Critique of Practical Reason*.

PR: PHIL 1200 or permission of the Department

## 12.22.4 19th Century Series

**3860 Hegel** examines selections from Hegel's system with emphasis on the nature of dialectical and speculative philosophy and its enormous influence in the present time.

PR: PHIL 1200 or permission of the Department

**3870 Utilitarianism** examines moral, political and jurisprudential themes in Bentham, J.S. Mill and their followers. Recent utilitarian theories.

PR: PHIL 1200 or permission of the Department

**3880 Post-Idealist Thought** examines 19th century reactions to idealist systems, the critique of Metaphysics, the rise of Positivism.

PR: PHIL 1200 or permission of the Department

**3890 Marxism** examines the political, social and historical theories of Marx and Engels and their later developments; themes in Marxist analysis of class and capitalism.

PR: PHIL 1200 or permission of the Department

## 12.22.5 20th to 21st Century Series

**3910 Analytic Philosophy** examines selections from established texts in contemporary analytic philosophy: Russell, Carnap, Wittgenstein and others.

PR: PHIL 1200 or permission of the Department

**3920 Phenomenology** is an introduction to the philosophy of Husserl and some of his followers, e.g. Heidegger, Merleau-Ponty.

PR: PHIL 1200 or permission of the Department

**3930 Pragmatism** examines the pragmatist standpoint from Peirce to the present.

PR: PHIL 1200 or permission of the Department

**3940 Existentialism** examines the philosophy and literature of Existentialism from Kierkegaard, Nietzsche and Dostoevsky to Sartre, de Beauvoir and Camus.

CR: the former PHIL 3980

PR: PHIL 1200 or permission of the Department

## 12.22.6 4000-Level and Higher

**4100 Seminar in Logic and the Philosophy of Mathematics** topics will be announced by the Department.

PR: 6 credit hours in courses at the 3000 level or permission of the Department

**4110 Seminar in Logic and the Philosophy of Mathematics** - inactive course.

**4150 Seminar in the Philosophy of Science** - inactive course.

**4200 Seminar in the Philosophy of Mind** - inactive course.

**4250 and 4260 Seminar in Metaphysics and Epistemology** topics will be announced by the Department.

PR: 6 credit hours in courses at the 3000 level or permission of the Department

**4300 and 4310 Seminar in Ethics** topics will be announced by the Department.

PR: 6 credit hours in courses at the 3000 level or permission of the Department

**4350 Seminar in the Philosophy of Law** - inactive course.

**4400 Seminar in Political Philosophy** - inactive course.

**4450 Seminar in the Philosophy of History** - inactive course.

**4500 Seminar in the Philosophy of Religion** - inactive course.

**4520 Seminar in Philosophical Background to Literature** - inactive course.

**4550 Seminar in the Philosophy of Language** - inactive course.

**4560 Seminar in the Philosophy of Language** - inactive course.

**4600 Seminar in Aesthetics** - inactive course.

**4700-4790 Seminar in Special Authors and Texts** will be announced by the Department.

PR: 6 credit hours in courses at the 3000 level or permission of the Department

**4800-4890 Seminar in Twentieth- and Twenty-First Century Philosophy** topics will be announced by the Department.

PR: 6 credit hours in courses at the 3000 level or permission of the Department

**4900 Advanced Readings in Ethics** is an individualized course tailored to the specialized moral interests of each student.

PR: 6 credit hours in courses at the 3000 level or permission of the Department

**4998 Comprehensive Examination** is part of the Honours program.

PR: 6 credit hours in courses at the 3000 level or permission of the Department

**4999 Honours Essay** is part of the Honours program.

PR: 6 credit hours in courses at the 3000 level or permission of the Department

**5000 Instructional Field Placement in Applied Ethics** is a part-time, one semester period of practical work designed to provide experience in medical, psychiatric, environmental, or other similar settings. Students may be placed, e.g., in a government policy office or a hospital.

UL: applicable only towards the **Diploma in Applied Ethics** (this program

is currently under review)

## 12.22.7 Medieval Studies

In accordance with Senate's *Policy Regarding Inactive Courses*, the course descriptions for courses which have not been offered in the previous three academic years and which are not scheduled to be offered in the current academic year have been removed from the following listing. For information about any of these inactive courses, please contact the Head of the Department.

Medieval Studies courses are designated by MST.

**2000 The Cultural Legacy of the Middle Ages** will survey the formative cultures of the Middle Ages - Latin, Celtic, Arabic - as well as the rise of the new vernacular cultures, Germanic and Romance. Literary trends such as the reliance on authority, the emergence of national epic and the development of court literature will be studied. The course examines the interplay of all the arts - literature, music, art and architecture.

**2001 Medieval Europe to 1050** (same as History 2320) is a survey of the economic, social, political and cultural developments of the early Middle Ages.

CR: History 2320

**2002 Medieval Europe, 1050 to the Reformation** (same as History 2330) is a survey of the economic, social, political and cultural developments of Europe in the high and late Middle Ages.

CR: History 2330

**3000 Medieval Books** (same as English 3002, History 3000, Religious Studies 3000) is an examination of the development and role of the manuscript book during the Middle Ages. Topics covered will include book production and dissemination; authors, scribes and audiences; and various kinds of books (e.g. glossed Bibles, anthologies, books of hours, etc.) and their uses.

CR: English 3002, History 3000, Religious Studies 3000

UL: this course may be substituted for a Greek and Roman Studies course in both the Classics degree programs (Honours, Joint Honours and general degree) and the Greek and Roman Studies degree programs (Honours, Joint Honours and general degree)

**3001 Art, Architecture and Medieval Life** - inactive course.

**3002 Folklore in Medieval Society** - inactive course.

**3003 Christian Thought in the Middle Ages** - inactive course.

**3004 Medieval Philosophy** (same as Philosophy 3760) is developments in Philosophy from Augustine to Ockham.

CR: Philosophy 3760

**3006 Women Writers of the Middle Ages** (same as English 3006, Gender Studies 3001, and the former Women's Studies 3001) will study selections from the considerable corpus of women's writings in the Medieval period, as well as issues which affected women's writing. All selections will be read in English translation.

CR: English 3006, the former MST 3351, Gender Studies 3001, the former Women's Studies 3001

**3710-3729 Special Topics in Medieval Studies** is available only as part of the Harlow Campus Semester.

**4000-4020 Special Topics in Medieval Studies** are seminars on such general, interdisciplinary or comparative subjects as, e.g., Popular Culture in the Middle Ages, The Medieval Stage, The Medieval Court, The Religious Orders, Women in Medieval Society, Medieval Universities, Scholasticism, Dante's Divine Comedy, Medieval Historiography, Arthurian Romance, Jewish Medieval Communities, Muslim Art and Architecture and The Byzantine World.

PR: MST 3000 or 3001 or permission of the instructor

**4021 Medieval Latin** - inactive course.

## 12.23 Police Studies

For Police Studies course descriptions see under **Sociology, Police Studies**.

## 12.24 Political Science

Political Science 1000 provides an introduction to the study of politics, power, law, public policy and government. Courses at the 2000-level offer an introduction to major fields and can be taken beginning in a student's first year of study. Courses at the 3000-level usually assume that students have completed at least two courses in Political Science including the corresponding 2000-level

introductory course. At the 4000-level, courses are advanced seminars with small enrollment caps, and therefore have formal prerequisites.

The second digit in each course number designates a field in Political Science. Students interested in notionally concentrating in an area may be guided in their course selections, as follows:

Second Digit

0 General & Research techniques

1 Political theory

2 International politics

3 Comparative politics

6 Public policy and public administration

8 Canadian politics

9 Special topics

Enrollment in Political Science courses is limited. First priority is given to students registered as an Honours, Major or Minor in Political Science. During this time other students may be temporarily placed on a wait list.

Political Science courses are designated by POSC.

**1000 Introduction to Politics and Government** is an introduction to basic concepts in the study of politics, power, law, public policy and government, touching on major areas of political ideologies, institutions, and current domestic and international political issues. Suitable for students in all disciplines.

**1001 Critical Reading and Writing: Politics and Governance** (same as the former POSC 2010) provides an overview of foundational knowledge and skills to enable critical reading and critical writing at the university level. Students learn the elements of academic assessment of literature and information that is available in the library and/or online, and about the mechanics of analytical writing. The "politics and governance" content varies by instructor and is not repeated in any other Political Science course. All sections of this course follow the Critical Reading and Writing Course Guidelines available at [www.mun.ca/hss/crw](http://www.mun.ca/hss/crw).

CR: the former POSC 2010

PR: students are encouraged to complete POSC 1000

**1010 Issues in Canadian Politics and Policy** explores some of Canada's most pressing and interesting political and public policy issues. This course profiles important political problems facing federal and provincial politicians and society. Open to all students interested in Canadian politics, government and domestic public policy.

**1020 Issues in World Politics** explores some of the world's most pressing and interesting political issues. This course profiles important political problems, such as a power struggle within a particular country, a controversial topic that affects an entire continent, or a major crisis that has implications for inhabitants around the world. Suitable for students in all disciplines who have an interest in international politics.

**2100 Introduction to Political Theory** is a survey of the most important political thinkers and schools of political thought. The course will ordinarily cover major political thinkers and include a selection of contemporary political ideologies.

CR: the former POSC 2000

**2200 Introduction to International Politics** is an examination of the "building blocks" of international politics including determinants, means, processes and ends. Emphasis is on the post-1945 period.

**2300 Introduction to Comparative Politics** is an introduction to comparative politics and techniques of comparative analysis across political jurisdictions. This course focuses on the differences between, and similarities among, a variety of countries and systems of government.

**2600 Introduction to Public Policy and Administration** outlines major concepts in, and issues relating to, the fields of public policy and administration. Introduces students to major conceptual issues that shape public policy and government, such as agenda setting, types of public policy models and public management processes. Open to all students interested in the study of public policy and public administration.

**2800 Introduction to Canadian Politics and Government** is an introduction to the structure and operations of institutions of Canadian government and the nature of political actors. Topics to be examined may include the constitution, federalism, parliament, political parties, political culture and elections.

CR: the former POSC 2710

**3010 Empirical Methods in Political Science** is an introduction to basic concepts in the scientific approach to studying politics, and provides students with the fundamental skills for conducting empirical research using both qualitative and quantitative methods. These skills include how to construct a research project, and how to collect and analyze information. All sections of this course follow Quantitative Reasoning Course Guidelines

available at [www.mun.ca/hss/qr](http://www.mun.ca/hss/qr).

PR: 6 credit hours in Political Science at any level or the instructor's permission

**3100 Political Theory from Plato to Rousseau** examines selected political theory from Plato to Rousseau. The theme of the course is the development of liberal democratic theory.

**3110 Political Theory from Tocqueville to Present** examines selected political theory from Tocqueville to the present. The theme of the course is the crisis in liberal democratic theory.

**3140 Feminist Political Theory** examines feminist scholarship that has challenged previously accepted notions in political theory, including definitions of politics itself, the distinctions between public and private, the nature of citizenship, and the roles of women in civil society. This course considers different ways of looking at power and political culture in modern societies, examining these such as gender and democracy, race and class, poverty and welfare, sexuality and morality.

**3210 International Law** is an introduction to international law concerned with the interaction of the political and legal systems. Topics discussed are sources, agreements, membership, recognition, territory, jurisdiction, immunities, state responsibility, and force and war.

**3220 International Organizations** examines the origins, structures and roles of international organizations as both 'arenas' in which states pursue their interests and 'evidence' of an embryonic international society. The focus will be primarily on the workings of the United Nations, especially its 'collective security' function, and other regional security organizations.

**3250 International Political Economy** studies the interaction between world politics and international economics. Major theoretical debates regarding globalization and multinational corporations are covered, as well as current topics such as: the politics of the global monetary and financial order, international trade, foreign investment and debt, international development, and environmental issues.

**3280 Foreign Policy** is an introduction to the analysis of foreign policy, with special reference to domestic and international constraints, capabilities and ideology.

CR: the former POSC 3200, the former POSC 3760

**3290 Human Security** examines political concepts and government policies related to security contexts, such as the displacement of citizens, food supply issues, energy, information flows, war and/or the environment.

CR: the former POSC 3391

**3300 European Politics** is a comparative study of government and politics in selected states of Western Europe. Emphasis will be on parties, institutions, and policy-making, particularly the ways in which states manage their economies.

**3305 Irish Politics** introduces students to the politics of the Republic of Ireland. Topics covered include the historical origins of the state, the political influence of the Roman Catholic Church, the evolution of political institutions, as well as the evolving relationship with Northern Ireland, Europe and the world.

**3310 American Politics** examines the governmental process in the United States including the role of parties and interest groups. This course will also consider select contemporary problems.

**3315 Latin American Politics** is an analysis of the forces influencing politics in contemporary Latin America with particular emphasis being given to those factors promoting political change. No prior knowledge of Latin America is assumed.

CR: the former POSC 3430

**3325 South Asian Politics** analyzes the history and development of political change in a selection of South Asian states with a focus on the contemporary challenges that they face in a globalized political environment.

CR: the former POSC 3420

**3340 Women and Politics** examines the role of women in the political process in comparative context. Topics may include the political socialization, organization, and recruitment of women; voting behaviour; and the organization of governmental institutions as a response to the concerns of women.

**3350 Public Opinion and Voting** looks at the measurement and formation of political attitudes, factors affecting attitude stability and change, and the distribution of opinion in society. Emphasizes public opinion and voting behaviour in the United States and Canada during campaigns and interelection periods. All sections of this course follow Quantitative Reasoning Course Guidelines available at [www.mun.ca/hss/qr](http://www.mun.ca/hss/qr).

CR: the former POSC 3510

**3390 Political Parties** is a study of political parties in liberal democracies. Attention is given to the origin and development of parties, how they organize, multiparty competition and what difference parties make. Political

parties in Europe, the United States, and Canada are considered in a comparative context.

CR: the former POSC 3531

**3600 Public Policy Fields** is an examination of the relationship between public policy development and changes in the social and economic policy environment. Applies theories and models of public policy to a variety of topical case studies.

PR: prior completion of POSC 2600 is recommended but not required

**3610 Public Administration in Canada** is an introduction to public administration, history of the public service in Canada, an examination of the structure and functioning of contemporary federal and provincial governments. Topics covered include cabinet organization, financial and personnel management, collective bargaining, and bilingualism.

CR: the former POSC 3741

**3620 Law, Governance and Public Policy** reviews traditional theories about law, discuss their inadequacies, and consider the benefits of a policy-oriented approach to the study of the role of law and governance in society. The concept of law as a process of authoritative decision will be used to examine the function of the judicial authority.

CR: the former POSC 3521

**3650 Canadian Political Economy** introduces students to major debates about the role of the state in Canadian economic development and public policy. Topics may include: the challenges of natural resource dependency, regionalism, globalization, and the relationship between Canada and the United States.

CR: the former POSC 3751

**3800 Federalism in Canada** examines relationships between government in the Canadian federation ranging from high-profile disputes to efficient diplomacy. This course reviews longstanding intergovernmental stresses such as the constitution, legislative powers, legal matters, sub-state nationalism (e.g., Quebec, Newfoundland, Labrador) and wealth distribution.

CR: the former POSC 3710

**3810 Executive-Level Governance in Canada** explores the roles of political elites, such as prime ministers, premiers and ministers, and executive institutions in government such as the Prime Minister's Office and the Privy Council Office, in addressing and shaping important political issues in Canada.

**3820 Constitutional Law in Canada** uses a casebook approach to examine critical issues of Canadian constitutional law. The development of the Canadian Constitution and processes of judicial review, as well as the legal development of federalism and protection of civil rights, are examined in detail.

CR: the former POSC 3720

**3830 Aboriginal Governance in Canada** is an introductory course in Aboriginal governance. It examines Aboriginal culture and traditions, the variety of Aboriginal governments and governing traditions, and Aboriginal and treaty rights. Public policy issues and processes surrounding categories of Aboriginal peoples, intergovernmental relations affecting them, and the role and significance of Aboriginal political organizations and actions are explored.

**3860 Media and Politics in Canada** draws upon communications theory to analyze major political problems and processes. Specific attention is given to Canadian politics in the news and to various print, broadcast and online media.

CR: the former POSC 3511

**3870 Provincial Government and Politics** is a comparative study of government and politics in selected Canadian provinces and territories. Consequences of varying historical and cultural contexts will be examined with special attention to government processes, parties and movements, leadership styles, and orientations to the Canadian federation.

CR: the former POSC 3770

**3880 Newfoundland and Labrador Government and Politics** is a study of the government and political process in Newfoundland and Labrador. Topics may include electoral behaviour and attitudes, the party system, leadership styles, the consequences of federalism, and public administration.

CR: the former POSC 3780

**3890 Municipal Government and Politics in Canada** is an examination of the theory, structure and operation of local governments in Canada, with particular emphasis on Newfoundland and Labrador. Recent proposals for reform and the politics of implementing regional government and financial reorganization will be examined.

CR: the former POSC 3790

**3900-3979 Special Topics in Political Science** will have topics announced by the Department.

CR: credit restrictions will be designated on a course-by-course basis

**3980-3999 Special Topics in European Politics** is offered only at the Harlow (England) Campus and explore selected facets of the politics of

contemporary Europe. Typical themes include the European Union and its member-states, asylum and immigration, social and economic policy, foreign policy and the position of Europe in the international system. For further information about the Harlow semester consult the Department or the Faculty of Humanities and Social Sciences.

CR: credit restrictions will be designated on a course-by-course basis

**4010 Honours Essay I** develops independent research and writing skills through regular meetings with a research supervisor, the preparation of an approved research proposal, and the completion of a high quality draft of at least one section of the Honours essay. Students are expected to follow the Department's "Guidelines Governing Honours Essays". Prior to enrolling, and ideally a semester in advance, students should contact the Head of the Department to identify a potential supervisor.

CR: the former POSC 4950

PR: enrollment in the Honours program and permission of the Head of the Department

**4011 Honours Essay II** builds on skills developed in POSC 4010, requires students to complete the writing of their Honours essay, including submitting a high quality complete draft at the midpoint of the semester, with the final complete document to follow soon afterwards. Students are expected to meet regularly with their research supervisor and to follow the Department's "Guidelines Governing Honours Essays".

CR: the former POSC 4951

PR: completion of POSC 4010 with a minimum grade of 70%

**4100 Approaches to Political Theory** is an introduction to the interpretation of political texts. Features historical and hermeneutical approaches to the study of Political Science.

**4110 Multicultural Citizenship** examines discourses on multiculturalism in contemporary political theory from a normative perspective. Focuses on the justice and equality frameworks within which multiculturalism is understood, and the challenges arising from pluralism in democratic societies.

**4120 Contemporary Democratic Theory** examines significant debates in the contemporary scholarship on democratic theory, such as the relationship between democratic decision-making and individual liberty; who "the people" are in democratic states and how they make their will known; whether democracy depends upon a sense of collective identity; and whether democracy is inherently exclusionary.

**4200 International Law and Politics** is a research seminar on contemporary Canadian legal problems. Each semester will focus on one problem, such as Northern sovereignty, pollution, fishing zones or control of the sea.

PR: POSC 2200 and a POSC 32xx course, or POSC 3210, or the instructor's permission

**4210 Arms Control and Proliferation** examines the evolution of arms control and considers the consequences of success and failure.

PR: POSC 2200 and a POSC 32xx course, or the instructor's permission

**4215 Human Rights and International Politics** examines the evolution of global norms of human rights and consequences for the structures of the international system, international civil society, and the international political process.

PR: POSC 2200 and a POSC 32xx course, or the instructor's permission

**4230 Theories of International Relations** examines the major theories used to understand world politics and international conflict, such as constructivism, feminism, game theory, historical structuralism, liberalism, and realism. These are explored through classic readings in international relations and case studies.

PR: POSC 2200 and a POSC 32xx course, or the instructor's permission

**4250 The European Union** is an examination of the European Community as an emergent transnational form of governance. The course will consider the origins of the Community, the operation of its institutions, its transformation from Common Market to European Union, and the ways in which EC politics impinges on national-level politics.

CR: the former POSC 3291

PR: POSC 2200 and a POSC 32xx course, or POSC 3300, or the instructor's permission

**4255 Controversies in Political Economy** examines current political and public policy challenges from a political economy perspective. Topics may include globalization, major trade disputes, currency and debt crises, economic development and global environmental problems.

CR: the former POSC 4350

PR: POSC 2200 and a POSC 32xx course, or the instructor's permission

**4280 American Foreign Policy** reviews the structures, process and major foreign policy perspectives of the United States of America in a global context.

CR: the former POSC 3200

PR: POSC 2200 or a POSC 31xx course, or POSC 3310, or the instructor's permission

**4310 Comparative Federalism** examines theories of federalism along with the development and operation of federalism in selected nation states.

PR: POSC 2300 and a POSC 33xx course, or POSC 3800, or the instructor's permission

**4330 Comparative Political Representation** - inactive course.

**4340 Women and Mass Politics** focuses on the gender gap in both political behaviour and participation. Focusing primarily on Canada and the United States, this course assesses patterns of involvement in political institutions, and examines differences between men's and women's political attitudes.

CR: the former POSC 4503

PR: POSC 2300 and a POSC 33xx course, or POSC 3140 or 3340, or the instructor's permission

**4360 Contentious Politics - Protest, Violence and Terrorism** examines protest and movement politics, insurgent and counter-insurgent politics, terrorism, and revolution.

CR: the former POSC 4740

PR: 3 credit hours in Political Science, or the instructor's permission

**4370 Democracy and Democratization** is a comparative study of the conditions necessary to develop and sustain democratic regimes and the circumstances under which transitions to democracy succeed or fail. The course will examine theoretical materials and apply them to recent and historical transitions to democratic rule.

CR: the former POSC 4301

PR: POSC 2300 and a POSC 33xx course, or the instructor's permission

**4380 The Developing World** considers the practical and theoretical issues that affect the chances of the over five billion inhabitants of the developing world to secure democratic governance and material well-being.

CR: the former POSC 4450

PR: POSC 2300 and a POSC 33xx course, or the instructor's permission

**4600 Public Policy Work Internship** provides new career-related policy work experience with government, a political party, a non-governmental organization, a union, or another employer involved in public affairs. Placements are for twelve weeks at eight hours per week, totalling 96 hours. Course work related to the study of public policy is required. Admission is selective and competitive. Details are available at [www.mun.ca/posc](http://www.mun.ca/posc). Enrollment constitutes permission for the course administrator to provide the student's transcript to a potential employer.

CR: POSC 460W, the former POSC 4000

PR: a minimum 60 credit hours, including at least 12 credit hours in Political Science courses with a minimum 70% average, and permission of the instructor. Prior completion of public policy courses is recommended but not required.

**4630 Policy Analysis** reviews the variety of qualitative and quantitative techniques used in the analysis of public policy and in program evaluation. Students work on a major project to gain experience applying public policy models and analysis techniques as they attempt to improve a real-world existing public policy within the constraints of finite resources and political realities. Features practitioners as guest speakers who explain the role of policy analysts in the public policy process and the types of analysis practices.

PR: POSC 2600 or POSC 3600, or the instructor's permission

**4650 Public Policy in Resource Dependent Economies** examines the political economy of Canada's human and natural resources, such as labour, energy, fisheries, forestry, mining, and water. The political consequences of natural resource dependency on the environment and Aborigines are also discussed.

CR: the former POSC 4731

PR: POSC 2600 and a POSC 36xx course, or the instructor's permission

**4680 Public Policy in Newfoundland and Labrador** is a study of public policy in Newfoundland and Labrador. Examines the formation, implementation and impact of policies in one or more of the following areas: fisheries, resources, industrial development, agriculture, social policy.

CR: the former POSC 4730

PR: POSC 2600 and a POSC 36xx course, or POSC 3600 or 3880, or the instructor's permission

**4860 Elections in Canada** is an examination of election campaigns and electoral systems in the Canadian political system, with an emphasis on candidates, parties, voters, electioneering activities and campaign regulations.

CR: the former POSC 3700

PR: POSC 2800 or the instructor's permission

**4870 Regionalism in Canada** is an examination of the economic, social, and institutional determinants of regionalism and the ways in which these forces have shaped decision-making in Canada. Emphasis on the various models and frameworks used to study regionalism.

CR: the former POSC 4750

PR: POSC 2800 and a POSC 38xx course, or POSC 3800 or 3870, or the instructor's permission

**4880 Research in Newfoundland and Labrador Politics** requires students to participate in advanced research projects dealing with selected aspects of the politics of Newfoundland and Labrador. Topics to be considered may include the legislature and the executive, the civil service, interest groups, parties, elections and political recruitment.

CR: the former POSC 4780

PR: POSC 2800 and a POSC 38xx course, or POSC 3880, or the instructor's permission

**4900-4990 (Excluding 4950 and 4951) Special Topics in Political Science** will have a seminar topic announced by the Department.

CR: will be designated on a course-by-course basis

PR: will be designated on a course-by-course basis

### 12.24.1 Work Terms

The following Work Terms are requirements for the Bachelor of Arts Honours (Co-operative) and Bachelor of Arts (Cooperative) programs only.

**260W Work Term 1** for most students this represents their first work experience in a professional environment. They are expected to learn, develop and practice the high standards of behaviour normally expected in the workplace. They are normally required to attend seminars on professional development.

CH: 0

OR: Professional development seminars, delivered by Co-operative Education, are presented in the previous semester to introduce and prepare the student for participation in the subsequent work terms. Topics may include, among others; résumé preparation; interview training; work term evaluation; preparation of reflective essays; career planning employment seeking skills; self-employment; ethics and professional concepts; behavioural requirements in the workplace; assertiveness in the workplace; and industrial safety.

PR: enrollment in the **Political Science Co-operative Education Program (PSCE)**; 18 POSC credit hours; a minimum overall average of 65% and a minimum average of 70% in POSC courses; and permission of the designated faculty member. A candidate for a Political Science Honours or Major who completed a minimum of 18 credit hours in Political Science prior to September 2011 and who is not pursuing the co-op option may apply to enroll in POSC 260W. Priority will be given to PSCE students.

**360W Work Term 2** building on their first work term placement students will further develop their knowledge and work-related skills in a position that entails increased responsibility and challenge. Students are expected to demonstrate an ability to deal with increasingly complex work-related concepts and problems.

CH: 0

PR: enrollment in the **Political Science Co-operative Education Program (PSCE)**; 27 POSC credit hours; POSC 260W; a minimum overall average of 65% and a minimum average of 70% in POSC courses; and permission of the designated faculty member

**460W Work Term 3** building on their previous work term placements and Political Science course knowledge students will be assigned to a highly challenging position. They should have sufficient academic grounding and work experience to contribute in a positive manner to the problem-solving and management processes needed and practiced in the work environment. Students should become better acquainted with their discipline of study; should observe and appreciate the attitudes, responsibilities and ethics normally expected of professionals; and should exercise greater independence and responsibility in their assigned work functions.

CH: 3

CR: POSC 4600

PR: enrollment in the **Political Science Co-operative Education Program (PSCE)**; a minimum third-year standing and 33 POSC credit hours; POSC 360W; a minimum overall average of 65% and a minimum average of 70% in POSC courses; and permission of the designated faculty member.

### 12.24.2 Law and Society

In accordance with Senate's *Policy Regarding Inactive Courses*, the course descriptions for courses which have not been offered in the previous three academic years and which are not scheduled to be offered in the current academic year have been removed from the following listing. For information about any of these inactive courses, please contact the Program Coordinator.

Law and Society courses are designated by LWSO.

**1000 Law, Democracy and Social Justice** examines the nature and aims of democracy and contemporary issues related to social justice through a law and society perspective.

**2000 Law and Society in Canada** is an introduction to law in Canadian society and the role which it has played in societies past and present.

PR: LWSO 1000

**3010-3019 (Excluding 3012, the former 3013, 3014, 3015 and 3016) Special Topics in Law and Society** will have topics to be studied announced by the Program Coordinator.

PR: LWSO 1000

**3012 Aboriginal Peoples: Concepts of Land, the Law and the Constitution** traces the historical development of Aboriginal land and resource rights; colonial and Canadian law; and the Constitution of Canada as it relates to the Aboriginal peoples of Canada. The developing concept of Aboriginal law is presented within the context of the treaty process, *Indian Act*, contemporary land claims, the Canadian Constitution, and federal/provincial relations.

PR: LWSO 1000. LWSO 2000 is recommended. Students who are declared in the **Certificate in Aboriginal and Indigenous Studies** program should seek written permission from the Instructor.

**3014 Aboriginal and Government Relations in Newfoundland and Labrador** traces the historical development of Aboriginal and Government relations in Newfoundland and Labrador. Topics include: the current legal and constitutional status of the Aboriginal peoples of the Province within the context of land claims, application of the *Indian Act*, access to programs and services, and federal/provincial relations.

PR: LWSO 1000. LWSO 2000 is recommended. Students who are declared in the **Certificate in Aboriginal and Indigenous Studies** program should seek written permission from the Instructor.

**3015 Women and Law in Canada** looks at the interplay between law and status under the law, the course proceeds to look at some of the main legal issues affecting women today, such as workplace equality, family law and women and crime. This course provides students with the opportunity to study cases in depth and apply legal theory to current issues affecting Canadian women.

PR: LWSO 1000. LWSO 2000 is recommended

**3016 Western Traditions of Law and War** provides students with a historical overview of the law of war. The course goes beyond the traditional legal definition of war as an armed conflict between states, and examines whether the law of war should be applied to terrorism and wars of national liberation. Topics include: just war theory, the legality of the various means of warfare, the treatment of protected people and places and the prosecution of war criminals.

PR: LWSO 1000

**3200 Women and the Law in Newfoundland History** - inactive course.

**3300 Understanding Human Rights** introduces students to the theory and practice of human rights. Course topics include: history; philosophy; and international and Canadian structures and provisions. The course includes an examination of selected areas of human rights, i.e. labour, women's and children's rights, and explores current and future applications of human rights.

PR: LWSO 1000

**3400 Organized Crime in Canada: National and Global Perspectives** examines the origins, expansion, and changing character of organized crime in Canada from the early twentieth century to the present, as well as Canada's role in transnational organized criminal activity. Laws relating to criminal activity, law enforcement and available tools to combat organized crime are assessed according to the inherent problems of investigation, evidence, and litigation.

PR: LWSO 1000. LWSO 2000 is recommended.

**4000 Multidisciplinary Perspectives on Law and Society** is an appreciation and understanding of those rules and activities termed legal which can be gained from a variety of disciplinary perspectives. The purpose of this seminar is to introduce students to the different ways in which law may be approached within the social sciences and humanities. The topic or topics to be discussed in a given semester will depend on the availability and participation of faculty from participating departments. Through seminar readings, discussions and research, students will gain a wider understanding of the role of law in society and of the diverse academic approaches for understanding it.

PR: at least 18 credit hours from **Table 1 Core Faculty of Humanities and Social Sciences Courses Approved for the Major or Minor in Law and Society**, including LWSO 1000

**4900 Development of Law in Newfoundland and Labrador** (same as History 4232 and the former History 4214) traces the evolution of the legal system of Newfoundland and Labrador from its earliest beginnings. Students are responsible for contributing to seminar discussions and presenting a research essay on some major themes that distinguish legal developments in Newfoundland and Labrador.

CR: History 4232, former History 4214

PR: at least 18 credit hours from **Table 1 Core Faculty of Humanities and Social Sciences Courses Approved for the Major or Minor in Law and Society**, including LWSO 1000

**4901-4909 Special Topics in Law and Society** will have topics to be

studied announced by the Program Coordinator.

PR: at least 18 credit hours from **Table 1 Core Faculty of Humanities and Social Sciences Courses Approved for the Major or Minor in Law and Society**, including LWSO 1000

## 12.25 Religious Studies

In accordance with Senate's *Policy Regarding Inactive Courses*, the course descriptions for courses which have not been offered in the previous three academic years and which are not scheduled to be offered in the current academic year have been removed from the following listing. For information about any of these inactive courses, please contact the Head of the Department.

Religious Studies courses are designated by RELS.

**1000 The Religions of the World** is an introduction to the beliefs and practices of the world's religions.  
CR: the former RELS 2010

**1001 Critical Reading and Writing: Religion and Violence** examines the relationship between religion(s) and violence from Religious Studies perspectives. Students learn the principles of scholarly analysis appropriate to the study of religious phenomena, the elements of academic assessment, and the mechanics of academic writing. Emphasis is placed on critical reading and writing, analyzing texts, evaluating sources, framing questions, organizing paragraphs, developing effective arguments, and refining presentation of written work. All sections of this course follow Critical Reading and Writing Course Guidelines available at [www.mun.ca/hss/crw](http://www.mun.ca/hss/crw).

**1010 Religion in the Modern World** is an introduction to some of the major issues confronting religion in the modern world. The focus will be on such topics as globalization and religion, religious faith and violence, freedom and authority.

**1021 Apocalypse: The End Times in Thought, Action, and Imagination** will explore the many ways in which Judaism and Christianity have anticipated and imagined the end times. Attention will be given to Jewish and early Christian notions of the Messiah and his reign, the end of the world, and the impending judgment, as well as how Christianity has coped repeatedly with the delay of the end and how millennial thought and action have affected people during periods of social and natural crises. The role of millennial expectations in our modern era and why the apocalypse is once again a powerful image in religion, film, and literature will also be covered.

**1022 Jesus in Film** is a study of how Jesus is represented in modern film. The course explores the continuing impact that the Jesus of history and faith has had on modern Western culture. The course will examine such films as *The Greatest Story Ever Told*, *The Robe*, *The Gospel According to St. Matthew* (by Pasolini), *Jesus Christ Superstar*, *Jesus of Montreal*, *The Last Temptation of Christ*, *The Life of Brian*, *The Passion of the Christ*, *The Newfoundland Passion* (video of the Squires' Paintings).

**1040 Introduction to Chinese (Mandarin) I** will introduce students to the basics of Chinese vocabulary, characters, and grammar. Mandarin Chinese, the official dialect of China, Taiwan, and Singapore, will be taught. This course is not intended for native speakers. All sections of this course follow the Language Study Course Guidelines available at [www.mun.ca/hss/ls](http://www.mun.ca/hss/ls).  
CR: the former RELS 4904

**1041 Introduction to Chinese (Mandarin) II** is a continuation of RELS 1040. At the end of this course students should know over a hundred Chinese characters, which should enable them to read basic texts and carry on a simple conversation. This course is not intended for native speakers. All sections of this course follow the Language Study Course Guidelines available at [www.mun.ca/hss/ls](http://www.mun.ca/hss/ls).  
CR: the former RELS 4911  
PR: RELS 1040

**1050 Introduction to Biblical Hebrew I** is designed to introduce students to the elements of Biblical Hebrew in order to prepare them for reading the Hebrew Bible/Old Testament in the original. The emphasis will be upon learning the basic grammar and syntax of Biblical Hebrew. All sections of this course follow the Language Study Course Guidelines available at [www.mun.ca/hss/ls](http://www.mun.ca/hss/ls).  
CR: the former RELS 3700, the former RELS 4900

**1051 Introduction to Biblical Hebrew II** is a continuation of RELS 1050. The emphasis will be upon the reading of selected Hebrew texts. All sections of this course follow the Language Study Course Guidelines available at [www.mun.ca/hss/ls](http://www.mun.ca/hss/ls).  
CR: the former RELS 3701, the former RELS 4901  
PR: RELS 1050

**1060 Sanscrit Language Study I** is an introduction to the Sanscrit language, to the (Devanagari) alphabet, basic grammar and foundational vocabulary with a focus on developing skills needed to read and translate Sanscrit texts. All sections of this course follow the Language Study Course Guidelines available at [www.mun.ca/hss/ls](http://www.mun.ca/hss/ls).

CR: RELS 4905

**1061 Sanscrit Language Study II** is a continuation of Sanscrit Language Study I. On completion of this course, students will have the ability to consult Sanscrit texts for research purposes. All sections of this course follow the Language Study Course Guidelines available at [www.mun.ca/hss/ls](http://www.mun.ca/hss/ls).  
CR: RELS 4906

**2050 The Old Testament** is an introduction to the historical background, literary structure, and content of the Old Testament. Emphasis will be placed on the authorship and dating of the various texts that comprise the Old Testament, as well as on major themes, figures, and events.

**2051 The New Testament** is an introduction to the history and literary structure of the documents comprising the New Testament. Emphasis will be placed on the major themes found in these documents and on the distinctiveness of approach of the individual writers.

**2130 Christianity from the First Century to the Middle Ages** explores the history of Christian thought and culture from the period of the Early Church to the Middle Ages. Topics will include the development of key theological ideas, changes to art, architecture, and ritual, the relations between church and state, tensions between Christian and pagan culture, and the growth and spread of Christianity in Western Europe.

**2140 Christianity from the Reformation to the Present** explores the radical religious, ethical, and intellectual changes and challenges that brought about the modern world we live in: the Reformation, the Enlightenment, the Romantic Period and Pietism, and Secularism.

**2330 Judaism** is an introduction to central beliefs and practices of the Jewish faith, from its beginnings to the modern era.

**2340 Islam** examines the tradition in its historical and contemporary manifestations; Muhammad, the Qur'an, Islamic sects, relations with Judaism and Christianity; trends and developments in contemporary Islamic thought and practice.  
CR: the former RELS 3340

**2350 Religious Institutions** (same as Anthropology 2350) is a contextual study of religious institutions and beliefs, calendrical feasts and solemnities, religious roles and hierarchies, ritual innovation and revitalization.  
CR: Anthropology 2350, the former Sociology/Anthropology 2350, the former Sociology 2350

**2400 Buddhism** examines the history of Buddhist traditions in Asia, with consideration of the major developments in Buddhist philosophy, institutions, and practices.  
CR: the former RELS 3400

**2410 Hinduism** examines the history of Hindu religious traditions, their major religious texts, institutions, and practices, and their role in social, political, and cultural movements in India and in Hindu diaspora communities.  
CR: the former RELS 3410

**2415 Gods and Goddesses of Hinduism** is focussed on myth, iconography and ritual of Hindu gods and goddesses from the ancient to the contemporary period. The course will explore fundamental assumptions of Hindu theistic traditions in popular practice and in formal religious institutions.

**2420 Chinese Philosophy and Religion** examines philosophical and religious responses to social and political crises in ancient China. Finding ways to answer the crises of prolonged warfare, high unemployment, a vast divide between rich and poor gave rise to the schools of Confucianism, Daoism, Legalism, and others. This introductory course examines the various schools' answers to these crises and how they connect to today.

**2425 Contemporary Issues in Chinese Religion and Culture** is an examination of religion in modern China and the Chinese diaspora in Taiwan, Singapore, and North America. Special attention will be paid to religious beliefs, practices, and institutions and the way in which modern attitudes have been framed by the past.  
CR: the former RELS 3425

**2430 Japanese Religions** is an introduction to the origin, teachings, and development of Shinto, along with the development of Buddhism in Japan. The course also examines the emergence of the "new religions" that bring together Shinto and Buddhism and their phenomenal growth in the 20th and 21st centuries.  
CR: the former RELS 3430

**2610 Introduction to Religious Ethics** is an introduction to religious ethics through the systematic study of selected writers and issues in biomedicine, human sexuality, and social justice. Possible topics for discussion include euthanasia, abortion, poverty, and unemployment.  
CR: students who have successfully completed both the former RELS 2600 and the former RELS 2601 may not receive credit for RELS 2610

**2800 Gender and Sexualities in Western Religions** examines attitudes toward, and treatment and construction of gender and sexualities in Western religions, including Judaism, Christianity, Islam, and New Religious Movements. Contemporary evaluations of these traditions from gender studies perspectives will be considered.

**2801 Gender and Sexualities in Asian Religions** examines gender and sexuality in the traditions of Hinduism, Buddhism, Confucianism, Daoism and folk traditions in Asia. Contemporary evaluations of these traditions from gender studies perspectives will be considered.

**2810 Religion and Modern Culture** is an historical examination of the impact of science on religion in Western culture. Particular emphasis will be placed on such developments as the scientific revolution, the rise of modern technology, and the emergence of modern scientific theories.

**2811 Contemporary Religious Movements** explores the development and forms of modern, western spiritualities, such as modern witchcraft, Neopagan religions, Mother Earth spirituality, UFO religion and the New Age Movement.

**2812 Religion and Popular Culture** focuses on the portrayal and treatment of religion in popular culture and the ways in which religious and mythic themes are expressed in such pop culture forums as television shows, films, music, mass-market fiction, and material culture.

**2820 Cults and New Religious Movements** - inactive course.

**2830 Religion and Popular Music** explores the religious themes and images found in popular music and song, considering the role of music as a vehicle for religious expression.

**2850 Religion and the Law: The Secular in Contemporary Canada** examines contemporary legal debates on secularism in Canada. Taking a historical and sociological perspective, it considers how shifts in immigration policy have encouraged a diversity of contemporary religious practice. The course pays particular attention to religion and public policy (related to the *Multiculturalism Act*) and to changing definitions of accommodation and the secular.

**3000 Medieval Books** (same as English 3002, History 3000, and Medieval Studies 3000) is an examination of the development and role of the manuscript book during the Middle Ages. Topics covered will include book production and dissemination; authors, scribes and audiences; and various kinds of books (e.g. glossed Bibles, anthologies, books of hours, etc.) and their uses.

CR: English 3002, History 3000, and Medieval Studies 3000

**3010 Greek Religion** (same as Classics 3010) is a study of the role of religion in the private and public life of the Greek world.

CR: Classics 3010, the former RELS 3121, the former Classics 3121

**3020 Roman Religion** (same as Classics 3020) is a study of the role of religion in the private and public life of the Roman world.

CR: Classics 3020, the former RELS 3121, the former Classics 3121

**3031 The Book of Genesis** introduces students to one of the founding texts of Western culture, the book of Genesis. Special attention will be paid to the role of myth, human origins, values, and political institutions.

CR: the former RELS 3030

**3053 Anthropology of Religion** (same as Anthropology 3053) is a critical evaluation of anthropological research on religion, centering on seminal thinkers and major theoretical traditions. Special attention is given to the study of belief systems, and to relationships between belief and ritual.

CR: Anthropology 3053

**3058 Topics in Religion and Politics** is a seminar-based course which offers socio-political and philosophical analyses of the impacts of religion in specific political contexts taking a variety of theoretical approaches. The geographical and historical foci of the course will vary by instructor.

**3060 The Prophets of Israel** is a study of the prophets through the relevant books of the Old Testament. Problems of text and interpretation will be discussed in relation to selected passages, but the general approach will be to bring out the creative genius and radical implications of the prophetic movement as a whole.

**3091 The Problem of Justice in the Old Testament** introduces students to the universal problem of divine justice as it is depicted in various biblical books. Special attention will be placed on the book of Job, but notions of suffering in the Psalms, Jeremiah, Proverbs, Ecclesiastes, and some apocryphal literature will also be considered.

CR: the former RELS 3090

**3200 Jesus of Nazareth** is a study of the historical Jesus. Beginning with an assessment of the relevant source material, this course explores what can be known about the life of Jesus of Nazareth in its historical and cultural contexts.

**3210 Paul and His Writings** is a study of the writings of the Apostle Paul in

the New Testament, and his contribution to Christianity in the cultural and historical milieu in which he lived and was active.

**3251 The Gospel of John** is an examination of the Gospel of John and the community which produced it. Special attention will be given to the place of the Gospel in the history of early Christianity.

**3270 Christianity and the Roman Empire** - inactive course.

**3272 Bible, Culture and Interpretation** - inactive course.

**3276 Contemporary Issues and the Bible** examines the relevance of the Bible to such issues as climate change, capitalism, and technology and freedom.

CR: the former RELS 3275

**3305 Ancient Israel** is an exploration of the religious thought and practices of Israel and Judah in their cultural and historical contexts in the Old Testament period, from their beginnings to the Babylonian Exile of the sixth century B.C.E.

CR: the former RELS 3050

**3310 Judaism at the Time of Jesus** will explore the developments in Jewish thought, institutions, beliefs, and practices from the Babylonian Exile of the sixth century B.C.E. to the time of Jesus, King Herod and the Roman Empire of the first century C.E.

CR: the former RELS 3220

**3401 Zen, Buddhist Meditation, and Buddhist Psychology** examines the relationship between meditation and theories of human psychology in Buddhism from its origins to its formulation in Zen.

**3411 The Ramayana: A Hindu Epic and Performance Tradition** is a study of one of the most influential Epics of Hinduism, the story of Rama, the perfect king of a golden age. The course examines various versions of the narrative, the social and religious values expressed through the story, and the Epic's place in Indian politics, in dramatic performances, and in visual arts.

**3415 Warrior, Wife, Witch: Ideal Females and Female Ideals in Hinduism** is a study of Hindu constructions of ideal or iconic females (e.g., Durga, the warrior goddess; Sita, the perfect wife; the Yoginis, the "witches" of Tantra) and their power in the lives of Hindu women. The course includes critical examination of the history of Hindu goddess traditions, the ideals for females in Hindu law, and Hindu women's interpretations of "ideal females".

**3431 Readings in Daoism: The Laozi and the Zhuangzi** is a course in the critical reading of the two most important texts in Daoism, the *Laozi* and the *Zhuangzi*.

CR: the former RELS 3420, the former RELS 3422

**3432 Confucius and Confucianism** begins with Confucius and China, and explores the growth and impact of Confucianism on East Asian society through an examination of its major writings.

CR: the former Religious Studies 3420, the former Religious Studies 3421

**3500 Philosophy of Religion** (same as Philosophy 3500) explores the philosophical aspects of religious belief, religious language, and theology.

CR: Philosophy 3500

**3510 Christianity in the Reformation Era** is a study of Christian thought and practice in the Reformation era. This course will examine both Protestant and Catholic efforts at reform from the late Middle Ages to the seventeenth century.

**3535 Christianity in the Modern Era** is a study of Western Christianity from the Enlightenment to the twentieth century through an examination of institutional and intellectual developments as well as changes in popular religious consciousness and practice.

CR: the former RELS 3530, the former RELS 3595

**3560 Christian Thought in the Middle Ages** (same as Medieval Studies 3003) is a study of the development of Christianity in the West from the eleventh century to the eve of the Reformation, through an examination of its principal thinkers and the most significant societal forces and events: the crusades, the universities, monasticism, religious dissent, and mysticism.

CR: Medieval Studies 3003

**3600 Ancient Myth and Cult** (same as Classics 3600) develops the students' knowledge of myth and material culture by examining specific religious sites in the Greek and Roman world as foci of ritual practice. Students will learn to integrate knowledge of the physical remains with the literary and ritual evidence in order to obtain a more integrated understanding of religious life in ancient Greece and Rome.

CR: Classics 3600

**3640 Religion and Bioethics** is an examination of the religious ethics of health care in the light of foundational concepts of bioethics. Topics to be discussed will include the relation of religion and medicine, as well as specific issues such as abortion, euthanasia, and genetic engineering.

**3650 Religion and Social Justice** is a study of social justice issues that arise from an investigation of economic and political systems from the perspective of religious ethics. Topics addressed may include environmental ethics, ecofeminism, gender equity, pacifism, civil disobedience, poverty, and social welfare questions.

**3680 Religion and the Problem of Evil** is a study of religious approaches to the problem of evil. Attention will be paid to both traditional and contemporary efforts among the world's religions to address the problem.

CR: the former RELS 4800

**3800 Re/Presentations of Muslim Women: Gender, Colonialism and Islam** is presented in three parts. Firstly, there will be a grounding theoretically in Islam, Orientalism, feminism and contemporary political implications related to the study of Muslim women. Secondly, there will be a consideration of topics which have served as explanations for the "difference" of Muslim women in various contexts, both in contemporary Muslim majority and minority political situations. Lastly, the course concludes by considering a variety of contemporary ethnographic representations of Muslim women in Egypt, Palestine, France, Turkey, Cyprus and Malaysia.

**3810 Religion, Society, and Culture** is a study of modern attempts to analyze, interpret, and reassess the place and significance of religion in human life. Attention will be given to thinkers such as Nietzsche, Marx, Freud, and Durkheim.

CR: the former RELS 3531

**3811 Contemporary Alternative Spirituality** is an in-depth examination of one or more forms of contemporary alternative spirituality. Students will study the writings of practitioners of alternative spirituality, as well as social-scientific studies of alternative spiritual groups. Religious movements to be explored include African-American alternative spirituality, Mother Earth and Creation spirituality, Neo-paganism, the New Age Movement, UFO spirituality, and contemporary witchcraft.

**3812 Religion and Disney: Not Just Another Mickey Mouse Course** provides an in-depth examination of religious themes and issues arising from and within the philosophies of Walt Disney, the Disney animated films, other Disney feature films, and the Disney theme parks. Theoretical models drawn from the field of Religion and Popular Culture will provide the lens through which the religious dimensions of Disney and Disney fandom will be explored.

PR: completion of RELS 2812 is recommended but not required

**3820 Religion and the Arts** (same as Visual Arts 3820) is an examination of the role of art in the expression of religious ideas, together with a study of specific religious themes and concerns in one or more of the following: literature, film, music, painting, sculpture, and dance.

CR: Visual Arts 3820

**3830 Religion, Science and Technology** - inactive course.

**3840 Rites of Passage** is an introduction to the scholarly study of ritual, focusing on lifecycle transitions: birth and initiation rites, weddings, and funerals. In addition to studying practices from a range of religious traditions, consideration is given to contemporary images, perceptions, and stories of passage, as well as to classical rites of passage theory.

**3860 Implicit Religion: The Sacred in Secular Places** is an in-depth examination of the concept of implicit religion. The course will explore the concept of "the sacred" through an examination of the ideas of such theorists as Eliade, Turner, and Bailey and will examine the claims of some Religious Studies scholars that the sacred can be found in secular contexts.

**3880 Religion, Worldviews, and the Environment** examines the human connection to the natural world as expressed in traditional religions, indigenous worldviews and contemporary approaches to environmental crises.

**3900 Religion in Newfoundland and Labrador: Beginnings** is a study of religion and its role in Newfoundland society from the seventeenth century to the middle of the nineteenth century. Attention will be given to the origin, growth, and consolidation of the Anglican, Roman Catholic, Methodist, Moravian, and Congregational churches.

**3901 Religion in Newfoundland and Labrador: The Nineteenth and Twentieth Centuries** is a study of religion and its role in Newfoundland society from the middle of the nineteenth century to the present. The course will include the history of the Anglican, Roman Catholic, United (Methodist), Congregational, and Presbyterian churches in Newfoundland and the establishment and social significance of the Pentecostal movement and the Salvation Army.

**4001 Religious Texts and Traditions** is an advanced seminar course which examines religious texts from a variety of religious traditions. Study may involve an exploration of sacred texts, traditions, and their interpreters. Content will vary with instructor.

**4002 Religion, Culture, and Society** is an advanced seminar course which concerns religious themes and issues as they affect culture. Study may

involve the exploration of institutions, rituals, built environments, and spaces. Content will vary with instructor.

**4300-4330 World Religions: Special Subjects** are courses which will be offered at the discretion of the Department. They are designed to provide an opportunity for students majoring in Religious Studies or doing a strong concentration of courses in the area to pursue advanced study under tutorial supervision.

PR: permission of the Department

**4460 Vernacular Religion** (same as Folklore 4460) examines religion as it is "lived" on a daily basis, focusing primarily on forms of belief and spirituality that are informally expressed. Drawing upon various cultural contexts, the course addresses such notions as space and time; metaphysical powers; religious material culture, music, and verbal art; and the role and power of the holy person.

CR: Folklore 4460, the former Folklore 4240

**4500 and 4510 Seminar in the Philosophy of Religion** - inactive course.

**4801-4830 Religion, Ethics, and Modern Culture: Special Subjects** are courses which will be offered at the discretion of the Department. They are designed to provide an opportunity for students majoring in Religious Studies or doing a strong concentration of courses in the area to pursue advanced study under tutorial supervision.

PR: permission of the Department

**4902-4910 (Excluding 4904, 4905, 4906) Language Studies: Special Subjects** provide students with advanced training in languages necessary for studying ancient religious texts. The languages presently offered through the Department are Biblical Hebrew, Sanskrit, and Mandarin Chinese. In addition, courses in Latin and Greek are available from the Department of Classics. All sections of this course follow the Language Study Course Guidelines available at [www.mun.ca/hss/ls](http://www.mun.ca/hss/ls).

**4998 Comprehensive Examination for Honours Students** will be based on a program of assigned reading related to the general subject area of the student's dissertation.

**4999 Honours Essay for Honours Students** may be required as part of the honours program.

## 12.26 Russian

For Russian course descriptions see under **German**.

## 12.27 Sociology

Sociology courses are designated by SOCI.

**1000 Introduction to Sociology** is an introduction to the concepts, principles, and topics of Sociology. This course is a prerequisite to most departmental courses.

CR: the former SOCI 2000

**2100 Social Inequalities** introduces the subject of social inequality and stratification, examines social inequalities in historical perspective, reviews major theories about social inequalities, and considers key social developments in contemporary societies in the area of social inequalities.

**2110 Economy and Society** as its principle task, explores different links that exist between economy and society. Emphasis will be put on embeddedness of economic processes in a broader social context. Several approaches to the study of the embeddedness will be discussed: economic sociology, institutional economics, law and economics, and others. Do we really live in a network society, where the most important thing is to 'get connected'? How important is it to trust people in everyday life and to what extent? What role do power and coercion play in our everyday lives? The course will provide guidelines for finding tentative answers to these questions.

**2120 Technology and Society** is an examination of the role of technology in society and society's role in shaping technology. Topics may include the emergence of modern technological society, the impact of new technologies on social organization and culture, and the institutionalization of science and the production of scientific knowledge. The course also explores the ideological functions of science and technology.

**2210 Communication and Culture** (same as the former Sociology/Anthropology 2210 and the former Anthropology 2210) is an examination of verbal and non-verbal systems of communication, and the influence of language on human cognition.

CR: the former Sociology/Anthropology 2210, the former Anthropology 2210

**2230 Newfoundland Society and Culture** (same as Folklore 2230, the former Sociology/Anthropology 2230, and the former Anthropology 2230) focuses on the social and cultural aspects of contemporary island Newfoundland.

CR: Folklore 2230, the former Sociology/Anthropology 2230, the former

## Anthropology 2230

**2240 Canadian Society and Culture** (same as the former Sociology/Anthropology 2240 and the former Anthropology 2240) is a descriptive and analytic approach to the development of Canadian society and culture.

CR: the former Sociology/Anthropology 2240, the former Anthropology 2240

**2250 Changing World** is a sociological analysis of contemporary world issues and social problems.

**2270 Families** (same as the former Sociology/Anthropology 2270 and the former Anthropology 2270) is a comparative and historical study of the family, and the range of variation in its processes and structure.

CR: the former Sociology/Anthropology 2270, the former Anthropology 2270

**2290 Animals and Society** introduces students to contemporary sociological approaches to the study of the relationship between human and non-human animals.

**2300 Criminological Inquiry** introduces students to sociological models for understanding the phenomenon of "crime." As a background for developing theory, this course will familiarize students with the problems inherent in defining what it is we mean by "crime." Once the underlying premises of the theories are tackled, students critically examine each theoretical perspective with a focus on assessing the validity of the approach, and how the theory works to guide public policy.

CO: SOCI 1000

**3030 Political Sociology** is an introduction to the sociological foundations of political life. Topics to be examined include voting behaviour, comparative power systems, ideologies, mass movements, parties, voluntary associations, and bureaucracies. Attention is given to the concepts of class, status, command, power, authority, and legitimacy.

CR: the former Political Science 3030

PR: SOCI 1000 or the former 2000

**3040 Introduction to the Methods of Sociological Research** provides familiarization with the processes and reasoning sociologists use for posing and answering sociologically grounded questions. Both qualitative and quantitative research design and analysis will be explored. We take you 'behind the scenes' of the research process to provide foundational research skills, familiarity with interpreting and gathering numerical data, and a stronger capacity for students to critically evaluate the research-based writing in sociology. All sections of this course follow Quantitative Reasoning Course Guidelines available at [www.mun.ca/hss/qr](http://www.mun.ca/hss/qr).

CO: SOCI 3041

PR: SOCI 1000 or the former 2000

**3041 Theory and Practice of Sociological Research** develops and elaborates upon work introduced in SOCI 3040. Students will more deeply explore the theories of knowledge that underpin social research and further hone their abilities to assess different forms of sociological work and to craft research questions. This course includes lectures, discussion, and introductory hands-on experience with both qualitative and quantitative research and analysis. Instruction takes place in a classroom equipped with the computer hardware and relevant software. All sections of this course follow Quantitative Reasoning Course Guidelines available at [www.mun.ca/hss/qr](http://www.mun.ca/hss/qr).

CO: SOCI 3040

PR: SOCI 1000 or the former 2000

**3120 Social Psychology** examines sociological perspectives on social psychology: the physiological and psychological basis of sign and symbol use, the context and emergence of self, identity, role, encounters, social relationships, altercasting.

**3130 Sociology of Gambling** provides a critical overview of the major social and cultural aspects of modern gambling in terms of leisure, work and economic development, social inequality, health and illness, deviance and crime, and policy. Special attention is directed at the promotion of modern gambling by the state (lotteries, casinos, video lottery terminals, slot machines, and horse racing).

**3140 Social Movements** (same as the former Sociology/Anthropology 3140 and the former Anthropology 3140) examines the major social movements that have driven social changes related to gender equality, social justice, human rights, and the environment. The course asks why people become involved in social movements, and what factors contribute to movement success. The course also examines social movements' use of mass media and new media technologies as tools for reaching the public and provoking social and cultural transformation.

CR: Sociology/Anthropology 3140, the former Anthropology 3140

**3150 Classical Social Theory** is an introduction to the work of major 19th and early 20th-century social theorists including Marx, Durkheim, and Weber.

PR: SOCI 1000 or the former 2000

**3160 Contemporary Social Theory** is an exploration of selected topics from issues in contemporary social theory, including theories of feminism, the state, the environment, culture, organization, and communication.

PR: SOCI 1000 or the former 2000, and SOCI 3150

**3180 Minority Groups** examines the nature of minority group status in society and various examples of minority groups in past and present societies, reviews theoretical perspectives on minority groups, and explores various aspects of the relationship between minority groups and the rest of society.

CR: the former SOCI 3304

PR: SOCI 1000 or the former 2000

**3200 Population** is an introduction to demography, the scientific study of human populations, their size and composition, and the processes by which they change over time: nuptially, fertility, mortality, and migration. Includes analyses of past and present Newfoundland and Labrador populations.

PR: SOCI 1000 or the former 2000

**3220 Work and Society** (same as the former Sociology/Anthropology 3220 and the former Anthropology 3220) is an historical and comparative perspective on the cultural and social organization of work, its determinants and human implications.

CR: the former Sociology/Anthropology 3220, the former Anthropology 3220

PR: SOCI 1000 or the former 2000

**3260 International Development** (same as Anthropology 3260) is an examination of theories of development including a critical analysis of international case studies.

CR: Anthropology 3260, the former Sociology/Anthropology 3260

**3290 Deviance** examines major sociological theories and methodological techniques central to the study of deviance and crime. The distribution, attributes and explanations of a variety of forms of deviance are examined, which may include violence, sexual deviance, delinquency, addiction, mental disorder, theft, organized crime, political deviance and corporate deviance.

PR: SOCI 1000 or the former 2000

**3300-3313 Sociological Specialties** will have a topic of current interest and importance, announced by the Department for each term, such as racial and ethnic relations, sociology of religion, health, art, language, conflict, stratification, knowledge, selected social problems.

**3317 Oil and Society** (same as the former Sociology/Anthropology 3317 and the former Anthropology 3317) is an examination of the sociology of the Western oil industry and of the social and cultural implications of oil activities for those regions in which they occur. Particular attention will be paid to North Atlantic societies: Scotland, Norway, and Atlantic Canada.

CR: the former Sociology/Anthropology 3317, the former Anthropology 3317

PR: SOCI 1000 or the former 2000

**3318 Culture and Aging** (same as the former Sociology/Anthropology 3318 and the former Anthropology 3318) is an Introduction to the study of aging from a social and cultural perspective. Distinctions between the biological and social elements of the aging process will be examined. The overview of social and cultural gerontology includes social, economic and political influences on later life, as well as the culture-based needs and aspirations of the aged.

CR: the former Sociology/Anthropology 3318, the former Anthropology 3318

PR: SOCI 1000 or the former 2000

**3320 Terrorism and Society** (same as the former Sociology/Anthropology 3320 and the former Anthropology 3320) is an examination of the recourse to violence as a recurring phenomenon in social and political movements. Consideration will be given to problems of classifying and explaining various forms of "terrorism", and to discussing their consequences for society.

CR: the former Sociology/Anthropology 3320, the former Anthropology 3320

PR: SOCI 1000 or the former 2000

**3395 Criminal Justice** provides an introduction to the sociological perspectives on our system of formal social control (police, courts, corrections). Special attention is directed at how social structure and social inequality (class, ethnicity and race, gender) influence criminal justice decisions. Topics discussed include public opinion on crime and criminal justice, offenders and victims in the system, consensus and conflict in the creation of criminal law, finding a delicate balance between police powers for crime control and democratic rights, types of sentencing options and rationales, and the dual and conflicting goals of prisons and alternatives to incarceration.

PR: SOCI 1000 or the former 2000, and SOCI 3290

**3400 Sociology of Youth** explores the social construction of youth and reviews major theoretical approaches to the study of youth within Western Society. The course examines youth in relation to culture and identity, place and space, social inequalities, and social institutions.

**3410 Sociology of Sport** (same as Human Kinetics and Recreation 3410) is an examination of the relationship between sport and society. Areas could include social origin of sport, social history of sport, religion and sport, sport and socialization, sport and social stratification, gender and sport, violence in sport, sport and nationalism.

CR: Human Kinetics and Recreation 3410  
PR: SOCI 1000 or the former 2000

**3420 Sociology of Gender** provides a comprehensive introduction to the major themes, theories and research questions addressed by sociologists studying 'gender'. The economic, social, cultural and political aspects of gender formations, in comparative Canadian and transnational contexts, will be examined.

**3630 New Media Methods in Social Research** (same as Anthropology 3630) will explore non-print means for recording social behavior and will utilize various forms of the media as a descriptive and an analytic tool.

CR: Anthropology 3630, the former Sociology/Anthropology 3630  
PR: SOCI 1000 or the former 2000

**3710 Post-Soviet Transformations** will explore problems of development in post-Soviet countries, examining them in a broader context of modernization. 'Catch-up' modernization gives rise to a set of problems related to institutional importation, e.g., a gap between formal and informal institutions. These problems exist in Russia as well as in a number of other less-developed countries.

PR: SOCI 1000 or the former 2000

**3731 Sociology of Culture** is a comparative examination of major contemporary sociological texts on the relationship between culture, broadly understood as symbolic systems, and social structure

**4040 Investigative Methods in Sociological Research** provides more advanced undergraduate-level study and practice in a variety of qualitative and quantitative sociological research methods. It will cover stages from conceptualization to empirical studies. The seminar format may include lectures, discussion and a range of research methods exercises.

PR: SOCI 3040, 3041

**4071 Social and Cultural Aspects of Health and Illness** (same as Anthropology 4071) will cover topics which may include: cultural concepts of illness and health; theories of disease causation; relationships between social life and illness patterns; symbiotic use of illness; variations in philosophies of treatment and in practitioner/patient relationships; the social organization of medicine.

CR: Anthropology 4071, the former Sociology/Anthropology 4071  
PR: SOCI 3040, 3150

**4074 Ritual and Ceremony** (same as the former Sociology/Anthropology 4074 and the former Anthropology 4074) is about ritual and ceremony, as both analytic and descriptive concepts, in both industrial states and subsistence-oriented societies. Topics examined could include: the universality of ritual and ceremony; essential differences between ritual and ceremony; their relative importance in non-industrialised and industrialised societies; the place of symbolism in ritual and ceremony; and the relationship between ritual, ceremony, religion and the sacred.

CR: the former Sociology/Anthropology 4074, the former Anthropology 4074

PR: SOCI 3040, 3150

**4077 Advanced Studies in Terror and Society** - inactive course.

**4080 Advanced Topics in Criminology** covers an array of theoretical and empirical developments in sociology and criminology that cross boundaries within the diverse systems of criminal justice, the community and society more broadly. Special emphases will be placed on the experiences of those in the criminal justice system - as victims, offenders, and professionals - and theories of desistance, as well as the intersection of gender with race, ethnicity and class.

PR: 6 credit hours in Sociology. Enrollment priority will be given to students who have declared a Sociology Major and/or the Criminology certificate program.

**4091 Oil and Development** (same as the former Sociology/Anthropology 4091 and the former Anthropology 4091) is an advanced seminar which will consider some selected topics dealing with the petroleum industry and its implications for economic development and social change. A comparative approach will be taken, using material from developed, underdeveloped and intermediate regions of the world.

CR: the former Sociology/Anthropology 4091, the former Anthropology 4091

PR: SOCI 3040, 3150

**4092 Gender and Social Theory** (same as the former Sociology/Anthropology 4092 and the former Anthropology 4092) is a seminar which examines assumptions about what constitutes 'social theory', the history of social thought as it applies to issues of gender, and the debates surrounding the intersection of gender and social theory. The goal is to understand more about ways in which social theory has illuminated relations between gendered categories, the social world and its diverse inhabitants.

CR: the former Sociology/Anthropology 4092, the former Anthropology 4092

PR: SOCI 3040, 3150, 3420 or permission of the instructor

**4093 Development Sociology** is a seminar course focusing on theoretical and empirical explanations of development (eg. International development, foreign aid, and trade). The course provides students with an understanding of how the theories, actors, and ongoing challenges of development shape societies globally.

PR: 6 credit hours at the 3000-level in Sociology or in any other discipline in the Humanities or Social Sciences

**4094 Unemployment (and Underemployment)** is a seminar which examines the origins and impacts of unemployment and underemployment in Newfoundland and Labrador, Canada and globally. It examines the core concepts in the sociology of unemployment and underemployment and then moves to consider the consequences for societies, communities and individuals.

PR: SOCI 3040, 3150

**4095-4099 (Excluding 4096) Special Areas in Sociology** will have the content announced when offered.

PR: SOCI 3040, 3150

**4100 Internship** is a part-time, one-semester internship course, and is normally an unpaid supervised field placement for academically strong sociology majors. The goal is to help give students basic skills required for employment in nonprofit organizations in the social services and arts management.

UL: six hours per week of worksite activities over a period of eight weeks as well as classroom instruction during part of the term

**4100-4109 (Excluding 4100, 4101, 4104 and 4107) Special Topics in Institutional Analysis** is advanced analysis from a sociological perspective of issues pertaining to specific social institutions.

PR: SOCI 3040, 3150

**4101 Modern Western State** provides a selective overview of some of the sociological debates surrounding the modern Western state. Topics may include the history and development of the modern Western state; sociological theories of the state; the state and the economy; and the state and globalization. Through this course, students will learn how the distribution of power in societies influences the character of the state and government decision making.

PR: SOCI 3040, 3150

**4104 Environmental Sociology** examines the social forces that drive environmental degradation and responses to environmental issues. The course explores how environmental issues, such as climate change, fisheries collapse, or deforestation, are intertwined with systems of social power and inequality. Through this course, students will learn how a sociological perspective helps address the causes and potential solutions for environmental problems and conflicts.

CO: SOCI 3040, SOCI 3150 and 3 additional credit hours in Sociology courses at the 3000 level, or permission of the course instructor

PR: SOCI 3040, SOCI 3150 and 3 additional credit hours in Sociology courses at the 3000 level, or permission of the course instructor

**4107 Feminist Technologies** (same as the former Women's Studies 4107) investigates the effects of technology on women's lives and technologies that exemplify feminist values and ideology. Topics could include: The history of domestic and workplace technology; assessing, designing, and building technologies from a feminist perspective; the gender politics of technological systems; information technologies; biotechnology and ecology; development in architecture and design. The course combines seminar discussions of reading with hands-on activities.

CR: the former Women's Studies 3009, the former Women's Studies 4107

PR: 9 credit hours in any combination of SOCI, Gender Studies, Communication Studies 2000, Communication Studies 2001

**4200-4220 (Excluding 4201, 4204, 4208, 4212 and 4213) Special Topics in Sociology** will have topics to be studied announced by the Department.

PR: SOCI 3040, 3150

**4201 The Sociology of Gender, Health and Risk** is a seminar course that critically examines how gender structures risk factors and health outcomes and shapes how we experience and understand bodies and minds in relation to health and risk. Topics may include transgender and transsexual health, masculinities and femininities, the body, mental health, leisure and sport, the health care system, and occupational health and safety.

PR: SOCI 3040, 3150

**4208 Gender, Poverty and Homelessness** is a critical sociology seminar using an intersectional approach to examine issues confronting the wide diversity of people living in poverty in the contemporary Canadian welfare state. Topics include pathways to poverty, health and quality of life, impact of gender and other social locations on poverty, civil society responses, social policy and actions, and the provision of financial, human, and social program resources in Canada and Newfoundland and Labrador.

**4210 The Sociology of Child Sexual Abuse** is an advanced seminar that explores how sexual violence toward youth is constructed as a social problem. Topics include: theoretical and methodological explanations of child sexual abuse (including methodological issues on collecting data on youth, cross-cultural research), relationships between adult sexual violence and child sexual abuse, sexual perpetrators and pedophiles, the place of children in contemporary society, the experiences of child victims and professional responses to child sexual abuse.

PR: SOCI 3040, 3150

**4212 Sociology of Policing** is a seminar course exploring the role policing plays in society, the social, economic, and political factors that shape policing, and the policies to improve policing. Topics may include popular views of the police, the use of force in arrest and public protest, investigative myths and effectiveness, community policing, police socialization, policing problems such as family violence, police misconduct, gender and diversity in police services and the expansion of private policing.

PR: SOCI 3040, 3150

**4213 Sociology of Sexuality** explores the socially constructed nature of sexuality, and examines how concepts of sexuality are used in the current North American context as well as across different times and cultures. The course explores sex and sexuality in connection to community and identity, social problems, social control, and political resistance.

PR: SOCI 3040, 3150

**4230 Gender and Development** is a seminar course focusing on theoretical and empirical explanations of how development processes affect gender inequality and relations between men and women. The course provides students an understanding of how the theories, actors, and ongoing challenges of development interact with and work to shape socially constructed gender relations in a global perspective. Special attention is paid to how globalization influences gender in the development context.

CR: the former SOCI 4204

PR: SOCI 3040, 3150

**4240 Development Issues and Policies in Newfoundland and Labrador** is a senior-level seminar course that focuses on the interaction between sociological research and theory on the one hand and government policymaking and implementation on the other with respect to social and economic development in Newfoundland and Labrador.

PR: SOCI 3040, 3150

**4995 Honours Essay** is a part of the honours program.

## 12.27.1 Police Studies

Police Studies courses are designated by PLST.

**2000 An Introduction to Policing in Canada** will introduce students to different theories and models of policing. It will examine the organization of policing, its mandate and operation. It will provide an overview of the history and development of policing in Canada; examples from Newfoundland and Labrador will be used where appropriate. It will discuss the various roles and responsibilities of the police in society. It will explore the issue by police decision making, the exercise of police powers, and the use of discretion by police officers. Several other issues relating to policing will be discussed including police recruitment and training, the professional role of the police, stress on the job and policing in a diverse society.

**2200 Introduction to Corrections** introduces students to the Correctional Systems in Canada and their role in Canadian Criminal Justice. Topics covered in this course include: the evolution of punishment and corrections in Canada, the purpose of prison, the classification of federal prisoners, the prisoner subculture or 'inmate' code, violence inside prisons, and community corrections after full custody incarceration.

**3000 Crime Victims and Policing** will provide an opportunity to explore contemporary victim issues, in particular, as they relate to enhancing police response and sensitivity to the needs of victims. The course will explore different types of victimization, encourage critical analysis and understanding of the impact of the CJS on victims and the role of the victim in bringing about progressive and positive changes in the CJS. It will consider recent legislative developments, programs, services and emerging issues and discuss how victim engagement can promote public confidence in the administration of justice.

PR: PLST 2000

**3100 Gender, Crime and Criminal Justice** examines the gendered aspects

of criminal offending, victimization, criminal justice responses (police, courts, corrections), and workers in the criminal justice system.

PR: PLST 2000

**3200 Internship** - inactive course.

**3500 Investigative Interviewing** will introduce students to investigative interviewing. It covers a range of topics that will help develop and/or improve the interviewing skills of those working in various disciplines where professional interviewing skills are essential.

PR: PLST 2000

**3600-3610 Special Topics** will cover special topics related to policing and will be announced by the Program Coordinator.

**4000 Advanced Issues in Policing** provides in depth discussion of various aspects of policing. It will discuss how social, economic and political factors influence the challenges of policing in a democratic society. It will look at police powers of arrest, search and release and how they are affected by the Charter of Rights and Freedoms. The different types of offences found in the Criminal Code and the special knowledge required to police them will be covered. The course will consider the use of police discretion, police misconduct and accountability and ethics in policing. It will also look at officer safety and stress in the work place. Several special topics related to policing will be discussed including: policing persons with mental illness, policing drug related offences, and policing racially diverse communities.

PR: PLST 2000 and 3 credit hours at the 3000-level in Police Studies

**4001 Police Decision Making and Ethics** provides students with the tools to locate, critically review, and summarize the findings and practical implications of police research on key topics. These topics include the influence of discretion on police powers and the importance of ethics and accountability in policing. The course will also discuss police officer stress and how it is influenced by ethical dilemmas. Examples of misuse of discretion and ethical dilemmas will be discussed.

PR: PLST 2000 and 3 credit hours at the 3000-level in Police Studies

**4100-4110 Special Topics** will cover special topics related to policing and will be announced by the Program Coordinator.

PR: PLST 2000 and 3 credit hours at the 3000-level in Police Studies

## 12.28 Spanish

For Spanish course descriptions see under **French**.

## 12.29 University

University courses are designated by UNIV.

**1010 The University Experience** helps students develop the skills and strategies that will benefit them as they make the transition from high school to university. Class activities and assignments focus on critical and creative thinking, communication skills, self-awareness, information literacy, and the ability to work in teams. Students will explore the campus community and examine the role the university plays in our society.

**1020 Critical Reading and Writing: A Path to Future Studies** broadens students' understanding of the multi-disciplinary nature of the university. Concentrating on reading and writing activities in multiple media, students will see how dialogue and text are involved in defining, creating, supporting, debating, refining, and disseminating research-based knowledge. The course offers students an opportunity to improve their own skills in an active and collaborative learning environment. All sections of this course follow Critical Reading and Writing Course Guidelines available at [www.mun.ca/hss/crw/](http://www.mun.ca/hss/crw/).

CR: the former UNIV 2020

**1500 Introduction to Critical Reading and Writing in University** (same as the former Arts 1500) introduces students to some of the processes, techniques and standards of university-level critical reading and writing. Students will engage in the practices of critical reading and pre-writing, drafting, revising and editing texts. An emphasis will be placed on using writing in response to critical reading exercises. All sections of this course follow Critical Reading and Writing Course Guidelines available at [www.mun.ca/hss/crw/](http://www.mun.ca/hss/crw/).

CR: the former Arts 1500

PR: restricted to students with fewer than eighteen credit hours

*N.B. Designation "Clinical" indicates a part-time appointment.*

**Dean of Medicine**

Rourke, J.T.B., M.D. *Western, CCFP(EM), MCIsc(FM), FCFP*

**Vice Dean**

Vardy, C., M.D. *Memorial, FRCPC*

**Associate Dean of BioMedical Sciences**

Paterno, G.D., B.Sc., M.Sc. *Toronto, Ph.D. Ottawa*

**Associate Dean of Clinical Research**

Rahman, P., M.D. *Memorial, M.Sc. Toronto, FRCPC*; Recipient of the President's Award for Outstanding Research, 2003-2004; University Research Professor, Awarded 2012

**Associate Dean of Community Health and Humanities**

Mulay, S., B.Sc. *Delhi, India, M.Sc., Ph.D McGill*

**Associate Dean of Educational Development**

Curran, V.R., B.A. *Memorial, Dip.Ad.Ed. St. Francis Xavier, M.Ed. Dalhousie, Post Grad. Cert. U.B.C., Ph.D. Guelph*

**Associate Dean of Research and Graduate Studies (Medicine)**

Tabrizchi, R., B.Sc.(Hons.) *Sunderland, M.Sc., Ph.D. British Columbia*

**Associate Dean of Undergraduate Medical Education**

McKay, D.W., B.S., M.S., Ph.D. *Michigan State*

**Assistant Dean of Admissions**

Parsons, W., M.D. *Memorial, C.C.F.P.*

**Assistant Dean of Graduate Studies (Medicine)**

Doré, J., B.Sc.(Hons.) *UBC, M.S. Florida, Ph.D. Tennessee*

**Assistant Dean of New Brunswick**

Laughlin, T., M.D. *Dalhousie*

**Assistant Dean of Post-Graduate Medical Education**

Samarasena, L.D.A., M.B., B.S. *Ceylon, F.F.A.R.C.S. Ireland, FRCPC*

**Assistant Dean of Rural Clinical School Medical Education Network**

Ravilia, M., M.B.Ch.B.(Hons.) *University of Rhodesia, LRCP(Ed) Zimbabwe*

**Assistant Dean of Student Affairs**

Moffatt, S. M., B.Sc. *Acadia, B.A. New Brunswick, M.D. Memorial, C.C.F.P., F.C.F.P.*

**Director of Administrative Services**

Peddigrew, G., B.Comm. *Memorial*

**Manager, Academic Affairs**

Corbett, P., B.Voc.Ed. *Memorial*

**Manager, Human Resources**

Norman, J., B.B.A. *St. Francis Xavier*

**Division of BioMedical Sciences**

**Associate Dean & Professor of Oncology**

Paterno, G.D., B.Sc., M.Sc. *Toronto, Ph.D. Ottawa*; Cross appointment with Discipline of Oncology

**Professores Emeriti**

Allderdice, P., M.A. *Chicago, M.S. Utah, Ph.D. Montana*

Bieger, D., M.D., Ph.D. *Kiel*

Hansen, P., B.Sc. *University of Akron, OH, B.S.(Biochemistry) University of Akron, Ph.D. Memorial*; Recipient of the President's Award for Distinguished Teaching 1991

Orr, J.C., B.Sc. *London, Ph.D. Glasgow, A.R.C.S.*

Tomlinson, J.D.W., M.A., M.B., B.Chir. *Cambridge*

**Professor of Neuroscience and Anatomy**

McLean, J., B.Sc. *New Brunswick, Ph.D. Dalhousie*

**Professors of Anatomy**

Chandra, S., M.B., B.S. *New Delhi*

Harris, J.A., B.Sc. B.Med. Sc., M.D., B.P.E. *Memorial, Dip. Med.Ed. Dundee*

**Professor of Neuro/Molecular Biology**

Mearow, K.M., B.Sc., M.Sc. *Brock, Ph.D. McMaster*

**Professor of Molecular Virology and Medicine (Hepatology)**

Michalak, T.I., M.D., Ph.D. *Warsaw*; Canada Research Chair Tier I in Molecular Virology

**Associate Professor of BioMedical Sciences**

Dorward, A.M., B.Sc., Ph.D. *McMaster*; Cross appointment with Genetics

**Professors of Immunology**

Grant, M., B.Sc., M.Sc. *British Columbia, Ph.D. McMaster*; Joint appointment with Laboratory Medicine

Hirasawa, K., Bc.D., Ph.D. *Tokyo*

**Associate Professors of Immunology**

Drover, S., M.Sc., Ph.D. *Memorial*

Larjani, M., B.Sc.(Hons.), Ph.D. *Toronto*; Recipient of the President's Award for Outstanding Research, 2012-2013

Russell, R., M.Sc. *Memorial, Ph.D. McGill*

**Professor of Endocrinology**

Carayanniotis, G., B.Sc. *Patras, Ph.D. Toronto*; Joint appointment with Medicine

**Professors of Oncology**

Church, J., B.Sc.(Hons.) *Queen's, M.Sc., Ph.D. Toronto*

Gillespie, L.L., B.Sc., Ph.D. *Ottawa*

Kao, K.R., B.Sc., M.Sc., Ph.D. *Toronto*

Paterno, G.D., B.Sc., M.Sc. *Toronto, Ph.D. Ottawa*; Cross appointment with Discipline of Oncology

**Professor of Cancer/Cardiovascular Biology**

Gendron, R., B.Sc., Ph.D. *McGill*; Cross appointment with Discipline of Oncology

**Professor of Vascular Molecular Biology/Pediatric Cancers**

Paradis, H., B.Sc., Ph.D. *Montreal*

**Associate Professor of Cardiovascular Cellular and Molecular Physiology**

Stuyvers, B.D., B.Sc., M.Sc., Ph.D. *Bordeaux, France*

**Associate Professor of Cell Biology**

Doré, J., B.Sc.(Hons.) *University of British Columbia, M.S. Florida, Ph.D. Tennessee*

**Professor of Pharmacology (Cardiovascular)**

Tabrizchi, R., B.Sc.(Hons.) *Sunderland, M.Sc., Ph.D. British Columbia*; Cross appointment with Discipline of Anesthesia

**Professor of Physiology**

McKay, D.W., B.Sc., M.S., Ph.D. *Michigan State*

**Assistant Professor of Cardiovascular Sciences**

Qi, D., B.Med.(M.D.) *China, M.Sc., Ph.D. University of British Columbia*

**Associate Professor of Cardiovascular Sciences**

McGuire, J.J., B.Sc.(Hons.), Ph.D. *Queen's University at Kingston, M.B.A. Memorial*

**Professor of Neurosciences**

Hirasawa, M., Bc.D., Ph.D. *Tokyo*

**Associate Professor of Neurosciences**

Vanderluit, J.L., B.A./BPHED *Ontario, M.Sc. Ottawa, Ph.D. British Columbia*

**Assistant Professor of Neurosciences**

Moore, C.S., B.Sc.(Hons.) *New Brunswick, Ph.D.(Pharmacology) Dalhousie*; Canada Research Chair Tier II in Neuroscience & Brain Repair; Cross appointment to Discipline of Medicine (Neurology)

Parsons, M., B.Sc. (Hons.), MSc, Ph.D. *Memorial*

**Professors of Cardiovascular/Renal Physiology**

Smeda, J., B.Sc.(Hons.), M.Sc. *Brock, Ph.D. McMaster*

Van Vliet, B.N., B.Sc. *Toronto, Ph.D. Saskatchewan*

**Professor (Biological Psychiatry)**

Chen, X., M.B. *China, Ph.D. Cambridge*; Joint appointment with Psychiatry

**Professor (Oncology Research)**Richardson, V.J., B.Sc., Ph.D. *Sheffield***Cross Appointed from Biochemistry**

Brosnan, M.E., B.A.(Hons.), M.Sc., Ph.D. *Toronto*

#### Clinical Lecturers of Family Medicine

Irfan, M., M.B.B.S. *Sri Lanka*, C.C.F.P.  
 Oldford, J., M.S.W., R.S.W. *Toronto*; Joint appointment with  
 Discipline of Psychiatry

#### Professional Associate

Cahill, D., Nurse Practitioner

#### Genetics

[www.med.mun.ca/genetics](http://www.med.mun.ca/genetics)

#### Professor and Chair

Fernandez, B., M.D. *Memorial*, FRCPC, FCCMG *Toronto*

#### Professor Emeritus

Ives, E.J., M.B., Ch.B. *Glasgow*, DCH *London*, MS *Michigan*,  
 FRCPC

#### Professors of Genetics

Green, J., M.Sc. *British Columbia*, Ph.D. *Memorial*  
 Young, T., B.Sc.(Hons.), Ph.D. *Memorial*; Recipient of the  
 President's Award for Outstanding Research, 2009

#### Associate Professors of Genetics

Savas, S., B.Sc., M.Sc., Ph.D. *Bogazici, Turkey*  
 Turner, L., M.D., FRCPC *Memorial*, FCCMG *British Columbia*  
 Woods, M., B.Sc., Ph.D. *Memorial*  
 Zhai, G., M.B.B.S. *China*, M.Sc. *Netherlands*, Ph.D. *Australia*

#### Cross Appointed from Laboratory Medicine

Han, F-Y, M.D. *Henan*, FCCMG *McGill*  
 Randell, E., B.Sc.(Hons.), Ph.D. *Memorial*, DCC, FCACB *Toronto*  
 Xie, Y-G., M.D. *Henan*, Dr.Med. *Zurich*, FCCMG *Queen's*

#### Cross Appointed from BioMedical Sciences

Dorward, A.M., B.Sc., Ph.D. *McMaster*

#### Cross Appointed from Clinical Epidemiology

Hodgkinson, K., B.Sc., M.Sc., Ph.D. *Memorial*

#### Cross Appointed from Computer Science and Biology

Peña-Castillo, L., B.Eng., M.Sc., Ph.D. *Otto-Von-Guericke-  
 Universität*

#### Cross Appointed From Medicine

Feldman, R., M.D. FACP, FAHA, FRCPC *Queen's, Kingston*  
 Rahman, P., M.D. *Memorial*, M.Sc. *Toronto*, FRCPC; Recipient of  
 the President's Award for Outstanding Research, 2003-2004;  
 University Research Professor, Awarded 2012

#### Jointly Appointed with Department of Mathematics and Statistics

Yilmaz, Y., B.Sc., M.Sc.(Statistics) *Middle East Technical  
 University*, Ph.D. *Waterloo*

#### Medicine

[www.med.mun.ca/DisciplineOfMedicine](http://www.med.mun.ca/DisciplineOfMedicine)

#### Professor and Chair

Feldman, R.D. M.D. *Queens*, FACP, FRCPC; Cross appointments  
 with Biomedical Science and Genetics

#### Professor and Vice Chair

Goodridge, A.E., M.D. *Memorial*, FRCPC; Recipient of the  
 President's Award for Distinguished Teaching, 1998

#### Professores Emeritis

Bowmer, M.I., B.Sc., M.D., C.M. *McGill*, FRCPC  
 Pryse-Phillips, W.E.M., M.D. *London*, M.R.C.P., FRCPC, Neuro.,  
 M.R.C. Psych., F.R.C.P.  
 Vasdev, S.C., B.Sc., M.Sc., Ph.D., D.V.M. *Punjab*

#### Professors of Medicine

Carayanniotis, G., B.Sc. *Patras*, Ph.D. *Toronto*; Joint appointment  
 with BioMedical Sciences  
 Fernandez, B., M.D. *Memorial*, FRCPC, FCCMG *Toronto*; Joint  
 appointment with Genetics  
 Peters, S., M.D. *Memorial*, MPH *Medical College of Wisconsin*,  
*Milwaukee*, FRCPC  
 Sun, G., M.D. *CMU China*, Ph.D. *Hirosaki U, Japan*  
 Xie, Y., M.D., Dr. Med Sci., FCCMG; Cross appointments with  
 Pediatrics and Genetics

#### Professor of Medicine (Cardiology)

Sussex, B.A., M.B.B.S. *Melbourne*, M.Sc. *Alberta*, FRCPC

#### Professor of Medicine (Dermatology)

Gulliver, W.P., B.Sc., B.Med.Sc., M.D. *Memorial*, FRCPC

#### Professor of Medicine (Endocrinology)

Kovacs, C.S., M.D., B.A. *Queen's*, FRCPC; Cross appointments to  
 Obstetrics & Gynecology and BioMedical Science; Recipient of  
 the President's Award for Outstanding Research, 2002-2003;  
 University Research Professor, Awarded 2014

#### Professors of Medicine (Gastroenterology)

Burse, R.F., B.Sc., M.D. *Memorial*, FRCPC  
 Fardy, J.M., B.Med.Sc., M.D. *Memorial*, M.Sc. *Western Ontario*,  
 FRCPC

#### Professors of Medicine (Nephrology)

Barrett, B.J., M.B., B.Ch., B.A.O. *Cork*, M.Sc., FRCPC  
 Harnett, J., M.B., B.Ch., B.A.O. *Cork*, F.R.C.P.I., FRCPC  
 Parfrey, P., M.B., B.Ch., M.D. *Cork*, M.R.C.P., FRCPC; University  
 Research Professor, Awarded 1995; Recipient of the John  
 Lewis Paton Distinguished University Professorship, 2013-2014

#### Professor of Medicines (Neurology)

Ogunyemi, A.O., M.B., B.S. *University of Lagos*, FRCPC

#### Professor of Medicine (Respirology)

Fox, G.A., B.Sc., B.Med.Sc., M.D. *Memorial*, FRCPC

#### Professor of Medicine (Rheumatology)

Rahman, P., M.D. *Memorial*, M.Sc. *Toronto*, FRCPC; Cross  
 appointment with Genetics; Recipient of the President's Award  
 for Outstanding Research, 2003-2004; University Research  
 Professor, Awarded 2012

**Associate Professors of Medicine**

MacDonald, S.M., B.Sc.N., M.D. *McMaster*, C.C.F.P.; Joint appointment with Family Medicine  
Mugford, G., B.Sc., Ph.D. *Memorial*  
Trahey, J., B.Med.Sc., M.D. *Memorial*

**Associate Professor of Medicine (Cardiology)**

Connors, S., D.Phil. *Oxford*, M.D. *Memorial*, FRCPC

## 1 The Memorial University of Newfoundland Code

The attention of all members of the University community is drawn to the section of the University Calendar titled **The Memorial University of Newfoundland Code**, which articulates the University's commitment to maintaining the highest standards of academic integrity.

## 2 Student Code of Conduct

Memorial University of Newfoundland expects that students will conduct themselves in compliance with University Regulations and Policies, Departmental Policies, and Federal, Provincial and Municipal laws, as well as codes of ethics that govern students who are members of regulated professions. The *Student Code of Conduct* outlines the behaviors which the University considers to be non-academic misconduct offences, and the range of remedies and/or penalties which may be imposed. Academic misconduct is outlined in **UNIVERSITY REGULATIONS - Academic Misconduct** in the University Calendar.

For more information about the *Student Code of Conduct*, see [www.mun.ca/student/conduct](http://www.mun.ca/student/conduct).

## 3 Background

The Faculty of Medicine of Memorial University of Newfoundland is one of 17 Canadian medical schools and was one of the four schools suggested by the Hall Royal Commission on Canadian Health Services in its 1964 report.

A series of meetings was begun in 1963 between representatives of Memorial University of Newfoundland, the Newfoundland Medical Association, and the Department of Health of the Government of Newfoundland and Labrador. Following the Hall Commission's recommendation and on the basis of positive advice from Dr. J. Wendell MacLeod, Executive Secretary of the Association of Canadian Medical Colleges, and Dr. Chester B. Stewart, Dean of Medicine at Dalhousie University, Halifax, Nova Scotia, Memorial University of Newfoundland established a Commission in 1965 to undertake a feasibility study. The late Dr. J.A. MacFarlane, formerly Dean of Medicine at the University of Toronto, and a member of the Hall Royal Commission served as chairman. The MacFarlane Commission's recommendation that a Medical School be established at Memorial University of Newfoundland was confirmed independently by a Royal Commission on Health Services for Newfoundland and Labrador. The chairman of this latter Commission, Lord Brain, an eminent British medical educator, and his advisors, reported that the location of a medical school in the Province was a necessary step in the provision of adequate medical services for Newfoundland.

Dr. Ian Rusted, a local physician who had been involved in the early negotiations and had taken the initiative in introducing continuing medical education for doctors in the Province, was appointed Dean of Medicine in 1967. Under his leadership, faculty members were recruited, the undergraduate program was initiated and the first medical students were admitted in 1969. The existing programs of postgraduate training and continuing medical education were strengthened and the spectrum of medical education was subsequently completed in 1971 with the initiation of a program of graduate studies leading to the degrees of M.Sc. and Ph.D.

The undergraduate curriculum was designed to foster integrated learning and to permit contact with patients early in the student's

training. To facilitate this integrated approach the administration of the school was set up as a non-departmental system based on three Divisions: Community Health, BioMedical Sciences and Clinical Sciences.

Initially the Faculty of Medicine was housed in temporary buildings. With joint funding by the Federal and Provincial Governments, a Health Sciences Centre (HSC) was constructed on the North Campus of the University and was officially opened in 1978. This new building became home to the Faculty of Medicine General Hospital and the School of Nursing. Over time the building was expanded, and now it also houses the School of Pharmacy, the Janeway Children's Health and Rehabilitation Centre, the Dr. H. Bliss Murphy Cancer Centre and the Agnes Cowan Hostel. The Health Sciences Centre contains a comprehensive health sciences library, animal care and research facilities, plus an appropriate range of teaching facilities to accommodate large lectures and demonstrations, small group discussions and seminars, clinical skills and laboratory sessions. The structure of the Health Sciences Centre facilitates integration between basic scientists, clinicians and allied health workers in the hospital, the University and the community. Clinical research facilities are located adjacent to basic research units and some research laboratories provide services in clinical investigation. Services such as cafeteria and stores are common to the Faculty of Medicine and the Eastern Regional Health Authority. In July 2014, the administrative offices of the Faculty of Medicine moved into the new adjacent Medical Education Centre where classes began for students in September, 2014. The Craig L. Dobbin Research Centre on the third, fourth, and fifth floors of the building opened in May, 2015.

The General Hospital and Janeway Children's Health and Rehabilitation Centre are part of a network of teaching hospitals in St. John's, throughout Newfoundland and Labrador and other Atlantic provinces. The conventional use of major referral centres as teaching resources is complemented by the availability of regional and community hospitals to provide valuable clinical experience for undergraduate and postgraduate medical students.

In contrast to many other schools, the class size at the University's Medical School is small. This facilitates interaction between students and faculty, and has obvious advantages in clinical teaching. Normally 80 students are admitted annually to the first year of the undergraduate medical program.

Additional information regarding the Faculty of Medicine is available at [www.med.mun.ca/medicine/home.aspx](http://www.med.mun.ca/medicine/home.aspx).

## 4 Mission and Objectives of the Faculty of Medicine

Our mission is to enhance the health of the people of Newfoundland and Labrador by educating physicians and health researchers; promoting lifelong learning; conducting research in biomedical, clinical and applied health sciences, community health, and medical humanities; engaging communities and decision makers; and collaborating to apply the best available evidence in the formulation of policy and the organization and delivery of care.

The objectives of the Faculty of Medicine are consistent with the objectives of Memorial University of Newfoundland in developing and maintaining excellence in the quality of its academic standards and of research, establishing programs to meet the expanding needs of the Province and of providing the means to reach out to all the people.

The Faculty seeks to attain these objectives through an organizational structure which allows optimum interaction among the various disciplines within the Medical School and with other Faculties and Schools as appropriate.

The term 'Medical School' refers to the wider organizational structure of the Faculty of Medicine with various healthcare, institutions, community organizations and other academic units with the University.

The specific objectives are:

1. To teach medical students to be physicians; and to provide such learning experiences as will inspire all medical graduates of the school to be prepared to practice medicine at the highest standards, serving all individuals and societies in the pursuit of health.
2. To acknowledge the special geography of this Province by encouraging the education of physicians with exemplary skills for rural practice.
3. To educate and train graduate and diploma students in the health sciences.
4. To provide postgraduate educational experiences in medicine and the medical sciences such that the graduating Canadian physicians will pursue further studies within the school's postgraduate programs, leading to certification in family medicine or specialist subjects, especially in those areas where deficiency in numbers is currently recognized or anticipated.
5. To instill within students at all levels:
  - a. The wish and the capacity to further the practice and science of medicine through the creation of new knowledge for the improvement of the health of the world's peoples.
  - b. The wish and the capacity to improve their own professional practice through continuing self-assessment and scholarship.
  - c. An appreciation of their evolving roles as members of a team of professionals possessing complementary skills.
6. To attract faculty members who will together:
  - a. Act as a resource in providing undergraduate, graduate, postgraduate, and continuing medical education.
  - b. Contribute to the advancement of educational methods.
  - c. Practice the highest quality of primary, secondary, or tertiary care medicine.
  - d. Show leadership in promoting research into the health of the individual and the community, including the organization of health care delivery systems.
  - e. Facilitate and promote education and research appropriate to our mid North-Atlantic environment.
7. To provide educational experiences in the health sciences to students from other Schools or Faculties of Memorial University of Newfoundland and of other educational institutions.
8. To provide Continuing Medical Education experiences which will help physicians to maintain and enhance their competence in medical skills.
9. To provide a learning environment for undergraduate, graduate, and postgraduate students of medicine and the medical sciences who are citizens of other countries.
10. Actively to provide an Informational, Educational and Consultative resource for the whole community.

## 5 Affiliated Teaching Sites

1. Within St. John's: (hospitals under the Eastern Regional Health Authority)
2. Outside St. John's: (hospital/community settings)
3. New Brunswick and other jurisdictions: (hospital/community settings)

## 6 Description of Medical Training Program

The Faculty of Medicine offers a four-year undergraduate medical program, comprising a minimum of 189 credit hours, leading to the degree of Doctor of Medicine (M.D.).

The Diversity Statement for the Faculty of Medicine is available on the Faculty of Medicine website at [www.med.mun.ca/medicine/home.aspx](http://www.med.mun.ca/medicine/home.aspx).

The program consists of four phases; Phase one covers normal health and development, Phase two covers acute reversible or modifiable health issues, Phase three covers chronic disease, and Phase four involves integration into practice. The first three Phases employ a variety of teaching and learning experiences, including self-directed learning, to learn about all aspects of health (physical, mental, social, and psychological), disruptions in health that can lead to frank disease, and all aspects of science, community health, ethics, and clinical skills related to identifying and describing disease and its diagnosis. During Phase 4, students take courses that will allow them to experience major disciplines in hospital and community settings throughout affiliated teaching sites in Newfoundland and Labrador and community and hospital settings in New Brunswick and other jurisdictions. They participate as members of the health care team, gaining the knowledge and experience necessary to assume the responsibilities associated with patient care.

Medical students are required to participate fully in medical education experiences which occur at various times and communities outside of the St. John's metropolitan area throughout the undergraduate medical education program.

Students in good academic standing are qualified to write Part I of the licensing examinations set by the Medical Council of Canada (MCC) at the appropriate time.

## 7 Continuing Professional Development

The Faculty of Medicine's Office of Professional Development (OPD) is an accredited provider of university continuing professional development (CPD) for healthcare professionals and faculty. OPD offers a breadth of professional development programming each year which address the needs of healthcare professionals who practice in both urban and rural communities across Newfoundland and Labrador, nationally and internationally. Programs are offered in a variety of formats, including: onsite/face-to-face; online/distance; discipline rounds; and educational assessment, retraining and traineeship experiences. OPD also offers a certificate program in Medical Teaching and, in conjunction with the Gardiner Centre, a certificate in Physician Management and Leadership.

## 8 Postgraduate Medical Training

Postgraduate medical training is offered in residency programs leading to certification by either the College of Family Physicians of Canada (CFPC) or the Royal College of Physicians and Surgeons of Canada (RCPSC). These are full-time training programs comprised of hands-on practical training complemented by formal teaching and academic study. Residency programs are completed in a structured learning environment consisting of hospital and community based teaching units, supervised by faculty. Residents are required to participate fully in all medical education experiences that occur at various times and communities throughout their respective residency program.

The Postgraduate Medical Education (PGME) Committee oversees all aspects of the planning of residency programs. The structure of the residency programs is based on the accreditation standards of the CFPC or the RCPSC. The PGME Committee reports to the Dean of Medicine through the Assistant Dean, PGME. Residency programs are accredited through an agreement between the CFPC, the RCPSC, and the Federation of Medical Regulatory Authorities of Canada (FMRAC).

### 8.1 Admission

Persons interested in a residency program apply through the Canadian Resident Matching Service (CaRMS). Further information is available from the CaRMS website at [www.carms.ca](http://www.carms.ca); by writing to, CaRMS, Suite 802, 151 Slater Street, Ottawa, Ontario K1P 5H3; or, by contacting the CaRMS office by telephone at (800) 291-3727.

A Resident who is currently in a residency program at another university and is interested in a residency program at Memorial University of Newfoundland's Faculty of Medicine is advised to consult the PGME website at [www.med.mun.ca/pgme](http://www.med.mun.ca/pgme), or contact the Office by email at [pgme@mun.ca](mailto:pgme@mun.ca), or by telephone at (709) 864-6331 for further information.

### 8.2 Residency Programs

The Faculty of Medicine offers programs leading to certification by the College of Family Physicians of Canada (CFPC) and programs leading to certification by the Royal College of Physicians and Surgeons of Canada (RCPSC).

#### 8.2.1 Programs Leading to Certification by the College of Family Physicians of Canada (CFPC)

The Faculty of Medicine offers a residency program in **Family Medicine** and enhanced skills programs in **Emergency Medicine** and **Care of the Elderly**.

##### 8.2.1.1 Family Medicine

Family Medicine is a two-year residency program that leads to eligibility for certification by the CFPC.

##### 8.2.1.2 Emergency Medicine

Emergency Medicine is a one-year program of specialty training. Successful completion of this program will lead to eligibility to sit the Examination of Special Competence in Emergency Medicine. Prospective applicants must be either currently enrolled in an accredited Family Medicine residency program in Canada or in practice (Certification in The College of Family Physicians) (CCFP) certified or eligible to sit the CCFP examination).

### 8.2.1.3 Care of the Elderly

Care of the Elderly is a six-month enhanced skills program that is specifically designed to focus on geriatric clinical work. Successful completion of this program will lead to eligibility for Certification of Added Competence (CAC) in the care of the elderly. Prospective applicants must be either currently enrolled in an accredited Family Medicine residency program in Canada or in practice (CCFP certified or eligible to sit the CCFP examination).

## 8.2.2 Programs Leading to Certification by the Royal College of Physicians and Surgeons of Canada (RCPSC)

The Faculty of Medicine offers residency programs in Anatomical Pathology, Anesthesia, Diagnostic Radiology, General Surgery, Internal Medicine, Neurology, Obstetrics/Gynecology, Orthopedic Surgery, Pediatrics, and Psychiatry. The Faculty of Medicine also offers postgraduate medical training in the **subspecialty programs** of Adult Nephrology, Child and Adolescent Psychiatry, General Internal Medicine, and Medical Oncology.

### 8.2.2.1 Internal Medicine and Pediatrics

Internal Medicine and Pediatrics offer a direct-entry program in the first year of the residency program. The normal period of training in Internal Medicine or Pediatrics is four years post-M.D.

### 8.2.2.2 Remaining Specialty Programs

In the remaining specialty residency programs offered by Faculty of Medicine, broad-based clinical training is offered as the first year of the residency program. The total length of each of these residency programs is five years post-M.D.

### 8.2.2.3 Subspecialty Programs

The Faculty of Medicine offers postgraduate medical training in the subspecialty programs of Adult Nephrology, Child and Adolescent Psychiatry, General Internal Medicine, and Medical Oncology. The length of each of the subspecialty programs is two years post completion of the relevant residency program.

## 8.3 Registration

1. Residents are registered each year as full-time students of Memorial University of Newfoundland.
2. Residents must be eligible for, and obtain, educational registration from the College of Physicians and Surgeons of Newfoundland and Labrador (CPSNL). Further information, including requirements for international medical graduates, is available at [www.med.mun.ca/pgme](http://www.med.mun.ca/pgme) or in-person at the Postgraduate Medical Education (PGME) Office.

## 8.4 Evaluation

Each Resident is expected to complete the requirements of the residency program, as outlined by the discipline Residency Program Committee (RPC), for each year of the program, and to meet the prescribed goals and objectives through the completion of mandatory rotations. A Resident is evaluated throughout each rotation. The evaluation of the Resident's performance is conducted by a subcommittee of the RPC and is based on written assessments and performance-based direct observation. The results of the evaluation indicate the competency level of the Resident for each goal and objective of the rotation. The level of responsibility given to a Resident is based on regular evaluation of abilities by faculty.

Assessment methods used in residency programs include, but are not limited to, In-Training Evaluation Reports (ITERS), In-Training Assessment Reports (ITARs), daily shift cards, and field notes. The assessment methods used are discipline-dependent and in accordance with the appropriate accreditation standards.

## 8.5 Promotion

To successfully complete a residency program, a Resident, upon evaluation, must be promoted through all the levels of the program. A Resident must also successfully complete the Teaching Effectiveness Program. The discipline Residency Program Committee (RPC) meets every year to review a Resident's progress report(s). On the basis of this review, the RPC decides which Residents should be promoted to the next year.

A Resident's promotion status at the end of a rotation will be in one of the following categories:

### 8.5.1 Clear Promotion

Clear promotion means a Resident can proceed to the next rotation without restrictions.

### 8.5.2 Additional Training or Remediation

A Resident who does not meet the criteria for clear promotion will be required to complete additional training or remediation in the form of a remedial rotation or a remedial program. If a Resident is required to complete a remedial program, the terms and conditions of the program will be outlined in a written contract.

### 8.5.3 Probation

A Resident will be placed on probation, only once, for:

1. failure to meet the requirements of remedial rotation; or,
2. failure to meet the requirements of two rotations in one academic year.

A Resident may be placed on probation if they fail to meet the terms and conditions of a remedial program contract.

The length of the probationary period will be determined by the discipline Residency Program Committee (RPC). If a Resident is required to complete probation, the terms and conditions of the probation will be outlined in a probation contract.

### 8.5.4 Dismissal

1. If, during a subsequent academic year, a Resident meets the criteria for probation a second time, the Resident will be dismissed from the residency program.
2. Failure of a Resident to meet the terms and conditions of the probation contract may result in dismissal from the residency program.

The RPC, with just cause, reserves the right to dismiss a Resident from a residency program at any time. In such cases, the Dean of Medicine, on behalf of the Faculty, recommends the dismissal to the Registrar who will then take appropriate action.

## 8.6 Other information

For Residents in the final year of their residency program, the Residency Program Committee (RPC) decides which Residents are eligible to sit the national examinations of the College of Family Physicians of Canada (CFPC) or the Royal College of Physicians and Surgeons of Canada (RCPC).

## 8.7 Appeal

A Resident has the right of appeal in accordance with the PGME Evaluation, Promotion, Dismissal, and Appeal Policy. Details regarding the appeal process are available at [www.med.mun.ca/pgme](http://www.med.mun.ca/pgme).

## 9 Graduate Studies

Interdisciplinary interaction and research among the divisions of BioMedical Sciences, Community Health and Humanities and the Clinical Disciplines is promoted.

Programs have been designed to attract students interested in a Graduate Diploma or a M.Sc., M.P.H., Ph.D. or M.D.-Ph.D. degree. Areas of strength include Applied Health Services Research, Cancer and Development, Cardiovascular and Renal Sciences, Clinical Epidemiology, Community Health, Human Genetics, Immunology and Infectious Diseases, Neurosciences, Nutrition/Dietetics, Population/Public Health, and Health Ethics. Details of the graduate programs are provided in the School of Graduate Studies section of this Calendar.

## 10 Regulations for the Degree of Doctor of Medicine

### 10.1 Admission to the Faculty of Medicine

- All applications for entry to the program of studies leading to the Doctor of Medicine (M.D.) degree are dealt with by the Admissions Office of the Faculty of Medicine and must be submitted to that office on or before the closing date (normally September 15th). No application received after this date will be considered. An application processing fee of \$75.00 is required from all applicants.
- Applications are reviewed after the closing date by the Admissions Committee of the Faculty of Medicine. This Committee has the delegated authority of the Faculty Council to admit or decline to admit students, following guidelines and procedures acceptable to that Council.
- Admissions will normally be to the first year of medical studies. In exceptional circumstances, admission with advanced standing may be offered.
- Entry to medical school is on the basis of competition for a fixed number of places. The Admissions Committee takes account of an applicant's academic background, performance on the Medical College Admissions Test (MCAT) and information on an applicant's personal characteristics and achievements as given by the applicant, by referees' reports and, in some cases, by personal interviews. Age by itself is not used as a basis for selection or rejection. Both age and the length of time away from full-time studies may be taken into consideration. The residency status of each applicant at the time of the closing date for application (normally September 15) will be determined by guidelines established by the Admissions Committee and approved by Faculty Council. For each candidate, the residency status determined at that time will apply throughout the admissions process and the period of undergraduate medical education. Priority is given to applicants who are bona fide residents of this province as well as applicants of Aboriginal descent. Further information is available on the Faculty of Medicine's website at [www.med.mun.ca/Admissions/Aboriginal-Admissions-Program.aspx](http://www.med.mun.ca/Admissions/Aboriginal-Admissions-Program.aspx).
- The Admissions Committee's decision to admit or decline to admit an applicant will be made on the basis of the competition for entry in the year of application and will be determined by the Committee's judgement of the likelihood of an applicant succeeding in the academic and professional studies leading to the award of the M.D. and in the eventual practice of medicine.
- To be eligible for admission, an applicant shall have completed a bachelor's degree including the prerequisite subjects of 6 credit hours in English at a recognized university or university college before admission.

In exceptional circumstances an application may be considered from someone who does not expect to hold a bachelor's degree at the time of admission. Such an applicant will have completed at least 60 credit hours including the prerequisite subjects of 6 credit hours in English at a recognized university or university college before admission and be a student who has work-related or other experience acceptable to the Admissions Committee.

No application will be considered from a candidate who cannot produce evidence that the above requirements have been met or will have been met by the time of entry to the Medical School.

In addition, all applicants must write the MCAT prior to the application deadline. The MCAT should be written within the preceding five years of the date of application.

- Applicants need to be aware of the policy related to Essential Skills and Abilities Required for the Study of Medicine. This policy outlines essential skills and abilities needed to succeed in the M.D. program and it includes technical standards for students in the program and information for students with disability. This information is available on the Faculty of Medicine's website at [www.med.mun.ca/Admissions/Application-Preparation.aspx](http://www.med.mun.ca/Admissions/Application-Preparation.aspx).
- Each applicant is responsible for ensuring that all the required information on the application form, e.g. transcripts, MCAT scores, referee's reports, is supplied to the Admissions Committee, and for providing any further information required by this Committee. An application is not considered complete until these documents have been received.
- The Admissions Committee may request that a candidate attend an interview.
- Notification of the Committee's decision will be made to candidates by letter signed by, or on behalf of, the Chair of the Admissions Committee. No other form of notification can be considered to be official.
- The letter of acceptance will give the successful applicant fourteen (14) days in which to confirm that he/she will accept the place offered. The signed intention to accept the offered place must be accompanied by a deposit of \$200.00 which will be credited towards tuition fees. The deposit will be forfeited if the applicant subsequently declines the place.  
If no reply to the offer of a place is received within fourteen days, the offer by the Faculty of Medicine will be withdrawn on the appropriate date, and the applicant will be informed of this by letter.
- In order to register, applicants who have been accepted as international students will be required to sign a document indicating that they will pay differential fees throughout the undergraduate medical program and that they will have the status of non-Canadians in

the postgraduate matching process.

13. The Admissions Committee, at its discretion, may grant deferral of admission for one year to four successful applicants (normally not to exceed this number) in the first round of offers for any one admission cycle. An applicant must request a deferred entry at the time of responding to an offer of admission. The first round of offers are normally confirmed by mid-May and requests for deferral are considered by mid-June.
14. Unsuccessful applicants who wish to reapply for admission are required to submit the application forms relevant to the year of application and will be required to enter the competition in that year. An unsuccessful applicant can meet with the Assistant Dean for Admissions or the Admissions Officer to discuss reapplying prior to the deadline for submission of a new application (normally September 15).
15. An unsuccessful applicant has the right to appeal against the decision of the Admissions Committee not to offer him/her a place, if it is felt by the applicant that the decision was reached on grounds other than those specified in Clauses 1-4 above. The appeal should be made in writing within fourteen days of the notification of the decision and should be directed to the Dean of Medicine. The letter should state clearly and fully the grounds for the appeal. If the Dean of Medicine, in consultation with the Registrar, judges the grounds to be sufficient, the formal appeals mechanism will be initiated.

## 10.2 Registration in Newfoundland and Labrador and Other Approvals

All students are required to be on the Education Register of the College of Physicians and Surgeons of Newfoundland and Labrador (CPSNL).

The Faculty of Medicine does not require criminal record checks or other screening procedures as a condition of admission to its program.

Students, however, should be aware that such record checks or other screening procedures may be required by agencies used by the University for professional registration, clinical experiences or academic course assignments necessary for graduation. Such agencies may refuse to accept students on the basis of information contained in the record check or other screening procedure thus preventing the student from completing a practice experience or other requirement. As a result, such students may not be eligible for promotion or graduation. The student is responsible for having such procedures completed as required at his or her own expense. The screening procedures of any given agency may change from time to time and are beyond the control of the University.

## 10.3 Evaluation

Subject to the approval of Senate, the overall policy of evaluation and the planning of the programs of studies leading to the M.D. degree are the responsibility of the Undergraduate Medical Studies Committee, which is a standing committee of the Council of the Faculty of Medicine.

## 10.4 Assessment

1. Each student is expected to complete the work of the class as described in the current regulations of the Faculty of Medicine for each Phase of the program and to pass the prescribed academic and professional assessments. In this context, the professional assessments will cover not only the skills expected of a student, but personal conduct and relationships with peers, patients, hospital personnel, faculty members and staff.
2. Course grades are recorded as pass or fail on a student's University transcript. Within each Phase, there will be multiple prescribed assessments. For all Phases, assessment of an individual student's performance is the responsibility of the appropriate Phase Lead. Grades for all Phases may be reported using an internal scale.
  - a. The appropriate Phase Lead or designate is responsible for ensuring that each student is informed of the results of each assessment. The appropriate Phase Lead will notify the student, in writing, of any concerns that have arisen about performance. The Associate Dean, Undergraduate Medical Education will also be informed.
  - b. It is the responsibility of the student to consult immediately with the appropriate Phase Lead regarding any assessment in which concerns about performance have been expressed. Within one week of receiving notification of the result of an assessment, a student may submit a written request to the appropriate Phase Lead for reconsideration of the assessment result or for a reread of an exam or paper.
  - c. The student is responsible for notifying the appropriate Phase Lead immediately of any new or pre-existing circumstances that could affect his or her individual performance in the work of the class.
  - d. For exemptions from final examinations and procedures for applying to write deferred examinations - see **UNIVERSITY REGULATIONS - General Academic Regulations (Undergraduate), Exemptions From Final Examinations and Procedures for Applying to Write Deferred Examinations.**
3. A student's progress is monitored in each Phase of the program by the appropriate Phase Management Team.

## 10.5 Promotion

1. The Student Promotions Committee is a standing committee of Faculty Council. The Student Promotions Committee reviews all assessments of all students in each Phase. On the basis of this review, this Committee decides which students should be promoted to the next Phase and which students are eligible to graduate. In reaching its decisions the Student Promotions Committee takes into account professional, as well as academic factors, and any special circumstances, duly authenticated, which warrant consideration.
2. Within each Phase, students may be required to be reassessed or to remediate with re-assessment in order to demonstrate competence and understanding of the required learning objectives. The amount and quality of remediation and reassessment required of a student is at the discretion of the appropriate Phase Management Team. Students with a Fail grade in any course cannot be promoted to the next Phase.
3. Even in the absence of any Fail grades, a student for whom substantial concerns about performance have been expressed may either be required to repeat the Phase or required to withdraw conditionally or unconditionally.
4. A student who is deemed by the Student Promotions Committee to be unsuitable for promotion or graduation is either required to repeat the Phase or required to withdraw either conditionally or unconditionally.
  - a. If a student is required to repeat a Phase with academic prejudice, his or her performance in the repeated Phase must be at a level at which no remediation or reassessment is required. If this standard is not met, the Student Promotions Committee requires the student to withdraw unconditionally. The option to repeat a Phase with academic prejudice can only be offered to a student once during his/her M.D. program.
  - b. A student may repeat a Phase without academic prejudice if it has been demonstrated that the student's performance has been

adversely affected by other factors acceptable to the Student Promotions Committee and duly authenticated.

- c. If the Student Promotions Committee requires a student to withdraw conditionally, the Chair of the Student Promotions Committee informs the Dean and the appropriate Phase lead about the nature of the conditions to be met and the time period specified for meeting the conditions. The Dean then recommends to the Registrar that the student be required to withdraw from the program. Any student who has been required to withdraw conditionally may be readmitted once the conditions have been met. If the conditions are not met within the specified time limit, the student is required to withdraw unconditionally.
  - d. If the Student Promotions Committee requires a student to withdraw unconditionally, the Chair of the Student Promotions Committee will report the decision and the basis upon which it was reached to the Dean and the appropriate Phase lead. The Dean then recommends to the Registrar that the student be required to withdraw from the program. Any student who is required to withdraw unconditionally and who wishes to re-enter the Faculty must apply by the appropriate deadline date to the Admissions Committee in competition with all other applicants.
5. A student has the right to make a formal appeal against a decision of the Student Promotions Committee. However, this appeal cannot be made on the basis of the grades awarded in individual courses, as the student will normally have had the opportunity of contesting grades and assessment results immediately after notification. A formal appeal by a student against the decision of this Committee must be made on grounds other than the grades awarded, e.g. default of procedure. This appeal should be made in writing, clearly stating the basis for the appeal and should be directed in the first instance to the Dean. The Dean in consultation with the Office of the Registrar determines whether or not the grounds stated are sufficient to warrant a formal hearing of the appeal.
  6. In addition to the above clauses, the Faculty of Medicine reserves the right to require a student to withdraw from the program at any time when acceptable cause is demonstrated. In such cases, the Dean, on behalf of the Faculty, recommends such withdrawal to the Registrar who will then take appropriate action. Any such action is subject to the right of appeal by the student. An appeal should be made in writing clearly stating the basis for the appeal and should be directed in the first instance to the Registrar of the University. The Registrar, in consultation with the Dean, will determine whether or not the grounds stated are sufficient to warrant a formal hearing of the appeal.
  7. Any student who enters the first Phase of the medical program but withdraws within the first seven weeks may be permitted re-entry only by re-application to the Admissions Committee in competition with all other applicants by the appropriate deadline date. Withdrawal at all other times is in accordance with **UNIVERSITY REGULATIONS - General Academic Regulations (Undergraduate)**.
  8.
    - a. Upon completion of a Phase or after the completion of 8710 and 8720 in Phase four, a student in good academic standing may elect to withdraw temporarily from studies (e.g. to pursue graduate studies).
    - b. Any student may be permitted to withdraw in accordance with **UNIVERSITY REGULATIONS - General Academic Regulations (Undergraduate), Withdrawing From The University**. In all cases, the intent to withdraw voluntarily should be discussed the appropriate Phase Lead. The student must make a written request for voluntary withdrawal to the Dean who will then consult the appropriate Phase Lead. In the event that a student wishes to return to medical school, the Dean should ensure that sufficient revision and preparatory work are undertaken before the student is permitted to resume medical studies.
    - c. Students permitted to withdraw are advised of the date upon which they are required to resume medical studies. In the absence of good cause, any such student who does not resume studies on the specified date will be deemed to have left the program.

## 10.6 Curricular Requirements (M.D.)

Students entering the M.D. program will be governed by curricular requirements in effect at the time of their admission. In the event of readmission, students will be governed by curricular requirements in effect at the time of their readmission.

The Student Promotions Committee recommends to Faculty Council those students to be awarded the M.D. degree.

## 11 Course Descriptions

Clerkship provides clinical experience in the affiliated teaching hospitals and community sites of Memorial University of Newfoundland. The courses in all Phases form a continuum. Each Phase provides blended and clinical learning experiences in the medical school, teaching hospitals and community sites. In Phase 4, the students become members of the patient care team and have graded and supervised responsibility. In any given course, multiple teaching and learning methods such as lectures, small group discussion, labs and self-directed learning will be used.

### 11.1 Courses in the Clerkship

**7000 Clerkship Preparation Course** - inactive course.

**7200 Internal Medicine** - inactive course.

**7210 Surgery** - inactive course.

**7220 Psychiatry** - inactive course.

**7230 Pediatrics** - inactive course.

**7240 Rural Family Practice** - inactive course.

**7250 Obstetrics/Gynecology** - inactive course.

**7260, 7261, 7263 Electives** - inactive course.

**7270-7273 Selectives** - inactive course.

**7280 Integrated Basic, Community Health and Clinical Sciences** - inactive course.

### 11.1.1 Phase 1 - Health and Its Promotion

**5710 The Healthy Person** introduces students to the structure and function of healthy people in all age groups in an integrated way. Students will learn in the context of a person as part of a family in a community. Students will begin to examine their future roles as professionals in our health care system.

CH: 19

**5720 Clinical Skills I** introduces students to the main elements of the medical interview and techniques of interviewing. Students will develop skills in examining healthy individuals within all age ranges. Communication and collaboration skills will be developed in the context of patient-centered care and working with other health care providers.

AR: attendance is required

**5730 Physician Competencies I** introduces students to concepts that encompass the non-medical expert physician roles of scholar, communicator, collaborator, advocate, manager and professional in the context of the healthy person, family and the physician within health care systems.

**5740 Community Engagement I** places students in community sites for two weeks to experience a variety of aspects of the health care system with various health agencies, a family physician, and other health care providers.

AR: attendance is required

### 11.1.2 Phase 2 - Disease Prevention and Disruptions of Health

**6750 The Patient: Acute or Episodic Health Problems** has students build on their knowledge of the normal structure and function of the body and analyze disruptions in health by exploring the pathophysiology of illnesses, their risk factors and risk prevention strategies.

CH: 21

**6760 Clinical Skills II** has students develop clinical reasoning skills used in patient-centered care using focused interviewing, examination, and communication skills.

AR: attendance is required

**6770 Physician Competencies II** has students apply concepts that encompass the non-medical expert physician roles of scholar, communicator, collaborator, advocate, manager and professional in the context of the patient's change in health status management and prevention.

**6780 Community Engagement II** places students in physicians' practices for two weeks to further experience interactions among patients, their family physician and the health care system when presenting with a change in health status.

AR: attendance is required

### 11.1.3 Phase 3 - Diagnosis and Investigation of Illness and Disease

**7710 The Patient: Chronic Conditions** has students apply knowledge of reversible or modifiable health problems to chronic conditions for diagnosis and management of the patient.

CH: 36

**7720 Clinical Skills III** has students advance their assessment skills of patients who have chronic health issues. They will develop verbal and written communication skills required for patient-centered care.

AR: attendance is required

**7730 Physician Competencies III** continues to develop student competencies in the non-medical expert physician roles introduced in previous special project courses.

**7740 Phase 4 Preparation** introduces students to skills required to succeed in their clinical experiences to achieve a level of competency for Phase 4.

AR: attendance is required

**7750 Community Engagement III** allows students to further explore the interactions between patients and the health care system.

AR: attendance is required

### 11.1.4 Phase 4 - Integration Into Clinical Practice

Phase 4 begins with students taking the core courses 8710 and 8720. These courses will be followed by 12 weeks of elective experiences and 12 weeks of advanced practice.

**8710 Core Experiences** immerses students in the clinical environment through experiences in core disciplines including internal medicine, surgery, obstetrics and gynecology, rural family practice, paediatrics and psychiatry.

AR: attendance is required

CH: 56

**8720 Advanced Procedural Competencies** provides students with opportunities to advance their procedural and clinical skills to promote patient safety and work effectively in team settings.

AR: attendance is required

CH: 2

**8730 Electives** are offered in two - four week blocks in approved areas of study for a maximum of twelve weeks.

AR: attendance is required

CH: 12

**8740 Advanced Practice Integration** enables students to be assigned to a physician, physician group or discipline for experiences that focus on following patients as they interact with the health care system.

AR: attendance is required

CH: 12

**8750 Practice Continuum** will focus on the transition to postgraduate training as a part of the continuum of medical education.

AR: attendance is required

CH: 1

## 11.2 Courses Offered By the Faculty of Medicine for Non-Medical Students

**310A and 310B Human Physiology** covers the properties of nerve and muscle cells, the special senses, blood and body fluids, and the nervous, cardiovascular, digestive, immune, respiratory, urinary, endocrine and reproductive systems. Integration of the body's systems in maintaining homeostasis is emphasized. Priority for entry into this course is given to Biochemistry, Nutrition, Dietetics, and other students who are interested in experimental science.

CO: Biochemistry 2101

CR: Biochemistry 311A/B and Medicine 310A/B

LH: to be specified

PR: Biochemistry 2101

**4300 Introduction to General and Autonomic Pharmacology** deals with the general principles of pharmacology (dose-response relationship, drug-receptor interaction, absorption, distribution, metabolism, excretion of drugs), and drugs that affect neuromuscular and autonomic neurotransmission, the cardiovascular, gastrointestinal, and central nervous systems, and autacoids/prostanoids.

CO: Biochemistry 3106 or Pharmacy 3111

CR: the former Biochemistry 4220

LH: to be specified

PR: Medicine 310A/B or Biochemistry 311A/B, or Pharmacy 2002/2003 or the former Pharmacy 3201/3202.

## 1 The Memorial University of Newfoundland Code

The attention of all members of the University community is drawn to the section of the University Calendar titled **The Memorial University of Newfoundland Code**, which articulates the University's commitment to maintaining the highest standards of academic integrity.

## 2 Student Code of Conduct

Memorial University of Newfoundland expects that students will conduct themselves in compliance with University Regulations and Policies, Departmental Policies, and Federal, Provincial and Municipal laws, as well as codes of ethics that govern students who are members of regulated professions. The *Student Code of Conduct* outlines the behaviors which the University considers to be non-academic misconduct offences, and the range of remedies and/or penalties which may be imposed. Academic misconduct is outlined in **UNIVERSITY REGULATIONS - Academic Misconduct** in the University Calendar.

For more information about the *Student Code of Conduct*, see [www.mun.ca/student/conduct](http://www.mun.ca/student/conduct).

## 3 School Description

The school of Music at Memorial University of Newfoundland is the largest and most comprehensive university school of music in Atlantic Canada. Four-year undergraduate programs are offered in performance, musicologies and composition. Students interested in music education have two options: the conjoint degrees of Bachelor of Music/Bachelor of Music Education (B.Mus./B.Mus.Ed.), offered in collaboration with Memorial University of Newfoundland's Faculty of Education, which can be completed in five years; and the four-year Comprehensive Major, which prepares them to apply for admission to the Bachelor of Music Education as a second degree. For students not ready to specialize, a Bachelor of Music (B.Mus.) in General Musical Studies with or without a Minor provides a flexible degree option. The School of Music's faculty comprise a diverse group of performers and scholars from across North America and Europe who are as dedicated to the highest standard of teaching as they are to their own professional careers. Access to professional applied studies instruction is a right of every student in each year of the program. With close to 200 degree-stream students, the School offers ensemble performance experience in choir, wind ensemble, orchestra, opera, jazz, world music, contemporary and chamber music. While the focus of the School's programs is on the classical music tradition, Newfoundland and Labrador's rich musical legacy is also honored in its curriculum with a range of courses taught by tradition-bearers from the professional music community. The School's undergraduate community is enriched by the presence of students pursuing **Master of Music (M.Mus.)** degrees in performance, performance/pedagogy and conducting, as well as **Master of Arts (M.A.)** and **Doctor of Philosophy (Ph.D.)** students in the area of ethnomusicology.

Additional information regarding the School of Music is available at [www.mun.ca/music](http://www.mun.ca/music).

### 3.1 Health Statement

Music study and music making are activities that demand great mental and physical energy and coordination. For this reason, students are strongly encouraged to maintain a healthy lifestyle, getting adequate rest, proper nutrition, and exercise, and avoiding practices that could be detrimental to good health and well-being.

## 4 Description of Programs

All courses in the School of Music are designated by the abbreviation MUS.

### 4.1 Bachelor of Music

The School offers a four-year Bachelor of Music with Majors in:

#### 4.1.1 Composition

This Major is recommended for students who plan to compose or to teach composition.

#### 4.1.2 Comprehensive

This major is recommended for students planning to apply for admission to the Bachelor of Music Education as a Second Degree.

#### 4.1.3 General Musical Studies

This Major is recommended for students seeking a broad knowledge of music that will prepare them for a variety of career and advanced study options. Students have the option of including a Minor in a discipline other than Music.

#### 4.1.4 Musicologies

This Major is recommended for students interested in research in music and/or media professions. A variety of approaches to music scholarship are addressed, including music history, ethnomusicology, and popular music studies.

#### 4.1.5 Performance

This Major is recommended for students planning to pursue a career as a solo performer, orchestral or band player, university-based musician or private teacher.

#### 4.1.6 Joint Major in Performance and Musicologies

This Major is recommended for students who have both advanced performance skills and an interest in music research. Students who are planning careers in specialized performance, music editing or as university-based musicians are encouraged to consider this Major.

#### 4.1.7 Major in Performance with a Minor in Composition

This Major is recommended for students who have both advanced performance skills and an interest in music theory and composition. Students who are planning careers in performance, music editing, conducting, arranging, composing or as university-based musicians are encouraged to consider this program.

### 4.2 Five Year Bachelor of Music Conjoint with Bachelor of Music Education

This degree program is offered jointly with the Faculty of Education, and is recommended for candidates planning to pursue a career in Music Education.

### 4.3 Interdisciplinary Minor in Music and Culture

This Minor is available to students in the Bachelor of Arts, Bachelor of Science, Bachelor of Business Administration, Bachelor of Commerce (Cooperative), Bachelor of Recreation, Bachelor of Recreation (Honours), Bachelor of Recreation (Cooperative), and Bachelor of Recreation (Cooperative) (Honours).

### 4.4 Minor in Music History

This Minor is available to students in the Bachelor of Arts, Bachelor of Science, Bachelor of Business Administration, Bachelor of Commerce (Cooperative), Bachelor of Recreation, Bachelor of Recreation (Honours), Bachelor of Recreation (Cooperative), and Bachelor of Recreation (Cooperative) (Honours).

### 4.5 Honours Degree

An honours degree signifies superior academic achievement. The Bachelor of Music (Honours) is available to candidates in the Performance, Composition, Musicologies, General Musical Studies, and Comprehensive Majors, candidates in the Joint Major in Performance and Musicologies, and candidates in the Major in Performance with a Minor in Composition. To be considered for an Honours Degree, the student must so indicate on the prescribed "Application for Graduation" form. This form may be obtained on-line at the Memorial Self Service at [www3.mun.ca/admit/twbkwbis.P\\_WWWLogin](http://www3.mun.ca/admit/twbkwbis.P_WWWLogin). Additional information is available from the Office of the Registrar at [www.mun.ca/regoff/graduation/apply\\_grad.php](http://www.mun.ca/regoff/graduation/apply_grad.php). For further information on honours degrees see **Bachelor of Music (Honours)**.

## 5 Admission/Readmission Regulations for the School of Music

In addition to meeting the **UNIVERSITY REGULATIONS**, students must meet the **Admission/Readmission Regulations for the School of Music**.

### 5.1 General Information

1. Entry to the School of Music is competitive and by audition only.
2. Admission or readmission to the University does not necessarily constitute admission or readmission to any program.
3. As part of the regular admissions quota, one seat per year is available in the Bachelor of Music program for applicants of First Nations/Aboriginal ancestry who have met the minimum academic and performance requirements for admission to the program. Applicants must provide documentation of First Nations/Aboriginal ancestry. Applicants may also, if they wish, submit a letter of request at the time of application.

## 5.2 Application Forms and Deadlines

1. Admission to the Bachelor of Music degree is normally possible in the Fall semester only. The application deadline for admission to the Fall semester is January 15.
2. Transfer students may be considered for admission in the Winter semester if they have the prerequisites to enter a sufficient number of music courses in that semester. The application deadline for admission to the Winter semester is September 30.
3. Students who have withdrawn from the music degree program may apply to be readmitted in either the Fall or Winter semester.
4. School of Music application forms are available from the School's General Office and the Office of the Registrar, through the School's website at [www.mun.ca/music/programs/undergraduate/application.php](http://www.mun.ca/music/programs/undergraduate/application.php) and through the Office of the Registrar's website at [www.mun.ca/regoff/forms.php](http://www.mun.ca/regoff/forms.php). Applicants who have not previously attended Memorial University of Newfoundland or those who have not attended Memorial University of Newfoundland in the three preceding semesters must also submit the "Undergraduate Application for Admission/Readmission" which is available at [www.mun.ca/regoff/forms.php](http://www.mun.ca/regoff/forms.php). Application forms may also be obtained by writing the School of Music, Memorial University of Newfoundland, St. John's, NL A1C 5S7 or the Office of the Registrar, Admissions Office, Memorial University of Newfoundland, St. John's, NL A1C 5S7.
5. All applications for admission or readmission must be submitted to the Office of the Registrar. A complete application includes an application to the University (for those who have not attended Memorial University of Newfoundland in the three preceding semesters), an application to the School, and a music teacher reference form. The School of Music application form and teacher reference form are available from the School of Music website at [www.mun.ca/music](http://www.mun.ca/music). Application fees must be paid when the application forms are submitted.

## 5.3 Admission/Readmission Requirements to the Bachelor of Music Degree Program

1. All applicants are required to audition to the satisfaction of the School on the instrument that they have chosen as their Principal Applied Study in their degree program.
  - a. The School offers instruction in voice, piano, organ, flute, clarinet, saxophone, oboe, bassoon, trumpet, horn, euphonium, trombone, tuba, percussion, guitar, violin, viola, cello and double bass. Audition requirements for each instrument may be obtained from the School of Music General Office or online at [www.mun.ca/music](http://www.mun.ca/music).
  - b. Auditions are normally held in early March. Dates and locations of upcoming auditions are available from the School of Music General Office or online at [www.mun.ca/music/programs](http://www.mun.ca/music/programs).
  - c. Late auditions may be held if space is available. Students auditioning late are normally not eligible for School of Music entrance scholarships.
  - d. Transfer students and students seeking readmission to the music degree program must audition to determine their placement in applied study courses. The level of audition should be equivalent to the jury requirements for the prerequisite of the course to which they are seeking admission. Jury requirements are available from the Office of the School of Music or through the School of Music website at [www.mun.ca/music](http://www.mun.ca/music).
2. All applicants are also required to take the following admission and placement tests:
  - a. Placement Test in Theory and Musicianship: This test in basic rudiments, aural perception, and simple four-part harmony will be administered during the entrance audition period.
  - b. Sightsinging Test: This short test is administered individually.
  - c. Piano Proficiency Test: This test assesses students' basic keyboard skills. Successful completion of the test is a prerequisite to required second-year core program courses. Students are advised to contact the School of Music regarding scheduling of the test and for information about private remedial piano instruction.
  - d. Writing Test: This test is administered during the entrance audition period. It is intended to assess students' writing skills and their capacity to articulate ideas about music.
3. The School will notify applicants in writing when a decision has been made regarding admission.

## 5.4 Major

1. With the exception of the Comprehensive Major, candidates normally declare their intended Major area of study in their fourth semester in the Bachelor of Music program.
2. A candidate may not change his/her Major without the written permission of the Dean. In cases where permission is granted, the candidate shall be required to fulfill all requirements for the new Major. However, in the case where a student's Major changes from Performance to one of the other Majors, the Principal Applied Study courses successfully completed under the Performance Major may be used to satisfy the requirements for Principal Applied Study in the new Major, with any additional credit hours being used as Music electives in the new Major.
3. Candidates shall choose one of the following areas for their Major:

### 5.4.1 Composition

Students interested in the Composition Major are strongly encouraged to take Music 3100 in their second year. Candidates for this Major must apply in writing to the Dean by February 15th in the semester during which they are registered for Music 2108, submitting up to three of their own compositions by the end of classes in that semester. Candidates will be interviewed by a panel of composition faculty. Admission to this Major will be based on the candidate's: 1) submitted compositions, 2) interview, 3) achievement in Music 1107, 1108, 1700, 2107, 2108, 3100 and any other elective courses in music theory and composition, 4) general academic achievement, and 5) potential for a career and/or graduate work in composition.

### 5.4.2 Comprehensive

Candidates planning to apply for admission to the Conjoint degrees (Bachelor of Music/Bachelor of Music Education) should first declare the Comprehensive Major by the end of their second semester in the Bachelor of Music program in order to take the necessary prerequisite courses for admission to the Conjoint degrees program. Students planning to apply for admission to the Bachelor of Music Education as a second degree may wait until their fourth semester to declare this Major. Please note that completion of this degree does not guarantee admission to the Faculty of Education.

### 5.4.3 General Musical Studies

Candidates for the General Musical Studies Major need not submit an application. All candidates who have not been admitted to another Major by the end of their fourth semester in the Bachelor of Music program will automatically be admitted to the General Musical Studies Major. Students have the option of including a Minor in a discipline other than Music, in which case they must meet all prerequisites and requirements for the Minor. The subject of the candidate's Minor shall be that declared by the candidate on the Change of Academic Program Form, which is available at [www.mun.ca/regoff/registration/Declare\\_Change\\_Academic\\_Program.pdf](http://www.mun.ca/regoff/registration/Declare_Change_Academic_Program.pdf) or in person at the Office of the Registrar.

### 5.4.4 Musicologies

Candidates for this Major must apply in writing to the Dean by February 15th in the semester during which they are registered for Music 2006, submitting up to three pieces of relevant work by the end of classes in that semester, including essays or analyses written either in the context of academic course work or independently. Candidates will be interviewed by a panel of faculty in this discipline. Admission to this Major will be based on the candidate's: 1) submitted work, 2) interview, 3) achievement in Music 1005, 1006, 2005, 2006 and any electives in musicologies, as well as English, Critical Reading and Writing (CRW) courses, and/or former Research/Writing (R/W) courses, 4) general academic achievement, and 5) potential for a career and/or graduate work in musicology, ethnomusicology, journalism or a related field.

### 5.4.5 Performance

Candidates for this Major must apply in writing to the Dean by February 15th in the semester during which they are registered for Music 240B. Candidates are required to audition for this program. Where possible, the jury examination for Music 240B will be considered as the audition for admission to the Performance Major, although in some cases the audition may require repertoire beyond the level and amount prepared for the jury examination. Admission to this Major will be based on a candidate's: 1) performance on the audition and achievement in Music 140A/B and 240A/B, 2) general academic achievement, and 3) potential for a career and/or graduate work in performance.

### 5.4.6 Joint Major in Music Performance and Musicologies

Candidates for the Joint Major must apply in writing to the Dean by February 15th in the semester during which they are registered for Music 240B. Candidates for admission to the Joint Major must fulfill the requirements for admission to both the Performance and Musicologies Majors.

### 5.4.7 Major in Music Performance with a Minor in Composition

Candidates for this Major must apply in writing to the Dean by February 15th in the semester during which they are registered for Music 240B. Candidates must fulfill the requirements for admission to both the Performance and Composition Majors.

### 5.4.8 Bachelor of Music Conjoint with Bachelor of Music Education

This program is offered with the Faculty of Education, and is recommended for candidates planning to pursue a career in Music Education. Candidates for the Conjoint Degrees program must meet the Faculty of Education's admission requirements for the Bachelor of Music Education Conjoint Degree program. Applications must be submitted to the Faculty of Education by January 15 for admission to the following Fall semester.

## 5.5 Admission Requirements to Minor Programs

1. The Interdisciplinary Minor in Music and Culture and Minor in Music History are available to students in the Bachelor of Arts, Bachelor of Science, Bachelor of Business Administration, Bachelor of Commerce (Cooperative), Bachelor of Recreation, Bachelor of Recreation (Honours), Bachelor of Recreation (Cooperative), and Bachelor of Recreation (Cooperative) (Honours). Students wishing to complete either of these minors must declare so on the Change of Academic Program Form, which is available at [www.mun.ca/regoff/registration/Declare\\_Change\\_Academic\\_Program.pdf](http://www.mun.ca/regoff/registration/Declare_Change_Academic_Program.pdf) or in person at the Office of the Registrar.
2. Students wishing to be considered for admission to the Minor in Music History must also meet the prerequisites for Music 1107 and 1117.

## 6 Bachelor of Music Degree Regulations

Students admitted or readmitted to the School of Music before Fall 2012 must follow the regulations outlined in the 2012-2013 University Calendar under **Bachelor of Music Degree Regulations, Transition to New Bachelor of Music Degree Program**. In addition **Table 1 Substitutions for Music Courses Required Under Previous Regulations** lists the courses that students following the regulations of an earlier Calendar may substitute for required courses that are no longer offered. **Table 2 Substitution of Former Courses For Courses in This Calendar** lists the former courses that may be substituted for courses required under this Calendar which were not offered before Fall 2012. Both Table 1 and Table 2 may be found on the School of Music website at [www.mun.ca/music/current/crse\\_subs.php](http://www.mun.ca/music/current/crse_subs.php).

### 6.1 Program Regulations

1. Students admitted to the Bachelor of Music program may register for a maximum of 18 credit hours per semester without written permission from the Dean.
2. A student may not repeat for credit a Principal Applied Study course that s/he has already successfully completed, unless the student has the written permission of the Dean.
3. Active participation in School of Music ensembles is an integral part of a music student's education. One must be present at rehearsals and performances to have participated in the learning experience. Furthermore, the success of the ensemble as a whole is dependent upon the regular attendance and participation of all of its members. Accordingly, attendance will be required in the following courses: Music 2611-2620, Music 263A/B, Music 265A/B, Music 3500, and Music 3511-3518.
4. The following Music courses may not be counted toward the Bachelor of Music degree: Music 1105, 1106, 1120, 2011, 2012, 2013 and 2014.

### 6.2 Core Program Requirements

All Bachelor of Music students, regardless of Major, must complete the following courses (55 credit hours) as outlined below:

1. **Applied Music (8 credit hours):** 140A/B, 240A/B
2. **Musicologies (15 credit hours):** 1005, 1006, 2005, 2006, 3009
3. **Music Theory (19 credit hours):**
  - a. **Written Theory:** 1107, 1108, 2107, 2108, 3105
  - b. **Aural Skills:** 1117, 1118, 2117, 2118
4. **Music Technology (1 credit hour):** Music 1700
5. **Functional Keyboard (1 credit hour):** 2401 or 2411, 2402 or 2412
6. **Ensemble I:** 1 credit hour from Music 3517 or 3518
7. **Ensemble II:** 10 credit hours according to **Principal Applied Study** below:
  - a. **Voice:** Music 2700 and 2701, and 2 credit hours from Music 2611-2612, plus 6 additional credit hours from Music 2611, 2612, 2616, 2617. Students will be placed in one of these ensemble courses during each semester in which they are enrolled in Principal Applied Study. The assignment will be based on their ensemble audition, the appropriateness of the ensemble for the student's musical development and program of study, and the need to create balanced ensembles.
  - b. **Piano, Organ, or Guitar:** 2 credit hours of music electives chosen from courses beyond the 1000 level, and 2 credit hours from Music 2611-2612, plus 6 additional credit hours from Music 2611-2620. Students will be placed in one of these ensemble courses during each semester in which they are enrolled in Principal Applied Study. The assignment will be based on their ensemble audition, the appropriateness of the ensemble for the student's musical development and program of study, and the need to create balanced ensembles.
  - c. **All other Principal Applied Study, i.e. percussion or a string or wind instrument:** 2 credit hours from Music 2611-2612, plus 8 credit hours from Music 2613, 2614, 2615, 2619, 2620. Students will be placed in two of these ensemble courses during each semester in which they are enrolled in Music 140A/B and in one ensemble course during each subsequent semester of Principal Applied Study. Ensemble assignments will be based on their ensemble auditions, the appropriateness of the ensemble for the student's musical development and program of study, and the need to create balanced ensembles.
8. The remaining credit hours for the degree are determined according to the student's Major, as below.

### 6.3 Composition Major

To be awarded the degree of Bachelor of Music in Composition, a candidate shall comply with the School's regulations, and successfully complete a minimum of 123 credit hours, including 55 credit hours in the **Core Program**. The remaining 68 credit hours will be chosen as follows:

1. Music 340A/B, 440A/B.
2. Six credit hours of Music 3140 and 6 credit hours of Music 4140.
3. Music 3104, 3112, 4112 and one of Music 3106 and 3108.
4. Twelve additional credit hours chosen from Music courses beyond the 1000 level including:
  - a. A maximum of 4 credit hours from Music 2611-2614, 2619, 2620, and 263A/B, in addition to those listed under the **Core Program**.
  - b. A maximum of 5 credit hours from Music 2615, 2616, 2617, 265A/B, 3500, the former 3510, 3511-3518 in addition to those listed under the **Core Program**.
  - c. No more than one of Music 2021, 2022 and 2023.
  - d. Students interested in this Major are strongly encouraged to take Music 3100 in their second year.
5. Twenty-four credit hours chosen from disciplines other than Music and Music Education, including at least 6 credit hours from courses in English, designated Critical Reading and Writing (CRW) courses, and/or former Research/Writing (R/W) courses.

### 6.4 Comprehensive Major

To be awarded the degree of Bachelor of Music with a Comprehensive Major, a candidate shall comply with the School's regulations, and successfully complete a minimum of 123 credit hours, including 55 credit hours in the **Core Program**. The remaining 68 credit hours will be chosen as follows:

1. Music 340A/B, 440A/B
2. Music 2311, 2312, 3321, 3322
3. Four credit hours of instrumental techniques courses, chosen as follows:
  - a. Music 3221 or 3222
  - b. One of Music 3231, 3232, 3233
  - c. Music 3241 or 3242
  - d. Music 3281 or 3282
4. Music 3401 or 3411, 3402 or 3412.
5. Nineteen additional credit hours chosen from Music courses beyond the 1000 level including:
  - a. At least 3 credit hours chosen from courses beyond the 2000 level in Musicologies and Music Theory/Composition.
  - b. A maximum of 4 credit hours from Music 2611-2614, 2619, 2620, and 263A/B, in addition to those listed under the **Core Program**.
  - c. A maximum of 5 credit hours from Music 2615, 2616, 2617, 265A/B, 3500, the former 3510, 3511-3518 in addition to those listed under the **Core Program**.
  - d. No more than 3 credit hours from Music 2021, 2022 and 2023.
  - e. Three credit hours chosen from the following may be substituted for Music electives in the Comprehensive Major: Education 2500, 2515, 2520.
6. Twenty-four credit hours chosen from disciplines other than Music and Music Education, including at least 6 credit hours from courses in English, designated Critical Reading and Writing (CRW) courses, and/or former Research/Writing (R/W) courses.

## 6.5 General Musical Studies Major

To be awarded the degree of Bachelor of Music in General Musical Studies, a candidate shall comply with the School's regulations, and successfully complete a minimum of 123 credit hours, including 55 credit hours in the **Core Program**. The remaining 68 credit hours will be chosen as follows:

1. Music 340A/B, 440A/B.
2. An additional 60 credit hours to be chosen according to either **Option A** or **Option B** below:

### 6.5.1 Option A (With Minor)

1. An additional 21 credit hours chosen from Music courses beyond the 1000 level, including:
  - a. At least 6 credit hours chosen from courses beyond the 2000 level in Musicologies and Music Theory/Composition.
  - b. A maximum of 4 credit hours from Music 2611-2614, 2619, 2620, and 263A/B, in addition to those listed under the **Core Program**.
  - c. A maximum of 5 credit hours from Music 2615, 2616, 2617, 265A/B, 3500, the former 3510, 3511-3518 in addition to those listed under the **Core Program**.
  - d. No more than one of Music 2021, 2022 and 2023.
2. Six credit hours chosen from courses in English, designated Critical Reading and Writing (CRW) courses, and/or former Research/Writing (R/W) courses.
3. A Minor of at least 24 credit hours in a subject other than Music. The candidate must follow the regulations for the Minor as set forth in the appropriate section of the Calendar.
4. Nine credit hours of open electives which may be chosen from courses in Music, the Minor subject, and/or any other disciplines. However, no more than 3 credit hours in Music Education may be included.

### 6.5.2 Option B (No Minor)

1. An additional 36 credit hours chosen from music courses beyond the 1000 level including:
  - a. At least 12 credit hours chosen from courses beyond the 2000 level in Musicologies and Music Theory/Composition.
  - b. A maximum of 4 credit hours from Music 2611-2614, 2619, 2620, and 263A/B, in addition to those listed under the **Core Program**.
  - c. A maximum of 5 credit hours from Music 2615, 2616, 2617, 265A/B, 3500, the former 3510, 3511-3518 in addition to those listed under the **Core Program**.
  - d. No more than one of Music 2021, 2022 and 2023.
  - e. A maximum of 3 credit hours chosen from the following courses may be substituted for Music electives: Education 2500, 2515, 2520. Music Education Majors have priority in registering for these courses and spaces may not be available for General Musical Studies Majors
2. Twenty-four credit hours chosen from disciplines other than Music and Music Education, including at least 6 credit hours from courses in English, designated Critical Reading and Writing (CRW) courses, and/or former Research/Writing (R/W) courses.

## 6.6 Musicologies Major

To be awarded the degree of Bachelor of Music in Musicologies, a candidate shall comply with the School's regulations, and successfully complete a minimum of 123 credit hours, including 55 credit hours in the **Core Program**. The remaining 68 credit hours will be chosen as follows:

1. Music 340A/B, 440A/B
2. Music 4095
3. Fifteen additional credit hours beyond the 2000 level in Musicologies.
4. Six credit hours chosen from Anthropology, Canadian Studies, European Studies, Folklore, Gender Studies, History, Law and Society, Medieval Studies, Newfoundland and Labrador Studies, Philosophy, Political Science, Psychology, Religious Studies, and/or Sociology.
5. Twelve additional credit hours chosen from music courses beyond the 1000 level including:
  - a. A maximum of 4 credit hours from Music 2611-2614, 2619, 2620, and 263A/B, in addition to those listed under the **Core Program**.
  - b. A maximum of 5 credit hours from Music 2615, 2616, 2617, 265A/B, 3500, the former 3510, 3511-3518 in addition to those listed under the **Core Program**.
  - c. No more than one of Music 2021, 2022 and 2023.
6. Twenty-four credit hours chosen from disciplines other than Music and Music Education, including at least 6 credit hours from courses in English, designated Critical Reading and Writing (CRW) courses, and/or former Research/Writing (R/W) courses and at least 6-credit hours in a language or languages other than English.

## 6.7 Performance Major

To be awarded the degree of Bachelor of Music in Performance, a candidate shall comply with the School's regulations, and successfully complete a minimum of 123 credit hours, including 55 credit hours in the **Core Program**. The remaining 68 credit hours will be chosen as follows:

1. Music 345A/B, 445A/B.
2. Music 3704 and 3 credit hours chosen from Music 3722, 3732, 3742, 3751, 3764, 3774, 4701, 4702, 4703.
3. Six credit hours from Music 2615, 2616, 2617, 265A/B, 3500, the former 3510, 3511-3518.
4. Twenty additional credit hours from Music courses beyond the 1000 level, including:
  - a. At least 6 credit hours chosen from courses beyond the 2000 level in Musicologies and Music Theory/Composition.
  - b. A maximum of 4 credit hours from Music 2611-2614, 2619, 2620, and 263A/B, in addition to those outlined under the **Core Program**.

- c. No more than one of Music 2021, 2022 and 2023.
  - d. A maximum of 3 credit hours chosen from the following courses may be substituted for Music electives: Education 2500, 2515, 2520. Music Education Majors have priority in registering for these courses and spaces may not be available for Performance Majors.
5. Twenty-four credit hours chosen from disciplines other than Music and Music Education, including at least 6 credit hours from courses in English, designated Critical Reading and Writing (CRW) courses, and/or former Research/Writing (R/W) courses. Students whose Principal Applied Study is Voice must include at least 3 credit hours in each of Italian, German and French.

## 6.8 Joint Major in Performance and Musicologies

To be awarded the degree of Bachelor of Music with a Joint Major in Performance and Musicologies, a candidate shall comply with the School's regulations, and successfully complete a minimum of 127 credit hours, including 55 credit hours in the **Core Program**. The remaining 72 credit hours will be chosen as follows:

1. Music 345A/B, 445A/B.
2. Three credit hours chosen from Music 3704, 3722, 3732, 3742, 3751, 3764, 3774, 4701, 4702, 4703.
3. Six credit hours from Music 2615, 2616, 2617, 265A/B, 3500, the former 3510, 3511-3518.
4. Music 4095.
5. Fifteen additional credit hours beyond the 2000 level in Musicologies.
6. An additional 3 credit hours chosen from music courses beyond the 1000 level.
7. Thirty credit hours chosen from disciplines other than Music, including:
  - a. At least 6 credit hours chosen from courses in English, designated Critical Reading and Writing (CRW) courses, and/or former Research/Writing (R/W) courses.
  - b. 6 credit hours in Anthropology, Canadian Studies, European Studies, Folklore, Gender Studies, History, Law and Society, Medieval Studies, Newfoundland and Labrador Studies, Philosophy, Political Science, Psychology, Religious Studies, and/or Sociology.
  - c. At least 6 credit hours in a language or languages other than English. Students whose Principal Applied Study is Voice must include at least 3 credit hours in each of Italian, German, and French.

## 6.9 Major in Performance with a Minor in Composition

To be awarded the degree of Bachelor of Music with a Major in Performance and a Minor in Composition, a candidate shall comply with the School's regulations, and successfully complete a minimum of 124 credit hours, including 55 credit hours in the **Core Program**. The remaining 69 credit hours will be chosen as follows:

1. Music 345A/B, 445A/B.
2. Music 3704 and 3 credit hours chosen from Music 3722, 3732, 3742, 3751, 3764, 3774, 4701, 4702, 4703.
3. Six credit hours from Music 2615, 2616, 2617, 265A/B, 3500, the former 3510, 3511-3518.
4. Six credit hours of Music 3140.
5. Music 3104, 3112 and one of Music 3106 or 3108.
6. Six credit hours chosen from Music courses beyond the 1000 level including:
  - a. A maximum of 4 credit hours from Music 2611-2614, 2619, 2620, and 263A/B, in addition to those listed under the **Core Program**.
  - b. A maximum of 5 credit hours from Music 2615, 2616, 2617, 265A/B, 3500, the former 3510, 3511-3518 in addition to those listed under the **Core Program**.
  - c. No more than 3 credit hours from Music 2021, 2022 and 2023.
  - d. Students interested in this Major are strongly encouraged to take Music 3100 in their second year.
7. Twenty-four credit hours chosen from disciplines other than Music or Music Education, including at least 6 credit hours chosen from courses in English, designated Critical Reading and Writing (CRW) courses, and/or former Research/Writing (R/W) courses. Students whose Principal Applied Study is Voice must include at least 3 credit hours in each of Italian, German, and French.

## 6.10 Bachelor of Music Conjoint with Bachelor of Music Education

To be awarded the Conjoint Degrees of Bachelor of Music and Bachelor of Music Education, a candidate shall comply with the School's regulations and successfully complete a minimum of 159 credit hours, including 55 credit hours in the **Core Program**. The remaining 104 credit hours will be chosen as follows:

1. Music 340A/B, 440A/B.
2. Music 2311, 2312, 3321, 3322.
3. Eight credit hours chosen from: Music 3221, 3222, 3231, 3232, 3233, 3241, 3242, 3261, 3281, 3282.
4. Music 3401 or 3411, 3402 or 3412.
5. Six additional credit hours chosen from Music courses beyond the 1000 level including:
  - a. A maximum of 4 credit hours from Music 2611-2614, 2619, 2620, and 263A/B, in addition to those listed under the **Core Program**.
  - b. A maximum of 5 credit hours from Music 2615, 2616, 2617, 265A/B, 3500, the former 3510, 3511-3518 in addition to those listed under the **Core Program**.
  - c. No more than 3 credit hours from Music 2021, 2022 and 2023.
6. Forty-five credit hours as prescribed by the Faculty of Education under the **Regulations for the Conjoint Degrees of Bachelor of Music and Bachelor of Music Education**.
7. Twenty-four credit hours chosen from disciplines other than Music and Music Education, including at least 6 credit hours from courses in English, designated Critical Reading and Writing (CRW) courses, and/or former Research/Writing (R/W) courses. Conjoint degrees students are strongly encouraged to take at least 18 credit hours in a second teachable subject.

## 6.11 Bachelor of Music (Honours)

The Bachelor of Music (Honours) will be awarded to candidates in the Performance, Composition, Musicologies, General Musical Studies, and Comprehensive Majors, candidates in the Joint Major in Performance and Musicologies, and candidates in the Major in Performance with a Minor in Composition who:

1. are graduating with First Class standing;
2. meet all the graduation requirements in the Bachelor of Music Degree Regulations for their Major; and
3. have attained a minimum average of 82% in all Music courses included in the degree.

## 7 Academic Standards and Continuance in the Bachelor of Music

1. Students in the Performance Major must attain a minimum grade of 75% in each of the jury exam and the course work for Music 345A/B and Music 445A/B. Students who fail to do so will be required to withdraw from the Performance Major. In such cases, the student may apply in writing to the Dean for admission into a Major other than Performance.
2. With the exception of those who have completed Music 440B or 445B, students who are not registered for a Principal Applied Study course or Education 403X at the end of the regular registration period will be deemed to have withdrawn from the Bachelor of Music degree program.
3. A student who withdraws from a Principal Applied Study course at any time in the semester shall have his/her eligibility to continue in the degree program reviewed by the Committee on Undergraduate Studies. The Committee shall determine whether or not the student shall be deemed to have withdrawn.
4. A student whose average in Music courses falls below 65% in any semester will be placed on probation.
5. A student who is on probation will be returned to clear standing if s/he achieves an average above 65% in music courses taken during the probation semester.
6. A student will be required to withdraw from the Bachelor of Music degree program if a) the student's average in music courses falls below 65% in each of two consecutive semesters of registration in the program, or b) the student's average in music courses falls below 65% in any three semesters of registration in the program, or c) the student fails any music course more than once, or d) the student has been unable to complete two consecutive semesters or three non-consecutive semesters of applied music studies (Music 140A/B, 240A/B, 340A/B, 440A/B, 345A/B, 445A/B).
7. Students who have withdrawn from the Bachelor of Music degree program and wish to re-enter the program must re-apply in competition. A student re-entering the program may be readmitted on probation if the Admissions Committee so recommends.
8. Students who have been required to withdraw from the Bachelor of Music degree program may apply for readmission after a minimum of two semesters have elapsed following the withdrawal.
9. Students who have been required to withdraw from the Bachelor of Music degree program twice are ineligible for further readmission.
10. Students who have withdrawn from the Bachelor of Music degree program may apply to be readmitted in either the Fall or Winter semester.

## 8 Minor Program Regulations

Students admitted or readmitted to the School of Music before Fall 2012 must follow the regulations outlined in the 2012-2013 University Calendar under **Minor Program Regulations, Transition to New Minor Programs. Table 1 Substitutions for Music Courses Required Under Previous Regulations** lists the courses that students following the regulations of an earlier Calendar may substitute for required courses that are no longer offered. In addition, **Table 2 Substitution of Former courses For Courses in this Calendar** lists the former courses that may be substituted for courses required under the current Calendar which were not offered before Fall 2012. Both Table 1 and Table 2 may be found on the School of Music website at [www.mun.ca/music/current/crse\\_subs.php](http://www.mun.ca/music/current/crse_subs.php).

### 8.1 Interdisciplinary Minor in Music and Culture

1. This Minor is available to students in the Bachelor of Arts, Bachelor of Science, Bachelor of Business Administration, Bachelor of Commerce (Cooperative), Bachelor of Recreation, Bachelor of Recreation (Honours), Bachelor of Recreation (Cooperative), and Bachelor of Recreation (Cooperative) (Honours). The Minor in Music and Culture is not applicable to the Bachelor of Music degree.
2. Students shall complete 24 credit hours for the Minor in Music and Culture, as follows:
  - a. Music 1120, Music 1106, or Music 1107
  - b. Music 4040 or Folklore 4440
  - c. Music 2012 or 2013
  - d. One of Music 2011, 2014, Music 3017 or Folklore 3200, Music 3018 or Folklore 3618
  - e. One of Music 3014, 3015, 3016 and 3019
  - f. One of Music 2021, 2022, and 2023
  - g. Two additional courses chosen from Music 1108 or the courses listed in d., e., f., or g. above.
3. Please note that most Music courses are not offered every semester, and some are offered only in alternate years.

### 8.2 Minor in Music History

1. This Minor is available to students in the Bachelor of Arts, Bachelor of Science, Bachelor of Business Administration, Bachelor of Commerce (Cooperative), Bachelor of Recreation, Bachelor of Recreation (Honours), Bachelor of Recreation (Cooperative), and Bachelor of Recreation (Cooperative) (Honours). The Minor in Music History is not applicable to the Bachelor of Music degree.
2. To be admitted to the Minor in Music History, students must meet the prerequisites for Music 1107 and 1117.
3. Students shall complete the following requirements (29 credit hours) for the Minor in Music History.
  - a. Music 1107, 1108, 1117, and 1118.
  - b. Music 1005, 1006, 2005, 2006, 3009.
  - c. An additional 6 credit hours chosen from Music 3004, 3005, 3006, 3007, 4001, 4002, 4003, 4004, 4005.
4. Course prerequisites stipulated in the course descriptions must be met. Please note that most Music courses are not offered every semester, and some are offered only in alternate years.

## 9 Graduation

Upon meeting the qualifications for any of the programs of the School of Music a student must apply by the appropriate deadline date to graduate on the prescribed "Application for Graduation" form. This form may be obtained on-line at the Memorial Self Service at [www3.mun.ca/admit/twbkwbis.P\\_WWWLogin](http://www3.mun.ca/admit/twbkwbis.P_WWWLogin). Additional information is available from the Office of the Registrar at [www.mun.ca/regoff/graduation/apply\\_grad.php](http://www.mun.ca/regoff/graduation/apply_grad.php).

## 10 Waiver of School Regulations

Every student has the right to request waiver of School regulations. Students wishing waiver of University academic regulations should refer to **UNIVERSITY REGULATIONS - General Academic Regulations (Undergraduate) - Waiver of Regulations**.

1. The School reserves the right in special circumstances to modify, alter, or waive any School regulation in its application to individual students where merit and equity warrant in the judgement of the Committee on Undergraduate Studies of the School.
2. Waiver of a School course prerequisite or co-requisite may be granted by the Dean.
3. All other requests for waiver of a School regulation must be submitted in writing to the Chair of the Committee on Undergraduate Studies of the School for consideration. Medical and/or other documentation to substantiate the request must be provided.
4. Any waiver granted does not reduce the total number of credit hours required for the degree.

## 11 Appeal of Decisions

Any student whose request for waiver of School regulations has been denied has the right to appeal. For further information refer to **UNIVERSITY REGULATIONS - General Academic Regulations (Undergraduate) - Appeal of Decisions**.

## 12 Music Courses Available to Students not Enrolled in a Program Offered by the School

1. The following Music courses are available to students who have not been admitted to a program in the School of Music, and are appropriate for students with little or no musical background:
  - Music 1105 Elements of Music I (3 credit hours)
  - Music 1106 Elements of Music II (3 credit hours)
  - Music 1120 Rudiments 1 (3 credit hours)
  - Music 2011 North American Popular Music (3 credit hours)
  - Music 2012 Understanding Classical Music (3 credit hours)
  - Music 2013 Twentieth-Century Musicals (3 credit hours)
  - Music 2014 Introduction to World Music (3 credit hours)
2. The following ensemble courses are available to non-music students with appropriate background, subject to the approval of the instructor:
  - Music 2611 Festival Choir (1 credit hour per semester)
  - Music 2614 Concert Band (1 credit hour per semester)
3. Non-Music students may also audition to participate in the following ensemble courses:
  - Music 2612 Chamber Choir (1 credit hour per semester)
  - Music 2613 Chamber Orchestra (1 credit hour per semester)
  - Music 2615 Jazz Ensemble (1 credit hour per semester)
  - Music 2616 Opera Workshop (1 credit hour per semester)
  - Music 2617 Opera Workshop (2 credit hours per semester)
  - Music 2619 Wind Ensemble (1 credit hour per semester)
  - Music 263A/B Chamber Orchestra (1 credit hour per two semesters)
  - Music 265A/B Jazz Ensemble (1 credit hour per two semesters)

Contact the School of Music office for further information regarding the audition process.
4. Most courses in musicologies (course numbers with second digit "0") and music theory/composition (course numbers with second digit "1") are available to non-music Majors who have fulfilled the prerequisites.

## 13 Course Descriptions

In accordance with Senate's *Policy Regarding Inactive Courses*, the course descriptions for courses which have not been offered in the previous three academic years and which are not scheduled to be offered in the current academic year have been removed from the following listing. For information about any of these inactive courses, please contact the Dean of the School.

All courses in the School of Music are designated by the abbreviation MUS.

### 13.1 Applied Music Courses

**140A/B Principal Applied Study I** requires one hour per week of individual instruction (vocal or instrumental).

AR: attendance is required at School of Music recitals  
CH: 4

CO: in each semester for students whose applied study is voice, piano, organ or guitar: one of MUS 2611, 2612 and in each semester for all other applied studies: one of MUS 2611 or 2612, and one of MUS

2613, 2614, 2615, 2619, 2620

OR: one hour per week of individual instruction

PR: admission to the Bachelor of Music Degree program

**1700 Introduction to Music Technology** provides a practical introduction to useful computer tools for musicians, such as music notation software, basic digital audio editing, and new media.

CH: 1

CO: MUS 140A/B

LC: 1

PR: admission to the Bachelor of Music Degree program

**2401 Functional Keyboard I** is an introduction to practical keyboard skills for students whose Principal Applied Study is not piano or organ. Functional accompaniment, transposition and score reading are emphasized.

CH: 0

CR: the former MUS 1127

LC: 1

PR: MUS 1108, successful completion of the Piano Proficiency Test, and admission to the Bachelor of Music Degree program

UL: may not be taken for credit by students whose Principal Applied Study is a keyboard instrument.

**2402 Functional Keyboard II** is a continuation of MUS 2401.

CH: 1  
CR: the former MUS 1128  
LC: 1  
PR: MUS 2401 and admission to the Bachelor of Music Degree program  
UL: may not be taken for credit by students whose Principal Applied Study is a keyboard instrument.

**240A/B Principal Applied Study II** is a continuation of MUS 140A/B.

AR: attendance is required at School of Music recitals  
CH: 4  
CO: one of MUS 2611-2620 in accordance with Ensemble II under the **Core Program**  
OR: one hour per week of individual instruction  
PR: MUS 140A/B and admission to the Bachelor of Music Degree program

**2411 Advanced Functional Keyboard I** is an introduction to practical keyboard skills for students whose Principal Applied Study is piano or organ. Functional accompaniment, transposition and score reading are emphasized.

CH: 0  
CR: the former MUS 1137  
LC: 1  
PR: MUS 1108, permission of the instructor for students whose Principal Applied Study is not a keyboard instrument, and admission to the Bachelor of Music Degree program

**2412 Advanced Functional Keyboard II** is a continuation of MUS 2411.

CH: 1  
CR: the former MUS 1138  
LC: 1  
PR: MUS 2411, permission of the instructor for students whose Principal Applied Study is not a keyboard instrument, and admission to the Bachelor of Music Degree program

**2611 Festival Choir** requires three hours rehearsal per week.

AR: attendance is required  
CH: 1  
PR: approval of the instructor  
UL: may only obtain a maximum of 10 credit hours; not applicable as an elective under the Bachelor of Arts program; students in the Faculty of Education should consult the Office of Undergraduate Programs in the Faculty of Education regarding applicability of this course to their education degree program.

**2612 Chamber Choir** requires three hours rehearsal per week.

AR: attendance is required  
CH: 1  
PR: an audition. Contact the instructor or the School of Music office before the beginning of the semester regarding the audition.  
UL: may only obtain a maximum of 8 credit hours; not applicable as an elective under the Bachelor of Arts program; students in the Faculty of Education should consult the Office of Undergraduate Programs in the Faculty of Education regarding applicability of this course to their education degree program.

**2613 Chamber Orchestra** requires three hours rehearsal per week.

AR: attendance is required  
CH: 1  
PR: an audition. Contact the instructor or the School of Music office before the beginning of the semester regarding the audition.  
UL: may only obtain a maximum of 8 credit hours; not applicable as an elective under the Bachelor of Arts program; students in the Faculty of Education should consult the Office of Undergraduate Programs in the Faculty of Education regarding applicability of this course to their education degree program.

**2614 Concert Band** - inactive course.

**2615 Jazz Ensemble** requires three hours rehearsal per week.

AR: attendance is required  
CH: 1  
PR: an audition. Contact the instructor or the School of Music office before the beginning of the semester regarding the audition.  
UL: may only obtain a maximum of 8 credit hours; available for credit only to students who successfully audition for participation in the ensemble; not applicable as an elective under the Bachelor of Arts program; students in the Faculty of Education should consult the Office of Undergraduate Programs in the Faculty of Education regarding applicability of this course to their education degree program.

**2616 Opera Workshop** requires three hours rehearsal per week.

AR: attendance is required  
CH: 1  
PR: an audition. Contact the instructor or the School of Music office before the beginning of the semester regarding the audition.  
UL: may only obtain a maximum of 8 credit hours; available for credit only to students who successfully audition for participation in the ensemble; not applicable as an elective under the Bachelor of Arts program; students in the Faculty of Education should consult the Office of

Undergraduate Programs in the Faculty of Education regarding applicability of this course to their education degree program.

**2617 Opera Workshop** requires six hours rehearsal per week.

AR: attendance is required  
CH: 2  
PR: an audition. Contact the instructor or the School of Music office before the beginning of the semester regarding the audition.  
UL: may only obtain a maximum of 16 credit hours; available for credit only to students who successfully audition for participation in the ensemble; not applicable as an elective under the Bachelor of Arts program; students in the Faculty of Education should consult the Office of Undergraduate Programs in the Faculty of Education regarding applicability of this course to their education degree program.

**2619 Wind Ensemble** requires three hours rehearsal per week.

AR: attendance is required  
CH: 1  
PR: an audition. Contact the instructor or the School of Music office before the beginning of the semester regarding the audition  
UL: may only obtain a maximum of 8 credits in 2619 or a combination of 2614 and 2619; not applicable as an elective under the Bachelor of Arts program; students in the Faculty of Education should consult the Office of Undergraduate Programs in the Faculty of Education regarding applicability of this course to their education degree program.

**2620 Instrumental Ensemble** requires three hours rehearsal per week.

AR: attendance is required  
CH: 1  
PR: an audition. Contact the instructor or the School of Music office before the beginning of the semester regarding the audition.  
UL: may only obtain a maximum of 8 credit hours

**263A/B Chamber Orchestra** requires 15 hours of rehearsal per semester.

AR: attendance is required  
CH: 1 credit hour per two semesters  
PR: an audition. Contact the instructor or the School of Music office before the beginning of the semester regarding the audition.  
UL: may only obtain a maximum of 4 credit hours; available for credit only to students who successfully audition for participation in the ensemble; not applicable as an elective under the Bachelor of Arts program; students in the Faculty of Education should consult the Office of Undergraduate Programs in the Faculty of Education regarding applicability of this course to their education degree program.

**265A/B Jazz Ensemble** requires 15 hours of rehearsal per semester.

AR: attendance is required  
CH: 1 credit hour per two semesters  
PR: an audition. Contact the instructor or the School of Music office before the beginning of the semester regarding the audition.  
UL: may only obtain a maximum of 4 credit hours; available for credit only to students who successfully audition for participation in the ensemble; not applicable as an elective under the Bachelor of Arts program; students in the Faculty of Education should consult the Office of Undergraduate Programs in the Faculty of Education regarding applicability of this course to their education degree program.

**2700 Lyric Diction I** is a study of English, German, French and Italian lyric diction. The International Phonetic Alphabet will be introduced and applied to singing in these four languages.

CH: 1  
LC: 1  
PR: open only to students whose Principal Applied Study is Voice and admission to the Bachelor of Music Degree program

**2701 Lyric Diction II** is a continuation of MUS 2700.

CH: 1  
LC: 1  
PR: MUS 2700; open only to students whose Principal Applied Study is Voice and admission to the Bachelor of Music Degree program

**3401 Functional Keyboard III** is continuation of MUS 2402. Emphasis is on functional keyboard skills for classroom music teachers.

CH: 0  
CR: the former MUS 2127  
LC: 1  
PR: MUS 2402 and admission to the Bachelor of Music Degree program  
UL: may not be taken for credit by students whose Principal Applied Study is a keyboard instrument

**3402 Functional Keyboard IV** is a continuation of MUS 3401.

CH: 1  
CR: the former MUS 2128  
LC: 1  
PR: MUS 3401 and admission to the Bachelor of Music Degree program  
UL: may not be taken for credit by students whose Principal Applied Study is a keyboard instrument

**340A/B Principal Applied Study III** is a continuation of MUS 240A/B for

students whose Major is other than Performance.

AR: attendance is required at School of Music recitals

CH: 4

CO: one of MUS 2611-2620 in accordance with Ensemble II under the **Core Program**

CR: MUS 345A/B

OR: one hour per week of individual instruction

PR: MUS 240A/B, successful completion of MUS 1006, 1108, 1118, and admission to the Bachelor of Music Degree program

**3411 Advanced Functional Keyboard III** is a continuation of MUS 2412. Emphasis is on functional keyboard skills for classroom music teachers.

CH: 0

CR: the former MUS 2137

LC: 1

PR: MUS 2412, permission of the instructor for students whose Principal Applied Study is not a keyboard instrument, and admission to the Bachelor of Music Degree program

**3412 Advanced Functional Keyboard IV** is a continuation of MUS 3411.

CH: 1

CR: the former MUS 2138

LC: 1

PR: MUS 3411, permission of the instructor for students whose Principal Applied Study is not a keyboard instrument, and admission to the Bachelor of Music Degree program

**345A/B Principal Applied Study III - Performance** is a continuation of MUS 240A/B. A more intensive approach to performance than in MUS 340A/B. Students are required to present a public recital consisting of 25 to 35 minutes of music to be given before the last day of classes in the second semester of the course.

AR: attendance is required at School of Music recitals

CH: 6

CO: one of MUS 2611-2620 in accordance with Ensemble II under the **Core Program**

CR: MUS 340A/B

OR: one hour per week of individual instruction

PR: MUS 240A/B, successful completion of MUS 1006, 1108, and 1118, and admission to the Bachelor of Music Degree program; open only to Performance Majors

**3500 Chamber Music Seminar** is an introduction to principles and practices in chamber music performance with an overview of repertoire research methods.

AR: attendance is required

CH: 1

CO: first registration in MUS 3511 or 3512

CR: the former MUS 3510

PR: an audition and admission to the Bachelor of Music Degree program. Contact the instructor or the School of Music office before the beginning of the semester regarding the audition.

**3511 Chamber Music** requires the ensemble to prepare and perform a recital of 10-15 minutes of music. Each ensemble receives six hours of coaching in preparation for the performance.

AR: attendance is required at all coachings and masterclasses

CH: 1 per semester

CO: MUS 3500 for first registration in MUS 3511 or 3512

PR: permission of the instructor and admission to the Bachelor of Music Degree program; repertoire to be performed must be approved prior to registration

UL: may only obtain a maximum of 8 credit hours

**3512 Chamber Music** requires the ensemble to prepare and perform a recital of 18-22 minutes of music. Each ensemble receives nine hours of coaching in preparation for the performance.

AR: attendance is required at all coachings and masterclasses

CH: 2 per semester

CO: MUS 3500 for first registration in MUS 3511 or 3512

PR: permission of the instructor and admission to the Bachelor of Music Degree program; repertoire to be performed must be approved prior to registration

UL: may only obtain a maximum of 12 credit hours

**3513 Chamber Music** requires the ensemble to prepare and perform a recital of 25-30 minutes of music. Each ensemble receives twelve hours of coaching in preparation for the performance.

AR: attendance is required at all coachings and masterclasses

CH: 3 per semester

PR: permission of the instructor and admission to the Bachelor of Music Degree program; repertoire to be performed must be approved prior to registration

UL: may only obtain a maximum of 18 credit hours

**3514 Small Ensemble** is a conducted ensemble requiring two hours per week of rehearsal.

CH: 1 per semester

PR: permission of the Dean and admission to the Bachelor of Music

Degree program

UL: may only obtain a maximum of 6 credit hours

**3515 Accompaniment** requires the students to meet for one hour per week in a masterclass. Coaching will be given to prepare for performance of a 15- to 20-minute program with a singer or instrumentalist.

AR: attendance is required

CH: 1 per semester

PR: admission to the Bachelor of Music Degree program; open only to students whose Principal Applied Study is a keyboard instrument; others by permission of the Dean; repertoire to be performed must be approved prior to registration

UL: may only obtain a maximum of 4 credit hours

**3516 Accompaniment** requires students to meet for one hour per week in a masterclass. Coaching will be given to prepare for performance of a half-hour program with a singer or instrumentalist.

AR: attendance is required

CH: 2 per semester

PR: admission to the Bachelor of Music Degree program; open only to students whose Principal Applied Study is a keyboard instrument; others by permission of the Dean; repertoire to be performed must be approved prior to registration

UL: may only obtain a maximum of 8 credit hours

**3517 World Music Ensemble** is a coached activity exploring one or more world music repertoires. This ensemble requires 2 hours of rehearsal per week.

AR: attendance is required

CH: 1 per semester

PR: admission to the Bachelor of Music Degree program

UL: may only obtain a maximum of 6 credit hours

**3518 Contemporary Music/Improvisation Ensemble** is a coached activity exploring improvisation and/or contemporary repertoire for mixed ensembles. This ensemble requires 2 hours of rehearsal per week.

AR: attendance is required

CH: 1 per semester

PR: admission to the Bachelor of Music Degree program

UL: may only obtain a maximum of 6 credit hours

**3605 Music Theatre Workshop** - inactive course.

**3704 Career Skills for Musicians** is an exploration of careers in music. Topics may include preparation of CVs, resumes, cover letters, business plans, grant applications, web sites, press kits and other promotional materials, tax, legal and business issues in the arts; and the study of successful arts enterprises.

CR: the former MUS 3703

PR: MUS 140B and admission to the Bachelor of Music Degree program

Jazz styles and improvisation will be explored through listening (recordings and live performance), imitation, and improvisation of selected jazz standards.

PR: MUS 240B or permission of the instructor, and admission to the Bachelor of Music Degree program

**3712 Improvisation** is an introduction to the art and practice of improvisation through guided ensemble exploration and performance, score study and the application of contemporary performance practice.

PR: MUS 240A/B and admission to the Bachelor of Music Degree program

**3722 Brass Seminar** has topics selected from: issues of brass performance practice, history of brass instruments, brass literature and pedagogy, performance anxiety, comparative performances of brass repertoire, and other issues of special relevance to brass players.

CH: 1 per semester

PR: admission to the Bachelor of Music Degree program. Open only to students whose Principal Applied Study is a brass instrument; others by permission of the Dean.

UL: may only obtain a maximum of 2 credit hours

**3732 Woodwind Seminar** has topics selected from: issues of woodwind performance practice, history of woodwind instruments, woodwind literature and pedagogy, performance anxiety, comparative performances of woodwind repertoire, and other issues of special relevance to woodwind players.

CH: 1 per semester

PR: admission to the Bachelor of Music Degree program. Open only to students whose Principal Applied Study is a woodwind instrument; others by permission of the Dean.

UL: may only obtain a maximum of 2 credit hours

**3742 String Seminar** has topics selected from: issues of string performance practice, history of string instruments, string literature and pedagogy, performance anxiety, comparative performances of string repertoire, and other issues of special relevance to string players.

CH: 1 per semester

PR: admission to the Bachelor of Music Degree program. Open only to students whose Principal Applied Study is a string instrument; others by permission of the Dean.

UL: may only obtain a maximum of 2 credit hours

**3751 Studio Pedagogy** is designed to provide students with a basic knowledge of resources and pedagogical approaches used in studio teaching at various levels. May include guest masterclasses and lectures.

CO: MUS 140B or permission of the instructor

CR: the former MUS 3773

PR: MUS 140B or permission of the instructor, and admission to the Bachelor of Music Degree program

**3764 Vocal Pedagogy** provides a thorough study of the anatomy, physiology and acoustics of the vocal tract and singing voice as well as a practical application of these topics.

CR: the former MUS 3761, 3762, 3763

PR: Music 140B in voice, and admission to the Bachelor of Music Degree program

**3774 Piano Pedagogy** is designed to provide students with a basic knowledge of resources and pedagogical approaches used in piano studio teaching at various levels. May include guest masterclasses and lectures.

CO: MUS 140B or permission of the instructor

CR: the former MUS 3772

PR: MUS 140B or permission of the instructor, and admission to the Bachelor of Music Degree program

**440A/B Principal Applied Study IV** is a continuation of MUS 340A/B.

AR: attendance is required at School of Music recitals

CH: 4

CO: one of MUS 2611-2620 in accordance with Ensemble II listed under the **Core Program**

CR: MUS 445A/B

OR: one hour per week of individual instruction

PR: MUS 340A/B, successful completion of MUS 2006, 2108, and 2118, and admission to the Bachelor of Music Degree program

**445A/B Principal Applied Study IV - Performance** is a continuation of MUS 345A/B. Students are required to present a public recital consisting of 50 to 60 minutes of music with program notes. This recital will normally take place in the second semester, before the last day of classes. A minimum grade of 75% is required to pass MUS 445B.

AR: attendance is required at School of Music recitals

CH: 6

CO: one of MUS 2611-2620 in accordance with Ensemble II listed under the **Core Program**

CR: MUS 440A/B

OR: one hour per week of individual instruction

PR: MUS 345A/B, successful completion of MUS 2006, 2108, and 2118 and admission to the Bachelor of Music Degree program; open only to Performance Majors

**4503 Special Topics in Applied Music** will have topics to be studied announced by the School of Music.

CH: 1 per semester

PR: admission to the Bachelor of Music Degree program

UL: may only obtain a maximum of 3 credit hours

**4504 Special Topics in Applied Music** will have topics to be studied announced by the School of Music.

CH: 2 per semester

PR: admission to the Bachelor of Music Degree program

UL: may only obtain a maximum of 4 credit hours

**4505 Special Topics in Applied Music** will have topics to be studied announced by the School of Music.

CH: 3 per semester

PR: admission to the Bachelor of Music Degree program

UL: may only obtain a maximum of 6 credit hours

**4701 Music in the Community** allows students to explore the role of the artist in the community by planning and carrying out a community music-making project. Students will be required to propose a viable collaborative project prior to registering.

CH: 1

PR: MUS 3704 or the former MUS 3703, permission of the Dean, and admission to the Bachelor of Music Degree program

**4702 Music in the Community** allows students to explore the role of the artist in the community by planning and carrying out a community music-making project. Students will be required to propose a viable collaborative project prior to registering.

CH: 2

PR: MUS 3704 or the former MUS 3703, permission of the Dean, and admission to the Bachelor of Music Degree program

**4703 Music in the Community** allows students to explore the role of the artist in the community by planning and carrying out a community music-making project. Students will be required to propose a viable collaborative

project prior to registering.

PR: MUS 3704 or the former MUS 3703, permission of the Dean, and admission to the Bachelor of Music Degree program

## 13.2 Ensemble Techniques Courses

All courses in ensemble techniques are available only to candidates for the degree of Bachelor of Music except where specified.

**2311 Voice/Choral Materials I** is a practical study, in a class situation, of vocal production, choral conducting and rehearsal techniques. This course is open to Bachelor of Music degree students and students in the Music Concentration Program for the Bachelor of Education (Primary or Elementary) degree.

**2312 Voice/Choral Materials II** is a continuation of MUS 2311.

PR: MUS 2311

**3221 Brass Techniques I** meets one hour per week. Practical study, in a class situation, of the basic techniques of playing brass instruments.

CH: 1

**3222 Brass Techniques II** meets one hour per week. A continuation of MUS 3221. Students whose Principal Applied Study is a brass instrument must have the permission of the instructor to take this course.

CH: 1

**3231 Flute Techniques** meets one hour per week. Practical study, in a class situation, of the basic techniques of playing the flute.

CH: 1

UL: may not be taken for credit by students whose Principal Applied Study is flute.

**3232 Single Reed Techniques** meets one hour per week. Practical study, in a class situation, of the basic techniques of playing the clarinet and/or saxophone.

CH: 1

PR: permission of the instructor for students whose Principal Applied Study is clarinet or saxophone.

**3233 Double Reed Techniques** meets one hour per week. Practical study, in a class situation, of the basic techniques of playing the oboe and/or bassoon.

CH: 1

PR: permission of the instructor for students whose Principal Applied Study is oboe or bassoon.

**3241 Upper String Techniques** meets one hour per week. Practical study, in a class situation, of the basic techniques of playing the violin and viola.

CH: 1

UL: may not be taken for credit by students whose Principal Applied Study is violin or viola

**3242 Lower String Techniques** meets one hour per week. Practical study, in a class situation, of the basic techniques of playing the cello and string bass.

CH: 1

PR: permission of the instructor for students whose Principal Applied Study is cello or string bass.

**3261 Guitar Techniques** meets one hour per week. Practical study, in a class situation, of the basic techniques of playing the guitar.

CH: 1

UL: may not be taken for credit by students whose Principal Applied Study is guitar.

**3271 Organ Techniques** - inactive course.

**3272 Harpsichord Techniques** - inactive course.

**3281 Percussion Techniques I** meets one hour per week. Practical study, in a class situation, of the basic techniques of playing percussion instruments.

CH: 1

UL: may not be taken for credit by students whose Principal Applied Study is percussion.

**3282 Percussion Techniques II** meets one hour per week and is a continuation of MUS 3281.

CH: 1

PR: MUS 3281

UL: may not be taken for credit by students whose Principal Applied Study is percussion.

**3321 Instrumental Conducting I** is the practical study of conducting and rehearsal techniques for band and orchestra.

AR: attendance is required

CR: the former MUS 3311, 3312, 3313, 3314

PR: MUS 1108

**3322 Instrumental Conducting II** is continuation of MUS 3321.

AR: attendance is required  
CR: the former MUS 3315, 3316  
PR: Music 3321

### 13.3 Music Theory and Composition Courses

**1105 Elements of Music I** is an introductory music theory and aural skills course focusing on reading, writing, and hearing basic and intermediate music rudiments that are associated with common practice Western art music. Topics include: pitch and rhythm, intervals, scales, chords, keys, time signatures, and musical terms. Emphasis will be placed on the aural comprehension of all pertinent topics.

CR: MUS 1120  
PR: MUS 1105 or permission of the instructor

**1106 Elements of Music II** is a continuation of Elements of Music I. This course will focus on advanced rudiments and basic harmony with an emphasis on the aural comprehension of all pertinent topics.

CR: MUS 1120  
PR: MUS 1105 or permission of the instructor

**1107 Materials and Techniques of Music I** is the study of the basic materials of tonal music; introduction to melody writing and phrase structures; introduction to voice leading with emphasis on chorale style; analysis and composition of smaller formal elements.

CO: MUS 1117  
CR: the former MUS 110A, the former MUS 1113  
PR: MUS 1106 or successful completion of the Theory Placement Test

**1108 Materials and Techniques of Music II** is a continuation of MUS 1107. Harmonic vocabulary is expanded to include all diatonic triads and seventh chords, with an introduction to chromatic harmony; phrase expansions and contractions; analysis and composition of binary and ternary forms.

CR: the former MUS 110B, the former MUS 1114  
PR: MUS 1107

**1117 Aural Skills I** is a course on sightsinging and dictation.

CH: 1  
CO: MUS 1107  
LC: 2  
PR: MUS 1106 or successful completion of the Theory Placement Test

**1118 Aural Skills II** is a continuation of MUS 1117.

CH: 1  
LC: 2  
PR: MUS 1107, 1117

**1120 Rudiments I** is an introductory course in music rudiments and theory, including basic aural skills.

UL: not applicable to the Bachelor of Music degree.

**2107 Materials and Techniques of Music III** is a study of chromatic harmony with emphasis on both writing and analysis. Introduction to sonata form.

CR: the former MUS 210A, the former MUS 2113  
PR: MUS 1108 and successful completion of the piano proficiency test

**2108 Materials and Techniques of Music IV** is a continuing study of chromatic harmony with an emphasis on enharmonic modulation and other advanced chromatic techniques. Continued study of sonata form, rondo, sonata rondo and variation forms. Written work will include both analysis and composition exercises in the styles studied.

CR: the former MUS 210B, the former MUS 2114  
PR: MUS 2107

**2117 Aural Skills III** is a continuation of MUS 1118.

CH: 1  
LC: 2  
PR: MUS 1108, 1118 and successful completion of the piano proficiency test

**2118 Aural Skills IV** is a continuation of MUS 2117.

CH: 1  
LC: 2  
PR: MUS 2107, 2117

**3100 Composition I** introduces students to a variety of compositional concepts such as selected post-1900 techniques, developments in rhythm and metre, texture, phrase structures, song forms, short forms, and motivic development. The emphasis will be on composing short works employing the compositional devices studied. Students planning to apply for the Major in Composition are strongly encouraged to take this course.

PR: MUS 1108

**3104 Electronic Music Studio Techniques I** is a course designed to give basic instruction in the theory, technique, and philosophy of electronic music composition. Students obtain the skills necessary to operate the equipment

of an electronic music studio (including mixers, synthesizers, and samplers) and to use them in appropriate and creative ways. Objectives of the course are achieved through lecture, lab experiences, listening and practical application.

PR: MUS 1108

**3105 Materials and Techniques of Post-Tonal Music** is a study of compositional devices used in the twentieth century. Topics include minimalism, new tonality, aleatorism, atonality, set theory, serial techniques, and electronic music.

PR: MUS 2108

**3106 Sixteenth-Century Counterpoint** is a course combining the analytical study of 16th-century sacred polyphony with an emphasis on the development of compositional skills in this style. Students will be required to write two- and three-part counterpoint exercises and a motet. The principal composers studied will be Palestrina, Lassus and Victoria. Some listening and singing assignments are required.

PR: MUS 1108

**3108 Eighteenth-Century Counterpoint** is a study of form and polyphony in eighteenth-century music, including the fugue and the Baroque suite. Assignments include analysis, composition, and written exercises in counterpoint.

CR: the former MUS 310A, the former MUS 3113  
PR: MUS 2107

**3109 Jazz Theory and Arranging** is an introduction to jazz theory and the principles of arranging for jazz ensembles.

PR: MUS 2108

**3112 Orchestration I** is an introduction to the principles of orchestration with an emphasis on instrumentation.

CR: the former MUS 3102  
PR: MUS 2108 or permission of the instructor

**3140 Composition Seminar** provides intensive composition study for students whose Major or Minor is Composition.

PR: MUS 2108, 2118, and admission to the Composition Major or Minor  
UL: may only obtain a maximum of 6 credit hours

**4104 Electronic Music Studio Techniques II** is a continuation of MUS 3104.

PR: MUS 3104

**4105 Special Topics in Music Theory** will have topics to be studied announced by the School of Music.

CH: 1  
UL: may only obtain a maximum of 3 credit hours

**4106 Special Topics in Music Theory** will have topics to be studied announced by the School of Music.

CH: 2  
UL: may only obtain a maximum of 4 credit hours

**4107 Special Topics in Music Theory** will have topics to be studied announced by the School of Music.

UL: may only obtain a maximum of 6 credit hours

**4112 Orchestration II** is a continuation of MUS 3112, and examines the technique of orchestration as it relates to the symphonic orchestra and other large ensembles.

CR: the former MUS 4102  
PR: MUS 3112, or the former MUS 3102, or permission of the instructor.

**4140 Advanced Composition Seminar** provides advanced composition study for students whose Major or Minor is Composition. Students will prepare a recital of original works and/or a portfolio of their compositions.

PR: 6 credit hours of MUS 3140, and admission to the Composition Major  
UL: may only obtain a maximum of 6 credit hours

### 13.4 Musicologies Courses

**1005 Thinking and Writing About Music I** is designed to develop listening, critical thinking, research and writing skills through selected cross-cultural topics and themes exploring the relationship between music and society. The course will introduce the student to the terminology of music history and the concepts of genre, musical style and style periods. This course has strong listening and writing components.

CR: MUS 2012, the former MUS 1002

PR: MUS 1120 or MUS 1106 or successful completion of theory placement test or admission to the Bachelor of Music degree program. The ability to read music is required.

**1006 Thinking and Writing about Music II** is a continuation of MUS 1005.

PR: MUS 1005

**2005 History of Western Art Music I** is an intensive survey, through selected compositions, of the development of musical style to 1700. This course has strong listening and writing components and continues to

develop research skills.  
 CO: MUS 1107  
 CR: the former MUS 1003  
 PR: MUS 1006

**2006 History of Western Art Music II** is a continuation of MUS 2005. An intensive survey, through selected compositions, of the development of musical styles in the Western world from 1700 to 1900. This course has strong listening and writing components and continues to develop research skills.

CR: the former MUS 2002  
 PR: MUS 2005

**2011 North American Popular Music** examines the development of North American popular music from its origins in the mid-nineteenth century to the present. The course examines major musical genres, their historical roots, their musical characteristics, the influences that shaped them and the artists who defined them. It explores sociopolitical issues embedded in popular music, as well as how music has evolved to express new conceptions of self and community, social anxieties, tensions and ideals. No prior musical knowledge is required.

UL: not applicable to the Bachelor of Music Degree

**2012 Understanding Classical Music: Introduction Through Guided Listening** is a course designed to enhance and develop listening skills and an understanding of the basic elements of music. Form and musical style in Western classical music will be explored within a cultural and historical context. Through guided listening, the student will be exposed to a variety of musical styles and traditions. This course has a strong listening component. The ability to read music is not required.

CR: MUS 1005, 1006, 2005, 2006 or the former MUS 1000, 1001, 1002, 1003, 1010, 1020 or 1021

UL: not applicable to the Bachelor of Music Degree.

**2013 Twentieth-Century Musicals** (same as English 1213) is a survey of twentieth-century musical theatre. Selected works, presenting different styles and periods, will be examined in detail. There will be a strong, required listening/viewing component to this course. The ability to read music is not required.

CR: MUS 3007, English 2013

UL: not applicable to the Bachelor of Music Degree.

**2014 Introduction to World Music** provides an introduction to the musics of selected cultures and contemporary intercultural communities. Drawing on topics and issues in ethnomusicology, it focuses on musical practices, beliefs, and techniques. It is intended to develop listening skills, broaden musical horizons, as well as to enable a deeper understanding of the way music functions in relation to social groups and individual lives.

UL: not applicable to the Bachelor of Music Degree.

**2021 Newfoundland and Labrador Folksinging** is an introduction to the sociocultural contexts, functions, and meanings of folksong in Newfoundland and Labrador. Proceeding from this contextual base drawn from oral and scholarly histories, the course offers practical instruction by a tradition-bearer in the singing of traditional Newfoundland and Labrador tunes and texts, using the techniques of aural transmission and assisted by the written medium where appropriate.

UL: no more than 3 credit hours from the 2021-2023 series may be applied toward the Bachelor of Music Degree

**2022 Newfoundland and Labrador Fiddling** is an introduction to the sociocultural contexts, functions, and meanings of fiddling in Newfoundland and Labrador. Proceeding from this contextual base drawn from oral histories, the course offers practical instruction by a tradition-bearer on the fiddle, using the techniques of aural transmission and assisted by the written medium where appropriate.

UL: no more than 3 credit hours from the 2021-2023 series may be applied toward the Bachelor of Music Degree

**2023 Newfoundland and Labrador Accordion** is an introduction to the sociocultural contexts, functions, and meanings of accordion music in Newfoundland and Labrador. Proceeding from this contextual base drawn from oral histories, the course offers practical instruction by a tradition-bearer on the button accordion, using the techniques of aural transmission and assisted by the written medium where appropriate.

UL: no more than 3 credit hours from the 2021-2023 series may be applied toward the Bachelor of Music Degree

**3004 The Development of Symphonic Music** (formerly MUS 3020) is a study of the development of symphonic literature from the late Baroque era to the present day. Selected compositions, representing different periods and styles, will be examined in detail. This course has a strong listening component.

CR: the former MUS 3020  
 PR: MUS 2005

**3005 The Development of Opera** is a study of the development of opera from the beginnings to the present day. Selected operas, representing different periods and styles, will be examined in detail. This course has a strong listening component.

PR: MUS 2005

**3006 The History of the Concerto** is a study of the development of the concerto from the late Baroque until the present day. Selected compositions, representing different styles and periods, will be examined in detail. This course has a strong listening component.

PR: MUS 2005

**3007 A History of Popular Music in Drama** is a survey of popular music styles in drama from the rise of the *Singspiel* to the musicals of Andrew Lloyd Weber. Selected works, representing different styles and periods, will be examined in detail. This course has a strong listening component.

CR: MUS 2013, English 2013

PR: MUS 2005 or permission of the instructor

**3009 Music in the Modern World** is an intensive study of music in the 20th and 21st centuries. Focused themes address a wide range of genres and styles with particular attention to music's interaction with the other arts and with society. This course has strong listening and writing components and continues to develop research skills.

CR: the former MUS 2003

PR: MUS 2006

**3014 World Music: Musics of Asia and Oceania** is an examination of musical theory, genres, instruments, aesthetics, and functions of music in Asia and Oceania, including the classical music of the Indian subcontinent, ritual musics of East Asia, gong-chime ensembles of Southeast Asia, and traditional musics of Polynesia and Australia. This course has a strong listening component.

PR: MUS 1120 with a minimum mark of 75% or MUS 1106 or equivalent and completion of at least 24 credit hours of university course work

**3015 World Music: Music of Africa and the Americas** is an examination of musical theory, genres, instruments, aesthetics, and functions of music in Africa and the Americas, including traditional African musics, neo-African musics of the Americas, Native American musics, and traditional South American musics. This course has a strong listening component.

PR: MUS 1120 with a minimum mark of 75% or MUS 1106 or equivalent and completion of at least 24 credit hours of university course work

**3016 Canadian Musical Traditions** is a survey of musical streams in Canadian music history from colonial times to the present, including indigenous and transplanted musical traditions, and Canadian art music. This course has a strong listening component.

PR: MUS 1120 with a minimum mark of 75% or MUS 1106 or equivalent and completion of at least 24 credit hours of university course work

**3017 Music, Song and Tradition** (same as Folklore 3200) introduces students to a wide range of traditional song. Students will hear and discuss local, regional and international examples. Ability to read music or familiarity with music theory not required.

CH: 3

CR: FOLK 3200, the former FOLK 4445

**3018 Jazz and Blues: The Roots of Popular Music** (same as Folklore 3618) is an overview of blues and jazz as traditional musical forms. Lectures and listening will illustrate the development of regional music cultures and generic styles. To better understand the shift of blues and jazz from regional to global performance contexts, the course will examine the effects of changing transmissional media, from predominantly sensory media through contemporary media technologies. A term paper concerning musical style will entail library research and aural analysis.

CR: Folklore 3618

**3019 Popular Music Studies** will explore a number of genres in the historical development of world popular music and dance, along some of the following themes: the roles of race, class, gender, sexuality, age, and ability in popular music production and reception; processes and effects of mass media and technology in shaping genres and consumers' experience of them; and cross-cultural influences within and across national borders.

PR: MUS 1120 with a minimum mark of 75% or MUS 1106 or equivalent and completion of at least 24 credit hours of university course work

**3060 Voice Literature and Performance Practice** is a survey of selected solo vocal repertoire from the Renaissance to the present day. Stylistic development and performance practices will be emphasized.

PR: MUS 140B in voice or permission of the instructor.

**3070 Piano Literature and Performance Practice** - inactive course.

**4001 The First Viennese School** is a study of the music composed in the Austro-Hungarian Empire from 1770 to 1800. The works of Haydn, Mozart and the young Beethoven will be investigated with particular emphasis on musical style, performance practices and cultural context. Listening will focus on complete works or extended excerpts.

PR: MUS 2006

**4002 Studies in Baroque Music** is an examination of aspects of musical style and performance practices in the baroque period through the study of selected topics and specific musical examples. The course includes reading

assignments, listening, score reading, and taking part in class demonstrations.

PR: MUS 2006

**4003 Special Topics in Musicologies** will be announced by the School of Music.

CH: 1 per semester

UL: may only obtain a maximum of 3 credit hours

**4004 Special Topics in Musicologies** will be announced by the School of Music.

CH: 2 per semester

UL: may only obtain a maximum of 4 credit hours

**4005 Special Topics in Musicologies** will be announced by the School of Music.

UL: may only obtain a maximum of 6 credit hours

**4040 Music and Culture** (same as Folklore 4440, the former Anthropology

4440, the former MUS 4440) examines traditional music as an aspect of human behaviour in Western and non-European cultures. Examination of the functions and uses of music; folk- popular-art music distinctions; and the relation of style to content. Outside reading, class exercises and individual reports will be required.

CR: Folklore 4440, the former Anthropology 4440, the former MUS 4440

PR: completion of at least 24 credit hours of university course work

**4095 Graduating Essay** is directed study which will result in the production of an original paper dealing with a topic in musicologies (including but not limited to music history, ethnomusicology, and popular music studies). This course is restricted to Musicologies Majors. A one-page research proposal and sample bibliography of at least ten items must be submitted to the Dean by the end of the seventh week of classes in the previous semester.

PR: admission to the Musicologies Major

## 1 The Memorial University of Newfoundland Code

The attention of all members of the University community is drawn to the section of the University Calendar titled **The Memorial University of Newfoundland Code**, which articulates the University's commitment to maintaining the highest standards of academic integrity.

## 2 Student Code of Conduct

Memorial University of Newfoundland expects that students will conduct themselves in compliance with University Regulations and Policies, Departmental Policies, and Federal, Provincial and Municipal laws, as well as codes of ethics that govern students who are members of regulated professions. The *Student Code of Conduct* outlines the behaviors which the University considers to be non-academic misconduct offences, and the range of remedies and/or penalties which may be imposed. Academic misconduct is outlined in **UNIVERSITY REGULATIONS - Academic Misconduct** in the University Calendar.

For more information about the *Student Code of Conduct*, see [www.mun.ca/student/conduct](http://www.mun.ca/student/conduct).

## 3 School Description

The origin of Memorial University of Newfoundland School of Nursing dates back to August 1963 when the Association of Registered Nurses of Newfoundland submitted a brief to the University calling for the establishment of a baccalaureate program in nursing. In September 1966, the first students were admitted to the undergraduate degree program. Over its history, the School has remained responsive to the changing needs of nursing within the province and in Canada and consequently has developed and changed over time.

The educational, research and scholarly activities of the School and its faculty draw upon knowledge from the arts and sciences and from nursing and other health professions. The School and its faculty are also involved in many community outreach and professional service activities. While being responsive to national and international needs, the School acknowledges its primary responsibility to the people of Newfoundland and Labrador.

In collaboration with the Centre for Nursing Studies and Western Regional School of Nursing, Memorial University of Newfoundland School of Nursing offers an undergraduate degree program on campus to prepare entry-level nurses for practice. Graduate degrees in nursing, including the Doctor of Philosophy in Nursing and the Master of Nursing, are offered by the School of Graduate Studies.

Students must meet all regulations of the School in addition to those stated in the general regulations. For information concerning fees and charges, admission/readmission to the University, and general academic regulations (undergraduate), refer to **UNIVERSITY REGULATIONS**.

Further information regarding the School of Nursing is available at [www.mun.ca/nursing](http://www.mun.ca/nursing).

### 3.1 Vision Statement

The School of Nursing will be responsive and engaging in leading nursing education and research provincially, nationally and internationally by developing quality teaching, learning, and research environments. Graduates of the School will be skillful, caring, knowledgeable nurses who have a clear vision of the nursing discipline. They will strive for excellence in health care, be prepared to collaborate with others, and be responsive to human diversity in an effort to improve health for all.

### 3.2 Mission Statement

The School of Nursing provides leadership in teaching and learning in nursing, nursing research, and public engagement with the goal of promoting health and well-being.

### 3.3 Academic and Professional Ethics

The Memorial University of Newfoundland School of Nursing, Centre for Nursing Studies, and Western Regional School of Nursing support the highest standards of academic and professional ethics. Ethical behaviour encompasses integrity, conduct, respect, and professionalism. It also means that students will take responsibility for their learning and pursue academic goals in an honest and engaged manner to reflect the principles, values, and expectations that are espoused as members of the Schools of Nursing and future nurse professionals.

### 3.4 Accreditation Status and Approval Status

#### 3.4.1 Accreditation Status

The School of Nursing's Bachelor of Nursing (Collaborative) and the Bachelor of Nursing (Post-RN) Programs are accredited to 2022 and 2017 respectively, by the Canadian Association of Schools of Nursing (CASN). The seven year award achieved by these programs is the highest award given to Schools of Nursing in Canada.

#### 3.4.2 Approval Status

The School of Nursing's Bachelor of Nursing (Collaborative) and the Bachelor of Nursing (Post-RN) Programs are approved by the Association of Registered Nurses of Newfoundland and Labrador (ARNNL). The ARNNL approval designation assures both the public and our students that these Programs prepare ethical entry-level practitioners who provide safe quality health care. This program prepares graduates to meet the requirements for licensure and professional practice as registered nurses in Newfoundland and Labrador.

## 4 Description of Programs

All courses of the School are designated by the abbreviation NURS.

### 4.1 Bachelor of Nursing (Collaborative) Program

The School of Nursing offers an undergraduate program leading to a Bachelor of Nursing. This Program is designed to prepare competent entry-level nurses who will function within a variety of health care settings. The graduate is prepared to assume the roles of direct care giver, educator, counsellor, advocate, facilitator, co-ordinator of care, researcher, leader, and member of the nursing profession. The Program is guided by a mission, philosophy and conceptual framework which direct the curriculum as students progress toward that competent entry-level nursing practice.

The School of Nursing depends on the cooperation and involvement of a large number of organizations and professional personnel in providing quality clinical placements and instruction to its students. These agencies often have a range of requirements, some of which include, a Certificate of Conduct, a Child Protection Record Check, immunizations, a First Aid Certificate, and a CPR certificate. Students unable to meet these agency requirements may be delayed in their program or prevented from completing their program of studies. All students are required to complete these requirements in a timely fashion and at their own expense. Many of these requirements must be updated annually.

In order to satisfy clinical practice requirements for the Bachelor of Nursing (Collaborative) Program, clinical agencies may be used 24 hours a day, seven days a week. Students may be required to attend during any of these times.

To meet the licensing requirements for practising nursing in Canada, students must graduate from an approved program offered by a School of Nursing and successfully write the National Council Licensure Examination for Registered Nurses (NCLEX-RN). During the program, students may be required to buy resources that are endorsed by the School to prepare for the exam and integrated into courses throughout the curriculum. In the final year of the Program, students must also complete a comprehensive examination set by the Bachelor of Nursing (Collaborative) Program. All costs associated with these resources and exams are the responsibility of the student.

The Bachelor of Nursing (Collaborative) Program (B.N.) has two full-time curriculum options. Both are guided by the same conceptual framework and leveled objectives. The Program also has an Licensed Practical Nursing Bridging (LPN) admission option directly into the second year of the Program's 4-Year Option for prospective students who have completed a LPN program as outlined under **Admission/Readmission Regulations for the School of Nursing**.

This Bachelor of Nursing (Collaborative) Program is offered at Memorial University of Newfoundland School of Nursing, the Centre for Nursing Studies, and the Western Regional School of Nursing. Information regarding Memorial University School of Nursing is available at [www.mun.ca/nursing](http://www.mun.ca/nursing). Information regarding the Centre for Nursing Studies is available at [www.centrefornursingstudies.ca](http://www.centrefornursingstudies.ca), and information regarding the Western Regional School of Nursing is available at [www.grenfell.mun.ca/nursing](http://www.grenfell.mun.ca/nursing).

#### 4.1.1 Bachelor of Nursing (Collaborative) 4-Year Option

The 4-Year Option is offered over nine semesters in four academic years. This option is comprised of 130 credit hours, and is open to applicants from both high school and university backgrounds. It should be noted that the Winter semester of the first, second and fourth years of the program extends beyond the normal University class end date in their respective semesters as outlined in the **University Diary**.

#### 4.1.2 Bachelor of Nursing (Collaborative) Fast-Track Option

The Fast-Track Option is designed for students with well-developed university-level study skills. This full-time Option is for current degree holders or those with advanced admission standing and is comprised of 94 credit hours. This Option is taken over two years in six consecutive semesters. It should be noted that the last semester of the second year ends later than the scheduled date on which the Spring semester ends. This Option is offered at Memorial University of Newfoundland School of Nursing and Western Regional School of Nursing.

## 5 Admission/Readmission Regulations for the School of Nursing

Applicants requiring additional information for the Bachelor of Nursing (Collaborative) Program may visit the Nursing Admissions website at [www.mun.ca/nursingadmissions](http://www.mun.ca/nursingadmissions).

In addition to meeting the **UNIVERSITY REGULATIONS** students must meet the admission/readmission regulations for the School of Nursing.

### 5.1 General Information

1. Entry to the Bachelor of Nursing (Collaborative) Program is competitive for a limited number of seats. Meeting the minimum requirements for admission does not guarantee acceptance into the Program. The final decision on admission rests with the Joint Admissions Committee of the B.N.(Collaborative) Program.
2. Admission or readmission to the University does not necessarily constitute admission or readmission to the Program.
3. Selection of candidates for admission to the Bachelor of Nursing (Collaborative) Program is based on academic performance, relevant work and volunteer experience, references and personal statements.
4. Selection of candidates for admission to the Bachelor of Nursing (Collaborative) Fast-Track Option is also based on:
  - a minimum grade point average of 3.0 on a 4 point scale in their degree program for applicants who have completed a bachelor degree; or a minimum overall grade point average of 3.0 on a 4 point scale in the twelve courses, 36 credit hours required for admission for applicants with advanced admission standing;
  - evidence of ability to successfully maintain a full course load; and
  - other criteria considered suitable for professional practice in nursing.
5. Priority is given to applicants who are residents of Newfoundland and Labrador.
6. Up to three additional positions per year are available in the Bachelor of Nursing (Collaborative) 4-year Option for applicants of Aboriginal ancestry who have met the admission requirements. Applicants must send a letter of request at the time of application and provide documentation of Aboriginal ancestry.
7. Applicants may be requested to attend an interview.
8. Bachelor of Nursing (Collaborative) Program applicants are required to submit a student information form and a complete record of current immunizations when admitted to the Program. Students who have not met these requirements by the beginning of the Winter semester of Year 1 will not be permitted to progress in the program.
9. Evidence of certification in Standard First Aid and Basic Life Support (CPR) level HCP, offered by The Canadian Red Cross or St. John Ambulance is required by all applicants prior to commencing clinical courses. Certification obtained from other organizations will be accepted if deemed equivalent by the School of Nursing.

### 5.2 Application Forms and Deadlines

1. The Bachelor of Nursing (Collaborative) Program (both options) commence in the Fall semester. The deadline for application is March 1st.
2. The deadline for application to the Bachelor of Nursing (Collaborative) Program via the LPN Bridging Admission Option is February 1st.
3. Students applying for admission to Bachelor of Nursing (Collaborative) Program must, if not a current Memorial University of Newfoundland student, submit the Undergraduate Application for Admission/ Readmission to the University and supporting documents as specified on the application. The Memorial University of Newfoundland application for Admission/Readmission along with the Bachelor of Nursing (Collaborative) Program application is available at [www.mun.ca/become](http://www.mun.ca/become). Additional information on applying is available at [www.mun.ca/nursingadmissions/Admission/HowtoApply/](http://www.mun.ca/nursingadmissions/Admission/HowtoApply/).

### 5.3 Admission Requirements to School Programs

These regulations apply to the Bachelor of Nursing (Collaborative) Program 4-year and Fast-Track Options. Applicants may apply for admission under the **Categories of Applicants, Admission Criteria and Other Information** outlined under **UNIVERSITY REGULATIONS - Admission/Readmission to the University (Undergraduate)**. In addition to meeting these regulations, applicants in the following categories, must meet the additional requirements as indicated below.

#### 5.3.1 High School Applicants

Applicants from High School may apply for admission only to the 4-year Option **Bachelor of Nursing (Collaborative)** Program.

1. High School applicants to the 4-Year Option of the **Bachelor of Nursing (Collaborative)** Program must have completed a high school diploma, or its equivalent, as certified by the Department of Education of Newfoundland and Labrador and meet the general **Admission/Readmission** requirements of Memorial University of Newfoundland. High school courses must include the following or their equivalents:
  - Biology 2201
  - Biology 3201
  - Chemistry 3202
  - English 3201
  - Math 3200 or 3201
  - Social Science or Modern Language (2 credits at 3000 level)

### 5.3.2 Memorial University of Newfoundland Applicants

Memorial University of Newfoundland applicants may apply for admission to either option of the Bachelor of Nursing (Collaborative) Program.

1. Bachelor of Nursing (Collaborative) 4-Year Option applicants must have a high school diploma, or its equivalent, as certified by the Department of Education of Newfoundland and Labrador. Advanced High School Math is preferred and science courses must include:
  - Biology 2201 and 3201 or their equivalents
  - Chemistry 3202 or equivalent
2. Bachelor of Nursing (Collaborative) Fast-Track Option applicants must have successfully completed an undergraduate degree from a recognized university and the following courses prior to admission:
  - Statistics 2500 or equivalent, or Education 2900
  - Biochemistry 1430 or equivalent
  - Biology 3053 or equivalent

or qualify for advanced admission standing. An applicant who has successfully completed all the non-nursing course requirements of the Bachelor of Nursing (Collaborative) Program, and who is in good standing, may qualify for advanced admission standing. Applicants must demonstrate successful completion of a minimum of the following 12 courses, 36 credit hours, prior to admission:

- 6 courses, 18 credit hours as follows: 6 credit hours from English, Biochemistry 1430 or equivalent, Biology 3053 or equivalent, Psychology 1000 or equivalent, Statistics 2500 or equivalent or Education 2900;
- 4 courses, 12 credit hours as follows: 3 credit hours from each of the following: Business, Philosophy 2500-2599 or Religious Studies 2610, Political Science, and Sociology, Anthropology, or Archaeology; and
- 2 courses, 6 additional elective credit hours selected from any credit courses offered by this University.

### 5.3.3 Transfer Applicants

Transfer applicants may apply for admission to any of the School of Nursing Programs.

Applicants wishing to transfer from a nursing program that is offered outside of this Province should view the information at [www.mun.ca/nursingadmissions/TransferringStudents](http://www.mun.ca/nursingadmissions/TransferringStudents).

1. Bachelor of Nursing (Collaborative) Program 4-Year Option applicants must have a high school diploma, or its equivalent, as certified by the Department of Education of Newfoundland and Labrador. High School Math is preferred and science courses must include:
  - Biology 2201 and 3201 or their equivalents
  - Chemistry 3202 or equivalent
2. Bachelor of Nursing (Collaborative) Program Fast-Track Option applicants must have successfully completed an undergraduate degree from a recognized university and the following courses prior to admission:
  - Statistics 2500 or equivalent, or Education 2900
  - Biochemistry 1430 or equivalent
  - Biology 3053 or equivalent 3-credit hour university course in Microbiology

or qualify for advanced admission standing. An applicant who has successfully completed all the non-nursing course requirements of the Bachelor of Nursing (Collaborative) Program 4-Year Option, and who is in good standing, may qualify for advanced admission standing. Applicants must demonstrate successful completion of the following 12 courses, 36 credit hours, prior to admission.

- 6 courses, 18 credit hours as follows: 6 credit hours from English, Biochemistry 1430 or equivalent, Biology 3053 or equivalent, Psychology 1000 or equivalent, Statistics 2500 or equivalent or Education 2900;
- 4 courses, 12 credit hours as follows: 3 credit hours from each of the following: Business, Philosophy 2500-2599 or Religious Studies 2610, Political Science, and Sociology, Anthropology, or Archaeology; and
- 2 courses, 6 additional elective credit hours selected from any credit courses offered by this University.

### 5.3.4 LPN Bridging Applicants

Applicants with a Licensed Practical Nurse designation may apply for admission to the Bachelor of Nursing (Collaborative) Program through the LPN Bridging Option. This admission option recognizes the nursing knowledge and clinical experience obtained through the Centre for Nursing Studies Practical Nursing Program (2002 or later) and work experiences, and provides a career ladder for Licensed Practical Nurses (LPN's) who wish to obtain the Bachelor of Nursing degree.

Successful applicants must complete a Bridging semester prior to admission to the Program. The courses taken during the Bridging semester prepare LPN's to enter the second year of the 4-Year Option of the Bachelor of Nursing (Collaborative) Program.

The Bridging semester, completed before admission to the Bachelor of Nursing (Collaborative) Program, is comprised of three non-nursing courses and a mathematics requirement as well as a 7-week Bridging course. Upon successful completion of the Bridging semester, LPN Bridging candidates are granted 25 unspecified transfer nursing credit hours as equivalent to the 25 credits of the Year 1 nursing courses in the Bachelor of Nursing (Collaborative) Program. If all courses of the Bridging semester are successfully completed, all non-academic requirements for entrance into the Program are complete, and candidates remain in good standing with the University, they are accepted into Year 2 of the Bachelor of Nursing (Collaborative) Program 4-Year Option.

The LPN Bridging option is offered only at the Centre for Nursing Studies. Information regarding the Centre for Nursing Studies is available at [www.centrefornursingstudies.ca](http://www.centrefornursingstudies.ca).

1. The LPN Bridging semester begins in May. The deadline for application to the Program through the LPN Bridging option is February 1st. Applicants to the LPN Bridging option should submit a Memorial University of Newfoundland application for Admission\Readmission for the Spring semester.
2. Selection of candidates for admission to the Bachelor of Nursing (Collaborative) LPN Bridging Option is based on:
  - academic performance in the practical nursing program and in any university courses taken to date;
  - evidence of ability to successfully maintain a full course load; and
  - other criteria considered suitable for professional practice in nursing.
3. Applicants must provide two letters of reference (one reference regarding academic performance and one from a current employer regarding clinical performance).
4. LPN Bridging option applicants may be requested to attend an interview.
5. To be considered for admission to the Bachelor of Nursing (Collaborative) Program, LPN Bridging Option applicants must:
  - be a graduate (2002 or later) of the Centre for Nursing Studies Practical Nursing Program, Province of Newfoundland and Labrador;
  - be a Licensed Practical Nurse (copy of certification required);
  - meet the admission requirements for the Bachelor of Nursing (Collaborative) Program listed under **Admission/Readmission Regulations for the School of Nursing**; and
  - have completed the following high school courses: Biology 2201 and 3201 or their equivalents, and Chemistry 3202 or equivalent.
6. Admission into the second year of the Bachelor of Nursing (Collaborative) Program will be conditional and based on successful completion of the Bridging semester which includes the following:
  - Bridging Course (offered only at the Centre for Nursing Studies)
  - Biochemistry 1430
  - Psychology 1000 or equivalent
  - English (3 credit hours)
  - Math 102N if applicant has not obtained a score of at least 50% on the Mathematics Placement Test, or completed Advanced Math in High School with a final grade of at least 75% or 3 credit hours in university level Mathematics (excluding Statistics 2500 and equivalents).
7. After admission into the Bachelor of Nursing (Collaborative) Program, students complete the 69 nursing credit hours and 27 non-nursing credit hours of Years 2 through 4 of the 4-Year Option as part of the 4-Year Option cohort. The courses are recommended to be taken in the academic terms in the sequence as set out in **Table 2, Bachelor of Nursing (Collaborative) Program - Centre For Nursing Studies (CNS)**, (Academic Terms 3-9).

## 6 Program Regulations - General Degrees

### 6.1 Bachelor of Nursing (Collaborative) Program 4-Year Option

- The four year, 130 credit hour Bachelor of Nursing (Collaborative) Program Option requires 94 NURS credit hours and 36 non-NURS credit hours.
- The 130 credit hours are recommended to be taken in the academic terms in the sequence as set out in **Table 1, 2, or 3 Bachelor of Nursing (Collaborative) Program 4-Year Option**. These courses will be offered during the same year at all sites, but the semester of course offering may vary with each site.
- Clinical course hours may occur at any time during the semester. Clinical courses may be offered in whole or in part outside the normal start and end dates of a semester.
- Selected nursing courses which are designed for the Bachelor of Nursing (Post-RN) Program may be used as electives in the Bachelor of Nursing (Collaborative) Program with permission of the Committee on Undergraduate Studies and the course instructor.

### 6.1.1 Bachelor of Nursing (Collaborative) Fast-Track Option

- The Bachelor of Nursing (Collaborative) Fast-Track Option is offered at Memorial University of Newfoundland School of Nursing and the Western Regional School of Nursing.
- The 94 credit hours must be taken in the academic terms as set out in **Table 4 Bachelor of Nursing (Collaborative) Fast-Track Option**.
- NURS 2002 and 2502 run over the first six weeks and NURS 3012 and 3512 run over the second six weeks of the Spring semester. NURS 2514 and 3514 run consecutively for 6 weeks each in the Fall semester.
- Clinical Courses may be offered in whole or in part outside the normal start and end dates of a semester. In the last semester of the Fast-Track Option, the last clinical course will finish outside of the end date of Summer semester and may finish as late as the 3rd week in September. Students will be informed of the pertinent dates of clinical courses two semesters in advance.

**Table 4 Bachelor of Nursing (Collaborative) Fast-Track Option**

Term	Required Courses

## 7 Promotion Regulations

1. The Memorial University of Newfoundland School of Nursing constitutes the examining body for all School of Nursing examinations. The standing of every student will be assessed at the end of each academic semester, and a grade report will be issued by the University Registrar to the individual student.
2. Students are required to achieve a grade of at least 65% or a grade of PAS as appropriate in each of the required nursing courses.
3. Except in the Bachelor of Nursing (Collaborative) Fast-Track Option, a student failing to achieve the requirements outlined above is permitted to repeat the given nursing course only once. A second failure in a given nursing course will result in withdrawal from the program.
4. A student in the Bachelor of Nursing (Collaborative) Fast-Track Option who fails a course is required to withdraw from the Fast-Track Option. This student may be permitted, with special permission from the Dean/Directors, to resume studies within the 4-Year Option of the Bachelor of Nursing (Collaborative) Program and is subject to all its academic standards. Accordingly, a failed course in the Fast-Track Option carries over to the 4-Year Option of the Bachelor of Nursing (Collaborative) Program as a first failure in the relevant course(s).
5. Failure in excess of two nursing courses during the program will result in withdrawal from the Bachelor of Nursing (Collaborative) Program.
6. A student who is required to withdraw from the Bachelor of Nursing (Collaborative) 4-Year Option due to academic failure, as outlined in the clause above, may appeal for readmission to the School of original admission after a lapse of two semesters by writing to the Chair, Committee on Undergraduate Studies. An applicant must submit a completed Application for Readmission to the Nursing by March 1 for Fall readmission and October 1 for Winter or Spring readmission.
7. A student who is required to withdraw from the program a second time will not be eligible for future admission/readmission to the program.
8. A student may be required to withdraw from a nursing course with a clinical component or from the program at any time, on the recommendation of the Committee on Undergraduate Studies, if the student is deemed unlikely to profit from continued attendance in the nursing course or program and/or is deemed unsafe in a clinical setting. This clause could also be applied to a student who displays unethical or unprofessional behavior in classroom, lab or clinical settings. A student who is required to withdraw from the program for any of these reasons will not be eligible for future admission/readmission to the program or the School of Nursing.
9. A student who does not complete a nursing course for a period of three consecutive semesters will be considered to have withdrawn from the program.
10. A student in the Bachelor of Nursing (Collaborative) Program who wishes to take a leave of absence from the program may do so only with the written permission of the Dean or delegate. A leave will be granted for a maximum period of three consecutive semesters. A student on leave who plan to resume studies must notify the Dean/Director in writing one semester prior to registration.
11. A student in the Bachelor of Nursing (Collaborative) Program who voluntarily withdraws from the program prior to the conclusion of the first semester of the first year and who wishes to return to the program must re-apply in competition as a new applicant.
12. A student in the Bachelor of Nursing (Collaborative) Program who voluntarily withdraws from the program, at the conclusion of the first semester of the program, or later, and who wishes to return to the program, must appeal for readmission. The letter of appeal must be directed to the Chair, Committee on Undergraduate Studies at the School of original admission.
13. A student in the Bachelor of Nursing (Collaborative) Program who is readmitted following a period of absence, either as a result of a leave of absence or a withdrawal from the program, upon the recommendation of the Committee on Undergraduate Studies may be required to undertake remedial work, which can include repeating clinical, laboratory, or classroom courses, or repeating one or more terms of the program. A student will be advised of the remedial program at the time of readmission. All remedial work must be successfully completed before a student will be permitted to proceed in the program.

## 8 Graduation

Upon meeting the qualifications for any of the programs noted above a student must apply to graduate on the prescribed "Application for Graduation" form. This form may be obtained on-line at the Memorial Self Service at [www3.mun.ca/admit/twbkwbis.P\\_WWWLogin](http://www3.mun.ca/admit/twbkwbis.P_WWWLogin). Additional information is available from the Office of the Registrar at [www.mun.ca/regoff/graduation/apply\\_grad.php](http://www.mun.ca/regoff/graduation/apply_grad.php).

## 9 Waiver of School Regulations

Any student whose request for waiver of School regulations has been denied has the right to appeal. For further information refer to **UNIVERSITY REGULATIONS - General Academic Regulations (Undergraduate) - Appeal of Decisions**.

### 9.1 General Information

1. The School reserves the right in special circumstances to modify, alter, or waive any School regulation in its application to individual students where merit and equity so warrant in the judgment of the Committee on Undergraduate Studies of the School.
2. All requests must be submitted to the Committee on Undergraduate Studies of the School for consideration. A student requesting a waiver of a School regulation must submit the request in writing to the Chair of the Committee on Undergraduate Studies. Medical and/or other documentation to substantiate the request must be provided.
3. Any waiver granted does not reduce the total number of credit hours required for the degree.

## 10 Supplementary Examinations

Any student receiving a grade of 60% in a Nursing course may be eligible to write a supplementary examination in that course.

In addition to meeting **UNIVERSITY REGULATIONS - General Academic Regulations (Undergraduate)**, upon successful completion of the supplementary examination, a student must also meet the promotion regulations of the School. For further information refer to **Promotion Regulations**.

1. Supplementary examinations are permitted only in Nursing courses that have a written final examination.
2. Supplementary examinations will have the same weight as final examinations for the course in determining whether the student achieves a passing grade for the course.
3. Only three supplementary examinations in Nursing courses can be written during the program
4. Any student writing a supplementary examination can obtain only a maximum grade of 65% in the course.

5. A student may write a supplementary examination for any one course only once.
6. If it is mathematically impossible to achieve a passing grade in a course the student will not be granted a supplementary examination
7. Supplementary examinations will be written no later than the first week of the semester immediately following the one in which the course was failed. Normally they should coincide with the writing of deferred examinations in courses where deferred examinations are granted for the semester in question. Grades for supplementary examinations must be received by the Office of the Registrar within one week following the completion of the examination.
8. Supplementary exams are not available for the Nursing Bridging Course offered at the Centre for Nursing Studies prior to entering the second year of the Bachelor of Nursing (Collaborative) Program. A student who is unsuccessful in the Bridging Course and who wishes to enter the Bachelor of Nursing (Collaborative) Program may apply in competition to enter into the first year of the program.

## 11 Appeal of Regulations

1. An applicant who has been denied admission to the Bachelor of Nursing (Collaborative) Program has the right to appeal this decision of the Joint Admissions Committee if it is felt by the applicant that the decision was reached on grounds other than those outlined under **Admission/Readmission Regulations for the School of Nursing**. The appeal should be made in writing within fourteen days of the notification of the decision and should be directed to the Chair of the Committee on Undergraduate Studies at Memorial University of Newfoundland School of Nursing. The letter should state clearly and fully the grounds for the appeal.
2. Any student whose request for waiver of School regulations has been denied has the right to appeal. For further information refer to **UNIVERSITY REGULATIONS - General Academic Regulations (Undergraduate) - Appeal of Decisions**.

## 12 Course Descriptions

In accordance with Senate's *Policy Regarding Inactive Courses*, course descriptions for courses which have not been offered in the previous three academic years and which are not scheduled to be offered in the current academic year have been removed from the following listing. For information about any of these inactive courses, please contact the Dean of the School.

All courses of the School are designated by NURS.

**1002 Anatomy and Physiology I** presents a survey of human anatomy and physiology throughout the lifespan. It includes aspects of cytology and histology that form a foundation for the practice of nursing. Special emphasis is given to the skeletal, muscular, nervous and endocrine systems.

CR: Pharmacy 2002 or the former Pharmacy 3201  
LH: 2

**1003 Developing Therapeutic Relationships** focuses on the application of caring theory to interpersonal communications. It emphasizes the development of the role of communicator in individual and group experiences and in professional relationships. Utilizing an experiential model, laboratory experiences focus on self-awareness and group dynamics.

CO: NURS 1004  
LH: 2

**1004 Introduction to Nursing** introduces the major concepts and theories related to the paradigm of person, health, society, nursing, environment, and nursing education in relation to the philosophy, conceptual framework and objectives of the program. Emphasis is placed on the concept of caring as the essence of nursing practice.

CR: the former NURS 1001

**1012 Anatomy and Physiology II** presents a survey of anatomy and physiology throughout the lifespan. It includes aspects of cytology, histology and embryology that form a foundation for the practice of nursing. Special emphasis is given to the circulatory, respiratory, urinary, digestive, and reproductive systems, including pregnancy and delivery.

CR: Pharmacy 2003 or the former Pharmacy 3202  
LH: 2  
PR: NURS 1002

**1014 Health Assessment** focuses on the development of competencies needed to assess the health status of individuals throughout the lifespan using a systematic approach. Content includes the nurse's responsibilities for health history, physical examination, interpretation of findings, and documentation.

CO: NURS 1012  
CR: the former NURS 2040  
LH: 2

**1015 Health Promotion throughout the Lifespan** explores nursing concepts and theories pertaining to health promotion/protection throughout the lifespan. Content includes principles of teaching/learning, introduction to community health and primary health care concepts and the determinants of health.

CO: NURS 1004 or the former NURS 1001, NURS 1003 and Psychology 1000; or admission to the Fast-Track Option  
CR: the former NURS 1011  
OR: 24 clinical or lab hours during the semester  
PR: NURS 1004 or the former NURS 1001, NURS 1003 and Psychology 1000; or admission to the Fast-Track Option

**1016 Healthy Aging** explores, in-depth, concepts and issues applicable to the well older adult (65+). Selected theories, physical changes, and psychosocial, ethical, and legal issues associated with aging will be presented.

CO: NURS 1012, 1014, and 1015; or admission to the Fast-Track Option  
PR: NURS 1002, 1003, and 1004; or admission to the Fast-Track Option

**1017 Fundamental Psychomotor Competencies** provides the student an opportunity to acquire beginning psychomotor competencies that are related to the provision of client comfort and safety in a variety of settings. As well, this course provides the opportunity for the student to integrate the conceptual framework of the **Bachelor of Nursing (Collaborative) Program** into the development of psychomotor competencies.

CH: 1  
CO: NURS 1003 and 1004  
LC: 0  
LH: 2  
PR: NURS 1003 and 1004

**1520 Extended Practice I** provides the student with the opportunity to integrate the knowledge and practise the competencies acquired to date. The focus is the promotion, protection and maintenance of health for individuals within the context of the family. This course is normally taught at the end of the Winter semester, usually beginning during the final week of the examination period.

CO: NURS 1012, 1014, 1015 or the former 1011, 1016, and 1017  
OR: 96 clinical hours over three weeks; or 96 clinical hours during the semester for Fast-Track Option students  
PR: NURS 1012, 1014, 1015 or the former 1011, 1016, and 1017

**2002 Nursing Concepts for the Care of Women and the Child-bearing Family** covers major concepts in women's reproductive health. The two major foci are women and their families through all phases of childbirth and the neonatal period, and nursing care of women experiencing alterations in reproductive health.

CO: NURS 2003, 2004, and 2502  
CR: the former NURS 2001  
PR: NURS 1520, 2003, and 2004

**2003 Pathophysiology** presents general concepts of disease processes and their impact on health. The course focuses on major pathophysiological changes, including associated etiology, pathogenesis and clinical manifestations. Common illnesses are studied to illustrate these disease processes.

CO: NURS 1012  
OR: tutorial 1.5 hours per week  
PR: NURS 1012, Biochemistry 1430 or admission to the Fast-Track Option

**2004 Pharmacology and Nutritional Therapies** explores principles and concepts of pharmacological, nutritional and complementary therapies and management of common health problems across the lifespan. Nursing considerations and psychomotor competencies pertinent to these therapies are addressed.

CO: NURS 1012 and NURS 1014  
LH: 2  
PR: NURS 1012, NURS 1014, NURS 1017, Biochemistry 1430, and completion of Advanced Math in High School with a final grade of at least 75%, or a score of at least 50% on the Mathematics Placement Test, or Math 102N, or 3 credit hours in Mathematics excluding Statistics 2500 or equivalent.

**2014 Community Health Nursing Theory** focuses on the knowledge required to practise nursing in the community with a variety of clients including individuals, families, groups and communities. It further examines

the principles of primary health care, population health, and their application in community health nursing. It also focuses on the multidimensional role of the nurse.

CO: NURS 2003 and 2004, 2514  
CR: NURS 4101  
OR: seminar or labs 2 hours per week  
PR: NURS 1520, 2003, and 2004

**2017 Intermediate Psychomotor Competencies** provides the student an opportunity to acquire intermediate psychomotor competencies that are related to the provision of client comfort and safety in a variety of settings. As well, this course provides the opportunity for the student to integrate the conceptual framework of the **Bachelor of Nursing (Collaborative)** Program into the development of psychomotor competencies.

CH: 1  
CO: NURS 2004  
LC: 0  
LH: 24 hours during the semester  
PR: NURS 1520 and 2004

**2502 Nursing Practice for the Care of Women and the Child-bearing Family** provides the student with opportunities to apply knowledge and practise competencies acquired in NURS 2002. Selected experiences are offered in a variety of institutional and community-based settings related to the provision of nursing care for women and their families.

CO: NURS 2002  
CR: the former NURS 2501  
LH: 24 hours during the semester  
OR: 80 clinical hours during the semester

**2514 Community Health Nursing Practice I** provides the student with the opportunity to apply knowledge and practise competencies for beginning community health nursing practice acquired in Community Health Nursing Theory.

CO: NURS 2014 or NURS 4101  
OR: 96 clinical hours during the semester  
PR: NURS 1520

**2520 Extended Practice II** provides the student with the opportunity to integrate the knowledge and practise the competencies acquired to date. The focus is on caring for adults in stable health situations and on the application of community health concepts. This course is normally taught at the end of the Winter Semester, usually beginning during the final week of the examination period.

CO: NURS 2002 and 2502 or 2014 and 2514  
OR: 96 clinical hours over three weeks  
PR: NURS 2002, 2014, 2017, 2502, and 2514; or admission to the Fast-Track Option

**3001 Nursing Concepts for Mental Health** focuses on individuals, families and small groups experiencing psychiatric/mental health problems across the lifespan. The meaning of mental health and illness to the individual, family and vulnerable populations is explored. Course content includes counselling, psychopathology, interdisciplinary psychiatric care, community mental health concepts and analysis of sociopolitical factors/issues affecting mental health.

CO: NURS 3501 or NURS 4502  
OR: seminar 2 hours per week  
PR: NURS 2520

**3012 Nursing Concepts for Children, Adolescents and Young Adults** uses a conceptual approach to focus on the nursing care of individuals and families, from infancy to young adulthood. The emphasis is on assisting persons experiencing health related needs to achieve health and well-being.

CO: NURS 3512 or NURS 3513  
CR: the former NURS 2011  
PR: NURS 2520; or admission to the Fast-Track Option

**3014 Nursing Concepts in Middle and Older Adulthood** uses a conceptual approach and focuses on individuals and families from middle to older adulthood. The emphasis is on assisting persons experiencing acute and chronic health related needs to achieve health and well-being.

CO: NURS 3514  
CR: the former NURS 3111  
PR: NURS 2520

**3104 Nursing Research** builds on previously introduced research concepts. It explores the research process and its inherent ethical and legal implications. The course focuses on the acquisitions of concepts used to critically appraise nursing research studies and examines the relevance of these studies for nursing practice.

CR: the former NURS 4002 and the former NURS 4104  
PR: Statistics 1510 or 2500 or equivalent, or Education 2900

**3113 Nursing Leadership and Management** promotes an understanding of the theories and principles of leadership and management in relation to the Co-ordinator of Care nursing role. Emphasis is placed on concepts of organizational structure and function, management of client care, team building, professional development, and application of nursing theories to practice. Current issues and trends are explored.

CO: NURS 3501 or NURS 4502, NURS 3512 or NURS 3513, and NURS 3514

PR: NURS 3501, 3512 or 3513, and 3514

**3501 Nursing Practice for Mental Health** provides the student with opportunities to apply theoretical knowledge and to practise competencies acquired in NURS 3001 and related courses. Selected experiences related to the provision of nursing care for individuals, families, and small groups are offered in a variety of institutional and community based mental health settings.

CO: NURS 3001  
OR: 96 hours during the semester

**3512 Nursing Practice with Children, Adolescents and Young Adults** provides the student with opportunities to apply knowledge and practise competencies acquired in NURS 3012. Selected experiences are offered in a variety of institutional and community based settings related to the provision of nursing care for children, adolescents, young adults and their families.

CO: NURS 3012  
CR: the former NURS 2511  
LH: 24 hours during the semester  
OR: 64 clinical hours during the semester  
PR: NURS 2520; or admission to the Fast-Track Option

**3513 Nursing Practice with Children, Adolescents and Young Adults** provides the student with opportunities to apply knowledge and practise competencies acquired in NURS 2017 and 3012. Selected experiences are offered in a variety of institutional and community based settings related to the provision of nursing care for children, adolescents, young adults and their families.

CH: 2  
CO: NURS 3012  
CR: the former NURS 2511 and NURS 3512  
OR: 64 clinical hours during the semester  
PR: NURS 2017 and NURS 2520

**3514 Nursing Practice with Middle and Older Adults** provides the student with the opportunity to practise competencies and apply knowledge acquired NURS 3014 and related courses. Selected experiences related to the provision of nursing care for middle and older adults, and their families are offered in a variety of institutional and community based settings.

CO: NURS 3014  
CR: the former NURS 3511  
LH: 24 hours during semester  
OR: 96 clinical hours during the semester  
PR: NURS 2520

**3523 Extended Practice III** provides the students with the opportunity to apply leadership and management principles in coordinating care for groups of individuals within a variety of nursing care settings. Students also have the opportunity to further develop clinical competencies acquired in previous courses.

CH: 6  
CR: the former NURS 3520 and the former 3521  
OR: 40 clinical hours per week for eight weeks  
PR: NURS 3001 and 3501 or 4502, NURS 3014 and 3514, NURS 3012 and 3512 or 3513, NURS 3113 and clinical placement approval

**4101 Community Health Nursing** focuses on the knowledge required to practise nursing at the aggregate and community levels. It further examines the principles of primary health care, their application in community health nursing and the multidimensional role of the nurse. Core concepts include: community development, epidemiology, program development, and the theoretical bases of community health nursing.

CO: NURS 2514 and admission to the Fast-Track Option  
CR: NURS 2014  
OR: tutorial 2 hours per week

**4103 Issues in Nursing and Health Care** focuses on the development of a personal framework for nursing practice, nursing organizations at the international level and nursing's role and development within health care systems. Current trends and issues in health policy and health care are examined.

PR: NURS 3113 or admission to the Fast-Tack Option

**4501 Community Health Nursing Practice II** provides the student with opportunities to apply knowledge acquired in Community Health Nursing Theory and other related courses. It also further develops competencies in community health nursing practice. In the clinical experiences, students work with selected aggregates (including individuals and families) in the community.

CO: NURS 4103  
CR: NURS 4502  
OR: 96 hours during the semester  
PR: NURS 2014, NURS 2514, and NURS 3523

**4502 Nursing Care in Community and Mental Health Settings** provides opportunities for practice in acute care psychiatric/mental health and community settings with individuals, families, and groups/aggregates. The

application of community health and mental health knowledge and competencies, with a particular focus on the concepts of vulnerability/resilience, will be emphasized.

CH: 6

CO: NURS 3001

CR: NURS 3501 and NURS 4501

OR: 168 hours during the semester

PR: Admission to the Fast-Track Option and NURS 2014 or 4101, NURS 2514, NURS 3014, NURS 3104, NURS 3514

**4512 Community Health Practicum** provides students with the opportunity to integrate and consolidate knowledge and competencies acquired throughout the program and apply them to community health nursing practice. Using a primary health care framework, the student participates in strategies which facilitate the mobilization of communities toward health. Online discussions will be included. NURS 4512 in the Fast-Track Option is one of five courses in Semester 5. It begins in April and progression into this course is dependent on successful completion of the other four nursing courses scheduled for Jan-April in the same semester.

OR: 40 clinical hours per week for four weeks

PR: (NURS 4103, 4501 and 4515) or (NURS 2514, 4101, 4103 and admission to the Fast-Track Option), and clinical placement approval

**4515 Nursing Concepts & Practice for Complex Care** provides students

the opportunity to work with individuals and their families who are experiencing multiple health challenges. Students are expected to synthesize concepts and theories of nursing, science and humanities, and participate in interprofessional collaborative practice in a variety of settings to facilitate the achievement of health and well-being for clients and their families.

OR: seminars 1 hour per week

OR: 144 clinical hours during the semester

PR: NURS 3523 or admission to the Fast-Track Option

**4516 Consolidated Practicum** provides students with the opportunity to practice nursing with a select client population. Students apply and test knowledge from nursing and related disciplines in this selected clinical setting. The course also enables students to further develop their professional roles. Online discussions will be included.

CH: 6

CR: the former NURS 4514 or the former NURS 3522, and the former NURS 4513

OR: 40 clinical hours per week for ten weeks

PR: NURS 4103, NURS 4501 or 4502 and NURS 4515 and clinical placement approval

#### Dean

to be determined

#### Associate Dean, Graduate Studies and Research

Weber, J., B.Sc. *Eastern Michigan*, M.Sc. *Montana*, Ph.D. *Medical College of Virginia*; Cross appointment to Faculty of Medicine; Associate Professor

#### Associate Dean, Undergraduate Studies

Dillon, C., B.Sc.(Pharm.) *Memorial*, Pharm.D. *Toronto*; Associate Professor; Cross appointment to Faculty of Medicine

#### Special Advisor, Practice Innovation

Kelly, D., B.Sc.(Pharm.) *Memorial*, Pharm.D. *Toronto*; Cross appointment to Faculty of Medicine; Associate Professor

#### Senior Administrative Officer

O'Keefe-Penney, A. M., B.A., B.Ed., Dipl. Bus. Admin., Dip. Adult Ed., M.B.A. *Memorial*

#### Professor Emeritus

West, R., M.Sc., Ph.D. *McGill*

#### Professors

Liu, Hu, B.Sc.(Pharm.), M.Sc. *Beijing Medical*, Ph.D. *Alberta*  
Loomis, C.W., B.Sc.(Hons.), M.Sc., Ph.D. *Queen's* (on leave)  
Phillips, L., B.Sc.(Pharm.) *Memorial*, Pharm.D. *British Columbia*;  
Joint appointment to Faculty of Medicine; Recipient of the President's Award for Distinguished Teaching, 2010

#### Associate Professors

Bishop, L., B.Sc.(Pharm.) *Memorial*, Pharm.D. *Colorado*; Cross appointment to Faculty of Medicine  
Hawboldt J., BSP *Saskatchewan*, Pharm.D. *Washington*; Cross appointment to Faculty of Medicine  
Hensman, L.R., B.Sc.(Pharm.) *British Columbia*, Pharm.D. *SUNY at Buffalo*, M.B.A. *Memorial*  
Law, R.M.T., B.Sc.(Pharm.) *Toronto*, Pharm.D. *SUNY at Buffalo*;  
Cross appointment to Faculty of Medicine  
Twells, L., B.A. *Memorial*, M.Sc. *London*, Ph.D. *Memorial*; Joint appointment with Faculty of Medicine  
Wang, L., B.Sc., M.Sc. *Beijing Medical*, Ph.D. *Alberta*  
Young, S.W., B.Sc.(Pharm.), Pharm.D. *Idaho State*, M.Sc.(Med.) *Memorial*; Cross appointment to Eastern Health

#### Assistant Professors

Alisaraie, L., Dr. rer. nat. *Paderborn*; Cross appointment to Department of Chemistry  
Clarke, A., B.Ed., B.Sc.(Pharm.) *Memorial*, Pharm.D. *Idaho State University*  
Daneshtalab, N., B.Sc., Ph.D. *Alberta*; Cross appointment to

Faculty of Medicine

Davis, E., B.Sc.(Pharm.) *Memorial*, Pharm.D. *British Columbia*;  
Cross appointment to Faculty of Medicine  
Gamble, J.M., B.Sc. *Lakehead*, B.Sc.(Pharm.), M.Sc., Ph.D. *Alberta*; Cross appointment to Faculty of Medicine

## 1 The Memorial University of Newfoundland Code

The attention of all members of the University community is drawn to the section of the University Calendar titled **The Memorial University of Newfoundland Code**, which articulates the University's commitment to maintaining the highest standards of academic integrity.

## 2 Student Code of Conduct

Memorial University of Newfoundland expects that students will conduct themselves in compliance with University Regulations and Policies, Departmental Policies, and Federal, Provincial and Municipal laws, as well as codes of ethics that govern students who are members of regulated professions. The *Student Code of Conduct* outlines the behaviors which the University considers to be non-academic misconduct offences, and the range of remedies and/or penalties which may be imposed. Academic misconduct is outlined in **UNIVERSITY REGULATIONS - Academic Misconduct** in the University Calendar.

For more information about the *Student Code of Conduct*, see [/www.mun.ca/pharmacy](http://www.mun.ca/pharmacy).

### 2.1 Pharmacy Students

In addition to the *Student Code of Conduct* above, students in Pharmacy programs are also required to adhere to the Newfoundland and Labrador Pharmacy Board Code of Ethics, the Code of Professional Conduct for Pharmacy Students, and the School of Pharmacy Pledge of Professionalism as outlined at [www.mun.ca/pharmacy/](http://www.mun.ca/pharmacy/).

### 3 School Description

The School of Pharmacy is committed to providing programs of quality and excellence that will prepare individuals to contribute significantly in pharmacy practice settings. The experiential learning component of the programs ensures students have the opportunity to integrate academic learning with professional practice and to develop the necessary knowledge, skills and attitudes required of practicing pharmacists. The School encourages a close working relationship among students, faculty, and staff, and prides itself on its strong association with and support of the pharmacy community at both the provincial and national level.

Additional information regarding the School of Pharmacy (undergraduate and graduate programs) is available at [www.mun.ca/pharmacy](http://www.mun.ca/pharmacy). For additional information on graduate programs see **School of Graduate Studies**.

Students must meet all regulations of the School in addition to those stated in the general regulations. For information concerning fees and charges, admission/readmission to the University, and general academic regulations (Undergraduate), refer to **UNIVERSITY REGULATIONS**.

#### 3.1 Vision Statement

To be a distinguished and innovative experienced-based pharmacy education program that fosters excellence in practice, professionalism, scholarship, and research to improve our citizens' health and well-being.

#### 3.2 Mission Statement

The School of Pharmacy:

Cultivates programs of distinction in pharmacy education and research, engages the broader community and offers innovative programs that are destinations of choice for undergraduate and graduate students, employers and funding agencies, and provides leadership in pharmacy practice and research.

#### 3.3 Accreditation Status

The School of Pharmacy is accredited by the Canadian Council for Accreditation of Pharmacy Programs (CCAPP) to 2017.

## 4 Description of Program - Bachelor of Science (Pharmacy)

#### Important Notice

The Bachelor of Science (Pharmacy) program is no longer available for admission. Students previously admitted to this program, and in good standing, must complete all program requirements by 2021. Students currently completing the requirements for this program must follow the Calendar regulations for the Academic year in which they were admitted to the program. Memorial University of Newfoundland Calendars by Academic year can be viewed at [www.mun.ca/regoff/calendar.php](http://www.mun.ca/regoff/calendar.php).

The Bachelor of Science (Pharmacy) degree has been replaced by the entry-to-practice Doctor of Pharmacy degree in Fall of 2017. As the Doctor of Pharmacy (Pharm.D.) program is introduced, the Bachelor of Science (Pharmacy) will be phased out. Students admitted to the Bachelor of Science (Pharmacy) program, who experience a disruption in their studies (e.g., medical leave, extended absence) may not be able to complete the degree requirements as described in the University calendar for the year they were admitted. Every reasonable effort will be made to accommodate the student's completion of the Bachelor of Science (Pharmacy) degree requirements by 2021.

The School of Pharmacy offers an undergraduate program leading to the degree of Bachelor of Science (Pharmacy). This degree is designed to prepare graduates for careers primarily in community and hospital settings but also in the pharmaceutical industry, pharmacy organizations, health sciences research, government, and educational environments. After successful completion of national examinations, a graduate of the program is eligible to apply to be licensed as a pharmacist in Newfoundland and Labrador and other provinces in Canada.

The program of study leading to the Bachelor of Science (Pharmacy) degree has two phases and requires at least five years to complete. Prior to entry to the program students will acquire a background in the mathematical and physical sciences. Once in the program students will take courses in the basic health sciences, pharmacy sub-specialties and social/administrative sciences. At the end of each year students will have an opportunity to apply the academic knowledge acquired and to develop and practice patient care skills by participating in experiential learning within community and hospital settings. During the program students will develop an understanding of the professional and societal responsibilities of a pharmacist, and will recognize the need for lifelong learning.

All courses in the School of Pharmacy are designated by the abbreviation PHAR.

## 4.1 Structured Practice Experience

Students are required to successfully complete all experiential components of the program, including the Structured Practice Experience (SPE). During SPE's students are placed in a variety of pharmacy practice settings and are brought into direct contact with patients, pharmacists and other health professionals. Students become involved in the practice of pharmaceutical care and are expected to assume increasing responsibility as their education advances. Such practice experiences ensure students are exposed to situations which cannot be provided in the classroom.

1. The Joint Committee on Structured Practice Experience, consisting of representatives from both the School of Pharmacy and the Newfoundland and Labrador Pharmacy Board, is responsible for providing the overall direction for the program and recommending policies and procedures for its operation.
2. Students will be placed at sites by the School. The Structured Practice Experience Co-ordinator liaises with students to determine placements.
3. While every effort will be made to accommodate a student's request to complete SPEs in a specific location, a student may be assigned to any participating site within the province of Newfoundland and Labrador.
4. Students are responsible for all travel and accommodation costs associated with the SPE.
5. Students who conduct themselves in such a manner as to cause their termination from the SPE site, including breaches in confidentiality, violation of policies and professional misconduct will be assigned a grade of FAL (fail) for that SPE.
6. Students are required to provide evidence of a valid certificate, normally, in St. John Ambulance or Canadian Red Cross Standard First Aid Level C that is valid for the duration of the SPE. Equivalent certificates will be considered and assessed on an individual basis for acceptability.
7. Students are required to complete three SPEs, each of four weeks duration, and one SPE of twelve weeks duration. The first three SPEs are completed at the end of the Winter term in the first, second, and third years of the program. The final SPE is completed in the Winter term of the final year of the program.
8. The number of hours per week of the SPE program will be as required by CCAPP standards.
9. Students will be evaluated on their performance during the SPE and on written assignments including workbooks, pharmaceutical care case work-ups and drug information requests. Students may have workbooks audited or they may be formally examined on material learned during the SPE period. The overall evaluation of SPEs will result in the assignment of one of the following grades: PWD (pass with distinction), PAS (pass), or FAL (fail).

## 4.2 Registration as a Pharmacy Student

A student must be register annually with the Newfoundland and Labrador licensing body as a "Pharmacy Student" by September 30th. Further information may be obtained at [www.nlpb.ca](http://www.nlpb.ca). Additionally, prior to the commencement of a Pharmacy Practice Experience in another Canadian jurisdiction, a student must register with the respective provincial or territorial licensing body. Further requirements may exist for international Pharmacy Practice Experience. A student who fails to meet the registration requirements will be required to withdraw from the program.

## 5 Program Regulations - Bachelor of Science (Pharmacy)

The Bachelor of Science (Pharmacy) program is no longer available for admission. Students previously admitted to this program, and in good standing, must complete all program requirements by 2021. Students currently completing the requirements for this program must follow the Calendar regulations for the Academic year in which they were admitted to the program. Memorial University of Newfoundland Calendars by Academic year can be viewed at [www.mun.ca/regoff/calendar.php](http://www.mun.ca/regoff/calendar.php).

### 5.1 Bachelor of Science (Pharmacy)

- The 176 credit hour Bachelor of Science (Pharmacy) degree requires 30 credit hours before admission to the program and 146 credit hours after admission to the program. The program includes four structured practice experiences, three of which are non-credit, with the other having 18 credit hours.
  - The program courses shall normally be taken in the academic terms in the sequence and course load as set out in **Table 1 Bachelor of Science (Pharmacy)**. Students wishing to change the sequence and/or reduce the course load required in the academic terms must obtain permission from the Committee on Undergraduate Studies of the School of Pharmacy.
  - Elective courses may be taken from any academic unit.

**Table 1 Bachelor of Science (Pharmacy)**

Term	Required Courses	Elective Courses
Courses required for admission.	Biology 1001 and 1002 Chemistry 1050 and 1051 or equivalent Any 6 credit hours at the 1000 level in English Mathematics 1000 and 1001 Physics 1020 and 1021 or Physics 1050 and 1051	
Fall Academic Term 1	Chemistry 2440 PHAR 2002 PHAR 2101 PHAR 2201 PHAR 2650 Psychology 1000	
Winter Academic Term 2	PHAR 2003 PHAR 2004 PHAR 201W PHAR 2102 PHAR 2202 PHAR 2203 PHAR 2651 Psychology 1001	
Fall Academic Term 3	Medicine 4300 PHAR 3003 PHAR 3111 PHAR 3203 PHAR 3205 PHAR 3650	
Winter Academic Term 4	PHAR 3006 PHAR 3009 PHAR 302W PHAR 3103 PHAR 3204 PHAR 3301 PHAR 3651	
Fall Academic Term 5	PHAR 4008 PHAR 4201 PHAR 4302 PHAR 4401 PHAR 4504 PHAR 4650	
Winter Academic Term 6	PHAR 403W PHAR 4402 PHAR 4503 PHAR 4505 PHAR 4651 Philosophy 2551 or the former Philosophy 2803	3 credit hours
Fall Academic Term 7	PHAR 5301 PHAR 5302 PHAR 5401 PHAR 5506 PHAR 5650	3 credit hours
Winter Academic Term 8	PHAR 500X	

## 6 Promotion Regulations - Bachelor of Science (Pharmacy)

### 6.1 General Information

- The Committee on Undergraduate Studies will determine each student's promotion status at the end of each Academic year.
- In addition to meeting the promotion regulations for the School students must meet the general academic regulations (undergraduate). For further information refer to **UNIVERSITY REGULATIONS - General Academic Regulations (Undergraduate)**.
- Success in the program depends on meeting the requirements of all terms.

### 6.2 Promotion Status

A student's promotion status at the end of each Academic year will be in one of the following two categories:

#### 6.2.1 Clear Promotion

Clear Promotion means a student can proceed to the next Academic year without restrictions.

- Students will receive a Clear Promotion from an Academic year by obtaining an average of 65% and having obtained at least a pass in each course. A weighted average based on credit hours in the Bachelor of Science (Pharmacy) program courses will be calculated for determining eligibility for promotion. Neither promotion nor graduation will be permitted if a student has a numeric grade below 50% in any course in the program.
- Students completing PHAR 2102 must obtain a numeric grade of at least 70%.
- Students completing PHAR 201W, 302W, 403W, or 500X must obtain a grade of PAS or PWD in each course.
- Students must attain a passing grade in each elective, but these courses will not be included in calculating the student's average grade for the purposes of promotion, graduation, or academic awards.

#### 6.2.2 Promotion Denied

Promotion Denied indicates Clear Promotion is not achieved at the end of each Academic year.

- A student with Promotion Denied status will normally be required to withdraw from the School.
  - A student who does not obtain a clear promotion may be permitted to repeat all or part of the Academic year. If a student is required to repeat a year on the grounds of unsatisfactory performance, his or her performance in the repeated year must meet the conditions for Clear Promotion. If this standard is not met, the Committee on Undergraduate Studies may require the student to withdraw from the program.
  - Normally, the option to repeat a year on the grounds of academic difficulties can be offered only once during the student's Bachelor of Science (Pharmacy) program. This restriction may be waived if it has been demonstrated that the student's academic performance has been adversely affected by factors duly authenticated and acceptable to the Committee on Undergraduate Studies.
- A student with Promotion Denied status at the end of the final Academic Term will not be recommended for graduation until the student's status is changed to Clear Promotion.

### 6.3 Other Information

- Students may be required to withdraw from their program at any time, if, in the opinion of the School, they are unlikely to benefit from continued attendance.
- The Committee on Undergraduate Studies may require a student who is deemed unlikely to benefit from continued attendance in his/her course of study to withdraw conditionally. The Chair of the Committee will advise the Dean of the School of the circumstances precipitating this action, the duration of the withdrawal and any conditions the student must fulfil during the withdrawal. The Dean may then recommend to the Registrar that the student is on conditional withdrawal. Upon completing the conditions, the student may be permitted re-entry to the program. If the conditions are not met, the student may be required to withdraw from the program.
- The School reserves the right to require a student to withdraw from the program at any time when acceptable cause is demonstrated. In such cases, the Dean, on behalf of the School, shall recommend such withdrawal to the Registrar who will then take appropriate action. Any such action is subject to the right of appeal by the student. An appeal should be made in writing clearly stating the basis for the appeal and should be directed in the first instance to the Registrar of the University. The Registrar, in consultation with the Dean, will determine whether or not the grounds stated are sufficient to warrant a formal hearing of the appeal.

### 6.4 Leave of Absence

- Upon completion of an Academic year, a student in good standing may elect to withdraw temporarily from studies. Voluntary withdrawal at other times and for other reasons may be permitted in accordance with **UNIVERSITY REGULATIONS - General Academic Regulations (Undergraduate) - Registration**. In all cases, the intent to withdraw voluntarily should be discussed with the Dean. The Dean may then recommend to the Registrar that a student be permitted to withdraw for a stated period of time. At the end of this period, the student, in consultation with the Committee on Undergraduate Studies, should ensure that sufficient revision and preparatory work is undertaken to allow studies to be resumed readily. In the absence of good cause, any such student who does not resume studies on the specified date may be deemed to have left the program.

## 7 Description of Program - Doctor of Pharmacy (Pharm.D.)

The entry-to-practice Doctor of Pharmacy (Pharm.D.) degree program will be available for admission for Fall 2017. The application deadline is February 1, 2017.

### 7.1 Doctor of Pharmacy (Pharm.D.)

The Doctor of Pharmacy (Pharm.D.) program prepares students to graduate as medication therapy experts, prepared to embrace the full scope of pharmacy practice. Students are required to complete 30 credit hours of specific prerequisite courses prior to entry into the program, followed by five years of study in the pharmacy program. The program is student-focused, comprehensive, and experience-based. The curriculum provides students with the scientific knowledge and clinical skills necessary to enter professional practice. Instructional methods emphasize critical thinking, problem-solving, communication, professionalism, and ethical behaviours. During the program, students will develop an understanding of the professional and societal responsibilities of a pharmacist, and will recognize the need for lifelong learning. The extensive Pharmacy Practice Experience component prepares students for a variety of professional settings. The aim is to graduate students who are scientific inquirers, interprofessional collaborators, independent decision makers, and leaders who have the ability to adapt their practice to fulfil their evolving professional roles. Pharm.D. graduates will be prepared to practice independently in a variety of pharmacy settings including community pharmacy, hospital pharmacy, pharmaceutical industry, pharmacy organizations, research, government, and academia.

All courses in the School of Pharmacy are designated by the abbreviation PHAR.

### 7.2 Registration as a Pharmacy Student

A student must be registered annually with the Newfoundland and Labrador licensing body as a "Pharmacy Student" by September 30th. Further information may be obtained at [www.nlpb.ca](http://www.nlpb.ca). Additionally, prior to the commencement of a Pharmacy Practice Experience in another Canadian jurisdiction, a student must register with the respective provincial or territorial licensing body. Further requirements may exist for international Pharmacy Practice Experience. A student who fails to meet the registration requirements will be required to withdraw from the program.

### 7.3 Pharmacy Practice Experience (PPE)

Through Pharmacy Practice Experiences, the program aims to prepare students for exemplary pharmacy practice. Students are expected to display appropriate communication, professionalism, and teamwork, and demonstrate increased independence and critical reasoning as they progress in the program. PPEs consist of early and intermediate experiences as well as advanced pharmacy practice experiences (APPE). PPEs expose students to situations which cannot be provided in the classroom.

1. The School of Pharmacy is responsible for providing overall direction for practice experiences and will oversee the placement of students at sites. Students may be assigned to any participating site within the Province of Newfoundland and Labrador; a request to complete a PPE outside the province may be considered.
2. Students are responsible for all travel and accommodation costs associated with the PPE.
3. Students are required to provide evidence of a valid Standard First Aid Level C certificate for all PPEs. Evidence of recertification must be submitted no later than one month before the expiry date of the certification.
4. Students must comply with the policies of the site to which they are assigned. Sites may have requirements for immunization, testing or documentation beyond those required by the School. Students are required to complete these requirements in a timely fashion and at their own expense. Students unable to meet these site requirements may be delayed in their program or prevented from completing their program of study.

#### 7.3.1 Pharmacy Practice Experience Evaluation

1. Evaluation of the student's performance is conducted by the preceptor responsible for supervising the student during the PPE. Preceptors determine the competency level of the student for each of the outcomes.
2. The School determines the grade of each PPE, based upon the evaluation provided by the preceptor. Students will be graded as PAS (pass) or FAL (fail).
3. Students who conduct themselves in such a manner as to be terminated from the PPE site will be assigned a grade of FAL (fail) for that PPE and may be required to withdraw from the program.

## 8 Admission Regulations - Doctor of Pharmacy (Pharm.D.)

The entry-to-practice Doctor of Pharmacy (Pharm.D.) degree program will be available for admission for Fall 2017. The application deadline is February 1, 2017. Application information will be made available at [www.mun.ca/pharmacy/](http://www.mun.ca/pharmacy/).

In addition to meeting **UNIVERSITY REGULATIONS** students applying for admission for the program must meet the admission regulations of the School.

### 8.1 General Information

1. Admission will be to the first year of the Doctor of Pharmacy (Pharm.D.) program in the Fall term.
2. Entry to the School is competitive for a limited number of seats. Priority is given to applicants who are bona fide residents of Newfoundland and Labrador. The final decision on admission is determined by the Committee on Undergraduate Student Admissions of the School of Pharmacy.
3. As part of the regular quota, one seat per year is available in the program for bona fide residents of Newfoundland and Labrador First Nations or Aboriginal ancestry who have met the minimum numeric grade and course requirements for admission to the program.
4. The Committee on Undergraduate Student Admissions of the School of Pharmacy considers each applicant's academic background and information on the applicant's personal characteristics and achievements as given by the applicant. Normally, personal interviews (which may include both a written and oral component) will be required. Reports from referees may also be considered.
5. The School of Pharmacy does not require criminal record checks or other screening procedures as a condition of admission to its program. However, applicants should be aware that such record checks or other screening procedures may be required by practice experience sites used by the University for academic course assignments necessary for graduation. Such sites may refuse to accept students on the basis of information contained in the record check or other screening procedure thus preventing the students from completing a practice experience or other clinical requirement. As a result, such students may not be eligible for promotion or

graduation. It is the students' responsibility to have such checks and screening procedures completed as required and at their own expense. The screening procedures of any given site may change from time to time and are beyond the control of the University.

## 8.2 Application Forms and Deadlines - Doctor of Pharmacy (Pharm.D.)

1. Application forms are available through the School of Pharmacy's website at [www.mun.ca/pharmacy/](http://www.mun.ca/pharmacy/).
2. All application forms, supporting documentation, and fees for admission to the program must be received on or before the deadline of February 1st in any year.
3. Incomplete applications and applications received after the deadline will not be considered.

## 8.3 Admission Requirements - Doctor of Pharmacy (Pharm.D.)

Applicants who are not currently students at Memorial University of Newfoundland must apply for admission to the University under the **Categories of Applicants, Admission Criteria and Other Information** outlined under **UNIVERSITY REGULATIONS - Admission/Readmission to the University (Undergraduate)**. In addition to meeting these regulations, applicants to the School must meet requirements as indicated below.

1. To be considered for admission, an applicant must have completed the 30 credit hours outlined below by the end of the Winter term for the year in which admission is being sought. These courses and credits must have been taken at Memorial University of Newfoundland or accepted for transfer credit from an academic institution. The 30 credit hours are:
  - Biology 1001 and 1002
  - Chemistry 1050 and 1051
  - 6 credit hours in English (a Critical Reading and Writing course is recommended)
  - Mathematics 1000 and 1001
  - Physics 1020 or 1050, and Physics 1021 or 1051
2. For students attending Grenfell Campus, the following course offerings are acceptable for admission to the School;
  - Biology 1001 and 1002
  - Chemistry 1200 and 1001
  - 6 credit hours in English (a Critical Reading and Writing course is recommended)
  - Mathematics 1000 and 1001
  - Physics 1020 or 1050, and Physics 1021 or 1051
3. Normally an application will not be considered from an applicant who cannot produce evidence that the above requirements have been met or will have been met by end of the Winter term of the year in which admission is being sought.
4. An unsuccessful applicant who wishes to reapply for admission is required to submit the application forms relevant to the year of reapplication and will be required to enter into the competition for that year.

## 8.4 Acceptance Procedures - Doctor of Pharmacy (Pharm.D.)

1. The decision of the Committee on Undergraduate Student Admissions of the School of Pharmacy will be sent electronically to applicants by the Dean of the School. No other form of notification will be considered official.
2. Applicants shall have 10 calendar days from the date of offer of admission in which to confirm acceptance. The signed intention to accept the offer must be accompanied by a deposit of \$500, which will be credited towards tuition fees. The deposit will be forfeited if the applicant subsequently declines the offer or fails to register in the Pharmacy program for the Fall term.
3. If the acceptance form and deposit is not received within 10 calendar days, the offer by the School will be withdrawn, and the applicant will be notified.
4. Students who fail to register for courses for the Fall term of admission will be considered withdrawn from the program. Such applicants, if they wish to be considered for admission in the future, must submit a new application for admission to the program.

Applicants requiring additional information may refer to the School of Pharmacy website at [www.mun.ca/pharmacy/](http://www.mun.ca/pharmacy/).

## 9 Program Regulations - Doctor of Pharmacy (Pharm.D.)

### 9.1 Doctor of Pharmacy (Pharm.D.)

- The 218 credit hour entry-to-practice Doctor of Pharmacy (Pharm.D.) degree requires 30 credit hours before admission and 188 credit hours after admission to the program.
- The program courses normally shall be taken in the Academic Terms in the sequence and course load as set out in **Table 2 Doctor of Pharmacy (Pharm.D.)**.

**Table 2 Doctor of Pharmacy (Pharm.D.)**

Term	Required Courses
Courses required for admission as indicated under <b>Admission Regulations for the Doctor of Pharmacy (Pharm.D.)</b>	Biology 1001 and 1002 Chemistry 1050 and 1051 (St. John's Campus) or Chemistry 1200 and 1001 (Grenfell Campus) 6 credit hours in English (an English Critical Reading and Writing course is recommended) Mathematics 1000 and 1001 Physics 1020 or 1050 and Physics 1021 or 1051
Fall Year 1, Academic Term 1	Chemistry 2440 PHAR 2002 PHAR 2010 (may be completed in Fall, Winter or Spring) PHAR 2201 PHAR 2250 PHAR 2610
Winter Year 1, Academic Term 2	Chemistry 2401 PHAR 2003 PHAR 2004 PHAR 2010 (if not previously completed) PHAR 2202 PHAR 2251 PHAR 2620
Spring Year 1, Academic Term 3	PHAR 2010 (if not previously completed)
Fall Year 2, Academic Term 4	PHAR 3111 PHAR 3250 PHAR 3270 PHAR 3801 PHAR 3805
Winter Year 2, Academic Term 5	PHAR 3006 PHAR 3251 PHAR 3271 PHAR 3410 PHAR 3810 PHAR 3825
Spring Year 2, Academic Term 6	PHAR 305P
Fall Year 3, Academic Term 7	PHAR 4250 PHAR 4270 PHAR 4620 PHAR 4802 PHAR 4810 Statistics 2550
Winter Year 3, Academic Term 8	PHAR 4251 PHAR 4271 PHAR 4420 PHAR 4820 PHAR 4860
Spring Year 3, Academic Term 9	PHAR 406P PHAR 407P
Fall Year 4, Academic Term 10	PHAR 5250 PHAR 5270 PHAR 5430 PHAR 5815 PHAR 5830
Winter Year 4, Academic Term 11	PHAR 508P PHAR 5251 PHAR 5271 PHAR 5275 PHAR 5640
Year 5, Advanced Pharmacy Practice Experience	PHAR 605P PHAR 606P PHAR 607P PHAR 608P

## 10 Promotion Regulations - Doctor of Pharmacy (Pharm.D.)

### 10.1 General Information

- The Committee on Undergraduate Studies of the School of Pharmacy will determine each student's promotion status at the end of each Academic year.
- In addition to meeting the promotion regulations for the School, students must meet the general academic regulations (undergraduate). For further information refer to **UNIVERSITY REGULATIONS - General Academic Regulations (Undergraduate)**.
- Success in the program depends on meeting the requirements of all terms.

### 10.2 Promotion Status

A student's promotion status at the end of each Academic year will be in one of the following two categories:

#### 10.2.1 Clear Promotion

Clear Promotion means a student can proceed to the next Academic year. Clear Promotion will be granted when the following criteria are met.

- A student must have completed the Academic year with a weighted average of at least 65% and at least a pass (numeric grade of at least 50% or PAS) in each course. A weighted average will be based on credit hours in the program of study as outlined in **Table 2 Doctor of Pharmacy (Pharm.D.)**.
- A student completing PHAR 2010 must obtain a grade of PAS (pass).
- A student completing a PPE course (PHAR 305P, 406P, 407P, 508P) must obtain a grade of PAS (pass) in each course.
- A student must maintain professional and ethical behaviour consistent with the Student Code Conduct as outlined at: [www.mun.ca/pharmacy](http://www.mun.ca/pharmacy).

#### 10.2.2 Promotion Denied

Promotion Denied means Clear Promotion is not achieved at the end of the Academic year. Promotion Denied will be granted when any of the following criteria are met.

- A student has obtained less than a 65% weighted average in the Academic year. A weighted average will be based on credit hours in the program of study as outlined in **Table 2 Doctor of Pharmacy (Pharm.D.)**.
- A student has obtained less than 50% in any course or who has received a grade of FAL (fail) in any course within the Academic year.
- A student completing a PPE course (PHAR 305P, 406P, 407P, or 508P) has obtained a grade of FAL (fail).
- A student has failed to obtain **Clear Promotion** at the end of each Academic year.
- A student has not maintained the professional and ethical behaviour consistent with the **Student Code of Conduct**.

Notwithstanding the above, the School of Pharmacy may offer the student the option to repeat an Academic year on the grounds of academic difficulties. This may be offered only once during the student's program. This restriction may be waived if it has been demonstrated that the student's academic performance has been adversely affected by factors duly authenticated and acceptable to the Committee on Undergraduate Studies of the School of Pharmacy.

#### 10.2.3 Other Information

To be recommended for graduation, a student must have **Clear Promotion** at the end of Academic year 4, and must have successfully completed all four Advanced Pharmacy Practice Experience (APPE) courses during Academic year 5. The following criteria will be used to assess the APPE courses.

- A student must demonstrate consistent professional and ethical behaviour that meets the criteria of Student Conduct as outlined at [www.mun.ca/pharmacy](http://www.mun.ca/pharmacy).
- A student is required to obtain a grade of PAS (pass) in all four APPE courses (PHAR 605P, 606P, 607P, 608P).
- Normally, if a student fails an APPE course, the Committee on Undergraduate Studies of the School of Pharmacy may permit the student to continue to the students next scheduled APPE course and require the student to repeat the failed course at a later date. This may extend the duration of the student's program.
- In certain circumstances, such as violation of student conduct as outlined at [www.mun.ca/pharmacy](http://www.mun.ca/pharmacy) or failure of an APPE course may result in the student being required to withdraw from the program.
- A student is permitted to repeat only one APPE course. A student who fails an APPE course (PHAR 605P, 606P, 607P, 608P) on a second attempt will be required to withdraw from the program.
- If a failed grade is received in more than one APPE course, the student will be required to withdraw from the program.

### 10.3 Student Withdrawal

A student may be required to withdraw from the program at any time, if, in the opinion of the Dean of Pharmacy, the student is unlikely to benefit from continued attendance or if acceptable cause is demonstrated. The Dean will recommend to the Registrar that the student is required to withdraw from the program.

### 10.4 Leave of Absence

Upon completion of an Academic year, a student with **Clear Promotion** may elect to withdraw temporarily from studies. Voluntary withdrawal at other times and for other reasons may be permitted in accordance with **UNIVERSITY REGULATIONS - General Academic Regulations (Undergraduate) - Registration**. In all cases, the intent to withdraw voluntarily should be discussed with the Dean. At the end of this period, the student, in consultation with the Committee on Undergraduate Studies of the School of Pharmacy, should ensure that sufficient revision and preparatory work is undertaken to allow studies to be resumed readily. In the absence of good cause, any such student who does not resume studies on the specified date may be deemed to have left the program.

## 11 Supplementary and Deferred Examination Regulations - Bachelor of Science (Pharmacy) and Doctor of Pharmacy (Pharm.D.)

- Supplementary examinations may be permitted in some courses offered by the School of Pharmacy. Students seeking to write a supplementary midterm or final examination shall apply in writing by completing the "Application for Supplementary Examination" form which is available from the School's website at [www.mun.ca/pharmacy/programs/bsc/currentstudents.php](http://www.mun.ca/pharmacy/programs/bsc/currentstudents.php).
- This form must be submitted within seven days following release of midterm marks in the case of supplementary midterm examinations or within seven days following release of the final grades in the case of supplementary final examinations. The completed form should be submitted to the Dean's office for consideration.
- The transcript will indicate that the final grade was earned as a result of a supplementary examination. Course coordinators shall advise students in the course outline that such a notation will be made on the transcript.
- A student shall be permitted to write a maximum number of one supplementary examination (excluding Pharmacy Practice courses) during each Academic year of the pharmacy program. For any one registration in a course, a student shall be permitted to write a final supplementary examination only once.
- For further details please refer to the School's Supplementary Examination Policy which is available at [www.mun.ca/pharmacy](http://www.mun.ca/pharmacy) or contact the Associate Dean of Undergraduate Studies.
- Memorial University of Newfoundland has official regulations regarding deferred final examinations, available at **UNIVERSITY REGULATIONS - General Academic Regulations (Undergraduate) - Exemptions From Final Examinations and Procedures for Applying to Write Deferred Examinations**. Deferred midterm examinations may be permitted in some courses offered by the School of Pharmacy. For details please refer to the School's Deferred Examination Policy which is available at [www.mun.ca/pharmacy](http://www.mun.ca/pharmacy) or contact the Associate Dean of Undergraduate Studies.

## 12 Graduation - Bachelor of Science (Pharmacy) and Doctor of Pharmacy (Pharm.D.)

A student must apply to graduate on the prescribed "Application for Graduation" form. This form may be obtained on-line at the Memorial Self Service at [www3.mun.ca/admit/twbkwbis.P\\_VWWWLogin](http://www3.mun.ca/admit/twbkwbis.P_VWWWLogin). Additional information is available from the Office of the Registrar at [www.mun.ca/regoff/graduation/apply\\_grad.php](http://www.mun.ca/regoff/graduation/apply_grad.php).

## 13 Waiver of School Regulations - Bachelor of Science (Pharmacy) and Doctor of Pharmacy (Pharm.D.)

A student has the right to request waiver of School regulations. A student wishing waiver of University academic regulations should refer to **UNIVERSITY REGULATIONS - General Academic Regulations (Undergraduate) - Waiver of Regulations**.

### 13.1 General Information - Bachelor of Science (Pharmacy) and Doctor of Pharmacy (Pharm.D.)

- The School reserves the right in special circumstances to modify, alter, or waive any School regulation in its application to individual students where merit and equity so warrant in the judgment of the Committee on Undergraduate Studies of the School of Pharmacy.
- All requests must be submitted to the Committee on Undergraduate Studies of the School of Pharmacy for consideration. A student requesting a waiver of a School regulation must submit the request in writing to the Chair of the Committee on Undergraduate Studies of the School of Pharmacy. Medical and/or other documentation to substantiate the request must be provided.
- Any waiver granted does not reduce the total number of credit hours required for the degree.

## 14 Appeal of Regulations - Bachelor of Science (Pharmacy) and Doctor of Pharmacy (Pharm.D.)

Any student whose request for waiver of School regulations has been denied has the right to appeal. For further information refer to **UNIVERSITY REGULATIONS - General Academic Regulations (Undergraduate) - Appeal of Decisions**.

- An applicant who has been denied admission has the right to appeal this decision of the Committee on Undergraduate Student Admissions of the School of Pharmacy if it is felt by the applicant that the decision was reached on grounds other than those outlined in the admission regulations for the former Bachelor of Science (Pharmacy) and in the **Admission Regulations for the Doctor of Pharmacy (Pharm.D.)**. The appeal should be made in writing within fourteen days of the notification of the decision and should be directed to the Dean of the School. The letter should state clearly and fully the grounds for the appeal. If the Dean of the School, in consultation with the Registrar, judges the grounds to be sufficient, the formal appeals mechanism will be initiated.

## 15 Course Descriptions

In accordance with *Senate's Policy Regarding Inactive Courses*, the course descriptions for courses which have not been offered in the previous three Academic years and which are not scheduled to be offered in the current Academic year have been removed from the following listing. For information about any of these inactive courses, please contact the Dean of the School.

A student is advised to pay attention to Usage Limitation (UL) for each course to determine its program applicability.

All courses of the School are designated by PHAR and are

restricted to students in the School of Pharmacy.

**2002 Anatomy and Physiology I** provides an overview of human anatomy and physiology throughout the lifespan. It includes aspects of cytology and histology that form a foundation for the practice of pharmacy. The focus will be on developing an understanding of the interrelationships and integration of all systems from the cell to whole organism. Special emphasis is given to the skeletal, muscular, nervous, and endocrine systems.

CR: Nursing 1002

LH: 2; attendance is required

**2003 Anatomy and Physiology II** provides an overview of human anatomy and physiology throughout the lifespan. It includes aspects of cytology and histology that form a foundation for the practice of pharmacy. The focus will

be on developing an understanding of the interrelationships and integration of all systems from cell to whole organism. Special emphasis is given to the endocrine, circulatory, respiratory, urinary, digestive, and reproductive systems.

CR: Nursing 1012  
LH: 2; attendance is required  
PR: PHAR 2002

**2004 Introduction to Biochemistry** is an introduction to the major organic substances of living organisms, proteins, carbohydrates and lipids: their structure, analysis and biochemical function. Other topics include: enzymes; the biochemistry of membranes, including the plasma membrane and specialized intracellular membranes; and the biochemistry of selected differentiated cells.

CR: Biochemistry 2101  
OR: tutorials as required  
PR: Chemistry 2400 and 2401 or Chemistry 2440

**2010 Service Learning** requires completion of 20 hours of service in the community in any term within the first year of the program. Students will engage in projects or activities which will benefit both the host organization and the student. It will occur in an approved setting either in the academic community or with an off-campus community group. The goal is to provide opportunities for the student to develop communication and self-reflective learning skills, acquire new frames of reference and perspectives, and gain an enhanced sense of civic responsibility.

CH: 0  
OR: 20 hours of service learning

**201W Structured Practice Experience I** is a structured practice experience in community pharmacy after completion of the first year which will provide an opportunity for students to apply their technical skills and introduce them to patient care activities. The structured practice experience is normally comprised of four weeks during May/June.

AR: attendance is required  
CH: 0  
LC: 0  
PR: successful completion of all courses in Academic Terms 1 & 2 of the program  
UL: applicable only to the Bachelor of Science (Pharmacy) program

**2101 Pharmacy Practice I** provides an introduction to the legal and professional framework of the practice of pharmacy. Pharmacy regulations in the dispensing of medications and provincial legislation that governs the practice of pharmacy will be the focus. Students will be introduced to core competencies of the profession including professionalism, interprofessionalism, pharmaceutical calculations, drug information and effective communication strategies for the provision of pharmacist care. Application of course content will occur in the concurrent course PHAR 2650.

CO: PHAR 2650  
UL: applicable only to the Bachelor of Science (Pharmacy) program

**2102 Pharmacy Practice II** continues the introduction to the legal and professional framework of the practice of pharmacy. The course will focus on federal legislation that governs the practice of pharmacy, drug information, patient education and methods to deal with challenging patient behaviours. Students will be introduced to pharmaceutical care and begin to develop a pharmacist care plan. Students will participate in interprofessional education (IPE) modules with students from other health related programs when such modules are available. The passing grade in this course is 70%, failing which the student may be required to withdraw from the program.

CH: 2  
CO: PHAR 2651  
LC: 2  
OR: tutorials 2 hours per week; attendance is required  
UL: applicable only to the Bachelor of Science (Pharmacy) program

**2201 Pharmaceutics I** provides an insight into a number of physicochemical basics and explains them within a pharmaceutical context. The course provides the basic foundation necessary for the study of pharmaceutical dosage forms, pharmacokinetics and bio-pharmaceutics.

LH: 3; attendance is required  
PR: Mathematics 1000 and 1001; and Chemistry 1050 and 1051, or Chemistry 1200 and 1001, or equivalent

**2202 Pharmaceutics II** is designed to provide the student with an understanding of pharmaceutical dosage forms and their applications. It applies the principles taught in Pharmaceutics I to understand the design and components of the different pharmaceutical preparations.

LH: 3; attendance is required  
PR: PHAR 2201

**2203 Pharmaceutical Analysis** is designed to introduce some important techniques and methods of analysis in pharmaceutical sciences. The laboratory exercises consist of both non-instrumental and instrumental analytical techniques that are widely employed in the analysis of pharmaceuticals.

CH: 2

LC: 2

LH: 3 hours every other week; attendance is required

PR: Chemistry 1050 and 1051 or Chemistry 1200 and 1001 or equivalent

UL: applicable only to the Bachelor of Science (Pharmacy) program

**2250 Pharmacy Practice I** is the first of a series of courses where students acquire and apply the knowledge, skills, and attitudes necessary for the practice of pharmacy. The course will include an introduction to calculations, technical skills and the legal and regulatory framework of the practice of pharmacy. The development of competence in the areas of patient care, drug information, communication, professionalism, critical thinking, and teamwork will begin. Application of knowledge and skills will occur in simulated pharmacy practice situations.

AR: attendance is required in practice sessions  
CH: 5  
CO: all Academic Term 1 Pharmacy courses, with the exception of PHAR 2010  
OR: practice sessions 2 hours per week

**2251 Pharmacy Practice II** continues the acquisition, development, and application of the knowledge, skills, and attitudes necessary for the practice of pharmacy. The legal and professional framework of the practice of pharmacy, patient counselling, and technical skills will be emphasized. Development of competence in the areas of patient care, drug information, communication, professionalism, critical thinking, and teamwork will occur. Application of knowledge and skills will take place in real and simulated pharmacy practice situations.

AR: attendance is required in practice sessions  
CH: 5  
CO: all Academic Term 2 Pharmacy courses, with the exception of PHAR 2010  
LC: 2  
OR: practice sessions 3 hours per week  
PR: PHAR 2250

**2610 Health Systems** provides an introduction to the Canadian healthcare system, its development, history, structure, and financing. The federal and provincial governments' involvement in the healthcare system and health policy will be presented. The roles and responsibilities of the pharmacist within healthcare will also be examined.

**2620 Social and Ethical Behaviour** introduces the social and cultural factors and determinants that influence health in Canada, and their ethical implications. Theoretical approaches from a social perspective, including value systems in Canada, ethical dilemmas and the role of ethics in pharmacy practice will be discussed.

CH: 2  
LC: 2  
PR: PHAR 2610

**2650 Pharmacy Skills** provides an introduction to the skills necessary for pharmacy practice in order to meet the educational outcomes for the first year of the pharmacy program. This course is the first in a series of Pharmacy Skills courses, all of which require students to acquire and apply the knowledge, attitudes and skills necessary for the effective practice of the profession. Students will begin to develop abilities in communication, professionalism, critical thinking, problem-solving, teamwork and self-directed learning. Students will apply basic knowledge and skills in drug information, technology, interpersonal communications and pharmacy legislation to simulated practice situations. Students will develop public communication skills through the completion of a professional communications program. Activities in this course will complement material covered in the concurrent course PHAR 2101.

CO: all Academic Term 1 Pharmacy courses  
CR: the former PHAR 2150  
LC: 0  
OR: practical sessions 3 hours per week; tutorials 1 hour per week; attendance is required  
UL: applicable only to the Bachelor of Science (Pharmacy) program

**2651 Pharmacy Skills** provides an introduction to the skills necessary for pharmacy practice in order to meet the education outcomes for the first year of the pharmacy program. Students will continue to develop abilities in communication, professionalism, critical thinking, problem-solving, teamwork and self-directed learning. Pharmacy practice in the community pharmacy setting will be a focus. Students will develop dispensing, drug information and pharmaceutical calculations skills relevant to community pharmacy practice. Students will begin developing their patient interaction and patient education skills. Activities in this course will complement material covered in the concurrent PHAR 2102. Students will participate in interprofessional education (IPE) modules with students from other health related programs when such modules are available.

CO: all Academic Term 2 Pharmacy courses  
CR: the former PHAR 2151  
LC: 0  
OR: practical sessions 3 hours per week; tutorials 1 hour per week; attendance is required  
PR: PHAR 2101 and 2650  
UL: applicable only to the Bachelor of Science (Pharmacy) program

**3003 Pathophysiology** examines the nature of disease, causes and effects, and alteration in structure and function of cells, inflammation, neoplasia, genetic and chromosomal diseases, healing and repair, stress and disease.

PR: PHAR 2003 or equivalent

UL: applicable only to the Bachelor of Science (Pharmacy) program

**3006 Immunology** (same as Biochemistry 4105) is an introduction to the cells and organs of the innate and adaptive immune systems. The molecular and cellular basis of allergy, autoimmunity, vaccination and cancer immunology will also be discussed.

CR: Biochemistry 4105, Biology 4200, and the former PHAR 4105

PR: PHAR 2004

**3009 Pharmacology** explores topics in general pharmacology including drugs used in the treatment of inflammatory diseases, renal pharmacology, anticoagulant and antithrombotic drugs, antihyperlipidemics, drugs used in the treatment of anemia, and endocrine pharmacology.

PR: Medicine 4300 or equivalent

UL: applicable only to the Bachelor of Science (Pharmacy) program

**302W Structured Practice Experience II** is a structured practice experience in hospital pharmacy after completion of the second year which will provide an opportunity for students to apply their technical skills and introduce them to patient care activities. The practical experience is normally comprised of four weeks during May/June.

AR: attendance is required

CH: 0

LC: 0

PR: successful completion of all courses in Academic Terms 3 & 4 of the program

UL: applicable only to the Bachelor of Science (Pharmacy) program

**305P Pharmacy Practice Experience I** provides six weeks (240 hours) of practice experience in a community pharmacy. The focus will be on the legal and regulatory framework governing pharmacy practice, prescription processing, gathering and assessing patient information, patient education, drug information, health promotion, and quality assurance. Students will apply their knowledge and skills in the provision of patient care. Effective communication skills, professionalism, and teamwork are expected.

AR: attendance is required

PR: all Academic Term 4 & 5 courses

**3103 Microbiology of Infectious Diseases** examines the various types of micro-organisms (bacterial, viral, parasitic and fungal), the environment in which they are able to multiply and their relationship to human diseases. The classifications of their morphology, mode of reproduction and the metabolic process, the physiological and epidemiological principles of infectious diseases and their manifestations are discussed including the principles of immunization.

UL: applicable only to the Bachelor of Science (Pharmacy) program

**3111 General Biochemistry** covers the catabolism of carbohydrates, lipids and amino acids. Mitochondria, chloroplasts and ATP synthesis. Biosynthesis of carbohydrates and lipids. Metabolic specialization of differentiated cells and tissues. Integration of metabolism.

CR: Biochemistry 3106

OR: tutorials as required

PR: PHAR 2004 or Biochemistry 2101

**3203 Medicinal Chemistry I** presents topics covering the molecular basis of action, metabolism, and toxicity of drugs. It provides an orientation to medically important nuclei and their nomenclature, followed by principles of drug discovery and development. The relationship between molecular structure and biological action of drugs together with elementary molecular modelling, and theories related to receptors and drug action will be presented. Concepts of drug metabolism and the relevant metabolic pathways in relationship to drug inactivation and toxicity, along with the principles of drug latentiation and prodrugs is covered. The structures, selected physicochemical properties, mechanism of action, structure-activity relationships, toxic effects at molecular level, and metabolism of drugs including central nervous system.

CO: Medicine 4300 and PHAR 3003

OR: tutorials 1 hour per week; attendance is required

PR: Chemistry 2440 or Chemistry 2400 and 2401

UL: applicable only to the Bachelor of Science (Pharmacy) program

**3204 Medicinal Chemistry II** is a continuation of Pharmacy 3203 and focuses on the structures, selected physicochemical properties, mechanism of action, structure-activity relationships, toxic effects at molecular level, and metabolism of different pharmacological classes of drugs including cholinergic agents, analgetic and anti-inflammatory agents, insulin and oral antidiabetic drugs, steroids and related compounds, antihyperlipidemic agents, histamine and antihistaminic agents, diuretic agents, angiotensin converting enzyme inhibitors and antagonists, and calcium channel blockers.

CO: PHAR 3009

OR: tutorials 1 hour per week; attendance is required

PR: PHAR 3203

UL: applicable only to the Bachelor of Science (Pharmacy) program

**3205 Pharmaceutics III** consists of several units. The standards of good manufacturing practice will be introduced. Characteristics, preparation, quality assurance and delivery systems for sterile products will be covered. The basic principles governing the application of radiation and radioactive compounds in medical diagnosis and therapy will be discussed. The status of current biotechnology-based pharmaceuticals and biotechnology related matters will be addressed.

PR: PHAR 2202

UL: applicable only to the Bachelor of Science (Pharmacy) program

**3250 Pharmacy Practice III** continues the acquisition, development, and application of the knowledge, skills, and attitudes necessary for the practice of pharmacy. The focus will include patient assessment, care plan development, counselling, follow-up, interprofessional collaboration, and communication with special patient populations. Emphasis will be on the development of competence in the areas of patient care, drug information, communication, professionalism, critical thinking, and teamwork. Application of knowledge and skills will occur in real and simulated pharmacy practice situations.

AR: attendance is required

CH: 5

CO: all Academic Term 4 Pharmacy courses

LC: 2

OR: practice sessions 3 hours per week

PR: PHAR 2251

**3251 Pharmacy Practice IV** continues the acquisition, development, and application of the knowledge, skills, and attitudes necessary for the practice of pharmacy. This course will build on pharmacy practice concepts and will emphasize patient safety. Development of competence in the areas of patient care, drug information, communication, professionalism, critical thinking, and teamwork will occur. Application of knowledge and skills will take place in simulated pharmacy practice situations.

AR: attendance is required

CH: 5

CO: all Academic Term 5 Pharmacy courses

LC: 2

OR: practice sessions 3 hours per week

PR: PHAR 3250

**3270 Pharmacotherapy I** introduces pharmacotherapeutic management of common diseases and effective management of patients' drug therapy. Emphasis will be placed on identifying drug therapy problems, establishing therapeutic outcomes, recommending pharmacological and non-pharmacological therapeutic alternatives, developing individualized therapeutic regimens, and developing a monitoring plan to evaluate adherence, efficacy, and safety. Topics may include drug interactions, gastroenterological conditions, musculoskeletal conditions, nutrition, and special populations.

CH: 5

CO: PHAR 3250, 3801, and 3805

LC: 5

**3271 Pharmacotherapy II** continues the discussion of pharmacotherapeutic management of common diseases and effective management of patients' drug therapy. Emphasis will be placed on identifying drug therapy problems, establishing therapeutic outcomes, recommending pharmacological and non-pharmacological therapeutic alternatives, developing individualized therapeutic regimens, and developing a monitoring plan to evaluate adherence, efficacy, and safety. Topics may include cardiovascular, dermatological, respiratory, and infectious diseases.

CH: 4

CO: PHAR 3251

LC: 4

PR: PHAR 3270, 3801, and 3805

**3301 Patient Care I** is an introductory course in patient care, especially in the areas of self-care and self-treatment and the role of the pharmacist. The regulatory environment of non-prescription products and the prevention and treatment of health conditions amenable to self-management will be discussed.

CO: PHAR 3009

PR: Medicine 4300

UL: applicable only to the Bachelor of Science (Pharmacy) program

**3410 Leadership and Health Promotion** focuses on the roles of leadership, advocacy, and health promotion in pharmacy to improve patient care. Insight into leadership skills and the roles of educating, advocating, and promoting health to patients, families, communities, and society will be discussed. The change process and the leader's role in change will be introduced.

**3650 Pharmacy Skills** continues the development of the skills necessary for pharmacy practice in order to meet the educational outcomes for the second year of the pharmacy program. Students will continue to develop abilities in communication, professionalism, critical thinking, problem-solving, teamwork and self-directed learning. Pharmacy practice in the hospital setting will be a focus. Students will participate in sterile product preparation and practice drug information and pharmaceutical calculation skills relevant to hospital

practice. Students will develop pharmacist care plans and will further develop their patient education skills. Scenarios will relate to the courses of study in the second year and draw on material studied in earlier years of the program. Students will participate in interprofessional education (IPE) modules with students from other health related programs when such modules are available.

CO: all Academic Term 3 Pharmacy courses

CR: the former PHAR 3150

LC: 0

OR: practical sessions 3 hours per week; tutorials 1 hour per week; attendance is required

UL: applicable only to the Bachelor of Science (Pharmacy) program

**3651 Pharmacy Skills** continues the development of the skills necessary for pharmacy practice in order to meet the educational outcomes for the second year of the pharmacy program. Students will continue to develop abilities in communication, professionalism, critical thinking, problem-solving, teamwork and self-directed learning. Students will participate in practice sessions necessary to develop an understanding of and skills required in patient assessment and patient education related to patient self-care. Students will build on their pharmacist care skills to meet patients' drug-related needs in uncomplicated patient scenarios and drug information skills to assess information needs. Scenarios will relate to the courses of study in the second year and draw on material studies in earlier years of the program. Students will participate in interprofessional education (IPE) modules with students from other health related programs when such modules are available.

CO: all Academic Term 4 Pharmacy courses

CR: the former PHAR 3151

LC: 0

OR: practical sessions 3 hours per week; tutorials 1 hour per week; attendance is required

PR: PHAR 3650

UL: applicable only to the Bachelor of Science (Pharmacy) program

**3801 Pathophysiology I** examines the nature of disease, causes and effects, and alterations in structure and function of cells. Topics may include cardiovascular, dermatological, gastrointestinal, and respiratory diseases.

CH: 2

CO: PHAR 3270 and 3805

LC: 2

PR: PHAR 2003

**3805 Pharmacology I** provides an introduction to the general principles of pharmacology including dose-response relationships, drug-receptor interactions, absorption, distribution, metabolism, and elimination of drugs. The focus will be on the pharmacological basis of the action of drugs leading to therapeutic effects, as well as adverse effects. Topics may include drugs used in the management of cardiovascular, gastrointestinal, respiratory diseases, and anti-inflammatory drugs.

CO: PHAR 3270 and 3801

PR: PHAR 2003

**3810 Microbiology of Infectious Diseases** examines the various types of micro-organisms (bacterial, viral, parasitic, and fungal), microbial growth, and their relationship to human diseases. The classifications of their morphology, mode of reproduction, and the metabolic process will be discussed.

CH: 2

LC: 2

**3825 Medicinal Chemistry** examines the functional group recognition and properties of drugs, drug-receptor interactions, structure activity relationships, and rational drug design. The relationship between the chemical structure of a drug and its binding affinity toward intended target enzymes or receptors, and its pharmacological activity, will be discussed.

CR: PHAR 3203 and 3204

PR: Chemistry 2401 and PHAR 3111

**4008 Chemotherapy** presents the principles of infectious diseases and cancer chemotherapy. Topics to be explored include molecular structure profiles in relation to mechanism of action, drug resistance, and toxicity of antimicrobial, antiviral, and antineoplastic agents. Antimicrobial activity/spectrum of activity of antibacterials, antifungals, antimalarial, antituberculosis, and antiviral/antiretroviral agents will be discussed. The classification and mechanism of action of cancer chemotherapeutic agents will be presented. Pharmacokinetic considerations, adverse effects/toxicity, and drug interactions will be explored for these agents.

CH: 2

CO: PHAR 4401

LC: 2

OR: tutorials 1 hour per week

PR: Medicine 4300, PHAR 3006, 3009, 3103, 3203 and 3204

UL: applicable only to the Bachelor of Science (Pharmacy) program

**403W Structured Practice Experience III** is a structured practice experience in community pharmacy after completion of the third year which will provide an opportunity for students to apply their technical skills and practice and participate in patient care activities. The practical experience is

normally comprised of four weeks during May/June.

AR: attendance is required

CH: 0

LC: 0

PR: successful completion of all courses in Academic Terms 5 & 6 of the program

UL: applicable only to the Bachelor of Science (Pharmacy) program

**406P Pharmacy Practice Experience II** provides two weeks (80 hours) of practice experience in a hospital pharmacy practice setting. The focus will be on the operations of a hospital pharmacy, including drug distribution, policies and procedures, and communicating with other healthcare professionals. Students will apply their knowledge and skills in the provision of pharmacy services. Effective communication skills, professionalism, and teamwork are expected.

AR: attendance is required

CH: 1

PR: all Academic Term 7 & 8 courses

**407P Pharmacy Practice Experience III** provides four weeks (160 hours) of practice experience in a direct patient care setting. Emphasis will be on continuing to develop patient care skills by working with a variety of patients and the healthcare team to appropriately identify, prevent, and resolve drug-related problems. Effective communication skills, professionalism, and teamwork, are expected.

AR: attendance is required

CH: 2

PR: all Academic Term 7 & 8 courses

**4201 Applied Pharmacokinetics** (same as the former PHAR 3206) is an introduction to biopharmaceutical and pharmacokinetic principles used in the selection, dosing, monitoring and evaluation of drug therapy. Application of these principles in evaluating drug literature and developing drug dosage regimens of selected classes of drugs for individual patients will be discussed.

CR: the former PHAR 3206

PR: Medicine 4300, PHAR 2202 and 3009

UL: applicable only to the Bachelor of Science (Pharmacy) program

**4250 Pharmacy Practice V** continues the acquisition, development, and application of the knowledge, skills, and attitudes necessary for the practice of pharmacy. Critical appraisal, patient safety, and interprofessional collaboration will be emphasized. Development of competence in the areas of patient care, drug information, communication, professionalism, critical thinking, and teamwork will occur. Application of knowledge and skills will take place in simulated pharmacy practice situations.

AR: attendance is required in practice sessions

CH: 5

CO: all Academic Term 7 Pharmacy courses

LC: 2

OR: practice sessions 3 hours per week

PR: PHAR 3251

**4251 Pharmacy Practice VI** continues the acquisition, development, and application of the knowledge, skills, and attitudes necessary for the practice of pharmacy. Sterile product preparation, drug information, patient safety, and calculations relevant to hospital practice will be introduced. Critical appraisal and interprofessional collaboration will also be a focus. Continued development of competence in the areas of patient care, communication, professionalism, critical thinking, and teamwork will occur. Application of knowledge and skills will take place in simulated pharmacy practice situations.

AR: attendance is required in practice sessions

CH: 5

CO: all Academic Term 8 Pharmacy courses

LC: 2

OR: practice sessions 3 hours per week

PR: PHAR 4250

**4270 Pharmacotherapy III** continues the discussion of pharmacotherapeutic management of common diseases and effective management of the patient's drug therapy. Emphasis will be placed on identifying drug therapy problems, establishing therapeutic outcomes, recommending pharmacological and non-pharmacological therapeutic alternatives, developing individualized therapeutic regimens, and developing a monitoring plan to evaluate adherence, efficacy, and safety. Topics may include autoimmune, infectious, and musculoskeletal diseases.

CH: 4

CO: PHAR 4250, 4802, and 4810

LC: 4

PR: PHAR 3006, 3271, and 3810

**4271 Pharmacotherapy IV** continues the discussion of pharmacotherapeutic management of common diseases and effective management of patients' drug therapy. Emphasis will be placed on identifying drug therapy problems, establishing therapeutic outcomes, recommending pharmacological and non-pharmacological therapeutic alternatives, developing individualized therapeutic regimens, and developing a monitoring plan to evaluate adherence, efficacy, and safety. Topics may

include cardiovascular, endocrine and renal disease, and women's and men's health.

CH: 6  
CO: PHAR 4251  
LC: 6  
PR: PHAR 4270, 4802, and 4810

**4302 Patient Care II** discusses the principal roles of health systems and health policy with a special emphasis on pharmaceutical policy and its impact on the profession, the public and on the delivery of pharmaceutical care. The principles of health promotion and the role of the pharmacist will be discussed. Students will gain knowledge about health challenges facing society, how education affects health, the roles of the pharmacist in educating and promoting health to patients.

CH: 1  
CR: the former PHAR 4301 and the former 3501  
PR: PHAR 2101, 2102, and 3301  
UL: applicable only to the Bachelor of Science (Pharmacy) program

**4401 Therapeutics I** is a part of a series that looks at the therapeutic management of common diseases. Topics may include but are not restricted to infectious diseases, hematology/oncology, and dermatology. For each disease state discussion will centre around several key issues including: the establishment of desired therapeutic outcomes; development of appropriate pharmacological and non-pharmacological therapeutic alternatives; factors to be considered to aid in the selection of an individualized therapeutic regimen; and the development of a monitoring plan to evaluate efficacy and safety.

CH: 6  
CO: PHAR 4008 and 4201  
LC: 6  
OR: tutorials 2 hours per week; attendance is required  
PR: Medicine 4300, PHAR 3006 and 3009  
UL: applicable only to the Bachelor of Science (Pharmacy) program

**4402 Therapeutics II** is a part in a series that looks at the therapeutic management of common diseases. Topics may include but are not restricted to women's health, men's health, gastroenterology, musculoskeletal, neurological, respiratory disorders and transplantation. For each disease state discussion will centre around several key issues including: the establishment of desired therapeutic outcomes; development of appropriate pharmacological and non-pharmacological therapeutic alternatives; factors to be considered to aid in the selection of an individualized therapeutic regimen; and the development of a monitoring plan to evaluate efficacy and safety.

CH: 6  
LC: 6  
OR: tutorials 2 hours per week; attendance is required  
PR: PHAR 4401  
UL: applicable only to the Bachelor of Science (Pharmacy) program

**4420 Pharmacy Management I** introduces the principles of management and leadership as they relate to pharmacy practice. Topics will include the pharmacy practice environment, human resources management, financial management, operations management, marketing, risk management, quality control and improvement, and effective communications.

**4503 Pharmacy Administration** introduces students to the basic principles of management as it relates to pharmacy practice. Topics will include human resources and financial management, marketing, strategic planning and the principles and issues associated with safe and appropriate drug distribution. These will be discussed from both a community and an institutional practice focus.

UL: applicable only to the Bachelor of Science (Pharmacy) program

**4504 Pharmacy Research and Evaluation I** introduces the biostatistical, pharmacoepidemiologic and pharmaco-economic concepts and develops the skills necessary to the practice of research and evaluation methods in applied pharmacy. The understanding of such methods is an important prerequisite in the critical appraisal of the health literature and the undertaking of evidence-based clinical practice.

CR: the former PHAR 4501  
UL: applicable only to the Bachelor of Science (Pharmacy) program

**4505 Pharmacy Research and Evaluation II** introduces students to principles of critical appraisal and provides opportunities to apply these principles to critique and evaluate current medical literature. Students will be assigned to a tutorial group, which will meet twice during the term to critically appraise at least two recently published studies (journal club). Emphasis will be placed on appropriate application of critical appraisal skills and group discussion of impact of study findings on clinical practice. In addition, this course will also discuss drug utilization reviews and evaluations and the role of the pharmacist, as well as adverse drug event reporting and the role of the pharmacist.

CH: 1  
CR: the former PHAR 4502  
LC: 1  
OR: tutorials 1 hour per week; attendance is required  
PR: PHAR 4504 or equivalent

UL: applicable only to the Bachelor of Science (Pharmacy) program

**4620 Applied Health Research** introduces the fundamentals of research design, methods, and appraisal necessary to develop the skills to analyze and interpret clinical research. Topics include randomized clinical trials, observational studies, and pharmaco-economic evaluations. Emphasis will be placed on making valid inferences about drug safety and effectiveness from scientific research. Principles of critically appraising the medical literature will be introduced.

CO: Statistics 2550

**4650 Pharmacy Skills** continues the development of the skills necessary for pharmacy practice in order to meet the educational outcomes for the third year of the pharmacy program. Students will continue to develop abilities in communication, professionalism, critical thinking, problem-solving, teamwork and self-directed learning. Students will participate in practice sessions necessary to develop an understanding of and skills required in patient assessment. Students will build on their pharmacist care skills to meet patients' drug-related needs in more complex patient scenarios, drug information skills to assess information needs, and medication preparation and dispensing skills to optimize safe and accurate medication delivery. Scenarios will relate to the courses of study in the third year and draw on material studies in earlier years of the program. Students will participate in interprofessional education (IPE) modules with students from other health related programs when such modules are available.

CO: all Academic Term 5 Pharmacy courses  
CR: the former PHAR 4150  
LC: 0  
OR: practical sessions 3 hours per week; tutorials 1 hour per week; attendance is required  
UL: applicable only to the Bachelor of Science (Pharmacy) program

**4651 Pharmacy Skills** continues the development of the skills necessary for pharmacy practice in order to meet the educational outcomes for the third year of the pharmacy program. Students will continue to develop abilities in communication, professionalism, critical thinking, problem-solving, teamwork and self-directed learning. Students will participate in sessions that focus on ethical issues in pharmacy practice and communication with health care providers. Students will build on their patient assessment and pharmacist care skills to meet patients' drug-related needs in more complex patient scenarios and will use critical appraisal skills to respond to clinical questions. Scenarios will relate to the courses of study in the third year and draw on material studied in earlier years of the program. Students will participate in interprofessional education (IPE) modules with students from other health related programs when such modules are available.

CO: all Academic Term 6 Pharmacy courses  
CR: the former PHAR 4151  
LC: 0  
OR: practical sessions 3 hours per week; tutorials 1 hour per week; attendance is required  
PR: PHAR 4650  
UL: applicable only to the Bachelor of Science (Pharmacy) program

**4802 Pathophysiology II** examines the nature of disease, causes and effects, and alterations in structure and function of cells. Topics may include endocrine disorders, renal, rheumatological and neurological diseases, neoplasia, and women's and men's health.

CO: PHAR 4270 and 4810  
PR: PHAR 3801

**4810 Pharmacology II** will focus on the pharmacological basis of the action of drugs leading to therapeutic effects, as well as adverse effects. Topics may include drugs used in the management of infectious diseases, the endocrine system, and inflammatory diseases, as well as hormonal drugs and analgesics.

CH: 2  
CO: PHAR 4270 and 4802  
LC: 2  
PR: PHAR 3006, 3805, and 3810

**4820 Pharmacokinetics** is an introduction to the biopharmaceutical and pharmacokinetic principles used in the selection, dosing, and monitoring of drug therapy. The concepts of absorption, distribution, metabolism and elimination, pharmacokinetic and pharmacodynamics mechanisms of drug interactions, and the importance of drug monitoring will be explored.

CH: 2  
LC: 2  
PR: PHAR 2202 and 3805

**4860 Pharmacogenomics and Biotechnology** provides insight into the development of biopharmaceuticals. Formulation, stability, dispensing, and clinical applications of biotechnology derived protein/peptide drugs will be discussed. The fundamental concepts of pharmacogenetics and pharmacogenomics will be explored. A focus will be on understanding how personalized drug therapy, based on the genetic profile of individuals, can optimize drug therapy and patient care.

CH: 2  
LC: 2  
PR: PHAR 2202 and 3111

**500X Structured Practice Experience IV** provides experience in clinical practice. Students will participate as members of the health care team. They will be responsible for providing pharmaceutical care to patients. Activities will include attending patient care rounds, providing in-services and drug information, and participating in case presentations. The structured practice experience is comprised of two six week modules.

AR: attendance is required  
 CH: 18  
 LC: 0  
 PR: successful completion of all course requirements for the degree and Clear Promotion  
 UL: applicable only to the Bachelor of Science (Pharmacy) program

**508P Pharmacy Practice Experience IV** provides two weeks (80 hours) of practice experience during Academic Term 11 in an institutional direct patient care setting. This course serves as a transition to the Advanced Pharmacy Practice Experience. Emphasis will be on developing independence in providing patient care under the mentorship of a preceptor or of an advanced practice pharmacy student. Effective communication skills, professionalism, and teamwork are expected.

AR: attendance is required  
 CH: 1  
 PR: all Academic Term 10 courses

**5250 Pharmacy Practice VII** continues the acquisition, development, and application of the knowledge, skills, and attitudes necessary for the practice of pharmacy. Critical appraisal, patient safety, and interprofessional collaboration will be emphasized. Continued development of competence in the areas of patient care, communication, professionalism, critical thinking, and teamwork will occur. Students will be expected to demonstrate increased independence during the application of knowledge and skills in simulated pharmacy practice situations.

AR: attendance is required in practice sessions  
 CH: 5  
 CO: all Academic Term 10 Pharmacy courses  
 LC: 2  
 OR: practice sessions 3 hours per week  
 PR: PHAR 4251

**5251 Pharmacy Practice VIII** is the final course in the series where students acquire, develop, and apply the knowledge, skills, and attitudes necessary for the practice of pharmacy. Demonstration of competence in the areas of patient care, drug information, communication, professionalism, critical thinking, and teamwork will be expected. Application of knowledge and skills will occur in simulated pharmacy practice situations.

AR: attendance is required in practice sessions  
 CH: 4  
 CO: all Academic Term 11 Pharmacy courses  
 LC: 2  
 OR: practice sessions 3 hours per week; course runs over 10 weeks to accommodate PHAR 508P  
 PR: PHAR 5250

**5270 Pharmacotherapy V** is the final course in the series that examines the pharmacotherapeutic management of common diseases and effective management of the patient's drug therapy. Emphasis will be placed on identifying drug therapy problems, establishing therapeutic outcomes, recommending pharmacological and non-pharmacological therapeutic alternatives, developing individualized therapeutic regimens, and developing a monitoring plan to evaluate adherence, efficacy, and safety. Topics may include neurological, oncological, and addictions and mental health conditions.

CH: 6  
 CO: PHAR 5815  
 LC: 6  
 PR: PHAR 4271

**5271 Advanced Pharmacotherapy** expands and integrates the knowledge and skills acquired from the Pharmacotherapy series of courses through application to complex patient scenarios. Critical thinking skills necessary for optimizing pharmacotherapy in a variety of patient care situations will be the focus of the course.

CH: 5  
 LC: 6  
 OR: course runs over 10 weeks to accommodate PHAR 508P  
 PR: PHAR 5270

**5275 Symposium in Pharmacy** is a forum for students to research, develop and deliver formal presentations related to pharmacy practice. Students will be expected to interpret, synthesize, and present information effectively. The presentations will allow for application of knowledge and reflection on content.

AR: attendance is required  
 CH: 2  
 CO: PHAR 5251  
 LC: 2

**5301 Clinical Toxicology** covers the toxicology and clinical management of toxicity associated with common medications.

CH: 2  
 CO: PHAR 5401  
 LC: 2  
 UL: applicable only to the Bachelor of Science (Pharmacy) program

**5302 Patient Care III** focuses on pharmaceutical care considerations in special patient populations (e.g., geriatrics, neonates, pediatrics, pregnancy and lactation, critically ill, etc.). Implementation of pharmaceutical care in hospital, ambulatory and community practice settings will be discussed.

CO: PHAR 5401  
 OR: tutorials 1 hour per week; attendance is required  
 UL: applicable only to the Bachelor of Science (Pharmacy) program

**5401 Therapeutics III** is part in a series that looks at the therapeutic management of common diseases. Topics may include but are not restricted to endocrine, psychiatric, renal and cardiovascular disorders. For each disease state discussion will centre around several key issues including: the establishment of desired therapeutic outcomes; development of appropriate pharmacological and non-pharmacological therapeutic alternatives; factors to be considered to aid in the selection of an individualized therapeutic regimen; and the development of a monitoring plan to evaluate efficacy and safety.

CH: 6  
 LC: 6  
 OR: tutorials 2 hours per week  
 PR: PHAR 4402  
 UL: applicable only to the Bachelor of Science (Pharmacy) program

**5430 Pharmacy Management II** prepares students for the various roles of management in pharmacy practice, regardless of position or practice setting. Management principles including communications, leadership, finance, human resources management, marketing, and promotion will be applied through demonstrating leadership, business planning, and pharmacy service implementation.

CH: 2  
 LC: 2  
 PR: PHAR 4420

**5506 Pharmacy Research and Evaluation III** (same as the former PHAR 5501) discusses the principles of critical appraisal and provides opportunities to apply these principles to critique and evaluate current medical literature. Students will be assigned to a tutorial group, which will meet twice during the term to critically appraise at least two recently published studies. Emphasis will be placed on appropriate application of critical appraisal skills and group discussion of impact of study findings on clinical practice.

CH: 1  
 CR: the former PHAR 5501  
 LC: 0  
 OR: tutorials 1 hour per week  
 PR: PHAR 4505 or equivalent  
 UL: applicable only to the Bachelor of Science (Pharmacy) program

**5640 Social Justice and the Pharmacist** will enable students to critically analyse the role of social justice as an integral part of the practice of pharmacy. The course will include a focus on the interconnectedness of health equity with global contexts that include social class, ethnicity, gender, ability, and mental health. Critical thinking skills will be used to examine complex health and social issues.

CH: 2  
 LC: 2

**5650 Pharmacy Skills** (same as the former PHAR 5150) continues the development of the skills necessary for pharmacy practice in order to meet the educational outcomes for the fourth year of the pharmacy program. Students will continue to develop abilities in communication, professionalism, critical thinking, problem-solving, teamwork and self-directed learning. Students will build on their pharmacist care skills to meet patients' drug-related needs in patients with multiple drug related problems. Refinement of verbal and written communication skills will be focus. Scenarios will relate to the courses of study in the fourth year and draw on material studies in earlier years of the program. Students will participate in interprofessional education (IPE) modules with students from other health related programs when such modules are available.

CO: all Academic Term 7 Pharmacy courses  
 CR: the former PHAR 5150  
 LC: 0  
 OR: practical sessions 3 hours per week; tutorials 1 hour per week; attendance is required  
 UL: applicable only to the Bachelor of Science (Pharmacy) program1

**5815 Pharmacology III** is the final course in the series that focuses on the pharmacological basis of the action of drugs leading to therapeutic effects, as well as adverse effects. Topics may include drugs used in the management of oncological, mental health, and neurological conditions as well as drugs of abuse.

CH: 2  
 CO: PHAR 5270  
 LH: 2

PR: PHAR 4810

**5830 Applied Pharmacokinetics** discusses pharmacokinetic principles of drug selection, dosing, and monitoring in the clinical setting for individualization of drug therapy.

CH: 2

LH: 2

PR: PHAR 4820

**605P Advanced Pharmacy Practice Experience: Direct Patient Care** is an eight week (320 hours) practice experience completed during the final year of the program (following Academic Term 11). Students will be expected to demonstrate leadership in the responsible provision of patient care by becoming an integral member of the healthcare team while confidently using clinical reasoning and critical thinking skills. Mentorship of junior students may be a component of this experience.

AR: attendance is required

CH: 12

PR: all Academic Term 10 &amp; 11 courses

**606P Advanced Pharmacy Practice Experience: Acute Care Hospital** is an eight week (320 hours) practice experience where patient care is provided in an acute care hospital setting and is completed during the final year of the program (following Academic Term 11). Students will be expected to demonstrate leadership in the responsible provision of patient care by becoming an integral member of the healthcare team while confidently using clinical reasoning and critical thinking skills. Mentorship of junior students may be a component of this experience.

AR: attendance is required

CH: 12

PR: all Academic Term 10 &amp; 11 courses

**607P Advanced Pharmacy Practice Experience: Community Pharmacy** is an eight week (320 hours) practice experience where patient care is provided in a community pharmacy setting and is completed during the final year of the program (following Academic Term 11). Students will be expected to demonstrate leadership in the responsible provision of patient care by applying expanded scope of practice skills, as well as communicating and collaborating with patients, the pharmacy team, other health professionals, and the public while confidently using clinical reasoning and critical thinking skills. Mentorship of junior students may be a component of this experience.

AR: attendance is required

CH: 12

PR: all Academic Term 10 &amp; 11 courses

**608P Advanced Pharmacy Practice Experience: Elective** is a six week (240 hours) experience completed during the final year of the program (following Academic Term 11). The experience may occur in either a direct or non-direct patient care setting. Options include patient care, research, health policy, drug information, teaching/education, advocacy, and administration. Placements may vary from year to year depending upon site and preceptor availability.

AR: attendance is required

CH: 9

PR: all Academic Term 10 &amp; 11 courses

Keough, K.M.W., B.Sc.(Hons.), M.Sc., Ph.D. *Toronto*

#### Professors

Bertolo, R.F.P., B.A.Sc.(Hons.) *McMaster*, M.Sc., Ph.D. *Guelph*  
 Brosnan, J.T., B.Sc.(Hons.), M.Sc., D.Sc. *National University of Ireland*, D.Phil. *Oxford*; University Research Professor, Awarded 1990; Recipient of the John Lewis Paton Distinguished University Professorship, 2014-2015; Cross appointment with Faculty of Medicine

Brosnan, M.E., B.A.(Hons.), M.Sc., Ph.D. *Toronto*; Cross appointment with Faculty of Medicine

Cheema, S.K., B.Sc. *Punjab*, M.Sc. *Punjab Agricultural*, Ph.D. *Post Graduate Institute of Medical Education and Research*; Deputy Head (Graduate Studies); Cross appointment with Faculty of Medicine

Davis, P.J., B.Sc., Ph.D. *Memorial*

Heeley, D.H., B.Sc.(Hons.), Ph.D. *Birmingham*

Herzberg, G.R., B.S., Ph.D. *Maine*

Hoover, R., B.Sc.(Hons.) *Ceylon*, M.Sc. *Leeds*, Ph.D. *Alberta*

McGowan, R.A., B.Sc.(Hons.) *Brock*, Ph.D. *SUNY, Buffalo*; Joint appointment with Department of Biology

Mulligan, M.E., B.Sc.(Hons.) *National University of Ireland*, Ph.D. *Harvard*; Recipient of the President's Award for Distinguished Teaching, 1999

Robinson, J.J., B.Sc.(Hons.) *University College Dublin*, M.Sc. *Trinity College Dublin*, Ph.D. *Alberta*

Shahidi, F., B.Sc. *Shiraz*, Ph.D. *McGill*, University Research Professor, Awarded 1998; Cross appointment with Departments of Biology and Ocean Sciences

Volkoff, H., B.Sc. *Pierre and Marie Curie University*, M.Sc. *University of Aix-Marseille III*, Ph.D. *Clemson University*; Joint appointment with Department of Biology

#### Associate Professors

Booth, V.K., B.Sc.(Hons.) *Victoria*, M.Sc. *Waterloo*, Ph.D. *Toronto*; Canada Research Chair in Proteomics; Deputy Head (Undergraduate); Cross appointment with Department of Physics and Physical Oceanography

Brunton, J.A., B.A.Sc. *Guelph*, Ph.D. *McMaster*

Nag, K., B.Sc.(Hons.), M.Sc. (Part I) *Calcutta*, M.Sc., Ph.D. *Memorial*

Randell, E.W., B.Sc.(Hons.), Ph.D. *Memorial*; Cross appointment from Faculty of Medicine

#### Assistant Professors

Brown, R.J., B.Sc.(Hons.), Ph.D. *Ottawa*

Christian, S.L., B.Sc.(Hons.) *Alberta*, Ph.D. *University of British Columbia*; Cross appointment with Faculty of Medicine

Mailloux, R.J., B.Sc., Ph.D. *Laurentian*

#### Adjunct Professors

Banoub, J., B.Sc.(Hons.) *Alexandria*, Ph.D. *Montreal*

Bromley-Brits, K., B.Sc.(Hons.) *Memorial*, Ph.D. *University of British Columbia*

Dave, D., B.Eng. *Gujarat University*, M.Eng. *S.V. Patel University*, Ph.D. *Indian Institute of Technology*

### Communal Research and Instrumentation Grouping

#### Supervisor

Skinner, C.T.

#### Senior Technician, Student Laboratory

Codner, H.M.

### Department of Biology

www.mun.ca/biology

#### Head

Marino, P., B.A. *Vermont*, M.Sc. *Northern Arizona*, Ph.D. *Alberta*

#### Professores Emeriti

Burton, D., B.Sc. *Wales*, P.G.C.E., Ph.D. *London*

Burton, M., B.Sc., Ph.D. *London*

Haedrich, R.L., A.B., A.M., Ph.D. *Harvard*; University Research Professor, Awarded 1999

Khan, R.A., B.S.A., M.Sc., Ph.D. *Toronto*

Patel, T.R., B.Sc., M.S. *Baroda*, M.A., Ph.D. *Texas*

#### Honorary Research Professors

Collins, M.A.J., B.Sc., Cert. Ed., M.Sc. *Southampton*, B.Ed., M.Ed. *Memorial*, Ph.D. *Keele*; Recipient of the President's Award for Distinguished Teaching, 1996-1997)

Dickinson, A., B.Sc. *University of London*, B.Ed., M.Sc. *Memorial*, M.A. *University of Leeds*, M.Phil., Ph.D. *Cambridge*

Finney-Crawley, J., B.Sc.(Hons.) *University College of North Wales, Bangor*, M.Sc., D.I.C., Ph.D. *Imperial College, London University, England*

Green, J.M., B.Sc. *Michigan*, M.Sc. *Miami*, Ph.D. *University of British Columbia*

#### Academic Director of Memorial University of Newfoundland Botanical Garden

Goodyear, N., B.Sc.(Hons.) *McGill*, M.Sc., Ph.D. *Guelph*

#### Professors

Abrahams, M., B.Sc.(Hons.) *Western*, M.Sc. *Queen's*, Ph.D. *Simon Fraser*; Dean of Science

Carr, S.M., B.Sc. *California Polytechnic*, C.Phil., Ph.D. *University of California, Berkeley*; Cross appointment to Faculty of Medicine

Edinger, E., B.A. *California*, M.Sc., Ph.D. *McMaster*; Joint appointment with Department of Geography

Hermanutz, L., B.Sc. *Guelph*, M.Sc. *Windsor*, Ph.D. *Western Ontario*; Cross appointment with Botanical Garden

Igamberdiev, A.U., Dr.Sci. *Russian Acad. Sciences*, Ph.D., M.S. *Voronezh*

Innes, D.J., B.Sc.(Hons.) *University of British Columbia*, M.Sc. *Dalhousie*, Ph.D. *S.U.N.Y. Stony Brook*

Jones, I.L. B.Sc. *Carleton*, M.Sc. *Toronto*, Ph.D. *Queen's*

McGowan, R.A., B.Sc.(Hons.) *Brock*, Ph.D. *SUNY/AB*; Joint appointment with Department of Biochemistry

Miller, E.H., B.Sc. *Alberta*, M.Sc. *Canterbury*, Ph.D. *Dalhousie*

Snelgrove, P., B.Sc.(Hons.) *Memorial*, M.Sc. *McGill*, Ph.D. *Woods Hole*; Joint appointment with Ocean Sciences Centre

Staveley, B.E., B.Sc., M.Sc. *Guelph*, Ph.D. *Alberta*

Volkoff, H., B.Sc. *Pierre et Marie Curie University*, M.Sc. *University of Aix-Marseille III*, Ph.D. *Clemson University*; Joint appointment with Department of Biochemistry

#### Associate Professors

Chapman, T.W., B.Sc.(Hons.), M.Sc. *Guelph*, Ph.D. *Simon Fraser*

Dufour, S., B.Sc.(Hons.), M.Sc. *Universite de Moncton*, Ph.D. *University California San Diego*

Hooper, R.G., B.Sc. *Victoria*, Ph.D. *Portsmouth*; Curator, Phycological Herbarium; Cross appointment to Grenfell Campus

Lang, A.S., B.Sc.(Hons.) *Brock*, Ph.D. *University of British Columbia*

Marshall, H.D., B.Sc.(Hons.) *Memorial*, Ph.D. *Toronto*

Murphy, F., B.Sc.(Hons.) *Memorial*, M.Sc. *Acadia*, Ph.D. *Queen's*

Purchase, C.F., B.Sc.(Hons.), M.Sc. *Memorial*, Ph.D. *Toronto*

Wiersma, Y.F., B.Sc.(Hons.), B.Ed. *Toronto*, M.Sc., Ph.D. *Guelph*

#### Assistant Professors

Bignell, D., B.Sc.(Hons.) *Manitoba*, Ph.D. *Alberta*

Hurford, A., B.Sc. *Fairfield*, M.Sc. *Alberta*, Ph.D. *Queen's*

Leroux, S.J., B.A., M.Sc. *Alberta*, Ph.D. *McGill*

Peña-Castillo, L., B.Sc. *ITESM-Veracruz, Mexico*, M.Sc. *Alberta*, Ph.D. *Otto-von-Guericke, Magdeburg*; Joint appointment with

Department of Computer Science

Roncal, J., B.Sc. *Universidad Peruana Cayetano Heredia, Lima*,

Peru, Ph.D. *Florida International University*  
 Tahlan, K., B.Sc. *Kurukshetra University*, Ph.D. *Alberta*  
 Vander Wal, E., HBSc., M.Sc. *Lakehead University*, Ph.D.  
*University of Saskatchewan*

#### Adjunct Professors

Bratley, J., B.Sc.(Hons.) *Glasgow*, Ph.D. *Liverpool*  
 Bykova, N.V., B.Sc., M.Sc., Ph.D. *Voronezh State Univ. Russia*  
 Debnath, S., B.Sc.Ag.(Hons.), M.Sc.Ag. *Bangladesh Agric. Univ.*,  
 Ph.D. *India Agric. Res. Inst.*  
 Dixon, P.L., B.Sc. *Memorial*, M.Sc. *Guelph*, Ph.D. *Edinburgh*  
 Gilkinson, K., B.Sc. *Ottawa*, M.Sc., Ph.D. *Memorial*  
 Gregory, R.S., B.Sc.(Hons.) *Acadia*, M.Sc. *Trent*, Ph.D. *University*  
*of British Columbia*  
 Hamoutene, D., B.Sc. *Houari Boumediene Univ. & Marine*  
*Sciences & Coastal Management Institute (ISMAL)*, M.Sc.,  
 Ph.D. *Aix-Marseille II Univ.*  
 Hillier, K., B.Sc.(Hons), Ph.D. *Memorial*  
 Lewis, K., B.Sc. *University of California, Davis*, M.Sc., Ph.D.  
*Memorial*  
 McKenzie, D., B.S.A., M.Sc. *University of Manitoba*, Ph.D. *Texas A*  
*& M University*  
 Robertson, G.J., B.Sc. *Queens*, Ph.D. *Simon Fraser*  
 Stenson, G.B., B.Sc. *Alberta*, Ph.D. *University of British Columbia*  
 Whitney, H.G., B.Sc. *McGill*, M.Sc. *Saskatchewan*, Ph.D. *Montréal*

#### Cross Appointments

Cadigan, N., B.Sc.(Hons), M.Sc. *Memorial*, Ph.D. *University of*  
*Waterloo*; Cross appointment from Fisheries and Marine  
 Institute  
 Clement, M., B.Sc.(Hons.) *Moncton*, M.Sc. *University of New*  
*Brunswick*; Ph.D. *Guelph*; Cross appointment from Fisheries  
 and Marine Institute  
 Connor, J., B.Sc. *Guelph*, M.A. *Western Ontario*, M. Phil., Ph.D.  
*Waterloo*; Cross appointment from Faculty of Medicine  
 Fleming, I.A., B.Sc. *Queen's*, M.Sc. *Simon Fraser*, Ph.D. *Toronto*;  
 Cross appointment from Ocean Sciences Centre  
 Gagnon, P., B.Sc., Ph.D. *Laval University*; Cross appointment from  
 Ocean Sciences Centre  
 Gamperl, A.K., B.Sc.(Hons.), M.Sc. *Guelph*, Ph.D. *Dalhousie*;  
 Cross appointment from Ocean Sciences Centre  
 McGaw, I.J., B.Sc.(Hons.), Ph.D., *Wales-Bangor*; Cross  
 appointment from Ocean Sciences Centre  
 Mercier, A., B.Sc. *Université de Sherbrooke*, M.Sc., Ph.D.  
*Université du Québec à Rimouski*; Cross appointment from  
 Ocean Sciences Centre  
 Montevecchi, W., B.Sc. *Northeastern*, M.Sc. *Tulane*, Ph.D.  
*Rutgers*; Cross appointment from Department of Psychology  
 Parrish, C.C., B.Sc. *Wales*, Ph.D. *Dalhousie*; Recipient of the  
 President's Award for Outstanding Research, 1995-1996;  
 University Research Professor, Awarded 2013; Cross  
 appointments with the Department of Chemistry and from the  
 Oceans Sciences Centre  
 Rise, M.L., B.Sc. *Whitworth College*, M.Sc. *Boston College*, Ph.D.  
*Victoria*  
 Robert, D., B.Sc., Ph.D. *Université Laval*; Cross appointment from  
 Fisheries and Marine Institute  
 Rowe, S., B.Sc.(Hons.), M.Sc., *Memorial*, Ph.D. *Dalhousie*; Cross  
 appointment from Fisheries and Marine Institute  
 Schneider, D.C., B.Sc. *Duke*, Ph.D. *SUNY, Stony Brook*; Associate  
 Dean (Research); Professor; Cross appointment from Ocean  
 Sciences Centre; Cross appointment with Department of  
 Psychology; Recipient of the President's Award for Outstanding  
 Graduate Student Supervision, 2012-2013  
 Shahidi, F., B.Sc. *Shiraz*, Ph.D. *McGill*; Cross appointment from  
 Department of Biochemistry  
 Storey, A.E., B.Sc.(Hons.), M.A. *Manitoba*, Ph.D. *Rutgers*; Cross  
 appointment from Department of Psychology  
 Wroblewski, J.S., B.Sc. *Illinois*, M.Sc., Ph.D. *Florida State*;  
 Professor (Research); Cross appointment from Ocean Sciences  
 Centre

#### Administrative Officer

Kenny, A.J., B.A. *Memorial*

#### Supervisor of Laboratories

Darby-King, A.

### Department of Chemistry

www.mun.ca/chem

#### Head

Fridgen, T.D., B.Sc.(Hons.) *Trent*, B.Ed., Ph.D. *Queen's*, Professor

#### Professores Emeriti

Gogan, N.J., B.Sc.(Hons.), Ph.D. *National University of Ireland,*  
*Dublin*, F.C.I.C.  
 Lucas, C.R., B.Sc., M.Sc. *Acadia*, D.Phil. *Oxon*, F.C.I.C.  
 Machin, W.D., B.Sc. *Carleton*, Ph.D. *Rensselaer*  
 Thompson, L.K., B.Sc., Ph.D. *Manchester*, F.C.I.C.; University  
 Research Professor, Awarded 1995

#### Honorary Research Professor

Georghiou, P.E., B.Sc.(Hons.) *Witwatersrand*, Ph.D. *McGill*,  
 F.C.I.C.

#### Professors

Bodwell, G.J., B.Sc., M.Sc. *Victoria*, Dr.rer.nat. *Tech. Univ.*  
*Braunschweig*; Deputy Head (Graduate Studies and Research);  
 Recipient of the President's Award for Outstanding Research,  
 1998-1999; Winner of the Petro Canada Young Innovator  
 Award, 1999-2000; Winner of the 2011 Distinguished Scholar  
 Medal; University Research Professor, Awarded 2013  
 Bottaro, C.S., B.Sc.(Hons.) *St. Mary's*, Ph.D. *Dalhousie*  
 Helleur, R.J., B.Sc. *Concordia*, M.Sc. *McGill*, Ph.D. *Queen's*;  
 Safety Coordinator  
 Kerton, F.M., B.Sc.(Hons.) *Univ of Kent*, D.Phil. *Univ of Sussex*  
 Merschrod, E., A.B. *Bryn Mawr Coll.*, M.S., Ph.D. *Cornell*  
 Mezey, P.G., M.Sc., M.Sc., Ph.D. *Budapest*, D. Sc. *Saskatchewan*;  
 Canada Research Chair in Scientific Modelling and Simulation  
 Pansare, S.V., B.Sc., M.Sc., *Univ. Pune (India)*, Ph.D. *Alberta*  
 Pickup, P.G., B.A., D.Phil. *Oxon*; University Research Professor,  
 Awarded 2005  
 Poirier, R.A., B.Sc., M.Sc. *Laurentian*, Ph.D. *Toronto*, F.C.I.C.;  
 Recipient of the President's Award for Outstanding Research,  
 1986-1987; University Research Professor, Awarded 2012  
 Wardlaw, D.M., B.Sc., Ph.D. *Toronto*; Provost/Vice-President  
 (Academic)/Pro Vice-Chancellor  
 Zhao, Y., B.S., M.S. *Dalian*, Ph.D. *Alberta*; Winner of the Petro  
 Canada Young Innovator Award, 2006-2007

#### Associate Professors

Davis, R.W., B.Sc. *Memorial*, Ph.D. *University of British Columbia*  
 Flinn, C.G., B.Sc., M.Sc., Ph.D. *Dalhousie*; Deputy Head  
 (Undergraduate Studies)  
 Kozak, C.M., B.Sc.(Hons.) *McMaster*, Ph.D. *UBC*; Winner of the  
 2011 Terra Nova Young Innovator Award  
 Thompson, D.W., B.Sc.(Hons.), M.Sc. *Queen's*, Ph.D. *York*

#### Assistant Professors

Katz, M.J., B.Sc., Ph.D. *Simon Fraser University*  
 Rowley, C.N., B.Sc.(Hons) *Carleton*, Ph.D. *Ottawa*  
 Young, C.J.L., B.Sc.(Hons.), Ph.D. *Toronto*

#### Assistant Professors (term)

Hattenhauer, K.M., B.Sc. *Winnipeg*, Ph.D. *Manitoba*; First Year  
 Coordinator  
 Warburton, P., B.Sc. (Hons.), M.Sc., Ph.D. *University of*  
*Saskatchewan*

#### Cross-Appointments

Alisaraie, L., B.Sc. *Sharif University of Technology*, M.Sc.  
*Chemistry & Chemical Engineering Research Centre of Iran*,  
 Dr.rer.nat. *Paderborn*; Cross appointment from School of  
 Pharmacy  
 Parrish, C.C., B.Sc. *Wales*, Ph.D. *Dalhousie*; Recipient of the  
 President's Award for Outstanding Research 1995-1996;  
 Professor (Research); University Research Professor, Awarded  
 2013; Cross appointment with the Department of Biology and  
 from the Ocean Sciences Centre  
 Poduska, K., B.A. *Carleton College*, Ph.D. *Cornell*; Cross  
 appointment from Department of Physics and Physical  
 Oceanography

#### Adjunct Professors

Banoub, J.H., B.Sc.(Hons.) *University of Alexandria, Egypt*, Ph.D.  
*University of Montreal*  
 De Silva, A., B.Sc. *Carleton*, M.Sc. *McGill*, Ph.D. *Toronto*  
 MacQuarrie, S., B.Sc. *Mount Allison*, Ph.D. *Virginia Polytechnic*  
*Institute and State University*  
 Pearson, J., B.Sc. *Cape Breton*, Ph.D. *Dalhousie*  
 Schneider, C., B.Sc.(Hons), M.Sc. *Université de Nancy I (France)*,  
 Ph.D. *Keele University*

#### Undergraduate Laboratory Supervisor

Vanasse, N.

## Department of Computer Science

www.mun.ca/computerscience

### Head

Barzhaf, W., Dipl. Phys. *Ludwig-Maximilian*, Munich, Dr.rer.nat  
*Federiciana*, Karlsruhe; University Research Professor, Awarded  
2010; Professor

### Professors

Bartha, M., M.Sc., Ph.D. *József Attila University*, Hungary  
Gong, M., B.Eng. *H.E.U.*, M.Sc. *Tsinghua*, Ph.D. *Alberta*  
Lu, S., B.Eng. *Peking*, M.Sc., Ph.D. *Waterloo*  
Miminis, G., Dipl. Greek Center of Productivity, B.Sc. *Univ. of  
Ioannina (Greece)*, M.Sc., Ph.D. *McGill*  
Tang, J., M.Sc. *Iowa*, Ph.D. *Penn. State*  
Vidyasankar, K., M.Tech. *I.I.T. Kanpur*, Ph.D. *Waterloo*  
Wang, C.A., B.A. *Peking*, M.Sc., Ph.D. *Alberta*  
Zuberek, W., M.Sc., Ph.D., D.Sc. *Warsaw Tech.*

### Associate Professors

Brown, E., B.Sc.(Hons.), *Memorial*, M.Sc., Ph.D. *Toronto*, LL.B.  
*Victoria*  
Bungay, S., B.Sc., M.Sc. *Memorial*, Ph.D. *Guelph*  
Byrne, R., B.Sc.(Hons.), B.Eng. *Memorial*, M.Sc., Ph.D. *Victoria*  
Chen, Y.P., B.Sc. *Beijing*, Ph.D. *Simon Fraser*  
Deb, A., M.Tech. *Calcutta*, Ph.D. *Iowa*  
Fiech, A., Dipl. Inf. *Dortmund*, Ph.D. *Kansas State*  
Kolokolova, A., B.Sc.(Hons.) *Arizona*, M.Sc., Ph.D. *Toronto*  
Mata-Montero, M., B.Sc. *Costa Rica*, M.Sc. *Illinois*, Ph.D. *Victoria*  
Shieh, J., B.Sc. *Beijing*, M.Sc., Ph.D. *Simon Fraser*  
Vardy, A., B.Eng. *Memorial*, M.Sc. *Sussex*, Ph.D. *Carleton*; Joint  
appointment with Electrical and Computer Engineering, Faculty  
of Engineering and Applied Science  
Wareham, T., B.Sc.(Hons.), B.A., M.Sc. *Memorial*, Ph.D. *Victoria*

### Assistant Professors

Hu, T., B.Sc., M.Sc. *Wuhan*, Ph.D. *Memorial*  
Peña-Castillo, L., B.Sc. *ITESM, Veracruz, Mexico*, M.Sc. *Alberta*,  
Ph.D. *Otto-von-Guericke, Magdeburg*; Joint appointment with  
Department of Biology

### Adjunct Professor

van Rooij, I., M.S.c. *Radboud University Nijmegen*, Ph.D. *Victoria*

### Lecturers

Batten, D.L., B.Sc.(Hons.) *Memorial*, M.Sc. *Queen's*  
Gupta, R., B.A. *Agra Univ.*, B.A. *Memorial*, M.S. *Georgia Tech.*

### Cross-Appointments

Carr, S.M., B.Sc. *California Polytechnic*, C.Phil, Ph.D. *University of  
California*; Cross appointment from Department of Biology  
Devillers, R., B.Sc.(Eq.) *Lyon 1*, M.Sc. *UQAM*, M.Sc. *Laval*, Ph.D.  
*Laval/Marne la Vallée*; Cross appointment from Department of  
Geography  
Evermann, J., Dipl. Wirt. Inf. *Muenster*, Ph.D. *University of British  
Columbia*; Cross appointment from Faculty of Business  
Administration  
Farrell, G., M.D. *Memorial*; Cross appointment from Discipline of  
Family Medicine, Faculty of Medicine  
Meruvia-Pastor, O., B.Eng. *ITESM, Monterrey*, M.Sc. *Alberta*, Dr.  
Eng. *Otto-von-Guericke, Magdeburg*; Cross appointment from  
Faculty of Science  
Norvell, T.S., B.Sc.(Hons.) *Dalhousie*, M.Sc., Ph.D. *Toronto*; Cross  
appointment from Faculty of Engineering and Applied Science  
Parsons, J., B.Comm.(Hons.) *Memorial*, Ph.D. *University of British  
Columbia*; Cross appointment from Faculty of Business  
Administration  
Peters, D.K., B.Eng. *Memorial*, M.Eng., Ph.D. *McMaster*, P.Eng.;  
Cross appointment from Faculty of Engineering and Applied  
Science  
Pike, D., B.Math. *Waterloo*, MAM, Ph.D. *Auburn*, FTICA; Cross  
appointment from Department of Mathematics and Statistics  
Samet, S., M.Sc., Ph.D. *Ottawa*; Cross appointment from Faculty  
of Medicine  
Shalaby, N.A.I., M.A. *York*, Ph.D. *McMaster*; Cross-appointment  
from Department of Mathematics and Statistics

### Systems Manager

Rayment, M., B.Sc. *Memorial*, MS *M.I.U.*

### Systems Personnel

Casey, A., B.Sc. *Memorial*  
Draskóy, A., B.Sc., B.A. *Memorial*

Greening, L., B.Sc. *Memorial*  
Payne, N., B.Ed., B.Sc. *Memorial*  
Price, P., B.Sc. *Memorial*  
Wissink, M., B.Sc. *University of New Brunswick*

### Laboratory Instructor

Johnstone, S., B.Sc. *Memorial*

### Instructional Assistants

Anthony, S., B.Sc. *Memorial*  
Milley, C., B.Sc. *Memorial*  
Verbree-Barnes, I., B.Sc. *Memorial*

## Department of Earth Sciences

www.mun.ca/earthsciences

### Head

Hanchar, J.M., B.S. *Memphis*, M.S. *Vanderbilt*, Ph.D. *Rensselaer  
Polytechnic Institute*, P.Geo.

### Professores Emeriti

Hall, J., B.A. *Oxon*, DIC *London*, Ph.D. *Glasgow*, F.G.C., P.Geo.;  
University Research Professor, Awarded 2003  
Hiscott, R.N., B.Sc.(Hons.) *Brock*, Ph.D. *McMaster*, P.Geo.  
Hodych, J.P., M.A., Ph.D. *Toronto*  
Longerich, H., B.Sc. *Millikin*, Ph.D. *Indiana*  
Rochester, M.G., B.A., M.A. *Toronto*, Ph.D. *Utah*, F.R.S.C.;  
University Research Professor, Awarded 1986

### Professors

Aksu, A.E., B.Sc. *Ege*, M.Sc., Ph.D. *Dalhousie*; University  
Research Professor, Awarded 2009  
Azmy, K., B.Sc.(Hons.) *Ain Shams*, M.Sc. *Windsor*, Ph.D. *Ottawa*  
Burden, E.T., B.Sc.(Hons.), M.Sc. *Toronto*, Ph.D. *Calgary*, P.Geo.  
Dunning, G.R., B.Sc.(Hons.), M.Sc. *Carleton*, Ph.D. *Memorial*;  
Recipient of the President's Award for Outstanding Research,  
1994-1995  
Indares, A., B.Sc. *Grenoble*, M.Sc., Ph.D. *Montreal*  
Jenner, G.A., B.Sc.(Hons.), M.Sc. *Western Ontario*, Ph.D.  
*Tasmania*, P.Geo.  
Johansen, T., BaSc., M.Sc., Ph.D. *Oslo*; Canada Research Chair  
in Reservoir Engineering; Cross appointment with Faculty of  
Engineering and Applied Science  
Kachanoski, G., B.Sc.(Hons.), M.Sc. *University of Saskatchewan*,  
Ph.D. *University of California (Davis)*; President and Vice-  
Chancellor  
McIlroy, D., B.Sc.(Hons.) *Manchester*, D.Phil. *Oxford*  
Piercy, S.J., B.Sc.(Hons.), M.Sc. *Memorial*, Ph.D. *University of  
British Columbia*, P.Geo.; NSERC-Altius Industrial Research  
Chair in Mineral Deposits; Recipient of the President's Award for  
Outstanding Research, 2015  
Rivers, C.J.S., B.Sc. *Belfast*, Ph.D. *Ottawa*  
Slawinski, M.A., B.Sc., M.Sc., Ph.D. *Calgary*  
Wilton, D.H.C., B.Sc. *Memorial*, M.Sc. *University of British  
Columbia*, Ph.D. *Memorial*, P.Geo.  
Ziegler, S., B.Sc.(Hons.) *Massachusetts*, Ph.D. *Texas*; Canada  
Research Chair in Environmental Science

### Associate Professors

Calon, T.J., M.Sc., Ph.D. *Leiden*  
Farquharson, C.G., B.Sc.(Hons.) *Edinburgh*, Ph.D. *University of  
British Columbia*  
Hurich, C., B.Sc., M.Sc., Ph.D. *Wyoming*  
Layne, G.D., B.Sc.(Hons.), Ph.D. *Toronto*, P.Geo.  
Leitch, A., B.Sc.(Hons.), Ph.D. *Australian National*  
Malcolm, A.E. B.Sc.(Hons.) *University of British Columbia*, Ph.D.  
*Colorado School of Mines*; Chevron Industrial Research Chair in  
Reservoir Characterization  
Mason, R.A., B.Sc.(Hons.) *London*, Ph.D. *Aberdeen*  
Morrill, P. B.Sc.(Hons.), Ph.D. *Toronto*

### Assistant Professors

Beranek, L.P., B.S. *Wisconsin-Eau Claire*, M.S. *Idaho State*, Ph.D.  
*University of British Columbia*  
Cheng, T., B.E. *Tsinghua University*, M.C.E., Ph.D. *Delaware*

### Adjunct Professors

Abedin, J., B.Sc.Ag.(Hons), M.Sc.Ag. *Bangladesh Agricultural  
University*, Ph.D. *University of Aberdeen*  
Callow, R., M.EarthSci., D.Phil. *Oxford*  
Fonkwe, M., B.Sc., M.Sc. *University of Yaoundé*, Ph.D. *University  
of Würzburg*  
Kerr, A., B.Sc. *University of Southampton*, M.Sc., Ph.D. *Memorial*

Van Staal, C., B.Sc. *Free University of Amsterdam*, M.Sc. *Free University of Amsterdam and Delft University of Technology*, Ph.D. *University of New Brunswick*

#### Manager of Academic Programs

Miskell, M., B.Sc.(Hons.) *Memorial*

#### Research Computing Specialist

Smith, D., B.A., B.Sc.(Hons.) *Memorial*

#### Laboratory Coordinator and Instructor

Hicks, R., M.Sc. *Dalhousie*

### Department of Mathematics and Statistics

www.mun.ca/math

#### Head

Radford, C., B.Sc., Ph.D. *Sydney*

#### Professores Emeriti

Booth, P.I., B.Sc., M.Sc., Ph.D., *Hull*; Winner of the Dean of Science Distinguished Scholar Medal, 1996  
 Brunner, H., M.A., Ph.D., E.T.H. *Zurich*; University Research Professor, Awarded 1994; Canadian Mathematical Society's David Borwein Distinguished Career Award, Awarded 2008  
 Heath, P.R., B.Sc., Ph.D. *Hull*, DBS *Durham*, MTS *Queen's*  
 Shawyer, B.L.R., B.Sc., Ph.D. *St. Andrews*

#### Honorary Research Professors

Goodaire, E.G., B.Sc. *Toronto*, Ph.D. *University of British Columbia*  
 Parmenter, M.M., B.Sc. *Toronto*, Ph.D. *Alberta*  
 Sutradhar, B., M.Sc., Ph.D. *Western Ontario*

### Mathematics

#### Professors

Bahturin, Y., D.Sc., Ph.D. *Moscow*, University Research Professor, Awarded 2002  
 Booth, I., B.Sc. *Memorial*, M.Sc., Ph.D. *Waterloo*; Cross appointment to Department of Physics and Physical Oceanography  
 Haynes, R.D., B.Sc. *Memorial*, M.Sc., Ph.D. *Simon Fraser*  
 Kocabiyik, S., B.Sc., M.Sc. *Middle East Tech.*, Ph.D. *Western Ontario*; Petro-Canada Young Innovators Award, 2000  
 Merkli, M., Diploma in Theoretical Physics, *EPF Lausanne*, Ph.D. *Toronto*; Recipient of the President's Award for Outstanding Research 2010-2011  
 Ou, C.H., B.A. *Peking*, Ph.D. *Hong Kong*  
 Pike, D., B.Math. *Waterloo*, MAM, Ph.D., *Auburn*, FTICA; Cross appointment to Department of Computer Science  
 Shalaby, N.A.I., M.A. *York*, Ph.D. *McMaster*  
 Summers, D., B.Sc., Ph.D. *London*, F.I.M.A. (U.K.), FRSC; University Research Professor, Awarded 2000  
 Xiao, J., M.Sc. *Hunan*, Ph.D. *Peking*; University Research Professor, Awarded 2011  
 Yuan, Y., B.Sc. *Wuhan*, M.Sc. *Central South Univ. of Tech.*, Ph.D. *Western Ontario*; UFA 2004  
 Zhao, X., B.S., M.S. *Northwest*, Ph.D. *Academia Sinica*; University Research Professor, Awarded 2008  
 Zhou, Y., B.Sc. *Hunan Normal*, M.Sc. *Beijing Normal*, Ph.D. *University of British Columbia*

#### Associate Professors

Alam, J., B.Sc., M. Sc. *Chittagong*, M.Sc., *Alberta*, Ph.D., *McMaster*  
 Dyer, T.D., B.Sc.(Hon.) *Memorial*, M.Sc., Ph.D. *Simon Fraser*  
 Foster, A., B.Sc., Ph.D. *Dalhousie*, M.Math *Waterloo*; Associate Dean (Administration and Undergraduate)  
 Kondratieva, M., M.Sc. *Moscow Inst. of Electronics & Math*, Ph.D. *Tomsk State*; Joint appointment with Faculty of Education  
 Kotchetov, M., M.Sc. *Moscow State (Lomonosov)*, Ph.D. *Memorial*, Cand. Sc. *Moscow State*  
 MacLachlan, S., B.Sc.(Hons.) *University of British Columbia*, Ph.D. *Colorado at Boulder*  
 Mantyka, S., B.A., M.B.A. *Sask.*, M.Math., Ph.D. *Waterloo*  
 Suvak, J.A., B.S. *St. Martin's College*, M.S., Ph.D. *Arizona*

#### Assistant Professors

Baird, T.J., B.Sc. *Queen's*, Ph.D. *Toronto*  
 Bhilo, A., M.Sc., Ph.D. *University Vienna*  
 Hurford, A., B.Sc. *Fairfield*, M.Sc. *Alberta*, Ph.D. *Queen's*; Joint appointment with Department of Biology  
 Kunduri, H., B.Sc.(Hons.) *Toronto*, M.Math., Ph.D. *Cambridge*

Martinez-Pedroza, E., Dipl. Math. *Los Andes*, M.Sc., Ph.D.

*Oklahoma*  
 Sommerhäuser, Y., Diploma, Ph.D. *Ludwig-Maximilians-Universität Munich*

Usefi, H., B.Sc. *AmirKabir*, M.Sc. *IASBS*, Ph.D. *Western Ontario*  
 Ye, D., B.Sc. *Shandong*, M.Sc. *Zhejiang*, Ph.D. *Case Western Reserve*

#### Visiting Assistant Professor

Sullivan, S.P., B.Sc., Ph.D. *Memorial*

#### Adjunct Professors

Charron, R., B.Sc. *New Brunswick*, M.Math. *Waterloo*, Ph.D. *New Brunswick*  
 Morgan, D., B.Sc., M.Sc. *Memorial*, Ph.D. *Alberta*  
 Tang, R., Ph.D. *Wuhan*

#### Cross-Appointment

Finnis, J., B.Sc. *Guelph*, Ph.D. *Colorado*; Assistant Professor; Cross appointment from Department of Geography

#### Laboratory Instructor

O'Rielly, G., B.Sc. *Memorial*

### Statistics

#### Professors

Fan, Z., B.Sc., M.Sc. *Shandong*, Ph.D. *Gottingen*  
 Loredo-Osti, J.C., B.Sc., M.Sc. *Universidad Autonoma*, Ph.D. *Dalhousie*, Graduate Officer

#### Associate Professors

Oyet, A., B.Sc., M.Sc. *Fed. U. of Tech.*, Ph.D. *Alberta*  
 Variyath, A., B.Sc., *Calicut*, M.Sc. *Kerala Agricultural*, Post Graduate Diploma *Indian Statistical Institute*, Ph.D. *Waterloo*  
 Wang, H., B.Sc. *Beijing Normal*, Ph.D. *Regina*

#### Assistant Professors

Abarin, T., B.Sc., M.Sc. *Shiraz*, Ph.D. *Manitoba*  
 Cigsar, C., B.Sc., M.Sc. *Middle East Technical University*, Ph.D. *Waterloo*  
 Yilmaz, Y., B.Sc., M.Sc.(Statistics) *Middle East Technical University*, Ph.D. *Waterloo*; Joint and Cross appointments with Genetics and Medicine

#### Cross-Appointments

Cadigan, N., B.Sc., MAS *Memorial*, Ph.D. *Waterloo*; Cross appointment from Marine Institute  
 Gadag, V., B.Sc., M.Sc. *Karnatak*, M.Phil., Ph.D. *Poona*; Professor of Biostatistics, Cross appointment from Department of Health Statistics and Health Information Systems  
 Yi, Y., B.Sc., *Hunan Normal*, M.Sc., *Changsha College*, M.Sc., Ph.D. *Manitoba*; Assistant Professor of Biostatistics; Cross appointment from Division of Community Health and Humanities

### Department of Ocean Sciences

www.mun.ca/osc

#### Head

Fletcher, G.L., B.Sc. *University of British Columbia*, Ph.D. *California*; Professor Emeritus

#### Professors

Abrahams, M., B.Sc. *Western*, M.Sc. *Queen's*, Ph.D. *Simon Fraser*, Dean of Science  
 Deibel, D.R., B.Sc. *Bucknell*, Ph.D. *Georgia*; Recipient of the President's Award for Outstanding Research, 1990; Professor (Research); Cross appointment with Department of Biology  
 Driedzic, W.R., B.Sc. *York*, M.Sc. *Toronto*, Ph.D. *University of British Columbia*; Tier I Canada Research Chair in Marine Bioscience; Cross appointment with Department of Biology  
 Fleming, I.A., B.Sc. *Queen's*, M.Sc. *Simon Fraser Univ.*, Ph.D. *Univ. of Toronto*; Cross appointment with Department of Biology  
 Gamperl, A.K., B.Sc., M.Sc. *Guelph*, Ph.D. *Dalhousie*; Cross appointment with Department of Biology  
 Parrish, C.C., B.Sc. *Wales*, Ph.D. *Dalhousie*; Recipient of the President's Award for Outstanding Research 1995-1996; Professor (Research); University Research Professor, Awarded 2013; Cross appointment with Department of Biology  
 Rivkin, R.B., B.Sc., M.Sc. *City College, New York*, Ph.D. *Rhode Island*; University Research Professor, Awarded 2007-2012  
 Schneider, D.C., B.Sc. *Duke*, Ph.D. *SUNY, Stony Brook*; Cross appointment with Department of Biology; Recipient of the President's Award for Outstanding Graduate Student

Supervision, 2012-2013

Snelgrove, P.V.R., B.Sc. *Memorial*, M.Sc. *McGill*, Ph.D. *Massachusetts/Woods Hole*; Joint appointment with Department of Biology; University Research Professor, Awarded 2015  
 Wroblewski, J.S., B.Sc. *Illinois*, M.Sc., Ph.D. *Florida State*; Cross appointment with Department of Biology

#### Associate Professors

Gagnon, P., B.Sc., Ph.D. *Laval*; Cross appointment with Department of Biology  
 McGaw, I., B.Sc., Ph.D. *Wales-Bangor*; Cross appointment with Department of Biology  
 Mercier, A., B.Sc. *Sherbrooke*, M.Sc., Ph.D. *Québec à Rimouski*; Cross appointment with Department of Biology; Academic Program Officer and Deputy Head  
 Rise, M., M.Sc. *Boston College*, Ph.D. *Victoria*; Tier II Canada Research Chair in Marine Biotechnology; Cross appointment with Department of Biology; Graduate Officer

#### Assistant Professor

Santander, J.A., B.Sc. *Universidad Católica del Norte, Chile*, M.Sc. *Pontificia Universidad Católica de Valpariso, Chile*, Ph.D. *Arizona State University, Arizona*

#### Adjunct Professors

Bradbury, I., Ph.D. *Dalhousie*; Research Scientist, Department of Fisheries and Oceans  
 Cote, D., M.Sc. *Wilfrid Laurier*, Ph.D. *Waterloo*; Terra Nova National Park  
 Dixon, B., B.Sc. *Wilfrid Laurier*, M.Sc. *Guelph*, Ph.D. *Waterloo*  
 Eaves, A.A., B.Sc., M.Sc. *University of Victoria*, Ph.D. *University of Alberta*  
 Farrell, T., Ph.D. *University of British Columbia*; Research Scientist, University of British Columbia. Vancouver  
 Hale, M., B.Sc., Ph.D. *Flinders*; Senior Lecturer, University of Portsmouth  
 Lawton, P., B.Sc. *University of Bradford*, Ph.D. *University of Wales*  
 McKenzie, C., B.Sc., Ph.D. *Texas A&M*; Research Scientist, Department of Fisheries and Oceans  
 Morris, C., Ph.D. *Memorial*; Research Scientist. Department of Fisheries & Oceans  
 O'Reilly, P., B.Sc., M.Sc. *Alberta*, Ph.D. *Dalhousie*; Research Scientist, Department of Fisheries and Oceans, Nova Scotia  
 Pepin, P., B.Sc. *McGill*, Ph.D. *Dalhousie*; Northwest Atlantic Fisheries Centre, Department of Fisheries and Oceans

#### Cross-Appointed Faculty

Favaro, B., B.Sc., Ph.D. *Simon Fraser*; Research Scientist, Marine Institute  
 Purchase, C., B.Sc., M.Sc. *Memorial*, Ph.D. *Toronto*  
 Rowe, S., B.Sc., M.Sc. *Memorial*, Ph.D. *Dalhousie*  
 Shahidi, F., B.Sc. *Shiraz*, Ph.D. *McGill*, University Research Professor, Awarded 1998; Professor, Department of Biochemistry

#### Post-Doctoral Fellows

Anderson, T., Ph.D. *Aarhus University, Denmark*  
 Connelly, T., B.Sc. *Bucknell University*, M.Sc. *Florida State University*, Ph.D. *Memorial*  
 Mayor, S., B.Sc. *Trent University*, M.Sc. *Memorial*, Ph.D. *University of Alberta*  
 Solares, A.C., M.Sc., Ph.D. *Universitat de Barcelona*  
 Speers-Roesch, B., B.Sc., M.Sc. *University of Guelph*, Ph.D. *University of British Columbia*

#### Research Assistants

Jones, D., B.Sc. *Saskatchewan*  
 Shears, M., B.Sc. *University of New Brunswick*, Ph.D. *Memorial*  
 Short, C., B.Sc., M.Sc. *Memorial*  
 Vickers, C., Dip.Tech. *Marine Institute*

#### Research Marketing Manager

Nichols, D., B.Sc. *Memorial*

### Department of Physics and Physical Oceanography

[www.mun.ca/physics](http://www.mun.ca/physics)

#### Head

Lagowski, J.B., B.Sc. *Manitoba*, M.Sc., Ph.D. *Toronto*; Professor

#### Professores Emeriti

Cho, C.W., B.Sc. *Seoul*, M.A., Ph.D. *Toronto*  
 Clouter, M.J., M.Sc. *Memorial*, Ph.D. *Toronto*; University Research Professor, Awarded 2000  
 Gien, T.T., Lic. és Sc. *Saigon*, M.Sc., Ph.D. *Ohio*; University Research Professor, Awarded 2001  
 Rochester, M.G., M.A. *Toronto*, Ph.D. *Utah*, FRSC; University Research Professor, Awarded 1986; Cross appointment from Department of Earth Sciences

#### Honorary Research Professors

Lewis, J.C., B.Sc., M.Sc. *Carenton*, Ph.D. *Toronto*  
 Whitehead, J.P., B.Sc. *St. Andrew's*, Ph.D. *Alberta*

#### Professors

Afanassiev, I., Ph.D. *P.P. Shirshov Institute of Oceanology, Russian Acad.*, M.Sc. *Moscow Physical-Technical University*  
 Chen, Q., B.Sc. *Shanghai Jiao Tong University China*, M.Sc., Ph.D. *Shanghai Institute of Optics and Fine Mechanics, China*  
 Curnoe, S.H., B.Sc. *Toronto*, Ph.D. *University of British Columbia (NSERC UFA)*; Recipient of the President's Award for Outstanding Research, 2005-2006  
 de Young, B., B.Sc., M.Sc. *Memorial*, Ph.D. *University of British Columbia*; Appointed to Robert A. Bartlett Professorship in Oceanography; Recipient of the President's Award for Outstanding Research, 1997-1998  
 Morrow, M.R., B.Sc. *McMaster*, M.Sc., Ph.D. *University of British Columbia*  
 Plumer, M., B.Sc. *St. Francis Xavier*, M.Sc. *Dalhousie*, Ph.D. *Toronto*  
 Poduska, K., B.A. *Carleton College*, M.S., Ph.D. *Cornell*; Cross appointment with Department of Chemistry  
 Quirion, G., B.Sc., M.Sc., Ph.D. *Sherbrooke*  
 Zedel, L., B.Sc., M.Sc. *Victoria*, Ph.D. *University of British Columbia*; Petro-Canada Young Innovators Award, Awarded 2001

#### Associate Professors

Andrews, G.T., B.Sc., M.Sc., Ph.D. *Memorial*  
 Beaulieu, L., B.Sc. *University of Ottawa*, M.Sc., Ph.D. *Dalhousie*; Petro Canada Young Innovators Award, Awarded 2008  
 Demirov, E., M.Sc., Ph.D. *University of St. Petersburg, Russia*  
 Saika-Voivod, I., B.Sc.(Hons.), Ph.D. *University of Western Ontario*  
 Tarasov, L., B.Sc. *Guelph*, M.Sc., Ph.D. *Toronto*; CRC Glacial Dynamics Modelling  
 Yethiraj, A., B.Sc. *Bombay (St. Xavier's College)*, M.Sc. *Houston*, Ph.D. *Simon Fraser*; Recipient of the President's Award for Outstanding Research 2008-2009

#### Assistant Professors

Evstigneev, M., B.Sc., Ph.D. *York*  
 Munroe, J.R., B.Math.(Hons.), M.Math *Waterloo*, Ph.D. *Alberta*  
 Wallin, S., M.Sc., Ph.D. *Lund University*

#### Visiting Assistant Professor

Harlick (Polomska), A., B.Sc. *Adam Mickiewicz*, M.Sc., Ph.D. *Memorial*

#### Adjunct Professors

Barkanova, S., B.Sc., M.Sc. *University of Latvia*, Ph.D. *University of Manitoba*  
 Davidson, F., B.Sc. *Ottawa*, M.Sc., Ph.D. *Memorial*  
 Han, G., B.S., M.S., Ph.D. *Hohai University*  
 Poole, P., B.Sc. *St. Francis Xavier University*, M.A., Ph.D. *Boston University*

#### Cross-Appointments

Aleksejevs, A., B.Phys.(Hons.), M.Phys. *Latvia*, Ph.D. *Manitoba*  
 Booth, I., B.Sc.(Hons.) *Memorial*, M.Sc., Ph.D. *University of Waterloo*; Cross appointment from Department of Mathematics and Statistics  
 Booth, V., B.Sc. *Victoria*, M.Sc. *Waterloo*, Ph.D. *Toronto*; Cross appointment from Department of Biochemistry

## 1 The Memorial University of Newfoundland Code

The attention of all members of the University community is drawn to the section of the University Calendar titled **The Memorial University of Newfoundland Code**, which articulates the University's commitment to maintaining the highest standards of academic integrity.

## 2 Student Code of Conduct

Memorial University of Newfoundland expects that students will conduct themselves in compliance with University Regulations and Policies, Departmental Policies, and Federal, Provincial and Municipal laws, as well as codes of ethics that govern students who are members of regulated professions. The *Student Code of Conduct* outlines the behaviors which the University considers to be non-academic misconduct offences, and the range of remedies and/or penalties which may be imposed. Academic misconduct is outlined in **UNIVERSITY REGULATIONS - Academic Misconduct** in the University Calendar.

For more information about the *Student Code of Conduct*, see [www.mun.ca/student/conduct](http://www.mun.ca/student/conduct).

## 3 Faculty Description

The Faculty of Science encompasses nine academic departments: Biochemistry, Biology, Chemistry, Computer Science, Earth Sciences, Mathematics and Statistics, Ocean Sciences, Physics and Physical Oceanography, and Psychology. Each, except for the Department of Ocean Sciences, offers programs leading to general and honours degrees. A number of specialized and joint (double major) programs are also offered, as well as Bachelor of Science degree programs delivered by the Departments of Geography and Economics. Selected students can complete the first two years of Acadia University's Bachelor of Science in Nutrition (Dietetics option)

at Memorial University of Newfoundland. In addition to educational programs, research is a most important aspect of the Faculty of Science. As such, the Faculty is in a position to generate new knowledge by the pursuit of high quality research and to foster economic development through cooperative research and technology transfer with the private sector. The Faculty of Science is the scientific training ground for all undergraduates at the University. Memorial University of Newfoundland's science graduates are in demand by science-based industries throughout the country. Our Faculty excels in research and in its commitment to effective teaching and delivery of quality educational programs.

Additional information regarding the Faculty of Science is available at [www.mun.ca/science](http://www.mun.ca/science).

Information regarding the Centre for Earth Resources Research (CERR) and the Ocean Sciences Centre (OSC) is available under **General Information, Centre for Earth Resources Research (CERR)**, and **General Information, Ocean Sciences Centre**, respectively.

## 4 Bachelor of Science in Nutrition (Dietetics Option), Memorandum of Understanding (MOU) between Memorial University of Newfoundland and Acadia University

Program Coordinator: B. Walters, Department of Biochemistry

### 4.1 General Information

Under the terms of a Memorandum of Understanding (MOU) between Memorial University of Newfoundland and Acadia University, selected students are able to complete the first two years of Acadia University's Bachelor of Science in Nutrition (Dietetics option) at Memorial University of Newfoundland and complete the final two years of the program at Acadia University. Selection for this program is competitive and is limited to ten qualified students each year. Upon successful completion of all degree requirements students will graduate with the degree of Bachelor of Science in Nutrition (Dietetics option) from Acadia University.

For detailed information about the Memorial University of Newfoundland component of the program, and for information about the selection process and deadlines, contact the Office of the Dean of Science by e-mail at [science@mun.ca](mailto:science@mun.ca) or by telephone at (709) 864-8153 or (709) 864-8154.

For detailed information about the Acadia University program, contact Acadia University in writing to the School of Nutrition and Dietetics, Acadia University, P.O. Box 68, 12 University Avenue, Wolfville, Nova Scotia, Canada B4P 2R6, or by telephone at (902) 585-1366, or by e-mail at [nutr@acadiau.ca](mailto:nutr@acadiau.ca), or through the website at [nutrition.acadiau.ca/](http://nutrition.acadiau.ca/).

### 4.2 Admission Regulations

1. Students who are interested in pursuing this program must first complete 30 credit hours from the prescribed courses from the **Memorial University of Newfoundland Courses** list below.
2. In the Winter semester, normally at the end of a student's first year at Memorial University of Newfoundland, a selection competition will be held. Only those students who are selected will be eligible to continue into the second year of the program at Memorial University of Newfoundland.
3. The selection process will be jointly administered by Memorial University of Newfoundland and by Acadia University.
4. Academic achievement will be a significant criterion used for selection and students may be asked to attend an interview.
5. The letter of acceptance will give the selected applicant 14 days from the date of the letter in which to confirm acceptance of their place in the program.
6. To continue on to Acadia University, the selected students must successfully complete the 17 courses, 51 credit hours from the **Memorial University of Newfoundland Courses** and the 3 courses, 9 credit hours from the **Acadia University Courses** lists below required by the MOU with a minimum 60% overall average. A grade of 60% (Acadia University equivalent grade of C-) is required in each of the three individual Nutrition courses taken through Open Acadia at [www.openacadia.ca](http://www.openacadia.ca), the distance education unit of Acadia University.

### 4.3 Continuance Regulations

Students who successfully complete the first two years of the program at Memorial University of Newfoundland as described below will transfer to Acadia University where the final two years will be completed.

#### 4.3.1 Memorial University of Newfoundland Courses

Under the terms of the MOU, the following 17 courses, 51 credit hours at Memorial University of Newfoundland must be completed with a minimum 60% overall average before being admitted to the third year of Acadia University's program:

1. Biology 1001
2. Chemistry 1010, 1011 (or Chemistry 1200, 1001)
3. Chemistry 2440
4. English 1080, 1110 (or equivalent)
5. Mathematics 1090 and 1000 (or Mathematics 1000 and one elective)
6. Pharmacy 2002, 2003, and 2004 or Biochemistry 2101 (only students who are selected for this program will be permitted to register for these Pharmacy courses)
7. Psychology 1000, 1001
8. Statistics 2500, 2501
9. Two Humanities and Social Sciences electives

### 4.3.2 Acadia University Courses

To continue to the third year of Acadia University's program, the selected students must successfully complete 20 courses, 60 credit hours comprised of the 17 courses, 51 credit hours from the **Memorial University of Newfoundland Courses** list above and the 3 courses, 9 credit hours from the **Acadia University Courses** list below. This is required by the MOU and students must obtain a minimum 60% overall average. A grade of 60% (Acadia University equivalent grade of C-) is required in each of the three individual Nutrition courses taken through Open Acadia at [www.openacadia.ca](http://www.openacadia.ca), the distance education unit of Acadia University.

Nutrition 1313  
Nutrition 1323  
Nutrition 2323

### 4.3.3 Internship

In order to be eligible to apply for internship placements administered by the Acadia Dietetic Internship Program, students must obtain a grade of at least B- (70-72) in the two courses Nutrition 2503 and 2513. This requirement does not apply for other non-Acadia internships for which all students are eligible to apply.

### 4.3.4 Programs Tables

The following tables present a schedule for completing the course requirements at Memorial University of Newfoundland.

**For Students Who Complete Mathematics 1090 in Their First Semester**

Term	Suggested Courses
<b>Fall</b> Semester 1	Biology 1001 Chemistry 1010 or 1200 English 1080 Mathematics 1090 Psychology 1000
<b>Winter</b> Semester 2	Chemistry 1011 or 1001 English 1110 (or equivalent) Mathematics 1000 NUTR 2323 through Acadia Online at <a href="http://www.openacadia.ca">www.openacadia.ca</a> Psychology 1001
<b>Fall</b> Semester 3	Humanities and Social Sciences Elective Chemistry 2440 NUTR 1313 through Acadia Online at <a href="http://www.openacadia.ca">www.openacadia.ca</a> Pharmacy 2002 Statistics 2500
<b>Winter</b> Semester 4	Humanities and Social Sciences Elective NUTR 1323 through Acadia Online at <a href="http://www.openacadia.ca">www.openacadia.ca</a> Pharmacy 2004 (or Biochemistry 2101) Pharmacy 2003 Statistics 2501

**For Students Who Complete Mathematics 1000 in Their First Semester**

Term	Suggested Courses
<b>Fall</b> Semester 1	Biology 1001 Chemistry 1010 English 1080 Mathematics 1000 Psychology 1000
<b>Winter</b> Semester 2	Chemistry 1011 English 1110 (or equivalent) NUTR 2323 through Acadia Online at <a href="http://www.openacadia.ca">www.openacadia.ca</a> Psychology 1001 Statistics 2500
<b>Fall</b> Semester 3	Humanities and Social Sciences Elective Chemistry 2440 NUTR 1313 through Acadia Online at <a href="http://www.openacadia.ca">www.openacadia.ca</a> Pharmacy 2002 Statistics 2501
<b>Winter</b> Semester 4	Humanities and Social Sciences Elective Elective NUTR 1323 through Acadia Online at <a href="http://www.openacadia.ca">www.openacadia.ca</a> Pharmacy 2004 (or Biochemistry 2101) Pharmacy 2003

- Notes: 1. Statistics 2501 is offered on campus in the Fall semester and normally is offered only by distance education in the Winter semester.  
2. While students are strongly encouraged to complete Nutrition 2323 in the first year, they can substitute an Humanities and Social Sciences elective for Nutrition 2323 in the first year but must then complete Nutrition 2323 in the second year.  
3. All three Open Acadia courses must be completed prior to starting courses at Acadia.

## 5 Joint Programs

Course descriptions are found at the end of the Faculty of Science section under **Course Descriptions**.

The following joint programs are offered by Departments in the Faculty of Science, and the regulations for each program are joint Departmental Regulations. For convenience of reference the joint programs are listed below in alphabetical sequence: Joint Honours, Joint Majors, and Joint Options.

### 5.1 Joint Honours

A student who wishes to be admitted to any of the Honours programs must submit an "Application for Admission to Honours Program Faculties of Humanities and Social Sciences or Science". This form is available at [www.mun.ca/regoff/Application\\_Honours\\_Program.pdf](http://www.mun.ca/regoff/Application_Honours_Program.pdf).

#### 5.1.1 Applied Mathematics and Chemistry Joint Honours (B.Sc. Only)

The following courses are required:

1. English 1080 and English 1110 (or equivalent).
2. A computing course. Computer Science 1510 is recommended.
3. Biochemistry 2101 or Chemistry 3410.
4. Physics 1050 (or 1020) and 1051 (or 1021).
5. Mathematics 1000, 1001, 2000, 2050, 2051, 2130, 2260, 3000, 3001, 3132, 3161, 3202, 3210, 4160.
6. Chemistry 1050 and 1051 (or 1010, 1011 and the former 1031) (or 1200 and 1001), 2100, 2210, 2301, 2302, 2400, 2401, 3110, 3210 or 3211, 3303.
7. Six additional credit hours chosen from courses numbered 3000 or higher that are offered by the Department of Chemistry.
8. Mathematics 419A/B or Chemistry 490A/B.
9. A sufficient number of elective courses to bring the degree up to a total of 120 credit hours.

#### 5.1.2 Applied Mathematics and Physics Joint Honours

The following courses are required:

1. English 1080 and English 1110 (or equivalent).
2. A computing course. Computer Science 1510 is recommended.
3. Six credit hours in a science other than Mathematics or Physics (if Computer Science is chosen then Computer Science 1510 may be counted as three of these hours).
4. Mathematics 1000, 1001, 2000, 2050, 2051, 2260, 3000, 3001, 3132, 3202, 3210,.
5. At least one of Mathematics 2130 or Mathematics 2320.
6. Physics 1050 (or 1020), 1051, 2053, 2055, 2750 (or 2056), 2820, 3220, 3230, 3400, 3500, 3750.
7. Three additional credit hours chosen from courses numbered 3000 or higher that are offered by the Department of Physics and Physical Oceanography.
8. Mathematics 3161 and Mathematics 4160, or Physics 3820 and Physics 4820.
9. Physics 490A/B or Mathematics 419A/B.
10. Twelve additional credit hours chosen from courses numbered 4000 or higher that are offered by the Department of Mathematics and Statistics or the Department of Physics and Physical Oceanography. At least 3 credit hours must be selected in each of Applied Mathematics and Physics.
11. A sufficient number of elective courses to bring the degree to a total of 120 credit hours.

The topic for the Honours project or thesis, Mathematics 419A/B or Physics 490A/B must be chosen with the prior approval of both departments.

#### 5.1.3 Biochemistry and Cell Biology Joint Honours

Students must have at least an overall average of 65% in English 1080 and 1110 (or equivalent), Mathematics 1000 and 1001, Biology 1001 and 1002, Chemistry 1050 and 1051 (or 1200 and 1001), Physics 1050 (or 1020), and 1051 (or 1021).

The following courses, including prerequisites where applicable, will be required.

1. Biochemistry 2101, 3105, 3106, 3107, 3108, either 4210 or 4211, 12 credit hours chosen from 4002, 4101, 4102, 4103, 4104, 4105, 4200, 4201, 4230-4249.
2. Biology 2060, 2250, 2600, 2900, 3050 and 9 credit hours chosen from 3500, 3530, 3620, 4000, 4200, 4241. In addition, further Biology courses at the 2000, 3000, or 4000 level must be selected by the student to make up a minimum of 42 credit hours in Biology including Biology 1001 and 1002 but not including Biology 499A or 499B.
3. Either Medicine 310A/B, or Biology 3401 plus one of Biology 3402, 4245 or 4404.
4. Chemistry 2100, 2301, 2400, 2401; either 3410 or 3411.
5. Statistics 2550 or equivalent.
6. An Honours Dissertation (Biology 499A/499B or Biochemistry 499A/499B).
7. Other courses to complete the prescribed minimum of 135 credit hours in courses for the Joint Honours Degree.

Note: Students may count only one of the two courses, Biochemistry 4105 or Biology 4200, for credit in this program.

The topic of the Honours dissertation must be chosen with the approval of both Departments. A faculty member of either Department may act as supervisor.

Seventy-eight credit hours in Biology, Biochemistry and Chemistry courses beyond the first-year level from those listed in the program shall contribute to those in which a grade of "B" or an average of 75 or higher is required. Medicine 310A/B counts as Biochemistry for these seventy-eight credit hours.

### 5.1.4 Biochemistry and Chemistry Joint Honours

The following courses are required:

1. Chemistry 1050 and 1051 (or Chemistry 1010, 1011 and the former 1031) (or Chemistry 1200 and 1001), Mathematics 1000 and 1001, Physics 1050 (or 1020) and 1051 (or 1021), 6 credit hours in first year English courses. Biology 1001 and 1002 are highly recommended.
2. Mathematics 2000.
3. Chemistry 2100, 2210, 2301, 2302, 2400, 2401, 3110, 3211, 3410.
4. Nine further credit hours in Chemistry courses numbered 3000 or higher, at least 6 credit hours of which must be in courses numbered 4000 or higher.
5. Biochemistry 2100, 2101, 3105, 3106, and either 3107, 3108, or Medicine 310A/B.
6. 12 credit hours chosen from Biochemistry 4002, 4101, 4102, 4103, 4104, 4105, 4200, 4201, 4210, 4211, 4230-4249.
7. Either Chemistry 490A/B or Biochemistry 499A/B.
8. A sufficient number of elective courses to bring the degree to a total of 120 credit hours.

Note: *Students should check prerequisites for 4000 level courses before making decisions about their 3000 level courses and seek academic advice if necessary.*

### 5.1.5 Biochemistry and Physics Joint Honours

The following courses are required:

1. English 1080 and 1110 (or equivalent), Chemistry 1050 and 1051 (or Chemistry 1010, 1011, and the former 1031) (or 1200 and 1001), Mathematics 1000 and 1001, Physics 1050 (or 1020) and 1051
2. Chemistry 2400, 2401.
3. Chemistry 2301 or Physics 2053
4. Mathematics 2000, 2050, 2260, either Mathematics 3202 or Physics 3810.
5. Biochemistry 2100, 2101, 3105, 3106;
6. Either Biochemistry 3107 and 3108 or Medicine 310A/B;
7. An additional 12 credit hours to be selected from Biochemistry 4002, 4101, 4102, 4103, 4104, 4105, 4200, 4201, 4210 or 4211; 4230-4249;
8. Physics 2055, 2750 or 2056, 2820, 3220, 3400, 3500, 3750, 3820, 3900, plus one 4000 level Physics course.
9. Either Physics 490A/B or Biochemistry 499A/B.
10. Other courses to complete the prescribed minimum of 120 credit hours in courses for the Joint Honours degree.

### 5.1.6 Biochemistry and Psychology (Behavioural Neuroscience) Joint Honours

Note: *Students completing this program cannot receive credit for Psychology 2920.*

The following courses (or equivalent) are required to complete the 120 credit hours in courses required for the degree:

1. Chemistry 1050 and 1051 (or 1200 and 1001), Biology 1001 and 1002, Mathematics 1000 and 1001, Physics 1050, (or 1020), 1051 (or 1021), English 1080 and 1110.
2. Biochemistry 2100, 2101, 3105, 3106, 3107, 3108, Medicine 310A/B, either 4210 or 4211, 9 credit hours chosen from Biochemistry 4002, 4101, 4102, 4103, 4104, 4105, 4200, 4201, 4230-4249, Chemistry 4701.
3. Psychology 1000, 1001, 2520, 2910, 2911, 2930, 3250, 3800, 3820, 3900, one further courses in Psychology chosen from the following: 3050, 3100, 3350, 3450, 3620, 3650, 3750; any research experience course and one of Psychology 4250, 4251, 4850 or 4851; or, any selected topics course and one of Psychology 4270 or 4870.
4. Either Biochemistry 499A/B or Psychology 499A/B.
5. Chemistry 2301, 2400, 2401.

Notes: 1. *In accordance with Clause 6.a. of the Regulations for the Honours Degree of Bachelor of Science, Honours candidates must obtain a grade of "B" or better, or an average of 75% or higher in all the required courses listed in Clauses 2., 3. and 4. above, except those at the 1000 level.*  
2. *Students in first year intending to follow this program should note the regulations for admission to Major programs in Psychology and that the deadline for submission of a completed application form to the Department of Psychology is June 1 for the Fall semester.*

### 5.1.7 Biochemistry (Nutrition) and Psychology (Behavioural Neuroscience) Joint Honours

Note: *Students completing this program cannot receive credit for Psychology 2920.*

The following courses (or equivalent) are required:

1. Chemistry 1010 and 1011 (or 1050, 1051) (or 1200 and 1001), Biology 1001 and 1002, Mathematics 1000, Physics 1020 or 1050, and 1021 (or 1051), English 1080 and 1110.
2. Biochemistry 2100, 2101, 2600, 3106, 3203, 4002, 4300, 4301, 4502, Medicine 310A/B; one course chosen from: Biochemistry 3105, 3107, 3108, 3202, 3402, 3600, 4101, 4103, 4104, 4105, 4200, 4201, 4210, 4211, 4230-4249, Biology 3050, Chemistry 4701.
3. Psychology 1000, 1001, 2520, 2910, 2911, 2930, 3250, 3800, 3820, 3900, one further course in Psychology chosen from the following: 3050, 3100, 3350, 3450, 3620, 3650, 3750; any research experience course and one of Psychology 4250, 4251, 4850 or 4851; or, any selected topics course and one of Psychology 4270 or 4870.
4. Either Biochemistry 499A/B or Psychology 499A/B.
5. Chemistry 2400, 2401 or Chemistry 2440.
6. Other courses to complete at least the prescribed minimum of 120 credit hours in courses for the Joint Honours Degree.

Notes: 1. *In accordance with Clause 6.a. of the Regulations for the Honours Degree of Bachelor of Science, Honours candidates must obtain a grade of "B" or better, or an average of 75% or higher in all the required courses listed in Clauses 2., 3., and 4. above, except those at the 1000 level.*  
2. *Students in first year intending to follow this program should note the regulations as outlined for admission to Major programs in Psychology and that the deadline for submission of a completed application form to the Department of Psychology is June 1 for the Fall semester.*

### 5.1.8 Biology and Earth Sciences Joint Honours

The following courses, including prerequisites where applicable, will be required:

1. English 1080 and 1110 (or equivalent), Mathematics 1000 and 1001, Biology 1001 and 1002, Earth Sciences 1000 and 1002, Chemistry 1010 and 1011 (or 1050 and 1051), Physics 1020 and 1021 (or 1050 and 1051).
2. Chemistry 2440, Biochemistry 2101, Biochemistry 3106, one of Statistics 2550 or 2560.
3. Biology 2060, 2250, 2600, 2900, one of 3401, 3402, 4245 or 4404; plus Biology 3710, 3711, and 4505. In addition, further Biology courses at the 2000, 3000, or 4000 level must be selected by the student in consultation with the supervisor to make up a minimum of 42 credit hours in Biology not including Biology 499A or 499B.
4. Earth Sciences 2030, 2031, 2502, 2905; plus a minimum of 24 credit hours in other Earth Science courses from 2000 to 4000 level, at least 3 credit hours of which must be at 4000 level. Earth Sciences 2150, 2914, 2915, 2916, 2917, 2918, 4310, and 4950 cannot be used to fulfill this requirement. Career-related streams outlined in the departmental Student Handbook should be used as a guide to course selection so as to achieve a concentration in one facet of Earth Sciences.
5. An Honours dissertation (Biology 499A/B or Earth Sciences 499A/B). The topic of the Honours dissertation must be chosen with the approval of both Department Heads. A faculty member of either Department may act as supervisor.
6. Other courses to complete the prescribed minimum of 135 credit hours in courses for the Honours degree, with at least 84 credit hours in courses in Biology and Earth Sciences combined.

Any change in the program of study must have the prior approval of the Heads of the two Departments concerned.

### 5.1.9 Biology and Psychology Joint Honours

Note: *Students completing this program cannot receive credit for Psychology 2920.*

The following forty courses (or equivalent) are required:

1. Biology 1001, 1002, 2060, 2250, 2600, 2900; one of 3401, 3402, 4245, 4404; four Biology electives at the 2000, 3000 or 4000 level not including Biology 499A or 499B.
2. Psychology 1000, 1001, 2520, 2910, 2911, 2930, 3250, 3800; 3900, 4910; one of the following: 3050, 3100, 3350, 3450, 3620, 3650; one further 4000 level Psychology research experience course.
3. Biology or Psychology 3750, 4701, 499A/B.
4. English 1080 and 1110; Mathematics 1000; Chemistry 1010 and 1011 (or 1050 and 1051), and 2440; Physics 1020 (or 1050) and 1021 (or 1051); Biochemistry 2101 and 3106.
5. Other courses, if necessary, to complete at least 120 credit hours of courses.

### 5.1.10 Biology and Psychology (Behavioural Neuroscience) Joint Honours

Note: *Students completing this program cannot receive credit for Psychology 2920.*

The following forty courses (or equivalent) are required:

1. Biology 1001, 1002, 2060, 2250, 2600, 2900; one of 3401, 3402, 4245, 4404; five Biology electives at the 2000, 3000 or 4000 level not including Biology 499A or 499B.
2. Psychology 1000, 1001, 2520, 2910, 2911, 2930, 3250, 3800, 3820, 3900; one further course in Psychology chosen from the following: 3050, 3100, 3350, 3450, 3620, 3650, 3750; any research experience course and one of Psychology 4250, 4251, 4850 or 4851; or, any selected topics course and one of Psychology 4270 or 4870.
3. Biology or Psychology 499A/B.
4. Biochemistry 2101, 3106.
5. English 1080 and 1110; Mathematics 1000 and 1001; Physics 1020 (or 1050) and 1021 (or 1051); Chemistry 1010 and 1011 (or 1050 and 1051), and 2440 (or 2400 and 2401);
6. Other courses, if necessary, to complete at least 120 credit hours of courses.

Note: *In accordance with Clause 6.a. of the Regulations for the Honours Degree of Bachelor of Science, Honours candidates must obtain a grade of "B" or better, OR average of 75% or higher in all the required courses listed in Clauses 1, 2, 3, and 4 above, except those at the 1000 level.*

### 5.1.11 Biology and Statistics Joint Honours (B.Sc. Only)

See **Regulations for the Honours Degree of Bachelor of Science**. Students shall complete the following requirements:

1. Mathematics 1000 and 1001, Biology 1001 and 1002, English 1080 and 1110, Chemistry 1010 and 1011 (or 1050 and 1051), Physics 1020 and 1021, or equivalent;
2. Mathematics 2000, 2050, 2051, Statistics 2500, 2501, or 2560, 3520, 3521, 4530, and 4581;
3. nine further credit hours in Statistics courses (excluding those with second digit 0) including at least 6 credit hours in courses at the 4000 level or higher but not including Statistics 459A/B;
4. Chemistry 2440 (or 2400 and 2401), Biochemistry 2101 and 3106.
5. Biology 2060, 2250, 2600, 2900, one of 3401, 3402, 4245, or 4404. In addition, further Biology courses at the 2000, 3000 or 4000 level must be selected by the student in consultation with the supervisor to make up a minimum of 42 credit hours in Biology but not including Biology 499A or 499B.
6. Either Biology 499A/B or Statistics 459A/B.
7. A computing course. Computer Science 1510 is recommended.

### 5.1.12 Chemistry and Earth Sciences Joint Honours

The following courses, including prerequisites, where applicable, will be required:

1. English 1080 and 1110 (or equivalents), Mathematics 1000 and 1001, Earth Sciences 1000 and 1002, Chemistry 1050 and 1051 (or 1010, 1011 and the former 1031) or their equivalents, Physics 1050 (or 1020) and 1051 (or 1021).
2. Earth Sciences 2030, 2031, 2401, 2502, 2702, 2905, 3420, 3600; plus 6 additional credit hours in 3000-level Earth Sciences courses, and 9 additional credit hours in 4000-level Earth Sciences courses.
3. Chemistry 2100, 2210, 2301, 2302, 2400, 2401; plus 3211, 3303, 3410, and 3411 with the option of substituting up to 6 credit hours of these 3000-level courses with 4000-level Chemistry courses; and at least 3 additional credit hours in 4000-level Chemistry

courses.

4. Mathematics 2000 and 2050.
5. Biology 2120 (or Biology 1001 and 1002) or Biochemistry 2101.
6. An Honours Dissertation (Earth Sciences 499A/B or Chemistry 490A/B). The topic of the Honours Dissertation must have the prior approval of the Heads of the two Departments. A faculty member of either Department may act as supervisor.
7. Other courses to complete the prescribed minimum of 120 credit hours.

Any change in the program of study must have the prior approval of the Heads of the two Departments concerned.

### 5.1.13 Chemistry and Physics Joint Honours

The following courses are prescribed:

1. Mathematics 1000, 1001, 2000, 2050, 3202, and 2260.
2. Physics 1050 (or 1020) and 1051, 2055, 2750 or 2056, 2820, 3220, 3500, 3750, 3820, 3900, 4820, 3 additional credit hours in a Physics course numbered 3000 or higher and 6 additional credit hours in Physics courses numbered 4000 or higher.
3. Chemistry 1050 and 1051 (or Chemistry 1010, 1011 and the former 1031; or Chemistry 1200 and 1001), 2100, 2210, 2301 (or the former Chemistry 2300), 2302, 2400, 2401, 3210 or 3211, 3303, 3410, and 6 additional credit hours in Chemistry courses numbered 3000 or higher.
4. Either Chemistry 490A/B or Physics 490A/B.
5. A sufficient number of elective courses to bring the degree total to 120 credit hours.
6. English 1080 and English 1110 (or equivalent).

### 5.1.14 Computer Science and Geography Joint Honours (B.Sc. Only)

See **Regulations for the Honours Degree of Bachelor of Science**

#### 1. Computer Science Requirements

Forty-eight credit hours in Computer Science courses are required for the Joint Honours:

- a. 1000, 1001, 1002, 2001, 2002, 2003, 2004, 2005, 2006, 2007, 2008, 4751.
- b. Six additional credit hours in courses at the 4000 level not including 4780.
- c. Twelve additional credit hours in courses at the 3000 level or beyond.

#### 2. Geography Requirements

Forty-eight credit hours in Geography courses are required for the Joint Honours: 1050, 2001, 2102, 2195, 2226, 2302, 2425, 3202, 3222, 3226, 3250, 3260, 3303, 4202, 4250, 4261, and the former 4291.

#### 3. Additional Requirements

- a. Mathematics 1000, 1001, 2000, and 2050.
- b. An Honours Dissertation (either Computer Science 4780 or Geography 4999). The topic for dissertation must be chosen with the prior approval of the Heads of both Departments.

### 5.1.15 Computer Science and Physics Joint Honours

The following courses are prescribed:

1. Chemistry 1050 and 1051 (or Chemistry 1010, 1011, and the former 1031) (or 1200 and 1001).
2. a. Computer Science 1000, 1001, 1002, 2001, 2002, 2003, 2004, 2005, 2006, 2007, 2008, 3731.  
b. Nine additional credit hours in Computer Science courses numbered 3000 or higher, including at least 3 credit hours in courses at the 4000 level.
3. a. Physics 1050 (or 1020) and 1051.  
b. Physics 2053, 2055, 2750, 2820, 3220, 3400, 3500, 3750, 3800, and 3820.  
c. Three additional credit hours in Physics at the 4000 level.
4. Physics 490A and Physics 490B or Computer Science 4780. and 3 additional credit hours in Computer Science at the 4000 level.
5. a. Mathematics 1000 and 1001.  
b. Mathematics 2000, 2050, 2260, and 3202.
6. English 1080 and 1110 (or equivalent).
7. Two electives to bring the total credit hours to 120. Computer Science 2500 and Statistics 2550 are recommended.

### 5.1.16 Computer Science and Pure Mathematics Joint Honours (B.Sc. Only)

See **Regulations for the Honours Degree of Bachelor of Science**. Students shall complete the following:

At least 51 credit hours in Computer Science courses are required including the following:

1. Computer Science 1000, 1001, 2001, 2002, 2003, 2004, 2005, 2006, 2007, 2008.
2. Excluding 4780, 24 additional credit hours from courses numbered 3000 or higher, at least 9 credit hours of which must be in courses at the 4000 level.

The following courses in Mathematics and Statistics are required:

1. Mathematics 1000, 1001, 2000, 2050, 2051, 2130, 2260, 2320, 3000, 3001, 3202, 3210, 3320, 3340, Statistics 2550;
2. Either Mathematics 4000 or 4001;
3. Excluding the former Mathematics 3330, the former 4399, and 439A/B, 15 additional credit hours in courses offered by the Department of Mathematics and Statistics numbered 3000 or higher including at least 9 credit hours from courses numbered 4000 or higher and at least 9 credit hours in Pure Mathematics courses;
4. An Honours Dissertation in one of the departments, with the topic chosen in consultation with both departments.

Note: *There is an Undergraduate Advisor in each Department. These advisors should be consulted on all academic matters.*

### 5.1.17 Computer Science and Statistics Joint Honours (B.Sc. Only)

See **Regulations for the Honours Degree of Bachelor of Science**. The following courses are required:

1. Mathematics 1000, 1001, 2000, 2050, 2051, 2320, 3340, Statistics 1510 or 2500 or 2550, 2501 or 2560, 3410, 3411, 3520, 3521, 3540, 4530, 4590;
2. Eighteen further credit hours in Statistics courses including at least 12 credit hours in courses numbered 4000 or higher, but not including Statistics 4581 and 459A/B;
3. Computer Science 1000, 1001, 2001, 2002, 2003, 2004, 2005, 2006, 2007, 2008, 4734.
4. Twenty-one additional credit hours in Computer Science courses at the 3000 level or higher, not including 4780.
5. Either Computer Science 4780 or Statistics 459A/B.

### 5.1.18 Earth Sciences and Geography Joint Honours (B.Sc. Only)

The following courses will be required. A few prerequisites are not met by this list of courses, and students are advised to obtain advice from instructors in such cases to be sure that they are prepared for course material. Both departmental Heads can advise students on a workable sequencing of courses to complete the degree in a timely manner, and students should view a student handbook that describes thematic streams within the program and offers specific guidance about course selection.

1. English 1080 or equivalent, English 1110 or equivalent, Geography 1050, Mathematics 1000 and 1001, Earth Sciences 1000 and 1002, one of Chemistry 1010 or 1050 (or equivalent) and one of Chemistry 1011 or 1051 (or equivalent), Physics 1050 and 1051, or Physics 1020 and 1021.
2. Geography 2001 or 2302, and Geography 2102, 2195, 2226, 2425 and 3226, Earth Sciences 2401 or 2502, and Earth Sciences 2030, 2031, 2702 and 2905.
3. Mathematics 2000 or Statistics 2550 or Geography 3222, Biology 1001 and 1002, or Biology 2120 or Physics 2055.
4. Either Earth Sciences 499A and 499B, or Geography 4990 and Geography 4999.
5. At least an additional 40 credit hours from Earth Sciences and Geography, with a minimum of 16 credit hours from Earth Sciences and 18 credit hours from Geography; and a minimum of 9 credit hours at the 4000-level in each discipline. Earth Sciences 2150, 2914, 2915, 2916, 2917, 2918, 4310, and 4950 cannot be used to fulfill this requirement. Geography 2105, 2290, 2405, 2460 and 2495 cannot be used to fulfill this requirement.
6. Additional credit hours selected to conform to the **Regulations for the Honours Degree of Bachelor of Science** so as to achieve a total of 120 credit hours.

Notes: 1. *The topic of the Honours dissertation must be chosen with the approval of both Departments. A faculty member of either Department may act as supervisor.*  
 2. *Any change in the program of study must have the prior approval of the Heads of both Departments concerned.*  
 3. *The number of specified courses means that English 1110 will be taken normally in the second or third year of the program.*  
 4. *Students who do not satisfy the **Regulations for the Honours Degree of Bachelor of Science - Academic Standing**, but who successfully complete all the courses, with the exception of the Honours dissertation, and who satisfy all other requirements for the Bachelor of Science, will be eligible to receive a Bachelor of Science with a joint major in Geography and Earth Science.*

### 5.1.19 Earth Sciences and Physics Joint Honours

This program was formerly in the Earth Sciences section of the calendar as an Honours B.Sc. Degree in Geophysics. The following courses will be required:

1. English 1080 and 1110 (or equivalent), Mathematics 1000 and 1001, Earth Sciences 1000 and 1002, Chemistry 1050 and 1051 (or Chemistry 1010 and 1011) (or 1200 and 1001), Physics 1050 (or 1020) and 1051.
2. Earth Sciences 2030, 2401, 2502, 2702, 2905, 3170, 3172, 3420, 3905, 4171, 4173, 4179.
3. Physics 2055, 2750 or 2056, 2820, 3220, 3230, 3500, 3820, 4820; plus 9 other credit hours in Physics courses at 3000 level or higher.
4. Mathematics 2000, 2050, 2260, and 3202.
5. Either Earth Sciences 499A/B or Physics 490A/B.
6. Other courses to complete at least a minimum of 120 credit hours.

Any change in the program of study must have the prior approval of the Heads of the two Departments concerned.

### 5.1.20 Geophysics and Physical Oceanography Joint Honours

The program requires the following courses:

1. English 1080 and 1110 (or equivalent), Chemistry 1050 and 1051 (or Chemistry 1010, 1011, and the former 1031), Mathematics 1000 and 1001, Earth Sciences 1000 and 1002, Physics 1050 (or 1020) and 1051.
2. Earth Sciences 2905, 3170, 3172, 4105, 4171, 4173, 4179 and 10 credit hours at the 2000 level or higher with at least 3 credit hours at the 3000 level.
3. Physics 2053, 2055, 2820, 3220, 3300, 3500, 3820, 4205, 4300, 4330, 4820 plus one of Physics 3600, 3150, 3400, 3550 or 3900.
4. Mathematics 2000, 2050, 2051, 2260, and 3202.
5. Either Earth Sciences 499A and 499B or Physics 490A and 490B.
6. Other courses to complete the prescribed minimum of 120 credit hours.

### 5.1.21 Pure Mathematics and Statistics Joint Honours

See **Regulations for the Honours Degree of Bachelor of Science**. The following courses are required:

1. Mathematics 1000, 1001, 2000, 2050, 2051, 2130, 2260, 2320, 3000, 3001, 3202, 3210, 4000, Statistics 1510 or 2500 or 2550, 2501 or 2560, 3410, 3411, 3520, 3521, 4402, 4410, 4530;
2. A computing course early in the program is required. Computer Science 1510 is highly recommended;
3. either Mathematics 439A/B or Statistics 459A/B;
4. one of: Mathematics 3331 or 3340;
5. Eighteen further credit hours in Pure Mathematics and/or Statistics courses numbered 3000 or higher, excluding the former

Mathematics 3330, of which at least 12 credit hours must be from courses numbered 4000 or higher excluding Statistics 4581.

## 5.2 Joint Majors

### 5.2.1 Applied Mathematics and Computer Science Joint Major (B.Sc. Only)

The following courses are required

1. Computer Science 1000, 1001, 2001, 2002, 2003, 2004, 2005, 2006, 2007, 2008, plus 18 further credit hours in Computer Science courses numbered 3000 or higher.
2. Mathematics 1000, 1001, 2000, 2050, 2051, 2130, 2260, 2320, 3000, 3100, 3132, 3161, 3202, 4160, 4190, plus one of Mathematics 3210, 4131, 4132, 4162.

In addition, Statistics 2550 is highly recommended.

### 5.2.2 Applied Mathematics and Economics Joint Major (B.Sc. Only)

1. Mathematics 1000, 1001, 2000, 2050, 2051, 2130, 2260, 3000, 3100, 3202, 4132, Statistics 2550.
2. Either Mathematics 3132 and 4131 or 3161 and 4160.
3. A computing course early in the program is required. Computer Science 1510 is highly recommended.
4. Economics: 2010, 2020, 2550, 3000, 3001, 3010, 4550, 4551.
5. Eighteen further credit hours chosen from among the various Economics courses in consultation with the Head of the Department or delegate, including at least 9 credit hours at the 4000 level.

### 5.2.3 Applied Mathematics and Physics Joint Major (B.Sc. Only)

Required course for this degree are:

1. English 1080 and English 1110 (or equivalent).
2. A computing course. Computer Science 1510 is recommended.
3. Six credit hours in science other than Mathematics or Physics (if Computer Science is chosen then Computer Science 1510 may be counted as 3 of these hours).
4. Mathematics 1000, 1001, 2000, 2050, 2051, 2260, 3000, 3001, 3132, 3202.
5. At least one of Mathematics 2130 or Mathematics 2320.
6. Physics 1050 (or 1020), 1051, 2053, 2055, 2750 (or 2056), 2820, 3220, 3400, 3500, 3750.
7. Mathematics 3161 or Physics 3820.
8. At least 15 additional credit hours chosen from Applied Mathematics and Physics courses numbered 3000 or above. At least 3 hours are required from Applied Mathematics and 6 hours are required from Physics.
9. A writing course. Any one of Mathematics 2130, Physics 3900, Mathematics 419A/B, or Physics 490A/B is acceptable.

The last requirement does not have to be met independently of the other regulations. For example, it can be satisfied either by choosing Mathematics 2130 from clause 5. above or choosing Physics 3900 as a 3000+ elective in clause 8. above.

### 5.2.4 Computer Science and Economics Joint Major (B.Sc. Only)

#### 1. Computer Science Requirements

Forty-two credit hours in Computer Science courses are required: 1000, 1001, 1002, 2001, 2002, 2003, 2004, 2005, 2006, 2007, 2008, 2500, 3731, 3753 plus 6 further credit hours in Computer Science courses numbered 3000 or higher.

#### 2. Economics requirements

A total of 42 credit hours in Economics courses are required: 2010, 2020, 2550, 3000, 3001, 3010, and 6 credit hours from either 3550 and 3551, or 4550 and 4551 are obligatory.

The remaining 18 credit hours shall be chosen from among the various Economics courses in consultation with the Head of the Department or delegate, and will include at least 9 credit hours in courses at the 4000 level.

3. **Additional Requirements:** Mathematics 1000, 1001, 2000, 2050, and Statistics 2550.

### 5.2.5 Computer Science and Geography Joint Major (B.Sc. Only)

#### 1. Computer Science Requirements

Thirty-nine credit hours in Computer Science courses are required: 1000, 1001, 1002, 2001, 2002, 2003, 2004, 2005, 2006, 2007, 2008, 2500, 4751 plus 6 further credit hours in Computer Science courses numbered 3000 or higher.

#### 2. Geography Requirements

Thirty-nine credit hours in Geography courses are required: 1050, 2001, 2102, 2195, 2302, 2425, 3202, 3222, 3250, 3260, 4202, 4250, 4261.

3. **Additional Requirements:** Mathematics 1000, 1001, 2000, 2050, and Statistics 2550.

### 5.2.6 Computer Science and Physics Joint Major

1. Chemistry 1050 and 1051 (or Chemistry 1010, 1011, and the former 1031).
2. Thirty-nine credit hours in Computer Science are required for the Joint Major: 1000, 1001, 1002, 2001, 2002, 2003, 2004, 2005, 2006, 2007, 2008, 3731 plus 9 further credit hours in Computer Science courses numbered 3000 or higher, including at least 3 credit hours at the 4000 level.
3. Physics 1050 (or 1020) and 1051 plus at least 30 additional credit hours in Physics including 2053, 2055, 2750, 2820, 3220, 3400, 3500, 3750, 3800.
4.
  - a. Mathematics 1000 and 1001.
  - b. Mathematics 2000, 2050, 2260, 3202.
  - c. Additional electives to bring the credit hours to 120. Computer Science 2500 and Statistics 2550 are recommended.

### 5.2.7 Computer Science and Pure Mathematics Joint Major (B.Sc. Only)

In addition to Mathematics 1000, 1001, and Computer Science 1000, 1001, the following courses numbered 2000 or higher are required:

1. Computer Science 2001, 2002, 2003, 2004, 2005, 2006, 2007, 2008.
2. Eighteen additional credit hours in Computer Science courses numbered 3000 or higher.
3. Mathematics 1000, 1001, 2000, 2050, 2051, 2130, 2260, 2320, 3000, 3202, 3320, 3340, and Statistics 2550.
4. Nine additional credit hours in courses numbered 3000 or higher offered by the Department of Mathematics and Statistics, excluding the former Mathematics 3330.

### 5.2.8 Computer Science and Statistics Joint Major (B.Sc. Only)

The following courses are required:

1. Computer Science 1000, 1001, 2001, 2002, 2003, 2004, 2005, 2006, 2007, 2008, 2500, 4734, plus 15 further credit hours in Computer Science courses numbered 3000 or higher.
2. Statistics 1510 or 2500 or 2550, and 2501 or 2560.
3. Mathematics 1000, 1001, 2000, 2050, 2051, 2320, 3340, Statistics 3410, 3411, 3520, 3521, 3540, 4590.
4. Nine further credit hours in Statistics courses numbered 3000 or higher including at least a 3 credit hour course numbered 4000 or higher excluding Statistics 4581.

### 5.2.9 Earth Sciences and Physics Joint Major

This program was formerly in the Earth Sciences section of the calendar as a General B.Sc. Degree in Geophysics. The following courses will be required:

1. English 1080 and 1110 (or equivalent), Mathematics 1000 and 1001, Earth Sciences 1000 and 1002, Chemistry 1050 and 1051 (or Chemistry 1010 and 1011), (or 1200 and 1001), Physics 1050 (or 1020) and 1051.
2. Earth Sciences 2030, 2401, 2502, 2702, 2905, 3170, 3172, 3420, 3905; plus a 3 credit hour course in Earth Sciences 4100 series.
3. at least 30 credit hours in Physics courses at the 2000 level or higher, including Physics 2055, 2056 or 2750, 2820, 3220, 3500.
4. Mathematics 2000, 2050 and 3202.
5. Other courses to complete at least a minimum requirement of 120 credit hours in courses for the General Degree.

Any change in the program of study must have the prior approval of the Heads of the two Departments concerned.

### 5.2.10 Economics and Pure Mathematics Joint Major (B.Sc. Only)

1. Mathematics 1000, 1001, 2000, 2050, 2130, 2260, 2320, 3000, 3100, 3202, 3320, Statistics 2550 and one 4000 level Mathematics course.
2. A computing course early in the program is required. Computer Science 1510 is highly recommended.
3. Economics: 2010, 2020, 2550, 3000, 3001, 3010, and 6 credit hours from either 3550 and 3551, or 4550 and 4551.
4. Eighteen further credit hours chosen from among the various Economics courses in consultation with the Head of the Department or delegate, including at least 9 credit hours at the 4000 level.

### 5.2.11 Economics and Statistics Joint Major (B.Sc. Only)

1. Mathematics 1000, 1001, 2000, 2050, 2051, Statistics 2550, 2560, 3410, 3411, 3520, 3540, 4590.
2. Six further credit hours in Statistics courses numbered 3000 or higher, at least 3 credit hours of which must be numbered 4000 or higher, excluding Statistics 3521 and 4581.
3. Economics: 2010, 2020, 2550, 3000, 3001, 3010, 4550, 4551.
4. Eighteen further credit hours chosen from among the various Economics courses in consultation with the Head of the Department or delegate, including at least 9 credit hours at the 4000 level.

### 5.2.12 Economics (Co-operative) and Statistics Joint Major (B.Sc. Only)

The Joint Major in Economics (Co-operative) and Statistics Option is available to full-time Economics and Statistics majors (B. Sc.) only. The program is available under the Economics Co-operative Education Option (ECEO)

The ECEO provides an excellent mutual opportunity for students and employers. Qualified students will obtain rewarding employment experience in fields related to Economics for several months of continuous duration. Students will learn valuable practical skills in an employment situation during their course of study. Furthermore, paid employment will help to defray the cost of their education. The timing of the Work Terms and the structure of the ECEO generally are such that employers stand to gain from the acquired employable skills of economists and statisticians in training. The objectives of the Work Term component of the ECEO are embodied in the Work Term descriptions below. The descriptions serve to guide the student and the employer toward achieving these objectives.

#### 1. Admission Requirements

- a. Admission is competitive and selective. Therefore, prospective students are encouraged to consider an alternate degree program in the event that they are not accepted into the Joint Co-operative program.
- b. Applicants should note that it is possible to enter Term 1 only in the Fall semester commencing in September of each academic year. Application forms are available in the Department of Economics and the Department of Mathematics and Statistics. The deadline for applications for admission to Term 1 is March 1.
- c. The primary criterion used in reaching decisions on applications for admission is overall academic achievement. Students with weak overall academic records are unlikely to be admitted.
- d. To be eligible for admission to Term 1 an applicant must have successfully completed a minimum of 30 credit hours with an overall average of at least 65% as follows: All applicants must have completed Economics 2010 and 2020; at least 6 credit hours in English; Mathematics 1000 and 1001; and 12 credit hours chosen from courses in the Faculties of Humanities and Social Sciences or Science.

It is recommended that students complete English 1110. Critical Reading and Writing II (Context, Substance, Style) as one of these English courses.

- e. Students may apply for admission to Advanced Standing.

- f. Transfer students from other universities will be placed in that term of the program judged to be appropriate considering equivalent credits, as determined by the Departments.

## 2. Program of Study

- a. Promotion from each of Terms 1 through 6 requires a passing grade in all specified required courses and an overall average of at least 60% in all courses including electives. A student who fails a required course or fails to maintain an overall average of 60% will not be promoted to the next term and will be required to withdraw from the program. The student in question may apply for readmission in a subsequent year after passing the specified required course(s) previously failed, or re-establishing the 60% average.
- b. In addition to the 30 credit hours required for admission, students are required to complete the six academic terms in the ECEO program for a total of 120 credit hours. Students must complete three Work Terms which follow Academic Terms 2, 4, and 5.
- c. Courses shall normally be taken in academic terms or "blocks" in the sequenced course load and order set out in the **Academic Course Program - Economics (Co-operative) and Statistics Joint Major (B.Sc. Only) Table**. Unspecified credits may be used to fulfill elective requirements only.
- d. **UNIVERSITY REGULATIONS - General Academic Regulations (Undergraduate) - Classification of Students** notwithstanding, students do not require special permission to register for courses while on work terms if the courses are in addition to the prescribed program.

## 3. Work Term Placement

See Regulations in Economics for the Major in Economics (Co-operative), in the Faculty of Humanities and Social Sciences section of the Calendar.

## 4. Registration and Evaluation of Performance

See Regulations in Economics for the Major in Economics (Co-operative), in the Faculty of Humanities and Social Sciences section of the Calendar.

**Academic Course Program - Economics (Co-operative) and Statistics Joint Major (B.Sc. Only) Table**

<b>Term 1 (Fall)</b> Economics 3000 Economics 3550 Statistics 2550 Mathematics 2000 Computer Science 1700	<b>Term 3 (Fall)</b> Economics 4550 Mathematics 2051 Statistics 3410 Three further credit hours in Statistics courses Three credit hours in elective courses [see Note 2]	<b>Term 5 (Fall)</b> Statistics 3520 Statistics 4590 Six further credit hours in Economics courses Three further credit hours in Statistics courses
<b>Term 2 (Winter)</b> Economics 2550 Economics 3001 Economics 3010 Mathematics 2050 Statistics 2560	<b>Term 4 (Winter)</b> Economics 3011 Economics 4120 Economics 4551 Statistics 3411 Statistics 3540	<b>Work Term III (Winter)</b> Economics 499W
<b>Work Term I (Spring)</b> Economics 299W	<b>Work Term II (Spring)</b> Economics 399W	<b>Term 6 (Spring)</b> Three further credit hours in Economics courses Three credit hours in Science courses [see Note 2] Nine credit hours in elective courses [see Note 2]

- Notes: 1. Another 1000-level Computer Science course may be substituted for Computer Science 1700 with the Heads' approvals.
2. Elective courses should be chosen with reference to the Regulations for the General Degree of Bachelor of Science, since courses specified for admission to and completion of the program only partially satisfy these regulations. In particular note that in addition to the 78 credit hours (26 courses) in Science subjects required, at least 3 credit hours in a Science subject other than Mathematics/Statistics, Economics and Computer Science must be completed.

## 5.3 Option Programs

### 5.3.1 Physics and Chemistry Option Programs

Students who follow the Physics/Chemistry Joint Honours Program of courses outlined above either as Honours students or otherwise and who satisfy all relevant course regulations except those on Academic Standing for the Honours Degree of Bachelor of Science shall receive on their University records a notation that they followed the "Physics/Chemistry" Option Programs.

Students who intend to follow a joint degree program are strongly recommended to consult the Head of the Department or delegate at their earliest opportunity to ensure proper planning of their course sequence.

## 6 Degree Regulations

Students must meet all regulations of the Faculty of Science in addition to those stated in the general regulations. For information concerning fees and charges, admission/readmission to the University, and general academic regulations (undergraduate), refer to **UNIVERSITY REGULATIONS**.

Upon meeting the qualifications for any of the programs of the Faculty of Science a student must apply by the appropriate deadline date to graduate on the prescribed "Application for Graduation" form. This form may be obtained on-line at the Memorial Self Service at [www3.mun.ca/admit/twbkwbis.P\\_WWWLogin](http://www3.mun.ca/admit/twbkwbis.P_WWWLogin). Additional information is available from the Office of the Registrar at [www.mun.ca/regoff/graduation/apply\\_grad.php](http://www.mun.ca/regoff/graduation/apply_grad.php).

### 6.1 Admission to the Department of Subject of Major

Admission to certain major programs within the Faculty is limited and competitive.

Admission to all major programs within the Faculty is upon formal application to the department of the subject of major after completion of the admission requirements.

Unless otherwise indicated by the Departmental Admission Regulations as published in the University Calendar under departmental regulations, students upon formal application by *Change of Academic Program Form*, are normally admitted to the department of major program upon successful completion of 30 credit hours which must include:

1. 6 credit hours in English courses
2. 6 credit hours in Mathematics courses
3. 6 credit hours in courses from each of two Sciences other than Mathematics

Students seeking admission to departments with Departmental Admission Regulations as indicated above must apply for admission on the appropriate Departmental Application for Admission Form upon completion of the specified admission requirements.

## 6.2 Limited Enrolment Courses

Certain course offerings in the Faculty of Science will be identified as being Limited Enrolment Courses and will be clearly identified as such in the University Timetable. Students who have registered for a Limited Enrolment Course must confirm their registration either (1) by attending at least one of the first three hours of lecture in the course and the first meeting of any laboratory section of the course; or (2) by notifying the department in writing within the first five university working days of the semester. Students who do not confirm their registration may be dropped from the course on the recommendation of the Head of Department.

## 6.3 Regulations to Govern Supplementary Examinations in the Departments of Biochemistry, Computer Science, Mathematics and Statistics, and Physics and Physical Oceanography

1. Supplementary examinations will be allowed in certain of the Biochemistry, Computer Science, and Mathematics and Statistics courses which have written final examinations. In each course, students will be informed as to the possibility of a supplementary examination during the first week of classes. This information will be provided in writing, as part of the evaluation scheme for the course.
2. Supplementary examinations will be similar in length and degree of difficulty as the original final examination.
3. Students who wish to write supplementary examinations must apply in writing to the department within one week of release of grades.
4. A student who has clear or conditional standing may write a supplementary examination in a course if the final grade obtained is 45-49F and if his or her term mark is at least 50%.
5. In order to pass the course, the student, must pass the supplementary examination. If the student passes the supplementary examination, then a new grade will be calculated using the same weighting scheme as used in the course, but with the result of the supplementary examination replacing that of the original final examination. Any additional course requirements, including a requirement to pass the laboratory component of a course, will continue to apply.
6. If the new course grade is higher than the original, it will replace the original grade on the student's transcript, subject to the condition that the final mark will not exceed the student's term mark. The student's transcript will indicate that the course result was earned as the result of a supplementary examination.
7. Supplementary examinations will be written no later than the first week of the semester immediately following the one in which the course was failed. Normally they will coincide with the writing of deferred examinations. Grades for supplementary examinations will be submitted to the Office of the Registrar within one week following the commencement of classes for that semester.
8. A student may write a supplementary examination for any one registration in a course only once; if the course result following the supplementary examination is a fail then the course must be repeated in order to obtain credit.

## 6.4 Regulations for the General Degree of Bachelor of Science

1. For the General Degree of Bachelor of Science a candidate will be required to complete, subject to the following Regulations, 120 credit hours applicable to the degree which shall include:
  - a. Six credit hours in English courses
  - b. Six credit hours in Mathematics courses
  - c. Six credit hours in courses from each of two Sciences other than Mathematics
2.
  - a. Courses shall be chosen so that a candidate shall have completed an approved concentration of courses in one subject to be known as the candidate's Major. For the purposes of these regulations, candidates may complete only one major from departments which offer more than one. In selecting courses in their Major, candidates must comply with the Departmental Regulations approved by the Senate and printed in the Calendar. The Departmental Regulations shall require not fewer than 36 nor more than 45 credit hours in courses from the subject of the Major (including the courses in that subject completed at the first year level). (See also Notes 1. and 2.).
  - b. The subject of the candidate's major shall be that declared by the candidate on the appropriate admission form and approved by the department at the time of admission.
  - c. The 36 or more credit hours in courses from one subject referred to in a. above, may be chosen from the following subjects, and may include courses in that subject which were completed at first-year level: Biology (see Note 4.), Biochemistry (see Note 6.), Chemistry, Computer Science, Earth Sciences, Economics, Geography, Mathematics (except the former 1150 and 1151) and Statistics, Physics, Psychology.
  - d. A candidate may change the subject of the Major during any Regular Registration Period provided he or she has first applied for and received acceptance by the department to which application is being made.
  - e. In those Departments which offer programs leading to both a degree of Bachelor of Arts and a degree of Bachelor of Science, students are free to choose the degree program they wish to follow and may change from one to the other; however, they may not obtain both degrees in the same Major subject at this University.
3. Further courses may be chosen from any of the subjects listed in Clause 2. above, or from other courses approved by the Committee on Undergraduate Studies of the Faculty of Science (see Note 5.), provided that, of the 120 credit hours required:
  - a. candidate shall have completed at least 78 credit hours in courses from the subjects listed in Clause 2. above, including the Major courses and the courses required for admission; See Notes 3. and 5.
  - b. there shall be not fewer than five subjects in which a candidate shall have completed courses. At least four of these subjects shall be chosen from the subjects listed in Clause 2. above. In the case of unspecified transfer credits awarded in a subject area not taught at Memorial University of Newfoundland any number of such transfer credits in the aggregate shall count as one subject area.
  - c. not more than 15 unspecified transfer credit hours awarded in a subject area not taught at Memorial University of Newfoundland

shall be used to satisfy the requirements of the degree.

4. Before a candidate registers, the Head of the Department of his or her Major, or delegate, shall approve a candidate's program which is in accordance with the above regulations. The Head of the Department or delegate shall advise each candidate of programs suitable for his or her particular needs.
5. To obtain a general degree of Bachelor of Science a candidate shall have:
  - a. satisfied the conditions of **UNIVERSITY REGULATIONS - General Academic Regulations (Undergraduate), Graduation - Application for Graduation - Degrees, Diplomas and Certificates;**
  - b. obtained an average of at least 2.0 points per credit hour in the 78 credit hours in Science required for the degree;
  - c. obtained an average of at least 2.0 points per credit hour in the minimum number of credit hours in the major subject (or, in the case of joint majors, subjects) required for the major program (or, in the case of joint majors, programs).
6. Where a student satisfies the separate departmental regulations for a major in two or more subjects for which a specific joint program does not exist, such subjects shall be recognized as the major subjects for the general degree of Bachelor of Science.
7. A candidate may complete a minor of at least 24 credit hours in courses from a subject area other than that of the Major chosen from Clause 2. c. above or from minors available in the Faculty of Humanities and Social Sciences, the Faculty of Business Administration, and the School of Music. (It should be noted that because of departmental regulations for the Major, not every candidate may be able to fit a minor into his or her 120 credit hour program).
  - a. The subject of the candidate's minor shall be that declared by the candidate on the Change of Academic Program Form which must then be signed by the Head of the Department of the Minor.
  - b. A candidate must follow the departmental regulations for the Minor as set forth in the appropriate section of the Calendar.
  - c. The Head of the Department of the Minor will advise the candidate on the selection of courses in the Minor.
  - d. Students who have taken courses appropriate to their Minor at another university are required to complete at least 6 credit hours in courses from that subject at this University. These courses must be chosen in consultation with the Head of the Department of the Minor program.
  - e. A candidate must obtain a grade point average of at least 2.0 in the credit hours prescribed for the minor program.

- Notes:
1. *Departmental regulations are not intended to debar students from taking more than the required courses in the subject of their Major.*
  2. *Students who have taken courses in the subject of their Major at another university are required to complete at least 12 credit hours in courses from that subject at this University.*
  3. *The former Science 2010/2011 may be used to fulfil in part the requirement of 78 credit hours in Science.*
  4. *Biology 2120 may not be used for credit by Biology Majors.*
  5. *When Science course equivalents have been established by Department Heads for Engineering courses, credit may not be obtained for both the Engineering course and the established equivalent course offered by the Faculty of Science.*
  6. *In the case of Biochemistry the courses for the Biochemistry program shall include Chemistry 2400 and 2401.*

## 6.5 Regulations for the Honours Degree of Bachelor of Science

A program is offered leading to the Honours Degree of Bachelor of Science. An Honours degree offers greater specialization in a given field of knowledge than a General degree, and requires higher than average academic achievement. Possession of this degree will be of great advantage to all students planning more advanced work in their chosen field. In many cases, an Honours degree is a prerequisite for admission to a graduate program.

### 6.5.1 Admission and Registration

1. A student who wishes to be admitted to any of the Honours programs must submit an "Application for Admission to Honours Program Faculties of Humanities and Social Sciences or Science". This form is available at [www.mun.ca/regoff/Application\\_Honours\\_Program.pdf](http://www.mun.ca/regoff/Application_Honours_Program.pdf). This form shall be submitted to his (her) Department(s) of specialization and to the Registrar not earlier than the beginning of his (her) fifth semester, or the equivalent, at University, and not later than the final date set for the application for a degree. A candidate for an Honours degree must have completed all courses listed under **Admission to the Department of Subject of Major** before declaring his (her) intent to pursue an Honours degree, regardless of whether these courses had been completed at the time of admission to his (her) Department of specialization.

Note: *An otherwise qualified student who fails to declare his (her) intention to obtain an Honours degree on or before the last day of the period outlined above shall be awarded a General degree even if he (she) fulfils all other requirements for an Honours degree. The University cannot undertake to notify him (her) that he (she) may be eligible for an Honours degree.*

2. At the beginning of each registration period the Head(s), or delegate(s), of the Department(s) in which a candidate is taking Honours, shall approve a candidate's program. The Head(s) of Department(s), or delegate(s), shall advise each candidate of programs suitable for his or her particular needs.
3. Students who have been awarded a Bachelor of Science (General) degree may convert it to a Bachelor of Science (Honours) degree by declaring their intention and by completing the requirements for the Honours degree as outlined in these regulations.
4. To graduate, a candidate for an Honours degree must have completed all courses listed under **Admission to the Department of Subject of Major** in addition to those courses required by individual departmental regulations.

### 6.5.2 Course Requirements

1. a. For the Honours Degree of Bachelor of Science with a single subject major a candidate will be required to have completed 120 prescribed credit hours in courses. For the Joint Honours Degree of Bachelor of Science a candidate will be required to have completed either 120 or 135 credit hours as prescribed by the specific program. In either case, those courses must include the courses specified in **Clause 1. of the Regulations for the General Degree of Bachelor of Science**.
- b. Clause 1.a. notwithstanding, certain Departmental regulations preclude the possibility of completing a single subject Honours degree in 120 credit hours and may require the completion of 123, 126 or 129 credit hours in courses. (See Note below). In such cases all courses required to satisfy requirements of the degree will be used to determine **Academic Standing**, 2. below.

Note: *The requirements for an Honours Degree of Bachelor of Science cannot be completed in 120 credit hours if any of the following three statements is true: (1) the student is a major in Chemistry, or Physics and has completed the former Mathematics 1080; (2) the student is a major in Chemistry or Physics and has completed the former Chemistry 1800; (3) the student is a candidate for the Honours B.Sc degree in Chemistry or Physics and has completed Physics 1021. Such students will only meet the degree requirements after completing 123, 126 or 129 credit hours in courses.*

2. Courses shall be chosen so that a candidate shall have completed:

Either, (1) at least 60 credit hours from courses in one of the following subjects, including the courses in that subject completed at

the first year level: Biology, Biochemistry, Chemistry, Computer Science, Earth Sciences, Economics, Geography, Mathematics and Statistics, Physics and Psychology.

- Notes: 1. For options in the Biochemistry and Nutrition programs the courses shall be those specified in the respective programs.  
 2. For the Behavioural Neuroscience Program, the courses shall be those specified in the program.  
 3. For the Environmental Physics Program, the courses shall be those specified in the program.

or, (2) at least 84 credit hours in courses from two subjects listed in (1) above, including the courses in these subjects completed at the first year level, with no fewer than 36 credit hours in either subject approved by the Committee on Undergraduate Studies of the Faculty of Science on the recommendation of the respective Heads of Departments.

or, (3) in special circumstances, a program of at least 90 credit hours in courses from two or more subjects, including the courses in these subjects completed at the first year level, one of which need not be taken from those listed in 1. above, as recommended by the Heads of the Departments concerned and approved by the Committee on Undergraduate Studies of the Faculty of Science.

3. Further courses may be chosen from any of the subjects listed in Clause 2. above, or from other courses recognized for this purpose by the Committee on Undergraduate Studies of the Faculty of Science (see Note 5 of the Bachelor of Science General Degree) provided that, of the 120 or more credit hours required:
  - a. a candidate shall have completed at least 90 credit hours in courses from the subjects listed in Clause 2. above, including those completed at the first-year level, and
  - b. there shall be no fewer than four subjects in which a candidate shall have completed courses. In the case of unspecified transfer credits awarded in a subject area not taught at Memorial University of Newfoundland, any number of such transfer credits in the aggregate shall count as one subject area.
  - c. Not more than 15 unspecified transfer credit hours in courses awarded from a subject area not taught at Memorial University of Newfoundland shall be used to satisfy the requirements of the degree.

### 6.5.3 Comprehensive Examination and Dissertation

1. In addition to the regular examinations, a candidate in an Honours program shall pass a general comprehensive examination in his (her) Major subject or subjects. Alternatively, a candidate may be required to submit a dissertation, which at the discretion of the Head(s) of the Department(s) of specialization may be followed by an oral examination thereon.
2. If a candidate is required to submit a dissertation, such dissertation must be submitted to the University Library before the degree is conferred. All Honours dissertations in the University Library shall be available for unrestricted consultation by students and faculty except under very exceptional circumstances which must be approved by the head of the academic unit of the student's program. Copyright remains with the author. A release form, signed by both the student and the head of the academic unit of the student's program, must accompany an essay or a dissertation when it is submitted to the University Library.
3. The deadline for the submission of Honours dissertations shall be no later than three weeks before the end of the final semester of the candidate's program.
4. The Honours dissertation shall be equivalent to either a 3 credit hour course or a 6 credit hour linked course as specified in the course offerings of each Department.

### 6.5.4 Departmental Regulations

Candidates for Honours Degrees shall also comply with such additional requirements of the appropriate Department(s) as are approved by the Senate and printed in the Calendar.

### 6.5.5 Residence Requirements

1. To qualify for an Honours Degree in Science, a candidate shall attend a recognized university or an equivalent institution for at least seven semesters as a full-time student. Honours candidates transferring credits to Memorial University of Newfoundland from other universities or equivalent institutions shall either spend a minimum of four of the seven semesters as full-time students at Memorial University of Newfoundland, and take a minimum of 24 credit hours in courses from their Honours discipline or take a minimum of 36 credit hours in courses from their Honours discipline as full-time students at Memorial University of Newfoundland (whichever is to their advantage), provided that the total number of semesters spent as full-time students at this and other recognized universities or equivalent institutions will not be less than seven.
2. To qualify for an Honours Degree in Science and additionally a second degree, a candidate shall attend this University for at least ten semesters as a full-time student, except with the special permission of the Faculty Committee on Undergraduate Studies.

### 6.5.6 Academic Standing

In order to graduate with an Honours degree, a candidate shall obtain:

1. a grade of "B" or better, OR an average of 75% or higher (whichever is to the candidate's advantage) in the minimum number of courses in the Honours subject (or subjects) prescribed by the Department (or, in the case of joint Honours, Departments) concerned, excluding the 1000-level courses, and
2. an average of at least 2.75 points on the total number of courses required for the degree (see **UNIVERSITY REGULATIONS - General Academic Regulations (Undergraduate), Grading** for explanation of the point system).

Note: A student may, with the approval of the Head of the Department and the Committee on Undergraduate Studies, repeat or substitute up to three courses in order to meet the requirements of Clause 1. above. In counting repeats, each attempt at the same course will count as one course towards the maximum. That is, the same course, repeated three times, would place a student at the maximum and no additional repeats or substitutions would be allowed.

### 6.5.7 Classification of Degrees

1. If the candidate's general average is 3.25 or better per required course, and his (her) average for the courses in his (her) Honours subject (excluding 1000-level courses) is 3.50 or better, he (she) shall be awarded an Honours degree with First Class standing.
2. If the candidate fulfils the conditions outlined under **Academic Standing** but not of Clause 1. above., he (she) shall be awarded an Honours degree with Second Class standing.
3. No classification will be given to the degree awarded a candidate who has completed (1) fewer than one half of the courses required for the degree at this University, or (2) who has completed fewer than one half of the courses required for the degree at this University since 1959. All candidates for such degrees shall, however, fulfil the conditions outlined under **Academic Standing** on the courses taken at the University since September, 1959, in order to qualify for the degree.
4. A declared candidate for an Honours degree who fails to attain the academic standing specified under **Academic Standing** but

fulfills the academic requirements for a General Degree shall be awarded a General Degree, the classification of which shall be determined in accordance with the **UNIVERSITY REGULATIONS - General Academic Regulations (Undergraduate), Graduation**.

## 7 Waiver of Regulations for Undergraduate Students

Where circumstances warrant, any prerequisite or prerequisites listed in Departmental Regulations may be waived by the Head of the Department. Any Department Regulations may be waived by the appropriate Committee on Undergraduate Studies upon request of the Head of the Department concerned.

Students wishing waiver of University academic regulations should refer to **UNIVERSITY REGULATIONS - General Academic Regulations (Undergraduate) - Waiver of Regulations**.

## 8 Appeal of Decisions

Any student whose request for waiver of Faculty regulations has been denied has the right to appeal. For further information refer to **UNIVERSITY REGULATIONS - General Academic Regulations (Undergraduate) - Appeal of Decisions**.

## 9 Program Regulations

### 9.1 Biochemistry

[www.mun.ca/biochem](http://www.mun.ca/biochem)

The following undergraduate programs are available in the Department:

1. Biochemistry and Cell Biology/Microbiology Joint Honours
2. Biochemistry and Chemistry Joint Honours
3. Biochemistry and Physics Joint Honours
4. Biochemistry and Psychology (Behavioural Neuroscience Joint Honours)
5. Biochemistry (Nutrition) and Psychology (Behavioural Neuroscience) Joint Honours
6. Major or Honours in Biochemistry
7. Major or Honours in Nutrition
8. Minor in Biochemistry

Students who wish to enrol in any of these programs should plan their program well in advance so that they will have taken the appropriate prerequisites. Entry to a number of required courses is limited and will be determined by academic performance. Required courses should be taken in the year indicated by the course numbers so as to avoid timetable clashes and missing prerequisites which could prolong the time necessary to complete the program. Students are advised to consult with the Department at the earliest opportunity.

Candidates for the general and honours degrees in the programs above should refer to the Faculty of Science **Degree Regulations** for the **General** and **Honours** degrees of Bachelor of Science.

Candidates for a minor in Biochemistry should refer to the **Regulations for the General Degree of Bachelor of Science**, Clause 7.

Students who intend to pursue graduate studies should take the courses leading to the honours degree.

Biochemistry course descriptions are found at the end of the Faculty of Science section under **Course Descriptions, Biochemistry**.

Note: *Supplementary examinations will be allowed in certain Biochemistry courses which have written final examinations. Students should refer to the Faculty of Science Degree Regulations for details.*

#### 9.1.1 Admission to Programs

Students who wish to declare a Major in Biochemistry or Biochemistry (Nutrition) or who wish to apply for Honours standing in any of our programs are strongly recommended to do so by May 31 in any year. Failure to apply by the recommended date may result in your application not being processed before your registration time. In addition, students who do not declare by this date may not be considered for departmental scholarships or other awards.

#### 9.1.2 Major in Biochemistry

Entry to the Biochemistry Majors program is based on academic standing.

1. To be considered for admission to the program students must have at least 30 credit hours in courses and have successfully completed the following courses (or their equivalents) with a minimum overall average of 60%. In addition, students must be eligible for entry to Chemistry 2400.
  - a. English 1080, 1110 (or equivalent)
  - b. Chemistry 1050 and 1051 (or 1200 and 1001)
  - c. Mathematics 1000, 1001 (or Mathematics 1090, 1000)
  - d. Physics 1050 (or 1020), 1051 (or 1021), or Biology 1001, 1002
2. Required courses to complete the major:
  - a. Biochemistry 2100, 2101, 3105, 3106, 3107, 3108.
  - b. At least 12 credit hours in courses from Biochemistry 2600, 3203, 4002, 4101, 4103, 4104, 4105, 4200, 4201, 4230-4239.
  - c. Medicine 310A/B or 6 credit hours from Biochemistry 4240-4249, Biology 2060, 3050, 3401, 3402, 3530, 4200, 4245, 4404, Chemistry 4201, 4701.
  - d. Biology 1001 and 1002; Mathematics 1001; and Physics 1050 (or 1020), 1051 (or 1021) for those students who did not complete them in first year. (See Notes 2. and 3. below).
  - e. Chemistry 1051 is a required course for the Major in Biochemistry and must normally be completed prior to entrance into 2nd year Chemistry and Biochemistry courses. Students who do not meet the requirements for entry into Chemistry 1050 from high school can first take Chemistry 1010 followed by Chemistry 1050 and 1051. It is strongly recommended that these students complete Chemistry 1051 prior to second year.

- f. Chemistry 2301 or Physics 2053; Chemistry 2400, 2401.
- g. One of Chemistry 2100, Environmental Sciences 3210.

Notes: 1. Students are required to complete at least 78 credit hours in Science courses for the General Degree.

2. Students taking Mathematics 1000 should take Physics 1050 as their first Physics course.

3. It is recommended that students who wish to pursue future studies in biophysics or related fields or who are considering postgraduate health professional programs take Physics 1050 as their first Physics course.

4. For the purposes of a Biochemistry degree, Medicine 310A/B count as Biochemistry courses.

- 3. Students are encouraged to choose a minor.

### 9.1.2.1 Honours Degree in Biochemistry

Students normally should apply for an Honours program at the completion of their third year of studies. Honours students would normally follow the Biochemistry Majors program before applying to honours, and must meet its admissions requirements as follows:

- 1. To be considered for admission to the majors program prior to admission to honours, students must have at least 30 credit hours in courses and have successfully completed the following courses (or their equivalents) with a minimum overall average of 60%. In addition, students must be eligible for entry to Chemistry 2400.
  - a. English 1080, 1110 (or equivalent)
  - b. Chemistry 1050 and 1051 (or 1200 and 1001)
  - c. Mathematics 1000, 1001 (or Mathematics 1090, 1000)
  - d. Physics 1050 (or 1020), 1051 (or 1021), or Biology 1001, 1002
- 2. To be eligible for admission, students must be in Honours standing. To be considered for early admission to an Honours program in Biochemistry at the end of second year, students must have achieved at least 70% in each of Biochemistry 2100 and 2101 and Chemistry 2400, 2401.
- 3. Required courses:
  - a. Biochemistry 2100, 2101, 3105, 3106, 3107, 3108, 4102, 499A, 499B, Medicine 310A/B.
  - b. Biochemistry 4210 or 4211.
  - c. Twelve credit hours in courses from Biochemistry 4002, 4101, 4103, 4104, 4105, 4200, 4201, 4230-4239.
  - d. At least 6 credit hours in courses from Biochemistry 2600, 3203, 4240-4249, Biology 2060, 3050, 3530, 4200, 4245, 4404, Chemistry 4201, 4701
  - e. Biology 1001 and 1002; Mathematics 1001; and Physics 1050 (or 1020), 1051 (or 1021), for those students who did not complete them in first year. (See Notes 1. and 2. below).
  - f. Chemistry 1051 is a required course for the major in Biochemistry and must normally be completed prior to entrance into 2nd year Chemistry and Biochemistry courses. Students who do not meet the requirements for entry into Chemistry 1050 from high school can take Chemistry 1010 followed by Chemistry 1050 and 1051. It is strongly recommended that these students complete Chemistry 1051 prior to second year.
  - g. Chemistry 2301 or Physics 2053, Chemistry 2400, 2401, one of Chemistry 3410 or 3411.
  - h. One of Chemistry 2100, Environmental Sciences 3210.
  - i. Statistics 2550 or equivalent

Notes: 1. Students taking Mathematics 1000 should take Physics 1050 as their first Physics course.

2. It is recommended that students who wish to pursue future studies in biophysics or related fields or who are considering postgraduate health professional programs take Physics 1050 as their first Physics course.

3. For the purposes of a Honours Degree in Biochemistry, Medicine 310A/B count as Biochemistry courses.

- 4. Students are encouraged to choose a minor.

Those courses in which a grade "B" or an average of 75% or higher are required, as specified under **Academic Standing**, clause 1. of the **Regulations for the Honours Degree of Bachelor of Science**, are 45 credit hours in Biochemistry courses and 15 credit hours in other courses (beyond the 1000-level) chosen from Biochemistry, Biology, or Chemistry. Biology 2040, 2041, 3820 and the former Chemistry 2600, the former Chemistry 2601 may not be used to meet this requirement. Medicine 310A/B counts as Biochemistry for these 60 credit hours.

### 9.1.2.2 Minor in Biochemistry

Students who take a minor in Biochemistry will complete:

- 1. Biochemistry 2101, 3106
- 2. One of Biochemistry 2100, 2600, Biology 2250.
- 3. Nine credit hours in Biochemistry at the third or fourth year level; or 6 credit hours in Biochemistry at the third or fourth year level and Biology 3050.
- 4. Either Chemistry 2400, 2401 or Chemistry 2440 and 3 additional credit hours from the Biochemistry courses listed in 3. above.

Course prerequisites stipulated in the course descriptions shall apply to a minor in Biochemistry.

Note: For the purposes of a Biochemistry minor, Medicine 310A/B count as Biochemistry courses.

## 9.1.3 Nutrition Program

### 9.1.3.1 Major in Nutrition

Entry to the Nutrition majors program is based on academic standing.

- 1. To be considered for admission to the program students must have at least 30 credit hours in courses and have successfully completed the following courses (or their equivalents) with a minimum overall average of 60%.
  - a. English 1080, 1110 (or equivalent)
  - b. Chemistry 1050, 1051 (or Chemistry 1010, 1011 or 1200, 1001)
  - c. Mathematics 1090, 1000 (or Mathematics 1000 and one elective)
  - d. Biology 1001, 1002 or Physics 1020, 1021 (or equivalent)
- 2. Required courses to complete the major:

- a. Biochemistry 2005, 2100, 2101, 2600, 3106, 3203, 3402, 4300, 4301, Medicine 310A/B
  - b. Six credit hours in courses from Biochemistry 3052, 3107, 3108, 3202, 3600, 4002, 4101, 4103, 4104, 4105, 4200, 4201, 4230-4249, Biology 3050.
  - c. Biology 1001 and 1002; and Physics 1020 and 1021 (or equivalent), for those students who did not complete them in first year
  - d. Chemistry 2440 (or Chemistry 2400, 2401)
  - e. Statistics 2550 or equivalent
3. Students are encouraged to choose a minor.

Notes: 1. *Students are required to complete at least 78 credit hours in Science courses for the General Degree.*  
 2. *Students who choose to complete Chemistry 2400/2401 are advised to take the appropriate prerequisites for those courses.*  
 3. *For the purposes of a Biochemistry (Nutrition) degree, Medicine 310A/B count as Biochemistry courses.*

### 9.1.3.2 Honours Degree in Nutrition

Students normally should apply for an Honours program at the completion of their third year of studies. Honours students would normally follow the Biochemistry (Nutrition) Majors program before applying to honours, and must meet its admissions requirements as follows:

1. To be considered for admission to the majors program prior to admission to honours, students must have at least 30 credit hours in courses and have successfully completed the following courses (or their equivalents) with a minimum overall average of 60%:
  - a. English 1080, 1110 (or equivalent)
  - b. Chemistry 1050, 1051 (or Chemistry 1010, 1011, or 1200, 1001)
  - c. Mathematics 1090, 1000 (or Mathematics 1000 and one elective)
  - d. Biology 1001, 1002 or Physics 1020, 1021 (or equivalent)
2. To be eligible for admission to the honours program, students must be in Honours standing. To be considered for early admission to an Honours program in Nutrition at the end of second year, students must have achieved at least 70% in each of their required 2000 level Biochemistry and Chemistry courses.
3. Required courses:
  - a. Biochemistry 2005, 2100, 2101, 2600, 3106, 3107, 3203, 3402, 3600, 4002, 4300, 4301, 4502, 499A, 499B, Medicine 310A/B.
  - b. Twelve additional credit hours chosen from Biochemistry 3052, 3105, 3108, 3202, 4101, 4103, 4104, 4105, 4200, 4201, 4210, 4211, 4230-4249, Biology 3050, Chemistry 4701.
  - c. Biology 1001 and 1002; and Physics 1020 and 1021 (or equivalent), for those students who did not complete them in first year.
  - d. Chemistry 2440 (or Chemistry 2400, 2401).
  - e. Statistics 2550 or equivalent.
4. Students are encouraged to choose a minor.
5. Those courses in which the grades specified under **Academic Standing, clause 1** of the **Regulations for the Honours Degree of Bachelor of Science** are 60 credit hours chosen from Biochemistry courses and Biology 3050.

Notes: 1. *Students who choose to complete Chemistry 2400/2401 are advised to take the appropriate prerequisites for those courses.*  
 2. *For the purposes of a Biochemistry (Nutrition) Honours degree, Medicine 310A/B count as Biochemistry courses.*

## 9.2 Biology

[www.mun.ca/biology](http://www.mun.ca/biology)

The following undergraduate programs are available in the Department:

1. Biochemistry and Cell Biology Joint Honours
2. Biology and Earth Sciences (Geology) Joint Honours
3. Biology and Psychology Joint Honours
4. Biology and Psychology (Behavioural Neuroscience) Joint Honours
5. Biology and Statistics Joint Honours
6. Major or Honours in Biology
7. Major or Honours, or Major (Co-operative) or Honours (Co-operative), in Biology (Cell and Molecular)
8. Major or Honours, or Major (Co-operative) or Honours (Co-operative), in Biology (Ecology and Conservation)
9. Major or Honours, or Major (Co-operative) or Honours (Co-operative), in Biology (Marine)
10. Minor in Biology

Details of joint programs are given after the **Regulations for the Honours Degree of Bachelor of Science**.

Biology course descriptions are found at the end of the Faculty of Science section under **Course Descriptions, Biology**.

### 9.2.1 Entrance Requirements

Entry to the Biology Majors Program is competitive and based on academic standing.

To be considered for admission to the program students must have completed Biology 1001/1002 with an average of at least 65%. In addition, applicants will normally have completed the following courses (or their equivalents) and must have a minimum overall average of 60% in these courses.

1. English 1080, 1110 or equivalent
2. Mathematics 1090 and Mathematics 1000 (or Mathematics 1000 only)
3. Chemistry 1010/1011 (or equivalent) or Physics 1020/1021 (or equivalent)
4. If Mathematics 1000 taken, any one other first year course.

Chemistry 1010/1011 (or 1050/1051) should be taken in the first year, as it is a prerequisite for other required courses in the programs, and delaying chemistry until second year may make it difficult to complete the program in the normal eight semesters.

### 9.2.2 Minor in Biology

A minor in Biology will consist of 24 credit hours in Biology courses: 1001 and 1002 (or equivalent) plus any 18 credit hours chosen from

the list of Biology courses except Biology 2040, 2041, 2120, 3053, and 3820. The choice of courses must be made in consultation with the Head of Biology or delegate and it is recommended (but not required) that students take at least two Biology courses at the 3000 level or above

### 9.2.3 General Degrees

Each Major is assigned a faculty advisor who should be consulted on academic problems, including course selection.

#### 9.2.3.1 Major in Biology

All students majoring in Biology are required to complete a minimum of 45 credit hours in courses from the Department of Biology offering. Those 45 credit hours must include: Biology 1001 and 1002 or their equivalents; the 15 credit hours in core courses listed below; and 24 credit hours in Biology electives at the 2000, 3000 or 4000 level except Biology 2040, 2041, 2120, 3053, and 3820.

Biology Core (15 credit hours): Biology 2060, 2250, 2600, 2900, plus one of Biology 3401, 3402, 4245 and 4404.

A maximum of 9 credit hours can be in Biology courses with no associated laboratory/seminar.

All majors must also successfully complete the following courses or their equivalents:

1. English 1080 and 1110 (or equivalent)
2. Physics 1020 and 1021 (or equivalent)
3. Mathematics 1000
4. Chemistry 1010 and 1011 (or equivalent), Chemistry 2440
5. Statistics 2550
6. Biochemistry 2101 and 3106
7. Extra Science courses as necessary to fulfil the requirement for 78 credit hours in Science as stipulated in Clause 3.a. of the **Regulations for the General Degree of Bachelor of Science.**

It is recommended, but not required, that a Computer Science course be included and the Department of Biology strongly recommends Computer Science 1000 or 1600.

Note: *To minimize timetabling problems, students on the St. John's campus are advised to take Biology 2250 and 2600 in their third semester (Fall), and 2060 and 2900 in their fourth semester (Winter).*

#### 9.2.3.2 Major in Biology (Cell and Molecular)

All students majoring in Biology (Cell and Molecular) are required to complete a minimum of 45 credit hours in courses from the Department of Biology offering. Those 45 credit hours must include: Biology 1001 and 1002 or their equivalents; the 15 credit hours in core courses listed below; Biology 3530 and 4241; 6 credit hours from the recommended Biology courses for Biology (Cell and Molecular) listed below; and 12 credit hours from Biology electives at the 2000, 3000 or 4000 level except Biology 2040, 2041, 2120, 3053, and 3820.

Biology Core (15 credit hours): Biology 2060, 2250, 2600, 2900, plus one of Biology 3401, 3402, 4245 and 4404.

Recommended Biology courses for Biology (Cell and Molecular) are 3050, 3052, 3401, 3402, 3500, 3620, 3950, 3951, 4010, 4040, 4050, 4200, 4245, 4250, 4251, 4255, 4404, 4550, 4605, and 4607.

A maximum of 9 credit hours can be in Biology courses with no associated laboratory/seminar.

All majors must also successfully complete the following courses or their equivalents:

1. English 1080 and 1110 (or equivalent)
2. Physics 1020 and 1021 (or equivalent)
3. Mathematics 1000
4. Chemistry 1010 and 1011 (or equivalent), Chemistry 2440
5. Statistics 2550
6. Biochemistry 2101 and 3106
7. Extra Science courses as necessary to fulfil the requirement for 78 credit hours in Science as stipulated in Clause 3.a. of the **Regulations for the General Degree of Bachelor of Science.**

It is recommended, but not required, that a Computer Science course be included and the Department of Biology strongly recommends Computer Science 1000 or 1600.

Note: *To minimize timetabling problems, students on the St. John's campus are advised to take Biology 2250 and 2600 in their third semester (Fall), and 2060 and 2900 in their fourth semester (Winter).*

#### 9.2.3.3 Major in Biology (Ecology and Conservation)

All students majoring in Biology (Ecology and Conservation) are required to complete a minimum of 45 credit hours in courses from the Department of Biology offering. Those 45 credit hours must include: Biology 1001 and 1002 or their equivalents; the 15 credit hours in core courses listed below; Biology 4650 and 4651; 6 credit hours from the recommended Biology courses for Biology (Ecology and Conservation) listed below; and 12 credit hours from Biology electives at the 2000, 3000 or 4000 level except Biology 2040, 2041, 2120, 3053, and 3820.

Biology Core (15 credit hours): Biology 2060, 2250, 2600, 2900, plus one of Biology 3401, 3402, 4245 and 4404.

Recommended Biology courses for Biology (Ecology and Conservation) are 3041, 3050, 3295, 3300, 3610, 3620, 3640, 3709, 3710, 3711, 3714, 3715, 3750, 4040, 4141, 4180, 4182, 4250, 4306, 4307, 4360, 4405, 4505, 4605, 4607, 4620, 4630, 4701, 4710, 4750, and 4820.

A maximum of 9 credit hours can be in Biology courses with no associated laboratory/seminar.

All majors must also successfully complete the following courses or their equivalents:

1. English 1080 and 1110 (or equivalent)
2. Physics 1020 and 1021 (or equivalent)
3. Mathematics 1000
4. Chemistry 1010 and 1011 (or equivalent), Chemistry 2440
5. Statistics 2550

6. Biochemistry 2101 and 3106

7. Extra Science courses as necessary to fulfil the requirement for 78 credit hours in Science as stipulated in Clause 3.a. of the **Regulations for the General Degree of Bachelor of Science.**

It is recommended, but not required, that a Computer Science course be included and the Department of Biology strongly recommends Computer Science 1000 or 1600.

Note: *To minimize timetabling problems, students on the St. John's campus are advised to take Biology 2250 and 2600 in their third semester (Fall), and 2060 and 2900 in their fourth semester (Winter).*

#### 9.2.3.4 Major in Biology (Marine)

All students majoring in Biology (Marine) are required to complete a minimum of 45 credit hours in courses from the Department of Biology offering. Those 45 credit hours must include: Biology 1001 and 1002 or their equivalents; the 15 credit hours in core courses listed below; Biology 3710 and 3711; 6 credit hours from the recommended Biology courses for Biology (Marine) listed below; and 12 credit hours from Biology electives at the 2000, 3000 or 4000 level except Biology 2040, 2041, 2120, 3053, and 3820.

Biology Core (15 credit hours): Biology 2060, 2250, 2600, 2900, plus one of Biology 3401, 3402, 4245 and 4404.

Recommended Biology courses for Biology (Marine) are 3014, 3050, 3295, 3620, 3640, 3709, 3712, 3714, 3715, 3951, 4122, 4141, 4182, 4360, 4601, 4605, 4607, 4620, 4630, 4710, 4750, 4810, 4912.

A maximum of 9 credit hours can be in Biology courses with no associated laboratory/seminar.

All majors must also successfully complete the following courses or their equivalents:

1. English 1080 and 1110 (or equivalent)
2. Physics 1020 and 1021 (or equivalent)
3. Mathematics 1000
4. Chemistry 1010 and 1011 (or equivalent), Chemistry 2440
5. Statistics 2550
6. Biochemistry 2101 and 3106
7. Extra Science courses as necessary to fulfil the requirement for 78 credit hours in Science as stipulated in Clause 3.a. of the **Regulations for the General Degree of Bachelor of Science.**

It is recommended, but not required, that a Computer Science course be included and the Department of Biology strongly recommends Computer Science 1000 or 1600.

Note: *To minimize timetabling problems, students on the St. John's campus are advised to take Biology 2250 and 2600 in their third semester (Fall), and 2060 and 2900 in their fourth semester (Winter).*

#### 9.2.3.5 Major in Biology (Co-operative) Program (BCOP)

This program is available to full-time Biology majors only.

The Biology (Co-operative) Program (BCOP) provides an opportunity for students to learn valuable practical skills while working in fields related to Biology. Students complete three Work Terms, which consist of full-time paid employment in the field of Biology of at least 12 weeks in duration. The timing of the Work Terms is such that employers stand to gain from the acquired skills of biology majors in training. The objectives of the Work Term component of the BCOP are embodied in the Work Term descriptions found at the end of the Faculty of Science section under **Course Descriptions, Biology, Work Term Descriptions.**

##### 1. Admission Requirements

- a. Admission is limited, competitive, and selective.
- b. The primary criterion used in reaching decisions on applications for admission is overall academic achievement.
- c. A student must first be admitted to the Biology Major.
- d. Application deadline: November 15 for the following Spring semester work term (normally the third semester in year two).
- e. To be admitted to the program, a student must have completed the second year Biology Core, with an overall average of at least 65%, and an overall average of at least 65% in all Biology courses. A student must have an overall average of 65% in all other required courses, and must be registered for 15 credit hours in the semester in which application is made.

##### 2. Program of Study

- a. In addition to the requirements below, a student must fulfill all requirements for one of a Major in Biology; Major in Biology (Cell and Molecular); Major in Biology (Ecology and Conservation); Major in Biology (Marine); Honours in Biology; Honours in Biology (Cell and Molecular); Honours in Biology (Ecology and Conservation); or Honours in Biology (Marine).
- b. To remain in BCOP, a student must receive a passing grade in all required courses, and must maintain an overall average of at least 65% in all Biology courses and an overall average of at least 65% in all courses, including electives. A student who fails a required course, fails to maintain an overall average of 65% in Biology courses, or fails to maintain an overall average of 65%, will be required to withdraw from BCOP. The student in question may apply for readmission in a subsequent year after passing the specified required course(s) previously failed, or re-establishing the required average.
- c. A student is required to complete three work terms, one of which must be either in the Fall or Winter semester.

##### 3. Work Term Placement

- a. General management of the work terms in BCOP is the responsibility of Co-operative Education. Co-operative Education is responsible for assisting potential employers to become involved in the program, organizing competitions for Work Term employment, arranging student-employer interviews and facilities, data base management, and for the continual development of employment opportunities. Co-operative Education will work with the Biology Co-op Liaison to counsel students, visit students on work assignments and evaluate the work term.
- b. Work placement is not guaranteed but every effort is made to ensure that appropriate employment is made available. In the case of students who are required to withdraw from the program, Co-operative Education has no responsibility for placement until they have been readmitted to the program.
- c. A student who is admitted to the co-op program gives permission to the University to provide a copy of the applicant's resume, university transcript and work term evaluations to potential employers.
- d. A student who has been accepted to BCOP may obtain his/her own work term placement outside the competition. Such employment positions must be confirmed by the employer, and must be approved by the DCE coordinator and the Biology Department Liaison.

- e. Within a month after starting a Work Term, a student must submit a proposal for the work term report.
  - f. Salaries paid to co-operative students are determined by employers based on their internal wage structures.
4. **Registration and Evaluation of Performance**
- a. In Work Terms I, II, and III, a student must register for Biology 199W, 299W, and 399W respectively.
  - b. Student performance evaluations are to be completed by the employer and returned to Co-operative Education. The Work Term evaluations shall consist of two components:
    - i. On-the-job Student Performance:
 

Job performance shall be assessed by Co-operative Education in consultation with the department using information gathered during the Work Term and input from the employer towards the end of the Work Term. Formal written documentation from the employer shall be sought. Evaluation of the job performance will result in one of the following classifications: OUTSTANDING, ABOVE EXPECTATIONS, SATISFACTORY, MARGINAL PASS, FAIL.
    - ii. The Work Report:
      - A student is required to submit a Work Term report to Co-operative Education on the first day of final exams in the semester of the Work Term
      - Work Term reports shall be evaluated by a faculty member and Co-operative Education.
      - If an employer designates a report to be of a confidential nature, both employer and Co-operative Education must agree as to the methods to protect the confidentiality of such a report before the report may be accepted for evaluation.
      - Reports must contain original work related to the Work Term placement. The topic must relate to the work experience and will be chosen by the student in consultation with the employer. The topic must be approved by the coordinator and the Biology Co-op Liaison.

Evaluation of the work term will result in one of the following classifications: OUTSTANDING, ABOVE EXPECTATIONS, SATISFACTORY, MARGINAL PASS, FAIL.

The evaluation of the job performance and the work term report are recorded separately on the transcript. Overall evaluation of the work term will result in one of the following final grades being awarded:

      - Pass with Distinction: Indicates OUTSTANDING PERFORMANCE in both the work report and the job performance.
      - Pass: Indicates that PERFORMANCE MEETS EXPECTATIONS in both the work report and the job performance.
      - Fail: Indicates FAILING PERFORMANCE in the work report or the job performance, or both. To remain in BCOP, a student must obtain a final grade of Pass or higher.
  - c. If a student fails to achieve the Work Term standards specified above, the student will be required to withdraw from BCOP. Such a student may reapply to the program, at which time the student will be required to repeat the Work Term with satisfactory performance. Only one Work Term may be repeated in the entire program.
  - d. In order to be considered for readmission, a student must formally apply for readmission to the program not later than the deadline date outlined under **Admission Requirements** above.
  - e. A student who withdraws from a Work Term without acceptable cause subsequent to a job placement will be required to withdraw permanently from BCOP.
  - f. A student who drops a Work Term without prior approval from both Co-operative Education and the Biology Co-op Liaison, or who fails to honour an agreement to work with an employer, or conducts him/herself in such a manner as to cause the discharge from the job, will be awarded an overall grade of FAIL for the Work Term in question and will be required to withdraw permanently from BCOP.
  - g. Permission to drop a Work Term does not constitute a waiver of degree requirements, and a student who has obtained such permission must complete an approved Work Term in lieu of the one dropped.

## 9.2.4 Honours Degrees

The attention of students wishing to take Honours is called to those sections of the Calendar dealing with Regulations for the Degree of Bachelor of Science (Honours).

Sixty-nine credit hours in courses, including the 6 first year credit hours and the 15 required core credit hours outlined in the regulations for the General Degree, and the Honours Dissertation (Biology 499A/499B), shall be taken from the Department of Biology offering. Students may elect to complete an Honours Program in Biology or in one of the joint Honours Programs listed under the heading "Programs in Biology". Programs of students taking Honours shall be drawn up in consultation with the student's supervisor, and must be approved by the Head of the Department (or his/her delegate) in accordance with **Admission and Registration**, clause 2. of the **Regulations for the Honours Degree of Bachelor of Science**.

*Note: Some Graduate Courses may be taken in the final year of the Honours Program with the permission of the Head of the Department and the course instructor.*

A dissertation (6 credit hours) is to be presented on some original piece of work undertaken by the candidate, under the guidance of a faculty member of the department, as appointed by the Head of Department. For students electing to take one of the Joint Honours Programs, the dissertation shall be on a topic representative of the selected program. The Department of Biology considers the dissertation to be an important part of the Honours Program.

The dissertation will be based on a 6 credit hours course (Biology 499A/499B). It will involve directed reading relevant to the dissertation topic, preparation of a dissertation outline, supervised research, data synthesis and interpretation, and preparation and defence of the dissertation.

Two typed copies of the dissertation, complete with figures and tables, are to be submitted not less than two weeks before the end of lectures in the semester in which the candidate is registered for Biology 499B. These copies must be submitted to the Head of Department, and must have met the prior approval of the candidate's Honours supervisor.

Before the last day for examinations in the semester, the candidate will be examined orally on the contents of the dissertation. The examining committee shall consist of the Head of the Department, or delegate, the candidate's supervisor, and an examiner appointed by the Head of the Department in consultation with the candidate's supervisor.

## 9.2.5 Honours in Biology

An Honours degree in Biology may comprise a broadly based selection of courses according to the student's interests, or it may be more narrowly focussed. An Honours student may focus on any area of Biology where an appropriate supervisor can be found. All Honours students should choose courses in consultation with their supervisors, but it is particularly important that students wishing to focus within

the Honours degree should discuss course selection with an Honours supervisor within their area of interest.

### 9.2.5.1 Biology Course Requirements

Students seeking an honours degree in Biology are required to successfully complete a minimum of 69 credit hours in courses from the Department of Biology offering. Those 69 credit hours must include:

1. Biology 1001 and 1002 or their equivalents;
2. 15 credit hours in the following core courses: Biology 2060, 2250, 2600, 2900, plus one of Biology 3401, 3402, 4245 or 4404; and
3. 42 credit hours from Biology electives at the 2000, 3000 or 4000 level (except Biology 2040, 2041, 2120, 3053, and 3820) and Biology 499A and 499B.
4. A maximum of 9 credit hours can be in Biology courses with no associated laboratory/seminar.

### 9.2.5.2 Core Course Requirements

All honours students must also successfully complete the following courses or their equivalents:

1. English 1080 and 1110 (or equivalent)
2. Physics 1020 and 1021 (or equivalent)
3. Mathematics 1000
4. Chemistry 1010 and 1011 (or equivalent), Chemistry 2440
5. Statistics 2550
6. Biochemistry 2101 and 3106
7. Electives to make up 120 credit hours

To minimize timetabling problems, students on the St. John's Campus are advised to take Biology 2250 and 2600 in their third semester (Fall), and Biology 2060 and 2900 in their fourth semester (Winter).

## 9.2.6 Honours in Cell and Molecular Biology

### 9.2.6.1 Cell and Molecular Biology Course Requirements

Students seeking an honours degree in Cell and Molecular Biology are required to complete a minimum of 69 credit hours in courses from the Department of Biology offering. Those 69 credit hours must include:

1. Biology 1001 and 1002 or their equivalents;
2. 15 credit hours in the following core courses: Biology 2060, 2250, 2600, 2900, plus one of Biology 3401, 3402, 4245 or 4404;
3. Biology 3530 and Biology 4241;
4. 12 credit hours from the following recommended Biology courses for Cell and Molecular Biology: Biology 3050, 3052, 3401, 3402, 3500, 3620, 3950, 3951, 4010, 4040, 4050, 4200, 4245, 4250, 4251, 4255, 4404, 4550, 4605, 4607; and
5. 24 credit hours in Biology electives at the 2000, 3000 or 4000 level (except Biology 2040, 2041, 2120, 3053, and 3820) and Biology 499A and 499B.
6. A maximum of 9 credit hours can be in Biology courses with no associated laboratory/seminar.

### 9.2.6.2 Core Course Requirements

All honours students must also successfully complete the following courses or their equivalents:

1. English 1080 and 1110 (or equivalent)
2. Physics 1020 and 1021 (or equivalent)
3. Mathematics 1000
4. Chemistry 1010 and 1011 (or equivalent), Chemistry 2440
5. Statistics 2550
6. Biochemistry 2101 and 3106
7. Electives to make up 120 credit hours

To minimize timetabling problems, students on the St. John's Campus are advised to take Biology 2250 and 2600 in their third semester (Fall), and Biology 2060 and 2900 in their fourth semester (Winter).

## 9.2.7 Honours in Ecology and Conservation Biology

### 9.2.7.1 Ecology and Conservation Biology Course Requirements

Students seeking an honours degree in Ecology and Conservation Biology are required to complete a minimum of 69 credit hours in courses from the Department of Biology offering. Those 69 credit hours must include:

1. Biology 1001 and 1002 or their equivalents;
2. 15 credit hours in the following core courses: Biology 2060, 2250, 2600, 2900, plus one of Biology 3401, 3402, 4245 or 4404;
3. Biology 4650 and 4651;
4. 12 credit hours from the following recommended biology courses for Ecology and Conservation Biology: Biology 3041, 3050, 3295, 3300, 3610, 3620, 3640, 3709, 3710, 3711, 3714, 3715, 3750, 4040, 4141, 4180, 4182, 4250, 4306, 4307, 4360, 4405, 4505, 4605, 4607, 4620, 4630, 4701, 4710, 4750, 4820; and
5. 24 credit hours in Biology electives at the 2000, 3000 or 4000 level (except Biology 2040, 2041, 2120, 3053, and 3820) and Biology 499A and 499B.
6. A maximum of 9 credit hours can be in Biology courses with no associated laboratory/seminar.

### 9.2.7.2 Core Course Requirements

All honours students must also successfully complete the following courses or their equivalents:

1. English 1080 and 1110 (or equivalent)

2. Physics 1020 and 1021 (or equivalent)
3. Mathematics 1000
4. Chemistry 1010 and 1011 (or equivalent), Chemistry 2440
5. Statistics 2550
6. Biochemistry 2101 and 3106
7. Electives to make up 120 credit hours

To minimize timetabling problems, students on the St. John's Campus are advised to take Biology 2250 and 2600 in their third semester (Fall), and Biology 2060 and 2900 in their fourth semester (Winter).

## 9.2.8 Honours in Marine Biology

### 9.2.8.1 Marine Biology Course Requirements

Students seeking an honours degree in Marine Biology are required to complete a minimum of 69 credit hours in courses from the Department of Biology offering. Those 69 credit hours must include:

1. Biology 1001 and 1002 or their equivalents;
2. 15 credit hours in the following core courses: Biology 2060, 2250, 2600, 2900, plus one of Biology 3401, 3402, 4245 or 4404;
3. Biology 3710 and 3711;
4. 12 credit hours from the following recommended biology courses for Marine Biology: Biology 3014, 3050, 3295, 3620, 3640, 3709, 3712, 3714, 3715, 3951, 4122, 4141, 4182, 4360, 4601, 4605, 4607, 4620, 4630, 4710, 4750, 4810, 4912; and
5. 24 credit hours in Biology electives at the 2000, 3000 or 4000 level (except Biology 2040, 2041, 2120, 3053, and 3820) and Biology 499A and 499B.
6. A maximum of 9 credit hours can be in Biology courses with no associated laboratory/seminar.

### 9.2.8.2 Core Course Requirements

All honours students must also successfully complete the following courses or their equivalents:

1. English 1080 and 1110 (or equivalent)
2. Physics 1020 and 1021 (or equivalent)
3. Mathematics 1000
4. Chemistry 1010 and 1011 (or equivalent), Chemistry 2440
5. Statistics 2550
6. Biochemistry 2101 and 3106
7. Electives to make up 120 credit hours

To minimize timetabling problems, students on the St. John's Campus are advised to take Biology 2250 and 2600 in their third semester (Fall), and Biology 2060 and 2900 in their fourth semester (Winter).

## 9.2.9 Honours in Biology (Co-operative)

### 9.2.9.1 Admission Requirements

See **Major in Biology (Co-operative)**.

### 9.2.9.2 Program of Study

1. In addition to the requirements below, a student must fulfill all requirements for either an Honours in Biology, Honours in Biology (Cell and Molecular), Honours in Biology (Ecology and Conservation), or Honours in Biology (Marine) as described under each specific program.
2. To remain in BCOP Honours, a student must receive a passing grade in all required courses, and must maintain an average of at least 65% in all Biology courses and an overall average of at least 70% in all courses, including electives.
3. A student is required to complete three work terms, one of which must be either in the Fall or Winter semester.

### 9.2.9.3 Work Term Placement

See **Major in Biology (Co-operative)**.

### 9.2.9.4 Registration and Evaluation of Performance

See **Major in Biology (Co-operative)**.

## 9.3 Chemistry

[www.chem.mun.ca](http://www.chem.mun.ca)

The following undergraduate programs are available in the Department:

1. Applied Mathematics and Chemistry Joint Honours
2. Biochemistry and Chemistry Joint Honours
3. Chemistry and Earth Sciences Joint Honours
4. Chemistry and Physics Joint Honours
5. Major or Honours in Chemistry. (Option to complete a Minor in Applied Science - Process Engineering) (see Faculty of Engineering and Applied Science for details)
6. Minor in Chemistry  
Minor in Chemistry for Faculty of Engineering Process Engineering Majors
7. Major or Honours in Computational Chemistry

The Major, Honours, and Joint Honours with Applied Mathematics, Biochemistry and Physics are accredited by the Canadian Society for Chemistry.

Details of joint programs are given under **Joint Programs**.

Chemistry course descriptions are found at the end of the Faculty of Science section under **Course Descriptions, Chemistry**.

### 9.3.1 Undergraduate Handbook

Additional information about the undergraduate program, individual courses and suggested timetables can be found in the Department of Chemistry Undergraduate Handbook which is available on the web at [www.chem.mun.ca](http://www.chem.mun.ca).

### 9.3.2 Faculty Advisors

Each student majoring in Chemistry will be assigned a Faculty Advisor who should be consulted on all academic matters. Individual programs must be drawn up in consultation with the advisor.

Note: *Students who have obtained a grade of 3 or better on the Advanced Placement courses in Chemistry will normally be eligible for direct entry into Chemistry 1051 or second year courses. Such students must consult the Department before registration.*

### 9.3.3 Minor in Chemistry

Students who take a minor in Chemistry will complete Chemistry 1050 and 1051 (or 1010, 1011 and the former 1031) (or 1200 and 1001), Chemistry 2100, 2210, 2301 or 2302, and 2400, and 6 credit hours in other chemistry courses at the 2000 level or above.

For Engineering students completing the **Process Engineering** major, a minor in Chemistry will consist of Chemistry 1050, 1051, 2100, 2210, 2301 (or Engineering 4602), 2302, 2400 and 3 credit hours chosen from the remaining Chemistry courses at the 2000 level or above.

### 9.3.4 General Degree - Major in Chemistry

The courses required for a Major in Chemistry are:

1. Chemistry 1050 and 1051 (or 1010, 1011 and the former 1031) (or 1200 and 1001), 2100, 2210, 2301, 2302, 2400, 2401, 3110, 3210, 3211, 3303, 3410, and 3411.
2. Physics 1050 (or 1020 and 1021) and 1051.
3. Mathematics 1000, 1001, 2000, and 2050.

Recommended courses: Biochemistry 2101, Mathematics 2051, Physics 2820 and/or 2750.

Students considering declaring Chemistry as their Major are encouraged to contact either the Head of the Department or the Deputy Head (Undergraduate Studies).

Chemistry Majors may complete a minor in **Applied Science - Process Engineering**. The requirements for this minor are detailed under **Faculty of Engineering and Applied Science, Minor in Applied Science - Process Engineering**.

### 9.3.5 Honours Degree in Chemistry

Students wishing to take Honours should consult those sections of the Calendar dealing with **Regulations for the Honours Degree of Bachelor of Science**.

#### 9.3.5.1 Required Courses

1. Chemistry 1050 and 1051 (or 1010, 1011 and the former 1031) (or 1200 and 1001), 2100, 2210, 2301, 2302, 2400, 2401, 3110, 3210, 3211, 3303, 3410, 3411, 490A/B and 12 credit hours selected from the remaining 4000-level Chemistry courses.
2. Physics 1050 (or 1020 and 1021) and 1051.
3. Mathematics 1000, 1001, 2000, and 2050.

Chemistry Honours students may complete a minor in **Applied Science - Process Engineering**. The requirements for this minor are detailed under **Faculty of Engineering and Applied Science, Minor in Applied Science - Process Engineering**.

#### 9.3.5.2 Other Information

1. Those courses in which a grade of B or an average of 75% or higher are required, as specified in **Regulations for the Honours Degree of Bachelor of Science, Academic Standing**, clause a., are the courses beyond first year used to satisfy clause 1. under **Required Courses** above.
2. Recommended courses: Biochemistry 2100, Biochemistry 2101, Mathematics 2051, Physics 2820 and/or 2750.
3. A thesis based on a selected research topic carried out under the supervision of a member of the Department is to be submitted in the final year.
4. Chemistry 490A/B will normally require the equivalent of nine hours per week for two semesters. Registration in Chemistry 490A/B is restricted to those students who have honours standing. The Honours dissertation will be assessed by a committee comprising the supervisor and one other faculty member.
5. With approval of the Heads of the Chemistry and Biochemistry Departments prior to registration, a number of courses in Biochemistry may be substituted for a like number of Chemistry courses.
6. Prospective Honours students in Chemistry in their first year should take
  - a. Six credit hours in English.
  - b. Chemistry 1050 and 1051 (or 1200 and 1001),
  - c. Physics 1050 and 1051 or 1020 and 1021.
  - d. Mathematics 1000 and 1001.
  - e. Six credit hours in other courses.
7. Given appropriate circumstances the Honours Chemistry program may be completed in four years. Students should consult the Undergraduate Student Handbook for timetabling details.
8. Students completing first year requirements for either Chemistry or Mathematics via the three course options (i.e. Chemistry 1010, 1050, 1051 (or 1010, 1011, and the former 1031), Mathematics 1090, 1000, 1001) instead of the two course options (Chemistry 1050, 1051, Mathematics 1000, 1001) will require the corresponding number of extra credits to obtain an Honours degree.

- Arrangements for subsequent years will depend on the other science subjects being studied and should be made in consultation with the Faculty Advisor.
- Certain advanced courses may only be offered in alternate years. Candidates therefore should consult the Head of the Department before registration
- Certain Graduate courses may be taken in the final year of the Honours Program with the permission of the Head of the Department.
- Details of Joint Honours programs with Biochemistry, Earth Sciences, Mathematics and Physics are outlined under **Joint Programs**.
- Details of the Environmental Science (Chemistry Stream) Major or Honours are outlined under the **Grenfell Campus** section off the Calendar.

### 9.3.6 General Degree - Major in Computational Chemistry

Students wishing to take a Major in Computational Chemistry should consult those regulations of the Calendar dealing with **Regulations for the General Degree of Bachelor of Science**.

#### 9.3.6.1 Required Courses

- Chemistry 1050 and 1051 (or 1010, 1011 and the former 1031) (or 1200 and 1001), 2100, 2210, 2301, 2302, 2400, 2401, 3210 or 3211, 3303, 4304, 4305.
- Physics 1050 (or 1020) and 1051 (or 1021), and 2820.
- Mathematics 1000, 1001, 2000, 2050, 2051, 2260 (or the former Mathematics 3260), and 3202.
- Computer Science 1510 and 1001.
- Computer Science 2500 and 2001
- Computer Science 3731 or Mathematics 3132.
- English 1080 and English 1110 or equivalent.
- A sufficient number of elective courses to bring the degree up to a total of 120 credit hours must also be completed.

#### 9.3.6.2 Suggested Program of Study

Given appropriate circumstances the Major in Computational Chemistry program can be completed in four years. While students should consult the Undergraduate Handbook for further timetabling details, to complete the program in four years generally will require that students take the following courses in their first year:

- English 1080 and English 1110 or equivalent.
- Chemistry 1050 and 1051 (or 1200 and 1001).
- Physics 1050 (or 1020) and 1051 (or 1021).
- Mathematics 1000 and 1001
- Computer Science 1510 and 1001

### 9.3.7 Honours Degree in Computational Chemistry

Students wishing to take Honours in Computational Chemistry should consult those sections of the Calendar dealing with **Regulations for the Honours Degree of Bachelor of Science**. The Honours program in Computational Chemistry consists of a minimum of 39 credit hours in Chemistry, a minimum of 21 credit hours in Mathematics, a minimum of 15 credit hours in Physics, and a minimum of 15 credit hours in Computer Science. An additional 3 credit hours in recommended Biochemistry, Chemistry, Computer Science, Mathematics or Physics courses are also required in addition to the minimum credit hour requirements.

#### 9.3.7.1 Required Courses

- Chemistry 1050 and 1051 (or 1010, 1011 and the former 1031) (or 1200 and 1001), 2100, 2210, 2301, 2302, 2400, 2401, 3210 or 3211, 3303, 4304, and 4305.
- Physics 1050 (or 1020) and 1051 (or 1021), and 2820.
- Mathematics 1000, 1001, 2000, 2050, 2051, 2260 (or the former Mathematics 3260), and 3202.
- Computer Science 1510 and 1001.
- Computer Science 2500 and 2001.
- Computer Science 3731 or Mathematics 3132.
- Chemistry 490A/B.
- English 1080 and English 1110 or equivalent.
- 3 additional credit hours in Biochemistry, Chemistry, Computer Science, Mathematics, or Physics at the 2000 level or above.
- A sufficient number of elective courses to bring the degree up to a total of 120 credit hours must also be completed.

#### 9.3.7.2 Suggested Program of Study

Given appropriate circumstances the Honours in Computational Chemistry program can be completed in four years. While students should consult the Undergraduate Handbook for further timetabling details, to complete the program in four years generally will require that students take the following courses in their first year:

- English 1080 and English 1110 or equivalent.
- Chemistry 1050 and 1051 (or 1200 and 1001).
- Physics 1050 (or 1020) and 1051 (or 1021).
- Mathematics 1000 and 1001
- Computer Science 1510 and 1001.

#### 9.3.7.3 Other Information

- Those courses in which a grade of B or an average of 75% or higher are required, as specified in **Regulations for the Honours Degree of Bachelor of Science, Academic Standing**, are the courses beyond first year used to satisfy the required course list.

- A thesis based on a selected research topic carried out under the supervision of a member of the Department is to be submitted in the final year.
- Chemistry 490A/B will normally require the equivalent of nine hours per week for two semesters. Registration in Chemistry 490A/B is restricted to those students who have honours standing. The Honours dissertation will be assessed by a committee comprising the supervisor and one other faculty member.
- Students completing first year requirements for any of Chemistry, Mathematics or Physics via the three course options (i.e. Chemistry 1010, 1050 and 1051 or 1010, 1011, the former 1031, Mathematics 1090, 1000, 1001, Physics 1020, 1021, 1051) instead of the two course options (Chemistry 1050, 1051, Chemistry 1200, 1001, Mathematics 1000, 1001, Physics 1050, 1051) will require the corresponding number of extra credits to obtain an Honours degree.
- Arrangements for subsequent years will depend on the other science subjects being studied and should be made in consultation with the Faculty Advisor.
- Certain advanced courses may only be offered in alternate years. Candidates therefore should consult the Head of the Department before registration.
- Certain Graduate courses may be taken in the final year of the Honours Program with the permission of the Head of the Department.

### 9.3.8 Course Restrictions

Students should be aware of a number of credit restrictions. For further information see the Chemistry course descriptions section found at the end of the Faculty of Science section under **Course Descriptions, Chemistry**.

## 9.4 Computer Science

[www.mun.ca/computerscience](http://www.mun.ca/computerscience)

The following undergraduate programs are available in the Department:

- Applied Mathematics and Computer Science Joint Major (B.Sc. only)
- Computer Internship Option (CIIO)
- Computer Science Honours (B.A., B.Sc.)
- Computer Science and Economics Joint Major (B.Sc. only)
- Computer Science and Geography Joint Honours (B.Sc. only)
- Computer Science and Geography Joint Major (B.Sc. only)
- Computer Science and Physics Joint Honours
- Computer Science and Physics Joint Major
- Computer Science and Pure Mathematics Joint Honours (B.Sc. only)
- Computer Science and Pure Mathematics Joint Major (B.Sc. only)
- Computer Science and Statistics Joint Honours
- Computer Science and Statistics Joint Major (B.Sc. only)
- Computer Science (Software Engineering) Honours (B.Sc. only)
- Major in Computer Science (B.A., B.Sc.)
- Minor in Computer Science (B.A., B.Sc.)

Details of joint program offerings in the Faculties of Humanities and Social Sciences and Science may be found under the heading **Joint Programs** following the heading **Regulations for the Honours Degree of Bachelor of Science**.

Computer Science course descriptions are found at the end of the Faculty of Science section under **Course Descriptions, Computer Science**.

### 9.4.1 Major in Computer Science

- Forty-five credit hours in Computer Science courses are required for a major in Computer Science:
  - Computer Science 1000, 1001, 1002, 2001, 2002, 2003, 2004, 2005, 2006, 2007, and 2008.
  - At least 6 additional credit hours in Computer Science at the 4000 level.
  - Twelve additional credit hours in Computer Science at the 3000 level or beyond.
- Additional courses required are: Mathematics 1000, 1001, 2000, 2050, and Statistics 1510 or 2550.

Note: *Students are encouraged to take Business 2000, Mathematics 3000, and Statistics 2560.*

### 9.4.2 Honours in Computer Science

- See **Regulations for the Honours Degree of Bachelor of Arts** or **Regulations for the Honours Degree of Bachelor of Science** (as appropriate).
- Sixty-three credit hours in Computer Science courses are required for the Honours Degree in Computer Science, including:
  - Computer Science 1000, 1001, 1002, 2001, 2002, 2003, 2004, 2005, 2006, 2007, 2008, and 4780.
  - Fifteen additional credit hours in Computer Science at the 4000 level.
  - Eighteen additional credit hours in Computer Science courses at the 3000 level or beyond.
- Additional courses required are: Mathematics 1000, 1001, 2000, 2050, and Statistics 1510 or 2550.

Note: *Students are encouraged to take Business 2000, Mathematics 3000, and Statistics 2560.*

### 9.4.3 Honours in Computer Science (Software Engineering) (B.Sc. Only)

Completion of the Honours in Computer Science (Software Engineering) Program does not qualify persons to hold the designation "Professional Engineer" as defined by various Provincial Acts governing the Engineering Profession.

- See **Regulations for the Honours Degree of Bachelor of Science**.
- Sixty-three credit hours in Computer Science courses are required for the Honours Degree in Computer Science (Software Engineering), including:

- a. Computer Science 1000, 1001, 1002, 2001, 2002, 2003, 2004, 2005, 2006, 2007, 2008, 4770, 4780.
  - b. Nine additional credit hours in Computer Science chosen from 4718, 4721, 4723, 4751, 4753, 4756, 4759, 4766, and 4768.
  - c. Nine additional credit hours in Computer Science at the 4000 level.
  - d. Twelve additional credit hours in Computer Science at the 3000 level or beyond.
3. Additional courses required are: Mathematics 1000, 1001, 2000, 2050, and Statistics 1510 or 2550.

Note: *The Honours project (4780) must be in the area of Software Engineering.*

#### 9.4.4 Minor in Computer Science

For a Minor in Computer Science, a student must complete at least 24 credit hours in Computer Science courses, including:

1. Computer Science 1000, 1001, 2001.
2. At least 6 credit hours selected from Computer Science 1002, 2002, 2003, 2004, 2005, 2006, 2007, 2008.
3. Three additional credit hours at the 3000 level or above.
4. Additional courses as necessary to fulfill the requirement for 24 credit hours in Computer Science.

#### 9.4.5 Computer Industry Internship Option (CIIO):

The Computer Industry Internship Option (CIIO) provides an opportunity for qualified students to obtain rewarding placements that help them develop practical skills in a real work setting before graduation. The CIIO is available to Computer Science Majors who will typically apply between their third and fourth year of studies.

##### 9.4.5.1 Admission Requirements

In order to be considered for admission to the CIIO, an applicant:

1. must be a declared Computer Science Major;
2. must have successfully completed Computer Science 1000, 1001, 1002, 2001, 2002, 2003, 2004, 2005, 2006, 2007, 2008 and 6 credit hours at the 3000 level'
3. must have at least 15 credit hours remaining after the internship in order to satisfy degree requirements, 3 of which must be in Computer Science; and
4. is expected to return to University as a full-time student after the internship.

In addition to meeting the above, applicants are also subject to academic performance.

##### 9.4.5.2 Internship Duration:

Subject to the availability of job openings, a student may choose either an 8, 12 or 16 consecutive month internship period.

##### 9.4.5.3 Internship Guidelines:

1. Internship employment is normally organized by Co-operative Education; however, students who have been accepted to the CIIO may also obtain their own internship placements. All placements are subject to the approval of Co-operative Education and of the Head of the Department of Computer Science.
2. Students who have applied to the internship program give permission to Co-operative Education to supply prospective employers with copies of their resume and transcript.
3. After being placed with an employer, students are not permitted to drop their internship without prior approval from Co-operative Education and the Head of the Department of Computer Science. Students who drop an internship without permission, who fail to honour an agreement to work with an employer, or who conduct themselves in such a manner as to cause their discharge from the placements, will normally be awarded a fail grade for the internship period and may not be permitted to reapply.

Note: *Students should also refer to the UNIVERSITY REGULATIONS - General Academic Regulations (Undergraduate).*

##### 9.4.5.4 Expectation of Work

Within two weeks of starting the internship, students are required to submit a list of their internship objectives to Co-operative Education. They are also required to submit a report to Co-operative Education due the last day of classes of each semester in which they are working. A progress report is required in semesters where the internship is continuing into the next semester. The progress report need only discuss the activities in that particular semester. A final report is required in the student's final internship semester. The final report must discuss the entire internship. Both reports will include a description of the student's internship projects and activities as well as the student's internship objectives and accomplishments. A completed Employer Evaluation Form should be submitted to Co-operative Education at the end of each semester.

##### 9.4.5.5 Registration, Assessment of Performance, and Assignment of Grades:

Students must register for the course Computer Science 3700 every semester during their internship.

Computer Science 3700 is a non-credit course open only to students who have been accepted into the Internship Program.

During the internship, the employer and intern will complete student performance evaluations every four months and will submit them to Co-operative Education. The final assessment of total work performed is the responsibility of Co-operative Education, and will be based upon both input from the employer and the intern's final internship report.

The Internship evaluation shall consist of two components:

1. On-the-job Student Performance: Job performance shall be assessed by Co-operative Education in consultation with the Department using information gathered during the internship and input from the employer. Evaluation of the on-the-job student performance will result in one of the following classifications: PASS WITH DISTINCTION, PASS, FAIL.
2. The Final Internship Report: Evaluation of the final internship report will result in one of the following classifications: PASS WITH DISTINCTION, PASS, FAIL.

The evaluation of the on-the-job student performance and the final internship report are recorded separately on the transcript.

Overall evaluation of the internship will result in one of the following final grades being awarded:

1. PASS WITH DISTINCTION: indicates outstanding performance in both the final internship report and the on-the-job student performance. PASS WITH DISTINCTION has been awarded to each of the final internship report and the on-the-job student

performance.

2. PASS: indicates that performance meets expectations in both the final internship report and on-the-job student performance. The student meets the requirements of a passing mark in the final internship report and on-the-job student performance.
3. FAIL: indicates failing performance in either the final internship report or on-the-job student performance or both.

Also, the following will be noted in the transcript of the intern:

1. Requirements for the Computer Industry Internship Option have been completed. Internship Duration: - months.
2. A grade of NC (No Credit) for Computer Science 3700 will be awarded in all semesters of the Internship Option prior to the final Semester.

#### 9.4.5.6 CIIO and Honours Program:

In case a student is enrolled in both the Honours program and the CIIO, the requirements of both must be met. Upon approval from the honours project supervisor within the Department, the employer and the Head of the Department of Computer Science, an internship project may be submitted as a component of an honours project. These arrangements must be made within the first semester of the Internship placement.

#### 9.4.6 Supplementary Examinations

Supplementary examinations will be allowed in certain Computer Science courses which have written final examinations. Students should refer to the **Faculty of Science Degree Regulations** for details.

#### 9.4.7 Faculty Advisors

The Department has an Undergraduate Advisor for Computer Science majors to consult with on academic matters.

#### 9.4.8 Undergraduate Handbook

Additional information about the undergraduate Computer Science programs and courses can be found in the Computer Science Undergraduate Handbook available from the General Office, Department of Computer Science or from [www.mun.ca/computerscience/](http://www.mun.ca/computerscience/).

### 9.5 Earth Sciences

[www.mun.ca/earthsciences](http://www.mun.ca/earthsciences)

The following undergraduate programs are available:

#### 120 credit hour programs

1. Chemistry and Earth Sciences Joint Honours
2. Earth Sciences and Geography Joint Honours
3. Earth Sciences and Physics Joint Honours
4. Earth Sciences and Physics Joint Major
5. General or Honours degrees in Earth Sciences
6. Geophysics and Physical Oceanography Joint Honours

#### 135 credit hour program

1. Biology and Earth Sciences Joint Honours

#### 24 credit hour program

1. Minor in Earth Sciences

Although Honours programs can be completed in 120 credit hours, students who do not select the prescribed **Common Block of Required Courses** will normally need more than 120 credit hours to satisfy degree requirements.

Earth Sciences course descriptions are found at the end of the Faculty of Science section under **Course Descriptions, Earth Sciences**.

#### 9.5.1 Undergraduate Handbook

Additional information about the undergraduate program, individual courses and suggested timetables can be found in the Department of Earth Sciences Undergraduate Handbook which is available on the web at [www.mun.ca/earthsciences](http://www.mun.ca/earthsciences).

#### 9.5.2 Entrance Requirements

In order to be formally admitted to major programs in Earth Sciences, students must have successfully completed 3 first-year credit hours in each of the following departments: English, Mathematics, Earth Sciences, Chemistry and Physics; these courses must be selected from the list of required courses for degree programs in Earth Sciences. Students are encouraged to declare their major in their first year of study at the university.

Most of the 2000 level Earth Sciences courses that are required for major and minor programs in Earth Sciences have Physics and Chemistry prerequisites, and students are advised to complete these prerequisites in their first year of study.

Students will not normally be permitted entry to 3000 level (or above) Earth Sciences courses without having completed all 1000-level courses listed in the **Common Block of Required Courses** specified in Clause 1. in the **Major Programs in Earth Sciences**.

#### 9.5.3 Minor in Earth Sciences

A Minor in Earth Sciences will consist of the following:

1. Earth Sciences 1000 and 1002.
2. Eighteen credit hours chosen from Earth Sciences courses at the 2000 level or higher with at least 5 credit hours from courses at the 2000 level. Credit hours from Earth Sciences 2150, 2311, 2914, 2915, 2916, 2917, 2918, 4310 and 4950 cannot be used to fulfil this requirement.

Due to the prerequisite structure, availability of courses at the 3000 level and higher depends on courses taken at the 2000 level (see Undergraduate Handbook for some options).

## 9.5.4 Major Programs in Earth Sciences

Programs in Earth Sciences consist of a **Common Block of Required Courses** (below), and additional courses that depend on the degree being sought.

### 9.5.4.1 Common Block of Required Courses

All majors in Earth Sciences must complete those courses specified in Clauses 1. through 4. Students should examine prerequisites of 3000 level courses in order to decide which course to select under Clauses 3. and 4.

1. English 1080 and 1110 (or equivalent), Mathematics 1000 and 1001, Earth Sciences 1000 and 1002, one of Chemistry 1050 or 1010 or 1200 and one of Chemistry 1051 or 1011 or 1001, Physics 1050 and 1051 or Physics 1020 and 1021. Students are advised to consult the Department of Physics Course Descriptions section for credit restrictions.

Students who intend or are required to complete higher level Physics courses must complete Physics 1051 as well, since it is a prerequisite for higher level Physics courses. Students should review the Department of Physics Calendar entry for these courses.

2. Earth Sciences 2030, 2031, 2401, 2502, 2702, 2905, 3420, 3905.
3. Mathematics 2000 or Statistics 2550.
4. Either Biology 2120 (or Biology 1001 and 1002); or both Physics 2055 and Physics 2820.

Students must ensure that the prerequisites for Earth Sciences courses are fulfilled. Great difficulties in timetabling may be encountered if the required first-year courses are not completed before the beginning of second year.

## 9.5.5 Honours B.Sc. Degree in Earth Sciences

Geoscientific careers vary widely in required background. The Honours B.Sc. program is designed with considerable choice in order that students may personalize their programs based on career goals. Note that the flexibility afforded by this program is not without limits. Some courses have prerequisites, and it is ultimately the student's responsibility to ensure that these prerequisites are satisfied. Students should consult faculty members and the departmental Student Handbook for guidance in selecting courses appropriate to particular career paths.

In addition to the **Common Block of Required Courses** listed under **Major Programs in Earth Sciences**, the following requirements must be completed to qualify for the Honours B.Sc. degree in Earth Sciences:

1. Earth Sciences 499A and 499B.
2. At least 27 additional credit hours from Earth Sciences courses at 3000 and/or 4000 levels with a minimum of 12 credit hours from courses at the 4000 level. Credit hours from Earth Sciences 4310 and 4950 cannot be used to fulfill this requirement.
3. Six credit hours from the Faculty of Science courses numbered 2000 or higher. Credit hours from Earth Sciences courses, courses that are cross-listed with Earth Sciences courses, and the former Physics 2050 are excluded. However, Physics 2820 is permitted.
4. Additional credit hours selected to conform with regulations for the Honours Degree of Bachelor Science so as to achieve a total of 120 credit hours. Students are encouraged to complete a minor in another department.
5. Three of the credit hours used to fulfill either requirement 3. or 4. above must be from Biology, Chemistry, Computer Science, Statistics or Physics. They may be from Mathematics only if Mathematics 2000 has not been taken as part of the **Common Block of Required Courses**.

## 9.5.6 General B.Sc. Degree in Earth Sciences

In addition to the **Common Block of Required Courses** listed under **Major Programs in Earth Sciences**, the following requirements must be completed to qualify for the General B.Sc. degree in Earth Sciences:

1. Eighteen additional credit hours from Earth Sciences courses at 3000 and/or 4000 levels with a minimum of 9 credit hours from courses at 4000 level. Credit hours from Earth Sciences 4310, 4950 and 499A/B cannot be used to fulfill this requirement.
2. Six credit hours from Science Faculty courses numbered 2000 or higher. Credit hours from Earth Sciences courses, courses that are cross-listed with Earth Sciences courses, and the former Physics 2050 are excluded. However, Physics 2820 is permitted.
3. Additional credit hours selected to conform with regulations for the General Degree of Bachelor Science so as to achieve a total of 120 credit hours. Students are encouraged to complete a minor in another department.

Students are advised that this is the minimum requirement for the General B.Sc. in Earth Sciences. Many provinces, including Newfoundland and Labrador, have legislation requiring registration of professional geoscientists. A basic requirement for registration is, in most cases, the course equivalent of an Honours B.Sc. degree. Students intending to make a career in Earth Sciences should consider taking the Honours Degree program of courses, regardless of whether honours standing is maintained.

### 9.5.7 Credit Restrictions for Present Earth Sciences (EASC) Courses with Former Courses Table

Present	Former Equivalents	Present	Former Equivalents
EASC 1000	EASC 1010, Geology 1000, Geology 1010	EASC 3611	EASC 4611
EASC 1001	EASC 1011, Geology 1001, Geology 1011	EASC 3705	EASC 4700, Geology 3070
EASC 2030	EASC 203A, Geology 203A	EASC 3811	EASC 3801, EASC 2801, Geology 2801
EASC 2031	EASC 203B, Geology 203B	EASC 4053	Geology 4053
EASC 2150	Physics 2150	EASC 4054	EASC 4052, Geology 4052
EASC 2401	EASC 3400, EASC 3120, Geology 3120	EASC 4171	Physics 4171
EASC 2502	EASC 2501, EASC 3200, Geology 3200	EASC 4179	EASC 4970, Physics 4970
EASC 2702	EASC 3701, EASC 3070, Geology 3070	EASC 4211	Geology 4211
EASC 2905	EASC 2310, EASC 2300, EASC 2900, Geology 2900	EASC 4302	EASC 4501, Geology 4501
EASC 2914	EASC 2414, Geology 2414	EASC 4310	Geology 4310
EASC 2915	EASC 2415, Geology 2415	EASC 4400	EASC 4120, Geology 4120
EASC 3054	EASC 2503 and EASC 3053	EASC 4420	EASC 400A, EASC 4320, EASC 4901, Geology 400A
EASC 3055	EASC 2503 and EASC 3053	EASC 4502	EASC 4201, Geology 4201
EASC 3170	Physics 3170	EASC 4601	Geology 4601
EASC 3172	EASC 3171, Physics 3171	EASC 4800	EASC 4110, Geology 4110
EASC 3210	Geology 3210	EASC 499A/B	EASC 4991, Geology 4991
EASC 3420	EASC 2400, EASC 4901, EASC 2161, EASC 2070, Physics 2070		

- Notes:
1. Students wishing to pursue study within the programs offered by Earth Sciences are strongly advised to keep in close contact with the Department to discuss course programs before registration in order to maintain proper sequencing.
  2. Students wishing to take some Earth Sciences courses without intending to major in Earth Sciences should consult with the Head of Department (or delegate) to determine the courses most suitable to their needs and capabilities. Earth Sciences 2914, 2915, 2916, 2917, 2918, and 2150 are especially suitable for such students and have no Earth Sciences prerequisites.
  3. Most courses comprise six hours of instruction per week, usually three hours of lectures or seminars and a three-hour laboratory period; however, at an advanced level other methods of instruction may be adopted.
  4. The field courses 2905, 3705, 3905 and 4905 require payment of a participation fee to cover costs for logistics and equipment. Registration for these courses will be by application only and may be competitive.
  5. The prerequisites for courses 4302, 4902 and 4903 refer to core courses in the Faculty of Science. For the purposes of these prerequisite statements, core courses are defined as those courses that are specified by each department as mandatory to fulfil the course requirements for their General or Honours programs.
  6. Certain 4000 level courses may not be offered every year.
  7. At most 6 credit hours in courses at the 1000-level can be used towards the course requirements in Earth Sciences for the Major, Minor, Joint Major, Honours or Joint Honours.

## 9.6 Economics

The following programs are available in the Department of Economics:

1. Honours in Economics (B.A. or B.Sc.)
2. Honours in Economics (Co-operative), (B.A. or B.Sc.)
3. Joint Programs (B.Sc. Only)
4. Joint Program (Co-operative) (B.Sc. Only)
5. Major in Economics (B.A. or B.Sc.)
6. Major in Economics (Co-operative) (B.A. or B.Sc.)
7. Minor in Economics

For Departmental Regulations and Course Descriptions, see Faculty of Humanities and Social Sciences section of the Calendar.

## 9.7 Geography

The following undergraduate programs are available in the Department of Geography:

1. Diploma in Geographic Information Sciences
2. Focus Area in Geography
3. Honours in Geography (B.A., B.Sc)
4. Joint Programs
5. Major in Geography (B.A., B.Sc)
6. Minor in Geography (B.A., B.Sc)

For Departmental Regulations and Course Descriptions, see Faculty of Humanities and Social Sciences section of the Calendar.

## 9.8 Mathematics and Statistics

www.mun.ca/math

The following undergraduate programs are available in the Department:

1. Applied Mathematics and Chemistry Joint Honours (B.Sc. only)
2. Applied Mathematics and Computer Science Joint Major (B.Sc. only)
3. Applied Mathematics and Economics Joint Major (B.Sc. only)
4. Applied Mathematics and Physics Joint Honours (B.Sc. only)
5. Applied Mathematics and Physics Joint Major (B.Sc. only)
6. Biology and Statistics Joint Honours (B.Sc. only)
7. Computer Science and Pure Mathematics Joint Honours (B.Sc. only)
8. Computer Science and Pure Mathematics Joint Major (B.Sc. only)
9. Computer Science and Statistics Joint Honours (B.Sc. only)
10. Computer Science and Statistics Joint Major (B.Sc. only)
11. Economics and Pure Mathematics Joint Major (B.Sc. only)
12. Economics and Statistics Joint Major (B.Sc. only)
13. Economics and Statistics (Co-operative) Joint Major (B.Sc. only)
14. Honours in Applied Mathematics (B.Sc. only)
15. Honours in Pure Mathematics
16. Honours in Statistics
17. Major in Applied Mathematics (B.Sc. only)
18. Major in Pure Mathematics
19. Major in Statistics
20. Minor in Mathematics
21. Minor in Statistics
22. Pure Mathematics and Statistics Joint Honours

Details of these programs are given after the **Regulations for the Honours Degree of Bachelor of Science**.

Mathematics and Statistics course descriptions are found at the end of the Faculty of Science section under **Course Descriptions, Mathematics and Statistics**.

### 9.8.1 Regulations

1. At most 9 credit hours in Mathematics will be given for courses completed from the following list subject to normal credit restrictions: Mathematics 1000, 1031, 1050, 1051, the former 1080, the former 1081, 1090, the former 1150 and 1151.
2. Students with credits in Mathematics or Statistics not listed in this Calendar must consult the Department for equivalency before taking any course listed under **Course Descriptions, Mathematics and Statistics**.
3. Placement in Mathematics 1000, 1050, 1051 and 1090, and Statistics 1510, shall be determined by the Department of Mathematics and Statistics on the basis of the student's score on the Mathematics Placement Test (MPT), SAT Subject Test in Mathematics Level 1, or other acceptable criteria-based test.

### 9.8.2 Faculty Advisors

Normally, the Program Officer will be the advisor for each student who has undertaken a major in Applied or Pure Mathematics, and the Deputy Head (Statistics) will be the advisor for any student involved in a major in Statistics. Students should consult with their advisor at least once each semester to ensure that their choice of courses is appropriate.

Note: *The Department of Mathematics and Statistics will endeavour to give appropriate advice to students registered in its programs. However, the Department points out that it is the responsibility of the student to see that his or her academic program meets the University's Regulations in all respects. Students are referred to the **UNIVERSITY REGULATIONS - General Academic Regulations (Undergraduate), Registration, Student Responsibility**. The Department accepts no responsibility for any matter arising from an inappropriate and/or improperly recorded registration.*

### 9.8.3 Course Numbering System

The subject area of all courses offered by the Department of Mathematics and Statistics is identified by the second digit of the course number:

#### Second Digit

- 0 – Common Core Mathematics courses
- 1 – Applied Mathematics courses
- 2 – Applied Mathematics and Pure Mathematics courses
- 3 – Pure Mathematics courses
- 4 – Pure Mathematics and Statistics courses
- 5 – Statistics courses

Unless otherwise specified, where a regulation makes reference to Mathematics courses, this shall include courses in any of the categories listed above.

Where a regulation makes reference to Applied Mathematics courses, this shall include all courses with second digit 1 or 2. Where a regulation makes reference to Pure Mathematics courses, this shall include all courses with second digit 2, 3 or 4. Where a regulation makes reference to Statistics courses, this shall include all courses with second digit 4 or 5.

### 9.8.4 Major in Applied Mathematics (B.Sc. Only)

Students shall complete the following requirements:

1. Mathematics 1000, 1001, 2000, 2050, 2051, 2260, 3000, 3001, 3100, 3132, 3161, 3202, 4160, 4190.
2. Three credit hours in courses numbered 3000 or higher that are offered by the Department of Mathematics and Statistics, excluding the former Mathematics 3330.
3. A computing course, early in your program. Computer Science 1510 is highly recommended.
4. A designated technical writing course offered by a Science department. Mathematics 2130 is recommended. The technical writing course is prerequisite to some 3000-level courses.
5. Physics 1050 (or 1020) and 1051.
6. A statistics course. Statistics 3410 is recommended.

### 9.8.5 Major in Pure Mathematics

Students shall complete the following requirements:

1. Mathematics 1000, 1001, 2000, 2050, 2051, 2320, 3000, 3001, 3320;
2. One of Mathematics 2260, 3202, 3210;
3. One of Mathematics 3331, 3370;
4. Twelve further credit hours in Pure Mathematics courses numbered 3000 or higher, excluding the former Mathematics 3260 and 3330, at least 6 credit hours of which must be in courses numbered 4000 or higher;
5. A computing course. Computer Science 1510 is recommended.
6. A designated technical writing course offered by a Science department. Mathematics 2130 is recommended.
7. A statistics course. Statistics 3410 is recommended.

### 9.8.6 Major in Statistics

Students shall complete the following requirements:

1. Mathematics 1000, 1001, 2000, 2050, 2051, Statistics 2560, 3410, 3411, 3520, 3521, 4530;
2. One of Statistics 1510, 2500, or 2550;
3. Nine further credit hours in Statistics courses numbered 3000 or higher, at least 6 credit hours of which must be in courses numbered 4000 or higher excluding Statistics 4581;
4. A computing course. Computer Science 1510 is recommended.
5. Mathematics 3000 and 3001 are recommended.

### 9.8.7 Honours in Applied Mathematics (B.Sc. Only)

See **Regulations for the Honours Degree of Bachelor of Science**. Students shall complete the following:

1. Mathematics 1000, 1001, 2000, 2050, 2051, 2130, 2260, 3000, 3001, 3100, 3111, 3132, 3161, 3202, 3210, 4160, 4180, 4190, 419A/B;
2. At least one of Mathematics 4162 or 4170;
3. Statistics 3410;
4. Nine further credit hours in courses numbered 3000 or higher that are offered by the Department of Mathematics and Statistics, excluding the former Mathematics 3330, at least 3 of which must be in courses numbered 4000 or higher;
5. A computing course early in the program is required. Computer Science 1510 is recommended.
6. Physics 1050 (or 1020), 1051, 2820, 3220.

### 9.8.8 Honours in Pure Mathematics

See **Regulations for the Honours Degree of Bachelor of Science**. Students shall complete the following requirements:

1. Mathematics 1000, 1001, 2000, 2050, 2051, 2130, 2260, 2320, 3000, 3001, 3202, 3210, 3300, 3320, 3331, 4300, 4310, 439A/B, Statistics 2550;
2. Either Mathematics 3340 or 3370;
3. Either Mathematics 4000 or 4001;
4. Either Mathematics 4320 or 4321;
5. Twelve further credit hours in Pure Mathematics courses numbered 3000 or higher, excluding the former Mathematics 3330, at least 9 credit hours of which must be in courses numbered 4000 or higher;
6. A computing course early in the program is required. Computer Science 1510 is recommended.

### 9.8.9 Honours in Statistics

See **Regulations for the Honours Degree of Bachelor of Science**. Students shall complete the following requirements:

1. Mathematics 1000, 1001, 2000, 2050, 2051, 3000, 3001, 3132, 3202, 3210, Statistics 2560, 3410, 3411, 3520, 3521, 4410, 4530, 4590, 459A/B;
2. One of Statistics 1510, 2500, or 2550;
3. Eighteen further credit hours in Statistics courses including at least 12 credit hours in courses numbered 4000 or higher excluding Statistics 4581;
4. A computing course. Computer Science 1510 is recommended.
5. Mathematics 4000 is recommended.

### 9.8.10 Minor in Mathematics

A total of 24 credit hours in courses offered by the Department of Mathematics and Statistics is required of which only 6 credit hours shall be in courses at the 1000 level and at least 6 credit hours shall be in courses numbered 3000 or higher.

### 9.8.11 Minor in Statistics

The courses required for a minor in Statistics are:

1. Mathematics 1000, 1001; Statistics 1510 or 2500 or 2550, Statistics 2501 or 2560.
2. Twelve further credit hours in Statistics courses numbered 3000 or higher excluding Statistics 4581.

It is recommended that Mathematics 2000 and Mathematics 2050 be taken since they are prerequisite to several further Statistics courses.

## 9.9 Ocean Sciences

[www.mun.ca/osc](http://www.mun.ca/osc)

The Department of Ocean Sciences is newest Department within the Faculty of Science. The faculty within this Department are the former faculty of the **Ocean Sciences Centre**, a research unit and facility that was first opened in 1967.

The Department's mandate as an interdisciplinary unit is to focus on increasing our understanding of biological and chemical processes within the oceans, and with those associated with aquaculture.

The Department offers undergraduate programs in Ocean Sciences and graduate programs in Marine Biology.

Ocean Sciences course descriptions are found at the end of the Faculty of Science section under **Course Descriptions, Ocean Sciences**.

### 9.9.1 Minor in Oceanography

Students who take a Minor In Oceanography will complete 24 credit hours as follows:

1. Ocean Sciences 1000, 2100, 2200, 2300;
2. Ocean Sciences 2000 or Biology 3710;
3. Earth Sciences 1000; and
4. the remaining 6 credit hours should be selected from Biology 3014, 3709, 3711, 3712, 3714, 3715, 4122, 4601, 4710, 4750, 4810, Chemistry 2100, 3110, 4151, 4156, Earth Sciences 4302, Geography 3120, 3510, 4190, 4300, Environmental Science 3072, 3210, 3211, 4230, Ocean Sciences 2001, 3000, 3002, 3620, 4000, 4122, 4601, and Physics and Physical Oceanography 3300, 3340, 4300, 4340.

Course prerequisites stipulated in the **Course Descriptions** section shall apply to a Minor In Oceanography.

### 9.9.2 Minor in Sustainable Aquaculture and Fisheries Ecology

Students who take a minor in Sustainable Aquaculture and Fisheries Ecology will complete 24 credit hours as follows:

1. Ocean Sciences 1000, 2001, 3000, 3002;
2. Biology 4750 or Geography 4300;
3. One of Ocean Sciences 2000, 3620, 3640, 4000, 4100, 4122, 4601;
4. One of Biology 2122, 3401, 3640, 3715, 4251, 4605; and
5. One of Biochemistry 3107, 3402, 4002, 4101, 4104, 4105, 4200, 4201.

Course prerequisites stipulated in the **Course Descriptions** shall apply to a minor in Sustainable Aquaculture and Fisheries Ecology.

## 9.10 Physics and Physical Oceanography

[www.mun.ca/physics](http://www.mun.ca/physics)

The following undergraduate programs are available in the Department:

1. Applied Mathematics and Physics Joint Honours
2. Applied Mathematics and Physics Joint Major
3. Biochemistry and Physics Joint Honours
4. Chemistry and Physics Joint Honours
5. Computer Science and Physics Joint Honours
6. Computer Science and Physics Joint Major
7. Earth Sciences and Physics Joint Honours
8. Earth Sciences and Physics Joint Major
9. Geophysics and Physical Oceanography Joint Honours
10. Honours in Environmental Physics
11. Honours in Physics
12. Major in Environmental Physics
13. Major in Physics
14. Minor in Physics

Details of these joint programs are given after the **Regulations for the Honours Degree of Bachelor of Science**. Other joint programs may be arranged in consultation with the departments concerned.

Physics and Physical Oceanography course descriptions are found at the end of the Faculty of Science section under **Course Descriptions, Physics and Physical Oceanography**.

- Notes: 1. The attention of students intending to follow any one of the programs listed above is drawn to the **UNIVERSITY REGULATIONS - General Academic Regulations (Undergraduate)**, governing the appropriate degree. Additional Departmental requirements are given below.
2. Faculty advisors are available to provide advice to students who are registered in, or who are considering registering in, any of the

- programs. Students are urged to consult with these advisors at their earliest opportunity in order to ensure that they select appropriate courses and programs. Students with credits in Physics courses which are not listed in this calendar should consult with the Department.
3. The six course stream consisting of Physics 1020, 1021, 1051, 2053, 2055, 2750, and 2820 or alternatively the seven course stream of Physics 1020, 1050, 1051, 2053, 2055, 2750, and 2820 is intended to provide a cohesive overview of Physics for potential Physics majors.
  4. Physics 1050 is open to and recommended for students who have completed Level II Physics, Level III Physics and Level III Advanced Mathematics. Mathematics 1000 must be taken at the same time as, or be completed prior to, taking Physics 1050. Students who have completed Mathematics 1090 and Physics 1050 are required to complete Mathematics 1000 before registering for Physics 1051.
  5. Physics 1020 is intended for students who do not qualify for Physics 1050, and while it may be taken by students who have no background in Physics it is recommended that students wishing to take Physics 1020 should have completed at least one of Level II and Level III Physics. Students who complete Physics 1020 and Mathematics 1000 are eligible for admission to Physics 1051. Students may receive credit for only one of Physics 1050 and 1020.
  6. Students who have successfully completed Advanced Placement courses in both Physics and Mathematics will normally be eligible for direct entry into Physics 1051, 2053 and 2750, all of which are offered in the Fall semester. Such students are advised to consult the Department.
  7. Where circumstances warrant, any prerequisites listed below may be waived by the Head of the Department.
  8. Supplementary examinations will be allowed in certain Physics courses which have written final examinations. Students should refer to the **Faculty of Science Degree Regulations** for details.

### 9.10.1 Minor in Physics

A minor in Physics will consist of 24 credit hours in Physics courses which must include Physics 1050 (or 1020), 1051, 2053, 2055, 2750, 2820. Only 6 credit hours at the 1000 level can be used to fulfill the 24 credit hours. For those students whose major is Chemistry or Biochemistry, the 24 credit hours in Physics will not include 2053.

For Electrical Engineering students, 24 credit hours in Physics which must include Physics 1050 (or 1020), 1051, 2750, 3000, and 3550 with an additional 9 credit hours selected from Physics 2820, 3600, 3750, 3751, 3800, 4000, 4220, 4600 or other 3000 or 4000 level courses subject to approval by the Head of Physics and Physical Oceanography and the Chair of Electrical and Computer Engineering.

### 9.10.2 Major in Physics

1. English 1080 and English 1110 (or equivalent).
2. Chemistry 1050 and 1051 (or Chemistry 1010, 1011, and the former 1031).
3. Mathematics 1000 and 1001.
4. Mathematics 2000, Mathematics 2050 and Mathematics 2260.
5. Physics 1050 (or 1020) and 1051.
6. Physics 2053, 2055, 2750, 2820, 3220, 3400, 3500, 3750 and 3900.
7. An additional 12 credit hours in physics courses numbered 3000 or higher which shall include at least 6 credit hours selected from the courses numbered Physics 3000, 3150, 3300, the former 3410, 3550, 3600, 3751.
8. Physics 3810 or Mathematics 3202.

Mathematics 1001, 2000 and 2050 are prerequisites to many Physics courses and should be completed by the end of second year. Mathematics 2260 is co-requisite to Physics 3220 and should be completed before the Winter of the third year. Those who intend to make a career in Physics should note that additional Physics courses are strongly recommended. Mathematics 2051 and Computer Science 1510 or the former 2602 are also recommended.

### 9.10.3 Honours in Physics

1. English 1080 and English 1110 (or equivalent).
2. Chemistry 1050 and 1051 (or Chemistry 1010, 1011, and the former 1031).
3. Mathematics 1000 and 1001.
4. Computer Science 1510.
5. Mathematics 2000, 2050, and 2260.
6. Physics 1050 (or 1020) and 1051.
7. Physics 2053, 2055, 2750, 2820, 3220, 3230, 3400, 3500, 3600, 3750, 3820, 3900, 4400, 4500, 4820, 4850, 4900, 490A/B.
8. Physics 3810 or Mathematics 3202.
9. An additional 12 credit hours in physics courses numbered 3000 or higher which shall include at least 6 credit hours selected from physics courses numbered 4000 or higher.
10. Fifteen credit hours in applicable elective courses

Note: *Certain graduate courses may be taken in the final year of the Honours Program with the permission of the Head of the Department.*

Only 6 credit hours at the 1000 level in each of Physics, Chemistry and Mathematics can be used to fulfil the 120 credit hours required for the Honours program. The inclusion of Mathematics 1090, the sequence of Physics 1020, 1021, and 1051 or the substitution of Chemistry 1010, 1011 and the former 1031 for Chemistry 1050 and 1051 will each increase the number of credit hours required for the Honours Physics program by three.

An Honours thesis is to be presented on work undertaken by the candidate under the guidance of a Department of Physics and Physical Oceanography faculty member. The thesis comprises the 6 credit hour course Physics 490A/B. Students should seek departmental advice regarding a thesis project no later than the winter preceding the semester in which the project will be started.

The Honours Physics program in and beyond the third year requires a familiarity with computer programming and numerical analysis. In choosing electives for this program, the Department recommends that students supplement the prescribed program with the following courses Computer Science 2500 or 2510, and 3731 (or Mathematics 2130 and 3132). Mathematics 2051 and 3000 are also suitable electives. For specific courses and recommendations about electives, consultation with a faculty advisor in the Department is suggested.

The Department recommends that students wishing to complete the Honours Physics program in 120 credit hours follow the schedule given below. This schedule is intended for students who qualify for Physics 1050 and 1051. Other suggested course schedules are available from the Head of the Department.

## Recommended Course Schedule - Honours Physics Program

Year	Semester I	Semester II
I	Chemistry 1050 English 1080 Mathematics 1000 Physics 1050 Elective	Chemistry 1051 Computer Science 1510 English 1110 (1101, 1102) Mathematics 1001 Physics 1051
II	Mathematics 2000 Mathematics 2050 Physics 2053 Physics 2820 Elective	Mathematics 2260 Mathematics 3202 Physics 2055 Physics 2750 Elective
III	Physics 3220 Physics 3400 Physics 3500 Physics 3750 Physics 3820	Physics 3900 Physics 3600/4500 Physics 3230/4400 Physics 4820 Physics Elective
IV	Physics 4900 Physics 4850 Physics 490A Physics Elective Elective	Physics 4500/3600 Physics 4400/3230 Physics 490B Physics Elective Physics Elective

**9.10.4 Major in Environmental Physics**

1. English 1080 and English 1110 (or equivalent)
2. Chemistry 1050 and 1051 (or Chemistry 1010, 1011, and the former 1031)
3. Mathematics 1000 and 1001
4. Mathematics 2000, Mathematics 2050, Mathematics 2260, Mathematics 3202
5. Physics 1050 (or 1020) and 1051
6. Physics 2053, 2055, 2750, 2820, 3220, 3820, 3300, 3340, 4340
7. Physics 3400 or 3500
8. Earth Sciences 1000, 1002, 2502, 3170, 3172
9. Geography 2102, 2195, 3120
10. Biology 2120, 2600

The Major degree offers students a fair degree of latitude in choosing electives, students are encouraged to take electives from Geography and Earth Sciences: of particular merit would be any of Earth Sciences 3600, 3611 or 4105.

**9.10.5 Honours in Environmental Physics**

1. English 1080 and English 1110 (or equivalent)
2. Chemistry 1050 and 1051 (or Chemistry 1010, 1011, and the former 1031)
3. Mathematics 1000 and 1001
4. Mathematics 2000, Mathematics 2050, Mathematics 2260, Mathematics 3202
5. Physics 1050 (or 1020) and 1051
6. Physics 2053, 2055, 2750, 2820, 3220, 3300, 3340, 3820, 4205, 4300, 4340, 4820, 490A/B
7. Physics 3400 or 3500
8. Earth Sciences 1000, 1002, 2502, 3170 and 3172
9. Geography 2102, 2195, 3120
10. Biology 2120, 2600

An honours thesis is to be presented on work undertaken by the candidate under the guidance of a Department of Physics and Physical Oceanography faculty member. The thesis comprises the 6 credit hour course Physics 490A/B. Students should seek departmental advice regarding a thesis project no later than the winter preceding the semester in which the project will be started.

The Department recommends that students wishing to complete the Honours Environmental Physics program in 120 credit hours follow the schedule given below. This schedule is intended for students who qualify for Physics 1050 and 1051. Other suggested course schedules are available from the Head of the Department.

Those courses in which a grade of "B" or better or an average of 75% or higher are required, as specified under **Academic Standing, clause 1** of the **Regulations for the Honours Degree of Bachelor of Science**, are 45 credit hours in Physics courses, and 15 credit hours in other courses (beyond the 1000 level) selected from the specified program courses in Earth Sciences, Geography and Biology.

## Recommended Course Schedule - Honours Environmental Physics Program

Year	Semester I	Semester II
I	Chemistry 1050 Earth Sciences 1000 English 1080 Mathematics 1000 Physics 1050	Chemistry 1051 Earth Sciences 1002 English 1110 Mathematics 1001 Physics 1051
II	Geography 2102 Mathematics 2000 Mathematics 2050 Physics 2053 Physics 2820	Geography 2195 Mathematics 2260 Mathematics 3202 Physics 2750 Elective
III	Earth Sciences 2502 Physics 3220 Physics 3820 Physics 3400/3500 Physics 3340	Biology 2120 Earth Sciences 3170 Geography 3120 Physics 2055 Physics 4820
IV	Biology 2600 Earth Sciences 3172 Physics 3300 Physics 490A Elective	Physics 4205 Physics 4300 Physics 4340 Physics 490B Elective

## Credit Restrictions for Present Physics Courses with Former Courses Table

Credit May Be Obtained For Only One Course From Each of The Pairs of Courses Listed in This Table

Present Course	Former Course	Present Course	Former Course
1020	1200	1051	2050
1021	1201	1051	1061
1051	1052	3750	3700
2820	2200	3750	3850
2053	2450	490A/B	4990
2055	2550	1051	2054
2750	2700	1051	2550
3220	3200	4400	3410
3230	2210	4820	3821
		4900	3920

Physics 1021 and the former Physics 1201 will be considered equivalent for prerequisite purposes. Physics 1051 and 2820 will be considered equivalent to the former Physics 1054 and 2054 for prerequisite purposes. Physics 1051 and the former Physics 1052 and 2050 will be considered equivalent for prerequisite purposes.

Not all courses are offered every year. Students should check with the Department prior to registration to plan programs.

## 9.11 Psychology

[www.mun.ca/psychology](http://www.mun.ca/psychology)

The following undergraduate programs are available in the Department.

1. **Biochemistry and Psychology (Behavioural Neuroscience) Joint Honours (B.Sc. Hons. only)**
2. **Biochemistry (Nutrition) and Psychology (Behavioural Neuroscience) Joint Honours (B.Sc. Hons. only)**
3. **Biology and Psychology (Behavioural Neuroscience) Joint Honours (B.Sc. Hons. only)**
4. **Biology and Psychology Joint Honours (B.Sc. Hons. only)**
5. **Major and Honours in Behavioural Neuroscience (B.Sc. only)**
6. **Major and Honours in Behavioural Neuroscience (Co-operative) (B.Sc. Hons. only)**
7. **Major and Honours in Psychology (B.A. or B.Sc.)**
8. **Major and Honours in Psychology (Co-operative) (B.A. or B.Sc.)**
9. **Minor in Psychology (B.A. or B.Sc.)**

Details of the joint honours programs are given under the **Degree Regulations** of the Faculty of Science.

Psychology course descriptions are found at the end of the Faculty of Science section under **Course Descriptions, Psychology**.

### 9.11.1 Admission to Major Programs

Admission to the Major programs in the Department of Psychology is competitive and selective. Students who wish to enter these programs must submit a completed application form to the Psychology Department by June 1 for Fall semester registration. To be eligible for admission, students must have completed the 24 credit hours as listed below with an average of at least 65% in Psychology 1000/1001 and an overall average of at least 60% in Psychology, English, and Mathematics:

1. Psychology 1000, 1001

2. English 1080 and one of 1101, 1102, 1103, or 1110, or equivalent.
3. Mathematics 1000, or two of 1090, 1050, 1051 (or equivalent).
4. Six credit hours of electives (9 if only Mathematics 1000 is completed).

Students who fulfill the eligibility requirements compete for a limited number of available spaces. Selection is based on academic performance, normally cumulative average and performance in recent courses.

### 9.11.2 Admission to Honours Programs

The Honours programs in the Department of Psychology are designed for students who would like to concentrate their studies or pursue graduate work. Students who wish to be admitted to these programs must submit an "Application for Admission to Honours Program Faculties of Humanities and Social Sciences or Science" to the Department of Psychology by June 1 for Fall semester registration. This form is available at [www.mun.ca/regoff/Application\\_Honours\\_Program.pdf](http://www.mun.ca/regoff/Application_Honours_Program.pdf). To be eligible for admission, students must have completed Psychology 2910, 2911, 2520, and 2930 and obtained in these courses a grade of "B" or better, or an average of 75% or higher. Students who fulfill the eligibility requirements compete for a limited number of available spaces. Selection is based on academic performance in the required courses. In special circumstances, students may be admitted to Honours Programs at times other than June.

Note: *Students are advised to consult the general regulations for Honours in the Faculty of Humanities and Social Sciences or the Faculty of Science, as appropriate.*

### 9.11.3 Requirements for a Major in Psychology

Students completing this program cannot receive credit for Psychology 2920. Students who intend to pursue graduate studies should take courses leading to the Honours degree.

1. Students may Major in Psychology as part of either a B.A. or a B.Sc. program. All Majors are required to complete a minimum of 42 credit hours of Psychology as listed below:
  - a. Psychology 1000, 1001, 2520, 2910, 2911, 2930.
  - b. Twelve credit hours in Psychology chosen from the following: 3050, 3100, 3250, 3350, 3450, 3620, 3650, 3750, or one of 3800 or 3830.
  - c. Twelve credit hours of 4000-level courses in Psychology, of which at least one must be a research experience course and one must be a selected topics course.
2. Psychology Majors following the B.Sc. program are also required to complete the following:
  - a. Mathematics 1000 (or equivalent).
  - b. Biology 1001 and 1002
  - c. Either Chemistry 1010 and 1011 (or 1050 and 1051); OR Physics 1020 (or 1050) and 1021 (or 1051)  
 Note: *First year students should think carefully about whether Chemistry or Physics best suits their future program needs. Students should examine the prerequisites for upper-level science courses and attempt to take them in their first year.*
  - d. Six credit hours of laboratory courses at the 2000 level or above in one of Biology, Chemistry, or Physics.  
 Note: *Biology/Psychology 4701 and Biology 3053 cannot be used to satisfy the requirement of 6 laboratory credit hours at the 2000 level or above in either Biology, Chemistry, or Physics.*
3. Psychology Majors following the B.A. program are also required to complete Mathematics 1000 or two of 1090, 1050, 1051 (or equivalent), and are encouraged to complete at least 6 credit hours in Biology.

### 9.11.4 Requirements for Honours in Psychology

Students completing this program cannot receive credit for Psychology 2920.

1. Honours students in Psychology are required to complete the 60 credit hours of Psychology as listed below:
  - a. Psychology 1000, 1001, 2520, 2910, 2911, 2930, 3900, 4910, 499A/B
  - b. Eighteen credit hours chosen from the alternatives listed in Clause 1. b. of the requirements for a Major in Psychology
  - c. Twelve credit hours of 4000-level courses in Psychology, of which at least one must be a research experience course and one must be a selected topics course.
2. Honours students must also complete the requirements listed in either Clause 2. or Clause 3., as applicable, of the requirements for a Major in Psychology.
3. Honours students will be required to submit in their graduating year, an undergraduate thesis (Psychology 499A/B) which demonstrates their competence in Experimental Psychology.

### 9.11.5 Requirements for a Major in Behavioural Neuroscience (B.Sc. Only)

Students completing this program cannot receive credit for Psychology 2920.

A program is offered in the Psychology Department to provide an education in Behavioural Neuroscience. Students planning to enroll in the program are advised to consult with the Head of the Department at the earliest opportunity because certain course choices may restrict later options. Students who intend to pursue graduate studies should take courses leading to the Honours degree.

The program for a Major in Behavioural Neuroscience shall include:

1.
  - a. Psychology 1000, 1001, 2520, 2910, 2911, 2930, 3250, 3800, 3820.
  - b. Three credit hours in Psychology chosen from the following: 3050, 3100, 3350, 3450, 3620, 3650, 3750.
  - c. Any research experience course and one of Psychology 4250, 4251, 4850 or 4851; or, any selected topics course and one of Psychology 4270 or 4870.
2.
  - a. Mathematics 1000 (or equivalent) and 1001
  - b. Chemistry 1010 and 1011 (or 1050 and 1051), and 2440 (or 2400/2401)
  - c. Physics 1020 (or 1050) and 1021 (or 1051).
  - d. Biology 1001 and 1002
  - e. English 1080 and one of 1101, 1102, 1103, or 1110, or equivalent
3. Eighteen credit hours from the following courses chosen from at least two different sciences:

- a. Biochemistry: Any 2000-, 3000-, or 4000-level course except the former 2000, 2005, the former 2010, the former 2011, 3202, 3402, or 4502
- b. Biology: 2060, 2122, 2210, 2250, 2900, 3050, 3160, 3202, 3295, 3401, 3500, 3530, 3540, 3750, 4200, 4241, 4245, 4250, 4402, the former 4450, 4601, 4605, 4701, the former 4900 (see note below)
- c. Chemistry: 2100, 2210, 2301 (or the former Chemistry 2300) or any 3000 or 4000 level course
- d. Computer Science: Any 2000, 3000, or 4000 level course except the former 2650 and the former 2801
- e. Mathematics: 2000, 2050, 2051, 3000, 3001 or any 3000 or 4000 level pure or applied mathematics course
- f. Physics: Any 2000, 3000, or 4000 level course except 2151, 3150, 3151

Notes: 1. Credit may not be obtained for both Biology 3750 and Psychology 3750 or for both Biology 4701 and Psychology 4701.

2. The courses listed under Clause 3 may have prerequisites. It is the student's responsibility to ensure that all prerequisites have been met, or that waivers have been obtained, before registering for these courses.

### 9.11.6 Requirements for Honours in Behavioural Neuroscience (B.Sc. Only)

Students completing this program cannot receive credit for Psychology 2920.

1. Honours students in Behavioural Neuroscience are required to complete the following Psychology courses: 1000, 1001, 2520, 2910, 2911, 2930, 3250, 3800, 3820, 3900, 499A/B, one further course in Psychology chosen from the following: 3050, 3100, 3350, 3450, 3620, 3650, 3750; any research experience course and one of Psychology 4250, 4251, 4850 or 4851; or, any selected topics course and one of Psychology 4270 or 4870.
2. Honours students in Behavioural Neuroscience must also complete the requirements listed in Clauses 2. and 3. of the requirements for a Major in Behavioural Neuroscience.
3. In accordance with **Academic Standing, clause 1** of the **Regulations for the Honours Degree of Bachelor of Science**, Honours candidates must obtain a grade of "B" or better, OR an average of 75% or higher in all the required courses listed in Clauses 1. and 3. of the requirements for a major in Behavioural Neuroscience and Clause 1 of the requirements for honours in Behavioural Neuroscience, except those at the 1000 level.

### 9.11.7 Requirements for a Minor in Psychology

Students who Minor in Psychology are required to complete a minimum of 24 credit hours of Psychology as follows:

- a. Psychology 1000, 1001, and 2920 (or 2910 or 2925)
- b. Fifteen other credit hours of Psychology.

### 9.11.8 Requirements for Major and Honours in Psychology (Co-operative) (B.A. or B.Sc.), and Major and Honours in Behavioural Neuroscience (Co-operative) (B.Sc. only)

#### Psychology Co-op Program (PCOP)

The Psychology Co-op Program (PCOP) is available to full-time Psychology (B.A. and B.Sc.) and Behavioural Neuroscience Majors and Honours students only.

The PCOP provides an opportunity for students to learn valuable practical skills while working in fields related to Psychology. Students complete three Work Terms, which consist of full-time paid employment. The timing of the Work Terms is such that employers stand to gain from the acquired skills of psychology majors in training. The objectives of the Work Term component of the PCOP are embodied in the **Work Term Descriptions**.

#### 9.11.8.1 Admission Requirements

1. Admission is limited, competitive, and selective.
2. The primary criterion used in reaching decisions on applications for admission is overall academic achievement. Students with average overall academic records are unlikely to be admitted.
3. Students must first be admitted to the Psychology (B.A. or B.Sc.) or Behavioural Neuroscience Major.
4. To be eligible for admission, students must have completed a minimum of 30 credit hours with an overall average of at least 65%, and an average of at least 65% in all Psychology courses. Students must have a passing grade in all required courses, and must be registered for 15 additional credit hours in the semester in which they apply.
5. The deadline date for application is December 15.

#### 9.11.8.2 Program of Study

1. In addition to the requirements below students must fulfill all requirements for either a Major in Psychology (B.A.), a Major in Psychology (B.Sc.), Major in Behavioural Neuroscience, Honours in Psychology (B.A.), Honours in Psychology (B.Sc.), or Honours in Behavioural Neuroscience. Courses in each program are normally taken in blocks as shown in the appropriate program table. Students should consult with a faculty advisor each semester regarding course selection.
2. Students' status in the program is assessed at the end of each semester. To remain in PCOP, students must receive a passing grade in all required courses, and must maintain an average of at least 65% in all Psychology courses and a cumulative average of at least 65%. A student who fails a required course, fails to maintain an average of 65% in Psychology courses, or fails to maintain a cumulative average of 65%, will be required to withdraw from PCOP. The student in question may apply for readmission in a subsequent year after passing the specified required course(s) previously failed, or re-establishing the required average.
3. Students are required to complete three work terms at the prescribed times.

#### 9.11.8.3 Work Term Placement

1. General management of the work terms in PCOP is the responsibility of Co-operative Education. It is responsible for assisting potential employers to become involved in the program, organizing competitions for Work Term employment, arranging student-employer interviews and facilities, data base management, and for the continual development of employment opportunities. Co-operative Education will work with the department to counsel students, visit students on their work assignments and evaluate the work term.
2. Work placement is not guaranteed but every effort is made to ensure that appropriate employment is made available. In the case of students who are required to withdraw from the program, Co-operative Education has no responsibility for placement until they have been re-admitted to the program.

3. A student who applies for admission to the co-op program gives permission to the University to provide a copy of the applicant's resume, university transcript and work term evaluations to potential employers.
4. A student who has been accepted to PCOP may obtain his/her own work term placement outside the competition. Such employment positions must be confirmed by the employer, and must be approved by Co-operative Education.
5. Students are expected to submit to Co-operative Education, within a month from starting a Work Term, a plan of the intended work that term.
6. Salaries paid to co-operative students are determined by employers based on their internal wage structures. However, students should not expect the income from work terms to make them completely self-supporting.

#### 9.11.8.4 Registration and Evaluation of Performance

1. In Work Terms I, II, and III, students must register for Psychology 199W, 299W, and 399W respectively.
2. Student performance evaluations are to be completed by the employer and returned to Co-operative Education. The Work Term evaluations shall consist of two components:
  - a. On-the-job Student Performance: Job performance shall be assessed by Co-operative Education in consultation with the Department using information gathered during the Work Term and input from the employer towards the end of the Work Term. Formal written documentation from the employer shall be sought. Evaluation of the job performance will result in one of the following classifications: OUTSTANDING, EXCEEDS EXPECTATIONS, SATISFACTORY, OR FAIL
  - b. The Work Report
    - i. Students are required to submit a Work Term report to Co-operative Education on the first day of final exams.
    - ii. Work Term reports shall be evaluated by a faculty member and Co-operative Education.
    - iii. If an employer designates a report to be of a confidential nature, both employer and Co-operative Education must agree as to the methods to protect the confidentiality of such a report before the report may be accepted for evaluation.
    - iv. Reports must contain original work related to the Work Term placement. The topic must relate to the work experience and will be chosen by the student in consultation with the employer. The topic must be approved by Co-operative Education or a faculty member of the Department of Psychology.

Evaluation of the work term report will result in one of the following classifications: OUTSTANDING, EXCEEDS EXPECTATIONS, SATISFACTORY, OR FAIL.

The evaluation of the job performance and the work term report are recorded separately on the transcript. Overall evaluation of the work term will result in one of the following final grades being awarded:

- Pass with Distinction: Indicates OUTSTANDING PERFORMANCE in both the work report and the job performance.
- Pass: Indicates that PERFORMANCE MEETS EXPECTATIONS in both the work report and the job performance.
- Fail: Indicates FAILING PERFORMANCE in the work report or the job performance, or both.

To remain in PCOP, a student must obtain a final grade of PAS.

3. If a student fails to achieve the Work Term standards specified above, the student will be required to withdraw from PCOP. Such a student may reapply to the program, at which time the student will be required to repeat the Work Term with satisfactory performance. Only one Work Term may be repeated in the entire program.
4. In order to be considered for readmission, students must formally apply for readmission to the program not later than the deadline date specified in **Admission Requirements**.
5. A student who withdraws from a Work Term without acceptable cause subsequent to a job placement will be required to withdraw permanently from PCOP.
6. Students who drop a Work Term without prior approval from both Co-operative Education and the Head of the Department of Psychology, or who fail to honour an agreement to work with an employer, or conduct themselves in such a manner as to cause their discharge from the job, will be awarded an overall grade of FAL for the Work Term in question and will be required to withdraw permanently from PCOP.
7. Permission to drop a Work Term does not constitute a waiver of degree requirements, and students who have obtained such permission must complete an approved Work Term in lieu of the one dropped.

### 9.11.9 Suggested Course Sequences

The tables below show suggested course sequences for the **B.A. in Psychology (Co-operative)**, the **B.Sc. in Psychology (Co-operative)**, the **B.A. Honours in Psychology (Co-operative)**, the **B.Sc. Honours in Psychology (Co-operative)**, the **B.Sc. in Behavioural Neuroscience (Co-operative)**, and the **B.Sc. Honours in Behavioural Neuroscience (Co-operative)**.

**Table 1 Suggested Course Sequence for B.A. in Psychology (Co-operative)**

Term	Suggested Courses
<b>Fall Semester 1</b>	Elective or Humanities and Social Sciences requirement Elective or Humanities and Social Sciences requirement English 1080 Mathematics 1000 or one of Mathematics 1090, 1050, 1051 Psychology 1000
<b>Winter Semester 2</b>	Elective or Humanities and Social Sciences requirement Elective or Humanities and Social Sciences requirement English 1101, 1102, 1103, or 1110 One of Mathematics 1000, 1090, 1050 or 1051* Psychology 1001

## 9.12 Science

Science course descriptions are found at the end of the Faculty of Science section under **Course Descriptions, Science**.

## 10 Course Descriptions

In accordance with Senate's *Policy Regarding Inactive Courses*, the course descriptions for courses which have not been offered in the previous three academic years and which are not scheduled to be offered in the current academic year have been removed from the following listing. For information about any of these inactive courses, please contact the Head of the Department.

### 10.1 Biochemistry

Biochemistry courses are designated by BIOC.

**1430 Biochemistry for Nurses** is an introduction to the chemistry and structure-function relationships of carbohydrates, lipids and proteins. It will examine the basic metabolism of carbohydrates and fats, with emphasis on the biochemical fluctuations that occur in human health and disease, and will include a brief introduction to molecular genetics. Prospective fast-track program students should consult with the School of Nursing concerning admission to this course.

CR: the former BIOC 2430

LC: 4

PR: Level 3 Chemistry or Chemistry 1010 or Chemistry 1810 or equivalent, and acceptance to Bachelor of Nursing (Collaborative)

UL: may not be used for credit to fulfil the requirements for a major in the Department of Biochemistry

**2005 Food, Food Safety, and Health** introduces the concepts of the composition of foods, and how the processing of food affects sensory appeal, shelf life and nutrient composition. Common food and water-borne illnesses (risks and prevention) are covered in the course content. Students will also be introduced to food biotechnologies, including genetically modified organisms, nutraceuticals and the development of functional foods.

CO: Chemistry 2400 or 2440

**2100 Introduction to Molecular Biology and Genetics** will cover the heritability of simple traits from phenotype to genotype; the discovery of DNA as the molecule of heredity; the structure and function of DNA; the elucidation of the genetic code; and the manipulation of DNA for recombinant DNA technology and biotechnology.

CO: BIOC 2101, Chemistry 2401, Physics 1021 or 1051. Students may replace the co-requisite Chemistry 2401 with Chemistry 2440 as a prerequisite. Chemistry 2440 may not be taken as a co-requisite of 2100

CR: Biology 2250

LH: up to four hours on alternate weeks which will normally consist of one three hour laboratory period plus one additional hour on the following day

PR: BIOC 2101, Chemistry 2401, Physics 1021 or 1051, and Science 1807. Students may replace the co-requisite Chemistry 2401 with Chemistry 2440 as a prerequisite. Chemistry 2440 may not be taken as a co-requisite of 2100.

**2101 Introduction to Biochemistry** is an introduction to the major organic substances of living organisms, proteins, carbohydrates and lipids: their structure, analysis and biochemical function. Other topics will include: enzymes; the biochemistry of membranes, including the plasma membrane and specialized intracellular membranes; and the biochemistry of selected differentiated cells.

CR: Pharmacy 2004, or the former Pharmacy 3110

LH: one three-hour laboratory period on alternate weeks

PR: Chemistry 2400 and 2401, or Chemistry 2440; and Physics 1020 or 1050, and 1021 (or 1051); and Science 1807. Chemistry 2401 and Physics 1021 or 1051 can be done concurrently.

**2600 Introduction to Human Nutrition** (same as Human Kinetics 2600) gives an overview of human nutrition with an emphasis on topics of current interest. Students will gain an understanding of nutrition in the context of health maintenance across the life span. Topics covered will include nutrition during pregnancy, nutrition for infants, Canadian Recommended Nutrient Intakes / Dietary Reference Intakes, weight loss and weight gain, nutraceuticals and ergogenic aids.

CR: Human Kinetics 2600 or the former Kinesiology 2600

**3052 Food Microbiology** (same as Biology 3052) is the study of the microbiology of water and food with regard to the beneficial and detrimental roles of microorganisms on interaction with these systems. Emphasis will be on the microbiology of food, fermentations, food spoilage and food borne vectors of human disease.

CR: Biology 3052, and the former BIOC 3054, BIOC 3401

LC: three hours per week

LH: three hours per week

PR: Biology 3050 and Science 1807

**3105 Physical Biochemistry** examines topics such as: types of intermolecular forces in biomolecules; the folding of biomolecules and the role of water; pH, buffers, and ionisation of biomolecules; thermodynamics: equilibria, coupled reactions, transport across membranes and redox reactions; and ligand binding. Other topics will include: size and shape of biomolecules; isotopes in biochemistry; and, spectroscopy of biomolecules.

OR: a two hour problem-solving class

PR: BIOC 2101; and the former Chemistry 2300 or 2301 or Physics 2053

**3106 Metabolism** examines the catabolism of carbohydrates, lipids and amino acids. Other topics will be: mitochondria, chloroplasts and ATP synthesis; biosynthesis of carbohydrates and lipids; metabolic specialization of differentiated cells and tissues; and, integration of metabolism.

CR: the former BIOC 3102 or Pharmacy 3111

LH: one three-hour laboratory or one-hour tutorial per week

OR: one-hour tutorial or one three-hour laboratory per week

PR: BIOC 2101 and Science 1807

**3107 Nucleic Acid Biochemistry and Molecular Biology** examines the structure, function and biochemistry of DNA and RNA and the biochemical processes in the flow of information from the gene to protein. These will include: DNA replication, recombination and repair processes; transcription of RNA and RNA splicing; and protein synthesis. The regulation of gene expression will also be covered at an introductory level. The course will also include an introduction to cloning methodology.

LH: up to four hours per week which will normally consist of one three hour laboratory period plus one additional hour on the following day.

PR: BIOC 2101; and BIOC 2100 or Biology 2250, and Science 1807

**3108 Molecular Biochemistry of the Cell** focuses on the molecular biochemistry of intracellular regulation, including advances in topics such as signal transduction, apoptosis and cancer. Other topics will include protein processing and sorting, cyclins, G-protein structure, function and regulation, cell adhesion molecules and the structure of the extracellular matrix.

PR: BIOC 2100 or Biology 2250; and BIOC 2101

**311A/B Human Physiology** - inactive course.

**3202 Community Nutrition** - inactive course.

**3203 Fundamentals of Human Nutrition** is the cornerstone course for the study of nutrition. The sources, uptake and physiologic roles of essential nutrients will be discussed in the context of growth, maintenance, reproduction and overall health in humans.

CO: BIOC 3106

CR: the former BIOC 3201

PR: BIOC 2101, 2600

**3402 Food Chemistry** examines the following topics: water structure and the role of water in chemical reactions and mechanical properties of foods; chemistry and physical properties of carbohydrates, proteins and lipids; food dispersions; pigments and natural colorants; food flavour; enzyme properties and applications; vitamins and minerals; chemistry of enzymic and non-enzymic browning; characteristics of: muscle tissue, milk, eggs, bread and edible plant tissue; food additives; and, chemical changes in foods during processing.

LH: one period per week

PR: BIOC 2005; BIOC 2101; Chemistry 2440 or Chemistry 2401, and Science 1807

**3600 Sports and Exercise Nutrition** deals with the specific roles of nutrients in sport and exercise, and the application of nutrition to sport and exercise.

CR: the former BIOC 4241

PR: BIOC 2600 or HKR 2600 or the former BIOC 3200/3201; and one of BIOC 311B, MED 310B, HKR 2320

**4002 Biochemical Regulation** examines metabolic regulation at the cellular and multicellular level. Topics will include: control theory; hormones: their biosynthesis and mechanism of action; signal transduction; and, endocrine coordination of metabolic processes. Principles will be illustrated by the use of case studies from the medical and veterinary literature.

LC: two to three hours per week, together with assigned reading and case studies

PR: BIOC 2100 or Biology 2250; BIOC 3106

**4101 Proteins** will review the history of protein research and the general properties of proteins and include other topics such as: strategy and methods for purification; chemical structure, properties, modification and determination of the protein amino acids; sequencing strategy, chain cleavage methods and end group analysis; folding of the protein main chain and techniques to determine structure; and, the relationship between structure and function: protein filaments, motors and regulators. It will also cover disease-related proteins and other examples from the current literature.

LC: two to three hours per week, together with assigned reading

PR: BIOC 3105

**4102 Current Topics in Biochemistry** is a seminar course in which faculty and students will discuss topics of current interest in the biochemical

literature. Students will be responsible for reading and critically assessing recent literature.

PR: Honours Biochemistry students in their final year or permission of the Head

**4103 Prokaryotic Gene Regulation** is a detailed and up-to-date treatment of the mechanisms of genetic regulation found in bacterial cells. The course will develop topics based on the evidence of bacterial genetics and modern molecular biological experiments. Topics may include: theory of mutations, RNA transcription, positive and negative regulation of transcription; regulation of protein synthesis; control of DNA replication; bacterial operons and regulons; developmental molecular biology in bacterial systems; and evolution and molecular biology of organelles.

PR: BIOC 3107

**4104 Eukaryotic Gene Regulation and Developmental Biology** details the cellular and molecular aspects of eukaryotic gene regulation and development. Topics to be covered will include the DNA content and organization of eukaryotes, mechanisms controlling the expression of eukaryotic genetic information at the transcriptional and post-transcriptional levels, and the methodologies used to define these mechanisms. Detailed consideration will be given to the cell-surface events which regulate nuclear gene expression and cell lineage specification. Developmental mechanisms operating in a number of model systems will be discussed.

PR: BIOC 3107 or 3108

**4105 Immunology** (same as Pharmacy 3006 and the former Pharmacy 4105) is an introduction to the cells and organs of the innate and adaptive immune systems. The molecular and cellular basis of allergy, autoimmunity, vaccination and cancer immunology will also be discussed.

CR: Biology 4200, Pharmacy 3006, the former Pharmacy 3105, the former Pharmacy 4105

PR: BIOC 2101

**4200 Bioenergetics and Biological Oxidation** examines topics such as: respiration and electron transport; the functional organization of energy transducing membranes; the structure and function of flavoenzymes, cytochromes, iron-sulfur proteins and quinones; enzyme reduction of oxygen; and, free radicals in biological systems.

LC: two to three hours per week and assigned reading

PR: BIOC 3106

**4201 Membranes - Structure and Function** examines the structure of model and biological membranes, the molecular interactions between membrane components and the effects of these interactions on the biophysical and functional properties of membranes. Other topics will include the structure-function of specialized membranous systems, such as lipoprotein, lung surfactant, and lipid rafts; membrane lipid composition in biochemical adaptation and function; and the role of membrane proteins in intracellular trafficking, receptor function, enzymatic activity and membrane-related diseases.

PR: BIOC 3105

**4210 Biochemical Research Techniques I** examines the proteome and the genome. This course is designed to familiarize students with current methodology employed in the analyses of the complements of proteins and genes resident in eukaryotic cells. Emphasis will be placed on techniques that facilitate the simultaneous functional analyses of large numbers of proteins or genes. A variety of techniques, used in the study of expression and functional proteomics, will be described, including 2D PAGE, tagged proteins, fluorophores, mass spectrometry and protein microarrays. Techniques used in the study of gene expression and functional genomics will also be described, including the use of reporter gene constructs, analysis of protein-DNA interactions, expressions of cloned genes and several experimental approaches used to define the eukaryotic transcriptome.

AR: attendance is required

PR: BIOC 3105

**4211 Biochemical Research Techniques II** is designed to familiarize students with methods used for the study of cellular and subcellular metabolism. This course may include a research project.

AR: attendance is required

LC: times as arranged

LH: times as arranged

PR: BIOC 3106

**4230 Lipid and Lipoprotein Metabolism** is designed to provide current knowledge about advances and controversies in lipid and lipoprotein metabolism in the context of health and disease. Topics to be covered include advanced knowledge about lipid and lipoprotein synthesis and regulation, reverse cholesterol transport, plus lipid and lipoprotein utilization to regulate cellular and physiological functions. The covered topics will be related to areas such as reproductive biology, atherosclerosis, AIDS, Alzheimer's, and cancer.

CR: BIOC 6000

PR: BIOC 3106 or Pharmacy 3111

**4231-4239 Special Topics in Biochemistry** will be given for senior undergraduates, and will cover a range of topics in specialized fields in

Biochemistry. They may be taught by visiting specialists when available.

PR: to be determined at the time of offering

**4240 Nutrigenetics and Nutrigenomics** is designed to familiarize students with emerging discoveries in the area of diet-gene interaction and to further their understanding of the relationships between the genome and diet as well as the potential to design personalized diets for better health. Students will develop an appreciation for the role of nutrients in the prevention and/or development of disease.

PR: BIOC 2100 or Biology 2250; BIOC 3106; and one of BIOC 3203 or the former BIOC 3200

**4242-4249 Special Topics in Nutrition** will be given for senior undergraduates, and will cover a range of topics in specialized fields in Nutrition. They may be taught by visiting specialists when available.

PR: to be determined at the time of offering

**4300 Advanced Nutrition** is a course in which current controversies and trends in human nutrition are presented and discussed using the scientific literature.

PR: BIOC 3203 or the former BIOC 3200/3201, and either BIOC 311B or Medicine 310B

**4301 Nutrition and Disease** is a course which addresses the scientific basis for nutritional intervention in chronic human disease.

PR: BIOC 3203 or the former BIOC 3200/3201, and either BIOC 311B or Medicine 310B

**4502 Techniques in Nutrition Research** is a seminar course in which faculty and students will discuss concepts and methods used in the study of nutrition. Students will be responsible for reading and critically assessing recent literature.

PR: BIOC 4301

PR: Honours Nutrition students in their final year or permission of the Head

**499A and 499B Dissertation** is a two-semester linked course based on independent study of a problem in Biochemistry. The subject of study will be decided in consultation with Faculty advisors and must be approved in advance by the Department. This dissertation is obligatory for Honours students in Biochemistry. The dissertation will be submitted as a formal written report accompanied by appropriate illustration before the end of the tenth week of the second semester. Before the end of his/her final semester the student will give an oral presentation of his/her research.

CH: 6

PR: Honours students in their final year or permission of the Head; Science 1807

## 10.2 Biology

According to the nature of particular courses, the specified number of laboratory hours may consist of some combination of laboratory work, seminars or directed independent study relevant to the practical aspects of the subject matter.

Biology courses are designated by BIOL.

**1001 Principles of Biology** is an introduction to the science of Biology, including a discussion of the unity, diversity and evolution of living organisms.

LH: 3

PR: Science 1807

UL: credit may be obtained for only 6 1000-level credit hours in Biology

**1002 Principles of Biology** is an introduction to the science of Biology, including a discussion of the unity, diversity and evolution of living organisms.

LH: 3

PR: Science 1807; BIOL 1001

UL: credit may be obtained for only 6 1000-level credit hours in Biology

**2010 Biology of Plants** is a study of the structure, function and reproductive biology of plants, with emphasis on the vascular plants, and on their relationship to environment and human activities.

LH: 3

PR: Science 1807; BIOL 1001 and 1002; Chemistry 1010 or 1050 (or the former Chemistry 1000)

**2040 Modern Biology and Human Society I** examines various aspects of the human body, and the implications of modern biological research for human beings. Topics include cancer; diet and nutrition and associated diseases; circulatory disease, immunity, human genetics, biorhythms, new diseases, genetic engineering and reproductive engineering.

OR: seminars

UL: not acceptable as one of the required courses for the Minor, Major or Honours programs in Biology

**2041 Modern Biology and Human Society II** examines the origins and consequences of the environmental crisis of the 20th century. Topics include the population explosion, energy, material cycles, air and water and land pollution, global food supplies, the fisheries, wildlands, renewable and non-

renewable resources, environmental ethics.

OR: seminars

UL: not acceptable as one of the required courses for the Minor, Major or Honours programs in Biology

**2060 Principles of Cell Biology** is a modern view of the biology of eukaryotic cells, organelles and molecules and their interactions in the functioning of living organisms.

CO: Physics 1021 or 1051; Biochemistry 2101

CR: the former BIOL 3060

LH: 3

PR: Physics 1021 or 1051; Biochemistry 2101

PR: Science 1807; BIOL 1001, 1002 and 2250; Chemistry 2440 or 2400

**2120 Biology for Students of Earth Sciences** is an introduction of the principles of Biology for students in Earth Sciences. Topics will include principles of classification, levels of biological organization, fundamental characteristics of living organisms and basic concepts in ecology.

CR: BIOL 1001 or 1002

LH: 3

PR: Science 1807; Earth Science major; Earth Sciences 1001 or 1002 or permission of the Head of Department.

UL: may not be used for credit by Biology Majors or Minors

**2122 Biology of Invertebrates** is a study of the invertebrates with emphasis on structure and function, adaptations and life histories. The laboratories will present a broad survey of the major invertebrate groups.

CR: the former BIOL 3122

LH: 3

PR: Science 1807; BIOL 1001, 1002

**2210 Biology of Vertebrates** is a study of the vertebrates, with emphasis on structure and function, adaptations and life histories.

CR: the former BIOL 3210

LH: 3

PR: Science 1807; BIOL 1001, 1002

**2250 Principles of Genetics** is an introduction to Mendelian and molecular genetics. Phenotype and genotype, behaviour of alleles in genetic crosses, chromosome theory of inheritance, genetic linkage, molecular biology of DNA, RNA and protein, molecular basis of mutation, recombinant DNA, applications of genetic biotechnology.

CO: Chemistry 2440 or 2400

CR: Biochemistry 2100 the former BIOL 3250

LH: 3

PR: Science 1807; BIOL 1001 and 1002; Chemistry 1010 and 1011 (or 1050/1051)

PR: Chemistry 2440 or 2400

**2600 Principles of Ecology** is a conceptual course introducing the principles of ecology, including theoretical, functional and empirical approaches.

CR: the former BIOL 3600

LH: 3

PR: Science 1807; BIOL 1001 and 1002

**2900 Principles of Evolution and Systematics** is an introduction to the processes and patterns of evolution, and the principles of classification. Natural selection and other microevolutionary processes, variation and adaptation, species and speciation, phylogenetic systematics, reconstruction of phylogeny, macro-evolutionary patterns in the fossil record and their interpretation.

CO: Statistics 2550 (or equivalent)

CR: the former BIOL 3900

LH: 3

PR: Science 1807; BIOL 1001, 1002, 2250

PR: Statistics 2550 (or equivalent)

**3014 Biology and Ecology of Boreal and Arctic Seaweeds** is a field course examination of seaweed biology and ecology with special study of living specimens in estuarine, fiordic and exposed coastal sites, demonstrating their physiological and ecological adaptations to cold-water habitats.

CR: the former BIOL 4014

OR: this course is offered at the Bonne Bay Marine Station during the Summer semester with two weeks of instruction followed by a week to complete course requirements

PR: Science 1807; BIOL 2600 or equivalent

**3041 Boreal Flora** - inactive course.

**3050 Introduction to Microbiology** is a course in which the basic principles underlying microbial life are studied. Aspects include structure, function, bioenergetics and growth with an emphasis on prokaryotes. Also studied are viruses, microbial diseases, introductory principles of immunology and the control of microorganisms. The laboratory sessions provide training in culture and determinative techniques using microorganisms.

LH: 3

PR: Science 1807; BIOL 1001 and 1002; Biochemistry 2101

**3052 Food Microbiology** (same as Biochemistry 3052) is the study of the microbiology of water and food with regard to the beneficial and detrimental roles of microorganisms on interaction with these systems. Emphasis will be on the microbiology of food, fermentations, food spoilage and food borne vectors of human disease.

CR: Biochemistry 3052 and the former Biochemistry 3054, Biochemistry 3401

LC: three hours per week

LH: three hours per week

PR: Science 1807; BIOL 3050

**3053 Microbiology for Nurses** examines the fundamentals of microbiology with an emphasis on medical microbiology. The course will include topics such as: host responses to infections, human diseases caused by microorganisms, and the control and exploitation of microorganisms.

LH: 2

PR: Science 1807; students admitted to the Bachelor of Nursing (Collaborative) program

UL: not acceptable as one of the required courses for the Minor, Major or Honours programs in Biology, nor is it acceptable for any of the joint programs between Biology and other disciplines

**3160 Insect Morphology and Physiology** - inactive course.

**3202 Comparative Vertebrate Anatomy** examines the phylogenetic development and comparative anatomy of the vertebrates.

CR: the former BIOL 3200 or the former BIOL 3201

LH: 3

PR: Science 1807; BIOL 1001 and 1002

**3295 Population and Evolutionary Ecology** is an introduction to the theory and principles of evolutionary ecology and population dynamics.

CR: the former BIOL 4290

LH: 3

PR: Science 1807; BIOL 2600; at least one of BIOL 2010, 2122 or 2210

**3300 Introductory Entomology** is a study of the classification and ecology of insects within an evolutionary framework. Topics will include molecular biological and classical morphological issues surrounding insect taxonomy, evolutionary based higher systematics, and the ecological roles of insects in a variety of ecosystems.

CR: BIOL 4150 and the former BIOL 4140

LH: 3

PR: Science 1807; BIOL 2600. It is recommended that students have completed BIOL 2900

**3401 Comparative Animal Physiology** is a comparative study of the basic physiological processes, with special attention paid to those strategies invoked by animals which enable them to adapt to environmental changes.

CO: Biochemistry 3106

CR: the former BIOL 4401

LH: 3

PR: Science 1807; BIOL 2060 and 2210

PR: Biochemistry 3106

**3402 Principles of Plant Physiology** is a consideration of the principles of plant physiology, including water relations, nutrition, metabolism, growth and development.

CO: Biochemistry 3106

CR: the former BIOL 4403

LH: 3

PR: Science 1807; BIOL 2010 and 2060

PR: Biochemistry 3106

**3500 Histology** is a study of microstructure and ultrastructure of tissues and organ systems in vertebrates, particularly mammals, with emphasis on correlating structure and function.

LH: 3

PR: Science 1807; BIOL 2060 and 2210

**3530 Molecular and Developmental Biology** is a study of developmental model systems with a focus on the underlying principles and molecular mechanisms involved in embryogenesis, organogenesis, morphogenesis, cellular differentiation, growth and regeneration in animals (vertebrates and invertebrates) and plants. Current cellular and molecular biology techniques and the implications of developmental biology in modern biological and health research will be emphasized.

LH: 3

PR: Science 1807; BIOL 2060 and BIOL 2250 or Biochemistry 2100

**3540 Histotechnique** - inactive course.

**3610 Boreal Ecology** is a study of the principal features of terrestrial ecosystems, with emphasis on the boreal region. This course may be offered in a usual 13 week semester or as a two-week field course.

CR: Environmental Science 3131

LC: either three hours of lecture and three hours of laboratory per week or a two week field course that embodies equivalent instructional time

LH: either three hours of lecture and three hours of laboratory per week or a two week field course that embodies equivalent instructional time

PR: Science 1807; BIOL 2010, 2250, 2600 and 2900; Statistics 2550 or equivalent

**3620 Aquatic Microbial Ecology** (same as Ocean Sciences 3620) is a study of the nature, distribution and activities of microorganisms in the freshwater and marine environments. Field and laboratory work illustrate some of the investigative techniques used in this area of study.

CR: Ocean Sciences 3620 and the former BIOL 3603

LH: 3

PR: Science 1807; BIOL 2600 and 3050; Statistics 2550 or equivalent

**3640 Environmental Physiology of Animals** (same as Ocean Sciences 3640) covers physiological adaptations of animals facilitating their survival in natural environments with emphasis on physiological and biochemical responses of animals to extreme environments. Starting with the fundamental basis of physiological mechanisms, the course explores various aspects and the integration of major physiological processes (metabolism, respiration, osmoregulation) and how these relate to ecological niche.

CR: the former BIOL 3403 or the former BIOL 4455, Ocean Sciences 3640

PR: BIOL 2060; Biochemistry 3106

UL: may not be used to fulfill the physiology course requirement for a Biology major, honours or joint honours program.

**3709 Field Course in Marine Principles and Techniques** begins with a two-week field school immediately prior to the beginning of the Fall Semester. In the Fall Semester there are follow-up lectures, readings and submission of reports. The course is designed to introduce the principal marine environments, organisms and techniques. It is strongly recommended that this course be taken before either BIOL 3710, 3711 or 4810.

PR: Science 1807; BIOL 2600; Statistics 2550 or equivalent and permission of the Head of Department

**3710 Biological Oceanography** is an introductory course in biotic and abiotic factors controlling marine biomass and primary production, emphasizing plankton and fishes. It introduces students to major groups of marine phytoplankton, zooplankton, and fishes, emphasizing how the physical, chemical, and geological environments interact with biology to define processes and pattern in marine organisms.

CR: Ocean Sciences 2000

LC: either three hours of lecture and three hours of laboratory per week or a two-week field course that embodies equivalent instructional time

LH: either three hours of lecture and three hours of laboratory per week or a two-week field course that embodies equivalent instructional time

PR: Science 1807; BIOL 2122 and 2600

**3711 Principles of Marine Biology** is an introductory course in biology of the oceans. Introduces students to marine habitats and the organisms that inhabit them, emphasizing functional morphology, physiology, biodiversity, phylogeny, and ecology. Also includes introduction to marine biogeography, conservation, fisheries and pollution.

LC: either three hours of lecture and three hours of laboratory per week or a two-week field course that embodies equivalent instructional time

LH: either three hours of lecture and three hours of laboratory per week or a two-week field course that embodies equivalent instructional time

PR: Science 1807; BIOL 2122, BIOL 2600

**3712 Benthic Biology** examines the biology of the aquatic benthos (bottom-dwelling organisms); their origins, adaptations, life histories and ecological roles. This course may be offered in a usual 13 week semester or as a two-week field course.

CR: the former Biology 3630

LC: either three hours of lecture and three hours of laboratory per week or a two-week field course that embodies equivalent instructional time

LH: either three hours of lecture and three hours of laboratory per week or a two-week field course that embodies equivalent instructional time

PR: Science 1807; Biology 2122, 2600 and 3710

**3714 Estuarine Fish Ecology Field Course** examines community structure, function and distribution of northern coastal fishes in fjords and estuarine environments. Emphasis on sampling, field techniques, taxonomy, quantitative characterization, adaptations and habitat relationships. A comparative approach will contrast fish communities from other areas. To be held as a two week field course.

PR: Science 1807; BIOL 2600

**3715 Ecology and Evolution of Fishes** (same as the former BIOL 4600) examines the evolutionary history and ecology of the world's fishes, with particular emphasis on those of ecological, economical and cultural importance to Eastern Canada. Topics will include taxonomy, life histories, behaviour, zoogeography, evolutionary ecology, population biology, contemporary evolution, and conservation biology.

CR: the former BIOL 4600

LH: 3

PR: Science 1807; BIOL 2600 and 2900

**3750 Animal Behaviour I** (same as Psychology 3750) is an introduction to the mechanisms, development, function and evolution of behaviour in animals. Topics include the history of ethology and comparative psychology, and behavioural ecology; methods of animal behaviour study, behaviour of

animals in relation to physiology, learning, communication, mating systems, and other areas in Biology and Psychology.

CR: Psychology 3750

PR: BIOL 1001 and 1002; Statistics 2550 or equivalent

**3811 Paleontology** (same as Earth Sciences 3811) is taught and administered by the Department of Earth Sciences.

CR: Earth Sciences 3811, the former BIOL 3800, and the former Earth Sciences 3801

PR: either Earth Sciences 1002 and BIOL 2120 (or BIOL 1001 and 1002); or BIOL 2122 and 2210

**3820 Foundations of Biology** will introduce students to the development of biological understanding, from the classical Greeks to the present. The course consists of an online seminar series, which will cover topics such as the influence of Aristotle, Theophrastus, Hippocrates and Galen, the development of the microscope, the discovery of cells, paleontology, classification, Darwin and evolution, genetics, the discovery of DNA, multidisciplinary approaches to biology, and the impact of biology on everyday life.

OR: 10 on-line seminars prior to the beginning of the two week field course in Harlow and a two-week field component at Harlow Campus in the Spring semester

PR: completion of a minimum of 60 credit hours

UL: not acceptable as one of the required courses for the Minor, Major or Honours programs in Biology

**3950 Research Methods in Genetic Biotechnology** (same as the former BIOL 4900) will include DNA extraction, DNA amplification by the Polymerase Chain Reaction (PCR), DNA cloning, DNA sequence analysis and Bioinformatics. Additional modules in gene expression and re-sequencing chip technologies may be included. Theory and methods will be introduced in a research framework.

CR: the former BIOL 4900

LH: Three hours of lecture and three hours of laboratory per week or a three week on-campus course that embodies equivalent instructor time

PR: Science 1807; BIOL 2060 and 2250

**3951 Introduction to Bioinformatics** (same as Computer Science 3550) deals with the development and application of computational methods to address biological problems. The course will focus on the fundamental concepts, ideas and related biological applications of existing bioinformatics tools. This course will provide hands-on experience in applying bioinformatics software tools and online databases to analyze experimental biological data, and it will also introduce scripting language tools typically used to automate some biological data analysis tasks.

CR: Computer Science 3550

LH: 3

PR: BIOL 2060 or Biochemistry 2101, and one Computer Science course at the 1000-level or above excluding Computer Science 1400, or Computer Science 1600 and Computer Science 2000; or Computer Science 2500 or Computer Science 2001, and one Biology course at the 1000-level or above excluding BIOL 2040 and BIOL 2041; or permission of the course instructor

**4000 Bacterial Systematics** - inactive course.

**4010 Virology** will examine topics about viruses infecting all forms of life including humans and other animals, plants and bacteria. The scope within the course ranges from the molecular biology of virus replication to virus evolution and ecology. Current issues concerning viruses and society are incorporated into the course including the practical applications of viruses, vaccines, and emerging viruses.

LH: Three hours of laboratory/seminar/discussion per week

PR: Science 1807; BIOL 2900 and 3050

**4012 Phycology** - inactive course.

**4040 Mycology** - inactive course.

**4050 Advanced Topics in Microbiology** examines the beneficial and harmful properties of microbes including topics on industrial microbiology and the discovery of new antimicrobial agents. The scope within the course ranges from the genetic manipulation of microbes for useful purposes to the isolation of bacteria for applications in various fields. Current issues concerning microbiology and society will also be discussed including the practical applications of microbes and bacterial diseases affecting society.

LH: 3

PR: Science 1807; BIOL 3050

**4122 Advanced Studies in Marine Animal Diversity** (same as Ocean Sciences 4122) provides an in-depth examination of cellular physiological, behavioural and ecological adaptations in marine animals. Lectures will be combined with discussions of relevant papers from the primary literature on topics of current interest, which may relate to morphology, ecology, evolution, natural history, species interactions and practical applications. Students will also gain hands-on experience by designing and conducting research projects involving live or preserved animals.

CR: Ocean Sciences 4122

LC: either three hours of lecture and three hours of laboratory per week or

- a two-week intensive course that embodies equivalent instructional time  
LH: either three hours of lecture and three hours of laboratory per week or a two-week intensive course that embodies equivalent instructional time  
PR: Science 1807; BIOL 2122 and BIOL 2600
- 4141 Nematology** - inactive course.
- 4150 Insect Systematics and Ecology** - inactive course.
- 4180 General Parasitology** - inactive course.
- 4182 Fisheries and Wildlife Parasitology** - inactive course.
- 4200 Immunology** is an introduction to the cells and organs of the innate and adaptive immune systems. The molecular and cellular basis of allergy, autoimmunity, vaccination and cancer immunology will also be discussed.  
CR: Biochemistry 4105, Pharmacy 3006, and the former Pharmacy 4105  
LH: 3  
PR: Science 1807; BIOL 2060 and BIOL 3050
- 4241 Advanced Genetics** has advanced topics in modern genetic analysis, including regulation of gene expression, developmental genetics, molecular basis of inherited disease, genomics, immunogenetics, behavioural genetics, and molecular evolution.  
LH: 3  
PR: Science 1807; BIOL 2250 and Biochemistry 2101
- 4245 Biophysics** is an examination of the physical properties involved in defining diffusion, membrane properties, electrochemical potentials and the processes of bioenergetics within cells and organelles. Selected topics in biomechanics and the functioning of whole organisms with respect to size, shape, support, orientation, transport and motility.  
LH: 3  
PR: Science 1807; BIOL 2060 and Biochemistry 2101
- 4250 Evolutionary Genetics** has advanced topics in the study of micro and macro-evolutionary phenomena. Genetic variation in natural populations; theory of genetic drift, mutation, migration, inbreeding, and natural selection; neutral theory of molecular evolution, patterns of nucleotide substitution, heritability and quantitative genetics.  
LH: 3  
PR: Science 1807; BIOL 2250 and 2900
- 4251 Genomics** will have lecture, seminar, and laboratory components. Topics covered will include Technical Foundations of Genomics, Global Gene Expression Profiling, Bioinformatics, Comparative Genomics, Microbial Genomics, Genomics and Medicine, Genomics and Agriculture, Environmental Genomics, and Ethical Issues of Genomics. Each topic will involve a lecture component, in which theory and methods will be taught using the textbook and journal articles. Some lecture and lab times will be devoted to seminars on methods and papers related to lecture or laboratory components of the course. In the lab component, students will have the opportunity to use state-of-the-art genomic techniques to address a research question.  
LH: 3  
OR: seminar  
PR: Science 1807; BIOL 2060, 2250
- 4255 Proteomics** - inactive course.
- 4270 History of Biology** - inactive course.
- 4306 Applied Biology** - inactive course.
- 4307 Global Change Biology** examines the evolution of biosphere, global role of photosynthesis in oxygen and carbon dioxide balance, glacial-interglacial oscillations, carbon sources and sinks in modern biosphere, greenhouse gases emissions, population dynamics, origin and global impact of agriculture, global changes in Holocene and Anthropocene.  
LH: 3  
PR: BIOL 2600, BIOL 2900 or permission of the instructor
- 4360 Community and Ecosystem Ecology** is a study of the basic principles, patterns and processes of ecological communities and ecosystems.  
OR: a seminar/discussion group each week  
PR: Science 1807; BIOL 2250, 2600 and 2900 and one of BIOL 2010, 2122 or 2210; Statistics 2550 or equivalent
- 4402 Electron Microscopy in Life Sciences** - inactive course.
- 4404 Microbial Physiology** is a study of the structure and growth of microorganisms. Themes covered in this course include the structure, function and regulation of the microbial cellular machinery, the hierarchical regulation of cellular activities, and communication between cells. Quantitative experimental methodology relating to microbial physiology is studied in the laboratory.  
LH: 3  
PR: Science 1807; BIOL 2250 and BIOL 3050
- 4405 Landscape Ecology** is an introduction to the theory and principles of landscape pattern and processes, including issues related to scale, networks, landform and vegetation patterns, species distributions, and natural and human-caused aspects of landscape change.  
CO: Statistics 2550 or equivalent  
LC: either three hours of lecture and three hours of laboratory per week or a two-week intensive course that embodies equivalent instructional time  
LH: either three hours of lecture and three hours of laboratory per week or a two-week intensive course that embodies equivalent instructional time  
PR: Science 1807; BIOL 2600 and 18 credit hours in Biology; Statistics 2550 or equivalent, or permission from the course instructor
- 4505 Systematics and Biogeography** is a study of the geographical distributions of plants and animals with particular reference to temporal and spatial variability and to theories advanced to explain historical and recent distribution patterns.  
CR: the former Geography 4170  
LH: 3  
PR: BIOL 2250, 2600, 2900 and one of BIOL 2010, 2122 or 2210
- 4510 Distribution Patterns in the Sea** - inactive course.
- 4550 Principles of Endocrinology** comprises an introduction to basic concepts concerned with how chemical messages are transmitted and received between cells to coordinate body functions. Hormonal control of adaptation, reproduction, metabolism, growth, digestion, and electrolyte homeostasis will be discussed. Although the endocrinology of invertebrates and lower vertebrates will be mentioned as appropriate, the main emphasis will be on mammalian and human endocrinology at the level of the whole organism.  
LH: 3  
PR: Science 1807; BIOL 3401; Biochemistry 3106
- 4601 Functional Biology of Fish** (same as Ocean Sciences 4601) is an introduction to anatomical, physiological and cellular aspects of selected processes in the life cycle of fishes.  
CR: Ocean Sciences 4601  
PR: BIOL 2060, 2210 or 3202, and BIOL 3401 or 3640
- 4605 Quantitative Methods in Biology** (same as Statistics 4581 and the former Statistics 4605) is quantitative reasoning using verbal, graphical and statistical models of scaled quantities (units and dimensions). Exploratory and confirmatory analysis of field and laboratory data. Hypothesis testing, including randomization tests. Topics include the general linear model (t-tests, ancova etc), correlation, autocorrelation, geographic statistics, estimates of population size and multivariate methods.  
CR: Statistics 4581 and the former Statistics 4605  
LH: 3  
PR: Statistics 2550
- 4606 Bioinformatics: Biological Data Analysis** (same as Computer Science 4550) provides students with the basis to analyse a variety of biological data within an integrated programming environment for data manipulation, calculation and graphical display. Students will learn to extract meaningful information from data generated by high-throughput experimentation. The course will introduce one such integrated programming environment and will explore the computational and statistical foundations of the most commonly used biological data analysis procedures.  
CR: Computer Science 4550  
LH: 3  
PR: BIOL 3951 or Computer Science 3550, and Statistics 2550 (or equivalent), or permission of the course instructor
- 4607 Models in Biology** is a study of the design and analysis of statistical and mathematical models for exploring the biology of cells, genes, species, populations, communities and ecosystems. Qualitative, quantitative and graphical techniques are used to analyze models and to compare theoretical predictions with empirical data. Classic models of systems biology, population growth, species competition, predator-prey interactions, ecosystem nutrient cycling, immunology, evolutionary invasion analysis, and species distribution will be covered.  
LH: 3  
PR: BIOL 2060, 2600 and 2900; Statistics 2550 or equivalent. It is recommended that students complete BIOL 3295.
- 4620 Ornithology** examines structure, classification, evolution, ecology and behaviour of birds, with particular reference to those of economic importance. Identification of the birds of Eastern Canada.  
LH: 3  
PR: Science 1807; BIOL 2210 and 2600
- 4630 Mammalogy** examines evolution, systematics, life histories and distribution of mammals, with particular emphasis on eastern North American forms.  
LH: 3  
PR: Science 1807; BIOL 2210 and 2600
- 4650 Conservation Biology I: Conservation in Biology and Geography**

(same as Geography 4650) is an examination of how biological and geographical principles can be applied to conserving biological diversity in the natural world under conditions of exploitation and habitat loss. Special emphasis will be given to relevant provincial examples.

CR: Environmental Science 4133, Geography 4650  
OR: 3 hours of seminar/discussion group each week  
PR: 30 credit hours in either Biology or Geography

**4651 Conservation Biology II: Conservation in Practice** examines issues relevant to global conservation science. Topics will be covered through a series of modules, including conservation genetics, costs and consequences of small populations, effects of anthropogenic activity on biodiversity, spatial dynamics, and the interface between science and society.  
PR: BIOL 2900, 3295 and 4650

**4701 Animal Behaviour II** (same as Psychology 4701) is an examination of the behaviour of animals with particular emphasis on evolution and ecology. Topics include behavioural genetics and evolution, reproductive strategies, social behaviour, habitat selection, territoriality, foraging behaviour, and other topics in biology and psychology.

CR: Psychology 4701  
LH: 3  
PR: BIOL 3750 or Psychology 3750

**4710 Experimental Marine Ecology of Newfoundland Waters** is a two-week field course examines the ecology of cold ocean environments, focussing on energy flux through marine pelagic and benthic flora and fauna of Newfoundland waters, and how the dynamics of this environment influence linkages among organisms in different habitats. The course will be field intensive with some lecture component and a strong hands-on field component. Students will identify local organisms and study how and why they vary in time and space. This course will be offered during two weeks of the Spring semester.

PR: Science 1807; BIOL 2600

**4750 Fisheries Ecology** is the application of ecological principles to the problem of managing exploited fish populations. Laboratory exercises will be based on a simulation approach to fisheries problems using computer and animal models.

LH: 3  
PR: BIOL 2600

**4770 Research Experience in Animal Behaviour** (same as Psychology 4770) allows students to gain research experience in selected areas of animal behaviour. This course may be offered in a usual 12-week semester or as a two-week field course.

CR: Psychology 4770  
LC: either three hours of lecture per week or a two-week field course that embodies equivalent instructional time  
PR: BIOL 3750 or Psychology 3750

**4800 Advanced Palaeontology** (same as Earth Sciences 4800) is a field, lecture, laboratory and seminar course dealing with selected topics in general and applied paleontology. Topics include measuring evolution and extinction, population paleontology, functional morphology, paleoecology, statistical methods for paleontological studies, and applications in petroleum, mining, and environmental studies. This course is taught and administered by the Department of Earth Sciences.

CR: Earth Sciences 4800  
LH: 3  
PR: Earth Sciences/BIOL 3811, and one of Statistics 2550, the former Statistics 2510 or Mathematics 2000

**4810 Research Field Course in Marine Biology** will consist of an intensive two-week field school designed to acquaint students with marine field research, experimental design, methodology and data analysis. Emphasis will be placed on individual projects. Projects must be designed and approved prior to the commencement of the course and will involve a written report. At the discretion of the Head of Department, another recognized field course may be substituted for BIOL 4810.

PR: Science 1807; BIOL 3710 and any two of BIOL 2010, 2122 or 2210, and permission of the Head of the Department. It is strongly recommended that students take BIOL 3709 before 4810.

**4820 Field Course in Terrestrial Biology** will begin with a three-week field school immediately prior to the beginning of the Fall Semester. It is designed to acquaint students with terrestrial organisms and environments, and emphasis will be placed on survey and sampling techniques. In the Fall Semester the material and data collected in the field will be used in lecture and laboratory periods dealing with identification, analytical methods, and report compilation.

PR: Science 1807; BIOL 2010, 2122, 2210, 2600 and permission of the Head of the Department. It is recommended that students complete BIOL 4605.

**4822 Internship in Biology** - inactive course.

**4910-4920 Special Topics in Biology** will be given for senior undergraduates and will be in a two-week format which will involve equivalent instruction time as a course on campus. These courses will cover

a range of topics in specialized fields in Biology and may be offered at the Bonne Bay Field Station, at the Harlow campus or elsewhere as appropriate. They may be taught by visiting specialists when available.

**499A and 499B Honours Dissertation** is available only to students in the Honours Program. Requirements for the Dissertation are outlined under **Honours Degrees**.

PR: admission to the Honours Program

## 10.2.1 Work Term Descriptions

The following Work Terms are a requirement of the Biology (Co-operative) Program (BCOP) only.

**199W Work Term I** follows the successful completion of Semester 4. Students are expected to learn, develop and practice the high standards of behaviour and performance normally expected in the work environment. (A detailed description of each job is normally posted during the job competition.)

As one component of the Work Term, the student is required to complete a work report. The work report, as a minimum requirement should

1. analyse an issue/problem related to the student's work environment.
2. demonstrate an understanding of the structure of a professional report, and show reasonable competence in written communication and presentation skills. (Students should consult the evaluation form provided in the placement package.)

Late reports will be graded as FAIL unless prior permission for a late report has been given by Co-operative Education.

Seminars on professional development, conducted by Co-operative Education, are presented during Semester 4 to introduce and prepare the student for participation in the subsequent work terms. Topics may include, among others, work term evaluation, work report writing, career planning, employment seeking skills, resume preparation, self employment, ethics and professional concepts, behavioural requirements in the work place, assertiveness in the work place and industrial safety.

CH: 0

LC: 0

PR: Admission to the Biology Major and successful completion of semester 4

**299W Work Term II** follows the successful completion of Semester 6. Students are expected to further develop and expand their knowledge and work-related skills and should be able to accept increased responsibility and challenge. In addition, students are expected to demonstrate an ability to deal with increasingly complex work-related concepts and problems. The work report, as a minimum requirement should

1. analyze an issue/problem related to the student's work environment and demonstrate an understanding of practical application of concepts relative to the student's academic background
2. demonstrate competence in creating a professional report, and
3. show competence in written communication and presentation skills. Late reports will be graded as FAIL unless prior permission for a late report has been given by Co-operative Education.

CH: 0

LC: 0

PR: admission to the Biology Major and successful completion of semester 6

**399W Work Term III** follows the successful completion of semester 7 or Work Term II. Students should have sufficient academic grounding and work experience to contribute in a positive manner to the problem-solving and management processes needed and practiced in the work environment. Students should become better acquainted with their discipline of study, should observe and appreciate the attitudes, responsibilities, and ethics normally expected of professionals and should exercise greater independence and responsibility in their assigned work functions.

The work report should reflect the growing professional development of the student and, as a minimum requirement, will

1. demonstrate an increased ability to analyse a significant issue/problem related to the student's experience in the work environment
2. demonstrate a high level of competence in producing a professional report, and
3. show a high level of competence in written communication and presentation skills.

Late reports will be graded as FAIL unless prior permission for a late report has been given by Co-operative Education.

CH: 0

LC: 0

PR: admission to the Biology Major and successful completion of semester 7 or Work Term II

## 10.3 Chemistry

Chemistry courses are designated by CHEM.

**1010 Introductory Chemistry I** examines descriptive chemistry; measurements; atoms; molecules; the mole; mole calculations and reaction stoichiometry; the balancing of redox reactions; gases; thermochemistry;

introduction to chemical kinetics and equilibrium; acids and bases.

AR: attendance is required in the laboratory component of this course.  
Failure to attend may result in a failing grade or deregistration from the course.

CR: CHEM 1200

LC: 4

LH: 3 hours biweekly alternating with tutorials

OR: 1.5 hour tutorial alternating with labs

PR: Science 1807. It is recommended that students have successfully completed high school Academic Mathematics 3201, or a pass in any university level mathematics course

UL: only 6 science credit hours will be awarded for a major or honours in Chemistry from the following course groups: CHEM 1010/1011/the former 1031, or CHEM 1010/1050/1051, or CHEM 1810/1200/1001 (Grenfell Campus)

**1011 Introductory Chemistry II** examines atomic structure; periodic properties; chemical bonding including VSEPR shapes and polarity; introduction to valence bond theory and hybridization; liquids, solids and intermolecular forces; solubility equilibrium; electrochemistry.

AR: attendance is required in the laboratory component of this course.  
Failure to attend may result in a failing grade or deregistration from the course.

CR: CHEM 1001 and CHEM 1051

LH: 3 hours biweekly alternating with tutorials

OR: 1.5 hour tutorial alternating with labs

PR: Science 1807; CHEM 1010

UL: only 6 science credit hours will be awarded for a major or honours in Chemistry from the following course groups: CHEM 1010/1011/the former 1031, or CHEM 1010/1050/1051, or CHEM 1810/1200/1001 (Grenfell Campus)

**1050 General Chemistry I** builds on basic chemistry concepts from high school. Topics include gases; thermochemistry; atomic structure; periodic properties; chemical bonding including valence bond theory; hybridization and introduction to molecular orbital theory; properties of liquids and solids.

AR: attendance is required in the laboratory component of this course.  
Failure to attend may result in a failing grade or deregistration from the course.

CR: CHEM 1200

LC: 4

LH: 3

PR: Science 1807; CHEM 1010 with a grade of at least 60% or high school CHEM 3202 with a grade of at least 65%. It is also recommended that students have successfully completed high school Mathematics 3200 or 3201.

UL: only 6 science credit hours will be awarded for a major or honours in Chemistry from the following course groups: CHEM 1010/1011/the former 1031, or CHEM 1010/1050/1051, or CHEM 1810/1200/1001 (Grenfell Campus)

**1051 General Chemistry II** builds on CHEM 1050 topics and on basic chemistry concepts from high school. Topics include solutions, kinetics, chemical equilibrium, equilibria involving acids and bases including polyprotic acids, buffers, acid-base indicators, titration curves, solubility and complex ion equilibrium, thermodynamics, and electrochemistry.

AR: attendance is required in the laboratory component of this course.  
Failure to attend may result in a failing grade or deregistration from the course.

CR: CHEM 1001 and CHEM 1011

LC: 4

LH: 3

PR: Science 1807; CHEM 1050

UL: only 6 science credit hours will be awarded for a major or honours in Chemistry from the following course groups: CHEM 1010/1011/the former 1031, or CHEM 1010/1050/1051, or CHEM 1810/1200/1001 (Grenfell Campus)

**2100 Analytical Chemistry I** is an introduction to analytical chemistry and includes preparation of samples and standards, calibration methods, statistical treatment of data, spectrophotometric trace analysis, gravimetric analysis and volumetric analysis including acid-based titrations, precipitation titrations, oxidation-reduction titrations, complexometric titrations and titrations in non-aqueous systems. Also introduced are liquid-liquid and other types of extraction, and chromatography with key methods of detection. Theoretical, practical and problem-solving aspects are covered.

AR: attendance is required in the laboratory component of this course.  
Failure to attend may result in a failing grade or deregistration from the course.

CR: the former CHEM 3100

LH: 3

PR: Science 1807; CHEM 1051 (or 1001 or the former 1031) with a grade of at least 60%

**2210 Introductory Inorganic Chemistry** studies the chemistry of selected s, p, and d block elements. Introduction to crystal and molecular structures and to molecular orbital and crystal field theories.

AR: attendance is required in the laboratory component of this course.  
Failure to attend may result in a failing grade or deregistration from the

course.

LH: 3

PR: Science 1807; minimum 60% in CHEM 1051 (or 1001 or the former 1031); Mathematics 1000

**2301 Thermodynamics and Kinetics** builds upon knowledge of physical chemistry from first year. It covers the three laws of thermodynamics for ideal and real systems as well as chemical kinetics. Topics in thermodynamics include the thermodynamics of ideal and real gases, phases, and solutions, the Maxwell relations, equilibria between phases, and in electrolyte solutions. The integrated rate laws for simple and complex mechanisms, and the temperature dependence of reaction rates in terms of kinetic molecular theory are some of the topics discussed in the kinetics section of the course.

AR: attendance is required in the laboratory component of this course.  
Failure to attend may result in a failing grade or deregistration from the course.

CR: the former CHEM 2300

LH: 3

PR: Science 1807; minimum 60% in CHEM 1051 (or CHEM 1001 or the former CHEM 1031), Mathematics 1001. Physics 1051 or Physics 1021 is recommended.

**2302 Quantum Chemistry and Spectroscopy** examines the quantum mechanics of simple systems such as the particle in a box, the harmonic oscillator, linear rotor, and hydrogen-like atoms. Topics also include orbital quantum numbers, spin, many electron atoms, an introduction to quantum mechanical methods, the electronic structures of molecules, bonding, and symmetry. Furthermore, electronic, rotational, and vibrational spectroscopy will be discussed as well as modern applications of spectroscopy and lasers.

AR: attendance is required in the laboratory component of this course.  
Failure to attend may result in a failing grade or deregistration from the course.

CO: Mathematics 2000 is recommended

CR: the former CHEM 3301

LH: 3

PR: Science 1807; minimum 60% in CHEM 1051 (or CHEM 1001 or the former CHEM 1031), Mathematics 1001 and Physics 1051 or Physics 1021

**2400 Introductory Organic Chemistry I** is a course on bonding involving carbon; conformations and stereochemistry; introduction to functional groups and nomenclature; properties, syntheses and reactions of hydrocarbons, alkyl halides and alcohols.

AR: attendance is required in the laboratory component of this course.  
Failure to attend may result in a failing grade or deregistration from the course.

CO: CHEM 1051

CR: CHEM 2440

LH: 3

PR: Science 1807; CHEM 1050 and 1051, or the former 1031; or CHEM 1010 and 1011 with a grade of at least 80% in each; or CHEM 1011 with a grade of at least 85%; or CHEM 1001 with a grade of at least 65%

**2401 Introductory Organic Chemistry II** is an introduction to the interpretation of infrared, H and C-13 NMR spectra; properties, syntheses and reactions of ethers, simple aromatic compounds, ketones, aldehydes, amines, carboxylic acids and their derivatives; aldol and related reactions.

AR: attendance is required in the laboratory component of this course.  
Failure to attend may result in a failing grade or deregistration from the course.

CR: the former CHEM 2420, 2440, and the former 240A/B

LH: 3

PR: Science 1807; CHEM 2400

**2440 Organic Chemistry for Biologists** is an introduction to the principles of organic chemistry with an emphasis on material relevant to biological molecules. The laboratory will introduce techniques and illustrate concepts covered in the course. This course is designed primarily for Biology Majors.

AR: attendance is required in the laboratory component of this course.  
Failure to attend may result in a failing grade or deregistration from the course.

CR: CHEM 2400

LH: 3

PR: Science 1807; CHEM 1011 (or 1001 or 1051)

UL: may not be used for credit by Chemistry or Biochemistry Majors and is not a prerequisite for any other Chemistry course.

**2610 Introductory Chemical Oceanography** (same as Ocean Sciences 2100) provides an introduction to the fundamental chemical properties of seawater and the processes governing the concentrations of elements and compounds in the oceans. It is an introduction to the sources, distribution, and transformations of chemical constituents of the ocean, and their relation to biological, chemical, geological, and physical processes. Topics include: controls on average concentration of chemicals in the ocean; vertical and horizontal distributions of ocean constituents; air-sea interactions; production, export, and remineralization of organic matter; the ocean carbon cycle; human-induced changes; stable isotopes; and trace elements.

CR: Ocean Sciences 2100  
PR: CHEM 1011 or 1051 which may be taken concurrently or CHEM 1001

**3110 Analytical Chemistry II** (same as the former CHEM 4110) builds upon the student's knowledge from CHEM 2100 (Analytical Chemistry I) and applies it to a more advanced level of instrumental quantitative analysis. The course examines error treatment, atomic emission and absorption spectroscopy, gas and liquid chromatography, capillary electrophoresis and supercritical fluid chromatography and extraction techniques, electroanalytical chemistry, molecular and atomic mass spectrometry, x-ray spectroscopy, ion and electron spectroscopy, surface analysis techniques and thermogravimetric analysis.

AR: attendance is required in the laboratory component of this course. Failure to attend may result in a failing grade or deregistration from the course.

CR: the former CHEM 4100, the former CHEM 4101, or the former CHEM 4110

LH: 3

PR: Science 1807; CHEM 2100 or the former CHEM 3100

**3210 Main Group and Materials Chemistry** is a detailed examination of the chemistry of the s and p block elements and modern applications of inorganic chemistry in materials and nanotechnology.

AR: attendance is required in the laboratory component of this course. Failure to attend may result in a failing grade or deregistration from the course.

LH: 3

PR: Science 1807; CHEM 2210, CHEM 2301 (or the former CHEM 2300), and CHEM 2302

**3211 Inorganic Chemistry** is a detailed examination of the structure, bonding, and chemistry of the d block elements.

AR: attendance is required in the laboratory component of this course. Failure to attend may result in a failing grade or deregistration from the course.

LH: 3

PR: Science 1807; CHEM 2210

**3303 Statistical Thermodynamics and Rate Theories** examines physical chemistry from the microscopic viewpoint. Topics include probability distributions, quantum statistical mechanics, statistical thermodynamics, ensembles, kinetics and introduction to statistical rate theories as well as an introduction to computational chemistry (lab).

AR: attendance is required in the laboratory component of this course. Failure to attend may result in a failing grade or deregistration from the course.

CR: the former CHEM 3300

LH: 3

PR: Science 1807; CHEM 2301 (or Engineering 4602), CHEM 2302, Mathematics 2000 (or Engineering 3424)

**3410 Bio-organic Chemistry** is a study of the major classes of biomolecules, their structure, function, and in vitro chemistry. An introduction to natural products. Synthetic polymers compared to biopolymers. Heteroaromatic molecules and derived biomolecules.

AR: attendance is required in the laboratory component of this course. Failure to attend may result in a failing grade or deregistration from the course.

CR: the former CHEM 3401

LH: 3

PR: Science 1807; CHEM 2401

**3411 Synthetic Organic Chemistry I** is a survey of some important reactions used in organic synthesis, including pericyclic reactions and those based on carbocation, carbene, nitrene and carbanion intermediates. Emphasis is placed on multifunctional compounds.

AR: attendance is required in the laboratory component of this course. Failure to attend may result in a failing grade or deregistration from the course.

CR: the former CHEM 3400

LH: 3

PR: Science 1807; CHEM 3410, or all of CHEM 2401, Biochemistry 2100 and Biochemistry 2101

**3600 Marine Chemistry** - inactive course.

**4150 Advanced Spectrometric Techniques** - inactive course.

**4151 Analytical Separations and Organic Mass Spectrometry** examines advances in the traditional chromatographic techniques, the development of new analytical tools in separation science, the interfacing of mass spectrometers to chromatographic instruments, and other mass spectrometric techniques.

AR: attendance is required in the laboratory component of this course. Failure to attend may result in a failing grade or deregistration from the course.

LH: 3

PR: Science 1807; CHEM 3110 (or the former CHEM 4100 or the former CHEM 4101 or the former CHEM 4110)

**4152 Electroanalytical Techniques** examines the principles and theory of dynamic electrochemistry, voltammetry, stripping analysis, electro-chemical sensors and detectors.

PR: CHEM 3110 (or the former CHEM 4100 or the former CHEM 4101 or the former CHEM 4110)

**4156 Analytical Method Development and Sampling** comprises the development and critical evaluation of analytical methods and sampling protocols for analyses in complex matrices, including those relevant to environmental, medical, food, and forensic sciences.

PR: CHEM 3110

**4201 Coordination Chemistry in Biological Molecules - Structural, Mechanistic and Magnetic Studies** examines the role of certain transition elements e.g. iron, copper, cobalt, and zinc, in proteins and enzymes will be discussed in terms of structural features, the natural ligands, magnetic properties, mechanisms, etc., and reinforced with examples of 'model compounds'. Magnetic theory, in particular for polynuclear transition metal complexes, will also be developed.

PR: CHEM 3211

**4202 Selected Topics in Main Group Chemistry** - inactive course.

**4203 Organometallic Chemistry** is principles and applications of organometallic chemistry with emphasis on compounds of the transition metals, lanthanides and actinides. A study of synthetic methods, structure, bonding, reactions and applications of these concepts to organic synthesis and to catalysis.

PR: CHEM 3211

**4204 Inorganic Reaction Mechanisms and Catalysis** is a survey of inorganic and organometallic reactions, their mechanisms and kinetic characteristics. In addition, stereochemical non-rigidity, reactions of coordinated ligands and homogeneous catalysis are discussed.

PR: CHEM 3211

**4205 Photochemistry of Transition Metal Complexes** is an introduction to the theory of electronic excited states in transition metal complexes. Applications to artificial photosynthesis, photodynamic therapy, molecular photovoltaics and molecular electronics.

CO: CHEM 3211 and CHEM 2302

PR: CHEM 3211 and the former CHEM 3301 or CHEM 2302

**4206 Green Chemistry** examines the benefits and limitations of new methods aimed at reducing the environmental impact of chemical processes including waste prevention, hazard/risk reduction, catalysts, renewable feedstocks and alternative solvents.

PR: CHEM 2401 and CHEM 3211

**4304 Advanced Quantum Chemistry** examines exact solutions to the Schrodinger equation, introduction to approximate methods, modern methods (wavefunction and density functional theories), spectroscopy, and applications of computational chemistry.

CR: the former CHEM 4300

PR: CHEM 2302 (or the former CHEM 3301) and Mathematics 2260. Due to the requirement of Mathematics 2260, students wishing to take this course should plan ahead.

**4305 Advanced Statistical Thermodynamics** examines intermolecular forces, the properties of liquids, the solvation of molecules and ions, and the structure and dynamics of macromolecules within the framework of statistical thermodynamics.

CR: the former CHEM 4303

PR: CHEM 3303 or the former CHEM 3301

**4350 Advanced Physical Chemistry III: Selected Topics in Physical Chemistry** is discussion of selected topics of current interest in physical chemistry and chemical physics, given in lecture or seminar form. Representative topics are crystal structure and x-ray crystallography, data processing and modelling, microwave spectroscopy, quantum chemical calculations. Arrangements to take this course should be made during the previous academic year.

PR: CHEM 3303

**4411 Topics in Medicinal Chemistry** - inactive course.

**4420 Physical Organic Chemistry** is an introduction to the quantitative and qualitative theories of reactions and reactivity and their application to organic reaction mechanisms and to mechanism elucidation.

CR: the former CHEM 4400 and the former CHEM 4401

PR: CHEM 2302 or the former CHEM 3301, and CHEM 3411 or the former CHEM 3401

**4430 Synthetic Organic Chemistry II** examines modern synthetic methods with particular attention placed on the synthesis of enantiomerically enriched compounds and newer methods for the formation of carbon-carbon bonds. Designing syntheses of complex organic molecules.

CR: the former CHEM 4410

PR: the former CHEM 3401 or 3411. CHEM 4420 is strongly recommended.

**4500 Advanced Nuclear Magnetic Resonance Spectroscopy** examines advances in modern and traditional NMR techniques, the principles and applications of solution and solid-state NMR spectroscopy and micro imaging.

AR: Attendance is required in the laboratory component of this course. Failure to attend may result in a failing grade or deregistration from the course.

LH: 3  
PR: CHEM 2302 and 2401

**4701 Principles of Pharmaceutical Chemistry** will provide the necessary foundation of knowledge to enable students to understand the principles of drug discovery, the main pharmacokinetics properties of drugs, the relationships between the chemical structure of drugs and their biological actions, their toxicity and side-effects, and the kinetics of inhibitory mechanisms and the metabolic reactions of drugs. It will also provide an overview of pharmaceutical regulatory affairs.

PR: CHEM 3410 or Biochemistry 3105 or permission of the instructor

**490A/B Honours Research in Chemistry** is available only to students in Chemistry Honours or Chemistry Joint Honours Programs. These courses are two single-semester, linked courses based on independent research carried out under the supervision of a faculty member in the Department of Chemistry. Research undertaken for these courses must have a clear disconnect from any research previously conducted. These courses are mandatory for Honours Chemistry students. A grade of pass in 490A is required to proceed to 490B. A written thesis is to be handed in by the end of the course. 490A and 490B are to be taken in the Fall and Winter semesters in the same academic year.

CH: 6  
PR: admission to the Honours Chemistry Program or Chemistry Joint Honours Program and honours standing  
UL: may be taken by students not in an Honours program or without Honours standing with the permission of the Head of the Department and a research supervisor.

## 10.4 Computer Science

Computer Science courses are designated by COMP.

### 10.4.1 First Year Courses

**1000 Computer Science – An Introduction** is a gentle introduction to computer science. In a breadth-first overview approach it discusses important aspects of computer science including fundamentals in algorithms, binary data representation, Boolean logic and its implementation, machine architecture, systems software, networking concepts, programming languages, databases, and selected Computer Science subfields.

CR: COMP 1700  
LH: 3

**1001 Introduction to Programming** is an introduction to fundamental programming techniques, primitive data types, and to simple algorithms and their design concepts.

CR: COMP 1710  
LH: 3

**1002 Introduction to Logic for Computer Scientists** introduces methods of reasoning and logic tools that underlie computer science. In particular, this course covers propositional and predicate logic, sets and other discrete structures, as well as modular arithmetic and basic counting, with emphasis on their applications in computer science.

CR: COMP 2742, Engineering 4424, Mathematics 2320. Students cannot receive credit for COMP 1002 if completed with, or subsequent to, Mathematics 2320.  
LH: 3

**1400 Computing in the 20th Century and Beyond** will give an overview of the development of computing technologies over the last 75 years as well as both the perception of these technologies by, and their impact on, society. The course will be organized chronologically by decade, and within each decade will examine the dominant computing developments, their image in various print and pictorial media, and their social impact. The aim is to give students of all disciplines an appreciation of the abilities and limitations of computer technology and how such technologies interact with society.

**1510 An Introduction to Programming for Scientific Computing** introduces students to basic programming in the context of numerical methods with the goal of providing the foundation necessary to handle larger scientific programming projects. Numerical methods to solve selected problems from Physics, Chemistry, and Mathematics will be covered.

CR: the former COMP 2602 and the former Mathematics 2120  
LH: 2  
PR: Mathematics 1000

**1550 Introduction to Multimedia Application Development** is an introduction to programming and computer science with an emphasis on the development of multimedia applications. The course introduces the

fundamental principles of programming, including object-oriented and event-driven programming, how to use and create classes and methods and combine them with multimedia libraries to produce animations, handle input from keyboard and mouse, and import sounds and videos to produce multimedia applications which can be directly deployed on the Internet.

LH: 3

**1600 Basic Computing and Information Technology** offers an overview of information technology. It provides students with an understanding of basic concepts and necessary skills required to use spreadsheet, database and presentation software to manage, analyze, and present data.

CR: the former Business 2700, the former COMP 2650 and the former COMP 2801  
LH: 3

**1700 Introduction to Computer Science** lays the foundation for the art and the science of computing. The course contains fundamental and topical issues in computers, languages, programming and applications. This course is designed for potential Computer Science majors without a background in programming, but is also available for non majors.

CR: COMP 1000  
LH: 3

**1710 Object-Oriented Programming I** is an introduction to fundamental programming techniques, primitive data types and operations, program control structures and the use of objects, classes and methods.

CR: COMP 2710 or COMP 1001

### 10.4.2 Second Year Courses

**2000 Collaborative and Emergent Behaviour** is a survey of computation as a means of understanding, modelling, and describing artificial and natural systems. The emergence of complex behaviour from the interaction of simple rules governing individual components is illustrated and discussed, as well as the role of communication between system components. Selected systems to be studied will be drawn from different topic areas which may include the worldwide web, the mind (cognitive science), formal logic, autonomous robotics, chaos and fractals, and bioinformatics. Each topic will incorporate an associated laboratory experience.

LH: 3 hours bi-weekly

**2001 Object-Oriented Programming and Human-Computer Interaction** advances from Introduction to Programming and studies object-oriented programming. Additional topics include event-driven programming, program correctness and simple refactoring, as well as interfaces and human-computer interaction. A brief overview of programming languages is also provided.

CR: COMP 2710  
LH: 3  
PR: COMP 1001, Mathematics 1000

**2002 Data Structures and Algorithms** covers fundamental data structures, algorithms and algorithm design techniques. A problem-driven course, it focuses on computational problem solving from designing an efficient algorithm to implementing it using appropriate data structures.

CR: COMP 2711  
LH: 3  
PR: COMP 1001, COMP 1002

**2003 Computer Architecture** introduces computer architecture at the digital logic implementation level, at the instruction set level, and at the level where programming languages are translated into the underlying machine instructions.

CR: COMP 3724  
LH: 3  
PR: COMP 1001, COMP 1002

**2004 Introduction to Operating Systems** introduces fundamental techniques for interfacing between computer software and hardware platforms, including the composition of, and connections within, a multilevel operating system. Students learn how to design substantial parts of an operating system.

CR: COMP 3725  
PR: COMP 2002, COMP 2003

**2005 Software Engineering** introduces students to the different software process models, to project management and the software requirements engineering process, as well as to systems analysis and design as a problem-solving activity.

CR: COMP 3716  
PR: COMP 2001

**2006 Computer Networking** introduces students to the use of programming interfaces for computer networking and to understand how the Internet works on the level of protocols. It focuses on the most commonly used of those protocols that are in the vast majority of modern computer systems.

CH: 1  
CO: COMP 2004  
CR: COMP 3715

PR: COMP 2001, COMP 2002

**2007 Introduction to Information Management** introduces the basic knowledge needed for managing large volumes of data. It covers topics in information management and database systems from storage and retrieval to security and privacy of data.

CH: 1  
CO: COMP 2004  
CR: COMP 3754  
PR: COMP 2002

**2008 Social Issues and Professional Practice** covers ethical and social considerations of computing to provide students with the basis to address these issues by ethical and technical actions. Case studies are used to illustrate ethical and social issues of computing.

CH: 1  
CR: COMP 2760  
PR: COMP 1000

**2500 Data Analysis with Scripting Languages** introduces the use of scripting languages to solve common data analysis tasks. The control structures and expressions of the language are first discussed. Script solution to storing/retrieving data sets, searching data sets, and performing numeric and statistical calculation are covered. Plotting and visualization for data sets are also presented.

PR: COMP 1510 or COMP 1700 or COMP 1710 or COMP 1000 or COMP 1001 (or equivalent)

**2510 Programming in C/C++** is a comprehensive treatment of the C/C++ programming languages. It is intended for students with some first programming experience. This course starts with a discussion of fundamentals of C and C++, moves on to the object-oriented aspects of C++, and introduces some advanced topics. It is an essential course for mastering the power of this rich programming language.

CR: Engineering 3891  
LH: 3  
PR: COMP 1510 or COMP 1550 or COMP 1700 or COMP 1710 or COMP 1000 or COMP 1001 or Engineering 1020 (or equivalent)

**2710 Object-Oriented Programming II** continues from Object-Oriented Programming I, and studies object-oriented and event-driven programming. Additional topics include: recursion, basic analysis of algorithms, fundamental data structures such as simple linked structures and stacks, and fundamental computing algorithms such as binary search and quadratic time sorting. A brief overview of programming languages, virtual machines and language translations is also provided.

CR: COMP 2001  
LH: 3  
PR: COMP 1710 and Mathematics 1000

**2711 Introduction to Algorithms and Data Structures** includes the study of standard ways of organizing and manipulating data in computer storage. Fundamental concepts in the design and analysis of algorithms are also discussed.

CR: COMP 2002  
LH: 3  
PR: COMP 2710. It is recommended that students complete COMP 2742 prior to registering for COMP 2711

**2718 Development Tools, Work Flows and Concepts** covers tools, work flows and concepts used in software development in a concentrated introductory set of topics. The essential work flows (with their underlying concepts) used to edit, build, test, combine with existing software and find existing software are introduced. The tools covered include text editors, programming language translators, file management tools, debuggers, scripting tools, source control tools, and building, testing and deployment tools. The architecture and use of an Integrated Development Environment are discussed.

LH: 3  
PR: COMP 1510 or COMP 1550 or COMP 1700 or COMP 1710 or COMP 1000 or COMP 1001

**2742 Logic for Computer Science** is an introduction to propositional and predicate logic with applications. The use of the system of boolean logic in reasoning and circuit design, as well as basic proof techniques and the resolution principle, for both propositional and predicate logic, will be covered. Concepts involving sets will be used to illustrate different types of proof techniques. The probable intractability of boolean logic and Goedel's incompleteness theorem will be presented.

CR: COMP 1002  
PR: COMP 1710 or COMP 1001, and Mathematics 1000

**2760 Encountering the Computer: Society and the Individual** examines social, ethical, legal and cultural issues surrounding the use of computers in modern society. These broader social issues are followed by an examination of the use of social and individual psychology in user interface design. Students will be expected to demonstrate an understanding of these issues both directly (through verbal and written discourse) and practically, as applied to the creation of actual software artifacts.

CO: COMP 2710 or COMP 2001

CR: COMP 2008  
PR: two 1000-level English courses, or equivalent

### 10.4.3 Third Year Courses

**3550 Introduction to Bioinformatics** (same as Biology 3951) deals with the development and application of computational methods to address biological problems. The course will focus on the fundamental concepts, ideas and related biological applications of existing bioinformatics tools. This course will provide hands-on experience in applying bioinformatics software tools and online databases to analyze experimental biological data, and it will also introduce scripting language tools typically used to automate some biological data analysis tasks.

CR: Biology 3951  
LH: 3  
PR: Biology 2060 or Biochemistry 2101, and one Computer Science course at the 1000-level or above excluding COMP 1400, COMP 1600 and COMP 2000; or COMP 2500 or COMP 2710 or COMP 2001, and one Biology course at the 1000-level or above excluding Biology 2040 and Biology 2041; or permission of the course instructor

**3700 Industrial Experience** is a course for students who are admitted to CIO. Students are required to register for this non-credit course every semester during their internship. This course is open only to students who have been accepted into the Internship Program and provides an opportunity for qualified students to obtain rewarding job experience of 8, 12 or 16 months of continuous duration, during the course of their studies.

CH: 0  
PR: admission to the Computer Industry Internship Option (CIIO)

**3710 Vocational Languages** is a study of several programming languages of vocational significance. The use of appropriate programming paradigms to solve some significant problems will be illustrated.

PR: COMP 2711 or COMP 2002

**3715 Network Computing with WEB Applications** studies how distributed applications (e.g., client/server Web applications) are constructed using the Internet. Topics covered include: the socket interface for network communication, client/server applications, browser scripting using Javascript, content generation for web applications (e.g., jsp, php), html/css documents, and the use of cryptography to handle security.

CR: COMP 2006  
PR: COMP 2711 or COMP 2002

**3716 Software Methodology** studies the development of software by gathering the requirements of the software program, analysing the requirements to create a development model, and creating the software and documents for the software product. This course studies techniques for all three software development activities.

CR: COMP 2005  
PR: COMP 2711 or COMP 2002

**3718 Programming in the Small** demonstrates the tools and techniques used in the construction of small software systems. The software tools and techniques to be covered include analysis and design of software components, software construction tools (e.g. linkers, builders, debuggers), software library use and design, and system integration.

PR: COMP 2711 or COMP 2002

**3719 Theory of Computation and Algorithms** is an introduction to formal algorithmic problem solving. Various algorithm design techniques that sometimes yield efficient solutions are studied. Deterministic and nondeterministic machines (finite state automata, pushdown automata and Turing machines) are discussed and used to efficiently solve problems such as the String Matching Problem, the parsing of Context-free Languages, and to introduce the theory of NP-completeness. In addition, Turing machines are used to prove the unsolvability of certain problems. Tractable, intractable and undecidable problems are contrasted. Basic issues related to parallelization are discussed as well.

CR: the former COMP 3711 and the former COMP 3740  
PR: COMP 2711 or COMP 2002; and Mathematics 2320 or COMP 1002

**3724 Computer Organization** can be studied at the digital logic implementation level, the instruction set architecture level, and the translation of programming languages to the underlying machine instruction level. This course studies computer organization at these levels.

CR: COMP 2003  
PR: COMP 2711 or COMP 2002; and COMP 2742 and Mathematics 2320, or COMP 1002

**3725 Computer Architecture and Operating Systems** covers system design and the architectural implementations of these designs. The objective is to develop the basic concepts of processor design, memory management, operating systems, and I/O devices and their interactions.

CR: COMP 2004  
PR: COMP 3724 or COMP 2003

**3731 Introduction to Scientific Computing** main objectives are the development of algorithms for the numerical solution of mathematical

problems and the study of the numerical stability of these algorithms. The efficiency of these algorithms with respect to speed and storage requirements is considered as well. Emphasis is also placed on the study of the sensitivity of selected problems to perturbations in the data. There is also a brief introduction to the development of numerical algorithms that take advantage of advanced computer architectures, such as pipeline processors, array processors and parallel processors.

CR: Mathematics 3132

PR: Mathematics 2000 and Mathematics 2050, and COMP 2710 or COMP 1001

**3753 Computational Aspects of Linear Programming** is an introduction to the Linear Programming Problem (LPP). The emphasis is placed upon developing the most recent and numerically reliable algorithms for the solution of the Linear Programming Problem. The numerical stability of these algorithms will be examined as well. Geometric understanding of the LPP. Simplex method for the LPP. Sparse matrix LPP. Duality and postoptimality analysis. Extensions to the simplex algorithm. Principles of interior algorithms for the LPP.

PR: Mathematics 2050, and COMP 2710 or COMP 2001

**3754 Introduction to Information and Intelligent Systems** introduces students to application areas that are away from usual number-based and text-based processing. Students will learn the basic concepts and become aware of the historical developments and social and ethical issues related to the application areas such as intelligent systems and information management. This exposure will help students to become knowledgeable about managing large volumes of data and dealing with problems that are well defined but whose algorithmic solutions are not feasible or problems that are fuzzily defined.

CR: COMP 2007

PR: COMP 2711 or COMP 2002, and COMP 2742 or COMP 1002

### 10.4.4 Fourth Year Courses

**4550 Bioinformatics: Biological Data Analysis** (same as Biology 4606) provides students with the basis to analyse a variety of biological data within an integrated programming environment for data manipulation, calculation and graphical display. Students will learn to extract meaningful information from data generated by high-throughput experimentation. The course will introduce one such integrated programming environment and will explore the computational and statistical foundations of the most commonly used biological data analysis procedures.

CR: Biology 4606

LH: 3

PR: Biology 3951 or COMP 3550, and Statistics 2550 (or equivalent), or permission of the course instructor

**4711 Structure of Programming Languages** covers programming language design considerations; syntactic and semantic structure; survey of typical features and operations; analysis of facilities for control and data structuring; language extensibility; execution models; formal specification of programming languages.

PR: COMP 3719, and COMP 3724 or COMP 2003

**4712 Compiler Construction** studies properties of formal grammars and languages; syntax-directed parsing and code generation; top-down and bottom-up parsing methods; LL(k) and LR(k) grammars and parsers; Code optimization; compiler writing tools.

PR: COMP 3719, and COMP 3724 or COMP 2003

**4715 and 4717 Special Topics in Programming Languages** will have topics to be studied announced by the Department.

**4718 Survey of Software Engineering** surveys the major topics of software engineering. Areas covered include: requirements capture, system design and design approaches, verification and validation (including formal methods and testing), and management of the software development process.

PR: COMP 3716 or COMP 2005

**4721 Operating Systems** studies the design and implementation of an operating system's kernel. The main components used in operating system implementations include: context switches, process management, memory management, interprocess communication, file systems and system calls. The data structures and algorithms used in implementing the above components are studied. The different architectural styles of kernel implementation are also considered. Real-time operating systems are also discussed.

CR: Engineering 8894

PR: COMP 3725 or COMP 2004

**4723 Introduction to Microprocessors** examines the architecture and instruction sets for several microprocessors. The use of microprocessors as device controllers; comparisons of hardware and programmed techniques; microprocessor interfacing with external devices; methods of I/O; bus structures; modern microprocessor support devices are discussed.

LH: Minimum of three hours per week. Practical experience with basic principles will be obtained through laboratory experience.

PR: COMP 3724 or COMP 2003

**4726-4729 Special Topics in Computer Systems** will have topics to be studied announced by the Department.

**4734 Matrix Computations and Applications** is an introduction to linear algebra; solution to linear systems; scaling, improving and estimating accuracy; the linear least squares problem; the eigenvalue problem; singular value decomposition of a matrix; the generalized eigenvalue problem.

PR: COMP 3731

**4736-4739 Special Topics in Numerical Computations** will have topics to be studied announced by the Department.

**4740 Design and Analysis of Algorithms** will give an overview of techniques for the design of efficient optimal-solution and heuristic algorithms. It will include an introduction to various advanced data structures for set and string processing that are used to further optimize algorithm efficiency.

PR: COMP 3719

**4741 Formal Languages and Computability** is an in-depth study of various types of formal machines and their associated languages. Effective computability and other formalisms, such as lambda calculus will be studied as well.

CR: the former COMP 3740

PR: COMP 3719

**4742 Computational Complexity** is an in-depth discussion of computational complexity theory. Topics covered in the course include: models of computation (for both serial and parallel computations); complexity measures; reducibility; complexity classes (NP, PSPACE, NC, LOGSPACE and P); and randomized computations.

PR: COMP 3719

**4743 Graph Algorithms and Combinatorial Optimization** discusses classical problems in combinatorial optimization and graph algorithms, including matching, colorability, independent sets, isomorphism, network flows and scheduling. Special families of graphs are discussed and algorithms that would otherwise be NP-hard or complete are shown to be polynomial time when restricted to such families.

PR: COMP 3719

**4745-4749 (Excluding 4748) Special Topics in Theoretical Aspects** will have topics to be studied announced by the Department.

**4748 Introduction to the Science of Complexity** is an exploration of the use of computers in the simulation of complex systems. Some theories and models, such as cellular automata, artificial life, fractals, genetic algorithms, chaos, and evolution will be discussed and will be used in the modelling of "real-life" systems. The approach in this course is practical. Students have to write a number of programs of different levels of sophistication including a final project.

PR: COMP 3719

**4750 Introduction to Natural Language Processing** covers tasks involving human languages, such as speech recognition, text understanding, and keyword-based information retrieval which underlie many modern computing applications and their interfaces. To be truly useful, such natural language processing must be both efficient and robust. This course will give an introduction to the algorithms and data structures used to solve key NLP tasks, including utterance understanding and generation and language acquisition, in both of the major algorithmic paradigms used today (rule-based and statistical). The emphasis will be primarily on text-based processing though speech-based processing will be addressed where possible.

PR: COMP 3719 and Statistics 1510

**4751 Computer Graphics** examines display devices, display processors, display file compilers, display transformations, structured display files, graphical input devices, perspective, hidden line elimination, languages and graphics systems.

LH: 3

PR: COMP 3719 and Mathematics 2050

**4752 Introduction to Computational Intelligence** provides an introduction to four of the fundamental computational intelligence methods: artificial neural networks, evolutionary computation, swarm intelligence and fuzzy systems. The integration of these techniques for problem solving will also be introduced.

PR: COMP 3719, and COMP 3754 or COMP 2007

**4753 Artificial Intelligence** has selected topics from AI programming languages; heuristic searching; problem solving; game-playing; knowledge representations; knowledge-based systems; reasoning in uncertainty situations; planning; natural language understanding; pattern recognition; computer vision; and machine learning.

PR: COMP 3719, and COMP 3754 or COMP 2007

**4754 Database Systems** introduces students to database processing, database management systems and database design considerations. It will cover the theory and methodologies essential for the relational database

design, implementation, manipulation, optimization and management.  
PR: COMP 3725 or 2004, and COMP 3754 or COMP 2007

**4756 Image Processing** will centre on the key analytical and algorithmic tools and concepts of digital image processing. Topics will include Transformations, Enhancement, Encoding, Data Bases, Segmentation and Description.

CR: Engineering 7854  
LH: 3  
PR: COMP 3719

**4759 Computer Networks** looks at how the operation of computer networks requires the following: a) communication between two computers, b) information transfer between two computers not directly connected, and c) services that need computer communication. This course focuses on the standard solutions and services used to fulfill the previous requirements. These include: physical transmission of signals, reliable communication based on unreliable communication channels, the routing of messages between connected computers to reach computers that are not directly connected, e-mail, file transfer, name servers, remote terminal access and the World Wide Web. Particular attention will be placed on the workings of the Internet.

PR: COMP 3715 or 2006, and COMP 3725 or COMP 2004

**4762 Introduction to Computational Molecular Biology** will give an overview of computational problems and algorithms for these problems associated with a variety of analyses of biological molecular data.

PR: COMP 3719

**4766 Introduction to Autonomous Robotics** examines the fundamental constraints, technologies, and algorithms of autonomous robotics. The focus of this course will be on computational aspects of autonomous wheeled mobile robots. The following topics will be covered: major paradigms in robotics, methods of locomotion, kinematics, simple control systems, sensor technologies, stereo vision, feature extraction, modelling uncertainty of sensors and positional information, localization, SLAM, obstacle avoidance, and 2-D path planning.

LH: 3  
PR: COMP 2711 or COMP 2002, Mathematics 2000, Mathematics 2050, and Statistics 1510 or Statistics 2550 or the former Statistics 2510

**4767 Information Visualization and Applications** focuses on the design and implementation of interactive visualization techniques for the analysis, comprehension, exploration, and explanation of large collections of abstract information. Topics to be covered include principles of visual perception, information data types, visual encodings of data, representation of

relationships, interaction methods, understanding user goals and tasks, and evaluation techniques. Case studies of accepted techniques and the current state-of-the-art in information visualization will be presented.

PR: COMP 2760 or COMP 2008, and COMP 3719

**4768 Software Development for Mobile Devices** focuses on the design and implementation of software in a mobile networking environment. The primary topics to be covered in this course include software engineering, network computing, graphics programming, and human-computer interaction for mobile devices. A modern mobile device with advanced networking and graphic features, including multi-touch interaction and motion sensors will be used as the primary platform for development in this course.

LH: One and one-half hours per week  
PR: COMP 2760 or COMP 2008, COMP 3715 or COMP 2006, and COMP 3716 or COMP 2005

**4770 Team Project** has as its main objective to develop a working prototype of a software system as a team effort. A group of students will work on a project for a term, experiencing the advantages and difficulties of team projects.

AR: attendance is required  
PR: COMP 3715 or COMP 2006, COMP 3716 or COMP 2005, COMP 3724 or COMP 2003, and COMP 3754 or COMP 2007

**4780 Honours Project** introduces computer science honours students to research activities, familiarizes them with a special problem in computer science, and provides independent study on an advanced topic under the direct supervision of a member of the computer science faculty. The topic is decided in consultation with the supervisor. The student is required to produce a written report on the project, to include the literature search on the topic, and to present this work at a departmental seminar prior to the last week of the semester.

PR: admission to the honours program and permission of the Head of Department

**4800-4825 Special Topics** will be offered as departmental resources permit.

CO: Special topics courses are not offered on a regular basis, but whenever departmental resources permit. For these reasons, the co-requisites can vary each time the courses are offered.

PR: Special topics courses are not offered on a regular basis, but whenever departmental resources permit. For these reasons, the prerequisites can vary each time the courses are offered.

## 10.5 Earth Sciences

The first digit of each course number designates the level (year) of the course. The second digit indicates the area of Earth Sciences into which the course best fits, as follows:

### Second Digit

- 0 - mineralogy and petrology
- 1 - geophysics
- 2 - economic geology
- 3 - stratigraphy and marine geology
- 4 - structural geology and tectonics
- 5 - geochemistry
- 6 - environmental geoscience and technical fields
- 7 - sedimentation, petroleum geology and geomorphology
- 8 - paleontology
- 9 - general and dissertation

Earth Sciences courses are designated by EASC.

### 10.5.1 First Year

**1000 Earth Systems** is a survey of the structure, function and interrelations of Earth's lithosphere, hydrosphere, atmosphere and biosphere. Topics include an exploration of the physical and chemical properties of planetary materials, forces driving and sustaining Earth systems, and biological modifiers (including humankind) on the Earth today.

LH: 3

**1001 Evolution of Earth Systems** - inactive course.

**1002 Concepts and Methods in Earth Sciences** provides an introduction to a broad range of concepts concerning the development of the geological record and the Earth; practical methods for collection of field based data; topics in map interpretation and geometric analysis, stratigraphy, paleontology, structure and petrology. The course is presented with an emphasis on the development of practical skills needed to pursue a career in Earth Sciences.

LH: 3  
PR: EASC 1000

### 10.5.2 Second Year

**2030 Mineralogy** provides an introduction to crystallography and the structure of minerals; introduction to crystal optics; study of the rock forming minerals and minerals of economic significance. Laboratory work comprises study of the structures and symmetries of minerals, chemistry of rock forming minerals, introduction to transmitted light microscopy of rocks, hand specimen recognition of common rocks and minerals.

CO: EASC 2502  
CR: the former EASC 203A/B  
LH: 3  
PR: EASC 1000 and 1002, Chemistry 1051 (or 1011 or 1001), Physics 1051 (or 1021 or 1054), and Mathematics 1000

**2031 Mineralogy and Petrography** examines the optical and chemical properties of rock-forming minerals, the petrography and classification of igneous and metamorphic rocks and applications of relevant phase equilibria to the study of minerals. Laboratory work comprises optical mineralogy and petrography of igneous and metamorphic rocks.

CO: Mathematics 1001  
CR: the former EASC 203A/B  
LH: 3

PR: EASC 2030, 2502, Mathematics 1001

**2150 The Solar System** describes the basic astronomy of the Solar System, tracing the search to understand motion of the Sun, Moon and planets in the sky; modern observations of planets, moons, comets, asteroids and meteorites and what they tell us about the origin and evolution of the Solar System.

UL: not acceptable as one of the required courses for the Minor, Major or Honours programs in Earth Sciences

**2311 Geoscience Communication** is an introduction to the fundamentals of preparation of written and oral geoscience reports, emphasizing organization, correct use of terminology, concise description, preparation of abstracts and introductions, integration of numerical data and publication-quality illustrations, and oral presentation skills. Topics for reports will be selected from the subject matter of other 2000 level Earth Sciences courses.

LC: 2

OR: tutorials three hours per week

PR: Earth Sciences 2905 and 6 credit hours in English

**2401 Structural Geology** provides an introduction to basic concepts; the physics of rock deformation, the classification and descriptive geometry of major and minor structures and their relationship to stress and strain. Laboratory work will concentrate on analysis of structural orientation data, and the analysis of structures in geological maps and cross-sections. Earth Sciences majors are advised to complete field course, EASC 3905, immediately following completion of this course.

CR: the former Geology 3120 or the former EASC 3120 or the former EASC 3400

LH: 3

PR: EASC 2905 or (for students following a Minor in Earth Sciences) permission of the Head of the Department

**2502 Introduction to Geochemistry** provides an overview of both low- and high-temperature geochemistry. Topics include: origin and classification of the elements; chemical differentiation of the solar system and solid Earth; aqueous geochemistry and the stability of minerals; radiogenic and stable isotopes. Geochemical concepts are illustrated using data and processes drawn from Earth systems. The laboratory component emphasizes the development of numerical skills needed in geochemistry.

CO: Mathematics 1001

LH: 3

PR: EASC 1000 and 1002, Chemistry 1051 (or 1011 or 1001)

**2702 Sedimentology and Stratigraphy** is a study of the origin and composition of sediments with a focus on depositional processes and resulting sedimentary structures. Study of environments of deposition and the stratigraphic framework of sedimentary successions. Laboratories involve local field trips, petrographic analysis, and the study of hand samples of sedimentary rocks.

CR: the former Geology 3070 or the former EASC 3070 or the former EASC 3701

LH: 3

PR: EASC 1002

**2905 Introduction to Geological Mapping** is based on approximately six days of geological mapping in Precambrian rocks near St. John's, and two days of in-class work preparing a digital map and written report. Emphasis is placed on the recognition and description of sedimentary and igneous rocks in the field, and techniques of geological mapping and the taking of field notes. This course will be given during a special session immediately preceding the fall semester.

AR: attendance is required

CH: 2

CR: the former EASC 2310 or the former EASC 2300

OR: field based course

PR: EASC 1002 and an application to the Head of the Department

**2914 The Earth's Energy Resources: Past, Present and Future** - inactive course.

**2915 The Earth's Material Resources: Past, Present and Future** - inactive course.

**2916 Natural Hazards on a Dynamic Earth** describes the surface of the Earth being in a constant state of change, thereby posing risks and challenges for society. An understanding of geological processes in the past and present provides context for evaluating risks related to earthquakes, volcanic activity and mass movements, challenges related to water resources, land-use planning and waste disposal, and the background to interpret sources and consequences of climate change. The course will provide a broad perspective on contemporary issues facing society. This course is designed for students taking Earth Sciences as an elective subject. This course complements traditional disciplines such as history, economics, and political science and should be of particular interest to teachers.

UL: not acceptable as one of the required courses for the Minor, Major or Honours programs in Earth Sciences.

**2917 Gems: The Science and Politics** introduces students to precious and semi-precious stones both from the perspective of their nature and origin

and from the perspectives of geography and the socio-political issues of mining, recovery, trade and cartels. The properties that confer value upon gems (colour, clarity, cut and carat), the techniques used to enhance, fake and imitate gems and the techniques used to detect fraudulent "gems" will be covered. The course will include discussion of the diamond industry in Canada and consideration of some famous gems. This course is designed for students taking Earth Sciences as an elective subject. This course complements traditional disciplines such as history, economics, and political science and should be of particular interest to teachers.

UL: not acceptable as one of the required courses for the Minor, Major or Honours programs in Earth Sciences.

**2918 Earth's Story** is an overview of Earth's dynamic past of episodes of supercontinent collision and breakup, massive flooding, global warming and freezing, magnetic field reversals and continents travelling over large distances. The evolution of life is tied to this history and has had equally dramatic turns of rich growth and catastrophic extinction. Discussion will be based on Canadian geology and includes an introduction to techniques used to decipher the rock record.

UL: not acceptable as one of the required courses for the Minor, Major or Honours programs in Earth Sciences.

**2919 Introduction to Marine Geology** (same as Ocean Sciences 2200) is a study of the formation and evolution of oceans, including plate tectonics, mid-ocean ridges (birth place of oceans), subduction zones (where oceans are consumed), sedimentary environments such as estuaries, deltas, beaches and barrier islands, continental shelves, slopes and deep abyssal plains and special topics, including anoxic events, evolution of tides, atmosphere-ocean interactions, formation of banded iron formations, snowball Earth, black and white smokers, and how Earth modulates its climate through atmosphere, hydrosphere, biosphere and lithosphere interactions.

CR: Ocean Sciences 2200

PR: EASC 1000

### 10.5.3 Third Year

**3030 Mineralogy and Materials Science** provides a review of elementary crystallography, introduction to space groups and crystal structures, bonding, properties of metals, semiconductors and insulators, crystallographic aspects of order-disorder, solid solution and mixing. Crystal growth, chemical zoning and diffusion. Phase changes in the solid state (exsolution, polymorphism and polytypism). Students will be introduced to the techniques used to study solids (X-ray diffraction, scanning and transmission electron microscopy, electron-microprobe analysis, luminescence, and computer simulation). Laboratory work will emphasize practical skills using these techniques. Examples will be chosen from among minerals, ceramics, semiconductors, metals and glass, making the course suitable for Earth Scientists, Engineers, Chemists and Physicists.

LH: 3

PR: EASC 2031 or permission of the instructor

**3054 High-Temperature Geochemistry and Igneous Petrology** is an integrated course dealing with the geochemistry, origin and classification of igneous rocks. Topics include trace element geochemistry; physical properties of magmas, physical and chemical processes in magma chambers (fractional crystallization, differentiation, assimilation and partial melting), phase equilibria and application to magmas, petrology of the mantle, and igneous rocks of specific tectonic settings (oceanic lithosphere, continental margins, continental lithosphere). Laboratories include geochemical calculations and examination of rock samples and thin sections.

CR: the former EASC 3053 in combination with the former 2503

LH: 3

PR: EASC 2031 and 2502

**3055 Thermodynamics and Metamorphic Petrology** is an integrated course dealing with the geochemistry, origin and classification of metamorphic rocks. Topics include thermodynamic background and kinetics (transfer of mass and energy in geochemical systems of the Earth's interior, thermodynamic laws, phase equilibria, solid-solid reactions, reaction rates); metamorphic facies, field gradients, isograds and reactions; mineral assemblages and textures of common metamorphic rocks. Laboratories include thermodynamic and phase diagram problems, hand specimen and thin section studies.

CR: the former EASC 3053 in combination with the former 2503

LH: 3

PR: EASC 2031 and 2502, Mathematics 1001

**3170 Seismic and Potential Fields Methods in Geophysics** examines fundamentals of seismic energy transmission in the Earth; basic methods in seismic exploration - data acquisition, processing and interpretation for refraction and reflection surveys; fundamentals of gravity and magnetic data acquisition, processing and interpretation; introduction to gravity and magnetic modelling.

LH: 3

PR: Physics 1051 (or 1021 or the former 1054); Mathematics 1001; Mathematics 2000 or Statistics 2550 or the former Statistics 2510;

EASC 2905 or permission of the Head of the Department for students following a Minor in Earth Sciences or a Major in Environmental Physics

**3172 Electric and Electromagnetic Methods in Geophysics** is an introduction to electrical and electromagnetic methods in geophysics applied in mineral exploration, petroleum well logging and environmental studies, and examples of application of various techniques; use of data processing and modelling techniques in interpretation; introduction to radiometric methods used in mineral and petroleum exploration. The laboratory component involves outdoor surveys using geophysical equipment, and computer-based presentation and analysis of collected data using modern geophysical software.

AR: attendance is required in the laboratory component of this course. Failure to attend may result in a failing grade or deregistration from the course.

CO: EASC 2905 or permission of the Head of the Department

LH: 3

PR: Physics 1051 (or 1021 or the former 1054); Mathematics 1001; Mathematics 2000 or Statistics 2550 or the former Statistics 2510; EASC 2905 or permission of the Head of the Department for students following a Minor in Earth Sciences or a Major in Environmental Physics

**3179 Mathematical Methods for Geophysics** covers subjects required for quantitative analysis of geophysical phenomena. Vector calculus with emphasis on integral theorems is covered in the context of Maxwell's equations; Derivations and solutions of ordinary and partial differential equations with emphasis on hyperbolic, parabolic and elliptic equations in the context of the wave, heat, and potential-field equations, respectively; tensor algebra and analysis in the context of theory of elasticity and electromagnetism; Fourier analysis as a tool for solution of differential equations and signal analysis. The course may also include such topics as the calculus of variations, curvilinear coordinates on differentiable manifolds, differentiation in the sense of distributions.

LH: 3

PR: Mathematics 2000, Physics 2055 and 2820

**3210 Economic Mineral Deposits** is an introduction to the study of mineral deposits and definition of the basic physio-chemical parameters of ore deposit formation. The course involves a systematic review of genetic models for the principal types of metallic mineral deposits, and links these models to a common theme of the relationship between lithosphere-hydrosphere-biosphere interactions and metallogeny. Laboratory exercises involve examination of representative suites of samples from different types of metallic mineral deposits and provide an introduction to the use of reflected light microscopy.

LH: 3

PR: either EASC 2031, 2502 and 2905; or EASC 2031 and Chemistry 3211; or Engineering 3610 and the former Engineering 3205

**3420 Global Tectonic Processes** examines how horizontal and vertical motions of the Earth's surface are influenced by heat and mass transfer within its interior. Surface motions are described qualitatively and quantitatively within the framework of plate tectonics, and used to identify major controls on the igneous, metamorphic and sedimentary rock records. Laboratory exercises emphasize geologic and geophysical applications of the material developed in lectures.

CR: the former EASC 2070, 2161, 2400 and 4901

LH: 3

PR: EASC 2031, 2401, 2502, 2702, Mathematics 1000 and 1001, Physics 1021 or 1051

**3600 Environmental Geology** examines the application of basic concepts and fundamental principles of geochemistry in evaluating natural and human-induced change through time on the interaction of the Earth's lithosphere, hydrosphere, atmosphere and biosphere; includes the effects of contaminants on global change. Laboratory time will be used for short field-based studies and for exercises examining the effects of contaminants on global change.

LH: 3

PR: either EASC 2502; or EASC 1000, Chemistry 2210 and the former CHEM 2300

**3610 Hydrogeology** (same as the former EASC 4610) examines geology and its relationship to groundwater occurrence and exploitation: basic theory, groundwater flow systems, surface-groundwater interactions and changes in water quality, field and laboratory techniques, hydrogeological aspects of waste disposal and resource development.

CR: Environmental Science 4479, the former EASC 4610

LH: 3

PR: Physics 1051 (or 1021); Mathematics 2000 or Statistics 2550 or the former Statistics 2510; EASC 2502

**3611 Engineering Geology** - inactive course.

**3700 Geomorphology** (same as Geography 3150) is a study of the relationships between geomorphic processes and landforms. Practical work will involve collection of data and samples in the field and analytical

laboratory techniques.

CR: Geography 3150

LH: 3

PR: EASC 2905 or Geography 2102; Mathematics 1000

**3702 Lithification, Diagenesis and Sedimentary Rock Properties** provides a conceptual and practical overview of the transformation of sediments into sedimentary rocks through compaction, cementation and mineral reactions, and the resultant modifications of rock composition, rock fabrics, and associated porous media characteristics (e.g. porosity). Both descriptive and analytical methods are integrated in laboratories that include carbonate and sandstone petrology (hand samples and thin sections), geological analysis of selected wireline logs, and the analysis of fluid reservoir properties.

LH: 3

PR: EASC 2031, 2702 and 2905

**3705 Field Course in Sedimentology, Reservoir Architecture and Sequence Stratigraphy** is a ten day field and lecture based course normally offered in the first two weeks of the Spring semester that aims to teach students to use sedimentological and palaeontological data for palaeoenvironmental analysis. The course will demonstrate the use of sedimentary facies models and facies architectural studies in reservoir geology, particularly when coupled with the principles of sequence stratigraphy. Students will be taught to create sedimentary logs and facies architectural panels.

CO: EASC 3811, 3905

CR: the former EASC 4700 or the former Geology 4700

OR: field based course

PR: EASC 2702, 3811, 3905

**3811 Paleontology** (same as Biology 3811) outlines the major changes in life forms from Archean times through the Phanerozoic to the present day, including details of invertebrate and vertebrate faunas and major floral groups; mechanisms and effects of mega- and micro-evolution in the fossil record; biology and classification of organisms and summaries of their geological significance in biostratigraphy, paleoecology and rock-building; relationships between major cycles of evolution and extinction to global processes.

CR: Biology 3811 or either the former EASC 3801 or the former Biology 3800

LH: 3

PR: either Biology 2120 (or Biology 1001 and 1002) and EASC 1002; or Biology 2122 and 2210

**3905 Field Methods in Structural Geology and Stratigraphy** is based on approximately 5 days of geological mapping in Precambrian rocks near St. John's. Emphasis is placed on application of techniques of structural analysis. Evenings will be dedicated to data analysis and preparation of structural maps and sections. Students are advised to complete this course immediately following EASC 2401. This course will be offered during a special session immediately following the examination period in a given semester.

AR: attendance for all of the field school days is required. Failure to attend may result in a failing grade or withdrawal from the course.

CH: 1

OR: field based course

PR: EASC 2401 and 2905 and an application to the Head of the Department

## 10.5.4 Fourth Year

**4053 Petrogenesis of Igneous Rocks** investigates the origin of topical and important groups of igneous rocks based on experimental petrology, phase equilibria and application of geochemical tools. It further investigates the classification of igneous rocks, including the study of volcanoclastic rocks and aspects of physical volcanology. The laboratory component of the course emphasizes practical aspects of igneous petrology including geochemical characterization and use of hand-sample and field criteria.

LH: 3

PR: EASC 3054 and 3420

**4054 Metamorphic Petrology** examines relationships between metamorphism and tectonics, representation and interpretation of metamorphic mineral assemblages using compositional phase diagrams and petrogenetic grids; equilibrium thermodynamics and thermobarometry; determination of P-T-t paths. Laboratories include use of the electron microprobe to collect data for use in calculations of the conditions of formation of metamorphic assemblages, and various types of software applicable to metamorphic petrology.

LH: 3

PR: EASC 2401, 3055 and 3420

**4105 Field Course in Applied Geophysics** is a field based course with an emphasis on environmental and mineral exploration applications. It consists of a data collection module normally offered during a special session immediately before the Fall semester, followed by a processing and interpretation module during the first part of the Fall semester. Field

techniques used may include ground probing radar, refraction seismology, magnetic surveying, gravimetry, electrical and electro-magnetic methods. For computer based processing, students make use of modern mapping and geophysical software.

AR: attendance required  
OR: field-based course  
PR: EASC 3170, 3172 and Mathematics 2000

**4171 Advanced Seismology** examines techniques involved in the acquisition, processing and interpretation of multichannel seismic reflection data. Introduction to elastic properties of rocks. Introduction to advanced processing and interpretation techniques as applied to qualitative and quantitative evaluation of hydrocarbon reservoir characteristics. This course has a laboratory component designed to provide hands-on experience with data processing and interpretation.

LH: 3  
PR: EASC 3170 and 4179

**4173 Advanced Electrical, Electromagnetic and Potential Fields Methods** examines advanced techniques in electrical and electromagnetic exploration methods including advanced IP, airborne EM surveys, EM and IP modelling, and inversion techniques; advanced methods in gravity and magnetic field exploration techniques including 2 ½-D and 3-D modelling and inversion, map processing techniques, and excess mass determination.

LH: 3  
PR: EASC 3170, 3172, 4179, and Physics 2820

**4179 Digital Signal Processing** is an introduction to the theory and basic computational techniques of digital signal processing in geophysics. Topics covered include: sampling, Fourier transformation, design and application of digital filters, deconvolution, spectral analysis, two dimensional signal processing, with emphasis on geophysical applications.

LH: 3  
PR: EASC 3170, 3172, and 3179

**4211 Economic Geology** provides a detailed look at the methodologies and techniques used in the study of mineral deposits and their applications in case histories. Laboratory exercises involve solving problem sets using the various types of data from selected case studies.

LH: 3  
PR: EASC 3054 or 3055; and 3210

**4302 Advanced Marine Geology** examines the geology and geophysics of ocean basins; discussion of methods of oceanic exploration, the history and development of ocean basins, interrelationships between ocean water, marine organisms, sedimentary and igneous processes.

PR: EASC 1001 or 1002 and completion of any 15 credit hours in core courses at the 3000 and/or 4000 levels (see General Note 5) in Biology, Biochemistry, Chemistry, Earth Sciences, Physics, or Geography.

**4310 Earth Science Concepts, Materials and Techniques for Archaeologists** - inactive course.

**4400 Advanced Techniques in Structural Geology** examines modern techniques of structural analysis applied to fold and fault systems including progressive deformation and strain analysis, fold mechanisms, fold morphology and classification, fold sections and profiles, superposed folding, fault geometry and morphology, brittle and ductile shear zones, and construction of balanced cross-sections.

LH: 3  
PR: EASC 2401 and 3905 and a minimum of 6 credit hours in Earth Sciences at the 3000 level

**4405 Field Course on the Geology of Newfoundland** is a field-based course consisting of in-class lectures and student seminars, and a week-long field trip within the island of Newfoundland. The classroom portion of the course may be offered in an accelerated format. The course provides an introduction to the geological history and tectonic development of Newfoundland. The field portion of the course will normally be offered during a special session either preceding or following any given semester.

OR: lecture and field-based course  
PR: 15 credit hours in Earth Sciences at the 3000 and/or 4000 levels including EASC 3420, and permission of the instructor

**4420 Tectonics and Crustal Evolution** is a lecture and seminar course covering secular change and tectonic evolution in Earth history from the Archean to Mesozoic, featuring examples from the North American geological record. The course will draw on and link concepts from a variety of Earth Science disciplines and provide an overview of the geological evolution of North America in a tectonic context.

CR: the former EASC 4901  
OR: seminar  
PR: EASC 3420

**4502 Advanced Geochemistry** focuses primarily on the application of trace, radiogenic and stable isotope geochemistry to constrain the origin, mass balance and chemical fluxes within the Earth's lithosphere and asthenosphere. The course permits students to complete assignments in aspects of geochemistry that reflect their career interests.

LH: 3  
PR: EASC 2031 and 2502 and a minimum of 6 credit hours in Earth Sciences at the 3000 level

**4503 Mineral Exploration Geochemistry** is an examination of the application of geochemistry to mineral exploration, covering: the lithochemical characteristics of ore deposits, their host rocks, and element dispersion from them; the principles of sampling and analysis in exploration geochemistry; approaches to the statistical analysis, graphical presentation, and interpretation of survey results; and the design of effective geochemical surveys. Particular emphasis will be placed on case studies relevant to exploration in Newfoundland and Labrador. Laboratory/seminar sessions involve working with exemplary data sets, using computer-based software for statistical analysis and software for searching large databases and viewing the spatial relationships of different types of map data relevant to the mineral exploration industry.

LH: 3  
OR: seminar  
PR: EASC 3210

**4601 Petroleum Origin and Occurrence** - inactive course.

**4605 Environmental Geoscience Field School** is a field-based course normally offered during a special session immediately before the Fall semester followed by laboratory analytical work during the Fall semester. The aim of this course is to investigate anthropogenic impacts on the environment using geochemical, hydrological, and microbial methods. Emphasis is placed on site investigation, sample collection and preparation techniques, instrumental analysis, and data analyses.

AR: attendance required  
OR: field-based course  
PR: EASC 2502, EASC 3600, Mathematics 1001, and one of Mathematics 2000, Statistics 2550, or the former Statistics 2510

**4620 Contaminant Hydrogeology** examines the physical and chemical processes controlling groundwater contamination. Methods for numerical modeling of groundwater flow and contaminant transport are discussed. Students gain hands-on experience in using computer software packages to solve practical problems.

LH: 3  
PR: EASC 3610 (or the former EASC 4610) or Environmental Science 4479 or permission of instructor

**4702 Sedimentary Basins and Hydrocarbon Exploration** (same as the former EASC 4602) provides a review of sedimentary basin types and associated petroleum systems including concepts applicable to petroleum generation, migration and accumulation. Regional-scale stratigraphic and structural concepts/models are presented as a framework for hydrocarbon fluid flow and entrapment. Laboratories include description and analysis of data typical of basin- and regional-scale exploration and appraisal of hydrocarbon resources using a variety of integrated, interdisciplinary techniques (geological, geophysical and geochemical).

CR: EASC 4601 and the former EASC 4602  
LH: 3  
PR: EASC 2401, 2702, 3170 and 3420

**4703 Environmental Change and Quaternary Geography** (same as Archaeology 4150 and Geography 4150) covers methods of reconstructing Quaternary environments; effects of Quaternary environmental change on landforms, with special reference to North America; development and characteristics of glacial and non-glacial climates.

CR: Archaeology 4150, Geography 4150  
LH: 3  
PR: 6 credit hours in Earth Sciences or Physical Geography courses at the 3000-level; or permission of the instructor

**4704 Reservoir Characterization** (same as the former EASC 4603) provides a review of the sedimentary, stratigraphic and structural setting of hydrocarbon reservoirs and the geological controls on reservoir quality. Reservoir types and methods of study are presented to evaluate their key properties for the development and production of hydrocarbons. Laboratories include detailed subsurface correlation and mapping, log analysis, interpretation of reservoir data (e.g. capillary pressure, porosity, permeability and production data).

CR: EASC 4601 and the former EASC 4603  
LH: 3  
PR: EASC 2401, 2702, 3170 and 3702

**4720 Carbonate Depositional Environments and Diagenesis** examines carbonate environments and their facies models with examples from modern and ancient settings. Diagenetic environments and diagenetic controls on rock properties, particularly porosity, are examined, as well as their application in the reconstruction of the diagenetic history of a sedimentary basin and in the characterization of hydrocarbon reservoirs. The application of chemostratigraphy to correlation is discussed. The laboratory exercises apply hand specimen, thin section and geochemical methods to investigate carbonates from different depositional settings and a wide spectrum of diagenetic environments covered in lectures

CO: EASC 3811

LH: 3  
PR: EASC 2031, 2702, and 3811

**4800 Advanced Paleontology** (same as Biology 4800) is a field, lecture, laboratory and seminar course dealing with selected topics in general and applied paleontology. Topics include measuring evolution and extinction, population paleontology, functional morphology, paleoecology, statistical methods for paleontological studies, and applications in petroleum, mining, and environmental studies.

CR: Biology 4800  
LH: 3  
PR: EASC 3811, and Statistics 2550 or the former Statistics 2510 or Mathematics 2000

**4902 Early Evolution of the Earth** - inactive course.

**4903 Global Change** is a lecture and seminar course that studies the interaction of the atmosphere, biosphere and lithosphere; topics covered include the evolution of the biosphere, fluid circulation, global geochemical budget, global environmental changes, and chemical evolution of the hydrosphere.

OR: seminar  
PR: EASC 1001 or 1002, and Biology 2120 (or Biology 1001 and 1002); and completion of any 15 credit hours in core courses at the 3000 and/or 4000 levels (see General Note 5) in Biology, Biochemistry, Chemistry, Earth Sciences, or Physics; or permission of the instructor.

**4905 Field Course in Geological Mapping and Regional Tectonics** is a two-week field school designed to allow application of techniques introduced in the third year, and to provide an introduction to the Appalachian geology of western and central Newfoundland. Reports must be submitted for grading during the fall semester.

OR: field based course  
PR: EASC 2401, 3055, 3420, and 3905; and permission of the Head of the Department

**4912 Planetary Geology** is a classroom- and laboratory-based course that provides students with a basic knowledge of the geology of the Moon, Mars, asteroids and the moons of the satellites of the outer solar system; the petrology and geochemistry of meteorites and their importance to understanding the origin of the planets; impact cratering processes and rock products including those on Earth; and instrumentation for planetary exploration. The course combines lectures and laboratory exercises that examine data sets from planetary missions and specimens of extraterrestrial materials. Students learn how geological processes that have shaped Earth also have operated on other planets, moons and asteroids in our solar

## 10.6 Economics

For course descriptions, see **Faculty of Humanities and Social Sciences** section of the Calendar.

## 10.7 Geography

For course descriptions, see **Faculty of Humanities and Social Sciences** section of the Calendar.

## 10.8 Mathematics and Statistics

Students are encouraged to consult the Department regularly for specific planned offerings, semester by semester.

Placement in first-year mathematics courses at the St. John's Campus and online is based upon a student's pre-requisite level of proficiency in mathematics as demonstrated in a manner that is acceptable to the Department of Mathematics and Statistics. This may be through credit and grades earned in recognized high school or undergraduate mathematics courses or scores earned in recognized standardized examinations such as International Baccalaureate (IB), Advanced Placement (AP), or the College Board's Subject Area Test in Mathematics Level I (SATM1) examinations. Where a pre-requisite has not been met through one of these means, a student will be required to complete the University's Mathematics Placement Test (MPT) as a pre-requisite for registration in a first-year mathematics course. A student who is not eligible for placement in a credit course in mathematics will be required to successfully complete appropriate foundation courses in order to proceed with further mathematics studies as indicated by the mathematics course pre-requisites.

For detailed information regarding mathematics pre-requisites and placement requirements, see the course descriptions below and refer to the mathematics and calculus placement information provided by the Department of Mathematics and Statistics at [www.mun.ca/math](http://www.mun.ca/math). Students registering for first year mathematics courses at the Grenfell Campus should consult **Grenfell Campus, Course Descriptions, Mathematics and Statistics** for placement

system.  
PR: EASC 2031, 2702, 2905, and 3420

**4910-4920 (Excluding 4912) Special Topics in Earth Sciences** are lecture and seminar courses given for undergraduates in their fourth or fifth year who wish to gain more specialized knowledge in a particular field of Earth Sciences than is possible through the standard course offerings. The Department will consider suggestions by students for Special Topics courses, but it must be borne in mind that such a course should normally be approved at least three months before the start of the semester in which it is to be taken.

PR: permission of the Head of Department

**4950 Technical Report on Geoscience Employment** requires the preparation of a publication-quality technical report, about 50 pages in length, based on a study undertaken during geoscience employment. The topic and scope of the study must be approved by the Head of Department prior to its commencement. Students will present a seminar or seminars on results of the project, and will be closely advised on proper organization and writing of scientific reports. Some directed reading will be required.

PR: completion of 9 credit hours in Earth Sciences at 3000 level, and permission of the Head of Department

UL: can only be used as an "additional course" under point 3. of the regulations for General degrees, and under point 4. of the regulations for Honours degrees. The same study cannot be used as the basis of a dissertation completed for course EASC 499A/B.

**499A and 499B Dissertation** is an independent study of an approved problem in the Earth Sciences. The subject of study will be decided in consultation with Faculty Advisors and must be approved in advance by the Head of Department. The first semester will normally involve directed reading, supervised field and/or laboratory work, and preparation of a dissertation outline and draft of a first chapter of the thesis. The second semester will be devoted to data synthesis and interpretation, to a seminar presenting the thesis results, and to preparation of a formal written report accompanied by appropriate illustrations, to be submitted for grading one week before the end of classes.

CH: 6  
PR: admission to the Honours program

UL: The dissertation cannot be based on the same study used to obtain credit for EASC 4950. May be used as Science credits by students not in the Honours program with permission of the Head of the Department.

information.

### 10.8.1 Foundation Courses

**102F Mathematics Skills Program** is a non-credit course intended for students who either have a weak background in mathematics or are returning to the subject after some years. The course enables students to master mathematical operations such as those involving whole numbers, fractions, decimals, percents, integers, exponents, linear equations and algebraic expressions.

CH: 0  
LH: 2

**102N Mathematics Skills Program for the B.N. (Collaborative) Program** is a non-credit course intended for students of the B.N. (Collaborative) Program who have a weak background in mathematics and/or have not done mathematics in some years. The course enables students to master mathematical operations such as those involving whole numbers, fractions, decimals, percents, units of measurement, ratios and proportions.

CH: 0  
LH: 2

**103F Mathematics Skills Program** is non-credit course intended for students who either have a weak background in mathematics or are returning to the subject after some years. The course enables students to master mathematical operations such as those involving rational expressions and equations, units of measurement, ratios and proportions, formulas, graphs of linear equations, systems of linear equations, basic geometry and trigonometry and number systems.

CH: 0  
LH: 2  
PR: Mathematics 102F

**104F Mathematics Skills Program** is a non-credit course intended for those students who either have a weak background in mathematics or are returning to the subject after some years. The course enables students to master mathematical operations such as those involving number systems, algebraic and rational expressions, linear and rational equations, formulas, exponents, radicals, quadratic equations and logarithms.

CH: 0  
LH: 2  
PR: Mathematics 103F

## 10.8.2 Accelerated M103F/M1051 Mathematics Skills Program/Finite Mathematics II

**103F Mathematics Skills Program/Finite Mathematics II** is a non-credit course enabling students to master mathematics operations such as those involving algebraic and rational expressions, formulas, graphs, systems of linear equations, basic trigonometry and number systems. Mathematics 1051 is a credit course with topics including elementary matrices, linear programming, elementary number theory, mathematical systems and geometry.

CH: 0  
CO: Mathematics 102F and a recommendation by an MLC instructor resulting in approval by the MLC Director  
LH: three 50 minute classes and two 75 minute classes per week  
PR: Mathematics 102F and a recommendation by an MLC instructor resulting in approval by the MLC Director

## 10.8.3 Mathematics Courses

Pure and applied Mathematics courses are designated by MATH. Where the 4 digit course number is the same, students can receive credit for only one course with subject names MATH, AMAT, PMAT, STAT.

**1000 Calculus I** is an introduction to differential calculus, including algebraic, trigonometric, exponential, logarithmic, inverse trigonometric and hyperbolic functions. Applications include kinematics, related rates problems, curve sketching and optimization.

CR: the former MATH 1081  
LC: 4  
PR: MATH 1090 or a combination of placement test and high school Mathematics scores acceptable to the Department  
UL: at most 9 credit hours in Mathematics will be given for courses completed from the following list subject to normal credit restrictions: Mathematics 1000, 1031, 1050, 1051, the former 1080, the former 1081, 1090, the former 1150 and 1151

**1001 Calculus II** is an introduction to integral calculus, including Riemann sums, techniques of integration and improper integrals. Applications include exponential growth and decay, areas between curves and volumes of solids of revolution.

PR: MATH 1000 or the former MATH 1081

**1031 Mathematical Problem Solving** - inactive course.

**1050 Finite Mathematics I** covers topics which include sets, logic, permutations, combinations and elementary probability.

LC: 4  
PR: a combination of placement test and high school mathematics scores acceptable to the department or MATH 103F  
UL: At most 9 credit hours in Mathematics will be given for courses completed from the following list subject to normal credit restrictions: Mathematics 1000, 1031, 1050, 1051, the former 1080, the former 1081, 1090, the former 1150 and 1151. With the exception of those already admitted at the time of registration in this course to a Bachelor of Education program that requires this course, students who already have obtained credit for 6 or more Mathematics and/or Statistics credit hours numbered 2000 or above should not register for this course and they will not receive credit for it.

**1051 Finite Mathematics II** covers topics which include elementary matrices, linear programming, elementary number theory, mathematical systems, and geometry.

LC: 4  
PR: a combination of placement test and high school mathematics scores acceptable to the department or MATH 103F  
UL: At most 9 credit hours in Mathematics will be given for courses completed from the following list subject to normal credit restrictions: Mathematics 1000, 1031, 1050, 1051, the former 1080, the former 1081, 1090, the former 1150 and 1151. With the exception of those already admitted at the time of registration in this course to a Bachelor of Education program that requires this course, students who already have obtained credit for 6 or more Mathematics and/or Statistics credit hours numbered 2000 or above should not register for this course and they will not receive credit for it.

**1090 Algebra and Trigonometry** provides students with the essential prerequisite elements for the study of an introductory course in calculus. Topics include algebra, functions and their graphs, exponential and logarithmic functions, trigonometry, polynomials, and rational functions.

CR: if previously completed or currently registered for MATH 1000, 1001, the former 1080, or the former 1081  
LC: 4  
PR: a combination of placement test and high school Mathematics scores acceptable to the Department or MATH 104F  
UL: at most 9 credit hours in Mathematics will be given for courses completed from the following list subject to normal credit restrictions: Mathematics 1000, 1031, 1050, 1051, the former 1080, the former 1081, 1090, the former 1150 and 1151

**2000 Calculus III** is an introduction to infinite sequences and series, and to the differential and integral calculus of multivariate functions. Topics include tests for the convergence of infinite series, power series, Taylor and Maclaurin series, complex numbers including Euler's formula, partial differentiation, and double integrals in Cartesian and polar coordinates.

PR: MATH 1001

**2050 Linear Algebra I** includes the topics: Euclidean n-space, vector operations in 2- and 3-space, complex numbers, linear transformations on n-space, matrices, determinants, and systems of linear equations.

PR: A combination of placement test and high school Mathematics scores acceptable to the Department or 3 credit hours in first year Mathematics courses

**2051 Linear Algebra II** includes the topics: real and complex vector spaces, basis, dimension, change of basis, eigenvectors, inner products, and diagonalization of Hermitian matrices.

PR: MATH 1000 and 2050

**2075 Introduction to the History of Mathematics** - inactive course.

**2090 Mathematics of Finance** covers the topics: simple and compound interest and discount, forces of interest and discount, equations of value, annuities and perpetuities, amortization schedules and sinking funds, bonds and other securities, contingent payments.

PR: MATH 1001

**2091 Introduction to Actuarial Mathematics** - inactive course.

**2130 Technical Writing in Mathematics** is a project oriented course combining mathematical investigation and technical writing. By using computer programming, graphical and typesetting tools, students will explore mathematical concepts and will produce technical reports of professional quality. The latter will combine elements of writing and graphics to convey technical ideas in a clear and concise manner.

PR: admission to Applied or Pure Mathematics major and MATH 1001 and (Computer Science 1510 or 1001 or 2001; or permission of the Head of Department)

**2260 Ordinary Differential Equations I** examines direction fields, equations of first order and first degree, higher order linear equations, variation of parameters, methods of undetermined coefficients, Laplace transforms, systems of differential equations. Applications include vibratory motion, satellite and rocket motion, pursuit problems, population models and chemical kinetics.

CR: the former MATH 3260  
PR: MATH 2000

**2320 Discrete Mathematics** covers basic concepts of mathematical reasoning, sets and set operations, functions, relations including equivalence relations and partial orders as illustrated through the notions of congruence and divisibility of integers, mathematical induction, principles of counting, permutations, combinations and the Binomial Theorem.

CR: the former Computer Science 2740 or the former Engineering 3422 or Engineering 4424  
PR: MATH 1001 or 2050

**2330 Euclidean Geometry** is an introduction to Euclidean geometry of the plane. It covers the geometry of triangles and circles, including results such as the Euler line, the nine-point circle and Ceva's theorem. It also includes straight-edge and compass constructions, isometries of the plane, the three reflections theorem, and inversions on circles.

CR: the former MATH 3330  
PR: MATH 2051 or 2320

**3000 Real Analysis I** covers proof techniques, structure of the real numbers, sequences, limits, continuity, uniform continuity, differentiation.

CR: the former MATH 2001  
LH: 1  
PR: MATH 2000

**3001 Real Analysis II** examines Infinite series of constants, sequences and series of functions, uniform convergence and its consequences, power series, Taylor series, Weierstrass Approximation Theorem.

CR: the former MATH 3201  
LH: 1

PR: MATH 3000

**3100 Introduction to Dynamical Systems** examines flows, stability, phase plane analysis, limit cycles, bifurcations, chaos, attractors, maps, fractals. Applications throughout.

CR: the former AMAT 3190

PR: MATH 2260 (or the former MATH 3260)

**3111 Applied Complex Analysis** examines mapping by elementary functions, conformal mapping, applications of conformal mapping, Schwarz-Christoffel transformation, Poisson integral formula, poles and zeros, Laplace transforms and stability of systems, analytic continuation.

PR: MATH 3210

**3132 Numerical Analysis I** includes a discussion of round-off error, the solution of linear systems, iterative methods for nonlinear equations, interpolation and polynomial approximation, least squares approximation, fast Fourier transform, numerical differentiation and integration, and numerical methods for initial value problems.

CR: Computer Science 3731

LH: 1.5

PR: MATH 2000, MATH 2050, and a computing course (Computer Science 1510 is recommended)

**3161 Ordinary Differential Equations II** examines power series solutions, method of Frobenius, Bessel functions, Legendre polynomials and others from classical Physics, systems of linear first order equations, fundamental matrix solution, existence and uniqueness of solutions, and advanced topics in ordinary differential equations.

PR: MATH 2260 (or the former MATH 3260) and 3202

**3202 Vector Calculus** deals with functions of several variables, Lagrange multipliers, vector valued functions, directional derivatives, gradient, divergence, curl, transformations, Jacobians, inverse and implicit function theorems, multiple integration including change of variables using polar, cylindrical and spherical co-ordinates, Green's theorem, Stokes' theorem, divergence theorem, line integrals, arc length.

CR: Physics 3810

PR: MATH 2000 and 2050

**3210 Introduction to Complex Analysis** examines complex numbers, analytic functions of a complex variable, differentiation of complex functions and the Cauchy-Riemann equations, complex integration, Cauchy's theorem, Taylor and Laurent series, residue theory and applications.

PR: MATH 3000

**3240 Applied Graph Theory** examines algorithms and complexity, definitions and basic properties of graphs, Eulerian and Hamiltonian chains, shortest path problems, graph colouring, planarity, trees, network flows, with emphasis on applications including scheduling problems, tournaments, and facilities design.

CR: the former Computer Science 2741

PR: MATH 2320

**3300 Set Theory** is an introduction to Mathematical Logic, functions, equivalence relations, equipotence of sets, finite and infinite sets, countable and uncountable sets, Cantor's Theorem, Schroeder-Bernstein Theorem, ordered sets, introduction to cardinal and ordinal numbers, logical paradoxes, the axiom of choice.

PR: MATH 2320

**3303 Introductory Geometric Topology** covers graphs and the four colour problem, orientable and non-orientable surfaces, triangulation, Euler characteristic, classification and colouring of compact surfaces, basic point-set topology, the fundamental group, including the fundamental groups of surfaces, knots, and the Wirtinger presentation of the knot group.

PR: MATH 2320

**3320 Abstract Algebra** is an introduction to groups and group homomorphisms including cyclic groups, cosets, Lagrange's theorem, normal subgroups and quotient groups, introduction to rings and ring homomorphisms including ideals, prime and maximal ideals, quotient rings, integral domains and fields.

PR: MATH 2320

**3321 Applied Algebra** - inactive course.

**3331 Projective Geometry** includes course topics: projective space, the principle of duality, mappings in projective space, conics and quadrics.

PR: MATH 2051

**3340 Introductory Combinatorics** includes topics: distributions, the binomial and multinomial theorems, Stirling numbers, recurrence relations, generating functions and the inclusion-exclusion principle. Emphasis will be on applications.

PR: MATH 2320

**3370 Introductory Number Theory** examines perfect numbers and primes, divisibility, Euclidean algorithm, greatest common divisors, primes and the unique factorization theorem, congruences, cryptography (secret systems), Euler-Fermat theorems, power residues, primitive roots, arithmetic functions,

Diophantine equations, topics above in the setting of the Gaussian integers.

PR: MATH 2320

**4000 Lebesgue Integration** includes a review of the Riemann integral, functions of bounded variation, null sets and Lebesgue measure, the Cantor set, measurable sets and functions, the Lebesgue integral in  $R_1$  and  $R_2$ , Fatou's lemma, Monotone and Dominated Convergence Theorems, Fubini's Theorem, an introduction to Lebesgue-Stieltjes measure and integration.

CR: the former Pure Mathematics 4400

PR: MATH 3001

**4001 Functional Analysis** includes metric and normed spaces, completeness, examples of Banach spaces and complete metric spaces, bounded linear operators and their spectra, bounded linear functionals and conjugate spaces, the fundamental theorems for Banach spaces including the Hahn-Banach Theorem, topology including weak and weak\* topologies, introduction to Hilbert spaces.

CR: the former Pure Mathematics 4302

PR: MATH 3001

**4100 Applied Functional Analysis** - inactive course.

**4102 Stochastic Methods in Applied Mathematics** - inactive course.

**4130 Introduction to General Relativity** (same as Physics 4220) studies both the mathematical structure and physical content of Einstein's theory of gravity. Topics include the geometric formulation of special relativity, curved spacetimes, metrics, geodesics, causal structure, gravity as spacetime curvature, the weak-field limit, geometry outside a spherical star, Schwarzschild and Kerr black holes, Robertson-Walker cosmologies, gravitational waves, an instruction to tensor calculus, Einstein's equations, and the stress-energy tensor.

CO: MATH 4230

CR: Physics 4220

PR: MATH 3202 and one of Physics 3220 or MATH 4230 or permission of the Head of Department.

**4131 Numerical Linear Algebra** - inactive course.

**4132 Introduction to Optimization** - inactive course.

**4133 Numerical Optimization** - inactive course.

**4140 Introduction to Mathematical Control Theory** - inactive course.

**4160 Partial Differential Equations I** covers two point boundary value problems, Fourier series, Sturm-Liouville theory, canonical forms, classification and solution of linear second order partial differential equations in two independent variables, separation of variable, integral transform methods.

PR: MATH 2260 (or the former MATH 3260) and 3202

**4161 Integral Equations** - inactive course.

**4162 Numerical Methods for Differential Equations** covers numerical solution of initial value problems for ordinary differential equations by single and multi-step methods, Runge-Kutta, and predictor-corrector; numerical solution of boundary value problems for ordinary differential equations by shooting methods, finite differences and spectral methods; numerical solution of partial differential equations by the method of lines, finite differences, finite volumes and finite elements.

PR: MATH 3132 and 4160

**4170 Partial Differential Equations II** covers first order equations, Cauchy problems, Cauchy-Kowalewska theorem, second order equations, canonical forms, wave equations in higher dimensions, method of spherical means, Duhamel's principle, potential equation, Dirichlet and Neuman problem, Green's function and fundamental solution, potential theory, heat equation, Riemann's method of integration, method of plane and Riemann waves for systems of PDEs of the first order.

PR: MATH 4160

**4180 Introduction to Fluid Dynamics** (same as Physics 4205) covers basic observations, mass conservation, vorticity, stress, hydrostatics, rate of strain, momentum conservation (Navier-Stokes equation), simple viscous and inviscid flows, Reynolds number, boundary layers, Bernoulli's and Kelvin's theorems, potential flows, water waves, thermodynamics.

CR: Physics 4205

PR: Physics 3220 and either MATH 4160 or the former Physics 3821

**4190 Mathematical Modelling** is intended to develop students' skills in mathematical modelling and competence in oral and written presentations. Case studies in modelling will be analysed. Students will develop a mathematical model and present it in both oral and report form.

PR: MATH 3100, 3161, 4160, and a technical writing course offered by a Science department (MATH 2130 is recommended).

**419A and 419B Applied Mathematics Honours Project** is a two-semester course that requires the student, with supervision by a member of the Department, to prepare a dissertation in an area of Applied Mathematics. In addition to a written project, a one hour presentation will be given by the

student at the end of the second semester.

CH: 6

CR: the former AMAT 4199

PR: registration in an Honours or Joint Honours program in Applied Mathematics.

**4230 Differential Geometry** covers both classical and modern differential geometry. It begins with the classical theory of curves and surfaces, including the Frenet-Serret relations, the fundamental theorem of space curves, curves on surfaces, the metric, the extrinsic curvature operator and Gaussian curvature. The modern section studies differentiable manifolds, tangent vectors as directional derivatives, one-forms and other tensors, the metric tensor, geodesics, connections and parallel transport, Riemann curvature and the Gauss-Codazzi equations.

PR: MATH 3202

**4240 Differential and Integral Calculus on Manifolds** - inactive course.

**4280-4290 Special Topics in Pure and Applied Mathematics** will have the topics to be studied announced by the Department. Consult the Department for a list of titles and information regarding availability.

PR: permission of the Head of the Department

**4300 General Topology** is an introduction to point-set topology, centering around the notions of the topological space and the continuous function. Topological properties such as Hausdorff, compactness, connectedness, normality, regularity and path-connectedness are examined, as are Urysohn's metrization theorem and the Tychonoff theorem.

PR: MATH 3300 or both MATH 3000 and 3303

**4301 Algebraic Topology** - inactive course.

**4310 Complex Function Theory** examines topology of  $\mathbb{C}$ , analytic functions, Cauchy's theorem with proof, Cauchy integral formula, singularities, argument principle, Rouché's theorem, maximum modulus principle, Schwarz's lemma, harmonic functions, Poisson integral formula, analytic continuation, entire functions, gamma function, Riemann-Zeta function, conformal mapping.

PR: MATH 3210

**4320 Ring Theory** examines factorization in integral domains, structure of finitely generated modules over a principal ideal domain with application to Abelian groups, nilpotent ideals and idempotents, chain conditions, the Wedderburn-Artin theorem.

PR: MATH 3320

**4321 Group Theory** examines permutation groups, Sylow theorems, normal series, solvable groups, solvability of polynomials by radicals, introduction to group representations.

PR: MATH 3320

**4331 Galois Theory** - inactive course.

**4340 Combinatorial Analysis** continues most of the topics started in 3340 with further work on distributions, recurrence relations and generating functions. Generating functions are used to solve recurrence relations in two variables. Also included is a study of Polya's theorem with applications.

PR: MATH 2000 and 3340

**4341 Combinatorial Designs** includes the study of finite fields, Latin squares, finite projective planes and balanced incomplete block designs.

PR: MATH 3320 or 3340

**4370 Number Theory** is continued fractions, an introduction to Diophantine approximations, selected Diophantine equations, the Dirichlet product of arithmetic functions, the quadratic reciprocity law, and factorization in quadratic domains.

PR: MATH 3370

**4375 History of Mathematics** - inactive course.

**439A and 439B Pure Mathematics Honours Project** is a two-semester course that requires the student, with supervision by a member of the Department, to prepare a dissertation in an area of Pure Mathematics. Although original research by the student will not normally be expected, the student must show an ability and interest to learn and organize material independently. A one-hour presentation will be given by the student at the end of the second semester.

CH: 6

CR: the former MATH 4399

PR: registration in an Honours or Joint Honours program in Pure Mathematics

## 10.8.4 Statistics Courses

Statistics courses are designated by STAT. Where the 4 digit course number is the same, students can receive credit for only one course with subject names MATH, AMAT, PMAT, STAT.

**1510 Statistical Thinking and Concepts** examines the basic statistical

issues encountered in everyday life, such as data collection (both primary and secondary), ethical issues, planning and conducting statistically-designed experiments, understanding the measurement process, data summarization, measures of central tendency and dispersion, basic concepts of probability, understanding sampling distributions, the central limit theorem based on simulations (without proof), linear regression, concepts of confidence intervals and testing of hypotheses. Statistical software will be used to demonstrate each technique.

CR: cannot receive credit for STAT 1510 if completed with, or subsequent to, STAT 2500, 2550 or the former 2510

LH: one 90 minute lab per week

PR: Mathematics 1090 or a combination of placement test and high school Mathematics scores acceptable to the Department.

**2500 Statistics for Business and Arts Students** covers descriptive statistics (including histograms, stem-and-leaf plots and box plots), elementary probability, random variables, the binomial distribution, the normal distribution, sampling distribution, estimation and hypothesis testing including both one and two sample tests, paired comparisons, correlation and regression, related applications.

CR: STAT 2550, the former 2510, Psychology 2910, 2925 and the former 2900

LH: one 90 minute lab per week. Statistical computer package will be used in the laboratory, but no prior computing experience is assumed

PR: Mathematics 1000 or 6 credit hours in first year courses in Mathematics or registration in at least semester three of a Bachelor of Nursing program or permission of the Head of Department

**2501 Further Statistics for Business and Arts Students** covers power calculation and sample size determination, analysis of variance, multiple regression, nonparametric statistics, time series analysis, introduction to sampling techniques.

CR: STAT 2560, Psychology 2911, 2950, and the former 2901

LH: one 90 minute lab per week. Statistical computer package will be used in the laboratory.

PR: STAT 2500 or the former 2510

**2550 Statistics for Science Students** is an introduction to basic statistics methods with an emphasis on applications to the sciences. Material includes descriptive statistics, elementary probability, binomial distribution, Poisson distribution, normal distribution, sampling distribution, estimation and hypothesis testing (both one and two sample cases), chi-square test, one way analysis of variance, correlation and simple linear regression.

CR: Engineering 4421, STAT 2500, the former STAT 2510, Psychology 2910, Psychology 2925, and the former Psychology 2900

LH: one 90 minute lab per week. Statistical computer package will be used in the laboratory, but no prior computing experience is assumed.

PR: Mathematics 1000 or the former 1081

**2560 Further Statistics for Science Students** (formerly STAT 2511) covers estimation and hypothesis testing in the two-sample and paired sample cases, one way and two way analysis of variance, simple and multiple linear regression, chi-square tests, non-parametric tests including sign test, Wilcoxon signed rank test and Wilcoxon rank test.

CR: STAT 2501, Psychology 2911, 2950, and the former 2901

LH: one 90 minute lab per week. Statistical computer packages will be used in the laboratory, but no prior computing experience is assumed.

PR: STAT 1510 or 2500 or 2550 or the former 2510, Mathematics 1000 or the former 1081

**3410 Probability and Statistics** covers basic probability concepts, combinatorial analysis, conditional probability, independence, random variables, distribution function, mathematical expectation, Chebyshev's inequality, distribution of two random variables, binomial and related distributions, Poisson, gamma, beta, normal, multivariate normal, student t and F distributions, transformations of random variables, convergence in probability, convergence in distribution, delta-method, moment-generating function technique, central limit theorem.

OR: one and a half hour tutorial period weekly

PR: Mathematics 2000

**3411 Statistical Inference I** examines sampling distributions, order statistics, confidence interval, hypotheses testing, chi-square tests, maximum likelihood estimation, maximum likelihood estimation, Rao-Cramér inequality and efficiency, maximum likelihood tests, sufficiency, completeness and uniqueness, exponential class of distributions, likelihood ratio test and Neyman-Pearson lemma.

OR: one and a half hour tutorial period weekly

PR: STAT 3410

**3520 Experimental Design I** is an introduction to basic concepts in experimental design, including principles of experimentation; single factor designs such as completely randomized designs; randomized block designs; Latin square designs; Graeco Latin square designs; multiple comparison tests; analysis of covariance; balanced incomplete block designs; factorial designs; fixed, random and mixed effects models.

CR: Psychology 3900 and 3950

PR: Mathematics 2050 and either STAT 3411 or both Mathematics 1001

and one of STAT 2501 or 2560 or the former 2511

**3521 Regression** covers inferences in linear regression analysis including estimation, confidence and prediction intervals, hypotheses testing and simultaneous inference; matrix approach to regression analysis, multiple linear regression, multicollinearity, model building and selection, polynomial regression, qualitative predictor variables.

PR: Mathematics 2050 and either STAT 3411 or both Mathematics 1001 and one of STAT 2501 or 2560 or the former 2511

**3540 Time Series I** is an introduction to basic concepts of time series analysis such as stationarity and nonstationarity, components of time series, transformation of nonstationary series using regression, decomposition methods and differencing, autocovariance and autocorrelation functions, moving average (MA), autoregressive (AR), and ARMA representation of stationary time series including stationarity and invertibility conditions; partial autocorrelation function; properties of MA(q), AR(p) and ARMA(p, q) models, model identification, parameter estimation, model diagnostics and selection, forecasting, integrated ARMA process. Applications to real time series.

PR: either STAT 3411 or both Mathematics 1001 and one of STAT 2501 or 2560 or the former 2511

**3570 Reliability and Quality Control** covers an introduction to reliability, parallel and series systems, standard parametric models, estimation of reliability, quality management systems, introduction to statistical process control, simple quality control tools, process control charts for variables and attributes, process capability, cumulative sum chart, exponentially weighted moving average chart, acceptance sampling plans, measurement system analysis, continuous improvement and six sigma methodology.

PR: either STAT 3411 or both Mathematics 1001 and one of STAT 2501 or 2560 or the former 2511

**3585 Computational Statistics** is an introduction to modern computational statistics, using a programming language which implements S. Emphasis will be placed on the development of programs for numerical and graphical exploratory data analysis and for implementing specialized statistical procedures.

PR: Mathematics 2000, STAT 2560

**4402 Stochastic Processes** covers the Poisson process, renewal theory, Markov chains, and some continuous state models including Brownian motion. Applications are considered in queuing, reliability, and inventory theory. Emphasis is on model building and probabilistic reasoning.

CR: Mathematics 4102

PR: STAT 3410

**4410 Statistical Inference II** covers multivariate normal distributions, quadratic forms of normal random variables, analysis of variance, multiple comparisons, distributions of quadratic forms, independence of quadratic forms, regression, distributions of order statistics, nonparametric statistics.

PR: Mathematics 2051, STAT 3411

**4520 Experimental Design II** is an introduction to factorial experiments including mixed effects models, unbalanced data in factorial designs, two level and three level factorial experiments, blocking and confounding in factorial designs, fractional factorial experiments, unreplicated factorial experiments, response surface designs, robust parameter designs, nested and split plot designs.

PR: STAT 3520

**4530 Survey Sampling** covers basic concepts, simple random sampling, unequal probability sampling and the Horvitz-Thompson principle, sufficiency, design and modelling in sampling, ratio and regression estimators, stratified and cluster sampling, methods for elusive and/or hard-to-detect populations.

PR: STAT 3411

**4540 Time Series** examines the analysis of time series in the time domain and is an introduction to frequency domain analysis. Topics covered include integrated ARMA processes, seasonal time series models, intervention analysis and outlier detection, transfer function models, time series regression and GARCH models, vector time series models, state space models and the Kalman Filter. Spectral decomposition of a time series is introduced. Emphasis is on applications and examples with a statistical software package.

PR: STAT 3411 and 3540

**4550 Non-parametric Statistics** covers inferences concerning location based on one sample, paired samples or two samples, inferences concerning scale parameters, goodness-of-fit tests, association analysis, tests for randomness.

PR: one of STAT 3520 or 3521 or STAT 3411

**4560 Continuous Multivariate Analysis** examines the multivariate normal distribution and its marginal and conditional distributions, distributions of non-singular and singular linear combinations, outline of the Wishart distribution and its application, in particular, to Hotelling's T-squared statistic for the mean vector, connection between likelihood ratio and Hotelling's T-squared statistics, a selection of techniques chosen from among MANOVA, multivariate regression, principal components, factor analysis, discrimination

and classification, clustering.

PR: Mathematics 2051, STAT 3410 and one of STAT 3411, 3520, or 3521

**4561 Categorical Data Analysis** is an analysis of cross-classified categorical data with or without explanatory variables, chi-square test, measures of association, multidimensional contingency tables, hypotheses of partial and conditional independence, log-linear models for Poisson, multinomial and product-multinomial sampling schemes, concept of ordinal categorical models, logit models, likelihood estimation, selection of suitable log-linear and logit models.

PR: STAT 3520 or 3521

**4581 Quantitative Methods in Biology** - inactive course.

**4590 Statistical Analysis of Data I** examines the statistical analysis of real life univariate data using computational and statistical methods including descriptive statistics, chi-square tests, non-parametric tests, analysis of variance, linear, logistic and log-linear regressions. Other statistical techniques such as integrated autoregressive moving average modelling and forecasting or quality control methods may be introduced depending on the nature of the data.

LH: one 90 minute lab per week

PR: one of STAT 3520, 3521 or 3540

**459A and 459B Statistics Honours Project** is a two-semester course that requires the student, with supervision by a member of the Department, to prepare a dissertation in an area of Statistics. In addition to a written project, a presentation will be given by the student at the end of the second semester.

CH: 6

CR: the former STAT 4599

PR: registration in an Honours or Joint Honours program in Statistics

## 10.9 Ocean Sciences

Ocean Sciences courses are designated by OCSC.

**1000 Exploration of the World Ocean** is an introductory course covering the major ocean sciences (biology, chemistry, geology, physics) at a level sufficient for science majors but accessible to non-science majors. It explores phenomena occurring from the shoreline to the abyss and from equatorial to polar regions. It also examines principles of marine ecology as well as how the marine environment affects humans and vice versa. The course is offered in a blended format that combines face-to-face lectures and online interactive activities in the form of virtual oceanographic expeditions.

LC: 1.5 hours per week

OR: 1.5 hours per week (online interactive activities)

**2000 Introductory Biological Oceanography** provides a general understanding of the biological processes that occur in coastal and oceanic environments. It introduces students to the major groups of bacteria, phytoplankton, invertebrates and fish, emphasizing the biotic and abiotic factors controlling primary production and marine biomass. It shows how the physical, chemical, and geological environments interact with biology to define processes and patterns affecting nutrients and life in marine ecosystems.

CR: Biology 3710

PR: OCSC 1000

**2001 Introduction to Sustainable Fisheries and Aquaculture** introduces students to the breadth of aquaculture and fisheries science and the variety of animal species cultured and harvested. Basic aspects of aquaculture and fisheries and the links between the two are covered, including production systems, capture fisheries, environmental interactions, and the physiology, ecology and reproduction of finfish and shellfish in the context of their culture and harvest.

PR: OCSC 1000 or Biology 1002

**2100 Introductory Chemical Oceanography** (same as Chemistry 2610) provides an introduction to the fundamental chemical properties of seawater and the processes governing the concentrations of elements and compounds in the oceans. It is an introduction to the sources, distribution, and transformations of chemical constituents of the ocean, and their relation to biological, chemical, geological, and physical processes. Topics include: controls on average concentration of chemicals in the ocean; vertical and horizontal distributions of ocean constituents; air-sea interactions; production, export, and remineralization of organic matter; the ocean carbon cycle; human-induced changes; stable isotopes; and trace elements.

CR: Chemistry 2610

PR: Chemistry 1011 or 1051 which may be taken concurrently or Chemistry 1001

**2200 Introductory Geological Oceanography** (same as Earth Sciences 2919) is a study of the formation and evolution of oceans, including plate tectonics, mid-ocean ridges (birth place of oceans), subduction zones (where oceans are consumed), sedimentary environments such as estuaries, deltas, beaches and barrier islands, continental shelves, slopes and deep abyssal plains and special topics, including anoxic events,

evolution of tides, atmosphere-ocean interactions, formation of banded iron formations, snowball Earth, black and white smokers, and how Earth modulates its climate through atmosphere, hydrosphere, biosphere and lithosphere interactions.

CR: Earth Sciences 2919  
PR: Earth Sciences 1000

**2300 Introductory Physical Oceanography** (same as Physics 2300) will provide an introduction to the physical ocean. Ocean characteristics studied will include: the properties of seawater, key features of ocean circulation, wind-forcing in the ocean, tides and shoreline processes as well as ocean coupling with the atmosphere, geosphere and cryosphere (ice) and new approaches to ocean sampling and numerical modelling. The course will take an integrated earth systems approach to the study of upwelling zones, open ocean ecosystems and climate change.

CR: Environmental Science 2371, Physics 2300  
PR: any two first-year courses in Physics

**3000 Aquaculture Principles and Practices** emphasizes the techniques and methods used to culture finfish and shellfish, with a primary focus on Canadian aquaculture species. Basic aspects of aquaculture will be covered, including the design and maintenance of production systems, culture techniques, and the nutrition, health, physiology and reproduction of finfish and shellfish. The laboratory portion of this course will provide students with practical experience in the maintenance of land-based aquaculture production systems and in the husbandry/culture of aquatic organisms.

LH: 3  
PR: OCSC 2001, or OCSC 1000 and Biology 1002

**3002 Aquaculture and Fisheries Biotechnology** is an introduction to biotechnology and genetics as they are applied to aquaculture and fisheries. Topics covered include genetic variation; genetic structure of fish and shellfish populations; the genetic basis of aquaculture traits; finfish and shellfish genomic research; marker-assisted selection in aquaculture; manipulation of ploidy; genetic engineering in aquaculture; and techniques used to study the responses of aquatic animals to external stressors such as hypoxia, temperature stress, acidification, and pathogens.

PR: Biology 2250 or Biochemistry 2100

**3620 Aquatic Microbial Ecology** (same as Biology 3620) is a study of the nature, distribution and activities of microorganisms in the freshwater and marine environments. Field and laboratory work illustrate some of the investigative techniques used in this field of study.

CR: Biology 3620 and the former Biology 3603  
LH: 3  
PR: Science 1807; Biology 2600 and 3050, Statistics 2550 or equivalent

**3640 Environmental Physiology of Animals** (same as Biology 3640) covers physiological adaptations of animals facilitating their survival in natural environments with emphasis on physiological and biochemical responses of animals to extreme environments. Starting with the fundamental basis of physiological mechanisms, the course explores various aspects and the integration of major physiological processes (metabolism, respiration, osmoregulation) and how these relate to ecological niche.

CR: the former Biology 3403 or the former Biology 4455, Biology 3640  
PR: Biology 2060; Biochemistry 3106

UL: may not be used to fulfill the physiology course requirement for a Biology major, honours or joint honours program

**4000 Scientific Diving Methods** is an in-depth study and application of methods routinely employed for data collection in underwater scientific research. Aspects covered include habitat mapping; installation and use of instrumentation; still and video camera techniques; planning and execution of surveys and experiments in major subtidal habitats; as well as data analysis and interpretation. Participants are trained in accordance with Memorial University of Newfoundland's Guide for Diving Safety and the Canadian Association for Underwater Science (CAUS) standards to meet the criteria for Scientific Diver I rating. This course is normally offered at the Bonne Bay Marine Station in a special 2-week session at the beginning or end of the Spring semester depending on station's availability.

OR: The following documentation must be provided to the course instructor at least four months before the first day of the course. It must be in effect until at least the last day of the course. Submission of this documentation does not guarantee acceptance into the course. Aside from course prerequisites, acceptance will be based on successful completion, before the course begins, of a diving fitness and skills evaluation in a pool environment and demonstration of understanding of the MUN Diving Safety Manual, physics and physiology of diving, and use of recreational dive tables. Nationally recognized scuba diver certification with diver rescue and accident management techniques; diver medical examination by a licensed physician knowledgeable in diving medicine; First Aid (basic), CPR (basic), and DAN oxygen first aid for scuba diving injuries administration cards; DAN membership and insurance or medical insurance covering hyperbaric treatment; diver's log book with at least 12 dives in the last 12 months including one dive in the last six months and four dives in cold (<10°C) water; cold-water scuba diving equipment complete with proper hydrostatic/VIP service tags on diving cylinders and overhaul/service receipts on

regulators and buoyancy compensator devices.

PR: Biology 2122 or Biology 3709, Biology 2600 or OCSC 2000 or Environmental Science 2371, Statistics 2550 or equivalent

**4100 Marine Pelagic Food Webs** examines the structure, function and dynamics of pelagic food webs in the marine environment. The course will focus on the material and energy flows within and among trophic levels and the interactions with major biogeochemical cycles and climate.

PR: Biology 1002 or 2120, and OCSC 2000 or Biology 3710

**4122 Advanced Studies in Marine Animal Diversity** (same as Biology 4122) provides an in-depth examination of cellular, physiological, behavioural and ecological adaptations in marine animals. Lectures will be combined with discussions of relevant papers from the primary literature on topics of current interest which may relate morphology, ecology, evolution, natural history, species interactions and practical applications. Students will also gain hands-on experience by designing and conducting research projects involving live or preserved animals.

CR: Biology 4122  
LC: either three hours of lecture and three hours of laboratory per week or a two-week intensive course that embodies equivalent instructional time

LH: either three hours of lecture and three hours of laboratory per week or a two-week intensive course that embodies equivalent instructional time

PR: Science 1807; Biology 2122 and Biology 2600

**4601 Functional Biology of Fish** (same as Biology 4601) is an introduction to anatomical physiological and cellular processes in the life cycle of fishes.

CR: Biology 4601  
PR: Biology 2060, Biology 2210 or 3202, and Biology 3401 or 3640

## 10.10 Physics and Physical Oceanography

Physics courses are designated by PHYS.

**1020 Introductory Physics I** is a non-calculus based introduction to mechanics. This course may be completed by someone who has no physics background provided some extra effort is made.

CO: Mathematics 1090  
CR: PHYS 1050  
LH: 3; six laboratory sessions per semester  
OR: tutorial sessions may be held on weeks when no laboratory is scheduled

PR: Level III Advanced Mathematics or Mathematics 1090. It is recommended that students have completed at least one of level II and level III high school physics courses

**1021 Introductory Physics II** is a non-calculus based introduction to fluids, wave motion, light, optics, electricity and magnetism.

CO: Mathematics 1000  
LH: 3; normally there will be six laboratory sessions per semester  
OR: tutorial sessions may be held on weeks when no laboratory is scheduled

PR: Science 1807; PHYS 1020 or 1050 and Mathematics 1090 or 1000

**1050 General Physics I: Mechanics** is a calculus based introduction to mechanics. The course will emphasize problem solving. For more details regarding PHYS 1050, see Note 4 under Physics and Physical Oceanography.

CO: Mathematics 1000  
CR: PHYS 1020  
LH: 3; normally there will be six laboratory sessions per semester  
OR: tutorial sessions may be held on weeks when no laboratory is scheduled

PR: Mathematics 1000

**1051 General Physics II: Oscillations, Waves, Electromagnetism** is a calculus based introduction to oscillations, wave motion, physical optics and electromagnetism.

CO: Mathematics 1001  
LH: 3; normally there will be six laboratory sessions per semester  
OR: tutorial sessions may be held on weeks when no laboratory is scheduled

PR: Science 1807; PHYS 1050, or 1021, or 1020 (with a minimum grade of 65%) and Mathematics 1001

**2053 Fluids and Thermal Physics** examines elasticity, fluid mechanics, thermodynamics, kinetic theory and statistical mechanics.

CO: Mathematics 1001 and PHYS 1051  
LH: 3  
PR: Science 1807; Mathematics 1001 and PHYS 1051

**2055 Electricity and Magnetism** examines Gauss' Law, the electrostatic potential, capacitance, magnetic forces and the magnetic field, electromagnetic induction, magnetic materials, ac circuits, superconductivity, the displacement current and Maxwell's equations.

CO: Mathematics 2000

LH: 3

PR: Science 1807; Mathematics 2000 and PHYS 1051

**2151 Stellar Astronomy and Astrophysics** covers atomic structure and spectra. The sun: radiation, energetics, magnetic field. Stars: distance, velocity, size, atmospheres, interiors. Variable stars, multiple stars, clusters and stellar associations. Stellar evolution, interstellar matter, structure of the Milky Way Galaxy. Exterior galaxies, quasi-stellar objects, pulsars. Cosmology.

PR: 6 credit hours in Mathematics courses at the first year level

**2300 Introductory Physical Oceanography** (same as Ocean Sciences 2300) will provide an introduction to the physical ocean. Ocean characteristics studied will include: the properties of seawater; key features of ocean circulation; wind-forcing in the ocean; tides and shoreline processes as well as ocean coupling with the atmosphere, geosphere and cryosphere (ice); and new approaches to ocean sampling and numerical modelling. The course will take an integrated earth systems approach to the study of upwelling zones, open ocean ecosystems and climate change.

CR: Environmental Science 2371, Ocean Sciences 2300

PR: any two first-year courses in Physics

**2750 Modern Physics** covers special relativity, quanta of light, atomic structure and spectral lines, quantum structure of atoms and molecules, nuclei and elementary particles.

CO: Mathematics 1001 and PHYS 1051

CR: PHYS 2056

PR: Mathematics 1001 and PHYS 1051

**2820 Computational Mechanics** covers newtonian dynamics and celestial mechanics, numerical differentiation and integration, numerical solutions to mechanics problems, data and spectral analysis, Fourier series and normal modes, oscillations and vibrations, linear and non-linear oscillators, nonlinear dynamics and chaos.

CO: Mathematics 2000

LC: 5

LH: 5

PR: Mathematics 2000 and PHYS 1051

**3000 Physics of Device Materials** is structures of crystalline and amorphous solids. Excitations and transport in metals, semiconductors, and dielectrics; electronic band structures. Physics of multi-material devices including photodiodes, solid state lasers, and field-effect transistors.

PR: PHYS 2055 or registration in Academic Term 3 of the Electrical Engineering Program

**3150 Astrophysics I** is a review of macroscopic and microscopic physics. The sun: luminosity, mass, spectrum, photosphere, corona, interior. Principles of stellar structure; radiative and convective transport of energy. The virial theorem. Thermonuclear fusion; temperature dependence; the solar neutrino problem. Nucleosynthesis; the curve of binding energy; the synthesis of heavy elements. White dwarfs, neutron stars, and black holes; degenerate electron and neutron gases; Chandrasekhar's Limit. Population I and Population II stars; the Hertzsprung-Russell diagram; relationships among luminosity, mass, and effective temperature for main sequence dwarfs. Evolution of post main sequence stars.

PR: PHYS 2053, 2750 (or 2056), and 2820

**3151 Astrophysics II** covers stellar spectra and classification of stars. Hertzsprung-Russell diagram; equations of stellar structure for a star in equilibrium; temperature and density dependencies of nuclear processes. Formation and classification of binary stars; mass and energy transfer in binary star systems; semidetached binaries; cataclysmic variables, pulsars, etc. Galaxies and galactic structure; active galactic nuclei; cosmological redshift. Cosmology.

PR: PHYS 3150 and 3220

**3220 Classical Mechanics I** covers kinematics and dynamics of a particle. Moving reference systems. Celestial mechanics. Systems of particles.

CO: PHYS 2820 and Mathematics 2260

PR: PHYS 2820 and Mathematics 2260 or (the former Mathematics 3260)

**3230 Classical Mechanics II** covers rigid body motion. Lagrange's equations. Hamilton's equations. Vibrations. Special theory of relativity.

PR: PHYS 3220 and 3810 (or Mathematics 3202) and Mathematics 2260 or (the former Mathematics 3260)

**3300 Intermediate Physical Oceanography** deals with the physics of processes in the ocean, but provides an integrated view of the whole field of oceanography. The importance of physical processes to other aspects of oceanography is treated.

PR: PHYS 2053 and Mathematics 2000 or registration in Academic Term 5 of the Ocean and Naval Architectural Engineering program

**3340 Principles of Environmental Physics** will explore the basic physical principles of light, heat, energy and sound in the natural environment. Several key aspects of physics in the environment will be covered including climate and the physical evolution of the planet and the present role of the atmosphere and ocean spectroscopy in the atmosphere and measurement

and observation of the atmosphere; principles of energy generation and pollution transport in the atmosphere and ocean.

PR: Mathematics 2000 and PHYS 2053

**3400 Thermodynamics** covers the first and second laws of thermodynamics. Entropy. Thermodynamics of real substances. Kinetic theory of matter. Introduction to statistical mechanics.

PR: Mathematics 2000, PHYS 2053 and PHYS 2750 or 2056

**3500 Electromagnetic Fields I** examines electrostatic Field: field, potential, Poisson's equation, Laplace's equation, capacitance, dielectrics, polarization, electric displacement, boundary conditions. Magnetic Field: electric current and magnetic field, vector potential, Lorentz force and relativity, changing magnetic field, inductance, magnetic materials, magnetization. Maxwell's equations.

PR: PHYS 2055 and 3810 (or Mathematics 3202)

**3550 Electric Circuits** covers circuit elements. Simple resistive circuits. Techniques of circuit analysis. Topology in circuit analysis. Operational amplifiers. Reactive circuit elements. Natural response and step response of RL, RC and RLC circuits. Circuits driven by sinusoidal sources. Mutual inductance. Series and parallel resonance. Laplace transforms in the analysis of frequency response.

CO: Mathematics 2260

CR: Engineering 3821

LC: 6

LH: 6

PR: Mathematics 2050, Mathematics 2260 or (the former Mathematics 3260), PHYS 2055

**3551 Analogue Electronics** - inactive course.

**3600 Optics and Photonics I** covers geometrical Optics: thin lenses, mirrors, optical systems. Two-beam and multiple-beam interference phenomena. Fraunhofer Diffraction. Introduction to Maxwell's Theory: reflection, transmission, and polarization. Modulation of light waves. Fibre-optical light guides: intermodal dispersion, index profiles, loss mechanisms, single mode fibres. Optical communication systems: free space and fibre systems, emitters, detectors, amplifiers, wavelength-division multiplexing, integrated optics.

PR: Mathematics 2000 and PHYS 2055

**3750 Quantum Physics I** covers wave-particle duality of nature. Introduction to Quantum Mechanics. Schrödinger equation. One electron atoms. Quantum statistics.

CO: PHYS 3220 and 3810 or Mathematics 3202

PR: PHYS 2750 (or 2056), 3220 and 3810 (or Mathematics 3202)

**3751 Quantum Physics II** covers multielectron atoms. Molecules. Solids - conductors and semiconductors. Superconductors. Magnetic properties. Nuclear models. Nuclear decay and nuclear reactions. Properties and interactions of elementary particles.

PR: PHYS 3750

**3800 Computational Physics** is a project-based course that trains students to become functional in computational methods by writing and compiling computer code (C/Fortran) in a Unix environment to solve problems from different areas of physics. Students complete one or more projects that introduce students to a particular class of numerical methods. Lectures and tutorials cover the theory that underlies the computational methods and background for code development and the application of the required numerical methods.

LC: 5

LH: 5

PR: Computer Science 1510, PHYS 2820, Mathematics 2260 (or the former Mathematics 3260), and Mathematics 3202

**3810 Mathematical Analysis** - inactive course.

**3820 Mathematical Physics I** focuses on applications of mathematical techniques to solve problems in physics. Vectors, vector calculus, matrices and tensors, coordinate systems and transformations, and summation notation are reviewed. Topics in complex numbers, functions and calculus are introduced, including branch cuts, differentiation, integration, Cauchy formula, series, residue theorem, and the gamma function. Other topics include differential equations using series solutions and separation of variables, and Fourier series of real and complex functions.

PR: Mathematics 2260 (or the former Mathematics 3260), and Mathematics 3202

**3900 Physics Laboratory I** is a selection of experiments based primarily on material covered in the third year courses.

LH: 6

PR: Science 1807; at least two of PHYS 2053, 2820, 2055, and PHYS 2750 (or 2056)

**4000 Solid State Physics** covers crystal structure and binding, phonons and lattice vibrations, thermal properties of solids. Electrons in solids, energy bands, semi-conductors, superconductivity, dielectric properties. Magnetic properties of solids.

PR: PHYS 3400 and 3750 or waiver approved by the instructor

**4200 Classical Mechanics III** - inactive course.

**4205 Introduction to Fluid Dynamics** (same as Mathematics 4180) covers basic observations, mass conservation, vorticity, stress, hydrostatics, rate of strain, momentum conservation (Navier-Stokes equation), simple viscous and inviscid flows, Reynolds number, boundary layers, Bernoulli's and Kelvin's theorems, potential flows, water waves, thermodynamics.

CR: Mathematics 4180

PR: PHYS 3220 and either Mathematics 4160 or the former PHYS 3821 or waiver approved by the instructor

**4210 Continuum Mechanics** - inactive course.

**4220 Introduction to general Relativity** (Mathematics 4130) studies both the mathematical structure and physical content of Einstein's theory of gravity. Topics include the geometric formulation of special relativity, curved spacetimes, metrics, geodesics, causal structure, gravity as spacetime curvature, the weak-field limit, geometry outside a spherical star, Schwarzschild and Kerr black holes, Robertson-Walker cosmologies, gravitational waves, an instruction to tensor calculus, Einstein's equations, and the stress-energy tensor.

CO: Mathematics 4230

CR: Mathematics 4130

PR: Mathematics 3202 and one of PHYS 3220, Mathematics 4230 or waiver approved by the instructor

**4300 Advanced Physical Oceanography** covers fundamental properties of seawater and techniques of oceanographic measurement. The dynamical equations of oceanography are derived and solutions explored by comparison with oceanic observations. Properties of waves in rotating and non-rotating fluids. Linear and non-linear wave theory are developed.

PR: PHYS 3300 and 3820 or waiver approved by the instructor

**4330 Topics in Physical Oceanography** - inactive course.

**4340 Modelling in Environmental Physics** covers the basic principles underlying environmental modelling will be developed and techniques for modelling presented and applied. Techniques for numerical modelling will be developed and simple numerical models will be developed for use in terrestrial, atmospheric and oceanic environments. Free and forced systems will be discussed and the transition to chaos and some aspects of chaotic dynamics.

PR: PHYS 3340 and PHYS 3820 or waiver approved by the instructor

**4400 Statistical Mechanics** covers ensembles. Classical and quantum statistical mechanics. Statistical mechanics of phase transitions. Advanced topics in statistical mechanics.

CO: PHYS 3750

PR: PHYS 3400 and 3750

**4500 Electromagnetic Fields II** covers multipole expansions, electrostatic fields as boundary value problems, polarizability of molecules in dielectric media, Clausius-Mossotti relation, gauges. Electromagnetic Waves: Poynting's theorem, reflection and transmission of electromagnetic waves, cavity resonators, wave guides. Electromagnetic Radiation: dipoles, antennas, quantum mechanics and electro-magnetic interactions. Selected topics in electrodynamics and applied electromagnetism.

PR: PHYS 3500 and 3820 or waiver approved by the instructor

**4600 Optics and Photonics II** is a review of basic topics in wave optics. Phase sensitive imaging. Electromagnetic waves in anisotropic media. Scattering of electromagnetic waves. The physics of light sources and applications. Non-linear optics and applications.

CO: PHYS 3751

PR: PHYS 3500, 3600, and PHYS 3751 or waiver approved by the instructor

**4700 Atomic and Molecular Physics** - inactive course.

**4710 Nuclear Physics** - inactive course.

**4820 Mathematical Physics II** covers topics on the common partial differential equations of Mathematical Physics and boundary value problems; Sturm-Liouville theory, introduction to the theory of distributions, Dirac delta function, Laplace and Fourier transforms, Green's functions, Bessel functions, Legendre functions, spherical harmonics, and other topics such as group theory.

PR: PHYS 3820 or all of Mathematics 2051, 2260, 3202, 3210

**4850 Quantum Mechanics** examines postulates of quantum mechanics. Operators and operator algebra. Matrix representations. Spin and magnetic fields. Approximation methods: WKB method, time independent perturbation theory, time dependent perturbation theory, variational methods. Elementary scattering theory.

PR: PHYS 3230, 3750, 3820 or waiver approved by the instructor

**4851 Advanced Quantum Mechanics** covers general formulation of quantum mechanics, measurement theory and operators. Hilbert spaces. Advanced topics selected from: electron in a strong magnetic field and the

Aharonov-Bohm effect; advanced scattering theory; systems of identical particles; Feynman path integral formulation of quantum mechanics; relativistic quantum mechanics; second quantization; symmetry and group theory; density matrix and mixtures.

PR: PHYS 4850 and the former 3821 or waiver approved by the instructor

**4900 Physics Laboratory II** is a selection of experiments at the senior level.

LH: 6

PR: Science 1807; PHYS 3900

**490A/B Honours Physics Thesis** is required of the Honours program.

**6317 Underwater Acoustics** covers basic theory of sound, sound in the ocean environment, wave equation, ray tracing, sonar system operation, transducers, applications.

PR: PHYS 3810 (or the former Mathematics 3220) and 3220, or waiver approved by the instructor

**6318 Ocean Climate Modelling** covers numerical techniques, finite difference, finite element and spectral methods. Introduction to the climate system. Ocean climate models. Box models. Variability on interdecadal, centennial and geological scales. Zonally averaged models. 3-D ocean modelling. Thermohaline circulation. General circulation models. Climate modelling and global warming.

PR: PHYS 3810 (or Mathematics 3202), PHYS 3300 and the completion of any 15 credit hours in core courses at the 3000 or 4000 level in the Faculty of Science or waiver approved by the instructor

## 10.11 Psychology

Psychology courses are designated by PSYC.

### 10.11.1 Non-Restricted Courses

These courses are open to all students who have the appropriate prerequisites. Students who intend to major in Psychology should note the credit restrictions for PSYC 2010, 2100, 2440, 2610, 2810, 2920, and 3640 as taking any of these courses will reduce options in the Majors program

**1000 Introduction to Psychology** is the first half of a two-semester introduction to Psychology as a biological and social science. Topics may include history, research methodology, behavioural neuroscience, sensation and perception, consciousness, learning, and memory.

**1001 Introduction to Psychology** is the second half of a two-semester introduction to Psychology as a biological and social science. Topics may include emotion, motivation, stress and health, personality and individuality, psychological disorders and treatment, and social psychology.

PR: PSYC 1000

**2010 Biological and Cognitive Development** is a survey of principles underlying human development from the prenatal stage to adolescence. Topics covered will include biological, physical, linguistic, sensory, cognitive and intellectual changes.

CR: PSYC 2025, PSYC 3050

PR: PSYC 1000 and 1001

UL: cannot be used towards the Psychology major

**2020 Social and Personality Development** (same as the former PSYC 2011) is an examination of relevant research on human socialization and personality development with special emphasis on parenting influences, attachment, imitation, sex role and moral development in childhood and adolescence.

CR: PSYC 2025, the former PSYC 2011

PR: PSYC 1000 and 1001

UL: cannot be used towards the Psychology major

**2030 Adult Development** (same as the former PSYC 2012) examines physical and psychological changes from early adulthood until the end of the lifespan. Topics include career choices, love partnerships, parenting and grandparenting, cognitive changes, interpersonal changes, and healthy aging.

CR: the former PSYC 2012

PR: PSYC 1000 and 1001

UL: cannot be used towards the Psychology major

**2100 Attitudes and Social Cognition** is an examination of the concepts and principles involved in the interaction between the individual and others. Emphasis will be on the theoretical and empirical concerns of attitude formation and change, social perception, and social cognition.

CR: the former PSYC 2125, PSYC 3100

PR: PSYC 1000 and 1001

**2120 Interpersonal and Group Processes** - inactive course.

**2150 Introduction to Forensic Psychology** will provide an in-depth overview of the relationship between psychology and the law. A variety of topics will be discussed and critically evaluated, including the use and

misuse of psychology-based investigative methods such as offender and geographic profiling, detection of deception, investigative interviewing, eyewitness testimony, jury decision-making, corrections and treatment, risk assessment, and criminal responsibility.

PR: PSYC 1000 and 1001

UL: cannot be used towards the Psychology major

**2151 Health Psychology** will explore the history, aims and future of health psychology. Topics covered will consider the contributions of a wide range of psychological theory within the context of psychosocial risk factors for illness, illness prevention, health promotion, and the health care system itself. These theories extend from rather individualistic notions of health and wellness (e.g., personality, attitudes, and behaviour) to concepts associated with characteristics of the broader social environment (e.g., social support, economic challenges, and organizational factors). An overall bio-psycho-social approach to health and wellness is explored.

PR: PSYC 1000 and 1001

UL: cannot be used towards the Psychology major

**2240 Survey of Learning** - inactive course.

**2440 Human Memory and Cognition** - inactive course.

**2540 Psychology of Gender** is an examination of the influence of gender on development and socialization, attitude formation, cognition, personality and mental health.

PR: PSYC 1000 and 1001

UL: cannot be used towards the Psychology major

**2560 Intelligence** - inactive course.

**2610 Personality** - inactive course.

**2800 Drugs and Behaviour** is an examination of the neurophysiology of drug action, the measurable effect of drugs on experimentally controlled behaviour, and a survey of information available on common self-administered drugs and their immediate and long-term effects.

PR: PSYC 1000 and 1001

UL: cannot be used towards the Psychology major

**2810 Brain and Behaviour** is a broad survey of physiological psychology at an elementary level. Topics will include the following: structure of the nervous system, nerve conduction, sensory and motor systems, behavioural biology of reproduction, aggression, feeding and drinking, sleep and arousal, pleasure and pain, learning and memory.

CR: PSYC 2520, 2825, the former PSYC 3801

PR: PSYC 1000 and 1001

UL: cannot be used towards the Psychology major

**2920 Research Methods in Psychology for Non-Majors** provides an introduction to the design, understanding, and application of psychological research. Topics covered include understanding and applying scientific method, creating and testing hypotheses, constructing reliable and valid experiments, and the proper use of controls. An emphasis will be placed on thinking critically about psychology and common errors of judgment.

PR: PSYC 1000 and 1001

UL: cannot be used towards the Psychology major or any Psychology honours or joint honours programs

**3430 The Psychology of Thinking** - inactive course.

**3501 Industrial Psychology** - inactive course.

**3533 Sexual Behaviour** covers the most important aspects of human sexuality with a psychology theory and research framework. The course will examine the biological, behavioural and socio-cultural bases of the human sexual response. Topics include sexual interaction and communication, contraception, sexually transmitted infections, reproduction, sexual orientation, transgender and intersex, variations in sexual behaviour, sex and gender, sexual dysfunction and therapy, and sexual coercion.

PR: PSYC 1000 and 1001

UL: cannot be used towards the Psychology major

**3577 Program Evaluation** - inactive course.

**3640 The Psychology of Abnormal Behaviour** covers problems of definition, the history of beliefs about abnormal behaviour and the implication of a behavioural model for the understanding and control of behaviour problems.

CR: PSYC 3650, PSYC 3626

PR: any 2000 level course in Psychology

UL: cannot be used towards the Psychology major

**4810 Human Neuropsychology** - inactive course.

## 10.11.2 Majors Courses

These courses are restricted to Majors in Psychology and Behavioural Neuroscience.

**2520 Introduction to Behavioural Neuroscience** is based on the idea that

psychological and neuroscience research efforts are synergistic. Neuroscience research can reveal mechanisms that help explain the mind and behavior, while concepts developed by psychological research often define the topics that neuroscience investigates. The course will survey a broad range of topics that include the fundamentals of neuroanatomy, neurophysiology, and neurodevelopment, as well as higher level functions such as motivation, emotion, sleep, memory, language, and mental illness.

CR: PSYC 2810, 2825, the former PSYC 3801

PR: PSYC 1000 and 1001 and admission to a Major in Psychology or Behavioural Neuroscience; minors may be permitted to take this course if space permits

**2910 Research Methods in Psychology I** is an introduction to the design and application of psychological research with particular concentration on understanding and applying scientific method, creating and testing hypotheses, constructing reliable and valid experiments, managing and analysing data sets, using statistical software, and scientific writing. Specific topics include descriptive statistics including measures of central tendency, variability and relative standing, inferential statistics such as *t* tests for one and two sample designs, correlation and regression, and non-parametric statistics.

CR: Statistics 2500, 2550, the former 2510, PSYC 2925

LH: one laboratory period weekly

PR: PSYC 1000 and 1001; Mathematics 1000 or two of 1090, 1050 and 1051 (or equivalent) and admission to a Major in Psychology or Behavioural Neuroscience

**2911 Research Methods in Psychology II** covers research methods in psychology with a focus on more complex research designs and statistical approaches, within the realm of experimentation and beyond the laboratory. Specific topics include controlling participant variables, using between and repeated measures designs within the context of Analysis of Variance (ANOVA). Particular ANOVA approaches include one-way and factorial designs, within subject design, and two-way mixed designs.

CR: Statistics 2501, 2560, PSYC 2950

LH: one laboratory period weekly

PR: PSYC 2910 and admission to a Major in Psychology or Behavioural Neuroscience

**2930 Research and Writing in Psychology** is an introduction to the fundamentals of preparing psychology reports, emphasizing organization, correct use of terminology, adherence to appropriate discipline style, concise and accurate description, preparation of abstracts, and integration of numerical data. Topics for reports will be selected each semester by the instructor.

PR: PSYC 1000 and 1001 and admission to a Major in Psychology or Behavioural Neuroscience

UL: may not be used towards the Faculty of Humanities and Social Sciences CRW requirement or the former R/W requirement

**3050 Developmental Psychology** is an examination of the methods of study and an evaluation of current findings and theoretical issues of importance to an understanding of development. Topics will be drawn from perception, learning, cognition, social learning, memory and language development.

CR: PSYC 2010, PSYC 2025

PR: PSYC 2520, 2911, and 2930 or the former 2570, and admission to a Major in Psychology or Behavioural Neuroscience

**3100 Social Psychology** is an examination of the concepts and principles involved in social behaviour. Topics covered will include attitudes, social cognition, interpersonal relations, and group processes.

CR: PSYC 2100, the former PSYC 2125

PR: PSYC 2520, 2911, and 2930 or the former 2570, and admission to a Major in Psychology or Behavioural Neuroscience

**3250 Neurobiology of Learning and Memory** examines how organisms adjust their behaviour to regularities in the environment as a result of experience. Experience changes behavior by modifying the nervous system. We will take a multidisciplinary approach, combining information from psychology and neuroscience. to study learning and memory. Students will gain an understanding of sensitization, habituation, and classical and operant conditioning using animal models, with a particular emphasis on the synaptic and molecular changes that occur with learning and memory.

PR: PSYC 2520, 2911, and 2930 or the former 2570, and admission to a Major in Psychology or Behavioural Neuroscience

**3350 Perception** is a broad survey of theory and research in sensation and perception.

PR: PSYC 2520, the former 2570, and 2911, and 2930 or the former 2570, and admission to a Major in Psychology or Behavioural Neuroscience

**3450 Human Cognition** is an introduction to the experimental study of the mental representations and processes involved in human cognition. Topics such as attention, perception and pattern recognition, concepts and the organization of knowledge, language processes, mental imagery, reasoning, problem solving, decision making and skilled performance will be covered with an emphasis on experimental analysis and techniques.

CR: PSYC 2440, PSYC 2425

PR: PSYC 2520, 2911, and 2930 or the former 2570, and admission to a Major in Psychology or Behavioural Neuroscience

**3510 Directed Study** provides an opportunity to work with an individual faculty member on a research project. The student will submit a formal written report of the research conducted. Permission of the instructor is required.

PR: PSYC 2911 and 2930 or the former 2570, and admission to a Major in Psychology or Behavioural Neuroscience

**3511 Directed Study** provides an opportunity to work with an individual faculty member on a research project. The student will submit a formal written report of the research conducted. Permission of the instructor is required.

PR: PSYC 2911 and 2930 or the former 2570, and admission to a Major in Psychology or Behavioural Neuroscience

**3620 Personality Theory and Research** - inactive course.

**3650 Abnormal Psychology** is an examination of the nature, explanation and treatment of psychological disorders with an emphasis on research methods and current findings.

CR: PSYC 3640, PSYC 3626

PR: PSYC 2520, 2911, and 2930 or the former 2570, and admission to a Major in Psychology or Behavioural Neuroscience

**3750 Animal Behaviour I** (same as Biology 3750) is an introduction to the mechanisms, development, function and evolution of behaviour in animals. Topics include the history of ethology and comparative psychology, and behavioural ecology; methods of animal behaviour study, behaviour of animals in relation to physiology, learning, communication, mating systems, and other areas in Biology and Psychology.

CR: Biology 3750

PR: Biology 1001, 1002 and PSYC 2520, 2911, and 2930 or the former 2570, and admission to a Major in Psychology or Behavioural Neuroscience

**3800 Cellular Neuroscience** addresses the structure and function of neurons and neural circuits and examines principles of electrochemical neural communication at the macroscopic, microscopic and molecular level. The relevance of this knowledge to understanding brain mechanisms of normal and diseased brain functions will be touched upon. The molecular basis of the formation of some types of memories will be explored.

PR: PSYC 2520, 2911, and 2930 or the former 2570, Biology 1001 and 1002, and admission to a Major in Psychology or Behavioural Neuroscience

**3820 Research Techniques in Behavioural Neuroscience** allows students to increase their understanding of how knowledge is generated in the study of neuroscience and behavior. Students will visit various on-campus laboratories that are engaged in research relevant to these fields. In addition to observations and hands-on tutorials, readings, discussions, and writing assignments will strengthen students' understanding of the techniques used to answer specific research questions in neuroscience and behaviour.

PR: Science 1807; PSYC 2520, 2911, and 2930, or the former 2570, Biology 1001 and 1002, and admission to a Major in Psychology or Behavioural Neuroscience

**3830 Behavioural Endocrinology** explores the behavioural effects of hormones and the question of how hormones act on the brain to influence behaviour. Topics include: basic concepts in neuroendocrinology, reproductive behaviour (sexual and parental), sexual differentiation of the brain and behaviour, aggressive behaviour, and the neuroendocrinology of stress, including the effects of stress on the brain and behaviour.

PR: PSYC 2520, 2911, and 2930 or the former 2570, Biology 1001 and 1002, and admission to a Major in Psychology or Behavioural Neuroscience

**3900 Design and Analysis III** is a course on complex and specialized research design in Psychology. Multifactor research designs that employ both between- and within-subjects independent variables. Advantages and disadvantages of using multifactor research designs to test psychological hypotheses. Hierarchical designs and incomplete factorials. The use of covariates and blocking to increase experimental precision. Problems created by missing data. Single subject designs. How to answer specific psychological questions in the context of complex designs. The design and analysis of non-experimental psychological research. Applications of such techniques as the analysis of variance and multiple linear regression to the data obtained with these research designs, with special attention to problems inherent in psychological research.

CR: PSYC 3950, Statistics 3520

LH: one laboratory period weekly

PR: PSYC 2911 and admission to a Major in Psychology or Behavioural Neuroscience

**4050 Selected Topics in Developmental Psychology I** is an intensive examination of a specific topic in developmental psychology.

PR: PSYC 3050 and admission to a Major in Psychology or Behavioural Neuroscience

**4051 Selected Topics in Developmental Psychology II** is an intensive examination of a specific topic in developmental psychology.

PR: PSYC 3050 and admission to a Major in Psychology or Behavioural Neuroscience

**4070 Research Experience in Development Psychology** allows students to gain research experience in selected areas of developmental psychology.

PR: PSYC 3050 and admission to a Major in Psychology or Behavioural Neuroscience

**4150 Selected Topics in Social Psychology I** is an intensive examination of a specific topic in social psychology.

PR: PSYC 3100 and admission to a Major in Psychology or Behavioural Neuroscience

**4151 Selected Topics in Social Psychology II** is an intensive examination of a specific topic in social psychology.

PR: PSYC 3100 and admission to a Major in Psychology or Behavioural Neuroscience

**4152 Selected Topics in Applied Social Psychology** - inactive course.

**4160 Psychology and the Law** - inactive course.

**4170 Research Experience in Social Psychology** will provide research experience in a selection of areas typically studied by social psychologists such as attitudes, prejudice, groups and social cognition. Students will acquire experience with research methods that are used to advance the body of knowledge in social psychology.

PR: PSYC 3100 and admission to a Major in Psychology or Behavioural Neuroscience

**4250 Selected Topics in Learning and Motivation I** an intensive examination of a specific topic in learning and motivation.

PR: PSYC 3250 and admission to a Major in Psychology or Behavioural Neuroscience

**4251 Selected Topics in Learning and Motivation II** is an intensive examination of a specific topic in learning and motivation.

PR: PSYC 3250 and admission to a Major in Psychology or Behavioural Neuroscience

**4260 Learning Processes and Drug Effects** - inactive course.

**4270 Research Experience in Learning** allows students to gain research experience in selected areas of learning.

PR: Science 1807; PSYC 3250 and admission to a Major in Psychology or Behavioural Neuroscience

**4350 Selected Topics in Perception I** - inactive course.

**4351 Selected Topics in Perception II** is an intensive examination of a specific topic in perception.

PR: PSYC 3350 and admission to a Major in Psychology or Behavioural Neuroscience

**4370 Research Experience in Perception** allows students to gain research experience in selected areas of perception.

PR: PSYC 3350 and admission to a Major in Psychology or Behavioural Neuroscience

**4450 Selected Topics in Cognition I** (same as the former PSYC 4400) is an intensive examination of a specific topic in cognition.

CR: the former PSYC 4400

PR: PSYC 3450 and admission to a Major in Psychology or Behavioural Neuroscience

**4451 Selected Topics in Cognition II** (same as the former PSYC 4401) is an intensive examination of a specific topic in cognition.

CR: the former PSYC 4401

PR: PSYC 3450 and admission to a Major in Psychology or Behavioural Neuroscience

**4452 Selected Topics in Cognition: Reading** - inactive course.

**4453 Selected Topics in Cognitive Science** (same as the former PSYC 4402) is an intensive examination of a specific topic in cognitive science from a psychological perspective.

CR: the former PSYC 4402

PR: two courses chosen from PSYC 3050, 3250, 3350, 3450, the former 3801 and admission to a Major in Psychology or Behavioural Neuroscience

**4461 Psycholinguistics** - inactive course.

**4462 Human Memory** - inactive course.

**4470 Research Experience in Cognition** allows students to gain research experience in selected areas of cognition.

PR: PSYC 3450 and admission to a Major in Psychology or Behavioural Neuroscience

**4500 Selected Topics in Psychology I** is an intensive examination of a specific topic in psychology that crosses traditional subdisciplines.

PR: two 3000-level majors courses (other than 3900) and admission to a Major in Psychology or Behavioural Neuroscience

**4501 Selected Topics in Psychology II** is an intensive examination of a specific topic in psychology that crosses traditional subdisciplines.

PR: two 3000-level majors courses (other than 3900) and admission to a Major in Psychology or Behavioural Neuroscience

**4610 Selected Topics in Personality I** - inactive course.

**4620 Selected Topics in Personality II** is an intensive examination of a specific topic in personality.

PR: PSYC 3620 and admission to a Major in Psychology or Behavioural Neuroscience

**4650 Selected Topics in Abnormal Behaviour I** is an intensive examination of a specific topic in abnormal behaviour.

PR: PSYC 3650 and admission to a Major in Psychology or Behavioural Neuroscience

**4651 Selected Topics in Abnormal Behaviour II** - inactive course.

**4660 Developmental Psychopathology** - inactive course.

**4661 Family Psychology** is a study of the reciprocal relationship between family processes and abnormal behaviour. The course will focus on the role of family dynamics in the etiology of abnormal behaviour, the impact of psychological disorders on family functioning and the application of family therapy to create therapeutic change.

PR: PSYC 3650, or all of 2520, 2930 or the former 2570, 2911, and 3640, and admission to a Major in Psychology or Behavioural Neuroscience

**4662 Clinical Psychology and Theories of Psychotherapy** - inactive course.

**4670 Research Experience in Abnormal Psychology** allows students to gain research experience in selected areas of clinical psychology.

PR: PSYC 3650 and admission to a Major in Psychology or Behavioural Neuroscience

**4671 Research Experience in Personality** - inactive course.

**4701 Animal Behaviour II** - inactive course.

**4750 Selected Topics in Animal Behaviour I** is an intensive examination of a specific topic in animal behaviour.

PR: PSYC 3750 or Biology 3750 and admission to a Major in Psychology or Behavioural Neuroscience

**4751 Selected Topics in Animal Behaviour II** is an intensive examination of a specific topic in animal behaviour.

PR: PSYC 3750 or Biology 3750 and admission to a Major in Psychology or Behavioural Neuroscience

**4770 Research Experience in Animal Behaviour** (same as Biology 4770) allows students to gain research experience in selected areas of animal behaviour. This course may be offered in a usual 12-week semester or as a two-week field course.

CR: Biology 4770

LC: either three hours of lecture per week or a two-week field course that embodies equivalent instructional time

PR: Science 1807; PSYC 2520, 2930 or the former 2570, 2911 and PSYC 3750 or BIOL 3750 and admission to a major in Psychology or Behavioural Neuroscience

**4850 Selected Topics in Behavioural Neuroscience I** is an intensive examination of a specific topic in behavioural neuroscience.

PR: One of PSYC 3800, the former 3801, 3820, or 3250 and admission to a Major in Psychology or Behavioural Neuroscience

**4851 Selected Topics in Behavioural Neuroscience II** - inactive course.

**4870 Research Experience in Behavioural Neuroscience** allows students to gain research experience in selected areas of neuroscience.

PR: Science 1807; PSYC 3820 or the former 3801, and admission to a Major in Psychology or Behavioural Neuroscience

**4910 Systems in Contemporary Psychology** is a study of paradigms and explanations in contemporary psychology in the context of their historical antecedents.

PR: at the St. John's campus, 30 credit hours in Psychology courses required in the majors program and admission to a Major in Psychology or Behavioural Neuroscience or, at the Grenfell campus, 30 credit hours in Psychology courses including Psychology 3950

**499A and 499B Honours Dissertation** is a linked course, based on independent study of an approved problem in Psychology. The topic will be chosen in consultation with the Faculty Advisor. The first semester will normally involve directed reading in this area, and preparation of a dissertation proposal. The second semester will be devoted to conducting

the study, gathering data, data analysis and preparation of a formal written report. The dissertation must be submitted for grading before the end of the tenth week of the semester in which the student is registered for 499B.

CH: 6

PR: admission to the Honours Program

### 10.11.3 Psychology Work Term Descriptions

The Following Work Terms are a requirement of the Psychology Co-op Program only.

**199W Work Term I** follows the successful completion of Semester 4. Students are expected to learn, develop and practice the high standards of behaviour and performance normally expected in the work environment. (A detailed description of each job is normally posted during the job competition.) As one component of the Work Term, the student is required to complete a work report. The work report, as a minimum requirement should:

1. analyse an issue/problem related to the student's work environment.
2. demonstrate an understanding of the structure of a professional report, and show reasonable competence in written communication and presentation skills. (Students should consult the evaluation form provided in the placement package.)

Late reports will be graded as FAL unless prior permission for a late report has been given by Co-operative Education.

Seminars on professional development, conducted by Co-operative Education, are presented during Semester 4 to introduce and prepare the student for participation in the subsequent work terms. Topics may include among others, work term evaluation, work report writing, career planning, employment seeking skills, resume preparation, self employment, ethics and professional concepts, behavioural requirements in the work place, assertiveness in the work place and industrial safety.

**299W Work Term II** follows the successful completion of Semester 6. Students are expected to further develop and expand their knowledge and work-related skills and should be able to accept increased responsibility and challenge. In addition, students are expected to demonstrate an ability to deal with increasingly complex work-related concepts and problems. The work report, as a minimum requirement, should:

1. analyse an issue/problem related to the student's work environment and demonstrate an understanding of practical application of concepts relative to the student's academic background
2. demonstrate competence in creating a professional report, and
3. show competence in written communication and presentation skills

Late reports will be graded as FAL unless prior permission for a late report has been given by Co-operative Education.

**399W Work Term III** follows the successful completion of Semester 7. Students should have sufficient academic grounding and work experience to contribute in a positive manner to the problem-solving and management processes needed and practiced in the work environment. Students should become better acquainted with their discipline of study, should observe and appreciate the attitudes, responsibilities, and ethics normally expected of professionals and should exercise greater independence and responsibility in their assigned work functions. The work report should reflect the growing professional development of the student and, as a minimum requirement, will:

1. demonstrate an increased ability to analyse a significant issue/problem related to the student's experience in the work environment
2. demonstrate a high level of competence in producing a professional report, and
3. show a high level of competence in written communication and presentation skills

Late reports will be graded as FAL unless prior permission for a late report has been given by Co-operative Education.

### 10.12 Science

**1000 Introduction to Science I** is a liberal science course for Humanities and Social Sciences students, which reflects the way scientists think and work through historical, philosophical and social considerations of the environment we live in. Typical course content includes: the concepts of matter, motion and energy; the chemical basis for life and the interdependence of organisms; and the abundance and distribution of the Earth's natural resources.

UL: may not be used to fulfill any of the Science course requirements for the Honours and General Degrees in Science

**1001 Introduction to Science II** is continuation of Science 1000.

PR: Science 1000

UL: may not be used to fulfill any of the Science course requirements for the Honours and General Degrees in Science

**1150 Introduction to Physical and Life Sciences** (formerly Science 115A) is an introduction to some concepts in the Physical and Life Sciences. This course is primarily intended for the non-science major (Bachelor of Arts; Bachelor of Education (Primary/Elementary)).

CR: the former Science 115A

LH: 3

PR: Science 1807

UL: not acceptable as a prerequisite for 2000 level courses in Physics, Chemistry, Biology, Geography or Earth Sciences

**1151 Introduction to Physical and Life Sciences** (formerly Science 115B) is an introduction to some concepts in the Physical and Life Sciences. This course is primarily intended for the non-science major (Bachelor of Arts; Bachelor of Education (Primary/Elementary)).

CR: the former Science 115B

LH: 3

PR: Science 1807

UL: not acceptable as a prerequisite for 2000 level courses in Physics, Chemistry, Biology, Geography or Earth Sciences

**1807 Safety in the Scientific Laboratory** introduces students to safety practices required for working in science laboratories where hazards are present. Students complete individual online modules in Laboratory Safety and WHIMIS. Normally, it will be taken before the start of the semester in which students take their first science laboratory course with this prerequisite, and it must be completed no later than the first Friday of the semester. Check department lists of courses to see where this is a prerequisite.

CH: 0

OR: only offered online; completion time estimated to be two hours

## 1 The Memorial University of Newfoundland Code

The attention of all members of the University community is drawn to the section of the University Calendar titled **The Memorial University of Newfoundland Code**, which articulates the University's commitment to maintaining the highest standards of academic integrity.

## 2 Student Code of Conduct

Memorial University of Newfoundland expects that students will conduct themselves in compliance with University Regulations and Policies, Departmental Policies, and Federal, Provincial and Municipal laws, as well as codes of ethics that govern students who are members of regulated professions. The Student Code of Conduct outlines the behaviors which the University considers to be non-academic misconduct offences, and the range of remedies and/or penalties which may be imposed. Academic misconduct is outlined in **UNIVERSITY REGULATIONS - Academic Misconduct** in the University Calendar.

For more information about the *Student Code of Conduct*, see [www.mun.ca/student/conduct](http://www.mun.ca/student/conduct).

## 3 School Description

A social work program at Memorial University of Newfoundland commenced in 1963 with the offering of a two-year diploma in public welfare. In 1965 the Bachelor of Arts (Social Welfare) degree was initiated, continuing until 1970 when the Bachelor of Social Work was established. The Bachelor of Social Work program is accredited by the Canadian Association of Social Work Education (CASWE). The program is currently accredited to January 2018. The School also offers an undergraduate diploma and graduate degrees at the master and doctoral level.

Social Work courses are designed for delivery on a philosophical base of humanism and social justice. This is accomplished in an empowering teaching and learning environment, through the practice of anti-oppression principles, within the context of critical thinking. The curriculum in social work draws upon the substance and analytical processes of the social and behavioural sciences and of the humanities. It reflects Memorial University of Newfoundland and the School of Social Work's traditional commitments to serve the people of Newfoundland and Labrador within a global context.

Additional information regarding the School of Social Work is available at [www.mun.ca/socwrk](http://www.mun.ca/socwrk).

Students must meet all regulations of the School of Social Work in addition to those stated in the general regulations. For information concerning fees and charges, admission/readmission to the University, and general academic regulations (undergraduate), refer to **UNIVERSITY REGULATIONS**.

### 3.1 Vision

The School of Social Work strives to strengthen human relationships and promote social justice through academic excellence.

### 3.2 Mission

The School of Social Work promotes social justice by providing social work education, conducting scholarly inquiry, disseminating knowledge and contributing to public policy and practice thereby addressing the needs and aspirations of the local and global communities with whom we collaborate and interact.

## 4 Description of Programs

All courses of the School are designated by the abbreviation SCWK.

### 4.1 Bachelor of Social Work

The Bachelor of Social Work is a full-time program that is offered as a first or a second degree program and is comprised of course work and two practica. The degree qualifies graduates for beginning professional practice in social work settings. The objectives of the liberal education aspect of the undergraduate program includes the achievement of: general knowledge of people and nature, analytical and critical thinking and communication skills and knowledge of social, political and economic impacts in society. The objectives of the undergraduate program are to prepare students to: promote social justice and social well being and creatively challenge oppression; acquire and apply knowledge, skills, values, professional ethics and critical thinking abilities; recognize limitations and strengths as a beginning social work practitioner; integrate reflexively critical self-awareness; assume leadership in collaboration and interdisciplinary practice; utilize and participate in innovative and traditional inquiry and research models; creatively practice with diverse individuals and collectives; promote and critique the social work profession on, regional, provincial, national and global levels; commit to the process of lifelong learning; participate collaboratively and respectfully in innovative teaching and learning processes; and address issues of transition and crisis in diverse contexts (individuals, families, groups, communities, formal organizations and society).

The aim of the program is to develop social workers with generically based skills for working with individuals, families, communities, and groups. Students receive an education which prepares them to work in urban centres and rural settings. A special emphasis is placed on the importance of identifying local needs and developing the means of meeting these needs in the context of available resources.

There is a **Program Residency Requirement** for both the **First** and **Second** Degree programs requiring students to take specific courses on the St. John's campus. Although the majority of courses are taught on-campus, selected courses are occasionally taught by distance format.

#### 4.1.1 Social Work Practica

- In addition to their course work, students are required to complete two supervised 350 hour practica which normally occur in Fall and Winter semesters. Students are expected to be available to engage in the practicum for 28 hours each week during the semester in which the practicum is scheduled.
- Each practicum is to be conducted in a setting and supervised by a qualified field instructor approved by the Field Education Coordinators, in compliance with the CASWE Standards for Accreditation and the relevant provincial legislation governing the practice of social work. Field instructors must possess, as a minimum qualification, a Bachelor of Social Work and/or a Master of Social Work from an accredited social work program plus a minimum of two years post-degree social work employment. Qualifications will be assessed in the case of international practica.
- Students normally are expected to be available for field practica throughout the Province of Newfoundland and Labrador.
- Field practica may be offered in whole or in part outside the normal start and end dates of a semester.
- The Field Education Coordinators are responsible for facilitating appropriate matches among students, field instructors, and field practicum settings. Although consideration will be given to all factors affecting the location and type of practica, final approval of field practica rests with the Field Education Coordinators. Students who refuse a practicum deemed suitable by the Field Education Coordinators may be delayed in their program or prevented from completing their program of study.
- Students are responsible for all costs associated with practica including travel, immunizations, police records/vulnerable sector checks and accommodation.
- Students shall submit an application, including Student Brief Resume, to the Field Secretary in the preceding January for Fall semester field practica and the preceding April for Winter semester field practica.
- Students shall complete agency specific requirements, such as Criminal Record Check, Vulnerable Sector Check, Child Protection Records Check, or Health Check, before starting the practicum. Students unable to meet the agency's requirements may be delayed in their program or prevented from completing their program of study. Students are required to complete and update these requirements in a timely fashion and at their own expense. The requirements and procedures of any given agency may change from time to time and are beyond the control of the University.

#### 4.1.2 Field Practicum Preparation Seminars

In the semesters prior to their first practicum, students are required to participate in six field preparation seminars. These seminars review the field practicum requirements, aid students in writing resumes and preparing for interviews, and discuss ethics, professionalism, and respectful workplaces. Students who do not complete all six seminars may be delayed in starting their practicum.

#### 4.1.3 Bachelor of Social Work Pledge of Professionalism Ceremony

In the Winter semester prior to their first practicum, students are required to participate in the Bachelor of Social Work Pledge of Professionalism Ceremony. Students who do not meet this requirement may be delayed in starting their practicum.

### 4.2 Diploma in Social Work

Pending availability of resources, a program leading to the Diploma in Social Work may be designed for groups of students with particular needs. This program is only offered to cohorts and not individual students. Admission of individual students to a diploma program is competitive and selective. Information about diploma programs can be obtained by contacting the Dean of the School of Social Work.

## 5 Admission/Readmission Regulations for the School of Social Work

In addition to meeting the *UNIVERSITY REGULATIONS* students must meet the admission/readmission regulations for the School of Social Work.

### 5.1 General Information

1. Entry to programs is competitive.
2. Selection of candidates will be based on academic standing, relevant work/volunteer experience, and personal suitability for a career in social work.
3. The School of Social Work depends on the cooperation of community agencies external to the University to provide field practica and instruction to its students. Many of these agencies have a range of requirements, such as a Certificate of Conduct or a Child Protection Records Check, which must be completed before starting the practicum. Students unable to meet these agencies' requirements may be delayed in their program or prevented from completing their program of study. Students are required to complete and update these requirements in a timely fashion and at their own expense. The procedures of any given agency may change from time to time and are beyond the control of the University.
4. As part of the regular quota, a minimum of three seats and up to five percent of the seats per year are available in the Bachelor of Social Work as a First Degree program for applicants of Aboriginal ancestry who have met the minimum requirements for admission to the program. Applicants must provide documentation of Aboriginal ancestry at the time of application.
5. As part of the regular quota, a minimum of three seats and up to five percent of the seats per year are available in the Bachelor of Social Work as a First Degree program for applicants who self-identify as a member of an equity group and who have met the minimum requirements for admission to the program.
6. As part of the regular quota, a minimum of one seat and up to five percent of the seats per year are available in the Bachelor of Social Work as a Second Degree program for applicants of Aboriginal ancestry who have met the minimum requirements for admission to the program. Applicants must provide documentation of Aboriginal ancestry at the time of application.
7. As part of the regular quota, a minimum of one seat and up to five percent of the seats per year are available in the Bachelor of Social Work as a Second Degree program for applicants who self-identify as a member of an equity group and who have met the minimum requirements for admission to the program.
8. Students applying for readmission must meet all admission and promotion requirements of the School of Social Work in effect for the year in which readmission is being sought.

### 5.2 Application Forms and Deadlines

1. The Bachelor of Social Work as a First Degree program commences in the Fall semester. The Bachelor of Social Work as a Second Degree program will normally commence in the Winter semester. The deadline for application for admission is March 1. Students are encouraged to submit their applications as early as possible.
2. Applications received after the deadline and incomplete applications will not be considered.
3. Application forms are available online at [www.mun.ca/socwrk/undergraduate/apply.php](http://www.mun.ca/socwrk/undergraduate/apply.php) annually from mid November to March 1st inclusive.
4. Applicants for readmission to the School of Social Work must submit a School of Social Work application to the Office of the Registrar by March 1 for Fall semester readmission, February 1 for Spring semester readmission, and October 1 for Winter semester readmission. Applications received after these deadlines will be considered only if a place is available in the School of Social Work.
5. All applications for admission or readmission must be submitted to the Office of the Registrar. A complete application package includes an application to the University (for those who have not attended Memorial University of Newfoundland in the three preceding semesters), an application to the School and any other required documentation.

### 5.3 Admission Requirements

#### 5.3.1 First Degree Program

1. To be considered for admission to the Bachelor of Social Work program, applicants must have completed the 30 credit hours of required prerequisite courses outlined below by the end of the Winter semester for the year in which admission is being sought and must achieve at least 65% in each of these required prerequisite courses. These courses and credits must have been taken at Memorial University of Newfoundland or accepted for transfer credit from a recognized university or university college. The 30 credit hours of required prerequisite courses are:
  - 6 credit hours in English
  - Psychology 1000 and 1001
  - Sociology 1000
  - Social Work 1710
  - 12 credit hours in non-social work courses of which at least 6 credit hours must be from the Faculty of Humanities and Social Sciences and/or the Faculty of Science.
2. Applicants must have completed a minimum of 60 hours of verified formal work/volunteer experience in human services.
3. In addition, applicants must have achieved an average of at least 65% in the courses comprising the last 30 credit hours attempted by the end of the Winter semester for the year in which admission is being sought and for which a numeric grade has been assigned.
4. Applicants for admission will be ranked according to their academic performance in addition to other criteria used in the selection process. For further details please refer to the School's website at [www.mun.ca/socwrk/undergraduate/prospective.php](http://www.mun.ca/socwrk/undergraduate/prospective.php).
5. Applicants will not be considered for admission if they have attempted SCWK 1710 twice and failed to receive a grade of 65% or higher.
6. Applicants who complete courses required by the Bachelor of Social Work prior to admission and receive a grade of less than 65% in these courses will be required to repeat the courses upon admission to the program in the semester required by the program.

### 5.3.2 Second Degree Program

The Bachelor of Social Work as Second Degree is a 60 credit hour program intended for candidates who have completed the required courses, meet the academic performance requirements, and have extensive employment and/or formal volunteer experience.

1. To be considered for admission to the Bachelor of Social Work as a Second Degree, applicants must have:
  - been awarded a Bachelor's Degree, or approved (by the end of the Winter semester preceding the academic year in which admission is being sought) for the award of a Bachelor's Degree from a university recognized by Memorial University of Newfoundland;
  - achieved a minimum average of at least 70% in the last 60 credit hours of undergraduate study attempted by the end of the Winter semester preceding the academic year in which admission is being sought and for which a numeric grade has been assigned;
  - completed the 30 credit hours of required prerequisite courses outlined below by the end of the Winter semester preceding the academic year in which admission is being sought and achieved a grade of at least 70% in each of these required prerequisite courses. These courses and credits must have been taken at Memorial University of Newfoundland or accepted for transfer credit from a recognized university or university college. The 30 credit hours of required prerequisite courses are:
    - Social Work 1710
    - 6 credit hours in English
    - Psychology 2010 and 2020 or (2025 and 3 credit hours in Psychology at the 2000 level or above)
    - 6 credit hours in Sociology of which 3 must be at the 2000 level or above
    - 9 credit hours in the Faculty of Humanities and Social Sciences and/or the Faculty of Science at the 2000 level or above.
  - completed 300 hours of verified formal work/volunteer experience in human services
2. Applicants for admission will be ranked according to their academic performance in addition to other criteria used in the selection process.
3. Applicants will not be considered for admission if they have attempted Social Work 1710 twice and failed to receive a grade of 70% or higher.

### 5.3.3 Acceptance Procedures for Admission

1. Applicants for the First Degree program will normally be notified of admission decisions by the end of June. Approved applicants for this program option will be admitted in the Fall semester only.
2. Applicants for the Second Degree program will normally be notified of admission decisions by the end of June. Approved applicants for this program option will normally be admitted in the Winter semester only.
3. The School of Social Work will not defer any admissions to the first or second degree programs.

### 5.3.4 Readmission Requirements

1. In addition to requirements specified in **Admission/Readmission Regulations for the School of Social Work**, applicants for readmission to the Bachelor of Social Work will be assessed for eligibility in accordance with Academic Requirements and Promotion Regulations, in effect for the year in which readmission is being sought, and contingent upon availability of a seat in the semester for which readmission is sought.
2. Students who are absent from the program for more than three years must apply as a new applicant to the School of Social Work and will be required to repeat previously completed social work courses and may be required to repeat previously completed non-social work courses listed in the program.

## 6 Program Regulations

### 6.1 Bachelor of Social Work (as a First Degree)

1. The 120 credit hour Bachelor of Social Work (as a First Degree) requires, 48 non-SCWK credit hours and 72 SCWK credit hours that include two practica as defined in **Table 1 Bachelor of Social Work (as a First Degree)**.
2. Following admission to Year 2, credit hours shall normally be taken in the sequence as set out in **Table 1 Bachelor of Social Work (as a First Degree)**. Students wishing to change the sequence and/or reduce the course load specified for Years 2 - 4 must receive written approval from the Dean of the School. A change in course sequence may result in an extension to the length of time normally required to complete the program.
3. Students must complete the application for Social Work practicum in January for Fall semester and in April for Winter semester.

**Table 1 Bachelor of Social Work (as a First Degree)**

Year / Term	Required Courses	Elective Courses
Year 1 Fall and Winter	6 credit hours in English Psychology 1000 and 1001 SCWK 1710 Sociology 1000	12 credit hours in non-social work elective courses of which at least 6 credit hours must be from the Faculty of Humanities and Social Sciences and/or the Faculty of Science
Year 2 Fall	One of Political Science 1010, 2600, 2800, Sociology 2230 or 2240 Psychology 2010 or Psychology 2020 SCWK 2211 SCWK 230A SCWK 2320 SCWK 2711	
Year 2 Winter	One of Philosophy 2551, 2552, 2553, or 2591 Psychology 2010 or Psychology 2020 (whichever one has not been taken during Fall above) SCWK 230B SCWK 2321 SCWK 2520 3 credit hours in Sociology at the 2000 level or above	
Year 3 Fall	SCWK 3300 SCWK 3311	
Year 3 Winter	Gender Studies 1000 SCWK 3221 SCWK 3521 SCWK 3720 One of Sociology 2250, 2270, 3290 or 3318	
Year 4 Fall	SCWK 4312 SCWK 4313 SCWK 4314 SCWK 4410	3 credit hours from: SCWK 4317 or 4620
Year 4 Winter	SCWK 4302	3 credit hours from: SCWK 4321, 4322, 4323 or SCWK 4820-4829

#### 6.1.1 Program Residency Requirements

Students shall be required to successfully complete all Social Work courses on the St. John's campus except for: SCWK 1710, 3300, 3311, 4302, 4321, 4322, 4323, and 4820-29.

## 6.2 Bachelor of Social Work (as a Second Degree)

1. The 60 credit hour Bachelor of Social Work (as a Second Degree) requires 60 SCWK credit hours including two practica as defined in **Table 2 Bachelor of Social Work (as a Second Degree)**.
2. Following admission, credit hours shall normally be taken in the sequence as set out in **Table 2 Bachelor of Social Work (as a Second Degree)**. Students wishing to change the sequence and/or reduce the course load specified for semesters 1-4 must receive prior written approval from the Dean of the School. A change in course sequence and/or reduction of the course load may result in an extension to the length of time normally required to complete the program.
3. Students must complete the application for Social Work practicum in January for Fall semester practica and in April for Winter semester practica.

**Table 2 Bachelor of Social Work (as a Second Degree)**

Year / Term	Required Courses
Year 1 Semester 1 Winter	SCWK 2211 SCWK 230A SCWK 230B SCWK 2320 SCWK 2520 SCWK 2711 SCWK 4410
Year 1 Semester 2 Spring	SCWK 2321 SCWK 3720 SCWK 4312 SCWK 4313 SCWK 4314
Year 1 Semester 3 Fall	SCWK 3300 SCWK 3311
Year 2 Semester 4 Winter	SCWK 3521 SCWK 4302

### 6.2.1 Program Residency Requirements

Students shall be required to successfully complete all Social Work courses on the St. John's Campus except for: SCWK 1710, 3300, 3311, 3521, and 4302.

## 7 Academic Requirements and Promotion Regulations

### 7.1 General Information

1. The Committee on Undergraduate Studies will determine a student's promotion status at the end of each academic term.
2. Once a student has been accepted into the Bachelor of Social Work degree, these regulations shall apply upon commencement of courses in the first semester of the program to the completion of the degree.
3. In addition to meeting the academic requirements and promotion regulations for the School all students must meet the general academic regulations (undergraduate). For further information refer to **UNIVERSITY REGULATIONS - General Academic Regulations (Undergraduate)**.

### 7.2 Promotion Status

A student's promotion status at the end of each term will be in one of the following three categories:

#### 7.2.1 Clear Promotion

Clear Promotion means that a student can proceed to the next term without restrictions. Clear Promotion will be given to a student

- who has completed the academic term with a numeric grade of at least 65% in each course in the program.
- who has completed a practicum with a letter grade of PAS (pass).
- who has maintained professional behaviour consistent with the current Code of Ethics of the Canadian Association of Social Workers and the Suitability for the Profession Policy & Procedures of the School of Social Work.

#### 7.2.2 Probationary Promotion

Probationary Promotion means that a student has not received a **Clear Promotion** and must meet certain conditions to obtain Clear Promotion. A student can only receive Probationary Promotion once in the Bachelor of Social Work program. Each of the following violations are mutually exclusive, meaning one violation is sufficient for a student to receive Probationary Promotion. Probationary Promotion will be given to a student

- who has completed the term with a numeric grade of less than 65% in one course in the program. The student must repeat the course within three academic terms from the unsuccessful completion and obtain a numeric grade of at least 65%. The student will not be permitted to repeat more than one course in the program.
- who behaves in a manner that breaches the current Code of Ethics of the Canadian Association of Social Workers and/or the Suitability for the Profession Policy & Procedures of the School of Social Work but for which the School considers that withdrawal from the program is not warranted.

### 7.2.3 Promotion Denied

Promotion Denied means that a student has not received either a **Clear Promotion** or a **Probationary Promotion** and must withdraw from the School. A student's eligibility for readmission is governed by conditions detailed below in **Other Information**. The following violations are mutually exclusive, meaning one violation in a term or across the program is sufficient for a student to receive Promotion Denied. Promotion denied will be given to a student:

- who has not met the conditions of probation.
- who has received a numeric grade of less than 65% in more than one course from **Program Regulations, Table 1 Bachelor of Social Work (as a First Degree)** or **Table 2 Bachelor of Social Work (as a Second Degree)**.
- who has received a numeric grade of less than 65% twice in the same course from **Program Regulations, Table 1 Bachelor of Social Work (as a First Degree)** or **Table 2 Bachelor of Social Work (as a Second Degree)**.
- who has conducted him/herself in such a manner as to cause the field agency and a Field Education Coordinator to terminate the practicum or who has voluntarily withdrawn from a field practicum without the prior approval of a Field Education Coordinator and the Committee on Undergraduate Studies.
- who has received a letter grade of FAL (fail) in a practicum.
- who behaves in a manner that breaches the current Code of Ethics of the Canadian Association of Social Workers and/or the Suitability for the Profession Policy & Procedures of the School of Social Work and for which the School considers that withdrawal from the program is warranted.

### 7.2.4 Other Information

1. A student who has been denied promotion and has had to withdraw from the School is eligible for consideration of readmission to the School according to the following three conditions. The student
  - must withdraw from the School for two academic terms before being considered for readmission. A student will normally be readmitted into the term from which promotion was denied. Readmission is contingent upon availability of a seat in the semester for which readmission is sought;
  - must meet readmission deadlines as per **Application Forms and Deadlines**; and
  - will be permitted only one readmission to the School. Once readmitted, the student must meet all conditions for **Clear Promotion** until the completion of the program or withdraw from the School.
2. A student will not be eligible for consideration for readmission to the School if the student has:
  - behaved in a manner that breaches the current Code of Ethics of the Canadian Association of Social Workers and/or the Suitability for the Profession Policy & Procedures of the School of Social Work and for which the School considers that withdrawal from the program is/was warranted.
3. Notwithstanding the above, after three years, a student who was denied promotion and/or withdrew from the School can apply as a new applicant in accordance with Calendar requirements for the year in which admission is being sought. Upon admission, the student will be required to repeat previously completed social work courses and may be required to repeat non-social work courses listed under the **Program Regulations** for the social work program.

### 7.3 Leave of Absence

1. Any student who wishes to withdraw from the program and retain status in the program may do so only with the written approval of the Committee on Undergraduate Studies and for a maximum period of one academic year. A student who wishes to resume studies within this period must notify the Dean in writing three months prior to the beginning of the term in which the student wishes to continue in the program. Students who do not return to the program at the end of their approved leave of absence will be deemed to have left the program.

### 7.4 Student Withdrawal

1. A student may be required to withdraw from the program at any time, on the recommendation of the Committee on Undergraduate Studies, if the student is deemed to have behaved in a manner that breaches the Canadian Association of Social Workers Code of Ethics and/or the School of Social Work Suitability Policy and for which the committee considers that withdrawal from the program is warranted. The Committee on Undergraduate Studies may determine the withdrawal to be conditional or permanent depending on the circumstances precipitating the action.
2. In the case of a conditional withdrawal, the Committee on Undergraduate Studies will determine the duration of the withdrawal and any conditions the student must fulfill during the withdrawal. Upon successful completion of the conditions, the student may be permitted re-entry to the program. Failure to meet conditions may result in a permanent withdrawal.
3. In the case of a permanent withdrawal, the student will not be eligible for future admission/readmission to the Bachelor of Social Work program.
4. A student who voluntarily withdraws from the program prior to the conclusion of the first semester and who wishes to return to the program must re-apply in competition as a new applicant.

## 8 Graduation

Upon meeting the qualifications for the Bachelor of Social Work program a student must apply by the appropriate deadline date to graduate on the prescribed "Application for Graduation" form. This form may be obtained on-line at the Memorial Self Service at [www3.mun.ca/admit/twbkwbis.P\\_WWWLogin](http://www3.mun.ca/admit/twbkwbis.P_WWWLogin). Additional information is available from the Office of the Registrar at [www.mun.ca/regoff/graduation/apply\\_grad.php](http://www.mun.ca/regoff/graduation/apply_grad.php).

## 9 Waiver of School Regulations

Every student has the right to request waiver of School regulations. A student wishing waiver of University academic regulations should refer to **UNIVERSITY REGULATIONS - General Academic Regulations (Undergraduate) - Waiver of Regulations**.

### 9.1 General Information

1. The School reserves the right in special circumstances to modify, alter, or waive any School regulation in its application to individual students where merit and equity so warrant in the judgment of the Committee on Undergraduate Studies of the School.

- All requests must be submitted to the Committee on Undergraduate Studies of the School for consideration.
- A student requesting a waiver of a School regulation must submit the request in writing to the Chair of the Committee on Undergraduate Studies. Medical and/or other documentation to substantiate the request must be provided.
- Any waiver granted does not reduce the total number of credit hours required for the degree.

## 10 Appeal of Regulations

- Any student whose request for waiver of School regulations has been denied has the right to appeal. For further information refer to **UNIVERSITY REGULATIONS - General Academic Regulations (Undergraduate) - Appeal of Decisions**.
- An applicant who has been denied admission has the right to appeal this decision of the Admissions Committee if it is felt by the applicant that the decision was reached on grounds other than those outlined in **Admission/Readmission Regulations for the School of Social Work**. The appeal should be made in writing within fourteen days of the notification of the decision and should be directed to the Dean of the School. The letter should state clearly and fully the grounds for the appeal. If the Dean of the School, in consultation with the Registrar, judges the grounds to be sufficient, the formal appeals mechanism will be initiated.

## 11 Course Descriptions

In accordance with Senate's *Policy Regarding Inactive Courses*, the course descriptions for courses which have not been offered in the previous three academic years and which are not scheduled to be offered in the current academic year have been removed from the following listing. For information about any of these inactive courses, please contact the Dean of the School.

All courses of the School are designated by SCWK.

**1710 Social Work Philosophy and Practice** provides an overview of the historical development, philosophical orientation, basic values, principles and knowledge base, and fields of practice of the profession. The course will examine critical social problems that impact societies with an emphasis on the quest for social justice at local, national and global levels.

CR: the former SCWK 2700

**2211 Diverse Theories for Social Work Practice** provides an overview of critical and practice theories that explain problems and guide the change process. The course will involve students in a critical analysis of a broad range of theories including: Critical theories such as structural, feminist, Marxist, anti-racist, aboriginal, queer, & anti-oppressive practice; modern theories such as interactional, systems, ecological cognitive & crisis theory/intervention; postmodern theories such as solution focussed and narrative; and Macro practice, social action, and community organization.

CO: SCWK 2320 and 2711

PR: SCWK 1710 or the former SCWK 2700

**230A/B Field Practicum Preparation Seminars** expose students to both theoretical and practical aspects of field education in general and the field practicum specifically prior to the first field placement. The seminars will utilize a combination of lectures, guest speakers, panel discussions, and practical exercises to prepare students for their field practicum. This course will be evaluated as PAS or FAL based on attendance, participation, and assignments. In exceptional circumstances, components of this course may be offered outside of semester start and end dates and/or in an accelerated format.

AR: attendance is required

CH: 0

LC: as scheduled

**2320 Social Work Knowledge and Skills for Assessment and Intervention** introduces beginning skills for social work practice. The relevance of relationship based approach, a strengths perspective and an anti-oppressive stance will be considered as students acquire biopsychosocial assessment and interviewing skills. Attention is given to self-awareness, professional identity and a wide range of beginning counselling skills with diverse populations and situations such as: Aboriginal people, involuntary clients, suicide risk, domestic violence, clients in crisis and children at risk.

CO: SCWK 2211 and 2711

CR: the former SCWK 3320, the former 3321 and the former 4310

PR: SCWK 1710 or the former SCWK 2700

**2321 Social Work Knowledge and Skills for Personal and Social Change** addresses knowledge, skills and competencies that enable the social worker to facilitate positive change within the middle and end stages of intervention. Emphasis will be given to a range of current best known practices within the context of clinical and community applications, promotion of social justice, strengths and critical thinking. General practice approaches that may be applied with individuals, families and communities will be emphasized.

CR: the former SCWK 3421

PR: SCWK 2211, 2320 and 2711

**2520 Social Work: Critical Analysis of Social and Health Policy** engages students in critical analysis of local and national social and health policy development from a social work perspective. The course explores topics that are relevant to direct service provision such as: the influence of historical

context on policy, policy development, interactions among federal, provincial and local governments that influence policy and leadership and advocates roles of social workers in program development in a diverse and changing environment.

CR: the former SCWK 2510 and 2710

PR: SCWK 2211, 2320 and 2711 or admission to the second degree program option

**2711 Social Justice and Social Work Practice** explores human rights from global perspective and examines social responsibility, the nature of oppression and marginalization and strategies to promote social justice and prevent injustice. Reflective practice principles and experiential activities will form the basis for examining use of self and the relevance of social location, and the application of: critical theoretical perspectives, critical empathy and ethical evaluation for anti-oppressive practice at the individual and structural/organizational level.

CO: SCWK 2211 and 2320

PR: SCWK 1710 or the former SCWK 2700

**3221 Social Impacts on Human Development** addresses how theories, concepts and information related to human development must be considered in the context of social issues and impacts in order to inform social work practice with vulnerable populations. The impact of issues such as violence, addictions, poverty, trauma and oppression are examined as are strengths and resilience of human beings. Strategies to address social impacts on human development are explored.

CO: SCWK 3521 and 3720

CR: the former SCWK 3211 and the former 3220

PR: SCWK 3300 and 3311

**3230 Cultural Camp** - inactive course

**3300 Social Work Practicum 1** is a 350 hour supervised field experience that provides students with opportunities to apply social work principles, theories and skills to work with clients and communities. The field experience is designed to develop: professional use of self, beginning ability to implement planned interventions with diverse populations and an appreciation for social justice activities.

CH: 12

CO: SCWK 3311

CR: the former SCWK 4315, 4316, 4300, 4325 and 4326

PR: successful completion of all designated Year 2 courses for the first degree program option; or admission to the second degree program option and successful completion of SCWK 230A/B, 2321, 3720, 4312, 4313, and 4314

**3311 Social Work Knowledge and Skills for Integration of Theory and Practice** focuses on application of selected models and methods of practice. The course explores links between theory and practice through critical consideration of: the influence of agency and community, the value of theory and knowledge, the role of self awareness, social location and practice skills. Topics to be explored include: documentation, support/resource counselling, advocacy, self care, vicarious trauma, professional identity, community work, interdisciplinary practice, group work, ethics and consultation.

CO: SCWK 3300

CR: the former SCWK 4310 and 4311

PR: successful completion of all designated Year 2 courses for the first degree program option; or admission to the second degree program option

**3511 Aboriginal People and Social Policy** - inactive course

**3521 Social Work Organizational Development for Community Services** examines policy development and change in human services organizations and their administration. Management and organizational concepts suitable for the administration of social policies and programs are addressed as are ethical and ideological issues for social workers on human service teams. A focus on beginning skills in administration is included for the social worker within a management and leadership context in human services

organizations.

CO: SCWK 3221 and 3720; or SCWK 4302

CR: the former SCWK 3110, the former 3510 and 4111

PR: SCWK 3300 and 3311

### 3530 Aboriginal Social Development - inactive course

**3720 Ethical and Legal Issues in Social Work Practice** examines ethical theories, decision - making models and key legislation in a variety of areas including child welfare, youth justice, privacy, health, human rights to resolve dilemmas in practice. Components of legislation and the Social Work Code of Ethics are analysed to determine approaches to practice dilemmas. Consideration and critical analysis of frameworks for decision making will lead to a personal model for practice choices.

CO: SCWK 3221 and 3521; or SCWK 2321, 4312, 4313, and 4314

CR: the former SCWK 5720

PR: SCWK 3300 and 3311 or admission to the second degree program option

**4302 Social Work Practicum 2** is a 350 hour supervised field experience that provides students with opportunities to apply social work principles, knowledge and skills that demonstrates the capacity for independent practice at micro and macro levels. Emphasis is on developing strong analytical abilities, applying enhanced practice skills, mastering a variety of social work roles, implementing strategies that impact social justice and making professional judgments in increasingly complex situations.

CH: 12

CO: either SCWK 4321, 4322 or 4323 or one of SCWK 4820-4829; or SCWK 3521

CR: the former SCWK 5300, 5301, and 5315-5319

PR: SCWK 4312, 4313, 4314, 4410 and either 4317 or 4620 and successful completion of all designated Year 3 courses or admission to the second degree program option and successful completion of 3300 and 3311

**4312 Social Work Knowledge and Skills for Community Development** emphasizes theory and practice of community organizing and community development within the context of social justice. Frameworks for community practice are critically analysed through examination of ethical dilemmas, accountability issues, practice skills, leadership and other roles. Urban, rural and cultural differences are considered in relation to their influence on effective community organizing and development work.

CO: SCWK 4313, 4314 and 4410; or SCWK 2321, 3720, 4313 and 4314

CR: the former SCWK 5322

PR: SCWK 3221, 3521 and 3720 or admission to the second degree program option

**4313 Social Work Knowledge and Skills for Group and Team Work** introduces students to social work methods and skills in group practice and team work. The design and implementation of diverse group types, evaluative models and the parallels between group and team functions are explored. The characteristics and challenges of interdisciplinary team work are considered as well as effective strategies and unique roles that social workers can contribute for effective team collaboration.

CO: SCWK 4312, 4314 and 4410; or SCWK 2321, 3720, 4312 and 4314

CR: the former SCWK 4320

PR: SCWK 3221, 3521 and 3720 or admission to the second degree program option

**4314 Social Work Knowledge and Skills for Practice with Families** prepares students to offer direct services to families through increasing their knowledge of family functioning and their competence in family assessment and intervention. Critical analysis of models of family intervention and exploration of ethical issues form the basis for application of selected approaches to family work including: structural therapy, solution focussed approach and crisis intervention.

CO: SCWK 4312, 4313 and 4410; or SCWK 2321, 3720, 4312 and 4313

CR: the former SCWK 5325

PR: SCWK 3221, 3521 and 3720 or admission to the second degree program option

**4317 Field of Practice: Child Welfare Prevention, Crisis Intervention and Protection** examines legislation that protects the rights of children, best practice in child welfare and care and protection of children within a community context. Social work intervention with complex issues such as:

family violence, poverty, cultural influences, addictions and mental health impacts are explored through feminist, aboriginal, empowerment and anti-oppressive perspectives. Continuity of care, permanency planning and the impact of separation are addressed through critical analyse of child welfare programs, and care giving models.

CO: SCWK 4312, 4313, 4314 and 4410

CR: the former SCWK 4614

PR: SCWK 3221, 3521 and 3720

**4321 Field of Practice: Social Work in Child Abuse and Protection** is aimed at developing knowledge and social work skills necessary for intake, crisis intervention, assessment, family support, removal, community placement, family reunification, and amelioration, within the context of social justice and the best interest of those most vulnerable for maltreatment and oppression. It addresses child-youth neglect, physical abuse, sexual abuse, emotional abuse, exploitation, problems, risks, needs and harm and includes trauma and developmental impacts.

CO: SCWK 4302

CR: the former SCWK 5328

PR: SCWK 4312, 4313, 4314 and 4410

**4322 Field of Practice: Social Work in Gerontology** reviews aging from a biopsychosocial perspective with an emphasis on the strengths of seniors and the impact of oppression on the lives of the elderly. The course will explore legislation, policies, societal trends and elder abuse, and consider the social work role in developing strategies for healthy aging and service provision for seniors.

CO: SCWK 4302

CR: the former SCWK 4615 and 5615

PR: SCWK 4312, 4313, 4314 and 4410

**4323 Field of Practice: Social Work in Addictions** is aimed at developing knowledge skills, and beginning competence, necessary for assessment and intervention with populations experiencing problems and risks associated with the use and abuse of chemicals and non-chemical addictions throughout the lifespan. Themes addressed include: the oppression of addictions; social determinants of addictions, the social worker's role in the continuum of care; strengths; the special needs of women, aboriginal, and GLBT populations.

CO: SCWK 4302

CR: the former SCWK 4616

PR: SCWK 4312, 4313, 4314 and 4410

**4410 Applied Research and Evaluation for Social Work Practice** teaches theories, concepts and methods of systematic inquiry and its relationship to professional social work judgment and action. The contribution of applied research to social justice, community based inquiry and accountability and evidence based practice is emphasized. Topics to be explored include: quantitative, qualitative, action and evaluative approaches to systematic inquiry for social work practice; ethical considerations in social work research.

CO: SCWK 4312, 4313 and 4314; or SCWK 2211, 2320, 2520, and 2711

CR: the former SCWK 4420 and 4421

PR: SCWK 3221, 3521 and 3720 or admission to the second degree program option

**4620 Field of Practice: Social Work in Interdisciplinary Mental Health and Health Services** provides an overview of mental health and illness, the impact on people and communities and social work interventions within an interdisciplinary community context. The oppression of illness, disability and mental health problems across the lifespan is considered as well as the role of social work in the continuum of care. Topics include: mental health, health, mental illness, disability, social determinants of health, social movements and advocacy.

CO: SCWK 4312, 4313, 4314 and 4410

CR: the former SCWK 4610, 5610 and 5613

PR: SCWK 3221, 3521 and 3720

**4820-4829 Selected Topics in Social Work** may be offered by the School. Students should consult the School for selected topics being offered in a given semester.

CO: SCWK 4302

PR: SCWK 4312, 4313, 4314 and 4410

## 1 The Memorial University of Newfoundland Code

The attention of all members of the University community is drawn to the section of the University Calendar titled **The Memorial University of Newfoundland Code**, which articulates the University's commitment to maintaining the highest standards of academic integrity.

## 2 Student Code of Conduct

Memorial University of Newfoundland expects that students will conduct themselves in compliance with University Regulations and Policies, Departmental Policies, and Federal, Provincial and Municipal laws, as well as codes of ethics that govern students who are members of regulated professions. The *Student Code of Conduct* outlines the behaviors which the University considers to be non-academic misconduct offences, and the range of remedies and/or penalties which may be imposed. Academic misconduct is outlined under **General Regulations - Academic Misconduct** in the University Calendar.

For more information about the *Student Code of Conduct*, see [www.mun.ca/student/conduct](http://www.mun.ca/student/conduct).

## 3 General Information and Regulations Governing All Graduate Students

### 3.1 School Description

Memorial University of Newfoundland's School of Graduate Studies (SGS) is home to over 3,500 graduate students enrolled in over 100 graduate diploma, and master's and doctoral degree programs.

The School is a central agency responsible for the collection, maintenance, and distribution of materials on graduate students. It maintains graduate files and administers graduate applications, admissions, comprehensive examinations, thesis examinations, and doctoral defences. SGS is also responsible for registrarial functions, graduate enrolment management, and recruitment, and administers graduate student funding including assistantships, external and internal scholarships, baseline fellowships, supervisor support, and Tricouncil global payments.

The School assists academic units in developing new program proposals and administers their approval. Through its Academic Council, SGS also provides a forum for representatives from all faculties, schools, and the Graduate Students' Union to discuss matters pertaining to graduate education. The Council ensures maintenance of standards across all graduate programs by considering policies relating to graduate studies, approving regulation changes and appeals, receiving reports from standing and ad hoc committees, and making recommendations on matters affecting graduate studies.

Additional information regarding the School of Graduate Studies is available at [www.mun.ca/sgs](http://www.mun.ca/sgs).

Students must meet all regulations of the School in addition to the **General Regulations**, the Degree Regulations and any additional requirements of the appropriate Department. For information concerning fees and charges refer to **Fees and Charges, UNIVERSITY REGULATIONS**.

### 3.2 Programs

The following graduate diploma and degree programs are offered by Memorial University of Newfoundland. Interdisciplinary study is encouraged by the University, and prospective applicants should make enquiries about their interests from all the areas of study concerned.

#### 3.2.1 Graduate Diplomas

Clinical Epidemiology  
Community Health  
Educational Leadership Studies  
Fisheries Resource Management  
Post-Secondary Studies (Health Professional Education)  
Post Masters Nurse Practitioner  
Safety and Risk Engineering

#### 3.2.2 Graduate Degrees

Master of Applied Science  
Master of Applied Psychological Science (Co-operative)  
Master of Applied Statistics  
Master of Arts  
Master of Arts and Education (Education and Francophone Literatures and Cultures)  
Master of Business Administration  
Master of Education  
Master of Employment Relations  
Master of Engineering  
Master of Environmental Science  
Master of Gender Studies  
Master of Health Ethics  
Master of Marine Studies  
Master of Maritime Management  
Master of Music

Master of Nursing  
 Master of Philosophy  
 Master of Physical Education  
 Master of Public Health  
 Master of Science  
 Master of Science in Boreal Ecosystems and Agricultural Sciences  
 Master of Science in Kinesiology  
 Master of Science in Management  
 Master of Science in Medicine  
 Master of Science in Pharmacy  
 Master of Social Work  
 Master of Technology Management  
 Doctor of Philosophy  
 Doctor of Psychology

### 3.3 Definition and Explanation of Terms Used in this Calendar

#### 3.3.1 Special/Selected Topics Courses

Where a block of courses has been approved under a general heading such as selected topics, special areas, directed readings or like heading, each new course offered from that block of courses shall be approved in advance by the Faculty/School Council (or delegated Graduate Studies Committee). To ensure an orderly use of the courses and non-duplication between course numbers, titles and contents, the Council (or Committee) shall require the same quality and type of information as is needed for the approval of a regular course. (*Consult the School of Graduate Studies or Deputy Registrar for administrative procedures.*)

#### 3.3.2 Dean of Graduate Studies

In all regulations following, reference to "the Dean" refers specifically to the Dean of Graduate Studies.

#### 3.3.3 Credit Hour

A credit hour is the measure used to reflect the relative weight of a given course towards the fulfilment of appropriate degree, diploma, certificate, major, minor, or other program requirements. Normally, a course has a credit value of 3 credit hours. A weight of one credit hour normally means that the course meets for lectures one hour per week for the duration of a semester or two hours per week for the duration of a session. The number of hours of required instruction, outside of lecture time, such as laboratory instruction, tutorials, etc. may or may not impact on the number of credit hours assigned to a particular course and academic units may recommend to the Senate a greater or lesser whole number of credit hours for a particular course.

#### 3.3.4 Graduate Course

1. A graduate course comprises a unit/units of work in a particular subject normally extending through one semester, the completion of which carries credit toward the fulfilment of the requirements for a postbaccalaureate degree, diploma, or certificate.
2. Accelerated courses are not normally permissible in graduate programs.
3. Courses required as part of a graduate student's program are known as program courses. Tuition for such courses is covered by the semester fee.
4. Courses which are not required as part of a graduate student's program are known as non-program courses. Students registering for such courses will be required to pay the appropriate per-course fee.

#### 3.3.5 Policy Governing the Auditing of Courses

1. In order to audit any course, an individual must receive permission from the instructor in that course, the Supervisor/advisor, and the administrative Head of the unit in which the course is offered. Matters to be considered shall include class size, impact on students registered for credit, and other factors judged relevant by the academic unit. Permission cannot be given until the number of registrations for credit is known.
2. Individuals auditing courses shall limit their participation to that deemed appropriate by the instructor; auditors are not permitted to write formal examinations, nor to have their work formally assessed.
3. Students who require a testamur of audition may request the same from the instructor of the course. Students will not register for audit courses nor will a record of audit courses appear on students' transcripts.

#### 3.3.6 Semester

A semester means a period of approximately 14 consecutive weeks during which the University is in regular session and in which period there are at least 12 teaching weeks as defined by the Senate. Normally the Fall semester commences in early September, the Winter semester in early January, and the Spring semester in early May.

#### 3.3.7 Academic Year

The academic year is from September 1 of one year to August 31 of the following year.

#### 3.3.8 Graduate Student

A graduate student is one who has been admitted to a graduate degree or a graduate diploma program.

A full-time graduate student is one who registers as such, devotes full time to his or her academic program and may not commit more than 24 hours a week working time, including teaching assistant or research assistant duties, to matters other than the degree program.

A part-time graduate student is one who is registered for the duration of a semester and is not classified as full-time.

#### 3.3.9 Visiting Graduate Student

1. A student who is registered in good standing in a graduate program at another recognized institution who comes to Memorial University of Newfoundland to conduct research under the supervision of Memorial University of Newfoundland faculty members is considered to be a visiting graduate student. In order to obtain access to University resources such a student will be required to

register each semester of their visit for GRAD 9900 using a Course Change Form.

- To be eligible to register, a visiting graduate student must submit an Application for Admission form to the School of Graduate Studies, accompanied by: a) a letter from their home institution verifying graduate student status, and b) a letter from the host faculty member confirming the duration of the visit. The student will then be admitted to the School of Graduate Studies to a "non-degree" program.
- Visiting graduate students will be exempt from tuition fees. However, all visiting graduate students will be required, as a condition of registration, to purchase health insurance (international students should contact the International Student Advisor, whereas Canadian citizens or permanent residents of Canada should contact the Graduate Students' Union for more information). If a visiting graduate student wishes to register for a course while at Memorial University of Newfoundland, s/he must meet the University admission requirements and pay the undergraduate per course fee as indicated under the **UNIVERSITY REGULATIONS - Fees and Charges** in the University Calendar.

Note: A student enrolled in a graduate program at another university who wishes to complete courses at Memorial University of Newfoundland for transfer of credit to his/her home institution is not considered to be a visiting graduate student under this definition. Such students should apply to the Office of the Registrar for admission to the University, and if admitted, will be governed by **GENERAL ACADEMIC REGULATIONS**. Fees will be assessed in accordance with the fee schedule for undergraduate courses as indicated under the **UNIVERSITY REGULATIONS - Fees and Charges** in the University Calendar.

### 3.3.10 Program

- A program, whether it comprises courses only, courses and comprehensive examination, or courses, internship, project, thesis research, paper folio is defined for each graduate student in accordance with Departmental and University Regulations. Each program of study is recommended by the appropriate academic unit, and must be approved in writing by the Dean of Graduate Studies before the beginning of the graduate student's second year of study.
- Responsibility for the administration of the program shall rest with the Dean acting on behalf of the School.

Note: The following general statements concerning admission and Degree requirements should be supplemented by the detailed regulations governing each program.

### 3.3.11 Collaborative Program Agreements

#### 3.3.11.1 Integrated Pathway Agreements

- Memorial University of Newfoundland supports the establishment of agreements with partner institutions that may lead to the completion of multiple degree programs through an integrated pathway.
- Examples of such agreements include but are not exclusive to 3+1+1 and 3+1+2 arrangements whereby an undergraduate degree is awarded by the partner institution and the graduate degree is awarded by Memorial University of Newfoundland.
- In the 3+1+1 arrangement, a student would complete 3 years of the undergraduate studies at the partner institution, finish the 4th year at Memorial University of Newfoundland, and earn the bachelor's degree at the partner institution. The student would then enroll in and complete a 1-year master's program and earn a master's degree at Memorial University of Newfoundland.
- In the 3+1+2 arrangement, a student would complete 3 years of undergraduate studies at the partner institution, finish the 4th year at Memorial University of Newfoundland, and earn the bachelor's degree at the partner institution. The student would then enroll in and complete a 2-year master's program and earn a master's degree at Memorial University of Newfoundland.
- All such agreements must comply with the general regulations governing undergraduate and graduate programs at Memorial University of Newfoundland.
- Memorial University of Newfoundland's Guidelines for Integrated Pathway Agreements provides details on the method of establishing such an agreement. The Guidelines are available from the School of Graduate Studies.

#### 3.3.11.2 Cotutelle Agreements

- Memorial University of Newfoundland offers graduate students the opportunity to carry out a joint research project through a cotutelle agreement between Memorial University of Newfoundland and another recognized institution. The student would be expected to participate in research and fulfill degree requirements at both institutions. Students who successfully complete all program requirements would earn doctoral degrees from both institutions. Memorial University of Newfoundland's Guidelines for Cotutelle Agreements, approved by the Academic Council of the School of Graduate Studies, provides information on the details on the method of establishing such an agreement and program. The Guidelines are available from the School of Graduate Studies.
- Upon successful completion of the program, Memorial University of Newfoundland and the cooperating institution will each issue its own doctoral degree certificate. On the certificate and subsequently on the university transcript, the following notation will be added: "This Ph.D. was awarded within a cotutelle agreement. The student was jointly enrolled at University XYZ and Memorial University of Newfoundland and successfully completed the degree requirements of both institutions."
- Graduate students interested in this type of program should contact the School of Graduate Studies for further information.

## 4 General Regulations

### 4.1 Qualifications for Admission

#### 4.1.1 Graduate Diploma Programs

To be considered for admission to a Graduate Diploma program the minimum requirements will normally be a second-class degree in an appropriate area of study from a university of recognized standing.

A candidate admitted to a Graduate Diploma program, who has demonstrated to the satisfaction of the appropriate Faculty/School/Department an ability to pursue research at the master's level, may be permitted subsequently to transfer his/her candidature to that of a master's in the affiliated program area and will thereafter be awarded only the master's at the end of his/her candidature.

#### 4.1.2 Master's Programs

To be considered for admission to a Master's program, the minimum requirements will normally be a second-class degree in an appropriate area of study from a university of recognized standing.

In exceptional cases, and upon the recommendation of the appropriate academic unit, students who apply for admission and do not meet the minimum admission requirements to a Master's program described above may be considered for a qualifying year. Academic

units will make recommendations for the qualifying year, including the appropriate courses to take during this period, to the School of Graduate Studies at the time of admission assessment.

#### 4.1.3 Ph.D. and Psy.D. Programs

1. To be considered for admission to a Ph.D. program, the minimum requirements will normally be a Master's degree from a university of recognized standing, in an appropriate area of study. Other students may be considered for admission to a Ph.D. program provided that:
  - a. they have been registered in a Master's program for a minimum of 12 months, and have demonstrated to the satisfaction of the Faculty/School/Department concerned their ability to pursue research at the Doctoral level. Such transfer should take place no later than the 5th semester of the student's Master's program as indicated under **UNIVERSITY REGULATIONS - Fees and Charges** in the University Calendar; or
  - b. they hold a Bachelor's Degree with Honours, or equivalent, from a university of recognized standing, and that the Faculty/School/Department is satisfied of the students' ability to pursue research at the Doctoral level.
2. To be considered for admission to the Psy.D. program, the minimum requirements will normally be an undergraduate honours degree in Psychology that includes senior courses as indicated under the **Regulations Governing the Degree of Doctor of Psychology**.

#### 4.1.4 Applicants Not Meeting Qualifications

Only in exceptional circumstances, and only upon the recommendation of the Faculty/School/Department concerned, will the Dean consider applicants who do not meet the requirements outlined in **Qualifications for Admission, Master's Programs, or Ph.D. and Psy.D. Programs**.

#### 4.1.5 English Proficiency Requirements

Since English is the primary language of instruction at this University, all applicants seeking admission to the School of Graduate Studies must possess an adequate knowledge of written and spoken English as a prerequisite to admission. Regardless of country of origin or of citizenship status, applicants will be required to demonstrate proficiency in the English language. This demonstration may take one of the following forms:

1. Successful completion of the equivalent of three years of full-time instruction in an English language secondary institution as recognized by Memorial University of Newfoundland including successful completion of at least two courses in English at the Grade XII (or equivalent) level. Please note that these courses must be other than English as a Second Language (E.S.L.) courses.
2. Successful completion of a baccalaureate degree from a recognized University where English is the language of instruction and from which transfer of credit may be allowed by Memorial University of Newfoundland.
3. Successful completion of a post-graduate degree program at a recognized University where English is the language of instruction and from which transfer of credit may be allowed by Memorial University of Newfoundland.
4. Submission of official results of the Test of English as a Foreign Language (TOEFL) with a paper-based score of 550 (or higher)/computer-based score of 213 (or higher) or Internet-based with a score of 80 (or higher) and the Test of Written English (TWE) with a score of 4 (or higher).
5. Submission of the official results of the Michigan Test of English Proficiency with a score of 85% (or higher).
6. Submission of the official results of the English Language Testing Service (ELTS) Test with an average band score of 6.5 or higher.
7. Submission of official results of the Canadian Academic English Language (CAEL) Assessment with a minimum score of between 50 and 60 in each of four bands, with at least 2 band scores of 60.
8. Submission of official results of the Canadian Test of English for Scholars and Trainees (CanTEST) with a Band Level 4.5 in the listening comprehension and reading comprehension sub-tests and a score of 4 in writing.
9. Submission of official results of the Pearson Test of English Academic (PTE Academic) with minimum scores of 58 in each of reading, writing, listening, and speaking.
10. Only in exceptional circumstances and only upon the recommendation of the Department/Faculty/School concerned, will the Dean consider applicants who do not meet one of the requirements listed in 1.-9. above.

#### 4.1.6 Additional Requirements

Particular Departments/Faculties/Schools may require greater strength in English communicative skills than is indicated by the achievement of minimum scores outlined in 4., 5., 6., 7., 8., and 9. above. Any such additional requirements are detailed in the appropriate section of the Calendar.

#### 4.1.7 English Language Requirements Subsequent to Admission

1. Students who have been admitted under **English Proficiency Requirements**, Clauses 4.-9. above, will be required to take an English language placement test on arrival at Memorial University of Newfoundland. On the basis of the test results, students may be required to complete successfully a course of language study designed to bring their English, in any or all of listening, speaking, reading, and writing, to a level required for graduate studies. A final assessment of the students' proficiency in these areas will normally be made no later than the end of the third semester following their first registration in the School of Graduate Studies. As a result of this assessment, and in consultation with the student's academic unit and the Department of English, there may be a recommendation for termination of the student's program.
2. Notwithstanding **Additional Requirements** above, if a student's Department is not satisfied with the student's ability to communicate in English, then the student may be required to complete successfully the relevant component(s) of the course of study referred to in **Additional Requirements**. The Department will be required to take this action within three semesters of the student's admission to a graduate program. At the end of this period the Department may recommend, but not require this procedure.

Note: Information regarding the TOEFL program is available on-line at [www.toeflgoanywhere.org/](http://www.toeflgoanywhere.org/). Information regarding the Michigan Test of English is available on-line at [www.michigan-test.com](http://www.michigan-test.com). Information regarding the ELTS Test is available on-line at [www.ielts.org](http://www.ielts.org).

#### 4.1.8 Foreign Degree Transcripts

Students who have completed undergraduate programs at universities which issue documents in languages other than English or French shall submit notarized English translations of all supporting documentation, including, but not limited to, transcripts, degrees, and diplomas.

## 4.2 Procedure for Admission

1. Application for admission to graduate studies must be made online to the School of Graduate Studies at [www.mun.ca/become/graduate/apply](http://www.mun.ca/become/graduate/apply). The application must be supported by an official transcript of the applicant's university record. If the applicant is a graduate of another university or college, a copy of the Calendar of that institution must be included upon request.  
Most graduate programs have September start dates; however, some programs accept students for January and/or May admission. Deadlines for submission of applications can be as early as November for the following September; therefore, applicants should inquire about program start dates and application deadlines of the academic program of interest (see [www.mun.ca/become/graduate/](http://www.mun.ca/become/graduate/)). Non-Canadian applicants should allow four to six months for processing of official documents with Immigration authorities.
2. Admission to graduate studies shall be upon acceptance by the Dean after assessment of the qualifications of the applicant but no candidate will be admitted unless the academic unit of specialization recommends acceptance along with a proposed program of study and a proposed Supervisor or advisor or, where appropriate, a tutor. Successful applicants will be notified by the Dean of Graduate Studies.
3. The applicant may be required to appear for an interview before a final offer of admission is made.
4. It is recommended that the applicant refer to the appropriate section of this Calendar to ascertain if additional testing information or documentation is required when making initial application.
5. The University reserves the right to refuse admission to any applicant.

## 4.3 Registration

### 4.3.1 Program Registration

1. All graduate students must be registered in each semester for the graduate program registration appropriate to their discipline (see note) until all academic requirements for the degree have been met, except during periods for which leaves of absence have been granted (see **Leaves of Absence**).  
Note: e.g., *Linguistics 9000, Chemistry 9000 or, in the case of Medicine, Medicine 9900.*
2. A student registered in a graduate diploma, Master's, Ph.D., or Psy.D. program may not concurrently pursue studies leading to any other degree without the prior approval of the Dean.

### 4.3.2 Program Withdrawal

Students intending to withdraw from their program must inform the Dean of Graduate Studies in writing. The period of withdrawal from a program without incurring liability for that semester's fees is three weeks after the first day of lectures in the semester in question, as stated in the **University Diary**. Requests received after the end of the regular registration period, and approved, will be charged an administration fee (see **Fees and Charges**).

### 4.3.3 Course Registration

Note: *For interdisciplinary programs, the Head of the academic unit is the Dean or Director of the Faculty/School administering the program.*

1. Students will register for courses at the times indicated in the **University Diary**.
2. Students not admitted to a graduate program may enroll in graduate courses with the permission of the Head of the appropriate academic unit.

### 4.3.4 Changes in Course Registrations

Note: *For interdisciplinary programs, the Head of the academic unit is the Dean or Director of the Faculty/School administering the program.*

1. Within two weeks following the first day of lectures in any semester, as stated in the **University Diary**, a graduate student may, upon the approval of the appropriate Head of academic unit, add a course or courses to his or her registration for that semester.
2. Within seven weeks after the first day of lectures in any semester, as stated in the **University Diary**, a graduate student may, upon the approval of the appropriate Head of academic unit, drop a course or courses from his or her registration for that semester without prejudice.
3. After the period described in 2. above has expired, and up until the last day of lectures, any student who is prevented from completing a course by illness, bereavement or other acceptable cause, duly authenticated in writing may, upon the recommendation of the Head of the appropriate academic unit, drop that course without academic prejudice.

Note: *A course cannot be dropped after the last day of lectures without the approval of the Dean of Graduate Studies.*

### 4.3.5 Period of Study

1. Each student in graduate studies shall spend such time in the program as decided by the academic unit of specialization and approved by the Dean, and be subject to the following minimum residency.
  - a. Except where provided for elsewhere in this calendar, each student for a Master's Degree shall normally spend at least two semesters in residence as a graduate student at this University.
  - b. Except where provided for elsewhere in this calendar, each student for a Ph.D. or Psy.D. shall normally spend at least three semesters in residence as a graduate student at this University.
  - c. To be resident as a graduate student of this university a student must be registered as a graduate student at Memorial University of Newfoundland and participate in a community of learners and instructors (formally or informally) who are joined together by the practices and standards of a profession or an academic discipline. For most students this will involve taking courses or engaging in research while resident on campus. These attributes may, however, be found elsewhere and it is possible therefore that the residency requirement may be satisfied in an off campus location. In such cases the Dean of Graduate Studies must be satisfied that the attributes are met.
  - d. Except where provided for elsewhere in this Calendar, each student for a graduate diploma shall normally spend at least one semester in residence as a graduate student at this University.
2. The maximum period of a graduate program shall be seven years beyond first registration.

### 4.3.6 Leaves of Absence

#### 4.3.6.1 General

1. A leave of absence is a period of time during which a student is not required to register; no fees are assessed; and the time granted is not counted in the maximum time period permitted for a graduate program (see **Period of Study**).
2. In the event that circumstances prevent a student from pursuing his/her program, the student may apply to the Dean of Graduate Studies for a leave of absence.
3. A student may normally apply for only one leave of absence during his/her program. The maximum leave of absence shall normally not exceed 12 months.
4. An application for leave will normally be made before the end of the registration period in the first semester for which leave is requested. Requests received after the end of the regular registration period, and approved, will be charged an administration fee (see **Fees and Charges**).

#### 4.3.6.2 Parental

A student may apply for a leave of absence in the case of pregnancy/birth/adoption of a child. (Such leave will be considered separately from 3. above.)

## 4.4 Program Requirements

Note: *Every candidate shall complete a program of study as recommended by the Head of the academic unit, in consultation with the Supervisory Committee and approved by the Dean of Graduate Studies. See **Procedure For Admission, Clause 2.***

### 4.4.1 Graduate Diploma and Master's Programs

1. Candidates should consult the appropriate Department/Faculty/School regulations for information concerning the specific program requirements. Candidates wishing to take individual courses outside of their program of study must seek approval from the Head of their academic unit prior to registration.
2. Graduate diploma programs shall not normally comprise more than 50% of the master's in the same area.

### 4.4.2 Ph.D. and Psy.D. Programs

1. Each candidate is required to pass a comprehensive examination (see **Comprehensive Examinations, Ph.D. and Psy.D. Comprehensive Examination**).
2. Each candidate shall present a thesis embodying the results of original research.
3. Candidates should consult the appropriate Department/Faculty/School regulations for information concerning the specific program requirements. Candidates wishing to take individual courses outside of their program of study must seek approval from the Head of their academic unit prior to registration.
4. Candidates may pursue a specified part of their research elsewhere provided that prior permission has been obtained from the Dean on the recommendation of the Head of the academic unit in consultation with the Supervisory Committee.

### 4.4.3 English Writing Requirement

Given the analytical and scholarly demands of study at the graduate level, graduate students are expected to demonstrate an advanced facility with written English in meeting the demands of their course work and, where applicable, in the writing of any end-of-program research report, folio, comprehensive examination, or thesis.

### 4.4.4 Changes in Programs

Any changes in the candidates's program of studies must be approved by the Dean of Graduate Studies on the recommendation of the appropriate academic unit.

### 4.4.5 Research Involving Animals

Animal user training for any graduate student working with live vertebrate animals is mandated by the Canadian Council on Animal Care as a requirement for institutional accreditation. Supervisors are required to add the names of graduate students requiring such training to the relevant Animal Care Committee-approved research protocol by submitting an amendment form. Where a dedicated protocol will be developed for the student's project, a new protocol form must be submitted. Animal Care Committee approval is required in advance of students commencing animal work. Further information may be obtained by contacting [acs@mun.ca](mailto:acs@mun.ca) or by telephone to (709) 777-6620.

### 4.4.6 Graduate Student Conduct

All graduate students shall adhere to Memorial University's policies and guidelines relating to academic scholarship, integrity, and ethical conduct informing the design, conduct, and reporting of responsible research.

### 4.4.7 Year of Degree and Departmental Regulations

1. A student completing a graduate degree program in the School of Graduate Studies will follow the degree and Faculty/School/Department regulations in effect in the year in which the student first registers for his/her current program. However, students may elect to follow regulations introduced subsequent to their initial registration.

Note: *The foregoing notwithstanding, in the case of students who have submitted a thesis/report/folio, or students in a non-thesis program who have taken a comprehensive examination, the option of changing regulations is no longer available.*

2. When there is doubt as to which degree or Departmental regulations may be followed, the Academic Council of the School of Graduate Studies will decide which are the appropriate regulations.
3. Notwithstanding these guidelines, the University may place limits on the time permitted to complete a program under any given set of regulations. In addition, detailed scheduling of courses and/or work periods may be changed as the University deems appropriate or necessary.

#### 4.4.8 Transfer of Course Credits

All such transfers require the approval of the Dean of Graduate Studies, on the recommendation of the Head of the appropriate academic unit.

1. A student who has successfully completed graduate courses at Memorial University of Newfoundland prior to admission to a graduate program may apply to transfer appropriate courses to that program, provided such courses have not been used to satisfy other Degree requirements.
2. A student who has successfully completed graduate courses as part of one graduate program at Memorial University of Newfoundland, and who is subsequently admitted to another program, may apply to transfer appropriate courses to the current program, provided such courses have not been used to satisfy other Degree requirements.
3. A student who has successfully completed graduate courses at another institution recognized by Senate may, on admission to a graduate program at Memorial University of Newfoundland, apply to transfer appropriate courses to the current program, provided such courses have not been used to satisfy other Degree requirements.
4. Students who successfully complete a graduate diploma program may transfer the course credits earned in that program towards a master's degree if these credits meet the requirements of the master's in the affiliated area in which the graduate diploma was granted.

Affiliated Master's programs for graduate diploma programs currently offered by the School of Graduate Studies are as follows:

##### Education

Graduate Diploma in Post-Secondary Studies (Health Professional Education) - Master of Education (Post-Secondary Studies)

##### Engineering

Graduate Diploma in Safety and Risk Engineering - Master of Engineering

##### Marine Studies

Graduate Diploma in Fisheries Resource Management - Master of Marine Studies (Fisheries Resource Management)

##### Medicine

Graduate Diploma in Clinical Epidemiology - Master of Science in Medicine (Clinical Epidemiology)

Graduate Diploma in Community Health - Master of Science in Medicine (Community Health) and Master of Public Health

5. In programs requiring a minimum of 12 credit hours or more, transfer of credit hours in graduate courses referred to in 1., 2., and 3. above shall not exceed 30% of the total number of credit hours required. In programs requiring fewer than 12 credit hours, a maximum of 3 credit hours in graduate courses referred to in 1., 2., and 3. above shall be considered eligible for transfer.
6. Graduate courses referred to in 1., 2., 3., and 4. above shall not be considered eligible for transfer if they have been completed more than seven years prior to the date of admission into the current program.

#### 4.5 Provision for Waiver of Regulations

Academic regulations notwithstanding, the University reserves the right in special circumstances, to modify, alter or waive any regulation in its application to individual students where, in the judgement of the appropriate University Officer or Committee, there is sufficient justification for doing so.

1. Waivers of course prerequisites/co-requisites may be granted by the Head of an academic unit.
2. Waivers of Departmental regulations may be granted by the Dean of Graduate Studies on the recommendation of the Head of an academic unit.
3. Requests for waiver of a degree or general regulation must be submitted to the Academic Council of the School of Graduate Studies.

#### 4.6 Appeal of Decisions

##### 4.6.1 General Information

1. Every graduate student has the right to appeal decisions resulting from the application of University regulations.
2. Appeals will be considered in the case of health issues, bereavement, and/or other acceptable cause, duly authenticated.
3. For assistance in the appeals process, a student is advised to consult with the School of Graduate Studies.
4. In preparing an appeal a student may consult advisors or facilitators. Such advisors or facilitators may include an international student advisor, a faculty advisor, a counsellor, a representative from the Memorial University of Newfoundland Graduate Students' Union (GSU), or a faculty member who is familiar with the appeals process and who is willing to undertake the role of student advisor or facilitator.
5. Appeals are made before specific committees that exist at the University to provide an objective review of cases. The appeals process is designed to assist students at critical points in their graduate program and to provide an accessible and transparent process for students. Refer also to **Routes of Appeal of Academic Regulations** for information concerning where appeals should be directed.
6. The principles of natural justice shall be applied to the appeals processes and decisions. These principles include, but are not limited to, such practices as all parties to the appeal receiving timely and adequate notice, all parties to the appeal having the opportunity to submit arguments and supporting documentation, and all parties to the appeal being made aware of the evidence considered by the committee. No person will sit in judgment on an appeal if that person has been previously involved in a decision-making process related to the matter under appeal or if that person has any conflict of interest, bias, or reasonable apprehension of bias.
7. While the University makes provision for students to appeal decisions made under University regulations, the academic, financial, or other consequences of the appeal process rests with the student.
8. When an appeal is denied, the student will be advised in writing of the reasons for the decision and if there are further steps that can be taken in the appeals process.
9. A student whose appeal is denied by the Appeals Committee of the School of Graduate Studies may appeal to the Senate Committee on Academic Appeals. Academic units whose decisions are overturned by the Appeals Committee of the School of Graduate Studies may appeal to the Senate Committee on Academic Appeals. Decisions of the Senate Committee on Academic Appeals are final and within the University there is no further appeal.

10. Unless the student bringing the appeal requests otherwise, student appeals are heard anonymously by all committees except the Senate Committee on Academic Appeals.

#### 4.6.2 Routes of Appeal of Academic Regulations

1. Normally, the responsibility for making an appeal before the appropriate committee of the University rests with the student.
2. A student who is ineligible to officially register for courses but who wishes to attend classes, laboratories, or other educational activities while an appeal is in progress can do so only with the written permission of the Head of the academic unit concerned. Such permission will not unnecessarily be withheld.
3. A student whose request for waiver of regulations has been denied may direct the appeal as described below.
  - Appeals against decisions of the Head of an academic unit will be made directly to the Dean of Graduate Studies.
  - Appeals against decisions of the Dean may be made to the Appeals Committee, School of Graduate Studies. Letters of appeal should be directed to the Chair of the Appeals Committee, c/o School of Graduate Studies.
  - Appeals against decisions of the Executive Committee of the Academic Council may be made to the Appeals Committee, School of Graduate Studies. Letters of appeal should be directed to the Chair of the Appeals Committee, c/o School of Graduate Studies.
  - Appeals against decisions of the Appeals Committee, School of Graduate Studies, may be made to the Senate Committee on Academic Appeals, c/o Office of the Registrar.

#### 4.6.3 Route for Questioning Grades of Courses and Examinations

1. Appeals cannot be made on the basis of the grades awarded in individual courses, Comprehensive Examinations, or examinations of theses and reports.
2. Notwithstanding the above, and recognizing that the awarding of grades is an academic matter within the purview of experts in a discipline or subject area, a student who wishes to question the award of grades in individual courses is encouraged to consult with the following in the order given:
  - the course instructor
  - the Head of the appropriate academic unit
  - the Dean of the appropriate Faculty/School, Associate Vice-President (Academic) of the Grenfell Campus or Vice-President of the Marine Institute.
3. A student who wishes to question the grade of a Comprehensive Examination, or the examination of a thesis or report, is encouraged to consult with the Dean of Graduate Studies.

#### 4.6.4 Appeals to the School of Graduate Studies

1. All appeals must be made in writing, clearly stating the basis for the appeal, and must be directed to the Dean or the Chair of the Appeals Committee of the School of Graduate Studies in accordance with **Routes of Appeal of Academic Regulations**.
2. In the Letter of Appeal, the student must clearly and fully provide:
  - name,
  - current address and telephone number,
  - Memorial University of Newfoundland e-mail address,
  - student ID number,
  - the decision being appealed,
  - the grounds for the appeal, and
  - the resolution being sought.
3. When providing grounds for the appeal, including health issues, bereavement and/or other acceptable cause, a student must present independent evidence to corroborate statements made in the Letter of Appeal. Preferably, this evidence will come from a professional, such as a health professional, a counsellor, or a professor. However letters from other knowledgeable parties may be acceptable.
4. A student shall include with the letter of appeal any submissions the student wishes to make in support of the appeal.
5. In cases where an appeal is made on health issues, the student must provide an original certificate from a health professional in the form of a note or a letter. Such a certificate must be sufficiently specific to allow appropriate consideration of the student's case. The certificate must also clearly state that, in the opinion of the health professional, the problem was serious enough to have interfered with the student's work. Students should refer to the policy respecting **Information Required for Certificates from Health Professionals** for more complete information.
6. A student claiming bereavement as grounds must provide an obituary notice or death certificate, together with evidence of a close personal relationship between the student and the deceased.
7. Privacy and Confidentiality: The committees to which appeals are made do require substantial information about the reasons for the appeal in order to make their decisions. However, the committees also recognize each student's right to privacy and their obligations, under the Access to Information and Protection of Privacy Act, to safeguard students' personal information.

#### 4.6.5 Appeals to the Senate Committee on Academic Appeals

1. Appeals shall be initiated by submitting a written Notice of Appeal, c/o Office of the Registrar, containing the following:  
When the Notice of Appeal is from a student:
  - name,
  - current address and telephone number,
  - Memorial University of Newfoundland e-mail address,
  - student ID number,
  - a copy of the decision giving rise to the appeal,
  - supporting documentation,
  - a description of the matter under appeal,

- the grounds of appeal, and
- the resolution being sought.

When the Notice of Appeal is from an academic unit:

- name of representative of the academic unit,
  - Memorial University of Newfoundland e-mail address,
  - a copy of the decision giving rise to the appeal,
  - supporting documentation,
  - a description of the matter under appeal,
  - the grounds of appeal, and
  - the resolution being sought.
2. The Notice of Appeal should include, in writing, relevant information in support of the appeal.
  3. Except with the approval of the Executive Committee of Senate, notices of appeal shall be submitted no later than the last day of classes in the semester following the semester in which the decision under appeal was sent to the student.
  4. In accordance with the principles of natural justice, students and academic units are entitled to make an oral presentation.
  5. Appeals shall be heard either through written submissions only or through an oral hearing, as requested. No inferences will be drawn from the choice.
  6. When appeal is heard by an oral presentation, a student may be accompanied by an advisor (see **Appeal of Decisions, General Information, 4.**). A student may participate in person, by way of teleconference, or by such other means approved in advance by the Committee; however, expenses incurred by the student are the responsibility of the student.
  7. When providing the grounds for the appeal, including health issues, bereavement, and/or other acceptable cause, a student must present independent evidence to corroborate statements made in the Notice of Appeal. Preferably, this evidence will come from a professional, such as a health professional, a counsellor, or a professor. However letters from other knowledgeable parties may be acceptable.
  8. A student may include with the Notice of Appeal any submissions the student wishes to make in support of the appeal.
  9. In cases where an appeal is made on health issues, the student must provide an original certificate from a health professional in the form of a note or a letter. Such a certificate must be sufficiently specific to allow appropriate consideration of the student's case. The certificate must also clearly state that, in the opinion of the health professional, the problem was serious enough to have interfered with the student's work. A student should refer to the policy respecting **Information Required for Certificates from Health Professionals** for more complete information.
  10. A student claiming bereavement as grounds must provide an obituary notice or death certificate, together with evidence of a close personal relationship between the student and the deceased.
  11. Privacy and Confidentiality: The committees to which appeals are made do require substantial information about the reasons for the appeal in order to make their decisions. However, the committees also recognize each student's right to privacy and their obligations, under the Access to Information and Protection of Privacy Act, to safeguard a student's personal information.
  12. Decisions of the Senate Committee on Academic Appeals are final and within the University there is no further appeal.

#### 4.6.6 Information Required for Certificates from Health Professionals

1. A student who requests permission to drop courses, to withdraw from University studies, to have examinations deferred, or to obtain other waivers of University, departmental, or course regulations based on health issues is required by the University to provide, in support of the request, a certificate from a health professional in the form of a note or letter. Such certificates must be sufficiently specific to allow a proper consideration of a student's case. The University requires that all such certificates must be on letterhead, must be signed by the health professional, must confirm the specific dates on which the student visited the health professional, and should include details on the following:
  - the degree to which the health issue (or treatment, in the case of medication, for example) is likely to have affected the student's ability to study, attend classes, sit examinations, or continue with research;
  - the length of time over which the student's abilities were likely hampered by the condition (e.g., recurring and severe back pain over a two-month period would likely have a more adverse effect on studies than a single episode of back pain requiring bed rest for a week); and
  - the fitness of the student to resume studies (it is in the student's best interest not to return to studies prematurely).
2. The University respects the privacy of students and will keep confidential all such certificates. A student should request that the health professional retain a copy of such a certificate in case the certificate needs to be verified or reissued at a later date.

## 4.7 Evaluation

Note: For interdisciplinary programs, the Head of the academic unit is the Dean or Director of the Faculty/School administering the program.

### 4.7.1 Evaluation Methods and Grading

1. Students shall write their examinations in graduate courses at a time to be determined by the Head of the academic unit on the recommendation of the Faculty member(s) concerned.
2. A written copy of the course outline, including method of evaluation in the course, shall be provided to each student in the course as early as possible, and in any case not later than two weeks after the start of the course.
3. The final evaluation submitted to the Registrar shall consist of one of the following letter grades with the appropriate numerical equivalent:

Letter Grades	Numeric Grades	Points Per Credit Hour
A	80-100%	4
B	65-79%	3
C	55-64%	2
D	50-54%	1
F	below 50%	0
PWD (pass with distinction) - indicates excellent performance	no numeric grade	not applicable
PAS (pass) - indicates performance meets expectations	no numeric grade	not applicable
FAL (fail) - indicates failing performance	no numeric grade	not applicable
DR (drop) - drop without academic prejudice	no numeric grade	not applicable
DRF (drop fail) - drop with academic prejudice	0%	0
ABS (absent) - absent for acceptable cause	no numeric grade	not applicable
INC (incomplete) - incomplete pending final grade	no numeric grade	not applicable
REX (re-examination)	no numeric grade	not applicable

4. Supplementary examinations are not permitted.

### 4.7.2 Evaluation of Graduate Students

1. Failure to attain a final passing grade of A or B in a program course shall lead to termination of a student's program unless:
  - a. the regulations for a particular degree allow the student to repeat the course. Only one such repeat will be permitted in a student's program. Failure to obtain a grade of A or B in the repeated course shall lead to termination of the student's program.
  - b. the Dean of Graduate Studies approves a repeat of the course, upon the recommendation of the Supervisor and the Supervisory Committee supported by the Head of the academic unit, where 1.a. above does not apply. Such recommendations must provide sufficient grounds for a repeat. Only one such repeat will be permitted in a student's program. Failure to obtain a grade of A or B in the repeated course shall lead to termination of the student's program.

Note: In exceptional circumstances, the Dean of Graduate Studies may approve a substitute course in place of the repeat upon the recommendation of the Supervisory Committee and Supervisor supported by the Head of the academic unit. Failure to obtain a grade of A or B in the substituted course shall lead to termination of the student's program.

2. Failure in a non-program course will not normally result in termination of a student's program.
3. The Supervisor and the Supervisory Committee may recommend that a candidate be required to withdraw from the program, if after consultation with the candidate, the candidate's non-course work is deemed to have fallen below a satisfactory level.
4. When Departmental requirements for a degree requires an examination of a candidate's reading knowledge of a language(s) other than English, the examination shall be set and marked by the appropriate language Department, or by an authority as determined by the Head of the academic unit and Dean. The results of the examination will be transmitted to the candidate by the Dean.

### 4.7.3 Deferral of Examinations

1. Graduate students who are prevented by illness, bereavement or other acceptable cause, duly authenticated, from writing final examinations may apply, with supporting documents within one week of the original examination date to the appropriate Head of the academic unit to have their examinations deferred.
2. The Department's decision, including information on the appeals route open to the student in the case of a negative decision, must be communicated in writing to the student and to the Dean of Graduate Studies within one week of the receipt of the student's complete application.
3. In those cases where the Department accepts the extenuating circumstances the student may be permitted to write a deferred examination or, with the consent of both the Department and the student, the grade submitted may be based on term work alone.
4. An interim grade of 'ABS' will be assigned by the academic unit in the case of a student granted a deferred examination. This grade will be replaced by the final grade which must be received by the Office of the Registrar within one week following the commencement of classes in the next academic semester or session.
5. Students who are prevented by illness or bereavement or other acceptable cause, duly authenticated, from writing a deferred examination, may apply, in writing, with supporting documents within one week of the scheduled date of the deferred examination to the appropriate Department Head to have the examination postponed to a time not later than the last date for examinations in the semester following that in which the student was enrolled in the course.
6. The Department's decision, including information on the appeals route open to the student in the case of a negative decision, must be communicated to the Registrar, to the student and to the Dean of Graduate Studies within one week of the receipt of the student's complete application.

#### 4.7.4 Incomplete Grades/Change of Grade

1. For good cause a grade of 'Incomplete' may, with the approval of the appropriate Department or academic unit, be submitted. This 'Incomplete' grade shall, however, be valid only for one week following the commencement of classes in the next academic session as stated in the **University Diary**. In the event that a mark has not been received by the Registrar within the prescribed deadline, the 'Incomplete' grade shall be changed to '0 F'.
2. Clause 1. notwithstanding, for acceptable cause an extension of time not exceeding the end of the semester following that in which the 'Incomplete' was given may be permitted by the Head of the academic unit. "Acceptable cause" in these cases must be duly authenticated and will be illness, bereavement, serious problems of a personal nature or the like.
3. Changes in grades for graduate courses must be submitted on the appropriate form, which must be signed by the course instructor and approved by the Head of the appropriate academic unit who will submit such changes to the Registrar.

Note: A grade of less than 65% cannot be changed without the approval of the Dean of Graduate Studies.

#### 4.7.5 Re-Reading of Examination Papers

1. Students may apply to have a final examination paper re-read whether or not they have obtained a passing grade in that course.
2. Students who wish to have a final examination paper re-read must make written application to the Registrar enclosing a fee of \$50.00 per paper within one month of the release by the University of the grade reports. If the mark is raised after re-reading, the fee is refunded. If the mark is unchanged or lowered, the fee is forfeited.

### 4.8 Comprehensive Examinations

#### 4.8.1 Master's Comprehensive Examination

1. The composition of the Comprehensive Examination Committee is specified in the Degree and Departmental regulations, and the Committee is appointed by the Dean. The Dean of Graduate Studies or delegate may exercise the right to attend. All members of the Committee including the Chairperson, but excluding the Dean of Graduate Studies, shall be voting members.
2. In this examination the candidates must demonstrate an advanced knowledge of the academic discipline as defined by the academic unit in which they are students. Therefore, in order to be eligible to sit the examination, all course requirements must be completed.
3. In cases where there are multiple parts to a comprehensive exam, including written and oral parts, a candidate must satisfy all parts of the examination to obtain a pass. The requirements to advance to a later part of the examination are specified in the Degree and Departmental regulations or by the appropriate academic unit.
4. Members of the Comprehensive Examination Committee shall decide the results of the comprehensive examination as indicated in a.-d. below:
  - a. The category of 'pass with distinction' will be awarded to candidates who demonstrate superior knowledge of their chosen field. This category requires unanimous support of the Comprehensive Examination Committee.
  - b. The category of 'pass' will be awarded to candidates who demonstrate an acceptable knowledge of their chosen area and requires a simple majority vote.
  - c. The category of 're-examination' selects those candidates with an understanding of their research area that lacks sufficient depth and scope as indicated by a simple majority of the Comprehensive Examination Committee. Only one such re-examination is possible and students in this category are not eligible for the award of 'pass with distinction'. If a re-examination is to be held, it must be conducted not less than one month and not more than six months after the first examination. The decision of the voting members of the Committee following this re-examination can only be 'pass' or 'fail' decided by simple majority. Failure will lead to immediate termination of the candidate's program. There is no option for further re-examination.
  - d. Students awarded a 'fail' are deemed, by unanimous vote of the Comprehensive Examination Committee, to be unable to demonstrate an adequate understanding of their research area. The candidate's program is terminated. A simple majority vote will default to the award of 're-examination'.
5. The Chairperson of the Comprehensive Examination Committee shall report to the Head of the academic unit who shall report to the Dean. The result of the comprehensive examination(s) shall be reported to the candidate by the Dean.

#### 4.8.2 Ph.D. and Psy.D. Comprehensive Examination

1. The candidate shall submit to a comprehensive examination, which may be written or oral or both as determined by the academic unit. Candidates shall normally take the examination no later than the end of the seventh semester in the doctoral program. Unless an extension is approved by the Dean of Graduate Studies, failure to take the examination at this time will result in the termination of the candidate's program.
2. This examination, whether written or oral, shall be conducted by a Committee appointed by the Dean of Graduate Studies on the recommendation of the academic unit. It shall consist of the Head of the academic unit (or delegate) who shall be the Chairperson, the candidate's Supervisor [or, where a Supervisor has not yet been appointed, the Graduate Officer or Chair of the Graduate Studies (or equivalent) Committee], the Dean of Graduate Studies (or delegate), and at least three other members, the total voting members to be an odd number. All members of the Committee including the Chairperson, but excluding the Dean of Graduate Studies, shall be voting members.
3. In this examination, the candidate must demonstrate a mastery of those sub-disciplines appropriate to his/her research area, as defined by the academic unit in which he or she is a student. Those sub-disciplines upon which the candidate will be examined should be made known to the candidate no later than three months prior to the examination. The candidate must further be able to relate the specialization of his/her research to the larger context of these sub-disciplines.
4. In cases where there are multiple parts to a comprehensive exam, including written and oral parts, a candidate must satisfy all parts of the examination to obtain a pass. The requirements to advance to a later part of the examination are specified in the Degree and Departmental regulations or by the appropriate academic unit.
5. Members of the Comprehensive Examination Committee shall decide the results of the comprehensive examination as indicated in a.-d. below:
  - a. The category of 'pass with distinction' will be awarded to candidates who demonstrate superior knowledge of their chosen field. This category requires unanimous support of the Comprehensive Examination Committee.
  - b. The category of 'pass' will be awarded to candidates who demonstrate an acceptable knowledge of their chosen area and requires a simple majority vote.
  - c. The category of 're-examination' selects those candidates with an understanding of their research area that lacks sufficient depth

and scope as indicated by a simple majority of the Comprehensive Examination Committee. Only one such re-examination is possible and students in this category are not eligible for the award of 'pass with distinction'. If a re-examination is to be held, it must be conducted not less than one month and not more than six months after the first examination. The decision of the voting members of the Committee following this re-examination can only be 'pass' or 'fail' decided by simple majority. Failure will lead to immediate termination of the candidate's program. There is no option for further re-examination.

- d. Students awarded a 'fail' are deemed, by unanimous vote of the Comprehensive Examination Committee, to be unable to demonstrate an adequate understanding of their research area. The candidate's program is terminated. A simple majority vote will default to the award of 're-examination'.
6. The Chairperson of the Comprehensive Examination Committee shall report to the Head of the academic unit who shall report to the Dean. The result of the comprehensive examination(s) shall be reported to the candidate by the Dean.

## 4.9 Supervision

### 4.9.1 Master's Candidates

Each Master's candidate shall be assigned a Supervisor by the Dean, on the recommendation of the Head of the academic unit, or the Dean of the faculty concerned.

### 4.9.2 Ph.D. and Psy.D. Candidates

1. Each candidate shall be assigned a Supervisor by the Dean, on the recommendation of the Head of the academic unit or the Dean of the faculty concerned.
2. A Supervisory Committee shall be appointed for each candidate by the Dean. The Supervisory Committee shall consist of the Supervisor (co-supervisors) who shall act as Chair, and normally at least two other members. In no circumstances may the Committee membership be fewer than two members. The membership of the Committee shall be nominated by the Head of the Department or the Dean of the faculty concerned, after consultation with the Supervisor and the candidate.
3. The Supervisory Committee shall forward its reports and recommendations to the Dean via the Head of the Department or the Dean of the faculty concerned.
4. The functions of the Supervisory Committee shall be, *inter alia*,
  - a. to decide, in consultation with candidates, the program of study, the subject of research, and the title of the thesis, and to recommend these for approval to the Dean;
  - b. to monitor the candidate's progress in their course programs and their research;
  - c. to report at least annually to the Dean on the candidates' progress and, at the same time, to advise on their continuation in the program; and to make such other reports and recommendations about the candidates to the Dean as it may deem necessary;
  - d. to recommend to the Dean, after consultation with the candidates, necessary changes in the program of study, the subject of research, or the title of the thesis;
  - e. to recommend to the Head of the academic unit or Dean of the faculty the timing of the comprehensive examination;
  - f. to report to the Dean that the thesis is ready for examination by completing a Supervisor Approval Form, which is to accompany the thesis upon its submission to the School of Graduate Studies; and
  - g. to recommend to the Dean suitable persons to act as members of the Thesis Examining Board.

### 4.9.3 Supervisory Reports

1. At least annually, the Supervisor, Supervisory Committee or the Department shall make evaluations of a student's progress in a program. Recommendations concerning continuation, amendment, or termination (see **Termination of a Graduate Program**) of a candidate's program, are sent to the Dean, who shall take appropriate action. Students shall be advised of the contents of this evaluation and the subsequent recommendation(s).
2. The Supervisor, Supervisory Committee, or the Department shall forward its reports and recommendations to the Dean via the Head of the academic unit or the Dean of the faculty concerned.

## 4.10 Theses and Reports

### 4.10.1 Thesis/Report Guide Supplement

The Guidelines for Theses and Reports, available at ([www.mun.ca/sgs/go/guid\\_policies/theses.php](http://www.mun.ca/sgs/go/guid_policies/theses.php)), approved by the Academic Council of the School of Graduate Studies, provides the details for the examination process, general form and style of the thesis/report, required forms, number of copies, etc., required under this regulation.

### 4.10.2 Submission

1. Candidates must submit the thesis/report at least four months before the University Convocation at which the award of the Degree is expected (see **University Diary** in current edition of University Calendar for exact date). The School of Graduate Studies does not accept any responsibility for completing the prescribed procedure in time for the nearest Convocation unless theses or reports are submitted by the prescribed dates in any current academic year.
2. A thesis/report may not be submitted until the candidate has fulfilled:
  - a. All course requirements, if any
  - b. All language requirements, if any
  - c. The comprehensive examination, if required, and
  - d. All other academic requirements of the academic unit concerned.

### 4.10.3 Evaluation of Master's Theses and Reports

1. Final examiners for the thesis/report will be appointed by the Dean on the recommendation of the academic unit. There will be two examiners for a Master's thesis. Examiners shall normally be those who have completed a graduate degree at the doctoral level, including a thesis, in the discipline or cognate area. Those serving as examiners shall not have been involved in the preparation of the thesis/report.

2. Examination of the thesis/report will result in one of the following recommendations by each examiner. The thesis/report is:
  - a. acceptable without modifications; or
  - b. acceptable, modifications are required but the thesis does not have to be re-examined\*; or
  - c. unacceptable, the thesis/report requires modification and re-examination\*\*; or
  - d. totally unacceptable, the thesis/report is failed.\*\*\*

\*Modifications may include corrections of typographical errors and errors in nomenclature, improvement in phrasing, or rewriting of sections of the thesis/report. Modifications may be indicated in the text or listed separately;

\*\*Modifications might include (but are not limited to) the rectification of one or more of the following deficiencies: (1) misinterpretation and/or misuse of the matter covered, omission of relevant materials, unfounded conclusions, illogicality of argument, improper analysis of data and the like, (2) bad writing, (3) unacceptable physical presentation. A detailed list of problems should be included with the report;

\*\*\*A detailed list of the reason(s) for failure must be included in the report.

3. If all examiners recommend that the thesis/report is totally unacceptable, then the thesis will be failed, and shall not be re-examined.
4. If an examiner recommends that the thesis/report is unacceptable, and this recommendation is accepted by the Dean, then the student may apply to the Dean for permission to resubmit the thesis for re-examination in one of the following ways:
  - a. to submit a modified thesis/report to the original examiners.
  - b. to submit a modified thesis/report to new examiners.
  - c. to submit the original thesis/report to an Examination Board to be appointed by the Dean.
5. If a thesis/report is re-examined, the candidate will not be awarded a pass unless all examiners find the thesis acceptable.
6. Under no circumstances may a thesis/report be re-examined more than once.

#### 4.10.4 Evaluation of Ph.D. and Psy.D. Theses

Candidates for the Degree of Doctor of Philosophy and the Degree of Doctor of Psychology must submit a written dissertation deemed acceptable by the University, and demonstrate their ability to defend their work in a public oral examination. For this reason, the final decision on whether a candidate will be recommended for the award of the degree is made only at the conclusion of the oral examination (see **The Examination Process**).

##### 1. Responsibilities of the Thesis Examining Board

The work of each candidate will be assessed by a Thesis Examining Board. Its first responsibility is to determine whether the thesis successfully demonstrates the candidate's competence to undertake independent research work. The Board must be satisfied that the work contributes significantly to knowledge in the field of study; that the contribution is of high scholarly merit; that the candidate is aware of the pertinent published literature; that it is written in a satisfactory style; and that it is free from typographical and other mechanical errors. The second responsibility of the Board is to conduct a final oral examination of the candidate and to then recommend to the Dean of Graduate Studies whether the candidate should be awarded the Degree.

##### 2. Composition of the Thesis Examining Board

The members of the Thesis Examining Board will be appointed by the Dean on the recommendation of the Head of the academic unit who will have consulted with the supervisory committee. The Board shall consist of four members. Normally these will be the candidate's Supervisor (who serves on the Board in a non-voting capacity), two examiners from within the University, and one from outside the University. However, when circumstances warrant, a second external examiner may be substituted for one of the internal examiners with permission of the Dean. Examiners shall normally be those who have completed a graduate degree at the doctoral level, including a thesis, in the discipline or cognate area. Members of the supervisory committee other than the Supervisor are ineligible for appointment to the Board. Those serving as examiners shall not have been involved in the preparation of the thesis/report.

##### 3. The Examination Process

- a. The voting members of the Board shall submit written reports on the thesis containing an assessment of the quality of the written work and a recommendation as to whether the candidate should be permitted to proceed to an oral examination and defence of the work. An examiner may recommend:
  - i. that the candidate be allowed to proceed to the oral defence of the thesis\*; or
  - ii. that the candidate not be allowed to proceed to the oral defence at this time\*\*; or
  - iii. that the candidate should be failed.

\*Any suggested corrections or revisions should be outlined in the examiner's report. It is understood that it will be the responsibility of the Supervisory Committee to discuss the suggested changes with the candidate, to determine which should be incorporated in the thesis before its final submission.

\*\*This recommendation reflects the examiner's opinion that further research, re-analysis of data, or thorough rewriting of the material is required. The thesis may, however, be re-submitted for examination.

- b. If all examiners recommend that the candidate should be failed, then the thesis shall not be re-examined.
- c. If an examiner recommends that the candidate not be allowed to proceed to the oral defence, and this recommendation is accepted by the Dean, then the student may apply to the Dean for permission to resubmit the thesis for re-examination in one of the following ways:
  - i. to submit a modified thesis to the original examiners.
  - ii. to submit a modified thesis to new examiners.
  - iii. to submit the original thesis to an Examination Board to be appointed by the Dean.
- d. No candidate will be permitted to re-submit a thesis more than once. In case of a re-submitted thesis an examiner may recommend only:
  - i. that the candidate be allowed to proceed to the oral defence of the thesis; or
  - ii. that the candidate should be failed.
- e. After receiving the reports from all three voting members of the Board the Dean will consider the recommendations and determine whether an oral defence of the thesis will be scheduled.
- f. The Final Oral Examination and Defence of Thesis will take place at a time and place to be determined by the Dean of Graduate Studies and will be chaired by the Dean or his/her delegate. The presence of all members of the Examining Board is normally required.

- g. Following the defence, the Board will meet *in camera* to render a final assessment of the thesis and the candidate's ability to defend his/her work. The Board may recommend one of the following outcomes:
- i. Passed with distinction (Awarded to candidates who demonstrate superior knowledge of their chosen field; this category requires unanimous support of the Board. A simple majority vote will result in a recommendation of 'passed'.)
  - ii. Passed\*
  - iii. Passed Subject to Conditions\*\*
  - iv. Re-examination required\*\*\*
  - v. Failed\*\*\*\*
- \*This recommendation may have attached to it the requirement that the candidate complete certain specified revisions to the satisfaction of the Supervisory Committee, the Head of the academic unit and the Dean. These revisions must have been specified in the written appraisal submitted prior to the Oral Examination.
- \*\*This recommendation is made if there are revisions beyond those specified in the written appraisal submitted prior to the Oral Examination. This recommendation must have the conditions attached and cannot include the option of re-examination.
- \*\*\*The members of the Thesis Examination Board may attach to this recommendation a list of any requirements which they feel are appropriate.
- \*\*\*\*Re-examination not permitted.
- h. If the members of the Board are unanimous in their recommendation, the Chair of the Examination may accept this recommendation and inform the candidate of the decision. In any other case, however, the delivering of any final decision shall be deferred pending further consultation within the School of Graduate Studies.
- i. No candidate shall be permitted more than two Oral Examinations.

#### 4.10.5 Time Limit for Revision

The final version of Master's, Ph.D., and Psy.D. theses/reports found acceptable with or without corrections shall be submitted to the School of Graduate Studies within 6 months of the date on which the thesis/report and the student's examiners' reports are returned to the student's academic unit. If a corrected thesis/report is not submitted within 6 months the student is considered to have withdrawn from the program. After this time, the student must apply to be readmitted.

Master's, Ph.D., and Psy.D. theses/reports requiring re-examination shall be resubmitted to the School of Graduate Studies within 12 months of the date on which the thesis/report and the examiner's reports are returned to the student. Students requiring resubmission and re-examination of theses/reports must maintain their registration during this period. Failure to resubmit the revised thesis/report within 12 months will result in termination of the student's program.

Note: Please refer to **Registration** for regulations governing program registration.

#### 4.10.6 Prepublication

Publication of material before submission of the thesis/report for examination is permitted. The School of Graduate Studies and Supervisor should be informed of such publication.

### 4.11 Graduation Procedure

Candidates expecting to graduate at any particular Convocation must apply on-line on the prescribed "Application for Graduation" form to the Office of the Registrar at least by the time of the submission of the Thesis, Project Report, or Internship Report required by their program, or, if applicable, by the date of the final comprehensive examination. This form may be obtained online at the Memorial Self Service at [www3.mun.ca/admit/twbkwbis.P\\_WWWLogin](http://www3.mun.ca/admit/twbkwbis.P_WWWLogin). Additional information is available from the Office of the Registrar at [www.mun.ca/regoff/graduation/apply\\_grad.php](http://www.mun.ca/regoff/graduation/apply_grad.php).

### 4.12 Academic Misconduct

#### 4.12.1 Principles

In the course of a graduate degree program a student is expected to adhere to those principles which constitute proper academic conduct. Within the University community there is a collective responsibility to maintain a high level of scholarly integrity. Dishonesty has no place in the academic community. Academic misconduct cannot be condoned or even appear to be condoned. A student has the responsibility to ascertain those actions which could be construed as dishonest or improper. Certain flagrant violations are listed below under **Academic Offences**. A student is reminded that for guidance on proper scholarly behaviour he/she should seek assistance from his/her instructors and supervisors. The Graduate Students' Union will provide a student with information on his/her legal rights and the information that advice about acceptable writing standards is available through the Writing Centre.

#### 4.12.2 General Information

1. These procedures shall apply to all academic offences relating to graduate studies involving, but not limited to, those students who either have been or who are enrolled at Memorial University of Newfoundland. Notification of an allegation of academic misconduct will be forwarded to the last known mailing address of the student as noted on the files at the Office of the Registrar, and to the official University email address of the student. The University reserves the right to implement action under these procedures where an allegation has been made against a student but where reasonable efforts to contact the student are unsuccessful.
2. Meetings and interviews stipulated in this regulation will be held in person, or at a distance using telephone or other interactive technologies.
3. A student who wishes to pursue research, or to attend classes, laboratories or other educational activities while an investigation under these procedures is being carried out, can normally do so with the understanding that if the allegation of academic misconduct is proven and the penalty involves either suspension or expulsion, credit will not be granted for work completed prior to a finding of guilt. This provision excludes a student charged with an offence under the *Code of Student Conduct*. For information regarding the *Code of Student Conduct* contact the Office of Student Affairs and Services.
4. Although a student can continue in a program of studies, if eligible, while an investigation under these procedures is being carried out, the University does not accept liability for any consequences to the student's progress. However, the University may take these consequences into account, as appropriate and to the extent feasible, in cases where charges are dropped or the student is not found guilty. The consequences arising from an investigation and any negative decision rendered may include retroactive effects on grades, examination results, or promotion within a program.

- A student accused of academic misconduct may consult advisors or facilitators. Such advisors may include a representative from the Graduate Students' Union, an international student advisor, a faculty advisor, a University counselor, or a faculty member who is familiar with these Regulations and who is willing to undertake the role of advisor whether resolution is sought through **Procedures for Resolution of Alleged Academic Offences at the Unit Level** or **Procedures for Resolution of Alleged Academic Offences by the School of Graduate Studies**.

#### 4.12.3 General Procedure

- When a member of the University community (faculty, staff, student) has grounds for belief that an academic offence has been committed there should be an attempt between the parties concerned to resolve allegations of minor offences. If the alleged offence is not deemed to be minor by the accuser, or resolution proves impossible, or one party is dissatisfied with the resolution, the matter shall be reported, without delay, to the Head (or other appropriate officer) of the academic or administrative unit. If resolution is achieved and it is agreed that an academic offence has been committed, then the offence, together with the penalty applied, shall be reported to the Head of the academic or administrative unit.
- Where resolution is not achieved, and if in the judgment of the Head of the academic or administrative unit, the alleged offence warrants resolution at the unit level, the individuals involved will be advised to attempt to resolve the matter through **Procedures for Resolution of Alleged Academic Offences at the Unit Level**. In the event that no resolution is possible through these procedures between the individual parties, the Head of the academic or administrative unit will institute proceedings through the School of Graduate Studies.
- If, in the judgment of the Head of the academic or administrative unit, the alleged offence against University regulations is such as to warrant resolution through the School of Graduate Studies, the Head of the academic or administrative unit will refer the matter to the Dean, and **Procedures for Resolution of Alleged Academic Offences by the School of Graduate Studies** will be implemented.
- Cases involving alleged offences on comprehensive examinations, examination of theses, allegations of impersonation, or allegations of submission of forged documents will be governed by the **Procedures for Resolution of Alleged Academic Offences by the School of Graduate Studies**. Such cases may be initiated by the Head of the academic or administrative unit, or by the School of Graduate Studies.
- In all cases, it is the responsibility of the academic or administrative unit to ensure that fairness and impartiality are achieved in the treatment of students.
- Where an allegation of academic misconduct relates to research and the Tri-Agency Framework: Responsible Conduct of Research, as amended from time to time, (the Framework) applies, these procedures shall be applied in a manner consistent with the minimal requirements of the Framework.

#### 4.12.4 Academic Offences

In the following section the plural shall be deemed to include the singular. Academic offences shall be deemed to include, but shall not be limited to, the following:

- Cheating:** This includes copying from another student's work or allowing another student to copy from one's own work; consulting with any unauthorized person during an examination or test, or using unauthorized aids; or knowingly recording or reporting false empirical or statistical data. The work referred to includes presentations, examinations, theses, assignments, work term reports, projects, laboratory assignments, laboratory reports, internship reports, or any other tests or evaluations which are to be used in judging the student's performance in a course or program of study; or any special tests which the University may offer; or in any presentations or publications related to academic work.
- Impersonation:** Impersonating another student or allowing oneself to be impersonated. By impersonation is meant the imitation of a student or entrance into an arrangement with another person to be impersonated for purposes of taking examinations or tests or carrying out laboratory or other assignments.
- Plagiarism:** Plagiarism is the act of presenting the ideas or works of another as one's own. This applies to all material such as theses, essays, laboratory assignments, laboratory reports, work term reports, design projects, seminar presentations, statistical data, computer programs, and research results. The properly acknowledged use of sources is an accepted and important part of scholarship. Use of such material without acknowledgment, however, is contrary to accepted norms of academic behaviour. Information regarding acceptable writing practices is available through the Writing Centre at [www.mun.ca/writingcentre](http://www.mun.ca/writingcentre).
- Theft of examination papers or other material:** By theft is meant obtaining by improper means examination papers, tests, or any other such material.
- Use and/or distribution of stolen material:** The use of material which the student knows to have been improperly obtained and/or the distribution of such material is considered to be an academic offence.
- Submitting false information:** This offence includes falsifying, submitting or causing to submit false academic transcripts, forms or records, credentials, medical or other certificates, or making a false or incomplete declaration to the University.
- Submitting work for one course, project or publication which has been or is being submitted to another course, project or publication without express permission to do so:** This includes the presentation of an essay, report, or assignment to satisfy some or all of the requirements of a course when that essay, report, or assignment has been previously submitted or is concurrently being submitted for another course without the express permission of the professor(s) involved.
- Ethical Practice:** Failure to follow relevant University/Faculty/School guidelines on ethics, including but not limited to, ethical practice in research.
- Failure to follow the **Memorial University of Newfoundland Code**.

#### 4.12.5 Procedures for Resolution of Alleged Academic Offences at the Unit Level

##### 4.12.5.1 General Information

These procedures will not be applied to cases involving alleged offences on comprehensive examinations, examination of theses, allegations of impersonation or allegations of submission of forged documents. Such alleged offences are governed by the **Procedures for Resolution of Alleged Academic Offences by the School of Graduate Studies**.

The principle that a resolution should be mutually satisfactory to both the accuser and the accused should be upheld throughout the attempt for resolution at the unit level.

##### 4.12.5.2 Explanation of Procedures

If, upon receiving a report of an alleged academic offence, the Head of the academic or administrative unit decides that an attempt

should be made to resolve that matter at the unit level the following procedures shall apply:

1. Normally within one week of notification, the Head of the academic or administrative unit shall request a meeting with the accuser and the accused and at the meeting the Head of the academic or administrative unit shall state the allegation, review the **Procedures for Resolution of Alleged Academic Offences at the Unit Level** including the range of applicable penalties, and arrange a second meeting between the accuser and the accused only.
2. At the second meeting the accuser and accused shall endeavour to obtain a mutually satisfactory resolution of the matter.
3. The accuser and accused shall report jointly to the Head of the academic or administrative unit on the result of their second meeting.
4. If the report is of a resolution which the Head of the academic or administrative unit considers to be fair and equitable the matter shall be considered closed. If the Head of the academic or administrative unit considers the reported resolution to be unfair and/or inequitable he or she will endeavour to obtain an alternative satisfactory resolution directly with the parties.
5. Should all reasonable efforts to obtain a mutually satisfactory resolution at the unit level fail, the Head of the academic or administrative unit will refer the case to the Dean of Graduate Studies and shall inform the accuser and the accused accordingly. From this stage onward by the **Procedures for Resolution of Alleged Academic Offences by the School of Graduate Studies** will apply.
6. At any stage of the **Procedures for Resolution of Alleged Academic Offences at the Unit Level**, the student or the accuser may ask that the case be referred to the Dean, and thereafter the **Procedures for Resolution of Alleged Academic Offences by the School of Graduate Studies** will apply.
7. Should the accused be found guilty, a brief description of the offence and the penalty(ies) applied shall be forwarded by the Head of the academic or administrative unit to the School of Graduate Studies.

#### 4.12.5.3 Failure to Appear or Respond

1. If at any stage of the **Procedures for Resolution of Alleged Academic Offences at the Unit Level**, the accused fails to respond to a charge, without reasonable cause, within two weeks of notification of an allegation, action may be taken on the charge in the absence of the accused.
2. If at any stage of the **Procedures for Resolution of Alleged Academic Offences at the Unit Level**, the accuser fails to appear at a scheduled meeting to defend an allegation, without reasonable cause, the action will be dismissed.

#### 4.12.5.4 Penalties in the Case of Resolution at the Unit Level

A student who has been found guilty of an academic offence will be subject to a penalty or penalties commensurate with the offence. Some cases may warrant more than one penalty for the same offence, and previous academic misconduct will be taken into account in determining the severity of penalties. The range of penalties and their determination is:

1. **Resubmission** of work with appropriate reduction in grade: will allow a student to complete and submit the work a second time.
2. **Reprimand**: This shall be in the nature of a warning in writing by the Head of the academic or administrative unit to the student that his/her conduct has been unacceptable to the University.
3. **Reduction of grade**: A reduction of grade will apply to an examination, test, or assignment to which an offence is relevant, or to the entire course, and will be decided by the Head of the academic or administrative unit. Since graduate students must obtain a grade of B or PASS in required courses, a reduction of grade could lead to termination of program.

### 4.12.6 Procedures for Resolution of Alleged Academic Offences by the School of Graduate Studies

#### 4.12.6.1 General Procedure

If the matter cannot be resolved following the **Procedures for Resolution of Alleged Academic Offences at the Unit Level**, or if, in the opinion of the Head of the academic or administrative unit, the allegation involves a major breach of University regulations, or in cases involving alleged offences on comprehensive examinations, thesis examinations, allegations of impersonation, or allegations of submission of forged or falsified documents, the following **Procedures for Resolution of Alleged Academic Offences by the School of Graduate Studies** shall apply.

#### 4.12.6.2 Explanation of Procedures

1. If the Head of the academic or administrative unit (in consultation with the Dean of his or her faculty or school) is satisfied that the student has a serious case to answer, that person shall inform the student in writing of the nature of the case against him or her. In addition, the Head of the academic or administrative unit shall report to the Dean of Graduate Studies who will, normally within one week, appoint as an investigator a member of the Academic Misconduct Investigations Board of the School of Graduate Studies (Investigations Board). The investigator will interview separately the accuser and accused and relevant witnesses. At these interviews, the investigator, the accuser, the accused, and relevant witnesses all have the right to be accompanied by a registered student or a member of the faculty or staff of the University.
2. Upon completion of these interviews, the investigator shall submit a written report of all findings to the Dean of Graduate Studies. The Dean of Graduate Studies shall present this report to both the accuser and accused for perusal and comment. Once in receipt of this report, the accuser and accused shall have two weeks in which to submit to the Dean of Graduate Studies any additional comments on the report that the person wishes to be considered. The investigator will be given the opportunity to correct any errors of fact should they arise from the comments of the accused and accuser prior to consideration of the allegation by the Investigations Board.
3. Upon receipt of all information from the investigator as well as comments from the accuser and accused, the Dean of Graduate Studies shall present the documents to the Chair of the Investigations Board.
4. The report shall be reviewed by a panel of three members of the Investigations Board for a decision.
5. Once a vote is taken, should the accused be found guilty, the Investigations Board shall take appropriate action in accordance with **Penalties in the Case of Resolution by the School of Graduate Studies**.

#### 4.12.6.3 Failure to Appear or Respond

1. If at any stage of the **Procedures for Resolution of Alleged Academic Offences by the School of Graduate Studies**, the accused fails to respond to a charge, without reasonable cause, within two weeks of notification of an allegation, action may be taken on the charge in the absence of the accused.
2. If at any stage of the **Procedures for Resolution of Alleged Academic Offences by the School of Graduate Studies**, the

accuser fails to appear at a scheduled interview to defend an allegation, without reasonable cause, the action will normally be dismissed; however, the investigation may proceed at the discretion of the Dean in consultation with the Investigations Board if the allegation or evidence warrants such action.

#### 4.12.6.4 Penalties in the Case of Resolution by the School of Graduate Studies

A student who has been found guilty of an academic offence will be subject to a penalty or penalties commensurate with the offence. Enforcement of penalties resulting from **Procedures for Resolution of Alleged Academic Offences by the School of Graduate Studies** will be overseen by the Registrar. Some cases may warrant more than one penalty for the same offence, and previous academic misconduct will be taken into account in determining penalties. Penalties shall be imposed on the basis of the student's status at the time of the offence. The range of penalties and their determination is:

1. **Reprimand:** This shall be in the nature of a warning in writing by the Investigations Board to the student that his/her conduct has been unacceptable to the University.
2. **Reduction of Grade:** A reduction of grade will apply to an examination, test, or assignment to which an offence is relevant, or to the entire course, and will be decided by the Investigations Board. Since a passing grade for graduate students is at least a grade of B or Pass, a reduction of grade could lead to termination of program.
3. **Change in Outcome of an Examination:** This will apply to Comprehensive Examinations and the examination of **Theses and Reports** and could lead to termination of program.
4. **Probation:** This is a trial period the length of which will be determined by the Investigations Board. The Investigations Board will inform the student that the finding of any further academic offence during the period of probation may lead to suspension or expulsion.
5. **Suspension:** Suspension will apply to a course, department, faculty, school, or the University. The period of suspension will be determined by the Investigations Board and shall not exceed three consecutive semesters, and shall be part of the allowable time for a graduate program.
6. **Expulsion:** The recommendation for expulsion from the University will be made by the Investigations Board to the President for his/her final decision. Prior to the President's decision, the Investigations Board will notify the accused, in writing, of the recommendation for expulsion from the University. The accused will be allowed a period of two weeks following the date of release of such notification to lodge an appeal before the President's final decision concerning expulsion from the University. Any such appeal should be made in writing or email to the Senate Committee on Academic Appeals, c/o the Office of the Registrar.
7. **Rescinding of Degree:** The recommendation for rescinding of a degree previously awarded by the University will be made by the Investigations Board of the School of Graduate Studies to Senate for a final decision. Prior to Senate's decision, the Investigations Board of the School of Graduate Studies will notify the accused, in writing, of the recommendation for rescinding of the degree. The accused will be allowed a period of two weeks following the date of release of such notification to lodge an appeal before the Senate's final decision concerning the rescinding of the degree. Any such appeal should be made in writing to the Senate Committee on Academic Appeals, c/o Office of the Registrar.

#### 4.12.7 Transcript Entries Related to Penalties

Transcript entries shall relate to the penalty(ies) imposed as follows:

Penalty	Transcript Entry
Reprimand	No transcript entry
Reduction of Grade	Entry of final grade for course
Change in Outcome of an Examination	Entry of final outcome for the examination
Probation	"On probation at the University for academic misconduct until Day, Month, Year"*
Suspension	"Suspended from the School of Graduate Studies for academic misconduct until Day, Month, Year"*
Expulsion	"Expelled from the University for academic misconduct"
Rescinding of Degree	"Degree rescinded for academic misconduct"

\* The transcript entries for 'probation' or 'suspension' will be removed entirely upon the expiration of the penalty.

#### 4.12.8 Disposition of Documentation

The disposition of documents relating to allegations under these procedures shall be as follows:

1. The cases where the allegation was either found "not proven" or "unfounded" no documentation shall be retained in the student files.
2. In the case of a resolution effected through **Academic Misconduct - General Procedure or Procedures for Resolution of Alleged Academic Offences at the Unit Level**, a brief description of the offence and the penalty(ies) applied shall be forwarded by the Head of the academic or administrative unit to and retained by the School of Graduate Studies, separate from the student files.
3. In the case of a resolution effected through the **Procedures for Resolution of Alleged Academic Offences by the School of Graduate Studies**, all documentation shall be retained in the School of Graduate Studies, separate from the student files.

#### 4.12.9 Right of Appeal

Appeals against decisions of the Investigations Board of the School of Graduate Studies made under **Procedures for Resolution of Alleged Academic Offences by the School of Graduate Studies** shall be directed to the Senate Committee on Academic Appeals, c/o Office of the Registrar.

#### 4.13 Termination of a Graduate Program

Grounds for termination of a graduate program are as follows:

1. a. Failure to comply with the conditions of admission into a program, unless the conditions of admission have been changed with approval of the academic unit and the School of Graduate Studies;

- b. Failure to register in any semester by the final date for adding courses (see **Registration, Program Registration 1.**);
  - c. Failure to obtain the required grades in courses as stated in the appropriate degree regulations (see **Evaluation**);
  - d. Failure in comprehensive examinations (see **Comprehensive Examinations**);
  - e. Demonstrated lack of progress in a program supported by written documentation;
  - f. Recommendation of the Supervisory Committee (see **Supervision**);
  - g. Failure of Thesis, Project, or Internship (see **Theses and Reports**);
  - h. Academic misconduct as outlined under **General Regulations, Academic Behaviour** governing the School of Graduate Studies.
2. The foregoing notwithstanding the University reserves the right to require students to discontinue their program or to deny them admission where, in the opinion of the Academic Council of the School of Graduate Studies, following appropriate professional consultation, there is a reasonable likelihood that a student's health or conduct could result in endangering the lives, health, or safety of other persons on campus or in settings related to the student's university studies.
  3. The foregoing notwithstanding, the School of Graduate Studies reserves the right to require students to discontinue their studies, or to deny them re-admission, where a student has been determined to have engaged in unprofessional conduct. The code of ethics of each profession will serve as the guideline as to what constitutes unprofessional conduct. However, should there not be any statements of what constitutes unprofessional conduct, the following standard will apply:  
Unprofessional Conduct: That conduct which involves a breach of the duties required by professional ethics.

Notes: 1. *If the University or a School or Faculty requires a student to discontinue his/her studies under any of the above clauses, that student must be advised in writing of the nature of the case against him/her and must be advised of the right to appeal before the penalty imposed takes effect.*

2. *Appeals against actions taken under Clause 2. should be directed to the Senate of the University. Any such appeal should be made in writing clearly stating the basis for the appeal and should be directed to the Secretary of Senate, c/o Office of the Registrar.*

3. *Appeals against actions taken under Clause 3. should be directed to the Appeals Committee, School of Graduate Studies.*

#### 4.14 Provision for Reapplication

1. A student whose program of studies has been terminated for any of the reasons outlined under **Termination of a Graduate Program** may apply for admission to a new program of studies leading to the same degree.
2. Notwithstanding the above, a student whose program of studies has been terminated under **Termination of a Graduate Program, 1.b.**, shall be readmitted to the existing program only under the following conditions:
  - a. on the recommendation of the appropriate academic unit;
  - b. on the payment to the University of those registration fees which would have been payable had the student remained in continuous registration during the period since the termination of the program;
  - c. on the understanding that the time period during which the student was not registered shall be considered as part of the maximum time permitted for the completion of the degree.

## 5 Regulations Governing the Degree of Master of Applied Science

www.engr.mun.ca

**Professor and Dean of Engineering**

G. Naterer

The Degree of Master of Applied Science (M.A.Sc.) is a course-based Degree offered in three areas: Computer Engineering, Environmental Systems Engineering and Management, and Oil and Gas Engineering. For information on the research-focused Master of Engineering program, refer to the regulations governing the Degree of Master of Engineering.

### 5.1 Industrial Internship Option

The Faculty permits graduate students to undertake internships of work in industry. These internships will allow students to either (a) enhance the application of their knowledge and skills within industry, or (b) complete a research project defined by the industry. Encouragement to undertake an internship will be given only where it is clear that one of these expectations can be met.

Students registered in the M.A.Sc. program may, with the permission of their Board of Studies, the Dean of the Faculty of Engineering and Applied Science, and the Dean of Graduate Studies, select the Industrial Internship Option. Students pursuing this option must satisfy the degree regulations for an M.A.Sc. program. In addition, students in the Industrial Internship Option:

1. shall normally complete at least 18 credit hours of the courses required for their program with an average of 75% or higher prior to the internship; the remaining required courses may be taken on campus or by distance
2. shall normally spend at least two continuous semesters on campus on a full-time basis as a graduate student at this University
3. shall normally spend 4 to 8 months of their program at an internship in industry
4. shall submit monthly reports to a university supervisor appointed by their Board of Studies, and shall submit a concise progress report to their Board of Studies no later than the end of each semester while on an internship
5. shall normally not opt out once the internship starts.

### 5.2 Computer Engineering

#### 5.2.1 Program of Study

1. The Faculty of Engineering and Applied Science offers a course-based program in Computer Engineering leading to the Degree of Master of Applied Science (M.A.Sc.) in Computer Engineering. The program is available only on a full-time basis.
2. The program is offered by the Faculty of Engineering and Applied Science and will be administered by a Board of Studies appointed by the Dean of Engineering and Applied Science.

#### 5.2.2 Qualifications for Admission

1. Admission to the program is limited and competitive.
2. To be eligible for consideration for admission, applicants will have at least a second class engineering degree in computer engineering, computer science or electrical engineering; they will have background in many of the following areas: object-oriented

programming, data structures, digital logic, computer organization, circuits and electronics, systems and signals, communications, discrete mathematics, probability and statistics and engineering design.

- To be eligible for consideration for admission, applicants will meet the English Proficiency Requirements described under **English Proficiency Requirements**.

### 5.2.3 Degree Requirements

- The degree program requires the completion of 36 credit hours, 6 of which comprise a project course.
  - Students are required to complete 9801, 9859, 9861, 9865, 9867, 9871, 9874, and 9876.
  - Three elective courses must be selected; each term the Board of Studies for the program will provide a selection of eligible courses, which may include ENGI 9821, ENGI 9822, ENGI 9868, ENGI 9869, ENGI 9872, ENGI 9875, ENGI 9877, ENGI 9878, ENGI 9879, ENGI 9880/83, ENGI 9888/91, CS 6752, CS 6756, PHYS 6102, and others designated by the Board of Studies for the program.
  - Based on their academic background, students may be required to complete additional courses at the undergraduate level.
- Normally students will take courses as shown in **Table 1**. Students wishing to take courses in another sequence must request approval from the Board of Studies for the program.

**Table 1 M.A.Sc. in Computer Engineering Program**

	Preparation	Core	Elective		
Year 1 Spring	English	3	0		
Year 1 Fall					
Year 1 Winter				2	1
Year 2 Spring				2	1
Year 2 Fall				ENGI 9801	1

### 5.2.4 Evaluation

Students must obtain a grade of at least 65% in all program courses to receive credit for the course towards their program requirements. Any student who fails to receive 65% or more in a course must repeat the course in the case of core courses, or must either repeat or replace the course with another program course in the case of elective courses. Only two such repetitions/replacements shall be permitted in the student's program. Should a grade of less than 65% be obtained in a repeated or replacement course, the student shall be required to withdraw from the program.

### 5.2.5 Courses

980A/B Computer Engineering Project  
 9802/05 (excluding 9804) Special Topics in Computer Engineering  
 9806/09 Special Topics in Communications Engineering  
 9821 Digital Signal Processing  
 9822 Nonlinear Digital Image Processing and Analysis  
 9859 Computer Engineering Fundamentals  
 9861 High-Performance Computer Architecture  
 9865 Advanced Digital Systems  
 9867 Advanced Computing Concepts for Engineering  
 9868 ASIC Design  
 9869 Advanced Concurrent Programming  
 9871 Information Theory and Coding  
 9872 Digital Communications  
 9874 Software Design and Specification  
 9875 Embedded and Real-Time Systems Design  
 9876 Advanced Data Networks  
 9877 Computer and Communications Security  
 9878 Wireless and Mobile Communications  
 9879 Formal Specification and Development  
 9880-83 Special Topics in Computer Engineering  
 9888-91 Special Topics in Communications Engineering  
 Computer Science 6752 Applications of Computer Graphics  
 Computer Science 6756 Digital Image Processing  
 Physics 6102 Optics and Photonics

## 5.3 Environmental Systems Engineering and Management

### 5.3.1 Program of Study

- The Faculty of Engineering and Applied Science offers a program in Environmental Systems Engineering and Management (ESEM) leading to the Degree of Master of Applied Science. The program is available on a full-time or part-time basis.
- The program is offered by the Faculty of Engineering and Applied Science and will be administered by a Board of Studies appointed by the Dean of Engineering and Applied Science.

### 5.3.2 Qualifications for Admission

- Admission is limited and competitive.
- To be considered for admission, applicants shall normally hold a minimum second class Bachelor's Degree in engineering preferably in civil, environment, chemical, processing, or petroleum engineering, or in a related discipline from a university of recognized standing.
- To be eligible for consideration for admission, applicants will meet the English Proficiency Requirements described under **General Regulations, English Proficiency Requirements**.

### 5.3.3 Degree Requirements

1. The Degree program requires the completion of 30 credit hours.
  - a. 6 credit hours comprising a project course 960A/B.
  - b. 15 credit hours comprised of 9601, 9609, 9626, 9627, and 9628.
  - c. 9 credit hours (three courses) to be selected from 9603, 9605, 9610-9615, 9621, 9622, 9624, 9625, 9629, 9630, Environmental Science 6001, Environmental Science 6002, Environmental Science 6003, and Geography 6250

### 5.3.4 Evaluation

Students must obtain a grade of at least 65% in all program courses to receive credit for the course towards their program requirements. Any student who fails to receive 65% or more in a course, must repeat the course in the case of core courses, or must either repeat or replace the course with another program course in the case of elective courses. Any student who receives a grade of less than 65% in two courses or in a repeated course will be required to withdraw from the program.

### 5.3.5 Courses

960A Environmental Engineering Project (0 credit hours)  
 960B Environmental Engineering Project (6 credit hours)  
 9601 Environmental Pollution and Mitigation (*cross-listed as Environmental Science 6004*)  
 9603 Environmental Sampling and Pollutant Analysis (*cross-listed as Environmental Science 6005*)  
 9605 Water and Wastewater Treatment  
 9609 Environmental Risk Assessment (*cross-listed as Environmental Science 6007*)

 Environmental Science 6003 Applied Ecology  
 Geography 6250 Conservation of Natural Resources

## 5.4 Oil and Gas Engineering

### 5.4.1 Program of Study

1. The Faculty of Engineering and Applied Science offers a program in Oil and Gas Engineering leading to the degree of Master of Applied Science in Oil and Gas Engineering (M.A.Sc.(OGE)). The program is available on a full-time basis.
2. The program is offered by the Faculty of Engineering and Applied Science and will be administered by a Board of Studies appointed by the Dean of Engineering and Applied Science.

### 5.4.2 Qualifications for Admission

1. Admission is limited and competitive.
2. To be considered for admission, applicants shall normally hold a minimum second class Bachelor's Degree in engineering preferably in mechanical, chemical/process, civil, environmental, mining/mineral, or petroleum engineering, or in a related discipline from a university of recognized standing.
3. To be eligible for consideration for admission applicants will meet the English Proficiency Requirements described under **General Regulations, English Proficiency Requirements**.

### 5.4.3 Degree Requirements

1. The degree program requires the completion of 30 credit hours.
  - a. 6 credit hours comprising a project course Engineering 910A/910B.
  - b. 15 credit hours by completing Engineering 9110, 9113, 9114, 9118 and 9121.
  - c. 9 credit hours (three courses) to be selected from Engineering 9002, 9015, 9111, 9112, 9116, 9117, 9119, 9120, 9420, 9609, 9624, 9625, 9901, 9902, 9989. Engineering 9117 is a recommended elective course for students without adequate background in petroleum engineering.

### 5.4.4 Evaluation

Students must obtain a grade of at least 65% in all program courses to receive credit for the course towards their program requirements. Any student who fails to receive 65% or more in a course must repeat the course in the case of core courses, or must either repeat or replace the course with another program course in the case of elective courses. Any student who receives a grade of less than 65% in two courses or in a repeated course will be required to withdraw from the program.

### 5.4.5 Courses

9002 Ocean Engineering Structures  
 9015 Ocean Engineering Hydrodynamics  
 910A OGE Project Course (0 credit hours)  
 910B OGE Project Course (6 credit hours)  
 9110 Advanced Petroleum Production Engineering  
 9111 Well Testing

9112 Multiphase Flow  
 9113 Phase Behaviour of Petroleum Reservoir Fluids  
 9114 Advanced Reservoir Engineering  
 9116 Reliability Engineering  
 9117 Offshore Petroleum Geology and Technology  
 9118 Advanced Drilling Engineering  
 9119 Compact Process Equipment Design  
 9120 Advanced Natural Gas Engineering  
 9121 Advanced Safety, Risk and Reliability Modeling  
 9420 Engineering Analysis  
 9609 Environmental Risk Assessment  
 9624 Air Pollution  
 9625 Environmental Impacts of Offshore Oil and Gas Operations  
 9901 Fundamentals of Fluid Dynamics  
 9902 Advanced Transport Phenomena  
 9989 Special Topics Course - Corrosion Principles, Prevention and Control

## 6 Regulations Governing the Degree of Master of Applied Psychological Science (Co-operative)

[www.mun.ca/science](http://www.mun.ca/science)  
[www.mun.ca/psychology](http://www.mun.ca/psychology)

### Professor and Dean of Science

M. Abrahams

This program is designed to meet the needs of both students and employers. Students will gain the skills and knowledge necessary to ask appropriate questions and conduct research in a variety of applied settings (e.g., business, government, health care, etc.). Students completing the program will be qualified for either immediate employment or further education. Students' and employers' needs will be met by a program that combines training in basic scientific methods and social psychological theory with practical experience in a variety of work settings. The training in methods and theory will be provided by the academic component of the program and the practical experience will be provided by the cooperative, work term component.

### 6.1 Qualifications for Admission

1. Admission to the program is competitive and selective. To be considered for admission to the Master of Applied Psychological Science (Co-operative) an applicant shall normally hold at least a high second class Honours degree or its equivalent, both in achievement and depth of study, from an institution recognized by the Senate.
2. Applications
  - a. All applicants are required to submit results from the General section of the Graduate Record Examinations.
  - b. Applicants are required to submit with their applications an example of their academic writing. This could include, but is not limited to, papers submitted in class, honour's thesis, etc.
  - c. At least one letter of reference should come from someone who is familiar with the applicant's research capability.
3. Election will be based on an applicant's overall academic performance, scores on the Graduate Record Examination and letters of reference.
4. Admission to the program shall be upon acceptance by the Dean of Graduate Studies after recommendation by the Head of the Department of Psychology which will include a proposed program of study and a proposed Supervisor.

### 6.2 Program of Study

1. Students should note that it is possible to enter Academic Term 1 only in the Fall semester commencing in September of each year.
2. Every candidate shall complete four Academic Terms in the Cooperative Program and shall normally be required to complete two Work Terms.
3. Academic and Work Terms normally alternate as follows:  
 Academic Term 1, Academic Term 2, Work Term 1  
 Academic Term 3, Work Term 2, Academic Term 4
4. Candidates shall normally complete 18 credit hours, including: Advanced Statistics in Psychology (6000), Research Design (6001), Theory and Methods in Social Psychology (6400), Program Evaluation and Applied Research (6403), Project in Applied Social Psychology (6404) and either Group Processes (6402) or Social Cognition (6401). Candidates will also register for the Colloquium Series in Psychology (6010) for Academic Term 1, Academic Term 2, and Academic Term 3 of their program for a maximum of three registrations.

### 6.3 Evaluation and Advancement

1. In order to continue in good standing in the program and in order to qualify for the Master's Degree, a candidate shall obtain a grade of A or B for program courses, and complete two Work Terms.
2. The dates for starting and finishing each Work Term are shown in the **University Diary**. Successful completion of the Work Term requirements is a prerequisite to graduation.
3. A competition for Work Term employment is organized by Co-operative Education. Students may also obtain their own Work Term jobs outside the competition. Such jobs must be confirmed by letter from the employer and approved by the Head of Psychology and Co-operative Education on or before the first day of the Work Term.

Work Term jobs may be outside St. John's and possibly outside Newfoundland and Labrador. Students who do not wish to accept a Work Term job arranged by Co-operative Education shall be responsible for finding an alternative acceptable to the Head of Psychology and Co-operative Education.

By entering the competition, students give permission for Co-operative Education to supply their University transcripts to potential employers.

4. The overall evaluation of the Work Term is the responsibility of Co-operative Education. The Work Term evaluation shall consist of

two components:

a. **On-the-job Student Performance:**

Job performance shall be assessed by Co-operative Education using information gathered during the Work Term and input from the employer towards the end of the Work Term. Formal written documentation from the employer shall be sought.

b. **The Work Report:**

- i. Work term reports shall be evaluated by a member of the faculty in the Department of Psychology. If an employer designates a report to be of a confidential nature, both employer and faculty member must agree as to the methods to protect the confidentiality of such a report before the report may be accepted for evaluation.
  - ii. Reports must be prepared according to American Psychological Association specifications and contain original work related to the Work Term placement. The topic must relate to the work experience and will be chosen by the student in consultation with the employer. For promotion from the Work Term, a student must obtain at least 65% in each component.
5. If a student fails to achieve the Work Term standards specified above the student will be required to withdraw from the program. Such a student may reapply to the program after lapse of two semesters, at which time the student will be required to complete a further Work Term with satisfactory performance before being admitted to any further academic term in the Faculty. A Work Term may be repeated once.
  6. Students are not permitted to drop Work Terms without prior approval of the Graduate Studies Committee of the Department of Psychology, upon the recommendation of Co-operative Education. The Graduate Studies Committee will make a recommendation to the Head of Department who will make the final decision. Students who drop a Work Term without permission, or who fail to honour an agreement to work with an employer, or who conduct themselves in such a manner as to cause their discharge from the job, will normally be awarded a failed grade for the Work Term. Permission to drop a Work Term does not constitute a waiver of degree requirements, and students who have obtained such permission must complete an approved Work Term in lieu of the one dropped.

## 6.4 Courses

A selection of the following graduate courses will be offered to meet the requirements of candidates, as far as the resources of the Department will allow. Other courses may be offered on the recommendation of the Head of the Department of Psychology.

6000 Advanced Statistics in Psychology  
 6001 Research Design  
 6010 Colloquium Series in Psychology (repeatable, non-credit)  
 601W Work Term 1  
 602W Work Term 2  
 6400 Theory and Methods in Social Psychology  
 6401 Social Cognition  
 6402 Group Processes  
 6403 Program Evaluation and Applied Research  
 6404 Project in Applied Psychological Science

## 7 Regulations Governing the Degree of Master of Applied Statistics

[www.mun.ca/science](http://www.mun.ca/science)  
[www.mun.ca/math](http://www.mun.ca/math)

**Professor and Dean of Science**

M. Abrahams

The Degree of Master of Applied Statistics (M.A.S.) is a highly structured program incorporating 18 credit hours in program courses and a practicum in applied statistics. The Degree is offered in the Department of Mathematics and Statistics by full-time or part-time study.

### 7.1 Qualifications for Admission

1. Admission is limited and competitive. To be considered for admission to the Master of Applied Statistics program, an applicant shall normally hold at least a high second class Honours Degree or its equivalent, both in achievement and depth of study, from an institution recognized by the Senate.
2. In addition, an applicant shall normally have completed undergraduate courses in statistics which cover the material of Statistics 3521, 3530, 4410, 4520, 4560, 4561, 4590, 4591. If necessary, an applicant may be required to demonstrate a satisfactory knowledge of the above courses in an examination administered by the Department of Mathematics and Statistics.
3. Applicants who do not meet these requirements should consult the Department of Mathematics and Statistics about a program of further undergraduate courses. Such a program is intended to provide the candidate with an adequate statistical background. Such courses may not be used to fulfill the program course requirements of the Master of Applied Statistics Degree.
4. Admission to the program shall be upon acceptance by the Dean of Graduate Studies after recommendation by the Head of the Department of Mathematics and Statistics along with a proposed program of study and a proposed Supervisor.

### 7.2 Program of Study

The minimum requirements for the Degree of Master of Applied Statistics are completion of the following:

1. The three credit hours courses STAT 6510 and STAT 6560 plus one from STAT 6530, STAT 6571 or STAT 6573.
2. Nine additional credit hours selected from STAT 6500-6589.
3. The series STAT 697A/B or the completion of an additional 3 credit hour graduate course from STAT 6500-6589.
4. STAT 6591 and an applied statistics project with its associated report. The report must demonstrate a satisfactory general mastery of applied statistical knowledge.

### 7.3 Evaluation

1. In order to continue in graduate studies and in order to qualify for a Master's Degree, a candidate shall obtain an A or B for all regular program courses. In order to qualify for a graduation the student shall pass STAT 697A/B and STAT 6591 and complete successfully the practicum requirement.
2. STAT 6591 will be evaluated by the student's consulting project supervisor.

- Evaluation of the practicum shall be carried out in accordance with **Theses and Reports** of the **General Regulations** governing all students in the School of Graduate Studies.

Note: *Every candidate in graduate studies shall comply with the **General Regulations**, the Degree Regulations and any additional requirements of the Department of Mathematics and Statistics.*

## 7.4 Courses

A selection of the following graduate courses will be offered to meet the requirements of candidates, as far as the resources of the Department will allow.

### Applied Statistics

6500 Probability (*credit restricted with former 6586*)

6503 Stochastic Processes

6505 Survival Analysis

6510 Mathematical Statistics

6520 Linear Models

6530 Longitudinal Data Analysis

6540 Time Series Analysis

6545 Statistical Computing

6550 Nonparametric Statistics

6560 Continuous Multivariate Analysis

6561 Categorical Data Analysis

6563 Sampling Theory

6570-6589 Selected Topics in Statistics and Probability (excluding 6571, 6573, 6586)

6571 Financial and Environmental Time Series

6573 Statistical Genetics

6591 Practicum (1 credit hour)

697A/B Graduate Seminar Series in Statistics

## 8 Regulations Governing the Degree of Master of Arts

[www.mun.ca/hss](http://www.mun.ca/hss)

### Professor and Dean of Humanities and Social Sciences

L. Phillips

The Degree of Master of Arts (M.A.) is offered in Anthropology, Archaeology, Classics, Economics, English, Environmental Policy, Ethnomusicology, Folklore, French Studies, Geography, German Language and Literature, History, Linguistics, Philosophy, Political Science, Religious Studies, and Sociology.

Applicants are advised to consult, in addition to the regulations governing the Degree of Master of Arts, both the **General Regulations** and the particular regulations of the appropriate Departments.

### 8.1 Qualifications for Admission

- Admission is limited and competitive. To be considered for admission an applicant shall hold a Bachelor's Degree or its equivalent from an institution recognized by the Senate and shall have a knowledge of the proposed field of specialization satisfactory to the Department concerned (or Departments, when interdisciplinary study is intended) and to the Dean.
- Preference will normally be given to applicants who hold an appropriate Honours Degree, either from Memorial University of Newfoundland, or from another university whose Honours Degree is of comparable standing. Any other applicant who holds a Bachelor's Degree or its equivalent will be considered for admission provided that:
  - the applicant's undergraduate record after the first year shows an average of at least grade B in courses in the proposed field of specialization;
  - the applicant's overall undergraduate record after the first year shows an average of at least grade B in all courses taken; and
  - the Department concerned satisfies the Dean that the applicant's work exhibits evidence of academic excellence.

Only in exceptional circumstances, and only on the recommendation of the Department concerned, will the Dean consider applicants who do not meet the requirements in a. and b. Such applicants, however, must meet the requirements in c.
- An applicant may be required to demonstrate a satisfactory knowledge of the proposed field of study in an examination administered by the Department or Departments.
- In most cases instruction is in English, and examinations and theses are to be written in English. (Language Departments, however, give instruction in the pertinent language and often require examinations and theses to be written in the language. In addition, other Departments may permit or even require examinations and/or theses to be written in a language other than English.)

### 8.2 Program of Study and Research

- The program of study for the Master of Arts Degree shall consist of the successful completion of a program of courses and, in accordance with Departmental regulations, either of a thesis embodying systematic research or of a Comprehensive Examination.  
For programs requiring 24 credit hours or more, the academic unit may choose not to require a thesis or comprehensive examination.
- Every candidate shall read at least 12 credit hours in program courses at the graduate level in one subject or in closely related subjects. Departmental regulations may require more courses than the minimum and this higher number is listed where applicable in the regulations of the Department.
- Students may, with the approval of the Dean, augment their program with a limited number of other courses of their choice. Passing grades are not required in these non-program courses in order to continue in graduate studies or obtain a Master's Degree.  
However, the final grades in these courses will be recorded on the student's transcripts. The grading system in non-program courses shall be that appropriate to the particular course.
- Candidates submitting a thesis on an approved topic shall conduct systematic research under the direction of a Supervisor recommended by the appropriate Department or Departments and approved by the Dean. The candidate may be required to take an oral examination.

5. Changes in either the program of courses or the topic of the thesis require the approval of the Dean.
6. On the recommendation of the Head of the Department, the Dean may waive, in part, the course requirements for a Master's Degree.
7. Application for transfer from the Master of Arts to the Master of Philosophy is to be made to the Dean before the end of the second semester in the case of full-time students, and in the case of part-time students before 18 graduate credit hours have been completed.
8. The Dean may approve an application to transfer from the M.A. to the M.Phil. only when a new integrated program, acceptable to the Dean, is submitted.

### 8.3 Evaluation

1. In order to continue in the School of Graduate Studies and in order to qualify for a Master's Degree, a candidate shall obtain an A or B grade in each regulation course. Some candidates may be required to read a specified number of additional graduate or undergraduate courses for which a passing grade must be achieved.
2. Students registered for credit shall write their examinations in their graduate courses at a time to be determined by the Dean on the recommendation of the Department.
3. Students registered in undergraduate courses shall satisfy examination requirements in these courses.
4. When, on a basis of consultation with the candidate, the instructors in graduate courses, and the thesis Supervisor, the Head of a Department has determined that the candidate's work has fallen below a satisfactory level, the Head may recommend to the Dean that the candidate be required to withdraw from the program.

### 8.4 Thesis or Report

See **General Regulation, Theses and Reports.**

### 8.5 Anthropology

[www.mun.ca/hss](http://www.mun.ca/hss)  
[www.mun.ca/anthro](http://www.mun.ca/anthro)

#### Associate Professor and Head of the Department

K. Gordon

The Degree of Master of Arts (M.A.) is offered in Anthropology by either full-time or part-time study.

1. Candidates will specialize in social and cultural anthropology.
2. When candidates are accepted into the program, they will be assigned one or more Supervisors. Candidates' programs shall be the responsibility of their Supervisor(s), the graduate co-ordinator(s), and the Head of the Department.
3. If candidates' records suggest a deficiency in some areas(s), the Department reserves the right to require that they complete additional undergraduate courses before beginning program courses.
4. Candidates may choose between a thesis and a non-thesis option.

#### 8.5.1 M.A. With Thesis

1. Normally, the M.A. program should take two academic years to complete, of which the first year will be spent in completing course work, writing and orally defending a thesis proposal before members of the faculty, and beginning to carry out research. The second academic year will be spent in completing research, presenting an oral research report to the Department, and completing a thesis.
2. Candidates for the Degree of a Master of Arts in Anthropology will be required to complete not fewer than 12 credit hours, nor more than 18 credit hours of courses at the graduate level.
3. Most Department graduate courses are taught in either a seminar or tutorial framework; all courses require intensive reading, regular oral communication of ideas to faculty and other students, and preparation of written research papers and other assignments.
4. Normally, during the second semester of the first year of study in the program, a written thesis proposal which has been approved by the student's Supervisor(s) will be circulated to all members of the Department. The written thesis proposal should be made available to faculty members at least two weeks prior to the scheduled date of a student's oral presentation and defence of the proposal.
5. Shortly following the completion of their research, candidates will be required to present an oral research report on their findings to the Department.
6. A final draft of the thesis will be evaluated in accordance with the requirements of the School of Graduate Studies.

#### 8.5.2 M.A. Without Thesis

Normally, the M.A. program without thesis should take one academic year to complete. Candidates who choose to do the M.A. without thesis must normally complete 24 credit hours in graduate program courses; 15 of which will normally be from ANTH 6440, ANTH 6890, and ANTH 6300. Nine additional credit hours are to be selected from the graduate courses offered by the Department.

*Note: ANTH 6440 will be worth 9 credit hours. This course will normally be based on secondary literature and will be supervised by a faculty member.*

#### 8.5.3 Courses

A selection of the following graduate courses will be offered to meet the requirements of candidates, as far as the resources of the Department will allow.

6010 Cultural Ecology  
 6071 Health and Illness: Cultural Contexts and Constructions  
 6081 Anthropology of Gender  
 6089 Anthropology of Underclass Life  
 6100 Social Organization  
 6110 Culture and Personality  
 6140 The Community  
 6210 Language and Culture  
 6240 Atlantic Regional Studies

6260 Social and Economic Development  
6280 Newfoundland Ethnography  
6281 Labrador Ethnography  
6282 Ethnography of a Single Region  
6300 Fieldwork and Interpretation of Culture  
6400 Current Themes in Cultural Anthropology  
6410 History of Anthropology  
6412 Anthropological Theory  
6413 Applied Anthropology  
6430 Audiovisual Anthropology  
6440 Master's Research Paper (9 credit hours)  
6580-6599 Special Areas in Anthropology  
6600 Contemporary Debates in Anthropology  
6890 Graduate Seminar

## 8.6 Archaeology

[www.mun.ca/hss](http://www.mun.ca/hss)  
[www.mun.ca/archaeology](http://www.mun.ca/archaeology)

### Associate Professor and Head of the Department

B. Gaulton

### 8.6.1 Program of Study

The Degree of Master of Arts is offered in Archaeology by either full-time or part-time study.

1. Candidates may specialize in either archaeology or bioarchaeology.
2. The choice of specialty will govern the selection of Supervisor(s), courses, and thesis or research paper topics. When candidates are accepted into the program, they will be assigned one or more Supervisors. Candidates' programs shall be the responsibility of their Supervisor(s), the graduate co-ordinator, and the Head of the Department.
3. If candidates' records suggest a deficiency in some areas(s), the Department reserves the right to require that they complete additional undergraduate courses before beginning program courses.
4. Normally, the M.A. program should take six academic semesters to complete, of which the first three semesters will be spent in completing course work, writing and orally defending a thesis proposal before members of the faculty, and beginning to carry out research. The following semesters will be spent in completing research, presenting an oral research report to the Department, and completing a thesis.
5. Candidates for the Degree of a Master of Arts in Archaeology will be required to complete not fewer than 12 credit hours, nor more than 18 credit hours of courses at the graduate level.
6. Most Department graduate courses are taught in either a seminar or tutorial framework; all courses require intensive reading, regular oral communication of ideas to faculty and other students, and preparation of written research papers and other assignments.
7. Normally, during the second semester of the first year of study in the program, a written thesis proposal which has been approved by the student's Supervisor(s) will be circulated to all members of the Department. The written thesis proposal should be made available to faculty members at least two weeks prior to the scheduled date of a student's oral presentation and defence of the proposal.
8. Shortly following the completion of their research, candidates will be required to present an oral research report on their findings to the Department.
9. A final draft of the thesis will be evaluated in accordance with the requirements of the School of Graduate Studies.

### 8.6.2 Courses

A selection of the following graduate courses will be offered to meet the requirements of candidates, as far as the resources of the Department will allow.

6020 Bioarchaeology  
6040 Human Osteology  
6095 Advanced Studies in Ethnohistory (*same as History 6095*)  
6151 Palaeoethnobotany  
6181 Palaeoeskimo Cultures of the Eastern Arctic  
6182 Advances in Material Culture Analysis  
6187 Readings in Maritime Provinces Prehistory  
6189 Palaeopathology  
6191 Approaches to Early Modern Material Culture  
6192 Conservation Method and Theory  
6290 Newfoundland and Labrador Prehistory  
6310 Economic Analyses in Archaeology  
6320 Ethnoarchaeology  
6330 Archaeological Field Conservation  
6409 History of Archaeology  
6411 Theory and Method in the Study of Archaeology and Prehistory  
6500 Special Topics in Historical Archaeology (*prerequisite 6191*)  
6680-6699 (excluding 6687) Special Topics in Archaeology and Prehistory  
6687 Applied Archaeological Sciences  
6700 Interpretative Methods in Archaeology  
6701 Interpretative Methods in Historical Archaeology  
6890 Graduate Seminar

## 8.7 Classics

www.mun.ca/hss  
www.mun.ca/classics

### Associate Professor and Head of the Department

T.J. Allen

The degree of Master of Arts is offered in Classics. The program is designed so that it may be completed in two academic years of full-time study.

### 8.7.1 Qualifications for Admission

Admission requirements are set forth in the **Regulations Governing the Degree of Master of Arts, Qualifications for Admission**. In addition to these requirements, an applicant should have completed at least 30 undergraduate credit hours in Greek and Latin language courses including a minimum of 12 credit hours in each language and at least 6 credit hours from senior level courses.

### 8.7.2 Program of Study

1. A student will complete a minimum of 24 credit hours in Classics courses at the 6000 level including Classics 699A and 699B; 6 of these 24 credit hours must be in Greek and/or Latin courses. Further courses beyond the minimum number may be required, depending on the background of the student.
2. A student is required to demonstrate competence in a modern European language, normally French, German, or Italian, as early as possible in their program of study, but no later than the end of the first semester of the second year. (See **General Regulations, Evaluation, Evaluation of Graduate Students**.)

### 8.7.3 Courses

6001 Seminar in Greek History and Society  
6002 Seminar in Greek Literature and Culture  
6003 Seminar in Roman History and Society  
6004 Seminar in Roman Literature and Culture  
6200 Latin Literature: Oratory  
6210 Latin Literature: Epic, drama, didactic  
6220 Latin Literature: Lyric, satire, elegy, epigram  
6230 Roman Historians  
6250-6260 Special Topics in Latin Readings  
6300 Greek Literature: Oratory  
6310 Greek Literature: Epic, drama, didactic  
6320 Greek Literature: Lyric, iambic, elegy, epigram  
6330 Greek Historians  
6340 Ancient Philosophical Authors  
6350-6360 Special Topics in Greek Readings  
699A Master's Research Paper (0 credit hours)  
699B Master's Research Paper (6 credit hours)

## 8.8 Economics

www.mun.ca/hss  
www.mun.ca/econ

### Professor and Head of the Department

W. Locke

The Degree of Master of Arts is offered in Economics. The focus of the program is applied economics. The non-thesis option is designed so that suitably qualified full-time students can complete it in one year. The thesis option normally takes more than one year.

### 8.8.1 Qualifications for Admission

To be considered for admission, an applicant must normally have completed an undergraduate Degree in Economics at a Canadian university with at least second-class Honours standing, or its equivalent. Satisfaction of this criterion does not guarantee admission and, if admitted, students may be required to complete specified undergraduate courses as deemed necessary by the Department.

### 8.8.2 Programs of Study

#### 1. Non-Thesis Option

- a. The program of study requires, in addition to any specified undergraduate courses, completion of 26 credit hours in graduate Economics courses, including a master's essay course. The maximum time normally permitted for students to satisfy these requirements is three years.
- b. The 26 credit hours in graduate courses consist of the following:
  - i. 11 credit hours in core courses, which shall normally be completed in the first term of the program: Economics 6000, 6001, 6002, and 6009;
  - ii. 12 credit hours in other courses selected from those offered by the Department;
  - iii. Masters Essay course: Economics 6999. Normally, all other required graduate courses must be completed before the essay.
- c. The master's essay, Economics 6999, must be in the area relating to the courses taken by the student. Students will be assigned a Supervisor, who will approve the topic; the essay will be graded by the Supervisor and one other member of the Department. The essay must be completed during the semester in which the student is registered in Economics 6999. During that time, students may be required to give a Departmental seminar on their essays.

#### 2. Thesis Option

- a. The thesis option consists of 20 credit hours and a thesis. The thesis will consist of a comprehensive study in the area of the student's field courses. The thesis must embody systematic research and demonstrate a mastery of economic principles and their application. Thesis work will be completed under a Supervisor from the Department.

- b. The thesis must normally be completed within the two years following completion of 20 required credit hours, which must include Economics 6000, 6001, 6002, and 6009.
- c. The thesis will normally be evaluated internally and in accordance with the requirements of the School of Graduate Studies.

### 8.8.3 Courses

The following courses will be offered to meet the requirements of candidates, as far as resources of the Department will allow.

#### Core Courses

6000 Advanced Micro-economic Theory  
 6001 Advanced Macro-economic Theory  
 6002 Econometrics  
 6009 Graduate Seminar (2 credit hours)

#### Elective Courses

6010 Taxation  
 6011 Expenditure  
 6012 Cost-benefit Analysis  
 6013 Fiscal Federalism  
 6014 Topics in Public Sector Economics  
 6020 Economics of Nonrenewable Natural Resources  
 6021 Economics of Renewable Natural Resources  
 6022 Environmental Economics  
 6023 Advanced Fisheries Economics  
 6024 Topics in Resource Economics  
 6025 Labour Economics  
 6040 Industrial Economics

#### Master's Essay Course

6999 Master's Essay

## 8.9 English

[www.mun.ca/hss](http://www.mun.ca/hss)  
[www.mun.ca/english](http://www.mun.ca/english)

#### Associate Professor and Head of the Department

J. Lokash

The degrees of Master of Arts and Doctor of Philosophy are offered in English.

Candidates for the M.A. in English may complete the program as either part-time or full-time students. Candidates for the Ph.D. in English must be in attendance as full-time students for at least three semesters of the program.

### 8.9.1 Admission

1. Admission to the M.A. in English is limited and competitive. Applicants should have an Honours B.A. in English (or the equivalent, 60 credit hours in English with an appropriate range of courses) and a strong academic record.
2. Strong candidates who have come close to achieving Honours equivalency may be admitted on the condition that they complete such undergraduate courses as the Department may deem necessary, in addition to the required graduate courses.
3. Candidates who have not completed English 4900 or an equivalent course will be required to complete English 5900 which will not count as one of the required courses for the M.A. The course will be graded 'pass' or 'fail'. As in other graduate courses a grade of 65 or above is considered a pass.

### 8.9.2 Program of Study

#### 1. Thesis Option

- a. Candidates completing the M.A. with thesis will complete a minimum of 15 credit hours in graduate courses, which will normally include English 7003 and a thesis. The thesis may be a creative work.
- b. Candidates must submit a thesis proposal which includes a statement of topic, a working title, a plan of research, and a preliminary bibliography. The proposal should be approved by the Supervisor or Supervisors and submitted to the Departmental Graduate Studies Committee for its approval by the end of the candidate's third semester. The Departmental Graduate Studies Committee shall return the thesis proposal to the candidate no later than one month after receiving it.
- c. Full-time students who choose the thesis option will usually complete their degree in two years.

#### 2. Non-Thesis Option

- a. Candidates completing the M.A. without thesis will complete a minimum of 24 credit hours in graduate courses, which will normally include English 7003.
- b. Full-time students who choose the non-thesis option will usually complete their degree in one year.

### 8.9.3 Courses

A selection of the following graduate courses will be offered to meet the requirements of candidates, as far as the resources of the Department will allow.

- Notes: 1. *Since it is impossible to list in detail the many topics that may from time to time be offered, the titles below refer only to the major periods and general subject areas in which specific courses may be available. The content and approach in specific courses will vary according to the research interests of students and faculty involved in the course. Students should consult the Department's annual Graduate Student Guide (or the Graduate Co-ordinator) for detailed descriptions of specific course offerings. Normally, no fewer than ten graduate courses are offered in any given academic year.*
2. *English 5900 cannot be counted as one of the required graduate courses in any program.*
3. *All students will normally take English 7003 - Trends in Contemporary Literary Theory, usually in their first semester.*
4. *Students who took graduate courses in English at Memorial University of Newfoundland before 1997 should consult with the Department before selecting further courses.*

5900 Bibliography and Research Methods

## 8.10 Environmental Policy

www.mun.ca/sgs

### Associate Professor and Head, Division of Social Science (Grenfell Campus)

K. Vodden

The M.A. in Environmental Policy is a rigorous, interdisciplinary study of environmental policy in terms of its theory, application, methodology, and approaches with reference to central contemporary debates. It is also an applied program that equips students with practical skills in the field making links to the labour market through a required internship program.

The M.A. in Environmental Policy is offered by full-time study or part-time study and by completion of either a thesis or research paper. The **Thesis Option** involves completion of 15 credit hours of course work, an internship, and a thesis, and is normally completed in two academic years of full-time study and in three academic years of part-time study. The **Research Paper Option** involves completion of 18 credit hours of course work, an internship, and a research paper, and is normally completed in one academic year of full-time study and up to three academic years of part-time study.

The following regulations must be read in conjunction with the **General Regulations** of the School of Graduate Studies of Memorial University of Newfoundland.

### 8.10.1 Administration

1. The program shall be administered by a Graduate Officer, who reports to the Dean of Graduate Studies. The Graduate Officer shall be appointed by the Dean of Graduate Studies on the recommendation of the Head of Social Science, Grenfell Campus and the Vice-President, Grenfell Campus. In making this recommendation, the Head of Social Science, Grenfell Campus and the Vice-President, Grenfell Campus may consult with the environmental policy community both within and outside the University.
2. An Executive Committee consisting of the Graduate Officer and the Head of Social Science, Grenfell Campus and the Vice-President, Grenfell Campus will be established to review administrative, resource, and strategic planning issues related to the program. This committee shall be chaired by the Dean of Graduate Studies.
3. The Graduate Officer shall consult with the Graduate Committee in Environmental Policy (GCEP) for the purposes of administering the academic elements of the program. The GCEP shall normally consist of seven members appointed by the Dean of Graduate Studies on the recommendation of the Graduate Officer. The GCEP will include the Graduate Officer, who shall chair the committee, approximately four faculty members from the Division of Social Science, Grenfell Campus who teach core courses, the Head of Social Science, Grenfell Campus and one student representative, Grenfell Campus.
4. An Advisory Board in Environmental Policy (ABEP) shall be established for the purposes of consulting with and obtaining feedback from the environmental policy community. The ABEP will consist of a broad cross-section of members from the environmental policy community both within and outside the University who shall be appointed by the Dean of Graduate Studies on the recommendation of the Graduate Officer.

### 8.10.2 Qualifications for Admission

1. Admission is limited and competitive.
2. To be considered for admission, applicants shall have an undergraduate degree, with a minimum B standing, from an institution recognized by Senate.
3. In exceptional cases, applicants who have not completed an undergraduate degree may be considered for admission. Preference will be given to those who have a minimum of 10 years of full-time professional experience, including demonstrated success in environmental policy, and who have successfully completed substantial university course work including several courses at an advanced undergraduate level from an institution recognized by Senate. Applicants without an undergraduate degree must have completed one or more undergraduate courses in public policy, public administration or political science and one or more undergraduate courses in geography, biology or chemistry from an institution recognized by Senate, with a minimum B standing in each course. Applicants may also be required to successfully complete the Graduate Management Admission Test (GMAT) or the Graduate Record Examination (GRE) with an acceptable score and/or additional undergraduate courses before being considered for admission.
4. To be eligible for consideration for admission, applicants shall meet the English Proficiency Requirements described under **General Regulation - Qualifications for Admission, English Proficiency Requirements**.
5. Applicants will be assessed for admission to the M.A. in Environmental Policy based on their interests, their potential to produce meaningful research in the field of environmental policy, and the availability of supervisors in the area of the applicant's interest.
6. Interdisciplinary study in the program is encouraged by the University. Applicants with an interdisciplinary background or whose background combines two or more fields of study (e.g., political science, public policy, environmental studies, geography, resource management, environmental science, public administration) would be an excellent fit for this program.

### 8.10.3 Deadlines for Applications

1. Applicants seeking full-time enrollment will normally only be admitted to the program in the Fall (September) semester.
2. Applications must be postmarked no later than February 15 for applicants wishing to enter full-time or part-time studies in the Fall (September) semester.
3. Applications must be postmarked no later than August 15 for applicants wishing to enter part-time studies in the Winter (January) semester.
4. Individuals submitting applications later than the above dates are not assured of consideration for admission to the program in the semester desired; their applications will be processed only if time and resources permit.

### 8.10.4 Procedure for Admission

1. Applications for admission to the M.A. in Environmental Policy program must be made on the appropriate form and submitted to the School of Graduate Studies.
2. The following documents must be submitted in support of the official application form:
  - a. Letter of appraisal from two referees, at least one of whom is capable of appraising the applicant's academic potential as a graduate student, and at least one of whom is capable of appraising the applicant's professional experience and/or actual or likely success in a career in environmental policy.
  - b. Official transcripts from each university or other post-secondary institution previously attended, to be sent directly by its Registrar (or equivalent officer) to the School of Graduate Studies. If not recorded on the transcript, official evidence of completion of

- undergraduate degree must also be submitted.
- c. All applicants must submit a one page statement outlining their research interests and are strongly encouraged to identify a supervisor.
  - d. Application files are normally evaluated after the deadline dates for application noted above and only when all required documentation has been received.
  - e. Admission shall be by the Dean of Graduate Studies on the recommendation of the GCEP. Upon notification from the Dean of the School of Graduate Studies of acceptance into the M.A. in Environmental Policy program, applicants must give written notice to the School of Graduate Studies of their intention to register.

### 8.10.5 Program of Study

1. **Thesis Option:** Students in the thesis-based program must complete 15 credit hours in graduate program as specified in **Table 1**, an internship (ENVP 6030) and a thesis. There are four required courses (representing 12 credit hours) as specified in **Table 2**. One elective, representing 3 credit hours, related to the student's research specialty is to be completed and may be chosen from **Table 3** in consultation with the student's thesis supervisor.
2. **Research Paper Option:** Students in the research paper-based program must successfully complete 18 credit hours in graduate program courses as specified in **Table 1**, an internship (ENVP 6030) and a Research Paper (ENVP 6999). There are four required courses (representing 12 credit hours) as specified in **Table 2**. Two electives, representing 6 credit hours, are to be completed, of which at least one is to be from **Table 2**. The second elective, related to the student's research specialty, may be chosen from **Table 2 or Table 3** in consultation with the student's research paper supervisor.
3. Further courses beyond the minimum number may be required, depending on the background and needs of the student.
4. Students are responsible for fulfilling all prerequisites.
5. All students are required to attend two Workshops:
  - a. **Policy and Science Orientation Workshop**  
This workshop is held the first week of September each year. Its intent is to provide students with a limited policy or biophysical background with conceptual tools to frame each discipline in order to orient students to the program. The workshop is team-taught and is three full days in length.
  - b. **Pre-Internship Workshop**  
This two-day workshop reviews the internship requirements, aids students in writing resumes and cover letters, discusses interviewing practices and examines student/employer relationships. It is held during the first week after classes end in December of each year.
6. **Internship Requirements**
  - a. All students are required to complete an environmental policy internship (ENVP 6030) with a relevant government office, non-governmental organization, community group, or business. Internships are normally selected from a list of approved organizations that is maintained by the Internship Officer and Graduate Officer. Internship placements may be outside the Corner Brook area and possibly outside Newfoundland and Labrador. Final decisions for internship placements rest with the Graduate Officer in consultation with the Internship Officer.
  - b. Internships are usually completed in the Spring semester of each year.
  - c. Internships are for full-time employment hours for the duration of the semester (12 weeks). Part-time internships over longer periods may be considered and will require approval from the Internship Officer and the Graduate Officer.
  - d. A competition for internships is organized by the Internship Officer. By entering the competition, students give permission for the Internship Officer to supply their university transcripts to potential employers. Students who do not wish to accept an internship arranged by the Internship Officer shall be responsible for finding an alternative acceptable to the Internship Officer in consultation with the Graduate Officer.
  - e. Students must attend scheduled pre-internship orientation workshop, professional development, and exit meeting.
  - f. Each internship placement is supervised and evaluated by the Internship Officer, the on-site Supervisor assigned by the employer and the Graduate Program Coordinator. The internship shall consist of two components:
    - i. On-Site Student Performance as evaluated by the Internship Officer in consultation with the on-site Supervisor assigned by the employer.
    - ii. An Internship Report graded by the Internship Officer or the Graduate Officer in consultation with the on-site Supervisor assigned by the employer.
  - g. Evaluation of the Internship shall result in one of the following final grades: Pass, or Fail.  
A student must obtain a Pass in both the On-Site Student Performance and the Internship Report to obtain a final grade of Pass.  
If a student fails to achieve the internship standards specified above, the student may be required to withdraw from the program. Such a student may reapply to the program after a lapse of two semesters, at which time the student will be required to complete a further internship with satisfactory performance before being admitted to any further academic term in the Faculty. An internship may only be repeated once.
  - h. Students who voluntarily withdraw from the internship without prior approval from the Internship Officer and the Graduate Officer, or who conduct themselves in such a manner as to cause the host organization and the Internship Officer to terminate the placement, will normally be awarded a grade of Fail in the internship.
  - i. Students are not permitted to drop internships without prior approval of the Internship Officer in consultation with the Graduate Officer. The Internship Officer will make a recommendation to the Graduate Officer who will make the final decision. Students who drop an internship without permission, who fail to honour an agreement to work with a host organization, or who conduct themselves in such a manner as to cause their discharge from the internship position will normally be awarded a failed grade for the internship. Permission to drop an internship does not constitute a waiver of degree requirements, and students who have obtained such permission must complete an approved internship in lieu of the one dropped.
7. Students in the M.A. in Environmental Policy shall meet the minimum residency of at least two semesters required under **General Regulation, Registration - Period of Study** of the University Calendar. Students are encouraged to meet this residency requirement in the first two semesters of their program.
8. All students will be required to present a seminar on their thesis or research paper in the final semester of their program as part of their thesis or research paper requirements. For applicable students, the thesis will be examined in accordance with the **General Regulations - Theses and Reports** of the School of Graduate Studies.

### 8.10.6 Evaluation

1. Candidates for the Master of Arts in Environmental Policy degree must obtain a grade of B or better in all program courses.
2. Candidates who receive a grade of less than B in a program course will be permitted to remain in the program, provided the course is repeated and passed with a grade of B or better. Alternatively, the candidate may, on the recommendation of the GCEP, and with the approval of the Dean of Graduate Studies, substitute another graduate course. Only one course repetition or substitution will be permitted during the candidate's program after which the candidate shall be required to withdraw from the program.

### 8.10.7 Courses

The schedule of courses for the Master of Arts in Environmental Policy is as follows:

**Table 1 Master of Arts in Environmental Policy Schedule of Courses**

Term	Thesis Option	Research Paper Option
<b>Fall Semester 1</b>	Policy and Science Internship Workshop Two required courses from <b>Table 2</b> One elective from <b>Table 2</b> or <b>Table 3</b> Pre-Internship Workshop	Policy and Science Internship Workshop Two core courses from <b>Table 2</b> One elective from <b>Table 2</b> or <b>Table 3</b> (one elective, either in the Fall or Winter Semester, shall be from <b>Table 2</b> ) Pre-Internship Workshop

### 8.11 Ethnomusicology

[www.mun.ca/music](http://www.mun.ca/music)  
[www.mun.ca/hss](http://www.mun.ca/hss)  
[www.mun.ca/folklore](http://www.mun.ca/folklore)

**Associate Professor and Dean**

I. Sutherland

The Master of Arts program in Ethnomusicology is administered by the School of Music in consultation with the Department of Folklore, and generally in response to recommendations from an Interdisciplinary Advisory Committee with representation from both academic units, chaired by the Program Co-ordinator.

The Degree of Master of Arts in Ethnomusicology is offered by part-time and full-time study. While it is normally a course work degree, a

thesis option is available upon application. Fieldwork is often a requirement both for independent research and course work. The resources of the Memorial University of Newfoundland Folklore and Language Archive are available to graduate students in Ethnomusicology.

### 8.11.1 Qualifications for Admission

Applicants may be admitted to the program if they have at least a B+ average with a B.Mus. Degree or other Degree in the Humanities or Social Sciences with evidence of specialization in music. Applicants whose professional music training took place outside the university system are also encouraged to apply, provided they have the academic equivalent of the qualifications described above. Applicants from a discipline other than Music will be expected to demonstrate the following skills:

- Competent performance in any musical tradition, as judged by a musician knowledgeable about that tradition.
- Knowledge of culturally appropriate language for discussion of performance techniques in that tradition.
- Ability to discuss musical details on the basis of aural and/or written sources, as appropriate to that tradition.

Candidates for admission may, at the discretion of the Interdisciplinary Advisory Committee, be required to write diagnostic examinations measuring skills and knowledge in music literacy, theory, or aural perception. Candidates with deficiencies in any of these areas may be required to take remedial course work prior or in addition to the required program.

### 8.11.2 Program of Study

The M.A. program will normally be completed within five consecutive semesters of full-time study. The degree is normally taken by completing course work and a major research paper. In special circumstances, a student may apply to complete the degree by completing course work and a thesis. Demonstration of competence in a language other than English may be required if warranted by the research proposed by the student.

#### 1. Course Work M.A.

- a. Students must normally complete a minimum of 24 credit hours plus a major research paper (Music 7002). Further courses beyond the minimum number may be required, depending on the background of the student. The required courses are:
  - i. Music 7001; Folklore 6030.
  - ii. One of Folklore 6100 or Music 6002.
  - iii. One area or genre studies course (3 credit hours) relevant to the research of the student.
  - iv. Twelve credit hours to be selected from the Music and Folklore courses listed below (with the approval of the Interdisciplinary Advisory Committee); one elective (3 credit hours) may be a relevant course offered in another discipline (with the approval of the Interdisciplinary Advisory Committee).
- b. Research paper (Music 7002) on a topic chosen by the student with his/her supervisor's approval. Proposals for topics and supervisors will be vetted by the Interdisciplinary Advisory Committee no later than the beginning of the third term of study. The paper will normally demonstrate the student's ability to apply methodologies and theoretical constructs, learned in the courses taken, to a specific repertory, or performance context.

#### 2. Thesis M.A. (available by special application to the Interdisciplinary Advisory Committee)

- a. Students must normally complete a minimum of 21 credit hours plus a thesis. The required courses are:
  - i. Music 7001; Folklore 6030.
  - ii. One of Folklore 6100 or Music 6002.
  - iii. One area or genre studies course (3 credit hours) relevant to the research of the student.
  - iv. Nine credit hours to be selected from the Music and Folklore courses listed below (with the approval of the Interdisciplinary Advisory Committee); one elective (3 credit hours) may be a relevant course offered in another discipline (with the approval of the Interdisciplinary Advisory Committee).
- b. Thesis submitted in accordance with General Regulation **Theses and Reports** of the School of Graduate Studies. A thesis proposal, consisting of a statement of topic, working title, plan of research, and preliminary bibliography, with the name of the preferred Supervisor, shall be submitted by the candidate to the Interdisciplinary Advisory Committee no later than the beginning of the third term of study.

### 8.11.3 Courses

#### Theories and Methods:

Music 6001 Research Methods  
 Music 6002 Graduate Seminar  
 Music 6807 Video Documentary Production (*credit may be received for only one of Music 6807 and Music 7803*)  
 Music 7001 Research Problems and Methods in Ethnomusicology  
 Music 7002 Research Paper  
 Music 7803 Radio Documentary Production (*credit may be received for only one of Music 6807 and Music 7803*)  
 Folklore 6010 Survey of Folklore Genres and Processes  
 Folklore 6020 Field and Research Methods  
 Folklore 6030 Folklore Theories  
 Folklore 6040 Feminist Theories: Perspectives and Issues  
 Folklore 6080 Vernacular Theories  
 Folklore 6090 Ethnology  
 Folklore 7100 Advanced Folkloristics II: Research and Ethnography

#### Form and Performance:

Music 7005 Performance Option  
 Folklore 6100 Song and Music  
 Folklore 6120 Ballad  
 Folklore 6130 Folk Music Canons and Documentary Sound Recordings  
 Folklore 6200 Folktale  
 Folklore 6210 Legend  
 Folklore 6220 Personal Experience Narrative  
 Folklore 6250 Language and Play  
 Folklore 6260 Ethnography of Communications  
 Folklore 6300 Ethnography of Belief

Folklore 6310 Health Systems  
 Folklore 6350 Custom  
 Folklore 6360 Traditional Drama  
 Folklore 6400 Material Culture  
 Folklore 6410 Vernacular Architecture  
 Folklore 6420 Art and the Artifact  
 Folklore 6430 Food and Culture  
 Folklore 6720 Folklore and Literature

**Area and Genre Studies:**

Music 7010 World Music: Music of Asia and Oceania  
 Music 7011 World Music: Music of Africa and the Americas  
 Music 7012 Canadian Musical Traditions  
 Music 7013 Music and Culture  
 Music 7017 Folksong  
 Music 7018 Jazz and Blues: The Roots of Popular Music  
 Folklore 6120 Ballad  
 Folklore 6600 Folklore of Newfoundland  
 Folklore 6610 Folklore of Canada  
 Folklore 6620 Folklore of the United States  
 Folklore 6630 Folklore of the British Isles  
 Folklore 6770 The Global and the Local

**Social Identities:**

Music 7006 Urban Ethnomusicology  
 Music 7007 Music in the Study of Gender, Race and Class  
 Music 7009 Music and Place  
 Music 7802 Music and Intercultural Processes  
 Folklore 6510 Occupational Folklore  
 Folklore 6551 Indigenous Expressive Cultures in Cross-cultural Encounter  
 Folklore 6730 Folklore and Gender  
 Folklore 6780 Ethnicities

**Public and Applied Ethnomusicology and Folklore:**

Music 6700 Career Skills for Musicians  
 Music 6750 Music Industries Internship (2 credit hours)  
 Folklore 6740 Public Sector Folklore  
 Folklore 6760 Archiving  
 Folklore 6790 Museums: Perspectives and Practices  
 Folklore 6800 Applied Folklore

**Interdisciplinary Perspectives:**

Music 7008 Media Studies  
 Folklore 6700 Folklore and Culture

 Music 7800-09 Special Topics in Music (excluding Music 7802 and 7803)  
 Folklore 6511-29 Special Topics in Folklore  
 Folklore 6570-79 Reading Course in Folklore

## 8.12 Folklore

[www.mun.ca/hss](http://www.mun.ca/hss)  
[www.mun.ca/folklore](http://www.mun.ca/folklore)

**Associate Professor and Head of the Department**

C. Thorne

The Degree of Master of Arts in Folklore is offered by part-time and full-time study. The program normally requires extensive fieldwork research in Newfoundland and/or the Maritimes.

Integral to the teaching of the Department of Folklore is work of the Memorial University of Newfoundland Folklore and Language Archive.

### 8.12.1 Program of Study

1. Applicants may be admitted to the graduate program if they have an average of at least grade 'B' in no fewer than 36 credit hours in Folklore or in any other discipline in the Humanities or Social Sciences.
2. The M.A. program will normally be completed within six consecutive semesters (i.e., a two-year period). The Degree of Master of Arts in Folklore may be taken by course work and comprehensive examination, course work and thesis, or course work and co-operative education work terms. All options are available to full-time and part-time students. However, the work term component of option C cannot be completed on a part-time basis.
  - a. **M.A. With Thesis:**
    - i. Students choosing to do the M.A. with thesis must normally complete a minimum of 24 credit hours plus a thesis. Normally, the required courses are:
      - 6010, 6020, and 6030, normally taken as an integrated foundation in the Fall semester.
      - At least one of the following: 6060, 6100, 6120, 6130, 6200, 6210, 6220, 6250, 6260, 6360, 6720.
      - At least one of the following: 6070, 6300, 6310, 6350, 6370, 6400, 6410, 6420, 6430.

- Nine additional credit hours to be selected from courses in the groups listed above or from the other courses offered by the Department.
  - ii. A brief thesis pre-proposal, including a statement of topic, working title, plan of research, ethics statement, preliminary bibliography, and the name of a preferred Supervisor, shall be submitted no later than the end of the candidate's second semester. A full proposal shall normally be submitted to the Department of Folklore and orally presented before members of the faculty by the end of the candidate's fourth semester. The written thesis proposal should be made available to faculty members at least two weeks prior to the scheduled date of a student's oral presentation of the proposal. Following approval of the thesis proposal and consultation with the candidate, the Supervisor and thesis topic will be recommended to the Dean.
- b. M.A. With Comprehensive Examination:**
- i. Students choosing to do the M.A. with comprehensive examination must normally complete a minimum of 30 credit hours plus comprehensive examination. Normally, the required courses are:
    - 6010, 6020, and 6030, normally taken as an integrated foundation in the Fall semester.
    - At least one of the following: 6060, 6100, 6120, 6130, 6200, 6210, 6220, 6250, 6260, 6360, 6720.
    - At least one of the following: 6070, 6300, 6310, 6350, 6370, 6400, 6410, 6420, 6430.
    - Fifteen additional credit hours to be selected from courses in the groups listed above or from the other courses offered by the Department.
  - ii. Each candidate selecting the M.A. with comprehensive examination option shall normally submit, by the end of the candidate's second semester, written notification of intention to take comprehensives.
  - iii. Each candidate selecting this option shall normally write the comprehensive examination at the end of the candidate's fifth semester in the program. The comprehensive examination will be graded by a comprehensive examination committee appointed by the Dean of Graduate Studies on the recommendation of the Head of the Department, in accordance with **General Regulations** governing the School of Graduate Studies.
- c. M.A. With Public and Applied Folklore Co-operative Education Work Terms:**
- i. Students choosing to do the M.A. with Public and Applied Folklore Co-operative Education option must normally complete a minimum of 24 credit hours plus two co-operative education work terms. Normally the required courses are:
    - 6010, 6020, and 6030, normally taken as in integrated foundation in the Fall semester.
    - 6740 or 6800 and at least one additional course selected from the following: 6551, 6740, 6760, 6790, 6800.
    - At least one of the following: 6060, 6100, 6120, 6130, 6200, 6210, 6220, 6250, 6260, 6360, 6720.
    - At least one of the following: 6070, 6300, 6310, 6350, 6370, 6400, 6410, 6420, 6430.
    - Three additional credit hours to be selected from courses in the groups listed above or from the other courses offered by the Department.
    - 601W and 602W.
  - ii. The dates for starting and finishing each work term are shown in the **University Diary**.
  - iii. A competition for work term employment is organized by Co-operative Education in cooperation with the Department of Folklore. Students may also obtain their own work term jobs outside the competition. Such jobs must be confirmed by letter from the employer and approved by the Head of Folklore and Co-operative Education on or before the first day of the work term. Work term jobs may be outside St. John's and possibly outside Newfoundland and Labrador. Students who do not wish to accept a work term job arranged by Co-operative Education shall be responsible for finding an alternative acceptable to the Head of Folklore and Co-operative Education. By entering the competition, students give permission for Co-operative Education to supply their Memorial University of Newfoundland transcripts to potential employers.
  - iv. Each work term placement will be supervised by the candidate's program Supervisor, the on-site Supervisor assigned by the employer, and Co-operative Education. The overall evaluation of the work term is the responsibility of the program Supervisor, on-site Supervisor, and Co-operative Education. The work term shall consist of two components:
    - On-the-job Student Performance as evaluated by the on-site Supervisor and Co-operative Education, in consultation with the program Supervisor.
    - A Work Report graded by the program Supervisor in consultation with the on-site Supervisor.
  - v. Evaluation of the work term will result in the assignment of one of the following final grades:
    - *Pass with Distinction*: Indicates EXCELLENT PERFORMANCE in both the work report and work performance.
    - *Pass*: Indicates that PERFORMANCE MEETS EXPECTATIONS in both the work report and work performance.
    - *Fail*: Indicates FAILING PERFORMANCE in the work report and/or the work performance.

If a student fails to achieve a final grade of *Pass* or *Pass with Distinction*, and provided the student has not failed to achieve a grade of 'B' or better in any program course, the student may request to repeat the work term component. The request will be considered by the Department Head in consultation with the program Supervisor and must include a proposal for a new work term placement. Only one work term repeat will be permitted in the student's program. Alternatively, the student may apply for a change of route to the thesis or comprehensive examination program option.

## 8.12.2 Courses

A selection of the following graduate courses will be offered to meet the requirements of candidates, normally after consultation with the Head of the Department or the Graduate Studies Administrator, and as far as the resources of the Department will allow. Courses are structured according to the categories of: Theories and Methods, Issues, Form and Performance, Special Topics, Regional, National and International Heritage, Social Identities, Public and Applied Folklore, Interdisciplinary Perspectives, and Required (Ph.D.):

### Co-operative Education Work Terms

601W Work Term I  
602W Work Term II

### Theories and Methods

6010 Survey of Folklore Genres and Processes  
6020 Field and Research Methods (may be offered in accelerated format)  
6030 Folklore Theories  
6040 Feminist Theories: Perspectives and Issues  
6080 Vernacular Theories  
6090 Ethnology

### Issues

6050 Issues in Folkloristics  
6060 Issues in Oral Tradition and Performance  
6070 Issues in Folklife

### Form and Performance

6100 Song and Music  
6120 Ballad  
6130 Folk Music Canons and Documentary Sound Recordings  
6200 Folktale  
6210 Legend  
6220 Personal Experience Narrative  
6250 Language and Play  
6260 Ethnography of Communications  
6300 Ethnography of Belief  
6310 Health Systems  
6350 Custom  
6360 Traditional Drama  
6370 Ritual, Festival and Public Display  
6400 Material Culture  
6410 Vernacular Architecture  
6420 Art and the Artifact  
6430 Food and Culture  
6720 Folklore and Literature

### Special Topics

6511-29 Special Topics in Folklore  
6550 Special Research in Folklore  
6551 Indigenous Expressive Cultures in Cross-cultural Encounter  
6552-69 Special Research in Folklore  
6570-79 Reading Course in Folklore

### Regional, National and International Heritage

6600 Folklore of Newfoundland  
6610 Folklore of Canada  
6620 Folklore of the United States  
6630 Folklore of the British Isles  
6640 Traditional Culture of Scotland  
6650 Culture and Traditions of Ireland  
6660 Folklore of the Francophone Regions  
6690 International Folklore

### Social Identities

6510 Occupational Folklife  
6730 Folklore and Gender  
6770 The Global and the Local  
6780 Ethnicities

### Public and Applied Folklore

6380 Perspectives on Cultural Tourism  
6740 Public Sector Folklore  
6760 Archiving  
6790 Museums: Perspectives and Practices  
6800 Applied Folklore

### Interdisciplinary Perspectives

6700 Folklore and Culture  
6710 Oral Tradition and Oral History  
6750 Popular Culture: Theory and Debate

### Required (Ph.D.)

7000 Advanced Folkloristics I  
7100 Advanced Folkloristics II Research and Ethnography

Note: Credit may not be obtained for both 6010 and the former 6110; 6020 and the former 6111; 6030 and the former 6112; 6100 and the former 6430; 6120 and the former 6445; 6300 and the former 6230; 6350 and the former 6230; 6400 and the former 6501; 6720 and the former 6460.

## 8.13 French

[www.mun.ca/hss](http://www.mun.ca/hss)  
[www.mun.ca/frenchandspanish](http://www.mun.ca/frenchandspanish)

### Head of the Department

to be determined

### 8.13.1 Program of Study

1. The Degree of Master of Arts in French Studies may be completed by full-time or part-time study. "French Studies" may take the form of the study of the French language or of francophone literature, including the study of literary history, criticism, or theory. It may also include the study of French-language cinema or of other aspects of francophone civilization
2. Candidates who are practicing teachers of French and wish to pursue French studies in conjunction with studies of the teaching of French may opt to pursue the Master of Arts and Education (Education and Francophone Literatures and Cultures) degree jointly offered by the Faculty of Humanities and Social Sciences, Department of French and Spanish, and the Faculty of Education.
3. Applicants for the M.A. program in French Studies are normally expected to have completed the Honours Degree with a second-class standing or better. An applicant who does not hold an Honours Degree or its equivalent may be required to complete such additional undergraduate courses as the Department considers necessary, prior to admission or as part of the program.

4. The M.A. program in French Studies will consist of 15 credit hours in graduate courses (normally requiring 2 or 3 semesters of full-time study), plus research activities and a thesis of approximately 80 pages. The 15 credit hours shall include 6008 and 6009, normally completed in consecutive semesters. The remaining 9 credit hours shall be obtained by completion of three courses chosen from those in three of the five groups listed in the **Courses** section below. The language of the thesis will be French. The thesis proposal, after being approved by the Supervisor, will be submitted by the candidate, normally before the end of the third semester of studies, to the Departmental Graduate Studies Committee, who will decide whether or not to grant its approval.
5. Each candidate's program of study must be approved by the Departmental Graduate Studies Committee.
6. A paper drawn from the thesis will be presented at a Departmental seminar or in another forum approved by the Departmental Graduate Studies Committee. Normally, this presentation will take place at some time between submission of the final draft thesis to the Supervisor and the submission of the thesis to the School of Graduate Studies.
7. The approval of the Departmental Graduate Studies Committee must be obtained before the thesis is forwarded to the School of Graduate Studies for examination.
8. In the final version of the M.A. thesis and other written assignments for M.A. courses, the quality of written French must be of a standard acceptable to the Department as represented by the Graduate Studies Committee. Normally, this will mean that the final version of such assignments will be free of spelling, lexical, and grammatical errors, and of improper use of stylistic conventions. In the case of the M.A. thesis, this requirement applies to the version submitted for examination.

### 8.13.2 Courses

A selection of the following graduate courses will be offered to meet candidates' requirements, as far as the resources of the Department will allow. Individual courses, excluding French 6900, may be offered in accelerated format outside of the regular semester of session timeframe when being delivered as part of the Summer Institute for French Teachers (SIFT):

6008\* Literary Methodology and Theory I

6009\* Literary Methodology and Theory II

#### **Historiographical, Genetic, Thematic, Hermeneutical or other historical or critical approaches to French Studies**

6032 Genetic Criticism and Exegesis

6102 History of the French Language

#### **Psychoanalytical, Ethnological or Anthropological approaches to French Studies**

6020 Literature and Psychoanalysis

6021 Mythocriticism

6130-39 Personal/Intimate Literature

#### **Sociological or Socio-historical approaches to French Studies**

6022 History, Society, Ideology and Texts

6101 The Female Voice: Women's Writing and its Contribution to the Development of French and Francophone Texts

6110-19 Paraliterature and Traditional Culture

#### **Linguistic, Semiotic, Poetic, Rhetorical or Pragmatic approaches to French Studies**

6011 General Theory of the French Language

6030 Grammar of the Text

6031 Narratology

6140-49 Genres and Discursive Forms

#### **Other approaches to French Studies**

6120-29 Texts/Images/Sounds

6150-59 Special Topics

#### **French and Spanish Courses for Students in Other Disciplines**

French 6900 Reading in French

Spanish 6900 Reading in Spanish

Note: \*Credit may not be obtained for both French 6008 and the former French 6006; or for both French 6009 and the former French 6006.

#### **Français**

[www.mun.ca/hss](http://www.mun.ca/hss)

[www.mun.ca/frenchandspanish](http://www.mun.ca/frenchandspanish)

#### **Directrice du Département**

à déterminer

1. Le diplôme de Maîtrise ès Arts en Études françaises sanctionne des études à temps plein ou à temps partiel. Les études françaises comprennent l'étude de la langue et de la littérature et l'étude de l'histoire, de la critique ou de théorie littéraire, ainsi que l'étude du cinéma ou d'autres aspects des civilisations francophones.
2. Les enseignants et enseignantes de français qui veulent poursuivre leurs études en français et en didactique du français peuvent choisir le programme de Maîtrise ès Arts et Éducation (Enseignement des littératures et cultures francophones) offerte par la Faculté des Arts, le Département d'études françaises et hispaniques et la Faculté d'Éducation.
3. Pour être admis au programme de Maîtrise ès Arts en Études françaises, l'étudiant doit normalement détenir un diplôme de baccalauréat avec une spécialisation en Études françaises et une note moyenne d'au moins B. Le département pourra obliger toute personne ne détenant pas ce diplôme ou son équivalent à suivre certains cours du premier cycle avant d'être admis au programme de deuxième cycle ou pendant ses études de maîtrise.
4. L'option en Études littéraires comprend quinze crédits de cours, ce qui exigera normalement 2 ou 3 trimestres d'études à temps plein et un mémoire d'environ 80 pages rédigé en français. Tous les candidats compléteront et le Fr.6008 et le Fr.6009. Normalement, ces deux cours devront être complétés en deux trimestres consécutifs. En plus, il faudra compléter 3 cours choisis parmi ceux qui font partie de 3 des 5 groupes identifiés dans la section **COURS**. Le projet de mémoire, qui est approuvé par son directeur, doit être officiellement présenté par le candidat au Comité des Études de deuxième cycle, avant la fin du troisième trimestre, pour son approbation.
5. Le programme d'études du candidat doit être approuvé par le Comité des Études de deuxième cycle.
6. Une communication tirée du mémoire sera présentée dans le cadre des séminaires départementaux ou dans une autre réunion approuvée par le Comité des Études de deuxième cycle. Normalement, cette présentation se fera entre la soumission à son directeur et sa soumission définitive à l'École des Études supérieures.
7. Avant d'être soumis à l'École des Études supérieures, le mémoire doit être proposé au Comité des Études de deuxième cycle, qui

doit en autoriser le dépôt.

8. Dans la version finale du mémoire et des autres travaux préparés pour les cours de maîtrise, la qualité du français écrit doit être d'un niveau acceptable au département, qui est représenté par le Comité des Études de deuxième cycle. Ainsi, la version finale de ces travaux ne contiendra-t-elle pas, normalement, d'erreurs orthographiques, lexicales, grammaticales, stylistiques et protocolaires. Pour ce qui est du mémoire, cette exigence s'applique à la version remise aux examinateurs.

### Cours

Un choix des cours de deuxième cycle suivants sera offert afin de répondre aux besoins des étudiants inscrits au programme de maîtrise selon les ressources disponibles au département. Certains cours, excepté le Français 6900, peuvent être enseignés sous format accéléré en dehors du calendrier habituel d'un semestre ou d'une session quand ils sont offerts dans le cadre de l'Institut d'Été pour les Enseignants de Français (SIFT, Summer Institute for French Teachers):

6008\* Méthodologie et théorie de la littérature I

6009\* Méthodologie et théorie de la littérature II

#### Approche historiographique, génétique, thématique, herméneutique ou autrement historique ou critique:

6032 Génétique et critique

6102 Histoire de la langue française

#### Approche psychanalytique, ethnologique ou anthropologique:

6020 Psychanalyse et littérature

6021 Mythocritique

6130-39 Littérature personnelle/intime

#### Approche sociologique ou socio-historique:

6022 Histoire, société, idéologie et textes

6101 La voix féminine et le féminisme

6110-19 Paralittérature et cultures traditionnelles

#### Approche linguistique, sémiotique, poétique, rhétorique ou pragmatique:

6011 Théorie générale de la langue française

6030 Grammaire du texte

6031 Narratologie

6140-49 Discours et genres

#### Autres approches aux Études françaises:

6120-29 Textes/Images/Sons

6150-59 Sujets spéciaux

#### Cours de français et d'espagnol pour étudiants d'autres disciplines

Français 6900 Lecture en français

Espagnol 6900 Lecture en espagnol

\* Nota / Note: *Les étudiants ne peuvent obtenir de crédit pour le Français 6008 et le Français 6006 (désormais supprimé) ni pour le Français 6009 et le Français 6006.*

## 8.14 Geography

[www.mun.ca/hss](http://www.mun.ca/hss)

[www.mun.ca/geog](http://www.mun.ca/geog)

### Professor and Head of the Department

N. Catto

#### 8.14.1 Program of Study

1. The degrees of Master of Arts and Master of Science are offered in Geography by full-time or part-time study.
2. Admission requirements are set forth in the **General Regulations** of the School of Graduate Studies and Degree Regulations for **Master of Arts** and **Master of Science**.
3. The deadline for submission of applications for admission is January 15. Candidates will normally commence their programs in the Fall semester.
4. An applicant will be admitted to a graduate program only if a faculty member agrees to act as Supervisor. A supervisory committee will be established after admission, normally consisting of the Supervisor and two other individuals, one of whom will normally be a member of the Department.
5. Major research areas for graduate study at the master's level are cultural, political, historical, economic, urban, resource management, community and regional development, geomorphology, Quaternary environments, climatology, and geographic information sciences.
6. Candidates will register for the M.A. program if their fields of interest lie in an area of Human Geography or for the M.Sc. if their fields of interest are in Physical Geography or Geographic Information Sciences.
7. It is expected that the program of study and research for the M.A. or M.Sc. will normally be completed in a maximum of two years of full-time work, or three years of part-time work.
8. Candidates must successfully complete a minimum of 12 credit hours of graduate program courses with a minimum grade of B in each. Geography 6000 and 6001 will be required courses for all candidates who have not already completed equivalent courses at the Honours or post-graduate level.
9. Candidates whose undergraduate degree is not in geography will normally be required to complete some additional undergraduate program courses during their first year of study, in addition to the required graduate program courses. Normally four such undergraduate courses will be required, and a minimum grade of 70% must be obtained in each.
10. Each candidate will be required to present a seminar on his or her research to the Department.
11. Each candidate must submit a thesis based on his or her own original research. This thesis will be examined in accordance with the **General Regulations** of the School of Graduate Studies.

### 8.14.2 Courses

A selection of the following graduate courses will be offered to meet the requirements of candidates as far as the resources of the Department will allow.

6000 Development of Geographical Thought and Practice I  
 6001 Development of Geographical Thought and Practice II  
 6002 Directed Readings in Geography  
 6100 Research Techniques in A Selected Field of Geography I  
 6101 Research Techniques in A Selected Field of Geography II  
 6120 Geospatial Modelling and Analysis  
 6150 Environmental Remote Sensing and Image Analysis  
 6200 Economic Geography I  
 6201 Economic Geography II  
 6204 Sustainable Community and Regional Development  
 6250 Conservation and Sustainability of Natural Resources  
 6251 Survey Design, Questionnaire Development and Techniques of Data Collection  
 6300 Problems in Fisheries Geography  
 6400 Fluvial Geomorphology  
 6401 Glacial Geomorphology  
 6402 Coastal Geomorphology  
 6410 Climatology  
 6420 Quaternary Geography  
 6430 Biogeography  
 6500 Cultural Geography  
 6600 Historical Geography  
 6700 Political Geography  
 6800 Urban Geography  
 6821 Advanced Computer Mapping  
 6900 Graduate Seminar in Regional Geography  
 6990-95 Special Topics in Geography

### 8.15 German

[www.mun.ca/hss](http://www.mun.ca/hss)  
[www.mun.ca/german](http://www.mun.ca/german)

**Associate Professor and Head of the Department**  
 J. Buffinga

#### 8.15.1 Program of Study

The degree of Master of Arts (M.A.) is offered in German Language and Literature and may be taken by full-time or part-time study.

1. Candidates for the M.A. degree in German are normally expected to have completed an Honours degree with a minimum of second-class standing. In addition to the general requirements, candidates will be expected to have acquired a superior knowledge of the spoken and written language as determined by the Department prior to admission.
2. Students will be required to demonstrate superior German language skills as determined by the Department prior to admission to the program.
3. As part of the admissions process, prospective students must submit a non-binding outline of the area in which they would like to write their thesis.
4. Students may choose from two modes of completing the M.A. program, in accordance with the Graduate Studies **Regulations Governing the Degree of Master of Arts**:
  - a. Candidates complete at least 18 credit hours of course work and submit a thesis. The entire program of study and research will normally take one year of full-time study. The M.A. thesis will be based on research conducted by the student.
    - i. The thesis will be examined in accordance with **General Regulation, Thesis and Reports**.
    - ii. Normally, one of the assigned examiners of the thesis will be external to the Department.
  - b. Candidates complete at least 18 credit hours of course work and write a comprehensive examination. The entire program of study and research will normally take one year of full-time study.
    - i. The comprehensive examination shall be examined in accordance with the **General Regulations, Comprehensive Examinations**.
    - ii. Material to be covered on the M.A. comprehensive exam is normally determined by consultation between the student and the Head of the Department (or designate). The exam is written in two sittings: one exam will cover the student's chosen area and the other will cover the student's reading list and literary terminology. A final component of the comprehensive exam is an oral examination on the eras or issues covered in the written portion of the exam.
5. All students, regardless of the mode of completing the requirements for the M.A., will be required to complete German 6103.

#### 8.15.2 Courses

A selection of the following graduate courses will be offered to meet the requirements of candidates, as far as the resources of the Department will allow.

6000 Issues in Modern Technology, Literature and Culture  
 6001 Issues in Literature on the Edges of Society  
 6100 Issues in the History of the German Language  
 6103 Bibliography and Research Methods  
 6200 Issues in Early German Literature and Culture I  
 6201 Issues in Early German Literature and Culture II  
 6300 Issues in Early Modern German Literature and Culture I  
 6301 Issues in Early Modern German Literature and Culture II  
 6800 Issues in Modern German Literature and Culture I

6801 Issues in Modern German Literature and Culture II  
6900 Issues in Contemporary German Literature and Culture I  
6901 Issues in Contemporary German Literature and Culture II  
6903 Issues in Propaganda and Censorship  
7000 Special Subject or Author I  
7001 Special Subject or Author II  
7002-7020 Special Topics in German Studies

## 8.16 History

[www.mun.ca/hss](http://www.mun.ca/hss)  
[www.mun.ca/history](http://www.mun.ca/history)

### Assistant Professor and Head of the Department

T. Bishop-Stirling

The degrees of Doctor of Philosophy and Master of Arts are offered in History by full-time or part-time study.

### 8.16.1 Program of Study

1. The Department of History offers M.A. programs in a broad range of geographical and thematic areas. Students in the M.A. program will choose a thesis or non-thesis option.
2. M.A. candidates who choose the non-thesis option shall complete a minimum of 24 credit hours, 18 of which shall normally be 6190, 6200, and 6999.
3. M.A. candidates who choose the thesis option shall complete 9 credit hours, 6 of which shall normally be 6190 and 6200, plus a thesis.
4. Students will be required to successfully complete HIST 6190 prior to taking HIST 6200.
5. Students will be required to successfully complete HIST 6200 before writing the Major Research Paper or thesis.
6. Where a student's major research project requires him or her to read a language other than English, he or she must demonstrate a reading knowledge of this language through an exam or other method subject to the approval of the Graduate Committee.

### 8.16.2 Courses

A selection of the following graduate courses will be offered to meet the requirements of candidates as far as the resources of the Department will allow.

6000 Advanced Studies in Newfoundland History  
6010 Advanced Studies in Canadian History  
6020 Advanced Studies in the History of the United States  
6030 Advanced Studies in French History  
6040 Advanced Studies in British History  
6050 Advanced Studies in German History  
6060 Advanced Studies in North Atlantic History  
6070 Advanced Studies in Social History  
6075 Advanced Studies in Labour and Working-Class History  
6080 Advanced Studies in Intellectual History  
6090 Advanced Studies in Women's History  
6095 Advanced Studies in Ethnohistory  
6100 Advanced Studies in Military History  
6105 Advanced Studies in Diplomatic History  
6110 Advanced Studies in Maritime History  
6120 Advanced Studies in Economic and Business History  
6125 Medical Science and Social Responsibility in Health Care: Aspects of Medical History (*cross-listed as Medicine 6420*)  
6130 Quantification and Measurement in History  
6140-59 Research in Special Topics  
6160-79 Reading Courses (Special Topics)  
6190 Theory and Method  
6200 Masters Seminar I  
6999 Masters Research Paper (12 credit hours)

## 8.17 Linguistics

[www.mun.ca/hss](http://www.mun.ca/hss)  
[www.mun.ca/linguistics](http://www.mun.ca/linguistics)

### Associate Professor and Head of the Department

P. Branigan

The degrees of Master of Arts and Doctor of Philosophy are offered in Linguistics.

### 8.17.1 Program of Study

1. The Linguistics Department offers the M.A. program with both a thesis and a non-thesis option. The M.A. with thesis option is intended for those who have completed an undergraduate major in Linguistics with satisfactory standing (a B+ average in Linguistics courses). Students interested in the thesis option who have an excellent undergraduate record and a well-defined research plan, yet who do not possess the equivalent of an undergraduate major, will be required to take additional undergraduate and/or graduate courses in Linguistics. Other students are encouraged to apply for the M.A. without thesis option.
2. The M.A. with thesis option is normally a two-year program consisting of at least 15 credit hours of graduate courses (including Linguistics 7000 and 7001), plus a thesis.
3. The M.A. without thesis option is normally a two-year program consisting of at least 21 credit hours of graduate courses (including Linguistics 7000 and 7001), plus a research project (Linguistics 6999), which consists of a major research paper in an approved area followed by an oral examination.

4. The M.A. in Linguistics requires proficiency in a language other than the candidate's first language, as demonstrated by a minimum B grade in a second-year undergraduate language course, or performance satisfactory to the Department in an arranged reading proficiency test. A working or structural knowledge of other languages may also be required for particular programs (e.g., Latin, Greek or Sanskrit for historical Indo-European linguistics, or courses in the series Linguistics 6050-59 or the former 6010-6041).
5. All M.A. students are advised to consult the Linguistics department's Graduate Handbook for details on program requirements and for general information relating to the graduate program.

### 8.17.2 Courses

A selection of the following graduate courses will be offered to meet the requirements of students, as far as the resources of the Department will allow. Full information is to be found in the Department's Graduate Handbook.

6050-54 Structure of a North American Aboriginal Language (*credit restriction: Except where an exemption is supplied by the Head of the Department, a student may not obtain credit for more than one course in the 6050-54 series. Students may not obtain credit for any of the previously offered 6010, 6011, 6020, 6021, 6030, 6031, 6040, 6041 in addition to a course in the 6050-54 series.*)

6055-59 Structure of an Uncommonly-Taught Language (*credit restriction: Except where an exemption is supplied by the Head of the Department, a student may not obtain credit for more than one course in the 6055-59 series.*)

6100 Issues in Morphosyntax (*credit may not be obtained for both Linguistics 6100 and the former 6001*)

6110 Selected Topics in Transformational Grammar

6115 Topics in the Syntax of a Selected Language (*prerequisite: 6001 or 6110*)

6150 Principles of Language Acquisition

6151 Selected Topics in Language Acquisition (*prerequisite: Permission of the instructor*)

6200 Phonological Theory

6201 Selected Topics in Phonology (*prerequisite: 6200*)

6210 Sociolinguistics (*credit restriction: a student may not obtain credit for both 6210 or the former 6211*)

6212 Selected Topics in Language and Gender

6220 Areal and Temporal Variations in Language

6300-9 Special Subjects

6350 General Romance Linguistics

6390 Franco-Canadian

6400 Comparative and Historical Linguistics

6401 Morphosyntactic Change (*prerequisite: 6400*)

6403 Etymology (*cross-listed as English 6403*)

6410 Comparative Structure of a Selected Language Family (*prerequisite: 6403 or the former 6011, 6031*)

6420 English Dialectology I

6421 English Dialectology II

6430 Selected Topics in Linguistic Variation (*prerequisite: 6220 or the former 6211*)

6500 Field Methods

6601 Modern Linguistic Theories

6700 Experimental Phonetics

6701 Selected Topics in Experimental Phonetics (*prerequisites: 6200, 6700*)

6800 Selected Topics in Morphology

6880 Selected Topics in Semantics

6999 M.A. Research Project

7000 Seminar in Research Methods

7001 Analytical Issues in Linguistics

7100 Topics in North American Native Languages (*prerequisites: a course from series 6050-6054 or the former 6011, 6031, 6041*)

7200 Advanced Topics in Syntax (*prerequisites: 6110, plus either 6001 or 6115*)

7400 Seminar in Comparative and Historical Linguistics (*prerequisite: 6400 or 6410*)

7430 Seminar in Linguistic Variation (*prerequisite: 6430*)

7800 Seminar in Morpho-semantics (*prerequisite: 6800*)

7900-03 Special Topics in Linguistics

Note: *Appropriate equivalent credits may be given for courses taken at the Summer Institute of the Linguistic Society of America, or a similar institute. Students are encouraged to attend these institutes. They should, however, consult the Head of the Department as to what courses may be appropriate for credit.*

## 8.18 Philosophy

[www.mun.ca/hss](http://www.mun.ca/hss)

[www.mun.ca/philosophy](http://www.mun.ca/philosophy)

**Professor and Head of the Department**

S. McGrath

### 8.18.1 Program of Study

The Degree of Master of Arts is offered in Philosophy by full-time or part-time study. The program is designed so that it may be completed in one academic year (three semesters) of full-time study.

The candidate must complete 18 credit hours - 3 credit hours from 6000, 12 credit hours from 6011-6016, any 3 credit hours from 6101-6102 - and a thesis.

Normally, a full-time candidate will complete all the 18 credit hours and submit a thesis proposal by the end of the second semester of study. A minimum of one additional semester will be spent in completing the balance of the program.

### 8.18.2 Courses

6000 Graduate Seminar

**Author Seminars**

6011 Ancient and Medieval Philosophy

6012 Modern Philosophy

6013 Contemporary Philosophy

### Area Seminars

6014 Metaphysics  
6015 Theory of Knowledge  
6016 Ethical and Political Theory

### Tutorials

6040-6099 Special Topics  
6101 Selected Texts  
6102 Current Issues

## 8.19 Political Science

[www.mun.ca/hss](http://www.mun.ca/hss)  
[www.mun.ca/posc](http://www.mun.ca/posc)

### Professor and Head of the Department

L. Ashworth

### 8.19.1 Program of Study

The Degree of Master of Arts is offered in Political Science by full-time and part-time study.

The degree of Master of Arts (M.A.) in Political Science may be taken by course work and thesis, course work and internship, or course work and research paper. The thesis, internship, and research paper options are available to full-time students. The M.A. with thesis is a two-year program. The internship and research paper options are one year programs for full-time students. The thesis and research paper options are open to part-time students.

#### 1. M.A. with Thesis:

- a. Students choosing the M.A. with thesis must complete a minimum of 12 credit hours in political science graduate program courses of which 3 credit hours must be attained from either POSC 6000 or 6010. Further courses beyond the minimum number may be required, depending on the background and needs of the student.
- b. Each student choosing the thesis option will submit a thesis on a subject that has been approved by the supervisory committee of the Department.
- c. Students applying for the thesis option must submit a brief (one page maximum) statement of their research interest with their application.

#### 2. M.A. with Internship:

- a. Students choosing the M.A. with internship must complete a minimum of 24 credit hours in political science graduate program courses of which 12 credit hours must be attained from POSC 6030, 6031, and 6790 and 3 credit hours must be attained from either POSC 6000 or 6010. Further courses beyond the minimum number may be required, depending on the background and needs of the student.
- b. Each student choosing this option will complete, normally in the Spring semester, a one-semester, full-time internship, 6030, with a political organization, government agency, or voluntary agency. Students registering for 6030 must also register for its co-requisite, 6031. The placement must normally be selected from a list of approved organizations that is maintained by the Department.

#### 3. M.A. with Research Paper:

- a. Students choosing the M.A. with research paper must complete a minimum of 24 credit hours in political science graduate program courses of which 9 credit hours must be attained from either POSC 6999 and 3 credit hours must be attained from POSC 6000 or 6010.
- b. The selection of a topic for the research paper must be approved by a faculty supervisor who will be chosen in consultation with the Department Head. The paper will be graded by the supervisor and one other member of the faculty, either from within the Department or the Department of a cognate discipline.

### 8.19.2 Courses

A selection of the following graduate courses will be offered to meet the requirements of candidates, as far as the resources of the Department will allow.

6000 Political Science Concepts  
6010 Political Science Methods  
6020 Research Design  
6030 Internship  
6031 Applied Political Research (6 credit hours)  
6100 Political Philosophy  
6200 International Politics  
6300 Comparative Politics  
6301 European Politics and Public Policy  
6350 Political Economy  
6400 Political Development  
6430 Latin American Politics  
6500 Political Behaviour  
6600 Newfoundland Politics  
6700 Canadian Politics  
6710 Intergovernmental Relations  
6720 Local Politics  
6740 Public Administration  
6770 Canadian Provincial Politics  
6780 Politics of the Atlantic Provinces  
6790 Public Policy Process  
6900-10 Special Topics  
6999 Master's Essay (9 credit hours)

## 8.20 Religious Studies

www.mun.ca/hss  
www.mun.ca/relstudies

### Professor and Head of the Department

K.I. Parker

### 8.20.1 General Information

The degree of Master of Arts (M.A.) is offered in Religious Studies and may be taken by full-time or part-time study.

Candidates for the M.A. in Religious Studies may choose between the M.A. with Thesis option and the M.A. with a Project option. Candidates must specify which M.A. stream they wish to pursue upon entry into the program.

1. Admission requirements are set forth in the **Regulations Governing the Degree of Master of Arts**. An applicant should have completed a minimum of 45 credit hours in Religious Studies courses at the undergraduate level with at least the grade of B in each. An applicant should have completed a minimum of 45 credit hours in Religious Studies courses at the undergraduate level with at least the grade of B in each. An applicant's overall undergraduate program must represent, to the satisfaction of the Department, a solid groundwork for graduate studies.
2. A candidate who does not hold an Honours Degree or its equivalent shall be required to complete such additional undergraduate courses as the Department may deem necessary. These courses may be required as prerequisites to admission to the program, or as an additional constituent part of the program, at the discretion of the Department.
3. Upon acceptance into the program, each candidate will be assigned a Supervisor, whose duty it shall be to assist the candidate.
4. Students will be required to satisfy the Department as to proficiency in any language or technical facility deemed necessary by the Graduate Studies Committee of the Department for successful completion of the thesis or project.

### 8.20.2 Program of Study

#### 1. Thesis Option

- a. Normally, the Master of Arts program with thesis option should take two years to complete, the first of which is to be spent primarily on course work and preparation of a thesis proposal. A student accepted on a part-time basis would normally be expected to take three to five years to complete the program.
- b. Students in the M.A. program with thesis option shall normally complete a thesis and a minimum of 12 credit hours in course work.
- c. Students may write a thesis in one of the following areas: Hinduism, classical Confucianism, philosophical Daoism, Chinese and North American Buddhism, Buddhism and psychology, Judaism, Christianity, Hebrew Bible, New Testament, religious history of Canada, religious history of Newfoundland and Labrador, medieval religious thought, religion and culture (including pop culture), New Age religious movements, ethics and social justice, philosophy of religion.
- d. Before a student begins writing his or her thesis, he/she should submit a research proposal to the Graduate Studies Committee of the Department for approval.
- e. Students in the M.A. with thesis option must complete four required courses. Typically the four required courses are: RS 6100 Methods and Theories in Religious Studies; RS 6110 Thesis Writing; RS 6120 Studies in Religious Texts; and RS 6130 Religious Contexts.

#### 2. Course-based M.A. with a Project Option

- a. Normally, the Master of Arts program with a project option should take one year (three semesters) to complete, the first two semesters spent on course work and the third semester on completing the project.
- b. Before a student begins writing his or her project, he/she should submit a research proposal to the Graduate Studies Committee of the Department for approval.
- c. Students in the M.A. with a project option must complete five required courses and at least one other from the course list. This may be from a cognate discipline (upon approval). Typically, the five required courses are: RS 6100 Methods and Theories in Religious Studies; RS 6110 Thesis Writing; RS 6120 Studies in Religious Texts; RS 6130 Religious Contexts; and RS 699A/B Advanced Research in Religious Studies.

### 8.20.3 Courses

6100 Methods and Theories in Religious Studies (*credit may not be obtained for both Religious Studies 6100 and the former Religious Studies 6000*)

6110 Thesis Writing

6120 Studies in Religious Texts

6130 Religious Contexts

6220 Selected Topics in New Testament

6230 Selected Topics in Hebrew Bible/Old Testament

6330 Selected Topics in Judaism

6340 Selected Topics in East Asian Religious Traditions

6350 Selected Topics in South Asian Religious Traditions

6720 Selected Topics in the History of Christianity

6730 Selected Topics in the Religious History of Canada

6740 Selected Topics in the Religious History of Newfoundland and Labrador

6750 Selected Topics in Medieval Religious Thought

6820 Selected Topics in Christian Ethics

6830 Selected Topics in Religion and Culture

6840 Selected Topics in the Philosophy of Religion

6850 Selected Topics in New Age Religious Movements

6900-6910 Special Topics in the Study of Religion

699A/B Advanced Research in Religious Studies (9 credit hours)

## 8.21 Sociology

[www.mun.ca/hss](http://www.mun.ca/hss)

[www.mun.ca/soc](http://www.mun.ca/soc)

### Associate Professor and Head of the Department

A. Craig

The Degrees of Master of Arts and Doctor of Philosophy can be earned through full-time or part-time study. Area of department specialization include: Social Theory; Sociology of Culture; Criminology; Environmental Sociology; Social Inequality; Sociology of Gender; Sexuality; Health, including Occupational Health; Development; Work; Political Sociology; and Maritime Sociology. Graduate courses are taught as tutorials or small seminars.

### 8.21.1 Program of Study

1. Minimum admission requirements are a B average in undergraduate studies with a good undergraduate background in Sociology.
2. The M.A. Degree with thesis requires the completion of 15 credit hours in graduate courses, normally including the Sociology Graduate Seminar (6880), Advanced Quantitative Methods (6040), Advanced Qualitative Methods (6041), Social Theory (6150), one elective, and a thesis. In the case of full-time students, the M.A. with thesis is normally completed in two years. The first year is devoted to the completion of the required courses and the definition of the thesis research topic. The second year is devoted to the completion of the thesis and presentation of the thesis at a Department seminar.
3. The M.A. Degree by Master's Research Paper requires the completion of 24 credit hours, normally including the Graduate Seminar (6880), Advanced Quantitative Methods (6040), Advanced Qualitative Methods (6041), Social Theory (6150), two electives, and the Master's Research Paper (6900). The coursework should be taken during the first two semesters of full-time study. The Master's Research Paper (Sociology 6900) should be written in the third semester of full-time study. The Master's Research Paper will be supervised by a faculty member and must be presented at a Departmental seminar. The Supervisor and one other member of the Department will grade the Master's Research Paper.

### 8.21.2 Courses

A selection of the following graduate courses will be offered to meet the requirements of candidates, as far as the resources of the Department will allow.

6040 Advanced Quantitative Methods  
6041 Advanced Qualitative Methods  
6042-49 Special Topics in Advanced Sociology  
6090-94 Special Area in Sociology  
6120 Social Organization  
6130 Social Stratification  
6140 The Community  
6150 Social Theory  
6160 Theory Construction and Explanation in Sociology  
6240 Sociology in Medicine  
6280 Social and Economic Development  
6300 Maritime Sociology  
6310 Political Sociology  
6320 Gender and Society  
6330 Science and Technology  
6340 Comparative North Atlantic Societies  
6350 Environmental Sociology  
6360 Sociology of Work  
6370 Feminist Theory and Methods  
6380 Women, Nature, Science and Technology  
6390 Sociology of Culture  
6610 Socialization  
6620 Current Topics in Social Behaviour  
6880 Sociology Graduate Seminar  
6900 Master's Research Paper (6 credit hours)

## 9 Regulations Governing the Degree of Master of Arts and Education (Education and Francophone Literatures and Cultures)

[www.mun.ca/hss](http://www.mun.ca/hss)  
[www.mun.ca/educ](http://www.mun.ca/educ)

### Professor and Dean of Humanities and Social Sciences

L. Phillips

### Professor and Dean of Education

K. Anderson

The degree of Master of Arts and Education (Education and Francophone Literatures and Cultures) is jointly offered by the Faculty of Humanities and Social Sciences and the Faculty of Education, and is offered by full-time or part-time study.

These regulations should be read in conjunction with the **General Regulations** of the School of Graduate Studies of Memorial University of Newfoundland.

The Administrative Committee is responsible for the program. The Committee shall be comprised of the Associate Dean, Graduate Programs in the Faculty of Education (or delegate), the Head of the Department of French and Spanish (or delegate) and one appointed faculty member. The faculty member shall come from either the Faculty of Education or the Department of French and Spanish in alternating years. The Administrative Committee is responsible for admissions and advising students on course selection when appropriate.

### 9.1 Qualifications for Admission

To be considered for admission to the Master of Arts and Education (Education and Francophone Literatures and Cultures), an applicant shall normally hold a Bachelor of Education degree, with a concentration in French, from an institution recognized by Senate. Applicants should have a minimum 'B' standing or an average of 70% in the last 30 courses attempted and two years of experience teaching French. An appropriate level of proficiency in French is required, and the applicant's level of competence will be evaluated by the Administrative Committee.

### 9.2 Program of Study

1. Candidates for the Master of Arts and Education (Education and Francophone Literatures and Cultures) may choose one of two program options:
  - Option I. Project Route
  - Option II. Comprehensive Course Route
2. All candidates shall be required to complete:
  - French 6800 Littératures francophones: Théorie et pratique/Francophone literatures: Theory and practice
  - French 6810 Cultures francophones: Théorie et pratique/Francophone Cultures: Theory and practice
  - Education 6100 Research Designs and Methods in Education
  - Six credit hours from Memorial University of Newfoundland, Department of French and Spanish graduate course offerings as deemed appropriate by the Administrative Committee.
  - Nine credit hours selected from:
    - Education 6668 Current Issues in Second Language Education
    - Education 6669 Graduate Seminar in Second Language Teaching and Learning
    - Education 6673 Second Language Teaching, Learning and Curriculum
    - Education 6674 Research in Second Language
  - Three credit hours from other Memorial University of Newfoundland, Faculty of Education graduate course offerings as deemed appropriate by the Administrative Committee.
3. Students choosing Option I must also complete:
  - Education 6392 Project in Curriculum, Teaching and Learning Studies
4. Students choosing Option II must also complete:
  - Three credit hours from Memorial University of Newfoundland, Department of French and Spanish graduate course offerings as deemed appropriate for each candidate's program by the Administrative Committee.
  - Education 6390 Research and Development Seminar in Curriculum, Teaching and Learning Studies

### 9.3 Evaluation

1. In order to continue as a candidate for the degree of Master of Arts and Education (Education and Francophone Literatures and Cultures), a candidate shall obtain an A or B grade in each required course. A candidate who receives a grade of C in any required course must repeat that course and obtain a minimum grade of B. In the case of an elective course, a suitable replacement course acceptable to the Administrative Committee may be substituted for the failed course. Only one such repetition/replacement shall be permitted on the candidate's graduate program. Should a grade of less than B be obtained in the repeated/replacement course, or any other program course, the candidate shall be required to withdraw from the program.
2. When the Administrative Committee has determined, through consultation with the candidate, graduate course instructors, and the project supervisor, if applicable, that the candidate's work has fallen below satisfactory level, they may request the Dean of the Faculty of Education and the Head of the Department of French and Spanish recommend to the Dean of Graduate Studies that the candidate's program be terminated.

### 9.4 Courses

Course descriptions for graduate course in Education are available at [www.mun.ca/educ/grad/fee\\_deadline.php](http://www.mun.ca/educ/grad/fee_deadline.php).

French 6800 Littératures francophones: Théorie et pratique/Francophone literatures: Theory and practice

French 6810 Cultures francophones: Théorie et pratique/Francophone Cultures: Theory and practice

French 6820 Littérature de jeunesse: Théorie et pratique/Children's and Young Adult Literature: Theory and Practice

Education 6100 Research Designs and Methods in Education

Education 6390 Research and Development Seminar in Curriculum, Teaching and Learning Studies

Education 6392 Project in Curriculum, Teaching and Learning Studies (6 credit hours)

Education 6668 Current Issues in Second Language Education

Education 6669 Graduate Seminar in Second Language Teaching and Learning

Education 6673 Second Language Teaching, Learning and Curriculum (*credit may not be obtained for both Education 6673 and the former 6665 or 6667*)

Education 6674 Research in Second Language

Other courses offered for the Master of Education program and the Master of Arts in French Studies program as deemed appropriate by the Administrative Committee.

### Règlements de la Maîtrise ès Arts et Éducation (Enseignement des littératures et cultures francophones)

[www.mun.ca/hss](http://www.mun.ca/hss)

[www.mun.ca/educ/home](http://www.mun.ca/educ/home)

#### Doyenne des Humanités et des Sciences Sociales

L. Phillips

#### Professeur et Doyen d'Éducation

K. Anderson

La Maîtrise ès Arts et Éducation (Enseignement des littératures et cultures francophones) est offerte conjointement par la Faculté des Arts et la Faculté d'Éducation et cautionne des études à temps partiel ou à temps plein.

Il est recommandé de lire ces règlements en conjonction avec les Règlements généraux de l'École des Études supérieures.

Le Comité administratif est responsable du programme. Le Comité sera composé du Doyen adjoint aux programmes supérieurs de la Faculté d'Éducation (ou son représentant), le Directeur du Département d'études françaises et hispaniques (ou son représentant), et un autre membre. Ce dernier viendra alternativement (une année sur deux) d'une des deux unités. Le Comité administratif décidera de l'admission et conseillera à l'occasion les étudiants sur leur choix de cours.

#### Admission

Pour être admis au programme de Maîtrise ès Arts et Éducation (Enseignement des littératures et cultures francophones), il faut normalement détenir un Baccalauréat en Éducation, avec concentration en français, provenant d'une institution reconnue par le Sénat. Il faut une note moyenne minimale de 'B' ou une moyenne de 70% dans les trente derniers cours et deux ans d'expérience dans l'enseignement du français. Un niveau adéquat de français est nécessaire et la compétence des candidats (le masculin est utilisé à titre épique) sera évaluée par le comité d'admission.

#### Programme d'études

- Les candidats à la Maîtrise ès Arts et Éducation (Enseignement des littératures et cultures francophones) choisira l'une ou l'autre des deux options suivantes:
  - 1<sup>re</sup> option Programme menant au projet terminal
  - 2<sup>e</sup> option Programme entièrement composé de cours
- Tous les candidats devront compléter:
  - French 6800 Littératures francophones: Théorie et pratique
  - French 6810 Cultures francophones: Théorie et pratique
  - Education 6100 Research Designs and Methods in Education
  - Six heures crédits de cours de deuxième cycle du Département d'études françaises et hispaniques jugés appropriés par le Comité administratif.
  - Neuf heures crédits parmi:
    - Education 6668 Current Issues in Second Language Education
    - Education 6669 Graduate Seminar in Second Language Teaching and Learning
    - Education 6673 Second Language Teaching, Learning and Curriculum
    - Education 6674 Research in Second Language
  - Trois heures crédits de cours de la Faculté d'Éducation jugés appropriés par le Comité administratif.
- L'étudiant ayant choisi la 1<sup>re</sup> option devra compléter:
  - Education 6392: Project in Curriculum, Teaching and Learning Studies
- L'étudiant ayant choisi la 2<sup>e</sup> option devra compléter:
  - Trois heures crédits de cours de deuxième cycle du Département d'études françaises et hispaniques jugés appropriés pour le programme de l'étudiant.
  - Education 6390 Research and Development in Teaching and Learning Studies

#### Évaluation

- Afin de continuer son inscription au programme de Maîtrise ès Arts et Éducation (Enseignement des littératures et cultures francophones), le candidat doit obtenir un note de A ou B dans chaque cours obligatoire. Le candidat qui reçoit une note de C dans un cours obligatoire doit répéter ce cours et obtenir au moins B. Dans le cas d'un cours facultatif, un cours jugé approprié par le Comité administratif peut être substitué à un cours qui n'a pas été réussi. Une telle répétition ou un tel remplacement ne sera permis qu'une seule fois dans le programme de l'étudiant. Si une note moindre que B est obtenue dans un cours répété ou dans un cours de remplacement, le candidat devra se retirer du programme.
- Lorsque le Comité administratif aura établi, après avoir consulté le candidat, ses enseignants et son directeur de projet, le cas échéant, que le travail du candidat n'atteint toujours pas un niveau satisfaisant, il pourra demander au Doyen de la Faculté des Arts et au Doyen de Faculté d'Éducation qu'ils recommandent la disqualification du candidat au Doyen des Études supérieures.

#### Cours

French 6800 Littératures francophones: Théorie et pratique

French 6810 Cultures francophones: Théorie et pratique

French 6820 Littérature de jeunesse: Théorie et pratique

Education 6100 Research Designs and Methods in Education

Education 6390 Research and Development Seminar in Teaching and Learning Studies

Education 6392 Project in Curriculum, Teaching and Learning Studiés (6 crédits heures)  
 Education 6668 Current Issues in Second Language Education  
 Education 6669 Graduate Seminar in Second Language Education  
 Education 6673 Second Language Teaching, Learning and Curriculum (*les étudiants ne peuvent recevoir de credit et pour Education 6673 et pour Education 6665 ou 6667*)  
 Education 6674 Research in Second Language  
 Autres cours de cycle supérieur offerts par la Faculté d'Éducation et le Département d'études françaises et hispaniques jugés appropriés par le Comité administrative.

## 10 Regulations Governing the Degree of Master of Business Administration

www.business.mun.ca

**Professor and Dean**

W. Zerbe

The Degree of Master of Business Administration (M.B.A.) is offered by full-time or part-time study. These regulations must be read in conjunction with the **General Regulations** of the School of Graduate Studies of Memorial University of Newfoundland.

### 10.1 Qualifications for Admission

1. Admission is limited and competitive. To be eligible for consideration for admission to the Master of Business Administration program, an applicant shall:
  - a. normally hold at least a Bachelor's Degree, with a minimum 'B' standing, from an institution recognized by Senate;
  - b. normally have two years of full-time work experience, or equivalent, deemed acceptable to the Faculty of Business Administration; and
  - c. achieve a satisfactory total score on the Graduate Management Admission Test (GMAT), as well as an appropriate balance of verbal and quantitative GMAT score components. Specific information regarding test centres, dates, registration procedure and deadlines can be obtained by contacting the Graduate Management Admission Council at [www.mba.com](http://www.mba.com).
2. An applicant who did not complete a Bachelor's degree at a recognized university where English is the primary language of instruction must normally complete either the:
  - a. Test of English as a Foreign Language (TOEFL) and achieve a paper-based score of 580 (or higher), computer-based score of 237 (or higher), or Internet based score of 92-93 (or higher); or
  - b. International English Language Testing System (IELTS) and achieve a score of 7 (or higher).
 Information regarding the TOEFL is available from the Educational Testing Service at [www.ets.org](http://www.ets.org). IELTS information is available at [www.ielts.org](http://www.ielts.org).
3. In exceptional cases, an applicant who has not completed a Bachelor's degree, but who meets all other requirements, may be considered for admission. Preference will be given to those who present a high GMAT score, have a minimum of 10 years of full-time managerial and executive experience, and have completed several years of university studies. The Faculty may also take into account relevant professional credentials. An applicant who does not meet normal admission requirements may be required to complete, with a high level of achievement, certain undergraduate courses before being considered for admission.
4. Notwithstanding the above, in exceptional cases, and only on the strong recommendation of the Faculty of Business Administration, consideration may be given to an applicant who does not qualify for admission consideration in accordance with the entrance requirements outlined above. It is noted that the GMAT requirement is never waived.

### 10.2 Deadlines for Applications

Applications and all supporting documents must be received not later than May 1 from Canadian applicants wishing to enter full-time or part-time studies in the Fall semester. Full-time and international applicants are normally considered for entry in the Fall semester. International applicants must submit complete documentation by February 1. Part-time applicants planning to enter in the Winter (January) or Spring (May) semester must apply prior to October 15 and January 15 respectively. Individuals submitting applications later than the above dates are not assured of consideration for admission to the program in the semester desired; their applications will be processed only if time and resources permit.

### 10.3 Procedure for Admission

1. Applications for admission to the M.B.A. program must be made on the appropriate form to the School of Graduate Studies.
2. The following documents must be submitted in support of the official application form:
  - a. letters of appraisal from two referees, at least one of whom has had close professional contact with the applicant within the last two years, and at least one of whom is capable of appraising the applicant's academic potential as a graduate student;
  - b. official transcript from each university or other post-secondary institution previously attended (other than Memorial University of Newfoundland), to be sent directly by its Registrar (or equivalent officer) to the School of Graduate Studies. If not recorded on the transcript, official evidence of completion of undergraduate degree must also be submitted;
  - c. the official GMAT score report, to be sent directly by the Graduate Management Admission Council. The code number for Memorial University of Newfoundland is LTT-6W-51;
  - d. the Master of Business Administration Employment Experience Form; and
  - e. where applicable, an official TOEFL or IELTS score report (or another equivalent test acceptable to the School of Graduate Studies), to be forwarded directly by the educational testing service.
3. Admission shall be by the Dean of the School of Graduate Studies on the recommendation of the Faculty of Business Administration. Upon notification from the Dean of the School of Graduate Studies of acceptance into the M.B.A. program, an applicant must give written notice to the School of Graduate Studies of his/her intention to register. Such notice must be received by the Office of the Dean within 30 days of notification of acceptance, or three weeks prior to semester registration.

### 10.4 Programs of Study

The program is a 60 credit hour all-course program. This program requires: 36 credit hours as specified in **Table 1**; plus 24 credit hours

selected from **Table 2** including a minimum of 3 credit hours in the area of international business chosen from 9005, 9020, 9030, 9306, 9326 or another approved international course.

Course exemptions may be considered in accordance with Clause 3. below. In the event that course exemptions are granted, the 60 credit hour program requirement will be adjusted accordingly.

1. The Faculty of Business Administration may consider exemptions for up to 10 (30 credit hours) introductory M.B.A. courses for those applicants who have completed relevant undergraduate courses in Business, Economics, and Statistics. Undergraduate courses will normally only be considered for exemption purposes if they were completed within seven years of the year in which admission to the M.B.A. program is sought and provided the student achieved a grade of 75% or higher in the undergraduate course(s) required for exemption of the relevant M.B.A. course. Only the following introductory M.B.A. courses will be considered for exemption: 8103, 8104, 8106, 8108, 8109, 8204, 8205, 8206, 8207, and 8208.
2. An applicant who has completed relevant undergraduate courses at institutions external to Memorial University of Newfoundland must submit the following information to the M.B.A. Program Office, Faculty of Business Administration, for evaluation:
  - a detailed course outline for each course to be considered in the application for advanced standing;
  - a description of the method of evaluation used in each such course, the grades received, and the completion dates.
3. The Faculty of Business Administration reserves the right to restrict a student from taking particular M.B.A. elective courses if it is deemed that those courses do not add sufficient value beyond courses that the student has completed at the undergraduate level.
4. A student is required to observe approved co- or prerequisites in scheduling his/her courses. These are indicated in **Table 3**.
5. A student shall successfully complete the requirements of Business 8103 as part of the first 36 credit hours of the program.

## 10.5 Evaluation

1. Credit towards the M.B.A. Degree will be granted only for those courses which have been approved as constituting part of the student's program of study and in which the student has obtained a mark of 65% or higher.
2. A student is required to withdraw from the M.B.A. program if a final grade of 'F' is obtained in any course.
3. To remain in the program, a student who obtains a final grade of 'C' or 'D' in any course must repeat that course when next offered, and obtain a minimum grade of 'B'. In the case of an elective course, a replacement course approved by the Faculty of Business Administration may be substituted for the course. Only two such repetitions/replacements shall be permitted in the student's graduate program. Should a grade of less than 'B' be obtained in a repeated or replacement course, the student shall be required to withdraw from the program.

## 10.6 Courses

**Table 1 Master of Business Administration Schedule of Required Courses**

8103 Statistical Applications in Management	8204 Human Resource Management
8104 Organizations: Behaviour and Structure	8205 Information Systems
8106 Marketing	8206 Managerial Finance
8107 Managing Ethics and Responsibility	8207 Operations Management
8108 Economics for Business	8208 Strategic Management
8109 Accounting for Management	8209 Leadership and Interpersonal Skills for Managers

**Table 2 Master of Business Administration Schedule of M.B.A. Electives**

8001 Consumer Behaviour	9306 International Strategic Management
8002-8005 Special Topics	9308 New Venture Creation
8202 Advanced Managerial Accounting	9309 Marketing Management
8203 Management Science	9310 Management Science Applications
8210 Labour Relations	9311 Seminar in Human Resource Management
9001-9019 Special Topics (excluding 9005, 9013)	9312 Financial Management
9005 International Marketing	9314 Business and Taxation Law
9013 Collective Agreement Administration and Arbitration	9315 Advanced Financial Accounting
9020 International Human Resource Management	9316 Information Systems Management
9021 Data Management	9317 Current Topics in Management
9022 Information Systems Analysis and Design	9318 Marketing Communications Management
9023-9050 Special Topics (excluding 9030, 9032, 9033, 9034, 9040, 9042)	9320 Investments and Portfolio Management
9030 International and Comparative Industrial Relations	9322 Strategic Management of Technology and Innovation
9032 Digital Marketing	9323 Financial Forward, Futures, and Options Markets
9033 The International Business Environment	9324 Gender, Work and Organizations
9034 Strategic Risk Management	9326 International Finance
9040 Business Sustainability	9328 Change Management
9042 Branding with Social Media	9329 Labour Law
9103 Research in Management	Up to 6 credit hours in courses from other graduate programs within the School of Graduate Studies, as approved by the Dean of Graduate Studies on the recommendation of the Faculty of Business Administration
9301-9303 Research Project	

A selection of electives will be offered to meet the requirements of candidates as far as the resources of the Faculty of Business Administration will allow.

**Table 3 Master of Business Administration Course Prerequisite/Co-requisite**

Course	Prerequisite/Co-requisite*	Course	Prerequisite/Co-requisite*
8001	8106	9040	Nine courses including 8107
8103	Nil	9042	Nil
8104	Nil	9103	Nine courses completed including 8103
8106	Nil	9301	Nine courses completed
8107	Nil	9302	Nine courses completed plus 9301*
8108	Nil	9303	Nine courses completed plus 9301* and 9302*
8109	Nil	9306	8103, 8104, 8106, 8108, 8109, 8205
8202	8109	9308	8106, 8109
8203	Nil	9309	Nine courses completed including 8106
8204	Nil	9310	8203
8205	Nil	9311	Nine courses completed including 8104, 8204 or admission to the MER program
8206	8103*, 8108*, 8109	9312	Nine courses completed including 8103, 8108, 8109, 8206
8207	8103, 8108*	9314	Nine courses completed including 8103, 8108, 8109, 8206 or admission to the MER program
8208	8103, 8104, 8106, 8108, 8109, 8205*, 8206*, 8207*	9315	8109
8209	8104	9316	Nine courses completed including 8205
8210	Nil	9317	Nine courses completed
9005	Nine courses including 8106	9318	Nine courses completed including 8106
9013	Nine courses completed including 8210 or 8210 plus admission to the MER program	9320	Nine courses completed including 8103, 8108, 8109, 8206
9020	Nine courses completed including 8104 or 8204	9322	8104, 8106, 8108, 8109, 8206
9021	Nine courses completed including 8205	9323	Nine courses completed including 8103, 8108, 8109, 8206, 9320
9022	Nine courses completed including 8205	9324	Nine courses completed including 8104 or admission to the MER program
9030	Nine courses completed including 8210	9326	Nine courses completed including 8103, 8108, 8109, 8206
9032	8106	9328	Nine courses completed including 8104 or admission to the MER program
9033	Nine courses	9329	Nine courses completed including 8210 or 8210 plus admission to the MER program
9034	Nine courses		

Note: Unless specified in **Table 3** all 9000-level courses require the prior completion of Nine courses, including any specific prerequisites or co-requisites unless otherwise specified.

## 11 Regulations Governing the Degree of Master of Education

[www.mun.ca/educ](http://www.mun.ca/educ)

### Professor and Dean

K. Anderson

The Master of Education (M.Ed.) is offered in the following areas: Educational Leadership Studies, Curriculum, Teaching and Learning Studies, Counselling Psychology, Post-Secondary Studies, and Information Technology.

In addition, a Master of Arts and Education (Education and Francophone Literatures and Cultures), jointly offered by the Faculty of Education and the Faculty of Humanities and Social Sciences, Department of French and Spanish, is available for candidates who wish to specialize in the study and teaching of French.

In the case of the following general program regulations and the specific program regulations, which govern all Master of Education Degree programs, Dean refers to the Dean of Graduate Studies, Dean of Education refers to the Office of the Dean, Faculty of Education, and Faculty refers to the Faculty of Education, through its various operating committees.

Students taking any of the Master of Education Degree programs are advised that a Bachelor of Education Degree is required for employment in the K - 12 system.

### 11.1 Qualifications for Admission

1. Admission to the Master of Education is limited and competitive. To be considered for admission to a graduate program in Education, an applicant shall:
  - a. have from a recognized institution, either (1) an undergraduate degree with at least second class standing, or (2) an undergraduate degree and an average of at least 70% in the last 90 attempted undergraduate credit hours.

- b. meet the requirements set forth in the specific program regulations.
2. Only in exceptional circumstances, and only on the recommendation of the Dean of Education, shall the Dean consider applicants who do not meet the requirements in 1.
3. Please refer to **Specific Programs** regulations for additional admission requirements.

## 11.2 Program of Study

1. Candidates for the Master of Education (Educational Leadership Studies, Curriculum, Teaching and Learning Studies) shall be required to complete a minimum of:
  - a. 18 credit hours plus a thesis; or
  - b. 24 credit hours plus an internship report, a project report or a paper folio; or
  - c. 30 credit hours on the comprehensive-course route.

Candidates for the Master of Education (Post-Secondary Studies) shall be required to complete a minimum of:

- a. 18 credit hours plus a thesis; or
- b. 24 credit hours plus an internship; or
- c. 30 credit hours on the comprehensive-course route.

Candidates for the Master of Education (Counselling Psychology) shall be required to complete a minimum of:

- a. 30 credit hours (which include an internship) plus a thesis; or
- b. 36 credit hours (which include an internship) on the comprehensive-course route.

Candidates for the Master of Education (Information Technology) shall be required to complete a minimum of:

- a. 18 credit hours plus a thesis; or
- b. 30 credit hours on the comprehensive-course route.

Candidates for the Graduate Diploma in Post-Secondary Studies (Health Professional Education) must complete:

- a. 12 credit hours

Candidates for the Graduate Diploma in Educational Leadership Studies must complete:

- a. 18 credit hours

2. Candidates may apply for transfer of course credits. All course transfers require the approval of the Dean, on the recommendation of the Dean of Education, and are subject to General Regulation, **Program Requirements, Transfer of Course Credits** of the School of Graduate Studies.
3.
  - a. All graduate courses completed must be in accordance with the student's program of study.
  - b. Graduate courses not within a program of study must be approved by the Associate Dean, Graduate Programs and Research, Faculty of Education, prior to registration.
4.
  - a. A candidate with full-time status may register for a maximum of 12 credit hours in any regular semester and a maximum of 6 credit hours in intersession or summer session.
  - b. A candidate with part-time status may register for a maximum of 3 credit hours in any semester or session, excluding summer session, when 6 credit hours are permitted.
  - c. Candidates may register for additional courses in a semester or session with the permission of the Office of the Associate Dean of Graduate Programs in Education.
5. Before submission of the proposal for thesis, project, internship, or paper folio, a Supervisory Committee shall be recommended by the Dean of Education, in consultation with the candidate, and approved by the Dean. The Supervisory Committee shall consist of the Supervisor and at least one other member.

The function of the Supervisory Committee shall be to approve the proposal for the thesis, project, internship, or paper folio, and to exercise supervision in the conduct of the study on behalf of the Faculty, subject to the final approval of the Dean.

## 11.3 Period of Study

The period of the study for a graduate program shall not normally exceed six years beyond first registration. Completion of some program components may require full-time study on the University campus.

## 11.4 Evaluation

1. In order to continue as a candidate for the Master of Education Degree, a candidate who receives a final grade of 'C' in any program course must repeat that course and obtain a minimum grade of 'B'. In the case of an elective course a suitable replacement course, acceptable to the Faculty, may be substituted for the failed course. Only one such repetition/replacement shall be permitted on the candidate's graduate program. Should a grade of less than 'B' be obtained in the repeated course, replacement course, or any other program course, the candidate shall be required to withdraw from the program.
2. When the Faculty has determined, through consultation with the candidate, the instructors of graduate courses, and the program advisor or thesis Supervisor that the candidate's work has fallen below satisfactory level, it may request that the Dean of Education recommend to the Dean that the candidate's program be terminated.

## 11.5 Thesis

See School of Graduate Studies General Regulation, **Theses and Reports**.

## 11.6 Program Regulations

Every candidate in graduate studies shall comply with the School of Graduate Studies **General Regulations**, the Degree Regulations **Program of Study**, and the specific program regulations as outlined in **Specific Programs**.

## 11.7 Appeals and Waivers Procedures

Candidates are advised that appeals and waivers of any regulations governing the Degree of Master of Education are governed by School of Graduate Studies General Regulations **Provision For Waiver of Regulations and Appeal Procedures**.

## 11.8 Specific Programs

### 11.8.1 Educational Leadership Studies

The Educational Leadership Studies program provides students with an opportunity to explore a broad range of issues in educational leadership, policy, and administration. It prepares candidates to assume leadership roles in a variety of settings, including school and district leadership, post-secondary institutions and policy analysis. The Faculty offers a Master of Education degree and a Graduate Diploma in Educational Leadership Studies.

#### 1. Admission Requirements

In addition to meeting the requirements in the School of Graduate Studies **General Regulations**,

- a. students must have completed a range and number of courses in Education deemed appropriate by the Faculty and Dean of Education.
  - b. a minimum of two years of teaching/leadership experience is recommended.
- #### 2. Program Requirements for the Master of Education Degree Program
- a. all students in the Master of Education Program (Educational Leadership Studies) program must complete:
    - 6100 Research Designs and Methods in Education
    - 6204 Educational Administration: Theory and Practice
    - 6205 Educational Policy: Theory and Practice and one of the following:
    - 6 credit hours (thesis route) within closed electives as listed in e. below
    - 9 credit hours (internship, paper folio, project, comprehensive course route) within closed electives as listed in Closed electives below
  - b. students on the thesis route must complete at least one of the research courses listed below (6100 is prerequisite):
    - 6466 Qualitative Research Methods
    - 6467 Quantitative Research Methods
    - 6468 Critical Approaches to Educational Research
    - 6469 Theoretical and Methodological Foundations of Action Research
  - c. students on the comprehensive-course route must complete 6290 Research and Development Seminar in Educational Leadership Studies. Normally students would be permitted to register for this course only after all other course requirements have been met, or during the student's last semester of studies.
  - d. to meet total credit hour requirements students may choose electives from any university graduate offering provided that those chosen are appropriate to the student's program:
    - students on the thesis route must complete a total of at least 18 credit hours
    - students on the internship, paper folio, or project route must complete a total of at least 24 credit hours and the appropriate course option including 6291 Internship in Educational Leadership Studies (6 credit hours), 6292 Project in Educational Leadership Studies (6 credit hours), or 6293 Paper Folio in Educational Leadership Studies (6 credit hours)
    - students on the comprehensive-course route must complete a total of at least 30 credit hours
  - e. Closed electives are those listed below:
    - 6202 Social Context of Educational Leadership
    - 6203 Leadership: Theory and Practice
    - 6321 Supervisory Processes in Education
    - 6330 Educational Finance
    - 6335 Legal Foundations of Educational Administration
    - 6410 Seminar on Philosophical Issues in Educational Policy and Leadership
    - 6420 Ethical Issues and Perspectives in Educational Practice and Policy
    - 6425 Comparative Perspectives in Public Education, Reform, and Leadership
    - 6426 Computer Applications in Educational Administration
    - 6427 School Community Partnerships
    - 6440 Family-School Relations: Leadership and Policy Implications
    - 6465 School Violence: Leadership and Policy Implications
    - 6664 Seminar in School Improvement
    - 6710 Issues in Development and Implementation of Special Education Policy and Practices

Courses must be appropriate to the program and chosen in consultation with the advisor.

#### 3. Program Requirements for the Graduate Diploma in Educational Leadership Studies

The Graduate Diploma in Educational Leadership Studies provides students with an opportunity to explore a broad range of issues in educational leadership, policy and administration. It prepares candidates to assume leadership roles in a variety of settings, including school and district leadership, post-secondary institutions and policy analysis.

Students wishing to be admitted to the Graduate Diploma in Educational Leadership Studies must meet the criteria for admission specified under **Master of Education (Educational Leadership Studies) degree, Qualifications for Admission**.

Candidates for the Graduate Diploma must complete a total of 18 credit hours, including:

- 6203 Leadership: Theory and Practice
- 6204 Educational administration: Theory and Practice
- 12 credit hours that come from the list of closed electives for the Master of Education (Educational Leadership Studies) degree, or are other graduate courses appropriate to the student's program and are approved by the Faculty of Education.

Students enrolled in the Graduate Diploma program may request transfer to the Master of Education (Educational Leadership Studies) prior to graduation. Students must complete an additional 12 credit hours appropriate to the Master of Education (Educational Leadership Studies) degree.

All courses completed must satisfy the requirements for the Graduate Diploma (Educational Leadership Studies) and the Master of Education (Educational Leadership Studies) Degree.

### 11.8.2 Curriculum, Teaching and Learning Studies

The Master of Education in Curriculum, Teaching and Learning Studies provides opportunities for students to investigate pertinent issues in these interrelated areas from a variety of perspectives: philosophical, historical, social, cultural, cognitive, and technological. The conceptual bases of curriculum, teaching, and learning are explored and analysed along with related examples of historical and current policies and practices. The program encourages the development of broad-based insights into issues related to these areas through an emphasis on critical inquiry and reflective practice. It supports students in the development and enhancement of research capabilities and professional expertise and practice.

Students may choose between two program options in Curriculum, Teaching and Learning Studies:

#### Option One

Students may choose to specialize in one of a number of areas of study: Computers in Education, Language and Literacy Studies, Mathematics Education, Music Education, Science Education, Second Language Education, Social Justice Education, Social Studies Education, Special Education, and Teacher-Librarianship.

#### Option Two

In consultation with a faculty advisor, students may choose to design a program speciality which addresses their research interests. Specialty foci within Curriculum, Teaching, and Learning Studies are numerous and may include technology and web-based education, arts education, rural and multi-age education. Students may alternatively select appropriate courses from other Master of Education program offerings to develop a program to meet their learning goals. Students interested in this option are strongly encouraged to explore and to focus their research and study interests and to discuss these interests with a faculty advisor.

#### 1. Admission Requirements

In addition to meeting the requirements in the School of Graduate Studies **General Regulations**,

- a. students must have completed a range and number of courses in Education deemed appropriate by the Faculty and Dean of Education.
- b. a minimum of two years of teaching or related experience is recommended.
- c. for a specialization in special education, a completed Bachelor of Special Education Degree or equivalent is required and enrolment will be limited to applicants articulating a research focus for which appropriate thesis supervision is available.

#### 2. Program Requirements

- a. all students in the Master of Education Program (Curriculum, Teaching and Learning Studies) shall be required to complete:
  - 6100 Research Designs and Methods in Education
  - 6300 Teaching and Learning
  - 6602 Curriculum Studies
- b. students on the thesis route must complete at least one of the research courses listed below (6100 is prerequisite):
  - 6466 Qualitative Research Methods
  - 6467 Quantitative Research Methods
  - 6468 Critical Approaches to Educational Research
  - 6469 Theoretical and Methodological Foundations of Action Research
  - 6909 Narrative Approaches to Teaching, Learning and Research
  - and at least 2 courses from any university graduate offering provided that those chosen are appropriate to the student's program
- c. students choosing Option One on the internship, paper folio, project route, and comprehensive-course route must complete at least 2 courses within one particular speciality area from the list in **Core speciality courses in the study of curriculum, teaching and learning areas** below.
- d. students choosing Option Two must choose courses that have been designated through consultation with faculty advisor during the first semester of studies in this program.
- e. students choosing the Mathematics Education specialization within Curriculum, Teaching and Learning Studies must complete 6630 Critical Issues in Mathematics Education prior to completing other Mathematics Education specialty courses.
- f. students choosing the Special Education specialization within Curriculum, Teaching and Learning Studies must complete a thesis and at least two of the required Special Education specialty courses.
- g. students on the comprehensive-course route must complete one of the following courses: E6390 Research and Development Seminar in Curriculum, Teaching and Learning Studies or E6394 Biographical Explorations of Teaching and Learning or E6913 Putting Action Research Methodologies into Practice (prereq. E6469). Normally students would be permitted to register for one of these courses only after all other course requirements have been met, or during the student's last semester of studies.
- h. to meet total credit hour requirements students may choose electives from any university graduate offering provided that those chosen are appropriate to the student's program:
  - students on the thesis route must complete a total of at least 18 credit hours
  - students on the internship, paper folio, or project route must complete a total of at least 24 credit hours and the appropriate course option 6391 Internship in Curriculum, Teaching and Learning Studies (6 credit hours), 6392 Project in Curriculum, Teaching and Learning Studies (6 credit hours), or 6393 Paper Folio in Curriculum, Teaching and Learning Studies (6 credit hours)
  - students on the comprehensive-course route must complete a total of at least 30 credit hours

#### i. Core speciality courses in the study of curriculum, teaching and learning areas:

##### Computers in Education

- 6610 Research on Computers in the Curriculum
- 6620 Issues and Trends in Educational Computing

##### Language and Literacy Studies

- 6106 Popular Culture and Literacy Education
- 6108 Literacy and Language Education: Sociocultural Perspectives
- 6641 Writing in the Primary, Elementary and Secondary Schools
- 6642 Developmental Reading (K-8)
- 6643 Contemporary Issues in Intermediate and Secondary English

6645 Literature for Children and Adolescents  
 6647 Diagnosis and Remediation of Reading and Writing Difficulties  
 6649 Exploring Multiple Literacies  
 6693 Literacy for the Young Child in Home and School

#### **Mathematics Education**

6630 Critical Issues in Mathematics Education  
 6634 Teaching and Learning to Solve Mathematics Problems (*prerequisite E6630*)  
 6639 Technology and the Teaching and Learning of Mathematics (*prerequisite E6630*)

#### **Music Education**

6502 Contexts of Music Education  
 6503 Teaching Music from the Podium  
 6504 Musicianship, Pedagogy, and Learning

#### **Science Education**

6653 Contemporary Issues in Science Education I  
 6655 The Nature of Science and Science Education  
 6658 Teaching and Learning Scientific Concepts, Laws, and Theories

#### **Second Language Education**

6668 Current Issues in Second Language Education  
 6669 Graduate Seminar in Second Language Teaching and Learning  
 6673 Second Language Teaching, Learning and Curriculum  
 6674 Research in Second Language

#### **Social Justice Education**

6105 Social and Cultural Difference and Education  
 6106 Popular Culture and Literacy Education  
 6108 Literacy and Language Education: Sociocultural Perspectives  
 6440 Family School Relations: Leadership and Policy Implications  
 6465 School Violence: Leadership and Policy Implications  
 6468 Critical Approaches to Educational Research  
 6909 Narrative Approaches to Teaching, Learning and Research  
 6913 Putting Action Research Methodologies into Practice (*prerequisite: 6469 Theoretical and Methodological Foundations of Action Research*)

#### **Social Studies Education**

6670 Teaching and Learning Social Studies  
 6671 Research in Social Studies Education  
 6672 Issues and Trends in Social Studies

#### **Special Education**

6710 Issues in Development and Implementation of Special Education Policy and Practices  
 6712 The Nature and Assessment of Behaviour Disorders in Children and Adolescents  
 6714 Principles and Practices in Exceptionality  
 6755 Nature and Assessment of Learning Disabilities

#### **Teacher-Librarianship**

6662 Seminar in Teacher-Librarianship  
 6664 Seminar on School Improvement

Additional courses in the speciality areas are available.

### **11.8.3 Counselling Psychology**

The mission of the program in Counselling Psychology is to prepare highly knowledgeable, skilled, dedicated, and ethical professional practitioners, who will endeavour to enhance human potential throughout the life span and who can effectively practice within a variety of settings.

The Counselling Psychology faculty promotes counselling as an effective, viable means of assisting individuals throughout the life span. The counselling practitioner, regardless of his or her theoretical stance or work setting, functions as a change agent who is sensitive to and knowledgeable about the range of human development reflected in individual differences and cultural and linguistic diversity. Effective and positive change is brought about by assisting clients to: examine and modify their behaviour for more effective living; cope with, adjust to, or otherwise negotiate the environments affecting their psychosocial well-being; and effect change in the larger society.

The practice of Counselling Psychology is based on theory and research, an understanding of ethical practices, and a set of professional and interpersonal skills. It is essential that graduate students study a variety of conceptual frameworks and research findings as preparation for collaborative work with other helping professionals, paraprofessionals, and a variety of self-help groups.

The Counselling Psychology faculty, while representing a range of views, agree that the uniqueness of the individual and his or her personal strengths must be acknowledged and respected. To fully explore professional issues and personal values, a trusting and open atmosphere must be present.

Individuals from a wide variety of personal, social, and educational backgrounds are encouraged to apply to the Counselling Psychology program. The program provides a broad-based sequence of studies and supervised experiences that will prepare graduate students to be knowledgeable and skilled practitioners who can function in a variety of settings. By the time they have completed this program, students will have acquired knowledge and competencies in the following general areas: individual and group counselling theory and techniques, legal and ethical aspects of counselling, human development and learning, social, cultural, and linguistic diversity, career education and counselling, program development and implementation, measurement and appraisal, research and program evaluation, and application of current technology service delivery in rural areas.

#### **1. Admission Requirements**

In addition to meeting the requirements in the School of Graduate Studies **General Regulations**, students:

- a. must have completed Education 3210, Introduction to Counselling.
- b. must have completed at least one undergraduate course on each of the following topics: Statistics (Education 2900), Assessment (Education 3280, 3951, 3952 or 4950), Introduction to Career Education (Education 3211), Introduction to Exceptionality (Education 4240 or 4242).

Note: *Many of these courses are prerequisites to specific graduate courses and must be completed before taking those courses.*

- c. must have at least one year of teaching (or related work) experience.
- d. must submit a resume that contains a concise rationale for the application (500 words or less) and three letters of recommendation (preferably one from each of the following: previous university instructors, supervisors, or employers).
- e. should note admission is selective and controlled by an admission committee of faculty members involved in the program. An interview may be required if deemed necessary.
- f. should note the Graduate Record Examination may be required.
- g. A criminal record check or other screening procedures are not required as a condition of admission to the Counselling Psychology program. A student should, however, be aware that such record checks or other screening procedures are required by school districts, schools, community agencies, or other agencies that host counselling psychology students. Such agencies will not accept a student without a clean criminal record and vulnerable sector check or other screening procedures, which would prevent the student from completing a required component of the program. As a result, such a student may not be eligible for promotion or graduation.

It is the responsibility of the student to have such procedures completed as required and at his/her own expense. The Faculty of Education's Counselling Psychology program expects a student to provide evidence of a clean criminal record and vulnerable sector check before participating in any course or experience where direct contact with clients will occur.

The screening procedures of any given agency may change from time to time and are beyond the control of the University.

## 2. Program Requirements

- a. all students in the Master of Education (Counselling Psychology) program shall be required to complete:
  - 6100 Research Designs and Methods in Education (prerequisite: Education 2900)
  - 6702 Counselling: Theory and Practice (prerequisite: Education 3210)
  - 6706 Career Education and Career Counselling (prerequisite: Education 3211)
  - 6708 Group Counselling: Theory and Practice (prerequisite: Education 6702)
  - 6700 Ethical and Legal Issues in Counselling
  - 6720 Internship in Counselling Psychology (prerequisite: Normally completion of all courses) (9 credit hours)
- b. Students on the thesis route must complete the core courses listed above (24 credit hours) as well as a minimum of 6 credit hours from the closed electives indicated below for a total of 30 credit hours.
- c. Students on the comprehensive-course route must complete the core courses listed above (24 credit hours) as well as a minimum of 6 credit hours from the closed electives and 6 credit hours from any university graduate offering provided that those chosen are appropriate to the student's program for a total of 36 credit hours.
- d. All students in the Counselling Psychology program must complete 6720. The Internship may be fulfilled full-time or part-time and must comprise 600 clock hours with 240 hours of direct service with clients. It cannot be completed as part of your regular employment. It is strongly recommended that students take no other course during the full-time internship.
- e. Closed electives are those listed below:
  - 6703 Personal and Professional Development Group
  - 6705 Nature and Development of School Counselling Services
  - 6707 Assessment for Counsellors
  - 6709 Assessment of Intelligence and Learning Skills (prerequisite: 3600 or its graduate equivalent 6707. Normally, students in Counselling Psychology will not enroll in this course until the latter part of their program). Candidates intending to pursue a career in the K-12 school system in Newfoundland and Labrador are urged to take this course and the prerequisite.
  - 6710 Issues in Development and Implementation of Special Education Policy and Practices
  - 6712 The Nature and Assessment of Behaviour Disorders in Children and Adolescents
  - 6713 Educational Applications of Contemporary Cognitive Psychology
  - 6714 Principles and Practices in Exceptionality
  - 6716 Working with Families and Parents
  - 6717 Counselling Adolescents
  - 6718 Elementary School Counselling
  - 6719 Cultural Issues in Counselling
  - 6802 Adult Learning and Development

- Notes: 1. Student membership in the Canadian Counselling Association (CCA) or other appropriate professional organizations is strongly recommended for all students in the program.
2. Students who plan to work in the school system should be aware of the Department of Education regulations to be eligible to work as a school counsellor.
3. Students who plan to become registered psychologists in Newfoundland and Labrador should review the requirements of the Newfoundland Board of Examiners in Psychology.

### 11.8.4 Post-Secondary Studies

The graduate programs in Post-Secondary Studies are designed to prepare candidates to function in a variety of roles in informal and formal post-secondary learning environments (including academic, technical, professional, adult education, health professional education, and student services/development). These programs facilitate a study of the post-secondary educational systems through an examination of their foundations, directions, organization and administration; and through curriculum and instructional development options for occupational preparation and adult education.

#### 1. Admission Requirements

In addition to meeting the requirements in the School of Graduate Studies **General Regulations**,

- a. Candidates must have completed an undergraduate course in statistics (Education 2900), and post-secondary education (Education 2720), or have accumulated the equivalent experiences in each of the above two areas as approved by the Head of the academic unit;
- b. two years of successful experience in working with adult learners is recommended;
- c. and for the Graduate Diploma in Post-Secondary Studies (Health Professional Education) program, candidates must have appropriate academic qualifications and work experience in a health-related field.

#### 2. Program Requirements (M.Ed.)

- a. Candidates for the Master of Education (Post-Secondary Studies) are required to complete courses that form the program core.
  - i. 6100 Research Designs and Methods in Education
  - ii. 6801 Foundations of Post-Secondary Programs

- iii. 6802 Adult Learning and Development
  - iv. 6803 Research in Post-Secondary Education
  - v. and not fewer than 6 credit hours from closed electives in g. below.
- b. Students holding the Graduate Diploma in Post-Secondary Studies (Health Professional Education) and accepted in the Master of Education (Post-Secondary Studies) will complete up to 12 fewer credit hours dependent upon the chosen program route and the completion date of the Graduate Diploma.
  - c. Students on the comprehensive-course route must complete 6890 Research and Development Seminar in Post-Secondary Studies.
  - d. Students on the internship route must complete 6891 Internship in Post-Secondary Studies (6 credit hours).
  - e. Normally, students will be permitted to register for 6890 and 6891 only after all other course requirements have been met.
  - f. To meet total credit hour requirements students may choose courses from other graduate offerings within the Faculty, the University, or other universities provided the courses chosen are appropriate to the student's program. Students on the thesis route must complete a total of at least 18 credit hours; and those on the internship or comprehensive-course route a total of at least 30 credit hours.
  - g. Closed electives are those listed below:
    - 6804 Leadership and Human Resource Development in Post-Secondary Education
    - 6805 Advanced Human Resource Communications
    - 6806 Interprofessional Education in the Health Professions
    - 6807 Economics and Finance of Post-Secondary Education
    - 6822 Foundations of Instructional Design in Post-Secondary Education
    - 6823 Principles of Program Design and Development
    - 6832 Issues and Trends in the Administration of Post-Secondary Education
    - 6841 Student Development Theory, Services and Programs in Post-Secondary Education
    - 6940 Administration of Student Services in Post-Secondary Education
- 3. Program Requirements for Graduate Diploma in Post-Secondary Studies (Health Professional Education)**

The Graduate Diploma in post-secondary studies, specialization in health professional education, which was created in collaboration with the Centre for Collaborative Health Professional Education, is designed to enhance health professionals' abilities as educators and leaders in educational program design, development, evaluation, and administration. The Graduate Diploma is intended for educators and educational leaders of formal and informal post-secondary health professional education programs.

Participants will engage in an in-depth study of the structure and organization of the post-secondary education system, theories and philosophies of adult learning and development; and through elective courses pursue studies of program development models, instructional design frameworks, evaluation and assessment techniques, teaching methods, and research design principles in post-secondary teaching and learning. Opportunities will exist for the guided study of these topics as they relate to health professional education.

- a. Candidates for the Graduate Diploma in Post-Secondary Studies (Health Professional Education) are required to complete courses that form the program core.
  - i. 6801 Foundations of Post-Secondary Programs
  - ii. 6802 Adult Learning and Development
  - iii. 6806 Interprofessional Education in the Health Professions
  - iv. and not fewer than 3 credit hours from closed electives in 2.g. above or from:
    - 6100 Research Designs and Methods in Education
    - 6803 Research in Post-Secondary Education
- b. Students are encouraged to relate their assignments in these courses to health professional education.
- c. Students enrolled in the Graduate Diploma program may request transfer to the Master of Education (Post-Secondary Studies). Courses for both the Graduate Diploma and the Degree must be appropriate to the program and chosen in consultation with the student's advisor.

### 11.8.5 Information Technology

The graduate program in Information Technology is offered in partnership with Cape Breton University (CBU). It is designed to facilitate the educational use of information technology in a wide variety of settings. The program will be of interest to educators at all levels including K-12 teachers, school administrators, those in the post-secondary system, business and industry, as well as those in most other adult learning situations.

Information technology in this Master of Education program encompasses computer, communications, networking, and multi-media applications. The overall intent of the program is to:

- provide educators with skill sets and pedagogical expertise that will enable them to address computer and related information technology in a teaching/learning situation;
- develop potential information technology leaders for the educational system;
- develop instructional designers, for a variety of educational settings, who are able to combine information technology with learning theory to enhance curriculum development and delivery;
- provide a basis for the continued professional development of educators in the area of information technology;
- develop an awareness of the applications of information technology in a wide variety of educational contexts; and
- develop research expertise and potential in the use and application of information technology for teaching and learning purposes.

Candidates for the program will have attained, prior to acceptance, some fundamental knowledge and skills with respect to information technology through prerequisite experiences, and have attained a recognized undergraduate degree in an appropriate discipline with at least a second class standing (see specific regulations for details). The program components are designed to enable candidates to build on their prior experience through the development of pedagogical links and information technology applications. It is intended that the program be offered primarily as a part-time program through distance delivered courses, with other delivery formats to be considered/ utilised where feasible. Access to specific computer hardware, software, and the Internet is required and will be the responsibility of each candidate.

A steering committee comprised of three members from each of the Faculty of Education at Memorial University of Newfoundland and the Institute for Education at CBU is responsible to the Associate Dean of Graduate Programs and Research, Faculty of Education, for

selected aspects of the program. The latter include assessing student applications, recommending approval of instructors who are not regular faculty members at either CBU or Memorial University of Newfoundland, and recommending course or program changes. This committee is to be co-chaired by the Associate Dean of Graduate Programs and Research, Faculty of Education, Memorial University of Newfoundland and the Director of the Institute for Education at CBU, or their designate(s).

CBU courses offered as part of this program are indicated by the prefix "CBU EDU" followed by the specific course number.

### 1. Admission Requirements

Admission to the program is competitive and selective. In addition to meeting the requirements in the School of Graduate Studies **General Regulations**, Faculty of Education, Memorial University of Newfoundland, candidates must have successfully completed:

- a. one of a diploma or certificate in information technology from an accredited institution; CBU EDU 530; Memorial University of Newfoundland 2751 and 3751; or equivalent as determined by the program steering committee.

Selection into the program is determined by an applicant's profile which would normally include such criteria as previous academic performance, related work experience, and relevant information technology experience. More detailed information may be found at [www.mun.ca/educ/grad/infotech.php](http://www.mun.ca/educ/grad/infotech.php).

### 2. Program Requirements

- a. all candidates for the Master of Education (Information Technology) must complete 6100 Research Designs and Methods in Education.
- b. candidates on the thesis route must complete:
  - three credit hours from:
    - 6610 Research on Computers in the Curriculum
    - 6615 Educational Software Prototyping and Evaluation
    - 6620 Issues and Trends in Educational Computing
  - nine credit hours selected from the core elective CBU courses approved for this program:
    - CBU EDU 5101 Assessment of Software and Information Technology Applications for Education
    - CBU EDU 5103 Integration of Instructional Design and Information Technology
    - CBU EDU 5104 Applications of Learning Theory in Educational Multi-media Design
    - CBU EDU 5105 Designing Web-based Learning
    - CBU EDU 5106 Technology Planning for Educational Environments
    - CBU EDU 5107 Information Management for Educational Environments
  - three credit hours from: 6822, 6823, 6802, 6426, or from other Memorial University of Newfoundland, Faculty of Education graduate course offerings as deemed appropriate for each candidate's program and approved by the program steering committee.
- c. candidates on the comprehensive-course route must complete:
  - i. six credit hours selected from 6610, 6615, 6620
  - ii. twelve credit hours selected from CBU EDU 5101, EDU 5103, EDU 5104, EDU 5105, EDU 5106, EDU 5107
  - iii. E6590 Research and Development Seminar in Information Technology in Education
  - iv. three credit hours from 6822, 6823, 6802, 6426, or from other Memorial University of Newfoundland, Faculty of Education graduate course offerings as deemed appropriate for each candidate's program and approved by the program steering committee
  - v. additional credit hours appropriate to a candidate's program, and approved by the program steering committee, to be chosen from graduate course offerings at Memorial University of Newfoundland, CBU, or any other university to complete the required 30 credit hours for the comprehensive-course route
- d. normally, candidates will be permitted to register for 6590 only after all other course requirements have been met.
- e. candidates who have successfully completed the CBU graduate level Certificate in Education (Technology) will be given advanced standing credit for the 9 CBU EDU course credit requirements for the thesis route or 12 CBU EDU course credit requirements for the comprehensive course-route on this program.
- f. candidates who have successfully completed the former CBU EDU 534 and/or EDU 543 with at least a CBU grade of B (70%) toward the CBU graduate level Certificate in Education (Technology) prior to September 2000, will receive up to 12 advanced standing credit hours appropriate to their Degree option (EDU 534 will be considered equivalent to EDU 5101 and EDU 5103, and EDU 543 equivalent to EDU 5104 and EDU 5105).
- g. thesis-route candidates will be subject to **Theses and Reports** of the School of Graduate Studies, Memorial University of Newfoundland, supervised by a faculty member at Memorial University of Newfoundland, and where feasible co-supervised by a CBU faculty member.

## 11.9 Courses

Course descriptions for graduate course in Education are available at [www.mun.ca/educ/grad/fee\\_deadline.php](http://www.mun.ca/educ/grad/fee_deadline.php).

A selection of the following graduate courses shall be offered to meet the requirements of candidates, as far as the resources of the Faculty allow.

6100 Research Designs and Methods in Education  
 6105 Social and Cultural Difference and Education  
 6106 Popular Culture and Literacy Education  
 6107 Arts Education: Creativity in the Classroom  
 6108 Literacy and Language Education: Sociocultural Perspectives  
 6202 Social Context of Educational Leadership  
 6203 Leadership: Theory and Practice  
 6204 Educational Administration: Theory and Practice  
 6205 Educational Policy: Theory and Practice  
 6290 Research and Development Seminar in Educational Leadership Studies  
 6291 Internship in Educational Leadership Studies (6 credit hours)  
 6292 Project in Educational Leadership Studies (6 credit hours)  
 6293 Paper Folio in Educational Leadership Studies (6 credit hours)  
 6300 Teaching and Learning  
 6321 Supervisory Processes in Education  
 6330 Educational Finance

6335 Legal Foundations of Educational Administration  
 6390 Research and Development Seminar in Curriculum, Teaching and Learning Studies  
 6391 Internship in Curriculum, Teaching and Learning Studies (6 credit hours)  
 6392 Project in Curriculum, Teaching and Learning Studies (6 credit hours)  
 6393 Paper Folio in Curriculum, Teaching and Learning Studies (6 credit hours)  
 6394 Biographical Explorations of Teaching and Learning  
 6410 Seminar on Philosophical Issues in Educational Policy and Leadership  
 6420 Ethical Issues and Perspectives in Educational Practice and Policy  
 6425 Comparative Perspectives in Public Education, Reform, and Leadership  
 6426 Computer Applications in Educational Administration  
 6427 School Community Partnerships  
 6440 Family-School Relations: Leadership and Policy Implications  
 6461 Graduate Research Writing  
 6465 School Violence: Leadership and Policy Implications  
 6466 Qualitative Research Methods  
 6467 Quantitative Research Methods  
 6468 Critical Approaches to Educational Research  
 6469 Theoretical and Methodological Foundations of Action Research  
 6481 Graduate Research Writing  
 6502 Contexts of Music Education  
 6503 Teaching Music from the Podium  
 6504 Musicianship, Pedagogy, and Learning  
 6590 Research and Development Seminar in Information Technology in Education  
 6600 Learning and Motivation  
 6602 Curriculum Studies  
 6603 Place, Ecology and Education  
 6610 Research on Computers in the Curriculum (*prerequisite: 6620*)  
 6615 Educational Software Prototyping and Evaluation  
 6620 Issues and Trends in Educational Computing  
 6630 Critical Issues in Mathematics Education  
 6632 Current Research in Teaching and Learning of Elementary School Mathematics (*prerequisite: 6630*)  
 6634 Teaching and Learning to Solve Mathematics Problems (*prerequisite: 6630*)  
 6635 Teaching and Learning Geometry  
 6636 Teaching and Learning the Concept of Number and Operations  
 6639 Technology and the Teaching and Learning of Mathematics (*prerequisite: 6630*)  
 6641 Writing in the Primary, Elementary and Secondary Schools  
 6642 Developmental Reading (K-8)  
 6643 Contemporary Issues in Intermediate and Secondary English  
 6644 Drama in Education  
 6645 Literature for Children and Adolescents  
 6646 Literature in the Secondary School  
 6647 Diagnosis and Remediation of Reading and Writing Difficulties  
 6649 Exploring Multiple Literacies  
 6653 Contemporary Issues in Science Education I  
 6655 The Nature of Science and Science Education  
 6658 Teaching and Learning Scientific Concepts, Laws, and Theories  
 6660 Information Technology  
 6661 Applications of Media in Education  
 6662 Research Seminar in Teacher-Librarianship  
 6663 The Organization of Learning Resources  
 6664 Seminar in School Improvement  
 6668 Current Issues in Second Language Education  
 6669 Graduate Seminar in Second Language Teaching and Learning  
 6670 Teaching and Learning Social Studies  
 6671 Research in Social Studies Education  
 6672 Issues and Trends in Social Studies  
 6673 Second Language Teaching, Learning and Curriculum (*credit may be obtained for only one of Education 6673, the former 6665 or 6667*)  
 6674 Research in Second Language Writing Education  
 6675 Current Issues in Rural Education  
 6676 Research and Practice in TESL/TEFL (Teaching English as a Second/Foreign Language)  
 6693 Literacy for the Young Child in Home and School  
 6700 Ethical and Legal Issues in Counselling  
 6701 Issues and Methodologies in Learning and Developmental Research  
 6702 Counselling: Theory and Practice  
 6703 Personal and Professional Development Group (non-credit)  
 6705 Nature and Development of School Counselling Services  
 6706 Career Education and Career Counselling  
 6707 Assessment for Counsellors  
 6708 Group Counselling: Theory and Practice  
 6709 Assessment of Intelligence and Learning Skills  
 6710 Issues in Development and Implementation of Special Education Policy and Practices  
 6711 Behaviour Modification in the Educational Setting  
 6712 The Nature and Assessment of Behaviour Disorders in Children and Adolescents  
 6713 Educational Applications of Contemporary Cognitive Psychology  
 6714 Principles and Practices in Exceptionality  
 6715 The Theory and Practice of Peer Helping Programs  
 6716 Working with Families and Parents  
 6717 Counselling Adolescents  
 6718 Elementary School Counselling  
 6719 Cultural Issues in Counselling  
 6720 Internship in Counselling Psychology (9 credit hours)

6755 Nature and Assessment of Learning Disabilities  
 6801 Foundations of Post-Secondary Programs  
 6802 Adult Learning and Development  
 6803 Research in Post-Secondary Education  
 6804 Leadership and Human Resource Development in Post-Secondary Education  
 6805 Advanced Human Resource Communications  
 6806 Interprofessional Education in the Health Professions  
 6807 Economics and Finance of Post-Secondary Education  
 6822 Foundations of Instructional Design in Post-Secondary Education  
 6823 Principles of Program Design and Development  
 6831 Organization and Administration of Student Services for the Adult Learner  
 6832 Issues and Trends in the Administration of Post-Secondary Education  
 6841 Student Development Theory, Services and Programs in Post-Secondary Education  
 6890 Research and Development Seminar in Post-Secondary Studies  
 6891 Internship in Post-Secondary Studies (6 credit hours)  
 6900-6910 Special Topics (excluding 6909)  
 6909 Narrative Approaches to Teaching, Learning and Research  
 6911 Multiage Education: An Introduction  
 6912-6950 Special Topics (excluding 6913, 6931, 6932, and 6940)  
 6913 Putting Action Research Methodologies into Practice (*prerequisite: 6469 Theoretical and Methodological Foundations of Action Research*)  
 6931 Educational Technology Law  
 6932 Intellectual Technology Law in Teaching and Learning  
 6940 Administration of Student Services in Post-Secondary Education

## 12 Regulations Governing the Degree of Master of Employment Relations

[www.mun.ca/sgs](http://www.mun.ca/sgs)

**Associate Professor and Director**

A. Hall

The Master of Employment Relations (M.E.R.) is a multidisciplinary program providing advanced level study of all aspects of the employment relationship.

The M.E.R. program is offered by full-time or part-time study and involves 36 credit hours of course work. Candidates registered on a full-time basis will normally complete the program in one academic year. The following regulations must be read in conjunction with the **General Regulations** of the School of Graduate Studies of Memorial University of Newfoundland.

### 12.1 Administration

1. The program shall be administered by a Director, who reports to the Dean of Graduate Studies. The Director shall be appointed by the Dean of Graduate Studies on the recommendation of the Deans of Humanities and Social Sciences and Business Administration. In making this recommendation, the Deans of Humanities and Social Sciences and Business Administration shall consult with the employment relations community both within and outside the University.
2. An Executive Committee consisting of the Director and Deans of Humanities and Social Sciences, Business Administration, and Graduate Studies will be established to review administrative, resource, and strategic planning issues related to the program. This committee shall be chaired by the Dean of Graduate Studies.
3. The Director shall consult with the Graduate Committee in Employment Relations (GCER) for the purposes of administering the academic elements of the program. The GCER shall normally consist of 11 members appointed by the Dean of Graduate Studies on the recommendation of the Director. The GCER will include the Director, who shall Chair the committee, approximately six faculty members from the Faculties of Humanities and Social Sciences and Business Administration who teach core courses, the Associate Deans or Directors of Graduate Studies from Humanities and Social Sciences and Business Administration, as well as one full-time and one part-time student representative.
4. An Advisory Board in Employment Relations (ABER) shall be established for the purposes of consulting with obtaining feedback from the employment relations community. The ABER will consist of a broad cross-section of members from the employment relations community both within and outside the University who shall be appointed by the Dean of Graduate Studies on the recommendation of the Director.

### 12.2 Qualifications for Admission

1. Admission is limited and competitive.
2. To be considered for admission to the M.E.R. program, an applicant shall have:
  - a. An undergraduate degree, normally with a minimum degree average of 70% from an institution recognized by Senate; and
  - b. An undergraduate course in statistics, microeconomics, and one of organizational behaviour, sociology of work or labour history from an institution recognized by Senate, normally with a minimum grade of 70% in each course.
3. Qualified applicants with relevant experience will normally receive preference during the evaluation of applications.
4. It is highly recommended that non-Canadian applicants submit a sample of their academic writing and achieve a satisfactory result on the Graduate Management Admission Test (GMAT) or Graduate Record Examination (GRE).
5. In exceptional cases, applicants who have not completed an undergraduate degree, but who meet all other requirements, may be considered for admission. Preference will be given to those who have a minimum of 10 years of full-time professional experience, including demonstrated success in employment relations, and who have successfully completed substantial university course work including several courses at an advanced undergraduate level from an institution recognized by Senate. Applicants without an undergraduate degree must have completed one or more undergraduate courses in organizational behaviour, statistics, and microeconomics, from an institution recognized by Senate, normally with a minimum grade of 70% in each course. Any applicants who do not meet normal admission requirements may also be required to successfully complete the GMAT or the GRE with a satisfactory result and/or additional undergraduate courses before being considered for admission.
6. Applicants who did not complete a four-year baccalaureate degree at a recognized university where English is the primary language

of instruction must normally complete either the:

- a. Test of English as a Foreign Language (TOEFL) and achieve a paper-based score of 580 (or higher), computer-based score of 237 (or higher), or Internet based score of 92-93 (or higher); or
- b. International English Language Testing System (IELTS) and achieve a score of 7 (or higher).
- c. Information regarding the TOEFL is available from the Educational Testing Service at [www.ets.org](http://www.ets.org). IELTS information is available at [www.ielts.org](http://www.ielts.org). It is noted that other equivalent tests acceptable to the School of Graduate Studies will also be considered.

### 12.3 Deadlines for Applications

1. Applicants seeking full-time enrolment will normally only be admitted to the program in the Fall (September) semester.
2. Applications must be postmarked no later than February 15 for applicants wishing to enter full-time or part-time studies in the Fall (September) semester.
3. Applications must be postmarked not later than August 15 for applicants wishing to enter part-time studies in the Winter (January) semester.
4. Individuals submitting applications later than the above dates are not assured of consideration for admission to the program in the semester desired; their applications will be processed only if time and resources permit.

### 12.4 Procedure for Admission

1. Applications for admission to the M.E.R. program must be made on the appropriate form and submitted to the School of Graduate Studies.
2. The following documents must be submitted in support of the official application form:
  - a. Letter of appraisal from two referees, one of whom is capable of appraising the applicant's academic potential as a graduate student, and of whom is capable of appraising the applicant's professional experience and/or actual or likely success in a career in employment relations.
  - b. The M.E.R. Employment Experience Information Form.
  - c. Official transcripts from each university or other post-secondary institution previously attended, to be sent directly by its Registrar (or equivalent officer) to the School of Graduate Studies. If not recorded on the transcript, official evidence of completion of undergraduate degree must also be submitted.
3. Application files are normally evaluated after the deadline dates for application noted above and only when all required documentation has been received.
4. Admission shall be by the Dean of Graduate Studies on the recommendation of the GCER. Upon notification from the Dean of the School of Graduate Studies of acceptance into the M.E.R. program, applicants must give written notice to the School of Graduate Studies of their intention to register.

### 12.5 Program of Study

1. The M.E.R. program consists of 36 credit hours of course work as specified in **Table 1**. These include 30 credit hours of compulsory courses and 6 credit hours of elective courses. The compulsory courses are comprised of 21 credit hours of core courses specified in **Table 2** and 9 credit hours for a research seminar.
2. The compulsory core courses introduce students to the three main areas of study in the program: labour-management relations; human resources management; and labour market and social policy analysis.
3. Electives allow students to specialize in one or more of the three main areas of study. Electives must be chosen from the list of approved electives specified in **Table 3**. Other courses may be approved and added to **Table 3** from time to time by the GCER.
4. Candidates are responsible for fulfilling all prerequisites and may require special permission from the Department offering an elective to enrol in the course.
5. The Research Seminar in Employment Relations provides students with both quantitative and qualitative research skills and requires the identification of a research problem, the development and execution of a methodology appropriate to addressing the problem, analysis of results, and completion of final report. The Research Seminar involves 3 credit hours of course work in each of the Fall, Winter, and Spring semesters.
6. The prerequisites for EMRE 6030 and EMRE 6040 are EMRE 6010 and EMRE 6020. In addition, students will normally complete six M.E.R. courses before registering for EMRE 6030 or EMRE 6040. There are no prerequisites for EMRE 6010 and EMRE 6020 but students are advised to take these courses late in their programs, just before taking EMRE 6030 or EMRE 6040. For the core courses, the prerequisite for BUS1 9329 is BUS1 8210. For the remaining core courses, there are no prerequisites. For the elective courses, Departmental regulations that specify particular courses as prerequisites will apply but the Departmental requirement to have completed a number of courses will not apply.
7. A waiver of a core course may be granted by the Dean of Graduate Studies on the recommendation of the Director if the candidate can demonstrate that the material in the course has been substantially covered by other courses taken at this or another recognized university. In such cases, the course must be replaced by another course offered by Memorial University of Newfoundland in consultation with the candidate, and approved by the Director. The maximum number of core courses that can be waived is 3 and all replacement courses must be taken during the candidate's period of enrollment in the program.
8. Each student's program of study must be approved by the Director. The Director reserves the right to restrict candidates from taking particular courses if it is deemed that those courses do not add sufficient value beyond courses that the candidate has completed at the undergraduate level.

### 12.6 Evaluation

1. Candidates for the M.E.R. Degree must obtain a grade of B or better in all program courses.
2. Candidates who receive a grade of less than B in a program course will be permitted to remain in the program, provided the course is repeated and passed with a grade of B or better. Alternatively, the candidate may, on the recommendation of the Director and with the approval of the Dean of Graduate Studies, substitute another graduate course. Only one course repetition or substitution will be permitted during the candidate's program after which the candidate shall be required to withdraw from the program.

## 12.7 Courses

The schedule of courses for the M.E.R. program is normally as follows:

**Table 1 Master of Employment Relations Schedule of Courses**

<p><b>Term I (Fall)</b> Four core courses from <b>Table 2</b> Employment Relations 6010 Research Seminar in Employment Relations I: Quantitative Methods</p> <p><b>Term III (Spring)</b> Employment Relations 6040 Research Seminar in Employment Relations III: Applied Research Project One elective from <b>Table 3</b></p>	<p><b>Term II (Winter)</b> Three core courses from <b>Table 2</b> One elective from <b>Table 3</b> Employment Relations 6020 Research Seminar in Employment Relations II: Qualitative Methods</p>
--	---

**Table 2 Master of Employment Relations Core Courses**

<p><b>Business</b> Business 8204 Human Resource Management Business 8210 Labour Relations Business 9329 Labour Law</p> <p><b>Employment Relations</b> Employment Relations 6050 Interpersonal skills in Employment Relations</p>	<p><b>Humanities and Social Sciences</b> Economics 6030 Labour Market Economics History 6075 Advanced Studies in Labour and Working-Class History One of: Sociology 6360 Sociology of Work, Sociology 6090 Special Area in Sociology, or Psychology 6402 Group Processes</p>
--	--

**Table 3 Master of Employment Relations Elective Courses**

<p><b>Labour-Management Relations</b> Business 9013 Collective Agreement Administration and Arbitration Business 9030 International and Comparative Industrial Relations Employment Relations 6030: Independent Research Project</p> <p><b>Human Resource Management</b> Business 9020 International Human Resource Management Business 9311 Seminar in Human Resource Management Business 9314 Business and Taxation Law Business 9317 Current Topics in Management Business 9324 Gender, Work and Organizations Business 9328 Change Management Education 6203 Leadership: Theory and Practice Education 6600 Learning and Motivation Education 6706 Career Education and Career Counselling Education 6802 Adult Learning and Development Education 6805 Advanced Human Resource Communications Employment Relations 6030 Independent Research Project Psychology 6401 Attitudes and Social Cognition Psychology 6402 Group Processes</p>	<p><b>Labour Market and Social Policy Analysis</b> Business 8108 Economics for Business Economics 6000 Advanced Micro-economic Theory Economics 6001 Advanced Macro-economic Theory Education 6410 Philosophical Issues in Educational Policy and Leadership Employment Relations 6030: Independent Research Project Gender Studies 6000 Feminist Theory History 6000 Advanced Studies in Newfoundland History History 6010 Advanced Studies in Canadian History History 6070 Advanced Studies in Social History History 6090 Advanced Studies in Women's History History 6120 Advanced Studies in Economic and Business History Political Science 6700 Canadian Politics Political Science 6740 Public Administration Political Science 6790 Public Policy Sociology 6320 Gender and Society Sociology 6370 Feminist Theory and Methods</p>
--	--

Note: Students may require special permission from the instructor and/or relevant graduate program administrator prior to enrolling in an elective course.

## 13 Regulations Governing the Degree of Master of Engineering

www.engr.mun.ca

### Professor and Dean

G. Naterer

The degree of Master of Engineering (M.Eng.) is a research-focused degree and may be obtained either through full-time or part-time studies. The M.Eng. degree can be obtained through programs in Civil Engineering, Computer Engineering, Electrical Engineering, Mechanical Engineering, Ocean and Naval Architectural Engineering, Oil and Gas Engineering, and Process Engineering.

In addition to the Master of Applied Science and Master of Engineering programs offered by the Faculty of Engineering and Applied Science, the Faculty also offers a course-based graduate diploma in Safety and Risk Engineering. For further information on this program refer to the regulations governing the **Graduate Diploma in Safety and Risk Engineering**.

### 13.1 Qualifications for Admission

To be considered for admission, an applicant shall meet the requirements set out in General Regulation, **Qualification for Admission**, or shall have qualifications and/or engineering experience that is acceptable to the Dean of Graduate Studies and to the Faculty of Engineering and Applied Science.

Admission to the M.Eng. program is limited and competitive. All applicants must meet the minimum qualifications set out in the above paragraph. Decisions on admission, however, will also take into account such things as the applicant's rank in class, referees' assessments, general performance throughout the applicant's undergraduate academic program, and the availability of supervisors in the area of the applicant's interest.

Normally applicants will be considered in January for admission to the following September. In special cases applicants may also be considered in April and August. Applications should be made sufficiently far in advance to permit the University to obtain all relevant documents and review the application.

Students who have successfully completed the requirements for the Graduate Diploma in Safety and Risk Engineering may receive transfer credits towards the M.Eng. degree in an affiliated area.

## 13.2 Program of Study and Research

1. Students enrolled in the Master of Engineering program will work in one of the following areas: Civil Engineering; Computer Engineering; Electrical Engineering; Mechanical Engineering; Ocean and Naval Architectural Engineering; and Oil and Gas Engineering.
2. A program shall normally consist of:
  - a. a thesis related to the area of study
  - b. 12 credit hours from graduate courses with at least 6 credit hours taken from the list of **Core Courses** below
  - c. Seminar course 9100
  - d. such other courses as may be required in an individual's program.
3. The thesis is to contain the results of a systematic investigation which has been conducted by the candidate under the direction of the Supervisor.
4. With the approval of the Dean of Graduate Studies and on the recommendation of the Faculty of Engineering and Applied Science, credit towards the course requirements may be considered for graduate courses previously taken by the student in accordance with the **General Regulations** for course credit transfers.

## 13.3 Supervision

1. Each student shall be assigned to a Supervisor approved by the Dean of Graduate Studies on the recommendation of the Faculty of Engineering and Applied Science.
2. The Supervisor shall propose a tentative program of study and topic of investigation which must be approved by the Dean of Graduate Studies acting on the recommendation of the Faculty of Engineering and Applied Science, before the acceptance of a student in the program.
3. At the end of each semester, the Supervisor shall report on the student's progress to the Dean of Engineering and Applied Science for onward transmission to the Dean of Graduate Studies.
4. A temporary or permanent change of Supervisor for a student already in a program shall be permitted only with the approval of the Dean of Graduate Studies and the Dean of Engineering and Applied Science.
5. The Supervisor shall advise the student in the preparation and presentation of a seminar on the student's topic of investigation as described in **Thesis**, 2. below.

## 13.4 Industrial Internship Option

The Faculty encourages graduate students to undertake internships of work in industry. Internships in industry will permit students either (a) to focus on the practicalities of research projects which have been well defined before the student enters an internship, or (b) to develop and define a research project from problems experienced during the internship. Encouragement to undertake an internship will be given only where it is clear that one of these expectations can be met.

Students registered in the Master of Engineering Program may, with the permission of their Supervisor, the Dean of the Faculty of Engineering and Applied Science, and the Dean of Graduate Studies select the Industrial Internship Option. Students approved to pursue this option must satisfy the degree regulations for a Master of Engineering Program. In addition, students in the Industrial Internship Option:

1. must take at least 9 credit hours of the courses required for their program on campus; the remaining required courses may be taken on or away from campus; those taken at other universities require pre-approval by the Dean of the School of Graduate Studies on the recommendation of the Faculty of Engineering and Applied Science
2. shall normally spend 8 to 12 months of their program at an internship in industry
3. shall normally spend at least two semesters on campus on a full-time basis as a graduate student at this University
4. shall submit a concise progress report to their supervisors, no later than the end of each semester while on an internship.

## 13.5 Fast-Track Option

Students registered in academic term 7 of a Memorial University of Newfoundland undergraduate engineering program are eligible to apply for admission to an M.Eng. fast-track option. The purpose of the option is to encourage students interested in pursuing graduate studies to begin their research-related activities while still registered as an undergraduate student. Normally, to be considered for admission to the option, students must have achieved at least a 70% average over academic terms 1 to 6 of their undergraduate engineering program. While enrolled in the option, a student may complete some of the M.Eng. Degree requirements and, hence, potentially be able to graduate earlier from the M.Eng. program.

Students shall enroll in the M.Eng. fast-track option concurrently with their undergraduate program during the Fall semester prior to academic term 8. Prior to entering the fast-track option, students must apply for and receive an exemption from work term 6. While enrolled in the option a student must be registered in full-time graduate studies during the Fall semester prior to academic term 8; during academic term 8, the student must take a leave of absence from the graduate program. A student enrolled in the fast-track option shall undertake research related to their field of study and shall normally complete at least 3 credit hours from the courses listed for their M.Eng. program in the Fall semester prior to academic term 8.

In the Fall semester following academic term 7, fast-track option students will pay only the graduate fees appropriate to graduate students following plan A of **Fees and Charges** (i.e., the 6 semester plan). In the succeeding Winter semester, while completing academic term 8 of their undergraduate program, fast-track option students will pay only the appropriate undergraduate fees.

Upon completion of their undergraduate program, students may register in the M.Eng. program on a full-time basis. All courses taken as part of their graduate program while enrolled in the M.Eng. fast-track option are credited towards the M.Eng. Degree course credit hour requirements. Courses taken as credit towards a student's undergraduate degree may not be credited towards a student's graduate degree; courses credited towards a student's graduate degree may not be credited towards a student's undergraduate degree. Students who do not complete their undergraduate degree within one year of entering the fast-track option will normally be required to withdraw from their M.Eng. program.

### 13.6 Course Evaluation

1. In order to continue in the program, a student shall obtain an A or B grade in each course taken for credit.
2. The student's achievement in the program must be to the satisfaction of the Dean of Graduate Studies and the Faculty of Engineering and Applied Science. When it has been determined on the basis of consultations with the student, the course instructors and the Supervisor, that a student's work has fallen below satisfactory level, he/she may be required to withdraw from the program.

### 13.7 Thesis

1. A student who expects to graduate must inform the Dean of Graduate Studies of this intention at least three months before the University Convocation at which the award of the degree is expected.
2. Before the thesis is submitted, the student shall present an open seminar on the topic of investigation to the Faculty of Engineering and Applied Science. Any serious deficiencies noticed at this stage should be carefully considered, in consultation with the Supervisor, for rectification.
3. Three copies of the thesis shall be submitted to the School of Graduate Studies through the Faculty of Engineering and Applied Science, in a form and format as specified in the Thesis Guide issued by the School of Graduate Studies and the Presentation of Theses Guide issued by the Faculty of Engineering and Applied Science. A submission which does not meet the specifications will be returned to the candidate.
4. Examiners shall be appointed by the Dean of Graduate Studies on the recommendation of the Faculty of Engineering and Applied Science soon after the student has expressed an intention to submit the thesis.

### 13.8 Evaluation of Theses

Theses evaluation shall be carried out in accordance with **Theses and Reports** of the **General Regulations** governing all students in the School of Graduate Studies.

### 13.9 Recommendation for Awarding Degree

When a student has completed all the requirements for the Master of Engineering (M.Eng.) Degree, the Faculty of Engineering and Applied Science shall forward a recommendation to the Dean of Graduate Studies for the award of the Degree.

### 13.10 Graduate Diploma in Safety and Risk Engineering

The Faculty of Engineering and Applied Science offers a course-based Graduate Diploma in Safety and Risk Engineering to provide an opportunity for engineers in a variety of engineering disciplines to obtain or upgrade their training in Safety and Risk Engineering. The program is available on a full-time or part-time basis.

#### 13.10.1 Qualifications for Admission

1. Admission to the program is limited and competitive.
2. To be eligible for consideration for admission, an applicant shall meet the requirements described under **General Regulations, Qualification for Admission**, or shall have qualifications and/or engineering experience that is acceptable to the Dean of Graduate Studies and to the Faculty of Engineering and Applied Science.
3. To be eligible for consideration for admission, applicants will meet the English Proficiency requirements described under **General Regulations, English Proficiency Requirements**.

#### 13.10.2 Program of Study

1. The Diploma program requires the completion of 18 credit hours as follows:
  - a. Engineering 9115, 9116, 9121, and 9411; and
  - b. two courses selected from Engineering 9396, 9516, 9609, 9622.

### 13.11 Master of Applied Science Programs

The Faculty of Engineering and Applied Science offers the following course-based programs:

#### 13.11.1 Computer Engineering

In addition to the research-focused M.Eng. Degree in Computer Engineering, the Faculty of Engineering and Applied Science offers a course-based program in Computer Engineering leading to a Master of Applied Science Degree in Computer Engineering. For details of program requirements for the M.A.Sc. Degree in Computer Engineering, refer to the regulations governing the Degree of **Master of Applied Science**.

#### 13.11.2 Environmental Systems Engineering and Management

The Faculty of Engineering and Applied Science offers a course-based program in Environmental Systems Engineering and Management. For the details of the program requirements for the M.A.Sc. Degree in Environmental Systems Engineering and Management refer to the regulations governing the Degree of **Master of Applied Science in Environmental Systems Engineering and Management**.

#### 13.11.3 Oil and Gas Engineering

The Faculty of Engineering and Applied Science offers a course-based program in Oil and Gas Engineering. For the details of the program requirements for the M.A.Sc. degree in Oil and Gas Engineering refer to the regulations governing the Degree of **Master of Applied Science in Oil and Gas Engineering**.

## 13.12 Courses

A selection of the following graduate courses will be offered to meet the requirements of the candidates, as far as the resources of the Faculty will allow.

### 13.12.1 Required Course

9100 Engineering Graduate Seminar (1 credit hour)

### 13.12.2 Core Courses

9002 Ocean Engineering Structures  
 9015 Ocean Engineering Hydrodynamics  
 9110 Advanced Petroleum Production Engineering  
 9113 Phase Behaviour of Petroleum Reservoir Fluids  
 9114 Advanced Reservoir Engineering  
 9115 Safety and Risk Engineering  
 9118 Advanced Drilling Engineering  
 9121 Advanced Safety, Risk and Reliability Modeling  
 9211 Experimental Methods  
 9411 Probabilistic Methods in Engineering  
 9420 Engineering Analysis  
 9496 Modeling and Simulation of Dynamic Systems  
 9501 Finite Element Analysis with Engineering Applications  
 9505 Structural Dynamics and Vibrations  
 9516 Similitude, Modelling and Experimental Data Analysis  
 9520 Solid and Structural Mechanics  
 9550 Fatigue, Fracture and Corrosion  
 9609 Environmental Risk Assessment  
 9627 Environmental Systems Engineering  
 9816 Antenna Theory  
 9821 Digital Signal Processing  
 9826 Advanced Control Systems  
 9827 Continuous and Discrete-Event Systems  
 9834 Advanced Power Electronics  
 9847 Computer and Control Methods in Power Systems  
 9861 High-Performance Computer Architecture  
 9865 Advanced Digital Systems  
 9867 Advanced Computing Concepts for Engineering  
 9871 Information Theory and Coding  
 9874 Software Design and Specification  
 9876 Advanced Data Networks  
 9901 Fundamentals of Fluid Dynamics  
 9902 Advanced Transport Phenomena  
 9940 Advanced Robotics  
 9977 Computational Fluid Dynamics

### 13.12.3 Other Courses

9022 Marine Geotechnical Engineering  
 9052 Ice Properties and Mechanics  
 9090/99 Special Topics in Ocean Engineering (excluding 9096)  
 9096 Marine and Offshore Ice Engineering  
 9111 Well Testing  
 9112 Multiphase Flow  
 9116 Reliability Engineering  
 9117 Offshore Petroleum Geology and Technology  
 9119 Compact Process Equipment Design  
 9120 Advanced Natural Gas Engineering  
 9150-59 Special Topics in Oil and Gas Engineering  
 9200 Industrial Internship  
 9210 Advanced Engineering Materials  
 9390/94 Special Topics in Engineering Management  
 9440 Optimization Principles in Engineering  
 9495/99 Special Topics in Engineering Analysis (excluding 9496)  
 9540/49 Special Topics in Mechanics, Structures and Materials  
 9560 Applied Remote Sensing  
 9601 Environmental Pollution and Mitigation (cross-listed as Environmental Science 6004)  
 9603 Environmental Sampling and Pollutant Analysis (*cross-listed as Environmental Science 6005*)  
 9605 Water and Wastewater Treatment  
 9610/15 Special Topics in Environmental Engineering and Applied Science  
 9621 Soil Remediation Engineering  
 9622 Environmental Statistics  
 9625 Environmental Impacts of Offshore Oil and Gas Operations  
 9626 Environmental Management System  
 9628 Environmental Laboratory  
 9629 Environmental Policy and Regulations  
 9630 Pollution Prevention  
 9713 Stochastic Hydrology  
 9723 Soil Properties and Behaviour (formerly 9720)  
 9750 Advanced Topics in Analysis and Design of Reinforced Concrete (*formerly 9701*)  
 9755 Advanced Topics in Precast and Prestressed Concrete (*formerly 9702*)  
 9760/64 Special Topics in Geotechnical Engineering

9790 Subsea Pipeline Engineering  
 9791/99 Special Topics in Civil Engineering  
 9802/05 (excluding 9804) Special Topics in Computer Engineering  
 9804 Industrial Machine Vision  
 9806/09 Special Topics in Communications Engineering  
 9815 Electromagnetic Propagation  
 9822 Nonlinear Digital Image Processing and Analysis  
 9825 Random Signals (*formerly 9830*)  
 9835 Advanced Electric Machines  
 9848 Power System Stability (*formerly 9812*)  
 9849 Power System Protection  
 9850/53 Special Topics in Power Systems and Controls  
 9866 Fault-Tolerant Computing (*formerly 9846*)  
 9868 ASIC Design  
 9869 Advanced Concurrent Programming  
 9872 Digital Communications  
 9873 Image Communications  
 9875 Embedded and Real-Time Systems Design  
 9877 Computer and Communications Security  
 9878 Wireless and Mobile Communications  
 9879 Formal Specification and Development  
 9880/83 Special Topics in Computer Engineering  
 9884/87 Special Topics in Signal Processing  
 9888/91 Special Topics in Communications Engineering  
 9892/95 Special Topics in Power Systems and Controls  
 9896 Renewable Energy Systems  
 9897/99 Special Topics in Applied Electromagnetics  
 9910 Advanced Manufacturing  
 9920 Advanced Concepts in Mechanical Design  
 9925 Theory and Design of Mechanical Components and Structures  
 9971 Nonlinear and Random Vibrations Analysis  
 9975/99 (excluding 9977 and 9979) Special Topics in Mechanical Engineering  
 9979 Fluid Structure Interactions

\* Courses likely to be offered annually on a regular basis. Other courses will be offered if required in a student's program and dependent upon Faculty resources.

## 14 Regulations Governing the Degree of Master of Environmental Science

[www.mun.ca/science](http://www.mun.ca/science)

(see also **Master of Science in Environmental Science**)

### Board of Studies

Dr. N. Catto, Department of Geography - Chair  
 Dr. C. Campbell, Division of Science, Grenfell Campus, ex-officio  
 Dr. B. Chen, Faculty of Engineering and Applied Science  
 Dr. P. Marino, Head, Department of Biology  
 Dr. W. Montevecchi, Department of Psychology  
 Dr. S. Ziegler, Department of Earth Sciences

### 14.1 Program of Study

1. The Environmental Science Program is an interdisciplinary graduate program involving the departments of the Faculty of Science, the Faculty of Humanities and Social Sciences, the Faculty of Medicine, and the Faculty of Engineering and Applied Science. There are three Environmental Science Graduate Degree streams: the Master of Science (M.Sc., Environmental Science), Master of Environmental Science (M.Env.Sci.), and the Doctor of Philosophy (Ph.D., Environmental Science). The program is available on a full or part-time basis.
2. The program is administered by a Board of Studies appointed by the Dean of Science. Supervisors of graduate students in the program include faculty from the Faculty of Science, the Faculty of Humanities and Social Sciences, the Faculty of Engineering and Applied Science, the Faculty of Medicine, and the Environmental Science Program at the Grenfell Campus, as well as adjunct appointees to the program (as a co-supervisor).

### 14.2 Qualifications for Admission

Admission is limited and competitive. To be considered for admission applicants shall normally hold a Bachelor's (Honours) degree in Science, Geography, or Environmental Science with at least second class standing, or equivalent, or a Bachelor's degree in Engineering from an institution recognized by the Senate, or shall have qualifications and/or environmental experience acceptable to the Dean of Graduate Studies and the Board of Studies. The Board of Studies will make recommendations on admission to the Dean of Graduate Studies.

### 14.3 Degree Requirements

To the extent that resources permit, individual programs will be developed to suit students' interests and needs. However all programs must be approved by the Board of Studies and by the Dean of Graduate Studies. All **General Regulations** of the School of Graduate Studies shall apply to these degrees.

1. The Master of Environmental Science (M.Env.Sci.) is a multidisciplinary course-based degree, focussed on environmental issues. The Degree program provides for both multidisciplinary courses and for courses focussed on the student's specific area of interest.
2. The Degree program requires completion of 24 credit hours of either **Option A** or **Option B** and a project report. The project report will be evaluated according to procedures outlined in **General Regulations, Theses and Reports**.

**Option A**

Students will be required to take a minimum of 15 credit hours in program courses, 9 credit hours of which must be Environmental Science 6000, Environmental Science 6009, and Environmental Science 6010 and 6 credit hours from Environmental Science 6001, 6002, and 6003. Students will also be required to take a minimum of 9 credit hours in elective courses approved by the Board of Studies, 6 credit hours of which will normally be selected from graduate courses offered by the Faculty of Science and the Faculty of Engineering and Applied Science. Students are advised to consult with instructors and Faculties regarding necessary prerequisites and availability.

**Option B**

Students will be required to take a minimum of 15 credit hours in program courses, 9 credit hours of which must be Environmental Science 6000, Environmental Science 6009, and Environmental Science 6010 and 6 credit hours from Environmental Science 6001, 6002, and 6003. Students will also be required to take a minimum of 6 credit hours in elective courses approved by the Board of Studies, normally selected from graduate courses offered by the Faculty of Science and Faculty of Engineering and Applied Science. In addition, students will be required to complete the 3 credit hours course Environmental Science 601W (work term).

Environmental Science 601W is a work term of one semester duration. Work term placements are arranged by Co-operative Education in consultation with the Program Chair and the student's Supervisor. The on-site employment supervisor and Co-operative Education evaluate the work term based on the student's performance on the job and on a written work term report submitted by the student. The topic of the work term report must be related to the work experience and will be chosen by the student in consultation with the on-site employment supervisor and Co-operative Education. The student will be permitted to submit a work term report only after the on-site employment supervisor and Co-operative Education determine that the work term has been successfully completed. The work term report may become the basis for the project report for Environmental Science 6009 (Project) which is required for the M.Env.Sci. Degree. The Program Chair, on the advice of Co-operative Education with input from the on-site employment supervisor, will recommend to the Dean of Graduate Studies a grade of Pass with Distinction, Pass, or Fail. In cases where Co-operative Education and the on-site employment supervisor are unable to reach agreement concerning the grade, the final decision lies with the Program Chair. Should a student fail to complete a work term successfully, the graduate student's M.Env.Sci. Supervisor and the Program Chair may submit to Co-operative Education a proposal for a different work term placement (only once), or the student may apply to the Board of Studies for a change to the course-based M.Env.Sci. Option A, or to the thesis-based M.Sc. (Environmental Science).

**14.4 Courses**

6000 Environmental Science and Technology  
 6001 Earth and Ocean Systems  
 6002 Environmental Chemistry and Toxicology  
 6003 Applied Ecology  
 6004 Environmental Pollution and Mitigation (*cross-listed as ENGI 9601*)  
 6007 Environmental Risk Assessment (*cross-listed as ENGI 9609*)  
 6008 Air Pollution (*same as ENGI 9624*)  
 6009 Environmental Science Project  
 6010 Environmental Seminar  
 6201-6210 Special Topics in Environmental Science  
 601W Work Term

**15 Regulations Governing the Degree of Master of Gender Studies**

[www.mun.ca/hss](http://www.mun.ca/hss)  
[www.mun.ca/genderstudies](http://www.mun.ca/genderstudies)

**Associate Professor and Head of the Department**

P. Dold

**15.1 General Information**

The Master of Gender Studies degree allows students to examine critically - at an advanced level - how gender shapes our identities, our social interactions and our world. Students will incorporate, into their study, frameworks for thinking about power relations and the ways those relations are shaped and challenged by intersecting constructions of gender, race, class, sexuality, age, ability, and nationality.

Faculty members in the Department of Gender Studies bring research expertise and interests in a range of fields, including: citizenship and human rights; corporeal feminism; reproductive rights, auto-biography, and life writing; postcolonial and transnational feminisms; and First Nations studies. This master's program offers a thriving environment that draws on the expertise of scholars from a wide range of academic disciplines.

The program is administered by the Department of Gender Studies and the Graduate Studies Advisory Committee.

The Graduate Co-ordinator, on behalf of the Department of Gender Studies, Graduate Studies Advisory Committee, makes recommendations to the Dean of Graduate Studies concerning admission, and financial support for students, and administers all other matters pertaining to the graduate program.

The Master of Gender Studies Degree offers, by full or part-time study, three degree options: thesis, project, or internship.

**15.2 Qualifications for Admission**

1. Admission is limited and competitive. To be considered for admission, an applicant will normally hold an Honours Degree or equivalent, and will have a breadth of knowledge in Gender Studies satisfactory to the Graduate Studies Advisory Committee.
2. Applicants who do not have an adequate background in Gender Studies may be required to complete Gender Studies 3005 or Gender Studies 3025 or equivalent normally with a grade of 75% or higher.

**15.3 Program of Study**

1. Upon admission, each graduate student in the thesis program will be assigned an academic advisor for one year. The supervisory committee, formed prior to the development of the thesis project proposal, will include two supervisors. For students selecting the non-thesis option, one Supervisor will be selected.
2. All candidates are required to complete Gender Studies 6000, 6100, and 6200.

3. Three to 9 additional elective credit hours approved by the Graduate Studies Advisory Committee and the student's supervisor(s) will be required. These elective credit hours will comprise courses selected from graduate courses in cognate academic units, and/or Gender Studies 6300 and/or from the block of special topics courses in Gender Studies 6400-6420.
4. Each student will be required to give a public seminar on her/his thesis research, project, or internship after the thesis proposal has been approved and before submission of her/his final thesis/project/internship report.

## 15.4 Thesis

1. Candidates for the Degree of Master of Gender Studies (thesis option) will be required to complete a minimum of 15 credit hours. Candidates will also be required to complete a thesis.
2. A thesis proposal, approved by the student's supervisors, will be presented to the Graduate Studies Advisory Committee for its approval. The thesis proposal must normally be approved by the Graduate Studies Advisory Committee no later than the end of the candidate's third semester in the program.
3. The thesis will be evaluated in accordance with the procedures outlined in General Regulation **Theses and Reports** of the School of Graduate Studies.

## 15.5 Project

1. Candidates for the Degree of Master of Gender Studies (project option) will be required to complete a minimum of 18 credit hours. Candidates will also be required to complete a project.
2. The Master's project must be interdisciplinary in nature and aimed at linking theoretical and practical knowledge by recognizing and articulating a problem relevant to Gender Studies and by developing and justifying theoretical and practical approaches. The project report should consist of the project (e.g., a film or video; a computer project; a website; a manual or guidebook; a kit of learning resources; photographs; audio or videotape, etc.) as well as a literature-based rationale, theoretical basis and justification for its use. The length of the written portion of the project should be 40-60 pages. Regardless of the form that the project takes (e.g., a film or video) a computer project; a website; a manual or guidebook; a kit of learning resources; photographs; audio or videotape, etc.) there must be a written project report.
3. A project proposal, approved by the student's supervisor, will be presented to the Graduate Studies Advisory Committee for its approval. The project proposal must normally be approved by the Graduate Studies Advisory Committee no later than the end of the candidate's third semester in the program.
4. The project will be evaluated in accordance with procedures outlined in General Regulation **Theses and Reports** of the School of Graduate Studies.

## 15.6 Internship

1. Candidates for the Degree of Master of Gender Studies (internship option) will complete a minimum of 18 credit hours. Candidates will also be required to complete an internship.
2. Internship placement shall be for one semester. Part-time internships of two semesters will require approval from the proposed agency or institution and the Graduate Studies Advisory Committee.
3. Students, in consultation with their supervisor and the Gender Studies Graduate Co-ordinator, will explore internship options and locate an eligible person to provide field instruction during their internship. Although consideration will be given to all factors affecting the location and type of all Gender Studies internships, the final decision regarding internship rests with the Head, Department of Gender Studies and the Dean of Graduate Studies.
4. Factors affecting the type and location of the internship include: the number of immersion hours per week, the extent to which the intern takes up a trainee, supervisory and/or research role, and whether the intern would be working directly or indirectly with clients of the agency or institution.
5. Each internship shall be supervised by a Supervisory Committee of at least three members, including the candidate's supervisor, the field supervisor, and Gender Studies Graduate Co-ordinator or her/his delegate.
6. The Supervisory Committee will meet with the intern and field supervisor at least once during the internship period to make an assessment of the nature and quality of the intern's progress, and to approve any modifications to the internship.
7. The internship proposal, approved by the student's supervisor, will be presented to the Graduate Studies Advisory Committee for its approval. The proposal must normally be approved by the Graduate Studies Advisory Committee no later than the end of the candidate's third semester in the program.
8. Regardless of the form that the internship takes, there must be a written internship report (40-60 pages). When the candidate completes the internship report, the Supervisory Committee will recommend to the Dean of Graduate Studies a grade of pass or fail. A candidate will be permitted to submit an internship report only after the Supervisory Committee has determined that the internship placement has been fully completed.
9. Should the Head, Department of Gender Studies, on the recommendation of the Supervisory Committee, terminate the internship prior to its completion, it may recommend to the Dean of Graduate Studies one of the following:
  - a. submission of a new internship proposal for a different field setting (once only);
  - b. selection of the thesis or project option;
  - c. termination of the student's program.

## 15.7 Courses

6000 Feminist Theory  
 6100 Feminist Epistemologies and Methodologies  
 6200 Graduate Seminar in Gender Studies  
 6300 Feminism as Community  
 6400-6420 Special Topics in Gender Studies

## 16 Regulations Governing the Degree of Master of Health Ethics

www.med.mun.ca

### Professor and Dean

J. Rourke

The degree of Master of Health Ethics is offered by the Faculty of Medicine, delivering an advanced program of study for students from various academic fields who are interested in a flexible graduate degree designed to prepare them for a career in ethics within health care organizations or, for those students completing the research option, further study in health ethics at the Ph.D. level.

The **General Regulations** of the School of Graduate Studies and the regulations outlined below will apply.

### 16.1 Qualifications for Admission

Admission to the Master of Health Ethics is limited and competitive. The regulations and procedures for admission are as given under the **General Regulations** of the School of Graduate Studies governing Master's degrees. In addition, to be considered for admission applicants must have successfully completed a minimum of one senior level undergraduate course in Philosophy with substantial ethics content.

### 16.2 Program of Study

- The Master of Health Ethics degree is offered by full or part-time study. Candidates may choose one of three program options: (1) Thesis option, (2) Non-thesis, Capstone Project option, (3) Non-thesis, Research Papers option. It is anticipated that full-time students will complete the program in four semesters in accordance with **Table 1 Master of Health Ethics Recommended Course Sequence for Full-Time Students**.
- The program of study is the responsibility of the Supervisory Committee composed of a Supervisor and at least two other faculty members. It is the responsibility of the Supervisory Committee to meet regularly (at least annually) with the student and to provide guidance at all stages of the candidate's program. An annual report prepared by the Supervisor and signed by the student and all members of the Committee is required to be submitted to the Assistant Dean of Research and Graduate Studies (Medicine).
- All candidates must complete the following course requirements:
  - MED 6800, MED 6801, and MED 6806
  - 3 elective courses (9 credit hours) chosen in consultation with the Supervisor. Elective courses may be selected from the elective courses listing below (excluding MED 6820, 6821, 6822, and 6825) or from other courses approved by the Supervisor.
- In addition, all candidates must complete a Health Ethics Practicum (MED 6815). The practicum will include three placements during the semester in which it is taken, one in each of the following areas of health ethics: clinical ethics, research ethics, and health ethics policy. Each placement will be approximately four weeks in length and students will be required to devote a minimum of 40 hours in overall placement activities. All course work identified above must be completed prior to initiation of the practicum.
- Students must also complete one of the following in accordance with the program option to which they have been admitted:
  - A thesis, submitted in accordance with the **General Regulations, Thesis and Reports** of the School of Graduate Studies.
  - Three Health Ethics Research Papers (represented as MED 6820). Research topics will be chosen in consultation with, and approved by, the Supervisor. Students must register for the course MED 6820 in every semester during which they are completing one or more of the Research Papers necessary to satisfy this requirement. A grade of NC (No Credit) will be awarded in all semesters prior to the final semester. A grade of 'B' or better is required in each of the three required Research Papers in order to successfully complete this requirement and receive a grade of 'Pass' in the final semester. Each paper will be evaluated by the supervising faculty member and another faculty member qualified to evaluate the work.
  - A Health Ethics Capstone Project (MED 6825). The Capstone Project will be chosen in consultation with, and approved by, the Supervisor. Students must register for the course MED 6825 in every semester during which they are completing the Capstone Project. A grade of NC (No Credit) will be awarded in all semesters prior to the final semester. The completed Capstone Project will be evaluated by the supervising faculty member along with a representative of the external organization for which the project was undertaken.

**Table 1 Master of Health Ethics Recommended Course Sequence for Full-Time Students**

Semester	Courses
Fall	MED 6806 Introduction to the Canadian Health System MED 6801 Important Cases in Health Ethics Elective Course
Winter	MED 6800 Health Ethics Theory Elective Course Elective Course
Spring and Fall	MED 6815 Health Ethics Practicum, and one of the following: MED 6820 Health Ethics Research Papers MED 6825 Health Ethics Capstone Project Thesis

### 16.3 Courses

A selection of the following graduate courses shall be offered to meet the requirements of students, as far as the resources of the Faculty allow.

MED 6800 Health Ethics Theory  
 MED 6801 Important Cases in Health Ethics  
 MED 6803 Research Ethics  
 MED 6804 Public Health Ethics  
 MED 6806 Introduction to the Canadian Health System  
 MED 6807-6814 Special Topics in Health Ethics  
 MED 6815 Health Ethics Practicum

## 17 Regulations Governing the Degree of Master of Marine Studies and the Graduate Diploma in Fisheries Resource Management

www.mi.mun.ca

### Vice-President (Marine Institute)

G. Blackwood

The degree of Master of Marine Studies (M.M.S.) is offered in Fisheries Resource Management (FRM) and in Marine Spatial Planning and Management (MSPM). There is also a Graduate Diploma in Fisheries Resource Management.

Both the Fisheries Resource Management and the Marine Spatial Planning and Management program areas will be administered by Academic Directors appointed by the Vice-President (Marine Institute), together with Academic Advisory Committees.

Academic Advisory Committees for each program area will be appointed by the Dean of Graduate Studies on recommendation of the Vice-President (Marine Institute). Each of these committees will consist of the Academic Director as Chair, three members from the Marine Institute and two members from other academic units of the University. Normally, all appointments will be for a period of three (3) years.

For the Fisheries Resource Management programs, a Technical Advisory Committee consisting of a cross-section of members with professional expertise related to the fishery, will provide regular feedback on program content, instruction, and future direction of the Program.

For the Marine Spatial Planning and Management program, a Technical Advisory Committee, consisting of a cross-section of members with professional expertise related to the ocean/marine sector, will provide regular feedback on program content, instruction, and future direction of the Program.

Members of these Technical Advisory Committees will be appointed by the Dean of Graduate Studies on recommendation of the Vice-President (Marine Institute). The Academic Director will be an ex-officio member and Chair of the Technical Advisory Committee. Normally all appointments will be for a period of three (3) years

### 17.1 Graduate Diploma (Fisheries Resource Management)

The Graduate Diploma in Fisheries Resource Management provides an opportunity for fisheries professionals to enhance their perspective on fishery issues from a variety of disciplines.

#### 17.1.1 Admission Requirements

To be considered for admission to the Graduate Diploma in Fisheries Resource Management, a student must be eligible to register in the Master of Marine Studies program (see **Master of Marine Studies (Fisheries Resource Management), Admission Requirements** below).

#### 17.1.2 Program of Study

The program is offered online and requires successful completion of 18 credit hours of course work:

1. 5 courses (15 credit hours) from **Core Courses**; and
2. 1 elective course (3 credit hours) from either **Category A** or **Category B** Electives.

#### 17.1.3 Evaluation

Candidates for the Graduate Diploma in Fisheries Resource Management must obtain a grade of B or better in all program courses.

#### 17.1.4 Courses

Courses required for the Graduate Diploma (Fisheries Resource Management) must be selected from the **Courses** section outlined under the Master of Marine Studies (Fisheries Resource Management) program.

### 17.2 Master of Marine Studies (Fisheries Resource Management)

The Master of Marine Studies (Fisheries Resource Management) is a multi-disciplinary program of study that will provide the candidate with exposure to all dimensions of modern fisheries resource management in an international context. The program is aimed at professionals working in or intending to enter careers in fisheries management. The program is offered online and requires successful completion of either 24 credit hours of course work and a Major Report, or 30 credit hours of course work. Students who have successfully completed the requirements for the Graduate Diploma may elect to continue their program of study in order to earn the Degree.

#### 17.2.1 Admission Requirements

1. Admission to the program is on a competitive basis. To be considered for admission to the program an applicant must normally have an undergraduate degree with a minimum of a high second class standing from an institution recognized by the Senate.
2. In addition, applicants will normally have a demonstrated commitment to fisheries through employment or experience in a sector of the fishery, in a regulatory agency or government department connected to fisheries, in a non-governmental agency, or through self-employment or consulting activities related to fisheries.
3. In exceptional cases, applicants who have not completed an undergraduate degree may be considered for admission. Preference will be given to those who have at least 10 years of relevant professional experience, and have successfully completed several years of post-secondary studies. Applicants who do not meet normal admission requirements shall be required to complete, with a high level of achievement, certain undergraduate courses before being considered for admission.
4. Applicants who did not complete a baccalaureate or post-graduate degree at a recognized university where English is the primary language of instruction must normally complete either the:
  - a. Test of English as a Foreign Language (TOEFL) and achieve a paper-based score of 580 (or higher), computer-based score of 237 (or higher), or Internet based score of 92-93 (or higher); or

b. International English Language Testing System (IELTS) and achieve a score of 7 (or higher).

Information regarding the TOEFL is available from the Educational Testing Service at [www.ets.org](http://www.ets.org). IELTS information is available at [www.ielts.org](http://www.ielts.org). It is noted that other equivalent tests acceptable to the School of Graduate Studies will also be considered.

5. The deadlines for submission of applications for candidates wishing to enter the program are as follows:

Fall (September) semester: June 15

Winter (January) semester: October 15

Spring (May) semester: February 15

Applications received after listed deadlines will be considered as time and resources permit.

### 17.2.2 Program of Study

1. Candidates for the Master of Marine Studies (Fisheries Resource Management) shall be required to complete a minimum of either:
  - a. 24 credit hours of course work plus a Major Report on the **Course Work Plus a Major Report Route** completed in accordance with **General Regulation, Theses and Reports** of the School of Graduate Studies. Course work must include the following course selections from the **Courses** section below:
    - 5 core courses (15 credit hours)
    - 1 elective course (3 credit hours) from **Category A** Electives
    - 1 elective course (3 credit hours) from **Category B** Electives
    - 1 elective course (3 credit hours) from either **Category A** or **Category B**
  - b. 30 credit hours on a **Comprehensive Course Route** which must include the following course selections from the **Courses** section below:
    - 5 core courses (15 credit hours)
    - 2 elective courses (6 credit hours) from **Category A** Electives
    - 1 elective course (3 credit hours) from **Category B** Electives
    - 2 elective courses (6 credit hours) from either **Category A** or **Category B**
2. Dependent upon the applicant's academic background, other courses may be required by the Academic Advisory Committee.
3. Transfer of credit for graduate courses completed in other programs at the University or at other institutions recognized by Senate will be considered in accordance with School of Graduate Studies **General Regulations, Transfer of Course Credits**.
4. Those having partially completed the requirements for the degree under 2011-2012 Calendar Regulations may apply to transfer to one of the above program options and will be considered in accordance with the following:
  - a. Those having previously completed all coursework required for the degree, but who have not submitted the Major Report, may satisfy the **Comprehensive Course Route** requirements by successfully completing an additional 6 credit hours of courses as follows:
    - MSTM 6005 (for students who completed the former FRM 6009 to satisfy the 24 credit hours of courses required under previous program regulations, an additional elective course chosen from **Category A** or **B** must be selected in place of this course)
    - One further elective course (3 credit hours) from **Category A** or **B** electives
  - b. Those having previously completed all coursework required for the degree may satisfy the Major Report requirements by successfully completing:
    - MSTM 6001 (or the former FRM 6001)
    - MSTM 6002 (or the former FRM 6002)
    - MSTM 6003 (or the former FRM 6003)
    - MSTM 6004 (or either of the former FRM 6004 or FRM 6005)
    - MSTM 6005 (or the former FRM 6009)
    - a Major Report completed in accordance with **General Regulations, Theses and Reports** of the School of Graduate Studies together with the following course selections from the **Courses** section below:
      - 1 elective course (3 credit hours) from **Category A** Electives
      - 1 elective course (3 credit hours) from **Category B** Electives
      - 1 elective course (3 credit hours) from either **Category A** or **Category B**. The former FRM 6007 and/or FRM 6008 may be used to partially satisfy the elective requirement.
  - c. Those having previously partially completed the coursework required for the degree may satisfy the **Comprehensive Course Route** requirements by successfully completing:
    - MSTM 6001 (or the former FRM 6001)
    - MSTM 6002 (or the former FRM 6002)
    - MSTM 6003 (or the former FRM 6003)
    - MSTM 6004 (or either of the former FRM 6004 or FRM 6005)
    - MSTM 6005 (or the former FRM 6009) together with the following course selections from the **Courses** section below:
      - 1 elective course (3 credit hours) from **Category A** Electives
      - 1 elective course (3 credit hours) from **Category B** Electives
      - 3 elective courses (9 credit hours) from either **Category A** or **Category B**. The former FRM 6007 and/or FRM 6008 may be used to partially satisfy the elective requirement.

#### 17.2.2.1 Course Work Plus a Major Report Route

24 credit hours of course work plus a Major Report completed in accordance with **General Regulations, Theses and Reports** of the School of Graduate Studies. Course work must include the following course selections from the **Courses** section below:

1. 5 core courses (15 credit hours)
2. 1 elective course (3 credit hours) from **Category A** Electives

3. 1 elective course (3 credit hours) from **Category B** Electives
4. 1 elective course (3 credit hours) from either **Category A** or **Category B**

#### 17.2.2.2 Comprehensive Course Route

30 credit hours on the Comprehensive Course Route which must include the following course selections from the **Courses** section below:

1. 5 core courses (15 credit hours)
2. 2 elective courses (6 credit hours) from **Category A** Electives
3. 1 elective course (3 credit hours) from **Category B** Electives
4. 2 elective courses (6 credit hours) from either **Category A** or **Category B**

#### 17.2.3 Evaluation

1. Candidates for the Master's Degree must obtain a grade of B or better in all program courses.
2. Candidates who have received a grade less than a B in a program course will be permitted to remain in the program, provided the course is retaken and passed with a grade of B or better. Alternatively the candidate may, on the recommendation of the Academic Advisory Committee, substitute another graduate course. Only one such repeat or substitution will be permitted in the program.
3. The Major Report will normally be undertaken towards the end of the program. The topic of the report and a faculty Supervisor will be chosen by the candidate in consultation with the Academic Advisory Committee. The report provides an opportunity to synthesize an original perspective on a selected fisheries issue through the examination of appropriate literature and other sources of information. Normally the report will be multi-disciplinary in nature and will result in a document equivalent to a publishable periodical journal article or a consultant's report on a particular issue. It will be assessed in accordance with **General Regulations, Theses and Reports** of the School of Graduate Studies.

#### 17.2.4 Courses

##### 17.2.4.1 Core Courses

MSTM 6001 Fisheries Ecology (*credit may be obtained for only one of MSTM 6001 and the former FRM 6001*)  
 MSTM 6002 Fisheries Resource Assessment Strategies (*credit may be obtained for only one of MSTM 6002 and the former FRM 6002*)  
 MSTM 6003 Fisheries Economics (*credit may be obtained for only one of MSTM 6003 and the former FRM 6003*)  
 MSTM 6004 Fisheries Policy and Planning (*credit may be obtained for only one of MSTM 6004, the former FRM 6004, and the former FRM 6005*)  
 MSTM 6005 Overview of World Fisheries (*credit may be obtained for only one of MSTM 6005 and the former FRM 6009*)

##### 17.2.4.2 Category A Electives

MSTM 6006 Business Management for Fisheries (*credit may be obtained for only one of MSTM 6006 and the former FRM 6006*)  
 MSTM 6007 Fisheries Technology  
 MSTM 6008 Social and Philosophical Issues of Fisheries Management  
 MSTM 6009 Current Issues for Sustainable Fisheries  
 MSTM 6010 Legal Aspects of Fisheries Resource Management

##### 17.2.4.3 Category B Electives

MSTM 6022 Communication and Conflict Resolution in a Technical Environment  
 MSTM 6023 Strategic Planning, Policy, Participation and Management in Technical Operations  
 MSTM 6033 Quality Systems  
 MSTM 6034 Project Management in the Offshore, Health, Fisheries and Engineering Technology Environments  
 MSTM 6039 Sustainability and Environmental Responsibility  
 MSTM 6044 Marine Environment Law and Pollution Control  
 MSTM 6056 Management for International Development  
 MSTM 6071 Management of Aquaculture Technology

### 17.3 Master of Marine Studies (Marine Spatial Planning and Management)

The Master of Marine Studies (Marine Spatial Planning and Management) is a multi-disciplinary academic program that provides students with both conceptual/theoretical background and practical applied skills in integrated coastal and ocean management (ICOM) and marine spatial planning (MSP). The program provides a broad level understanding of planning processes and the governance, policy/legislative, ecological, social, cultural and economic elements of coastal and ocean areas complemented by practical and applied skills for stakeholder engagement, project management and utilization of geospatial technology to support planning and management efforts.

Successful completion of the program includes 30 credit hours of course work and an Internship or a Research Project.

The program commences in the Fall semester of each year.

#### 17.3.1 Admission Requirements

Admission to the program is on a limited and competitive basis.

1. To be considered for admission to the program an applicant will normally possess a relevant second class or better undergraduate degree from a university of recognized standing.
2. Students intending to undertake electives in Decision Support / Geospatial Analysis (Category C) are required to have a background in mathematics, statistics and geographic information systems.
3. In exceptional cases, applicants who have not completed an undergraduate degree may be considered for admission. Preference will be given to those who have at least 10 years of relevant professional experience, and have successfully completed several years of post-secondary studies. Applicants who do not meet normal admission requirements shall be required to complete, with a high level of achievement, certain undergraduate courses before being considered for admission.
4. Applicants who did not complete a baccalaureate or post-graduate degree at a recognized university where English is the primary language of instruction must normally complete either the:

- a. Test of English as a Foreign Language (TOEFL) and achieve a paper-based score of 580 (or higher), computer-based score of 237 (or higher), or Internet based score of 92-93 (or higher); or
- b. International English Language Testing System (IELTS) and achieve a score of 7 (or higher).

Information regarding the TOEFL is available from the Educational Testing Service at [www.ets.org](http://www.ets.org). IELTS information is available at [www.ielts.org](http://www.ielts.org). It is noted that other equivalent tests acceptable to the School of Graduate Studies will also be considered.

The deadline for submission of applications is March 15.

### 17.3.2 Program of Study

Students in the Master of Marine Studies (Marine Spatial Planning and Management) are required to complete 30 credit hours of course work and an Internship or Research Project. Course work includes 7 core courses: 6 courses (18 credit hours) completed online, 1 intensive hands-on course (3 credit hours) offered in a face-to-face environment, as well as 3 elective courses (9 credit hours) offered either online or on campus.

#### 17.3.2.1 Core Courses

All students must complete the following compulsory core courses:

- MSTM 6011 Introduction to Integrated Coastal and Ocean Management / Marine Spatial Planning
- MSTM 6012 Fundamentals of Geospatial Analysis
- MSTM 6013 Resource/Natural Environment and Ocean Use Characterization
- MSTM 6014 Geospatial Analysis for Marine Spatial Planning (prerequisites: MSTM 6011, 6012, and 6013)
- MSTM 6022 Communication and Conflict Resolution in a Technical Environment
- MSTM 6027 Coastal and Ocean Environmental Policies
- MSTM 6034 Project Management in the Offshore, Health, Fisheries and Engineering Technology Environments

#### 17.3.2.2 Electives

Students will choose one of three options for elective course selection:

- two Category A Electives plus one Category B Elective or
- two Category B Electives plus one Category A Elective or
- two Category C Electives plus one Category A or B Elective

##### Category A Electives: Natural Environment

- ENVE/ENVS 6001 Earth and Ocean Systems
- MSTM 6001 Fisheries Ecology
- MSTM 6015 Marine Protected Areas
- MSTM 6016 Coastal Geomorphology / Oceanography

##### Category B Electives: Human Environment

- MSTM 6008 Social and Philosophical Issues in Sustainable Fisheries
- MSTM 6017 Social and Cultural Aspects of Coastal Communities
- MSTM 6018 Coastal and Ocean Economics

##### Category C Electives: Decision Support / Geospatial Analysis

- GEOG 6120 Geospatial Modelling and Analysis
- GEOG 6821 Advanced Computer Modelling/Habitat Mapping

#### 17.3.2.3 Internship (MSTM 6019) or Research Project

All students must complete an Internship or Research Project. Normally students would be permitted to register for the Internship or Research Project only after all other course requirements have been met, or during the student's last semester of studies. Evaluation of the Research Project shall be carried out in accordance with **General Regulations, Theses and Reports** in the School of Graduate Studies.

##### 1. Internship Requirements

- Internships are normally proposed by the student and approved by the Academic Director in consultation with the Placement Officer. Internship placements may be local, national or international. Students seeking international internships must consult with the Academic Director early in the first year of their program.
- Internships are for full-time employment hours for the duration of the semester (12 weeks)
- Students must attend a scheduled pre-internship orientation workshop. See **Pre-Internship Workshop** below.
- Each internship placement is supervised and evaluated by the on-site Supervisor assigned by the employer and the Academic Director. The internship shall consist of two components:
  - On-Site Student Performance as evaluated by the on-site Supervisor assigned by the employer, in consultation with the Academic Director and Placement Officer.
  - An Internship Report graded by the Academic Director in consultation with the on-site Supervisor assigned by the employer.
- Evaluation of the Internship shall result in one of the following final grades: Pass or Fail.
- A student must obtain a Pass in both the On-Site Student Performance and the Internship Report to obtain a final grade of Pass. If a student fails to achieve the internship standards specified above, the student may be required to repeat the internship. An internship may only be repeated once.
- Students who voluntarily withdraw from the internship without prior approval from the Academic Director, or who conduct themselves in such a manner as to cause the host organization and the Placement Officer to terminate the placement, will normally be awarded a grade of Fail in the internship.
- Students are not permitted to withdraw from the internship without prior approval of the Academic Director, in consultation with the Placement Officer. The Placement Officer will make a recommendation to the Academic Director who will make the final decision. Permission to withdraw from the internship does not constitute a waiver of degree requirements, and students who

have obtained such permission must complete an approved internship or research project in lieu of the internship dropped.

## 2. Research Project Requirements

- Research projects are normally proposed by the student and approved by the Academic Director.
- Students must attend a scheduled pre-research project orientation workshop. See **Pre-Research Project Workshop** below.
- Evaluation of the Research Project shall be carried out in accordance with **General Regulations, Theses and Reports** in the School of Graduate Studies.
- Students are not permitted to withdraw from the research project without prior approval of the Academic Director. Permission to withdraw from the research project does not constitute a waiver of degree requirements, and students who have obtained such permission must complete an approved research project or internship in lieu of the research project dropped.

## 3. Workshops

Students are required to complete one of the following workshops:

### • Pre-Internship Workshop

This online workshop reviews the Internship requirements. It aids students in writing resumes and cover letters, discusses interviewing practices and examines student/employer relationships. International internship opportunities and processes for application will be discussed. This workshop is held during the week following the end of the Winter semester.

### • Pre-Research Project Workshop

This online workshop reviews the Research Project requirements, aids students in preparing a project concept, proposal and establishing the research project timelines, and provides access to information and resources necessary for approval and completion of the Research Project. This workshop is held during the week following the end of the Winter semester.

## 17.3.3 Advanced Standing

Students who have successfully completed the Marine Institute Advanced Diploma in Integrated Coastal and Ocean Management will be given advanced standing credit for MSTM 6012, 6013, 6016.

## 17.3.4 Transfer Credits

Up to three relevant elective courses (9 credit hours) may be transferred from other graduate programs within the School of Graduate Studies or from other post-secondary institutions recognized by Senate, subject to the approval of the Dean of Graduate Studies on the recommendation of the Academic Director.

## 17.3.5 Evaluation

1. Students in the Master of Marine Studies (Marine Spatial Planning and Management) program must obtain a grade of B or better in all program courses.
2. Students who receive a grade of less than B in any course will be permitted to remain in the program provided the course is repeated and passed with a grade of B or better. Alternatively, the student may, on the recommendation of the Academic Director, and with the approval of the Dean of Graduate Studies, substitute another graduate course. Only one course repetition or substitution will be permitted during the student's program after which the student shall be required to withdraw from the program.

## 17.3.6 Courses

### 17.3.6.1 Core Courses

- MSTM 6011 Introduction to Integrated Coastal and Ocean Management / Marine Spatial Planning
- MSTM 6012 Fundamentals of Geospatial Analysis
- MSTM 6013 Resource/Natural Environment and Ocean Use Characterization
- MSTM 6014 Geospatial Analysis for Marine Spatial Planning (prerequisites: MSTM 6011, 6012, and 6013)
- MSTM 6022 Communication and Conflict Resolution in a Technical Environment
- MSTM 6027 Coastal and Ocean Environmental Policies
- MSTM 6034 Project Management in the Offshore, Health, Fisheries and Engineering Technology Environments

### 17.3.6.2 Category A Electives: Natural Environment

- ENVE/ENVS 6001 Earth and Ocean Systems
- MSTM 6001 Fisheries Ecology
- MSTM 6015 Marine Protected Areas
- MSTM 6016 Coastal Geomorphology / Oceanography

### 17.3.6.3 Category B Electives: Human Environment

- MSTM 6008 Social and Philosophical Issues in Sustainable Fisheries
- MSTM 6017 Social and Cultural Aspects of Coastal Communities
- MSTM 6018 Coastal and Ocean Economics

### 17.3.6.4 Category C Electives: Decision Support / Geospatial Analysis

- GEOG 6120 Geospatial Modelling and Analysis
- GEOG 6821 Advanced Computer Modelling/Habitat Mapping

## 18 Regulations Governing the Degree of Master of Maritime Management

www.mi.mun.ca

**Vice-President (Marine Institute)**

G. Blackwood

### 18.1 Administration

The Master of Maritime Management (M.M.M.) program will be administered by an Academic Director appointed by the Vice-President (Marine Institute), together with an Academic Advisory Committee.

An Academic Advisory Committee will be appointed by the Dean of Graduate Studies on recommendation of the Vice-President (Marine Institute). This committee will consist of the Academic Director as Chair, three members from the Marine Institute, one member from the Faculty of Business Administration and one member from another unit of the University. Normally, all appointments will be for a period of three (3) years.

A Technical Advisory Committee, consisting of a cross-section of members with professional expertise related to the maritime sector, will provide regular feedback on program content, instruction, and future direction of the Program. Members of this Committee will be appointed by the Dean of Graduate Studies on recommendation of the Vice-President (Marine Institute). The Academic Director will be an ex officio member and Chair of the Technical Advisory Committee. Normally all appointments will be for a period of three (3) years.

### 18.2 Program

The Master of Maritime Management (M.M.M.) is a comprehensive academic program that provides a broad understanding of the structure and operation of organizations and the factors that influence business decisions in the context of maritime-based organizations. It provides a maritime management focus through the development of knowledge and understanding of the nature of technical operations and the factors that have an impact on their success, as well as the ability to apply these concepts within their organizations.

The program is offered online and requires successful completion of either 1) 24 credit hours of course work and a comprehensive project and report (6 credit hours), or 2) 30 credit hours of course work. Candidates will typically register on a part-time basis.

#### 18.2.1 Admission Requirements

1. Admission to the program is on a competitive basis. To be considered for admission to the program an applicant will normally possess a second class or better undergraduate degree from a university of recognized standing and will normally have:
  - a. a Memorial University of Newfoundland Bachelor of Maritime Studies or Bachelor of Technology, or a comparable undergraduate degree with appropriate maritime sector and business management course work; and
  - b. an appropriate technical knowledge and relevant marine sector employment experience.
2. The deadlines for submission of applications for candidates wishing to enter studies are as follows:
  - Fall (September) semester: May 15
  - Winter (January) semester: September 15
  - Spring (May) semester: January 15
 Applications received after listed deadlines will be considered as time and resources permit.
3. In exceptional cases, applicants who have not completed an undergraduate degree, but who meet all other requirements, may be considered for admission. Preference will be given to those who have at least 10 years of relevant professional and managerial experience, and have successfully completed several years of post-secondary studies. Applicants who do not meet normal admission requirements shall be required to complete, with a high level of achievement, certain undergraduate courses before being considered for admission.
4. Applicants who did not complete a baccalaureate or post-graduate degree at a recognized university where English is the primary language of instruction must normally complete either the:
  - a. Test of English as a Foreign Language (TOEFL) and achieve a paper-based score of 580 (or higher), computer-based score of 237 (or higher), or Internet based score of 92-93 (or higher); or
  - b. International English Language Testing System (IELTS) and achieve a score of 7 (or higher).

Information regarding the TOEFL is available from the Educational Testing Service at [www.ets.org](http://www.ets.org). IELTS information is available at [www.ielts.org](http://www.ielts.org). It is noted that other equivalent tests acceptable to the School of Graduate Studies will also be considered.

#### 18.2.2 Program of Study

1. Candidates for the Master of Maritime Management shall be required to complete a minimum of either:
  - a. Twenty-four credit hours of course work and a major project and report (6 credit hours). Course work includes two compulsory core courses (6 credit hours), and six elective courses (18 credit hours). Students on the project route will complete MSTM 6101 Project in Maritime Management (6 credit hours).
    - i. **Core Courses (Two to be completed):**
      - MSTM 6041 Marine Policy
      - MSTM 6042 Business of Shipping/Transportation of Goods
    - ii. **Elective Courses (Six to be completed: a minimum of one from Category A and three from Category B):**
      - Category A**
        - MSTM 6022 Communication and Conflict Resolution in a Technical Environment
        - MSTM 6023 Strategic Planning, Policy, Participation and Management in Technical Operations
        - MSTM 6030 Principles of Management for Engineering Technology Enterprises
        - MSTM 6034 Project Management in the Offshore, Health, Fisheries and Engineering Technology Environments
        - MSTM 6039 Sustainability and Environmental Responsibility
        - MSTM 6052 Management of Intellectual Property
        - MSTM 6054 Technology Assessment
      - Category B**
        - MSTM 6027 Coastal and Ocean Environmental Policies

MSTM 6043 Marine Law  
 MSTM 6044 Marine Environment Law and Pollution Control  
 MSTM 6045 Port Operations and Management  
 MSTM 6046 Information Systems in the Marine Environment  
 MSTM 6047 Maritime Security and Event Investigation  
 MSTM 6048 Emerging Issues in International Marine Transportation  
 MSTM 6049 Maritime Risk Analysis and Management  
 MSTM 6050 Maritime Health, Safety, Environment and Quality  
 MSTM 6051 International Maritime Compliance & Business Continuity Planning

iii. **Project in Maritime Management**

MSTM 6101 Project in Maritime Management (6 credit hours)

Students will choose a topic in consultation with the Academic Director and will work independently to carry out an in-depth study of a problem or application within the area of maritime management and fully document and present their findings. Preferably the problem will be directly related to a workplace situation.

- b. Thirty credit hours on a course-based route. Course work includes two compulsory core courses (6 credit hours), and eight elective courses (24 credit hours).

i. **Core Courses (Two to be completed):**

MSTM 6041 Marine Policy

MSTM 6042 Business of Shipping/Transportation of Goods

ii. **Elective Courses (Eight to be completed: a minimum of two from Category A and four from Category B):**

**Category A**

MSTM 6022 Communication and Conflict Resolution in a Technical Environment

MSTM 6023 Strategic Planning, Policy, Participation and Management in Technical Operations

MSTM 6030 Principles of Management for Engineering Technology Enterprises

MSTM 6034 Project Management in the Offshore, Health, Fisheries and Engineering Technology Environments

MSTM 6039 Sustainability and Environmental Responsibility

MSTM 6052 Management of Intellectual Property

MSTM 6054 Technology Assessment

**Category B**

MSTM 6027 Coastal and Ocean Environmental Policies

MSTM 6043 Marine Law

MSTM 6044 Marine Environment Law and Pollution Control

MSTM 6045 Port Operations and Management

MSTM 6046 Information Systems in the Marine Environment

MSTM 6047 Maritime Security and Event Investigation

MSTM 6048 Emerging Issues in International Marine Transportation

MSTM 6049 Maritime Risk Analysis and Management

MSTM 6050 Maritime Health, Safety, Environment and Quality

MSTM 6051 International Maritime Compliance & Business Continuity Planning

Up to three relevant elective courses (9 credit hours) may be transferred from other graduate programs within the School of Graduate Studies or from other post-secondary institutions recognized by Senate, subject to the approval of the Dean of Graduate Studies on the recommendation of the Academic Director.

### 18.2.3 Evaluation

1. Candidates for the Master of Maritime Management degree must obtain a grade of B or better in all program courses.
2. Candidates who receive a grade of less than B in any course will be permitted to remain in the program provided the course is repeated and passed with a grade of B or better. Alternatively, the candidate may, on the recommendation of the Academic Director, and with the approval of the Dean of Graduate Studies, substitute another graduate course. Only one course repetition or substitution will be permitted during the candidate's program after which the candidate shall be required to withdraw from the program.

## 19 Regulations Governing the Degree of Master of Music

[www.mun.ca/music](http://www.mun.ca/music)

### Associate Professor and Dean

I. Sutherland

The Master of Music (M.Mus.) program provides the environment for accelerated advances in comprehension, skills, and abilities as a performing musician, music pedagogue, or conductor while offering experience in the metier of the contemporary musician. To that end, the School of Music has forged active partnerships with many of the professional music organizations and institutions within the arts community in the greater St. John's region which afford an exceptional range of professional experiences to its graduate students. Included among these partners are the Newfoundland Symphony Orchestra, the Canadian Broadcasting Company, Heritage Canada, the Newfoundland and Labrador Arts Council, and many others. Within the areas of specialization offered for the M.Mus., there is considerable flexibility available to further focus the program to meet specific interests and needs.

### 19.1 Program of Study

The Degree of Master of Music (M.Mus.) is offered by full-time study, normally commencing in the Fall semester. Three areas of specialization are offered:

1. Conducting. Students may focus in choral conducting, instrumental conducting, or a combination of choral and instrumental conducting.
2. Performance. For a complete list of applied areas of study, see the School of Music website at [www.mun.ca/music](http://www.mun.ca/music).
3. Performance/Pedagogy. For a complete list of applied areas of study, see the School of Music website at [www.mun.ca/music](http://www.mun.ca/music).

The specialization of Ethnomusicology is available through the degrees Master of Arts and Doctor of Philosophy. For further information see the section **Regulations Governing the Degree of Master of Arts, Ethnomusicology** and the section **Regulations Governing the Degree of Doctor of Philosophy, Ethnomusicology**, respectively.

## 19.2 Qualifications for Admission

1. Admission to the program is limited and competitive. The application deadline is December 15 for admission to the following Fall semester. Under special circumstances, applicants may be considered for admission to the Winter semester. For further information, contact the School of Music.
2. To be eligible for consideration for admission, applicants shall meet the requirements set out in **General Regulations for Admission, Master's Program**. Applicants to the M.Mus. will normally hold a Bachelor of Music or equivalent from a recognized university or conservatory. Preference will be given to applicants who hold first class standing in their undergraduate program.
3. In addition to the requirements above, admission is further determined by audition.
  - a. Auditions for September entry are normally held in late February or early March of each year. Check the School of Music website at [www.mun.ca/music](http://www.mun.ca/music) for dates and locations.
  - b. Applicants to the M.Mus. in Performance or Performance/Pedagogy may submit the audition as a professional quality video recording if they are unable to attend the live auditions. The recording must be unedited; live performances are preferred. The audition program should display a range of performance styles and repertoire. Applicants should consult the School of Music website at [www.mun.ca/music](http://www.mun.ca/music) for details on length of audition and appropriate repertoire.
  - c. Applicants to the M.Mus. in Conducting should submit professional quality video recordings of their work with a minimum of two different types of ensembles. These video recordings should include both rehearsals and performances.
4. Applicants may also be asked to submit a sample of their academic written work.
5. Once they have been admitted, students may be required to write diagnostic exams in music theory, aural skills, and/or music history. Voice and choral conducting students will also have their knowledge of lyric diction assessed. If weaknesses are identified, students may be required to complete remedial undergraduate course work.

## 19.3 Degree Requirements

1. The Degree of Master of Music is normally completed in two years of full-time study. Comprehensive examinations are not administered. The normal residency period may, in some instances, be reduced through Summer and Intersession study.
2. All candidates for the M.Mus. must complete at least 31 credit hours. Further courses may be required depending on the background of the individual student.
3. All candidates must complete:
  - a. Music Research Methods: Music 6000 (1 credit hour)
  - b. Music Seminar: Music 6002
  - c. Career Skills for Musicians: Music 6700
  - d. Further courses may be required depending on the background of the individual student.
4. Candidates in Conducting must complete an additional 24 credit hours according to their area of focus:
  - a. Choral Conducting
    - i. Choral Conducting: Music 6310, 6311, 7310
    - ii. Instrumental Conducting: Music 6210
    - iii. Score Study and Analysis: Music 6100
    - iv. Choral Repertoire: Music 6007
    - v. Electives: Six credit hours. With the approval of the School of Music. 3 credit hours may be from related disciplines.
  - b. Instrumental Conducting
    - i. Instrumental Conducting: Music 6210, 6211, 7210
    - ii. Choral Conducting: Music 6310
    - iii. Score Study and Analysis: Music 6100
    - iv. Orchestral or Instrumental Ensemble Repertoire: Music 6006 or 6008
    - v. Electives: Six credit hours. With the approval of the School of Music. 3 credit hours may be from related disciplines.
  - c. Combined Choral/Instrumental Conducting
    - i. Instrumental Conducting: Music 6210, 6211
    - ii. Choral Conducting: Music 6310, 6311
    - iii. Score Study and Analysis: Music 6100
    - iv. Ensemble Repertoire: One of Music 6006, 6007, or 6008
    - v. Electives: Six credit hours. With the approval of the School of Music. 3 credit hours may be from related disciplines.
5. Candidates in Performance must complete an additional 24 credit hours as follows:
  - a. Principal Applied Study: Music 645A/B, 745A/B
  - b. Other Applied Study: 3 credit hours from Music 6500-6506, 646A/B
  - c. Music Pedagogy: Music 6400 or Music 6600
  - d. Electives: Six credit hours. With the approval of the School of Music. 3 credit hours may be from related disciplines.
6. Candidates in Performance/Pedagogy must complete an additional 24 credit hours as follows:
  - a. Principal Applied Study: Music 647A/B, 747A/B
  - b. Music Pedagogy: Music 6400 and 6600
  - c. Pedagogy Internship: Music 6610
  - d. Electives: 3 credit hours

Master of Music Curriculum Summary Table

Master of Music	Conducting			Performance	Performance/ Pedagogy
Research	6000, 6002			6000, 6002	6000, 6002
Career Skills	6700			6700	6700
Applied	Choral 6210 6310 6311 7310	Instrumental 6210 6211 6310 7210	Combined 6210 6211 6310 6311	645A/B 745A/B 3 credit hours chosen from 646A/B, 6500- 6506	647A/B 747A/B
Complementary	6007 6100	6006 or 6008 6100	one of 6006, 6007, 6008 6100	6400 or 6600	6400, 6600, 6610
Electives	6 credit hours, of which 3 may be from related disciplines			6 credit hours, of which 3 may be from related disciplines	3 credit hours

## 19.4 Evaluation

- Candidates must meet all requirements of the **General Regulations** of the School of Graduate Studies.
- Candidates must obtain a grade of at least 65% in all program courses to receive credit for the course toward their program requirements. Candidates who fail to receive 65% or more in a required course must repeat the course. Candidates who fail to receive 65% or more in an elective course must either repeat the course or replace it with another program course. Any student who receives a grade of less than 65% in two courses or in a repeated course will be required to withdraw from the program.
- In addition, failure to receive a grade of 75% or higher in any of Music 645A/B, Music 745A/B, Music 647A/B, Music 747A/B, Music 6210, Music 6211, Music 6310, Music 6311, Music 7210, or Music 7310 will lead to termination of the student's program.

## 19.5 Courses

A selection of the following graduate courses will be offered to meet the requirements of candidates, as far as the resources of the School will allow. All courses are 3 credit hours unless otherwise indicated.

6000 Music Research Methods (1 credit hour)  
6002 Graduate Seminar (*prerequisite: Music 6000*)  
6005 Performance Practice  
6006 Instrumental Ensemble Repertoire  
6007 Choral Repertoire  
6008 Orchestral Repertoire  
6009 Music Literature  
6100 Score Study and Analysis  
6210 Instrumental Conducting I  
6211 Instrumental Conducting II (*prerequisite: Music 6210*)  
6212 Instrumental Conducting Internship I (1 to 3 credit hours)  
6213 Instrumental Conducting Internship II (1 to 3 credit hours)  
6310 Choral Conducting I  
6311 Choral Conducting II (*prerequisite: Music 6310*)  
6312 Choral Conducting Internship I (1 to 3 credit hours)  
6313 Choral Conducting Internship II (1 to 3 credit hours)  
6400 Music Pedagogy  
645A/B Principal Applied Study I (6 credit hours)  
646A/B Secondary Principal Applied Study (4 credit hours)  
647A/B Principal Applied Study I (6 credit hours)  
6500 Chamber Music (2 credit hours per semester. Maximum: 8 credit hours)  
6501 Chamber Music (3 credit hours per semester. Maximum: 12 credit hours)  
6502 Opera Performance (2 credit hours)  
6503 Opera Performance (3 credit hours)  
6504 Chamber Music (1 credit hour per semester. Maximum: 4 credit hours)  
6505 Conducted Instrumental Ensemble (1 credit hour per semester. Maximum: 4 credit hours)  
6510 Seminar in Performance Issues  
6600 Pedagogy Seminar  
6610 Pedagogy Internship I  
6611 Pedagogy Internship II  
6700 Career Skills for Musicians  
6701 Music in the Community (1 credit hour) (*prerequisite: Music 6700*)  
6702 Music in the Community (2 credit hours) (*prerequisite: Music 6700*)  
6703 Music in the Community (3 credit hours) (*prerequisite: Music 6700*)  
6750 Music Industries Internship (2 credit hours)  
6751 Music Industries Internship  
7002 Research Paper  
7010 World Music: Music of Asia and Oceania  
7011 World Music: Music of Africa and the Americas  
7012 Canadian Musical Traditions  
7013 Music and Culture  
7017 Folksong  
7018 Jazz and Blues: The Roots of Popular Music  
7210 Instrumental Conducting III (*prerequisite: Music 6211*)  
7310 Choral Conducting III (*prerequisite: Music 6311*)

745A/B Principal Applied Study II (6 credit hours) (*prerequisite: Music 645B*)  
 747A/B Principal Applied Study II (6 credit hours) (*prerequisite: Music 647B*)

### Special Topics Courses

6800-6809

6900-6909

7800-7809

## 20 Regulations Governing the Degree of Master of Nursing

[www.mun.ca/nursing](http://www.mun.ca/nursing)

### Professor and Dean

A. Gaudine

### 20.1 Program

1. The responsibility for the administration of all graduate programs shall reside with the Dean of Graduate Studies.
2. Applicants for the program shall be required to apply for admission to the Dean of the School of Graduate Studies and shall be expected to follow the regulations, policies, and practices required of the School. Deadline for receipt of applications should be no later than February 15. If space is available, students who apply after the deadline date may be accepted.
3. The School of Nursing offers a Master of Nursing (M.N.) Program with two options: Practicum and Nurse Practitioner as well as a Post Master's Nurse Practitioner Graduate Diploma.

### 20.2 Qualifications for Admission

1. Applicants to the Master of Nursing program in any of the two options listed above must have a baccalaureate Degree in nursing, or an equivalent from an institution recognized by the University and a knowledge of nursing satisfactory to the School of Nursing.
2. Admission to the program is limited and competitive. To be considered for admission, the applicant must have maintained at least a grade B standing in the baccalaureate program.
3. Applicants are also required to have a minimum of one year's experience in nursing practice, and to have completed an undergraduate nursing research course and an undergraduate statistics course.
4. Applicants must hold a practising licence from the Association of Registered Nurses of Newfoundland and Labrador or must be currently registered as a practising nurse in another Canadian jurisdiction. Applicants from other countries who do not meet the above criteria will be assessed on an individual basis. However, they must submit proof of registration as a practising nurse (or an equivalency) from their country or jurisdiction.
5. In addition to the above requirements, candidates seeking admission to the MN-Nurse Practitioner Degree option must have two years of clinical experience preferably in their chosen specialty area.
6. In addition to requirements 1 and 4, candidates seeking admission to the Post Master's Nurse Practitioner Graduate Diploma program must have completed a Master's Degree in Nursing or an equivalent degree with a nursing focus and have two years of clinical nursing experience preferably in their chosen specialty area.
7. In addition to requirements 1., 4., and 6. candidates seeking admission to the MN-Nurse Practitioner Degree option and the Post Master's Nurse Practitioner Graduate Diploma program will note that preference will be given to applicants who are living and working as Registered Nurses in Newfoundland and Labrador.
8. Only in exceptional circumstances and only on the recommendation of the School of Nursing shall the Dean of Graduate Studies consider applicants who do not meet admission requirements listed above.

### 20.3 Registration

See School of Graduate Studies **General Regulations, Registration.**

### 20.4 Programs of Study

There are two routes offered that lead to a Master of Nursing Degree: the **Practicum Option** and the **Nurse Practitioner Option**. Normally the program will require two years to complete when taken on a full-time basis. In addition to the M.N. Degree program, the School of Nursing also offers a **Post Master's Nurse Practitioner Graduate Diploma**.

#### 20.4.1 Practicum Option

1. Candidates must complete an approved program of study consisting of a minimum of 24 credit hours in graduate program courses and 6 credit hours in practicum courses.

##### Required courses:

6010 Research in Nursing: Quantitative Methods

6011 Philosophical and Theoretical Foundations of Nursing

6012 Statistics for Advanced Nursing Practice

6100 Research in Nursing: Qualitative Methods

6221 Population-based Nursing (equivalent to N6220 and N6230)

6240 Nursing Individuals and Families Through Life Transitions (equivalent to N6200 and N6210)

6250 Foundations for Advanced Nursing Practice

##### One of the following courses:

6020 Program Development in Nursing

6031 Education in Nursing

##### The following practicum courses:

6660 MN Practicum 1

6661 MN Practicum 2

2. The program of each candidate shall be approved by the Dean of Graduate Studies on the recommendation of the Dean of the School of Nursing.

### 20.4.2 Nurse Practitioner Option

1. Candidates must complete an approved program of studies consisting of a minimum of 37 credit hours in graduate program courses and an integrated clinical practice experience, comprising 12 credit hours.

**Required courses:**

6010 Research in Nursing: Quantitative Methods  
 6011 Philosophical and Theoretical Foundations of Nursing  
 6012 Statistics for Advanced Nursing Practice  
 6100 Research in Nursing: Qualitative Methods  
 6221 Population-Based Nursing (*equivalent to 6220 and 6230*)  
 6240 Nursing Individuals and Families Through Life Transitions (*equivalent to 6200 and 6210*)  
 6251 Writing Skills for Nurse Practitioners (1 credit hour) (*Students who have transferred from the practicum option and have credit for 6250 Foundations for Nursing Practice will have this course waived*)  
 6703 Advanced Health Assessment and Clinical Practicum 1 (4 credit hours)  
 6704 Applied Pathophysiology and Clinical Practicum 2 (4 credit hours)  
 6705 Pharmacotherapy and Therapeutics  
 6706 Nurse Practitioner Roles and Practice Issues

Either one of: 6800 Adult Advanced Clinical Decision Making 3 (4 credit hours) {or the former 6800 Adult Advanced Clinical Decision Making (4 credit hours)}, 6802 Family/All Ages Clinical Decision Making 3 (4 credit hours) {or the former 6802 Family/All Ages Clinical Decision Making (4 credit hours)}, or, one of: 6803 to 6809 Nursing Specialty Option Courses (4 credit hours)

690X Advanced Clinical Practicum 4 (The integrated practice component will normally consist of a minimum of 400 hours of preceptored specialty clinical practice and biweekly seminars) (12 credit hours), {or the former 690X 2 (The integrated practice component will normally consist of a minimum of 400 hours of preceptored specialty clinical practice and biweekly seminars) (12 credit hours)}

2. The program of each candidate shall be approved by the Dean of Graduate Studies on the recommendation of the Dean of the School of Nursing.
3. The maximum time frame from commencement of the first core NP course until program completion shall normally be no longer than 3 years.

### 20.4.3 Post Master's Nurse Practitioner Graduate Diploma

1. Candidates with a Master's Degree in Nursing or an equivalent Degree with a nursing focus must complete an approved program of study consisting of a minimum of 18 credit hours in graduate program courses and integrated clinical practice experience, comprising 12 credit hours.

**Required courses:**

6703 Advanced Health Assessment and Clinical Practicum 1 (4 credit hours)  
 6704 Applied Pathophysiology and Clinical Practicum 2 (4 credit hours)  
 6705 Pharmacotherapy and Therapeutics  
 6706 Nurse Practitioner Roles and Practice Issues

Either one of: 6800 Adult Advanced Clinical Decision Making 3 (4 credit hours), {or the former 6800 Adult Advanced Clinical Decision Making (4 credit hours)}, 6802 Family/All Ages Clinical Decision Making 3 (4 credit hours), {or the former 6802 Family/All Ages Clinical Decision Making (4 credit hours)}, or, one of: 6803 to 6809 Nursing Specialty Option Courses (4 credit hours)

690X Advanced Clinical Practicum 4 (The integrated practice component will normally consist of a minimum of 400 hours of preceptored specialty clinical practice and biweekly seminars).

2. Programs for some candidates may exceed the above minimum requirements.
3. The program for each candidate shall be approved by the Dean of Graduate Studies on the recommendation of the Dean of the School of Nursing.
4. The maximum time frame from commencement of the first core NP course until program completion shall normally be no longer than 3 years.

### 20.5 Evaluation

1. In order to continue in graduate studies and in order to qualify for a Master's Degree, a candidate shall obtain an A or B grade in each program course and in both practicum courses.
2. When the Dean of the School of Nursing has determined on the basis of consultation with the candidate, the Associate Dean, Graduate Programs, and the thesis or practicum Supervisor, that a candidate has fallen below a satisfactory level, the Dean of the School of Nursing may recommend to the Dean of Graduate Studies that the candidate be required to withdraw from the program.

### 20.6 Courses

A selection of the following graduate courses will be offered to meet the requirements of candidates as far as the resources of the School of Nursing will allow.

6010 Research in Nursing: Quantitative Methods (3 credit hours) (*prerequisite or co-equisite: 6012*)  
 6011 Philosophical and Theoretical Foundations of Nursing  
 6012 Statistics for Advanced Nursing Practice  
 6020 Program Development in Nursing  
 6031 Education in Nursing  
 6100 Research in Nursing: Qualitative Methods (*pre or co-requisite: 6011*)  
 6221 Population-Based Nursing (*equivalent to 6220 and 6230*)  
 6240 Nursing Individuals and Families Through Life Transitions (*equivalent to 6200 and 6210*)  
 6250 Foundations for Advanced Nursing Practice (*This course is a prerequisite for all other courses for students in the practicum option though may be taken as a co-requisite in the first term of the program*)  
 6251 Writing Skills for Nurse Practitioners (1 credit hour) (*This course is a prerequisite for all other courses for students in the MN-NP option though may be taken as a co-requisite in the first term of the program*)  
 6310-6350 Special Topics in Nursing  
 6501-6510 Individual Readings and Research in Special Areas  
 6660 MN Practicum 1 (*prerequisites: All required courses including 6020 or 6031, and 6240/6721 or 6200/6210 or 6220/6230*)  
 6661 MN Practicum 2 (*prerequisite: 6660 MN Practicum 1*)

- 6703 Advanced Health Assessment and Clinical Practicum 1 (4 credit hours)  
 6704 Applied Pathophysiology and Clinical Practicum 2 (4 credit hours) (*prerequisite: 6703*)  
 6705 Pharmacotherapy and Therapeutics (*prerequisite: 6704*)  
 6706 Nurse Practitioner Roles and Practice Issues  
 6800 Adult Advanced Clinical Decision Making 3 (4 credit hours), (or the former 6800 Adult Advanced Clinical Decision Making (4 credit hours)) (*prerequisite: 6705*)  
 6802 Family/All Ages Clinical Decision Making 3 (4 credit hours), (or the former 6802 Family/All Ages Clinical Decision Making (4 credit hours)) One of: 6803 to 6809 Nursing Specialty Option Courses (4 credit hours) (*prerequisite: 6705*)  
 690X Advanced Clinical Practicum 4 (*The integrated practice component will normally consist of a minimum of 400 hours of preceptored specialty clinical practice and biweekly seminars*) (12 credit hours), (or the former 690X Advanced Clinical Practicum 2 (*The integrated practice component will normally consist of a minimum of 400 hours of preceptored specialty clinical practice and biweekly seminars*)) (12 credit hours) (*prerequisite: 6800 or 6802*)

## 21 Regulations Governing the Degree of Master of Philosophy

www.mun.ca/hss

### Professor and Dean of Humanities and Social Sciences

L. Phillips

Programs leading to the Degree of Master of Philosophy (M.Phil.) are offered at present in German Language and Literature, and in the Humanities. The degree of M.Phil. in the Humanities is administered by the Director of Studies and is in all respects separate from the M.Phil. in German Language and Literature.

### 21.1 Qualifications for Admission

- Admission is limited and competitive. To be considered for admission an applicant shall hold a Bachelor's Degree or its equivalent from an institution recognized by the Senate and shall have a knowledge of his or her proposed field of specialization satisfactory to the relevant Department (and to the Director of Studies in the case of the program in Humanities), and to the Dean.
- Preference will normally be given to applicants who hold an appropriate Honours Degree either from Memorial University of Newfoundland, or from another university whose Honours Degree is of comparable standing. Any other applicant who holds a Bachelor's Degree or its equivalent will be considered for admission provided that:
  - the applicant's undergraduate record after the first year shows an average of at least grade B in courses in the proposed field of specialization;
  - the applicant's overall undergraduate record after the first year shows an average of at least grade B in all courses taken; and
  - the Department (and Director of Studies in the case of the program in Humanities) satisfies the Dean that the applicant's work exhibits evidence of academic excellence.

Only in exceptional circumstances, and only on the recommendation of the relevant Department (and Director of Studies in the case of the program in Humanities) or the Board of Studies, will the Dean consider applicants who do not meet the requirements a. and b. Such applicants, however, must meet the requirement c.

- An applicant may be required to demonstrate a satisfactory knowledge of the proposed field of study in an examination administered by the relevant Department (and Director of Studies in the case of the program in Humanities).
- Applicants whose mother tongue is not English are reminded that a high degree of literacy in English is required of students at the University. In most cases instruction is in English, and examinations are to be written in English. (Language departments, however, give instruction in the pertinent language and often require examinations to be written in that language. In addition, other departments may permit and even require examinations to be written in a language other than English).
- An applicant may be required to pass a qualifying examination.

Note: *Some Departments have particular regulations in addition to these, and applicants are advised to turn to the relevant parts of this Calendar and acquaint themselves with both the **General Regulations** and the regulations of the program in which they are interested.*

### 21.2 Program of Study

- Every candidate shall read at least 30 credit hours in program courses in one subject or in a combination of closely related subjects as recommended by the relevant Department (and Director of Studies in the case of the program in Humanities), and approved by the Dean.
- A candidate may be required also to take additional credit hours in program courses, which must be recommended by the relevant Department (and Director of Studies in the case of the program in Humanities), and approved by the Dean.
- Students registered in the program in Humanities will be required to maintain and submit for evaluation a program Journal (see **Program of Study, 3. of the Regulations for the Degree of Master of Philosophy in Humanities**).
- No candidate while classified as a part-time student may take more than 6 credit hours in any one semester.
- No candidate may take more than 9 credit hours in graduate courses in a single semester, nor any credit hours in undergraduate courses at the same time as 9 credit hours in graduate courses; in no case may graduate and undergraduate credit hours combined exceed 12 in any one semester.
- The course program will culminate in a general comprehensive examination (see **Evaluation - General Comprehensive Examination** below).
- Every candidate shall be assigned to a tutor recommended by the relevant Department (and Director of Studies in the case of the program in Humanities), and approved by the Dean.
- The Dean may approve an application to transfer from the M.Phil. to the M.A. or M.G.S. only when a new integrated program, acceptable to the Dean, is submitted.

### 21.3 Period of Study

The period of study for the Master of Philosophy Degree shall not normally exceed three years, during which time the candidate shall spend at least two semesters in full-time attendance as a graduate student at this University.

### 21.4 Evaluation

See also **Evaluation under General Regulations**.

1. Students registered in undergraduate courses shall satisfy examination requirements in these courses.
2. The academic requirements for the Degree of Master of Philosophy shall be met when the candidate has successfully completed all course requirements of the program and has passed a general examination which consists of both written and oral parts. The Dean, on the recommendation of the relevant Department (and Director of Studies in the case of the program in Humanities), shall determine the times and places for general examinations; and, on the recommendation of the relevant Department (and Director of Studies in the case of the program in Humanities), shall appoint examiners, one of whom shall be from outside the Department(s) concerned. In the M.Phil. in Humanities, a program Journal is also required.

## 21.5 Evaluation - General Comprehensive Examination

1. Each candidate must pass a general comprehensive examination.
2. The examination committee shall be appointed by the Dean on the recommendation of the relevant Department (and Director of Studies in the case of the program in Humanities). The committee shall consist of either three or five members, at least one of whom must come from outside the Department(s) concerned. The candidate shall be informed of the names of the committee well before the examination.
3. The candidate and the tutor will normally agree when the candidate may sit the general comprehensive examination. However, the relevant Department (and Director of Studies in the case of the program in Humanities) must accede to the candidate's request to sit a comprehensive examination, except that in no circumstances may a candidate attempt the general comprehensive examination before his or her course program is completed.
4. The schedule for the examination shall be agreed by the candidate, the tutor, and the examining committee, and shall be communicated by the Dean.
5. The examination shall consist of a written part and an oral part. The time between the written and the oral parts shall normally be from one to four weeks.
6. The oral examination shall be from one to three hours in length, and shall be conducted by the examining committee, and shall be open only to the examination committee and to members of the relevant Department (and Director of Studies in the case of the program in Humanities).
7. A candidate must satisfy the examining committee in both parts of the examination to obtain a pass.
8. The successful completion of the comprehensive examination is the final academic requirement for the Master of Philosophy Degree.

## 21.6 Departmental Regulations

Every candidate in a graduate program shall comply with any additional program requirements and with the **General Regulations**.

### 21.7 German

[www.mun.ca/german](http://www.mun.ca/german)

#### Associate Professor and Head of the Department

J. Buffinga

#### 21.7.1 Program of Study

The degrees of Master of Arts and Master of Philosophy are offered in German Language and Literature and may be taken by full-time or part-time study. No graduate work is offered in Russian at this time.

1. In addition to the general requirements, candidates will be expected to have acquired a superior knowledge of the spoken and written language and may, depending on their academic background and field of specialization, be asked to take advanced undergraduate courses.
2. All candidates will complete at least 15 credit hours and a thesis for the M.A. and at least 30 credit hours for the M.Phil., and the entire program of study and research will normally be of two-years' duration.

#### 21.7.2 Courses

A selection of the following graduate courses will be offered to meet the requirements of candidates, as far as the resources of the Department will allow.

6000 German Civilization I  
 6001 German Civilization II  
 6100 History of the German Language I  
 6101 History of the German Language II  
 6200 Medieval German Literature I  
 6201 Medieval German Literature II  
 6300 German Literature, 1500-1700 I  
 6301 German Literature, 1500-1700 II  
 6400 German Literature of the Enlightenment and Storm and Stress I  
 6401 German Literature of the Enlightenment and Storm and Stress II  
 6500 German Classicism I  
 6501 German Classicism II  
 6600 German Romanticism I  
 6601 German Romanticism II  
 6700 German Realism I  
 6701 German Realism II  
 6800 German Literature, 1880-1933 I  
 6801 German Literature, 1880-1933 II  
 6900 Contemporary German Literature I  
 6901 Contemporary German Literature II  
 7000 Special Subject or Author I  
 7001 Special Subject or Author II  
 7002-7020 Special Topics in German Studies

**Deutsch**

www.mun.ca/german

**Ausserordentlicher Professor und Leiter der Abteilung**

J. Buffinga

Auf dem Gebiet der Germanistik werden die Grade Master of Arts (Magister Artium) und Master of Philosophy (Magister Philosophiae) geboten. Sie können sowohl von voll- wie auch von halbtzeitlich Studierenden erworben werden. Auf dem Gebiet der Slawistik wird z.Zt. kein weiterführendes Studium geboten.

1. Ausser den allgemeinen Zulassungsbestimmungen wird von den Kandidaten überdurchschnittliche Kenntnis des Deutschen in Sprache und Schrift erwartet. Ihrer akademischen Vorbildung und ihrem Fachgebiet entsprechend, kann ihnen eventuell geraten werden, gleichzeitig fortgeschrittene Kurse der Unterstufe zu belegen.
2. Für den Master of Arts sind mindestens 15 Kreditstunden zu absolvieren und eine wissenschaftliche Arbeit in Übereinstimmung mit den allgemeinen Zulassungsbestimmungen einzureichen, für den Master of Philosophy sind mindestens 30 Kreditstunden vorgeschrieben. Das ganze Studienprogramm dauert normalerweise zwei Jahre.

**Kurse**

Von den hier aufgeführten Kursen für Graduierte wird jeweils eine Auswahl angeboten, die sowohl den Anforderungen des Studierenden wie den Möglichkeiten der Abteilung gerecht wird.

6000 Deutsche Kulturkunde I  
 6001 Deutsche Kulturkunde II  
 6100 Geschichte der deutschen Sprache I  
 6101 Geschichte der deutschen Sprache II  
 6200 Mittelhochdeutsche Literatur I  
 6201 Mittelhochdeutsche Literatur II  
 6300 Deutsche Literatur 1500-1700 I  
 6301 Deutsche Literatur 1500-1700 II  
 6400 Deutsche Literatur der Aufklärung und des Sturm und Drang I  
 6401 Deutsche Literatur der Aufklärung und des Sturm und Drang II  
 6500 Deutsche Klassik I  
 6501 Deutsche Klassik II  
 6600 Deutsche Romantik I  
 6601 Deutsche Romantik II  
 6700 Deutscher Realismus I  
 6701 Deutscher Realismus II  
 6800 Deutsche Literatur 1880-1933 I  
 6801 Deutsche Literatur 1880-1933 II  
 6900 Deutsche Gegenwartsliteratur I  
 6901 Deutsche Gegenwartsliteratur II  
 7000 Wahlthema oder-Autor I  
 7001 Wahlthema oder-Autor II  
 7002-7020 Wahlthemen in German Studies

**21.8 Humanities****Associate Professor and Director of Studies**

J. Dyer

The Master of Philosophy in Humanities has been designed for students from any discipline. It is directed to students who hold an Honours bachelor's Degree or its equivalent. The object of the M.Phil. in Humanities program is to provide students with an opportunity to see the historical and logical context of their own disciplinary points of view. The program is based on the interaction of a group of students of varying backgrounds and interests studying a common core of texts in a shared set of courses.

The program draws scholarly participation from faculty members in a range of academic disciplines within the School of Graduate Studies. The program is administered by a Director of Studies located within the Department of Gender Studies.

**Master of Philosophy**

In addition to meeting these regulations students must also meet the **General Regulations Governing the Degree of Master of Philosophy**.

This program is administered by a Director of Studies on behalf of the Faculty of Humanities and Social Sciences, and will draw scholarly participation chosen from those appropriately qualified faculty members wishing to participate, regardless of Department or Faculty affiliation.

**21.8.1 Qualifications for Admission**

1. Admission is limited and competitive. The number of students admitted to the program will be strictly limited to ensure small classes and maximum student-faculty contact. To be considered for admission an applicant will normally hold an Honours Bachelor's Degree (or equivalent) from an institution recognized by the Senate, and will have a breadth of knowledge in one or more of the Humanities disciplines satisfactory to the Director of Studies, and to the Dean.
2. Applicants who do not hold an Honours Degree (or equivalent) will be required to complete, prior to admission, a number of undergraduate courses, the nature and number of which will be determined on the basis of the applicants' undergraduate record by the Director of Studies. Candidates will be required to complete such designated pre-admission courses with a minimum overall average of 70%.

**21.8.2 Administration**

1. The program will be administered by the Director of Studies.
2. There will be a Director of Studies who will make recommendations to the Dean concerning admission, financial support for students, and all other matters pertaining to the program.
3. Responsibility for the allocation of teaching and the support of related research will be managed by agreement between the Deans of the appropriate Faculties, the Heads of Departments of participating faculty members, and the Director of Studies, in consultation with the Dean of Graduate Studies.

### 21.8.3 Program of Study

1. Every candidate shall normally read 30 credit hours in the 10 regulation courses listed below.
2. With permission of the Director of Studies, a candidate may elect to substitute up to two of these courses with courses from other graduate programs in this University. Attendance in other programs requires the permission of the departments involved. (See also School of Graduate Studies General Regulation **Program Requirements, Transfer of Course Credits** which allows for further transfer of credits already taken but not yet applied to a graduate degree.)
3. Every candidate shall be required to maintain and submit a program Journal which will be monitored and evaluated by the Director of Studies. The Journal will comprise the candidate's critical reflections arising out of analyses of designated key themes common to the several disciplines which constitute the program.

### 21.8.4 Comprehensive Examination

1. Each candidate must pass a general comprehensive examination.
2. The Examination Committee shall be appointed by the Dean of Graduate Studies on the recommendation of the Director of Studies. The Committee shall normally consist of three members. One member of the Committee is normally the tutor. The candidate shall be informed of the names of the committee well before the examination.
3. The candidate and the tutor will normally agree when the candidate may sit the general comprehensive examination. However, the Director of Studies must accede to the candidate's request to sit a comprehensive examination, except that in no circumstances may a candidate attempt the general comprehensive examination before his or her course program is completed.
4. The schedule for the examination shall be agreed by the candidate, the tutor, and the Examining Committee, and shall be communicated by the Dean.
5. The examination shall consist of a written part and an oral part. The time between the written and the oral parts shall normally be from one to four weeks.
6. The program journal is an extended paper or series of linked papers which analyses and reflects critically on issues encountered by the candidate during the course of the program. Papers and/or projects completed during courses may be incorporated into the program journal, but shall not, of themselves, constitute the entire journal.
7. The oral examination shall be from one to three hours in length, shall be conducted by the Examining Committee, and shall be open only to the Examination Committee, and members of the Departments concerned. The oral examination shall be chaired by the Director of Studies.
8. A candidate must satisfy the Examining Committee in both parts of the examination to obtain a pass.
9. The successful completion of the comprehensive examination is the final academic requirement for the Master of Philosophy Degree.

### 21.8.5 Courses

6000 Speaking and Writing I  
 6001 Speaking and Writing II  
 6010 Readings in History I  
 6011 Readings in History II  
 6015 Historical Contexts and Modern Users/Viewers (Harlow, England)  
 6020 Readings in Western Literature I  
 6021 Readings in Western Literature II  
 6030 Readings in Philosophy I  
 6031 Readings in Philosophy II  
 6040 Readings in Science and Technology  
 6041 Seminar in Humanities

## 22 Regulations Governing the Degree of Master of Physical Education

[www.mun.ca/hkr](http://www.mun.ca/hkr)

### Professor and Dean

H. Carnahan

The Degree of Master of Physical Education (M.P.E.) is offered by full-time and part-time study. Part-time study is available through Internet-based distance education technology.

### 22.1 Qualifications for Admission

1. Admission is limited and competitive. The deadline for receipt of applications is March 1 for admission into the subsequent Fall semester. To be considered for admission an applicant shall normally hold a Bachelor's Degree in Physical Education, Recreation and Leisure Studies, or a related discipline, with at least second class standing, from an institution recognized by Senate. In addition to the above, preference will be given to applicants with work experience, obtained either through Cooperative Education programs or through employment deemed appropriate.
2. Any other applicant who holds a Bachelor of Physical Education or Recreation and Leisure Studies Degree or its equivalent may be considered for admission provided that:
  - a. the applicant's undergraduate record after the first year shows an average of at least grade B in physical education and/or recreation and leisure studies courses, OR
  - b. the applicant has raised his/her overall academic standing to second class following the completion of the undergraduate degree, through the successful completion of an approved pattern of undergraduate courses.
3. Only in exceptional circumstances and only on the recommendation of the School of Human Kinetics and Recreation shall the Dean of Graduate Studies consider applicants who do not meet these admission requirements.

### 22.2 Program of Study and Research

1. The Degree of Master of Physical Education is offered under three options:
 

**Option 1.** The program shall consist of a minimum of 12 credit hours in graduate courses plus a thesis. The thesis shall be on an

approved subject in which systematic research has been conducted by the candidate under the direction of the Supervisor.

**Option 2.** The program shall consist of a minimum of 12 credit hours in graduate courses plus a project report. The project shall be on an approved subject in which action-research has been conducted by the candidate under the direction of the Supervisor.

**Option 3.** The program shall consist of a minimum of 24 credit hours in graduate courses plus a comprehensive examination in the candidate's major area of study.

- The candidate's major area of study shall be Administration, Curriculum, and Supervision in Physical Education.

In conjunction and collaboration with other Faculties and Schools of Memorial University of Newfoundland, students may pursue their special interests through an interdisciplinary course of study. The student's interests may be accommodated through individual reading and research in these special areas.

- The required courses for the degree shall normally include:

**Option 1:** HKR 6500, one of 6000 or 6001, 6120, plus one of 6003, 6111, 6121, 6122, 6123, 6124, 6125, 6610-6615 (plus thesis)

**Option 2:** HKR 6500, one of 6000 or 6001, 6120, plus one of 6003, 6111, 6121, 6122, 6123, 6124, 6125, 6610-6615 (plus project)

**Option 3:** HKR 6500, one of 6000 or 6001, 6120, plus 5 of 6003, 6111, 6121, 6122, 6123, 6124, 6125, 6610-6615 (plus comprehensive examination)

Equivalent courses may be substituted from other Faculties or Schools subject to the approval of the School of Human Kinetics and Recreation Graduate Studies Committee. In addition, all on-campus candidates shall be required to complete four semester-length seminars represented by successful completion of HKR 6314 (a non-credit, repeatable course) in each of four semesters during their tenure in the program. Off-campus or part-time candidates who cannot attend the on-campus seminar series can substitute 24 hours of participation (over their two-year tenure) and present once at national, provincial or regional conferences, workshops, professional development seminars, or equivalent activities.

## 22.3 Evaluation

- Candidates must obtain an A or B grade in each program course. In accordance with General Regulation **Evaluation, Evaluation of Graduate Students** only one course may be repeated.
- When the Dean has determined, on the basis of consultation with the candidate and the instructors, that a candidate's work has fallen below a satisfactory level, he or she may recommend to the Dean of Graduate Studies that the candidate be required to withdraw from the program.

## 22.4 Thesis and Project Report

- A student completing a Master of Physical Education thesis option will be required to present a thesis proposal for his or her proposed thesis normally by the end of the third semester. The thesis proposal shall normally consist of a full written proposal (including literature review) submitted to the Supervisory Committee, a summary to be distributed to graduate students and faculty one week prior to the presentation, and a formal presentation normally at the seminar series. The candidate may be questioned on his/her proposal by the Supervisory Committee and seminar audience. Any deficiencies noted during the presentation should be carefully considered by the student and the Supervisory Committee prior to proceeding with the thesis.
- Evaluation of the thesis or project report shall be governed by School of Graduate Studies **General Regulations, Theses and Reports**. The thesis or project report shall normally be evaluated by two examiners approved by the Dean.
- When the thesis or project report has been completed to the satisfaction of the Dean, the Dean shall recommend that the candidate be awarded the degree.

## 22.5 Comprehensive Examinations

- Candidates electing to qualify for the Degree under Option 3 must write a comprehensive examination. The comprehensive examination shall examine the candidate's ability to integrate and apply material from all course work completed during study for the Degree. The candidate may be required to appear for an oral examination.
- The comprehensive examination shall normally be constructed and evaluated by an examining committee of three examiners, at least two of whom shall be faculty members of the School of Human Kinetics and Recreation appointed by the Dean on the recommendation of the Dean of the School.
- A candidate may not write the examination before completing the course work for the Degree.

Note: Every candidate in graduate studies shall comply with the **General Regulations**, the Degree Regulations and any additional requirements of the Department.

## 22.6 Courses

6000 Quantitative Methods in Physical Education  
 6001 Qualitative Research Methods in Physical Education  
 6002 Scientific and Cultural Foundations of Physical Education  
 6003 Physical Education, Culture and Society  
 6110 Physical Education, Recreation and Sport Management  
 6111 Canadian Delivery Systems in Physical Education, Recreation and Sport  
 6120 Curriculum Development in Physical Education  
 6121 Physical Education Leadership  
 6122 Comprehensive School Health  
 6123 Coaching and Long-term Athlete Development in the Education System  
 6124 Adapted Physical Activity for Persons with Physical and Intellectual Disabilities  
 6125 Evaluation and Testing in Physical Education  
 6130 Computer Applications in Physical Education  
 6314 Graduate Seminar Series (repeatable, non-credit)  
 6410 Sport and Society  
 6420 History of Physical Education and Sport  
 6500 Introduction to Research in Physical Education  
 6600 Contemporary Issues and Trends in Physical Education  
 6610-15 Individual Reading and Research in Special Areas  
 6700-6709 Individual Reading and Research in Special Areas of Physical Education

## 23 Regulations Governing the Degree of Master of Public Health

www.med.mun.ca

### Professor and Dean

J. Rourke

The degree of Master of Public Health (M.P.H.) is offered by the Faculty of Medicine, with specializations in **Population and Public Health** and **Nutrition and Dietetics**.

The Population and Public Health specialization delivers an advanced program of study for students from various academic fields who are interested in a professional degree that will prepare them for practical work in a variety of public health practice settings. The program is available for full-time and part-time study noting that full-time attendance is required during the Public Health Practicum (or Public Health Capstone Research Project) portion of the program. It is anticipated that full-time students will complete the program in 12 months in accordance with **Table 1 Master of Public Health Recommended Course Sequence for Full-Time Students in the Population and Public Health Specialization**.

The Nutrition and Dietetics specialization provides a research enriched program of study for full-time students who wish to pursue a career in dietetics or community nutrition. This specialization offers an opportunity for advanced academic study in the field of public health. Upon completion of the program, which includes a dietetics internship, students will be eligible to write the qualifying exam of Dietitians of Canada. It is anticipated that full-time students will complete the program in 24 months in accordance with **Table 2 Master of Public Health Recommended Course Sequence for Full-Time Students in the Nutrition and Dietetics Specialization**.

Graduate students of the Division of Community Health and Humanities may be required to participate in education experiences which occur outside of the St. John's metropolitan area. Students may be responsible for their own associated transportation and accommodation.

The **General Regulations** of the School of Graduate Studies and the Degree Regulations outlined below will apply.

### 23.1 Qualifications for Admission

Admission to the Master of Public Health is limited and competitive. The regulations and procedures for admission are as given under the **General Regulations** of the School of Graduate Studies governing Master's degrees. In addition, to be considered for admission to the Nutrition and Dietetics specialization applicants must have successfully completed an undergraduate dietetics program accredited by Dietitians of Canada as indicated at [www.dietitians.ca](http://www.dietitians.ca).

### 23.2 Program of Study

#### 23.2.1 Population and Public Health

1. Minimum requirements for the M.P.H. degree in Population and Public Health will include the successful completion of 42 credit hours as follows:

- Eight core courses: Biostatistics I (MED 6200), Epidemiology I (MED 6270), Policy and Decision Making (MED 6288), Disease and Injury Prevention (MED 6721), Environmental Health (MED 6722), Health Promotion (MED 6723), Communicable Disease Prevention and Control (MED 6724), and Public Health Leadership and Management (MED 6725).
- Six additional credit hours in elective courses chosen from the **Courses** listing below, or other courses as approved by the M.P.H. program coordinator.
- The Public Health Seminar Series courses (MED 6700 - 6701).
- Either, the Public Health Practicum (MED 6710) or the Public Health Capstone Research Project (MED 6711) as determined by the Graduate Program Committee depending on the professional background and experience of the candidate.

The Public Health Practicum is a full-time practice experience conducted in a work setting and following the guidelines set forth by the Public Health Agency of Canada (PHAC) at [www.phac-aspc.gc.ca/index-eng.php](http://www.phac-aspc.gc.ca/index-eng.php).

All course work must be completed prior to the initiation of either the Public Health Practicum or the Public Health Capstone Research Project.

**Table 1 Master of Public Health Recommended Course Sequence for Full-Time Students in the Population and Public Health Specialization**

Semester	Courses
Fall	MED 6270 Epidemiology I MED 6288 Policy and Decision Making MED 6700 Public Health Seminar Series I MED 6724 Communicable Disease Prevention and Control MED 6725 Public Health Leadership and Management MED Elective Course
Winter	MED 6200 Biostatistics I MED 6701 Public Health Seminar Series II MED 6721 Disease and Injury Prevention MED 6722 Environmental Health MED 6723 Health Promotion MED Elective Course
Spring	MED 6710 Public Health Practicum, or MED 6711 Public Health Capstone Project

### 23.2.2 Nutrition and Dietetics

1. Minimum requirements for the M.P.H. degree in Nutrition and Dietetics will include the successful completion of the following:
  - a. Six core courses: Policy and Decision Making (MED 6288), Epidemiology I (MED 6270), Community Health Research Methods (MED 6280), Biostatistics I (MED 6200), Community Nutrition (MED 6731), Professional Practice (MED 6730)
  - b. The Public Health Seminar Series courses (MED 6700, 6701)
  - c. The Dietetics Research Project (MED 671A/B)
  - d. The Dietetics Internship (MED 6733 - 6736). The Dietetics Internship is a practice experience conducted in a work setting and following the guidelines set forth by the Dietitians of Canada.

Dietetics Internship I & II (MED 6733 & 6734) are non-credit, mandatory, part-time internship components completed during the first and second academic semesters of the program in accordance with **Table 2 Master of Public Health Recommended Course Sequence for Full-Time Students in the Nutrition and Dietetics Specialization**. A grade of NC (No credit) will be awarded for these two internship components.

Building on the components of Dietetics Internship I & II, Dietetics Internship III & IV (MED 6735 & 6736) are full-time internship blocks each of which will normally extend beyond the regular semester timeframe. Evaluation of the internship blocks will be on a PASS/FAIL basis.

All core courses and seminars must be completed prior to the initiation of the Dietetics Internship III (MED 6735) and/or the Dietetics Research Project (MED 671A/B).

**Table 2 Master of Public Health Recommended Course Sequence for Full-Time Students in the Nutrition and Dietetics Specialization**

Semester	Courses
Fall	6270 Epidemiology I 6280 Community Health Research Methods 6288 Policy and Decision Making 6700 Public Health Seminar Series I 6733 Dietetics Internship I
Winter	6200 Biostatistics I 6731 Community Nutrition 6730 Professional Practice 6701 Public Health Seminar Series II 6734 Dietetics Internship II
Spring	671A Dietetics Research Project
Fall	671B Dietetics Research Project
Winter	6735 Dietetics Internship III
Spring	6736 Dietetics Internship IV

### 23.3 Courses

A selection of the following graduate courses shall be offered to meet the requirements of candidates, as far as the resources of the Faculty allow.

6102 Critical Theory in Health and Society  
 6200 Biostatistics I  
 6220 Introduction to Community Health  
 6247 Chronic Disease Epidemiology  
 6250 Basic Clinical Epidemiology  
 6270 Epidemiology I  
 6275 Epidemiology II  
 6280 Community Health Research Methods  
 6282 Canadian Health Care System  
 6288 Policy and Decision Making  
 6290 Determinants of Health: Healthy Public Policy  
 6293 Knowledge Transfer and Research Uptake  
 6294 Advanced Qualitative Methods  
 6390 Human Population Genetics  
 6700 Public Health Seminar Series I (1 credit hour)  
 6701 Public Health Seminar Series II (1 credit hour)  
 671A/B Dietetics Research Project (6 credit hours)  
 6710 Public Health Practicum (10 credit hours)  
 6711 Public Health Capstone Project (10 credit hours)  
 6720 Public Health Surveillance  
 6721 Disease and Injury Prevention  
 6722 Environmental Health  
 6723 Health Promotion  
 6724 Communicable Disease Prevention and Control  
 6725 Public Health Leadership and Management  
 6726 Program Development in Public Health  
 6730 Professional Practice  
 6731 Community Nutrition  
 6733 Dietetics Internship I (non-credit component)  
 6734 Dietetics Internship II (non-credit component)  
 6735 Dietetics Internship III (17 week Internship block - 10 credit hours)  
 6736 Dietetics Internship IV (16 week Internship block - 10 credit hours)

## 24 Regulations Governing the Degree of Master of Science

www.mun.ca/science

### Professor and Dean

M. Abrahams

The degree of Master of Science (M.Sc.) is offered at present in Aquaculture, Biochemistry, Biology, Chemistry, Cognitive and Behavioural Ecology, Computer Science, Earth Sciences (Geology), Earth Sciences (Geophysics), Environmental Science, Experimental Psychology, Food Science, Geography, Marine Biology, Mathematics, Physical Oceanography, Physics, Scientific Computing, Scientific Computing (Co-operative), and Statistics. Interdisciplinary studies are encouraged; applicants should consult the academic unit concerned.

### 24.1 Qualifications for Admission

1. Admission is limited and competitive. To be considered for admission an applicant will normally hold at least a high second class Honours Degree, or an M.D. Degree, or the equivalent of either, both in achievement and depth of study, from an institution recognized by the Senate, and shall have knowledge of the proposed field of specialization satisfactory to the Dean.
2. Any other applicant may be considered for admission provided that:
  - a. the applicant's undergraduate record after the first year shows an average of at least Grade B in courses in the proposed field of specialization.
  - b. the applicant's overall undergraduate record after the first year shows an average of at least Grade B in all courses taken.
 In addition, an applicant may be required to demonstrate a satisfactory knowledge of the proposed field of study in an examination administered by the academic unit concerned.
3. Only in exceptional circumstances, and only on the recommendation of the academic unit concerned, will the Dean consider applicants who do not meet these requirements of Clause 2.
4. Applicants who do not possess the prerequisite academic qualifications should consult the appropriate academic unit about a program of further undergraduate courses. Such a program will be intended to raise their qualifications to a level considered academically equivalent to Honours. Such courses may not be used to fulfill the regulation course requirements of the M.Sc. Degree.
5. A high degree of literacy in English is required of all graduate students in the University.

Note: *Some Departments have specific regulations in addition to those outlined above, and prospective applicants are advised to turn to the relevant part of this Calendar and acquaint themselves with the regulations of the Department or appropriate academic unit in which they are interested.*

### 24.2 Program of Study and Research

1. The program of study for the Master of Science Degree shall consist of the successful completion of a program of courses and, in accordance with the specific program regulations, either of a thesis embodying original research or of a project and report.
2. Every candidate shall read at least 6 credit hours in graduate program courses in one subject or in closely related subjects, and such other courses as may be required in an individual program. Undergraduate courses may, if necessary, be included as additional courses.
3. Where Departmental regulations require more than the minimum number of credit hours, the Dean, on the recommendation of the appropriate academic unit, may waive in part the credit hour requirements for a Master's Degree, provided that no student may take less than the 6 required credit hours in graduate program courses.
4. Students may, with the approval of the Dean, augment their studies with 6 credit hours in other courses of their choice. The grading system in non-program courses shall be that appropriate to the particular course, and the final grades in these courses will be recorded on the student's transcripts. However, passing grades are not required in these non-program courses in order to continue in graduate studies or obtain a Master's Degree. (See General Regulation **Evaluation, Evaluation of Graduate Students**).
5. Every candidate shall submit a thesis or report on an approved subject in which systematic research has been conducted under the direction of a Supervisor recommended by the academic unit concerned and approved by the Dean. The candidate may be required to take an oral examination.
6. The program of courses, the thesis or report topic and the Supervisor, and all changes in these, must be approved by the Dean.

### 24.3 Evaluation

1. In order to continue in the School of Graduate Studies and in order to qualify for a Master's Degree, a candidate shall obtain an A or B grade in each program course. (See General Regulation **Evaluation, Evaluation of Graduate Students**).
2. When it has been determined, on the basis of consultation with the candidate, the instructors in graduate courses, and the thesis or report Supervisor, that a candidate's work has fallen below a satisfactory level, the Supervisor or the Head of the appropriate academic unit may recommend to the Dean that such a candidate be required to withdraw from the program.

### 24.4 Thesis

See General Regulation **Theses and Reports**.

Note: *Every candidate in graduate studies shall comply with the **General Regulations**, the Degree Regulations, and any additional requirements of the appropriate academic unit.*

### 24.5 Aquaculture

www.mun.ca/science

#### Administrative Committee

Mr. C. Couturier, Fisheries and Marine Institute - Chair  
 Dr. K. Gamperl, Department of Ocean Sciences  
 Dr. I. McGaw, Department of Ocean Sciences  
 Dr. C. Parrish, Department of Ocean Sciences  
 Dr. F. Shahidi, Department of Biochemistry

The program of study leading to the Master of Science in Aquaculture is designed to instruct students in research using scientific principles derived from a wide range of disciplines including Behaviour, Biochemistry, Biology, Ecology, Food Science, Genomics,

Nutrition, and Physiology. It is an interdisciplinary program and often involves several fields of study. Research problems may include field and/or laboratory studies of one or more species of marine or freshwater flora and/or fauna. The Aquaculture group consists of faculty members from the Fisheries and Marine Institute of Memorial University of Newfoundland and the Departments of Biology, Biochemistry, and Ocean Sciences of Memorial University of Newfoundland. Research scientists at other institutions, e.g., Fisheries and Oceans Canada, complement the group in offering advice, facilities, and expertise to students in the program.

The Aquaculture Administrative Committee is responsible for the program. This Committee is composed of seven members appointed by the Dean of Science including two to three members from the Department of Ocean Sciences, two to three members from the Fisheries and Marine Institute of Memorial University of Newfoundland, and two members from appropriate academic units at Memorial University of Newfoundland. In addition, the Heads of the Departments of Biochemistry, Biology, and Ocean Sciences, and the Head of the School of Fisheries of the Fisheries and Marine Institute of Memorial University of Newfoundland are ex-officio members. The Committee makes recommendations to the Dean of the School of Graduate Studies concerning the academic requirements of the program: admission, course programs of individual students, financial support, composition of supervisory committees, and theses examiners. The Chair of the Committee will also ensure that a supervisory report form for each student in the program is submitted annually to the Dean.

### 24.5.1 Qualifications for Admission

To be considered for admission to the Master of Science in Aquaculture, an applicant shall normally hold one of the following: at least a second class Honours degree, or an equivalent both in achievement and depth of study, from an institution recognized by the Senate, or successful completion of the Advanced Diploma in Sustainable Aquaculture offered by the Fisheries and Marine Institute of Memorial University of Newfoundland, with academic standing deemed appropriate by the Committee.

### 24.5.2 Program of Study

1. The Master of Science Degree requires the successful completion of a program of courses and of a thesis embodying original research.
2. All candidates will be required to take 6 credit hours in graduate courses which will normally include at least one of the following: AQUA 6000 - Shellfish Culture and Enhancement, AQUA 6100 - Finfish Aquaculture, or AQUA 6200 - Aquaculture and the Environment.
3. Candidates who do not hold the Advanced Diploma in Sustainable Aquaculture may be required to successfully complete a selection of its component courses.
4. Further courses may be required depending on the background of the individual student.
5. Before the thesis is submitted, the student shall present an open seminar on the topic of investigation to the appropriate academic units, as recommended by the Administrative Committee. Any serious deficiencies in the thesis noticed at this stage should be carefully considered, in consultation with the Supervisor, for rectification.
6. The student will be required to comply with all other regulations governing the graduate Degree of Master of Science.

### 24.5.3 Courses

A selection of the following graduate courses will be offered to meet the requirements of candidates as far as the resources of the Department will allow.

#### Aquaculture

6000 - Shellfish Culture and Enhancement  
 6100 - Finfish Aquaculture  
 6200 - Aquaculture and the Environment  
 6201-6209 - Special Topics in Aquaculture (*prerequisite: Permission of Chair of Program*)

#### Biochemistry

BIOC 6670 - Biological Waste Treatment

#### Biology

6000 - Research Topics in Microbiology  
 6710 - Marine Benthic Biology  
 7101 - Topics in Marine Biology  
 7220 - Quantitative Methods in Biology  
 7933 - Advanced Topics in Marine Invertebrates  
 7938 - Genomics  
 7531 - Biological Oceanography  
 7535 - Research Methods in Marine Science  
 7550 - Fishery Biology  
 7551 - Fisheries Resource Management  
 7560 - Physiology of Marine Invertebrates  
 7561 - Physiology of Marine Vertebrates  
 7570 - Marine Benthic Biology  
 7910 - Community and Ecosystem Ecology

#### Cognitive and Behavioural Ecology

6351 - Behavioural Ecology and Sociobiology

#### Engineering

9603 - Environmental Sampling and Pollutant Analysis (*cross-listed as Environmental Science 6005*)  
 9605 - Advanced Waste Water Treatment  
 9622 - Environmental Statistics

#### Environmental Science

6000 - Environmental Science and Technology  
 6001 - Earth and Ocean Systems  
 6002 - Environmental Chemistry and Toxicology  
 6003 - Applied Ecology  
 6007 - Environmental Risk Assessment (*same as Engineering 9609*)

#### Geography

6250 - Conservation of Natural Resources

6410 - Climatology

**Marine Studies (Fisheries Resource Management) Program Courses**

6001 - Fisheries Ecology

6005 - Overview of World Fisheries

6009 - Current Issues for Sustainable Fisheries

**Physics**

6316 - Ocean Data Analysis

6320 - Ocean Turbulence and Mixing

**Technology Management (Aquaculture Technology Option) Program Courses**

6056 - Management of International Development

6071 - Management of Aquaculture Technology

6072 - Animal Husbandry Management

6073 - Aquaculture Environmental Management

6074 - Aquaculture Site and Operational Assessment

6075 - Aquaculture Engineering Technology Management

Note: Consult the Program for a list of titles and information regarding availability.

## 24.6 Biochemistry

[www.mun.ca/science](http://www.mun.ca/science)

[www.mun.ca/biochem](http://www.mun.ca/biochem)

**Professor and Head of the Department**

M.D. Berry

### 24.6.1 Program of Study

The Degree of Master of Science is offered in Biochemistry or Food Science to full-time and part-time students.

The admission requirements for the graduate programs in Biochemistry and Food Science are as given under **Regulations Governing Master of Science Degrees**. Depending on the background and/or area of specialization, a candidate's program may include additional courses taken for credit in Biochemistry, Food Science, or related subjects.

The program of a candidate for the M.Sc. Degree shall be the responsibility of the supervisory committee, composed of the Supervisor and at least two other faculty members recommended with the concurrence of the Supervisor by the Head of the Department or delegate.

It is the responsibility of the student to arrange regular meetings with his or her supervisory committee. A semi-annual report, prepared by the Supervisor and signed by all members of the supervisory committee, is required to be given to the Head of the Department or delegate.

All graduate students are expected to attend and participate in the Departmental seminars.

A student completing an M.Sc. Degree will be required to present a seminar on his/her research area. The seminar will normally take place during the last semester of the student's program.

Any deficiencies noted during the seminar should be carefully considered by the student and the supervisory committee prior to submission of the thesis for final examination.

### 24.6.2 Courses

A series of advanced courses in the areas outlined below will be offered. Normally only one course will be offered per semester.

6000-6009 Special Topics in Biochemistry

6010-6019 Special Topics in Nutrition and Metabolism

6020-6029 Special Topics in Food Science

6400 Control of Intermediary Metabolism

6460 Structural Biochemistry

6520 Nutritional Biochemistry

6530 Food Biochemistry

6590 Cellular, Molecular and Developmental Biology (*credit restricted with Biology 6590 and Medicine 6590*)

6630 Marine Biochemistry

6680 Processing and Quality of Foods

## 24.7 Biology

[www.mun.ca/science](http://www.mun.ca/science)

[www.mun.ca/biology](http://www.mun.ca/biology)

**Associate Professor and Head of the Department**

P. Marino

The Degree of Master of Science is offered in Biology to full-time and part-time students. Students interested in animal behaviour should also consult the section in the Calendar describing the **Master of Science in Cognitive and Behavioural Ecology program**. In addition, a Master of Science Degree is offered in **Aquaculture** and in **Marine Biology**. See appropriate sections of this Calendar.

### 24.7.1 Program of Study

1. The program of a candidate shall be the responsibility of a Supervisory Committee composed of the Supervisor and at least two other appropriate members recommended to the Dean by the Head (or delegate) of the Department with the concurrence of the Supervisor.
2. The Supervisory Committee shall interview the student normally within a month of first registration, to discuss the student's program and to explore any areas of weakness in the candidate's biological knowledge, especially where these relate to the intended areas of research.
3. A student will be required to take a minimum of 6 credit hours and Biology 7000 (Graduate Core Seminar).
4. It is the function of a Supervisory Committee to have regular meetings, at least annually, with its graduate student. A meeting report,

signed by all members of the Supervisory Committee and student, must be given to the Department. A copy will be sent to the graduate student and to the Dean of Graduate Studies.

5. The candidate will present a tentative outline of the proposed research to the Supervisory Committee, with a copy to the Department by the end of the second semester, and preferably prior to commencement of the research.
6. The student will present a research seminar to the Department, normally by the end of the second semester following admission, to describe the research topic being investigated and the methodologies to be employed. This seminar provides an opportunity for the student to receive constructive input from the broad biological community.
7. The candidate must present a thesis seminar of 30-40 minutes duration to the Department prior to submission of the thesis to the School of Graduate Studies. The candidate will be questioned by a panel approved by the Departmental Graduate Studies Committee, in consultation with the student's Supervisory Committee. All others in attendance will be invited to question the candidate before adjournment. Deficiencies noted at this stage should be carefully considered by the student and the Supervisory Committee prior to submission of the thesis for final examination.  
Under exceptional circumstances, this requirement may be waived by the Head of the Department (or delegate).
8. Each Master's candidate shall spend at least one semester in residence as a full-time student within the Department during the program. It is recommended that this semester be at the beginning of the program.  
Under exceptional circumstances, this requirement may be waived by the Head of the Department (or delegate).
9. If candidates, in the opinion of the Supervisor, Committee and Department, are not making satisfactory progress, they will be required to withdraw from the program.
10. Theses shall conform to **Theses and Reports** of the **General Regulations** of the School of Graduate Studies and to the regulations in the Departmental Guidelines.

### 24.7.2 Courses

A selection of the following graduate courses will be offered to meet the requirements of candidates, as far as the resources of the Department will allow.

- 6000 Research Topics in Microbiology
- 6131 Models in Biology (*credit cannot be obtained if already received for Biology 4607*)
- 6351 Behavioural Ecology and Sociobiology (*cross-listed as Psychology 6351*) *credit cannot be obtained if already received for Biology 4701*
- 6590 Molecular Biology I (*cross-listed as Medicine 6590 and credit-restricted with Biochemistry 6590*) *prerequisites: Biology 4241 (or equivalent)*
- 6591 Molecular Biology II (*cross-listed as Medicine 6591 and credit-restricted with the former Biochemistry 6591*) *prerequisites: Biology 4241 (or equivalent)*
- 6592 Bacterial Genetics (*credit-restricted with the former Biochemistry 6592*) *prerequisite: Biology 4241 (or equivalent)*
- 6593 Selected Readings in Molecular Biology (*credit-restricted with the former Biochemistry 6593*) *prerequisites or Co-requisites: one of Biology, Biochemistry or Medicine 6590, and one of Biology 6591, Medicine 6591, or the former Biochemistry 6591 (or equivalent)*
- 6710 Marine Benthic Biology
- 7000 Graduate Core Seminar (*cross-listed as Ocean Science 7000*)
- 7101 Topics in Marine Biology
- 7201 Topics in Cellular and Molecular Biology and Physiology
- 7220 Quantitative Methods in Biology (*credit cannot be obtained if already received for Biology 4605*)
- 7300 Ornithology (*credit cannot be obtained if already received for Biology 4620*)
- 7301 Topics in Ecology and Conservation Biology
- 7530 The Molecular Biology of Development
- 7535 Research Methods in Marine Science
- 7920-7960 Special Topics in Biology (CMSC Biology 7931)
- 7931 Research Methods in Genetic Biotechnology (Biology 7931 may be delivered in an accelerated format outside of the regular semester timeframe)

## 24.8 Chemistry

[www.mun.ca/science](http://www.mun.ca/science)  
[www.mun.ca/chem](http://www.mun.ca/chem)

**Professor and Head of the Department**

T. Fridgen

### 24.8.1 Program of Study

1. The Degree of Master of Science in Chemistry is offered as full-time or part-time study.
  - a. Preference for admission will be given to students with a B.Sc. (Honours) Degree in Chemistry from a recognized university.
  - b. Students holding a B.Sc. Degree in Chemistry from a university of recognized standing with a minimum overall average of 65% and minimum average of 65% in all Chemistry courses taken after the first year will be considered for admission to the Chemistry M.Sc. program. Students not admissible under 1.a. may, on the advice of the Supervisory Committee, be required to pass qualifying exams and/or supplementary undergraduate courses with a minimum B grade.
  - c. Students with a first class B.Sc. in an area other than Chemistry will also be considered for admission. Students not acceptable under 1.a. or 1.b. who have a strong background in an appropriate area of specialization may, on the advice of the Supervisory Committee, be required to pass qualifying exams and/or supplementary undergraduate courses with a minimum B grade.
  - d. Upon recommendation of their supervisor, candidates will write American Chemical Society (ACS) placement test(s) in the first two weeks of their initial semester of registration in order to determine an appropriate course program.
2. Candidates will be assigned a Supervisory Committee consisting of the Supervisor and at least two other appropriate faculty members appointed by the Dean on the recommendation of the Chemistry Deputy Head (Graduate Studies).
3. The program of a candidate must be arranged by the Supervisor before the second semester of registration in consultation with the Supervisory Committee and the student. It is the responsibility of the Supervisory Committee to meet at least annually with the student, to provide guidance at all stages of the candidate's program, and, in consultation with the student, to prepare written annual progress reports for submission to the Dean of Graduate Studies.
4. Candidates are normally required to successfully complete Chemistry 6001 (Master's Seminar) and a minimum of 6 credit hours of

graduate Chemistry courses with a minimum B grade. Additional program courses may be assigned by the Supervisory Committee.

- Candidates are required to attend Departmental seminars.
- Candidates must submit a thesis deemed acceptable to two examiners as described under **Regulations Governing Master of Science Degrees**. An oral defence is not required.

### 24.8.2 Courses

6001 Master's Seminar  
 6004 Project Seminar  
 6110 Analytical Chemistry II  
 6150 Advanced Spectroscopic Techniques  
 6151 Analytical Separations and Organic Mass Spectrometry  
 6152 Electroanalytical Techniques  
 6153 Techniques in Sampling, Trace Analysis and Chemometrics  
 6154 Business Management and Good Laboratory Practice  
 6155 Computers in Instrumental Analysis and Basic Electronics (*same as Med 6070*)  
 6156 Analytical Method Development and Sampling  
 6160 Laboratory Projects in Sampling, Electroanalysis and Trace Analysis  
 6161 Laboratory Projects in Analytical Separations and Spectroscopic Techniques  
 6190-9 Selected Topics in Analytical Chemistry  
 6201 Bioinorganic Chemistry  
 6202 Main Group Chemistry  
 6204 Mechanisms in Catalysis  
 6205 Photochemistry of Transition Metal Complexes  
 6206 Green Chemistry  
 6210 Organometallic Chemistry  
 6290-9 Selected Topics in Inorganic Chemistry  
 6300 Quantum Chemistry I  
 6301 Quantum Chemistry II  
 6302 Molecular Spectroscopy  
 6304 Computational Chemistry I  
 6310 Electronic Structure Theory  
 6323 Chemical Thermodynamics I  
 6324 Chemical Thermodynamics II  
 6340 Biophysical Chemistry  
 6350 Electrochemical Kinetics  
 6360 Solid State Chemistry  
 6370 Nanoscale Phenomena  
 6380 Adsorption on Surfaces  
 6381 Surface and Interface Science  
 6382-9 Selected Topics in Physical Chemistry  
 6390-8 Selected Topics in Physical Chemistry  
 6399 Chemical Kinetics and Dynamics  
 6401 Organic Spectroscopic Analysis I  
 6402 Organic Spectroscopic Analysis II  
 6421 Natural Products Chemistry  
 6460 Organic Synthesis  
 6470 Physical Organic Chemistry  
 6490-9 Selected Topics in Organic Chemistry  
 6590-9 Selected Topics in Theoretical and Computational Chemistry  
 6600 Applications of Inorganic and Organometallic Chemistry to Toxicology

## 24.9 Cognitive and Behavioural Ecology

[www.mun.ca/science](http://www.mun.ca/science)

### Administrative Committee

Dr. I. Fleming, Department of Ocean Sciences - Co-Chair  
 Dr. C. Walsh, Department of Psychology - Co-Chair  
 Dr. T. Chapman, Department of Biology  
 Ms. M. Fitzsimmons, Graduate Student Representative  
 Dr. A. Hurford, Department of Biology  
 Dr. S. Leroux, Department of Biology  
 Dr. W. Montevecchi, Department of Psychology  
 Dr. C. Purchase, Department of Biology  
 Dr. A. Storey, Department of Psychology  
 Dr. E. Vander Wal, Department of Biology  
 Dr. I. Warkentin, Grenfell Campus  
 Dr. D. Wilson, Department of Psychology

### 24.9.1 General Information

- The Cognitive and Behavioural Ecology Program is interdisciplinary and designed to train students in research that integrates cognitive and behavioural studies at the ecological level. Molecular, developmental, and evolutionary aspects of cognition and behaviour are also studied. Supervisors include faculty from the Departments of Biology, Ocean Sciences, Psychology, the Faculty of Medicine and the Environmental Science Program at Grenfell Campus, as well as adjunct faculty from the Canadian Wildlife Service, Department of Fisheries and Oceans, the Newfoundland and Labrador Forestry and Wildlife Divisions and Parks Canada. The Departments of Biology and Psychology jointly offer the Master of Science and the Doctor of Philosophy degrees in Cognitive and Behavioural Ecology.
- The Administrative Committee is responsible for the Program. Committee members are appointed by the Dean of Science, on the recommendation of the Chair of the Committee and of the Heads of Biology and Psychology. The Committee Chair is elected by the

committee members and appointed by the Dean of Science. The Committee makes recommendations to the Dean of Graduate Studies concerning admissions and academic requirements. In consultation with supervisors, recommendations are made concerning course programs, financial support, thesis committees, comprehensive and thesis topics, examiners and students' annual progress. Upon program completion, the Committee certifies that all requirements for the appropriate degree have been met. The Department of the Supervisor ensures that adequate facilities are provided for each candidate. Students in the Cognitive and Behavioural Ecology Program are considered for teaching assistantships in the Psychology or Biology Departments.

### 24.9.2 Program of Study

1. Students normally take three courses (9 credit hours) in the first year. Students will be required to take Behavioural Ecology and Sociobiology (CABE 6351), Field and Lab Methods in Animal Behaviour and Behavioural Ecology (CABE 7000) and one elective, normally Quantitative Methods in Biology (BIOL 7220) or Advanced Statistics in Psychology (6000), in consultation with the Supervisor.
2. Upon completion but before submission of the thesis, the student is required to give a formal thesis presentation.
3. The student will be required to comply with all other regulations governing the graduate Degree of Master of Science.

#### Table of Credit Restrictions - Master of Science in Cognitive and Behavioural Ecology

(Credit may be obtained for only one course from each of the pairs of courses listed in this table.)

Present Course	Former Course
CABE 6240	Biopsychology 6240
CABE 6350	Biopsychology 6350
CABE 6351	Biopsychology 6351
CABE 7000	Biopsychology 7000

### 24.9.3 Courses

Biology 7220 Quantitative Methods in Biology  
 Cognitive and Behavioural Ecology 6240 Special Topics  
 Cognitive and Behavioural Ecology 6350 Behavioural Ontogeny  
 Cognitive and Behavioural Ecology 6351 Behavioural Ecology and Sociobiology  
 Cognitive and Behavioural Ecology 7000 Field and Lab Methods in Animal Behaviour and Behavioural Ecology  
 Psychology 6000 Advanced Statistics in Psychology

### 24.10 Computer Science

[www.mun.ca/science](http://www.mun.ca/science)  
[www.mun.ca/computerscience](http://www.mun.ca/computerscience)

#### Professor and Head of the Department

W. Banzhaf

The degrees of Master of Science and Doctor of Philosophy are offered in Computer Science.

#### 24.10.1 Admission Requirements

Admission into a Master's program in Computer Science is restricted to candidates holding at least a Bachelor degree (major in Computer Science or Computer Engineering) with a minimum average of 75% overall. When circumstances warrant, this requirement may be waived on the recommendation of the Head of the Department. Applicants should also refer to the **Qualifications for Admission** given under the **Regulations Governing the Degree of Master of Science** within the School of Graduate Studies section of the current Calendar. International applicants are strongly encouraged to submit results of the (general) Graduate Record Examination (GRE) test.

#### 24.10.2 Programs

##### 24.10.2.1 Option 1 - Thesis Route

1. Candidates are required to complete a minimum of 15 credit hours in graduate program courses, 9 of which must be in Computer Science (excluding COMP 601W and COMP 6999).
2. Full-time students are expected to complete their course work within their first year of studies. Part-time students are expected to complete their course work by the end of the seventh semester in their program.
3. Candidates must participate in the Research Forum at least once during their program. The Student Research Forum is organized by the Department of Computer Science and takes place in the Winter term of each academic year.
4. Each candidate is required to submit an acceptable thesis. The thesis project may involve a theoretical investigation and/or the development of an original, practical system. Each candidate is required to present a tentative outline of his/her proposed research to the Supervisor, with a copy to the Department Committee on Graduate Studies, by the end of his/her third semester in the program (sixth semester for part-time students). A fifteen minute oral presentation of the proposal is to be scheduled and given within four weeks of the submission date.
5. Prior to submission of a thesis, normally in the last semester of the program, candidates are required to present a seminar on the thesis topic, methods employed, and research results.

##### 24.10.2.2 Option 2 - Course/Project Route with Work Term

1. Candidates are required to complete a minimum of 24 credit hours in graduate program courses, of which at least 18 credit hours must be in Computer Science.
2. Within this credit requirement, a student must take the following courses:  
 COMP 6999 (Master's Project)  
 One course in Software Engineering (COMP 6905)

One course in Algorithms (COMP 6901 or COMP 6902)

3. Additionally students are required to complete one co-operative education work term (COMP 601W). The work term is a full-time, paid work experience with one employer and either a four or eight months in duration. The work term should start in the third semester of the program. The work term can be deferred to the fourth semester, but normally only in the event of an unsuccessful job search for the third semester.
4. The dates for starting and finishing each work term are shown in the **University Diary**.
5. Students must successfully complete at least 12 credit hours (four courses) prior to beginning their work term. Students must have at least one required course remaining after their work term.
6. Students will conduct job searches with an Academic Staff Member in Co-operative Education in cooperation with the Department of Computer Science. It is the student's responsibility to seek and obtain a work term placement and to communicate with all parties both within the University and beyond in a professional manner. Work term placements cannot be guaranteed by the Department of Computer Science or an Academic Staff Member in Co-operative Education, although every effort will be made to assist students in their job search. Work term placements obtained outside the job competition must be confirmed by letter from the employer and approved by the Head of Computer Science and by an Academic Staff Member in Co-operative Education on or before the first day of the work term. Work term placements may be outside Newfoundland and Labrador.
7. Each work term placement will be supervised by the candidate's program Supervisor, the on-site Supervisor assigned by the employer and the Academic Staff Member in Co-operative Education. The overall evaluation of the work term is the responsibility of the program Supervisor, on-site Supervisor and the Academic Staff Member in Co-operative Education. The work term shall consist of two components:
  - a. On-the-job Student Performance as evaluated by the on-site Supervisor and the Academic Staff Member in Co-operative Education, in consultation with the program Supervisor.
  - b. A Work Report graded by the program Supervisor in consultation with the on-site Supervisor.
8. Evaluation of the work term will result in the assignment of one of the following final grades:
  - a. Pass with Distinction: indicates outstanding performance in both the work report and work performance.
  - b. Pass: Indicates that PERFORMANCE MEETS EXPECTATIONS in both the work report and work performance.
  - c. Fail: Indicates FAILING PERFORMANCE in the work report and/or the work performance. If a failing grade is assigned, the student's Masters program will be terminated.
9. Prior to graduation and after successfully completing COMP 6999 (Master's Project), candidates are required to present a seminar on their projects.

### 24.10.3 Other Regulations

1. Students from either **Option 1 - Thesis Route** or **Option 2 - Course/Project Route with Work Term** may request to transfer between both options once during their studies, after at least two semesters in the program.
2. All candidates are expected to take an active part in seminars and other aspects of the academic life of the Department of Computer Science.
3. Full-time students are expected to complete all program requirements in two years. Part-time students are expected to complete all program requirements in four years.

### 24.10.4 Courses

A selection of the following graduate courses will be offered to meet the requirements of candidates, as far as the resources of the Department will allow. Normally, students will be expected to complete their course work during the fall and winter semesters. Courses might not be offered in the spring semester.

601W Work Term

6758-6769 Special Topics in Computer Applications

6770-6790 Special Topics in Computer Science

690A/B Research Methods in Computer Science

6901 Applied Algorithms (*credit may be obtained for only one of 6901 and 6783*)

6902 Computational Complexity (*credit may be obtained for only one of 6902 and 6743*)

6903 Concurrent Computing

6904 Advanced Computer Architecture (*credit may be obtained for only one of 6904 and 6722*)

6905 Software Engineering (*credit may only be obtained for one of 6905 or 6713*)

6906 Numerical Methods (*credit may only be obtained for one of 6906 or 6731*)

6907 Introduction to Data Mining (*credit may be obtained for only one of 6907 and 6762*)

6908 Database Technology and Applications (*credit may be obtained for only one of 6908 and 6751*)

6909 Fundamentals of Computer Graphics (*credit may be obtained for only one of 6909 or 6752*)

6910 Services Computing, Semantic Web and Cloud Computing

6911 Bio-inspired Computing

6912 Autonomous Robotics (*credit may be obtained for only one of 6912 and 6778*)

6913 Bioinformatics

6914 3D Modelling and Rendering

6915 Machine Learning

6916 Security and Privacy

6918 Digital Image Processing (*credit may be obtained for only one of 6918 or 6756*)

6921 Syntax and Semantics of Programming Languages (*credit may be obtained for only one of 6921 or 6711*)

6922 Compiling Methods (*credit may be obtained for only one of 6922 and 6712*)

6924 Formal Grammars, Automata and Languages

6925 Advanced Operating Systems

6926 Performance Evaluation of Computer Systems

6928 Knowledge-Based Systems (*credit may be obtained for only one of 6928 or 6755*)

6929 Advanced Computational Geometry (*credit may be obtained for only one of 6929 or 6745*)

6930 Theory of Databases (*credit may be obtained for only one of 6930 or 6742*)

6931 Matrix Computations and Applications (*credit may only be obtained for one of 6931 or 6732*)

6932 Matrix Computations in Control (*credit may only be obtained for one of 6932 or 6738*)

6999 Master's Project

## 24.11 Earth Sciences

www.mun.ca/science  
www.mun.ca/earthsciences

### Professor and Head of the Department

J. Hanchar

The degrees of Master of Science and Doctor of Philosophy are offered in Earth Sciences (Geology) and Earth Sciences (Geophysics) by full-time and part-time study.

### 24.11.1 Program of Study

1. Admission into a Master's Degree program in Earth Sciences (Geology) and Earth Sciences (Geophysics) is restricted to candidates holding at least a B.Sc. Degree with second class Honours. When circumstances warrant, this requirement may be waived by the School of Graduate Studies on the recommendation of the Head of the Department.
2. Each candidate will be assigned a multi-member supervisory committee. This committee shall consist of the Supervisor and at least one other member. Within two weeks of the first registration in the M.Sc. Degree program, a candidate will meet with his/her supervisory committee. Within six months, the student and the supervisory committee will agree on a written thesis proposal outlining the objectives, methods, timetable and funding for the project, and provide the proposal (signed by the student and supervisory committee) to the Head for inclusion in the student's file.
3. A candidate for the M.Sc. Degree must complete a minimum of 6 credit hours in program courses. The courses must be selected from the overview and general courses below or with the approval of the supervisory committee and Head of the Department, other graduate level courses including those offered by other departments. Depending on background and/or area of specialization, a candidate also may be required to complete additional courses in earth sciences or related subjects.
4. All course requirements should be completed within one year from the date of first registration in the M.Sc. Degree program.
5. A candidate is required to give an oral presentation to the Department on the results of his/her research. This presentation must be given during the second year of the program.
6. The M.Sc. Degree program will conclude with a thesis examination as prescribed in the **Regulations Governing the Degree of Master of Science**.
7. The Supervisor and the Head of the Department may recommend to the Dean of Graduate Studies that a candidate who is not making satisfactory progress be required to withdraw from the program.

### 24.11.2 Courses

A selection of courses will be offered to meet the requirements of candidates as far as the resources of the Department will allow.

#### Overview Courses

7110 Physics of the Solid Earth  
7120 Crustal Geophysics  
7300 Changes in Global Paleoenvironment  
7400 Tectonic Regimes  
7410 Engineering and Environmental Geology  
7500 Chemical Fluxes in the Earth  
7810 Paleocology (*same as the former 6810. credit may be obtained for only one of 7810 or 6810*)

#### General Courses

6070 Quantitative Techniques in Mineralogy and Metamorphic Petrology  
6105 Advanced Field Course in Applied Geophysics (may be offered in accelerated format)  
6141 Rotation of the Earth  
6142 Theory of Global Geodynamics  
6152 Paleomagnetism  
6171 Advanced Exploration Seismology  
6172 Borehole Seismic  
6175 Gravity and Magnetic Methods  
6177 Mathematical Formulations of Seismic Wave Phenomena  
6210 Genesis of Mineral Deposits  
6320 Marine Geology  
6400 Flow and Transport in Fractured Rock  
6410 Advanced Engineering and Environmental Geology  
6420 Deformation Mechanisms  
6500 Stable Isotope Geochemistry  
6510 Trace Element Geochemistry  
6520 Methods in Advanced Research in Geochemistry  
6540 Radiogenic Isotope Geochemistry  
6550 Biogeochemistry  
6600 Petroleum Geology  
6740 Modern and Ancient Sedimentary Environments  
6750 Sequence Stratigraphy  
6820 Palynology and Paleobotany  
6900-6999 Special Topics in Earth Sciences

## 24.12 Environmental Science

www.mun.ca/science

(see also **Master of Environmental Science**)

### Board of Studies

Dr. J. Wroblewski, Department of Ocean Sciences - Interim Chair  
Dr. C. Campbell, Division of Science, Grenfell Campus, ex-officio  
Dr. T. Chapman, Department of Biology  
Dr. B. Chen, Faculty of Engineering and Applied Science  
Dr. W. Montevecchi, Department of Psychology

Dr. C. Tarasov, Department of Physics and Physical Oceanography  
 Dr. S. Ziegler, Department of Earth Sciences

### 24.12.1 Program of Study

1. The Environmental Science Program is an interdisciplinary graduate program involving the departments of the Faculty of Science, the Faculty of Humanities and Social Sciences, the Faculty of Medicine, and the Faculty of Engineering and Applied Science. There are three Environmental Science Graduate Degree streams: the Master of Science (M.Sc., Environmental Science), Master of Environmental Science (M.Env.Sci.), and the Doctor of Philosophy (Ph.D., Environmental Science). The program is available on a full or part-time basis.
2. The program is administered by a Board of Studies appointed by the Dean of Science. Supervisors of graduate students in the program include faculty from the Faculty of Science, the Faculty of Humanities and Social Sciences, the Faculty of Engineering and Applied Science, the Faculty of Medicine, and the Environmental Science Program at the Grenfell Campus, as well as adjunct appointees to the program (as a co-supervisor).

### 24.12.2 Qualifications for Admission

Admission is limited and competitive. To be considered for admission applicants shall normally hold a Bachelor's (Honours) degree in Science, Geography, or Environmental Science with at least second class standing, or equivalent, or a Bachelor's degree in Engineering from an institution recognized by the Senate or shall have qualifications and/or experience in environmental science acceptable to the Dean of Graduate Studies and the Board of Studies. The Board of Studies make recommendations on admission to the Dean of Graduate Studies.

### 24.12.3 Degree Requirements

1. To the extent that resources permit, individual programs will be developed to suit students' interests and needs. However all programs must be approved by the Board of Studies and by the Dean of Graduate Studies. All **General Regulations** of the School of Graduate Studies shall apply to these degrees.
2. The Master of Science (Environmental Science) is a research Degree which includes a thesis and course work. The thesis research will focus on environmental topics relevant to the student's background. The course component has two aims: to broaden the student's understanding of environmental issues; and to provide further training in areas of research specialization for the thesis.
3. Each student will have a Supervisory Committee normally consisting of a Supervisor and two others. The Supervisory Committee will be appointed by the Dean of Graduate Studies on the recommendation of the Board of Studies for Environmental Science.
4. The program of each student will consist of a minimum of 12 credit hours in program courses which will include Environmental Science 6000 and Environmental Science 6010. Of the 6 credit hours remaining in program courses, 3 credit hours will be from Environmental Science 6001, 6002, and 6003 and the other 3 credit hours will be related to the student's specialty and will normally be chosen from graduate courses offered by the Faculties of Science, Humanities and Social Sciences, Medicine, and Engineering and Applied Science.
5. All students will be required to submit a thesis embodying the results of systematic research on an approved topic. The thesis will be evaluated according to procedures outlined in **General Regulations, Theses and Reports**.

### 24.12.4 Courses

6000 Environmental Science and Technology  
 6001 Earth and Ocean Systems  
 6002 Environmental Chemistry and Toxicology  
 6003 Applied Ecology  
 6004 Environmental Pollution and Mitigation (*cross-listed as ENGI 9601*)  
 6007 Environmental Risk Assessment (*cross-listed as ENGI 9609*)  
 6008 Air Pollution (*same as ENGI 9624*)  
 6009 Environmental Science Project  
 6010 Environmental Seminar  
 6201-6210 Special Topics in Environmental Science

### 24.13 Food Science

See **Biochemistry**.

### 24.14 Geography

[www.mun.ca/hss](http://www.mun.ca/hss)  
[www.mun.ca/science](http://www.mun.ca/science)  
[www.mun.ca/geog](http://www.mun.ca/geog)

**Professor and Head of the Department**

N. Catto

#### 24.14.1 General Information

1. The degrees of Master of Arts and Master of Science are offered in Geography by full-time or part-time study.
2. Admission requirements are set forth in the **General Regulations** of the School of Graduate Studies and Degree Regulations for **Master of Arts** and **Master of Science**.
3. The deadline for submission of applications for admission is January 15. Candidates will normally commence their programs in the Fall semester.
4. An applicant will be admitted to a graduate program only if a faculty member agrees to act as Supervisor. A supervisory committee will be established after admission, normally consisting of the Supervisor and two other individuals, one of whom will normally be a member of the Department.
5. Major research areas for graduate study at the master's level are cultural, political, historical, economic, urban, resource management, community and regional development, geomorphology, Quaternary environments, climatology, and geographic information sciences.

6. Candidates will register for the M.A. program if their fields of interest lie in an area of Human Geography or for the M.Sc. if their fields of interest are in Physical Geography or Geographic Information Sciences.
7. It is expected that the program of study and research for the M.A. or M.Sc. will normally be completed in a maximum of two years of full-time work, or three years of part-time work.
8. Candidates must successfully complete a minimum of 12 credit hours of graduate program courses with a minimum grade of B in each. Geography 6000 and 6001 will be required courses for all candidates who have not already completed equivalent courses at the Honours or post-graduate level.
9. Candidates whose undergraduate Degree is not in geography will normally be required to complete some additional undergraduate program courses during their first year of study, in addition to the required graduate program courses. Normally four such undergraduate courses will be required, and a minimum grade of 70% must be obtained in each.
10. Each candidate will be required to present a seminar on their research to the Department.
11. Each candidate must submit a thesis based on their own original research. This thesis will be examined in accordance with the **General Regulations** of the School of Graduate Studies.

### 24.14.2 Courses

A selection of the following graduate courses will be offered to meet the requirements of candidates as far as the resources of the Department will allow.

6000 Development of Geographical Thought and Practice I  
 6001 Development of Geographical Thought and Practice II  
 6002 Directed Readings in Geography  
 6100 Research Techniques in A Selected Field of Geography I  
 6101 Research Techniques in A Selected Field of Geography II  
 6120 Geospatial Modelling and Analysis  
 6150 Environmental Remote Sensing and Image Analysis  
 6200 Economic Geography I  
 6201 Economic Geography II  
 6204 Sustainable Community and Regional Development  
 6250 Conservation and Sustainability of Natural Resources  
 6251 Survey Design, Questionnaire Development and Techniques of Data Collection  
 6300 Problems in Fisheries Geography  
 6400 Fluvial Geomorphology  
 6401 Glacial Geomorphology  
 6402 Coastal Geomorphology  
 6410 Climatology  
 6420 Quaternary Geography  
 6430 Biogeography  
 6500 Cultural Geography  
 6600 Historical Geography  
 6700 Political Geography  
 6800 Urban Geography  
 6821 Advanced Computer Mapping  
 6900 Graduate Seminar in Regional Geography  
 6990-95 Special Topics in Geography

### 24.15 Geology

See **Earth Sciences**.

### 24.16 Geophysics

See **Earth Sciences**.

### 24.17 Marine Biology

[www.mun.ca/science](http://www.mun.ca/science)  
[www.mun.ca/osc](http://www.mun.ca/osc)

#### Professor Emeritus and Head of the Department

G.L. Fletcher

The degree of Master of Science (M.Sc.) is offered in Marine Biology by full-time and part-time study through the Department of Ocean Sciences. Areas of concentration include: Ocean Ecology, Functional Biology of Marine Organisms, Fisheries and Aquaculture, and Oceans and Environment.

#### 24.17.1 Admission and Program of Study

1. Admission into the Master of Science degree program in Marine Biology is normally restricted to candidates holding at least a Bachelor of Science degree with second class Honours. When circumstances warrant, the requirement for a second class Honours may be waived by the School of Graduate Studies on the recommendation of the Head of the Department.
2. Each student will be assigned a Supervisory Committee consisting of the Supervisor and at least one other member. Within three months of the first registration in the M.Sc. degree program, the student will meet with his/her Supervisory Committee. Within six months, the student and the Supervisory Committee will agree on a written thesis proposal outlining the objectives, methods, timetable and funding for the project, and provide the proposal (signed by the student and the supervisory committee) to the Head for inclusion in the student's file.
3. A student is required to complete a minimum of 9 credit hours of graduate program courses as follows:
  - Ocean Sciences 7000
  - One of Ocean Sciences 7100 or 7200
  - 3 additional credit hours selected from other Ocean Sciences graduate courses or relevant courses in other Departments as approved by the Supervisory Committee

4. All course requirements should be completed within four semesters from the date of first registration in the M.Sc. degree program.
5. A student is required to give an oral presentation to the Department on the results of his/her research. This presentation should be given after completion of a thesis draft.
6. The M.Sc. degree program will conclude with a thesis examination as prescribed in the School of Graduate Studies **General Regulations, Theses and Reports**.

### 24.17.2 Courses

A selection of the following graduate courses will be offered to meet the requirements of candidates, as far as the resources of the Department will allow.

OCSC 7000 Graduate Core Seminar (*cross-listed as Biology 7000*)

OCSC 7100 Biological Oceanography (*credit cannot be obtained for both OCSC 7100 and the former Biology/OCSC 7531*)

OCSC 7200 Adaptations to the Marine Environment (*credit cannot be obtained for both OCSC 7200 and the former Biology/OCSC 7561*)

OCSC 7300 Plankton Dynamics (*credit cannot be obtained for both OCSC 7300 and the former Biology/OCSC 7540*)

OCSC 7400 Fisheries Resource Management (*credit cannot be obtained for both OCSC 7400 and the former Biology/OCSC 7551*)

### 24.18 Mathematics and Statistics

[www.mun.ca/science](http://www.mun.ca/science)

[www.mun.ca/math](http://www.mun.ca/math)

#### Professor and Head of the Department

C. Radford

The degrees of **Master of Applied Statistics** (see appropriate calendar entry), Master of Science, and Doctor of Philosophy are offered in the Department of Mathematics and Statistics. The Masters' degrees are offered by full-time and part-time studies.

#### 24.18.1 Specific Requirements for the M.Sc. in Mathematics

Every candidate for the M.Sc. in Mathematics is required to complete one of two options:

1. **Option 1:** MATH 6310, 6351 and 696A/B, a minimum of 9 further credit hours in courses chosen from the departmental course offerings, excluding MATH 6299, and a thesis as per **General Regulations, Theses and Reports**.
2. **Option 2:** MATH 6299, 6310, 6332, 6351, 696A/B, and a minimum of 12 further credit hours in courses chosen from the departmental course offerings.
  - Algebra: 6320, 6321
  - Analysis: 6310, 6311, 6312
  - Applied Mathematics: 6100, 6201 or 6212, 6120
  - Combinatorics: 6340, 6341, 6342
  - Topology: 6300 or 6301, 6332

#### 24.18.2 Specific Requirements for the M.Sc. in Statistics

Every candidate for the M.Sc. in Statistics is required to complete STAT 6510 and STAT 6560 plus at least 12 credit hours in graduate courses as well as the series STAT 697A/B or the completion of an additional 3 credit hour graduate course. A thesis is required as per **General Regulations, Theses and Reports**.

**Table of Credit Restrictions for Present Mathematics Courses with Former Mathematics Courses**

(Credit may be obtained for only one course from each of the pairs listed in this table.)

Present Course	Former Course	Present Course	Former Course
6323	6030	6212	6080
6321	6032	6310	6130
6322	6035	6330	6200
6340	6040	6331	6210
6341	6041	6332	6350
6342	6042	6312	6500

#### 24.18.3 Courses

A selection of the following graduate courses will be offered to meet the requirements of candidates, as far as the resources of the Department will allow.

##### Mathematics

6100 Dynamical Systems

6101 Modern Perturbation Theory

6102 Mathematical Biology

6104 Infinite Dimensional Dynamical Systems

6110 Advanced General Relativity

6111 Calculus in Manifolds

6112-6119 Special Topics in Applied Mathematics

6120 Theoretical Fluid Dynamics

6121 Functional Differential Equations

6130 Introduction to General Relativity

6160 Partial Differential Equations

6201 Numerical Methods for Partial Differential Equations

6204 Iterative Methods in Numerical Linear Algebra  
 6205-6209 Special Topics in Numerical Analysis  
 6210 Numerical Solution of Differential Equations  
 6212 Numerical Methods for Initial Value Problems  
 6230 Differentiable Manifolds and Riemannian Geometry  
 6299 Master's Project  
 6300 Homology Theory  
 6301 Homotopy Theory  
 6302 Theory of Fibre Bundles  
 6304-6309 Special Topics in Topology  
 6310 Functional Analysis  
 6311 Complex Analysis  
 6312 Measure Theory  
 6313 Functional Analysis II  
 6315-6319 Special Topics in Analysis  
 6320 Group Theory  
 6321 Ring Theory  
 6322 Nonassociative Algebra  
 6323 Homological Algebra  
 6324-6329 Special Topics in Algebra  
 6330 Analytic Number Theory  
 6331 Algebraic Number Theory  
 6332 Point Set Topology  
 6340 Graph Theory  
 6341 Combinatorial Design Theory  
 6342 Advanced Enumeration  
 6343-6349 Special Topics in Combinatorics  
 6351 Advanced Linear Algebra  
 696A/B Graduate Seminar (2 credit hours)

#### Statistics

6500 Probability (*credit restricted with former 6586*)  
 6503 Stochastic Processes  
 6505 Survival Analysis  
 6510 Mathematical Statistics  
 6520 Linear Models  
 6530 Longitudinal Data Analysis  
 6540 Time Series Analysis  
 6545 Statistical Computing  
 6550 Nonparametric Statistics  
 6560 Continuous Multivariate Analysis  
 6561 Categorical Data Analysis  
 6563 Sampling Theory  
 6571 Financial and Environmental Time Series  
 6573 Statistical Genetics  
 6570-6589 Selected Topics in Statistics and Probability (excluding 6571, 6573, 6586)  
 697A/B Graduate Seminar Series in Statistics (2 credit hours)

## 24.19 Physics and Physical Oceanography

[www.mun.ca/science](http://www.mun.ca/science)  
[www.mun.ca/physics](http://www.mun.ca/physics)

#### Professor and Head of the Department

J. Lagowski

Programs leading to the Degree of Master of Science in Physics and in Physical Oceanography are offered to both full and part-time students. Because Oceanography is multidisciplinary in nature, undergraduate students who plan to undertake Physical Oceanography studies are urged to consult the faculty member in charge of Physical Oceanography programs at their earliest opportunity, in order to ensure the appropriateness of their undergraduate course selections. The Degree of Doctor of Philosophy in Physics is offered through both full-time and part-time study in Atomic and Molecular Physics, Condensed Matter Physics, and Physical Oceanography. The following Departmental Regulations are supplementary to the General Regulations governing the M.Sc. and Ph.D. degrees. A thorough familiarity with the latter Regulations should be regarded as the prerequisite to further reading in this section.

The Department of Physics and Physical Oceanography compiles, and regularly reviews, a brochure which contains reasonably detailed descriptions of currently active research projects, as well as a comprehensive listing of recent research publications, and other material which may be of interest to prospective graduate students.

### 24.19.1 Program of Study

1. Admission to a M.Sc. program in the Department of Physics and Physical Oceanography is normally restricted to candidates holding an Honours B.Sc. Degree in Physics. However, depending on background and area of specialization and with particular reference to Physical Oceanography, other Baccalaureate degrees in science, applied science or mathematics, may be accepted.
2. A program of study for the M.Sc. Degree in Physics or Physical Oceanography shall normally include a minimum of 12 graduate credit hours. However, depending on the student's background and area of specialization, more or fewer graduate and/or undergraduate courses may be required.
3. Except with the special permission of the Department and the approval of the Dean of Graduate Studies, a candidate may not take any courses in addition to those approved for his/her M.Sc. program.
4. Before submission of the thesis to the School of Graduate Studies for examination, the student must present a seminar on the topic of his/her thesis research.

## 24.19.2 Courses

A selection of the following graduate courses will be offered to meet the requirements of candidates, as far as the resources of the Department will allow.

6000 Condensed Matter Physics I  
 6001 Condensed Matter Physics II  
 6002 Superconductivity  
 6003 Path Integral Techniques in Condensed Matter Physics  
 6010-19 Special Topics in Condensed Matter Physics  
 6040 Biophysics  
 6060-69 Special Topics in Interdisciplinary Areas  
 6200 Nonlinear Dynamics  
 6308 Ocean Dynamics I  
 6309 Ocean Dynamics II  
 6310 Physical Oceanography  
 6313 Physical Fluid Dynamics  
 6314 Field Oceanography  
 6315 Polar Oceanography  
 6316 Ocean Measurements and Data Analysis  
 6317 Ocean Acoustics  
 6318 Numerical Modelling  
 6319 Climate Dynamics  
 6320 Turbulence  
 6321 Coastal Oceanography  
 6322 Stratified Fluids  
 6323 Stability Theory  
 6324 Models in Ocean Ecology  
 6360-69 Special Topics in Physical Oceanography (excluding 6363)  
 6363 Laboratory Experiments in Geophysical Fluid Dynamics  
 6400 Statistical Mechanics  
 6402 Theory of Phase Transitions  
 6403 Stochastic Processes, Time-Dependent and Non-equilibrium Statistical Mechanics  
 6502 Electrodynamics  
 6720 Theory of Molecules  
 6721 Molecular Spectroscopy  
 6722 Light Scattering Spectroscopy  
 6730 Molecular Theory of Liquids and Compressed Gases  
 6740 Physics of Atomic Collisions  
 6760-69 Special Topics in Atomic and Molecular Physics  
 6800 Group Theory  
 6810-19 Special Topics in Theoretical and Mathematical Physics  
 6850 Quantum Mechanics I  
 6851 Quantum Mechanics II  
 6900 Techniques in Experimental Condensed Matter Physics  
 6910-19 Special Topics in Experimental and Applied Physics

**Table of Credit Restrictions - Physics and Physical Oceanography**

(Credit may be obtained for only one course from each of the pairs of courses listed in this table.)

Present Course	Former Course	Present Course	Former Course
6001	6051	6321	6303
6002	6822	6321	6304
6003	6820	6323	6303
6200	6821	6402	6401
6308	6312	6403	6401
6309	6311	6403	6824
6313	6301	6502	6500
6316	6302	6502	6501
6317	6823	6722	6790

Members of the Department carry out research in several areas of experimental and theoretical physics, including atomic and molecular physics, condensed matter physics, physical oceanography, theoretical geophysics, and applied nuclear physics. In atomic and molecular physics, there are experimental programs in collision-induced infrared absorption spectroscopy, electron emission spectroscopy of simple molecules, molecular ions and free radicals, laser-induced fluorescence spectroscopy, and Raman spectroscopy, and theoretical work on atomic and molecular collisions. The work in condensed matter physics includes experimental programs in solid state nuclear magnetic resonance on systems of biophysical interest, Raman spectroscopy of lipid bilayers and membranes, studies of phase transitions using Brillouin and Raman spectroscopy, studies of instabilities and pattern formation in simple fluid dynamical systems, and spectroscopic studies of molecular crystals. Theoretical condensed matter physics research involves studies of magnetism, superconductivity, and the statistical mechanics of polymers and lipid bilayers. The physical oceanography group carries out field and laboratory research on several projects which take advantage of Newfoundland's unique oceanographic environment, using acoustic and other remote sensing techniques. These include studies of circulation on the Newfoundland and Labrador shelves, Labrador current dynamics, fjord dynamics, submarine canyons and sediment transport dynamics in the nearshore zone and on the shelf. Theoretical oceanographic studies involve the modelling of ocean circulation, gravity wave phenomena and other aspects of ocean dynamics. Research in theoretical geophysics is concentrated on whole-Earth dynamics, with special emphasis on the physics of the liquid core (the Earth's "third ocean") as inferred from its wave spectrum and the associated momentum transfer to the

deformable solid parts of the Earth. In nuclear physics, research is done on the atmospheric concentrations of radioactive elements and on dosimetry for medical applications.

Note: For Geophysics, see **Earth Sciences**

## 24.20 Psychology

[www.mun.ca/science](http://www.mun.ca/science)

[www.mun.ca/psychology](http://www.mun.ca/psychology)

### Professor and Head of the Department

I. Neath

The Degree of Master of Science is offered in Experimental Psychology. The Degree of Doctor of Philosophy is offered in Experimental Psychology. Interested students may wish to consult the sections in the Calendar describing the **Master of Applied Psychological Science (Co-operative)** and the Master of Science and Doctor of Philosophy in Cognitive and Behavioural Ecology programs.

### Applications

All applicants are required to submit results from the General section of the Graduate Record Examinations.

At least one letter of reference should come from someone who is familiar with the applicant's research capability.

### 24.20.1 Program of Study

A candidate may be accepted into a program leading to the M.Sc. in Experimental Psychology.

#### Experimental Psychology

1. The areas of specialization offered are: Animal Behaviour (see **Cognitive and Behavioural Ecology Program**), Behavioural Neuroscience and Clinical, Cognitive, Developmental and Social Psychology.
2. Candidates shall normally complete 15 credit hours, including: Advanced Statistics in Psychology (6000), Research Design (6001), and 6 credit hours related to their area of specialization. Candidates will also register for the Colloquium Series in Psychology (6010) each Fall and Winter semester of their program for a maximum of four registrations.
3. Every candidate shall submit an original thesis based upon an approved experimental research topic.

### 24.20.2 Courses

A selection of the following graduate courses will be offered to meet the requirements of candidates, as far as the resources of the Department will allow.

6000 Advanced Statistics in Psychology

6001 Research Design

6010 Colloquium Series in Psychology (repeatable, non-credit)

6100-6130 Special Topics in Experimental Psychology

6200 Learning I

6201 Learning II

6203 Behavioural Pharmacology

6210 Behavioural Analysis of Toxins

6351 Behavioural Ecology and Sociobiology (*cross-listed as CABE 6351*)

6400 Theory and Methods in Social Psychology

6401 Social Cognition

6402 Group Processes

6403 Program Evaluation and Applied Research

6404 Project in Applied Psychological Science (*Note: This course is open only to students in the Master of Applied Psychological Science*)

6500 Developmental Psychology I

6501 Developmental Psychology II

6502 Developmental Changes During Old Age

6700 Perception

6710 Human Information Processing

6720 Human Memory

6800 Behavioural Neuroscience I

6801 Behavioural Neuroscience II

6810 Psychometrics

6910 Personality

699A/B Core Graduate Seminar in Psychology

## 24.21 Scientific Computing

[www.mun.ca/science](http://www.mun.ca/science)

### Administrative Committee

Dr. R. Haynes, Department of Mathematics and Statistics - Chair

Dr. V. Booth, Department of Biochemistry

Dr. S. Bromley, Industry Representative

Dr. C. Farquharson, Department of Earth Sciences

Dr. F. Khan, Faculty of Engineering and Applied Science

Dr. C. Rowley, Department of Chemistry

Dr. I. Saika-Voivod, Department of Physics and Physical Oceanography

### 24.21.1 Administrative Committee

The Administrative Committee, appointed by the Dean of the School of Graduate Studies on the recommendation of the Dean of the Faculty of Science, consists of at least one representative of each participating academic unit, and one member external to the University.

### 24.21.2 Participating Departments and Organizations

This interdisciplinary program offers the Master of Science Degree in both Scientific Computing and Scientific Computing (Co-operative). The departments of Biochemistry, Chemistry, Computer Science, Earth Sciences, Mathematics and Statistics, Physics and Physical Oceanography and the Faculty of Engineering and Applied Science are participants in this program. Other departments and faculties may be involved, depending on the nature of the thesis or project. External organizations may provide placements for co-op students, jointly supervise students, share computing resources and participate in teaching courses.

### 24.21.3 Admission Criteria and Procedures

1. The criteria for acceptance of an applicant are: his or her anticipated successful and timely completion of the program, and the willingness of a participating faculty member to supervise the applicant.
2. Students will be expected to hold a B.Sc. (Honours) or B.Eng. Degree with honours standing, or equivalent, with a strong computational orientation. At the time of application, the student is expected to provide evidence (for example, transcripts of completed courses) of his or her knowledge of a modern computer language such as Fortran, and/or C and/or C++, and/or Matlab, and/or Python. Evidence of knowledge of differential equations; and/or linear algebra and/or computer graphics would be an asset. Students with an inadequate background may be encouraged to take certain undergraduate courses.
3. Admission decisions will be made by the School of Graduate Studies on the recommendation of the Chair of the Administrative Committee.

### 24.21.4 Program of Study

1. The goal of Scientific Computing is to solve technical problems, in science and engineering, using computers and computational methods. Our program is designed to educate students to apply computational, numerical and programming concepts and tools to solve and model complex problems in science and engineering.
2. The Program is offered in thesis and project (non-thesis) versions, with the option of a co-operative education program. It is intended that the overall level of student effort and performance required in each version will be comparable. The normal length of time to complete each option is 24 months.
3. The work for the thesis or project will be carried out under the guidance of a supervisor (or joint supervisors). The home department of the student will be the same as that of the Supervisor. Upon completion of the work for the thesis or project, each student is required to present a seminar suitable for the interdisciplinary audience of Scientific Computing program students.
4. All students are required to complete a minimum of 3 core courses (9 credit hours) selected from the list of **Core Courses** listing below. All students are also recommended to complete CMSC 6950. Additional courses are required in accordance with the program options as outlined below and will normally be selected from the student's discipline of specialization. The course requirements for each student are approved by the Program Chair on the recommendation of the student's supervisor(s), and should reflect the interdisciplinary nature of the program. Students are expected to attend research seminars in their home department as well as those relevant to Scientific Computing, when advertised.
  - a. The thesis option requires the completion of a minimum of four graduate courses (12 credit hours) numbered 6000 or higher, which must include three courses (9 credit hours) from the **Core Courses** listing below. Equivalent courses may be considered for substitution with approval of the Program Chair. The additional course(s) will normally be chosen from the **Additional Courses** listing below in the same discipline as the thesis work. The submission of an acceptable thesis is required. The thesis is to contain an original scholarly contribution which must be submitted to the School of Graduate Studies for final examination. The thesis must be written in a format according to procedures outlined in Guidelines for Theses and Reports by the School of Graduate Studies at [www.mun.ca/sgs/go/guid\\_policies/theses.php](http://www.mun.ca/sgs/go/guid_policies/theses.php).
  - b. The project option requires the completion of a minimum of eight graduate courses (24 credit hours) numbered 6000 or higher, which must include CMSC 6009 and at least three courses (9 credit hours) from the **Core Courses** listing below. Equivalent courses may be considered for substitution with approval of the Program Chair. The additional courses will normally be chosen from the **Additional Courses** listing below in the same discipline as the project work. An acceptable project report is also required that is based on research performed with the guidance of the student's supervisor. The project, which will include an in-depth written report, shall require the equivalent of at least one and no more than two semesters of full time work. The project report must be written in a format according to procedures outlined in Guidelines for Theses and Reports by the School of Graduate Studies at [www.mun.ca/sgs/go/guid\\_policies/theses.php](http://www.mun.ca/sgs/go/guid_policies/theses.php). The report will be evaluated by the student's supervisor, by the Chair of the Board of Study (or delegate), as well as by one other faculty member. Acceptance of a final version of the report (and a passing grade for CMSC 6009) requires the agreement of the three examiners.

### 24.21.5 Co-operative Education Option

1. A co-operative education option will be available to students who are accepted into the M.Sc. program. Students in this option may follow the thesis or non-thesis version of the program. It is expected to take up to 24 months to complete.
2. Students will normally declare their intention to complete the co-operative education option at the start of the second semester of their academic program.
3. Students will complete two work terms consecutively, normally following the successful completion of a minimum of four courses (12 credit hours).
4. The dates for starting and finishing each work term are shown in the **University Diary**.
5. A competition for work term employment is organized by Co-operative Education in cooperation with a designated faculty member from Scientific Computing. Students may also obtain their own work term jobs outside the competition. Such jobs must be confirmed by letter from the employer and approved by the Chair of Scientific Computing and by Co-operative Education on or before the first day of the work term. Work term jobs may be outside St. John's and possibly outside Newfoundland and Labrador. Students who do not wish to accept a work term job arranged by Co-operative Education shall be responsible for finding an acceptable alternative. By entering the competition, students give permission for Co-operative Education to supply their Memorial University of Newfoundland transcripts and resumes to potential employers.
6. Each work term placement will be supervised by the student's program supervisor, the on-site supervisor assigned by the employer and Co-operative Education. The overall evaluation of the work term is the responsibility of the program Supervisor, on-site Supervisor, and Co-operative Education. The work term shall consist of two components:
  - On-the-job Student Performance as evaluated by the on-site supervisor and Co-operative Education, in consultation with the program supervisor.
  - A Work Report graded by Co-operative Education and the program supervisor in consultation with the on-site supervisor.
7. Evaluation of the work term will result in the assignment of one of the following final grades:

- *Pass with Distinction*: Indicates OUTSTANDING PERFORMANCE in both the work report and work performance.
  - *Pass*: Indicates that PERFORMANCE MEETS EXPECTATIONS in both the work report and work performance.
  - *Fail*: Indicates FAILING PERFORMANCE in the work report and/or the work performance. If a student fails to achieve a final grade of Pass or Pass with Distinction, and provided the student has not failed to achieve a grade of 'B' or better in any program course, the student may request to repeat the work term component. The request will be considered by the Chair of Scientific Computing in consultation with the program supervisor and Co-operative Education. Only one repetition of a work term will be permitted in the student's program.
8. Following the completion of the two work terms, each student must complete any remaining course requirements and project report or thesis. Assuming that prior written authorization of the employer and the supervisory committee was obtained and submitted to the School of Graduate Studies, students may include material from the work terms in their reports or theses. For students following the non-thesis version of the program, the two work-term reports may be combined into a single, integrated report for this purpose. All other students must write a thesis on a research project which may be based on research completed during the work terms.
  9. Students who are accepted into the co-op option are not guaranteed placements. In the event that a student fails to obtain two semesters of placements, but successfully completes all other requirements of the Degree, he or she will still be eligible for graduation, but without the designation of a co-op degree.

## 24.21.6 Courses

### Core Courses

Computer Science 6731 Topics in Numerical Methods

Mathematics 6201 Numerical Methods for Partial Differential Equations

Mathematics 6210 Numerical Solutions of Differential Equations

Scientific Computing 6009 Master's Project

Scientific Computing 6910 Matrix Computations and Applications or Computer Science 6732 Matrix Computations (*credit may be obtained for only one of the CMSC 6910 and COMP 6732*)

Scientific Computing 6920 Applied Scientific Programming

Scientific Computing 6930 Algorithms for Distributed and Shared Memory Computers

Scientific Computing 6950 Computer Based Tools and Applications (*credit may be obtained for only one of CMSC 6950 and the former CMSC 6940*)

### Additional Courses

The following courses are identified as suitable for students in this program. Other courses may be permitted with the approval of the Program Chair.

### Biochemistry

6000-6009 Special Topics in Biochemistry

6010-6019 Special Topics in Nutrition and Metabolism

6020-6029 Special Topics in Food Science

6400 Control of Intermediary Metabolism

6460 Structural Biochemistry

6520 Nutritional Biochemistry

6530 Food Biochemistry

6590 Cellular, Molecular and Developmental Biology (*credit restricted with Biology 6590 and Medicine 6590*)

6630 Marine Biochemistry

6680 Processing and Quality of Foods

### Chemistry

6201 Bioinorganic Chemistry

6204 Mechanisms in Catalysis

6205 Photochemistry of Transition Metal Complexes

6210 Organometallic Chemistry

6300 Quantum Chemistry I

6301 Quantum Chemistry II

6302 Molecular Spectroscopy

6304 Computational Chemistry I

6310 Electronic Structure Theory

6323 Chemical Thermodynamics I

6324 Chemical Thermodynamics II

6340 Biophysical Chemistry

6350 Electrochemical Kinetics

6360 Solid State Chemistry

6380 Adsorption on Surfaces

6381 Surface and Interface Science

6382-6389 Selected Topics in Physical Chemistry

6390-6398 Selected Topics in Physical Chemistry

6399 Chemical Kinetics and Dynamics

6401 Organic Spectroscopic Analysis I

6402 Organic Spectroscopic Analysis II

6470 Physical Organic Chemistry

6590-6599 Selected Topics in Theoretical and Computational Chemistry

6600 Applications of Inorganic and Organometallic Chemistry to Toxicology

### Computer Science

6713 Software Engineering

6722 Advanced Computer Architectures

6728-6729 Special Topics in Computer Systems - Computer Networks

6731 Topics in Numerical Methods

6732 Matrix Computations

6738-6739 Special Topics in Numerical Methods

6752 Applications of Computer Graphics

6756 Digital Image Processing

**Earth Sciences**

6141 Rotation of the Earth  
 6142 Theory of Global Geodynamics  
 6171 Advanced Exploration Seismology  
 6172 Borehole Seismic  
 6175 Gravity and Magnetic Methods  
 6177 Mathematical Formulations of Seismic Wave Phenomena  
 6918 Airborne and Borehole Electromagnetic Methods  
 6994 Special Topics in Earth Sciences - Geophysical Inversion and Applications  
 7110 Physics of the Solid Earth  
 7120 Crustal Geophysics

**Engineering and Applied Science**

9015 Ocean Engineering Hydrodynamics  
 9052 Ice Properties and Mechanics  
 9501 Finite Element Analysis  
 9713 Stochastic Hydrology  
 9815 Electromagnetic Propagation  
 9821 Digital Signal Processing  
 9826 Advanced Control Systems  
 9861 High-Performance Computer Architecture  
 9865 Advanced Digital Systems  
 9869 Advanced Concurrent Programming  
 9871 Information Theory and Coding

**Mathematics and Statistics**

6112-6119 Special Topics in Applied Mathematics  
 6201 Numerical Methods for Partial Differential Equations  
 6210 Numerical Solution of Differential Equations (required course for Scientific Computing)  
 6212 Numerical Methods for Initial Value Problems  
 6588 Selected Topics in Statistics and Probability - Generalized Additive Models with Applications in Scientific Visualization

**Physics and Physical Oceanography**

6000 Condensed Matter Physics I  
 6200 Nonlinear Dynamics  
 6308 Ocean Dynamics I  
 6309 Ocean Dynamics II  
 6310 Physical Oceanography  
 6316 Ocean Measurements and Data Analysis  
 6317 Ocean Acoustics  
 6318 Numerical Modelling  
 6320 Turbulence  
 6321 Coastal Oceanography  
 6323 Stability Theory  
 6400 Statistical Mechanics  
 6402 Theory of Phase Transitions  
 6800 Group Theory  
 6850 Quantum Mechanics I

**Scientific Computing**

601W Work Term 1  
 602W Work Term 2  
 6910 Matrix Computations and Applications (*credit may be obtained for only one of CMSC 6910 and COMP 6732*)  
 6920 Applied Scientific Programming  
 6925 Tools of the Trade for Programming High Performance Computers (2 credit hours)  
 6930 Algorithms for Distributed and Shared Memory Computers  
 6950 Computer Based Tools and Applications (*credit may be obtained for only one of CMSC 6950 and the former CMSC 6940*)

## 25 Regulations Governing the Degree of Master of Science in Boreal Ecosystems and Agricultural Sciences

[www.grenfell.mun.ca/science](http://www.grenfell.mun.ca/science)

**Associate Professor and Head, Division of Science (Grenfell Campus)**

R. Gallant

The Degree of Master of Science in Boreal Ecosystems and Agricultural Sciences (M.Sc. (Boreal Ecosystems and Agricultural Sciences)) is offered by the Division of Science, Grenfell Campus to full-time and part-time students in Boreal Ecosystems and Agriculture research areas focussed on, but not exclusively to, Economics and Social Science, Plant Sciences, Soil and Land Resource, and Water Resources

### 25.1 Qualifications for Admission

To be considered for admission, applicants shall hold a Bachelor's (Honours) degree normally in Science, Agriculture, Forestry, Engineering, Geography, or Environmental Science with at least second class standing, or equivalent, from an institution recognized by the Senate or shall have qualifications and/or experience in environmental science acceptable to the Dean of Graduate Studies and the Grenfell Campus graduate committee. The Grenfell Campus graduate committee makes recommendations on admission to the Dean of Graduate Studies for this program.

Admission is limited and competitive, and will follow the general qualifications for admission to Masters Programs at Memorial University of Newfoundland as set out under **General Regulations, Qualifications for Admission** of the School of Graduate Studies. All applicants found academically acceptable to the Master of Science in Boreal Ecosystems and Agricultural Sciences program are required to have a faculty supervisor before final acceptance can be offered.

As well, applicants are required to demonstrate English proficiency by submission of a minimum score in TOEFL, IELTS, or another

acceptable language test, in accordance with **General Regulation, Qualifications for Admission, English Language Proficiency Requirements** of the School of Graduate Studies.

## 25.2 Program of Study and Research

1. The program of study for the Master of Science in Boreal Ecosystems and Agricultural Sciences degree shall consist of the successful completion of a program of courses and a thesis embodying original research.
2. Every candidate shall successfully complete at least 12 credit hours as outlined under **Program Requirements** below. Undergraduate courses at the fourth year level may be required at the recommendation of the supervisory committee; these courses do not count against the required graduate credit requirements but are necessary for graduation.
3. Every candidate shall submit a thesis, as outlined under **General Regulations, Theses and Reports**, on an approved subject in which systematic research has been conducted under the direction of the Supervisor recommended by the academic unit concerned and approved by the Divisional Head.
4. In addition to courses and thesis research, it is a requirement that all graduate students of this program must participate in Grenfell campus-wide graduate student seminars. This is graded by supervisor(s) for participation as satisfactory/unsatisfactory; a satisfactory evaluation is required for graduation.

## 25.3 Program Requirements

1. Students admitted to the program must complete a research thesis under the supervision of a faculty member or members, and a minimum of four courses (12 credit hours) as determined by the thesis supervisor. Three courses are selected from four core courses. A fourth course can be selected from a list of optional courses.
2. All students must complete three core courses:
  - BEAS 6000 - Issues in Boreal Ecosystems and Agricultural Sciences (3 credit hours). This course will initially be offered during the Fall semester.
  - BEAS 600A/B - Graduate Research Seminar (3 credit hours). Students will normally register for BEAS 600A in the Fall semester and BEAS 600B in the following Winter semester. A grade of NC (No Grade Expected) will be assigned to BEAS 600A.
3. Students must also complete one of the two following courses: BEAS 6002 - Advanced Quantitative Research Methods for the Natural Sciences or BEAS 6003 - Advanced Quantitative Research Methods for the Social Sciences (3 credit hours)
4. A further 3 credit hours will be accumulated in elective courses related to the student's research area. Students should view **Table 1 Research Areas and Sample Elective Courses** for suggestions.

**Table 1 Research Areas and Sample Elective Courses**

<b>Economics &amp; Social Science</b>	<b>Plant Science</b>	<b>Soil and Land Resource</b>	<b>Water Resources</b>
BEAS 6010 Agriculture and Forestry Economics	BEAS 6020 Management of Crop Nutrition BEAS 6021 Organic Farming for Sustainable Agriculture BEAS 6022 Plant Biochemistry BEAS 6023 Plant Physiology	BEAS 6030 Chemical Speciation Modeling for Environmental Matrices BEAS 6031 Soil Functions: Soil as a Bioreactor BEAS 6032 Environmental Soil Physics BEAS 6033 Soil and Water Conservation	BEAS 6040 Advanced Groundwater Management BEAS 6041 Applied Hydrology BEAS 6042 Soil and Groundwater Remediation

## 25.4 Evaluation

1. In order to continue in the School of Graduate Studies and in order to qualify for a Master's Degree, a candidate shall obtain an A or B grade in each program course as outlined under **General Regulations, Evaluation, Evaluation of Graduate Students**.
2. When it has been determined, on the basis of consultation with the candidate, the instructors in graduate courses, and the thesis Supervisor, that a candidate's work has fallen below a satisfactory level, the Supervisor or the Head of the appropriate academic unit may recommend to the Divisional Head that such a candidate be required to withdraw from the program as outlined under **General Regulations, Evaluation, Evaluation of Graduate Students**.

## 25.5 Courses

BEAS 6000 Issues in Boreal Ecosystems and Agricultural Sciences  
 BEAS 600A/B Graduate Research Seminar  
 BEAS 6002 Advanced Quantitative Research Methods for the Natural Sciences  
 BEAS 6003 Advanced Quantitative Research Methods for the Social Sciences  
 BEAS 6010 Agriculture and Forestry Economics  
 BEAS 6020 Management of Crop Nutrition  
 BEAS 6021 Organic Farming for Sustainable Agriculture  
 BEAS 6022 Plant Biochemistry  
 BEAS 6023 Plant Physiology  
 BEAS 6030 Chemical Speciation Modeling for Environmental Matrices  
 BEAS 6031 Soil Functions Soil as a Bioreactor  
 BEAS 6032 Environmental Soil Physics  
 BEAS 6033 Soil and Water Conservation  
 BEAS 6040 Advanced Groundwater Management  
 BEAS 6041 Applied Hydrology  
 BEAS 6042 Soil and Groundwater Remediation  
 BEAS 6050-6150 Special topics in Boreal Ecosystems and Agricultural Sciences

## 26 Regulations Governing the Degree of Master of Science in Kinesiology

www.mun.ca/hkr

**Professor and Dean**

H. Carnahan

The Degree of Master of Science in Kinesiology (M.Sc. (Kinesiology)) is offered to qualified full-time and part-time students by the School of Human Kinetics and Recreation. The **General Regulations** of the School of Graduate Studies of Memorial University of Newfoundland outlined in the current Calendar, and the Degree Regulations of the School of Human Kinetics and Recreation outlined below will apply to the Master of Science in Kinesiology program.

### 26.1 Qualifications for Admission

1. The admission requirements for the Master of Science in Kinesiology are as given under the **General Regulations** of the School of Graduate Studies. Admission is limited and competitive. Preference for admission may be given to students with undergraduate degrees in relevant disciplines, with a minimum overall B average. Applications submitted through the School of Graduate Studies will be evaluated by the Graduate Studies Committee of the School of Human Kinetics and Recreation. Admission of a candidate to the program shall be made by the Dean of Graduate Studies.
2. Only in exceptional circumstances, and only on the recommendation of the Dean of the School of Human Kinetics and Recreation, shall the Dean of Graduate Studies consider applicants who do not meet the requirements above.

### 26.2 Program and Degree Requirements

1. The Degree of Master of Science in Kinesiology is offered in the areas of Biomechanics/Ergonomics, Exercise and Work Physiology, Psychology of Sport, Exercise and Recreation, and Socio-cultural Studies of Physical Activity and Health.
2. The program of a candidate for the Master of Science in Kinesiology shall be the responsibility of the Supervisory Committee, composed of the Supervisor and at least one other faculty member recommended with the concurrence of the Supervisor by the Dean of the School, or delegate.
3. Candidates for the Master of Science in Kinesiology shall be required to complete a minimum of 12 credit hours plus a thesis. Either HKR 6000 or HKR 6001 is normally required for all candidates. In addition, all on-campus candidates shall be required to complete four semester-length seminars represented by registration and successful completion of HKR 6314 (a non-credit, repeatable course) in each of four semesters during their tenure in the program. Off-campus or part-time candidates who cannot attend the on-campus seminar series can substitute 24 hours of participation in (over their two-year tenure) and one presentation at national, provincial or regional conferences, workshops, professional development seminars, or equivalent activities. The remaining course requirements will be selected, in agreement with the Supervisory Committee, to reflect the kinesiology areas of specializations offered with the School.
4. It is the responsibility of the student to arrange regular meetings with their supervisory committee. An annual report, prepared by the Supervisor and signed by all members of the Supervisory Committee and the student, is submitted to the Dean of the School of Human Kinetics and Recreation (or delegate) as required by the School of Graduate Studies.
5. Depending on the background of the candidate or his/her area of intended specialization, a candidate's program may be modified. Such modifications may include a reduction in course requirements where a student demonstrates that he or she brings graduate level competency to their program in specific areas, or may include additional graduate or undergraduate courses, as specified by the student's Supervisory Committee. A minimum of three courses or 9 credit hours completed in the School of Human Kinetics and Recreation is mandatory.
6. A student completing a Master of Science in Kinesiology will be required to present a thesis proposal for his or her proposed thesis normally by the end of the third semester of study. The thesis proposal shall normally consist of a full written proposal (including literature review) submitted to the Supervisory Committee, a summary to be distributed to graduate students and faculty one week prior to the presentation and a formal presentation normally at the seminar series. The candidate may be questioned on his/her proposal by the Supervisory Committee and seminar audience. Any deficiencies noted during the presentation should be carefully considered by the student and the Supervisory Committee prior to proceeding with the thesis.
7. All graduate students are expected to attend and participate in the School of Human Kinetics and Recreation seminars and thesis proposal presentations.
8. In conjunction and collaboration with other Faculties and Schools of Memorial University of Newfoundland, students may pursue their special interests through electives from departments/schools outside the School of Human Kinetics and Recreation. These courses must be approved by the Graduate Studies Committee and the Dean of Graduate Studies in the preceding semester.
9. Candidates may apply for transfer course credits. All course transfers require the approval of the Dean of Graduate Studies, on the recommendation of the Dean of the School of Human Kinetics and Recreation, and are subject to General Regulation **Program Requirements, Transfer of Course Credits** of the School of Graduate Studies.

### 26.3 Evaluation

1. In order to continue as a candidate for a Master of Science in Kinesiology Degree, a candidate who receives a final grade of 'C' or less in a program course must repeat that course and obtain a minimum grade of 'B'. In the case of an elective course a suitable replacement course, acceptable to the Graduate Studies Committee of the School of Human Kinetics and Recreation, may be substituted for the failed course. Only one such repetition/replacement shall be permitted in the candidate's graduate program. Should a grade of lower than 'B' be obtained in the repeated course/replacement course, or any other program course, the candidate shall be required to withdraw from the program.
2. When the Graduate Studies Committee of the School of Human Kinetics and Recreation has determined, through consultation with the candidate, the instructors of graduate courses and the program advisor or thesis Supervisor that the candidate's work has fallen below satisfactory level, it may request that the Dean of the School of Human Kinetics and Recreation recommend to the Dean of Graduate Studies that the candidate's program be terminated.

### 26.4 Period of Study

The period of study for a graduate program shall not normally exceed seven years beyond first registration.

1. A candidate in full-time attendance may register for a maximum of 12 credit hours in any regular semester and a maximum of 6

credit hours in intersession or summer session.

2. A candidate in part-time attendance may register for a maximum of 3 credit hours in any semester, including intersession or summer session.

## 26.5 Thesis

The School of Graduate Studies General Regulation describes the requirements in **Theses and Reports**.

## 26.6 Courses

6000 Quantitative Methods in Physical Education  
 6001 Qualitative Research Methods in Physical Education  
 6003 Physical Education, Culture and Society  
 6111 Canadian Delivery Systems in Physical Education, Recreation and Sport  
 6120 Curriculum Development in Physical Education  
 6121 Physical Education Leadership  
 6122 Comprehensive School Health  
 6123 Coaching and Long-term Athlete Development  
 6124 Adapted Physical Activity for Persons with Physical and Intellectual Disabilities  
 6130 Computer Applications in Physical Education  
 6201 Foundations of Sport Psychology and Mental Training Techniques  
 6202 Intervention and Enhancement Techniques in Mental Training Consultation  
 6203 Sport Psychology Consulting  
 6310 Exercise Physiology I  
 6314 Graduate Seminar Series (repeatable, non-credit)  
 6320 Exercise Physiology II  
 6330 The Application and Implementation of Kinesiology Technologies  
 6340 Occupational Biomechanics  
 6350 Human Error in Complex Work Systems  
 6360 Knowledge Translation: Applications to Ergonomics and Occupational Health and Safety  
 6370 Movement and Neural Science  
 6410 Sport and Society  
 6500 Introduction to Research in Physical Education  
 6710-6719: Individual Reading and Research in Special Areas of Exercise and Work Physiology  
 6720-6729: Individual Reading and Research in Special Areas of Biomechanics and Ergonomics  
 6730-6739: Individual Reading and Research in Special Areas of Psychology of Sport, Exercise and Leisure

## 27 Regulations Governing the Degree of Master of Science in Management

[www.business.mun.ca](http://www.business.mun.ca)

**Professor and Dean**

W. Zerbe

The Degree of Master of Science in Management is a research-focused Master's degree offered by the Faculty of Business Administration. The Degree is offered to full-time students in five areas in management: (1) **General Management**; (2) **Human Resources Management**; (3) **Information Management**; (4) **Operations Management**; and (5) **Organizational Behaviour**. These regulations must be read in conjunction the **General Regulations** of the School of Graduate Studies of Memorial University of Newfoundland.

### 27.1 Qualifications for Admission

Admission is limited and competitive. General qualifications for admission to Masters Programs at Memorial University of Newfoundland are set out under **General Regulations, Qualifications for Admission**. In addition, the following admission requirements will apply:

1. A Graduate Management Admissions Test (GMAT) score of at least 600. A Graduate Records Examinations (GRE) score of at least 310 will be accepted in lieu of GMAT scores.
2. An applicant who did not complete a four-year baccalaureate degree at a recognized university where English is the primary language of instruction must normally complete either the:
  - a. Test of English as a Foreign Language (TOEFL) and achieve a paper-based score of 580 or higher, computer-based score of 237 or higher, or Internet-based score of 92-93 or higher; or
  - b. International English Language Testing System (IELTS) and achieve a score of 7 or higher.

### 27.2 General Program Requirements

1. The program of study for the Master of Science in Management Degree is the responsibility of the Supervisor.
2. It is the responsibility of the Supervisor to meet regularly (at least annually) with the student and to provide guidance at all stages of the candidate's program. An annual report prepared by the Supervisor and signed by the student and the Supervisor is required to be submitted to the Director of the Master of Science in Management Program (Faculty of Business Administration).
3. Course requirements are set by each of the program areas and are described under **Program Areas** below.
4. In addition to courses and research, graduate students are expected to participate in Faculty of Business Administration seminars.
5. The Master of Science in Management program requires the successful completion of a written thesis. See School of Graduate Studies **General Regulations, Thesis and Reports** regarding thesis examination.

### 27.3 Program Areas

Program areas are available in **General Management, Human Resources Management, Information Management, Operations Management, and Organizational Behaviour**. The program requirements for each program area are outlined below:

### 27.3.1 General Management Program Requirements

Business 9901; Business 9923; Business 9927; one of Business 8103, Business 9903 or Business 9904; two electives chosen from any other graduate course(s) approved by the student's supervisor.

### 27.3.2 Human Resources Management Program Requirements

Business 9901; Business 9921; Business 9925; one of Business 8103, Business 9903 or Business 9904; two electives chosen from other graduate course(s) approved by the student's supervisor.

### 27.3.3 Information Management Program Requirements

Business 9901; Business 9911; Business 9918; one of Business 8103, Business 9902, Business 9903 or Business 9904; one of Business 9913 or Business 9915; one other graduate course approved by the student's supervisor.

### 27.3.4 Operation Management Program Requirements

Business 9901; Business 9910; Business 9914; Business 9917; one of Business 8103, Business 9902, Business 9903 or Business 9904; one other graduate course approved by the student's supervisor.

### 27.3.5 Organizational Behavior Program Requirements

Business 9901; Business 9920; Business 9924; one of Business 8103, Business 9903 or Business 9904; two electives chosen from other graduate course(s) approved by the student's supervisor.

## 27.4 Courses

8103 Statistical Applications in Management  
9901 Approaches to Management Research  
9902 Modeling Methods in Management Research (*prerequisite: 9901*)  
9903 Quantitative Methods in Management Research (*prerequisite: 9901*)  
9904 Qualitative Methods in Management Research (*prerequisite: 9901*)  
9910 Optimization  
9911 Data and Process Models in Information Systems Development  
9913 Human-Computer Interaction and Decision Support Systems  
9914 Supply Chains: Models and Management  
9915 Electronic Commerce  
9917 Special Topics in Operations Management  
9918 Special Topics in Information Systems  
9920 Foundations in Organizational Behaviour  
9921 Foundations in Human Resource Management  
9923 Foundations in Organization Theory  
9924 Current Issues in Organizational Behaviour  
9925 Current Issues in Human Resource Management  
9927 Current Issues in Organization Theory

## 28 Regulations Governing the Degree of Master of Science in Medicine

www.med.mun.ca

### Professor and Dean

J. Rourke

The Faculty of Medicine offers the degree of Master of Science in Medicine in eight program areas: Applied Health Services Research, Cancer and Development, Cardiovascular and Renal Sciences, Clinical Epidemiology, Community Health, Human Genetics, Immunology and Infectious Diseases, and Neurosciences. The Faculty of Medicine also offers the degrees of Master of Health Ethics and Master of Public Health. Each program area has a Co-ordinator/Principal who is responsible for communicating the interests of the programs to the Faculty of Medicine Graduate Studies Committee and participates in the admission of graduate students into the program in Medicine.

The Degree of Master of Science in Medicine (in all of the programs excluding the Applied Health Services Research Program) is offered in the Faculty of Medicine to full-time and part-time students. The Applied Health Services Research program is offered by full-time study only. The graduate diploma programs in Community Health and Clinical Epidemiology are offered to full-time and part-time students.

The following regulations will apply in conjunction with the **General Regulations** of the School of Graduate Studies.

### 28.1 Master of Science in Medicine

#### 28.1.1 Qualification for Admission

The admission requirements for each of the M.Sc. program areas in Medicine are described under Programs of Study.

#### 28.1.2 General Program Requirements

1. The program of study for the M.Sc. in Medicine Degree is the responsibility of the Supervisory Committee composed of a Supervisor and at least two other faculty members.
2. It is the responsibility of the supervisory committee to meet regularly (at least annually) with the student and to provide guidance at all stages of the candidate's program. An annual report prepared by the Supervisor and signed by the student and all members of the committee is required to be submitted to the Assistant Dean of Research and Graduate Studies (Medicine).
3. Course requirements are set by each of the program areas and are described under **Programs of Study**.
4. In addition to courses and research, graduate students are expected to participate in Faculty of Medicine seminars and journal clubs.
5. The M.Sc. in Medicine requires the successful completion of a research project and a written thesis.

## 28.1.3 Program Areas

### 28.1.3.1 Applied Health Services Research

The Applied Health Services Research program is jointly offered by the University of New Brunswick (UNB), Memorial University of Newfoundland (MUN), and the University of Prince Edward Island (UPEI). Students will be educated in an interdisciplinary environment and will develop a substantive understanding of: the Canadian health system, the conduct of ethical research, critical appraisal, appropriateness of research design for particular policy questions and determinants of health models. They will also gain first-hand exposure in a decision-making/policy environment and learn how to conduct research through completion of a thesis. Access to specific computer software and the Internet is required and will be the responsibility of each student.

#### 1. Administration

- An Advisory Board, consisting of the Deans of Graduate Studies, the Principals from each site, plus student representation as well as health care decision makers and stakeholders from the Atlantic Region will oversee the academic program across the Universities and ensure program integrity.
- A Program Management Committee, consisting of the Principals from UNB, Memorial University of Newfoundland, and UPEI will oversee the operation of the program.
- At Memorial University of Newfoundland, the program shall be administered through the Office of Research and Graduate Studies (Faculty of Medicine) by a Principal who shall be appointed by the Dean of Graduate Studies on the recommendation of the Dean, Faculty of Medicine.

#### 2. Qualifications for Admission

- Admission is limited and competitive. To be considered for admission to the program, an applicant shall normally have a bachelor's degree with a minimum 75% average (or equivalent) from an institution recognized by the Senate. Normally, students should have completed an undergraduate course in statistics.
- Students are normally admitted to the Fall semester (September). The deadline for receipt of applications is March 1. Late applications will only be considered if admissions decisions have not yet been made.

#### 3. Program Requirements

- All students will be required to successfully complete seven core courses, a four-month residency placement and a thesis. In addition, candidates must participate in five conference workshops.
- Prior to submission of the thesis to the School of Graduate Studies for examination (see **General Regulation Thesis and Reports**), candidates shall present an open seminar.
- Outline of program of study:

#### Outline of Program of Study

Term	Required Courses
<b>Semester 1</b> Fall	<b>Workshop 1</b> Theme: Orientation to first year MED 6282 MED 6284 MED 6286 <b>Workshop 2</b> Theme: Research Issues and Critical Appraisal
<b>Semester 2</b> Winter	MED 6288 MED 6290 <b>Workshop 3</b> Theme: Policy and Decision Making
<b>Semester 3</b> Spring	Residency Placement: All candidates are required to complete a 16-week residency placement. The residency placement is negotiated by the Principal in consultation with the student and governed by the agreements outlined in the Atlantic Regional Training Centre residency manual. <b>Workshop 4</b> Theme: Orientation to second year
<b>Semester 4</b> Fall	MED 6293 MED 6294 or MED 6295 <b>Workshop 5</b> Theme: Communication and Dissemination
<b>Semester 5 &amp; 6</b> Winter & Spring	Thesis, including public presentation

### 28.1.3.2 Cancer and Development

The graduate program in Cancer and Development offers study in fundamental cell and molecular biological areas including viral oncogenesis, growth factors, and oncogenes in developmental models, programmed cell death and drug resistance.

#### 1. Qualifications for Admission

The admission requirements are as given under the **General Regulations** governing Master's degrees. All courses in the program have as a prerequisite, successful completion of an advanced, upper-level biochemistry, biology or medical course, with an emphasis on molecular biology or medicine.

#### 2. Program Requirements

All students are required to attend, for credit, and participate in the Cancer and Development Journal Club (Cancer, Seminars, MED 6400, 6401, 6402, 6403). One other graduate course (chosen from MED 6580, 6590, 6591, 6340, 6341, or 6342) is required for M.Sc. Medicine students although other courses may be required in individual cases.

### 28.1.3.3 Cardiovascular and Renal Science

The graduate program in Cardiovascular and Renal Sciences enables students to pursue research and academic studies in selected topics including hypertension and stroke, neural and endothelial control of vasculature and blood pressure as well as physiological mechanisms promoting heart failure.

#### 1. Qualifications for Admission

The admission requirements are as given under the **General Regulations** governing Master's degrees.

#### 2. Program Requirements

Students will be required to take a minimum of two graduate courses. Basic Cardiovascular and Renal Physiology (MED 6140) is required and must be taken within 1.5 years after entry into the program. Students will choose a second course from MED 6141, 6142, 6143, 6144, or 6194 or any other graduate course approved by the student's supervisory committee.

### 28.1.3.4 Clinical Epidemiology

The program in Clinical Epidemiology is aimed at university graduates intending a career in health services, faculty members seeking advanced training in clinical epidemiology, medical doctors and other health care professionals interested in health research.

#### 1. Qualifications for Admission

The admission requirements are as given under the **General Regulations** governing Master's degrees. In exceptional circumstances, a professional equivalent qualification will be considered for admission.

#### 2. Program Requirements

- a. Students are required to take: MED 6262, MED 6250, MED 6255, or MED 6260, plus a minimum of one elective. Electives are normally chosen from MED 6095, MED 6263 and MED 6265 as recommended by the supervisory committee and approved by the Director or Coordinator. In addition students are required to take the Seminar Series (MED 6400, 6401, 6402 and 6403). MED 6250 and MED 6262 are normally completed in the Fall semester. MED 6255 and MED 6260 are normally completed in the Winter semester.
- b. Students are expected to give an oral presentation or course lecture in each year of their program.

### 28.1.3.5 Community Health

The graduate program in Community Health enables students to pursue research and academic studies in selected topics including community health, epidemiology, socio-behavioural health, biostatistics, health services utilization, health policy, and health promotion.

#### 1. Qualifications for Admission

The admission requirements are as given under the **General Regulations** governing Master's degrees. In exceptional circumstances, a professional equivalent qualification will be considered. Students are expected to have successfully completed at least one basic university-level statistics course.

#### 2. Program Requirements

Students are required to take three core courses: MED 6220, MED 6270, and MED 6280; 2 core stream courses: either the quantitative stream, consisting of MED 6200 and MED 6275 or the qualitative stream, consisting of MED 6294 and MED 6102; and 1 elective; and to attend, for credit, and participate in four semester-length seminar courses (MED 6400-6403).

Graduate students of the Division of Community Health and Humanities may be required to participate in education experiences which occur outside of the St. John's metropolitan area. Students may be responsible for their own associated transportation and accommodation.

### 28.1.3.6 Human Genetics

The graduate program in human genetics will enable students to pursue academic studies and research in a number of areas of genetics including molecular genetics, genomics, genetics of complex traits, genetic epidemiology, gene mapping, medical genetics, birth defects, and population genetics. Faculty members from all three divisions of the Faculty of Medicine (BioMedical Sciences, Community Health and Humanities, and the Clinical Disciplines) participate in the program.

#### 1. Qualifications for Admission

The admission requirements are as given under the General Regulations governing Master's degrees. Applicants with backgrounds in the fields of genetics, biochemistry and biology are preferred.

#### 2. Program Requirements

- a. Students will be required to complete a minimum of two graduate courses. Within the Human Genetics program the following courses are offered: Human Molecular Genetics (MED 6393), Human Population Genetics (MED 6390), Applied Human Genetics (MED 6392), Cancer Genetics (MED 6394), Genetic Epidemiology (MED 6395) and Selected Topics in Human Genetics (MED 6391). In addition, there are a number of courses in other graduate programs which could be suitable for some students in this program, including Epidemiology I (MED 6270), Molecular Biology of Cancer (MED 6580), Molecular Biology I (MED 6590) and Molecular Biology II (MED 6591). Course selection for each student is determined by the supervisory committee in consultation with the student and is based on the area of study and past course credits.
- b. Students must also participate in the Genetics Seminar Series (MED 6400, 6401, 6402, 6403) and are expected to participate in other Discipline of Genetics activities including an annual graduate student research forum.

### 28.1.3.7 Immunology and Infectious Diseases

The Immunology and Infectious Diseases group has an interdisciplinary character and consists of faculty from biomedical science oncology research. The graduate programs are designed to provide individualized training oriented towards basic research and a solid and scientific background in the discipline of immunology and infectious diseases.

#### 1. Qualifications for Admission

The admission requirements are as given under the General Regulations governing Master's degrees. A Bachelor of Science Degree or equivalent is required.

#### 2. Program Requirements

Students in the program are required to take a minimum of two courses. MED 6127 is required and the students will choose a second course from: MED 6119, MED 6128, MED 6580 or any other graduate course approved by the student's supervisory committee. Some students may be required to take additional courses depending upon their thesis topic. All students are required to attend, for credit, and participate in the Immunology and Infectious Diseases Seminar Series (MED 6400-6403).

### 28.1.3.8 Neurosciences

The Neuroscience Program offers graduate studies in an interdisciplinary setting including faculty from biomedical science within the Faculty of Medicine. Graduate students may pursue research in a number of specialty areas including the physiological basis of learning and memory, stroke and neuroplasticity, neuroregeneration, signal transduction mechanisms, neuronal circuitry, neuroimmunology, and membrane physiology.

#### 1. Qualifications for Admission

The admission requirements are as given under the General Regulations governing Master's degrees. It is expected that the students will have had courses in biochemistry, biology and/or psychology with some exposure to basic university-level statistics.

#### 2. Program Requirements

- Students in the program are required to take Systems Neuroscience (MED 6196) and one other graduate level course. Additional courses may be required based on the recommendation of the supervisory committee.
- Students are expected to attend and participate in the activities of the neuroscience group including the weekly seminar and journal club.

## 28.2 Graduate Diploma

The Faculty of Medicine offers a Graduate Diploma providing an opportunity for professionals and individuals within the health sector to obtain or upgrade their training in Community Health or Clinical Epidemiology.

### 28.2.1 Qualifications for Admission

To be admitted into the respective graduate diploma program a student must be eligible to register as a graduate student, as described under **General Regulations, Graduate Diploma Programs**. In special circumstances, and upon the recommendation of the Associate Dean of Community Health and Humanities, or Director of Clinical Epidemiology, for their respective program, a suitable combination of training and professional experience relevant to that program may be acceptable for admission.

### 28.2.2 Program Requirements

#### 1. Community Health and Humanities

A graduate diploma in Community Health requires successful completion of MED 6220, MED 6270, 3 electives, and 2 semester-length seminar courses (MED 6400-6401).

#### 2. Clinical Epidemiology

A graduate diploma in Clinical Epidemiology requires successful completion of MED 6262, 6250, and 6255 and the completion of two of the Clinical Epidemiology seminar courses: MED 6400 and 6401. Students are expected to give an oral presentation in the seminar series.

### 28.2.3 Graduate Courses

6070 Seminars in Physiological Instrumentation  
 6075 Human Physiology, Performance and Safety in Extreme Environments (HSPE)  
 6090-6101 Special Topics  
 6102 Critical Theory in Health and Society  
 6103-6119 Special Topics  
 6127 Immunology I  
 6128 Immunology II (*prerequisite: Medicine 6127*)  
 613A/B Advanced Immunological Methods (*same as the former 6130*)  
 6131-6139 Special Topics  
 6140 Basic Cardiovascular and Renal Physiology  
 6141 Cardiovascular/Renal Techniques  
 6142 Selected Topics in Cardiovascular and Renal Physiology  
 6143 Cardiovascular Anatomy  
 6144 Current Concepts in Cardiovascular and Renal Pathophysiology  
 6180 Structure, Function and Pharmacology of Muscle  
 6190 General Pharmacology  
 6192 Pharmacology of Receptors and Receptor Effector Coupling Processes  
 6193 Advanced Topics in Neuroscience  
 6194 Advanced Topics in Physiology  
 6195 Neurobiology of Nervous System Diseases  
 6196 Systems Neuroscience  
 6197 Cellular Neuroscience  
 6198 Neuroanatomy for Graduate Students (accelerated format)  
 6199 Health Sciences: Writing and Grantsmanship  
 6200 Biostatistics I (*credit may be obtained for only one of MED 6200 or MED 6262*)  
 6220 Introduction to Community Health  
 6225 Health Inequities and the Social Determinants of Health  
 6250 Basic Clinical Epidemiology  
 6255 Clinical Research Design  
 6260 Applied Data Analysis for Clinical Epidemiology  
 6262 Biostatistics in Clinical Medicine (*credit may be obtained for only one of MED 6200 or MED 6262*)  
 6263 Conducting and Publishing Systematic Review and Meta-analysis  
 6265 Genetics and Clinical Epidemiology  
 6270 Epidemiology I  
 6274 Chronic Disease Epidemiology  
 6275 Epidemiology II  
 6276 Current Topics in Canada's Health Care System  
 6277 Issues in Northern, Rural and Remote Health in Canada  
 6278 Advanced Biostatistics for Health Research  
 6279 Quantitative Methods for Applied Health Research  
 6280 Community Health Research Methods

6281 Theory and Approaches to Medical Publication  
 6282 Canadian Health Care System  
 6284 Research and Evaluation Design and Methods  
 6286 Ethical Foundations of Applied Health Research  
 6288 Policy and Decision Making  
 6290 Determinants of Health: Healthy Public Policy  
 6292 Qualitative and Quantitative Methods for Health Services Research  
 6293 Knowledge Transfer and Research Uptake  
 6294 Advanced Qualitative Methods  
 6295 Advanced Quantitative Methods  
 6296 Residency  
 6297 Theories of Social Justice in Health  
 6340 Research Topics in Cancer I  
 6341 Research Topics in Cancer II  
 6342 Basic Principles of the Pathology of Cancer  
 6390 Human Population Genetics  
 6391 Selected Topics in Human Genetics  
 6392 Applied Human Genetics  
 6393 Human Molecular Genetics  
 6394 Cancer Genetics  
 6395 Genetic Epidemiology  
 6400 Research Seminars for M.Sc. Students I (one-credit hour)  
 6401 Research Seminars for M.Sc. Students II (one-credit hour)  
 6402 Research Seminars for M.Sc. Students III (one-credit hour)  
 6403 Research Seminars for M.Sc. Students IV (one-credit hour)  
 6410 Research Seminars for Ph.D. Students I (one-credit hour)  
 6411 Research Seminars for Ph.D. Students II (one-credit hour)  
 6412 Research Seminars for Ph.D. Students III (one-credit hour)  
 6413 Research Seminars for Ph.D. Students IV (one-credit hour)  
 6420 Medical Science/Social Responsibility in Health Care: Aspects of Medical History (*same as History 6125*)  
 6580 Molecular Biology of Cancer (*prerequisites: Biology 4241, Biochemistry 4100 [or equivalent]*)  
 6590 Molecular Biology I (*cross-listed as Biology 6590 and credit-restricted with Biochemistry 6590 prerequisites: Biology 4241 (or equivalent)*)  
 6591 Molecular Biology II (*cross-listed as Biology 6591 and credit-restricted with the former Biochemistry 6591 prerequisites: Biology 4241 (or equivalent)*)  
 6900 Medical Geography I - Introduction to Geographic Information Science and Spatial Analysis in Health  
 6901 Medical Geography II - Geospatial Analysis and Modelling in Health *prerequisite: 6900*

## 29 Regulations Governing the Degree of Master of Science in Pharmacy

[www.mun.ca/pharmacy](http://www.mun.ca/pharmacy)

### Dean

to be determined

The Degree of Master of Science in Pharmacy (M.Sc. (Pharm.)) is offered to qualified full-time and part-time students by the School of Pharmacy. The **General Regulations** of the School of Graduate Studies of Memorial University of Newfoundland outlined in the current Calendar, and the Degree Regulations of the School of Pharmacy outlined below will apply to the M.Sc. (Pharm.) program. Every candidate in graduate studies shall comply with the **General Regulations**, the Degree Regulations, and all additional requirements of the School of Pharmacy.

### 29.1 Qualifications for Admission

Admission to the M.Sc. (Pharm.) program will be offered on the basis of academic excellence. The basic requirements for admission are those established by the School of Graduate Studies of Memorial University of Newfoundland. The minimum qualification for admission is a recognized four-year undergraduate degree in Pharmacy, or a recognized four-year undergraduate degree in physical, chemical or biological science, or equivalent, with an overall B average.

Applications submitted through the School of Graduate Studies will be evaluated by the Graduate Studies Committee of the School of Pharmacy. No candidate will be admitted to the program without a recommendation of acceptance by the Graduate Studies Committee. Admission of a candidate to the M.Sc. (Pharm.) program shall be made by the Dean of Graduate Studies.

### 29.2 Formulation of Program of Study

Upon acceptance to the program, the Supervisor will assess the student's research interests, background, strengths, and weaknesses. The Supervisor will formulate a program of study (see below) and select a supervisory committee for the student. The program of study will be selected on the basis of the thesis research, the background of the student, and the perceived need for specific graduate courses that will complement the student's working knowledge in his/her area of research. The supervisory committee will include the Supervisor, one other academic staff person from the School of Pharmacy, and one external academic staff person from Memorial University of Newfoundland. This committee will advise the student about his/her thesis research. Accordingly, they will meet with the student within two months of his/her initial registration, at the end of the second semester (8th month of study), at the end of the fourth semester (16th month), and immediately before the student begins to write the thesis. Both the program of study and the supervisory committee must be approved by the Graduate Studies Committee.

### 29.3 Program of Study

1. Minimum requirements for the M.Sc. (Pharm.) Degree will be the successful completion of:
  - a. Six credit hours in program graduate courses chosen from those available in Pharmacy, Medicine, or Biochemistry.
  - b. Pharmacy Seminar
  - c. A thesis embodying original research

- Graduate courses will be chosen based on the academic background of the student and the area of his/her thesis research.

Note: *Qualified students accepted into the program who are considered to have an insufficient background for their thesis research may be required to successfully complete additional courses as selected by their Supervisor.*

- Pharmacy Seminar: All candidates for the Degree of M.Sc. (Pharm.) will be required to participate in the Pharmacy Seminar during the first two years of their program. Selected topics in pharmaceutical sciences will be presented and discussed by faculty, students and visiting speakers. Graduate students will be required to present one seminar each year. In the second year of study, the graduate student will present a progress report of his/her research in the seminar. Upon successful completion of the seminar the Chair of the Graduate Studies Committee will so notify the Dean of Graduate Studies.

## 29.4 M.Sc. (Pharm.) Thesis

Every candidate shall submit a thesis to the School of Graduate Studies. The thesis shall contain original research conducted by the candidate and approved by the supervisory committee.

In preparation for the thesis examination, the candidate will provide a copy of the thesis to each member of the supervisory committee. Each member of this committee will submit a written report to the Chairman of the Graduate Studies Committee.

Before the thesis is submitted, the student shall present an open seminar on the topic of investigation to the School of Pharmacy. Any serious deficiencies noticed at this stage should be carefully considered, in consultation with the supervisory committee, for revision.

Three copies of the thesis shall be submitted to the School of Graduate Studies through the School of Pharmacy, in a form and format as specified by the School of Graduate Studies.

As specified in General Regulation **Theses and Reports** of the School of Graduate Studies, the written thesis will be reviewed by examiners appointed by the Dean of Graduate Studies on the recommendation of the Dean of the School of Pharmacy or the Chairman of the Graduate Studies Committee.

## 29.5 Courses

Permission of the instructor and the Graduate Studies Committee of the School of Pharmacy is required for admission to any of the graduate Pharmacy courses.

6000 Medicinal Chemistry  
 6001 Advanced Physical Pharmacy  
 6002 Dosage Form Design and Novel Drug Delivery Systems  
 6003 Pharmacokinetic Modelling  
 6004 Principles of General Pharmacology  
 6005 Toxicology of Therapeutic Agents and Chemicals  
 6100-6108 Special Topics in Pharmacy

## 30 Regulations Governing the Degree of Master of Social Work

[www.mun.ca/socwrk](http://www.mun.ca/socwrk)

### Professor and Dean

D. Hardy-Cox

The degrees of Master of Social Work and Doctor of Philosophy are offered in social work.

The Master of Social Work (M.S.W.) may be completed by part-time or full-time study. All program components, with the exception of on-campus institutes, are offered online.

The focus of the M.S.W. program is creative approaches to critical thinking for leadership in diverse social work practice. The program allows professionally qualified social workers holding the Degree of B.S.W. or an equivalent professional undergraduate degree in Social Work to undertake intensive advanced work in a specialized area of social work knowledge and practice.

The program is designed to be accessible to students in remote and rural areas, and assumes that: (1) students will have a computer and Internet access; and (2) can travel to St. John's for the institute portion of the three practice courses. Students will be expected to incur charges for Internet services, long distance telephone charges, and travel and accommodation expenses.

Entrance into all courses and the offering of any course in an academic year is by approval of the School, consistent with the student's program. Students are admitted only into a designated program of studies.

The School of Social Work may deliver special offerings of the M.S.W. and/or other programs of the School to identified groups of out-of-province students where numbers warrant. These offerings will be self supporting, and therefore subject to an additional one-time non-refundable tuition fee as approved by the Board of Regents and payable on first registration following formal admission to the program. Students will also pay appropriate tuition fees for each semester during their tenure in the program.

Admission to the special offerings of these programs will be competitive, using the same procedures and standards that are in place for students applying to the St. John's campus program(s).

Subject to approval by the M.S.W. Program Committee of the School of Social Work, students admitted to an out-of-province program offering may apply to transfer to the equivalent program on the St. John's campus. In such instances, the fee structure under which the student was admitted will not change. Subject to approval by the M.S.W. Program Committee of the School of Social Work, students admitted to a St. John's based program may apply to transfer to the equivalent out-of-province program. In these instances, students transferring from the St. John's based program offerings to an equivalent out-of-province offering will be required to pay a pro-rated one-time fee upon formal transfer to the special offering.

### 30.1 Qualifications for Admission

- Admission to the M.S.W. program is limited, selective, and competitive. Meeting the minimum criteria for admission does not guarantee acceptance to the program.
- To be considered for admission, an applicant shall hold a Bachelor of Social Work (B.S.W.) degree (or an equivalent professional undergraduate degree in social work approved by the M.S.W. Program Committee of the School of Social Work) from an institution recognized by the Senate, with at least second class standing, and an average of at least 70% in the last 60 undergraduate credit hours.
- In addition to the stated academic requirements, the applicant must have completed, subsequent to obtaining the B.S.W. degree, at least two years employment in professional social work practice or in a comparable human service discipline or activity. Extensive relevant experience prior to undergraduate degree work may be recognized in full or partial fulfillment of this requirement.

4. For ten percent of seats per year, priority is given to applicants of First Nations/Aboriginal ancestry who meet the minimum criteria for admission. When the number of eligible applicants wishing to be considered under this clause exceeds the number of seats available, priority will normally be given to bona fide residents of Newfoundland and Labrador (see **Qualifications for Admission**). Applicants wishing to be considered under this clause shall complete the Educational Equity section of the Supplementary Information form at the time of application.
5. For an additional ten percent of seats per year, priority is given to applicants from other equity groups, based on a person's sexual orientation, gender identity, race, ethnicity, disability and/or being disadvantaged by their economic position/background and who meet the minimum criteria for admission. When the number of eligible applicants wishing to be considered under this clause exceeds the number of seats available, priority will normally be given to bona fide residents of Newfoundland and Labrador (see **Qualifications for Admission**). Applicants wishing to be considered under this clause shall complete the Educational Equity section of the Supplementary Information form at the time of application.
6. Notwithstanding the above, and in keeping with the School's commitment to achieving equitable representation in the student body, the M.S.W. Program Committee of the School of Social Work, at its discretion, may give preference to additional applicants of First Nations/Aboriginal ancestry and/or members of other equity groups who meet the minimum criteria for admission.
7. Notwithstanding the above, and in keeping with the University's special obligation to educate the citizens of Newfoundland and Labrador, when the number of eligible applicants exceeds the number of seats available, priority will normally be given to bona fide residents of Newfoundland and Labrador (see **Qualifications for Admission**).
8. Applicants will be deemed bona fide residents of Newfoundland and Labrador if at the time of application they are currently residing or have a permanent address in the province.

### 30.2 Procedure for Admission

1. Applicants must submit an application for admission with supporting documentation to the School of Graduate Studies, which approves recommendations for admission made by the M.S.W. Program Committee of the School of Social Work. The supporting documentation will consist of: an official transcript of the applicant's previous academic record submitted directly from the institution(s) attended; a statement of previous professional employment; a list of any published or unpublished works; a declaration of program emphasis and educational objectives; and two letters of appraisal, to be submitted by two referees, one assessing the applicant's previous academic performance and one assessing the applicant's previous practice performance. Letters of appraisal are to be submitted directly to the School of Graduate Studies by the referees.

*Note: Independent of admission to the program, agencies providing the mandatory field internship may have a range of additional requirements such as Criminal Record Check, Child Protection Records Check, or Health Check.*

2. The deadline date for receipt of applications for admission in September of each year is January 15 of the same year. All application forms and supporting documentation for admission to the program must be submitted to the School of Graduate Studies on or before the deadline of January 15. Under special circumstances, late applications and admissions in other semesters may be considered.
3. The M.S.W. Program Committee of the School of Social Work may require the applicant to be interviewed by one or more faculty members of the M.S.W. Program Admissions Subcommittee.
4. A person who meets the basic admission requirements under **Qualifications for Admission**, may, space permitting, take SCWK 6012 without being admitted to the M.S.W. program. Persons wishing to take a course under this provision must have applied for admission to the M.S.W. program by January 15th of the same year, and been placed on the waitlist. If there are available seats in the course, the applicant will need to submit to the School of Social Work the appropriate form requesting permission to register in a graduate course, and apply or reapply for admission to Memorial University of Newfoundland as an undergraduate.
5. A person who has completed an M.S.W. degree is eligible to register in any M.S.W. course offering, space permitting.

### 30.3 Plan of Study

1. A student's plan of study will be developed cooperatively by the student and the M.S.W. Student Services Coordinator.
2. Specified supplementary studies may be required to ensure requisite knowledge pertinent to the requirements for the degree.
3. A student electing a thesis program shall be assigned a Supervisor by the Dean of the School in consultation with the student. It is recommended that a thesis Supervisor be assigned as early in the program as possible. The thesis supervisor, when assigned, shall normally assume the duties of faculty advisor and Pathway mentor.
4.
  - a. Students who choose the thesis route must complete a thesis and a minimum of 21 credit hours consisting of SCWK 6012 (or the former 6011), 6013, 6014, 6313, 6413, 6917, and at least one of SCWK 6314 or 6315. Course route students must complete a minimum of 27 credit hours consisting of SCWK 6012 (or the former 6011), 6013, 6014, 6313, 6314, 6315, 6413, 6417, and 6917. Students in either route may be required to take additional courses.
  - b. In addition to the above, students will be required to register for SCWK 6000 during each of the relevant semesters as prescribed below, in accordance with their plan of study. This course comprises the academic mentorship component of the program and is designed to provide students with the opportunity to integrate curriculum with their individual academic and practice interests throughout their time in the program. For course route students, SCWK 6000 serves as a foundation for SCWK 6417. For thesis route students, SCWK 6000 serves as a foundation for their thesis.
    - i. Full-time course route and all thesis route students will register for SCWK 6000 beginning in the Fall of their first year and in each subsequent semester in which they are actively completing course work in the M.S.W. program.
    - ii. Part-time course route students completing the program in 6 semesters will register for SCWK 6000 beginning in the Fall of their first year and in each subsequent semester in which they are actively completing course work in the M.S.W. program.
    - iii. Part-time course route students completing the program in 9 semesters will register for SCWK 6000 beginning in the Fall of their second year and in each subsequent semester in which they are actively completing course work in the M.S.W. program.
    - iv. By the end of the final week of the first semester in which students are registered in SCWK 6000, they are required to submit the M.S.W. Pathway Learning Contract to their Mentor. Students are also required to submit a written progress report due the last day of classes of each semester, beginning with the first semester in which they are registered in SCWK 6000.
    - v. A grade of NC (No Grade Expected) will be awarded in all semesters of the course prior to the final Semester. The final grade in this non-credit course will be either Pas or Fal.

### 30.4 Field Internship SCWK 6917

Each M.S.W. student is required to complete a 500 hour field internship that is to be conducted in a setting and supervised by a qualified field instructor approved by the School of Social Work. Field Instructors must have as a minimum qualification a M.S.W. Degree and a

minimum of two years post-M.S.W. social work employment.

Field internships may be offered in whole or in part outside the normal start and end dates of a semester. Part-time field internships of two semesters will require approval from the proposed agency, field instructor, and the M.S.W. Field Education Coordinator.

The M.S.W. Field Education Coordinator is responsible for facilitating appropriate matches among the student, field instructor, and field internship setting. Although consideration will be given to all factors affecting the location and type of social work field internships, final approval of field internship rests with the School of Social Work. The School cannot guarantee the availability of M.S.W. field instruction in all communities and at all times. Students are responsible for their own financial support during the field internship.

At least four months prior to the commencement of the semester in which they intend to begin SCWK 6917, all students shall submit a completed Intent to Register in M.S.W. Field Internship form and a current resume to the M.S.W. Field Education Coordinator. At least six weeks before the internship commences, students shall submit an M.S.W. Field Internship Proposal to the Coordinator. The School of Social Work depends on the cooperation of community agencies external to the University to provide field internships and instruction to its students. Many of these agencies have a range of requirements, such as Criminal Record Check, Child Protection Records Check, or Health Check, which must be completed before starting the internship. Students unable to meet the agency's requirements may be delayed in their program or prevented from completing their program of study. Students are required to complete and update these requirements in a timely fashion and at their own expense. The procedures of any given agency may change from time to time and are beyond the control of the University.

Evaluation of the field internship will be on a PAS/FAIL basis. Students who voluntarily withdraw from the field internship without prior approval of the M.S.W. Field Education Coordinator, or who conduct themselves in such a manner as to cause the agency and the M.S.W. Field Education Coordinator to terminate the placement, will normally be awarded a grade of FAIL in the field internship.

Students who voluntarily withdraw from the field internship with the prior approval of the M.S.W. Field Education Coordinator cannot be guaranteed a second internship during that semester. In this case, the student will be awarded a grade of INC for the field internship. The student shall normally complete a field internship the following semester.

### 30.5 Course Format

To increase accessibility for students in remote and rural areas, we offer courses in the following formats:

1. SCWK 6012, 6013, 6014, and 6413 are online courses.
2. SCWK 6313, 6314 and 6315 are online courses with a mandatory on-campus institute component consisting of 36 hours of classroom instruction. Course materials and activities for the pre-institute and post-institute components of the courses are available online for students. Students must be available on a full-time basis to attend classes and complete assignments and group projects during the institute portion of these courses. It is recommended that students take leave from their employment for the duration of an on-campus institute, which may be scheduled in a combination of weekday, evening, and weekend hours within a two-week time period. The final decision regarding the on-campus institute schedule rests with the School of Social Work.
3. SCWK 6917 can be completed in St. John's, or in a student's home community, where appropriate supervision is available.
4. SCWK 6000 and 6417 can be completed in St. John's or in a student's home community.
5. In exceptional circumstances, and contingent upon student numbers and school resources, additional course sections may be offered in a regular classroom format.

### 30.6 Period of Study

For students admitted to the program under **Plan of Study** above:

1. For part-time students, the program is designed to permit completion of all degree requirements within three academic years (nine semesters) or two academic years (six semesters). The following is a sample program of study for nine semesters:

**Fall Semester:**

SCWK 6012 in Year 1  
 SCWK 6000, 6013, 6313, 6315 or 6413 in Year 2  
 SCWK 6000, 6013, 6313, 6315 or 6413 in Year 3

**Winter Semester:**

SCWK 6013, 6014, 6313, 6314, or 6413 in Year 1  
 SCWK 6000, 6013, 6014, 6313, 6314, or 6413 in Year 2  
 SCWK 6000, 6013, 6014, 6313, 6314, or 6413 in Year 3

**Spring Semester:**

SCWK 6014, 6314 or 6315 in Year 1  
 SCWK 6000, 6014, 6314 or 6315 in Year 2  
 SCWK 6917 (Field Internship) may be completed in Fall/Winter/Spring of Year 3  
 SCWK 6417 (Pathway Scholarship) is the final requirement to be completed and may be completed in the same semester as SCWK 6917 (Field Internship). Students are required to register for SCWK 6000 concurrently with SCWK 6917 and 6417.

2. For full-time students, course route, the program is designed to permit completion of all degree requirements within one academic year (three semesters), as follows:

**Fall Semester:**

SCWK 6000, 6012, 6313 (institute) and 6413. Thesis students are required to complete 6313 and only one of the two institute courses 6314 or 6315

**Winter Semester:**

SCWK 6000, 6013, 6014, and 6314 (institute)

**Spring Semester:**

SCWK 6000, 6315 (institute), 6417 (pathway scholarship), and 6917 (Field Internship).

3. For full-time students, thesis route, the program is designed to permit completion of all degree requirements within one academic year (three semesters), as follows:

**Fall Semester:**

SCWK 6000, 6012, 6313 (institute) and 6413

**Winter Semester:**

SCWK 6000, 6013, 6014, 6314 (institute). Thesis students are required to complete 6313 and only one of the two institute courses 6314 or 6315

**Spring Semester:**

SCWK 6000, 6315, 6917 (field internship), thesis. Thesis students are required to complete 6313 and only one of the two institute courses 6314 or 6315

**30.7 Evaluation**

1. Failure to attain a final passing grade of A or B in a program course, or PAS in a PASS/FAIL course, shall lead to termination of the student's program, unless a re-read has been requested. Failure to obtain the required grades in the re-read shall lead to termination of the student's program.
2. To remain in good standing students are required to maintain professional behaviour consistent with the current Code of Ethics of the Canadian Association of Social Workers ([www.casw-acts.ca/en/what-social-work/casw-code-ethics](http://www.casw-acts.ca/en/what-social-work/casw-code-ethics)). Students who are registered in their home province are required to comply with the current Code of Ethics of their provincial association of social workers. Students who are not registered in their home province are required to comply with the current Code of Ethics of the Canadian Association of Social Workers ([www.casw-acts.ca/en/what-social-work/casw-code-ethics](http://www.casw-acts.ca/en/what-social-work/casw-code-ethics)). Students who fail to meet this requirement will be required to withdraw from the School upon the recommendation of the M.S.W. Program Committee.

**30.8 Courses**

A selection of the following graduate courses will be offered to meet the requirements of candidates, as far as the resources of the School will allow.

**Program Courses**

6000 Pathway (mandatory repeatable non-credit course)

6012 Critical Thinking and Reflection (*credit may not be obtained for both 6012 and the former 6011*)

6013 Leadership for Social Justice (*prerequisite/co-requisite 6012*) (*credit may not be obtained for both 6013 and the former 6540*)

6014 Leadership in Social Policy and Programs (*prerequisite/co-requisite 6012*) (*credit may not be obtained for both 6014 and the former 6530*)

6313 Perspectives with Individuals and Families (*prerequisite/co-requisite 6012*) (*credit may not be obtained for both 6313 and the former 6312 or 6322*)

6314 Perspectives with Diverse Communities (*prerequisite 6012*) (*credit may not be obtained for both 6314 and the former 6230*)

6315 Perspectives with Groups (*prerequisite 6012*) (*credit may not be obtained for both 6315 and the former 6332*)

6413 Research Theory, Design, and Analysis (*prerequisite/co-requisite 6012*) (*credit may not be obtained for both 6413 and the former 6412 or 6422*)

6417 Pathway Scholarship (following completion of all other program components) (*credit may not be obtained for both 6417 and the former 6432 or 6442*)

6917 Field Internship (*prerequisites 6012, 6013, 6014, 6313 and 6413 and prerequisite/co-requisite two of 6314 and 6315 for course route students; one of 6314 or 6315 for thesis route students*) (*credit may not be obtained for both 6917 and the former 6912*)

**Program Core Courses for Students Admitted Prior to Fall 2011**

6011 Critical Thinking and Ethical Evaluation for Assessment and Intervention

6312 Crisis Intervention, Brief and Integrated Therapies for Diverse Individuals (*prerequisite/co-requisite 6011*) (*credit may not be obtained for both 6312 and 6313*)

6322 Family Therapy: Promotion of Strengths and Prevention of Violence in Diverse Families (*prerequisite 6011*) (*credit may not be obtained for both 6322 and 6313*)

6332 Social Work Perspectives in Interdisciplinary Team Development and Group Therapy (*prerequisite 6011*) (*credit may not be obtained for both 6332 and 6315*)

6412 Research Design for Social Work Assessment and Evaluation (*prerequisite/co-requisite 6011*) (*credit may not be obtained for both 6412 and 6413*)

6422 Data Analysis for Social Work Assessment and Evaluation (*prerequisite 6011 and 6412*) (*credit may not be obtained for both 6422 and 6413*)

6432 Research Internship (2 credit hours) (*prerequisite 6011, 6412 and 6422*)

6442 Colloquium Presentation Integrating Theory and Research in Advanced Clinical Practice (1 credit hour) (following completion of all other program components)

6912 Advanced Clinical Practice Internship (*prerequisites 6011, 6312, 6322 and prerequisite/co-requisite 6332*) (*credit may not be obtained for both 6912 and 6917*)

**Program Elective Courses for Students Admitted Prior to Fall 2011**

6230 Seminar in Community Development (*credit may not be obtained for both 6230 and 6314*)

6530 Seminar in Social Administration: Evaluation of Policies and Programs (*credit may not be obtained for both 6530 and 6014*)

6540 Supervision in Professional and Clinical Practice (*credit may not be obtained for both 6540 and 6013*)

6550 Feminist Therapy in Social Work Practice

Although the School does not currently offer a program in Social Policy and Administration, it has faculty expertise in these areas and, in the future, may offer the following courses:

6210 Seminar in Social Planning and Social Development

6220 Seminar in Organization Development

6510 Seminar in Social Administration: Social Policy Analysis, Development and Administration

6520 Seminar in Social Administration: Program Design and Development

6820-29 Individual Reading and Research in Special Areas

**Thesis**

See **General Regulations, Theses and Reports**.

Note: Every candidate shall comply with the **General Regulations** governing the School of Graduate Studies and the M.S.W. Degree Regulations.

## 31 Regulations Governing the Degree of Master of Technology Management

www.mi.mun.ca

**Vice-President (Marine Institute)**

G. Blackwood

### 31.1 Administration

The Program will be administered by an Academic Director appointed by the Vice-President (Marine Institute), together with an Academic Advisory Committee.

An Academic Advisory Committee will be appointed by the Dean of Graduate Studies on recommendation of the Vice-President (Marine Institute). This committee will consist of the Academic Director as Chair, three members from the Marine Institute and one member from each of the Faculty of Business Administration and the Faculty of Engineering and Applied Science. Normally, all appointments will be for a period of three (3) years.

A Technical Advisory Committee consisting of a cross-section of members with professional expertise related to the technology sector, will provide regular feedback on program content, instruction, and future direction of the Program. Members of this Committee will be appointed by the Dean of Graduate Studies on recommendation of the Vice-President (Marine Institute). The Academic Director will be an ex officio member and Chair of the Technical Advisory Committee. Normally all appointments will be for a period of three (3) years.

### 31.2 Program

The Master of Technology Management (MTM) is a comprehensive academic program that provides a broad understanding of the structure and operation of organizations and the factors that influence business decisions in the context of technology-based organizations. It provides a technology management focus through the development of knowledge and understanding of the nature of technical operations and the factors that have an impact on their success, as well as the ability to apply these concepts within their organizations.

The program consists of two Options:

- Engineering and Applied Science Technology Option
- Aquaculture Technology Option

The program is offered online and requires successful completion of either 1) 24 credit hours of course work and a comprehensive project and report (6 credit hours), or 2) 30 credit hours of comprehensive course work. Candidates will typically register on a part-time basis.

#### 31.2.1 Admission Requirements

Admission to the program is on a competitive basis.

1. The deadlines for submission of applications are as follows:

- Fall (September) semester: May 15
- Winter (January) semester: September 15

Applications received after listed deadlines will be considered as time and resources permit.

2. To be considered for admission to the Engineering and Applied Science Technology Option an applicant will normally possess a second class or better undergraduate degree from a university of recognized standing and will normally have:

- a Memorial University of Newfoundland Bachelor of Technology, Bachelor of Maritime Studies, or a comparable undergraduate degree with appropriate technology sector and business management course work; and
- a minimum of two (2) years relevant employment experience.

3. To be considered for admission to the Aquaculture Technology Option an applicant will normally possess a second class or better undergraduate degree from a university of recognized standing and will normally have:

- a post-graduate aquaculture credential or an aquaculture focus in their undergraduate degree; or significant professional experience in the aquaculture industry; and
- a minimum of two (2) years relevant employment experience.

4. In exceptional cases, applicants who have not completed an undergraduate degree, but who meet all other requirements, may be considered for admission. Preference will be given to those who have significant and relevant professional experience, and have successfully completed several years of post-secondary studies. Applicants who do not meet normal admission requirements shall be required to complete, with a high level of achievement, certain undergraduate courses before being considered for admission.

5. Applicants who did not complete a baccalaureate or post-graduate degree at a recognized university where English is the primary language of instruction must normally complete either the:

- Test of English as a Foreign language (TOEFL) and achieve a paper-based score of 580 (or higher), computer-based score of 237 (or higher), or Internet based score of 92-93 (or higher); or
- International English Language Testing System (IELTS) and achieve a score of 7 (or higher).

Information regarding the TOEFL is available from the Educational Testing Service at [www.ets.org](http://www.ets.org). IELTS information is available at [www.ielts.org](http://www.ielts.org). It is noted that other equivalent tests acceptable to the School of Graduate Studies will also be considered.

6. Upon acceptance into the program, students will be admitted to one of the two Options: the Engineering and Applied Science Technology Option or the Aquaculture Technology Option.

#### 31.2.2 Program of Study

##### 31.2.2.1 Master of Technology Management - Engineering and Applied Science Technology Option

1. Candidates for the Master of Technology Management (Engineering and Applied Science Technology Option) shall be required to complete a minimum of either:

- a. 24 credit hours of course work and a major project and report (6 credit hours). Course work includes two compulsory core

courses (6 credit hours) and six elective courses (18 credit hours). Students on the project route will complete MSTM 6100: Project in Engineering and Applied Science Technology Management (6 credit hours).

i. **Core Courses (Two to be completed):**

MSTM 6031 Overview of Technical Operations  
MSTM 6032 Managing Technological Innovation

ii. **Elective courses (Six to be completed):**

MSTM 6022 Communication and Conflict Resolution in a Technical Environment  
MSTM 6023 Strategic Planning, Policy, Participation and Management in Technical Operations  
MSTM 6030 Principles of Management for Engineering Technology Enterprises  
MSTM 6033 Quality Systems  
MSTM 6034 Project Management in the Offshore, Health, Fisheries and Engineering Technology Environments  
MSTM 6035 Information Technology Applications in the Health and Engineering Technology Environments  
MSTM 6036 Supply Chain Management and Advanced Engineering Technology Operations  
MSTM 6037 Risk Analysis and Operations in the Engineering Technology Sector  
MSTM 6038 Manufacturing and Engineering Technology Management  
MSTM 6039 Sustainability and Environmental Responsibility  
MSTM 6052 Management of Intellectual Property  
MSTM 6054 Technology Assessment  
MSTM 6056 Management of International Development

**Project in Engineering and Applied Science Technology Management**

MSTM 6100 Project in Engineering and Applied Science Technology Management (6 credit hours). Students will choose a topic in consultation with the Academic Director and will work independently to carry out an in-depth study of a problem or application within the area of technology management and fully document and present their findings. Preferably the problem will be directly related to a workplace situation.

- b. 30 credit hours on a comprehensive-course route. Course work includes two compulsory core courses (6 credit hours) and eight elective courses (24 credit hours).

i. **Core Courses (Two to be completed):**

MSTM 6031 Overview of Technical Operations  
MSTM 6032 Managing Technological Innovation

ii. **Elective Courses (Eight to be completed):**

MSTM 6022 Communication and Conflict Resolution in a Technical Environment  
MSTM 6023 Strategic Planning, Policy, Participation and Management in Technical Operations  
MSTM 6030 Principles of Management for Engineering Technology Enterprises  
MSTM 6033 Quality Systems  
MSTM 6034 Project Management in the Offshore, Health, Fisheries and Engineering Technology Environments  
MSTM 6035 Information Technology Applications in the Health and Engineering Technology Environments  
MSTM 6036 Supply Chain Management and Advanced Engineering Technology Operations  
MSTM 6037 Risk Analysis and Operations in the Engineering Technology Sector  
MSTM 6038 Manufacturing and Engineering Technology Management  
MSTM 6039 Sustainability and Environmental Responsibility  
MSTM 6052 Management of Intellectual Property  
MSTM 6054 Technology Assessment  
MSTM 6056 Management of International Development

2. Up to three relevant elective courses (9 credit hours) may be transferred from other graduate programs within the School of Graduate Studies or from other post-secondary institutions recognized by Senate, subject to the approval of the Dean of Graduate Studies on the recommendation of the Academic Director.

### 31.2.2.2 Master of Technology Management - Aquaculture Technology Option

1. Candidates for the Master of Technology Management (Aquaculture Technology Option) shall be required to complete a minimum of either:

- a. 24 credit hours of course work and a major project and report (6 credit hours). Course work includes two compulsory core courses (6 credit hours); and six elective courses (18 credit hours). Students on the project route will complete MSTM 6102: Project in Aquaculture Technology Management (6 credit hours).

i. **Core Courses (Two to be completed):**

MSTM 6031 Overview of Technical Operations  
MSTM 6032 Managing Technological Innovation

ii. **Elective Courses (six to be completed including at least three from Category B):**

**Category A**

MSTM 6022 Communication and Conflict Resolution in a Technical Environment  
MSTM 6023 Strategic Planning, Policy, Participation and Management in Technical Operations  
MSTM 6033 Quality Systems  
MSTM 6034 Project Management in the Offshore, Health, Fisheries and Engineering Technology Environments  
MSTM 6037 Risk Analysis and Operations in the Engineering Technology Sector  
MSTM 6039 Sustainability and Environmental Responsibility  
MSTM 6052 Management of Intellectual Property  
MSTM 6056 Management of International Development

**Category B**

MSTM 6071 Management of Aquaculture Technology  
MSTM 6072 Animal Husbandry Management  
MSTM 6073 Aquaculture Environmental Management  
MSTM 6074 Aquaculture Site and Operational Assessment  
MSTM 6075 Aquaculture Engineering Technology Management

**Project in Aquaculture Technology Management**

MSTM 6102 Project in Aquaculture Technology Management (6 credit hours). Students will choose a topic in consultation with the Academic Director or designate and will work independently to carry out an in-depth study of a problem or application within the area of aquaculture technology management and fully document and present their findings. Preferably

the problem will be directly related to a workplace situation.

- b. 30 credit hours on a comprehensive-course route. Course work includes two compulsory core courses (6 credit hours); and eight elective courses (24 credit hours).
    - i. **Core Courses (Two to be completed):**
      - MSTM 6031 Overview of Technical Operations
      - MSTM 6032 Managing Technological Innovation
    - ii. **Elective courses (Eight to be completed including at least three from Category B):**
      - Category A**
        - MSTM 6022 Communication and Conflict Resolution in a Technical Environment
        - MSTM 6023 Strategic Planning, Policy, Participation and Management in Technical Operations
        - MSTM 6033 Quality Systems
        - MSTM 6034 Project Management in the Offshore, Health, Fisheries and Engineering Technology Environments
        - MSTM 6037 Risk Analysis and Operations in the Engineering Technology Sector
        - MSTM 6039 Sustainability and Environmental Responsibility
        - MSTM 6052 Management of Intellectual Property
        - MSTM 6056 Management of International Development
      - Category B**
        - MSTM 6071 Management of Aquaculture Technology
        - MSTM 6072 Animal Husbandry Management
        - MSTM 6073 Aquaculture Environmental Management
        - MSTM 6074 Aquaculture Site and Operational Assessment
        - MSTM 6075 Aquaculture Engineering Technology Management
2. Up to three relevant elective courses (9 credit hours) may be transferred from other graduate programs within the School of Graduate Studies or from other post-secondary institutions recognized by Senate, subject to the approval of the Dean of Graduate Studies on the recommendation of the Academic Director.

### 31.2.3 Evaluation

1. Candidates for the Master of Technology Management Degree must obtain a grade of B or better in all program courses.
2. Candidates who receive a grade of less than B in any course will be permitted to remain in the program provided the course is repeated and passed with a grade of B or better. Alternatively, the candidate may, on the recommendation of the Academic Director, and with the approval of the Dean of Graduate Studies, substitute another graduate course. Only one course repetition or substitution will be permitted during the candidate's program after which the candidate shall be required to withdraw from the program.

## 32 Regulations Governing the Degree of Doctor of Philosophy

In this and following regulations and notes, "Head" and "Department" shall be understood to mean "Dean or Director" and "Faculty or School" respectively, applying the regulations to a Faculty or School in which there are no Departmental divisions.

Students should consult the General Information and Regulations Governing All Graduate Students for information concerning the Degree of Doctor of Philosophy. For information concerning the number of courses required for specific programs, students should consult the following listing for the appropriate Department.

The degree of Doctor of Philosophy (Ph.D.) is offered in selected areas in Anthropology, Archaeology, Atomic and Molecular Physics, Biochemistry, Biology, Chemistry, Cognitive and Behavioural Ecology, Computer Science, Condensed Matter Physics, Earth Sciences (Geology), Earth Sciences (Geophysics), Education, Engineering, English, Environmental Science, Ethnomusicology, Experimental Psychology, Folklore, Food Science, Geography, History, Interdisciplinary, Linguistics, Management, Marine Biology, Mathematics, Medicine, Pharmacy, Philosophy, Physical Oceanography, Social Work, Sociology, Statistics, and Theoretical Physics.

### 32.1 Anthropology

[www.mun.ca/hss](http://www.mun.ca/hss)  
[www.mun.ca/anthro](http://www.mun.ca/anthro)

**Associate Professor and Head of the Department**  
 K. Gordon

#### 32.1.1 Program of Study

1. The Ph.D. in Anthropology is offered in historic anthropology and ethnography of Newfoundland and Labrador, and Western Europe.
2. An applicant must normally hold a Master's Degree with a specialization in social and cultural anthropology. In exceptional circumstances, a student who has spent three semesters in the M.A. program may be recommended for transfer into the Ph.D. stream.
3. Residency: the Department requires a minimum residency of two years for Ph.D. students.
4. A supervisory committee will be established for each student as per **General Regulations, Supervision, Ph.D. and Psy.D. Candidates**.
5. A student will normally be required to complete four courses during their first three semesters in the program: Anthropology 6300 and 6890, and two other courses, to be determined by the supervisory committee. The supervisory committee may also require the candidates to complete additional graduate courses.
6. All students must demonstrate a reading knowledge of a second language to be determined in consultation with the supervisory committee. This language will normally be a language in which there is a substantial body of literature in Social and Cultural Anthropology. It could also be a field language pertinent to the student's project. The exam will be set and marked by an authority determined by the Head of the Department and the Dean of Graduate Studies as per **General Regulations, Evaluation, Evaluation of Graduate Students**, 4., and will normally be completed before the Comprehensive Examination is undertaken.
7. The Ph.D. Comprehensive Examination shall be administered in accordance with **General Regulations, Comprehensive Examinations**. The examination may be oral, written or both, and shall consist normally of three sessions, each of up to three hours duration, within a one week period, or three (3) one week take home examinations. A student will prepare for these examinations by undertaking supervised readings in three fields prescribed by the three members of the comprehensive exam committee. The

examination will deal with specified areas of social/cultural anthropology. The examination will normally be scheduled in the third week of November each year in the second year of the student's program.

8. The student must submit a written thesis proposal for presentation to the Department two months following completion of his/her comprehensive examination.
9. As stated in the **General Regulations** for Graduate Studies, the time limit for completion of the Degree is 7 years.
10. Submission of dissertation and the oral defence of dissertation will follow **General Regulations, Theses and Reports, Evaluation of Ph.D. and Psy.D. Theses.**

### 32.1.2 Courses

A selection of the following graduate courses will be offered to meet the requirements of candidates, as far as the resources of the Department will allow.

6010 Cultural Ecology  
 6071 Health and Illness: Cultural Contexts and Constructions  
 6081 Anthropology of Gender  
 6089 Anthropology of Underclass Life  
 6100 Social Organization  
 6110 Culture and Personality  
 6140 The Community  
 6210 Language and Culture  
 6240 Atlantic Regional Studies  
 6260 Social and Economic Development  
 6280 Newfoundland Ethnography  
 6281 Labrador Ethnography  
 6282 Ethnography of a Single Region  
 6300 Fieldwork and Interpretation of Culture  
 6400 Current Themes in Cultural Anthropology  
 6410 History of Anthropology  
 6412 Anthropological Theory  
 6413 Applied Anthropology  
 6430 Audiovisual Anthropology  
 6440 Master's Research Paper (9 credit hours)  
 6580-6599 Special Areas in Anthropology  
 6600 Contemporary Debates in Anthropology  
 6890 Graduate Seminar

## 32.2 Archaeology

[www.mun.ca/hss](http://www.mun.ca/hss)

[www.mun.ca/archaeology](http://www.mun.ca/archaeology)

**Associate Professor and Head of the Department**

B. Gaulton

### 32.2.1 Program of Study

1. The Ph.D. in Archaeology is offered in prehistoric and historic archaeology of Northeastern North America and the Arctic.
2. An applicant must normally hold a Master's Degree with a specialization in archaeology.
3. The Department requires a minimum residency of six semesters for Ph.D. students.
4. A supervisory committee will be established for each student as per **General Regulations, Supervision, Ph.D. and Psy.D. Candidates, 2.**
5. Students will normally be required to successfully complete two courses during their first three semesters in the program: Archaeology 6700 and 6411. The supervisory committee may require the candidates to complete additional graduate courses.
6. All candidates must demonstrate a reading knowledge of a second language to be determined in consultation with the supervisory committee. This language will normally be a language in which there is a substantial body of literature in Archaeology. The exam will be set and marked by an authority determined by the Head of the Department and the Dean of Graduate Studies (see **General Regulations, Evaluation, Evaluation of Graduate Students, 4.**) and will normally be completed before the Comprehensive Examination is undertaken.
7. The Ph.D. Comprehensive Examination shall be administered in accordance with **General Regulations, Comprehensive Examinations.** The examination may be oral, written or both, and shall consist normally of three sessions, each of up to three hours duration, within a one week period, or three (3) one week take home examinations. Candidates will prepare for these examinations by undertaking supervised readings in three fields prescribed by the three members of the comprehensive exam committee. The examination will deal with specified areas of archaeology. The examination will normally be scheduled in the third week of November each year in the second year of the candidate's program.
8. The candidate must submit a written thesis proposal for presentation to the Department two months following completion of his/her comprehensive examination.
9. As stated in the **General Regulations** for Graduate Studies, the time limit for completion of the Degree is 7 years.
10. Submission of dissertation and the oral defence of dissertation will follow **General Regulations, Theses and Reports, Evaluation of Ph.D. and Psy.D. Theses.**

### 32.2.2 Courses

A selection of the following graduate courses will be offered to meet the requirements of candidates, as far as the resources of the Department will allow.

6020 Bioarchaeology  
 6040 Human Osteology  
 6095 Advanced Studies in Ethnohistory (*same as History 6095*)  
 6151 Palaeoethnobotany

6181 Palaeoeskimo Cultures of the Eastern Arctic  
 6182 Advances in Material Culture Analysis  
 6187 Readings in Maritime Provinces Prehistory  
 6189 Palaeopathology  
 6191 Approaches to Early Modern Material Culture  
 6192 Conservation Method and Theory  
 6290 Newfoundland and Labrador Prehistory  
 6310 Economic Analyses in Archaeology  
 6320 Ethnoarchaeology  
 6330 Archaeological Field Conservation  
 6409 History of Archaeology  
 6411 Theory and Method in the Study of Archaeology and Prehistory  
 6500 Special Topics in Historical Archaeology (*prerequisite 6191*)  
 6680-6699 (excluding 6687) Special Topics in Archaeology and Prehistory  
 6687 Applied Archaeological Sciences  
 6700 Interpretative Methods in Archaeology  
 6701 Interpretative Methods in Historical Archaeology  
 6890 Graduate Seminar

## 32.3 Biochemistry

[www.mun.ca/science](http://www.mun.ca/science)  
[www.mun.ca/biochem](http://www.mun.ca/biochem)

### Professor and Head of the Department

M.D. Berry

### 32.3.1 Program of Study

1. The Degree of Doctor of Philosophy is offered in Biochemistry or Food Science to full-time and part-time students.
2. The admission requirements for the graduate programs in Biochemistry and Food Science are as given under **General Regulations**. Depending on the background and/or area of specialization, a candidate's program may include additional courses taken for credit in Biochemistry, Food Science or related subjects.
3. The program of a candidate for the Ph.D. Degree shall be the responsibility of the supervisory committee, composed of the Supervisor and at least two other faculty members recommended with the concurrence of the Supervisor by the Head.
4. It is the responsibility of the student to arrange regular meetings with his or her graduate supervisory committee. A semi-annual report, prepared by the Supervisor and signed by all members of the supervisory committee, is required to be given to the Head of the Department or delegate.
5. All candidates for the Ph.D. Degree shall be required to attend and participate in Departmental seminars.
6. A candidate for the Ph.D. will be required to present a seminar on his/her research area within 18 months of starting the program and again immediately prior to the submission of thesis.
7. A candidate for the Ph.D. degree shall normally take the Comprehensive Examination within the first seven semesters of his or her program. The examination will have two components: the preparation of a grant proposal on a topic related to the student's research specialization followed by an oral examination of the proposal. Failure of this examination will result in the termination of the candidate's program.

### 32.3.2 Courses

A series of advanced courses in the areas outlined below will be offered. Normally only one course will be offered per semester.

6000-6009 Special Topics in Biochemistry  
 6010-6019 Special Topics in Nutrition and Metabolism  
 6020-6029 Special Topics in Food Science  
 6400 Control of Intermediary Metabolism  
 6460 Structural Biochemistry  
 6520 Nutritional Biochemistry  
 6530 Food Biochemistry  
 6590 Cellular, Molecular and Developmental Biology (*credit restricted with Biology 6590 and Medicine 6590*)  
 6630 Marine Biochemistry  
 6680 Processing and Quality of Foods

## 32.4 Biology

[www.mun.ca/science](http://www.mun.ca/science)  
[www.mun.ca/biology](http://www.mun.ca/biology)

### Associate Professor and Head of the Department

P. Marino

The Degree of Doctor of Philosophy is offered in Biology to full-time and part-time students. Students interested in animal behaviour should also consult the section in the Calendar describing the Doctoral programs **Cognitive and Behavioural Ecology**. Students interested in **Marine Biology** should consult the section of the Calendar specific to the Doctoral program in that area of study.

### 32.4.1 Program of Study

1. A student will be required to take Biology 7000 (Graduate Core Seminar).
2. Admission to a Ph.D. program in Biology shall not normally take place until after the completion of the course requirements and the submission of the thesis for the M.Sc. Degree. However, on the recommendation of the Department, this requirement may be waived by the Dean of Graduate Studies.
3. The program of a candidate shall be the responsibility of a Supervisory Committee composed of the Supervisor and at least two other appropriate members recommended to the Dean by the Head (or delegate) of the Department with the concurrence of the Supervisor.

4. The Supervisory Committee shall interview the student normally within a month of first registration, to discuss the student's program and to explore any areas of weakness in the candidate's biological knowledge, especially where these relate to the intended areas of research. The Supervisory Committee will recommend a student's subdiscipline within Biology to the Department in writing after this meeting.
5. It is the function of a Supervisory Committee to have regular meetings, at least annually, with its graduate student. A meeting report, signed by all members of the Supervisory Committee and student, must be given to the Department. A copy will be sent to the graduate student and to the Dean of Graduate Studies.
6. The candidate will present a tentative outline of the proposed research to the Supervisory Committee, with a copy to the Department by the end of the second semester, and preferably prior to commencement of the research.
7. The student will present a research seminar to the Department, normally by the end of the second semester following admission, to describe the research topic being investigated and the methodologies to be employed. This seminar provides an opportunity for the student to receive constructive input from the broad biological community.
8. When the Supervisory Committee deems it necessary, a working knowledge of a language other than English may be required.
9. Comprehensive Examination
  - a. Timing of Examination
    - i. Timing of the comprehensive examination shall follow General Regulation, 1. under **Comprehensive Examination, Ph.D. Comprehensive Examination** governing the Degree of Doctor of Philosophy. A candidate registered in a full-time Ph.D. program in the Faculty of Science, Department of Biology shall normally take the comprehensive examination during the first year of the program, and no later than one year after completion of the prescribed courses.
    - ii. The procedure shall be initiated by the candidate's Supervisor who will notify the Department of Biology, in writing, of the candidate's readiness. Failure to meet the above requirement can result in the candidate being required to withdraw from the program.
  - b. Examination Committee
 

The Examination Committee shall be appointed by the Dean of Graduate Studies on the recommendation of the Department of Biology according to Regulation **Comprehensive Examinations, Ph.D. Comprehensive Examination, 2.** of the **General Regulations** of the School of Graduate Studies. No more than two members of the Examination Committee may be members of the candidate's Supervisory Committee. The committee shall meet and recommend to the Department in writing an examination seminar topic within the student's previously determined subdiscipline.
  - c. Examination Procedure
 

The Department shall provide the student the examination date and the seminar topic in writing not more than six nor less than four weeks prior to the examination. The student shall provide each member of the Examination Committee a written paper on the seminar topic one week prior to the examination. The Examination Committee shall evaluate the candidate's presentation and response to questions put to him/her during the Oral Examination both on the seminar and within the student's subdiscipline of Biology.
  - d. Subsequent Action
 

The Examination Committee will meet in camera to arrive at its conclusions. The Chair shall report the results of the Examination to the Head and the Dean of Graduate Studies for transmission to the candidate. The report will include one of the following decisions: a) the student passed with distinction, passed or failed. b) if failed and it is the first examination whether the student may be re-examined.
  - e. Re-examination
 

Comprehensive Re-examination if permitted will occur not sooner than one month and not more than six months after the first. The candidate and his or her Supervisory Committee shall be informed of the deficiencies found. The format for the second examination will be determined by the Examination Committee with the approval of the Biology Graduate Studies Committee. The candidate will be informed of the topic and format four to six weeks prior to the examination. The examination will follow the procedure outlined in 8.c and d. above. A failure will require the student to withdraw from the program.
10. Theses shall conform to **Theses and Reports** of the **General Regulations** of the School of Graduate Studies and the Departmental Guidelines.

### 32.4.2 Courses

A selection of the following graduate courses will be offered to meet the requirements of candidates, as far as the resources of the Department will allow.

- 6000 Research Topics in Microbiology
- 6131 Models in Biology (*credit cannot be obtained if already received for Biology 4607*)
- 6351 Behavioural Ecology and Sociobiology (*cross-listed as Psychology 6351*) *credit cannot be obtained if already received for Biology 4701*
- 6590 Molecular Biology I (*cross-listed as Medicine 6590 and credit-restricted with Biochemistry 6590*) *prerequisites: Biology 4241 (or equivalent)*
- 6591 Molecular Biology II (*cross-listed as Medicine 6591 and credit-restricted with the former Biochemistry 6591*) *prerequisites: Biology 4241 (or equivalent)*
- 6592 Bacterial Genetics (*credit-restricted with the former Biochemistry 6592*) *prerequisite: Biology 4241 (or equivalent)*
- 6593 Selected Readings in Molecular Biology (*credit-restricted with the former Biochemistry 6593*) *prerequisites or co-requisites: one of Biology, Biochemistry or Medicine 6590, and one of Biology 6591, Medicine 6591, or the former Biochemistry 6591 (or equivalent)*
- 6710 Marine Benthic Biology
- 7000 Graduate Core Seminar (*cross-listed as Ocean Science 7000*)
- 7101 Topics in Marine Biology
- 7201 Topics in Cellular and Molecular Biology and Physiology
- 7220 Quantitative Methods in Biology (*credit cannot be obtained if already received for Biology 4605*)
- 7300 Ornithology (*credit cannot be obtained if already received for Biology 4620*)
- 7301 Topics in Ecology and Conservation Biology
- 7530 The Molecular Biology of Development
- 7535 Research Methods in Marine Science
- 7920-7960 Special Topics in Biology (*excluding Biology 7931*)
- 7931 Research Methods in Genetic Biotechnology (Note: Biology 7931 may be delivered in an accelerated format outside of the regular semester timeframe)

## 32.5 Chemistry

www.mun.ca/science

www.mun.ca/chem

### Professor and Head of the Department

T. Fridgen

### 32.5.1 Program of Study

The Degree of Doctor of Philosophy in Chemistry is offered as full-time or part-time study. A Master's Degree in Chemistry or related area from a recognized university is normally required for entry into the Ph.D. program. Students holding a Bachelor's Degree (Honours or equivalent) in Chemistry may be considered for direct admission into the Ph.D. program. Students currently registered in the Memorial University of Newfoundland's Chemistry M.Sc. program for a minimum of three semesters may request transfer into a Ph.D. program. The transfer should be supported by the Supervisor and the Supervisory Committee and subsequent to satisfactory presentation of a written progress report and Ph.D. research proposal.

1. Upon recommendation of their supervisor, candidates will write American Chemical Society (ACS) placement test(s) in the first two weeks of their initial semester of registration in order to determine an appropriate course program.
2. Candidates will be assigned a Supervisory Committee consisting of the Supervisor and at least two other appropriate faculty members appointed by the Dean on recommendation of the Chemistry Deputy Head (Graduate Studies).
3. The program of a candidate must be arranged by the Supervisor in consultation with the Supervisory Committee and the student before the second semester of registration. It is the responsibility of the Supervisory Committee to meet at least annually with the student, to provide guidance at all stages of the candidate's program, and, in consultation with the student, to prepare annual written progress reports for submission to the Dean of Graduate Studies.
4. Candidates holding a Master's Degree from a recognized university are normally required to successfully complete a minimum of 6 credit hours of graduate Chemistry courses with a minimum grade of B and to present a Departmental seminar on a topic not directly related to the candidate's research (Chemistry 6002) as well as a seminar describing the candidate's research (Chemistry 6003). Courses taken towards a Master's Degree may not be repeated. Candidates not holding a Master's Degree must successfully complete at least 12 credit hours of graduate Chemistry courses with a minimum grade of B in addition to Chemistry 6002 and 6003.
5. Candidates are required to attend Departmental seminars.
6. Candidates must pass a comprehensive examination, as described in the **General Regulations**, according to one of the following descriptions:
  - a. A three-hour written part covering topics in Organic Chemistry, and, subsequent to the written examination at the discretion of the comprehensive examination committee, an oral exam designed to explore areas of perceived deficiency.
  - b. A paper on a research topic selected by the student in consultation with his/her supervisor and the examination committee, and subsequently, an oral examination designed to explore general areas of Analytical, Inorganic and/or Physical Chemistry and areas of chemistry related to the research topic.
7. Candidates must submit and successfully defend a thesis deemed acceptable by two internal and one external examiner as outlined in the **General Regulations**.

### 32.5.2 Courses

6002 Doctoral Seminar  
 6003 Doctoral Research Seminar  
 6110 Analytical Chemistry II  
 6150 Advanced Spectroscopic Techniques  
 6151 Analytical Separations and Organic Mass Spectrometry  
 6152 Electroanalytical Techniques  
 6153 Techniques in Sampling, Trace Analysis and Chemometrics  
 6154 Business Management and Good Laboratory Practice  
 6155 Computers in Instrumental Analysis and Basic Electronics (*same as Med 6070*)  
 6156 Analytical Method Development and Sampling  
 6160 Laboratory Projects in Sampling, Electroanalysis and Trace Analysis  
 6161 Laboratory Projects in Analytical Separations and Spectroscopic Techniques  
 6190-9 Selected Topics in Analytical Chemistry  
 6201 Bioinorganic Chemistry  
 6202 Main Group Chemistry  
 6204 Mechanisms in Catalysis  
 6205 Photochemistry of Transition Metal Complexes  
 6206 Green Chemistry  
 6210 Organometallic Chemistry  
 6290-9 Selected Topics in Inorganic Chemistry  
 6300 Quantum Chemistry I  
 6301 Quantum Chemistry II  
 6302 Molecular Spectroscopy  
 6304 Computational Chemistry I  
 6310 Electronic Structure Theory  
 6323 Chemical Thermodynamics I  
 6324 Chemical Thermodynamics II  
 6340 Biophysical Chemistry  
 6350 Electrochemical Kinetics  
 6360 Solid State Chemistry  
 6370 Nanoscale Phenomena  
 6380 Adsorption on Surfaces  
 6381 Surface and Interface Science  
 6382-9 Selected Topics in Physical Chemistry  
 6390-8 Selected Topics in Physical Chemistry  
 6399 Chemical Kinetics and Dynamics  
 6401 Organic Spectroscopic Analysis I

6402 Organic Spectroscopic Analysis II  
 6421 Natural Products Chemistry  
 6460 Organic Synthesis  
 6470 Physical Organic Chemistry  
 6490-9 Selected Topics in Organic Chemistry  
 6590-9 Selected Topics in Theoretical and Computational Chemistry  
 6600 Applications of Inorganic and Organometallic Chemistry to Toxicology

## 32.6 Cognitive and Behavioural Ecology

www.mun.ca/science

### Administrative Committee

Dr. I. Fleming, Department of Ocean Sciences - Co-Chair  
 Dr. C. Walsh, Department of Psychology - Co-Chair  
 Dr. T. Chapman, Department of Biology  
 Ms. M. Fitzsimmons, Graduate Student Representative  
 Dr. A. Hurford, Department of Biology  
 Dr. S. Leroux, Department of Biology  
 Dr. W. Montevecchi, Department of Psychology  
 Dr. C. Purchase, Department of Biology  
 Dr. A. Storey, Department of Psychology  
 Dr. E. Vander Wal, Department of Biology  
 Dr. I. Warkentin, Grenfell Campus  
 Dr. D. Wilson, Department of Psychology

### 32.6.1 Program of Study

1. The Cognitive and Behavioural Ecology Graduate Program focuses on interdisciplinary animal behaviour research. Research integrates mechanistic, developmental, evolutionary, and ecological perspectives on behaviour through molecular, individual, and population levels of analysis. Supervisors include faculty from the Departments of Biology, Ocean Sciences, Psychology, the Faculty of Medicine and the Environmental Science Program at Grenfell Campus, as well as adjunct faculty from the Canadian Wildlife Service, Department of Fisheries and Oceans, the Newfoundland and Labrador Forestry and Wildlife Divisions and Parks Canada. The Departments of Biology and Psychology jointly offer the Master of Science and the Doctor of Philosophy degrees in Cognitive and Behavioural Ecology.
2. The Administrative Committee is responsible for the Program. Committee members are appointed by the Dean of Science, on the recommendation of the Chair of the Committee and of the Heads of Biology and Psychology. The Committee Chair is elected by the committee members and appointed by the Dean of Science. The Committee makes recommendations to the Dean of Graduate Studies concerning admissions and academic requirements. In consultation with supervisors, recommendations are made concerning course programs, financial support, thesis committees, comprehensive and thesis topics, examiners and students' annual progress. Upon program completion, the Committee certifies that all requirements for the appropriate degree have been met. The Department of the Supervisor ensures that adequate facilities are provided for each candidate. Students in Cognitive and Behavioural Ecology are considered for teaching assistantships in the Psychology or Biology Departments.

### 32.6.2 Regulations

1. There are no required courses for the doctoral program. However, the Doctoral Seminar (CABE 6992) and/or other courses tailored for individual students may be included in the student's program by the Dean of Graduate Studies on the recommendation of the Chair of the Committee.
2. The comprehensive examination shall normally be taken within the first 5 semesters of the program. An Examination Committee will be struck in accordance with **General Regulations**. At least one member of either the Department of Biology or of the Department of Psychology (other than the Supervisor) must be on the Examination Committee, along with one other representative from among the faculty members currently associated with Cognitive and Behavioural Ecology and an additional representative from either within or outside of Cognitive and Behavioural Ecology. The candidate's Supervisor will be on the Examination Committee with a maximum of one other member from the candidate's supervisory committee permitted to serve when appropriate. The Examination Committee is chaired by the Chair of the Cognitive and Behavioural Ecology Committee. The examination will include a comprehensive, integrative review and critical evaluation of novel ideas with regard to a topic in Animal Behaviour or Behavioural Ecology. The review topic is assigned by the Examination Committee, which also determines the submission date for the paper, and the date of the examination. Normally, the student will write the paper in 10 weeks, and the oral examination will occur within two to three weeks of the paper's submission. This paper will form the basis of a public seminar. The Examination Committee will question the candidate about the paper, the topic and its broader relationship with Cognitive and Behavioural Ecology.

### 32.6.3 Courses

Biology 7220 Quantitative Methods in Biology  
 Cognitive and Behavioural Ecology 6240 Special Topics  
 Cognitive and Behavioural Ecology 6350 Behavioural Ontogeny  
 Cognitive and Behavioural Ecology 6351 Behavioural Ecology and Sociobiology  
 Cognitive and Behavioural Ecology 6992 Doctoral Seminar  
 Cognitive and Behavioural Ecology 7000 Field and Lab Methods in Animal Behaviour and Behavioural Ecology  
 Psychology 6000 Advanced Statistics in Psychology

**Table of Credit Restrictions - Doctor of Philosophy in Cognitive and Behavioural Ecology**

(Credit may be obtained for only one course from each of the pairs of courses listed in this table.)

Present Course	Former Course
CABE 6240	Biopsychology 6240
CABE 6350	Biopsychology 6350
CABE 6351	Biopsychology 6351
CABE 7000	Biopsychology 7000

**32.7 Computer Science**

www.mun.ca/science  
www.mun.ca/computerscience

**Professor and Head of the Department**

W. Banzhaf

The degrees of Master of Science and Doctor of Philosophy are offered in Computer Science.

**32.7.1 Program of Study**

1. Admission into the Ph.D. program in Computer Science is normally restricted to candidates holding a Master's Degree (or equivalent) in Computer Science or a closely related area. Others may be considered for admission. See **Qualifications for Admission** of the **General Regulations**. International applicants are strongly encouraged to submit results of the (general) Graduate Record Examination (GRE) Test.
2. Each candidate for the Ph.D. shall complete a program of graduate courses prescribed by the supervisory committee. The normal minimum will be 9 credit hours.
3. The candidate shall take the Comprehensive Examination within the time limits specified in **Comprehensive Examinations** of the **General Regulations**. Students should consult the Departmental guidelines for a detailed description of the content of the Comprehensive Examination.
4. The Ph.D. Degree program will conclude with an oral defence of the thesis as described in **Theses and Reports** of the **General Regulations**.

**32.7.2 Courses**

A selection of the following graduate courses will be offered to meet the requirements of candidates, as far as the resources of the Department will allow.

6758-6769 Special Topics in Computer Applications  
6770-6790 Special Topics in Computer Science  
690A/B Research Methods in Computer Science  
6901 Applied Algorithms (*credit may be obtained for only one of 6901 and 6783*)  
6902 Computational Complexity (*credit may be obtained for only one of 6902 and 6743*)  
6903 Concurrent Computing  
6904 Advanced Computer Architecture (*credit may be obtained for only one of 6904 and 6722*)  
6905 Software Engineering (*credit may only be obtained for one of 6905 or 6713*)  
6906 Numerical Methods (*credit may only be obtained for one of 6906 or 6731*)  
6907 Introduction to Data Mining (*credit may be obtained for only one of 6907 and 6762*)  
6908 Database Technology and Applications (*credit may be obtained for only one of 6908 and 6751*)  
6909 Fundamentals of Computer Graphics (*credit may be obtained for only one of 6909 or 6752*)  
6910 Services Computing, Semantic Web and Cloud Computing  
6911 Bio-inspired Computing  
6912 Autonomous Robotics (*credit may be obtained for only one of 6912 and 6778*)  
6913 Bioinformatics  
6914 3D Modelling and Rendering  
6915 Machine Learning  
6916 Security and Privacy  
6918 Digital Image Processing (*credit may be obtained for only one of 6918 or 6756*)  
6921 Syntax and Semantics of Programming Languages (*credit may be obtained for only one of 6921 or 6711*)  
6922 Compiling Methods (*credit may be obtained for only one of 6922 and 6712*)  
6924 Formal Grammars, Automata and Languages  
6925 Advanced Operating Systems  
6926 Performance Evaluation of Computer Systems  
6928 Knowledge-Based Systems (*credit may be obtained for only one of 6928 or 6755*)  
6929 Advanced Computational Geometry (*credit may be obtained for only one of 6929 or 6745*)  
6930 Theory of Databases (*credit may be obtained for only one of 6930 or 6742*)  
6931 Matrix Computations and Applications (*credit may only be obtained for one of 6931 or 6732*)  
6932 Matrix Computations in Control (*credit may only be obtained for one of 6932 or 6738*)

## 32.8 Earth Sciences

www.mun.ca/science  
www.mun.ca/earthsciences

### Professor and Head of the Department

J. Hanchar

The degrees of Master of Science and Doctor of Philosophy are offered in Earth Sciences (Geology) and Earth Sciences (Geophysics) by full-time and part-time study.

### 32.8.1 Program of Study

1. Admission into a Ph.D. program in Earth Sciences (Geology) and Earth Sciences (Geophysics) is normally restricted to candidates holding a Master's Degree or its equivalent. Candidates holding B.Sc. (Honours) degrees who show evidence of exceptional ability may be considered for a direct entry into a Ph.D. program. In exceptional circumstances, a candidate with a B.Sc. (Honours) Degree who has spent not less than 12 months in an M.Sc. Degree program may be recommended for transfer into a Ph.D. program, provided that the candidate can demonstrate, to the satisfaction of the Department of Earth Sciences, his/her ability to pursue research at the doctoral level.
2. A candidate for the Ph.D. Degree is normally required to complete 6 credit hours in addition to the credit hours required for the M.Sc. Degree. The courses must be selected from the overview and general courses below or with the approval of the supervisory committee and Head of Department, other graduate level courses including those offered by other departments. Depending on background and/or area of specialization, a candidate also may be required to complete additional courses in earth sciences or related subjects. All course requirements should be completed within 12 months from the date of the first registration in the Ph.D. program.
3. The Ph.D. Comprehensive Examination shall normally be taken in the first semester of registration in the Ph.D. program.  
Note: *Detailed descriptions of the Ph.D. Comprehensive Examination are available upon request from the General Office of the Department of Earth Sciences.*
4. The Ph.D. Thesis Proposal Examination shall normally be taken in the second semester of registration in the Ph.D. program.  
Note: *Detailed descriptions of the Ph.D. Thesis Proposal Examination are available upon request from the General Office of the Department of Earth Sciences.*
5. The Ph.D. Degree program will conclude with a thesis examination and an oral defense of thesis as prescribed in the **General Regulations, Theses and Reports**.
6. The Supervisor and the Head of the Department may recommend to the Dean of Graduate Studies that the program of a candidate who is not making satisfactory progress be terminated, in accordance with **General Regulation, Termination of a Graduate Program**.
7. A candidate is required to give an oral presentation to the Department on the results of his/her research. The presentation must be given during the second or third year of the program.

### 32.8.2 Courses

A selection of courses will be offered to meet the requirements of candidates as far as the resources of the Department will allow.

#### Overview Courses

7110 Physics of the Solid Earth  
7120 Crustal Geophysics  
7300 Changes in Global Paleoenvironment  
7400 Tectonic Regimes  
7410 Engineering and Environmental Geology  
7500 Chemical Fluxes in the Earth  
7810 Paleocology (*same as former 6810. credit may be obtained for only one of 7810 or 6810*)

#### General Courses

6070 Quantitative Techniques in Mineralogy and Metamorphic Petrology  
6105 Advanced Field Course in Applied Geophysics (may be offered in accelerated format)  
6141 Rotation of the Earth  
6142 Theory of Global Geodynamics  
6152 Paleomagnetism  
6171 Advanced Exploration Seismology  
6172 Borehole Seismic  
6175 Gravity and Magnetic Methods  
6177 Mathematical Formulations of Seismic Wave Phenomena  
6210 Genesis of Mineral Deposits  
6320 Marine Geology  
6400 Flow and Transport in Fractured Rock  
6410 Advanced Engineering and Environmental Geology  
6420 Deformation Mechanisms  
6500 Stable Isotope Geochemistry  
6510 Trace Element Geochemistry  
6520 Methods in Advanced Research in Geochemistry  
6540 Radiogenic Isotope Geochemistry  
6550 Biogeochemistry  
6600 Petroleum Geology  
6740 Modern and Ancient Sedimentary Environments  
6750 Sequence Stratigraphy  
6820 Palynology and Paleobotany  
6900-6999 Special Topics in Earth Sciences

## 32.9 Education

www.mun.ca/educ

### Professor and Dean

K. Anderson

The degrees of Master of Education and Doctor of Philosophy are offered in Education.

The Degree of Doctor of Philosophy in Education is offered to qualified candidates, normally by full-time study. The **General Regulations** of the School of Graduate Studies of Memorial University of Newfoundland outlined in the current Calendar, and the Degree Regulations of the Faculty of Education outlined below will apply.

### 32.9.1 Admission to the Ph.D. Program

General qualifications for admission to the Ph.D. Programs at Memorial University of Newfoundland are set out in the University Calendar under School of Graduate Studies, General Regulation **Qualifications for Admission, Ph.D. Program**.

In addition, the following admission requirements apply:

1. an 'A' standing in a Master's Degree in Education or in an equivalent Master's Degree from an accredited university;
2. evidence of scholarly work, such as a master's thesis, directed research project, or qualifying research paper;
3. normally, completion of two years of professional experience in an educational setting.

### 32.9.2 Supervisory Committee

Each candidate will have a supervisory committee comprised of a minimum of three members, at least two of whom shall be members of the Faculty of Education. The thesis Supervisor shall be a faculty member in the Faculty of Education, Memorial University of Newfoundland.

### 32.9.3 Program of Study

#### 1. Courses

- a. Students are required to successfully complete two courses on the doctoral program.

Education 701A/B - Doctoral Seminar in Education: Area of Specialization

Education 702A/B - Advanced Educational Research

Students will normally register for the 'A' portion of the above-noted courses in the relevant Fall semester of their program of study and the corresponding 'B' portion of the course in the following Winter semester. A grade of NC (No Grade Expected) will be assigned to the 'A' portion of each of these courses.

- b. Based on a consideration of educational background and research interest, students may be required to complete (or have completed at the masters level) as many as two (2) additional courses in research related to their program focus and specialty.
- c. Normally, no more than four courses may be undertaken on a candidate's program.
- d. Education 7003-30 - Special Topics (offered as required)

#### 2. Comprehensive Examination

The candidate shall undertake a written and an oral comprehensive examination, which will follow General Regulation **Comprehensive Examinations, Ph.D. Comprehensive Examination** which sets out the procedures for the comprehensive examination.

- a. A candidate in a Ph.D. program in Education shall normally take the written Comprehensive Examination prior to the seventh semester of the program. The candidate will have completed required courses prior to taking the Comprehensive Examination. In preparation for the Comprehensive Examination, the doctoral candidate, with the guidance of the candidate's Supervisor, will undertake study of the sub-disciplines/areas of concentration identified by the candidate and supervisory committee and approved by the Doctoral Committee. Normally, these will include the candidate's area of concentration and two additional sub-disciplines/areas of concentration.
- b. Such study of sub-disciplines will normally include but not be limited to developing a reading list of important historical and current publications within the sub-disciplines, identifying emerging research emphases within the sub-disciplines, and writing scholarly review papers of these publications.
- c. In preparation for the written comprehensive examination, the doctoral candidate and the supervisory committee will agree on the topics to be examined. The examination will be written over a three-week period.
- d. Normally, the oral comprehensive examination will occur within six weeks of the written examination, which if judged to be successful by the Comprehensive Examination Committee, will form the basis of an oral comprehensive examination.
- e. The procedure for scheduling the Comprehensive Examination shall be initiated by the candidate's Supervisor who will notify, in writing, the Dean of Education of the candidate's readiness. The date of both the written examination and the oral examination will be determined by the Dean of Education. The candidate will receive a written notice of the scheduled date for both examinations from the Dean of Education.
- f. The Comprehensive Examination Committee shall be appointed by the Dean of Graduate Studies in accordance with School of Graduate Studies General Regulation **Comprehensive Examination, Ph.D. Comprehensive Examination** on the recommendation of the Dean, Faculty of Education. There will be six members of the Comprehensive Examination Committee as follows:

Dean of Education or delegate (Chair)

Chair of the Doctoral Committee of the Faculty Council of Education

Candidate's Supervisor

Second member of candidate's supervisory committee

Dean of School of Graduate Studies or delegate (non-voting)

Member of the Faculty of Education or educational community selected by the Dean of Education.

In the event that the Chair of the Doctoral Committee is the candidate's Supervisor, the Dean of Education shall appoint an additional member.

#### 3. Ph.D. Thesis Regulations

- a. The candidate must submit a thesis proposal based on his/her own research interest to all members of the Supervisory

Committee for critical evaluation. Normally, the proposal must be approved prior to the eighth semester of the program. The Chairperson of the Supervisory Committee will inform the candidate within one month of its acceptance, rejection or acceptance with recommended changes.

- b. If the proposal is not acceptable, the candidate will normally be permitted a second attempt. The revised proposal must be submitted and deemed acceptable by the Supervisory Committee within a semester. Failure to resubmit within this time period will lead to termination of the candidate's program.
- c. The thesis shall give evidence of the candidate's ability to carry out independent and original research, develop the necessary theoretical and methodological framework and analyses, and present the findings in a scholarly manner.
- d. Each candidate will be required to present a seminar on her/his thesis research to the Faculty.
- e. Ph.D. program will conclude with the examination and oral defence of the completed thesis in accordance with the appropriate sections of the General Regulation **Theses and Reports, Evaluation of Ph.D. Theses** governing the School of Graduate Studies.

### 32.9.4 Courses

701A/B Doctoral Seminar in Education: Area of Specialization (*credit may not be obtained for 701A/B and the former 7001*)

702A/B Advanced Educational Research (*credit may not be obtained for 702A/B and the former 7002*)

7003-30 Special Topics

## 32.10 Engineering and Applied Science

www.engr.mun.ca

### Professor and Dean

G. Naterer

The degree of Doctor of Philosophy (Ph.D.) is offered in the Faculty of Engineering and Applied Science and may be obtained either through full-time or part-time studies. The Ph.D. degree can be obtained through programs in Civil Engineering, Computer Engineering, Electrical Engineering, Mechanical Engineering, Ocean and Naval Architectural Engineering, Oil and Gas Engineering, and Process Engineering.

### 32.10.1 Qualifications for Admission

Admission to the Ph.D. program is limited and competitive. All applicants must meet the minimum qualifications described in the **General Regulations** for the School of Graduate Studies. Admission is normally restricted to candidates holding a Master's Degree in Engineering or a related area. Decisions on admission, however, will also take into account such things as the applicant's rank in class, referees' assessments, general performance throughout the applicant's previous academic programs, and the availability of supervisors in the area of the applicant's interest. In cases of demonstrated ability, a student enrolled in the M.Eng. program may be allowed to transfer to the Ph.D. program without the completion of all the M.Eng. Degree requirements. As well, in exceptional cases, direct entry to the Ph.D. program, after completion of a Bachelor's Degree in Engineering or a related area, is possible.

Normally, applicants will be considered in January for admission for the following September. In special cases, applicants may also be considered in April and August. Applications should be made sufficiently far in advance to permit the University to obtain all relevant documents and review the application.

### 32.10.2 Program of Study and Research

A Ph.D. program shall normally consist of three components:

1. a minimum of 6 credit hours consisting of graduate courses recommended by the student's supervisory committee,
2. a comprehensive examination as detailed in **Regulations for Ph.D. Comprehensive Examination**, and
3. a thesis satisfying the requirements of the **General Regulations** for the School of Graduate Studies.

In cases of direct entry after a Bachelor's Degree or promotion from a Master's program before fulfilment of the Master's course requirements, it is likely that the student will be required to take more credit hours than the normally required minimum. In such cases, the requirements for the course component of the student's program will be reviewed on an individual basis by the student's supervisory committee and the Dean of the Faculty of Engineering and Applied Science.

### 32.10.3 Regulations for Ph.D. Comprehensive Examination

#### Timing

A candidate registered in the Ph.D. Program shall normally take the Comprehensive Examination within four semesters of the start of his/her program. The candidate must have successfully completed all required courses prior to the Comprehensive Examination. The Comprehensive Examination Committee shall be appointed by the Dean of Graduate Studies on the recommendation of the Dean of Engineering and Applied Science, normally within three semesters of the start of the student's program.

The Examination Committee shall be appointed by the Dean of Graduate Studies on the recommendation of the Dean of Engineering and Applied Science, normally within three semesters of the start of the student's program.

#### Examination Procedure

The Comprehensive Examination (as prescribed under **General Regulations, Comprehensive Examinations, Ph.D. and Psy.D. Comprehensive Examination**), shall be an oral examination that is open to the University community; however, only members of the Examination Committee are permitted to ask questions. Following the examination, the Examination Committee shall meet in camera to decide a recommendation for the Committee Chair to forward to the Dean of Graduate Studies. The possible recommendations in accordance with **General Regulations, Comprehensive Examinations, Ph.D. and Psy.D. Comprehensive Examination** are "pass with distinction", "pass", "re-examination", or "fail".

### 32.10.4 Ph.D. Thesis Regulations

1. Upon successful completion of the Comprehensive Examination, and normally prior to the end of the sixth semester in the program, the candidate must submit a thesis proposal to the Supervisory Committee for evaluation and approval. The proposal shall consist of
  - 1) a written research proposal, normally of no more than 10,000 words, that should clearly define the research problem, survey literature, present the research method or experimental design, and may include a summary of results already obtained, and
  - 2) a 20 to 30 minute presentation. The candidate should submit the written proposal at least one month prior to the presentation which is

open to the University community.

2. The presentation will be chaired by the Dean of Engineering and Applied Science or delegate. Immediately following the presentation, the Supervisory Committee shall question the candidate regarding the proposal and shall then meet in camera to assess the proposal. Assessment shall result in one of the following three outcomes: (1) accept; (2) accept with changes, or (3) reject. The results of this assessment shall be provided to the student following the meeting. Assessments of 'accept with changes' or 'reject' shall be accompanied by written comments within one week of the proposal presentation.
3. If the proposal is rejected, the candidate shall be permitted to submit a second proposal. This proposal must be submitted and deemed acceptable by the Supervisory Committee within four months of the original proposal presentation. Failure to submit an acceptable second proposal within the time period shall lead to termination of the candidate's program.
4. The Ph.D. thesis shall constitute an independent and original research contribution.
5. The Ph.D. thesis shall be evaluated according to the process established in **General Regulations, Theses and Reports, Evaluation of Ph.D. and Psy.D. Theses** governing the School of Graduate Studies.

### 32.10.5 Courses

For a list of graduate courses offered by the Faculty of Engineering and Applied Science refer to the list of "Core Courses" and the list of "Other Courses" offered for the Master of Engineering program.

### 32.11 English

[www.mun.ca/hss](http://www.mun.ca/hss)

[www.mun.ca/english](http://www.mun.ca/english)

#### Associate Professor and Head of the Department

J. Lokash

The degrees of Master of Arts and Doctor of Philosophy are offered in English.

Candidates for the M.A. in English may complete the program as either part-time or full-time students. Candidates for the Ph.D. in English must be in attendance as full-time students for at least three semesters of the program.

#### 32.11.1 Program of Study

1. Admission to the Ph.D. in English is limited and competitive. Applicants should have a Master's Degree in English or its equivalent from a recognized university and should have an outstanding academic record.
2. All candidates will be required to complete 15 credit hours in graduate courses. These courses will be selected by the candidate in consultation with the candidate's Supervisory Committee.

While candidates will normally be free to choose graduate courses of interest to them, it will be a primary responsibility of their Supervisory Committees to ensure that any serious deficiencies in their record of previous courses, graduate and undergraduate, are remedied, particularly in the area of proposed thesis research.

3. Candidates who have not previously taken English 7003 or its equivalent will take English 7003, which will count as one of the required courses for the Ph.D. Students who have taken English 7003 or its equivalent before entering the Ph.D. program must still complete 15 credit hours.
4. Candidates who have not completed English 4900 or English 5900 or an equivalent course will be required to complete English 5900, which will not count as one of the required courses for the Ph.D. The course will be graded "pass" or "fail". As in other graduate courses a grade of 65B or above is considered a pass.
5. Candidates must submit a thesis proposal which includes a statement of topic, a working title, a plan of research, and a preliminary bibliography. The thesis proposal should be approved by the Supervisory Committee and submitted to the Departmental Graduate Studies Committee for its approval before the Comprehensive Examination and before the end of the fifth semester. The Departmental Graduate Studies Committee shall return the thesis proposal to the candidate no later than one month after receiving it.
6. Reading knowledge of a second language will be required of all candidates. Reading knowledge is defined as a minimum B grade in a second-year language course taken within the previous five years, a passing grade in an approved second-language course for graduate students, or performance satisfactory to the Department in an arranged reading proficiency test (in which a dictionary may be used).

The language requirement should be completed before the Comprehensive Examination is taken.

The second language will normally be French. In exceptional circumstances, and on the recommendation of the Supervisory Committee and the Departmental Graduate Studies Committee, a language other than French may be substituted.

The Supervisory Committee may also require a demonstrated reading knowledge of an additional language (other than French or the substituted language) if such knowledge is deemed necessary for the student's research interests.

7. The Ph.D. Comprehensive Examination in English will have written and oral components, will have two parts, and will be prepared by the candidate's Comprehensive Examination Committee. The Comprehensive Examination Committee will determine the submission dates for papers and the dates of oral examinations. The Ph.D. Comprehensive Examination in English shall in all circumstances be in accordance with General Regulation **Comprehensive Examinations, Ph.D. Comprehensive Examination**.

The candidate's Comprehensive Examination Committee will include the Head (or the Head's delegate, usually the Graduate Coordinator), the Dean of the School of Graduate Studies (or delegate), the candidate's Supervisor, and three other members of the Department.

The examination shall take place before the end of the seventh semester.

The first part of the examination will be in a complementary area (Complementary Examination) and the candidate will have a choice of either writing an essay in response to questions determined by the Comprehensive Examination Committee or completing a set of assignments related to teaching in the field.

The second part of the examination will be in the candidate's thesis area (Thesis Area Examination) and will require the candidate to write in response to questions determined by the Comprehensive Examination Committee and that paper will form the basis of a departmental presentation. The Comprehensive Examination Committee will orally examine the candidate about the paper topic and the broader relationship to the thesis area.

All examinations, both written and oral, will comply with Departmental Guidelines.

Candidates will be graded "pass with distinction", "pass", "re-examination", or "fail." Candidates who are marked for "re-examination"

will be re-examined in the area or areas in which the Comprehensive Examination Committee has determined that the candidate's performance is deficient. The nature of this re-examination (and whether it will be written or oral) is left to the discretion of the Comprehensive Examination Committee.

### 32.11.2 Courses

A selection of the following graduate courses will be offered to meet the requirements of candidates, as far as the resources of the Department will allow.

- Notes: 1. *Since it is impossible to list in detail the many topics that may from time to time be offered, the titles below refer only to the major periods and general subject areas in which specific courses may be available. The content and approach in specific courses will vary according to the research interests of students and faculty involved in the course. Students should consult the Department's annual Graduate Student Guide (or the Graduate Co-ordinator) for detailed descriptions of specific course offerings. Normally, no fewer than 30 credit hours in graduate courses are offered in any given academic year.*
2. *English 5900 cannot be counted as one of the required graduate courses in any program.*
3. *All students will normally take English 7003 - Trends in Contemporary Literary Theory, usually in their first semester.*
4. *Students who took graduate courses in English at Memorial University of Newfoundland before 1997 should consult with the Department before selecting further courses.*

5900 Bibliography and Research Methods  
 6403 Etymology (same as Linguistics 6403)  
 6420 English Dialectology I  
 6421 English Dialectology II  
 6999 Master's Essay (for non-thesis students)  
 7003 Trends in Contemporary Critical Theory  
 7004 English Phonology and Morphology  
 7005 The Syntactic Structure of English  
 7020-25 Special Topics in English  
 7032 Studies in Old English I  
 7033 Studies in Old English II  
 7034 Studies in Middle English I  
 7035 Studies in Middle English II  
 7036 Studies in Middle English III  
 7037 Studies in 16th-Century Literature I  
 7038 Studies in 16th-Century Literature II  
 7039 Studies in 16th-Century Literature III  
 7040 Studies in 16th-Century Literature IV  
 7041 Studies in 17th-Century British Literature I  
 7042 Studies in 17th-Century British Literature II  
 7043 Studies in 17th-Century British Literature III  
 7044 Studies in 17th-Century British Literature IV  
 7045 Studies in 18th-Century British Literature I  
 7046 Studies in 18th-Century British Literature II

## 32.12 Environmental Science

[www.mun.ca/science](http://www.mun.ca/science)

### Board of Study

Dr. J. Wroblewski, Department of Ocean Sciences - Interim Chair  
 Dr. C. Campbell, Division of Science, Grenfell Campus, ex-officio  
 Dr. T. Chapman, Department of Biology  
 Dr. B. Chen, Faculty of Engineering and Applied Science  
 Dr. W. Montevicchi, Department of Psychology  
 Dr. C. Tarasov, Department of Physics and Physical Oceanography  
 Dr. S. Ziegler, Department of Earth Sciences

### 32.12.1 General Information

1. The Environmental Science Program is an interdisciplinary graduate program involving the departments of the Faculty of Science, the Faculty of Humanities and Social Sciences, the Faculty of Medicine and the Faculty of Engineering and Applied Science. There are three Environmental Science Graduate Degree streams: the Master of Science (M.Sc., Environmental Science), Master of Environmental Science (M.Env.Sci.), and the Doctor of Philosophy (Ph.D., Environmental Science). The program is available on a full or part-time basis.
2. The program is administered by a Board of Studies appointed by the Dean of Science. Supervisors of graduate students in the program include faculty from the Faculty of Science, the Faculty of Humanities and Social Sciences, the Faculty of Engineering and Applied Science, the Faculty of Medicine, and the Environmental Science Program at the Grenfell Campus, as well as adjunct appointees to the program (as a co-supervisor).

### 32.12.2 Program of Study

1. The Doctor of Philosophy (Ph.D., Environmental Science) is a research degree which includes a doctoral dissertation and course work. Normally, students entering the Ph.D. program in Environmental Science will have a M.Sc. degree from an institution recognized by the Senate. Students in the Master of Science (Environmental Science) program, after a minimum of 12 months in their program of studies, may request a transfer to the Ph.D. program. Final decision for transfer from the M.Sc. program to the Ph.D. program rests with the Dean of the School of Graduate Studies. There are two courses (6 credit hours) required for the doctoral program. All students take Environmental Science 6010 and those with a disciplinary M.Sc. degree in Science from a recognized university also take Environmental Science 6000. Other courses tailored for individual students are included in the student's program by the Dean of Graduate Studies on the recommendation of the Chair of the Board of Studies.
2. The comprehensive examination should be taken on completion of all course work. An Examination Committee will be struck in accordance with the **General Regulations**. At least two members of the Board of Studies must be on the Examination Committee. The candidate's Supervisor will be on the Examination Committee and will be the only examiner from the candidate's Thesis Supervisory Committee. The Head of the Department of the Supervisor or his/her delegate is invited to serve on the Comprehensive Examination Committee. The Examination Committee is chaired by the Chair of the Environmental Science Program. The examination will be both written and oral. The topic is assigned by the Examination Committee, which also determines the submission date for the paper, and the date of the examination. Normally, the student will write the paper within four months, and the oral examination will occur within six weeks of the paper's submission. This paper will form the basis of a public seminar. The Examination Committee will question the candidate about the paper, the topic and its broader relationship with Environmental Science.
3. The doctoral thesis is based on the results of systematic, independent research on an approved scientific topic. To ensure the research is interdisciplinary, the supervisory committee must be made up of members from at least two different departments. The candidate will be required to present a Ph.D. research proposal to the supervisory committee. The completed thesis will be evaluated according to the **General Regulations** of the School of Graduate Studies. It must contribute significantly to knowledge in the field of Environmental Science.

### 32.12.3 Courses

6000 Environmental Science and Technology  
 6001 Earth and Ocean Systems  
 6002 Environmental Chemistry and Toxicology  
 6003 Applied Ecology  
 6004 Environmental Pollution and Mitigation (*cross-listed as ENGI 9601*)  
 6007 Environmental Risk Assessment (*cross-listed as ENGI 9609*)  
 6008 Air Pollution (*cross-listed as ENGI 9624*)  
 6010 Environmental Seminar  
 6201-6210 Selected Topics in Environmental Science

## 32.13 Ethnomusicology

[www.mun.ca/hss](http://www.mun.ca/hss)  
[www.mun.ca/folklore](http://www.mun.ca/folklore)  
[www.mun.ca/music](http://www.mun.ca/music)

### Associate Professor and Dean

I. Sutherland

The Doctor of Philosophy program in Ethnomusicology is administered by the School of Music in consultation with the Department of Folklore, and generally in response to recommendations from an Interdisciplinary Advisory Committee with representation from both academic units, chaired by the Program Co-ordinator.

The Degree of Ph.D. in Ethnomusicology is offered by part-time and full-time study. This program is a research Degree, generally involving extended fieldwork. The resources of the Memorial University of Newfoundland Folklore and Language Archive are available to graduate students in Ethnomusicology.

### 32.13.1 Qualifications for Admission

Applicants may be admitted to the program if they have at least a B+ average in a M.A. Degree in Ethnomusicology, another field of Music, or other relevant discipline in the Humanities or Social Sciences with evidence of specialization in music. Applicants from a

discipline other than Music will be expected to demonstrate the following skills:

- Competent performance in any musical tradition, as judged by a musician knowledgeable about that tradition.
- Knowledge of culturally appropriate language for discussion of performance techniques in that tradition.
- Ability to discuss musical details on the basis of aural and/or written sources, as appropriate to that tradition.

Candidates for admission may, at the discretion of the Interdisciplinary Advisory Committee, be required to write diagnostic examinations measuring skills and knowledge in music literacy, theory, or aural perception. Candidates with deficiencies in any of these areas may be required to take remedial course work prior or in addition to the required program.

Upon completion of M.A. course work, students who have attained an A average may wish to be considered for transfer to the Ph.D. program. Students who seek this option must apply to the Interdisciplinary Advisory Committee to be considered for transfer one month prior to the completion of their M.A. courses or by the end of the 5th semester (see General Regulation **Qualifications for Admission, Master's Program**).

### 32.13.2 Program of Study

The Ph.D. program may be completed within twelve to fifteen consecutive semesters of full-time study, depending on fieldwork requirements. The Degree is normally taken by completing course work, comprehensive examinations, a language proficiency requirement, and a Ph.D. thesis, defended in accordance with General Regulation **Theses and Reports** of the School of Graduate Studies.

1. Students must complete a minimum of 21 credit hours of course work. If required courses have been completed at the M.A. level, electives may be substituted (with approval of the Interdisciplinary Advisory Committee). The required courses are:
  - a. Music 8001; Folklore 6030; and Folklore 7100.
  - b. Twelve credit hours of electives selected from courses listed below or from relevant courses offered in another discipline (with the approval of the Interdisciplinary Advisory Committee). Ph.D. students may take up to two courses (6 credit hours) in a cognate discipline.
  - c. Reading proficiency in one language other than English, relevant to the research area, demonstrated to the satisfaction of the Interdisciplinary Advisory Committee. The choice of language must be approved by the Interdisciplinary Advisory Committee. The language exam should normally be completed before the comprehensive exams.
  - d. Further courses beyond the minimum number may be required, depending on the background and needs of the student.
2. Comprehensive examinations will be administered in a major area, minor area, and theoretical/interdisciplinary area; a component of the comprehensive examination will test audio-visual skills. Bibliographies and discographies for several focussed topics will be developed by the student in consultation with his/her supervisory committee and will be the basis of examination questions. The written portion of the examination will be scheduled over a one-week period. The Comprehensive Examination Committee will normally schedule a consultation with the student to discuss the written essays within one month following the completion of the written examination. For further information see General Regulation **Comprehensive Examinations, Ph.D. Comprehensive Examination**.
3. Students must complete a thesis, examined and defended in accordance with General Regulation **Theses and Reports** of the School of Graduate Studies. A thesis proposal, including a working title, statement of purpose and research scope, outline of theoretical and methodological approach, working plan, and preliminary bibliography, together with proposed membership of the supervisory committee, must be submitted to the Interdisciplinary Advisory Committee no later than the fifth semester of study. The thesis shall demonstrate the candidate's ability to carry out original and independent research, develop the necessary theoretical and methodological framework, and present the findings in a scholarly manner.

### 32.13.3 Courses

#### Theories and Methods:

Music 6807 Video Documentary Production (*credit may be received for only one of Music 6807 and Music 7803*)  
 Music 7001 Research Problems and Methods in Ethnomusicology  
 Music 7803 Radio Documentary Production (*credit may be received for only one of Music 6807 and Music 7803*)  
 Music 8001 Theoretical Issues in the Study of Music  
 Folklore 6010 Survey of Folklore Genres and Processes  
 Folklore 6020 Field and Research Methods  
 Folklore 6030 Folklore Theories  
 Folklore 6040 Feminist Theories: Perspectives and Issues  
 Folklore 6080 Vernacular Theories  
 Folklore 6090 Ethnology  
 Folklore 7100 Advanced Folkloristics II: Research and Ethnography

#### Form and Performance:

Music 7005 Performance Option  
 Folklore 6100 Song and Music  
 Folklore 6120 Ballad  
 Folklore 6130 Folk Music Canons and Documentary Sound Recordings  
 Folklore 6200 Folktale  
 Folklore 6210 Legend  
 Folklore 6220 Personal Experience Narrative  
 Folklore 6250 Language and Play  
 Folklore 6260 Ethnography of Communications  
 Folklore 6300 Ethnography of Belief  
 Folklore 6310 Health Systems  
 Folklore 6350 Custom  
 Folklore 6360 Traditional Drama  
 Folklore 6400 Material Culture  
 Folklore 6410 Vernacular Architecture  
 Folklore 6420 Art and the Artifact  
 Folklore 6430 Food and Culture  
 Folklore 6720 Folklore and Literature

#### Area and Genre Studies:

Folklore 6120 Ballad

Folklore 6600 Folklore of Newfoundland  
 Folklore 6610 Folklore of Canada  
 Folklore 6620 Folklore of the United States  
 Folklore 6630 Folklore of the British Isles  
 Folklore 6770 The Global and the Local

**Social Identities:**

Music 7006 Urban Ethnomusicology  
 Music 7007 Music in the Study of Gender, Race and Class  
 Music 7009 Music and Place  
 Music 7001 Research Problems and Methods in Ethnomusicology  
 Music 7802 Music and Intercultural Processes  
 Folklore 6510 Occupational Folklore  
 Folklore 6551 Indigenous Expressive Cultures in Cross-cultural Encounter  
 Folklore 6730 Folklore and Gender  
 Folklore 6780 Ethnicities

**Independent Study:**

Music 7026-29 Directed Reading in Ethnomusicology  
 Folklore 6570-79 Reading Course in Folklore

**Special Topics:**

Music 6800-09 Special Topics in Music (excluding Music 6807)  
 Music 7800-09 Special Topics in Music (excluding Music 7802 and 7803)  
 Folklore 6511-29 Special Topics in Folklore  
 Folklore 6570-79 Reading Course in Folklore

**Public and Applied Ethnomusicology and Folklore:**

Music 6750 Music Industries Internship (2 credit hours)  
 Folklore 6740 Public Sector Folklore  
 Folklore 6760 Archiving  
 Folklore 6790 Museums: Perspectives and Practices  
 Folklore 6800 Applied Folklore

**Interdisciplinary Perspectives:**

Music 7008 Media Studies  
 Folklore 6700 Folklore and Culture  
 Folklore 6710 Oral Tradition and Oral History  
 Folklore 6750 Popular Culture: Theory and Debate

## 32.14 Folklore

[www.mun.ca/hss](http://www.mun.ca/hss)  
[www.mun.ca/folklore](http://www.mun.ca/folklore)

**Associate Professor and Head of the Department**

C. Thorne

The Degree of Doctor of Philosophy in Folklore is offered by part-time and full-time study and is primarily a research Degree. The program normally requires extensive fieldwork research in Newfoundland and/or the Maritimes.

Integral to the teaching of the Department of Folklore is the work of the Memorial University of Newfoundland Folklore and Language Archive; see section under **Master of Arts, Folklore**.

### 32.14.1 Program of Study

1. An applicant for admission to the Ph.D. program in Folklore must hold an M.A. Degree in Folklore, or its equivalent as determined by the Head of the Department and the Dean, with an average grade in M.A. courses of not less than 80%.
2. All Ph.D. students in the Folklore program must complete *at least* 18 credit hours in program graduate courses which shall include Folklore 7000 and 7100. Candidates will normally be free to choose graduate courses of interest to them in Folklore or related disciplines, though it will be a primary responsibility of their committees to ensure that any serious deficiencies are made good. At the end of the second semester the program and further status of the candidate will be reviewed.
3. Second Language Requirements:
  - a. All Ph.D. candidates are required to demonstrate an adequate reading knowledge of a second language - normally a common, modern language.
  - b. Reading knowledge is defined as a minimum B grade in a second-year language course taken within the previous five years, or performance satisfactory to the Department in an arranged reading proficiency test.
  - c. The selection of a second language can be based on the student's research requirements.
  - d. The selection of a second language must be made in consultation with the student's faculty advisor or Supervisor. Confirmation that the choice is acceptable must be obtained from the Department.
  - e. The language requirement must normally be fulfilled before a student takes the Ph.D. Comprehensive Examination.
4. Comprehensive Examination for the Ph.D.:
  - a. The Ph.D. Comprehensive Examination shall be administered in accordance with **General Regulations, Comprehensive Examinations**. Candidates will prepare for three examinations by undertaking supervised readings in three fields decided by the Comprehensive Examinations Committee. The basic principle is to integrate knowledge within specific areas of folklore and folklife scholarship. The examination normally will be written with the format to be determined by the Comprehensive Examination Committee in consultation with the student. Assessment will be based on the examination of three papers each of one week duration or three open book examinations each of eight hour duration. The Committee will recommend to the Dean of Graduate Studies a grade of PWD (pass with distinction), PAS (pass), REX (re-examination), or FAL (fail).
  - b. Examination normally will take place only upon the completion of the second language requirements and no earlier than the end of the first year after admission to candidacy but no later than one year after the completion of the program courses. The examination normally will be scheduled in the second semester following the candidate's completion of courses.

## 5. Ph.D. Thesis:

- a. The candidate will normally submit a thesis proposal based on his/her own interests no later than the end of the semester following the completion of comprehensive examinations. The thesis proposal will include a working title, names of preferred Supervisor and two other Committee members, statement of topic, plan of research, statement of methodological and theoretical approach, a brief review of the literature and a preliminary bibliography. The proposal will be circulated to the Department for critical evaluation on the basis of which the candidate will be informed, within one month, by the Supervisor, of its acceptance, rejection, or acceptance with recommended changes.
- b. The thesis shall give evidence of the candidate's ability to carry out independent and original research, develop the necessary theoretical and methodological framework and present the findings in a scholarly manner.

**32.14.2 Courses**

A selection of the following graduate courses will be offered to meet the requirements of candidates, normally after consultation with the Head of the Department or the Graduate Studies Administrator, and as far as the resources of the Department will allow. Courses are structured according to the categories of: Theories and Methods, Issues, Form and Performance, Special Topics, Regional, National and International Heritage, Social Identities, Public and Applied Folklore, Interdisciplinary Perspectives and Required (Ph.D.).

**Theories and Methods**

6010 Survey of Folklore Genres and Processes  
 6020 Field and Research Methods  
 6030 Folklore Theories  
 6040 Feminist Theories: Perspectives and Issues  
 6080 Vernacular Theories  
 6090 Ethnology

**Issues**

6050 Issues in Folkloristics  
 6060 Issues in Folk Literature  
 6070 Issues in Folklife

**Form and Performance**

6100 Song and Music  
 6120 Ballad  
 6130 Folk Music Canons and Documentary Sound Recordings  
 6200 Folktale  
 6210 Legend  
 6220 Personal Experience Narrative  
 6250 Language and Play  
 6260 Ethnography of Communications  
 6300 Ethnography of Belief  
 6310 Health Systems  
 6350 Custom  
 6360 Traditional Drama  
 6370 Ritual, Festival and Public Display  
 6400 Material Culture  
 6410 Vernacular Architecture  
 6420 Art and the Artifact  
 6430 Food and Culture  
 6720 Folklore and Literature

**Special Topics**

6511-29 Special Topics in Folklore  
 6550 Special Research in Folklore  
 6551 Indigenous Expressive Cultures in Cross-Cultural Encounter  
 6552-69 Special Research in Folklore  
 6570-79 Reading Course in Folklore

**Regional, National and International Heritage**

6600 Folklore of Newfoundland  
 6610 Folklore of Canada  
 6620 Folklore of the United States  
 6630 Folklore of the British Isles  
 6640 Traditional Culture of Scotland  
 6650 Culture and Traditions of Ireland  
 6660 Folklore of the Francophone Regions  
 6690 International Folklore

**Social Identities**

6510 Occupational Folklife  
 6730 Folklore and Gender  
 6770 The Global and the Local  
 6780 Ethnicities

**Public and Applied Folklore**

6380 Perspectives on Cultural Tourism  
 6740 Public Sector Folklore  
 6760 Archiving  
 6790 Museums: Perspectives and Practices  
 6800 Applied Folklore

**Interdisciplinary Perspectives**

6700 Folklore and Culture  
 6710 Oral Tradition and Oral History  
 6750 Popular Culture: Theory and Debate

**Required (Ph.D.)**

7000 Advanced Folkloristics I

7100 Advanced Folkloristics II Research and Ethnography

Credit may not be obtained for both 6010 and the former 6110; 6020 and the former 6111; 6030 and the former 6112; 6100 and the former 6430; 6120 and the former 6445; 6300 and the former 6230; 6350 and the former 6230; 6400 and the former 6501; 6720 and the former 6460.

**32.15 Food Science**See **Biochemistry**.**32.16 Geography**[www.mun.ca/hss](http://www.mun.ca/hss)[www.mun.ca/science](http://www.mun.ca/science)[www.mun.ca/geog](http://www.mun.ca/geog)**Professor and Head of the Department**

N. Catto

**32.16.1 Program of Study**

1. To be admitted to the program, an applicant must have completed either a Master of Arts or a Master of Science Degree, or its equivalent, in Geography or a related discipline. In exceptional circumstances, a candidate who has completed either a B.A. (Honours) or B.Sc. (Honours) Degree, and who has spent not less than 12 months in a M.A. or M.Sc. Degree program may apply for transfer into a Ph.D. program. A successful application for transfer will require that the candidate demonstrate to the satisfaction of the Department an ability to pursue research at the doctoral level.
2. The deadline for submission of applications for admission is January 15. Candidates will normally commence their programs in the Fall semester.
3. Research areas for graduate study at the Doctoral level are cultural, political and historical geography, economic geography, resource management, community and regional development, physical geography, and geographic information sciences.
4. An applicant will be admitted to a doctoral program only if a faculty member agrees to act as Supervisor, and at least two other individuals are willing to serve on the supervisory committee.
5. All candidates must successfully complete Geography 6000 and 6001 if these courses, or equivalent courses, have not been included in their Master's program. In addition, all candidates are required to successfully complete a minimum of 3 credit hours in graduate program courses.
6. The supervisory committee may decide that a candidate successfully completes an examination for reading or speaking a language other than English.
7. After the successful completion of all required courses, candidates must take a comprehensive examination which will have both a written and an oral component.
8. Following successful completion of the comprehensive examination the candidate will submit a written research proposal to the supervisory committee. The proposal must then be approved by the Committee prior to the commencement of research by the candidate.
9. Each candidate will be required to present a seminar on their research to the Department.
10. The Ph.D. program will conclude with the examination and oral defence of the completed thesis in accordance with the appropriate sections of the **General Regulations** governing the School of Graduate Studies.

**32.16.2 Courses**

A selection of the following graduate courses will be offered to meet the requirements of candidates as far as the resources of the Department will allow.

6000 Development of Geographical Thought and Practice I

6001 Development of Geographical Thought and Practice II

6002 Directed Readings in Geography

6100 Research Techniques in A Selected Field of Geography I

6101 Research Techniques in A Selected Field of Geography II

6120 Geospatial Modelling and Analysis

6150 Environmental Remote Sensing and Image Analysis

6200 Economic Geography I

6201 Economic Geography II

6204 Sustainable Community and Regional Development

6250 Conservation and Sustainability of Natural Resources

6251 Survey Design, Questionnaire Development and Techniques of Data Collection

6300 Problems in Fisheries Geography

6400 Fluvial Geomorphology

6401 Glacial Geomorphology

6402 Coastal Geomorphology

6410 Climatology

6420 Quaternary Geography

6430 Biogeography

6500 Cultural Geography

6600 Historical Geography

6700 Political Geography

6800 Urban Geography

6821 Advanced Computer Mapping

6900 Graduate Seminar in Regional Geography

6990-95 Special Topics in Geography

## 32.17 Geology

See Earth Sciences.

## 32.18 Geophysics

See Earth Sciences.

## 32.19 History

[www.mun.ca/hss](http://www.mun.ca/hss)  
[www.mun.ca/history](http://www.mun.ca/history)

### Assistant Professor and Head of the Department

T. Bishop Stirling

The degrees of Doctor of Philosophy and Master of Arts are offered in History by full-time or part-time study.

### 32.19.1 Program of Study

1. The Ph.D. Degree in History is offered in the following areas:
  - a. Canadian History
  - b. Maritime History
  - c. Newfoundland History
2. An applicant must hold either a Master's Degree in History or a Bachelor's Degree in History with first-class Honours or their equivalents as determined by the Head of the Department and the Dean.
3. During the first semester, a Ph.D. candidate must successfully complete History 7000 and 7001 if these courses (or their equivalents) have not been included in his/her Master's program. The Supervisory Committee may require the candidate to complete additional graduate courses.
4. A candidate must demonstrate in accordance with regulations established by the School of Graduate Studies a reading knowledge of French before taking the comprehensive examination. On the recommendation of the Supervisory Committee a modern language other than French may be substituted. In addition, the Supervisory Committee may require a demonstrated reading knowledge of a second language other than French or English (or the substitute language).
5. A candidate will undertake supervised reading in fields prescribed by the Department. The Supervisors of these programs of reading, along with the thesis Supervisor, will comprise the student's Supervisory Committee.
6. In the second year of the program, after the successful completion of all required courses, a student must take a Comprehensive Examination, which will have both written and oral components.
7. Following successful completion of the Comprehensive Examination, a student must submit a thesis proposal, deemed acceptable by the Supervisory Committee, to the Department.
8. An interested applicant is urged to consult with the Head of the Department on these prerequisites and other requirements before filing an application for admission.

### 32.19.2 Courses

A selection of the following graduate courses will be offered to meet the requirements of candidates as far as the resources of the Department will allow.

6000 Advanced Studies in Newfoundland History  
6010 Advanced Studies in Canadian History  
6020 Advanced Studies in the History of the United States  
6030 Advanced Studies in French History  
6040 Advanced Studies in British History  
6050 Advanced Studies in German History  
6060 Advanced Studies in North Atlantic History  
6070 Advanced Studies in Social History  
6075 Advanced Studies in Labour and Working Class History  
6080 Advanced Studies in Intellectual History  
6090 Advanced Studies in Women's History  
6095 Advanced Studies in Ethnohistory  
6100 Advanced Studies in Military History  
6105 Advanced Studies in Diplomatic History  
6110 Advanced Studies in Maritime History  
6120 Advanced Studies in Economic and Business History  
6125 Medical Science and Social Responsibility in Health Care: Aspects of Medical History (*Cross-listed as Medicine 6420*)  
6130 Quantification and Measurement in History  
6140-59 Research in Special Topics  
6160-79 Reading Courses (Special Topics)  
6190 Theory and Method  
6200 Masters Seminar I  
6999 Masters Research Paper (12 credit hours)  
7000 Ph.D. Seminar I  
7001 Ph.D. Seminar II

## 32.20 Interdisciplinary

www.mun.ca/sgs

**Associate Professor and Director**

J. Dyer

The Degree of Doctor of Philosophy (Interdisciplinary) is offered by part-time and full-time study.

The **General Regulations** of the School of Graduate Studies and the regulations outlined below will apply.

### 32.20.1 Administration

1. The program shall be administered by a Director, together with the School of Graduate Studies Interdisciplinary Ph.D. Committee (ID Ph.D. Committee). Duties of this committee include recommendation of applications for acceptance into the program.
2. The program of study of each student will be guided for the duration of the program by a Supervisory Committee of either three (3) or five (5) faculty members, appointed by the Dean of Graduate Studies on the recommendation of the ID Ph.D. Committee at the time of admission.

In addition, the Director shall be an ex officio member of each Interdisciplinary Ph.D. Supervisory Committee.

Duties of this Committee shall involve supervising the overall program of study, including the recommendation of appropriate courses, the setting and scheduling of comprehensive examinations, advising on the development of a research proposal and thesis-writing and recommendation of thesis examiners.

The Supervisory Committee is also responsible for recommending fellowship support to the ID Ph.D. Committee and to the Dean of Graduate Studies at the time of admission and throughout the student's program.

3. Normally, the "academic home" for the student is in the Department or faculty/school of the Chair of the Supervisory Committee.

### 32.20.2 Deadlines for Applications

1. The deadline for Fall admission is March 1 for commencement in September, October 1 for commencement in January, and February 1 for commencement in May. Students seeking admission to the program should start preparing their admission file well in advance of the application deadline.

Admissions shall be considered by the ID Ph.D. Committee and recommendations shall be made to the Dean of Graduate Studies.

### 32.20.3 Admission

1. Prospective students should normally hold a Master's Degree and have an excellent academic record. Applications for admission must include:
  - a. Two letters of reference
  - b. A detailed research proposal
  - c. Letters expressing a commitment to the research project and to supervisory duties from three Memorial University of Newfoundland faculty members, one of whom is prepared to assume the role of Chair of the Supervisory Committee and at least one whose unit of primary responsibility is a Ph.D. granting unit.
  - d. Letters of endorsement from the administrative heads of each of the units involved in the proposed program.
  - e. A statement from the University Librarian indicating the adequacy of Library resources to satisfy the demands of the research program.

### 32.20.4 Program of Study

1. **Courses**
  - a. Students are required to complete INTE 902A/B: normally, this course will be completed in the first year.
  - b. In addition to INTE 902A/B, students will normally be required to take 12-18 credit hours of courses to be determined by the Supervisory Committee. These must include at least one course from each participating discipline. Directed reading courses may be included to support the development of the thesis work.
  - c. Where appropriate, extra language and/or methodology courses may be prescribed. See **Evaluation, Evaluation of Graduate Students**, 4. concerning language(s) requirement.
2. **Comprehensive Examination**

The scope and format of the comprehensive examination shall be determined by the Supervisory Committee in consultation with the student and in accordance with the needs of his/her particular program of study. Students will be required to take a comprehensive examination no later than the end of the seventh semester of study and after the completion of all required course work. Comprehensive examinations shall follow procedures in accordance with General Regulation, **Comprehensive Examinations, Ph.D. Comprehensive Examination**, with the exception of 2.
3. **Thesis**
  - a. Students must complete a thesis, examined and defended in accordance with General Regulations of the School of Graduate Studies. The thesis shall give evidence of the candidate's ability to develop independent and original research.

## 32.21 Linguistics

www.mun.ca/hss

www.mun.ca/linguistics

**Associate Professor and Head of the Department**

P. Branigan

The degrees of Master of Arts and Doctor of Philosophy are offered in Linguistics.

### 32.21.1 Program of Study

1. The Degree of Doctor of Philosophy is offered in the following areas:
  - a. Theoretical issues in Core Areas of Grammar (phonetics, phonology, morphology, syntax, semantics);

- b. Languages in which the Department has demonstrated expertise, especially languages of the Newfoundland and Labrador Area;
  - c. Language Acquisition; and
  - d. Language Variation and Language Contact.
2. In order to be admitted to the Ph.D. in Linguistics, a student shall normally hold a Master's Degree in Linguistics. In the case of a student who does not meet the above requirement but who holds a language-oriented Master's Degree, a program of additional linguistics courses, supplementary to those normally considered to be required in the Ph.D. program, may be required.
  3. The program of each candidate must be approved by the Dean of Graduate Studies upon the recommendation of the Supervisory Committee in consultation with the Head of the Department.
  4. Candidates who fulfill the requirement in Clause 2 and who otherwise possess the qualifications of Ph.D. candidates will embark on a program approved on an individual basis. This will normally include not less than 15 credit hours in graduate courses, at least 6 credit hours of which must be at the 7000-level.
  5. Where needed, each program will include appropriate courses to ensure that the student will have completed 9 credit hours from graduate courses in each of two required fields selected from the following:
    - a. Phonetics and Phonology
    - b. Morphology and Syntax
    - c. Language Acquisition
    - d. Sociolinguistics
  6. The student must research and write two comprehensive papers, each to be defended at an oral examination (see Regulation **Comprehensive Examinations, Ph.D. and Psy.D. Comprehensive Examination of the General Regulations**).
    - a. The written examinations consist of two separate research papers. These papers will be submitted to the Examination Committee. At least one of the papers must be in one of the core areas of phonetics/phonology, morphology, syntax or semantics. The topic selected for each paper must obtain the prior approval of the Graduate Studies Committee of the Department. In each of these papers, candidates must demonstrate knowledge of the literature on the topic selected, general mastery of the discipline of linguistics and ability to undertake independent research.
    - b. The Examination Committee will examine the candidate orally, on each paper, within one month of submission. Questioning can be as wide-ranging as the Committee deems necessary to ensure that the student displays a thorough and comprehensive knowledge of the area in question.
    - c. The Examination Committee shall consist of the Head of Department (or delegate) who shall Chair the Committee, the Supervisor, the Dean of Graduate Studies (or delegate), and other members necessary to satisfy General Regulation **Comprehensive Examinations, Ph.D. and Psy.D. Comprehensive Examination, 2.**, who may normally include the members of the Supervisory Committee. If the Head of Department is also a member of the Supervisory Committee, an additional representative of the Department shall be appointed to chair the Examination Committee.
  7. Initially, candidates must obtain approval for their Ph.D. thesis topics from the Graduate Studies Committee of the Department, in consultation with the Supervisory Committee. The thesis topic is normally selected before the end of the second full year in the program. Once the topic is approved, a more detailed thesis proposal must be presented to the Department in both written and oral format, and must receive formal Departmental approval prior to the writing of the thesis.
  8. Proficiency in a language other than the candidate's first language will be required, as demonstrated by a minimum B grade in a second-year language course, or performance satisfactory to the Department in an arranged reading proficiency test. A structural knowledge of a non-Indo-European language is also required, as demonstrated by a minimum B grade in a field methods/language structure course or other performance satisfactory to the Department. Depending on the program, a reading knowledge of one or more additional languages may be required. Students must meet all language requirements before undertaking their comprehensive examinations.
  9. All Ph.D. students are advised to consult the Linguistics department's Graduate Handbook for details on program requirements and for general information relating to the graduate program.

### 32.21.2 Courses

A selection of the following graduate courses will be offered to meet the requirements of students, as far as the resources of the Department will allow. Full information is to be found in the Department's Graduate Brochure.

- 6050-54 Structure of a North American Aboriginal Language (*credit restriction: except where an exemption is supplied by the Head of the Department, a student may not obtain credit for more than one course in the 6050-54 series. Students may not obtain credit for any of the previously offered 6010, 6011, 6020, 6021, 6030, 6031, 6040, 6041 in addition to a course in the 6050-54 series.*)
- 6055-59 Structure of an Uncommonly-Taught Language (*credit restriction: Except where an exemption is supplied by the Head of the Department, a student may not obtain credit for more than one course in the 6055-59 series.*)
- 6100 Issues in Morphosyntax (*credit may not be obtained for both Linguistics 6100 and the former 6001*)
- 6110 Selected Topics in Transformational Grammar
- 6115 Topics in the Syntax of A Selected Language (*prerequisite: 6001 or 6110*)
- 6150 Principles of Language Acquisition
- 6151 Selected Topics in Language Acquisition (*prerequisite: Permission of the instructor*)
- 6200 Phonological Theory
- 6201 Selected Topics in Phonology (*prerequisite: 6200*)
- 6210 Sociolinguistics (*credit restriction: A student may not obtain credit for both 6210 or the former 6211*)
- 6212 Selected Topics in Language and Gender
- 6220 Areal and Temporal Variations in Language
- 6300-09 Special Subjects
- 6350 General Romance Linguistics
- 6390 Franco-Canadian
- 6400 Comparative and Historical Linguistics
- 6401 Morphosyntactic Change (*prerequisite: 6400*)
- 6403 Etymology (*cross-listed as English 6403*)
- 6410 Comparative Structure of a Selected Language Family (*prerequisite: 6011 or 6031 or 6403*)
- 6420 English Dialectology I
- 6421 English Dialectology II
- 6430 Selected Topics in Linguistic Variation (*prerequisite: 6220 or the former 6211*)
- 6500 Field Methods
- 6601 Modern Linguistic Theories

6700 Experimental Phonetics  
 6701 Selected Topics in Experimental Phonetics (*prerequisites: 6200, 6700*)  
 6800 Selected Topics in Morphology  
 6880 Selected Topics in Semantics  
 7000 Seminar in Research Methods  
 7001 Analytical issues in Linguistics  
 7100 Topics in North American Native Languages (*prerequisites: a course from series 6050-6054 or the former 6011, 6031, 6041*)  
 7200 Advanced Topics in Syntax (*prerequisites: 6110, plus either 6001 or 6115*)  
 7400 Seminar in Comparative and Historical Linguistics (*prerequisite: 6400 or 6410*)  
 7430 Seminar in Linguistic Variation (*prerequisite: 6430*)  
 7800 Seminar in Morpho-semantics (*prerequisite: 6800*)  
 7900-03 Special Topics in Linguistics

Note: *Appropriate equivalent credits may be given for courses taken at the Summer Institute of the Linguistic Society of America, or a similar institute. Students are encouraged to attend these institutes. They should, however, consult the Head of the Department as to what courses may be appropriate for credit.*

## 32.22 M.D.-Ph.D.

[www.mun.ca/sgs](http://www.mun.ca/sgs)

1. The M.D.-Ph.D. program is offered by full-time study to highly motivated students with an excellent academic record who wish to obtain an M.D. and a Ph.D., and whose academic excellence, research potential, and the suitability of the proposed research training environment is acceptable to the Program Admissions and Advisory Committee.
2. The purpose of the M.D.-Ph.D. program is to provide medical education, including clinical skills and training in health research.
3. The M.D.-Ph.D. program will be overseen by the Program Admissions and Advisory Committee (P.A.A.C.). The P.A.A.C. will be responsible for the recruitment and oversight of the program of highly qualified trainees.
4. The P.A.A.C. is composed of the M.D.-Ph.D. Program Director(s), a representative from the Faculty of Medicine, one or more faculty members representing the School of Graduate Studies and a senior M.D.-Ph.D student.
5. M.D.-Ph.D students are jointly enrolled in the M.D. program and the Ph.D. program. The student's Ph.D. program is overseen by the administrative Head of the appropriate academic unit in which the student is enrolled. The M.D. program is overseen by the Assistant Dean, Undergraduate Medical Education, Faculty of Medicine.

### 32.22.1 Qualifications for Admission

1. To be admitted into the M.D.-Ph.D. program, applicants must first meet the admission requirements of both the M.D. and Ph.D. programs. Admission to the Ph.D. program shall be by the Dean of Graduate Studies on the recommendation of the Head of the appropriate academic unit. Admission to the M.D. program is by the Dean of Medicine on the recommendation of the Assistant Dean, Admissions, Faculty of Medicine.
2. Normally, students will enter the M.D.-Ph.D. program from the M.D. program after successful completion of the pre-clerkship phase or from the Ph.D. program after one or two years of the graduate program and acceptance into the M.D. program.

### 32.22.2 Program of Study and Research

1. The program of study for the Ph.D. is described in the University Calendar entry for the student's chosen discipline. For the purposes of timing of the comprehensive examination, only the semesters in the Ph.D. component of the program will be counted.
2. The program of study for the M.D. follows the General Regulations governing the M.D. Degree.
3. During the Ph.D. component, students are expected to maintain clinical skills by arrangement with the Assistant Dean, Undergraduate Medical Education, Faculty of Medicine, and will be required to demonstrate competency in clinical skills before resuming full-time studies in the clerkship phase of the M.D. component.
4. During the M.D. component (including the clerkship phase), students, where required, are expected to participate in seminars and journals clubs in their area of research specialization.
5. The Ph.D. will be awarded to students in the M.D.-Ph.D. program on completion of all academic requirements appropriate to the Ph.D. Degree. The M.D. will be awarded to students in the M.D.-Ph.D. program on completion of all academic requirements appropriate to the M.D. Degree.

### 32.22.3 Evaluation

Failure to maintain academic standing in either the Ph.D. or M.D. components will lead to termination of the M.D.-Ph.D. program which will be annotated on the student's transcript. On failure of the M.D. component, the Dean of Graduate Studies may approve transfer to a Ph.D. program on the recommendation of the administrative Head of the appropriate academic unit. On failure of the Ph.D. component, the Dean of Medicine may approve transfer to a M.D. program on the recommendation of the Assistant Dean of Undergraduate Medical Education.

### 32.22.4 Courses

See course listing under the regulations for the relevant Ph.D. program and also for the M.D. program in the General Regulations governing the M.D. degree.

## 32.23 Management

[www.business.mun.ca](http://www.business.mun.ca)

### Professor and Dean

W. Zerbe

The Degree of Doctor of Philosophy in Management is offered in the Faculty of Business Administration. The designation refers to management in the broad context. The Degree will offer specializations corresponding to functional areas in management. The Degree currently is offered with specializations in: (1) operations and information management, and (2) organizational behaviour and human resources management.

The Degree of Doctor of Philosophy in Management is offered by full-time study to qualified candidates. The **General Regulations** of the School of Graduate Studies and the Degree Regulations of the Faculty of Business Administration outlined below, will apply.

### 32.23.1 Admission to the Ph.D. Program

Admission is limited and competitive. General qualifications for admission to the Ph.D. Programs at Memorial University of Newfoundland are set out under **General Regulations, Qualifications for Admission**. Applicants from all disciplines will be considered.

In addition:

1. Quantitative and qualitative competency are required as evidenced by an acceptable balanced GMAT (minimum score of 600) (or a minimum GRE score of 302).
2. An applicant who did not complete a Master's degree at a recognized university where English is the primary language of instruction must normally complete either the: Test of English as a Foreign Language (TOEFL) and achieve a paper-based score of 580 (or higher), computer-based score of 237 (or higher), or Internet-based score of 92-93 (or higher); or International English Language Testing System (IELTS) and achieve a score of 7 (or higher).

Information regarding the TOEFL is available from the Educational Testing Service at [www.ets.org](http://www.ets.org). IELTS information is available at [www.ielts.org](http://www.ielts.org). It is noted that other equivalent tests acceptable to the School of Graduate Studies will also be considered.

### 32.23.2 Supervisory Committee

Until a supervisory committee has been formed, the Ph.D. Program Director will be the designated advisor of each Ph.D. student. Each candidate will have a supervisory committee consisting of three or more members, at least two of whom shall be members of the Faculty of Business Administration. The thesis Supervisor shall be a doctorally qualified faculty member in the Faculty of Business Administration, Memorial University of Newfoundland, having a recent (past five years) research track record suitable to provide research supervision at the Ph.D. level. The supervisory committee will be appointed no later than the end of the first year of studies.

Students are encouraged to find a Supervisor within the first year of the program and, together with the Supervisor, find the remaining committee members by the time all required courses are completed.

### 32.23.3 Components of Study

#### 32.23.3.1 Courses

Students are required to complete successfully a program of courses, normally over the first two years of the program. Students without an adequate background in the functional areas of business may be required to take additional breadth courses. Such determination will be made by the Graduate Research Programs Committee when a student is accepted into the program.

#### Required for all Specializations

Philosophy 6015 Theory of Knowledge

Business 9901 Approaches to Management Research

#### One of

Business 9902 Modelling Methods In Management Research

Business 9903 Quantitative Methods In Management Research\*

Business 9904 Qualitative Methods In Management Research\*\*

Business 9901 is to be completed before any of Business 9902, 9903, 9904 is attempted. In exceptional cases Business 9901 may be completed concurrently with 9902, 9903 or 9904, with approval from the Director of the Program and the Supervisor.

\*Alternatively, students may elect to take an equivalent quantitative methods graduate course on the approval of the Ph.D. Program Director and the Supervisor.

\*\*Alternatively, students may elect to take an equivalent qualitative methods graduate course on the approval of the Ph.D. Program Director and the Supervisor.

Note: *Waivers shall not be granted in the Ph.D. program for previously completed course work at either the undergraduate or master's level.*

#### Operations and Information Management (OIM) Specialization Courses

In addition to the above-noted courses required for all specializations, the following courses are required for the Operations and Information Management specialization.

Business 9910 Optimization

Business 9911 Data and Process Models in Information Systems Development

Business 9912 Probabilistic Models

Business 9913 Human-Computer Interaction and Decision Support Systems

Business 9914 Supply Chains: Models and Management

Business 9915 Electronic Commerce

Business 9917 Special Topics in Operations Management

Business 9918 Special Topics in Information Systems

**Recommended Sequence for Operations and Information Management (OIM) Specialization Table**

Semester	Courses
Year 1 Fall	Philosophy 6015 Theory of Knowledge BUSI 9901 Approaches to Management Research BUSI 9910 Optimization BUSI 9911 Data and Process Models in Information Systems Development
Year 1 Winter	BUSI 9902 (Modelling), 9903 (Quantitative), or 9904 (Qualitative) Methods in Management Research BUSI 9912 Probabilistic Models BUSI 9913 Human-Computer Interaction and Decision Support Systems
Year 1 Spring	Summer Research Project
Year 2 Fall	BUSI 9914 Supply Chain: Models and Management* BUSI 9915 Electronic Commerce** Graduate Program in Teaching (Recommended (non-credit))
Year 2 Winter	BUSI 9917 Special Topics in Operations Management* BUSI 9918 Special Topics in Information Systems**

Notes: 1. \* Students who are planning to specialize in Information Systems can substitute appropriate graduate courses for BUSI 9914 and 9917 on the approval of the Director of the Program and the Supervisor.  
2. \*\* Students who are planning to specialize in Operations Management can substitute appropriate graduate courses for BUSI 9915 and 9918 on the approval of the Director of the Program and the Supervisor.

### Organizational Behaviour and Human Resources Management Specialization Courses

In addition to the above-noted courses required for all specializations, the following courses are required for the Organizational Behaviour and Human Resources Management specialization.

1. Required courses:

Business 9920 Foundations in Organizational Behaviour  
Business 9921 Foundations in Human Resources Management  
Business 9924 Current Issues in Organizational Behaviour  
Business 9925 Current Issues in Human Resources Management

2. Four of:

Business 9922 Foundations in Industrial Relations  
Business 9923 Foundations in Organizational Theory  
Business 9926 Current Issues in Industrial Relations  
Business 9927 Current Issues in Organizational Theory  
Business 9928-9939 Special Topics in Organizational Behaviour/Human Resources Management

Any other graduate course subject to the Director of the Program and the Supervisor

**Recommended Sequence for Organizational Behaviour and Human Resources Management Specialization Table**

Semester	Courses
Year 1 Fall	Philosophy 6015 Theory of Knowledge BUSI 9901 Approaches to Management Research BUSI 9920 Foundations of Organizational Behaviour BUSI 9921 Foundations of Human Resources Management
Year 1 Winter	BUSI 9902 (Modelling), 9903 (Quantitative), or 9904 (Qualitative) Methods in Management Research Business 9924 Current Issues in Organizational Behaviour Business 9925 Current Issues in Human Resources Management
Year 1 Spring	Summer Research Project
Year 2 Fall	Two of: BUSI 9922, 9923, 9926, 9927, 9928-9939** or any other graduate course subject to the approval of the Supervisor (** Offerings subject to scheduling) Graduate Program in Teaching (Recommended (non-credit))
Year 2 Winter	Two of: BUSI 9922, 9923, 9926, 9927, 9928-9939** or any other graduate course subject to the approval of the Supervisor (** Offerings subject to scheduling)

### 32.23.3.2 Summer Research Project

During the first summer in the program, students will complete a research project under the supervision of a qualified faculty member in the area of specialization. Projects must be presented at a Faculty of Business Administration research seminar during the second year of the program.

### 32.23.3.3 Research Seminar Participation

Students are expected to attend research seminars offered by the Faculty of Business Administration in their discipline. Presentation of student conference papers where the Faculty of Business Administration funds travel is expected at a Faculty of Business Administration research seminar. In addition, students may be requested to present their work at other Faculty seminars where and when feasible.

### 32.23.3.4 Comprehensive Examination

Students shall undertake a mandatory written comprehensive examination, following General Regulation **Comprehensive Examinations, Ph.D. Comprehensive Examination**, which sets out the procedures for the comprehensive examination.

In addition:

1. A candidate in the Ph.D. Program in Management shall normally take the written Comprehensive Examination by the end of the seventh semester of the program. The candidate must have successfully completed all required courses prior to writing the Comprehensive Examination. The scope of the Comprehensive Examination will be determined by the Examining Committee (as defined in General Regulation **Comprehensive Examinations, Ph.D. Comprehensive Examination**) under the guidance of the Supervisory Committee.
2. A list of topics/areas for the Comprehensive Examination will be provided to the student no later than three months prior to the date of the examination.
3. The written examination will take place in three phases over a one-week period.
4. Based on the results of the written examination, the Examining Committee may schedule a supplementary oral examination on any topics covered on the written examination. The oral examination request must be made to the Dean within two weeks of completion of the written examination. The oral examination, if any, must take place within six weeks of completion of the written examination.
5. The scheduling of the Comprehensive Examination will be initiated by the student's Supervisor who will notify the Dean of the Faculty of Business Administration or designate. The date of the written examination will be determined by the Dean of the School of Graduate Studies. The student will be provided with written notice of the scheduled dates of the written examinations. In the case of oral examinations, requests will be initiated by the Examining Committee or the student (as described above in 4.) through the School of Graduate Studies.

### 32.23.3.5 Ph.D. Thesis Regulations

1. The candidate must submit a thesis proposal to all members of the Supervisory Committee for evaluation and approval by the end of the eighth semester of the program. Within one month of submitting the proposal, the Candidate will give a public oral presentation of the proposal, attended by the Committee. The presentation will provide the Committee and others in attendance with an opportunity to raise questions about the proposal research. Immediately following the presentation, the Supervisory Committee will meet to assess the proposal. Assessment will result in one of the following three outcomes: (1) accept; (2) accept with changes; or (3) reject. The results of this assessment will be provided to the student following the meeting. Assessments of accept with changes or reject will be accompanied by written comments within one week of the proposal presentation.
2. If the proposal is rejected, the candidate will be permitted a second proposal. This proposal must be submitted and deemed acceptable by the Supervisory Committee within four months of the original proposal presentation. Failure to resubmit within this time period will lead to termination of the candidate's program.
3. The Ph.D. thesis will constitute an independent and original research contribution.
4. The Ph.D. thesis will be evaluated according to the process established in General Regulation **Theses and Reports, Evaluation of Ph.D. Theses** governing the School of Graduate Studies.

## 32.24 Marine Biology

[www.mun.ca/science](http://www.mun.ca/science)

[www.mun.ca/osc](http://www.mun.ca/osc)

### Professor Emeritus and Head of the Department

G.L. Fletcher

The Degree or Doctor of Philosophy (Ph.D) is offered in Marine Biology by full-time and part-time study through the Department of Ocean Sciences. Areas of concentration include: Ocean Ecology, Functional Biology of Marine Organisms, Fisheries and Aquaculture, and Oceans and Environment.

### 32.24.1 Admission and Program of Study

1. Admission into the Ph.D. program in Marine Biology is normally restricted to candidates holding a Master's Degree or its equivalent. In exceptional circumstances, a candidate with a B.Sc. (Honours) Degree who has spent not less than 12 months in an M.Sc. Degree program may be recommended for transfer into a Ph.D. program, provided that the candidate can demonstrate, to the satisfaction of the Department of Ocean Sciences, his/her ability to pursue research at the doctoral level.
2. Each student will be assigned a Supervisory Committee consisting of the Supervisor and at least one other member. Within three months of the first registration in the Ph.D. degree program, a student will meet with his/her Supervisory Committee. Within nine months, the student and the Supervisory Committee will agree on a written thesis proposal outlining the objectives, methods, timetable and funding for the project, and provide the proposal (signed by the student and the supervisory committee) to the Head for inclusion in the student's file.
3. A student is normally required to complete a minimum of 6 credit hours of graduate program courses as follows:
  - Ocean Sciences 7100 or 7200
  - Ocean Sciences 7000 or relevant course as approved by the Supervisory Committee
4. All course requirements should be completed within five semesters from the date of first registration in the Ph.D. program.
5. Normally, upon completion of required course work the student shall undertake a mandatory comprehensive examination, following the **General Regulations, Comprehensive Examinations, Ph.D. and Psy.D, Comprehensive Examination**. The comprehensive examination will be both written and oral. A student should consult the Departmental guidelines for further information and a detailed description of the content of the Comprehensive Examination.
6. The Ph.D. program will conclude with the examination and oral defense of the completed thesis in accordance with the School of Graduate Studies **General Regulations, Theses and Reports**.

### 32.24.2 Courses

A selection of the following graduate courses will be offered to meet the requirements of candidates, as far as the resources of the Department will allow.

OCSC 7000 Graduate Core Seminar (*cross-listed as Biology 7000*)

OCSC 7100 Biological Oceanography (*credit cannot be obtained for both OCSC 7100 and the former Biology/OCSC 7531*)

OCSC 7200 Adaptations to the Marine Environment (*credit cannot be obtained for both OCSC 7200 and the former Biology/OCSC 7561*)

OCSC 7300 Plankton Dynamics (*credit cannot be obtained for both OCSC 7300 and the former Biology/OCSC 7540*)

OCSC 7400 Fisheries Resource Management (*credit cannot be obtained for both OCSC 7400 and the former Biology/OCSC 7551*)

## 32.25 Mathematics and Statistics

www.mun.ca/science

www.mun.ca/math

### Professor and Head of the Department

C. Radford

The degrees of **Master of Applied Statistics** (see appropriate calendar entry), **Master of Science**, and Doctor of Philosophy are offered in the Department of Mathematics and Statistics. The Masters' degrees are offered by full-time and part-time studies. The Department also participates in the interdisciplinary Ph.D. Program in Theoretical Physics.

### 32.25.1 Program of Study

The following regulations should be read in conjunction with the **General Regulations** of the School of Graduate Studies.

1. Candidates shall be assigned a supervisory committee consisting of the Supervisor (or Co-Supervisors) and at least two other members of faculty appointed by the Dean on the recommendation of the Head.
2. A candidate shall complete at least 6 credit hours in graduate courses in the area of specialization. Candidates not holding a Masters Degree shall, in addition, complete, or have already completed successfully, the course requirements for a Memorial University of Newfoundland Master's Degree in mathematics or in statistics, as appropriate. Any candidate may be required to take additional courses.
3. The Comprehensive Examination consists of two parts, called the "qualifying review" and the "intermediate review". Successful completion of both the qualifying and intermediate reviews constitutes successful completion of the Comprehensive Examination in the sense of General Regulation **Comprehensive Examinations**.
  - a. The **qualifying review** consists of written examinations and takes place as soon as the Supervisory Committee deems appropriate, but not later than the end of the candidate's third semester in the doctoral program. Its main purpose is to ensure that the candidate has a reasonably broad general knowledge of mathematics or of statistics, as appropriate.
  - b. The **intermediate review** consists of an oral presentation on the candidate's thesis topic followed by an oral examination based on the presentation although questions of a general nature relating to the field of specialization are also permitted. It must take place no later than the end of the candidate's seventh semester in the doctoral program. Its purpose is to ensure that the candidate has specialized knowledge in his/her chosen area sufficient to do original research of a high level.

More details concerning the Department's comprehensive examinations can be obtained from the Department.

### 32.25.2 Specific Regulations for the Ph.D. in Mathematics

A Masters Degree in mathematics or related area from a recognized university is required for entry into the Ph.D. program. Students currently registered in their first year at Memorial University of Newfoundland's M.Sc. Program in mathematics who have obtained A in at least four program courses are eligible to be transferred into a Ph.D. program. Such transfer must be supported by a prospective Ph.D. supervisory committee as well as the Graduate Studies Committee and approved by the Dean of Graduate Studies. Transferred students shall finish their Masters program courses plus the minimum Ph.D. requirements.

### 32.25.3 Specific Regulations for the Ph.D. in Statistics

A Masters Degree in statistics from a recognized university is normally required for entry into the Ph.D. program. Students currently registered in their first year at Memorial University of Newfoundland's M.A.S. or M.Sc. Program in statistics who have obtained A in at least four program courses are eligible to be transferred into a Ph.D. program. Such transfer must be supported by a prospective Ph.D. supervisory committee as well as the Graduate Studies Committee and approved by the Dean of Graduate Studies. Transferred students shall finish their Masters program plus the minimum Ph.D. requirements.

In addition to general Departmental requirements, each candidate for the Ph.D. in statistics will be required to present at least one paper at a graduate seminar on a topic to be approved by his or her Supervisor.

**Table of Credit Restrictions for Present Mathematics Courses with Former Mathematics Courses**

(Credit may be obtained for only one course from each of the pairs of courses listed in this table.)

Present Course	Former Course	Present Course	Former Course
6323	6030	6212	6080
6321	6032	6310	6130
6322	6035	6330	6200
6340	6040	6331	6210
6341	6041	6332	6350
6342	6042	6312	6500

### 32.25.4 Courses

A selection of the following graduate courses will be offered to meet the requirements of candidates, as far as the resources of the Department will allow.

#### Mathematics

6100 Dynamical Systems

6101 Modern Perturbation Theory

6102 Mathematical Biology

6104 Infinite Dimensional Dynamical Systems

6110 Advanced General Relativity

6111 Calculus in Manifolds

6112-6119 Special Topics in Applied Mathematics

6120 Theoretical Fluid Dynamics

6121 Functional Differential Equations

6130 Introduction to General Relativity  
 6160 Partial Differential Equations  
 6201 Numerical Methods for Partial Differential Equations  
 6204 Iterative Methods in Numerical Linear Algebra  
 6205-6209 Special Topics in Numerical Analysis  
 6210 Numerical Solution of Differential Equations (for Computational Science students only - required core course)  
 6212 Numerical Methods for Initial Value Problems  
 6230 Differentiable Manifolds and Riemannian Geometry  
 6300 Homology Theory  
 6301 Homotopy Theory  
 6302 Theory of Fibre Bundles  
 6304-6309 Special Topics in Topology  
 6311 Complex Analysis  
 6312 Measure Theory  
 6313 Functional Analysis II  
 6315-6319 Special Topics in Analysis  
 6320 Group Theory  
 6321 Ring Theory  
 6322 Nonassociative Algebra  
 6323 Homological Algebra  
 6324-6329 Special Topics in Algebra  
 6330 Analytic Number Theory  
 6331 Algebraic Number Theory  
 6340 Graph Theory  
 6341 Combinatorial Design Theory  
 6342 Advanced Enumeration  
 6343-6349 Special Topics in Combinatorics

#### Statistics

6500 Probability (*credit restricted with former 6586*)  
 6503 Stochastic Processes  
 6505 Survival Analysis  
 6520 Linear Models  
 6530 Longitudinal Data Analysis  
 6540 Time Series Analysis  
 6545 Statistical Computing  
 6550 Nonparametric Statistics  
 6561 Categorical Data Analysis  
 6563 Sampling Theory  
 6571 Financial and Environmental Time Series  
 6573 Statistical Genetics  
 6570-6589 Selected Topics in Statistics and Probability (excluding 6571, 6573, 6586)

Notice that, although the courses 6310, 6332, 6351, 6510 and 6560 cannot be used to fulfill the 6 credit hours graduate courses requirement, any of them can be listed as part of the program of study as additional course work, whenever the supervisory committee deems it appropriate.

### 32.25.5 Specific Regulations for the Ph.D. in Theoretical Physics

The **Ph.D. in Theoretical Physics** is an interdisciplinary program offered jointly with the Department of Physics and Physical Oceanography. The regulations for this program are described under the **Regulations Governing the Degree of Doctor of Philosophy - Theoretical Physics**

### 32.26 Medicine

[www.med.mun.ca](http://www.med.mun.ca)

#### Professor and Dean

J. Rourke

The Faculty of Medicine offers the degree of Doctor of Philosophy in seven program areas: Cancer and Development, Cardiovascular and Renal Sciences, Clinical Epidemiology, Community Health, Human Genetics, Immunology and Infectious Diseases and Neurosciences. Each program area has a Co-ordinator who is responsible for communicating the interests of the program to the Faculty of Medicine Graduate Studies Committee and participate in the admission of graduate students into the graduate program in Medicine. The Faculty of Medicine also offers the opportunity for students registered in the Doctor of Medicine (M.D.) program to obtain a Ph.D. in a combined and integrated M.D.-Ph.D. program.

#### 32.26.1 Qualifications for Admission

The admission requirements for the Ph.D. are as given under the **General Regulations** governing Ph.D. degrees.

#### 32.26.2 Program of Study and Research

1. The program of study for a Ph.D. Degree is the responsibility of the supervisory committee composed of a Supervisor and at least two other faculty members.
2. It is the responsibility of the supervisory committee to meet regularly (at least annually) with the student and to provide guidance at all stages of the candidate's program. An annual report prepared by the Supervisor and signed by the student and all members of the committee is required to be submitted to the Assistant Dean of Research and Graduate Studies (Medicine).
3. Graduate Students are expected to participate in Faculty of Medicine seminars and journal clubs, for some of the program areas these are available as required courses.
4. Course requirements are set by each of the program areas and are described under Program Requirements. Some supervisory committees may require some students to successfully complete specified course work.
5. Graduate Students in the Ph.D. degree are required to successfully complete the comprehensive examination before the end of the

seventh semester. The comprehensive examination consists of both written and oral components and is in accordance with the **General Regulations** governing Ph.D. degrees.

6. Graduate students in the Ph.D. degree must complete an original piece of research, a written dissertation which must be successfully defended in an oral examination in accordance with the **General Regulations** governing Ph.D. degrees.

### 32.26.2.1 Program Areas

#### 1. Cancer and Development

- a. The graduate program in Cancer and Development offers study in fundamental cell and molecular biological areas including viral oncogenesis, growth factors and oncogenes in developmental models, programmed cell death and drug resistance.
- b. Program Requirements: Students are required to participate in the Seminar Series (MED 6410, 6411, 6412, 6413).

#### 2. Cardiovascular and Renal Sciences

- a. The graduate program in Cardiovascular and Renal Sciences enables students to pursue research and academic studies in selected topics including hypertension and stroke, neural and endothelial control of vasculature and blood pressure as well as physiological mechanisms promoting heart failure.
- b. Program Requirements: Students are required to successfully complete MED 6140 if this course has not been previously taken. Students are required to present their thesis research to the Cardiovascular and Renal Sciences group.

#### 3. Clinical Epidemiology

- a. The program in Clinical Epidemiology is aimed at university graduates intending a career in health services, faculty members seeking advanced training in clinical epidemiology, medical doctors, and other health care professionals interested in health research.
- b. Program Requirements: Students are required to successfully complete the following courses if they have not been previously completed: MED 6262, MED 6250, MED 6255, and MED 6260 plus a minimum of one elective. Electives are normally chosen from MED 6095, MED 6263 and MED 6265 or as recommended by the supervisory committee and approved by the Director or Coordinator. Students are required to take the Ph.D. Seminar Series (MED 6410, 6411, 6412, 6413). MED 6250 and MED 6262 are normally completed in the Fall semester. MED 6255 and MED 6260 are normally completed in the Winter semester. The supervisory committee, with the approval of the Director or Coordinator, can recommend an alternate program of study. Students are expected to give an oral presentation or course lecture in each year of their program.

#### 4. Community Health

- a. The graduate program in Community Health enables students to pursue research and academic studies in selected topics. Students may specialize in one of the following three streams: epidemiology and biostatistics; health services and policy research; or social justice and equity in health.
- b. Program Requirements: Coursework as defined by the Supervisory Committee and this would normally include the Ph.D. Seminar Series (MED 6410, 6411, 6412, 6413).

#### 5. Human Genetics

- a. The graduate program in Human Genetics will enable students to pursue academic studies and research in a number of areas of genetics including cancer genetics, genomics, genetics of complex traits, genetic epidemiology, gene mapping, medical genetics, birth defects, and population genetics. Faculty members from all three divisions of the Faculty of Medicine (Biomedical Sciences, Community Health and Clinical Sciences) participate in the program.
- b. Program Requirements: Students are required to take the Genetics Seminar Series (MED 6410, 6411, 6412, 6413).

#### 6. Immunology and Infectious Diseases

- a. The Immunology and Infectious Diseases group has an interdisciplinary character and consists of faculty from biomedical science. The graduate programs are designed to provide individualized training oriented towards basic research and a solid scientific background in the discipline of immunology and infectious diseases.
- b. Students are required to successfully complete two courses if they have not been previously completed: MED 6127 is required and the students will choose one course from MED 6114, MED 6119, MED 6128, MED 6580, or any other graduate course approved by the student's supervisory committee. Some students may be required to take additional courses depending upon their thesis topic. Students are required to attend, for credit, and participate in the Immunology and Infectious Diseases Seminar Program (MED 6410, 6411, 6412, 6413).

#### 7. Neurosciences

- a. The Neuroscience Program offers graduate studies in an interdisciplinary setting with the core faculty in the Division of BioMedical Sciences. Graduate students may pursue research in a number of specialty areas including the physiological basis of learning and memory, stroke and neuroplasticity, neuroregeneration, signal transduction mechanisms, neuronal circuitry, neuroimmunology, and membrane physiology.
- b. Program Requirements: Normally students in the Ph.D. program are required to complete two graduate level courses in Neuroscience, one of which is to be Systems Neuroscience (MED 6196). Course selection is made on the recommendation and advice of the supervisory committee. Students are expected to attend and participate in the activities of the neuroscience group including the weekly seminar and journal club.

### 32.26.2.2 Courses

For a list of courses offered by the Faculty of Medicine refer to **Courses** offered for the Master of Science in Medicine.

## 32.27 Nursing

[www.mun.ca/nursing](http://www.mun.ca/nursing)

### Professor and Dean

A. Gaudine

The degree of Doctor of Philosophy (Ph.D.) is offered in Nursing in areas reflective of the strength and expertise of current faculty members in the School of Nursing. All candidates will be required to attend as full-time students during the first six semesters (two academic years) of the program.

The following regulations must be read in conjunction with the **General Regulations** of the School of Graduate Studies.

### 32.27.1 Qualifications for Admission

1. Admission to the program is limited and competitive.
2. To be considered for admission an applicant must normally hold a Master of Nursing degree or equivalent from a recognized university and have a strong academic record.
3. Applicants must have completed either a graduate level course(s) in research that included both qualitative and quantitative approaches with some advanced statistical analysis in the quantitative work, or a graduate level statistics course.
4. Applicants must hold an active practicing license from the Association of Registered Nurses of Newfoundland or must be currently registered as a practicing nurse in another Canadian jurisdiction. Applicants from other countries who do not meet the above criteria will be assessed on an individual basis and must submit proof of registration as a practicing nurse (or an equivalency) from their country or jurisdiction.
5. Applicants must submit a statement about a research focus that is compatible with expertise within the current faculty of the School of Nursing.

### 32.27.2 Program of Study

1. A Supervisory Committee shall be appointed for each candidate in accordance with **General Regulations, Supervision** of the School of Graduate Studies.
2. Candidates normally be required to successfully complete a minimum of 18-credit hours of program courses as follows: Nursing 7011, Nursing 7012, Nursing 7100, Nursing 7101, one of Nursing 7200-7210 (or another approved research course at the doctoral level), and one of Nursing 7300-7310 (or another approved course at the doctoral level in the area of the student's research interest). All courses will normally be completed within the first two semesters of the program.
3. Candidates will normally be required to complete a minimum of two mandatory, non-credit internships/institutes during the first two years of the program. The internships/institutes are designed to provide an opportunity for students to gain substantive knowledge of, and engage in, collaborative research and/or teaching. An internship/institute will be selected based on the student's area of interest and learning needs and will have a set or negotiated time limit during a semester depending on the nature and scope of the work.
4. Candidates will be required to participate in graduate seminars of 2 hours per week in the Fall and Winter semesters in each of the first two academic years of the program.
5. Candidates must develop and maintain a professional portfolio that includes experience in research, teaching, and academic and professional service.
6. Candidates shall submit to a comprehensive examination in accordance with **General Regulations, Comprehensive Examinations** of the School of Graduate Studies. The Comprehensive Examination will consist of a written component and an oral component. The examination will normally be scheduled in the first semester of the second year of the program, but no later than the end of the student's seventh semester in the program.
7. Candidates must submit a written thesis proposal for presentation to the School, normally within six weeks of completion of the comprehensive examinations, but no later than the end of the fifth semester of the program.
8. Candidates must submit a thesis, examined and defended in accordance with **General Regulations, Theses and Reports** of the School of Graduate Studies.
9. Candidates are required to spend a minimum of six semesters (two academic years) of full-time study in residence.
10. In keeping with the **General Regulations, Period of Study** for the School of Graduate Studies, the time limit to complete the degree is seven years.

### 32.27.3 Courses

A selection of the following courses will be offered to meet the requirements of candidates, as far as the resources of the School of Nursing will allow.

7011 Nursing: The Science

7012 Nursing: The Profession

7100 Nursing Research 1: Conceptualizing Research

7101 Nursing Research 2: Conducting Research

7200-7210 Reading Courses in Research Methodology

7300-7310 Reading Courses in a Substantive Area for Research

## 32.28 Pharmacy

[www.mun.ca/pharmacy](http://www.mun.ca/pharmacy)

### Dean

to be determined

The Degree of Doctor of Philosophy in Pharmacy is offered to qualified candidates normally by full-time study. The **General Regulations** of the School of Graduate Studies of Memorial University of Newfoundland outlined in the current Calendar, and the Degree Regulations of the School of Pharmacy outlined below will apply. Every candidate in graduate studies shall comply with the **General Regulations**, Degree Regulations and all additional requirements of the School of Pharmacy.

### 32.28.1 Qualifications For Admission

1. Admission to the Ph.D. program is limited and competitive. Applicants must have completed an M.Sc. Degree in Pharmacy, or its equivalent in a related discipline, from a university of recognized standing.
2. Other students may be considered for admission to a Ph.D. provided that they have been registered in a M.Sc. Pharmacy program for a minimum of 12 months, and have demonstrated to the satisfaction of the Graduate Studies Committee of the School of Pharmacy an ability to pursue research at the doctoral level. Students wishing to transfer from the M.Sc. to the Ph.D. will have completed 6 credit hours. Prior to admittance to the Ph.D. program, a written thesis proposal will be submitted for assessment by the Supervisory Committee plus one additional faculty member. The recommendation of this Committee will be forwarded to the Graduate Studies Committee of the School of Pharmacy.
3. On admission to the program, a Supervisory Committee shall be appointed in accordance with General Regulation **Supervision** governing the School of Graduate Studies.

### 32.28.2 Program of Study and Research

1. As a minimum, each candidate shall successfully complete 6 credit hours as well as Pharmacy 6999 (Pharmacy Research Seminar). A minimum grade of 65% will be required in each course. Candidates shall complete additional undergraduate courses in Pharmacy or other related areas where the Supervisory Committee considers there to be a deficiency in the academic record. Candidates may select these courses in consultation with the Supervisory Committee. However, it will be the primary responsibility of the Supervisory Committee to ensure that deficiencies in the academic record are rectified.
2. All candidates must submit a thesis proposal to the Supervisory Committee for approval no later than the second semester of study after admission to the program.
3. All candidates must complete a comprehensive examination on or before the end of the sixth semester of study after admission to the program. The comprehensive examination will consist of two components: a written examination and an oral examination. The oral examination will normally be held no later than two weeks after successful completion of the written examination.
4. A Comprehensive Examination Committee shall be appointed in accordance with General Regulation **Comprehensive Examination**. The Committee will be responsible for preparing the questions for the written and oral examinations and evaluating the candidate's performance in the subject area. The Committee will consist of the Dean of Graduate Studies (or delegate), the Supervisor, and three other members, one of whom may be a member of the Supervisory Committee. All shall be voting members of the Committee except the Dean of Graduate Studies (or delegate).
5. Successful completion of the Ph.D program will require formal examination of the written thesis and an oral defence of the research, as prescribed in the General Regulation **Theses and Reports**. Final approval of the thesis shall be the responsibility of the School of Graduate Studies.

### 32.28.3 Courses

A selection of the following graduate courses will be offered to meet the requirements of candidates as far as the resources of the School will allow. Permission of the instructor and the Graduate Studies Committee of the School of Pharmacy is required for admission to any graduate Pharmacy course.

6000 Medicinal Chemistry  
 6001 Advanced Physical Pharmacy  
 6002 Dosage Form Design and Novel Drug Delivery Systems  
 6003 Pharmacokinetic Modelling  
 6004 Principles of General Pharmacology  
 6005 Toxicology of Therapeutic Agents and Chemicals  
 6100-6108 Special Topics in Pharmacy  
 6999 Pharmacy Research Seminar

## 32.29 Philosophy

[www.mun.ca/hss](http://www.mun.ca/hss)

[www.mun.ca/philosophy](http://www.mun.ca/philosophy)

### Professor and Head of the Department

S. McGrath

The degree of Doctor of Philosophy (Ph.D.) is offered in Philosophy by full-time study only. Graduate courses are taught as small seminars and directed reading courses. Program candidates must spend a minimum of two years in residence at this institution.

### 32.29.1 Program of Study

1. The Ph.D. in Philosophy is offered in accordance with the **General Regulations** of the School of Graduate Studies. Doctoral candidates will specialize in one or more of three departmental research clusters:
  - Metaphysics and its History
  - Kant and Continental Philosophy
  - Ethics, Social and Political Philosophy
2. To be considered for admission to the program an applicant must have completed a Master of Arts Degree in Philosophy or hold an equivalent qualification.
3. All candidates are required to complete 15 credit hours in graduate courses selected from the **Courses** listed below and including

the following:

- Philosophy 6000
  - Four additional courses (12 credit hours) only one of which (3 credit hours) may be a directed reading courses. Courses will be selected by the candidate in consultation with the candidate's Supervisory Committee.
4. Proficiency in a second language is required since it is necessary for the purpose of the proposed doctoral research. The selection of a second language is based upon the student's research requirements, and the selection is to be made in consultation with the student's faculty advisor or supervisor. Confirmation that the choice is acceptable must be obtained from the department. Demonstration of proficiency will be determined in accordance with the governing general regulation of the School of Graduate Studies (**General Regulations, Evaluation, Evaluation of Graduate Students**). If a student is working in recent Anglo American philosophy, then the student can opt, with the permission of the Graduate Studies Committee, to complete an examination in philosophical logic. The language requirement must normally be fulfilled before a student takes the Ph.D. comprehensive examination.
  5. The Ph.D. Comprehensive Examination shall be administered and evaluated in accordance with **General Regulations, Comprehensive Examinations**. The examination shall consist of three written parts: a four-hour examination in the student's area of concentration and two three-hour examinations in two of the Department's research clusters (Metaphysics and its History, Kant and Continental Philosophy, and Ethics and Social and Political Philosophy).
  6. No more than seven semesters after having been admitted to the program the candidate must submit a thesis proposal that is considered satisfactory by the supervisory committee.
  7. Students must submit and successfully defend a thesis in accordance with the School of Graduate Studies general regulations governing **Theses and Reports**.

### 32.29.2 Courses

A selection of the following graduate courses will be offered to meet the requirements of candidates, as far as the resources of the Department will allow.

6000 Graduate Seminar

#### History of Philosophy Seminars

6011 Ancient and Medieval Philosophy

6012 Modern Philosophy

6013 Contemporary Philosophy

#### Area Seminars

6014 Metaphysics

6015 Theory of Knowledge

6016 Ethical and Political Theory

#### Tutorials

6040-6099 Special Topics

6101 Selected Texts

6102 Current Issues

### 32.30 Physics and Physical Oceanography

[www.mun.ca/science](http://www.mun.ca/science)

[www.mun.ca/physics](http://www.mun.ca/physics)

#### Professor and Head of the Department

B. de Young

The following Departmental Regulations are supplementary to the **General Regulations** governing the M.Sc. and Ph.D. degrees. A thorough familiarity with the latter Regulations should be regarded as the prerequisite to further reading in this section.

The Department of Physics and Physical Oceanography compiles, and regularly reviews, a brochure which contains reasonably detailed descriptions of currently active research projects, as well as a comprehensive listing of recent research publications, and other material which may be of interest to prospective graduate students.

#### 32.30.1 Program of Study

The Degree of Doctor of Philosophy (Ph.D.) is offered in Atomic and Molecular Physics, in Physical Oceanography, in Condensed Matter Physics, and in Theoretical Physics.

1. A program of study for the Ph.D. Degree in Atomic and Molecular Physics, Condensed Matter Physics or Physical Oceanography shall normally include a minimum of 9 graduate credit hours, beyond those required for the M.Sc. Degree. However, depending on the student's background and area of specialization, more or fewer graduate and/or undergraduate courses may be required.
2. A Comprehensive Examination (as prescribed under General Regulation **Comprehensive Examinations**) shall be an oral one, and may include the presentation of a written research proposal.
3. The **Ph.D. Program in Theoretical Physics** is an interdisciplinary program offered jointly with the Department of Mathematics and Statistics. The regulations for this program are described under the **Regulations Governing the Degree of Doctor of Philosophy - Theoretical Physics**

#### 32.30.2 Courses

A selection of the following graduate courses will be offered to meet the requirements of candidates, as far as the resources of the Department will allow.

6000 Condensed Matter Physics I

6001 Condensed Matter Physics II

6002 Superconductivity

6003 Path Integral Techniques in Condensed Matter Physics

6010-19 Special Topics in Condensed Matter Physics

6040 Biophysics

6060-69 Special Topics in Interdisciplinary Areas

6200 Nonlinear Dynamics

6308 Ocean Dynamics I  
 6309 Ocean Dynamics II  
 6310 Physical Oceanography  
 6313 Physical Fluid Dynamics  
 6314 Field Oceanography  
 6315 Polar Oceanography  
 6316 Ocean Measurements and Data Analysis  
 6317 Ocean Acoustics  
 6318 Numerical Modelling  
 6319 Climate Dynamics  
 6320 Turbulence  
 6321 Coastal Oceanography  
 6322 Stratified Fluids  
 6323 Stability Theory  
 6324 Models in Ocean Ecology  
 6360-69 (excluding 6363) Special Topics in Physical Oceanography  
 6363 Laboratory Experiments in Geophysical Fluid Dynamics  
 6400 Statistical Mechanics  
 6402 Theory of Phase Transitions  
 6403 Stochastic Processes, Time-Dependent and NonEquilibrium Statistical Mechanics  
 6502 Electrodynamics  
 6720 Theory of Molecules  
 6721 Molecular Spectroscopy
